The University of Texas at Arlington Online University Catalog is the official catalog of the University, and takes precedence over any previously printed or online catalog. This version of the catalog was published in June of 2015, and supersedes the previously published 2014-2015 catalog. Students are governed by the catalog under which they were enrolled or, at a student's option, the catalog of any subsequent year in which that student was in residence. Please refer to the academic requirements and procedures sections for more information.

The University Catalog is a general information publication only. The University Catalog is not intended to nor does it contain all regulations that relate to students. The provisions of this catalog do not constitute a contract, express, or implied, between any applicant, student or faculty/staff member and The University of Texas at Arlington or The University of Texas System. The University reserves the right to withdraw courses at any time, change fees, rules, calendar, curriculum, degree programs, degree requirements, graduation procedures and any other requirements affecting students. Changes will become effective whenever the proper authorities so determine and will apply to both prospective students and those already enrolled.

Students are held individually responsible for complying with all requirements of the rules and regulations of the University and the Board of Regents of The University of Texas System. Failure to read and comply with policies, regulations and procedures will not exempt a student from being governed by and accountable to them. Many departments and programs issue program manuals, procedures and policy manuals, student handbooks and other informational publications for students and faculty in its programs. These publications provide detailed and useful information; however, they are not statements of official policy or binding contracts of The University of Texas at Arlington or of The University of Texas System. In all matters, the Rules and Regulations of the Board of Regents of The University of Texas System, the Handbook of Operating Procedures of The University of Texas at Arlington, and the University Catalog of The University of Texas at Arlington shall supersede departmental, program or college publications.

Available Formats

The University Catalog is available in an online format only. This is part of the Mavericks Go Green Campus Sustainability program (<http://www.uta.edu/sustainability>). Many of our previous catalogs are still available online. Catalogs that are no longer online are still available through the University Archives (<http://www.uta.edu/library/spco/universityarchives.php>).

The University of Texas at Arlington

University Profile

The University of Texas at Arlington is a Carnegie Research Institution (High Research Activity) whose mission is the advancement of knowledge and the pursuit of excellence in research, teaching, and service to the community. The mission statement affirms UT Arlington's commitment to expanding academic research; to attracting and retaining high quality faculty scholars who actively engage students; to providing a well-rounded academic experience that promotes student involvement, service learning, and free discourse; to employing alternative access venues to meet students' needs; and to developing public and private partnerships.

Founded in 1895 as a private liberal arts institution, UT Arlington has evolved through a succession of names and missions. The institution achieved senior college status in 1959 and became part of The University of Texas System in 1965. The government of UT Arlington is vested in a nine-member Board of Regents of The University of Texas System, nominated by the governor and approved by the Senate. The Office of the Chancellor is the chief administrative office of The University of Texas System and is located in Austin. The chief administrative officer of UT Arlington is the University president, under the authority of the Office of the Chancellor of the UT System and the Board of Regents. A complete statement of the authority and duties of the Regents and of the several officers, together with an account of the organization of the system, is published in the Rules and Regulations of the Board of Regents of The University of Texas System.

Authorized by the Texas Higher Education Coordinating Board, UT Arlington offers 81 baccalaureate, 71 master's, 30 doctoral degree programs, and 1 professional program.

The University of Texas at Arlington is accredited by the Southern Associate of College and Schools Commission on Colleges (<http://www.sacscoc.org/pdf/2012PrinciplesOfAcreditation.pdf>) to award baccalaureate, master's, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of The University of Texas at Arlington.

In addition, many of UT Arlington's academic departments and schools have received national accreditation from specific agencies. These accreditations are detailed under the individual listings for departments and schools in this catalog.

UT Arlington currently serves 34,870 students, including 9,134 graduate students. Our student body is drawn from almost every state in the United States and more than 100 countries. The average age of all students in fall 2012 was 27, while the average age of all graduate students was 30. UT Arlington's student population is becoming more traditional and residential. The size of the incoming freshman class for fall 2013 was more than 3,900. Approximately 58 percent of our students are enrolled full-time. Since becoming a degree-granting institution at the baccalaureate, master's, and doctoral levels, UT Arlington has awarded more than 158,400 degrees with 9,221 of those degrees awarded during the 2011-12 academic school year.

UT Arlington is categorized as a "selective" institution by U.S. News & World Report. In fall 2011, 69 percent of first-time freshman applicants were accepted and 77 percent of graduate applicants were accepted. More than 22 percent all fall 2011 first-time undergraduate students ranked in the top 10 percent of their graduating high school class.

UT Arlington is one of the most ethnically diverse campuses in the United States, according to rankings of national universities published by U.S. News & World Report in September 2013. In fall 2012, the student population was 22 percent Hispanic, 15 percent African American, 10 percent Asian, 11 percent international, and 0.2 percent Native American. It is estimated that the Hispanic student population will be UT Arlington's fastest growing student segment in the coming decades.

In response to societal needs, UT Arlington has evolved into a renowned university within the state and one of emerging position nationally and internationally. The University's history of achievement can be attributed to its outstanding faculty; a strong student body; a record of success by graduates in their respective fields; and the growth of the Dallas/Fort Worth area as a nationally and internationally significant metropolis.

The University of Texas at Arlington is a comprehensive research, teaching, and public service institution whose mission is the advancement of knowledge and the pursuit of excellence. It is committed to the promotion of lifelong learning through its academic and continuing education programs and to the formation of good citizenship through its community service learning programs. The diverse student body shares a wide range of cultural values and the University community fosters unity of purpose and cultivates mutual respect.

As a University, we affirm our commitment to the following objectives:

- The University is committed to comprehensive programs of academic research. This research effort requires attracting and retaining scholars who promote a culture of intellectual curiosity, rigorous inquiry, and high academic standards among their fellow faculty and the students they teach.
- The University values intellectual discovery not only as a manifestation of advancing human knowledge for its own sake but also as a vital prerequisite for fostering innovation, developing and transferring new technologies, and supporting the commercialization of products and services that enhance the standard of living and quality of life of the region, the state, the nation and the world.
- The University prepares students for full, productive lives and informed and active citizenship. To that end, we have developed undergraduate and graduate curricula and classroom practices that engage students actively in the learning process. Outside the classroom a wide range of student organizations and activities contribute to the learning environment. Our service learning program offers students the opportunity to supplement their

academic study with internships in a variety of community settings, testing their skills and aptitudes and challenging their values. State-of-the-art teaching technologies, distance education, and off-site instruction afford access to off-campus as well as traditional students. Non-degree certificate and continuing education programs offer practical, aesthetic, and intellectually stimulating opportunities for community learners, for individual courses or a sustained program of study.

- The University's mission can be achieved only when its students, faculty, staff, and administrators value and promote free expression in an atmosphere of tolerance, responsibility, and trust. The University regards these attributes as prerequisites for any community of learners and vigilantly strives to maintain them.
- Mindful of its role as a resource to the community, locally, nationally, and internationally, the University continually seeks partnerships with public and private concerns in order to advance the economic, social, and cultural welfare of its constituencies. We serve the needs of the North Texas community by sponsoring public lectures and academic symposia, as well as artistic, musical, and dramatic productions.

Non-Discrimination Policy and Procedure

It is the policy of The University of Texas at Arlington that no person shall, on the basis of race, color, national origin, religion, age, sex, sexual orientation, disabilities, genetic information, and/or veteran status, be denied employment with or admission to the University; or be excluded from participation in, denied the benefits of, or subject to discrimination under, any program or activity that the University sponsors or conducts. Retaliation against persons who oppose a discriminatory practice, file a charge of discrimination, or testify for, assist in, or participate in an investigative proceeding relating to discrimination is prohibited. Constitutionally-protected expression will not be considered discrimination or harassment under this policy.

The University of Texas at Arlington complies with the Equal Pay Act of 1963, Titles VI and VII of the Civil Rights Act of 1964, Executive Order 11246, the Age Discrimination in Employment Act of 1967, Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, the Uniformed Services Employment and Reemployment Rights Act of 1994, Title II of the Genetic Information Nondiscrimination Act of 2008, the Vietnam Era Veterans' Readjustment Act of 1974, the Texas Commission on Human Rights Act and their subsequent amendments, as well as other applicable federal and state laws and regulations, the Rules and Regulations of the Board of Regents of The University of Texas System, and policies and standards issued by The University of Texas System Administration.

This policy applies to all students and employees of the University, to visitors to the University, and to applicants for admission to or employment with the University. For further details, including definitions, complaint procedures, and contact information, please review the University policy Procedure 14-2 (<https://www.uta.edu/policy/procedure/14-2>).

Sexual Harassment and Misconduct, and Consensual Relationships Policy

The University of Texas at Arlington is committed to an academic and working environment free from inappropriate conduct of a sexual nature. Sexual harassment and misconduct is prohibited and will be in violation of this policy. Sexual harassment is a prohibited practice for employees under Title VII of the 1964 Civil Rights Act as amended by the Equal Employment Opportunity Act of 1973 and the Texas Commission on Human Rights Act, and under Title IX of the Education Amendments of 1972 for students. The university will take prompt disciplinary action against any individuals on this campus who engage in actions that violate this policy.

This policy and its complaint procedures apply to all administrators, faculty, staff, students, visitors, and applicants for employment or admission. It is also applicable regardless of the gender of the complainant or the alleged harasser. For further details, including definitions, complaint procedures, and contact information, please review the University policy Procedure 14-1 (<https://www.uta.edu/policy/procedure/14-1>).

University Requirements & Policies

Students are held individually responsible for complying with all requirements of the rules and regulations of the University and the Board of Regents of The University of Texas System. Failure to read and comply with policies, regulations and procedures will not exempt a student from being governed by and accountable to them. Many departments and programs issue program manuals, procedures and policy manuals, student handbooks and other informational publications for students and faculty in its programs. These publications provide detailed and useful information; however, they are not statements of official policy or binding contracts of The University of Texas at Arlington or of The University of Texas System. In all matters, the Rules and Regulations of the Board of Regents of The University of Texas System, the Handbook of Operating Procedures of The University of Texas at Arlington, and the University Catalog of The University of Texas at Arlington shall supersede departmental, program or college publications.

Academic Standing

Academic standing is determined by students meeting departmental and University standards as described in the following sections.

- Undergraduate Academic Standing
- Graduate Academic Standing

Good Academic Standing is defined differently for graduate and undergraduate students and may affect a student's ability to register for a subsequent term, ability to receive scholarships, fellowships or assistantships, and eligibility for graduation.

Classification

Students at UT Arlington are classified in accordance with the number of hours earned. Hours earned are interpreted as hours passed at UT Arlington plus hours accepted in transfer from other institutions and/or credit by examination.

- Freshman: One who has earned fewer than 30 hours.
- Sophomore: One who has earned 30 hours but fewer than 60 hours.
- Junior: One who has earned 60 hours but fewer than 90 hours.
- Senior: One who has earned 90 hours or more.
- Degreed: One who has earned a bachelor's degree or higher and is enrolled as an undergraduate.
- Masters Student: One who is enrolled in a master's degree program.
- Doctoral Student: One who is enrolled in Doctor of Philosophy (Ph.D.) degree program.

Academic standing regulations apply to all undergraduate students. Additional regulations may apply to provisionally- and conditionally-admitted students until they have met the requirements for regular admission.

Academic standing is determined when grades are reported at the end of each fall and spring term and at the end of the entire summer session. A student's cumulative grade point average may change between these grade-reporting periods (e.g., by recording a final grade in place of an incomplete, or another grade change), and the student's academic standing status may change when the grade change is processed.

Academic standing is differentiated from Satisfactory Academic Progress (p. 21), and from Scholastic Dishonesty (p. 79) which are discussed elsewhere in this catalog.

Good Standing

Academic good standing for undergraduates studying at UT Arlington is defined as a cumulative University grade point average of 2.00 or higher. A University GPA of at least 2.00 is necessary for satisfactory progress toward a degree.

Table of Academic Standards for Continuance

An undergraduate student must maintain a minimum cumulative grade point average (GPA) at UT Arlington to remain academically eligible to register for the subsequent term or session. The minimum average required varies with the total number of college credit hours attempted at UT Arlington and is shown in the Table of Academic Standards.

TABLE OF ACADEMIC STANDARDS

Total College Hours Undertaken	UTA GPA for Academic Probation	UTA GPA for Academic Warning and Dismissal
0-29	less than 2.00	less than 1.60
30-59	less than 2.00	less than 1.80
60 or more	less than 2.00	less than 2.00

Academic Probation

See the Table of Academic Standards column “UTA GPA for Academic Probation” above. Undergraduate students on academic probation may not take more than 14 semester hours without permission of their college/school dean, or if they are an undeclared or freshman student, the Director of the University Advising Center. Academic advisors may further limit the number of hours and overall difficulty of the students’ schedules, require students to take specific courses deemed necessary to their education, prevent students from taking unsuitable courses, require students to attend advising sessions, and take other actions approved by the dean of their college/school or the Director of the University Advising Center to assure the students’ attention to their academic deficiencies. Students on academic probation cannot hold office in any club or organization, represent UT Arlington at any official or social event, or make any University trip without the permission of the appropriate dean or the University Advising Center.

Removal from Academic Probation

Students on academic probation who achieve a 2.0 or higher cumulative GPA at the end of a grade-reporting period during which they are registered at the University will be removed from academic probation. Removal from probation will be reflected on the student’s permanent academic record.

Academic Warning

See the Table of Academic Standards column “UTA GPA for Academic Warning and Dismissal” above. Before an undergraduate student is dismissed from the University, the student is on academic warning. At the end of the warning term, the student must earn a cumulative GPA that meets or exceeds the appropriate values in the Table of Academic Standards or a term GPA of at least 2.5 to avoid dismissal. Students on academic warning may not take more than 14 semester hours without permission of their college/school dean, or if they are an undeclared or freshman student, the Director of the University Advising Center. Academic advisors may further limit the number of hours and overall difficulty of the students’ schedules, require students to take specific courses deemed necessary to their education, prevent students from taking unsuitable courses, require students to attend advising sessions, and take other actions approved by the dean of their college/school or the Director of the University Advising Center to assure the students’ attention to their academic deficiencies. Students on academic warning cannot hold office in any club or organization, represent UT Arlington at any official or social event, or make any University trip without the permission of the appropriate dean or the University Advising Center.

Academic Continuance

After receiving an academic warning, undergraduate students who earn a GPA of 2.5 or higher on a minimum of three semester credit hours each subsequent term are given a one-semester continuance.

Academic Dismissal

See the Table of Academic Standards column “UTA GPA for Academic Warning and Dismissal” above. Any student who registers to attend classes at UT Arlington and is ineligible to attend for academic or disciplinary reasons will be dropped automatically from the rolls of the University. Undergraduate students placed on academic dismissal for the first time are eligible to continue enrollment after not having attended UT Arlington for one regular term (fall or spring). Students placed on academic dismissal for a second or subsequent time are eligible to apply for readmission after having not attended UT Arlington for a minimum 12-month period. After this time period, students may be required to petition for reinstatement from the University College Readmission Committee administered through the University Advising Center. If the petition for reinstatement is disapproved, a student may not file another petition until the following term. Appeal of a denial for reinstatement may be made to the Office of the Vice Provost for Academic Analytics and Operations within two weeks after the notice of the denial is mailed. The decision of the Office of the Vice Provost is final. After returning from a one- or a two-semester dismissal, students who fail to continuously earn a semester GPA of 2.5 or higher and/or reach appropriate Table of Standards values are dismissed for a 12-month period. Appeals for academic continuance and financial aid continuance are handled separately, and one appeal being approved does not insure that the other will, or that enrollment is guaranteed in the event the student has been dismissed. Refer to the University College website (<http://www.uta.edu/universitycollege/current/academic-planning/uac/policies/probation-dismissal.php>) for additional information. Academic dismissal is reflected on the student’s permanent academic record.

Students in Degree Programs

Students on academic probation, continuance or warning who have been accepted into a degree program are subject to all additional rules governing the definition and terms of admission and enrollment established by the program in which they are enrolled. Students dismissed from a degree program or leaving a degree program voluntarily may transfer to another major or pre-major with the permission of the dean of the receiving college/school, or to undeclared status or the University Studies degree program with the approval of the Executive Director of University College.

Satisfactory Academic Progress (SAP)

Federal regulations require that the University of Texas at Arlington establish policies to monitor the academic progress of students who apply for and/or receive financial aid. To retain eligibility, undergraduate recipients must show satisfactory progress toward a degree based on the following requirements. There are two areas specifically addressed in these requirements. The first is cumulative grade point average (qualitative standard) and the other is a comparison of the number of credit hours annually and a review of the maximum number of hours attempted (quantitative standard). The cumulative grade point average required to meet this portion of the SAP standards mirrors the grade point average required to remain in good academic standing at the University. Information regarding the calculation of the quantitative standard as well as the notification and appeal process may be found on the Financial Aid website (<http://www.uta.edu/fao>). Click on the Satisfactory Academic Progress tab.

Good Standing and Satisfactory Scholastic Progress

Graduate students are considered to be in good academic standing and making satisfactory progress in a degree or certificate program if they 1) meet all admission conditions within the time required 2) have a B (3.0) or better grade point average on all coursework undertaken while enrolled as a graduate student at UT Arlington and 3) have a B (3.0) or better grade point average in courses needed to satisfy degree requirements by the end of the semester in which they intend to graduate. Departments may specify additional requirements that students must meet in order to be in good standing or to be considered to be making satisfactory progress. Students should understand and follow those requirements because failure to meet them may lead to dismissal (see Dismissal, below). Students must be in good academic standing by the end of their final semester in order to receive an advanced degree or certificate from UT Arlington. Refer to the section **Courses That Do Not Provide Graduate Credit** for an explanation of courses that do not provide graduate credit and will not be used to determine academic standing or to satisfy degree requirements.

Academic Probation

A graduate student whose cumulative grade point average falls below a 3.00 in all graduate courses, be they graduate or undergraduate level taken while enrolled as a UT Arlington graduate student, will be placed on academic probation. The student must attain a grade point average of at least 3.00 in the next semester he or she is enrolled or be subject to dismissal. Undergraduate courses or graduate courses graded P, R, I or W or courses that do not provide graduate credit (see **Courses That Do Not Provide Graduate Credit**) cannot be used to remove the condition of academic probation.

Dismissal

Students have the initial responsibility to recognize when they are having academic difficulties and are expected to initiate steps to resolve the problem. When a student is in academic difficulty, and dependent upon the severity of the problem, the student may receive an oral warning and/or written statement of the problem and required corrective actions from his or her program. Failure to take these corrective actions can result in termination from the degree program.

Graduate courses or undergraduate graduate courses graded P, R, I or W or courses that do not provide graduate credit (see **Courses That Do Not Provide Graduate Credit**) cannot be used to remove the condition of academic probation. If a student is on academic probation and earns only grades that do not provide graduate credit, he or she will be dismissed.

A student who has been dismissed from their program for failure to remove the condition of academic probation by meeting the 3.0 grade-point average requirement may be readmitted for further graduate study in the same or in a different program only if a petition has been approved by the appropriate Committee on Graduate Studies and the academic dean of the college or school in which the student was enrolled.

A student can be dismissed from a degree program not only for failure to maintain an adequate grade point average, but also for such reasons as unsatisfactory progress toward a degree as defined by the department or program, inability to pass a comprehensive examination, failure to prepare or to defend a thesis or dissertation in a satisfactory manner or complete thesis or dissertation work in an acceptable amount of time. Termination due to inadequate academic progress is a decision made by the program's or department's graduate advisor and Graduate Studies Committee. A student's thesis/dissertation committee may recommend termination for failure to prepare a thesis/dissertation proposal, prospectus or final draft in a satisfactory manner or failure to complete work in an acceptable amount of time to the program's graduate advisor and Graduate Studies Committee. Such decisions to terminate a student must be communicated to the academic dean by the Chairman of the Graduate Studies Committee with required justification. The academic dean will review the case make the final decision. The student may continue enrollment until the dean finalizes the termination decision.

Students failing to pass a comprehensive examination or thesis/dissertation defense may be terminated upon the recommendation of the examining committee. Such decisions are indicated on the Comprehensive Examination Report or Final Defense Report which are returned to the academic dean and the Office of Records and Registration. The academic dean will notify the student formally of the program's or department's decision.

Satisfactory Academic Progress (SAP)

Federal regulations require that the University of Texas at Arlington establish policies to monitor the academic progress of students who apply for and/or receive financial aid. To retain eligibility, recipients must show satisfactory progress toward a degree based on the following requirements. There are two areas specifically addressed in these requirements. The first is cumulative grade point average (qualitative standard) and the other is a comparison of the number of credit hours annually and a review of the maximum number of hours attempted (quantitative standard). The cumulative grade point average required to meet this portion of the SAP standards mirrors the grade point average required to remain in good academic standing at the University. Information regarding the calculation of the quantitative standard as well as the notification and appeal process may be found on the Financial Aid website (<http://www.uta.edu/fao>). Click on the Satisfactory Academic Progress tab.

Admissions

The Office of Admissions, Records, and Registration handles over 70,000 applications per year to the university's graduate and undergraduate programs. Admission to the university is open to qualified applicants regardless of race, color, gender, sexual orientation, creed, age, national origin or educationally unrelated handicaps. Once applications are received by the office, the applicant will be notified of the documents which must be submitted in order for an assessment to be made and admissibility determined. Determination of admission is made in the academic department for graduate

applicants while undergraduate student's admissibility is determined by the Office of Admissions, Records & Registration based on approved university admissions requirements. Students are notified of the admissions decision both by email and by a letter to the home address.

The department seeks to encourage life-long learners to become partners in the educational enterprise and provide a seamless transition throughout the application and enrollment process.

Graduate Admissions (p. 23)

Undergraduate Admissions (p. 34)

Graduate Admissions

Admission

Basic admission requirements must be met before a student can be accepted. In meeting these requirements, an applicant 1) must have a bachelor's degree from a regionally accredited U.S. college or university or its foreign equivalent, with a satisfactory grade-point average; 2) must have an acceptable and current score on the aptitude tests of the Graduate Record Examination or the Graduate Management Admission Test, as specified by the department or program to which application is being made; 3) demonstrate potential for graduate work in the chosen field through previous academic performance; and 4) be approved for admission by the department in which a degree is sought. Certain programs require students to submit to and satisfactorily complete a background check review as a condition of admission and/or participation in education experiences. Students who refuse to submit to a background check or who do not pass the background check may be dismissed from the program. Applicants should examine departmental requirements with care.

The following sections detail the minimum standards required for admission to a graduate program at the University of Texas at Arlington. Meeting them does not guarantee acceptance into a departmental degree program because most departments have more stringent admission standards. The University may limit the number of students accepted in a program if the number of applicants exceeds the resources needed to support the educational objectives of that program. Admission to graduate programs is competitive. Therefore, students meeting admission requirements who are less well qualified than other applicants may be denied admission.

Members of the UT Arlington faculty holding an appointment at the rank of instructor or above may not pursue a graduate degree at the University.

Applicants must complete the online application for admission (<http://grad.uta.edu/prospective/apply>). Since admission requirements vary and are program specific, go to <http://www.uta.edu/admissions/graduate> and look up current admission requirements in the current Graduate Catalog for the program or department to which admission is sought.

The admission policies of the academic departments of The University of Texas at Arlington comply with standards specified by the Texas Education Code, Section 51.842. Specifically, performance on a standardized test is not the sole criterion for consideration of an applicant for admission or the primary criterion to end consideration of the applicant for admissions. Relevant experience, commitment to the field of planned study, multilingual proficiency, and socioeconomic background (to the extent that it can be identified) may also enter into these decisions. This law does not apply to standardized tests used to measure the English language proficiency of non-native English speakers without a bachelor's or master's degree from a regionally accredited U.S. institution.

Basic Admission Requirements

Application

Application for admission must be made on official application forms. Students may complete the application online by accessing our Web site <http://www.uta.edu/admissions/graduate>. Please note, you may only submit one application, and be considered for admission to one program at a time.

APPLICATION EVALUATION CHARGES

A non-refundable application evaluation charge is required of all applicants. Payment must be received before processing can begin. There are no exceptions to this policy.

A non-refundable evaluation charge of \$40 is required of all U.S. citizens and U.S. Resident Alien applicants who have attempted all of their college or university work at institutions located in the United States. A \$90 evaluation charge is required of all U.S. citizens and U.S. Resident Alien applicants who have attempted some or all undergraduate or graduate coursework at an institution located outside of the United States.

All international students are required to pay a non-refundable \$90 application evaluation charge.

Required Official Transcripts, Marksheets, and Diplomas

Application processing for admission to a graduate program requires receipt of official U.S. transcripts or foreign country transcripts or marksheets and diplomas. Unattested, notarized or fax copies of U.S. transcripts, foreign country transcripts, marksheets, diplomas, test scores and other academic records are not acceptable for processing purposes. Acceptable transcripts, marksheets and diplomas from U.S. and international institutions are

described below. Documents meeting the indicated criteria will be accepted by Graduate Admissions for admission purposes. Unacceptable documents will prevent or cause delays in admission processing.

U.S. TRANSCRIPTS

Official transcripts from U.S. institutions are those mailed directly to Graduate Admissions by the Registrar or responsible head of the institution at which the work was attempted or completed. An official original "issued to student" transcript on safety paper with the official university seal and signature of the university's Registrar may upon Graduate Admissions review, be acceptable. Submit one set of transcripts. Currently or previously enrolled UT Arlington students do not have to request UT Arlington transcripts be forwarded by the UT Arlington Registrar to Graduate Admissions.

FOREIGN COUNTRY TRANSCRIPTS OR MARKSHEETS AND DIPLOMAS

Official foreign country transcripts or marksheets and diplomas are those bearing the original seal of the institution and the original signature of the Registrar or responsible head of the institution. Those not issued in English must be accompanied by an exact word for word original English translation bearing the original university or translation agency attestation. Submit one set of transcripts or marksheets and diplomas. They may be sent directly to Graduate Admissions by the institution or by the applicant.

Grade Point Average Calculation for Admission

STUDENTS WITH DEGREES FROM U.S. INSTITUTIONS

The grade-point average for admission to graduate school at The University of Texas at Arlington is calculated according to Texas law and the policies and procedures of Graduate Admissions. For applicants completing work in U.S. institutions of higher learning, calculation of the grade-point average for admission purposes is based on the last two years of courses from the bachelor's degree transcript, on a 4.0 scale. In practice, this grade-point average is based on approximately the last 60 semester hours or the equivalent in quarter hours (90 quarter hours) shown on an applicant's bachelor's degree transcript.

In cases in which an applicant's transcript shows repeated courses, the grade-point calculation includes all grades earned in those courses.

For an applicant who applies before official receipt of the bachelor's degree, the last 60 semester hours grade-point calculation will include senior college and university work completed to date. The grade-point average will not be automatically recalculated upon receipt of the degree.

An applicant wishing to have undergraduate courses completed after their degree has been awarded included in the grade-point calculation may submit a written request to Graduate Admissions at the time the application for admission is submitted.

An additional grade-point average is calculated for an applicant awarded or completing a master's or doctoral degree at the time application to UTA is made. For master's level students, the grade-point calculation will include all graduate level courses taken subsequent to the bachelor's degree at the institution from which the degree has been or will be awarded. For doctoral level students, the grade-point calculation will include all graduate level courses taken subsequent to the bachelor's and master's degree at the institution from which the doctoral degree has been or will be awarded. The grade-point average will be calculated on the basis of information provided at the time application to UTA is made and will not be automatically recalculated upon completion of on-going work or award of a degree.

International applicants and others with degrees earned outside the United States should see the grade-point calculation information under Admission of International Students and Resident Aliens.

The following are not included in grade-point calculations for admission purposes:

1. courses completed at junior or community colleges
2. courses completed by examination or correspondence
3. incomplete grades or withdrawals
4. pluses and minuses
5. personal improvement courses such as activity courses in physical education
6. graduate courses or any courses completed in graduate student status (a graduate grade-point average will be calculated and reported separately)
7. courses in which the grade is a P, pass, credit, satisfactory or other such designation

STUDENTS WITH DEGREES FROM INTERNATIONAL INSTITUTIONS

The calculation of the GPA for international applicants and U.S. resident aliens who have earned degrees from colleges or universities in the United States follows the policies and procedures for U.S. applicants. The diversity of marksheets and transcripts from foreign universities requires flexibility in calculating approximate equivalents of U.S. GPAs. Generally, GPAs for applicants with foreign degrees are calculated using the final grade for courses taken in the last two years of the applicants' undergraduate program. For an applicant who applies pending receipt of the bachelor's degree, the GPA calculation will include final course grades for the last two years of undergraduate work available at the time the application is submitted for processing. All grades are converted to the U.S. 4-point scale. Pluses and minuses, graduate courses, and personal improvement courses such as physical education are not included in these calculations.

GPA CALCULATION UNDER ACADEMIC FRESH START STATUTE

Admission to Undergraduate Programs

Texas residents may seek to enter undergraduate programs at U.T. Arlington under provisions of the "academic fresh start" statute, Section 51.931 of the Texas Education Code. When applicants inform U.T. Arlington admissions officials in writing of their decision, U.T. Arlington will not consider in the admissions decision any academic course credits or grades earned 10 or more years prior to the starting date of the semester in which the applicant seeks to enroll. Applicants who decide to apply under this statute may not receive any course credit for courses taken 10 or more years prior to enrollment under academic fresh start.

Admission to Postgraduate/Professional Programs

Applicants who have earned baccalaureate degrees under the "academic fresh start" statute, Section 51.931 of the Texas Education Code, and who apply for admission to a postgraduate or professional program will be evaluated on only the grade-point average of the course of work completed for that baccalaureate degree and the other criteria stated herein for admission to the postgraduate or professional program.

Standardized Test Requirements

Official test score reports for the Graduate Record Exam (GRE), Test of English as a Foreign Language (TOEFL), TOEFL iBT, and Test of Spoken English (TSE) are issued by the Educational Testing Service (ETS) and sent by ETS directly to Graduate Admissions. Official test score reports for the Graduate Management Admission Test (GMAT) are issued by the Graduate Management Admission Council (GMAC) and sent by GMAC directly to Graduate Admissions. Current information about GRE, GMAT, TOEFL, TOEFL iBT and TSE test dates, locations and registration procedures is published by ETS at www.ets.org. For current information about the GMAT including test dates, locations, registration procedures, and time frames for test score validity, access www.mba.com. Official test scores for the International English Language Testing System (IELTS) are reported on an IELTS issued Test Report Form (TRF) and sent directly to Graduate Admissions from IELTS. Current information about IELTS test dates, locations and registration procedures is published by IELTS at www.ielts.org.

GRE AND GMAT MINIMUM SCORES

The University of Texas at Arlington does not set minimum GRE or GMAT requirements that apply to all students. Individual programs or departments determine GRE and GMAT requirements for admission to their programs. Individual departments and programs may evaluate GRE or GMAT scores as one of several criteria to determine admissibility. Test scores do not constitute the sole or primary basis for admission or for ending consideration of an applicant. Applicants should refer to individual departmental or program section for test requirements.

TOEFL, TSE, TOEFL IBT AND IELTS SCORES MINIMUMS

The University of Texas at Arlington sets test score minimums for tests that measure English proficiency such as the TOEFL, TOEFL iBT, TSE and IELTS; however, individual departments and programs may impose a more stringent test score requirement. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies. Applicants must submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section to meet this requirement.

An applicant holding either a bachelor's or a master's degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, TSE or IELTS score for admission purposes. Any other waivers of the score requirements must be recommended by the applicant's Graduate Advisor and approved by the college or school dean.

TOEFL IBT OR IELTS REQUIREMENTS FOR GRADUATE TEACHING ASSISTANTS

Before being appointed to an assistantship at UT Arlington, a student whose native language is not English must demonstrate acceptable skill with spoken English. An applicant who is a non-native speaker of English must submit a TOEFL iBT score of at least 23, or a score of at least 7 on the Speaking section of the IELTS, or take and pass the UTA Developmental English course to meet this requirement. Only official scores provided directly to UT Arlington by ETS or IELTS are acceptable. The English proficiency requirement will be waived for non-native speakers of English who possess a bachelor's degree from an accredited U.S. institution.

Application Deadlines

UNITED STATES CITIZEN APPLICANTS

A U.S. citizen student may complete the application online. Since admission requirements vary and are program specific, go to our Web site at <http://www.uta.edu/admissions/graduate> for admission criteria specific to each individual department and program. The application and following required credentials should be submitted preferably 90 days prior to the date of expected enrollment:

1. one set of official transcripts of all undergraduate and graduate college work; currently or previously enrolled UTA students do not have to request UTA transcripts be forwarded by the UTA Office of Records and Registration to Graduate Admissions;
2. official GRE or GMAT test score as required by the intended program;
3. official TOEFL or IELTS test score, if applicable;

4. letters of recommendation as required by the intended program
5. essay or statement of general academic plans as required by the intended program
6. a nonrefundable application evaluation charge of \$40, if no foreign college or university work or \$90, if foreign college or university work.

Some graduate programs may set deadlines for application or consideration of applicants for graduate assistantships that are earlier than general deadlines established by Graduate Admissions. Such deadlines will be included in descriptions of admission requirements provided by each department. Applicants should read those materials carefully and submit their application materials before a departmental deadline passes. If the department does not specify a deadline, applicants should meet the Graduate Admissions deadlines described above.

INTERNATIONAL AND U.S. RESIDENT ALIEN APPLICANTS

An International or U.S. Resident Alien applicant may complete the application online. Since admission requirements vary and are program specific, use this link <http://www.uta.edu/admissions/graduate> and look up current admission requirements in the current Graduate Catalog for the program or department to which admission is sought. The application and following required credentials should be submitted preferably 120 days prior to the date of expected enrollment: 1) all international students must submit a nonrefundable application evaluation charge of \$90. U.S. Resident Alien applicants WITH foreign college or university work must submit a non-refundable application evaluation charge of \$90. U.S. Resident Alien applicant WITHOUT foreign college or university work must submit a non-refundable application charge of \$40; 2) one set of official marksheets, diplomas or transcripts of all undergraduate and graduate coursework; 3) official GRE or GMAT test score as required by the intended program; 4) official TOEFL or IELTS test score, if applicable; 5) three letters of recommendation; 6) general academic plans; 7) financial and/or immigration documentation as specified in the application instructions.

Changes to a Submitted Application

STARTING SEMESTER, DEGREE PROGRAM, OR DEGREE LEVEL

Current applicants wishing to change the semester in which they plan to start study at UT Arlington, programs in which they wish to be considered for admission, or degree levels (e.g., master's or doctoral) for which they initially applied, may request that their application be reprocessed for possible admission by completing the form "Reactivate an Admissions Application". This form is completed online at our Web site <http://www.uta.edu/admissions/graduate>. Applicants may submit only one "Reactivate an Admissions Application" at a time. The initial admission decision does not automatically apply when an applicant requests these types of changes to their application. When a request is received, the appropriate non-refundable U.S. Citizen, Resident Alien or International Student application evaluation charge must be paid in order to begin processing the request. Once the fee is paid the application is thoroughly re-evaluated to ensure it is complete and current and a new admission decision will be made. This rule does not apply to an applicant who was admitted but did not enroll because of deployment as a member of the armed forces of the United States serving on active duty in a combative operation outside the United States. For an applicant requesting a change in their semester start date because of deployment in a combative operation outside the United States the initial program admit decision and standardized test scores submitted for admission to the initial program automatically apply to the change in semester start date and the application evaluation charge for the change is semester start date is waived (TEC Sec. 51.844).

RETENTION OF APPLICATION MATERIALS

Application materials become property of The University of Texas at Arlington and cannot be returned.

NOTIFICATION OF APPLICANTS REGARDING ADMISSION DECISIONS

While admission related information received from the graduate program to which an individual has applied may be important and useful, such information does not constitute official notice of admission into a graduate program at The University of Texas at Arlington.

Official notification of the admission decision is issued by the Graduate Admissions Office and is sent by Graduate Admissions directly to the applicant. It is very important that applicants read this notice carefully because it describes any conditions or restrictions placed on admission that must be addressed. Many of these conditions must be satisfied before the end of the first semester of enrollment. If they are not, a student may be barred from enrolling in subsequent semesters. Thus applicants should read the notice and keep it for future reference. Admission conditions described in official notification letters are described in the following section.

Types of Admission Decisions

After an applicant's credentials have been evaluated by the Graduate Advisor in the applicant's major area the applicant will be notified by letter and email sent by the Graduate Admissions Office of : 1) acceptance and admission under one of the categories of admission listed below; or 2) denial of application; or 3) deferral of application for reasons listed in the letter. If accepted, the acceptance notification will state conditions for admission, if any, and period of validity of the acceptance. Applicants who have not received an admission notification one week prior to the beginning of classes for the semester for which admission is sought should contact the Graduate Admissions Office for information concerning the status of their application.

UNCONDITIONAL ADMISSION

An applicant who meets all requirements is normally considered for unconditional admission.

PROBATIONARY ADMISSION

An applicant who does not meet all requirements for unconditional admission nevertheless may show promise for successful graduate study and, upon recommendation of the graduate advisor, Committee on Graduate Studies and with approval of the academic dean may be granted probationary admission. Special course requirements or other conditions may be imposed by the advisor, Committee on Graduate Studies and/or dean. .

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission upon recommendation of the appropriate graduate advisor and Committee on Graduate Studies.. Complete and satisfactory credentials must be received by the Graduate Admissions Office before the end of the semester in which the student has registered in a provisional status. A student will not be permitted to enroll with a provisional status for more than one semester. Provisional admission does not guarantee subsequent admission on an unconditional basis. International applicants residing outside of the United States at the time of application are not admitted on a provisional basis. A student may not hold an assistantship while in provisional status.

DEFERRED ADMISSION

If an applicant does not present adequate evidence of being able to supply required application materials or must complete additional preparatory work before their admissibility can be determined , the admission decision may be deferred until records are complete. The applicant will be sent an Admission Deferral Notice specifying the data that must be provided or the work that must be completed before the application will be reconsidered. The application may be reactivated for reprocessing by returning the "Request to Update/Reactivate Application" that accompanied the Admission Deferral Notice. An application evaluation charge will be required for each reprocessing request unless the request is made for the original semester and program.

DENIED ADMISSION

Admission is typically denied if an individual fails to meet more than one of the admission standards of the department to which he or she applied and the admission committee feels that there is insufficient basis to justify a probationary, provisional or deferred admission recommendation. As the admission process is competitive, students meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

Applicants denied admission to a graduate program may not take or reserve graduate courses for graduate credit. Applicants may reapply for admission if the deficiencies in credentials that led to denial are remedied. An application evaluation charge will be required for each reprocessing request. Applicants denied admission may ask the Graduate Advisor in the program to which they applied about the reasons for the denial.

Graduate English Skills Program

The Graduate English Skills Program (GESP) comprises an intensive English course designed for international students who have been conditionally accepted to graduate school because of marginally acceptable scores on verbal admission tests.

The program focuses on improving English language skills in the areas of academic writing, reading/research skills, note taking from academic lectures, accent reduction and oral presentations. Instruction includes technological support materials.

International students must receive admission from Graduate Admissions at UT Arlington and permission from their graduate departments to enroll in GESP to remove their English deficiencies.

Students who receive permission to enroll in GESP are tested in writing, reading, speaking and listening. Based on the outcome of placement tests, the English Language Institute (ELI) will recommend to the graduate departments the areas where each student needs improvement. A student may be required to take no further English or may be required to take up to a maximum of three skill areas (five hours) per day. Students studying less than five hours of English per day may be allowed by their department to enroll in some graduate courses as well.

At the end of a semester, if the student has attained a minimum average of 85% during the semester, the GESP Coordinator will recommend to the graduate department that the student enroll for all graduate courses or continue studying English. Most students complete their English requirements in a semester.

GESP tuition charges and other information can be found at <http://eli.uta.edu> or contact the GESP Coordinator at the English Language Institute, Box 19560, Arlington, Texas 76019. Phone: 817.272.7576. Fax: 817.272.2731.

Special Admissions Programs for UT Arlington Undergraduates

OUTSTANDING UT ARLINGTON UNDERGRADUATES

Upon the recommendation of the Graduate Advisor, outstanding graduates of The University of Texas at Arlington may be admitted to a master's degree program or B.S. to Ph.D. track by facilitated admission. To qualify, the student must meet the following minimum requirements:

1. The student must have graduated from a commensurate bachelor's degree program at UT Arlington no more than one academic year prior to the semester for which admission to a graduate program is sought. A commensurate bachelor's degree program is one that is a normal feeder program

for the master's degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, facilitated admission is conditional upon successful completion of the bachelor's degree.

2. The student's grade-point average must equal or exceed 3.5 in each of two calculations:
 - a. the grade-point average in the last 60 hours of study as calculated in Graduate Admissions for admission purposes;
 - b. all work completed at UT Arlington to date.

Students who qualify for facilitated admission will be admitted directly to graduate school without completing the application for admission, submitting an application evaluation charge or taking the GRE or GMAT. Students who believe they may qualify for this program should contact the appropriate Graduate Advisor. Some programs may require a higher grade-point average to qualify. Not all graduate programs participate in Facilitated Admission of Outstanding Undergraduates.

ADMISSION WITH GRADUATE RECORD EXAMINATION WAIVED

Upon recommendation of the Graduate Advisor, outstanding UT Arlington graduates may qualify for waiver of the requirements for the Graduate Record Examination (GRE). To qualify, the applicant must meet the following minimum requirements:

1. The student must have graduated from a commensurate bachelor's degree program at UT Arlington no more than three academic years prior to admission to the graduate program (as measured from the start of the semester for which admission is sought). A commensurate bachelor's degree program is one that is a normal feeder program for the master's degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, admission with the GRE waiver is contingent upon successful completion of the bachelor's degree.
2. The student's UT Arlington grade-point average must equal or exceed 3.0 in each of two calculations: (a) in the last 60 hours of study as calculated for admission by Graduate Admissions; (b) in all undergraduate coursework completed at UT Arlington.

Applicants qualifying for waiver of the GRE who do not qualify for facilitated admission, must comply with all other requirements for admission, i.e., submitting the application for admission, paying fees, providing official transcripts from other institutions, and meeting any requirements established by the admitting graduate program. The GRE waiver must be recommended by the Graduate Advisor at the time of admission. The waiver of GRE program applies to applicants for master's degree programs only. Some programs may require higher grade-point averages to qualify. Not all graduate programs participate in the GRE waiver program.

FAST TRACK TO MASTER'S DEGREE

The Fast Track program is designed to encourage gifted UT Arlington undergraduate students to complete a master's degree at UT Arlington, by enabling them to complete their undergraduate studies without delay and reducing the time and the number of additional courses needed to complete a master's degree. It is available in some graduate programs to outstanding UT Arlington undergraduate students and admission to these programs is highly selective. Participating undergraduate students use a set of courses specified by their graduate program to satisfy both undergraduate bachelor degree and graduate master's degree requirements. Students must formally apply to and be accepted as a Fast Track student by a participating graduate program to receive the full benefits of the program. Admitted students going on to complete all program requirements successfully will be automatically admissible to the associated master's program when they receive their bachelor's degree. They will not have to submit the formal application for admission to Graduate Admissions, pay an application evaluation fee, or take the GRE. Students who do not complete the Fast Track program may apply for admission per regular means but must take all required tests and pay all required fees. Admission in such cases is not automatic and will be based on the published admission requirements of the program applied to all regular applicants. Not all programs offer a Fast Track option. Interested students should consult with their intended program's graduate advisor prior to their senior year for detailed information regarding requirements and application procedures.

Non-Degree Seeking (Special) and Graduate Certificate Applicants

A person holding a bachelor's degree from a regionally accredited U.S. institution or its foreign equivalent wishing to take graduate courses at The University of Texas at Arlington but not planning to pursue a graduate degree may be apply for admission as a special non-degree seeking student or graduate certificate student. In most cases, admission as a special non-degree seeking student is granted only for the purpose of participating in special graduate course offerings, or for taking courses to be transferred to another institution. A student who has been denied admission to or been dismissed from graduate studies may not be permitted to enroll as a special non-degree seeking or graduate certificate student.

Before submitting an application for admission, an applicant for special non-degree seeking student or graduate certificate should consult with the Graduate Advisor in the department or program in which the graduate course or graduate certificate is offered. Applicants may complete our application online. In addition to the application form applicants must submit an official transcript of previous college work showing evidence of an undergraduate degree and, if applicable, a graduate degree. Special non-degree seeking student admission status is granted for the semester for which the application is submitted. Further enrollment as a special non-degree seeking student must be approved on a semester-by-semester basis. Graduate certificate enrollment is limited to the courses and length of time required to complete the graduate certificate program. Special non-degree students and graduate certificates may not hold graduate assistantships or enroll in research, thesis, internship or dissertation courses.

Up to 12 graduate level (5000 and above) semester credit hours earned as a special non-degree seeking student may be applied to a graduate degree program, subject to the policies on grades and graduate credit described in the General Information and Regulations section of this catalog. Review and

approval of the appropriate Committee on Graduate Studies and the approval of Graduate Admissions are required. All grades in courses taken as a special non-degree seeking student and graduate certificate status will be considered in computing a student's graduate grade-point average.

A former or currently enrolled special student or graduate certificate student wishing to apply for admission to a graduate degree program must submit a graduate admissions application online, all supporting documents listed in the Admission section of this catalog, and the appropriate non-refundable application evaluation charge. Admission as a special student or graduate certificate student in no way guarantees subsequent admission into a graduate program in graduate school.

NOTE: Immigration regulations do not generally permit international students to study as special non-degree seeking or certificate students. If you are an international student, please contact Graduate Admissions before submitting an application so that eligibility to apply as a special non-degree seeking or graduate certificate student can be determined.

Readmission

A student previously enrolled in graduate school at The University of Texas at Arlington, wishing to resume graduate work after an absence of a fall or spring term or longer (summer excluded) must submit an "Application for Readmission" form online and pay the required non-refundable application evaluation charge. This rule does not apply to a student who withdraws with an Approved Leave of Absence or to a student who withdraws from the university because of deployment as a member of the armed forces of the United States serving on active duty in a combative operation outside the United States. A student returning from an Approved Leave of Absence as scheduled will be automatically readmitted and will not be required to submit an application or pay an application fee. For a student withdrawing due to deployment in a combative operation outside the United States readmission will be granted upon request, the readmission fee waived, previously submitted standardized test scores will remain acceptable and credit toward for any work previously completed applied. (TEC Sec. 51.844). In addition, the student may be eligible for the same financial assistance provided before the student's withdrawal (TEC, Section 51.9242).

The "Application for Readmission" is completed online at our Web site <http://www.uta.edu/admissions/graduate>. Students may submit only one "Application for Readmission" at a time. A \$30.00 application charge is required of all U.S. Citizen and U.S. Resident Alien applicants who have attempted or completed all of their college or university work at institutions located in the United States. A \$60 evaluation charge is required of all U.S. Citizen and U.S. Resident Alien applicants who have attempted or completed some or all of their coursework at an institution located outside of the United States. A \$60 evaluation charge is required of all International students. Payment must be received before processing can begin. An application evaluation charge is required with each readmission application form submitted. International students and U.S. Resident Alien students should submit this form and pay the required non-refundable evaluation charge 120 days prior to their expected semester of enrollment, and U.S. Citizen students 90 days prior to their expected date of enrollment.

A former student wishing to apply for a dual degree program must complete the "Application for Readmission" form online.

An applicant for readmission should consult with the Graduate Advisor of the program, or the Graduate Advisors of the dual degree programs, before submitting the readmission form and fee to Graduate Admissions. This is particularly important when requesting readmission to a new program or requesting readmission to a dual degree program.

An applicant for readmission who has enrolled at other institutions during their absence from UT Arlington (including those in UT Arlington concurrent enrollment) must submit official transcripts showing such coursework to Graduate Admissions.

Change of Graduate Major, Program, or Degree Level for Current Students

Students wishing to change graduate major, program or degree level (master's or doctoral classification) from the one in which they are enrolled currently or in which they were enrolled during the most recent semester at UT Arlington, must initiate the change by completing the "Change of Program or Degree Level" form online. Students may submit only one "Change of Program or Degree Level" form at a time. Additional forms will not be processed until a final decision on any prior request has been made. Students intending to change majors should consult the Graduate Advisor of the new program regarding program admission and degree requirements before completing this form. Similarly, students wishing to change degree level should submit the request after discussing the matter with the appropriate Graduate Advisor.

Students wishing to change from one program to a dual degree program must complete the "Change of Program or Degree Level" form online.

The "Change of Program or Degree Level" form is completed online at our Web site <http://www.uta.edu/admissions/graduate>.

Master's, Doctoral and Certificate Programs

The University of Texas at Arlington offers approximately 100 different master's and doctoral degrees across a wide spectrum of academic and professional programs. In addition to typical classroom instruction suited to either full or part-time students, a number of degrees can be pursued through distance educational formats. Numerous certificate programs not requiring admission in a particular master's or doctoral degree program are also available for persons seeking to enhance their professional skills and careers.

- Women's and Gender Studies

Undergraduate Admissions

Office of Admissions, Records and Registration

Undergraduate Admissions is a unit within the Office of Admissions, Records & Registration

Application for Admission

New prospective students who wish to enroll at The University of Texas at Arlington must apply for admission. They should apply as early as possible. All application materials—signed application (or certified if online), appropriate application fee or fee waiver documentation, official copies of transcripts of all high school and all college work attempted, and official test scores when appropriate—should be submitted by the priority deadlines. Completed applications will be accepted after the priority deadlines until the ApplyTexas application closes approximately two weeks prior to the start of the term. A late application fee will be assessed. Adherence to the deadlines ensures careful evaluation of credentials resulting in an admission decision and notification of that decision to the student in time for orientation, academic advising, registration, and tuition/fee payment.

All documents, including official transcripts submitted to the Office of Admissions, become the property of the University and will not be returned to the student. Official transcripts must be currently dated with an issue date that closely corresponds to the date the admission application is submitted. An offer of admittance to UT Arlington is only valid for the semester indicated on the admission application. Applicants wishing to be considered for a future semester other than the one identified on their first application must submit a new application. Although a new application must be completed, a second application fee will not be required if the application is being updated for the first time within the same academic year. If the second or subsequent admission application reflects a change in academic history, the student must provide the new official transcripts and test scores reflecting any new work completed since the first application was submitted. Once complete, the student's admission status will be re-evaluated. The application for admission can be found at www.ApplyTexas.org (<https://www.applytexas.org>).

PRIORITY DEADLINES

Application Deadline	Fall Semester	Spring Semester & Winter Intersession	Summer Semester & Summer Intersession
Freshman	June 1	December 1	April 1
Transfer students	June 1	December 1	April 1
Former students	June 1	December 1	April 1
International students	May 1	October 1	March 1
Transient students	June 1	December 1	April 1

The above priority deadlines may not apply to some academic programs which are offered exclusively online. Please consult the specific web site of the online program you will be participating in for application deadline information.

APPLY TEXAS APPLICATION

Pursuant to Section 51.762 and 51.763 of the Texas Education Code, the Texas Higher Education Coordinating Board adopted a uniform undergraduate admission application called the Apply Texas Application. All undergraduate freshmen, transfer, former and transient students applying to a Texas public institution of higher education must use this form. It may be accessed and sent electronically via the Internet at www.applytexas.org (<https://www.applytexas.org>).

ADMISSION APPLICATION FEE

All new undergraduate applicants to UT Arlington must pay a non-refundable \$60 application fee. The fee may be paid online using a credit card at the time the application is submitted. The Admissions Office also accepts application fees be paid by check or money order in U.S. dollars. The only fee waivers accepted by the office are those offered from ACT or SAT. Fee waivers are not available for students applying to the Academic Partnership programs. Admission decisions will not be made until after the application, application fee and all official academic credentials are received and reviewed. Applicants who are not admitted or who do not enroll on the basis of their original admission application may receive one free update within the same academic year upon completion of an update application.

International Students

All prospective students from countries other than the United States who are not immigrants and have not been granted permanent residency must submit:

1. an International Student Application.
2. the application processing fee of \$60 U.S., which is not refundable.
3. **Entering freshmen** must present completed official secondary school transcripts, diplomas, certificates and/or national test examination scores as appropriate for the educational systems in their country. In order to be considered for freshman admission you must have completed a secondary school series equivalent to that of United States high school graduation. Transcripts and exam marks should be attested as true copies of the originals by the school you attended. Notarized copies are not used for admission. If documents are written in a language other than English, complete and official English translations must be provided with the original language transcripts, exam records and diplomas. Official SAT I or ACT scores are required for entering freshmen with less than 24 semester hours of university level course work (equivalent to one year of full time study). The minimum required SAT I score for entering freshmen educated in a country other than the U.S. is 900. The minimum ACT score is 19. International Freshman applicants educated in the U.S. must meet U.S. freshman admission standards regarding high school class rank and SAT I or ACT scores. Scores must be sent directly to UT Arlington from the Testing Service in order to be considered official. Student score reports are not used for admission processing.

International Transfer Students must submit official transcripts or mark-sheets of all college or university level course work showing subjects completed and grades (marks) earned. Transcripts and diplomas must be attested as true copies of the originals by the school you attended or UT Arlington. Notarized copies are not used for admission. If documents are written in a language other than English, complete and official English translations must be provided with the original language transcripts, exam records and diplomas.

4. Official TOEFL scores are required from International students (entering freshman and transfer students) from non-native English speaking countries on the following visas: B, C, D, F, H-4 dependents of H-1C, H-2A, and H-2B visa holders, J, M, O-2, O-3, P, Q, S, TN, TD, TPOV. Applicants who have graduated from secondary schools or colleges in the following countries are exempt from the TOEFL: Anguilla, Antigua, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (except Quebec), Cayman Islands, Dominica, Grenada, Grand Cayman, Guyana, Ireland, Jamaica, Liberia, Montserrat, New Zealand, Sierra Leone, St. Kitts and Nevis, St. Lucia, St. Vincent, Trinidad/Tobago, Turks and Caicos Islands, and United Kingdom.

The TOEFL will be waived for those applicants:

- a. who have an SAT I verbal score of at least 480 or an ACT I English score of 19, or
- b. who have completed English Composition I and II with a grade of C or better, plus 24 additional transferable hours at a college or university located in the U.S.

The minimum acceptable score on the TOEFL is 79 on the Internet-based test, 550 on the paper-based test and 213 on the computer-based test. The IELTS can be substituted for TOEFL scores. The minimum acceptable overall score of 6.5 is required for admission. Scores must be sent directly to UT Arlington from the Testing Service in order to be considered official. Student score reports are not used for admission processing.

5. The applications of prospective students from countries other than the United States are reviewed on an individual basis, and admission decisions are based on the strength of the previous academic work, scores on the SAT if required, and the Test of English as a Foreign Language score. Academic background and curriculum are important considerations in decisions on admissibility.
6. International students who plan to attend UT Arlington on an F-1 (student visa) and who wish to be issued an I-20 must present a copy of their passport, I-94 card and evidence of sufficient financial support while studying in this country. Please see the latest Financial Statement Form at UT Arlington's Web site at www.uta.edu/admissions for the most current estimate to be documented and types of acceptable documentation.
7. International Students on any visa other than F-1 must present a copy of their passport and I-94 card.
8. Prior to course registration each prospective International student must clear through the Office of International Education. In addition, International students on the following visas are required to attend an International Orientation before registering for classes: A-2, e-2, F-1 (including transfer students) H-4, J-1, J-2, L-2, O-3, R-2, TD.
9. Prior to course registration each prospective International student must have a Tuberculosis screening and/or chest X-ray in order to enroll. For further information please call the Health Services Immunization Clinic at 817-272-7143 or visit their Web site at www.uta.edu/health_services.

Meningitis Requirement

As of Jan. 1, 2012, incoming Texas college students under 30 years old as of the first day of classes for the term in which they intend to enroll must be immunized against bacterial meningitis before they enroll in any Texas institution of higher education per SB 1107 (<http://www.capitol.state.tx.us/BillLookup/History.aspx?LegSess=82R&Bill=SB1107>). The law was subsequently updated for students entering the Spring 2014 to be under the age of 22 years old instead of 30. Students transferring from another institution and students who are re-enrolling following a break of at least one fall or spring semester must be inoculated against the illness. Students who plan to audit a course also must comply with the law. Students enrolling in only online classes are exempt from the legislation.

It is imperative that students who plan to enroll at UT Arlington be vaccinated as soon as possible. Under the law, new college students must have received the vaccine within the past five years. Proof of inoculation is required 10 days before the start of the semester as the vaccine is considered effective several days after it is administered. Additionally, the vaccine must have been administered within the past five years. Limited exemptions are specified in state law. Upon acceptance to the university, the student will receive detailed information sent to their UT Arlington email address

concerning compliance with the law. UT Arlington uses a third-party service, Magnus Health SMR, to collect student vaccination records, verify the documents and maintain the records in compliance with federal privacy laws. Magnus will create an account for incoming students, who will be sent instructions via email to their UT Arlington email address detailing how to submit vaccination documentation. Students enrolled in classes who must meet the requirement will be dropped from their classes the day prior to the first day of class if they have not completed the requirements as defined by the law.

Frequently asked questions (<http://www.uta.edu/news/info/meningitis.php>) regarding this requirement are available online at UT Arlington's web site.

Major Classifications

All entering students will be classified either as undeclared majors, intended-majors or majors. All entering students who are not ready to declare a major will be admitted as undeclared majors. **Note:** Applications for students interested in the Architecture or Interior Design programs will only be accepted for the Fall semester.

All first-time freshman students and freshman transfer students will be advised by the University Advising Center in University College for their first year and then advised by departmental advisors thereafter. Undeclared majors beyond the first year will continue be advised in the University Advising Center until they are ready to move into an intended major or major.

Transfer students will be advised by a departmental advisor for the intended major or major, unless admitted as an undeclared major and be advised by the University Advising Center.

Enrollment as a Non-Degree Student

A student who holds a bachelor's degree from an accredited institution, including The University of Texas at Arlington, may choose to apply for admission as a non-degree student in one of the undergraduate colleges or schools and is subject to the rules that apply to other undergraduates. Students may, with the approval of the director of admissions and the academic dean, change to degree-seeking status in an undergraduate college.

Consideration for the non-degree option is made by submitting an admission application, application fee and an official transcript showing the awarding of at least a bachelor's degree. Materials must be submitted by the deadline for undergraduate admission.

Admission to a Degree Program

Admission to the University's degree programs is determined by application to the academic unit offering the degree. Before being admitted to a degree program, students must fulfill all departmental and college requirements. Degree programs may require students to complete additional courses or hours in residence prior to applying for admission to the degree program. Until students are admitted into a degree program, students will remain on pre-major status.

Criminal Background Check

Some programs require a criminal background check as a condition of admission or program completion or licensure expectations concerning acceptable qualifications. Applicants should examine departmental requirements with care.

Academic Fresh Start

Section 51.931 of the Texas Education Code provides that a resident of Texas may apply for admission to the University as an undergraduate student without consideration of course credit or grades earned 10 or more years prior to the semester the applicant plans to enroll. To be admitted, the applicant must meet the admissions standards in effect at the time of application. Students admitted under the "fresh start" option may not receive credit for any course work taken 10 or more years prior to enrollment. The Academic Fresh Start provision does not affect Texas Success Initiative exemptions claimed on the basis of college credit earned prior to September 1989.

After enrollment, a message will be posted to the student's academic record at UT Arlington indicating admission has been granted through the Academic Fresh Start provision. Once this option has been claimed and the student has enrolled at any state institution, the provision cannot be reversed. An applicant may use the Academic Fresh Start provision only once at UT Arlington.

Academic Fresh Start may be claimed only upon application to the University and will not be applicable to currently enrolled UT Arlington students. Once a student has enrolled, Academic Fresh Start may only be requested upon application for readmission to the University. Students apply for readmission after resigning for one calendar year. All requests for Academic Fresh Start should be made to the Office of Admissions by completing an Academic Fresh Start form (http://www.uta.edu/admissions/fresh_start.php).

Orientation and Early Registration

Orientation and Early Registration is a program which includes placement testing, group sessions to prepare for the transition to UT Arlington, resources for academic success, and an introduction to social and extracurricular opportunities. A highlight of the program is early advising and registration.

Upon completion of the admission requirements and admittance to the University, students are sent information regarding orientation from the UT Arlington Division of Student Affairs. The orientation program is required for all first-time freshmen students.

For students starting UT Arlington in the fall semester, several orientation options are available. New freshman students may attend one of several one-and-a-half-day sessions offered in June, July and August. Students have the option to stay overnight in the residence halls. Parents of freshman students are invited to attend a separate but concurrent program. There are limited accommodations for parents or guests on campus. Transfer students are also required to attend a one-day program in July or August. All Orientation programs conducted during the summer include Academic Advising and Early Registration. For students starting in the other semesters, Orientation and Early Registration is offered prior to the start of the semester. Please contact the UTA Division of Student Affairs for additional information regarding the orientation programs.

International Student Orientation

The New International Student Orientation provides new international students with information about immigration matters, health services and health insurance, registration procedures, academic rules and regulations, cultural adjustment, and Office of International Education programs and activities. Attendance at this orientation program is required for all non-immigrants who are new to UT Arlington, including transfer students. Orientations are offered on various days in the two weeks preceding each semester. Students are notified by letter of this New International Student Orientation at the time of notification of admission. The dates and details of orientation are included in this letter. Attendance at any other UT Arlington orientation does not substitute for attendance at the New International Student Orientation. Those who do not attend will not be allowed to register during regular registration and must attend a makeup orientation program before being allowed to register in late registration.

College Credit by Examination

The University of Texas at Arlington recognizes that many excellent students have gained academic achievement in certain subject areas prior to entering an institution of higher education. UT Arlington strongly encourages such superior attainment, recognizes it for academic purposes and permits students who have done such work to obtain course credit through examination. Students will be given the opportunity to receive credit by examination in courses within the regular curricular offerings of the University where proficiency may be practically and validly determined by examination.

UT Arlington uses several examination programs to assess the prior academic achievement of undergraduate students. The University awards credit for scores on certain tests from the College Board Advanced Placement Program (AP), the College Board College Level Examination Program (CLEP), the College Board SAT II: Subject Tests, the DANTES Subject Standardized Test (DSST), and the International Baccalaureate Program (IB). UT Arlington also offers advanced standing examinations prepared by departmental faculties.

The following policies govern the awarding of credit by examination by UT Arlington:

- Credit by examination (<http://www.uta.edu/universitycollege/prospective/testing-services/credit-by-examination>) is available to undergraduate students with a completed application on file, currently enrolled students, and formerly enrolled students who meet eligibility requirements. Provided the student has neither passed nor failed that course at the University of Texas at Arlington (including a Z in English). Credit by examination will not be given for a course the student previously passed or failed, or received transfer credit at UT Arlington. Additional eligibility requirements for certain courses are listed in Assessment Services Credit by Examination brochure or on their Web site.
- Although prospective students may take examinations to establish their eligibility to receive credit, credit is awarded only to currently enrolled students or to former students who meet eligibility requirements.
- Credit by examination may not be used for graduate credit and no such credit, graduate or undergraduate, may appear on graduate student transcripts.
- Credit earned by examination satisfies degree requirements in the same way as credit earned by passing courses except it does not count as credit earned in residence. Credit by examination cannot be used to satisfy general degree requirements for: (a) 30 semester hours in residence, (b) at least 18 semester hours in residence of advanced course work (courses numbered 3000 and 4000), to include 12 hours of advanced course work in the major field. Credit by examination can be used to meet prerequisites for higher-level courses.
- After the official Census Date, students may earn credit by examination for a course they are enrolled in only if the student drops the course with a W or upon written approval of the chair of the appropriate academic department. Once a grade is posted for the course the student may not petition for credit earned by exam.
- Most academic departments award semester hours of credit, but no letter grades. In a few subjects, credit may be awarded with grades of A, B or C, depending on the level of test performance. For each course in which grades are assigned, students may choose to accept credit hours recorded either with the letter grade or as credit only. Accepting credit only will not affect a student's cumulative grade point average. After credit has been posted to the academic record, a student's choice, letter grade or credit only, cannot be changed.
- To have credit reported to the registrar, official test scores must be sent to Assessment Services for credit by examination to be awarded. Students must complete a Petition to Record Credit by Examination at the Assessment Services office. Credit by examination will be posted to a student's official record after the student has enrolled and completed one semester at UT Arlington. Unsuccessful attempts to earn credit by examination are not recorded on students' academic records.
- Credit by examination on a transcript from another institution of higher education is considered transfer work and will transfer to UT Arlington, subject to the same conditions as corresponding resident course work from that institution. The Office of Admissions, Records and Registration is responsible for evaluating all transfer work.

Further information regarding test dates, registration procedures and deadlines, fees, current eligibility criteria and petitioning to record credit may be obtained from the Testing Services Office (<http://www.uta.edu/universitycollege/prospective/testing-services>).

Placement Examinations

Certain departments offer (or require of) the student an exemption from taking courses based on departmental placement examinations. Such exemption does not grant credit for the course but permits the student to enroll in the next course in the subject area.

Modern Language Placement Examination

The Modern Language Department recommends that students who are native speakers, have high school credit, or equivalent knowledge of French, German or Spanish language take a placement exam prior to enrolling in certain lower-division language courses. Modern Language placements tests are the CLEP (<http://www.uta.edu/universitycollege/prospective/testing-services/credit-by-examination/clep.php>) French, German, or Spanish Language exams and may be taken in an attempt to earn credit by examination. Students have the option to choose credit with letter grade or credit without letter grade for credit earned depending on level of test performance.

Texas Residency for Tuition Purposes

The Office of Admissions, Records and Registration determines Texas residency (<http://www.uta.edu/admissions/residency.php>) status for all new and continuing UT Arlington undergraduate students. Graduate students should contact the UT Arlington Office of Graduate Studies (<http://grad.uta.edu/prospective/apply/before>). A review of responses on the admission application is conducted by the residency determination official in accordance with Title 19, Chapter 21, Subchapter B of the Texas Administrative Code (<http://www.sos.state.tx.us/tac>).

When incomplete, insufficient or conflicting information is presented on the admission application, the student will be sent a Core Residency Questionnaire. This should be completed and returned to the Office of Admissions, Records and Registration (Box 19114, Arlington, TX 76019-0114) with the appropriate supporting documentation prior to registration. After the Core Residency Questionnaire has been reviewed, the student will receive a written response of the residency determination from the Office of Admissions, Records and Registration.

Report of Medical History

A Report of Medical History form will be sent to students when they are accepted to the university.

First-time students: Prior to registration, a first-time student must submit a Report of Medical History to UT Arlington Health Services (<http://www.uta.edu/healthservices>). It is the responsibility of the student to complete the health form and mail it to UT Arlington Health Services at least two weeks prior to registration. A Report of Medical History form will be sent to students when they are accepted for admission.

Students who are from countries other than the United States and who are not immigrants or have not been granted permanent residency: All students who are from countries other than the United States and who are not immigrants or have not been granted permanent residency must submit to UT Arlington Health Services an International Health Card issued within the past year. The International Health Card must note that the student has tested negative for tuberculosis. Once the card has been presented, the student will be cleared to register for classes. Students who do not present this card will not be permitted to enroll in classes.

International students: In addition to the International Health Card requirement, all international students must be tested by a U.S. medical facility for tuberculosis prior to the 25th class day. Failure to receive clearance from a U.S. medical facility will result in the removal from classes. Testing is available at UT Arlington Health Services.

First-time Non-U.S. Citizen/Non-Permanent Resident and Intensive English students: The University of Texas at Arlington requires all entering Non-U.S. Citizen/Non-Permanent Resident and Intensive English students to:

- Have a Tuberculosis screening and/or chest X-ray performed at UT Arlington Health Services upon arrival to the University for classes. TB screening or chest X-ray will be performed even if the student has been vaccinated with BCG (vaccine for TB usually administered to children and effective for 8-10 years-not widely used in the U.S.).
- Ensure that all documentation is complete and submitted to UT Arlington Health Services by the 25th class day or the student will be dropped from classes without reinstatement privileges. Students dropped from classes due to non-compliance will not be eligible for a refund of tuition or fees.

For the complete text of the UT Arlington policy concerning Tuberculosis screening, please visit UT Arlington Health Services (<http://www.uta.edu/healthservices>).

Freshman Admission Overview

A freshman applicant to The University of Texas at Arlington must have graduated from an accredited high school or is on track to graduate from high school prior to enrollment at UT Arlington. Applicants must submit an application for admission, an application fee, an official high school transcript indicating rank-in-class and official scores on the Scholastic Assessment Test (SAT) or the American College Test (ACT). Students enrolled in dual credit courses at a college while in high school are encouraged to submit an official college transcript. If an admission offer is made prior to high school graduation, a second official transcript that identifies the graduation date and final class rank will be required prior to the first day of classes.

All applications for admission from prospective freshmen are reviewed individually. Decisions are based on factors that predict academic success: rank-in-class; and scores on standardized admission tests at the freshman level.

Applicants who meet the minimum SAT/ACT requirements listed in this section or who graduated in the top 25 percent of their class from an accredited high school are guaranteed admission. Those who have a different pattern of rank and test scores will be considered on an individual basis and may be asked to submit additional information such as recommendations from teachers and counselors and/or a writing sample or an interview. Applicants who do not meet unconditional criteria will also be evaluated on the following factors:

- the socioeconomic background of the applicant
- whether the applicant would be the first generation of the applicant's family to attend or graduate from an institution of higher education
- whether the applicant has bilingual proficiency
- the applicant's responsibilities while attending school, including whether the applicant has been employed, whether the applicant has helped to raise children, or other similar factors
- the applicant's region of residence
- whether the applicant is a resident of a rural or urban area or a resident of a central city or suburban area in the state
- the applicant's involvement in community activities
- the applicant's extracurricular activities
- the applicant's commitment to a particular field of study

In addition to current university requirements for admission, Texas Education Code, Sections 51.803, 51.804, 51.804(2) require applicants to also have either:

1. successfully completed the Texas curriculum requirements for the recommended or advanced high school program or its equivalent; **OR**
2. satisfied ACT's College Readiness Benchmarks on the ACT assessment applicable to the applicant (minimum 18 on the English, 22 on Math, 21 on Reading, and 24 on Science) **OR** earned on the SAT assessment a score of at least 1,500 (Critical Reading + Math + Writing) out of 2,400 or the equivalent.

If the applicant does not meet admission requirements after individual review, admission may be deferred pending completion of a minimum of 24 transferable credit hours at another college with a grade point average of at least a 2.25. Students with at least a 2.0 but less than a 2.25 overall GPA are encouraged to apply and may be considered on a space available basis.

Current minimum freshman admissions requirements:

Rank in High School Graduating Class	Minimum Acceptable SAT Score	Minimum Acceptable ACT Score
Top 25%	No minimum score but students must submit scores.	No minimum score, but students must submit scores.
Second quarter	1050	22
Third quarter	Individual review	Individual review
Fourth quarter	Individual review	Individual review
No class rank	Individual review	Individual review

Minimum SAT scores are based on the highest Critical Reading score added to the highest Math score.

Engineering: For full-major status, applicants to the College of Engineering are required to present the following minimum test scores in addition to meeting other criteria specified in the College of Engineering section of this catalog:	1200	28
---	------	----

Prospective engineering majors who meet general university requirements for admission, but not the above listed test scores, will be reviewed and considered on the basis of individual merits by the College of Engineering for admission as pre-majors.

Meeting the above minimum university admissions requirements does not guarantee admission.

An applicant is entitled to automatic admission if the applicant meets the minimum requirements and is a child of certain public servants who were killed or sustained a fatal injury in the line of duty.(Section 51.803(e), Texas Education Code.

ENTRANCE EXAMINATION

Freshman applicants for admission must take the Scholastic Assessment Test (SAT) or the American College Test (ACT). The SAT is given nationally in October, November, December, January, April, May and June. Any student graduating from high school in 2006 or later, must also submit the writing

score from the new SAT or the writing score from the ACT. Students taking the ACT should make sure they sign up for the writing exam since it is an optional component of the regular ACT. Test applications and a sample test bulletin can be obtained from the Educational Testing Service, College Board ATP, CN 6200, Princeton, N.J. 08541-6200 or online at www.collegeboard.com/student/testing/sat/about.html (<http://www.collegeboard.com/student/testing/sat/about.html>). The ACT is given nationally in October, December, February, March and June. Test applications and a sample test bulletin can be obtained from American College Testing Program, P.O. Box 414, Iowa City, Iowa 52243 or online at www.actstudent.org (<http://www.actstudent.org>). Test applications can also be obtained from a local high school or from the Office of Testing Services at UT Arlington. Applications will not be accepted later than one month prior to the test date. The applicant should complete one of the examinations at least three months prior to the start of the semester for which admission is sought. Test scores are only considered official if they are received directly from the testing service or are included on an official transcript and are less than five years old.

Students age 25 or older as of the first day of classes for the term they wish to enroll are not required to submit SAT or ACT scores. Their admission will be determined by individual approval.

HIGH SCHOOL PREPARATION

It is recommended that students complete the college preparatory program of study offered by their high schools. For purposes of admission as a freshman to the University, passing the General Educational Development Test (GED) is not considered to be the equivalent of graduating from high school. An applicant with a GED certification may be eligible for admission under the Individual Approval clause explained later in this section of the catalog.

In order for majors in architecture, engineering, biology, biochemistry, chemistry, mathematics, and physics, and B.S. candidates in geology and psychology to start their mathematics sequence with analytic geometry, applicants should have at least 3 1/2 units of high school mathematics. Those who made low scores on the mathematics part of the SAT or the ACT examination are required to take, without credit toward a degree, the necessary mathematics courses prerequisite to taking analytic geometry.

EARLY ADMISSION AND HONORS ACADEMY PROGRAMS

The Early Admission and Honors Academy Programs are designed for high school students who wish to gain college credit at UT Arlington and the Honors College while still attending high school. It is also possible for students in some school districts to earn dual credit for their course work. Students should contact their home school district or the Honors College for further information regarding dual credit.

Early Admission students must submit:

- Applications for both general admission and the Early Admission Program.
- Official high school transcript showing course work through the sophomore year.
- Upon graduation, a final high school transcript showing graduation and final rank-in-class.

Admission to the Early Admission Program requires students to demonstrate college readiness. One way is by demonstrating they are exempt under the provisions of the Texas Success Initiative (TSI) (<http://www.uta.edu/admissions/successinitiative.php>):

- An SAT I score of at least 1070 (Critical Reading + Math only). (SAT math score must be at least 500 with Critical Reading score of at least 500), **or**
- An ACT composite score of at least 23 (ACT math score must be at least 19 with English score of at least 19), **or**
- A TAKS math score of at least 2200, TAKS English/language arts score of at least 2200 and a TAKS essay score of at least 3.
- A STAAR English II Reading Score of 2000+, an English II Writing score of 2000+, and a Geometry or Algebra II score of 4000+.

If a student meets the exemptions for the Reading, Writing, and Math requirements, they will be eligible for the EAP program. If they cannot meet any of the requirements they can also become eligible for the EAP program by achieving the minimum passing standards under the provisions of the Texas Success Initiative (TSI) (<http://www.uta.edu/admissions/successinitiative.php>). This provision requires the student to take the TSI Assessment exam.

The student only needs to take the portion of the test for which they have not met the exemption requirement stated above. If you have taken the TSI Assessment at another institution, please request to have the scores sent to the UT Arlington Office of Admissions, Records & Registration. Information to take the TSI Assessment on the UT-Arlington campus is available at the UT Arlington Testing Services website (<http://www.uta.edu/testing>).

Alternatively, an eleventh grade student is eligible to enroll in dual credit courses under the following conditions:

1. A minimum combined (Critical Reading + Math) PSAT score of 107 with at least a 50 on the Critical Reading and 50 on the Math section.
OR
2. A PLAN composite score of at least 23 with at least a score of 19 on both the English and Math sections.

Each individual admitted into this program will be enrolled in regular University classes and will receive credit for the course work completed at the end of the semester. A permanent academic record will be established for each person enrolled under the Early Admission Program.

Upon completion of the Early Admission Program, a student who wishes to continue enrolling at UT Arlington must complete a Freshman Application for Admission (<http://www.applytexas.org>) and submit an official final high school transcript. Admission to the Early Admission Program does not guarantee acceptance to the university as a freshman following high school graduation.

HONORS ACADEMY

The Honors College offers an outstanding program of study for exceptionally motivated high school students. A student may earn credit hours toward the college degree while also receiving credit toward the high school diploma for the course work taken at UT Arlington. Granting of dual credit is subject to the policies of each independent school district under the guidelines of the Texas Education Agency. Students should check with their home districts or the Honors College for more information regarding dual credit.

Honors Academy students must submit:

- Applications for both general admission and the Early Admission Program.
- Official high school transcript showing course work through the junior year. Students must be in the top 10 percent of their class.
- Official minimum SAT scores of 1,200 or minimum PSAT scores of 120, or minimum ACT scores of 27.
- Upon graduation, a final high school transcript showing graduation and final rank-in-class.

Qualified Honors Academy students are eligible to receive scholarships, will be enrolled in Honors College classes and will receive credit for the course work completed at the end of the semester. A permanent academic record will be established for each person enrolled under the Honors Academy Program.

Upon completion of the Honors Academy Program, a student who wishes to continue enrolling at UT Arlington must complete a Freshman Application for Admission and submit an official final high school transcript.

INDIVIDUAL APPROVAL

Graduation from an accredited high school is a prerequisite for admission to the University for most individuals. However, freshmen with the following educational profiles may be considered for admission under certain circumstances and will be automatically reviewed by Admissions officials:

- Graduates from unaccredited high schools
- Graduates from home schools
- Graduates with a General Educational Development (GED) certificate
- Students who are high school graduates and are age 25 or older. These students are not required to submit ACT or SAT scores.
- Texas residents age 21 or older who did not graduate from high school but scored at least 1010 on the SAT or 22 on the ACT.

Applicants should submit an admission application, application fee or fee waiver (ACT or SAT only) documentation, official transcripts of all high school grades completed from all unaccredited or home schools, official transcripts of all partially completed grades from accredited high schools, GED test scores if applicable, and official SAT or ACT test scores. Admission will be based on the freshman criteria stated in the Freshman Admission section of this catalog with emphasis placed on each individual's academic preparation and readiness to begin a college-level curriculum. Applicants with exceptional circumstances are encouraged to discuss their educational plans with an admission counselor.

Individuals age 25 or older who have graduated from an accredited high school may be considered for admission without taking the SAT or the ACT. Such students may, however, be ineligible for federal student aid under the "Ability to Benefit" rules. An individual admitted under this waiver will be required to enroll as an undeclared major until 30 semester hours have been successfully completed. An application for admission, an official copy of the high school transcript, official transcripts of all attempted college work and the application fee will be required for admission consideration. The testing waiver does not apply to international students who must submit the results of the SAT and TOEFL for admission purposes.

An applicant seeking admission under the Individual Approval provisions who has any course credit from previous college enrollment must meet the University transfer requirements for all college work attempted. Passing the General Educational Development (GED) Test is not recognized by UT Arlington as being equivalent to graduation from an accredited high school.

ADMISSION APPEAL

Students denied admission may appeal the decision by sending a letter of written appeal addressed to the Admissions Appeal Committee, The University of Texas at Arlington, Box 19111, Arlington, TX 76019. In the letter, students should provide the committee with the reason(s) they feel they should be admitted to the university and provide any additional information not provided at time of application including letters of recommendation, new transcripts, and new test scores. Students can expect a decision from the committee within two weeks from its receipt of the appeal.

Transfer Admission Overview

Prospective students who have attempted college-level courses beyond 24 hours are considered transfer students. An applicant who is not eligible to continue at another institution for academic or disciplinary reasons is not eligible for admission to The University of Texas at Arlington. Applicants, whether a new or former student, who have attended another collegiate institution may not disregard any part of their academic record except as permitted under the "fresh start" option described in this section. Applicants who fail to list all previously attended institutions on their application for admission are subject to disciplinary action, including expulsion, and possible loss of credit for subsequent work taken at the University.

All college-level courses except those determined to be developmental or pre-college-level courses are used to compute a transfer grade point average. Grades earned in every course attempted are part of this calculation with the exception of 10 hours of repeated courses. In the case of repeated

courses, the second course attempt is counted and the first forgiven even if the second attempt is a withdrawal. Subsequent attempts after the second time a course is taken are counted toward the grade point average calculated for transfer admission. To be considered for admission, transfer applicants must have a minimum 2.25 GPA on all previous college work. Students with at least a 2.0 but less than a 2.25 overall GPA are encouraged to apply and may be considered on a space available basis.

FRESHMAN TRANSFERS

(less than 24 college hours completed)

Applicants who have completed fewer than 24 hours of transferable credit must have a grade point average of at least 2.25 to be admitted. In addition, they must meet the admission requirements for entering freshmen at UT Arlington. Freshman transfer students must submit: 1) an official score report from a national administration of the SAT I or ACT, 2) an official high school transcript showing graduation and rank-in-class, 3) a completed undergraduate application form, 4) official transcripts of all college work attempted, and 5) the application fee or fee waiver documentation. Students taking college classes while still in high school will be considered freshmen instead of transfer students.

TRANSFERS WITH SOPHOMORE OR HIGHER CLASSIFICATION

(24 or more college hours completed)

Applicants who have completed 24 or more hours of transferable credit must have at least a 2.25 grade point average to be admitted. Students taking college classes while still in high school will be considered freshmen instead of transfer students.

Prospective transfer students who have completed 24 or more transferable credit hours must submit: 1) an undergraduate application for admission, 2) an official transcript from each accredited college or community college attended, and 3) the application fee or fee waiver documentation.

TRANSFERS WITH DEGREES

An applicant who has received a degree from another accredited senior college or university will be admitted as a degreed undergraduate. Acceptance into specific academic programs will be subject to the criteria set by each academic department. Applicants seeking a second baccalaureate degree must submit an application for admission, application fee, and an official transcript from each college attended as an undergraduate student to the Office of Admissions. The applicant should submit required credentials for admission by the priority deadline date. Non-degree seeking applicants must submit an application for admission, application fee, and an official transcript from the degree-granting institution. An applicant who wishes to take graduate course work before gaining admission to the Graduate School should contact the Office of Admissions, Records & Registration and the graduate advisor in the appropriate academic department.

CREDIT EVALUATION

The Office of Admissions, Records & Registration completes an evaluation of transfer credit for all admitted degree-seeking students. This evaluation does not constitute approval of the credit for use toward a degree. Decisions on which transferred courses satisfy degree requirements are solely within the jurisdiction of a student's academic department. Policies governing the evaluation of transfer credit include the following:

- Transfer credit is generally awarded for academic course credit earned from regionally accredited institutions or from institutions that are candidates for regional accreditation if the course credit was earned during the candidacy period.
- Occupational or some workforce courses from junior/community colleges, developmental courses, and courses classified as below freshman level by the sending institution are not transferable and will not count toward a degree.
- Workforce Courses that are agreed upon in Articulation Agreements between Texas community colleges and UT Arlington are transferable. The use of these courses is in the jurisdiction of the student's academic department.
- Junior/community college courses transfer as lower-division (freshman or sophomore) credit. Undergraduate courses from senior colleges transfer at the same level, lower- or upper-division, as they were taken. Graduate level course work may be transferred as upper-division credit at the written request of the student. Any graduate courses transferred in as upper-division undergraduate work will not be eligible for use at a later date in the graduate school.
- No limit is placed on the total amount of course credit accepted in transfer from either junior or senior institutions. However, use of transfer credit toward a degree may be limited by the student's academic department.
- Credit-by-examination earned at other institutions is treated as transfer credit only if the sending institution posts such credit on the student's transcript with regular catalog course numbers and with a grade of at least C, with the symbol CR, or with a similar designation representing credit earned without letter grade.
- Evaluation of military transcripts that include ACE, AARTS, DD214, SMART, CCAF and the Defense Language Institute are evaluated for all admitted students.
- Credit in which a grade of D was earned is not transferable and will not count toward a degree.
- Grade Point Averages earned at other institutions are not transferred to UT Arlington.
- Transfer credit evaluations.

1. University course numbers may be modified in transfer credit evaluations to reflect differences in the number of credit hours. For example, if a course has 4 hours from the sending institution such as Mathematics "College Algebra," the course will be brought in as MATHTRAN 1000, since UT Arlington's "College Algebra" is a three-hour course.
2. Courses taught at other institutions often have no direct UT Arlington equivalents, but may be accepted in transfer. If such a course is in a discipline offered at the University, credit without a specific course number is awarded in the appropriate academic department. General elective credit may be awarded if no equivalent department exists at the University; use of elective credit toward a degree may be restricted by the student's academic department.
3. Courses taught at other institutions that are determined to be developmental are not accepted as transfer credit. Transfer credit of English courses taught at institutions in non-native English-speaking countries may be restricted or not accepted.

TRANSFER OF LOWER DIVISION COURSE CREDIT

UT Arlington operates in accordance with Section 61.821, et seq., of the Texas Education Code. This statute recognizes that all lower division academic courses are fully transferable among public institutions and count toward the same degree at any public college or university in Texas. As such, any Texas Higher Education Coordinating Board approved core or field of study curricula are fully transferable to equivalent UT Arlington academic programs with the following stipulations:

- No institution shall be required to accept in transfer more credit hours in a major than the number set out in the applicable Coordinating Board-approved Transfer Curriculum for that major, as prescribed by the current issue of the Coordinating Board's guide, Transfer of Credit Policies and Curricula.
- In any major for which there is not a Coordinating Board-approved Transfer Curriculum, no institution shall be required to accept in transfer more lower division course credit in the major applicable to a baccalaureate degree than the institution allows their non-transfer students in that major.
- The university will only accept grades of C or higher in transfer credit.
- No university shall be required to accept in transfer or toward a degree more than sixty-six (66) semester credit hours of academic credits earned by a student in a community college. Universities, however, may choose to accept additional credit hours.

CATALOG ELIGIBILITY FOR TEXAS COMMUNITY COLLEGE TRANSFERS

A student transferring from an accredited public community college in Texas has the same choice of catalog, designating degree requirements, that would have been possible if the student's dates of attendance at the University had been the same as the dates of attendance at the community college. However, the student's choice of major may affect whether or not transferable course work may be counted toward a degree.

RESOLUTION OF TRANSFER DISPUTES

If the University refuses to accept lower-division credit earned at another Texas public institution of higher education, students and the institution where the credit was earned will be given written notice that the transfer credit was denied. If the denial of transfer credit is contested, the University will attempt to resolve the issue with the student and the sending institution according to applicable rules and guidelines of the Texas Higher Education Coordinating Board. If the dispute is not resolved to the student's satisfaction or to the satisfaction of the sending institution within 45 days of the initial notification, the University will notify the Coordinating Board of the denial of the transfer credit and the reason for the denial. The Coordinating Board will resolve the dispute and notify all involved parties of its findings. For more information contact the Office of Admissions, Records and Registration at 817-272-6287.

Former and Continuing Students

A student who has attended UT Arlington previously, but has not been enrolled for one calendar year must reapply for admission by submitting an application for admission and application fee to the Office of Admissions, Records and Registration. Continuing students, those who have been officially enrolled at UT Arlington during the calendar year, do not need to reapply for admission.

If a former student has attended another college or university since last enrolling at UT Arlington, the student must submit official transcripts from all institutions attended. Academic performance in such work may be factored into the enrollment/eligibility process. Former students on academic probation or suspension upon resigning from UT Arlington may be required to obtain special permission to re-enroll from the academic dean's office of their intended major or from the University Advising Center.

Any student who withdraws from the University to perform active military service (not including Texas National Guard training exercises) will not have to reapply for admission, but will be readmitted upon a request made within one year of being released from active military services and may be eligible for the same financial assistance provided before the student's withdrawal. This right to readmission is afforded under Section 51.9242, *Texas Education Code*.

Applicants cannot be re-admitted without required credentials. Former international students seeking readmission must refer to the catalog requirements for international students.

Transient Admission Overview

Undergraduate students who are pursuing degrees at other colleges and universities during the long session (fall and spring semesters) and wish to continue their studies at the University for one semester may be admitted to some undergraduate programs as transient students. Individuals who wish

to enroll as a transient student must submit an admission application, application fee and official transcript from their home campus. Admittance requires good academic standing from the home institution. Transient students will be classified as non-degree seeking students and therefore are not eligible for Financial Aid through UT Arlington. Transient students may not enroll in two consecutive semesters at UT Arlington. A transient student who wishes to be admitted to the University on a regular basis must apply for admission in accordance with the procedures, criteria and deadlines governing transfer admission. All transcripts from previously attended institutions must be submitted. Students who attend the University as transient students and then are admitted on a regular basis are immediately subject to the University's academic regulations as well as the rules of the Texas Success Initiative (see section below). In particular, such students will be placed on scholastic probation upon enrollment if their grade point average for work undertaken as a transient student at the University is below 2.0. All transient students are classified as non-degree seeking and therefore not eligible for Financial Aid.

Texas Success Initiative Overview

All new entering UT Arlington undergraduate degree-seeking students must meet the requirements of the Texas Success Initiative (TSI). (Texas Education Code, Section 51.3062 and 19 Texas Administrative Code §4.51, et seq.)

The Texas Success Initiative has been developed by the state legislature to ensure student success at institutions of higher education. The two major steps of the program are (1) assessment of each student's academic skills in reading, writing, and math before enrolling and, (2) advisement into appropriate developmental coursework for any academic skills that need improvement. Under the Texas Success Initiative, all new entering students must take the Texas Higher Education Assessment test unless the student is exempt.

You are exempt if you:

- took the SAT I less than 5 years ago and made a qualifying score of 1070 total (does not include essay), with 500 verbal and 500 math.
- took the ACT less than 5 years ago and made a qualifying score of 23 composite, with 19 English and 19 math.
- took the STAAR EOC exams less than 3 years ago and made a qualifying English Reading & Writing score of 2000+ and Math score of 4000+.
- took the TAKS test less than 3 years ago and made a qualifying score of 2200 reading, 2200 math and 3 on the writing.
- have a bachelor's degree or associate's degree from an institution of higher education.
- are serving on active duty as a member of the armed forces of the United States, the Texas National Guard, or as a member of a reserve component of the armed forces of the United States and have been serving for at least three years preceding enrollment.
- were honorably discharged, retired or released from active duty on or after August 1, 1990 as a member of the armed forces of the United States, the Texas National Guard, or as a member of a reserve component of the armed forces of the United States.
- a student who has previously attended any institution and has been determined to have met readiness standards by that institution * a student who is enrolled in a certificate program of one year or less (Level-One certificates, 42 or fewer semester credit hours or the equivalent) at a public community college, a public technical institute, or a public state college.
- are a non-degree seeking or non-certificate-seeking student.

TAKING THE TSI ASSESSMENT

UT Arlington requires incoming students who are not exempt to take the TSI Assessment Exam. The UT Arlington Testing Services (<http://www.uta.edu/universitycollege/prospective/testing-services>) office offers the opportunity for students to take this exam.

If you took the TSI Assessment and did not have the scores sent to UT Arlington, please have the scores sent directly to the Office of Admissions, Records and Registration.

If you attended a Texas public college for dual-credit while you were in high school or are transferring from a Texas public college, your test scores should be listed on the transcript you submit to UT Arlington. It is your responsibility to ask your community college to send an official transcript to the UT Arlington Office of Admissions.

We also accept faxed scores if they are sent directly from the college you attended. The fax number for the Office of Admissions, Records and Registration is: 817.272.3435. **Note:** The Office of Admissions, Records and Registration will not accept transcripts for evaluation of transfer courses by fax.

If you do not pass (<http://www.uta.edu/admissions/tsi.php>) a section of the TSI Assessment, you are required to enroll in developmental coursework for the failed areas. You should speak with your advisor to ensure that you are enrolled in the right courses.

Degree Requirements

Undergraduate Degree Requirements (p. 52)

Graduate Degree Requirements (p. 45)

Students are responsible for requesting the preparation of a degree plan through their departmental academic advisor during the semester following admission to a degree program. No deviation from a degree plan will be allowed except with the written approval of the departmental advisor. Students should follow the graduation procedures described in the Graduation section of this catalog (p. 69) in order to be eligible for degree conferral.

Each student must complete degree requirements in accordance with the Catalog in force at the time the student entered the program in which the degree will be awarded or, at the student's option, the catalog of any subsequent year in which the student was in residence. If a student chooses to complete degree requirements in accordance with the catalog of a year subsequent to that in which he/she entered the degree program.

Please note that changes in University regulations and policies become effective for all enrolled students in the year for which the catalog is in force, regardless of the year of initial enrollment. Thus, students may choose to satisfy degree requirements specified in an earlier catalog, but all must observe University regulations and follow graduation procedures prescribed in the Catalog in force in the intended semester of graduation.

Graduate

Each graduate student must complete degree requirements in accordance with the catalog in effect at the time the student entered the graduate program in which the degree will be awarded or, at the student's option, the catalog of any subsequent year in which the student was in residence.

Please note that changes in University regulations and policies become effective for all enrolled students in the year for which the catalog is in effect, regardless of the year of initial enrollment. Thus, students may choose to satisfy degree requirements specified in an earlier catalog, but all must observe University regulations and follow graduation procedures prescribed in the catalog in effect in the intended semester of graduation.

Enrollment Requirements

All students must be enrolled in their graduate program in any term in which they are completing graduate degree requirements including taking the final master's exam, conducting research, or defending a thesis or dissertation. Enrollment in courses outside the major and minor fields will not satisfy enrollment requirements. Enrolled students who do not complete all requirements by the beginning of the next long semester must enroll to complete remaining degree requirements.

Funded Students

Funded students are normally expected to be enrolled as full time students while holding an assistantship or associateship. Master's students who must enroll in a six-hour thesis course or doctoral students who must enroll in a six or nine-hour dissertation course or three-hour dissertation completion course because they have not received a passing grade in one of these courses must enroll in one of these courses and receive a grade of P in their final semester. However, master's students who need fewer hours to complete their degrees may petition for a waiver of full time enrollment as described in the Assistantship/Associateship Policy (p. 57) section of this catalog.

Credit Toward Degrees and Certificates

Only courses completed with a grade of A, B, C, or P can satisfy graduate degree or certificate requirements. However, courses in which grades of D or F are earned will affect a student's grade-point average. A student must have a B (3.0) grade-point average in courses included in their degree plan and a B (3.0) average in all work undertaken as a graduate student to have credits applied toward a graduate degree or certificate.

Credit for Repeated Courses

A student may repeat a course only if that course is specifically designated in this catalog as one that can be repeated for credit. A student who fails to receive credit (earns a grade of D or F) may repeat the course in order to obtain credit, in which case the grades for both attempts will count in computing the student's overall grade-point average. No student will be allowed to repeat a course in order to change a passing grade of C or higher.

Course Credit Applied to More Than One Degree

No course that has been applied to any degree, at any graduate or undergraduate institution, may be applied to any other degree, either directly or by substitution except in approved dual degree or approved fast track programs. The amount of shared credit between degrees in dual degree programs is limited and varies with the total number of hours needed to complete both degrees. Similarly, the amount of credit that can be shared in fast track programs is also limited. Details may be found in descriptions provided by participating programs elsewhere in this catalog.

Credit for Advanced Undergraduate Coursework

Up to nine hours of advanced undergraduate credit from UT Arlington or another institution may be applied to a master's degree program if the hours have not been used to earn a previous degree and have the approval of the appropriate Graduate Studies Committee and the Academic Dean. Approved fast track programs may allow dual credit.

Earning Graduate Course Credit as a UT Arlington Undergraduate Student

Courses taken in undergraduate status may not be applied directly to a doctoral program.

Some departments do not permit students to enroll in graduate courses unless they have been admitted to a graduate program. Others allow students enrolled as undergraduates to take a limited amount of graduate coursework under the conditions described below.

All undergraduate students should consult with the appropriate graduate advisor before attempting to register for graduate courses.

Advanced UT Arlington Undergraduates (Current Seniors)

An undergraduate student at the University of Texas at Arlington may not use graduate courses (numbered 5000 and above) to fulfill undergraduate degree requirements except as part of an approved fast track program. However, an undergraduate needing no more than 12 hours in one term (six semester hours in one summer session) to complete all the requirements for a bachelor's degree may register for graduate courses and apply them toward a master's degree at UT Arlington under the following conditions:

1. In no case may a student previously dismissed from or denied admission to a graduate program enroll in graduate courses or reserve courses for graduate credit.
2. All work for undergraduate credit must be completed during that term in which the student initially enrolls in graduate courses.
3. Total registration for all work may not exceed 15 semester hours in a term (or 12 semester hours in the summer sessions).
4. The student must submit to the graduate advisor a "Reservation of Courses for Graduate Credit by Undergraduate Students" form (available from graduate advisors). The reservation must be approved by the graduate advisor and the Academic Dean. The Office of Admissions, Records and Registration must certify that the reserved credit will not be applied to the student's undergraduate degree requirements.
5. The student must have at least a 3.0 undergraduate GPA to be eligible to enroll in a graduate course and to reserve it for graduate degree credit.
6. Courses taken at UT Arlington and reserved for graduate credit may be applied to a master's degree program only if a grade of A, B, C, or P was earned.
7. Credit is officially accepted for application to a graduate program when a student is unconditionally admitted to UT Arlington.
8. A maximum of 12 semester hours of graduate level courses may be reserved.

Students Holding Bachelor or Higher Degrees Enrolled as Degreed Undergraduates

Students who have completed their undergraduate studies and have been awarded their bachelor's degree may enroll as degreed undergraduates in graduate-level course work and receive graduate credit at UT Arlington under the following conditions:

1. Courses taken at UT Arlington and reserved for graduate credit may be applied to a master's degree program only if a grade of A, B, C, or P was earned.
2. No more than 12 semester hours of credit earned while a degreed undergraduate may be applied for credit toward a master's degree. Students must file a request, approved by the graduate advisor, the Committee on Graduate Studies, and the Academic Dean to apply such credits toward a graduate degree.
3. All courses that are applied to a master's degree must have been completed no more than five years before enrollment in a graduate program at UT Arlington. If the student has completed more than 12 semester hours of graduate courses in undergraduate status, only graduate courses completed within five years of enrollment in a graduate program at UT Arlington will become part of the graduate record and considered in computing the student's grade-point average.
4. A student may elect to apply all graduate courses completed in the last five years toward their degree or to apply none of this work. Selective application of courses is not permitted. If any courses are applied for credit toward a master's degree, all courses completed within the last five years will become part of the graduate record.

Credit for courses taken as a non-degree seeking graduate student

Up to 12 graduate level (5000 and above) semester credit hours earned as a special non-degree seeking student may be applied to a graduate degree program, subject to graduate grading practices (p. 65). Review and approval of the appropriate Committee on Graduate Studies and the approval of Graduate Admissions are required. All grades in courses taken as a special non-degree seeking student and graduate certificate status will be considered in computing a student's graduate grade-point average.

Graduate Credit for Extension Classes

Work done in extension classes may be applied toward an advanced degree under the same conditions that apply to transfer work, except that credit for extension work is limited to six credit hours.

Courses That Do Not Provide Graduate Credit

- Personal Improvement Courses: Personal improvement individual or group music or art lessons and exercise and sports activities courses can not be used for the following: 1) to satisfy graduate degree requirements; 2) meet enrollment requirements; 3) in computation of graduate grade-point averages or determination of academic probation or academic good standing; 4) in calculation of grade-point averages for the purpose of admission to a Graduate Program or for certification for graduation from a Graduate Program.
- Audited Classes: University credit is not granted for audited classes and audited classes will not satisfy enrollment requirements.
- Correspondence Courses: Correspondence courses are not accepted for graduate credit.
- Credit by Examination: Credit by examination may not be used for graduate credit and no such credit, graduate or undergraduate may appear on graduate student transcripts.

Transfer Credit and Course Waivers

Transfer Credit Applied to Master's Degrees

Equivalent coursework completed at other institutions of recognized standing may be transferred to a master's degree program after evaluation and approval. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

No more than nine hours of transfer credit will be granted except in the professional master's programs that require more than 36 hours of coursework. In such programs, the number of transfer hours is limited to 25 percent of the total program hours. This rule does not invalidate agreements that are stated elsewhere in this catalog. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a master's program at UT Arlington must be approved in advance by the appropriate graduate advisor and Committee on Graduate Studies. All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at UT Arlington. A list of approved credit must be sent to the Office of Admissions, Records, and Registration to be posted to the student's university record.

Waiving Courses Required for Doctoral Degrees

Graduate-level coursework completed in the student's major area of doctoral study at institutions of recognized standing that grant doctoral degrees in those subject areas may serve to establish the student's competency in equivalent UT Arlington courses. Competency demonstrated by successful completion of equivalent courses may provide a basis for waiving some UT Arlington course requirements and the credit hours associated with those courses.

Waivers must be recommended by the student's graduate advisor and current supervising professor and their recommendation must be approved by both the Committee on Graduate Studies of the student's major area. Only courses in which the student has earned a B (3.0) or better (or a P if the UTA course is also graded P/F) will be considered for purposes of a waiver. In no case will final semester Dissertation course (6x99 or 7399) requirements be waived. An approved list of waived courses must be sent to the Office of Admissions, Records, and Registration to be posted to the student's university record.

Transfer Credit Applied to Graduate Certificates

Equivalent coursework completed at other institutions of recognized standing may be transferred to a master's degree program after evaluation and approval. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

The number of transfer units is limited to 50% of the total units required for the certificate, except in certificate programs that exceed 15 units, in which case 12 of those units must be taken in residence. This rule does not invalidate written agreements stated elsewhere in this catalog. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a master's program at UT Arlington must be approved in advance by the appropriate graduate advisor and Committee on Graduate Studies. All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at UT Arlington. A list of approved credit must be sent to the Office of Admissions, Records, and Registration to be posted to the student's university record.

Departmental, Program and College Program Manuals for Students

Many departments and programs issue program manuals, procedures and policy manuals, graduate student handbooks, and other informational publications for students and faculty in graduate programs. These publications may provide detailed and useful information; however, they are not statements of official policy of the University of Texas at Arlington nor of the University of Texas System. In all matters the *Rules and Regulations* of the Board of Regents of The University of Texas System, the *Handbook of Operating Procedures* of the University of Texas at Arlington and the University of Texas at Arlington Catalog shall supersede departmental, program or college publications.

Master's Degree Requirements

Degree requirements and academic performance standards given in this section are the minimum required. Satisfying these general requirements and standards, however, does not imply that all degree and program requirements have been met. Many programs set special course requirements and may require higher grade-point averages or other academic standards than those given in this section. Such program requirements and standards are included in individual program descriptions in this catalog and in departmental and college program manuals or policy statements. These special requirements shall not be considered in conflict with this catalog and shall have the same force as this catalog.

Degree Plans and Required Hours

Three degree plans (thesis, thesis substitute and non-thesis) leading to the master's degree are available. All programs, except those in Education and Public Administration, offer the thesis degree plan. In certain departments and programs, a student may follow a thesis substitute or non-thesis degree

plan upon recommendation of the appropriate graduate advisor. Plans available in each department or program are listed in the department-specific page of the catalog.

The **thesis degree plan** requires a minimum of 30 semester hours, of which at least 24 must be in coursework and 6 in a thesis course. The thesis must be approved by the thesis advisor and by a supervising committee of three or more members appointed by the Academic Dean. Students receiving advice and assistance from a faculty member in the preparation of a thesis must register for the appropriate course even if they are not on campus. Each term, after consulting with their graduate advisor, students must register for the amount of thesis credit commensurate with the efforts to be expended by the student and the thesis advisor in the preparation of the thesis. Once the student is enrolled in the thesis course, continuous enrollment is required. The student must be enrolled in six hours of thesis during the term in which the thesis is defended and the final Master's Examination is unconditionally passed. The degree candidate must defend the thesis in a final oral examination open to all members of the faculty.

The **thesis substitute degree plan** requires a minimum of 33 semester hours, of which at least 27 must be in coursework and 3 in an appropriate project or research course. The thesis substitute may include: 1) internship reports in programs in which the internship has been determined to be an essential component; 2) reports prepared in certain graduate seminar, conference or research courses; or 3) a design thesis in Architecture. The internship substitute requires a minimum of six semester hours in the internship course.

The **non-thesis degree plan** requires a minimum of 36 semester hours of coursework, of which at least 24 must be in the major area(s) of study.

Time Limit

Programs for the master's degree must be completed within six years (time in military service excluded) from initial registration in a graduate degree program. Students who exceed the published time limits for completing the graduate degree but wish to graduate, must petition the Academic Dean for an exception to the time limit policy.

Residence

Master's degree candidates are expected to spend the equivalent of two terms of full-time study in residence at The University of Texas at Arlington.

Foreign Language Requirement

A reading knowledge of at least one foreign language (classical or modern) is required by some departments or programs for master's degree candidates. Specific language requirements, if any, are given in the individual departmental and program degree descriptions.

Supervising Committees

The Academic Dean will appoint for each master's student a supervising committee upon recommendation by the graduate advisor and the appropriate Committee on Graduate Studies. The committee will normally consist of at least three members of the graduate faculty and will be responsible for the design of the student's program. One qualified external person who is not a member of the graduate faculty may serve as a voting member of a supervising committee if nominated by the appropriate Committee on Graduate Studies and approved by the Dean. The nomination form is available online (<http://grad.pci.uta.edu/faculty/forms>) and must be submitted by the student's department to the Office of Graduate Studies along with the nominee's curriculum vitae. Any external, non-voting members must be in addition to the three voting members and must be approved by the Academic Dean. The supervising committee conducts the final thesis examination for thesis degree plan candidates and determines scope, content and form of the final master's comprehensive examination for thesis substitute and non-thesis degree plan candidates.

Final Master's Examination

A final program examination is required for all master's degree candidates. The final master's examination can result in: 1) an unconditional pass with a recommendation to the Academic Dean that the candidate be certified to receive the earned degree; 2) a conditional pass with the requirement that additional conditions be met, which may include further work on the thesis or thesis substitute, additional coursework with a minimum specified grade-point average, or both (in all cases, the final master's examination must be repeated within a specified period); 3) failure, with permission to be re-examined after a specified period; or 4) failure, with recommendation to the Academic Dean that the candidate be dismissed from the program. Most programs limit to two the number of repeats of the final master's examination.

For **thesis degree plan** candidates, the examination will be an oral defense of the thesis. The examination will be conducted by all members of the student's supervising committee but will be open to all members of the faculty. The thesis examining committee must have copies of the thesis at least two weeks prior to the thesis defense. Thesis degree plan candidates must submit an electronic copy of the unconditionally passed thesis to the Library following the procedures for electronic submission.

For **thesis substitute or non-thesis degree plan** candidates, the final examination will be a comprehensive examination that is written, oral or both. The scope, content and form of the examination(s) is to be determined and administered by all members of the student's supervising committee. Some programs require successful completion of a specified course in the final term of study to satisfy this requirement.

The Final Master's Examination Report must be filed no later than three weeks before the date on which the candidate expects the degree to be conferred.

Master's Thesis

All master's students in the thesis option must be aware of requirements, components and deadlines associated with the thesis, final defense, and submission of the thesis to the Library. Thesis format review and approval by the Library are required and must be completed by the published deadlines in order to graduate from UT Arlington.

Enrollment Requirement

A thesis degree plan student must be enrolled in the appropriate thesis course in the term in which the thesis is defended. Social work students will enroll in SOCW 6393 to conduct thesis research and SOCW 6398 in the term in which the thesis is defended. All other thesis option students must be enrolled in the appropriate 6 hour thesis course in the term in which the thesis is defended.

Thesis Manuscript Preparation

Students pursuing a thesis option master's degree must have the format of the thesis manuscript approved before the degree can be conferred. The Library specifically checks the document for conformity to UT Arlington formatting requirements. Details regarding thesis formatting requirements can be found on the UT Arlington Library website (<http://www.uta.edu/library/etd>).

Mechanical Check

The format of all theses must be reviewed and approved by the Library before the theses will be accepted as satisfying the thesis requirement of the Master's degree. Master's thesis students must submit a copy of their thesis electronically to the ETD Coordinator in the UT Arlington Library for a complete review of the format of the entire manuscript. This review is called the mechanical check. Students may be required to resubmit the document for additional checks depending on the nature and number of formatting errors found. The thesis submitted for mechanical check should be complete and as near to being in final format as possible.

Final Submission

After the thesis has been through the required mechanical check process and has been approved by the student's committee and the Library, the final copy of the thesis must be submitted via the University's electronic submission process. The final thesis is University property and a student may make no private agreements with employers, funding sources, or others that restrict or infringe upon University rights. Thesis copyrights, where applicable, are held by the student author. Thesis fees are explained in the Tuition and Fees section of the Catalog.

Thesis Defense

The thesis defense will be a public oral examination open to all members of the faculty. Questioning of the candidate will be directed by the student's thesis supervising committee. All members of the student's committee must be present at the defense.

Although the defense is concerned primarily with the thesis research and its interpretation, the examining committee may explore the student's knowledge of areas relevant to the core of the thesis problem. The thesis defense may result in a decision that the candidate has 1) passed unconditionally; 2) passed conditionally with remedial work specified by the committee; 3) failed, with permission to be re-examined after a specified period; or 4) failed and dismissed from the program. The thesis must be approved unanimously by the student's thesis supervising committee and by the Academic Dean. Regardless of the outcome of the defense, the thesis defense results must be submitted to the Office of Admissions, Records, and Registration.

Dual Degrees

Students may pursue dual degree programs other than those specifically defined in the catalog with prior approval of the appropriate Committees on Graduate Studies and the Academic Dean.

Students in any dual degree program must be admitted to each participating program. Unless otherwise stated under the dual degrees programs specified elsewhere in this catalog, the number of hours that may be used jointly will be determined by the total number of hours required by both degree programs if completed separately. For purposes of dual degree programs, the total number of semester hours required for both degrees if completed separately is defined as the number of semester hours required for a student to complete all advanced degree requirements (excluding deficiency, leveling and prerequisite courses) for both degrees.

1. Six semester hours may be used jointly when the total number of hours required for both degrees is 60;
2. Six to 12 semester hours may be used jointly when the total number of hours required for both degrees is between 60 and 72 hours;
3. Six to 18 semester hours may be used jointly when the total number of hours required for both degrees exceeds 72 hours.

Admission to and enrollment in the programs for a dual degree must be concurrent. Students must be admitted to the second program before completing more than 24 semester hours in the first program, exclusive of leveling, deficiency or foundation courses, and must complete the second degree within three academic years following completion of the first.

All grades earned in dual degree status are used for purposes of determining academic good standing, academic probation and graduate requirements.

Students must be in good standing in both programs to continue in a dual degree program. Students who are dismissed from either program are no longer considered to be in a dual degree program. These students may enroll in and use courses for credit toward the degree program in which they

are in good standing only. Students may not take courses in the program from which they have been dismissed and may not use such courses for dual degree credit.

Dual degree programs are available at the master's level only. Not all graduate programs participate in dual degrees.

Doctoral Degree Requirements

The Doctor of Philosophy (Ph.D.) is the highest degree offered by The University of Texas at Arlington. The degree is awarded only for academic work of distinction through which the student demonstrates superior scholarship and capacity for original work. Requirements for the doctoral degree listed below are the minimum required. Meeting all of these requirements does not result automatically in the awarding of the doctoral degree. All departments and programs have additional requirements for a high level of scholarly achievement that must be met by successful doctoral candidates. In all doctoral programs, the basic requirements are that a student 1) attain mastery of a field of knowledge as determined by the appropriate Committee on Graduate Studies and demonstrated in a general examination; and 2) present evidence of a capacity to complete a significant program of original research by preparation of a dissertation.

To be admitted to a doctoral program, an applicant must have completed a master's degree or at least 30 semester credit hours of graduate coursework.

Degree Plans and Required Hours

The doctoral degree cannot be earned solely by passing certain courses and accumulating a specified number of credit hours; however, a department or program may require a core group of courses for all of its doctoral students. Courses are generally concentrated in the student's major field, but some are normally taken in one or more complementary minor fields. In interdepartmental programs, the major work may be divided among two or more primary fields.

The University imposes no specific semester-hour requirements for the doctoral degree except for residence requirements included in individual degree program descriptions.

Time Limit

All requirements for the doctoral degree must be completed within four years after the student unconditionally passes the comprehensive exam. Students who exceed the published time limits for completing the graduate degree but wish to graduate, must petition the Academic Dean for an exception to the time limit policy.

Residence

Residence requirements vary widely among doctoral programs. For specific requirements, consult the Degree Requirements section under individual departments and programs offering the doctoral degree.

Foreign Language Requirement

Prior to scheduling the doctoral comprehensive examination, the University requires evidence that the student has a reading knowledge of one foreign language applicable to the student's field of study or has attained proficiency in a research-tool area such as computer sciences or experimental statistics. The foreign language requirement may be met by 1) successfully passing an examination prepared by an appointee of the Academic Dean; 2) making an acceptable score on the Educational Testing Service Graduate School Foreign Language Test; or 3) earning a grade of B or higher in French, German or Russian 4331 and 4332, or equivalents. The foreign language substitute research tool requirement may be met by a method determined by the appropriate Committee on Graduate Studies and approved by the Academic Dean. Other suitable substitutes may be approved by the Committee on Graduate Studies and Academic Dean.

Diagnostic Evaluation

During the student's first year of doctoral program work the student must demonstrate potential to successfully complete a degree program. The method of assessing the student's potential will be determined by the appropriate Committee on Graduate Studies and may be in the form of a written or oral examination, personal interviews with faculty members, successful completion of certain courses in the first semester of residence, or by any combination of these methods. Results of the diagnostic evaluation may be 1) approval to continue in the doctoral program; 2) approval to continue with specified remedial work; 3) failure, but with permission for assessment through a second diagnostic evaluation after a specified period; or 4) failure and termination in the program. The student must be enrolled in the graduate program in the term in which he/she completes the diagnostic evaluation.

The results of the diagnostic evaluation must be filed in the Admissions, Records, and Registration Office no later than after completion of 18 semester hours of coursework while enrolled in a doctoral program at UT Arlington .

After the student successfully completes the diagnostic evaluation, the Academic Dean will approve an examining committee. Members for the committee are recommended by the graduate advisor and appropriate Committee on Graduate Studies. The committee will consist of no fewer than 3 voting members, at least two of whom must be from the student's major area. Committees in interdisciplinary programs must include at least four voting members with two members coming from each discipline. Individual programs may require the committee to have more members and students must conform to such requirements. One qualified external person who is not a member of the graduate faculty may serve as a voting member of a supervising committee if nominated by the appropriate Committee on Graduate Studies and approved by the Graduate Studies Office. Any external,

non-voting members must be in addition to the required number of voting members. Students should consult with their program's graduate advisor to make sure their committees have sufficient membership to meet program requirements.

The committee is responsible for design and direction of the student's program.

Comprehensive Examination

Students are eligible to take the comprehensive examination after giving evidence to their doctoral committee of adequate academic achievement by having completed all or most coursework requirements for a degree. The comprehensive examination usually marks the end of formal coursework and the beginning of concentrated work on dissertation research and preparation. The student must be enrolled in the term in which he/she takes the comprehensive examination.

The comprehensive examination may be written, oral, or both. Its scope, content, and form are determined by the student's examining committee with approval of the appropriate Committee on Graduate Studies. The student must submit a Request for the Comprehensive Examination and the request must indicate the time, place, and form (oral and/or written) of the examination and include signatures of all members of the examining committee.

In some departments and programs comprehensive examinations are given semiannually so students should consult their graduate advisor in that program for appropriate regulations and procedures.

The comprehensive examination may result in 1) unconditional pass and recommendation to proceed to the next phase of the program; 2) approval to remain in the program, but required to meet certain specified additional criteria; 3) failure, but with permission to retake the examination after a period specified by the examining committee; or 4) failure and dismissal from the program.

Dissertation

The dissertation represents the culmination of the student's academic efforts and so is expected to demonstrate original and independent research activity and be a significant contribution to knowledge.

All doctoral students must be aware of requirements and deadlines associated with the dissertation, final defense, and submission of the final copy of the dissertation.

Enrollment Requirements

1. Registration in an independent study, research, or similar course implies an expected level of effort on the part of the student that is at least equivalent to that of an organized course of the same credit value.
2. Doctoral students will not be required to register for more than nine credit hours during any term with these exceptions:
 - a. Doctoral students who are enrolled in nine credit hours of organized courses and who are also doing research related to their dissertation may be required to register for up to three hours of research for a total of 12 credit hours.
 - b. Doctoral students supported as a graduate research or teaching assistants may be required to register for 12 credit hours (no more than nine credit hours to be in organized courses), as determined by the students' graduate program.
3. Doctoral students who are required to register solely to satisfy the continuous enrollment requirement may register 3 credit hours during each term.
4. Doctoral students may not register for more than 12 semester hours in a term unless such registration is approved by the student's graduate advisor.
5. A doctoral student working on a dissertation should be enrolled in an appropriate 6X99 or 7399 dissertation course. Once the student is enrolled in a dissertation course, continuous enrollment is required. A student receiving advice and assistance from a faculty member in the preparation of a dissertation must register in the course even if the student is not on campus. Doctoral students must enroll in the appropriate 6699, 6999 or 7399 Dissertation Completion course the semester in which the dissertation is defended. Students typically enroll in these courses defend and apply for graduation in the same term. The Dissertation Completion course (7399) may only be taken once and cannot be repeated.

Dissertation Committee

After the student has passed the comprehensive examination, the doctoral supervising committee may be altered or expanded to accommodate the dissertation research needs of the student. The committee will consist of no fewer than 3 voting members. Individual programs may require the committee to have more members and students must conform to such requirements. One qualified external person who is not a member of the graduate faculty may serve as a voting member of a supervising committee if nominated by the appropriate Committee on Graduate Studies and approved by the Graduate Studies Office. Any external, non-voting members in addition to the required number of voting members of the committee must be approved by the Office of Graduate Studies. Students should consult with their program's graduate advisor to make sure their committees have sufficient membership to meet program requirements. The dissertation supervising committee is responsible for providing feedback regarding the student's dissertation, attending the defense, and determining the results of the student's defense.

Dissertation Manuscript Preparation

Students pursuing a doctoral degree must have the format of the dissertation manuscript approved by the UTA Library before the degree can be conferred. Details regarding dissertation formatting requirements can be found on the UT Arlington Library website (<http://www.uta.edu/library/etd>).

Format must conform to standards described in the UT Arlington *Manual of Style. A Dissertation Template* in which students can paste text is provided to simplify proper dissertation formatting and appearance.

Mechanical Check

The format of all dissertations must be reviewed and approved by the Library before the theses will be accepted as satisfying the dissertation requirement of the Ph.D. degree. Doctoral students must submit a copy of their dissertation electronically to the ETD Coordinator in the UT Arlington Library for a complete review of the format of the entire manuscript. This review is called the mechanical check. Students may be required to resubmit the document for additional checks depending on the nature and number of formatting errors found. The document submitted for mechanical check should be complete and as near to being in final format as possible.

Final Submission

After the dissertation has been through the required mechanical check process and has been approved by the student's committee and the Library, the final copy of the dissertation must be submitted via the University's electronic submission process. The final dissertation is University property and a student may make no private agreements with employers, funding sources, or others that restrict or infringe upon University rights. Thesis copyrights, where applicable, are held by the student author. Dissertation fees are explained in the Tuition and Fees section of the catalog.

Dissertation Defense

Doctoral students must be enrolled in the appropriate course in the term in which he/she defends the dissertation (see Enrollment Requirements above).

The dissertation defense will be a public oral examination open to all members (faculty, students and invited guests) of the University community. Questioning of the candidate will be directed by the student's dissertation supervising committee. All members of the student's committee must be present at the defense.

Although the defense is concerned primarily with the dissertation research and its interpretation, the examining committee may explore the student's knowledge of areas relevant to the core of the dissertation problem. The dissertation defense may result in a decision that the candidate has 1) passed unconditionally; 2) passed conditionally with remedial work specified by the committee; 3) failed, with permission to be re-examined after a specified period; or 4) failed and dismissed from the program. The dissertation must be approved unanimously by the student's dissertation supervising committee and by the Academic Dean. Regardless of the outcome of the defense, the thesis defense results must be submitted to the Office of Admissions, Records, and Registration.

Credit Toward Certificates

Only courses completed with a grade of A, B, C, or P can satisfy graduate certificate requirements. However, courses in which grades of D or F are earned will affect a student's grade-point average. A student must have a B (3.0) grade-point average in courses included in their degree plan and a B (3.0) average in all work undertaken as a graduate student to have credits applied toward a graduate certificate.

Grade Point Average

All grades in courses taken as a special non-degree seeking student and graduate certificate status will be considered in computing a student's graduate grade point average.

Transfer Credit Applied to Graduate Certificates

Equivalent coursework completed at other institutions of recognized standing may be transferred to a master's certificate program after evaluation and approval. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade point average.

The number of transfer units is limited to 50% of the total units required for the certificate, except in certificate programs that exceed 15 units, in which case 12 of those units must be taken in residence. This rule does not invalidate written agreements stated elsewhere in this catalog. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required.

Undergraduate

Undergraduate Admission to a Degree Program

Admission to the University's degree programs is determined by application to the academic unit offering the degree.

Degree Plan

Students are responsible for requesting a degree plan through their major department advisor during the semester following admission to a degree program. No deviation from a degree plan will be allowed except with the written approval of the department advisor, the chair of the major department and the academic dean.

Multiple Undergraduate Degrees at UT Arlington

While a student should carefully consider with an academic advisor if obtaining multiple undergraduate degrees is necessary for a given career path, it is possible for students to earn more than one undergraduate degree under the certain conditions and limitations.

DOUBLE MAJOR

A student who fulfills the specified requirements for two different majors under a single degree, simultaneously prior to graduation, completes a double major. For example, a student may complete a Bachelor of Arts in History and a Bachelor of Arts in Political Science – both B.A. degrees - or a Bachelor of Science in Psychology and a Bachelor of Science in Biology – both B.S. degrees. Prerequisite and field of study courses are required to complete both majors.

When applying for graduation, a student should note on the application that he/she will be completing an additional major. One diploma is issued and both majors are recorded on a student's transcript and diploma. Also, upon graduation, a student can attend multiple commencement ceremonies if the majors span across different colleges, though both majors are announced at any ceremony and college-specific policies apply for each ceremony.

DUAL DEGREE

A student who fulfills the specified requirements for two different majors from different degrees, simultaneously prior to graduation, will complete a dual degree. For example, a student may complete a Bachelor of Science in Biology and a Bachelor of Arts in Public Relations – a B.S. degree and a B.A. degree. The student must complete a minimum additional 30 credit hours beyond the degree plan with the greater required credit hours and also complete all prerequisite and field of study courses for both degrees.

Upon graduation, the student must complete two graduation applications (one application for each degree) and pay the processing fee for each degree. Upon graduation a student can attend multiple commencement ceremonies if the majors span across different colleges, though both degrees are announced at any ceremony and college-specific policies apply for each ceremony.

SECOND BACCALAUREATE DEGREE

A student who earns a bachelor degree subsequent to receiving the first bachelor degree will complete a second baccalaureate degree. The student must complete at least 30 credit hours in residence, above and beyond the minimum number of hours to complete the first degree. One diploma is issued and the new degree is added to the student's transcript.

Academic Advising and Limitations

Students seeking a double major or dual degree must:

- seek regular advising for each degree program from the department offering the major.
- understand the requirements to remain in and graduate from each degree program.
- adhere to proper course sequencing and complete the proper prerequisite and field of study courses for each degree program.

All requirements to enter a major in a given department must be met in order to pursue that major/degree. Students who are not meeting the requirements to remain in a particular degree program can be removed from that major/degree and prohibited from further enrolling in coursework to earn the additional undergraduate degree.

A student can only work on two major/degree programs simultaneously. Some degree programs may limit or not permit the pursuit of a double major or dual degree. Students should discuss possible limitations with both departmental advisors to determine what limitations may apply. Additional major degrees cannot be added to students' degree plans until they have completed at least 30 hours of college coursework. It is also important to note that once a degree has been conferred and applied to a student's transcript the degree cannot be removed from the academic record.

Minor Field of Study

A minor requires at least 18 semester hours in a given program, including six hours of advanced work. Specific course sequences for a minor are determined by the program offering the minor. Since some undergraduate degree programs do not offer minors, students should consult an advisor in their program of study.

In a case where the student wishes to pursue a minor comprised of courses within the same college as that which offers his/her major program of study, the student and his/her advisor will propose a program of study/list courses for approval by the dean of the college.

In a case where the student wishes to pursue a minor which includes one or more courses offered by a different college from that which offers his/her major program of study, the student and his/her advisor will propose a program of study/list of courses for approval by both (a) the dean of the college which offers his/her major, and (b) the dean of the college which offers the minor courses.

In either case, the approved minor program of study will be forwarded to the Office of Admissions, Records and Registration for verification and notation on the student's transcript.

The Core Curriculum

Given the rapid evolution of necessary knowledge and skills and the need to take into account global, national, state, and local cultures, the core curriculum must ensure that students will develop the essential knowledge and skills they need to be successful in college, in a career, in their communities, and in life. Therefore, with the assistance of the Undergraduate Education Advisory Committee, the Texas Higher Education Coordinating Board approved a 42 semester credit hour core curriculum for all undergraduate students in Texas, including a statement of purpose, six core objectives, and common component areas.

Statement of Purpose

Through the Texas Core Curriculum, students will gain a foundation of knowledge of human cultures and the physical and natural world, develop principles of personal and social responsibility for living in a diverse world, and advance intellectual and practical skills that are essential for all learning.

Core Objectives

- **Critical Thinking Skills** - to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information
- **Communication Skills** - to include effective development, interpretation and expression of ideas through written, oral and visual communication
- **Empirical and Quantitative Skills** - to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions
- **Teamwork** - to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal
- **Personal Responsibility** - to include the ability to connect choices, actions and consequences to ethical decision-making
- **Social Responsibility**: to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities

The UT Arlington Core Curriculum is comprised of the following component areas:

- Communication
- Mathematics
- Life and Physical Sciences
- Language, Philosophy and Culture
- Creative Arts
- American History
- Government/Political Science
- Social and Behavioral Sciences
- Foundation Area Option

Click here (p. 93) for the requirements and approved courses.

Core Complete: Students who transfer from a Texas public community college or public university and are certified as core complete shall have satisfied the core requirements of UT Arlington. Academic departments may, in some instances, require specific courses outside their major as prerequisites for major course work. (See "Credit Evaluation" and "Transfer of Lower Division Course Credit" under Undergraduate Admission section, p.15-16.)

Transcript Codes: The Transcript Codes identify specific core requirements on a student's transcript. For further information on core transferability, consult with an academic advisor, or refer to the Texas Administrative Code.

Field of Study: Students who complete an approved field of study curriculum in whole or in part will receive academic credit for the equivalent courses within their selected field of study at UT Arlington. View the field of study curriculums approved by the Texas Higher Education Coordinating Board at www.thecb.state.tx.us (<http://www.thecb.state.tx.us>).

Note: Consult a specific academic department in this catalog regarding further requirements for a degree in your area of interest.

Competence in Computer Use

Graduating students should be proficient in the use of computers. Proficiency is understood as the ability to use word-processing, database/spreadsheet and representative software of one's major discipline. Each student should be able to tap the communications, analytical and information-retrieval potential of computers to solve research problems and be able to evaluate the results. Students should consult their departmental, school or college advisors to determine the mechanisms by which they can demonstrate proficiency. An examination or completion of a department- or college-designated course may be required.

Competence in Communication

Students should have proficiency in communication skills including interaction in classroom settings to meet the needs of course work and the use of acceptable grammar and pronunciation in formal presentations. Students should consult their individual department, school or college advisors to determine the mechanisms by which they can demonstrate this competency. A proficiency examination or completion of a department- or college-designated course may be required.

Tuition for Excessive Undergraduate Hours

Pursuant to state law, students who first enrolled in any college or university in Fall 1999 or a later semester may be required to pay a higher tuition rate if attempted undergraduate credit hours exceed a designated limit. Students who first entered a college or university in Fall semester 1999 through Summer semester 2006 may be required to pay a higher tuition rate when the credit hours attempted at publicly-funded Texas colleges or universities exceed by 45 or more the hours required for the student's declared baccalaureate degree. Students who first entered a college or university in Fall semester 2006 and thereafter may be required to pay higher tuition rates when the credit hours attempted at publicly-funded Texas colleges or universities exceed by 30 or more the hours required for the student's declared baccalaureate degree. This requirement applies only to the first baccalaureate degree earned; students already holding one baccalaureate degree are exempt when enrolled in a second baccalaureate degree program.

This requirement applies to **all credit hours attempted at any publicly-funded Texas institution, including courses with a grade of D, F, or W**, as well as courses serving as a grade replacement and courses that have been grade replaced or grade excluded or grade forgiven. Credit hours earned at a private or an out-of-state institution are not counted toward the limit. Some other exceptions may apply.

For more information about this state law, see www.statutes.legis.state.tx.us (<http://www.statutes.legis.state.tx.us/Docs/ED/htm/ED.54.htm#54014>) (Texas Education Code, secs. 54.014 and 61.0595), or UT Arlington's excessive hours website (http://www.uta.edu/aa/recordsandregistration/content/student_services/excessive_hours.aspx).

Residency Requirements

The degree requirements for graduation in specific divisions of the University are explained at the beginning of each division in the catalog. In addition:

- Each candidate for a degree must complete and receive credit in residence* for:
 - a. 25 percent of the semester credit hours required for a degree (some colleges or schools may have additional residency requirements)
 - b. at least 18 semester hours of advanced (3000/4000 level) course work, to include 12 hours of advanced courses in the major subject
- Successful completion of a course of study prescribed by the major department, including a minimum of 36 advanced hours, is required for a degree at UT Arlington. Courses numbered with a first digit of 3 or 4 are classified as advanced courses.
- A minimum overall grade point average of 2.0 (C average) is required. In addition, a minimum grade point average of 2.0 in the major is required. Individual units will determine the specific courses to be included in the calculation of the GPA in the major, and may have higher overall GPA requirements for graduation than a 2.0. (The College of Business requires a 2.0 overall grade-point average, 2.0 on all course work taken in the college, and 2.0 within the major and concentration area for those majors having a concentration.)
- No more than 30 of the semester hours required for any degree may be completed by correspondence and/or extension, but may include approved online course work.
- Only the first four semester hours of exercise and sport activity (EXSA) and dance activity (DNCA) courses may be counted toward graduation. Additional activity courses taken will not be calculated in the student's grade point average. Each college, school or department will determine if activity courses satisfy degree requirements. Consult department academic advisor.
- Graduate courses (numbered 5000 and above) cannot be used to fulfill undergraduate degree requirements except in programs approved by the Undergraduate Assembly.
- To qualify for a second bachelor's degree, a student must complete all the degree requirements as stated in the catalog for that degree and must complete no fewer than 30 semester hours beyond those of the bachelor's degree program requiring the greater number of hours. The additional hours must be taken in residence at UT Arlington.

*The term "in residence" is defined as in residence at the (U.T. System) component which ultimately grants the degree. Residence credit does not include courses taken by extension or correspondence or exam, but may include approved online course work.

Two-Year Transfer Programs

The course offerings of the University are sufficient in the following fields for a student to complete the first two years of study toward a baccalaureate degree. The student must transfer to another institution to complete their studies. Information about the programs may be obtained from the Allied Health Coordinator in Life Sciences.

TWO-YEAR TRANSFER PROGRAMS

- Gerontology
- Dietetics

- Occupational Therapy
- Pharmacy
- Dental Hygiene
- Rehabilitation Science
- Prosthetics and Orthotics

Professions

HEALTH PROFESSIONS

MEDICINE AND DENTISTRY

In general, medical and dental school admission committees do not state a preference about an undergraduate major field, leaving the student free to choose a degree program suited to individual abilities and interests. Therefore, the student may choose any major, after conferring with an advisor, if the minimum requirements stated by the professional schools are met.

Admission Requirements for The University of Texas Medical and Dental Schools

English

6 semester hours of college English.

Biology

14 semester hours (12 semester hours of lecture & 2 semester hours of formal lab) of Biological Sciences.

Mathematics

Statistics (MATH 1308) is required. Some school may accept Calculus in place of Statistics, however you will need to confirm with the Health Professions Advisor.

Physics

8 semester hours, as required for college science majors, including the corresponding laboratory experience are required.

Chemistry

8 semester hours of General Chemistry AND 8 semester hours of Organic Chemistry.

Testing

The Medical College Admission Test (New MCAT) or Dental Aptitude Test (DAT) as required.

It is strongly recommended that students taking the 2015 MCAT complete Biochemistry I, Intro to Psychology, and Intro to Sociology. These courses will be covered on the new MCAT.

These requirements are representative of admission requirements for most other American medical and dental schools.

Health Professions Counseling and Advising

The Health Professions Counseling and Advising Center, located in Room 206, Life Science Building, provides counseling for students interested in medicine, dentistry, optometry, pharmacy and veterinary medicine. All pre-professional students should contact the office upon entering the University. The services provided include new student orientation, academic advising, career counseling and assistance in applying to professional school. In addition, numerous career materials including catalogs, applications and testing information are available in Room 206, Life Science Building. The health professions advisor coordinates the Health Professions Advisory Committee's evaluation recommended for each pre-medical and pre-dental student before applying to professional school. Students applying to professional schools should contact the health professions advisor at least one year prior to applying.

The Health Professions Advisory Committee, which is responsible for recommending students for medical and dental schools, bases evaluations on three factors: a student's academic record, resume, and personal qualities. The ideal applicant will demonstrate strength in all three areas. The committee may decline to recommend students who have not completed at least a portion of his/her pre-medical or pre-dental sciences at The University of Texas at Arlington, or may be unable to recommend students because their personal qualities are not known. Therefore, it is important that a student actively participate in health profession programs involving medical schools and the pre-health related student organizations. Also, students should interact with the faculty and pre-medical advisor for at least one year prior to medical school application so the advisors will have an opportunity to become familiar with the students' individual background.

THE LEGAL PROFESSION

Students are free to choose the degree program that best suits their interests and abilities; law schools do not require any particular major, degree plan, or courses. Students at UTA who are considering law school may take one of two routes, either: (1) selecting any major and minor, or (2) pursuing a major or minor that is specified as pre-law. Students wishing to focus on law-related courses at the undergraduate level should consider the pre-law degree plans in political science, criminal justice, philosophy, and history. Students who do not follow a pre-law degree track should choose any major and consult the advisor in the major department and/or in the University Advising Center. They also should confer with an advisor in the UTA Pre-Law Center with regard to recommended additional courses, depending on their degree plans. Law schools look favorably on students with diverse academic interests. UTA graduates not only in the liberal arts and business but also in math, biology, and engineering, for example, have been successful in law school and beyond.

State Law - 45 Hours to Major Requirement

45 Hours to Undergraduate Major Policy.

1. Each student enrolled in an a bachelor's degree program at UT Arlington shall file a degree plan no later than the end of the second regular semester immediately following the semester in which the student earned a cumulative total of 45 or more semester credit hours for coursework successfully completed by the student, including transfer courses, international baccalaureate courses, dual credit courses, and any other course for which the institution the student attends has awarded the student college course credit, including course credit awarded by examination.
2. A student transferring to UT Arlington who begins the student's first semester with 45 or more semester credit hours of course credit for courses shall file a degree plan no later than the end of the student's second regular semester (fall or spring term). A student whose first term is summer will have through the end of his/her fall term to file the degree plan. Students who are unable to be admitted to a major of their choosing must see an academic advisor in the University Advising Center for special permission to enroll.
3. At each registration for a semester, a student who is required to have filed a degree plan before that semester shall verify that:
 - (1) the student has filed a degree plan; and
 - (2) the courses for which the student is registering are consistent with that degree plan.
4. If a student does not timely file a degree plan as required, will be notified that the degree plan is required by law under House Bill 3025 and require the student to consult with an academic advisor for that purpose during the semester in which the student receives the notice. The student may not obtain an official transcript from the UT Arlington until the student has filed a degree plan.

Reverse Articulation Requirement. Legislation passes as part of House Bill 3025 also establishes a reverse articulation program for the awarding of an Associate degree. Students who transferred from, or previously attended, a lower-division institution of higher education, earned at least 30 semester credit hours for coursework at the lower-division institution, and have completed 90 semester credit hours while enrolled at a general academic institution, will be contacted by their general academic institution to provide permission to send the lower-division institution the student's transcript. The lower-division institution will evaluate the transcript to see if the student is eligible to receive an Associate's degree.

For additional information regarding the UT Arlington's administration of the Texas timely completion policy, please visit http://www.uta.edu/aa/recordsandregistration/content/student_services/timely_completion.aspx.

Financial Aid

Many sources of student financial aid exist at The University of Texas at Arlington. Any interested student should apply for assistance each year, as eligibility and funding availability can vary from one year to the next. Financial aid is generally limited to U.S. citizens or permanent residents. A minimum of half-time enrollment (as defined in the Registration (p. 69) section of the catalog) with the intent of obtaining a degree or certificate and the maintenance of satisfactory academic progress are required to participate in most aid programs. Students subject to selective service registration will be required to file a statement that the student has registered or is exempt from selective service registration to be eligible for financial aid.

Unless otherwise noted in this section of the Catalog, financial aid is available through the Office of Financial Aid in Room 252, Davis Hall, 817-272-3561. Information is also available on the financial aid Web site: www.uta.edu/fao.

Students subject to selective service registration will be required to file a statement that the student has registered or is exempt from selective service registration to be eligible to apply for state or federal financial aid including tuition waivers and exemptions provided through legislative action by the State of Texas.

Federal and State Programs

The University participates in most of the federal student financial aid programs offered through the U.S. Department of Education. In addition, several state and institutional programs are available for students with exceptional financial need. Among the programs in which the University participates are Federal Pell Grants, Federal Work-Study, Federal Supplemental Educational Opportunity Grants, Federal TEACH Grants, Federal Perkins Loan, Federal Direct Stafford Loan, Federal Direct PLUS, Texas Public Education Grants and TEXAS Grants. Award amounts are subject to funding levels set by the appropriate federal or state legislature. Information regarding eligibility and application procedures for these programs is available from the

Office of Financial Aid. The Texas Education Coordinating Board administers various tuition assistance programs including programs for teachers and vocational nursing students.

Aid applicants may check the status of their financial aid applications on the Web through their MyMav (<http://www.uta.edu/mymav>) accounts. A list of missing documents may be found in the To Do List in the Student Center. Award information can be viewed on the same page.

Students wishing to participate in the federal and state need-based student financial aid programs should complete a Free Application for Federal Student Aid (FAFSA) as early as possible prior to their actual enrollment at the University. The awarding process requires 2 – 3 weeks for completion once all required documents are received and is governed by the availability of funds. The FAFSA can be obtained online at <http://www.fafsa.ed.gov>. The school code for UT Arlington is 003656.

With the exception of post-baccalaureate students seeking certification in the following areas: early childhood - grade 6, middle level, secondary and all level, non-degree seeking students in stand-alone certificate programs awarded by UT Arlington are not be eligible to receive need-based financial aid.

Grant Assistance for International Students

A limited number of TPEG grants are available to international students. Please contact the Financial Aid Office to complete an International TPEG form during the month of June. This funding is limited to international students paying the non-resident tuition rate.

Loan Programs

The Federal Perkins Loan, Federal Stafford Loan (subsidized and unsubsidized), and College Access Loan (CAL) are the primary sources of long-term loans available at UT Arlington. These programs include deferred repayment provisions that permit students to repay the loan after termination of at least half-time studies at the University. Interest will not accrue on the loans while the borrowers are enrolled on at least a half-time basis. Information regarding loan amounts and terms can be obtained from the Financial Aid Office.

Federal PLUS (Parent Loan for Undergraduate Students) loans are available to parents to finance their dependents' educational costs. Information and an application are available at www.StudentLoans.gov (<http://www.studentloans.gov>). Students whose parents wish to borrow through the Federal PLUS must complete the FAFSA and have the results sent to UT Arlington prior to loan certification. Grad PLUS loans are available to graduate students. This loan also requires completion of the FAFSA although the loan is not based on financial need.

Federal Work-Study Program

A student who needs a job to help pay for college expenses may be eligible for employment through the Federal Work-Study Program. Eligibility is based on financial need as determined by the FAFSA. Most participants are employed in positions with various University departments, but limited off-campus jobs with certain approved agencies are also available. You may view available on-campus student employment positions at SNAP Job (<https://www.myinterfase.com/utahr/student>) by the Office of Human Resources and off-campus employment positions at Hire A Maverick (<https://www.myinterfase.com/uta/Account/LogOn?ReturnUrl=%2futa%2fstudent>) provided by the Career Center.

Financial Counseling

The Financial Aid Office provides financial aid counseling for any and all students regardless of whether they qualify for other types of financial assistance. Students may also wish to contact the Student Money Management Center at 817 272-2353 for assistance with developing a personal budget or other money management tools.

Out-of-State Student Assistance

Several states offer aid to their students attending schools in other states. Amounts and requirements for this assistance vary greatly. Further information can be obtained from the home-state aid agency.

Veterans' Assistance

Contact the Registrar's Office for information concerning eligibility for and payment of VA benefits and other matters for veterans attending or planning to attend UT Arlington.

Fellowships and Scholarships

252 Davis Hall | Box 19199 | 817.272.2197 | <http://www.uta.edu/fao>

The University of Texas at Arlington provides a variety of scholarship programs for students who have demonstrated exceptional academic achievement. UT Arlington also offers a number of endowed scholarships that are administered by a school, department or program. Graduate scholarships are awarded on the basis of scholastic excellence and adequate preparation for graduate study in the student's chosen field, as shown by the student's academic record. Scholarship eligibility criteria include admission into a degree program, enrollment in coursework leading to the degree, reasonable progress in the degree program, good academic standing, GPA, and in some cases, test scores, references and personal statements. Test scores are not used as the sole criterion for awarding scholarships or the primary criterion for denying scholarship to applicants. There are additional specific qualifications for scholarships in various areas of study. Students are encouraged to contact their school dean or department/program office to obtain information about eligibility criteria and scholarships awarded in the student's area of study.

In addition to the specific qualifications required for various competitive scholarships awarded by the University, the committee responsible for selection of a given scholarship may consider such factors as leadership, community involvement and financial need. State law and the Rules and Regulations of the Board of Regents of The University of Texas System require that any scholarship and/or fellowship be approved by the appropriate scholarship, loans and awards committee (graduate or undergraduate). Scholarship funds have been contributed by individual donors, UT Arlington alumni, corporations, government agencies and other entities to recognize and reward academic excellence.

TOP 10% SCHOLARSHIP

Per *Texas Education Code*, Section 51.933, students who graduated in the top 10% of their graduating class may be eligible for a scholarship provided by the Texas Higher Education Coordinating Board. For eligibility and application information visit College for All Texans (<http://www.collegefortexans.com/apps/financialaid/tofa2.cfm?ID=385>) website.

ASSISTANTSHIPS

Standard research and teaching assistantships available in most departments can be held only by students admitted unconditionally or on probation to Graduate School. Recipients of the Enhanced GTA and the STEM Fellowship can be admitted unconditionally only. Students admitted provisionally or students who are on academic probation are not eligible for assistantships. Prospective graduate students should contact the appropriate department chairperson for further information. To be continued on a research or teaching assistantship, a student must be in good standing and have performed assigned duties satisfactorily in the preceding semesters as determined by the respective department. Consult the catalog section on General Graduate School Regulations and Information for regulations regarding registration and responsibility of graduate assistants.

Before being appointed to an assistantship at UT Arlington, a student whose native language is not English must demonstrate English proficiency. The preferred method to demonstrate English proficiency is to submit an acceptable score of at least 23 on the TOEFL speaking subtest, or a score of at least 7 on the speaking section of the IELTS, or take and pass the UTA Developmental English course. The TOEFL or IELTS score should be sent directly to UT Arlington by ETS or IELTS. Score reports submitted directly by the student or those marked "Student Copy" or "Applicant's Copy" are not considered official and will not be accepted by the University. The English proficiency requirement will be waived for non-native speakers of English who possess a bachelor's degree from an accredited U.S. institution. The TOEFL and IELTS are administered at test centers around the world.

GRADUATE ASSISTANTSHIP/ASSOCIATESHIP POLICY

Graduate teaching and research assistantships and associateships are funded through state appropriations and federal, state, local and private grants for at least three principal reasons. First, employment of graduate students in teaching and in research positions during their graduate education encourages and supports their participation in these two major functions of a university and thereby strengthens the quality of the students' educational experience. Second, assistantships and associateships provide direct financial support to outstanding students who are essential to the development of quality graduate programs. Third, graduate students provide valuable and necessary services to the University in their roles as teaching and research assistants and associates. It must be kept in mind, however, that graduate assistants and associates are first and foremost students. As such, their most important task is to complete their degree requirements in a timely fashion; this is the primary expectation of the University as well.

The University of Texas at Arlington supports the "Resolution Regarding Graduate Scholars, Fellows, Trainees, and Assistants" of The Council of Graduate Schools in the United States. A copy of the resolution and list of signatory institutions can be viewed at www.cgsnet.org/portals/0/pdf/CGSResolutionMarch2009.pdf. To assure the appointment of the most highly qualified students available and to best realize the principal objectives for which graduate assistants are employed, The University of Texas at Arlington has adopted the following policies and regulations, all provisions of which apply to both graduate assistantships and graduate associateships.

Admission Status

A student must be admitted to a degree program to be eligible to hold a graduate assistantship. Students admitted as Provisional students may not be considered for an assistantship until all provisional requirements have been resolved. New students, admitted with probationary conditions, may be considered for an assistantship, subject to the requirement that they earn and maintain a 3.0 grade-point average while enrolled as a graduate student, conform to admission conditions specified by the admitting department or the University and meet assistantship enrollment requirements. See Admissions (p. 22) for more information.

English Proficiency

Before being appointed to a teaching assistantship at UT Arlington, a student whose native language is not English must demonstrate English proficiency. The preferred method to demonstrate proficiency is to submit an acceptable score of at least 23 on the Speaking Section of the TOEFL, or a score of at least 7 on the Speaking Section of the IELTS, or take and pass the UTA Developmental English course. The TOEFL and IELTS scores should be sent directly to UT Arlington by ETS or IELTS. Score reports submitted directly by the student or those marked "Student Copy" or "Applicant's Copy" are not considered official and will not be accepted by the University. The English proficiency requirement will be waived for non-native speakers of English who possess a bachelor's degree from an accredited U.S. institution. See Graduate Admissions (p. 23) for more information.

Developmental English Program

Students who do not achieve scores on the TOEFL or IELTS high enough to satisfy the English proficiency requirements for graduate teaching assistants must enroll in the Developmental English Program and be certified for English proficiency before becoming eligible to hold a teaching assistantship. This 10-week program, offered by the UT Arlington English Language Institute, emphasizes oral presentation skills and accent reduction.

Registration is in 402 Hammond Hall, and the charge for course is payable at the time of registration. Contact the English Language Institute at 817.272.2730 for details, including the current class schedule and charges.

Continuation or Renewal of Appointment

Although a student may be appointed initially to a graduate assistantship for a full academic year, continuation of the appointment beyond the first semester is subject to the following conditions:

1. To continue or renew an appointment, the student must be in good standing in the University. A student on academic probation is not in good standing, and therefore, will automatically lose his or her assistantship. However, Graduate Advisors, with the written endorsement of their department's or program's Graduate Studies Committee, may petition the Academic Dean to allow a one-time exception, granting one additional semester of assistantship support in the next semester of enrollment if they judge the student is capable of raising his or her GPA to the required minimum by the end of that semester and believe that the student is making satisfactory progress in all other aspects of their studies. If granted, the student will be considered to be in good academic standing for one semester for purposes of continuing their assistantship. This broadened definition of academic good standing for a student with a GPA below 3.00 applies only in cases where a program wishes to continue or renew a student's teaching or research assistantship during the semester of enrollment following the one in which his or her GPA dropped below 3.00. Programs may not request this exception on behalf of students who will hold any other type of employment.

A student granted one semester of good academic standing for purposes of continuing their assistantship must improve his or her UT Arlington graduate grade-point average to 3.00 and return to good academic standing as normally defined in the next semester of enrollment in order to qualify for assistantship support in subsequent semesters. Requests to extend this form of good standing beyond one semester will not be approved. Further, students who have previously received a one-semester extension of academic good standing for purposes of continuing their assistantship will not be eligible for this exception again.

2. The student must be making satisfactory progress toward an advanced degree.
3. The student must have performed assigned assistantship duties satisfactorily in the preceding semester(s) as determined by the department in which the assistantship is held.

A department may limit the number of semesters during which a graduate student may hold an assistantship.

Resident Tuition Rates

Graduate teaching and research assistants employed at least 20 hours per week in positions related to their degree programs are entitled to Texas resident tuition rates. Eligibility for the resident rate must be certified prior to registration otherwise, full tuition will be assessed. Non-resident students receiving appointments after a term's published Census date will not be eligible for resident tuition rates in that term.

Non-resident or international students holding less than full assistantships (full meaning 20 hours employment per week) are not eligible for Texas resident rates.

Course Load

Full Assistantships

Graduate assistants holding full assistantships (20 hours of employment per week) may register for and must complete no fewer than nine semester hours and no fewer than six semester hours during the three summer semesters.

The nine hour minimum registration limit may be reduced to six semester hours for thesis and dissertation students who 1) have completed all required coursework 2) are registered for thesis or dissertation research only. In such cases, master's students should enroll in 5698 and doctoral students who have passed their Comprehensive Examinations should enroll in 6699 course. International students meeting these requirements must obtain written permission from the Office of International Education to enroll in fewer than nine hours and present it to the appointing department. Students defending their theses typically must enroll in a six-hour thesis course. Doctoral students who have completed or will complete a total of at least nine hours of dissertation research in 6399, 6699, 6999 and/or 7399 courses prior to graduation may meet minimum registration requirements in the term they intend to defend their dissertations and graduate by enrolling in 7399. However, if a student does not graduate after enrolling in 7399, he or she must enroll in 6699 or 6999 until graduation. The 7399 course may not be repeated. Students may not petition for a course load reduction below these requirements.

Non-thesis master's students with only three to six hours of organized coursework left to complete a program in his or her final semester are permitted to hold an assistantship while enrolled in the three to six hour course. International students in these instances must obtain written permission from the OIE for less than nine hours of enrollment and present it to the appointing department.

Partial Assistantships

Graduate Teaching Assistants or Graduate Research Assistants who have a 25% (10 hours of employment per week) or less appointment must be enrolled for at least six hours during a long semester and three hours during the summer. This enrollment requirement covers both organized courses and dissertation and thesis hours. However, all graduate students, whether funded or unfunded, must follow UT Arlington policy concerning required enrollment in the final semester.

Assignment of Duties

Graduate assistants are under the direction of the department chair with regard to assistantship responsibilities and assignments.

ADDITIONAL EMPLOYMENT WHILE AN ASSISTANT OR ASSOCIATE

All Students

In accepting a graduate assistantship/associateship, students agree to devote their efforts to graduate studies and assistantship/associateship responsibilities. In some circumstances, however, additional employment may be justified. Immigration policies severely restrict the amount that an international student may work.

U.S. Citizen Students

Full-time (20-hour) graduate assistants wishing to hold additional assistantships/associateships or accept additional on or off-campus positions must obtain the approval of their Graduate Advisor. Approval will only be given if the additional work will not impact the student's academic progress negatively or exceed employment limits allowed by law.

International Students

During the fall and spring semesters, international students may work on campus only 20 hours per week unless authorized for additional employment through Curricular Practical Training (CPT). During vacation and the summer, international students may work more than 20 hours per week on-campus without additional authorization. At anytime during the year, employment with an off-campus employer must be authorized by either BCIS or by the International Office in the case of CPT. The Office of International Education must grant approval prior to taking on additional employment if that employment is to be authorized by CPT. Students holding a UT Arlington assistantship wishing to work off-campus in addition to the assistantship, must 1) meet and maintain the enrollment requirements for holding an assistantship 2) meet the immigration requirements for CPT 3) work only part-time (20 hours or less) off-campus 4) be employed in off-campus work that is clearly connected to his or her assistantship. If these requirements are not met, a student will be obliged to give up either the assistantship or the off-campus employment.

Satisfactory Academic Progress

Federal regulations require that the University of Texas at Arlington establish policies to monitor the academic progress of students who apply for and/or receive financial aid. To retain eligibility, undergraduate recipients must show satisfactory progress toward a degree based on the following requirements. There are two areas specifically addressed in these requirements. The first is cumulative grade point average (qualitative standard) and the other is a comparison of the number of credit hours annually and a review of the maximum number of hours attempted (quantitative standard). The cumulative grade point average required to meet this portion of the SAP standards mirrors the grade point average required to remain in good academic standing at the University. Information regarding the calculation of the quantitative standard as well as the notification and appeal process may be found on the Financial Aid website (<http://www.uta.edu/fao>). Click on the Satisfactory Academic Progress tab.

Grades and Grading Policies

Grades that may be assigned in courses at the University of Texas at Arlington (Valid Grades) for undergraduate courses consist of and A, B, C, D, F, I, P, R, Q, P, Z. Grades assigned in graduate courses are limited to A, B, C, D, F, P, I, R, W. Instructors only assign grades listed on the MyMav grade roster for a given course. Students uncertain about the grading policy in a course should consult their instructor at the beginning of the term for information. Valid grades for independent study, conference, seminar, and readings courses vary widely among departments; therefore, a statement on valid grades and special grading policies, if any, is given at the beginning of the course descriptions for each program in this catalog.

Computation of the Grade Point Average

Computation of the Grade Point Average: The cumulative University grade point average for an undergraduate student is calculated on the basis of all work undertaken at UT Arlington, including credit by examination, correspondence and extension, for which a letter grade is given, unless the course is repeated under the Grade Replacement Policy or Grade Forgiveness Policy, or removed from the calculation under the Grade Exclusion Policy or Grade Forgiveness Policy. Courses in which the symbol I, P, Q, W or Z is recorded are excluded in calculating the grade point average. These grades appear on the student's official transcript.

Grades earned at any institution other than UT Arlington are not used in calculating the University grade point average, but semester hours of transfer credit accepted by UT Arlington are added to hours taken at the University to determine the total college hours undertaken.

The following grades are used at UT Arlington:

Grade	Description	Grade Points Per Semester Hour
A	Excellent	4
B	Good	3
C	Fair	2
D	Passing, Below Average	1
F	Failure	0

I	Incomplete	0
W	Withdrawn	0
Q	Withdrawn - No Penalty (does not count toward Six-Course Drop Policy)	0
P	Pass	0
R	Research	0
Z	No Credit	0

Undergraduate Grading Policies

- **D's:** Although a grade of D may be sufficient for an undergraduate to earn credit in a course, a cumulative University grade point average of at least 2.00 is necessary for satisfactory progress toward a degree.
- **I's:** A grade of I (Incomplete) may be assigned for a course if, in the opinion of the instructor, there are extenuating circumstances which prevent the student from completing the required work within the term of enrollment for the course. The Incomplete must be removed by the end of the final examination period of the following term, excluding the summer sessions, for the student to receive credit for the course. If the Incomplete is not removed during the allotted time period, it will convert automatically to an F. As long as the grade is carried as an I, it will not be used in the calculation of the student's grade point average. A student should not re-enroll in a course for which an I is the grade of record. Students in Blackboard courses that receive an incomplete grade automatically retain their enrollment in the Bb course and section in which they received the incomplete until the incomplete is resolved.
- **Grades that do not count toward GPA:** A course for which the symbol I, P, Q, W or Z is given does not count as hours undertaken for the purpose of calculating the grade point average, and no grade points are earned. A course taken and passed on the pass/fail basis counts as hours undertaken, but no grade points are earned.
- **Pass/Fail Program (Engineering, Liberal Arts, Science, Nursing):** Students who are majors in the colleges of Engineering, Liberal Arts, Science, or Nursing may take courses on a pass/fail basis subject to differing rules established by these academic units. This policy is intended to offer students an opportunity to take courses that will broaden their education with less immediate emphasis on the need to achieve grade points. However, an F received in a pass/fail course (except developmental courses) will be evaluated the same as an F received on a regular basis, adversely affecting the grade point average. Students must inform the instructor of their intention to take a course on a pass/fail basis by the Census Date of the term. Complete details and requirements of each college are available in the offices of the academic deans and in the departmental offices of the colleges.
- **Developmental Course Grades:** Students assigned to developmental courses, as a result of TSI status will be graded on a pass/fail basis. This policy is intended to offer students an opportunity to take courses that will broaden their education with less immediate emphasis on the need to achieve grade points. Therefore, an F received in a preparatory or developmental course will be not evaluated the same as an F received in a credit-bearing course and will not be factored into the student's GPA.

Effect of Grades in Repeated Courses

A student may repeat any course except as limited by individual colleges and schools, provided the student's grade earned in an earlier term is below C. Courses transferred for credit to UT Arlington from another college or university may not be repeated for credit. A student may not repeat a course for additional hours toward a degree unless the catalog description specifically states that the course may be repeated for credit.

Courses originally taken or repeated at another college will not affect a student's grade point average at UT Arlington. If a student earned a grade of less than C in a course taken at UT Arlington, the student may take that course or its equivalent at another college or university for transfer to UT Arlington only with the prior written approval of the student's major department chair or academic dean.

Grade Exclusion Policy

The grade exclusion policy may be utilized by students subject to the policy except as otherwise noted. Grade Exclusion is available to students whose initial enrollment at UT Arlington was Fall 2006 through Summer 2013. Upon receiving a D or F in a course, a student may file a request with the Office of Admissions, Records and Registration for grade exclusion. All Grade Exclusion requests submitted during the term must be submitted by the last day to drop a course to be processed that term. Students have to be enrolled on Census Date for their Grade Exclusion petition to be processed in that term. See the academic calendar (<http://www.uta.edu/uta/acadcal.php>) for Census Date and Last Drop Date information. Students who had already completed a grade replacement for one or more courses at UT Arlington are not eligible to utilize the grade exclusion policy. The following conditions apply:

- Students seeking grade exclusion must receive counseling from the following as appropriate: Academic Advisor to determine effect on completion of degree requirements and probation requirements, Financial Aid Office if receiving a scholarship or financial aid administered by that office, Athletic Department if a student athlete, International Office if an international student
- Grade exclusion requests must be made using a grade exclusion form available from the Office of the Admissions, Records and Registration. The request must be approved by the academic dean from the student's major College/School.

- The course grade will be removed from the academic GPA; although the grade received will remain on the student's transcript.
- This policy will apply to a maximum of three courses at UT Arlington and will not apply to courses taken on a pass/fail basis. Of the three courses, only one course may be at the 3000/4000 level.
- This policy is not applicable to graduate students.
- Individual colleges and schools may limit this policy.
- Students may not apply this policy to grades of D or F which result from disciplinary action.
- Students who are dismissed from the University for academic reasons cannot use a grade exclusion until their dismissal period is completed.
- Excluded grades will be included in the calculation of GPA for determining graduation with Latin Honors.
- Excluded hours will count toward the 30 hour/45 hour policy for Tuition for Excessive Undergraduate Hours.
- Tuition and fee refunds, rebates or other financial consideration will not be given for courses for which grade exclusion is granted.
- Once a course has been excluded, a student may not later have the exclusion removed.
- Excluded courses cannot be used to satisfy degree requirements.
- Students must be enrolled at UT Arlington on Census Day of the term that the grade exclusion, if approved, is processed.

Grade Forgiveness Policy

The grade forgiveness policy may be utilized by students subject to the policy except as otherwise noted in this policy. Grade Forgiveness is available to incoming freshman students (i.e., first time in college students and/or freshman transfers with 23 or fewer attempted hours in transfer) whose initial enrollment at UT Arlington as a freshman or freshman transfer was Fall 2013 or thereafter. This policy is not available to transfer students (i.e., students who are transferring from one institution of higher education to another with 24 or more semester credit hours and who are not considered first time in college students). For continuing UTA students whose initial enrollment at UT Arlington occurred between Fall 2006 and Summer 2013, the Grade Exclusion policy remains in effect.

Upon receiving a grade of D or F in a 1000 or 2000 course, students subject to the Grade Forgiveness policy may, after filing the intent to do so with their academic advisor, elect to have the grade forgiven. Students subject to this policy must contact their academic advisor, who files the Grade Forgiveness petition on their behalf. All Grade Forgiveness requests submitted during the term must be submitted by the last day to drop a course to be processed that term. Students have to be enrolled on Census Date for their Grade Forgiveness petition to be processed in that term. See the academic calendar (<http://www.uta.edu/uta/acadcal.php>) for Census Date and Last Drop Date information. A student is limited to a total of two Grade Forgiveness opportunities under the following conditions:

- **Grade Omission:** A student may elect the **grade omission option** for one of the two Grade Forgiveness opportunities if the student is changing their major and the course is not required for the new major. In addition, a student electing grade omission may not re-enter that major. Grade omission may only be applied to one course. If electing to use grade omission, the student is not required to retake the course.
- **Grade Substitution:** A student may elect **grade substitution option** for one or both of the Grade Forgiveness opportunities. In this case, the course(s) must be retaken, even if it is not required for the student's current major. The second grade earned, whether higher or lower, will be used in calculating the grade point average unless the second attempt results in a grade of W. This policy applies only the second time a course is completed.
- Students must file their intention to substitute or omit the grade earned in a course with their academic advisor. Students must be enrolled at UT Arlington on Census Day of the term that the Grade Forgiveness, if approved, is processed.
- Students MAY apply for Grade Forgiveness for any term (after final grade posting of the previous term but before the Last Drop Day of the current term) before the final semester PRIOR to graduation. Students may not apply for Grade Forgiveness AFTER graduation.
- Courses transferred for credit to UT Arlington from another college or university may *not* be repeated for credit or excluded.
- For courses in which the topic may change from term to term, this policy may only be used if the topic for the repeated course is the same as the initial course topic.
- This policy does not apply to courses taken on a pass/fail basis.
- Individual colleges and schools may limit this policy.
- Students may not apply this policy to grades of D or F which resulted from disciplinary action.
- Students seeking Grade Forgiveness must receive counseling from the following as appropriate: Academic Advisor, to determine the effect on completion of degree requirements and probation requirements; Financial Aid Office, if receiving a scholarship or financial aid administered by that office; Athletic Department, if a student athlete; and International Office, if an international student.
- The grade(s) for the forgiven course(s) will be removed from the grade point average, although the grade(s) received will remain on the student's transcript.
- A course that has been "grade omitted" or "grade substituted" may not be used to satisfy degree requirements.
- Once Grade Forgiveness has been applied to a course, the student may not have the action reversed.
- Students who are dismissed from the University for academic reasons cannot use Grade Forgiveness until they have completed their dismissal period.
- Forgiven grades will be included in the calculation of the grade point average for determining graduation with Latin Honors.

- The credit hours earned in courses where the grade is forgiven will count toward the 30 hour/45 hour policy for Tuition for Excessive Undergraduate Hours.
- Tuition and fee refunds, rebates or other financial consideration will not be given for courses for which Grade Forgiveness is granted.
- A student may not use credit by exam to receive credit for a course once a student has received a grade for that course even if it has been omitted.
- Students must be enrolled at UT Arlington on Census Day of the term that the forgiven grade, if approved, is processed.

Progress Reports

Freshman Progress Reports: Freshmen will receive early progress report grades in or by the fourth week of the fall and spring terms.

Midterm Progress Reports: Freshmen, first term transfers, athletes, undergraduates with a cumulative GPA of 2.25 or lower, and undeclared or freshman students will receive an interim grade report in or by the ninth week of the fall and spring terms.

These progress report grades are not recorded on the student's official record. They are for information purposes only and are intended to benefit the student as an early alert. The grade reported at the end of a term is the official and permanent evaluation of a student's performance in a given course. Notifications are sent to students' UTA email boxes when progress reports are available, and students are urged to frequently review their progress report grades in MyMav (<http://www.uta.edu/mymav>) during the grade collection period. For the purpose of progress reports, a grade of I indicates that no grade data was available at the time. Students are encouraged to consult their instructor for progress report grade data if an I is reported or if no grade is reported.

Final Grades

Final grades are available in MyMav (<http://www.uta.edu/mymav>). Grades are posted at the end of each regular, summer, and intersession session, and academic standing is posted at the end of each term. The grade reported at the end of a term is the official and permanent evaluation of a student's performance in a given course. Official transcripts are available in the Office of Admissions, Records and Registration for those students who need official verification for tuition reimbursement and other reasons. Students with transcript holds will not be able to access their official transcript.

Final Examinations

Final examinations are scheduled at the end of each session or term. In some courses, a departmental final examination is given. Final examinations will be given according to the published academic calendar (<http://www.uta.edu/uta/acadcal.php>). Exceptions must be approved in advance by the academic dean.

Final Review Week

A period of five class days prior to the first day of final examinations in the long sessions shall be designated as Final Review Week. The purpose of this week is to allow students sufficient time to prepare for final examinations. During this week, there shall be no scheduled activities such as required field trips or performances; and no instructor shall assign any themes, research problems or exercises of similar scope that have a completion date during or following this week unless specified in the class syllabi. During Final Review Week, an instructor shall not give any examinations constituting 10% or more of the final grade, except makeup tests and laboratory examinations. In addition, no instructor shall give any portion of the final examination during Final Review Week.

Official Transcripts

Official transcripts are available in the Office of Records and Registration. Students with transcript holds will not be able to access their official transcript.

Grievance Procedures Related to Grades

In attempting to resolve any student grievances regarding grades, it is the student's obligation first to make a serious effort to resolve the matter with the individual with whom the grievance originated. Individual course instructors retain primary responsibility for assigning grades. The instructor's judgment is final unless compelling evidence shows preferential treatment or procedural irregularities. If students wish to appeal, their request must be submitted in writing—on an appeal form available in departmental or program offices—to the department chair or program director. The student has one calendar year from the date the grade is assigned to initiate the grievance. The normal academic channels are department chair or program director and then academic dean. However, before considering a grievance, the department chair or program director will refer the issue to a departmental or program committee of faculty. If the student does not find the committee's decision acceptable, the student may appeal to the academic dean. The decision of the dean is final. Information specific to the procedures to be followed in each academic unit is available in the office of the academic dean.

The dean of the college or school in which a student is enrolled, or the Executive Director of University College if the student has not declared a major, has jurisdiction over the student's program of study, degree requirements and all other academic matters including grievances. However, students taking a course in a college or school other than the one in which they are primarily registered are subject to the dean of the college or school in which the course is offered concerning the course and academic grievances regarding the course.

Information regarding grievances for matters other than grades is available in the Student Rights (p. 84) section of the catalog.

Freshman Honor Roll

First-time, first-year freshman students with less than 30 credit hours with excellent grades will be recognized by being listed on the Freshman Distinction roll. The Freshman Distinction roll will include those students who have both:

- Less than 30 semester credit hours earned in residence at UT Arlington with a GPA of not less than 3.5, and
- 12 semester credit hours earned in the current term, not including pass/fail work, with a GPA for the semester of not less than 3.5

In addition to this official recognition, University College will be recognizing new students with a 3.0 and 3.49 grade point average, as well as those in the Freshman Distinction roll and All A's (4.0 gpa), with special recognition from the Dean of Undergraduate Studies.

Honor Roll

Students with excellent grades will be recognized by being listed on the Honor Roll. The Honor Roll will include those students who have both:

- 30 semester credit hours earned in residence with a GPA of not less than 3.5, and
- 12 semester credit hours earned in the current term, not including pass/fail work, with a GPA for the semester of not less than 3.5.

Graduate Grading Policies

GRADE OF I

The grade of I designates the grade of incomplete. A graduate student unable to complete all assigned work in a class in the term in which it was taken may, at the discretion of the instructor, receive an I grade. *This grade is not given automatically* when a student does not complete all assigned work. It is the responsibility of the student to make arrangements with the instructor to secure a grade of I before the term ends. The grade of I will remain as part of the student's academic record until the work is completed and a final grade awarded. To change a grade of I to another grade, the instructor must submit a change of grade form. A grade of I does not carry credit value. This grade is not awarded in research, internship, thesis or dissertation courses. Students in Blackboard courses that receive an incomplete grade automatically retain their enrollment in the Bb course and section in which they received the incomplete until the incomplete is resolved.

GRADE OF R

The grade of R designates the grade of research in progress and is given only in research, internship, thesis or dissertation courses. A graduate student unable to complete assignments in one of these courses may, at the discretion of the instructor, receive an R grade. The R grade is a permanent grade and does not carry credit value. To receive academic credit in an R-graded course, a student *must re-register for and successfully complete the course* earning a valid passing grade for the course. Grading policy in some courses may change during the period covered by this catalog. Grading policy for each course each term is included in the course syllabus. Students should verify the grading policy with the instructor at the beginning of each term.

GRADE OF W

A grade of W may be assigned if a student chooses to withdraw from a class after Census date, but prior to the last date to drop posted in the University's Academic Calendar. *However, the grade of W is not automatically awarded.* Graduate students must consult with their graduate advisor before withdrawing from a class. Further, the student must secure the permission of the instructor and be passing the course (have a grade of A, B, C or P) at the time they intend to withdraw to receive a grade of W.

RESEARCH OR INTERNSHIP COURSE GRADES

The only grades awarded in most research or internship courses are P (pass), R (research in progress), F (fail) or W (withdrawn).

THESIS (5398) GRADES

Only R (research in progress), F (fail) or W (withdrawn) are awarded in this course.

THESIS (5698) GRADES

Grades of P (pass) R (research in progress) F (fail) or W (withdrawn) are awarded in this course. The grade of P can only be awarded when the thesis defense is passed unconditionally and the final version of the thesis is accepted by the supervising committee. R, F or W grades are assigned otherwise.

DISSERTATION (6399) GRADES

Only R (research in progress), F (fail) or W (withdrawn) are awarded in this course.

DISSERTATION (6699, 6999 AND 7399) GRADES

The grades P (pass), (R) research in progress, F (fail) and W (withdrawn) may be awarded in these courses. The grade of P can be awarded when the dissertation defense is passed unconditionally and the final version of the dissertation is accepted by the supervising committee. R, F, or W grades are assigned otherwise.

Effect of Grades in Repeated Courses

A student may repeat any course except as limited by individual colleges and schools, provided the student's grade earned in an earlier term is below C. Courses transferred for credit to UT Arlington from another college or university may not be repeated for credit. A student may not repeat a course for additional hours toward a degree unless the catalog description specifically states that the course may be repeated for credit.

Courses originally taken or repeated at another university will not affect a student's grade point average at UT Arlington. If a student earned a grade of less than C in a course taken at UT Arlington, the student may take that course or its equivalent at another university for transfer to UT Arlington only with the prior written approval of the student's major department chair or academic dean.

Final Grades

Final grades are available in MyMav (<http://www.uta.edu/mymav>). Grades are posted at the end of each regular, summer, and intersession session, and academic standing is posted at the end of each term. The grade reported at the end of a term is the official and permanent evaluation of a student's performance in a given course. Official transcripts are available in the Office of Admissions, Records and Registration for those students who need official verification for tuition reimbursement and other reasons. Students with transcript holds will not be able to access their official transcript.

Final Examinations

Final examinations are scheduled at the end of each session or term. In some courses, a departmental final examination is given. Final examinations will be given according to the published academic calendar (<http://www.uta.edu/uta/acadcal.php>). Exceptions must be approved in advance by the academic dean.

Final Review Week

A period of five class days prior to the first day of final examinations in the long sessions shall be designated as Final Review Week. The purpose of this week is to allow students sufficient time to prepare for final examinations. During this week, there shall be no scheduled activities such as required field trips or performances; and no instructor shall assign any themes, research problems or exercises of similar scope that have a completion date during or following this week unless specified in the class syllabi. During Final Review Week, an instructor shall not give any examinations constituting 10% or more of the final grade, except makeup tests and laboratory examinations. In addition, no instructor shall give any portion of the final examination during Final Review Week.

Official Transcripts

Official transcripts are available in the Office of Records and Registration. Students with transcript holds will not be able to access their official transcript.

Grievance Procedures Related to Grades

In attempting to resolve any student grievances regarding grades, it is the student's obligation first to make a serious effort to resolve the matter with the individual with whom the grievance originated. Individual course instructors retain primary responsibility for assigning grades. The instructor's judgment is final unless compelling evidence shows preferential treatment or procedural irregularities. If students wish to appeal, their request must be submitted in writing—on an appeal form available in departmental or program offices—to the department chair or program director. The student has one calendar year from the date the grade is assigned to initiate the grievance. The normal academic channels are department chair or program director and then academic Dean. However, before considering a grievance, the department chair or program director will refer the issue to a departmental or program committee of faculty. If the student does not find the committee's decision acceptable, the student may appeal to the academic Dean. The decision of the Dean is final. Information specific to the procedures to be followed in each academic unit is available in the office of the academic Dean.

Information regarding grievances for matters other than grades is available in the Student Rights (p. 84) section of the catalog.

Course Credit and Degree or Certificate Requirements

CREDITS COUNTED TOWARD DEGREE OR CERTIFICATE REQUIREMENTS

Only courses completed with a grade of A, B, C, or P can satisfy graduate degree or certificate requirements. However, courses in which grades of D or F are earned will affect a student's grade-point average. A student must have a B (3.0) grade-point average in courses included in their degree plan and a B (3.0) average in all work undertaken as a graduate student to have credits applied toward a graduate degree or certificate.

COURSE CREDIT APPLIED TO MORE THAN ONE DEGREE

No course that has been applied to any degree, at any graduate or undergraduate institution, may be applied to any other degree, either directly or by substitution except in approved dual degree or approved fast track programs. The amount of shared credit between degrees in dual degree programs is limited and varies with the total number of hours needed to complete both degrees. See Dual Degree Programs in the Advanced Degrees and Requirements section of this catalog for details. Similarly, the amount of credit that can be shared in fast track programs is also limited. Details may be found in descriptions provided by participating programs elsewhere in this catalog.

CREDIT FOR REPEATED COURSES

A student may repeat a course only if that course is specifically designated in this catalog as one that can be repeated for credit. A student who fails to receive credit (earns a grade of D or F) may repeat the course in order to obtain credit, in which case the grades for both attempts will count in computing the student's overall grade-point average. No student will be allowed to repeat a course in order to change a passing grade of C or higher.

CREDIT FOR ADVANCED UNDERGRADUATE COURSEWORK

Up to nine hours of advanced undergraduate credit from UT Arlington or another institution may be applied to a master's degree program if the hours have not been used to earn a previous degree and have the approval of the appropriate Graduate Studies Committee and the academic Dean. Approved fast track programs may allow dual credit.

CREDIT FOR EXTENSION CLASSES

Work done in extension classes may be applied toward an advanced degree under the same conditions that apply to transfer work, except that credit for extension work is limited to six credit hours.

GRADUATE CREDIT EARNED IN UNDERGRADUATE STATUS

UT Arlington undergraduates may be allowed to take graduate courses and have the credits earned apply to a master's degree.

- An undergraduate student may not use graduate courses (numbered 5000 and above) to fulfill undergraduate degree requirements except as part of an approved fast track program.
- Courses taken in undergraduate status may not be applied directly to a doctoral program.
- Some departments do not permit students to enroll in graduate courses unless they have been admitted as degree seeking graduate students. Others allow students enrolled as undergraduates to take a limited amount of graduate coursework under the conditions described below.
- All undergraduate students should consult with the appropriate graduate advisor before attempting to register for graduate courses.

An undergraduate needing no more than 12 hours in one term (six semester hours in one summer session) to complete all the requirements for a bachelor's degree may register for graduate courses and apply them toward a master's degree at UT Arlington under the following conditions:

1. In no case may a student previously dismissed from their graduate program or denied admission enroll in graduate courses or reserve courses for graduate credit.
2. All work for undergraduate credit must be completed during that term or session in which the student enrolls in graduate courses.
3. Total registration for all work may not exceed 15 semester hours in a term (or 12 semester hours in the summer sessions).
4. The student must submit to the graduate advisor a "Reservation of Courses for Graduate Credit by Undergraduate Students" form (available from graduate advisors). The reservation must be approved by the graduate advisor and the academic Dean of the college in which the course is taken. The Office of Admissions, Records and Registration must certify that the reserved credit will not be applied to the student's undergraduate degree requirements.
5. The student must have at least a 3.0 undergraduate GPA to be eligible to enroll in a graduate course and to reserve it for graduate degree credit.
6. Courses taken at UT Arlington and reserved for graduate credit may be applied to a master's degree program only if a grade of A, B, C, or P was earned.
7. Credit is officially accepted for application to a graduate program when a student is unconditionally admitted as a graduate student.
8. A maximum of 12 semester hours of graduate level courses may be reserved.

CREDIT EARNED IN DEGREED UNDERGRADUATE STATUS

Students who have completed their undergraduate studies and have been awarded their bachelor's degree may enroll as degreed undergraduates in graduate-level course work and receive graduate credit at UT Arlington under the following conditions:

1. Courses taken at UT Arlington and reserved for graduate credit may be applied to a master's degree program only if a grade of A, B, C, or P was earned.
2. No more than 12 semester hours of credit earned while a degreed undergraduate may be applied for credit toward a master's degree. Students must file a request, approved by the graduate advisor, the Committee on Graduate Studies, and the academic Dean to apply such credits toward a graduate degree. The form is available online (<http://grad.pci.uta.edu/students/forms>).
3. All courses that are applied to a master's degree must have been completed no more than five years before enrollment in a graduate program at UT Arlington. If the student has completed more than 12 semester hours of graduate courses in undergraduate status, only graduate courses completed within five years of enrollment in a graduate program at UT Arlington will become part of the graduate record and considered in computing the student's grade-point average.
4. A student may elect to apply all graduate courses completed in the last five years toward their degree or to apply none of this work. Selective application of courses is not permitted. If any courses are applied for credit toward a master's degree, all courses completed within the last five years will become part of the graduate record.

TRANSFER CREDIT IN MASTER'S PROGRAMS

Equivalent coursework completed at other institutions of recognized standing may be transferred to a master's degree program after evaluation and approval. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

No more than nine hours of transfer credit will be granted except in the professional master's programs that require more than 36 hours of coursework. In such programs, the number of transfer hours is limited to 25 percent of the total program hours. This rule does not invalidate written articulation agreements that have been approved by all appropriate parties, including the Dean, Provost, and/or President. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B (3.0) or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a master's program at UT Arlington must be approved in advance by the appropriate Committee on Graduate Studies and is reviewed by the dean of the college or school in which the student's current graduate degree program is located. . All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at UT Arlington.

To request transfer credit, students must complete the Transfer of Graduate Credit form and obtain approvals from the appropriate graduate advisor and chair of the Committee on Graduate Studies and final approval from the dean of the student's college or school. The form is available online (<http://grad.pci.uta.edu/students/forms>).

No more than nine hours of transfer credit will be granted except in the professional master's programs that require more than 36 hours of coursework. In such programs, the number of transfer hours is limited to 25 percent of the total program hours. This rule does not invalidate written agreements between graduate programs and the Graduate Office or agreements that are stated elsewhere in this catalog. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required. Grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

Courses from other universities taken after a student has been admitted into a master's program at UT Arlington must be approved in advance by the appropriate Committee on Graduate Studies and academic Dean.. All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at UT Arlington.

To request transfer credit, students must complete the Transfer of Graduate Credit form and obtain approvals from the appropriate graduate advisor and chair of the Committee on Graduate Studies and final approval from the academic Dean. The form is available online (<http://grad.pci.uta.edu/students/forms>).

TRANSFER CREDIT IN CERTIFICATE PROGRAMS

Equivalent coursework completed at other institutions of recognized standing may be transferred to a graduate certificate program after evaluation and approval of the graduate advisor, the appropriate Committee on Graduate Studies and the Dean of the College or School in which the student is currently enrolled. The number of transfer units is limited to 50% of the total units required for the certificate, except in certificate programs that exceed 15 units, in which case 12 of those units must be taken in residence. This rule does not invalidate written agreements between graduate certificate programs and the Office of Graduate Studies or agreements that are stated elsewhere in this catalog. Transfer credit will be accepted only for organized courses in which the student received a letter grade of B or higher and an official transcript showing the course(s) and grade(s) is required.

Courses from other universities taken after a student has been admitted into a graduate certificate program at UT Arlington must be approved in advance by the graduate advisor, the appropriate Committee on Graduate Studies and the Dean of the College or School in the student's current graduate degree program is located. The form is available online (<http://grad.pci.uta.edu/students/forms>).

Grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

WAIVER OF COURSES IN DOCTORAL PROGRAMS

Graduate-level coursework completed in the student's major area of doctoral study at institutions of recognized standing that grant doctoral degrees in those subject areas may serve to establish the student's competency in equivalent UT Arlington courses. Competency demonstrated by successful completion of equivalent courses may provide a basis for waiving some UT Arlington course requirements and the credit hours associated with those courses. Waivers must be recommended by the student's graduate advisor and current supervising professor and their recommendation must be approved by both the Committee on Graduate Studies of the student's major area and the Academic Dean. Only courses in which the student has earned a B (3.0) or better (or a P if the UTA course is also graded P/F) will be considered for purposes of a waiver. In no case will final semester Dissertation course (6x99 or 7399) requirements be waived. Waived courses must be shown on the student's academic plan.

COURSES THAT DO NOT PROVIDE GRADUATE CREDIT

Audited Classes: University credit is not granted for audited classes and audited classes will not satisfy enrollment requirements.

Personal Improvement Courses: Personal improvement individual or group music or art lessons and exercise and sports activities courses can not be used for the following: 1) to satisfy graduate degree requirements; 2) meet enrollment requirements; 3) in computation of graduate grade-point averages

or determination of academic probation or academic good standing; 4) in calculation of grade-point averages for the purpose of admission to a Graduate Program or for certification for graduation from a Graduate Program.

Correspondence Courses: Correspondence courses are not accepted for graduate credit.

Credit by Examination: Credit by examination may not be used for graduate credit and no such credit, graduate or undergraduate may appear on graduate student transcripts.

Credit Used to Earn Another Degree: No course that has been applied to any degree, at any graduate or undergraduate institution, may be applied to any other degree, either directly or by substitution except in approved dual degree or approved fast track programs.

Grade Forgiveness and Grade Exclusion

Students in graduate programs including degree seeking, certificate, and non-degree seeking programs are not eligible for grade forgiveness or grade exclusion.

Graduation

Degree Conferral

Degrees are awarded at the end of the fall semester (December), spring semester (May) and summer session (August). Formal commencement ceremonies are held within the college or school in which the degree is earned. Students should contact the Office of the Dean of their department for information concerning the commencement ceremonies.

Application for Graduation

All graduating students must file an Application for Graduation through their Student Center in MyMav (<http://www.uta.edu/mymav>) by the published deadlines for the semester of graduation. Students are encouraged to meet with their academic advisor to insure that they will meet degree plan requirements in a timely way to allow graduation. Neither the graduation application nor graduation fees are transferable to a subsequent semester; therefore, if a student does not graduate in the semester indicated in the initial application, a new application must be filed for the semester of graduation and the appropriate fees paid again. Additional information on graduation processes is available on the Office of Admissions, Records and Registration's Graduation website (http://www.uta.edu/aaorecordsandregistration/content/student_services/graduation.aspx).

Students who fail to apply for graduation by the specified deadlines may apply late by completing the Application for Graduation and paying a late fee. Applications for graduation will be accepted with a late fee for 30 calendar days after the deadline for applying for graduation. After that date, no applications will be accepted and students must apply for graduation for a subsequent semester. Applicants for graduation will be billed the Graduation Application fee and, as appropriate, the late graduation application fee. Again, graduation charges are non-transferable and non-refundable. See the section titled Tuition, Fees, and Charges in this catalog for information on specific fees.

Diplomas

Diplomas will be issued approximately 6-8 weeks after commencement ceremonies, and will be sent to graduates via USPS mail. Graduates with account balances or transcript or any diploma holds must clear these before their diploma can be released for mailing. Diplomas are only kept and available for mailing for one (1) year after graduation. After one year, the graduate will need to order a replacement diploma.

Graduation Rates

As of October 1, 2013, the six-year graduation rate was 42 percent for students who entered The University of Texas at Arlington in Fall 2007 on a full-time basis as first-time, degree-seeking undergraduates.

Registration

To attend The University of Texas at Arlington any given term, a student must register and pay fees. All registration at UT Arlington may be done online in MyMav (<http://www.uta.edu/mymav>). The current term's Registration Timetable (http://www.uta.edu/aaorecordsandregistration/content/student_services/registration_timetable.aspx) gives the exact dates and times for registration. General requirements are below.

Undergraduate Student Registration Requirements (p. 72)

Graduate Student Registration Requirements (p. 75)

Advising Prior to Registration

Students new to UT Arlington, many continuing students and readmitted former students must be advised by their major department academic advisor prior to registration each term. Undeclared students should meet with their academic advisor in the University Advising Center. Students can check to see if they need to be advised by checking their Student Center using MyMav (<http://www.uta.edu/mymav>), the computerized, high-security student

records system used by UT Arlington. If advising is required, a service indicator (enrollment hold) will appear on the student's record. The service indicator must be released by the academic advisor before the student can register.

Typically, the advising period for the Spring term opens in October, and for the Summer and Fall terms in March. Meeting with an academic advisor is strongly recommended even if the student is exempted from advising.

Registrant Responsibilities

- The student must know and abide by all University policies and deadlines.
- UT Arlington's **Student Responsibility Statement** includes specific information on registrant responsibilities.
- Students must drop courses prior to the first class day for a given term to avoid financial responsibility.
- A student's registration is not automatically cancelled for non-attendance. A student should either pay tuition and fees in full by the designated deadline or take the appropriate steps to withdraw.
- Students must apply for financial aid using the Free Application for Federal Student Aid (FAFSA).

Terms and Sessions

There are three terms and seven regularly scheduled sessions in the academic calendar year at UT Arlington. The three terms are Fall, Spring and Summer.

A session called Dynamic Dated Session is associated with all three terms. This session has classes scheduled outside of the normally scheduled time periods and is used for special programs known as Academic Partnership programs. Only students associated with these programs can enroll in the Dynamic Dated Sessions.

Fall Term

The Fall term has one session, called the regular session. It typically begins the fourth week in August and ends the second week in December. Final grades and academic standing are posted in the third week of December.

Commencement exercises for the Fall term are typically held the second week of December, following the conclusion of the term.

Spring Term

The Spring term has two sessions. The first session is Intersession Winter (ISW). It begins the week after the Fall term ends and concludes the week before the start of the Spring term regular session. Final grades are posted the following week; however, academic standing is not run until the end of the Spring term.

The Spring term regular session typically begins the Tuesday after the Martin Luther King Memorial Holiday and ends the second week in May. Final grades and academic standing are posted in the third week of May.

Commencement exercises for the Spring term sessions are typically held the second week of May, following the conclusion of the Spring regular session.

Summer Term

The Summer term has four sessions. The first session is Intersession Summer (ISS). It typically begins the week after the Spring regular session concludes and ends the Friday before the Memorial Day Holiday weekend.

The second session of the Summer term is the First 5-Week Session (5W1). It typically begins the first week of June and ends before the Fourth of July.

The third session of the Summer term is the Summer 11-Week Session (11W). It begins concurrently with the First 5-Week Session and typically ends the second week of August.

The fourth session of the Summer term is the Second 5-Week Session (5W2). It typically begins after the Fourth of July and ends concurrently with the Summer 11-Week Session in the second week of August.

Final grades are posted following each of the sessions. Academic standing for grades earned in all summer sessions is run in the third week of August.

Commencement exercises for all Summer term sessions are typically held the second week of August, following the conclusion of the Summer term.

Full-Time and Part-Time Enrollment

All full-time status calculations are done at the term level.

Undergraduate¹

Credit Hours Required for Half-Time or Full-Time Status	Less Than Half-Time	Half-Time	Full-Time
Long Semester (fall or spring)	5 or less	6	12
A 5-Week Session	5 or less	6	N/A
11-Week Session	5 or less	6	12
Intersession winter or summer ³	3	N/A	N/A

Graduate²

Credit Hours Required for Half-Time or Full-Time Status	Less Than Half-Time	Half-Time	Full-Time
Long Semester (fall or spring) other than Graduate Nursing	4 or less	5	9
Long Semester (fall or spring) Graduate Nursing	2	3	6
A 5-Week Session	4 or less	5	9
11-Week Session	4 or less	5	9
Intersession winter or summer ³	3	N/A	N/A

¹ For undergraduate students, 12 semester credit hours equal full-time status for any term and can be achieved by adding the total hours for each session within a term.

² For graduate students, 9 semester credit hours equal full-time status for any term and can be achieved by adding the total hours for each session within a term. For graduate nursing students, 6 semester credit hours is full time enrollment.

³ For all students, Winter intersession hours are combined with the Spring session, and Summer intersession hours are combined with any of summer sessions I, II and 11 weeks.

Class Meeting Times

On-campus class meeting times are typically scheduled Monday through Friday, 8 a.m. to 10 p.m. Class meeting times can vary; consult the Schedule of Classes (https://sis-portal-prod.uta.edu/psp/AEPPRD/EMPLOYEE/PSFT_ACS/c/COMMUNITY_ACCESS.CLASS_SEARCH.GBL?pslnkid=UTA_PS_CLASS_SCHEDULE_LINK&PORTALPARAM_PTCNAV=UTA_PS_CLASS_SCHEDULE&EOPP.SCNode=EMPL&EOPP.SCPortal=EMPLOYEE%20and%20Classes&EOPP.SCPTcname=&FolderPath=PORTAL_ROOT_OBJECT.PORTAL_BASE_DATA.CO_NAVIGATION_COLLECTIONS.ADMN_CATALOGS_AND) for specific days and times.

Course Descriptions & Syllabi

Course information, including the course syllabus when available, can be found online at Instructor and Course Syllabus Information (<http://www.uta.edu/uta/academics/courses/syllabus.php>).

Enrollment

To attend UT Arlington in any given term, a student must accept financial responsibility for any enrollment transactions, register and pay tuition and fees. Registration at UT Arlington is done online using MyMav (<http://www.uta.edu/mymav>). The current term's Registration Timetable gives the exact dates and times for registration. The Schedule of Classes (<https://tinyurl.com/k5ow2ds>) is updated for the Spring term in mid-October, and in mid-March for the Summer and Fall terms. Students log in to MyMav (<http://www.uta.edu/mymav>) to register.

For payment of tuition and fees information, refer to Tuition, Fees, and Charges (p. 86) section of this catalog for registration billing and payment.

Students who are no longer eligible for enrollment at the start of the term will have their registration canceled and their tuition and fees refunded.

Late Registration

Late registration is held each term for students who are unable to register during the regular registration period. Late registration at UT Arlington is done online using MyMav (<http://www.uta.edu/mymav>). Late registration fees are assessed for enrollment transactions made during the late registration period.

Scheduling Changes

Students can elect to make changes to their course schedules on MyMav (<http://www.uta.edu/mymav>).

- **Adding Classes:** Students can add classes through self-service in MyMav or in person in the major academic department (or the University Advising Center for undeclared students) from the beginning of the registration period through the late registration period. A student will not be permitted to add a course for credit or make a section change after the last day of late registration.
- **Dropping Classes:** Students can drop or swap (adding and dropping a class concurrently) classes through self-service in MyMav from the beginning of the registration period through the late registration period. Students dropping their last class on or after the first day of classes must

meet with the academic advisor in the department of their major to make the last class drop (withdrawal). After the late registration period, students must see their academic advisor to drop a class or withdraw. Undeclared students must see an advisor in the University Advising Center. Drops can continue through a point two-thirds of the way through the term or session. In a long (fall or spring) term, this point is through the tenth week of classes.

- No grade or withdrawal is posted if a student drops a course before 5:00 pm Central Standard Time on the Census Date of that term.
- For additional information on withdrawing from classes, see the Withdrawals section on the Undergraduate and Graduate tabs.
- Although unusual, a section may be cancelled due to low enrollment or staffing considerations. The department that cancels the class should notify any students already enrolled and assist with alternate arrangements. At the beginning of the term, students should always check for changes regarding class meeting times or classroom locations.

Bacterial Meningitis Documentation Requirement

As of January 1, 2012, Texas college students new to the institution or returning after an absence of at least one fall or spring term who are under 22 years old must submit documentation of immunization against bacterial meningitis. Under the law, students must have received the vaccine *within the past five years and no less than 10 days before the start of the first session of enrollment* at UT Arlington. Limited exemptions are specified in the state law (<http://www.thecb.state.tx.us/index.cfm?objectid=A641CD0D-E56A-A36A-1BCB39FF80781178>). Students who fail to meet this requirement will be dropped from courses.

Details for submitting proof of vaccination are emailed to students' UT Arlington email address.

Students planning to move into campus housing (<http://www.uta.edu/housing/applications/meningitis.php>) must comply with the meningitis vaccination requirements at least 10 days from a housing contract offer or 10 days before move in, whichever is earliest. Students will not be allowed to move in to campus housing without submitting timely proof that they have complied with the meningitis vaccination law.

For additional information regarding UT Arlington's administration of the Texas meningitis vaccination law, please visit www.uta.edu/meningitis.

Ineligibility to Register

Students who are no longer eligible for enrollment at the start of the term will have their registration canceled and their tuition and fees refunded. Additionally, violation of several academic policies can result in a student's inability to register without permission or action.

Undergraduate Registration

Eligibility to Enroll

An undergraduate student must maintain a minimum cumulative grade point average (GPA) at UT Arlington to remain academically eligible to register for the subsequent term or session. The minimum average required varies with the total number of college credit hours attempted at UT Arlington and is shown in the Table of Academic Standards, in the Grades and Grading Policies section of the Catalog.

Texas Success Initiative (TSI)

Undergraduate students who have not fulfilled testing or exemption requirements of the Texas Success Initiative (TSI) will be barred from registering in MyMav. See requirements listed at Texas Success Initiative. Some students may be exempt from the TSI. For a list of exemptions, go to Texas Success Initiative Exemptions (<http://www.uta.edu/universitycollege/prospective/TSI/TSI-exemptions>).

Before students can take the TSI Assessment, they must complete a Pre-Assessment Activity in order to prepare for the exam, as a State of Texas requirement. To take UT Arlington's Pre-Assessment Activity go to www.uta.edu/universitycollege/TSI-Pre-Assessment. Additional information on TSI testing is available through the Testing Services office.

For additional information regarding TSI status, students can contact the University Advising Center at 817-272-3140 or uac.uta.edu or email questions to tsi@uta.edu.

Maximum Course Load

Without permission from the appropriate academic dean, an undergraduate student may not register in a fall or spring term for more than 19 hours at UT Arlington or concurrently at UT Arlington and another institution. Any student who violates this regulation may be required to drop hours to comply with the 19-hour rule or may be denied transfer credit for those hours in excess of 19 taken at another institution. A student may register for a maximum of three hours during the Winter Intersession and Summer Intersession terms. A student who registers in the summer sessions for more than 14 hours without permission from the academic dean may be required to drop sufficient hours to comply with the 14-hour limit. The table below indicates the combinations of course work for which an undergraduate student may enroll in summer sessions, and stay within the maximum load of 14 hours.

Schedule Changes (Adds, Drops and Swaps)

Adds, drops and swaps (adding and dropping a class concurrently) may be made through late registration by an undergraduate either in MyMav (<http://www.uta.edu/mymav>) or in person by contacting their major academic department (or the University Advising Center for undeclared or freshman

students). Drops may continue in person until a point in time two-thirds of the way through session or term. Students dropping their last class on or after the first day of classes must meet with the academic advisor in the department of their major to make the last class drop (withdrawal).

- A student may not add a course after the end of the late registration period.
- No grade is posted if a student drops a course before 5:00 p.m. on the Census Date of that term.
- Students who enrolled in a Texas public institution of higher education as a first-time freshman in fall 2007 or later are permitted to drop no more than six courses during their entire undergraduate career. This limit includes all transfer work taken at a Texas institution of higher education and to second baccalaureate degrees. This statute was enacted by the State of Texas in spring 2007 (Texas Education Code 51.907, and Texas Administrative Code §4.10). Any course that a student drops is counted toward the six-course limit if: "(1) the student was able to drop the course without receiving a grade or incurring an academic penalty; (2) the student's transcript indicates or will indicate that the student was enrolled in the course; and (3) the student is not dropping the course in order to withdraw from the institution." A UT Arlington student affected by this statute who has attended or plans to attend another institution of higher education should become familiar with that institution's policies on dropping courses. This statute applies across all Texas public institutions, but procedures for implementation may vary between institutions. Students affected by this policy may request an exemption to the policy by submitting a "Petition for Exemption to 6-Course Drop Policy" form. Students who enroll in coursework at more than one institution of higher education may not exceed the six dropped course limit based on all undergraduate enrollment in Texas public colleges and universities.
- A student may drop a course with a grade of "W" until the two-thirds point of the term, session, or course offering period. Students dropping their last class on or after the first day of classes must meet with the academic advisor in the department of their major to make the last class drop (withdrawal).
- A student may drop a course after the two-thirds point of the term, session, or course offering period (Last Drop Date) only with the approval of the dean of his/her college or school.

Exceptions to this policy may be entertained because of extraordinary non-academic circumstances. Under such circumstances, approval must be received from the instructor of the course, the department chair of the student's major, and the dean. Additional information (http://www.uta.edu/aa/recordsandregistration/content/student_services/add_drop_procedures.aspx#exceptionForm).

Students wanting to drop all courses for which they are enrolled must withdraw from the University for that term. Students dropping their last class on or after the first day of classes must meet with the academic advisor in the department of their major to make the last class drop. Students should follow the procedure in the Withdrawal section below.

Withdrawals

A student may withdraw from all courses for the current session/term from the first class day until a point two-thirds of the way through the session or term by contacting their major academic department (or the University Advising Center for undeclared students) for appropriate advisement and removal from the coursework. A student who elects to withdraw on the first day of classes or thereafter will incur financial responsibility to the University as regulated by Student Financial Services.

A student may withdraw from the University with grades of "W" until the two-thirds point in the term. A student may be removed from a course after that point only upon approval of the academic dean in the student's college or school.

Students who have enrolled in a Texas public institution of higher education as a first-time freshman in fall 2007 or later are permitted to drop no more than six courses during their entire undergraduate career. When an undergraduate student withdraws from all courses during the term, the withdrawals will not count toward the student's six-drop limit.

Withdrawal as a Result of Military Service

Students who withdraw from the University to perform active military service (not including Texas National Guard training exercises) will not have to reapply for admission, but will be readmitted upon a request made to the Office of Admissions, Records and Registration within one year of being released from active military service. Students who withdraw as a result of military service may choose to receive a full refund of tuition and fees, an incomplete (if eligible) or final grade at institution discretion. Typically, a final grade is awarded when the student has satisfactorily completed a substantial amount of coursework and has demonstrated sufficient mastery of the course material. (Texas Education Code, Section 54.006.)

Six Course Drop Limit

Students who have enrolled in a Texas public institution of higher education as a first-time freshman in fall 2007 or later are permitted to drop no more than six courses during their entire undergraduate career. This limit includes all transfer work taken at a Texas institution of higher education and to second baccalaureate degrees. This statute was enacted by the State of Texas in spring 2007 (Texas Education Code 51.907). Any course that a student drops after Census Day is counted toward the six-course limit if "(1) the student was able to drop the course without receiving a grade or incurring an academic penalty; (2) the student's transcript indicates or will indicate that the student was enrolled in the course; and (3) the student is not dropping the course in order to withdraw from the institution."

If an undergraduate student withdraws from all courses during the term, the withdrawals will not count toward the student's six-drop limit.

The limit on dropped courses is subject to the following conditions:

- Students dropping a course for academic reasons will receive a “W.” Students withdrawing from the university or who received an approved non-academic exception will receive a course notation of Q on the transcript. Courses denoted with Q do not count toward the 6-course drop limit.
- Dropped developmental courses do not count toward the limit.
- Dropped dual credit courses earned prior to a student graduating from high school do not count toward the limit.
- If an undergraduate student withdraws from all courses during the term, the withdrawals will not count toward the student’s 6-drop limit. During the course of the same term, if some courses are dropped prior to final full withdrawal, all courses will be converted to ‘withdrawn’ status, regardless of the timing. (Example: Student A is enrolled in four courses and drops two and completes two. The two courses will be counted against the 6-drop limit. Student B is enrolled in four courses and drops two courses following Census Date. These two drops are counted against the 6-drop limit. Prior to the last drop date, Student B withdraws from school (drops final two courses). The final two courses are coded as “withdrawn” and do not count against the 6-drop limit. The two courses previously counted as “dropped” are reclassified as “withdrawn” and the student’s drop limit is readjusted). The University of Texas at Arlington 2013-2014 Undergraduate Catalog
- This drop policy overrides the limit of 15 hours W previously in place at UT Arlington (<http://www.uta.edu/catalog/2006/fall/index.html>, 2006 Undergraduate Catalog, see Schedule Changes, Item C). Students who entered UT Arlington between Fall 2006 and Summer 2007 and were subject to the 15-hour W policy will no longer be held to the limits of that institutional policy.
- Students should be aware that dropping a course or courses may result in reducing them to part-time status which can affect financial aid, scholarships, and insurance coverage.

Change of Major Program of Study

Undergraduate students who wish to change their major program of study must consult with the proposed major department to process the program change.

An academic unit may require students to change their major program of study if the students do not meet the academic standards or the professional conduct standards of the unit. For information concerning specific standards in a program of study, students should contact the office of the appropriate academic dean's office

Auditing

Final arrangements to audit an undergraduate course may be made during the late registration period only, although the permission process can begin prior. The required form, obtained from the Office of Admissions, Records and Registration, must be completed and taken to the instructor for approval. This form can be accepted and processed by the Office of Admissions, Records and Registration only during the late registration period only, and approval is based in part on space availability. After obtaining the instructor’s approval and approval from the Office of Admissions, Records and Registration, the applicant pays a fee at Student Accounts of \$20 per course if enrolled for course work at UT Arlington or \$100 per course if not enrolled for course work in residence at UT Arlington. Persons 65 years of age or older may audit courses without paying an audit fee.

The auditor has the privilege of hearing and observing only; no University credit is granted for auditing. An academic department or the Office of Admissions, Records and Registration may place restrictions on the privilege of auditing or may deny permission to audit certain courses. Activity classes, labs, etc., are generally not auditable.

Students auditing a course are required to comply with Texas state legislation that mandates those who have not been continuously enrolled at UT Arlington must have received the bacterial meningitis vaccine (http://www.uta.edu/aao/recordsandregistration/content/student_services/ meningitis_requirement.aspx) within the past five years.

Cooperative Programs Between University of Texas System Components

A student concurrently enrolling at two or more University of Texas System components may register and pay tuition and fees for all courses through the student’s home institution. Detailed procedures may be obtained from the registrar or records office of the student’s home institution. At UT Arlington, this is the Office of Admissions, Records and Registration. The concurrent enrollment agreement and waiver of specified fees applies only to students following the concurrent enrollment procedures specified by the home institution.

The charges for the following will be assessed and collected at the home institution for the other institution(s):

- Tuition at an appropriate rate
- Applicable laboratory fees and special course charges
- General Use Fee at the appropriate rate
- Any other fees that are required at the host institution that are not charged at the home institution

Student services at the second institution will be made available to concurrently enrolled students paying the appropriate student service fees at the second institution.

Some institutions have a reciprocal agreement for honoring parking permits. Details may be obtained from the police departments on each campus.

Concurrently enrolled students should report any problems concerning registration, payment of fees or other matters related to concurrent enrollment procedures to the registrar or records office of the home institution.

Concurrent students wishing to add or drop courses must do so in compliance with the host institution's policy. On or before the host institution's Census Date, schedule changes may be done through the home institution's records office. After the Census Date, drops must be done at the host institution.

All paperwork must be turned in two weeks prior to the host institution's first class day.

Students Receiving Financial Aid

To qualify for most forms of financial aid administered through the Office of Financial Aid, students must enroll in and complete a certain number of credit hours each term to meet the Satisfactory Academic Progress requirements to receive future financial aid. Details are available on the Financial Aid website (<http://wwwb.uta.edu/aao/fao>).

Other Public Institutions of Higher Education

When students register at more than one public institution of higher education in Texas, they shall pay the full tuition charges to the first institution at which they are registered. A student who is first registered at another institution must present a copy of the fee receipt from that institution to Student Accounts when registering at UT Arlington. Any reduction in tuition per the following guidelines will be refunded to the student approximately one month after the beginning of the term.

- If the minimum tuition at the first institution is the same as or greater than the UT Arlington minimum, the amount charged for tuition will be the UT Arlington hourly rate.
- If the minimum tuition at the first institution is lower than the UT Arlington minimum, the amount charged for tuition will include the difference in the minimum charges. In no case will the amount charged be less than the UT Arlington hourly rate.
- All other applicable fees will be charged.

Graduate Registration

Eligibility to Enroll

A graduate student must maintain a minimum cumulative grade point average (GPA) of at least 3.0 at UT Arlington to remain academically eligible to register for the subsequent term or session.

Continuous Enrollment Policy

Graduate students must enroll in at least one credit hour of work related to their degree each long semester (Fall and Spring) in order to remain classified as an enrolled student. Some programs may specify a higher minimum enrollment requirement in their Handbook for Graduate Students or other published documents. Enrollment in Summer Sessions is not required, and students who do not enroll in summer will not be considered in violation of the continuous enrollment policy. However, students are required to register for appropriate courses in every term in which they expect to receive assistance, use the facilities of the university, take diagnostic or comprehensive examinations or defend theses or dissertations. The minimum enrollment requirements for holding graduate assistantships or fellowships or the requirements of the enrollment requirements of other programs, offices and agencies such as the Veterans Administration, U.S. Citizenship and Immigration Services, and federal financial aid and certain loan programs, must be met. It is the student's responsibility to determine the enrollment requirements of such entities. Students who have completed all degree requirements or who will complete degree requirements must submit an application for graduation by the deadline for graduation for the next available graduation date. They must also pay the appropriate graduation fees. Enrolled students who do not complete all requirements by the beginning of the next long semester must enroll to complete remaining requirements.

Maximum Course Load:

The maximum course load for full-time graduate students is 15 semester hours in a regular term and 12 hours in the summer term. Registration in excess of these limits in exceptional circumstances must be approved by the student's graduate advisor.

Schedule Changes (Adds, Drops and Swaps)

Graduate students who wish to change a schedule by either dropping or adding a course must first consult with their graduate advisor. Regulations pertaining to adding or dropping courses are described below. A student's registration is not automatically cancelled for non-attendance. A student should either pay fees in full by the designated deadline or take the appropriate steps to withdraw. To avoid financial responsibility to the University, this cancellation of enrollment must be completed as soon as possible, but no later than the day before the first official University class day. Prompt notification also helps to free up class space for other students who are interested in the same classes.

A student wishing to drop all classes will be considered to have withdrawn from the University and must reapply for admission in order to resume studies unless granted a leave of absence. Adds and drops may be made through late registration either on the Web at MyMav or in person through the student's academic department. Drops may occur until a point in time two-thirds of the way through the term. The last day to drop a course is listed in the Academic Calendar (<http://www.uta.edu/uta/acadcal>).

1. A student may not add a course after the end of the late registration period.
2. No grade is posted if a student drops a course before 5:00 p.m. on the Census Date of that term.
3. A student dropping a graduate course after the Census Date but on or before the last drop date may, with the agreement of the instructor, receive a grade of W but only if passing the course with a C or better average. A grade of W will not be given if the student does not have at least a C average. In such instances, the student will receive a grade of F if he or she withdraws from the class.
4. Students dropping their last class on or after the first day of classes must meet with their graduate advisor to make the last class drop (withdraw). A student desiring to drop all courses in which he or she is enrolled is reminded that such action constitutes withdrawal (resignation) from the University unless an approved leave of absence has been obtained.
5. In most cases, a student may not drop a graduate course or withdraw (resign) from the University after the two-thirds point of the course offering period (Last Drop Date). Under extreme circumstances, the academic dean of the student's college or school may consider a petition to withdraw (resign) from the University after the Last Drop Date. Students should use the Petition to Withdraw for this purpose. See the section titled Withdrawal (Resignation) From the University for additional information concerning withdrawal.

Withdrawals

A student who wishes to withdraw (resign) voluntarily from the University may do so by withdrawing from **all** graduate and undergraduate classes prior to the last day to drop date, a point of time corresponding to two-thirds of the duration of the term. The last day to drop a course is listed in the Academic Calendar (<http://www.uta.edu/uta/acadcal>). After this deadline has passed, a graduate student or undergraduate student enrolled in a graduate course is not permitted to withdraw or to selectively drop courses. In exceptional cases, however, a graduate student may request to withdraw after the deadline by obtaining a Petition to Withdraw form (<http://grad.pci.uta.edu/faculty/resources/advisors/current/#withdraw>) and submitting it to the Dean of the college or school in which they are enrolled. If the petition is not approved, the student remains responsible for all coursework requirements. Therefore, students should not discontinue class attendance or course assignments unless they have been notified in writing that their academic dean has approved the Petition to Withdraw.

Withdrawal as a Result of Military Service

Students who withdraw as a result of military service may choose to receive a full refund of tuition and fees, an incomplete (if eligible) or final grade at institution discretion. Typically, a final grade is awarded when the student has satisfactorily completed a substantial amount of coursework and has demonstrated sufficient mastery of the course material (see Texas Education Code, Section 54.006).

Leave of Absence Policy

A student may apply for a Leave of Absence in order to respond to exceptional circumstances that will prevent him or her from meeting the continuous enrollment requirement. A Leave of Absence will be granted only for good cause, such as health-related issues, major financial or employment issues, significant family concerns such as pregnancy, childbirth, child care or elder care or other major personal circumstances that interfere with a student's ability to undertake graduate study. Leaves are granted for up to two long semesters. Students returning from leave as scheduled will be automatically readmitted and will not be required to submit an application or pay an admission fee. Students who do not return at the end of their approved Leave of Absence must reapply for admission by the published application deadlines, pay all relevant evaluation fees, and are not assured of readmission to the University. During the time of the leave of absence, the student may not use University facilities or resources, receive an assistantship or fellowship, continue academic work with faculty, take a diagnostic or comprehensive examination, or defend a thesis or a dissertation. Time taken on an approved Leave of Absence will not count against degree completion time limits.

An approved Leave of Absence does not exempt students from the enrollment requirements of other programs, offices, and agencies such as the Veterans Administration, Immigration and Naturalization Service, and federal financial aid and certain loan programs. It is the student's responsibility to determine what effect a Leave of Absence will have on his or her status with such entities. For example, International students approved for a Leave of Absence must inform the Office of International Education so that requirements of the Immigration and Naturalization Service can be addressed.

A student requesting leave should complete the Leave of Absence Request form and obtain the approval of his or her graduate advisor who will forward the request to the Dean for final review and approval. This form is available online (<http://grad.pci.uta.edu/students/forms>). Requests must be made no later than mid-semester. Leave of Absence will not be granted retroactively for a semester after the mid-semester point has passed. Students who miss this deadline must withdraw from the University and apply for readmission when they wish to return to their studies.

Change of Graduate Major, Program or Degree Level

Students wishing to change graduate major, program or degree level (master's or doctoral classification) from that in which they are enrolled currently, or in which they were enrolled during their most recent term at UT Arlington, must initiate the change by completing the Request for Change of Graduate Program or Degree Level form. The Request For Change of Graduate Program or Degree Level form can be found online (<http://grad.pci.uta.edu/students/forms>). Students intending to change majors should consult the graduate advisor of the new program regarding program admission and degree requirements before completing this form. Similarly, students wishing to change degree level should submit the request after discussing the matter with the appropriate graduate advisor.

Students wishing to change from one program to a dual degree program must complete the Request for Change of Graduate Program or Degree Level form and mark the box stating Request to Change to Dual Degree Program (master's level only).

Students wishing to change from a dual degree program to single degree program must complete the Request For Change of Graduate Program or Degree Level form and mark the box stating Request to Change to New Graduate Program.

Students wishing to change from Doctoral to Masters degree level for conferral of the masters degree must complete the Request for Change of Graduate Program or Degree Level form and mark the box stating Request to change from PhD to Masters Status (for conferral of the master's degree). Students will remain in masters status until award of the masters degree. Upon award of the masters degree, students will be automatically changed back to doctoral status.

The Dean of the college or school will make the final decision regarding the request(s) for change.

Auditing Courses

Final arrangements to audit an undergraduate course may be made during the late registration period only, although the permission process can begin prior to it. The required form, obtained from the Office of Admissions, Records and Registration, must be completed and taken to the instructor for approval. This form will only be accepted and processed by the Office of Admissions, Records and Registration during the late registration period and approval is based in part on space availability. After obtaining the instructor's approval and approval from the Office of Admissions, Records and Registration, the applicant will be obliged to pay an audit fee at Bursar Services of \$20 per course if enrolled for course work at UT Arlington or \$100 per course if not enrolled for course work in residence at UT Arlington. Persons 65 years of age or older may audit courses without paying an audit fee.

The auditor has the privilege of hearing and observing only; no University credit is granted for auditing. An academic department or the Office of Admissions, Records and Registration may place restrictions on the privilege of auditing and may deny permission to audit certain courses. Activity classes, labs, etc., are generally not auditable.

Students auditing a course are required to comply with Texas state legislation that mandates those who have not been continuously enrolled at UT Arlington must have received the bacterial meningitis vaccine (http://www.uta.edu/aao/recordsandregistration/content/student_services/ meningitis_requirement.aspx) within the past five years.

Audited courses do not meet enrollment requirements applying to graduate students.

Funded Student Enrollment Requirements

Students are normally expected to be enrolled as full time students while holding a funded assistantship or associateship. Master's students who must enroll in a six-hour Thesis course or doctoral students who must enroll in a six or nine-hour Dissertation Course or three-hour Dissertation Completion Course because they have not received a passing grade in one of these courses must enroll in one of them and receive a grade of P in their final semester. However, master's students who need fewer hours to complete their degrees may petition for a waiver of full time enrollment as described in the Assistantship/Associateship Policy section (p. 57) of this catalog.

Teaching and Research Assistants

Students receiving graduate teaching or research assistantships must meet enrollment requirements during the term in which they are supported. Assistants should complete no more than 12 semester hours and no fewer than 9 semester hours per term. They may register for no fewer than 6 semester hours during the summer sessions. See the section titled Graduate Assistantship/Associateship Policy (p. 57) for exceptions to these rules and other requirements that Assistants and Associates must meet.

Students Receiving Financial Aid

To qualify for most forms of financial aid administered through the Office of Financial Aid, students must enroll in and complete a certain number of credit hours each term to meet the Satisfactory Academic Progress requirements to receive future financial aid. The Satisfactory Academic Progress policy may be found at www.uta.edu/fao. Students enrolling in 9 or more credit hours at Census Date must complete at least 6 of these hours whereas students enrolling in 6-8 credits hours at Census Date must complete 4 hours to qualify for financial aid. Students enrolling in 5 hours must complete 3 hours. If a student does not complete the required minimum number of hours, they will lose eligibility for aid in the next academic year of enrollment. Students enrolling in fewer than 5 hours at Census do not meet the enrollment requirements for financial aid. Contact the Office of Financial Aid for additional information and guidance on enrollment and eligibility requirements

Doctoral Student 99-hr Rule

The "99 hour rule" refers to the implementation of Senate Bill 961, passed by the Seventy-fifth Legislature. Under this policy, graduate students at UT Arlington who are Texas residents and nonresidents who normally would be entitled to pay resident tuition by virtue of residency, work appointments or fellowships who have attempted more than 99 doctoral hours may be subject to the payment of nonresident tuition. This rule does not apply to students enrolled before August 1999. A student who has completed more than 99 hours of doctoral level study at UT Arlington will not be obligated to pay non-resident tuition unless they have also completed a total of 14 long semesters of master's and/or doctoral study. Programmatic or individual exceptions for students exceeding the 99-hour and 14 long semester limit may be considered.

International Students

International students must be enrolled for a minimum of 9 semester hours during each regular semester (Fall and Spring). International students should refer to the International Student section of this catalog for additional registration information.

Course Designation System

Courses at UT Arlington are designated by a combination of letters and numbers. The letters indicate the department, or the area within a department, that offers the course. The numbers furnish information such as level, credit and hours of theory or practice. A complete list of course abbreviations is outlined below.

Examples demonstrating UT Arlington's Course Designation System:

Undergraduate example: CHEM 1301 (3-0) 3 hours credit

- "CHEM" indicates that the course is offered by the Chemistry Department.
- The first digit (1 in the example above) denotes the level of the course: 1 and 2 indicate lower division (freshman and sophomore) courses; 3 and 4 indicate upper division (junior and senior) courses; and 5 and 6 indicate graduate courses.
- The second digit (3) denotes the semester hour credit the student is attempting to earn by taking the course.
- The third and fourth digits (0 and 1) distinguish the individual course. Course numbers 90 through 99 indicate individual or small group instruction.
- The first figure in parentheses (3) indicates the clock hours per week in the long (spring and fall) terms devoted to theory or lecture. Theory includes recitations and lectures.
- The second figure in parentheses (0) indicates the clock hours per week in the long (spring and fall) terms devoted to practice. Practice includes work done in the laboratory, shop, drawing room or field.
- The final figure is the credit value of the course. The unit of credit is the "semester credit hour," which involves one hour of theory and/or from two to four hours of practice per week for a 16-week term.

Graduate example: GEOL 5313 (2-3) 3 hours credit

1. "GEOL" indicates that the course is offered by the Geology Department
2. The first digit (5) in the above example denotes the level of the course. Graduate courses are designated 5 or 6.
3. The second digit (3) denotes the semester hour credit the student is attempting to earn by taking the course.
4. The third and fourth digits (1 and 3) distinguish the individual course.
5. The first figure in parentheses (2) indicates the clock hours per week in the long (spring and fall) terms devoted to theory or lecture. Theory includes recitations and lectures.
6. The second figure in parentheses (3) indicates the clock hours per week in the long (spring and fall) terms devoted to practice. Practice includes work done in the laboratory, shop, drawing room or field.

List of Course Abbreviations (p. 726)

Student Conduct & Academic Integrity

All students are expected to obey the civil and penal statutes of the State of Texas and the United States, the Regents' Rules and Regulations of The University of Texas System, the rules and regulations of the University, and the orders or instructions issued by an administrative official of the University or The University of Texas System in the course of his/her duties and to observe standards of conduct that are compatible with the University's functions as an educational institution. Any student who engages in conduct that is prohibited by the Regents' Rules and Regulations or the rules of the University, or by federal, state, local law or regulation is subject to disciplinary action regardless of whether such conduct takes place on or off campus, or whether civil or criminal penalties are also imposed for such conduct. Individuals who are not currently enrolled at UT Arlington remain subject to the disciplinary process for conduct that occurred during any period of enrollment and for statements, acts, or omissions related to application for enrollment or the award of a degree.

Information about the rules of conduct and due process procedures can be found in the UT Arlington Handbook of Operations Procedures (<https://www.uta.edu/policy/hop>).

University Honor Code

All students are expected to live by the University of Texas at Arlington's honor code:

I pledge, on my honor, to uphold UT Arlington's tradition of academic integrity, a tradition that values hard work and honest effort in the pursuit of academic excellence. I promise that I will submit only work that I personally create or that I contribute to group collaborations, and I will appropriately reference any work from other sources. I will follow the highest standards of integrity and uphold the spirit of the Honor Code.

It is the policy of The University of Texas at Arlington to uphold and support standards of personal honesty and integrity for all students consistent with the goals of a community of scholars and students seeking knowledge and responsibility. Furthermore, it is the policy of the University to enforce these standards through fair and objective procedures governing instances of alleged dishonesty, cheating and other academic/non-academic misconduct. Students found responsible for dishonesty in their academic pursuits are subject to sanctions that may range from disciplinary probation, suspension and expulsion from the University.

Student Travel Policy

Before any student organization travels, it is beneficial to come to the Office of Student Governance and Organizations to receive information about liability and to consider using release forms that are available (Texas Education Code, Section 51.950).

However, if the trip is funded by the University (including Program Assistance Funds), is more than 25 miles from the University, and the vehicle is owned or leased by the University, or if attendance is required by a student organization, then the organization must submit the Student/Group Travel Form and the University Request for Travel Authorization at least 10 days prior to the date of travel. All forms and additional information are available in the Office of Student Governance and Organizations. For additional information, see the UT Arlington Handbook of Operating Procedures, Part II, Subchapter 6-600.

Academic Integrity

What Constitutes Scholastic Dishonesty?

Scholastic Dishonesty includes, but is not limited to, cheating, plagiarism, and collusion on an examination or an assignment being offered for credit. Each student is accountable for work submitted for credit, including group projects.

Cheating

- Copying another's test or assignment.
- Communication with another during an exam or assignment (i.e., written, oral or otherwise).
- Giving or seeking aid from another when not permitted by the instructor.
- Possessing or using unauthorized materials during the test.
- Buying, using, stealing, transporting, or soliciting a test, draft of a test, or answer key.

Plagiarism

- Using someone else's work in your assignment without appropriate acknowledgement.
- Making slight variations in the language and then failing to give credit to the source.

Collusion

- Without authorization, collaborating with another when preparing an assignment.

In accordance with the Rules and Regulations of the Board of Regents of The University of Texas System (Rule 50101 (<http://www.utsystem.edu/bor/rules/50000Series/50101.pdf>)), institutional procedures regarding allegations of scholastic dishonesty are outlined in Part Two, Chapter 2, of the UT Arlington Handbook of Operating Procedures (<https://www.uta.edu/policy/hop>). Students found responsible for dishonesty in their academic pursuits are subject to penalties that may range from disciplinary probation to suspension or expulsion from the University.

Any student who registers to attend classes at UT Arlington and is ineligible to attend for disciplinary reasons will be dropped automatically from the rolls of the University. This information may be obtained by accessing the Office of Student Conduct website at <http://www.uta.edu/conduct>.

Responsibility for Academic Misconduct

There are two ways in which students are held responsible for their academic behavior. First, students are responsible for their own actions. Those that violate the principles of academic integrity, scholastic honesty, or engage in activities prohibited by the Code of Student Conduct must assume responsibility for their behavior and accept the consequences. You can assume responsibility in two ways. First, if you choose to take the risk associated with scholastic dishonesty and any other violation of the Code of Student Conduct and Discipline, you must assume responsibility for your behavior and accept the consequences. In an academic community, the standards for integrity are high. Second, students who become aware of if you are aware of scholastic dishonesty and any other conduct violations on the part of others, you have the responsibility to report it to the relevant professor or the Office of Student Conduct. The decision to do so is another moral dilemma to be faced as you define who you are.

Student Conduct

Office of Student Conduct

All students are expected to obey the civil and penal statutes of the State of Texas and the United States, the Regents' Rules and Regulations of The University of Texas System, the rules and regulations of the University, and the orders or instructions issued by an administrative official of the University or The University of Texas System in the course of his/her duties and to observe standards of conduct that are compatible with the University's functions as an educational institution. Any student who engages in conduct that is prohibited by the rules of the University, or by federal, state, local law or regulation is subject to disciplinary action regardless of whether such conduct takes place on or off campus or whether civil or criminal penalties are also imposed for such conduct. Individuals who are not currently enrolled at a component institution of The University of Texas System remain subject to the disciplinary process for conduct that occurred during any period of enrollment and for statements, acts, or omissions related to application for enrollment or the award of a degree.

Information about the rules of conduct and due process procedures can be found on these Web sites:

- UT Arlington Handbook of Operations Procedures (<https://www.uta.edu/policy/hop>)

Unauthorized Distribution of Copyrighted Material

Unauthorized distribution of copyrighted material may subject students to disciplinary action and civil and criminal penalties. Information concerning the legal consequences of such violations may be found in *Copyright Law of the United States of America and Related Laws Contained in Title 17 of the United States Code*, Circular 92 (<http://www.copyright.gov/title17/92chap5.html#504>). The University's policies on copyrighted materials (ADM 5-200 and 5-300) can be found at <http://www.uta.edu/policy/hop>.

Hazing

The 74th Texas Legislature modified the law concerning hazing which became effective May 30, 1995. Under the law, individuals or organizations engaging in hazing could be subject to fines and charged with criminal offenses (Section 51.936, Texas Education Code).

A person violates the law if he or she:

- engages in hazing; or
- solicits, encourages, directs, aids or attempts to aid another engaging in hazing; or
- recklessly permits hazing to occur; or
- has firsthand knowledge of the planning of a specific hazing incident involving a student in an educational institution, or
- has firsthand knowledge that a specific hazing incident has occurred, and knowingly fails to report that knowledge in writing to the Office of Student Conduct or other appropriate official of the institution.

An organization violates the law if

- the organization condones or encourages hazing or
- if an officer or any combination of members, pledges, or
- alumni of the organization commits or assists in the commission of hazing.

Thus, according to the law, a person can commit a hazing offense not only by engaging in a hazing activity, but also by soliciting, directing, encouraging, aiding or attempting to aid another in hazing; intentionally, knowingly or recklessly allowing hazing to occur; or by failing to report first hand information that a hazing incident is planned or has occurred in writing to the Office of Student Conduct. The fact that a person consented to or acquiesced in a hazing activity is not a defense to prosecution for hazing under this law.

In an effort to encourage reporting of hazing incidents, the law grants immunity from civil or criminal liability to any person who reports a specific hazing event to the Office of Student Conduct; and immunizes that person from participation in any judicial proceeding resulting from that report. The penalty for failure to report is a fine of up to \$2,000, up to 180 days in jail, or both. Penalties for other hazing offenses vary according to the severity of the injury, which results and range from \$500 to \$10,000 in fines and up to two years confinement.

The law defines hazing as any intentional, knowing or reckless act, occurring on or off the campus of an educational institution, by one person alone or acting with others, directed against a student, that endangers the mental or physical health or safety of a student for the purpose of pledging, being initiated into, affiliating with, holding office in, or maintaining membership in any organization whose members are or include students at an educational institution. Hazing includes but is not limited to:

- Any type of physical brutality, such as whipping, beating, striking, branding, electronic shocking, placing a harmful substance on the body, or similar activity;
- Any type of physical activity, such as sleep deprivation, exposure to the elements, confinement in small space, calisthenics, or other activity that subjects the student to an unreasonable risk or harm or that adversely affects the mental or physical health or safety of the student;
- Any activity involving consumption of food, liquid, alcoholic beverage, liquor, drug, or other substance which subjects the student to an unreasonable risk of harm or which adversely affects the mental or physical health of the student;

- Any activity that intimidates or threatens the student with ostracism, that subjects the student to extreme mental stress, shame, or humiliation, or that adversely affects the mental health or dignity of the student or discourages the student from entering or remaining registered in an educational institution, or that may reasonably be expected to cause a student to leave the organization or the institution rather than submit to acts described in this subsection;
- Any activity that induces, causes, or requires the students to perform a duty or tasks, which involved a violation of the Penal Code.

The University of Texas at Arlington regards hazing as a serious issue and is committed to the removal of any such practice. The Office of Student Conduct is prepared to assist any organization with a review of its activities to ensure they do not violate the hazing law.

Sexual Harassment and Sexual Misconduct

The safety and security of all students is of the utmost importance. Instances of sexual harassment and sexual misconduct impact the entire community and disrupt the academic progress of all involved. The University of Texas at Arlington's Handbook of Operating Procedures, Procedure 14-1 states the following:

Definition of Sexual Harassment:

Sexual harassment is defined by the Equal Employment Opportunity Commission (EEOC) and the courts to be any unwelcome sexual advances, requests for sexual favors, or other verbal or physical conduct of a sexual nature, when:

- submission to such conduct is made either explicitly or implicitly a term or condition of employment (or a student's status in a course, program, or activity);
- submission to, or rejection of such conduct by an employee is used as a basis for employment decisions affecting the individual. In the case of a student, it is used as a basis for academic or decisions affecting a student; or,
- such conduct has the purpose or effect of unreasonably interfering with the individual's employment (or the student's educational experience) or creating an intimidating, hostile, or offensive academic environment.

Definition of Sexual Misconduct:

Sexual misconduct includes sexual advances, requests for sexual favors, or verbal or physical conduct of a sexual nature directed towards another individual that does not rise to the level of sexual harassment but is unprofessional and inappropriate for the workplace or classroom. Examples of behavior that could be considered sexual harassment or sexual misconduct includes, but is **not limited to**, the following:

- physical contact of a sexual nature including touching, patting, hugging, or brushing against a person's body;
- explicit or implicit propositions of offers to engage in sexual activity;
- comments of a sexual nature including sexually explicit statement, questions, jokes or anecdotes, remarks of a sexual nature about a person's clothing or body, remarks about sexual activity, speculation about sexual experience;
- exposure to sexually oriented graffiti, pictures, posters or materials;
- physical interference with or restriction to an individual's movements.

If a person believes they have been the subject of sexual harassment or sexual misconduct, it should be reported immediately to the Equal Opportunity Services Director, the University Police Department and/or the Office of Student Conduct.

The University offers various educational opportunities, campus resources and avenues for support to community members. More information can be found at the following links:

- University of Texas at Arlington's Handbook of Operating Procedures <https://www.uta.edu/policy/hop>
- Relationship, Violence and Sexual Assault Prevention <http://www.uta.edu/rvsp>
- Equal Opportunity Services <http://www.uta.edu/hr/eos>
- *Safe & Sound in Maverick Country* <http://www.uta.edu/safety>

Campus Solicitations

"Solicitation," as defined in Rule 80103, Section 3 of the Rules and Regulations of the Board of Regents of The University of Texas System, means the sale, lease, rental or offer for sale, lease or rental of any property, product, merchandise, publication or service, whether for immediate or future delivery; an oral statement or the distribution or display of printed material, merchandise or products that is designed to encourage the purchase, use or rental of any property, product, merchandise, publication or service; the oral or written appeal or request to support or join an organization other than a registered student, faculty or staff organization; the receipt of or request for any gift or contribution; or the request to support or oppose or to vote for or against a candidate, issue or proposition appearing on the ballot at any election held pursuant to state or federal law or local ordinances. All solicitations on the UT Arlington campus must conform to the Regents' Rules and Regulations, copies of which are available in the offices of the president, vice presidents, academic deans, numerous other administrative offices and the Central Library. The Regents' Rules and Regulations also may be accessed at the following Web site: www.utsystem.edu/BOR/rules.htm (<http://www.utsystem.edu/BOR/rules.htm>).

Use of Campus Facilities

The property, buildings or facilities owned or controlled by The University of Texas at Arlington are not open for assembly, speech or other activities as are the public streets, sidewalks and parks. No person, organization, group, association or corporation may use property, buildings or facilities owned or controlled by UT Arlington for any purpose other than in the course of the regular programs or activities related to the University's role and mission unless authorized by the Rules and Regulations of the Board of Regents of The University of Texas System. Any authorized use must be conducted in compliance with the provisions of the Regents' Rules and Regulations (Regents' Rules and Regulations, Rule 80101), the approved rules and regulations of UT Arlington, and applicable federal, state and local laws and regulations.

Photo Identification Cards

Students are strongly urged to retain possession of their photo identification cards at all times. Misuse of University identification is an offense, which subjects students to discipline. Students lending their photo identification cards for fraudulent purposes, as well as those making use of them, will be disciplined. The student photo identification card is the property of the University, and a student may be asked to surrender the card for appropriate reasons.

Student Responsibilities

While University faculty and staff members give students academic advice and assistance, each student is expected to take responsibility for his or her education and personal development. The student must know and abide by the academic and disciplinary policies given in this catalog, including rules governing quantity of work, the standard of work required to continue in the University, scholastic probation and dismissal, and enforced withdrawal. The student must also know and meet the requirements of his or her degree program, including the University's core education requirements; must enroll in courses appropriate to the program; must meet prerequisites and take courses in the proper sequence to ensure orderly and timely progress; and must seek advice from appropriate University representatives about degree requirements and other University policies when necessary. The student must also know and adhere to all University deadlines.

Sources of Information on Academics, Deadlines, and Rules

All students are expected to be familiar with the following sources of information. Students will not be relieved of their responsibility to know the policies, deadlines and rules of the University on the grounds that they were not told. If students have questions regarding these materials, it is the University's expectation that the student will consult his/her academic advisor for guidance and resolution.

Dean's Offices

Students are responsible to the appropriate Dean of a College or School. Undeclared and freshman students are responsible to the Director of the University Advising Center. In each college/school, the office of the assistant or associate dean serves as a central source of information about academic affairs and student services.

Academic Advising

The student is responsible for seeking academic advice, for enrolling in appropriate courses to insure progress toward a degree, for timely completion of his or her academic program, for familiarity with the appropriate catalog, and for maintaining University standards. Assistance from an academic advisor is not a substitute for the personal responsibility of the student.

Undergraduate Student Advising

Academic advisors guide students to develop educational plans that are compatible with their strengths, goals, and interests. While monitoring their progress and guiding students to academic success, advisors also help students understand their responsibilities toward academic success. Academic advisors also serve as a key resource and advocate for students regarding the interpretation of University policies and procedures and referral to campus resources that to aid student success (Menezes, 2005; National Academic Advising Association Clearinghouse).

The student should consult the advising office in his or her department or, if he or she is an undeclared or freshman student, the University Advising Center. A student who is in doubt about any University regulation should always seek clarification before proceeding.

Academic advisors may limit the number of hours and overall difficulty of the students' schedules, require students to take specific courses deemed necessary to their education, prevent students from taking unsuitable courses, require students to attend advising sessions, and otherwise restrict enrollment or take other actions approved by the dean of their college/school or the Director of the University Advising Center to assure the student's best academic interest. Failure to enroll in courses as prescribed/contracted by academic advisor without consultation and consent can lead to disciplinary actions through Student Conduct.

Undergraduate advising locations can be found at <http://www.uta.edu/universitycollege/resources/advising.php>.

Graduate Student Advising

Each graduate program has a graduate advisor. The graduate advisor represents the academic dean and the Committee on Graduate Studies in matters pertaining to advising graduate students in their academic areas. The graduate advisor's functions include clearing of students for registration,

acting upon requests for drops, adds, section changes and special examinations; maintaining graduate student records; and advising graduate students about their degree plans. The name and contact information for graduate advisors can be found at <http://grad.pci.uta.edu/faculty/advisors>.

Enrollment & Attendance

Managing Enrollment

Once a student registers for classes, the University commits resources to provide registered students with instruction by qualified faculty and sufficient class space for the course. Thus, upon registration, a student assumes full responsibility for either paying fees in full by a prescribed due date, or notifying the University in an appropriate time frame that he/she will not attend and take all appropriate action as prescribed to drop a course(s) or officially withdraw from the University. The student must verify his or her schedule of classes each term, must see that necessary corrections are made, and must keep documentation of all schedule changes and other transactions.

Class Attendance, Tardiness and Make-Up Work

The University is not required by an outside entity to take attendance; however, regular attendance at all class meetings is expected. Individual class attendance and tardiness regulations will be established by instructors and published in the course syllabus or announced to their classes. At the discretion of the instructor, such regulations may not include provisions for making up work missed by the student as a consequence of an absence. Special regulations of colleges and schools required by the unique nature of their programs of study may be enacted through the normal approval process. These special regulations may not conflict with University regulations on class attendance and absence. An instructor is under no obligation to accommodate students who are absent or miss work without prior notification and make-up arrangements.

A student's registration is not automatically cancelled for non-attendance. A student should pay fees in full by the designated deadline or take the appropriate steps to withdraw. To avoid financial responsibility to the University, cancellation of enrollment must be completed no later than the day before the first official University class day. Prompt withdrawal notification helps to free up class space for other students.

University Authorized Absences

The Office of the Vice President for Student Affairs provides lists of students who have absences authorized by the University (e.g., participation in athletic events or scholastic activities that are officially sponsored University functions--those are primarily activities that are funded by the University).

The student must notify the instructor in writing at least one week in advance of the start of the excused absence and arrange with the instructor to make up missed work or missed examinations. Instructors will allow students an opportunity to make up the work and examinations within a reasonable time period following the absence or otherwise adjust the grading to ensure that the student is not penalized for the absence, provided that the student has properly notified the instructor. Students who have properly notified the instructor, will not be penalized for the absence. However, the instructor may respond appropriately if the student fails to complete the assignment or examination satisfactorily within the time limit following the absence set by prior arrangement.

If there is disagreement between student and faculty member regarding what constitutes a reasonable amount of time to complete any missed assignments or examinations, either the student or the instructor may request a ruling from the Office of the Vice Provost for Academic Analytics and Operations. The decision of the Vice Provost is final.

Absence for Military Service

In accordance with section 51.9111 of Texas Education Code, a student is excused for attending classes or engaging in other required activities, including examinations, if he or she is called to active military service of reasonably brief duration. The student will be allowed a reasonable amount of time after the absence to complete assignments and take examinations.

Withdrawal as a Result of Military Service

A student who must withdraw from the University as a result of military service will receive the following considerations according to Section 54.006 of the Texas Education Code: (1) receive a refund of tuition and fees (2) if eligible, be assigned a grade of incomplete (I) or (3) as determined by the instructor, receive a final grade or credit in courses where the student has satisfactorily completed a substantial amount of coursework and has demonstrated sufficient mastery of the course material.

Observance of Religious Holy Days

A student who misses an examination, work assignment or other project because of an observance of a religious holy day will be given the opportunity to complete the work missed within a reasonable time after the absence.

Checking Email

E-mail serves a primary means for communication at UT Arlington. Therefore, the University has the right to send communications to students via University-issues e-mail and the right to expect that those communications will be received and read in a timely fashion. The Office of Information Technology (OIT) will assign all students an official University e-mail address. Students are expected to check their official University e-mail account on

a frequent and consistent basis to stay current with University communications. The University recommends checking e-mail daily; in recognition that certain communications may be time-critical.

Maintaining updated address and phone

While most of University business and communications is handled through official University email or through MyMav, on occasion the University will need to contact students by phone or mail. The student must give current and correct local and permanent addresses and telephone numbers to the University, either through self-service in MyMav or in person to the Office of Admissions, Records and Registration. Official correspondence may be mailed, versus e-mailed, to the appropriate address depending upon the nature of the correspondence and the academic calendar; if the student has moved and failed to correct this address, he or she will not be relieved of responsibility on the grounds that the correspondence was not delivered.

Requirement to Update Academic Records

UT Arlington students who also enroll at other institutions of higher education have an obligation to ensure that UT Arlington has a complete and accurate academic record. Students who enroll in coursework at other institutions must transfer a record of that coursework to UT Arlington's Office of Admissions, Records and Registration at the conclusion of each term completed externally.

Student Rights & Security

Rights Under Family Educational Rights and Privacy Act (FERPA)

At UT Arlington, FERPA rights apply to a student. A student is a person who has been admitted and is registered, regardless of the person's age.

Under FERPA, a student has a right to:

- inspect his or her education records within 45 days of the request;
- require that the University obtain his or her prior written consent before releasing personally identifiable information from education records;
- request that corrections be made to education records if the student believes the records are inaccurate or misleading or otherwise in violation of the student's privacy rights under FERPA.
- file a complaint with the Department of Education concerning an alleged failure by the institution to comply with FERPA.

Rights Under the Jeanne Clery Disclosure of Campus Security Policy

In compliance with the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (formerly the Student Right-to-Know and Campus Security Act; P.L. 101-542, as amended), the University of Texas at Arlington publishes specified campus crime statistics and campus security policies through the Office of the Chief of the University Police.

Other Student Rights

GRIEVANCES OTHER THAN GRADES

In attempting to resolve any student grievance, the student must first make a serious effort to resolve the matter with the individual with whom the grievance originated. Grievances involving matters other than grades are appealed to the department chair or office director, then to the Vice Provost for Academic Analytics and Operations. Appeals to the Vice Provost must be submitted in writing on an appeal form available in academic departments.

Information on grievance procedures related to grades is available in the Grades and Grading (p. 61) section of the catalog.

SEEKING EXCEPTIONS TO GRADUATE POLICIES

A student may petition for exceptions to published graduate policy by submitting a petition. The Graduate Advisor and the departmental Committee on Graduate Studies Chair will evaluate the petition and send it to the Dean for final decision. Limited exceptions to some rules may be approved if the facts presented by the petitioner are fully justified in the views of the Graduate Advisor, Committee on Graduate Studies Chair, and Dean. All petitions must be submitted on the petition form available online (<http://grad.pci.uta.edu/students/forms>).

Student Right-to-Know and Campus Security Act

Campus security and safety guidelines: In case of emergency or to report a crime in progress, contact the UT Arlington Police at (817) 272-3003. For all other security and safety issues, dial (817) 272-3381 or visit the Campus Police homepage (<http://www.uta.edu/campus-ops/police>).

Campus security policies: In compliance with the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, formerly the Student Right-to-Know and Campus Security Act (P.L. 101-542, as amended), the University of Texas at Arlington publishes specified campus crime statistics and campus security policies through the Office of the Chief of the University Police.

Campus security policies include:

- Procedures for reporting criminal actions or other emergencies occurring on campus.
- Policies concerning security of and access to campus facilities, including campus residences; campus law enforcement authority and responsibilities.
- A description of programs designed to inform students and employees about the prevention of crimes, and campus security procedures.
- The policy of monitoring and recording of students' criminal activity occurring at off-campus locations of student organizations officially recognized by the institution.
- The policy regarding the possession, use and sale of alcoholic beverages and illegal drugs, and enforcement of federal and state drug and drinking laws.
- A description of drug or alcohol-abuse education programs.
- Sexual assault programs to prevent sex offenses, and procedures to follow when a sex offense occurs.
- Policy on emergency response and emergency notification procedures involving immediate threat and campus evacuation.
- Missing student information
- Fire and life safety policies and procedures
- Gang free zones and consequences of engaging in organized criminal activities in these zones
- Campus-wide emergency notification procedures in case of immediate threat or campus evacuation (MavAlert (<http://www.uta.edu/campus-ops/police/docs/mav-alert.pdf>))

To learn more how to prevent crime or to respond to emergency situations, visit the website <http://www.uta.edu/campus-ops/police/emergency-management>.

Crime statistics may be accessed on the University Police Web site at <http://www.uta.edu/campus-ops/police>.

Gang-free zones: To promote campus safety and deter crime, premises owned, rented or leased by The University of Texas at Arlington, and areas within 1,000 feet of the premises are "gang-free" zones. Certain criminal offenses, including those involving gang-related crimes, will be enhanced to the next highest category of offense if committed in a gang-free zone by an individual 17 years or older. See Texas Penal Code, Section 71.028 (<http://www.statutes.legis.state.tx.us/Docs/PE/htm/PE.71.htm#71028>).

Missing student notification policy: If a member of the University community has reason to believe that a student who resides in on-campus housing is missing, he or she should immediately notify the UT Arlington Police Department at 817-272-3381. Students residing in on-campus housing have the option to identify confidentially an individual to be contacted by UT Arlington in the event the student is determined to be missing for more than 24 hours. Contact information will be accessible only to authorized campus officials and law enforcement and will not be disclosed outside of a missing person investigation. To designate a confidential contact, contact Apartment and Residence Life (<http://www.uta.edu/studentaffairs/residence-life-home>) at (817) 272-2926. More details can be found in the Annual Campus Fire and Safety Report (<http://www.uta.edu/campus-ops/police/docs/Annual%20Campus%20Fire%20and%20Safety%20Report%202013.pdf>).

False alarms reports: Since Sept. 1, 2013, Section 42.06(b) of the Texas Penal Code (<http://www.legis.state.tx.us/tlodocs/83R/billtext/pdf/HB01284F.pdf#navpanes=0>) mandates that the penalty for the offense of making a false alarm or report involving a public or private institution of higher education is a state jail felony.

Family Educational Rights and Privacy Act (FERPA)

FERPA, the Family Educational Rights and Privacy Act of 1974, is a federal law that pertains to the release of and access to student education records. In compliance with FERPA, the University of Texas at Arlington does not disclose personally identifiable information contained in student education records, except as authorized by law.

Also known as the Buckley Amendment, this law applies to all schools that receive funds under an applicable program of the US Department of Education. UT Arlington has established policies relating to the accessibility of student information in its custody. These are described below.

Under FERPA, a student has a right to:

- inspect his or her education records within 45 days of the request;
- require that the University obtain his or her prior written consent before releasing personally identifiable information from education records;
- request that corrections be made to education records if the student believes the records are inaccurate or misleading or otherwise in violation of the student's privacy rights under FERPA.
- file a complaint with the Department of Education concerning an alleged failure by the institution to comply with FERPA.

At UT Arlington, FERPA rights apply to a student. A student is a person who has been admitted and is registered, regardless of the person's age.

FERPA applies both to the education record and to the personally identifiable information within the record, which is called directory-type information (http://www.uta.edu/aa0/recordsandregistration/content/student_services/ferpa.aspx#dirInfo). At UT Arlington, an education record is defined as any information recorded in any way, including but not limited to handwriting, print, tape, film, microfilm, microfiche, and digital image. A student does not have a right under FERPA to inspect information that is not an education record (http://www.uta.edu/aa0/recordsandregistration/content/student_services/ferpa.aspx#infoInspec).

UT Arlington students have the right to provide written consent before the University discloses personally identifiable information from the student's education records, except to the extent that FERPA authorizes disclosure without consent.

The University of Texas at Arlington will disclose information from a student's education record without the written consent of the student in specified instances (http://wwwb.uta.edu/aa/recordsandregistration/content/student_services/ferpa.aspx#discPermit). This includes to persons employed by the University in an administrative, supervisory, academic, or support staff position (including law enforcement unit and health staff); a person or company with whom the University has a contract or affiliation (such as an attorney, auditor, collection agent or clinical facility); a member of the UT System Board of Regents; or a person assisting another university official in performing his or her tasks; who needs to review an education record in order to fulfill his or her professional responsibility. For a full listing, please see UT Arlington's FERPA page (http://wwwb.uta.edu/aa/recordsandregistration/content/student_services/ferpa.aspx#discPermit).

UT Arlington uses safe methods to identify and authenticate the identity of students, parents, school officials and all other parties before disclosing education records.

Consult the FERPA webpage at http://wwwb.uta.edu/aa/recordsandregistration/content/student_services/ferpa.aspx for additional information.

Tuition & Fees

Overview

Tuition and fees are subject to change by legislative or regental action and become effective on the date enacted. The Texas Legislature does not set the specific amount for any particular student fee. The student fees assessed above are authorized by state statute; however, the specific fee amounts and the determination to increase fees are made by the university administration and The University of Texas System Board of Regents. (General Appropriations Act 2010-2011, Article IX, §6.16). Visit www.uta.edu/fees for current tuition, fees, and charges.

To comply with Senate Bill 1304, passed by the 81st Texas Legislature the University of Texas at Arlington is required to report to each student the amount of tuition paid by the student that must be set aside to provide financial assistance to qualified students. UT Arlington will notify students by email of the set aside amount.

Tuition is charged based on course of study; therefore a precise semester registration total may be calculated by accessing the Registration Cost Estimation site at www.uta.edu/fees.

Undergraduate students who enrolled under the fall 1999 or subsequent catalogs will be required to pay non-Texas resident tuition rates when they exceed 45 hours more than is required for completion of the degree program for which the student is enrolled.

The "99 hour rule" refers to the implementation of Senate Bill 961, passed by the Seventy-fifth Legislature. It is the rule that students admitted during the fall semester of 1999 and thereafter who complete more than 99-hours of *doctoral* level study may be required to pay out-of-state tuition for every subsequent semester. UT Arlington does not to automatically change tuition rates when a doctoral student passes the 99-hour mark. The policy of the University is as follows: Doctoral students who enrolled under the Summer 1999 or subsequent catalogs will be charged non-resident tuition under the following conditions: A doctoral student must pay non-Texas resident tuition beginning the first long semester in which a) the student has been enrolled previously as a graduate student for 14 or more long semesters, AND b) the student has accumulated more than 99 semester credit hours of doctoral study at UT Arlington. Students exceeding both limits will not be eligible for assistantships supported by state funds. Individual exceptions for students exceeding these criteria who are nearing degree completion are considered.

Failure to pay tuition, fees, and charges by the term/session payment due date constitutes voluntary withdrawal from the term/session.

Description of Tuition, Fees, and Charges

Tuition, fees, and charges are assessed to students based on session credit hours (SCH), a set charge per session, or specific services. They are required of all students, charged to everyone taking specific courses or anyone receiving specific services, or charged only for voluntary products or services. Refer to www.uta.edu/fees and choose Description of Tuition and Fees for a detailed description.

Exemptions and Waivers

State law provides for several exemptions or waivers of tuition, fees, and charges. Students qualified for a reduced rate in any of the following categories must have that eligibility certified prior to registration. For a complete description and eligibility requirements, please go to <https://webapps.uta.edu/UtaSfs/Application?cmd=exemptions>. This web site will also provide department contact information and a list of tuition, fees, and charges that are exempt or waived. Additional information may be found in the Texas Education Code.

Tuition Rebate for Baccalaureate Graduates

Texas residents enrolling for the first time in a Texas public institution of higher education may be eligible for a tuition rebate up to \$1,000 when the baccalaureate degree is completed (Texas Education Code, Section 54.0065). The student must have attempted all course work at a Texas public college or university and have been entitled to pay resident tuition at all times while pursuing the degree. The requested rebate must be for course work related to a first baccalaureate degree received from a Texas public university. No more than three hours may be attempted in excess of the minimum

number of semester hours required for the degree under the catalog which the student is graduating. (Hours attempted include transfer credits, credit earned exclusively by examination, courses dropped after the official census date, for-credit developmental courses, optional internship and cooperative education courses, and those repeated exclusively by examination.)

An application form and any other requirements pertaining to the tuition rebate may be obtained from the Graduation section of the Office of Admissions, Records and Registration. Interested students should apply for the rebate when filing for graduation prior to registration for the final semester. To be eligible, a student must apply for the rebate before degrees are awarded for that semester.

This rebate is not part of the UT Arlington Guaranteed Tuition Plan, but you may qualify for it, in addition to qualifying for the Guaranteed Tuition Plan, and earn rebates from both programs if you meet eligibility requirements.

Payment of Tuition, Fees, and Charges

Please go to www.uta.edu/fees for information on due dates, deadlines, detailed penalties and refunds. Students will be given notice of the amount of his/her tuition charges that were required to be set aside to provide financial assistance for students enrolled at the institution (Texas Education Code, Section 56.014).

Withdrawal for Non-Payment

Please go to www.uta.edu/fees and select Refunds for Semester Withdrawals and Dropped Courses for information about a specific session.

Payment Options

Please go to www.uta.edu/fees and select Payment Information in the Paying Your Bills section for deadlines and payment options for a specific session.

- **Installment Payment Option:** (Available in fall and spring semesters only. Installments are not available to Academic Partnership (AP) students or students enrolled in the Finish@UTprogram.) The Installment Payment Option is available to students and requires payment of at least one third of your total current semester registration, plus all past due amounts, by the session payment due date. Additionally, if your tuition, fees, and charges increase for any reason, such as residency status changes or schedule adjustments, the new higher total must be used in your current session calculations. By using the installment plan, you will not be eligible for a Designated Tuition discount.

Note: The following quotation from Texas Education Code 54.007 applies to installment payments due: "A student who fails to make full payment of tuition and fees, including any incidental fees, by the due date may be prohibited from registering for classes until full payment is made. A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester."

- **Financial Aid:** Please read the Financial Aid section of this catalog or visit www.uta.edu/fao for information.
- **Enrollment Loans:** Loans are offered only if funds are available and the borrower meets underwriting requirements. Loans are available at Student Accounts Department, Room 130, Davis Hall. Please visit our Web site, www.uta.edu/fees, and select Enrollment Loans for specified dates and requirements. Enrollment loans are not available to Academic Partnership (AP) students or students enrolled in the Finish@UTprogram.

Questions may be directed to the Student Accounts Department, 817-272-2172 or by email at studentaccounts@uta.edu. Detailed student account information may not be released to anyone other than the student without the student's written permission in the Student Accounts Department.

Payment Methods and Locations

The University accepts cash, checks, traveler's checks, money orders, wires, and the following credit cards: MasterCard, Visa, Discover, Diner's Club, and American Express. Any form of payment that is returned unpaid can result in enrollment withdrawal and additional penalties.

- **Online:** Pay by credit card at www.uta.edu/makepayment.
- **In Person:** Payments can be made in person at Student Accounts, Room 130, E.E. Davis Hall.
- **Mail:** Please include your 10-digit student ID number and do not mail cash or traveler's checks. Check or money order payments can be mailed to:

UT Arlington Student Accounts Department

P.O. Box 19649

Arlington, TX 76019-0649

- **Traveler's Check:** Traveler's checks must be signed in the presence of a cashier and should be presented in person at the Student Accounts window during their regular business hours.
- **International Wires:** Demand drafts and international checks are held for 60 days before refunds can be issued. The use of wires is recommended to expedite refunds.
- **Kiosks:** Payments can be made at kiosks across campus using credit cards, debit cards, and checking or savings accounts.

Concurrent Enrollment

COOPERATIVE PROGRAMS BETWEEN UNIVERSITY OF TEXAS SYSTEM COMPONENTS

A student concurrently enrolling at two or more University of Texas System components and participating in a joint cooperative program may register and pay tuition, fees, and charges for all courses through the student's home institution. The concurrent enrollment agreement and waiver of specified fees and charges applies only to students following the concurrent enrollment procedures specified by the registrar of the home institution. Detailed procedures may be obtained from the registrar of the student's home institution. UT Arlington students will find additional information by going to www.uta.edu/fees and selecting Concurrent Enrollment. The concurrent enrollment agreement and waiver of specified fees and charges applies only to students following the concurrent enrollment procedures specified by the registrar of the home institution. Applicable tuition, fees and charges will be assessed and collected at the home institution for the other institution(s). The charges for the following will be assessed and collected at the home institution for the other institution(s):

- Flat rate Tuition at an appropriate rate
- Applicable laboratory fees and special course charges
- Enhanced Designated Tuition
- Any other fees and charges that are required at the host institution that are not charged at the home institution

Student services at the second institution will be made available to concurrently enrolled students paying the appropriate student service fees at the second institution. Some institutions have a reciprocal agreement for honoring parking permits. Details may be obtained from the police departments on each campus. Concurrently enrolled students should report any problems concerning registration, payment of tuition, fees, and charges or other matters related to concurrent enrollment procedures to the registrar of the home institution.

Concurrent students wishing to add or drop courses must do so in compliance with the host institution's policy. On or before the host institution's Census Date, adds or drops may be done through the home institution's registrar. After the Census Date, drops must be done at the host institution.

Sponsored Students/ Texas Tomorrow Fund Participants

It is the student's responsibility to contact the Student Accounts Department, Room 130, Davis Hall, 817-272-2172, each session prior to the payment deadline date to confirm that an authorization has been received and is sufficient to secure the current session registration.

Cost of Attendance and Financial Aid Opportunities

Annually, the Office of Financial Aid, Scholarships, and Veteran's Affairs estimates the average expenses for a full-time student for two semesters at UT Arlington, which includes the estimated cost of books, transportation, living expenses plus tuition and fees. Current information may be found at www.uta.edu/fao. Navigate to the Cost of Attendance option under the Financial Aid menu for detailed information. (Texas Education Code, Section 61.0777).

Academic Common Market

The Academic Common Market is an interstate agreement for sharing academic programs through an exchange of students across state lines. Fifteen southern states take part in the Academic Common Market. Texas, Florida and North Carolina participate at the graduate level only. Selected out-of-state programs that are not offered in a student's home state can be accessed through the Academic Common Market at in-state tuition rates.

For information on the graduate programs at The University of Texas at Arlington that are available through the Academic Common Market and the states that have access to those programs, contact the Office of Financial Aid or the Academic Common Market coordinator in the home state.

Further information on the Academic Common Market may be obtained from the Texas State Coordinator for the Academic Common Market: Texas Higher Education Coordinating Board, P.O. Box 12788, Austin, Texas, 78711. Phone: 512-427-6525. E-mail: linda.mcdonough@thehb.state.tx.us

State Law - Excessive Hours

Texas Education Code § 54.014 specifies that resident undergraduate students who initially enrolled as an undergraduate student in an institution of higher education fall semester 1999 and later may be subject to a higher tuition rate for attempting excessive hours at any Texas public institution of higher education while classified as a resident student for tuition purposes.

- Undergraduate students who enrolled initially in the fall 1999 semester or subsequent semesters cannot exceed more than 45 hours of the number of hours required for completion of the degree plan in which they are enrolled. Any hours beyond 45 are considered excessive and may result in additional tuition charges.
- Undergraduate students who enrolled initially in the fall 2006 semester or subsequent semesters cannot exceed more than 30 hours of the number of hours required for completion of the degree plan in which they are enrolled. Any hours beyond 30 are considered excessive and may result in additional tuition charges.

The purpose of these policies is to encourage students to complete their degree programs in an efficient, timely manner.

For additional information regarding the UT Arlington's administration of the Texas excessive hours policy, please visit <http://www.uta.edu/records/courses/policies/excessive-hours.php>

Other Fees

INTERNATIONAL STUDENT HEALTH INSURANCE

International students are required to purchase The University of Texas at Arlington Student Health Insurance Plan while enrolled at the University. Exceptions to this requirement are:

- Coverage by the UT Arlington faculty/staff insurance
- Continuing coverage under a mandatory government-sponsored health plan
- Continuing coverage under a mandatory employer-sponsored insurance plan

Proof of coverage and benefits provided must be documented and must be comparable to the University-sponsored plan. All policies under the three categories of exceptions must contain at least a \$7,500 repatriation benefit and a \$10,000 medical evacuation benefit. All policies must meet USIA regulations for those in "J" status. If coverage does not include medical evacuation and repatriation, supplemental policies covering those items will be made available.

MAV EXPRESS CARD FEATURES AND CHARGES

The Mav Express Card is used for accessing controlled facilities, checking books from the Library, gaining admission to various University activities such as athletic events and for other situations where personal identification is required.

A student may choose to deposit money on the Mav Express Card. This debit feature is called Mav Money. Students may use Mav Money at Dining Services, Student Accounts, University Center, University Bookstore, and many other locations on and off campus. Deposits may be made and account activity reviewed online. .

The Mav Express Card is a permanent card. As a student registers for a semester, the card is automatically validated. It is not necessary to obtain an additional Mav Express Card unless the student loses or destroys the card. Fees associated with the Mav Express Card (ID Card Replacement Fee) can be found at Description of Tuition and Fees: www.uta.edu/fees.

For additional information, visit www.uta.edu/mavexpress or call 817-272-2645.

MAVERICK PARKING GARAGE

The optional parking garage is available at an additional per term charge, plus gate card deposit. Day and night passes are offered; however, the official meeting time of all classes must be 5:30 p.m. or later to qualify for the night pass. Passes must be picked up at the garage and are only for parking in the garage. The garage is normally closed between terms. A parking permit must be purchased for parking elsewhere on campus. Contact the Maverick Parking Garage at 817-272-2370 for specific rates and availability.

PARKING PERMIT CHARGE

All students who drive a vehicle on campus need a permit to enter or park legally on campus (Texas Education Code, Section 51.207 (<http://www.statutes.legis.state.tx.us/Docs/ED/htm/ED.51.htm#51207>)). Please order your permit online through the registration screen from your student service center on the web. All students who order their permit before the first day of class will be mailed their permit. The permit will be mailed to their current University mailing address. If students order their permit after the first day of class, they will need to pick up the permit at the University Police Parking Service Office, 1225 W. Mitchell, Suite 112. Hours of business are 7:30 a.m. to 5 p.m. Monday-Friday, with the exception of registration periods. Students picking up a dorm or rental property parking permit must show proof of residency if they are not listed as primary resident.

Per Texas Transportation Code, Section 681.008 (<http://www.statutes.legis.state.tx.us/Docs/TN/htm/TN.681.htm>), Vehicles displaying a disabled veteran license plate are allowed to park in any person with disability parking space without displaying a University of Texas at Arlington parking permit. This exemption does not apply to parking in non-ADA designated spaces

If students withdraw from school any time before classes begin or before the census date, they must bring their permit to the Parking Office to receive a full/partial refund or mail the permit back by certified mail. If the permit is not returned or if it is lost or misplaced, a refund cannot be given. Each student will receive only ONE permit per fiscal year. If it becomes necessary to drive a different vehicle, the permit is transferable. However, the permit owner is responsible for all violations accrued by any vehicle that has their permit displayed. Students who terminate their enrollment prior to spring registration and who have paid a vehicle permit fee may receive a partial refund in accordance with the Rules and Regulations booklet provided they return their permit. No refunds on parking permits will be given after the spring census date for students. Ownership of the permit remains with the institution and is not transferable.

Students are responsible for picking up a copy or visiting the web site for the Rules and Regulations booklet that contains campus parking policies. For additional parking information, pricing information, or hours of extended service during registration, call 817-272-3907 or visit the web site www.uta.edu/parking.

GRADUATION CHARGES

A graduation charge must be paid by each baccalaureate degree candidate when application is made for graduation. If graduation is delayed past the stated semester, the student must reapply for graduation and repay the graduation charge. An additional charge to cover the cost of cap and gown is assessed to each candidate who plans to attend any graduation ceremony. Students who request that their diplomas be mailed after graduation will be required to pay the first class mailing cost.

COST OF BOOKS

Cost of books depends upon the courses selected. Generally, books for technical subjects are somewhat higher than those for other academic subjects. In certain technical, scientific and fine arts fields, there are extra expenses for equipment and supplies.

The University Bookstore has both new and used textbooks available. The bookstore will purchase used textbooks which are in good condition at any time during the year provided such textbooks continue to be used by the academic departments and if needed by the bookstore. "A student of this institution is not under any obligation to purchase a textbook from a university-affiliated bookstore. The same textbook may also be available from an independent retailer, including an online retailer." (Texas Education Code, Section 51.9705; 19 TAC 4.215 et seq.)

Information about required and recommended course textbooks, including titles, authors, other publisher information and price, can be found at the UT Arlington Bookstore's website, accessible via <http://www.uta.edu/bookstore>. Further information about required course materials is available by reviewing individual course syllabuses at UT Arlington's Instructor and Course Syllabus Information (<http://www.uta.edu/ra/real/courses.php>) website.

TRANSCRIPTS

The Registrar's Office will mail an official copy of an academic transcript at the written request of a student upon receipt of payment of \$7 for each copy requested. When working conditions permit, the office will provide one-day transcript service if requested. An official transcript will not be issued unless all financial obligations to the University have been satisfied.

HOUSING AND FOOD EXPENSES

Information about University housing may be found in the Student Housing section of this catalog. Information about campus food service may be found in the University Center section of this catalog.

Refunds

DROPPING COURSE(S) BUT CONTINUING ENROLLMENT

Students who drop a course/s while remaining enrolled in the session are refunded in full for drops completed by the published session census date. However, because of the tiered flat rate tuition rates, not every drop will result in a credit to your account. For example, a student who is taking 15 hours and drops to 12 hours will not see a credit to their flat rate tuition amount because 12 hours costs the same as 15 hours (see Flat Rate Fee Schedule (<https://webapps.uta.edu/UtaSfs/Application?cmd=feedescr>)). No refunds will be credited and the student is financially responsible for the full cost of the course/s dropped after the published session census date. (Texas Education Code, Section 54.006).

TOTAL WITHDRAWAL FROM SCHOOL

A student who officially withdraws from a session (drops all hours of a specific session) will receive a refund according to the schedule below.

1. A student who withdraws prior to the first official university class day will receive a 100 percent refund.
2. Students who withdraw as a result of military service may choose to receive a full refund of tuition and fees, an incomplete (if eligible) or final grade at institution discretion. (Texas Education Code, Section 54.006.)
3. If the foregoing condition is not met, then the refund shall be as shown below. Class days noted are official university class days. They are not the individual student's class meeting days.

FALL, SPRING AND SUMMER 11-WEEK SESSIONS

During class days 1 through 5—80%

During class days 6 through 10—70%

During class days 11 through 15—50%

During class days 16 through 20—25%

After 20th class day—no refund

INTERSESSIONS, SUMMER I 5-WEEK AND SUMMER II 5-WEEK SESSIONS

On first class day—80%

On second class day—50%

After second class day—no refund

Applicable dates and deadlines are available at www.uta.edu/fees. Select Refunds of Registration Charges (Withdrawals and Drops).

4. Parking refunds must be applied for separately at the Parking Office, 1225 W. Mitchell.

RETURN OF TITLE IV AND OTHER AID FUNDS

If a student receiving financial assistance withdraws (resigns) from all courses at the University of Texas at Arlington, then UT Arlington and/or the student may be required to return some of the federal, state, and/or institutional funds awarded to the student. These funds would be returned to the grant, scholarship, or loan fund from which the assistance was received.

The federal Return of Title IV Funds policy requires that a portion of federal aid be returned if the student withdraws on or before completing 60% of the semester for which student received federal aid. Students receiving all grades of F or a combination of all Fs and Ws are subject to the Return of Title IV Funds Calculation. Federal financial aid includes the Federal Pell Grant, Federal Academic Competitiveness Grant (ACG), Federal SMART Grant, Federal Supplemental Educational Opportunity Grant (FSEOG), LEAP Grant (formerly SSIG), Federal Perkins Loan, Federal Stafford Loan (subsidized and unsubsidized), and the Federal Parent Loan for Undergraduate Students (PLUS).

Depending on the types and amounts of aid received, UT Arlington may be required to return a certain portion of funds, and the student may be required to repay a portion of the funds. If the student owes a repayment of grant funds as a result of the calculation, he/she cannot receive future federal financial aid funds at any school until repayment has been made. Any federal loan amount owed by the student is to be repaid under the terms of the promissory note (see example below). The student may owe an outstanding balance to UT Arlington once we return funds required through the federal Return of Title IV Funds calculation. Complete details of the policy can be found at www.uta.edu/fao, click Financial Aid on the left menu, then Return of Funds Policy. Contact the Office of Financial Aid for additional information.

DISBURSEMENT OF REFUNDS

For your convenience, direct deposit of your refund is available. Information about direct deposit is published at www.uta.edu/fees, select Direct Deposit.

Inquiries concerning refunds should be directed to Student Accounts, Room 130, Davis Hall, 817-272-2172, or by email at studentaccounts@uta.edu.

Current detailed information is available at www.uta.edu/fees. Select Refunds of Registration Charges (Withdrawals and Drops)

Residency Regulations

Resident classifications are determined in accordance with Title 19, Part 1, Chapter 21, Subchapter B of the Texas Administrative Code and the rules of the Texas Higher Education Coordinating Board for determining residence status. Except as specifically provided by law, an individual classified as a nonresident student must pay tuition, fees, and charges required of nonresident students. Students may access these rules at the Texas Administrative Code web site (<http://www.sos.state.tx.us/tac>).

To be considered a Texas Resident a person must establish a domicile in Texas not later than one year before the census date of the academic term in which the person is enrolled in an institution of higher education, and maintain that domicile continuously for the year preceding the census date. Generally, a person enrolling in an institution of higher education prior to having established a domicile in Texas for 12 consecutive months immediately preceding the census date will be classified as a nonresident student.

Additionally, a person is eligible to be classified as a Texas Resident if the person: maintained a domicile in Texas for at least 36 months prior to graduation from a Texas high school or receipt of the equivalent to a Texas high school diploma, graduated from a Texas high school or received the equivalent of a Texas high school diploma, and maintained a residence in Texas for the 12 months preceding the census date at an institution of higher education. The domicile of a dependent's parents is presumed to be the domicile of the dependent unless the dependent meets all the requirements of this paragraph.

If while attending an institution of higher education a person classified as a nonresident meets the requirements to domicile in Texas, the nonresident student may reclassify as a Texas Resident if business and personal facts or actions are unequivocally indicative of a fixed intention to domicile permanently in Texas. A nonresident classification is presumed to be correct as long as the residence of the individual in Texas is primarily for the purpose of attending an educational institution. Students wishing to reclassify will need to complete a set of the Core Residency Questions and turn them into the Undergraduate Admissions Office with supporting documentation.

Generally, a student attending The University of Texas at Arlington who is not classified as a Texas Resident will be charged nonresident tuition. Certain nonresident students, however, are entitled to pay tuition and other fees at the Texas Resident rate. For example, military personnel assigned to duty in Texas, and their spouses and dependent children, are entitled to pay the same tuition as a Texas resident if certain documentation is provided. Similarly, students who hold a competitive academic scholarship of \$1,000 per year or more awarded through The University of Texas at Arlington are entitled to pay resident fees and charges. Other exceptions to the requirement that nonresident students pay nonresident tuition, fees, and charges are included in the Texas Higher Education Coordinating Board rules for determining residence status. (<http://www.theccb.state.tx.us/reports/pdf/0183.pdf>)

The responsibility of registering under and maintaining the proper residence classification rests on the student. If there is any question concerning the student's classification at the time of registration, or any time thereafter, it is the student's obligation to consult with the Residency Determination Official in the undergraduate school and have the student's classification officially determined. All requests for reclassification should be submitted to the undergraduate school at least 30 days prior to the census date of the term in question. Residency appeals are made to the Residency Appeals Committee. Decisions of the committee are final.

Degree Requirements

See Degree Requirements (p. 44).

General Core Requirements

General Core Curriculum for a Bachelor's Degree

The University requires the following courses for each degree*:

COMMUNICATION

Select two of the following:

COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING	6
COMS 2302	PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING	
ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
THEA 1303	FUNDAMENTALS OF PRESENTATION	

Total Hours 6

CREATIVE ARTS

Select one of the following:

ARCH 1301	INTRODUCTION TO ARCHITECTURE AND INTERIOR DESIGN	3
ART 1301	ART APPRECIATION	
ART 1309	ART OF THE WESTERN WORLD I: GREECE THROUGH RENAISSANCE	
ART 1310	ART OF THE WESTERN WORLD II: BAROQUE TO MODERN	
MUSI 1300	MUSIC APPRECIATION	
THEA 1342	THEATRE AND FILM APPRECIATION	
THEA 1343	INTRODUCTION TO THEATRE	
MUSI 1302	JAZZ APPRECIATION	
MUSI 2300	INTRODUCTION TO WORLD MUSIC	
MUSI 2301	APPRECIATION OF MUSIC IN FILM	

Total Hours 3

GOVERNMENT/POLITICAL SCIENCE

POLS 2311	GOVERNMENT OF THE UNITED STATES	3
POLS 2312	STATE AND LOCAL GOVERNMENT	3

Total Hours 6

LANGUAGE, PHILOSOPHY AND CULTURE

Select one of the following:

ANTH 2322	GLOBAL CULTURES	3
ARAB 2314	INTERMEDIATE ARABIC II	
ARCH 2300	MASTERWORKS OF WESTERN ARCHITECTURE	
ART 1317	THE ART OF NONWESTERN TRADITIONS	
CHIN 2314	INTERMEDIATE CHINESE II	
ENGL 2303	TOPICS IN LITERATURE	
ENGL 2309	WORLD LITERATURE	
ENGL 2319	BRITISH LITERATURE	
ENGL 2329	AMERICAN LITERATURE	
FREN 2314	INTERMEDIATE FRENCH II	
GERM 2314	INTERMEDIATE GERMAN II	
GLOBAL 2301	INTRODUCTION TO GLOBAL ISSUES	

INTS 1310	INTRODUCTION TO POPULAR CULTURE
KORE 2314	INTERMEDIATE KOREAN II
LING 2371	LANGUAGE IN A MULTICULTURAL USA
PHIL 2300	INTRODUCTION TO PHILOSOPHY
PORT 2314	INTERMEDIATE PORTUGUESE II
RUSS 2314	INTERMEDIATE RUSSIAN II
SPAN 2314	INTERMEDIATE SPANISH II
PHIL 1304	CONTEMPORARY MORAL PROBLEMS
CLAS 1300	INTRODUCTION TO CLASSICAL MYTHOLOGY
LATN 2314	LATIN LEVEL IV
GREK 2314	GREEK LEVEL IV

Total Hours 3

LIFE AND PHYSICAL SCIENCE

Select two of the following: 6

ASTR 1345	INTRODUCTORY ASTRONOMY I
ASTR 1346	INTRODUCTORY ASTRONOMY II
BIOL 1333	DISCOVERING BIOLOGY: MOLECULES, CELLS AND DISEASE
BIOL 1334	LIFE ON EARTH: EVOLUTION, ECOLOGY AND GLOBAL CHANGE
BIOL 1441	CELL AND MOLECULAR BIOLOGY
BIOL 1442	EVOLUTION AND ECOLOGY
BIOL 2457	HUMAN ANATOMY AND PHYSIOLOGY I
BIOL 2458	HUMAN ANATOMY AND PHYSIOLOGY II
CHEM 1300	INTRODUCTORY CHEMICAL PRINCIPLES
CHEM 1345	CHEMISTRY IN THE WORLD AROUND US
CHEM 1346	CHEMISTRY IN THE WORLD AROUND US II
CHEM 1441	GENERAL CHEMISTRY I
CHEM 1451	CHEMISTRY FOR HEALTH SCIENCES
GEOL 1301	EARTH SYSTEMS
GEOL 1302	EARTH HISTORY
GEOL 1315	METEORITES, ASTEROIDS, FLOOD VOLCANISMS AND MASS EXTINCTIONS
GEOL 1330	GLOBAL WARMING
GEOL 1340	WEATHER AND CLIMATE
GEOL 1350	INTRODUCTION TO OCEANOGRAPHY
GEOL 1360	GEOLOGIC HAZARDS
PHYS 1300	INTRODUCTION TO MUSICAL ACOUSTICS
PHYS 1301	PHYSICS FOR NON SPECIALISTS I
PHYS 1302	PHYSICS FOR NON SPECIALISTS II
PHYS 1441	GENERAL COLLEGE PHYSICS I
PHYS 1442	GENERAL COLLEGE PHYSICS II
PHYS 1443	GENERAL TECHNICAL PHYSICS I
PHYS 1444	GENERAL TECHNICAL PHYSICS II

Total Hours 6

MATHEMATICS

Select two of the following: 6

MATH 1301	CONTEMPORARY MATHEMATICS
MATH 1302	COLLEGE ALGEBRA
MATH 1303	TRIGONOMETRY
MATH 1308	ELEMENTARY STATISTICAL ANALYSIS
MATH 1313	LIBERAL ARTS HONORS MATHEMATICS
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS

MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	
ENGR 1300	ENGINEERING PROBLEM SOLVING	
PHIL 2311	LOGIC	
MATH 1421	PREPARATION FOR CALCULUS	
MATH 1324	ALGEBRA AND TRIGONOMETRY	
MATH 1325	ANALYTIC GEOMETRY	
MATH 1327	ARCHITECTURAL CALCULUS	
MATH 1330	ARITHMETICAL PROBLEM SOLVING	
MATH 1331	GEOMETRICAL INFERENCE AND REASONING	
MATH 1332	FUNCTIONS, DATA, AND APPLICATIONS	
MATH 1426	CALCULUS I	
MATH 2326	CALCULUS III	
MATH 2425	CALCULUS II	
Total Hours		6

SOCIAL AND BEHAVIORAL SCIENCES

Select one of the following:

ANTH 1306	INTRODUCTION TO ANTHROPOLOGY	
CRCJ 2334	INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM	
ECON 2305	PRINCIPLES OF MACROECONOMICS	
ECON 2306	PRINCIPLES OF MICROECONOMICS	
ECON 2337	ECONOMICS OF SOCIAL ISSUES	
FINA 2330	MONEY, FINANCE AND THE MODERN CONSUMER	
IE 2308	ECONOMICS FOR ENGINEERS	
LING 2301	INTRODUCTION TO THE STUDY OF HUMAN LANGUAGES	
MANA 2302	COMMUNICATIONS IN ORGANIZATIONS	
PSYC 1315	INTRODUCTION TO PSYCHOLOGY	
SOCI 1311	INTRODUCTION TO SOCIOLOGY	
Total Hours		3

U.S. HISTORY

HIST 1311	HISTORY OF THE UNITED STATES TO 1865	3
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	3
Total Hours		6

FOUNDATIONAL COMPONENT AREA OPTION

* A course may only fulfill one component area.

OLD--through summer 2014

ENGLISH COMPOSITION

Six hours (1301 and 1302 or suitable substitutes).

LITERATURE

Three hours of English or modern language literature or other approved substitute.

LIBERAL ARTS ELECTIVE

Three hours above the freshman level of literature, or social and cultural studies designated as taught in the College of Liberal Arts, or fine arts or philosophy, or technical writing.

U.S. HISTORY

Six hours of American history or three hours of American and three hours of Texas history. (This requirement is mandated by state law and cannot be waived.)

U.S. POLITICAL SCIENCE

Six hours covering U.S. and Texas constitutions. (This requirement is mandated by state law and cannot be waived.)

MATHEMATICS

Six hours (MATH 1301 or higher. Credit will not be given for both MATH 1301 and 1302.)

NATURAL SCIENCE

Eight hours in lab science (biology, chemistry, geology and/or physics).

SOCIAL/CULTURAL STUDIES

Three hours*.

FINE ARTS

Three hours from art, dance, music, architecture or theatre arts.

*The Social and Cultural Studies requirement will be satisfied by designated courses which have been approved by the Undergraduate Assembly. For a list of approved courses, contact the University Advising Center or see <http://www.uta.edu/universitycollege/current/academic-planning/uac/what-is-advising/core-courses.php>.

International students whose secondary education was taught in their native tongue (other than English) may meet the modern language requirement for the Bachelor of Arts degree by successfully completing six additional hours in English beyond the general requirements for a bachelor's degree. The eight additional hours needed to fulfill the total degree requirements must be approved by the student's major department and must be included in the degree plan. The major department has the right to stipulate the modern language permitted for the bachelor's degree, provided the language is taught at UT Arlington.

Undergraduate Education

New Maverick Orientation (Freshman and Transfer Orientation)

B160 Lower Level, University Center · Box 19348 · 817-272-9234 · www.uta.edu/orientation

The University of Texas at Arlington is dedicated to the retention and overall success of our students, by promoting academic excellence and fostering lifelong learning. New Maverick Orientation offers a variety of programs, both on campus and online, for new freshmen, transfer students, and veterans students. These programs are designed to meet your individual needs and to assist you in making a smooth transition into life as a UT Arlington Maverick. Our goal is to assist you with the transition process, acclimate you to our way of doing things, connect you to our community and its resources that support your success, and assist you in registering for your first semester of classes.

Attending New Maverick Orientation helps students begin to take ownership of their educational goals and create a framework for their future. Embracing UT Arlington traditions and jumping into the experience will help you learn, right from the beginning, what it means to "Be a Maverick!"

Our office is staffed by professionals who specialize in providing outstanding support and service to incoming students, undergraduate student leaders who service as guides and resources in the on campus programs, and graduate students who are gaining experience for future careers in higher education. Together, we look forward to providing you with a memorable and helpful experience. Welcome to Maverick Country!

MAVS 1000 Policy

Effective fall 2014, first-time freshmen students (new high school graduates) who have been accepted into UT Arlington are required to take MAVS 1000 First Year Experience. MAVS 1000 orients students to life on campus and assists in the transition to college. Course content and assignments will help students identify their individual needs and skills which will affect their success, determine what resources are appropriate and available to them, and formulate a plan for an actively engaged and enriched experience on the campus.

Exemptions: Students enrolled in UNIV 1131 ISSUES IN COLLEGE ADJUSTMENT through the FIG (Freshmen Interest Group) program will not be required to take MAVS 1000 First Year Experience. In addition, students enrolled in the following college specific first year seminars will be exempt from taking MAVS 1000: MANA 1300, NURS 1300, ARCH 1101, INTD 1101, ART 1300, THEA 1300.

Student Feedback Surveys

As part of the UT Arlington's efforts toward continually improving the quality of teaching, the University developed the Student Feedback Survey (SFS) program, a campus-wide program that affords students with an opportunity to reflect upon their experience in each organized course (lectures, seminars, and labs) and offer relevant feedback.

Toward the end of each term, each student enrolled in a lecture, seminar, or lab course will receive an e-mailed invitation to participate in the SFS for that particular section. (Students will receive separate e-mail messages for each course in which they are enrolled.) With few exceptions, each SFS is administered online. In every case, the feedback is submitted anonymously.

Once the final grades for the term have been officially certified by the University, summaries of the SFS data are provided to both the professor and his/her supervisor. These reports help members of the faculty identify which aspects of a course should remain unchanged and which aspects might benefit from revision.

Graduate Education

Mission and Philosophy

The Office of Graduate Studies is part of the Division of Academic Programs and Curricula.

The goal of graduate study is to develop a student's potential for original research, scholarship, creative expression and teaching in his or her chosen field of endeavor. Graduate study actively involves students in research, creative and scholarly pursuits that foster acquisition of factual knowledge and professional skills in an environment that values and promotes discovery, innovation, and the spirit of creative scholarship. Ultimately, graduate study prepares students to become important contributors to and intellectual leaders of their disciplines.

History and Overview

Graduate study at the University of Texas at Arlington began in 1966 with the initiation of six master's degree programs. Doctoral degree programs were added in 1969 with a Ph.D. in engineering. Today the University offers master's degrees in 71 disciplines or interdisciplinary programs and 29 doctoral degree programs.

Office of Graduate Studies Website

Students and faculty are encouraged to visit the Office of Graduate Studies website at <http://www.uta.edu/gradstudies> to locate important information about graduate programs and to learn about support resources that help students hone critical skills which lead to academic and professional success.

Administration of the Advanced Degree Programs

Academic Deans

Academic deans oversee and regulate graduate program practices taking place in their colleges or schools.

Committees on Graduate Studies

Each graduate program is governed by a Committee on Graduate Studies. The committee is composed of all full members of the graduate faculty in that program. Graduate faculty from allied fields may serve on the committee, when appropriate. In an interdepartmental program, the Committee on Graduate Studies is appointed by the Vice Provost for Academic Programs and Curricula.

Graduate Advisors

Each graduate program has a Graduate Advisor. The Graduate Advisor represents the academic dean of the college and the departmental Committee on Graduate Studies in matters pertaining to advising graduate students in their academic areas. The Graduate Advisor's functions include clearing of students for registration, acting upon requests for drops, adds, section changes and special examinations; maintaining graduate student records; and advising graduate students about their degree plans.

Office of International Education

Mission Statement

The Office of International Education furthers an international focus for the university and supports the development of activities, programs, exchanges and events that create deeper international and global awareness among faculty, staff, students, and the surrounding community.

International Student and Scholar Services (ISSS)

INTERNATIONAL STUDENT SERVICES

Advising for international students is available Monday through Friday. In addition, ISSS processes a variety of requests to help students remain in compliance with university policies and government (Department of Homeland Security, Department of State) regulations. ISSS also offers various workshops and seminars throughout the year for international students who want to learn more about topics such as off-campus employment. For more information, including advising hours, request forms, and seminar schedules, please visit: <http://www.uta.edu/oie/>

J-1 SCHOLAR SERVICES

ISSS works closely with other departments at UT Arlington to bring international exchange visitors to campus for research activities, teaching, and internships. For more information, please visit: <http://www.uta.edu/oie/>

Programs and Events

The OIE seeks to engage UTA international and domestic students through a variety of programs, including International Student Orientation and International Week, among others. For more information, please visit: <http://www.uta.edu/oie/?page=programs>

Study Abroad

To help students attain the education demanded by today's increasingly interdependent world, UT Arlington offers the opportunity to study overseas while earning credit toward a degree. Some programs involve direct enrollment in an overseas institution, while others are led by UT Arlington faculty members. For more information, including program and application requirements, please visit: <http://studyabroad.uta.edu>.

College of Architecture, Planning, and Public Affairs

Mission and Philosophy

The mission of the graduate Architecture and Landscape Architecture programs is to prepare students for sustained contributions and leadership in the design professions. This mission occurs in partnership with the larger University. Together the programs and the University share the aim of educating broadly to the demands of a complex society and, more specifically, to the demands of sophisticated and changing professions.

History and Overview

Architecture was first taught at what is now The University of Texas at Arlington in the early 1940s as a two-year, non-degree program within the School of Engineering. In 1968, with the support of professional architects in the Dallas/Fort Worth area, architecture became a department of the College of Liberal Arts, granting the degree of Bachelor of Science in Architecture. The department prospered, and by 1973 a decision was made to establish a separate school of architecture based on a four-year undergraduate program with a two-year master of architecture program as the professional degree.

By 1978, the School of Architecture and Environmental Design (as it was named in 1974) had an enrollment of more than 1,000 students with 31 full-time faculty. Four programs were included at that time: architecture, interior design, landscape architecture, and city and regional planning. Subsequently, planning moved to the Institute of Urban Studies. In 1989, the school was renamed the School of Architecture.

Architecture and landscape architecture are seen as both the means and the goal of the education we offer. As *means*, our fields provide a ready path to the larger domain of ideas, history and the human condition. Architecture was seen, after all, as one of the essential liberal arts during the Renaissance. As *goals*, our fields call upon us to learn specific professional knowledge and skills they focus our attitudes and abilities to produce tangible, concrete things. This demand that we alternately widen and narrow our vision is one of the great strengths of the fields and is one source of their effectiveness as courses of study.

Within a broad curriculum, design as a discipline and a process is emphasized. Students are encouraged to give rich visual and material substance to both theoretical and pragmatic ideas. The context for design at UT Arlington centers on the contemporary urban condition, an approach appropriate for a school at the heart of a diverse, expanding and internationally oriented region like Dallas/Fort Worth.

The school's location at the center of the Dallas/Fort Worth area is especially important for students of architecture and landscape architecture. Almost every cultural, social and professional opportunity is nearby. The urban setting serves as a laboratory to observe the issues that confront current design and to test the proposals put forward. Built work by many of the foremost contemporary architects and landscape architects may be experienced and studied firsthand. Kahn, Pei, Wright, Johnson, Meier, Legoretta, Rudolph, Giurgola, Barnes, Predock, Holl, KPF, Kiley and Walker all have major projects here.

The School of Architecture offers large and up-to-date facilities for research and study. Constructed in 1984, the Architecture Building houses studios, classrooms and offices in addition to a CAD laboratory, a photography studio, a materials shop, a slide library and the Architecture and Fine Arts Library, with 40,000 books and 190 periodicals. The UT Arlington Libraries contains more than 1 million volumes, and students have access to The University of Texas System Library, which house 12 million volumes.

The School of Architecture has an enrollment of approximately 1,000 students, of whom about 160 are graduate students. They come from all parts of the United States and the world; more than 20 percent are international students. About one-third of the graduate students are women.

In terms of recognition of quality, 134 School of Architecture students have received awards in 63 major design or research competitions over the last 10 years, most at the national or international level. This unsurpassed record of competitive accomplishment reflects the education focus of the school. Developed student abilities, along with a tradition of integrating work and academic experience, give UT Arlington graduates ready entry and advancement in the professional world.

Accreditation

The school offers the Master of Architecture and the Master of Landscape Architecture as first professional degrees in the respective programs. The former is accredited by the National Architecture Accrediting Board and the latter by the Landscape Architecture Accrediting Board. The M.Arch. and the M.L.A. taken as second, or post-professional degrees, do not carry professional accreditation.

Scholastic Activity and Research Interests of the Faculty

The faculty-full-time, adjunct and part-time-are involved in their areas of academic and professional interest. This takes many forms: built projects, design studies and competitions, scholarly writing and applied research. This work enriches the teaching mission and provides contributions to the larger community. For a detailed listing of faculty activity, see the **Faculty Catalog**, available from the School of Architecture.

Special Programs and Opportunities

Visiting faculty members are an integral part of the graduate program at UT Arlington. Noted teachers from other schools in the United States and abroad as well as distinguished practicing designers offer advanced studios and courses each year. Thus, students have access to both a core of permanent faculty members and to a changing spectrum of approaches and values. In addition to on-campus coursework, graduate students may study and travel abroad as an integrated part of the curriculum. The school maintains semester-long, full-credit student exchanges during the academic year with architecture schools at the Universities of Barcelona (Spain,) Lund (Sweden,) Innsbruck (Austria,) and Cottbus (Germany.) During the summer, there is a full-credit, five-week travel program to Rome, Florence and Verona, Italy.

(COPIED TEXT Below from SUPA College Landing Page - CAPP Staff to incorporate text as determined)

School of Urban & Public Affairs

Graduate Degrees

- Master's in Urban Affairs and Policy
- Master's of City and Regional Planning
- Master's of Public Administration
- Ph.D. in Public and Urban Administration
- Ph.D. in Urban Planning and Public Policy

Mission and Philosophy

The mission of the School of Urban and Public Affairs is to conduct basic and applied research into urban problems and public policy, to provide services in support of public and nonprofit agencies, and to educate and train students for public service careers.

History and Overview

The Institute of Urban Studies was established in 1967 by an act of the Texas Legislature. The institute's mandate was to offer Texas city and county governments and other public agencies high-caliber, university-based research, training and other technical services. In 1992, after significant expansion of its staff and programs, the School of Urban and Public Affairs was created. The Institute of Urban Studies continues to operate as a vital research and outreach arm of the School of Urban and Public Affairs.

The Institute is the state's only university-based center for applied research and service in urban affairs. It is called upon routinely to study and recommend solutions for problems confronting government agencies, nonprofit organizations and private industry.

During its more than 40 years of existence, the Institute of Urban Studies in the School of Urban and Public Affairs has conducted hundreds of studies on such topics as transportation, housing, local economic development, public safety, corrections, education, human services, child care and regional governance. These reports are included in the collections of virtually every major library in Texas and have been adopted as texts at many colleges and universities.

Students are offered a wide array of opportunities for projects, internships and employment. SUPA faculty, staff and students work on "real-life" urban and public affairs projects in cooperation with city governments, public agencies and nonprofit organizations.

Accreditation

The School of Urban and Public Affairs is one of only approximately 20 in the country having both its Master's of Public Administration and its Master's of City and Regional Planning programs fully accredited by their respective accrediting agencies.

The Master's of City and Regional Planning is officially recognized and accredited by the Planning Accreditation Board that accredits North American planning programs on the basis of a strict and extensive set of criteria rooted in planning knowledge, skills, and values. Students enrolled in accredited programs are eligible for certain national scholarships, and graduates of accredited programs may qualify for certification by the American Institute of Certified Planners after fewer years of experience than graduates of nonaccredited programs.

The Master's of Public Administration degree is accredited by the National Association of Schools of Public Affairs and Administration that requires public administration programs to meet strict standards for faculty qualifications, curriculum content, admissions and program requirements, student composition and services, budget and facilities. Accreditation enhances the program's national reputation and opens doors and provides opportunities for students applying for Texas-based scholarships and nationwide positions. Public Administration was ranked 74th by U.S. News & World Report in 2014.

Scholastic Activity and Research Interests of the Faculty

SUPA faculty are actively engaged in research and community service projects that benefit local jurisdictions, public and nonprofit agencies with expertise that is beyond the normal scope of their particular services and resources. Typical projects include revitalization studies for inner-city

neighborhoods, development plans for central business districts, economic development strategies for municipalities, inter-local contracting studies, and assessments of service delivery alternatives in communities and school districts.

The broad range of faculty research interests primarily focuses on local issues and provides support for local officials and urban professionals, but it also includes basic research into urban problems and public policy that is published in national journals and used in university texts. Research topics include such planning issues as urban design, land use analysis, environmental planning, economic development, community service and development, focus group research and group facilitation; such public administration issues as public management, intergovernmental relations, entrepreneurship in government, education and economic development; and such urban affairs issues as urban theory, development, management, politics, social welfare policy, social service administration and minority relations.

Architecture

Overview

The design disciplines - **Architecture, Interior Design, Landscape Architecture** - teach us to understand and to shape the space we live in: rooms, buildings, gardens, cities. These disciplines are old, among the first activities of civilization itself. They are also new, requiring advanced knowledge and skills to serve contemporary culture. The design disciplines operate at many levels of thought and concern. On one hand they are very practical, dealing with a host of concrete realities; on the other they are highly conceptual, having to do with meaning and society's highest aspirations.

The purpose of the School's undergraduate curriculum is to pursue professional studies within the context of a liberal education. This goal is a natural one for the design disciplines, drawn as they are from the arts, the sciences, and the humanities.

The School of Architecture offers programs leading to the following degrees:

- Bachelor of Science in Architecture (p. 103)
- Bachelor of Science in Interior Design (p. 123)
- Master of Architecture (p. 108)
- Master of Landscape Architecture (p. 129)

Bachelor of Science in Architecture: A four-year program of studies comprising, with a later two-year graduate program, the six-year Master of Architecture curriculum. This sequence, called the **4 + 2 model**, has been adopted by many major universities as the most effective way of combining liberal education with professional education. (See the Graduate Catalog for the Master of Architecture (p. 108) program, which is accredited by the National Architectural Accrediting Board.) The four-year undergraduate degree is not an accredited professional degree; the Master of Architecture is fully accredited.

Bachelor of Science in Interior Design: A four-year program of studies, interdisciplinary with architecture, on the design of interior environments. Following the two-year Basic Studies sequence, the student completes two years of Major Studies, an intensive series of courses and studios on the theory, history, skill, and practice of interior design. The program leads to the professional degree in interior design, accredited by the Council for Interior Design Accreditation (CIDA) and the National Association of Schools of Art and Design (NASAD).

Master of Architecture: The Master of Architecture is an NAAB-accredited professional degree offered only at the graduate level. The Master of Architecture curriculum is coordinated with the Bachelor of Science in Architecture curriculum degree to form a six-year professional program. Below is the language from the National Architectural Accrediting Board explaining accreditation policy:

"In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes two types of degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a five-year, three-year or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree."

Master of Landscape Architecture: Landscape Architecture is offered only at the graduate level and is accredited by the American Society of Landscape Architects.

Minor in History of Architecture: For students in disciplines requiring a minor, the School of Architecture offers a minor in History of Architecture.

The School of Architecture will assist each student in selecting the path most appropriate to his or her interests and abilities. Academic advising is provided for all students in the school.

Architecture - Undergraduate Programs

Overview

The four-year Bachelor of Science in Architecture degree is a four-year pre-professional degree program of studies comprising, with a later two-year graduate program, the six-year Master of Architecture curriculum. This sequence, called the **4 + 2 model**, has been adopted by many major universities as the most effective way of combining liberal education with professional education. It provides the basis for various career possibilities, including the professional degree of Master of Architecture or the Master of Landscape Architecture; these advanced degrees are normally awarded after two years of graduate study (refer to the graduate catalog for details).

The baccalaureate degree programs combine a core liberal arts curriculum with a structured sequence of courses in architecture and design. A large number of electives allows the student the flexibility to pursue special interests in the school and in the University.

The Bachelor of Architecture degree program consist of two two-year segments: Basic Studies and Major Studies. The first two years (Basic Studies) is a foundation curriculum taken by all undergraduates at that level in the school. In addition to work in the arts and sciences, Basic Studies includes a series of lecture and studio courses which introduce the student to the concepts, history, skills, and vocabulary of design.

In the third and fourth years (Major Studies), the student concentrates in one of the design disciplines, taking courses and studios of a more advanced and professional nature. Those pursuing the Bachelor of Science in Architecture degree follow the architecture sequence.

Major Studies: Entrance Requirements

ADMISSIONS REQUIREMENTS

Admission to the architecture-intended program is open to all students meeting the general requirements for entrance to the University.

ENTRANCE REQUIREMENTS

To declare a major (enter 3rd year) in Architecture and gain permission to enroll in upper-level ARCH or INTD courses:

- The student will have completed the final architecture-intended courses and core curriculum.
- Have a minimum of a 2.8 GPA both overall at UT Arlington as well as within the major (first and second year ARCH courses).
- Complete a Major Declaration form available through the School of Architecture

Prior to completing the application in the School of Architecture office, ALL required architecture-intended coursework must be completed.

GPA requirements may change based on changes in the curriculum of the program. Qualified students must meet the GPA requirements that are in place at the time they fulfill all other requirements to declare their major.

To declare a major for a fall semester, qualified applicants will submit their request to declare a major in the School of Architecture office at the completion of the spring semester, by the department specified deadline.

Students meeting the qualifications to declare a major during the summer or fall semesters will submit their request to declare a major at the completion of the fall semester, by the department specified deadline, for spring entrance consideration*.

Consideration for fall admission into the major studies programs for qualified summer applicants will be based on space availability.

Coursework taken at other institutions or universities must be noted on the application with accompanying attachments showing the completion of/ or current attendance in the course(s). It is the student's responsibility to ensure that all coursework is transferred to the Office of Admissions at UT Arlington in a timely manner.

Upon entrance into the major studies programs, students will be required to maintain the minimum 2.8 GPAs both overall at UT Arlington and within the major to remain active and proceed within the program.

PROGRAMS COHORT

The undergraduate programs in the School of Architecture at the University of Texas at Arlington are organized in a structured cohort format.

What Is a Cohort?

A cohort is a group of students that follows the same set schedule and progresses through a program together. The sequential scheduling of the courses promotes an interactive learning environment and facilitates networking opportunities and career-strengthening relationships.

How Does It Work?

The program consists of a sequence of courses that takes a minimum of eight semesters to complete. The courses are offered in specific semesters (Fall and Spring) that require the students to complete the prior level before proceeding to the next level. If a student gets off-track in the cohort, she/he must wait until the missing course(s) are offered again.

How Are the Courses Sequenced?

The major courses must be taken as follows (*Please note: For every year listed below, 'First Semester' is Fall and 'Second Semester' is Spring*):

Architecture Students

First Year			
First Semester	Hours	Second Semester	Hours
ARCH 1101	1	ARCH 1342	3
ARCH 1301	3		
ARCH 1341	3		
	6		3
Second Year			
First Semester	Hours	Second Semester	Hours
ARCH 2303	3	ARCH 2304	3
ARCH 2551	5	ARCH 2552	5
	8		8
Third Year			
First Semester	Hours	Second Semester	Hours
ARCH 3323	3	ARCH 3324	3
ARCH 3343	3	ARCH 3331 ¹	3
ARCH 3553	5	ARCH 3337	3
		ARCH 3554	5
	11		14
Fourth Year			
First Semester	Hours	Second Semester	Hours
ARCH 4321 ¹	3	ARCH 4557	5
ARCH 4556	5		
	8		5

Total Hours: 63

¹ Course may be offered both Fall and Spring semesters.

Student Personal Laptop Policy

All declared Architecture and Interior Design majors admitted to the Third Year (Major Studies) are required to have a personal laptop computer configured to the specifications defined by the School of Architecture. Specifications may be found on the Architecture website: www.uta.edu/architecture/

Special Academic Requirements

GPA Requirements: Upon admission to the Major Studies, all declared majors must maintain a minimum GPA of 2.8 both within the major and in the cumulative GPA to continue in the upper level program to satisfy requirements for graduation.

Grade Requirements: A grade of C or higher must be earned in each School of Architecture course used for credit toward an undergraduate degree and minor offered by the school. A grade of C or higher must be earned in all required Math courses.

Repetition of Courses: Three attempts to achieve a satisfactory grade are permitted for each required course in the School of Architecture. Beyond that number of attempts, the student is denied access to the course in question, or to the sequence of courses for which it is requisite. Enrollment in the course for the time sufficient to receive a grade, including the grade W, is considered an attempt.

Transfer of Credit: The extent of credit toward degree requirements for academic work done elsewhere will be determined by the representatives of the appropriate program. Students applying to transfer credits from studio courses taken elsewhere must present examples of that work for evaluation.

Student Projects: The School of Architecture reserves the right to retain, copyright, use, exhibit, reproduce, and publish any work submitted for course credit. The student is encouraged to develop a portfolio of all work accomplished in advanced courses for future professional and academic uses.

COMPETENCE IN ORAL PRESENTATIONS

Students obtaining a Bachelor of Science degree in Architecture demonstrate oral proficiency by taking and passing ARCH 2551 BASIC DESIGN AND DRAWING I, ARCH 2552 BASIC DESIGN AND DRAWING II, ARCH 3553 DESIGN STUDIO: ARCHITECTURE I, ARCH 3554 DESIGN STUDIO: ARCHITECTURE II, ARCH 4556 DESIGN STUDIO: ARCHITECTURE III, and ARCH 4557 DESIGN STUDIO: ARCHITECTURE IV or approved equivalents.

COMPETENCE IN COMPUTER USE

Students obtaining a Bachelor of Science degree in Architecture can demonstrate computer proficiency by:

- Taking and passing ENGL 1301 RHETORIC AND COMPOSITION I or ENGL 1302 RHETORIC AND COMPOSITION II at UT Arlington in a computer classroom environment or ENGL 3372 COMPUTERS AND WRITING, ENGL 3374 WRITING, RHETORIC, AND MULTIMEDIA AUTHORING, CSE 1301 COMPUTER LITERACY (or equivalent), or any other class approved by the Undergraduate Assembly.
- Passing the University computer literacy examination.

Minor in Architecture History

The school offers numerous courses from which to select the 18 hours required for the Architecture History minor (<http://www.uta.edu/architecture/academic-programs/minors/minor-history.php>).

Students who choose to pursue the minor in History of Architecture must complete our 6 hours of core courses (ARCH 2303 and ARCH 2304).

Upon completion of the two core classes, students must select an additional 12 hours from our other Architecture History courses.

CORE		6

Minor in Environmental and Sustainable Studies

The University offers a variety courses from which to select the 18 hours required for the Environmental and Sustainable Studies minor (<http://www.uta.edu/architecture/academic-programs/minors/minor-environmental.php>).

Students are required to take one core course, ESST 2300: Introduction to Environmental and Sustainability Studies, which surveys topics and methods in interdisciplinary studies of sustainability and the environment. This course should be taken in the freshman or sophomore year.

An additional 15 hours of coursework is to be completed from the list of courses below (or others approved by the ESS advisor). At least one course must be taken in each of the two groups. Students are encouraged to inquire about other courses that might qualify for credit. At least 6 hours must be taken as 3000- or 4000-level courses. Additional courses are expected to be approved each semester, so students are encouraged to consult regularly with the advisor. *Students may be allowed to take additional classes from alternate group with advisor approval.

Minor in Urban and Public Affairs

The University offers numerous courses from which to select the 18 hours required for a minor.

The Urban and Public Affairs minor (<http://www.uta.edu/architecture/academic-programs/minors/minor-urbanpublicaffairs.php>) is for students interested in complementing their academic career with a broader understanding of Urban Affairs, Urban Planning and the Environment, or Public Administration.

Students are required to take two core courses, URPA 1301 Intro to Urban Life and URPA 3301 The Metroplex,

Students pursuing the minor complete the 2 required core courses then select 4 courses (12 hours) from one of the fields of interest.

Architecture - Graduate Programs

The purpose of the Master of Architecture degree program is to educate toward ultimate leadership positions within the profession of architecture. Within a broad curriculum, design as a discipline and a process is emphasized. Students are encouraged to give rich visual and material substance to both theoretical and pragmatic ideas. The context for design at the UT-Arlington focuses on the contemporary urban condition, a viewpoint especially appropriate for a school at the heart of a diverse, expanding, and internationally oriented region like Dallas/Fort Worth.

There are three distinct programs of study in architecture, which provide options to graduate students with different backgrounds and needs. Path A requires approximately 3-1/2 years, Path B two years, and Path C one year.

Accreditation

The Master of Architecture is a NAAB-accredited professional degree offered only at the graduate level. The Master of Architecture curriculum is coordinated with the Bachelor of Science in Architecture curriculum degree to form a six-year professional program.

Objective

The purpose of the Master of Architecture program is to educate for ultimate leadership positions within the architecture profession.

Design is emphasized as central to the discipline of design deeply informed by history, theory, technology, and the broader cultural setting. Design studios, lecture courses, seminars, and workshops develop the critical mind as well as the visual sensibility.

Architecture and its practice exist within the social fabric. Thus discourse and communication are a vital part of the educational process. Through case studies in studios and courses, students learn to present ideas, and to use and give commentary. Visiting faculty leading practitioners and teachers from other schools provide a rich connection to the world of building and to a variety of views. In addition, international student exchange programs, study-travel courses, and numerous internship opportunities in the Dallas-Fort Worth area connect the learning of architecture with the wider world.

In the United States, most state registration boards require a degree from an accredited degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB,) which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes two types of degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a five-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree. The University of Texas at Arlington does not offer the Bachelor of Architecture degree.

The professional program leading to the Master of Architecture degree consists of a sequence of coordinated core courses that introduce and develop architectural knowledge; this is followed by a flexible array of more advanced and speculative course options. The preparation each student brings determines where, in this progression from introductory to advanced work, the program is entered. Path A is for those with a baccalaureate degree but no specific background in architecture; this sequence normally takes 3.5 years to the M.Arch. Path B is for those with a four-year undergraduate baccalaureate degree with a major in architecture; this sequence assumes satisfactory core studies and consists of about two years of more advanced professional studies. Path C is for those who already hold an accredited professional degree in architecture and who wish for a second professional degree; at least one year of advanced work is required.

NAAB Statement

The National Architectural Accrediting Board (<http://www.naab.org>) explains the accreditation policy:

"In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB,) which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes two types of degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a five-year, three-year or two-year term of accreditation, depending on its degree of conformance with established educational standards.

"Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree."

The complete NAAB Conditions for Accreditation, including Student Performance Criteria, can be found on the NAAB website at www.naab.org (<http://www.naab.org>).

Graduate Teaching Assistantships

To be considered for a Graduate Teaching Assistant position, the candidate must be admitted without provisional conditions. Candidates whose native language is not English must submit an acceptable score on the Test of Spoken English (TSE-A) before arriving in the United States. GTA positions in architecture are limited and are very competitive.

Fellowships

To be considered for a Dean's Fellowship, the candidate must have a favorable review in most of the evaluation criteria. Candidates must be new students coming to UT Arlington, must have a GPA of 3.0 in their last 60 undergraduate credit hours and any graduate credit hours, and must be enrolled in a minimum of 6 hours in both long semesters to retain their fellowships. Fellowships in architecture are limited and very competitive.

Prospective students are strongly encouraged to contact the Graduate Advisor and discuss their options, the admission process, and how the M.Arch program may fit in their professional plans. Students are also invited to visit the School, sit in on classes, and meet faculty and students at the School of Architecture.

Master's Admissions Requirements

UNCONDITIONAL ADMISSION

Path A: For unconditional admission to the Path A program, the candidate must meet the following requirements:

- B.S. or B.A. Degree - Hold a 4-year B.S. or B.A. degree from an accredited program.
- GPA of 3.0 - Have a GPA of 3.0 as calculated by Graduate Admissions.
- GRE score of 297 - Have a minimum total score of 154 in the verbal and 143 in the quantitative portions of the Graduate Record Exam (GRE).
- 3 Letters of recommendation - Submit three letters of recommendation from sources who are familiar with the applicant's academic record, preferably former professors. (For applicants who have been out of school for an extended period, letters of recommendation may be from professional sources if academic ones are no longer available).
- 200 Word Essay
Submit a short 200-word personal statement providing evidence of professional or academic goals consistent with the Architecture Program.
- TOEFL Score of 213
For applicants whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (TOEFL), or the equivalent score on the computer based test. For otherwise highly qualified candidates, this requirement may be eased.
- Portfolio Submission (Optional)
Submission of a design portfolio is not required. If a candidate does have a portfolio of creative work showing freehand drawings or sketches, painting, graphic design, architectural or furniture design, he/she is encouraged to submit it.

Path B: For unconditional admission to the Path B program, the candidate must meet the above requirements, and in addition must:

- Portfolio Submission (required)
Submit a portfolio of design work and/or professional involvement, which shows evidence of design capability on a level expected in the graduate program as determined by the Graduate Architecture Admissions Committee. (Design work produced in an office as an employee carries less weight

because of the difficulty in determining the applicant's exact contribution to the work shown). The best indication of probable success in the program is the quality of work demonstrated in the portfolio.

Path C: For unconditional admission to the Path C program, the candidate must meet the requirements of the Path A and Path B programs (except the requirement of a B.A. or B.S. degree) and must:

- Professional Architecture Degree
Have a professional architecture degree (B.Arch. or M.Arch. or the international equivalent) from an accredited architecture program.

PROBATIONARY ADMISSION

Path A: Candidates who do not meet the criteria for unconditional admission to Path A, will be considered for probationary admission in which they will be required to maintain a grade of B or better in the first 12 credit hours of courses in the program. To be considered for probationary acceptance, the candidate must perform well on four of the following six criteria:

- Undergraduate performance in relevant courses
- Work experience
- GPA
- GRE
- Portfolio review (optional)
- Letters of recommendation

Path B: Candidates who do not meet the criteria for unconditional admission to Path B may be considered for probationary admission in which they will be required to maintain a grade of B or better in the first 12 credit hours of courses in the program. And/or they may also be required to take one or more Path A and/or fourth year design studio as determined by the graduate advisor on review of their portfolio before continuing with the Path B design studio sequence.

To be considered for probationary acceptance, the candidate must perform well on three of the following five criteria:

- Undergraduate performance in relevant courses
- GPA
- GRE
- Letters of recommendation
- Portfolio review

Path C: Candidates who do not meet the criteria for unconditional admission to Path C, may be considered for probationary admission in which they will be required to maintain a grade of B or better in the first 12 credit hours of courses in the program. To be considered for probationary acceptance, the candidate must perform well on three of the following five criteria:

- Performance in relevant courses in a program leading to the B.Arch or M.Arch degree.
- GPA
- GRE
- Letters of recommendation
- Portfolio review

Note: Applicants whose native language is not English who do not meet the program's minimum TOEFL score, may be asked to complete extramural training in English, as approved by the program and the Graduate Office.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the submission deadline but who otherwise appears to meet admission requirements may be granted provisional admission. All missing documentation must be received before the end of the first semester of study.

DEFERRED ADMISSION

A deferred admission may be granted when a file is incomplete or when a denied decision is not appropriate.

WAIVER OF GRADUATE RECORD EXAM (GRE)

A waiver of the Graduate Record Exam may be considered for a UT Arlington undergraduate who has completed an undergraduate degree in Architecture or Interior Design; the student's GPA must equal or exceed 3.50 in all undergraduate coursework completed at UT Arlington. The GRE waiver may also be extended to other UT Arlington undergraduates who have completed an undergraduate degree at UT Arlington; the student's GPA must equal or exceed a 3.50 in all undergraduate coursework completed at UT Arlington. The final decision to waive the GRE also requires a positive review of completed coursework by the graduate advisor to determine the applicant's readiness to study Architecture.

DENIAL OF ADMISSION

Candidates who do not satisfy the requirements for probationary admission will not be admitted.

Architecture Degree Requirements

PROFESSIONAL DEGREE PROGRAM: PATH A (3.5 YEARS)

For applicants holding a baccalaureate (B.A., B.S.) degree in a subject outside architecture, such as liberal arts, sciences, business, or another profession.

A minimum of 104 credit hours in architectural design, theory, and practice is required of Path A candidates for the professional degree in architecture (M.Arch). Due to the rigor of the program (not unlike any other professional school, law or medicine), students entering this program are advised to discontinue outside employment.

Advancement in Professional Degree Program Path A is predicated upon successful and timely completion of required coursework as well as an annual review of the student's portfolio of design work by the Directors Group of the Architecture Program.

In addition to completing an introductory curriculum beginning in the Fall of the first semester of enrollment, students must also complete the Path B core curriculum of 39 credit hours. The core curriculum of this course of study is:

ARCH 5325	ENVIRONMENTAL CONTROL SYSTEMS	3
ARCH 5326	ENVIRONMENTAL CONTROL SYSTEMS	3
ARCH 5329	TOPICS IN COMPUTERS AND DESIGN	3
ARCH 5331	PROFESSIONAL PRACTICE	3
ARCH 5333	CONSTRUCTION II	3
ADVANCED		24
Total Hours		39

Electives must include at least one course from each of the following categories of courses offered by the school:

1. history and theory
2. technology and practice, and
3. allied disciplines (landscape architecture, urban design, housing, and interior design).

PROFESSIONAL DEGREE PROGRAM: PATH B (2 YEARS)

For applicants holding a baccalaureate degree with a major in architecture. Placement in the graduate curriculum may be adjusted on the basis of previous academic and professional work.

The core curriculum for this course of study is:

ARCH 5325	ENVIRONMENTAL CONTROL SYSTEMS	3
ARCH 5326	ENVIRONMENTAL CONTROL SYSTEMS	3
ARCH 5327	ARCHITECTURAL STRUCTURES II	3
ARCH 5328	ARCHITECTURAL STRUCTURES III	3
ARCH 5329	TOPICS IN COMPUTERS AND DESIGN	3
ARCH 5331	PROFESSIONAL PRACTICE	3
ARCH 5333	CONSTRUCTION II	3
ADVANCED STUDIO		24
Total Hours		45

Electives must include at least one course from each of the following categories of courses offered by the School of Architecture:

1. history and theory
2. technology and practice and
3. allied disciplines (landscape architecture, urban design, housing and interior design).

POST-PROFESSIONAL DEGREE PROGRAM: PATH C (1 YEAR)

For applicants holding a previous professional degree in Architecture (B.Arch.) from an accredited program. The M.Arch, as a second rather than a first professional degree, does not receive NAAB Accreditation.

A minimum of 18 hours is required in architectural program courses including six hours of history/theory as well as advanced studio. Students are also required to take an advanced studio which may be waived by student request if design proficiency or equivalent experience has been demonstrated. The remainder of the work will be arranged with and approved by the Graduate Advisor to suit the interests of the student. Courses of study provide for an area of specialization or for advanced general studies.

The School of Architecture offers international study programs in Rome, Italy, Barcelona, Spain, Innsbruck, Lund, Sweden and Cottbus, Germany. The Rome Program, conducted for five weeks each summer by UT Arlington faculty, is open to upper division and graduate students and may be used to satisfy history and elective requirements. The Barcelona, Innsbruck and Lund programs are semester-long exchange programs with universities in these cities, with the normal expectation of both studio and elective credit.

M.C.R.P. AND M.ARCH. DUAL DEGREE PROGRAM

Students in this dual program may earn both the Master of City and Regional Planning and the Master of Architecture degrees in a curriculum of 87 semester credit hours. Applicants must meet the admission requirements of both the M.C.R.P. and the M.Arch. programs. City and Regional Planning students wishing to earn the M.Arch degree will be required to take Path A in the Architecture Program unless they have earned an undergraduate degree in architecture which will allow CIRP applicants to take Path B. Programs of study will follow both master's programs, with all of the 15 credit hours of electives in the M.Arch program to be taken in the MCRP program. In addition to the 36 credit hours of architectural core courses, the remainder of coursework will be in the City and Regional Planning program in the School of Urban and Public Affairs with a required thesis proposal and programs of work to be jointly approved by the City and Regional Planning Program and the Architecture Program. A thesis supervisor should be selected from CIRP or the School of Architecture, and committee members should be selected from both faculties.

Course selection and programs of study should be designed with the assistance of the Graduate Advisors in both programs. Only in special instances may students select the thesis substitute plan of the MCRP program. The successful candidate will be awarded both degrees rather than one joint degree.

Admissions Requirements

Applicants must meet the general requirements of the Office of Graduate Studies. A personal interview with the Director, Graduate Advisor or members of the landscape architecture faculty is strongly recommended. Three letters of recommendation are required, and it is suggested that at least two of the letters come from former educators or academic contact. Applicants also are required to submit scores from the Graduate Record Exam (GRE). Average GRE scores of successful applicants since 1998 have been approximately 550 Verbal and 550 Quantitative. Also required is a grade point average (GPA) of 3.00 as calculated by the Office of Graduate Studies.

Applicants holding first professional degrees in landscape architecture, or in some cases degrees related to landscape architecture (such as architecture, engineering, environmental design, horticulture, interior design, planning, and the like) are required to submit portfolios reflecting the applicants' professional and/or academic experiences and interests. Portfolios are assessed according to proficiency in design, presentation and layout, technical skills, and content, similar to criteria used in design studios.

Applicants who have a weakness in one of the criteria for admission can enhance their credentials with strengths in the remaining criteria.

Applicants can be admitted according to four conditions: Unconditional; Provisional; Probationary; and, Deferred. Applicants who do not meet the criteria of one of these conditions will be denied admission to the Program.

UNCONDITIONAL ADMISSION

Applicants must possess a bachelor's degree from an accredited college or university. Transcripts from all previous college or university work, along with scores from the Graduate Record Exam (GRE), and three letters of recommendation are required of all applicants. In addition, applicants should have a minimum Grade Point Average (GPA) of 3.0, as calculated by the Office of Graduate Studies. Applicants holding the first professional degree in landscape architecture, or a related field, must submit a portfolio.

PROVISIONAL ADMISSION

Those who have submitted their applications forms, but whose packets are incomplete, can be admitted provisionally if their GPA meets minimum requirements, and if the Program and the Office of Graduate Studies have received official transcripts. In this case, incomplete materials could include letters of recommendation, GRE scores, and/or portfolios.

PROBATIONARY ADMISSION

Those who have weaknesses in no more than two of the Degree Requirements (letters of recommendation, GRE scores, and GPA), can be admitted on probation, with the condition that they make no less than a B in the first 12 hours of coursework in landscape architecture. Such students must complete no fewer than 9 credits during the semester in which they are on probation.

DEFERRED ADMISSION

Those who have weaknesses in no more than two of the Degree Requirements (letters of recommendation, GRE scores, and GPA), and/or who have not submitted all of the materials required for unconditional admission, can have their applications deferred for one semester, until outstanding requirements and criteria are met.

INTERNATIONAL STUDENT ADMISSION

International applicants must meet the Degree Requirements (letters of recommendation, GRE scores, and GPA), and must be admitted in one of the admission categories described above. In addition, applicants whose native language is not English must have a demonstrated speaking ability in English. They also must meet the Program's minimum required score of 575 on the paper exam, or an equivalent score on the computer based- or internet-based tests, on the Test of English as a Foreign Language (TOEFL). International applicants who do not meet the Program's minimum TOEFL score, must complete extramural training in English, as approved by the Program and the Office of Graduate Studies.

Certificate in Repositioning & Turnaround Strategies

13 Credits for Certificate --- Four Core Courses and Studio

Purposefully designed for real estate professionals seeking enhanced skills and new career options, or for graduate students seeking new credentials in course electives, the University of Texas at Arlington Graduate School of Architecture offers a special Certificate Program in Repositioning & Turnaround Strategies. This one-semester 14 -week intensive Certificate meets two evenings each week, Wednesday + Thursday at The Universities Center, 1901 Main St. in downtown Dallas. The Financial Analyses course meets on Saturday mornings for three weeks in the UT Arlington Ft Worth campus with the remainder of the course taught online. For Students already experienced in financial modeling, this component can be replaced by Independent Research to qualify for the Certificate.

ARCH 5101. DIRECTED STUDY: ANALYTICAL SOFTWARE TUTORIAL. 1 Hour.

Introduction to software relevant to ARCH 5375, ARCH 5376 and ARCH 5377: Excell Argus.

ARCH 5370. ADVANCED DESIGN STUDIO. 3 Hours.

Studio course in the generation and development of architectural ideas in formal and environmental contexts.

ARCH 5375. PROPERTY AND ASSET REPOSITIONING. 3 Hours.

The physical planning and design issues impacting project performance levels and asset appreciation.

ARCH 5376. PROPERTY DUE DILIGENCE. 3 Hours.

Course addresses physical project data collection techniques.

REAE 5392. FINANCIAL ANALYSIS. 3 Hours.

Course in financial feasibility for those without knowledge of real estate cash flow analysis and excel spreadsheets.

Certificate Program Faculty

The UT Arlington Certificate Program is led by senior UT Arlington Faculty from the Graduate Schools of Architecture and Business Administration, and assisted by Visiting Lecturers drawn from the DFW real estate industry.

Michael P Buckley

Director, Certificate Program in Repositioning & Turnaround Strategies, Center for Metropolitan Density

Professor Buckley formerly directed Columbia's Master of Science in Real Estate program and now heads the UT Arlington Certificate in Repositioning & Turnaround Strategies, and the new UT Arlington research platform, the Center for Metropolitan Density.

Past President of the Connecticut Society of Architects, he now serves on the Dallas AIA Exec Committee. As President of Halcyon LTD Development Advisors, he has an international reputation for mixed-use concepts and strategic urban planning. Assignments to redevelop underutilized sites include San Juan's El Triangulo Dorado Harbor Plan and Washington DC's Navy Yard. Consulting engagements included Organizational options for a major Asian developer and Strategic Cluster studies for cities in Texas, Connecticut and Puerto Rico.

Prof Buckley is a former ULI Trustee and former Chair, ULI Program Committee and Urban Development Mixed-Use Council. He is now on the Research Committee of the Real Estate Roundtable DC, Affinity Group Leader for the Pension Real Estate Assoc, Academic Member of the Assoc. of Foreign Investors in Real Estate, and The Commercial Real Estate Finance Council. He serves on the Advisory Boards of Interlink Group, and the Texas Sustainability Council. He holds BA and BSc degrees from Rice University, and a Master's degree in Advanced Studies from MIT.

Fred A. Forgey

Professor of Finance, UTA College of Business

Director, Graduate Real Estate Programs

Dr. Forgey teaches the program's Real Estate Development Financial Analysis and Valuation course. He is executive director of Graduate Real Estate Programs for the UT Arlington College of Business. Over the past 20 years, he has held faculty positions with the University of Auckland-New Zealand, University of North Texas, University of Texas at Austin and Texas A&M University, where he was coordinator for the Master of Science in

Land Development Program. He has led a variety of specialized study abroad programs to Australia and New Zealand, has taught in executive MBA programs in Asia and has been a professor of real estate for ORIX Capital Markets. Dr. Forgey's teaching and research focus on adaptive re-use and redevelopment initiatives. He currently serves as chair of the Downtown Bryan Economic Development Association in Bryan, Texas.

Adjunct Faculty/ Visiting Lectures

The UT Arlington Cert Program has an objective to maintain a close working relationship and a deliberate outreach to the real estate industry.

Each Semester, a select group of industry leaders share their project experience and opinions of emerging trends and proven operational and investment practices. Over the past two years the UT Arlington Cert Program has benefitted from an outstanding array of professionals from Banking, Law, Development, Leasing, Asset Management and Private Equity, with senior executives serving as Visiting Lecturers such as:

- **Michael Dalton** - Vice President, Archon Group
- **Peter McKee** - Partner, Andrews Kurt
- **John Walsh** - President, TIG USA
- **Steve Kennedy** - Partner, E2M Private Equity
- **Jay Small** - Vice President OREO Keybank
- **Steve Kanoff** - EVP, Westmont Realty
- **Mark Wolf** - Principal, JHP Architects
- **Chuck Bedsole** - VP Hospitality. Alvarez& Marsal
- **David Parham** - Partner, Baker McKenzie

UT Arlington Roundtable Series

Now in its third year, this popular topic-oriented gathering is sponsored by UT Arlington Center for Metropolitan Density and is an integral part of the Certificate curriculum which has been co-sponsored by major DFW Professional organizations including:

- North Texas District Council
- The Real Estate Council
- AIA Dallas
- Texas Capital Bank
- Cushman & Wakefield LLP
- Haynes & Boone LLP
- Ernst & Young LLP
- Jones Lang LaSalle

The UT Arlington Roundtable series has featured Panelists from the top DFW Region, including Asset Managers, Real Estate Funds Financiers, Developers, Equity Sources, Brokers and Law Firms such as:

- Holiday Fenoglio Fowler LLP
- Granite Properties
- Hunt Realty Corp
- Texas Capital Bank
- Witten Assocs
- Cushman & Wakefield LLP
- Invesco Real Estate
- Stratford Land Corporation
- Primera Companies
- E2M Private Equity
- Corgan Associates
- CityPlace Development
- Andrews Kurth LLP
- Berkadia Commercial Mortgage
- Joe Foster Company
- Crosson-Danis
- Centerline / C3 M
- DLA Piper LLP

- BOKA Powell
- Good Fulton Farrel
- Hughes Development
- Jones Lang LaSalle
- The Weitzman Group
- Dallas Area Rapid Transit
- Texas Institute for Sustainability
- Jackson Walker LLP
- City of Dallas Eco Dev
- Archon Group
- Billingsley Companies
- Trinity Works
- HKS Architects
- Cityview Corp
- UCR Realty
- Baker McKenzie LLP
- Ernst & Young LLP
- Haynes & Boone LLP
- Behringer Harvard
- JHP Architects
- Interlink Group
- Texas Capital Bank

City and Regional Planning

Master's Degrees

- City & Regional Planning, MCRP

Doctoral Degree

- Urban Planning and Public Policy, Ph.D.

Certificates

- Developmental Review Certificate
- Geographical Information Systems Certificate

GENERAL

Located in the heart of the Dallas-Fort Worth Metroplex, the fourth largest metropolitan region in the U.S., both our City and Regional Planning Master's Degree Program (<http://www.uta.edu/supa/graduate/cirp.php>) (MCRP) and Ph.D. in Urban Planning & Public Policy (UPPP) programs are situated in an optimal laboratory to study, analyze, and provide planning solutions to contemporary urban problems, such as sprawl, pollution, equity, carbon footprints, economic development, aging infrastructure, and, more generally, contributing to the development of sustainable cities and regions.

Both programs reside in the School of Urban and Public Affairs' (SUPA) whose Institute of Urban Studies (<http://www.uta.edu/supa/ius>) provides student research and practical experience through the professional planning services it offers to cities across the state of Texas.

MCRP

The MCRP program prepares students for careers as professional planners with public, private and nonprofit organizations. It does this by training students to apply planning theory, knowledge, techniques, and skills to "real world" planning problems through coursework, studios, and internship opportunities.

UTA's City and Regional Planning Master's Degree Program is accredited by the Planning Accreditation Board (<http://www.planningaccreditationboard.org>) (PAB). The program's mission, goals and objectives, and accreditation efforts are shaped in consultation with the MCRP Advisory Board composed of alumni and area practitioners.

UPPP

The Ph.D. Program in Urban Planning and Public Policy (UPPP) prepares Doctoral students for careers in university teaching and research, research organisations and think tanks, senior public, private, or non-profit sector positions and also policy or advocacy institutes. It does this by integrating the

academic disciplines of urban planning and public policy, providing students with a rich core of substantive and procedural knowledge concerning policy and planning.

The Program combines theoretical inquiry and analysis with application, offering students diverse approaches to policy and planning issues. Students are encouraged to pursue dissertation research using either or both quantitative and qualitative methodologies, and the Program offers extensive preparation in these modes of inquiry.

Advising

Graduate Advisor: Anthony Valdez; valdezaa@uta.edu

Admissions Requirements

The MCRP program takes a holistic approach to the application review process. Each applicant file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's record. A complete application includes:

- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate Admissions from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal, Quantitative, and Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work (download Letter of Recommendation form) (http://grad.pci.uta.edu/resources/pdf/Request_Recommendation.pdf)
- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The Essay is considered both for its content and quality of writing. The Essay should address the following questions: 1. Why do you want to earn a Master's degree in the program for which you are applying? 2. What relevant background and experience do you bring to the program? The essay can also include other concerns you'd like to bring to the attention of the Graduate Advisor or Master's Admissions Committee.
- Non-native English speakers only: TOEFL or IELTS scores (Exceptions: An applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, or IELTS score for admission purposes.)

Official transcripts and test scores must be sent directly to the Graduate School by the institution and ETS respectively. Letters of recommendation and personal essay should be sent directly to the MCRP Graduate Advisor via email or postal service, SUPA Box 19588, Arlington TX 76019. It is the applicant's responsibility to ensure all application materials are received by the application deadline. Incomplete applications or applications received after the deadline could be deferred.

The MCRP program admits students for Fall and Spring semesters; the application deadlines are June 15th and October 15th respectively.

WAIVING THE GRE

The MCRP program waives the requirement that an applicant take the GRE under any of the following conditions:

1. A completed UT-Arlington undergraduate degree awarded within three years of application for admission and a 3.0 or higher GPA on the last 60 hours of coursework.

TYPES OF ADMISSION

Unconditional Admission

Applicants who meet all the following requirements will be considered for unconditional admission:

1. Minimum Undergraduate GPA of 3.0
2. A preferred minimum Verbal GRE score of 150 (450 if the test was taken before August 1, 2011), a preferred minimum Quantitative GRE score of 141 (450 if the test was taken before August 1, 2011), and a preferred minimum Writing GRE score of 4.
3. Outstanding letters of recommendation
4. Strong, well-written personal essay
5. Non-native English speakers only: TOEFL scores of at least 550 (paper-based), 213 (computer-based), or 79 (iBT) with sectional scores that meet or exceed 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or, IELTS score of at least 6.5.

Probationary Admission

Applicants who do not meet all requirements for Unconditional admission will be considered for Probationary admission on the basis of the strength of all the listed admission factors. Test scores will not constitute the sole or primary basis for ending consideration of an applicant. Under Probationary admission, special course requirements or other conditions may be imposed by the SUPA Master's Admissions Committee. Applicants who meet all

the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for Probationary Admission conditional on completing an approved Writing course in their first semester.

1. Other types of admission decisions pertaining to Master's applicants:

- a. **Deferred:** Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.
- b. **Provisional:** Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted Provisional admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a Provisional status.
- c. **Denied:** Applicants who fail to meet more than one of the admission requirements and for whom the SUPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

Scholarship and Fellowship Criteria

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships and fellowships.
- Scholarships and fellowships for Master's and Doctoral students will be competitively awarded based on consideration of the all admission criteria assessed by their admitting programs.

SUPA Inadequate Academic Progress Point System

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their Master's degree or their Ph.D. Students who complete a Master's degree at SUPA will not carry deficiency points into their Ph.D. work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points

F = 3 deficiency points

I = 1 deficiency point

W = 0.5 deficiency point

Master's Degree Curriculum

The program's curriculum imparts knowledge, skills and values necessary for entering the planning profession. The degree requires completion of 48 hours of study. The generalist core (30 hrs) is organized into three knowledge tiers: Theory, Analysis and Techniques, and Implementation and Plan Making, plus a Professional Report (3 hrs) or Thesis (6 hrs) and 12-15 hours in elective coursework.

Core Courses

CIRP 5303	PLANNING HISTORY, THEORY AND ETHICS	3
CIRP 5310	PLANNING, URBAN DEVELOPMENT AND STRUCTURE	3
CIRP 5308	METROPOLITAN SUSTAINABILITY AND PLAN MAKING	3
CIRP 5363	LEADERSHIP AND COMMUNICATION SKILLS IN THE PLANNING PROCESS	3
CIRP 5318	TECHNIQUES OF PLANNING ANALYSIS I	3
CIRP 5330	TECHNIQUES OF PLANNING ANALYSIS II	3
CIRP 5304	PLAN IMPLEMENTATION, ZONING, AND REGULATIONS	3
CIRP 5316	LAND USE PLANNING AND THE LAW	3
CIRP 5332	PROJECT STUDIO	3
CIRP 5380	RESEARCH QUESTIONS IN PLANNING (taken in the next to last semester)	3
CIRP 5397	PROFESSIONAL REPORT	3-6
or CIRP 5698	PLANNING THESIS	

Elective Courses

Select 4-5 of the following: ¹		12-15
CIRP 5305	LAND USE, MANAGEMENT AND DEVELOPMENT	
CIRP 5306	URBAN REVITALIZATION	
CIRP 5311	ELEMENTS OF URBAN DESIGN	
CIRP 5313	URBAN GROWTH POLICIES	
CIRP 5315	TRANSPORTATION POLICIES, PROGRAMS AND HISTORY	
CIRP 5322	ECONOMIC DEVELOPMENT PLANNING AND POLICY	
CIRP 5324	COMMUNITY DEVELOPMENT	

CIRP 5325	PHYSICAL PLANNING AND URBAN DESIGN
CIRP 5327	INTRODUCTION TO GREEN CITIES AND TRANSPORTATION
CIRP 5331	GIS WORKSHOP (CIRP 5357 prerequisite)
CIRP 5340	GIS AND SUITABILITY ANALYSIS
CIRP 5341	ENVIRONMENTAL REGULATIONS: LAWS AND PLANNING
CIRP 5342	ENVIRONMENTAL POLICY
CIRP 5346	QUALITATIVE METHODS
CIRP 5350	ENVIRONMENTAL PLANNING
CIRP 5351	TECHNIQUES OF ENVIRONMENTAL ASSESSMENT
CIRP 5356	INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS
CIRP 5357	INTERMEDIATE GEOGRAPHIC INFORMATION SYSTEMS
CIRP 5361	PLANNING INTERNSHIP

¹ Other electives as approved by the Graduate Advisor

See the program's Graduate Advisor for a list of approved electives in each study area, or download a copy from the MCRP webpage (<http://www.uta.edu/supa/graduate/cirp.php>). Other courses may be substituted upon approval of the program's Graduate Advisor and/or Program Director.

THESIS OR PROFESSIONAL REPORT (6 HOURS THESIS STUDENTS; 3 HOURS THESIS-SUBSTITUTE STUDENTS)

All MCRP students must enroll in CIRP 5380 RESEARCH QUESTIONS IN PLANNING in their next to last semester to prepare for the Thesis or Professional Report.

Thesis (minimum of 6 credit hours): This option is recommended for students who enjoy research and/or are interested in pursuing a career in research or private consulting, or who intend to obtain another advanced degree. However, this option is also available to students who intend to go into professional planning practice.

Thesis format and submission calendar must adhere to the Office of Graduate Studies' thesis criteria. Thesis students identify a committee chair no later than their next to last semester and, in consultation with the chair, form a thesis committee consisting of at least three members of the SUPA Graduate Faculty. The thesis committee guides the student's development of research question and choice of research method and analysis. Thesis students must defend their thesis in a public oral examination- open to all members of the faculty- and before all members of the student's thesis committee. The thesis committee must have copies of the thesis at least two weeks prior to the thesis defense. All members of the student's committee must be present at the defense. Thesis students must be enrolled in the appropriate section of CIRP 5698 PLANNING THESIS (under their committee chair) during the semester they receive advise from their chair and committee for preparing the thesis, as well as during the semester they defend their thesis. Once the student is enrolled in the thesis course, continuous enrollment is required.

Professional Report (3 credit hours): This option is recommended for students who are going into professional practice and/or who desire additional experience beyond the Project Studio course by working on a professional report. This option does not preclude professional report students the opportunity of further pursuing an advanced graduate degree. Students identify a professional report committee chair no later than their next to last semester and, in consultation with the chair, form a professional report committee consisting of at least three members of the SUPA Graduate Faculty. The professional report committee guides the student's choice of planning project and method of analysis. Professional report students must defend their report in a public oral examination- open to all SUPA graduate faculty and students- and before all members of the student's professional report committee. Professional Report students must be enrolled in the appropriate section (under their committee chair) of CIRP 5397 PROFESSIONAL REPORT the semester in which the professional report is defended.

Dual Degrees

To participate in the dual degree program, students must make separate application to each program and must meet the admission requirements of each program. Students must be admitted to the second program before completing more than 24 credit hours in the first program and must complete the second degree within three academic years following completion of the first. By participating in a dual degree program, students may apply 6-18 total credit hours jointly to meet the requirements of both degrees, thus reducing the total number of hours required to earn each degree separately (shared courses are subject to approval by Program Advisors of each program). Degree plans, thesis or professional report proposals, and the final thesis or report must be submitted separately for each degree and approved by Program Advisors and relevant committees of each program. The successful candidate is awarded two degrees (not one joint degree).

Those interested in the dual degree program should consult the appropriate Program Advisors for further information and review the statement on Dual Degree Programs in the general information section of the catalog.

Dual degrees can be arranged with any suitable program. Arrangements for the following dual degrees have already been made between M.C.R.P. and the relevant Program Advisors.

- M.C.R.P. and M.P.A. (Master of Public Administration)
- M.C.R.P. and M.A. (Master of Arts in Urban Affairs)
- M.C.R.P. and M.S.W. (Master of Social Work)
- M.C.R.P. and M.Arch. (Master of Architecture)*
- M.C.R.P. and M.S.L.A. (Master of Science in Landscape Architecture)
- M.C.R.P. and M.S.C.E. (Master of Science in Civil Engineering)/M.Engr. (Master of Engineering)
- M.C.R.P. and M.S.Ev.S.E. (Master of Science in Environmental Science and Engineering)

*MCRP students without a Bachelor's degree in Architecture take Path A in the architecture program; those with an undergraduate degree take Path B. All 15 credit hours of electives in the M.Arch. program must be taken in the MCRP program. Only in special instances may students select the thesis substitute plan of the MCRP program. Student will write one thesis and the thesis supervisor should be selected from CIRP or the School of Architecture, and committee members should be selected from both faculties.

Ph.D. in Urban Planning and Public Policy (UPPP)

The UPPP Ph.D. program requires a minimum of 48 credit hours beyond the master's degree, including 39 credit hours of coursework and a minimum of 9 dissertation credit hours. The 39 credit hours of coursework include: 6 hours of leveling courses, 9 hours in the required core of urban planning and public policy, 6 hours of methods courses and 18 hours of elected field area courses. Courses and credit hours may be waived for students with relevant previous coursework upon approval of the dissertation supervisor and program director.

Coursework in the required core, which covers core knowledge and competencies in planning and policy, as well as the courses in the selected field areas prepares students for the field exam. Students take a diagnostic exam toward the end of their first semester or early in their second semester so that their three-member Diagnostic Supervisory Committee can be selected and can guide them in their selection of courses thereafter. The student's committee will then guide their course work, including any extra courses needed based on their diagnostic exam as well as dissertation proposal stages.

APPLICATION REQUIREMENTS AND DEADLINES

Along with the Graduate School application requirements, a complete application includes:

1. Official transcripts from colleges and universities attended. Information about submitting transcripts is available in the Graduate Catalog
2. Official test score reports for the Graduate Record Exam (GRE) and, for international applicants, the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Information about submitting official test scores is available from the Graduate Catalog. The ETS code for UTA is 6013
3. Three Letters of Recommendation. Letters should attest to the applicant's ability to do Doctoral-level work and complete the dissertation. Letters must be from references who hold a Ph.D. degree; and
4. Essay by applicant approximately one double-spaced page in length (approximately 250 words). The essay is considered both for its content and writing quality. The essay should discuss research agenda, identify the faculty you wish to work with, and state the reasons for wanting to earn the Doctoral degree.

Official transcripts and test scores must be sent directly to the Graduate School by the institution and ETS respectively. Letters of recommendation and personal essay should be sent directly to: UPPP Admissions Committee, SUPA Box 19588, Arlington TX 76019 or email to the program's Graduate Advisor. It is the applicant's responsibility to ensure all application materials are received by the application deadline. Incomplete applications or applications received after the deadline could be deferred.

UPPP program admits doctoral students for Fall and Spring semester admissions. The application deadline for the UPPP program is February 1st for Fall semester and July 1st for spring semester.

ADMISSION CRITERIA

Applicants are typically admitted unconditionally with a graduate GPA of 3.6, a Verbal GRE score of at least 153 (500 if test was taken before August 1, 2011) and a Quantitative GRE score of at least 144 (500 if test was taken before August 1, 2011). GRE requirements are applied flexibly as different areas of study vary in the relative importance of quantitative and verbal analysis. Applicants should contact the Graduate Advisor if uncertain whether their area of primary interest requires more strength in either quantitative or verbal analysis.

Applicants with an interest in areas with quantitative emphasis typically meet the minimum Quantitative GRE score requirement, but may be admitted with a lower than typical GRE Verbal score. Applicants pursuing study in less quantitative but more verbally analytic areas typically meet the GRE Verbal score minimum, but may be admitted with lower than typical GRE Quantitative scores. However, in no case will standardized test performance be the sole or primary determinant of admissibility. Strength of letters of recommendation, and quality of personal statement and Master's degree field of study are also considered carefully.

U.S. students with a Master's degree from an accredited U.S. institution and several years of increasing responsibilities on the job are not required to submit GRE scores. International applicants are also required to have a score of 213 or higher on the TOEFL (550 or higher on the written TOEFL; 79 or higher on TOEFL iBT).

Applicants not admitted unconditionally may be considered for admission on probation based on factors mentioned above as well as multilingual proficiency, first generation graduate student from family and community service experience. The Doctoral admissions committee will set the probationary conditions.

The admissions committee may defer the admission decision when a component of the application is incomplete. It may also admit a student provisionally when an applicant is unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements.

Curriculum and Degree Requirements:

Leveling Courses (6 hours)

CIRP 5303	PLANNING HISTORY, THEORY AND ETHICS	3
CIRP 5310	PLANNING, URBAN DEVELOPMENT AND STRUCTURE	3

Required Core Courses (9 credit hours)

UPPP 6300	ADVANCED URBAN THEORY	3
UPPP 6311	SPATIAL THEORY AND POLICY: URBAN FORM AND STRUCTURE	3
URPA 5306	THE URBAN ECONOMY	3

Methods Courses (6 hours)

CIRP 5317/URPA 5342	INTERMEDIATE DATA ANALYSIS	3
CIRP 5346/URPA 5344	QUALITATIVE METHODS	3
CIRP/URPA 6346	ADVANCED DATA ANALYSIS IN URBAN AND PUBLIC AFFAIRS	3

Urban Planning and Public Policy Field Area Courses (18 hours)

Students take 18 hours of courses in their elected field area of planning and/or policy, preparing the student for the dissertation and beyond. Courses are determined in consultation and approval with the student's diagnostic supervisor and diagnostic committee.

Students are encouraged to use faculty resources and the opportunities offered in SUPA and UTA to specialize in following field areas or their combinations:

- Urban Policy and Planning
- Physical Planning, Development and Urban Design
- Land Use/Transportation Analysis, Planning and policy
- Environmental Planning Policy/Sustainability

Dissertation (minimum 9 hours)

ORGANIZATION

UPPP Diagnostic

When students are admitted into the UPPP program, a Graduate advisor will advise them regarding first semester courses and registration and will assign them an advisor based on the student's interest area and/or Statement Letter. Students take a diagnostic exam toward the end of their first semester or early in their second semester so that their three-member Diagnostic Supervisory Committee can be selected and can guide them in their selection of courses thereafter. As a part of this process, the university requires that "a student and his/her advisor should complete the Milestone form during the student's first term of study and it must be completed before the end of the second semester of enrollment." The school will keep a copy of the completed form on file and the student will be provided a copy for his/her records.

Deficiency & Field Courses

The Supervisory Committee decides and provides guidance on needed field areas and additional coursework based on the deficiencies noted during the diagnostic process as well as during the proposal preparation and proposal defense stages.

Deficiency courses may include courses from the selected field area and other needed courses. The final decision on deficiencies will be determined in the proposal defense session.

Waivers or Substitutions

Based on UT Arlington regulations, no course that has been applied to any degree, at any graduate or undergraduate institution, may be applied to any other degree, either directly or by substitution. Graduate-level coursework completed in the student's major area of doctoral study at institutions of recognized standing that grant doctoral degrees in those subject areas may serve to establish the student's competency in equivalent UTA courses. Competency demonstrated by successful completion of equivalent courses may provide a basis for waiving some UPPP course requirements and the credit hours associated with those courses. Waivers must be recommended by the student's graduate advisor and current supervising professor and their recommendation must be approved by both the Committee on Graduate Studies of the student's major area and the Office of Graduate Studies. Only courses in which the student has earned a B (3.0) or better will be considered for purposes of a waiver. Waived courses must be shown on the student's academic plan.

UPPP Field Area Exam

The Diagnostic Committee disbands toward the completion of the required coursework and the student selects a three-member Dissertation Committee to start working on his/her dissertation proposal. After completion of the coursework and when the student's dissertation proposal has been sufficiently developed and also is fully established in the chosen field area, the student will be given a take-home field exam by the Dissertation Committee. The exam may include questions in both broader and more specific aspects of the selected field area as well as questions designed to guide the student toward completion of the dissertation proposal. It is crucial to select the dissertation proposal topic very carefully as the dissertation is the stepping stone for the student's future professional goals, forming the first important building block of research work in the student's field area of expertise.

Once the field exam is successfully completed, the student must continue work on the dissertation proposal which must be defended within 6 months of his/her field exam.

POSSIBLE COURSES TO ENHANCE FIELD AREAS**Urban Policy and Planning**

CIRP 6301	THEORETICAL FOUNDATIONS AND Ph.D. WORKSHOP
URPA 5304	URBAN POLITICS
URPA 5305	THEORIES OF URBAN SOCIETY
URPA 5311	SOCIAL POLICY FORMATION
URPA 5309	LOCAL POLITICS IN THE INTERGOVERNMENTAL SETTING

All SUPA policy courses

Physical Planning, Development and Urban Design**Physical Planning**

CIRP 5305	LAND USE, MANAGEMENT AND DEVELOPMENT
CIRP 5306	URBAN REVITALIZATION
CIRP 5313	URBAN GROWTH POLICIES
CIRP 5340	GIS AND SUITABILITY ANALYSIS
CIRP 5358	INTELLIGENT TRANSPORTATION SYSTEMS (ITS) AND PLANNING

Urban Design

ARCH 5306	URBAN DESIGN
CIRP 5311	ELEMENTS OF URBAN DESIGN
LARC 5301	SITE PLANNING AND DEVELOPMENT PROCESSES
LARC 5302	LAND DEVELOPMENT PLANNING
LARC 5382	URBAN DESIGN SEMINAR

Real Estate Development

CIRP 5313	URBAN GROWTH POLICIES
CIRP 5345	PLANNING AND REAL ESTATE DEVELOPMENT
REAE 5350	QUANTITATIVE METHODS FOR REAL ESTATE
REAE 6390	SEMINAR IN SPECIAL TOPICS IN REAL ESTATE

Land Use/Transportation Analysis, Planning & Policy**Urban Economics**

CIRP 5322	ECONOMIC DEVELOPMENT PLANNING AND POLICY
URPA 5306	THE URBAN ECONOMY
URPA 5312	ECONOMIC POLICY

Land Use/Transportation

CE 5328	FUNDAMENTALS OF AIR POLLUTION
CE 5338	SYSTEM EVALUATION
CE 6306	PUBLIC TRANSIT PLANNING & OPERATIONS
CE 6308	ANALYTICAL MODELS IN TRANSPORTATION
CIRP 5305	LAND USE, MANAGEMENT AND DEVELOPMENT
CIRP 5309	TRANSPORTATION/LAND USE MODELING AND POLICY ANALYSIS
CIRP 5315	TRANSPORTATION POLICIES, PROGRAMS AND HISTORY
CIRP 5340	GIS AND SUITABILITY ANALYSIS
CIRP 5358	INTELLIGENT TRANSPORTATION SYSTEMS (ITS) AND PLANNING

Environmental Planning Policy/Sustainability**Environmental Policy Planning**

CIRP 5340	GIS AND SUITABILITY ANALYSIS
CIRP 5341	ENVIRONMENTAL REGULATIONS: LAWS AND PLANNING
CIRP 5342/URPA 5317	ENVIRONMENTAL POLICY
CIRP 5350	ENVIRONMENTAL PLANNING
CIRP 5351	TECHNIQUES OF ENVIRONMENTAL ASSESSMENT
Environmental Science & Engineering	
CE 5329	ENVIRONMENTAL RISK BASED CORRECTIVE ACTION
EVSE 5310	ENVIRONMENTAL SYSTEMS-CHEMICAL ASPECTS
EVSE 5311	ENVIRONMENTAL SYSTEMS-GEOLOGICAL ASPECTS

DISSERTATION PROPOSAL

Upon completion of the coursework, students will work in preparation of their dissertation proposal. This preparation is guided by the student's Dissertation Committee. The Dissertation committee may advise the student to take courses which provide theoretical background and techniques to prepare the student for completing the dissertation proposal. Students must also work closely with their dissertation supervisor and committee to develop their dissertation proposal. A formal proposal defense must be held, and the proposal must be formally approved by the dissertation committee before the student may continue to complete the dissertation. The dissertation represents the culmination of the student's academic efforts and so is expected to demonstrate original and independent research activities and be a significant contribution to knowledge.

DISSERTATION

A student receiving advice and assistance from a faculty member in the preparation of a dissertation must register for the appropriate course commensurate with the student's level of effort that is equivalent to an organized course of the same credit value (<http://grad.pci.uta.edu/about/catalog/current/schools/general/regulations/#designation>). Once the student is enrolled in the dissertation course, continuous enrollment is required. The student must accumulate a minimum of nine dissertation hours to graduate.

The Graduate School offers Dissertation Seminars each semester and encourages all Dissertation students to attend.

All doctoral students must enroll in the appropriate Dissertation (6699, 6999) or Doctoral Degree Completion course (7399) in the semester in which they intend to defend their theses or dissertations. The Doctoral Degree Completion course, 7399, may be taken only once and cannot be repeated.

The dissertation defense is a public oral examination open to all members (faculty, students and invited guests) of the University community. Questioning of the candidate will be directed by the student's dissertation supervisory committee. All members of the student's committee must be present at the defense. Although the defense is concerned primarily with the dissertation research and its interpretation, the examining committee may explore the student's knowledge of areas relevant to the core of the dissertation problem.

The dissertation defense may result in a decision that the candidate has 1) passed unconditionally; 2) passed conditionally with remedial work specified by the committee; 3) failed, with permission to be re-examined after a specified period; or 4) failed and dismissed from the program. The dissertation must be approved unanimously by the student's dissertation supervisory committee and by the Dean of Graduate Studies.

Graduate Certificates

CERTIFICATE IN DEVELOPMENT REVIEW

Certificate Coordinator: Enid Arvidson; enid@uta.edu

The Certificate in Development Review provides training in zoning, subdivision plat review, site design, communication skills, and urban development, while keeping in mind the interests of citizens and the spirit of places. These skills are essential for planners who want to understand proposed development activity, ensure that proposed development is consistent with a city's vision, and facilitate review of development proposals. The program is geared for both entry-level planners/planning technicians, and for professionals in allied fields such as architecture, landscape architecture, law, engineering, and real estate.

The certificate requires completion of 15 hours of graduate-level coursework.

CIRP 5304	PLAN IMPLEMENTATION, ZONING, AND REGULATIONS	3
Select two of the following in land use and development:		6
CIRP 5305	LAND USE, MANAGEMENT AND DEVELOPMENT	
CIRP 5306	URBAN REVITALIZATION	
CIRP 5316	LAND USE PLANNING AND THE LAW	
CIRP 5322	ECONOMIC DEVELOPMENT PLANNING AND POLICY	
Select one of the following in communication:		3
CIRP 5308	METROPOLITAN SUSTAINABILITY AND PLAN MAKING	
CIRP 5363	LEADERSHIP AND COMMUNICATION SKILLS IN THE PLANNING PROCESS	

Select one of the following in agencies and policies:	3
CIRP 5313	URBAN GROWTH POLICIES
CIRP 5328/URPA 5326	PUBLIC BUDGETING
Total Hours	15

CERTIFICATE IN GEOGRAPHIC INFORMATION SYSTEMS

Certificate Coordinator: Jianling Li; jili@uta.edu

The Geographic Information Systems (GIS) Certificate program is designed for students and professionals wishing to acquire skills in spatial data analysis. GIS is a powerful computer-based analytical tool used at all levels of government, in business, industry, and institutions. GIS skills are a must in many different fields including urban planning, engineering, geology, and the social sciences. In planning for instance, GIS skills provide professionals a spatial analytical edge with application in all areas of planning including land use, environmental, transportation and economic development planning.

Applying for admission to the GIS-Certificate program does not require the GRE or a degree in planning and should be done as a Non-Degree Seeking Special Applicant through the Graduate School. To obtain the 15-credit hour certificate, students must maintain a GPA of 3.0 in their coursework.

Up to 12 GIS-certificate-credit hours earned as a special non-degree seeking student may be applied to the Master's degree in City and Regional Planning, subject to the policies on grades and graduate credit described in the Graduate School catalog

Required

CIRP 5356	INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS	3
CIRP 5357	INTERMEDIATE GEOGRAPHIC INFORMATION SYSTEMS	3
CIRP 5331	GIS WORKSHOP	3

Electives

Select two electives with approval of the GIS Certificate Program advisor:	6
CIRP 5340	GIS AND SUITABILITY ANALYSIS
GEOL 5323	REMOTE SENSING FUNDAMENTALS
ARCH 5329 & ARCH 5340	TOPICS IN COMPUTERS AND DESIGN and THE EVERYDAY CITY
CSE 5330	DATABASE SYSTEMS

Total Hours	15

Interior Design

Bachelor of Science in Interior Design

Interior Design at UT Arlington focuses on the commercial, institutional, and large-project scale activities of the profession, a focus very appropriate in the context of architecture.

The Bachelor of Science in Interior Design is a four-year program of studies, interdisciplinary with architecture, on the design of interior environments and consists of two two-year segments: Basic Studies and Major Studies. Following the two-year Basic Studies sequence, the student completes two years of Major Studies, an intensive series of courses and studios on the theory, history, skill, and practice of interior design.

In the third and fourth years (Major Studies), the student concentrates in one of the design disciplines, taking courses and studios of a more advanced and professional nature.

The program leads to the professional degree in interior design, accredited by the Council for Interior Design Accreditation (CIDA) and the National Association of Schools of Art and Design (NASAD).

Accreditation

The program is fully accredited by the Council for Interior Design Accreditation (CIDA) and the National Association of Schools of Art and Design (NASAD).

Major Studies: Entrance Requirements

ADMISSIONS REQUIREMENTS

Admission to the interior design-intended program is open to all students meeting the general requirements for entrance to the University.

ENTRANCE REQUIREMENTS

To declare a major (enter 3rd year) in Interior Design and gain permission to enroll in upper-level INTD courses:

- The student will have completed the final architecture-intended or interior design-intended courses and core curriculum.
- Have a minimum of a 2.8 GPA both overall at UT Arlington as well as within the major (first and second year ARCH courses).
- Complete a Major Declaration form available through the School of Architecture

Prior to completing the application in the School of Architecture office, ALL required interior design-intended course work must be completed.

GPA requirements may change based on changes in the curriculum of the program. Qualified students must meet the GPA requirements that are in place at the time they fulfill all other requirements to declare their major.

To declare a major for a fall semester, qualified applicants will submit their request to declare a major in the School of Architecture office at the completion of the spring semester, by the department specified deadline.

Students meeting the qualifications to declare a major during the summer or fall semesters will submit their request to declare a major at the completion of the fall semester, by the department specified deadline, for spring entrance consideration*.

Consideration for fall admission into the major studies programs for qualified summer applicants will be based on space availability.

Coursework taken at other institutions or universities must be noted on the application with accompanying attachments showing the completion of/ or current attendance in the course(s). It is the student's responsibility to ensure that all coursework is transferred to the Office of Admissions at UT Arlington in a timely manner.

Upon entrance into the major studies programs, students will be required to maintain the minimum 2.8 GPAs both overall at UT Arlington and within the major to remain active and proceed within the program.

PROGRAMS COHORT

The undergraduate programs in the School of Architecture at the University of Texas at Arlington are organized in a structured cohort format.

What Is a Cohort?

A cohort is a group of students that follows the same set schedule and progresses through a program together. The sequential scheduling of the courses promotes an interactive learning environment and facilitates networking opportunities and career-strengthening relationships.

How Does It Work?

The program consists of a sequence of courses that takes a minimum of eight semesters to complete. The courses are offered in specific semesters (Fall and Spring) that require the students to complete the prior level before proceeding to the next level. If a student gets off-track in the cohort, she/he must wait until the missing course(s) are offered again.

How Are the Courses Sequenced?

The major courses must be taken as follows (*Please note: For every year listed below, 'First Semester' is Fall and 'Second Semester' is Spring*):

Interior Design Students

First Year			
First Semester	Hours	Second Semester	Hours
ARCH 1301	3	ARCH 1342	3
ARCH 1341	3		
INTD 1101	1		
	7		3
Second Year			
First Semester	Hours	Second Semester	Hours
ARCH 2303	3	ARCH 2304	3

INTD 4394	3	INTD 4563	5
INTD 4562	5		
	17		14

Total Hours: 85

Student Personal Laptop Policy

All declared Interior Design majors admitted to the Third Year (Major Studies) are required to have a personal laptop computer configured to the specifications defined by the School of Architecture. Specifications may be found on the Architecture website: www.uta.edu/architecture/

Special Academic Requirements

GPA Requirements: Upon admission to the Major Studies, all declared majors must maintain a minimum GPA of 2.8 both within the major and in the cumulative GPA to continue in the upper level program to satisfy requirements for graduation.

Grade Requirements: A grade of C or higher must be earned in each School of Architecture course used for credit toward an undergraduate degree and minor offered by the school. A grade of C or higher must be earned in all required Math courses.

Repetition of Courses: Three attempts to achieve a satisfactory grade are permitted for each required course in the School of Architecture. Beyond that number of attempts, the student is denied access to the course in question, or to the sequence of courses for which it is requisite. Enrollment in the course for the time sufficient to receive a grade, including the grade W, is considered an attempt.

Transfer of Credit: The extent of credit toward degree requirements for academic work done elsewhere will be determined by the representatives of the appropriate program. Students applying to transfer credits from studio courses taken elsewhere must present examples of that work for evaluation.

Student Projects: The School of Architecture reserves the right to retain, copyright, use, exhibit, reproduce, and publish any work submitted for course credit. The student is encouraged to develop a portfolio of all work accomplished in advanced courses for future professional and academic uses.

COMPETENCE IN ORAL PRESENTATIONS

Students obtaining a Bachelor of Science degree in Interior Design demonstrate oral proficiency by taking and passing ARCH 2551 BASIC DESIGN AND DRAWING I and ARCH 2552 BASIC DESIGN AND DRAWING II, or approved equivalents.

COMPETENCE IN COMPUTER USE

Students obtaining a Bachelor of Science degree in Interior Design can demonstrate computer proficiency by:

- Taking and passing ENGL 1301 RHETORIC AND COMPOSITION I or ENGL 1302 RHETORIC AND COMPOSITION II at UT Arlington in a computer classroom environment or ENGL 3372 COMPUTERS AND WRITING, ENGL 3374 WRITING, RHETORIC, AND MULTIMEDIA AUTHORING, CSE 1301 COMPUTER LITERACY (or equivalent), or any other class approved by the Undergraduate Assembly.
- Passing the University computer literacy examination.

Minor in Architecture History

The school offers numerous courses from which to select the 18 hours required for the Architecture History minor (<http://www.uta.edu/architecture/academic-programs/minors/minor-history.php>).

Students who choose to pursue the minor in History of Architecture must complete our 6 hours of core courses (ARCH 2303 and ARCH 2304).

Upon completion of the two core classes, students must select an additional 12 hours from our other Architecture History courses.

CORE		6

ARCH 4317	MODERN ARCHITECTURE II	3
Total Hours		18

¹ A Special Topics courses whose offerings continually are changing.

Minor in Environmental and Sustainable Studies

The University offers a variety courses from which to select the 18 hours required for the Environmental and Sustainable Studies minor (<http://www.uta.edu/architecture/academic-programs/minors/minor-environmental.php>).

Students are required to take one core course, ESST 2300: Introduction to Environmental and Sustainability Studies, which surveys topics and methods in interdisciplinary studies of sustainability and the environment. This course should be taken in the freshman or sophomore year.

An additional 15 hours of coursework is to be completed from the list of courses below (or others approved by the ESS advisor). At least one course must be taken in each of the two groups. Students are encouraged to inquire about other courses that might qualify for credit. At least 6 hours must be taken as 3000- or 4000-level courses. Additional courses are expected to be approved each semester, so students are encouraged to consult regularly with the advisor. *Students may be allowed to take additional classes from alternate group with advisor approval.

CORE		
ESST 2300	INTRODUCTION TO ENVIRONMENTAL & SUSTAINABILITY STUDIES	3
FIELD OF INTEREST (choose group)		12

Total Hours		18

Minor in Urban and Public Affairs

The University offers numerous courses from which to select the 18 hours required for a minor.

The Urban and Public Affairs minor (<http://www.uta.edu/architecture/academic-programs/minors/minor-urbanpublicaffairs.php>) is for students interested in complementing their academic career with a broader understanding of Urban Affairs, Urban Planning and the Environment, or Public Administration.

Students are required to take two core courses, URPA 1301 Intro to Urban Life and URPA 3301 The Metroplex,

Students pursuing the minor complete the 2 required core courses then select 4 courses (12 hours) from one of the fields of interest.

Landscape Architecture

Master of Landscape Architecture

The Program in Landscape Architecture has the dual objectives of providing students with a core of design and technical skills in combination with experiences in pure and applied research. The Landscape Architecture Program enables students to enter practice as landscape architects in private, public, academic, and research organizations.

The mission of the Program in Landscape Architecture is to educate for ultimate leadership in the landscape architecture profession. This mission requires the development and exercise of both intellect and sensibility.

Accreditation

The Program in Landscape Architecture is fully accredited by the Landscape Architectural Accreditation Board of the American Society of Landscape Architects. Graduates from the program are qualified to sit for the Landscape Architecture Registration Exam which, when successfully passed, qualifies individuals to practice as landscape architects in the state of Texas.

Objective

The mission of the Program in Landscape Architecture is to educate for ultimate leadership in the landscape architecture profession. This mission requires fostering rigorous scholarly inquiry of the discipline, and the preparation of knowledgeable practitioners.

The Program in Landscape Architecture has the dual objectives of providing students with a core of design and technical skills in combination with experiences in pure and applied research. This duality prepares students for identifying and solving problems in the profession through design and research, and it is a Program focus. The Program in Landscape Architecture also prepares students to enter practice in private, public, academic, and research organizations.

Student preparation is enhanced by specialized coursework taken inside and outside of landscape architecture and by the topic of one's thesis. Students are directed to select thesis committee members early-on and to select specialized courses which reinforce students' areas of primary interest in landscape architecture.

The Program in Landscape Architecture is fully accredited by the Landscape Architecture Accreditation Board. Graduates from the Program are qualified to sit for the Landscape Architecture Registration Exam which, when successfully passed, qualifies individuals to practice as landscape architects in the State of Texas.

Graduate Teaching/Research Assistantships

To be considered for a Graduate Teaching or Research Assistantship, the candidate must be admitted without provisional conditions. In order to be eligible for teaching assistantships, students whose native language is not English, must complete extramural training in English as approved by the Program and the Graduate School.

Fellowships and Scholarships

To be considered for fellowships or scholarships in the Program the candidate must have a favorable review in most of the evaluation criteria. Fellowships and scholarships in landscape architecture are limited and very competitive. Generally, candidates must be new students coming to UT Arlington, must have a GPA of 3.0 in their last 60 undergraduate credit hours and any graduate hours, and must be enrolled in a minimum of 9 hours in both long semesters to retain their fellowships or scholarships.

Master's Admissions Requirements

Applicants must meet the general requirements of the Office of Graduate Studies. A personal interview with the Director, Graduate Advisor or members of the landscape architecture faculty is strongly recommended. Three letters of recommendation are required and it is suggested that at least two of the letters come from former educators or academic contact. Applicants also are required to submit scores from the Graduate Record Exam (GRE). Average GRE scores of successful applicants since 1998 have been approximately 550 Verbal and 550 Quantitative. Also required is a grade point average (GPA) of 3.00 as calculated by the Office of Graduate Studies.

Selected applicants holding first professional degrees in landscape architecture, or in some cases degrees related to landscape architecture (such as architecture, engineering, environmental design, horticulture, interior design, planning, and the like) are required to submit portfolios reflecting the

applicants' professional and/or academic experiences and interests. Portfolios are assessed according to proficiency in design, presentation and layout, technical skills, and content, similar to criteria used in design studios.

Applicants who have a weakness in one of the criteria for admission can enhance their credentials with strengths in the remaining criteria.

Applicants can be admitted according to four conditions: Unconditional; Provisional; Probationary; and, Deferred. Applicants who do not meet the criteria of one of these conditions will be denied admission to the Program.

Unconditional Admission

Applicants must possess a bachelor's degree from an accredited college or university. Transcripts from all previous college or university work, along with scores from the Graduate Record Exam (GRE), and three letters of recommendation are required of all applicants. In addition, applicants should have a minimum Grade Point Average (GPA) of 3.0, as calculated by the Office of Graduate Studies. Applicants holding the first professional degree in landscape architecture, or related fields, must submit a portfolio. Applicants should contact the Landscape Architecture Graduate Advisor or Program Director regarding this requirement.

Provisional Admission

Those who have submitted their applications forms, but whose packets are incomplete, can be admitted provisionally if their GPA meets minimum requirements, and if the Program and the Office of Graduate Studies have received official transcripts. In this case, incomplete materials could include letters of recommendation, GRE scores, and/or portfolios.

Probationary Admission

Those who have weaknesses in no more than two of the Degree Requirements (letters of recommendation, GRE scores, and GPA), can be admitted on probation, with the condition that they make no less than a B in the first 12 hours of coursework in landscape architecture. Such students must complete no fewer than 9 credits during the semester in which they are on probation.

Deferred Admission

Those who have weaknesses in no more than two of the Degree Requirements (letters of recommendation, GRE scores, and GPA), and/or who have not submitted all of the materials required for unconditional admission, can have their applications deferred for one semester, until outstanding requirements and criteria are met.

International Student Admission

International applicants must meet the Degree Requirements (letters of recommendation, GRE scores, and GPA), and must be admitted in one of the admission categories described above. In addition, applicants whose native language is not English must have a demonstrated speaking ability in English. They also must meet the Program's minimum required score of 575 on the paper exam, or an equivalent score on the computer based- or internet-based tests, on the Test of English as a Foreign Language (TOEFL). International applicants who do not meet the Program's minimum TOEFL score, must complete extramural training in English, as approved by the Program and the Office of Graduate Studies.

GRADUATE TEACHING/RESEARCH ASSISTANTSHIPS

To be considered for a Graduate Teaching or Research Assistantship, the candidate must be admitted without provisional conditions. In order to be eligible for teaching assistantships, students whose native language is not English, must complete extramural training in English as approved by the Program and the Office of Graduate Studies.

FELLOWSHIPS AND SCHOLARSHIPS

To be considered for fellowships or scholarships in the Program the candidate must have a favorable review in most of the evaluation criteria. Fellowships and scholarships in landscape architecture are limited and very competitive. Generally, candidates must be new students coming to UT Arlington, must have a GPA of 3.0 in their last 60 undergraduate credit hours and any graduate hours, and must be enrolled in a minimum of 9 hours in both long semesters to retain their fellowships or scholarships.

DEGREE REQUIREMENTS

First Professional Degree Program

The core curriculum for the Program in Landscape Architecture prepares students holding a college degree in a field other than landscape architecture or a related design discipline to complete the requirements for the first professional degree in landscape architecture. The core curriculum also provides students with the basic equivalent of a bachelor's degree in landscape architecture. For full-time students with degrees from other non-design disciplines, the core usually takes three semesters to complete. For all students, electives must be concentrated in areas of interest which support the student's thesis and/or the student's professional objectives.

Landscape Architecture Degree Requirements

FIRST PROFESSIONAL DEGREE PROGRAM

The core curriculum for the Program in Landscape Architecture prepares students holding a college degree in a field other than landscape architecture or a related design discipline to complete the requirements for the first professional degree in landscape architecture. The core curriculum also provides students with the basic equivalent of a bachelor's degree in landscape architecture. For full-time students with degrees from other non-design disciplines, the core usually takes three semesters to complete. For all students, electives must be concentrated in areas of interest which support the student's thesis and/or the student's professional objectives.

An approved degree plan must be submitted no later than the start of the student's second semester of graduate work.

The following coursework is a suggestion to meet the Program's mission. Each student will be counseled, based upon interests and background, to develop an appropriate degree plan.

The Core Curriculum

First Year

First Semester	Hours	Second Semester	Hours	Summer Session	Hours
LARC 5320	3	LARC 5312	3	LARC 5350	3
LARC 5330	3	LARC 5331	3		
LARC 5341	3	LARC 5382	3		
LARC 5661	6	LARC 5662	6		
	15		15		3

Second Year

First Semester	Hours	Second Semester	Hours	Summer Session	Hours
LARC 5342	3	LARC 5302	3	Select one of the following:	
LARC 5663	6	LARC 5340	3	LARC 5395 (or LARC 5660 if necessary)	3
Landscape Architecture elective of any LARC 53XX		LARC 5380	3		
		LARC 5664 (CAD experience required)	6		
	9		15		3

Third Year

First Semester	Hours	Second Semester	Hours
Advanced or Independent Study in Landscape Architecture	9	LARC 5294	2
LARC 5665	6	LARC 5698	6
		Advanced or Independent Study in Landscape Architecture	3
	15		11

Total Hours: 86

¹ After completing 45 credit hours, the first professional degree student is evaluated by means of an academic review and portfolio review by the Graduate Studies Committee. The committee identifies areas of strength and weakness in the student's performance and recommends appropriate action.

Upon completion of the three core semesters, the student is required to develop an area of specialization or primary interest. The student must consult with faculty advisors to complete this step, which includes a preliminary agreement between student and faculty advisors regarding the specialization or primary interest and the appropriate research method to support it. If a student is interested in Advanced Landscape Architecture, for example, a probable program of study could look like the following terms.

Students pursuing other primary areas of interest also must consult with appropriate faculty advisors for approval.

ADVANCED STANDING

Students from backgrounds other than landscape architecture or its related fields must complete the 92 credits required in the curriculum. Students with degrees and/or professional experience in fields related to landscape architecture (such as architecture, engineering, environmental design, horticulture, interior design, planning and the like) may apply for advanced standing, allowing them to enter the academic phase (second year) of the curriculum. Advanced standing in these cases requires a minimum of 62 total credit hours for graduation.

Students with first professional degrees in landscape architecture also may apply for advanced standing, allowing them to enter the research (third year) phase of the curriculum. Advanced standing in these cases requires a minimum of 30 total credit hours for graduation.

Minimum Program for Advanced Standing

(For students from fields of study related to landscape architecture)

Public Administration

Master's Degrees

- Academic Partnership Online Master of Public Administration
- Public Administration, M.P.A.

Certificates

- Public Budgeting and Financial Management Certificate
- Urban Non-Profit Management Certificate

General

Public Administration is concerned with the formulation, analysis, negotiation, and implementation of democratically responsible collective action. With an interdisciplinary focus, this program gives special emphasis to the urban community and the special challenges of public managers who serve in urban areas. The curriculum is designed to develop leadership capacity, understanding of the political, social, and economic characteristics of today's urban environment and the ability to apply current theories of management and analysis to difficult management issues. The program is meant as preparation for those entering management careers in government for the first time or as career development for those already employed who are seeking upward mobility in public management.

The MPA degree at the School of Urban and Public Affairs is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA), and the curriculum conforms to NASPAA standards.

Those seeking admission to the MPA program can choose between two program options:

1. courses taught on campus primarily during the evening hours; and
2. courses taught online.

Applicants who choose the on-campus option may plan their courses to include the requirements of certificate programs such as Urban Nonprofit Management or Public Budgeting and Financial Management. A description of the various certificate offerings can be found in the Urban and Public Affairs section of the catalogue.

A hallmark of the MPA program is its distinguished faculty that combines extensive academic and field experience in public administration with a wide range of related backgrounds. Augmenting the permanent faculty are several adjunct professors with impressive credentials in the public management field such as Bob Hart, City Manager of Kennedale, Texas; Richard Greene, Regional Director of EPA and former Mayor of Arlington, Texas.

MISSION

The mission of the Master's of Public Administration program is to strengthen public decision making and the delivery of public services in a globalized and diverse society by educating students to lead and manage organizations at all levels of government and nonprofit institutions ethically, democratically, and effectively.

For specific goals and objectives, see the UTA MPA website (www.uta.edu/mpa).

Admission Requirements

Factors in admission decisions are the same for the on campus and online programs.

The MPA program takes a holistic approach to the application review process. Each applicant's file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's records. A complete application includes:

- Graduate Record Exam (GRE) score: Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements. See "Waiving the GRE" below)
- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate Admissions from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal and Quantitative (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work.

- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The Essay is considered both for its content and quality of writing. The Essay should address the following questions: 1. Why do you want to earn a Master's degree in the program for which you are applying? 2. What relevant background and experience do you bring to the program? The essay can also include other concerns you'd like to bring to the attention of the Graduate Advisor or Master's Admissions Committee.
- Non-native English speakers only: TOEFL or IELTS scores (Exceptions: An applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, or IELTS score for admission purposes.)

TYPES OF ADMISSION

1. Unconditional Admission:

Applicants who meet all the following requirements will be considered for unconditional admission:

- Minimum Writing GRE score of 4.0 (may be waived under certain conditions - see "Waiving the GRE" below)
- Minimum Undergraduate GPA of 3.0
- A preferred minimum Verbal GRE score of 450 (Revised GRE Test: 150), and minimum Quantitative GRE of 450 (Revised GRE Test: 141), and a minimum combined Verbal and Quantitative score of 1,000 (Revised GRE Test Combined: 291) (may be waived under certain conditions - see "Waiving the GRE" below)
- Outstanding letters of recommendation
- Strong, well-written personal essay
- Non-native English speakers only: TOEFL scores of at least 550 (paper-based), 213 (computer-based), or 79 (iBT) with sectional scores that meet or exceed 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or, IELTS score of at least 6.5.

2. Probationary Admission:

Applicants who do not meet all requirements for Unconditional admission will be considered for Probationary admission on the basis of the strength of all the listed admission factors. Test scores will not constitute the sole or primary basis for ending consideration of an applicant. Under Probationary admission, special course requirements or other conditions may be imposed by the SUPA Master's Admissions Committee. Applicants who meet all the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for Probationary Admission conditional on completing an approved Writing course in their first semester.

3. Other types of admission decisions pertaining to Master's applicants:

- Deferred:** Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.
- Provisional:** Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted Provisional admission pending submission of complete and satisfactory credentials before the end of the semester in which they have registered in a Provisional status.
- Denied:** Applicants who fail to meet more than one of the admission requirements and for whom the SUPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission

WAIVING THE GRE

The MPA program waives the requirement that an applicant take the GRE under **any** of the following conditions:

- A 3.25 or higher undergraduate GPA based on the last 60 hours of course work AND at least three years professional non-profit or public service work experience (as judged by the MPA admission committee. Applicants should submit a supporting resume or other relevant documentation to the MPA Graduate Advisor)
- A completed graduate degree from an accredited program in a related field such as, but not exclusively, political science, economics, urban planning, social work, criminal justice, and sociology OR a 3.0 or better higher after 12 hours of coursework in the accredited graduate degree program.
- A completed UTA B.A. or B.S. with 3.0 or higher GPA
- An equivalent GMAT or LSAT score from an exam taken within the last two years preceding the time of application.

SCHOLARSHIPS AND FELLOWSHIPS

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships and fellowships.
- Scholarships and fellowships for Master's and Doctoral students will be competitively awarded based on consideration of the all admission criteria assessed by their admitting programs.

SUPA INADEQUATE ACADEMIC PROGRESS POINT SYSTEM

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their Master's degree or their Ph.D. Students who complete a Master's degree at SUPA will not carry deficiency points into their Ph.D. work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points
 F = 3 deficiency points
 I = 1 deficiency point
 W = 0.5 deficiency point

Degree Requirements

ON CAMPUS DEGREE REQUIREMENTS AND COURSES

The on campus program consists of 39 or 42 total hours, which includes 10 required core courses and 9 hours in a selected emphasis area (2 required emphasis area courses and 1 elective). URPA 5360 PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP is a 3 credit hour internship course; however this can be waived with at least 1 year of professional experience working in the public sector. Details on internship waiver requests are available on the MPA program website (www.uta.edu/mpa).

Upon successfully being admitted into the MPA program, students will choose an emphasis area and degree plan. Most all classes are offered as one session per week on Monday through Thursday during evening times (6:00-8:50pm or 7-9:50pm).

Core Courses

URPA 5302	FOUNDATIONS OF URBAN RESEARCH AND ANALYSIS	3
URPA 5309	LOCAL POLITICS IN THE INTERGOVERNMENTAL SETTING	3
URPA 5320	PUBLIC AND NON-PROFIT ORGANIZATION THEORY	3
URPA 5326	PUBLIC BUDGETING	3
URPA 5329	FINANCIAL MANAGEMENT IN THE PUBLIC AND NON-PROFIT SERVICES	3
URPA 5345	EVALUATION RESEARCH	3
URPA 5350	INTRODUCTION TO PUBLIC ADMINISTRATION	3
URPA 5351	HUMAN RESOURCE MANAGEMENT IN GOVERNMENT AND NON-PROFITS	3
URPA 5358	ETHICS IN THE PUBLIC SERVICE	3
URPA 5399	PUBLIC ADMINISTRATION CAPSTONE	3

Emphasis Areas

Select on Emphasis Area (see descriptions below): ¹		9
Public Budgeting and Financial Management		
Local Government Management		
Urban Nonprofit Agency Management		
Strategic Human Resources Management		
Economic Development Management		

Internship

URPA 5360	PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP (for students with less than one year of appropriate work experience)	3
-----------	---	---

Total Hours		42
-------------	--	----

¹ Students select an emphasis area and take a total of three courses: two required courses plus one elective from the respective list or any other course with the approval of the MPA advisor.

Emphasis Area 1: Public Budgeting and Financial Management

Objectives-upon completion of this emphasis track, students should be able to:

1. Review, recommend, and interpret operating and capital budget requests taking political, economic, and decision-making processes into account; and
2. Assist the budget officer and other higher-level public officials in performing comprehensive financial analyses and developing financial and budgetary recommendations.

Required Courses

URPA 5332	CAPITAL BUDGETING IN PUBLIC MANAGEMENT	3
URPA 5348	COST BENEFIT ANALYSIS	3

Elective Courses

Select one of the following:

URPA 5312	ECONOMIC POLICY	
URPA 5321	URBAN MANAGEMENT	

URPA 5324	URBAN PUBLIC FINANCE
URPA 5341	PROFESSIONAL REPORT WRITING
URPA 5342/CIRP 5317	INTERMEDIATE DATA ANALYSIS
URPA 5357/CIRP 5312	STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES
URPA 5367	STRATEGIC PUBLIC AND NONPROFIT HUMAN RESOURCES MANAGEMENT
URPA 5333	GOVERNMENTAL AND NONPROFIT ACCOUNTING
URPA 6349	DECISION MAKING AND PUBLIC POLICY ANALYSIS (New)

Emphasis Area 2: Local Government Management

Objectives-upon completion of this emphasis track, students should be able to:

1. Demonstrate proficiency in the use of applied analytic tools such as program evaluation, policy analysis, cost-benefit analysis, and other management decision-making tools to aid the public manager make more informed decisions;
2. Assist public managers and other higher-level public officials to understand, analyze, and recommend appropriate solutions to complex public policy issues.

Required Courses (5321 and either 5357 or 5367)

URPA 5321	URBAN MANAGEMENT	3
URPA 5357/CIRP 5312	STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES (OR)	3
URPA 5367	STRATEGIC PUBLIC AND NONPROFIT HUMAN RESOURCES MANAGEMENT	3

Elective courses

Select one of the following:

URPA 5304	URBAN POLITICS
URPA 5312	ECONOMIC POLICY
URPA 5323	MANAGING CHANGE IN PUBLIC AND NON-PROFIT SERVICES
URPA 5324	URBAN PUBLIC FINANCE
URPA 5341	PROFESSIONAL REPORT WRITING
URPA 5342/CIRP 5317	INTERMEDIATE DATA ANALYSIS
URPA 5348	COST BENEFIT ANALYSIS
URPA 5352	CONFLICT RESOLUTION IN THE PUBLIC AND NONPROFIT MANAGEMENT
URPA 5367	STRATEGIC PUBLIC AND NONPROFIT HUMAN RESOURCES MANAGEMENT
URPA 5368	PRACTICAL EMPLOYMENT FOR PUBLIC AND NONPROFIT MANAGERS
URPA 6349	DECISION MAKING AND PUBLIC POLICY ANALYSIS

Emphasis Area 3: Urban Nonprofit Agency Management

Objectives-upon completion of this emphasis track, students should be able to:

1. Understand the different management areas and techniques within the nonprofit organization, including institutional management, leadership, fundraising, financial administration, human resources coordination, and planning and performance measurements.
2. Understand the role of nonprofits as community institutions with an outward focus, including the political, economic, and inter-organizational environment, as well as marketing, legal, and government policy issues.

Required Courses

URPA 5354	NONPROFIT MANAGEMENT AND SOCIAL ENTREPRENEURSHIP	3
URPA 5355	NONPROFIT ORGANIZATIONS IN PUBLIC POLICY	3

Elective Courses

Select one of the following:

URPA 5313	COMMUNITY DEVELOPMENT
URPA 5318	SOCIAL WELFARE POLICY
URPA 5321	URBAN MANAGEMENT
URPA 5330	COMMUNITY AND NEIGHBORHOOD ORGANIZATION
URPA 5341	PROFESSIONAL REPORT WRITING
URPA 5342/CIRP 5317	INTERMEDIATE DATA ANALYSIS
URPA (CIRP 5312)	
URPA 5348	COST BENEFIT ANALYSIS

URPA 5352	CONFLICT RESOLUTION IN THE PUBLIC AND NONPROFIT MANAGEMENT
URPA 5357	STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES
URPA 5367	STRATEGIC PUBLIC AND NONPROFIT HUMAN RESOURCES MANAGEMENT
URPA 5368	PRACTICAL EMPLOYMENT FOR PUBLIC AND NONPROFIT MANAGERS
URPA 6349	DECISION MAKING AND PUBLIC POLICY ANALYSIS

Emphasis Area 4: Strategic Human Resources Management

Objectives-upon completion of this emphasis track, students should be able to:

1. Demonstrate an understanding of public human resource policies, programs, procedures, and legal issues relevant to the field; and
2. Demonstrate knowledge of techniques employed in designing performance appraisals, recruiting and selecting employees, and developing rewards systems.

Required Courses

URPA 5352	CONFLICT RESOLUTION IN THE PUBLIC AND NONPROFIT MANAGEMENT	3
URPA 5367	STRATEGIC PUBLIC AND NONPROFIT HUMAN RESOURCES MANAGEMENT	3

Elective Courses

Select one of the following:

URPA 5321	URBAN MANAGEMENT
URPA 5323	MANAGING CHANGE IN PUBLIC AND NON-PROFIT SERVICES
URPA 5341	PROFESSIONAL REPORT WRITING
URPA 5342/CIRP 5317	INTERMEDIATE DATA ANALYSIS
URPA 5357/CIRP 5312	STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES
URPA 5368	PRACTICAL EMPLOYMENT FOR PUBLIC AND NONPROFIT MANAGERS
URPA 6349	DECISION MAKING AND PUBLIC POLICY ANALYSIS

Emphasis Area 5: Economic Development Management

Objectives-upon completion of this emphasis track, students should be able to:

1. Demonstrate a general comprehension of the politics, organization, policy issues and legal and financial dimensions of local economic development; and
2. Demonstrate knowledge of techniques employed in location and impact analysis, strategic planning, revenue generation, marketing, cluster development, site planning, and business recruitment, development and retention.

Required Courses (5334 and either 5357 or 5367)

URPA 5334	MANAGEMENT OF ECONOMIC DEVELOPMENT	3
URPA 5357/CIRP 5312	STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES (OR)	3
URPA 5367	STRATEGIC PUBLIC AND NONPROFIT HUMAN RESOURCES MANAGEMENT	3

Elective Courses

Select one of the following:

URPA 5306	THE URBAN ECONOMY
URPA 5312	ECONOMIC POLICY
URPA 5321	URBAN MANAGEMENT
CIRP 5322	ECONOMIC DEVELOPMENT PLANNING AND POLICY
URPA 5341	PROFESSIONAL REPORT WRITING
URPA 5342/CIRP 5317	INTERMEDIATE DATA ANALYSIS
URPA 5348	COST BENEFIT ANALYSIS
URPA 6349	DECISION MAKING AND PUBLIC POLICY ANALYSIS

ONLINE DEGREE REQUIREMENTS AND COURSES

The online program consists of 39 required core hours plus a 3 hour internship. Internships may be waived under the same conditions as the on campus program. Students may choose between URPA 5332 CAPITAL BUDGETING IN PUBLIC MANAGEMENT and URPA 5352 CONFLICT RESOLUTION IN THE PUBLIC AND NONPROFIT MANAGEMENT but all other courses are required.

The program is designed for students to take two courses a term (Fall, Spring, Summer) in succession (one course in first half of term, another in second half of term) except in Summer where the two courses have staggered starting dates and URPA 5399 which is a full semester course. It is possible to

take more than two courses per term but not advised. The curriculum is offered in a lockstep cohort format. Unlike the on campus program, there are no emphasis areas.

Core Course

URPA 5302	FOUNDATIONS OF URBAN RESEARCH AND ANALYSIS	3
URPA 5309	LOCAL POLITICS IN THE INTERGOVERNMENTAL SETTING	3
URPA 5320	PUBLIC AND NON-PROFIT ORGANIZATION THEORY	3
URPA 5326	PUBLIC BUDGETING	3
URPA 5329	FINANCIAL MANAGEMENT IN THE PUBLIC AND NON-PROFIT SERVICES	3
URPA 5332	CAPITAL BUDGETING IN PUBLIC MANAGEMENT	3
URPA 5345	EVALUATION RESEARCH	3
URPA 5350	INTRODUCTION TO PUBLIC ADMINISTRATION	3
URPA 5351	HUMAN RESOURCE MANAGEMENT IN GOVERNMENT AND NON-PROFITS	3
URPA 5352	CONFLICT RESOLUTION IN THE PUBLIC AND NONPROFIT MANAGEMENT	3
URPA 5355	NONPROFIT ORGANIZATIONS IN PUBLIC POLICY	3
URPA 5358	ETHICS IN THE PUBLIC SERVICE	3
URPA 5368	PRACTICAL EMPLOYMENT FOR PUBLIC AND NONPROFIT MANAGERS	3
URPA 5399	PUBLIC ADMINISTRATION CAPSTONE	3
Internship		
URPA 5360	PUBLIC AND NON-PROFIT MANAGEMENT INTERNSHIP (for students with less than one year of appropriate work experience)	3

DUAL DEGREE PROGRAMS

Students in public administration may participate in one of five dual degree programs whereby they can earn a Master of Public Administration and one of the following:

1. Master of Arts in Urban Affairs
2. Master of City and Regional Planning,
3. Master of Science in Social Work,
4. Master of Science in Nursing,
5. Master of Arts in Criminal Justice, or
6. Master's of Sociology.

By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from nine to 18 hours, subject to the approval of Graduate Advisors from both programs. To participate in the dual degree program, students must make separate application to each program and must submit a separate Program of Work for each degree. Those interested in the dual degree program should consult the appropriate Graduate Advisor(s) for further information on course requirements. See also the statement of Dual Degree Programs in the general information section of this catalog.

Public and Urban Administration Ph.D. Program (PUAD)

The PUAD Ph.D. has eight required core courses, three required research courses, six hours in a declared emphasis area (like public administration), and a minimum of nine dissertation credit hours. The eight core courses address the social sciences and public administration literatures critical to the integrative approach of the program. The methods courses include an intermediate quantitative methods course and a qualitative methods course. The six hours in an emphasis area are chosen to stress particular subject areas tailored to the student's interests. Students are assigned an initial adviser based primarily on their research interests and add two additional supervising committee members by the end of their first semester to help guide them through their course of study.

A student can expect to complete the required courses in no more than two academic years. Upon completing all courses (39 hours), students sit for their written comprehensive examination. The comprehensive examination is an integrative exam that blends public policy issues with public administration.

Students who completed a Masters in Public Administration degree may be eligible to waive some coursework and are encouraged to meet with the PUAD advisor to review their degree plan.

APPLICATION REQUIREMENTS AND DEADLINES

Along with the Graduate School application requirements, a complete application includes:

1. Official transcripts from colleges and universities attended. Students that obtained their masters degree at UT Arlington are not required to submit separate copies of transcripts as their information will be available to the SUPA advisors online. Information about submitting transcripts is available in the Graduate Catalog; and
2. Official test score reports for the Graduate Record Exam (GRE) and, for international applicants, the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Information about submitting official test scores is available from the Graduate Catalog. The ETS code for UTA is 6013; and
3. Three Letters of Recommendation. Letters should attest to the applicant's ability to do doctoral-level work and successfully complete the dissertation. Letters must be from references who hold a Ph.D. degree; and
4. An essay from the applicant that discusses the student's research agenda, identifies the faculty with whom the student will work, and states the reasons for pursuing a doctoral degree. The essay should be approximately 250 words. The essay is considered both for its content and writing quality.

Official transcripts and test scores must be sent directly to the Graduate School by the institution and ETS respectively. Letters of recommendation and personal essay should be sent directly to: PUAD Admissions Committee, SUPA Box 19588 , Arlington TX 76019 . It is the applicant's responsibility to ensure all application materials are received by February 1. Incomplete applications or applications received after the deadline will be deferred.

SUPA primarily admits doctoral students for the Ph.D. in Urban and Public Administration for fall semester only. Spring admissions are rare and there are no summer admissions.

Applicants who wish to be considered for graduate teaching assistant positions or other financial assistance, must submit their applications by their first week in January for full consideration. Only complete applications (including GRE scores and letters) will be considered for financial assistance. Students must also complete a separate financial aid applications available on the SUPA website.

Admission Criteria

Applicants may be admitted unconditionally with a graduate GPA of 3.6, a Verbal GRE score of at least 153 (500 if taken before August 1, 2011 and a Quantitative GRE score of at least 144 (500 if taken before August 1, 2011). International applicants are required to have a score of 213 or higher on the TOEFL (550 or higher on the written TOEFL; 79 or higher on TOEFL iBT). Strength of letters of recommendation and quality of personal statement and Master's degree field of study are also considered.

or

Applicants may be unconditionally admitted with a GPA above 3.6 if they earn scores of at least a 153 on the Verbal subtest (500 if taken before August 1, 2011) and 140 on the Quantitative subtest (400 if taken before August 1, 2011) or earn at least 144 (500 prior to August 1, 2011) on the Quantitative and 146 (400 prior to August 1, 2011) on the Verbal subtests.

Applicants not admitted unconditionally may be considered for admission on probation based on factors mentioned above as well as multilingual proficiency, first generation graduate student and applicant's community service experience. The doctoral admissions committee will set the probationary conditions.

The admissions committee may defer the admission decision when a component of the application is incomplete. It may also admit a student provisionally when an applicant is unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements.

SUPA Inadequate Academic Progress Point System

A student may be subject to dismissal from the program if they accumulate 4 deficiency points during their Master's degree or their Ph.D. Students who complete a Master's degree at SUPA will not carry deficiency points into their Ph.D. work. Deficiency points may not be removed from a student's record by repeating a course or additional coursework.

D = 2 deficiency points

F = 3 deficiency points

I = 1 deficiency point

W = 0.5 deficiency point

If a Ph.D. student does not complete dissertation proposal within 2 years of passing comprehensive exam, they will accrue 2 deficiency points.

If a Ph.D. student does not complete all requirements for the Doctoral degree within five years after the student unconditionally passes the comprehensive examination, they will accrue 1 deficiency point per year beyond the five year mark.

Doctoral Degree Requirements

CURRICULUM AND DEGREE REQUIREMENTS

Required Core Courses (24 hours)

URPA 5304

URBAN POLITICS

or URPA 5309	LOCAL POLITICS IN THE INTERGOVERNMENTAL SETTING	
URPA 5305	THEORIES OF URBAN SOCIETY	3
URPA 5306	THE URBAN ECONOMY	3
URPA 5311	SOCIAL POLICY FORMATION	3
URPA 6320	ADVANCED ORGANIZATION THEORY	3
URPA 6315	PUBLIC ADMINISTRATION THEORY	3
URPA 6326	PUBLIC BUDGETING & FINANCE	3
URPA 6349	DECISION MAKING AND PUBLIC POLICY ANALYSIS	3
Required Research Courses (9 hours)		
URPA 5342	INTERMEDIATE DATA ANALYSIS	3
CIRP 5346	QUALITATIVE METHODS	3
URPA 6301	THEORETICAL FOUNDATIONS AND PH.D. WORKSHOP	3
Selected Emphasis (6 hours)		
URPA 5323	MANAGING CHANGE IN PUBLIC AND NON-PROFIT SERVICES	3
URPA 5351	HUMAN RESOURCE MANAGEMENT IN GOVERNMENT AND NON-PROFITS	3
Total Hours		39

Notes on Curriculum and Degree Requirements

Students with the approval of their adviser may select substituted methods courses for the "required research courses." Listed "Selected Emphasis" courses are examples of possible classes. "

Comprehensive Exam and Dissertation

Upon successful completion of the written comprehensive exam students form a three-member faculty committee and prepare their dissertation proposal. Given the research topic and preparedness of the student, the faculty committee may recommend that the student take additional courses that contribute to the student's dissertation. The student will defend a dissertation proposal before her/his committee.

Successful completion of the dissertation proposal advances the student to the status of candidacy (ABD). The student continues to work closely with her/his dissertation committee to the completion of the dissertation.

Dissertation Proposal

Upon successful completion of the written comprehensive examination, students will work in preparation of their dissertation proposal. This preparation may include independent study or structured courses and is guided by the student's Dissertation Committee. Students must also work closely with their dissertation supervisor and committee to develop their dissertation proposal. A formal oral proposal defense must be held, and the proposal must be formally approved by the dissertation committee before the student may continue to complete the dissertation. Guidelines for the dissertation proposal are available in the Ph.D. Student Handbook.

Dissertation

The dissertation represents the culmination of the student's academic efforts and so is expected to demonstrate original and independent research activity and be a significant contribution to knowledge.

Upon the successful defense of their dissertation proposal, the student is required to submit an application to the UT Arlington's Institutional Review Board if their research involves human subjects. Detailed information on the application process is available at: UTA's Human Subjects Research (<http://www.uta.edu/research/administration/departments/rs/human-subjects-irb>)

Doctoral students must enroll in a minimum of 3 dissertation hours (PUAD 6399 DISSERTATION) every long semester (Fall & Spring). The student must accumulate a minimum of nine dissertation hours to graduate. Once the student's committee has reviewed the completed dissertation and agree that the student is ready to defend, the student enrolls in PUAD 7399 DOCTORAL DEGREE COMPLETION in the term designated as their completion term. Students may designate only one term as the completion term. Doctoral students who do not graduate at the end of their completion term will receive a grade of R, W or F and must enroll in a minimum of 6 hours of dissertation research (PUAD 6699 DISSERTATION or PUAD 6999 DISSERTATION) every term until graduation.

The Graduate School offers Dissertation Seminars each semester and encourages all Dissertation students to attend.

The dissertation defense is a public oral examination open to all members (faculty, students and invited guests) of the University community. Questioning of the candidate will be directed by the student's dissertation committee. All members of the student's committee must be present at the defense. Although the defense is concerned primarily with the dissertation research and its interpretation, the examining committee may explore the student's knowledge of areas relevant to the core of the dissertation problem.

The dissertation defense may result in a decision that the candidate has:

1. passed unconditionally;
2. passed conditionally with remedial work specified by the committee;
3. failed, with permission to be re-examined after a specified period; or
4. failed and dismissed from the program.

The dissertation must be approved unanimously by the student's dissertation supervising committee and by the Dean of Graduate Studies.

Certificate in Urban Nonprofit Management

The Urban Nonprofit Management Certificate provides in-depth management training to nonprofit managers, staff, board members and volunteers to strengthen their management skills, administrative systems, and service delivery programs.

Students from any department or discipline may elect to complete the certificate program. Upon completion, students will be prepared to assume key roles in any nonprofit institution.

The certificate requires completion of URPA 5354 NONPROFIT MANAGEMENT AND SOCIAL ENTREPRENEURSHIP and URPA 5355 NONPROFIT ORGANIZATIONS IN PUBLIC POLICY as well as three additional courses to be selected by the student with approval of the Urban Nonprofit Management certificate program advisor. Examples of courses that would be approved include:

URPA 5303	THE METROPLEX: SURVEY OF URBAN AFFAIRS, PLANNING, ADMINISTRATION:	3
URPA 5329	FINANCIAL MANAGEMENT IN THE PUBLIC AND NON-PROFIT SERVICES	3
URPA 5351	HUMAN RESOURCE MANAGEMENT IN GOVERNMENT AND NON-PROFITS	3
URPA 5392	TOPICS IN URBAN MANAGEMENT	3
CIRP 5319	AGENCIES OF PLANNING AND ADMINISTRATION	3
CIRP 5312	STRATEGIC MGT AND PLANNING IN PUBLIC AND NON-PROFIT SERVICES	3
CIRP 5324	COMMUNITY DEVELOPMENT	3
CIRP 5306	URBAN REVITALIZATION	3
SOCW 5303	FOUNDATIONS OF SOCIAL POLICY AND SERVICES	3
MARK 5311	MARKETING	3

Students who are already enrolled in a graduate degree program at U.T. Arlington need only declare their intent to enroll by submitting the appropriate application form to Dr. Edith Barrett, the Urban Nonprofit Management Certificate Advisor. No prerequisite requirements are essential for these students.

Students who desire only to enroll in the Urban Nonprofit Management Certificate program but NOT in a graduate degree program may apply for admission to UT Arlington as a special student or "non-degree seeking" student. An undergraduate degree and grade point average of 3.0 shall be required. A GRE (graduate record examination) score and letters of recommendation are not necessary for admission to the Urban Nonprofit Management Certificate program. Any student that later seeks a graduate degree in a UT Arlington college or school may apply nine hours of coursework toward that degree within six years of completion and award of the Urban Nonprofit Management Certificate and by petition to the Graduate School through her or his prospective academic department. The acceptance or waiver of the remaining six hours taken as part of the requirements for the award of the Urban Nonprofit Management Certificate is at the discretion of each department.

Graduate students in any degree program at UT Arlington may register for Urban Nonprofit Management courses using standard registration procedures. It should be noted that class slots in the two core courses would be reserved for all of those Urban Nonprofit Management Certificate program participants who are accepted. Urban Nonprofit Management program students who are enrolled in other academic schools or colleges must obtain written course approval from their respective graduate advisors.

Professionals who desire to enroll in any or both of the core courses for continuing education hours may do so as special students. If at a later date these students decide to apply for the Urban Nonprofit Management Certificate program, the hours already taken as continuing education will be applied (within six years of completion of the courses) to the certificate program requirements.

Graduate Certificate in Public Budgeting and Financial Management

Sound fiscal management at all levels of government is essential for meeting the demands of an increasingly expensive and complex service-delivery need. The purpose of this graduate certificate is provide students interested in public sector affairs and local government officials (budgeters, planners, finance analysts, and elected officials) with the skills to enable them to effectively support local government financial decision-making. Participants should expect to attain a comprehensive understanding of public budgeting and financial management practices and theories including knowledge of the various government revenue sources, major expenditures, and borrowing mechanisms used to finance long-life capital assets.

Students wishing to enroll only in the Graduate Certificate in Public Budgeting and Financial Management (certificate) but NOT to a graduate degree program may apply for admission to UT Arlington as a non-degree seeking student. A Bachelor's degree with a GPA of 2.8 in the last 60 hours of undergraduate coursework is required for admission through the Graduate School. Students with GPAs lower than 2.8 may be recommended for admission by Alejandro Rodriguez, Ph.D., the Certificate Advisor, based on the following admission enhancing factors:

1. the applicant's work experience and level of responsibility;
2. undergraduate degree in economics, financial management, accounting, or other closely related field; and
3. two letters of recommendation.

Students already enrolled in a Master's degree program at UT Arlington may enroll by submitting the appropriate application form to the program manager and his or her academic graduate advisor. Students who have completed a Master's degree may apply for admission to UT Arlington as a non-degree seeking student. In either case, a minimum GPA of 3.0 in Master's degree work is required.

Participants must satisfactorily complete three required core courses and two elective courses from an approved list of elective courses, or by permission of the program advisor. Students shall be awarded the Graduate Certificate for Public Budgeting and Financial Management by the School of Urban and Public Affairs and the Graduate School upon satisfactory completion of the certificate requirements and a grade point average of 3.0.

Core Courses (Required)

URPA 5326	PUBLIC BUDGETING ¹	3
URPA 5332	CAPITAL BUDGETING IN PUBLIC MANAGEMENT ¹	3
URPA 5329	FINANCIAL MANAGEMENT IN THE PUBLIC AND NON-PROFIT SERVICES	3

Elective Courses

Select two of the following:			6
URPA 5302	FOUNDATIONS OF URBAN RESEARCH AND ANALYSIS		
URPA 5345	EVALUATION RESEARCH		
URPA 5310	URBAN POLICY AND THE LAW		
URPA 5312	ECONOMIC POLICY		
URPA 5324	URBAN PUBLIC FINANCE		
URPA 5306	THE URBAN ECONOMY		
URPA 5333	GOVERNMENTAL AND NONPROFIT ACCOUNTING		

Students who later seek graduate degrees at UT Arlington may apply 12 hours of certificate coursework within six years of completion and award of the certificate, with approval of the appropriate Graduate Studies Committee and the Dean of the Graduate School. Non-degree seeking students in the certificate program desiring to seek a degree must meet all admission requirements of the degree program.

Urban Affairs and Policy

Degrees Offered

- Urban Affairs and Policy, M.A.

Master of Urban Affairs & Policy

The Master of Urban Affairs and Policy (MUAP) prepares students for challenging careers in the development, implementation and evaluation of policies that require both the comprehension of complex urban issues and the application of tangible solutions. The program is organized around select public policy issues that focus on the economic/community development, environmental or healthcare challenges in the urban milieu. Because urban issues are complex, the program is interdisciplinary in character, curriculum content, and faculty. It provides a stimulating and inclusive environment for intellectual curiosity, rigorous inquiry and creativity and for developing new knowledge and putting it to work in the service of environmentally and economically sustainable healthy urban communities to ultimately improve the quality of life. It is designed to attract candidates that have technical expertise but desire to advance their knowledge of the dynamics of public policy in twenty-first century metropolitan regions. Students develop the knowledge and skills needed to analyze, question, challenge and shape urban policy. They draw on a core of economics, political science and sociology to analyze and interpret multiple types of data in order to critically evaluate problems and provide alternative courses of action.

Admission Requirements

The Masters in Urban Affairs and Policy program takes a holistic approach to the application review process. Each applicant's file is reviewed individually with equal consideration given to the quantitative and qualitative aspects of the student's record. A complete application includes:

- Graduate Record Exam (GRE) score: Writing (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements)
- Undergraduate Grade Point Average (GPA): The undergraduate GPA based on the last 60 hours of course work as calculated by the Graduate School from the official transcript.
- Graduate Record Exam (GRE) scores: Verbal and Quantitative (Exceptions: Outstanding UT Arlington graduates may qualify for GRE waiver providing they meet certain requirements)
- Letters of Recommendation attesting to the applicant's potential to do Master's-level work and complete the program. Letters for Master's programs should be from professors or supervisors at work (download Letter of Recommendation form)

- Essay by applicant approximately one double-spaced page in length (approximately 250 words). The Essay is considered both for its content and quality of writing. The Essay should address the following questions: 1. Why do you want to earn a Master's degree in the program for which you are applying? 2. What relevant background and experience do you bring to the program? The essay can also include other concerns you'd like to bring to the attention of the Graduate Advisor or Master's Admissions Committee.
- Non-native English speakers only: TOEFL or IELTS scores (Exceptions: An applicant holding either a Bachelor's or a Master's degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, or IELTS score for admission purposes.)

WAIVER

1. Submission of GRE scores may be waived for applicants to SUPA master's programs who hold a bachelor's degree from UTA with a 3.0 or higher GPA in their last 60 hours as calculated by the Graduate School.
2. Submissions of TOEFL or IELTS scores may be waived for applicants to SUPA master's programs who hold a Bachelor's or Master's degree from a regionally accredited U.S. college or university.

TYPES OF ADMISSION

Unconditional Admission

1. Applicants who meet all the following requirements will be considered for unconditional admission: a preferred minimum Writing GRE score of 4.0
2. Minimum Undergraduate GPA of 3.0
3. A preferred minimum Verbal GRE score of 450 (Revised GRE Test: 150), and preferred minimum Quantitative GRE of 450 (Revised GRE Test: 141), and a preferred minimum combined Verbal and Quantitative score of 1,000 (Revised Test Combined 291)
4. Outstanding letters of recommendation
5. Strong, well-written personal essay
6. Non-native English speakers only: TOEFL scores of at least 550 (paper-based), 213 (computer-based), or 79 (iBT) with sectional scores that meet or exceed 22 Writing, 21 Speaking, 20 Reading, and 16 Listening; or, IELTS score of at least 6.5.

Probationary Admission

Applicants who do not meet all requirements for Unconditional admission will be considered for Probationary admission on the basis of the strength of all the listed admission factors. Test scores will not constitute the sole or primary basis for ending consideration of an applicant. Under Probationary admission, special course requirements or other conditions may be imposed by the SUPA Master's Admissions Committee. Applicants who meet all the standards for Unconditional admission except for deficiency in Writing GRE score will be considered for Probationary Admission conditional on completing an approved Writing course in their first semester.

Other types of admission decisions pertaining to Master's applicants:

1. **Deferred:** Applicants who are unable to supply required application materials, or who must complete additional preparatory work before their admissibility can be determined, may be deferred until records are complete.
2. **Provisional:** Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be granted Provisional admission pending submission of complete and satisfactory credentials before the start of classes in which they have registered in a Provisional status.
3. **Denied:** Applicants who fail to meet more than one of the admission requirements and for whom the SUPA Master's Admission Committee finds there is insufficient basis to justify any other kind of admission will be Denied admission. As the admission process is competitive, applicants meeting basic admission requirements who are less well qualified than other applicants may also be denied admission.

SCHOLARSHIP/FELLOWSHIP CRITERIA

- Graduate students with a GPA of 3.0 or better who are enrolled in six hours or more are eligible to apply for competitive scholarships and fellowships.
- Scholarships and fellowships for Master's and Doctoral students will be competitively awarded based on consideration of the all admission criteria assessed by their admitting programs.

SUPA INADEQUATE ACADEMIC PROGRESS POINT SYSTEM

A student may be subject to dismissal from the program if they accumulate 4 deficiency points while pursuing their Master's degree or their Ph.D. degree. Deficiency points may not be removed from a student's record by repeating a course or completing additional coursework. For students who complete a Master's degree in SUPA and proceed to work on a SUPA Ph.D., any accumulated deficiency points are not carried forward to the more advanced degree.

D = 2 deficiency points

F = 3 deficiency points

I = 1 deficiency point

W = 0.5 deficiency point

DEGREE REQUIREMENTS AND COURSES

Dual Degree Program

Students in Urban Affairs and Policy may participate in a dual degree program whereby they can earn a Master of Urban Affairs and Policy and a Master of Science in Social Work, or Master's in City and Regional Planning, or a Master's in Public Administration. By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from nine to 18 hours, subject to the approval of Graduate Advisors from both programs. To participate in the dual degree program, students must make separate application to each program and must submit a separate Program of Work for each degree. Those interested in the dual degree program should consult the appropriate Graduate Advisor(s) for further information on course requirements. See also the statement on "Dual Degree Programs" in the general admission section of this catalog.

College of Business

Overview

Since its origination in 1965, the College of Business has been one of the fastest growing business schools in the nation. This growth has mirrored the dynamic growth of the D/FW Metroplex as the college has worked hard to provide high quality educational programs. The college is organized into six academic departments: Accounting, Economics, Finance, Information Systems and Operations Management, Management, and Marketing. A total of 103 full-time equivalent faculty organize and conduct classes, including 88 with doctoral degrees from some of the top schools in the nation. The college currently enrolls 5,500 students, of whom more than 1,500 are enrolled in 12 graduate business programs.

Teaching, research, and community service are the essential activities of the College of Business. All three activities are aimed at enhancing the college's scholarly environment and strengthening relationships with the business community. The emphasis on excellence in the performance of these cornerstone activities enables the college to offer an outstanding business education for students over a broad spectrum of interest, age, and experience.

Mission, Vision and Values

The mission of the College of Business is to create and disseminate knowledge that engages the business community and positively impacts society. The College seeks to be ranked among the top business schools in the nation.

As its vision, the College develops recognized business thought-leaders who create value and enrich the world. Faculty, students and graduates of the College are functioning as thought-leaders for better understanding the economies of the enterprise, effectively managing its resources and producing results for goal accomplishment.

Five values form much of the foundation upon which the College operates on a daily basis in developing and offering degree programs, linking faculty and students to the business and professional communities, and conducting relevant research to advance business practices and enhance the performance of business and other organizations. These values are:

Integrity – We do the right thing, always being honest, transparent and accountable.

Respect - We treat all people in a way that affirms their individual uniqueness, worth and dignity.

Diversity – We pursue an inclusive environment where individual differences create value.

Excellence – We continually strive to achieve the highest levels of performance in all our endeavors.

Collaboration – We team with internal and external partners to create and accomplish shared goals.

Accreditation

The University of Texas at Arlington's College of Business is fully accredited in business and accounting at both the undergraduate and graduate levels by the AACSB-International – The Association to Advance Collegiate Schools of Business.

Business Undergraduate Advising Center

107 Business Building
817-272-3368
www.uta.edu/business/ugadvise/

Each student in the College of Business has access to a professional academic advisor for educational and vocational guidance. The advising process is designed to assist students as they make important decisions related to their academic progress at UT-Arlington and career goals in general.

Specifically, the purpose of advising is:

- To empower students to clarify and achieve their educational goals by providing timely and accurate information about degree requirements, as well as College and University policies and procedures.
- To provide every business student with the opportunity to develop a relationship with a knowledgeable advisor in order to obtain sound academic advising with a degree of continuity.
- To provide students with information about additional services, programs, and support systems available within the College and University as appropriate.

Ultimately, the student is responsible for seeking academic advice, making decisions regarding goals, meeting degree requirements, and enrolling in appropriate courses. The academic advisor is to provide assistance and help in these decisions. All students are responsible for understanding and complying with University and College policies and procedures.

The Advising Center is located on the first floor of the Business Building, Suite 107 and operates on an appointment basis. Please contact the Center by calling 817.272.3368 between the hours of 8:00 am and 5:00 pm, Monday through Friday.

Graduate Business Services

107 Business Building
817-272-3004/3005

<http://www.uta.edu/business/gradbiz>

Graduate Business Services (GBS) provides information to assist students with various issues relating to their graduate business education. Prospective students, current students and graduating students can contact GBS for general information, assistance with understanding graduate program rules and admission status. Specific advising questions are addressed to the program advisor.

The office is located on the first floor of the Business Building, Suite 107. Please contact GBS by calling 817.272.3004/3005 between the hours of 8:00 am and 5:00 pm, Monday through Friday. While the University is in session, the office has extended hours Monday through Thursday from 8:00 am to 6:46 pm.

Goolsby Leadership Academy

304 Business Building
817-272-3085
www.uta.edu/goolsby
goolsbyacademy@uta.edu

The Goolsby Leadership Academy was established in 2003 with a gift from an anonymous donor in honor of John and Judy Goolsby. John Goolsby is a 1964 graduate of the College of Business with a degree in accounting. Much of his executive career was spent as CEO of the Howard Hughes Corporation. The mission of the Academy is to educate the nation's future leaders and ensure they are prepared for the multiple, myriad challenges and opportunities they will face. The Academy is focused on the tenets of personal integrity and "strength based" leadership. Simply put, strength based leadership involves building on the strengths that the individual already possesses, to enhance their leadership skills and abilities. Today's current and emerging leaders need to understand how to apply and reap the benefits of leadership strategies and practices. The Goolsby Leadership Academy currently provides a select group of undergraduate students with rigorous training in:

- Developing innate leadership skills
- Management and decision making
- Emotional intelligence and motivation
- Ethics and personal integrity
- Goal setting and outcome measurement
- Performance measurement and employee evaluation
- Group dynamics and team building

As part of their major course work, Goolsby students receive customized leadership education designed to transform leadership potential into leadership reality. At the heart of the student development experience are leadership courses, testing to help each student identify their own leadership strengths and challenges, specialized preparation for entering the work force, and extensive interaction with leading executives from the Dallas/Fort Worth Metroplex.

Students typically apply during the Spring semester of their Sophomore year. The two year program starts in the Fall of their junior year. Each student accepted into the program receives a significant scholarship for each of the two years. The application, application process, and qualifications for consideration may be found on the Academy's website. Academy administrators include the Associate Dean, Dr. David Mack, who serves as the Director of the Academy and Ms. Rebecca Neilson, who serves as the Assistant Director.

Goolsby Scholars are encouraged to apply for admission to the Honors College. Each of the required Goolsby courses qualifies for Honors College credit. For more information, please visit the Honors College website.

Undergraduate Degree Programs

To attain these objectives, guidelines have been developed to provide minimum coverage of the basic areas of human knowledge and exposure to the fundamentals in each of the functional areas of business.

There are two major degree programs, each developed within the frame of reference described above. The first is the Bachelor of Business Administration (B.B.A.) Degree, with subject area concentrations in finance, information systems, management, marketing, operations management, real estate, or economics. A minor is not required or allowed for any B.B.A. The B.B.A. (Accounting) degree, while adhering to the basic philosophy outlined, permits a maximum 27 semester hour concentration in accounting. Thus, in addition to acquiring excellent preparation for a management career in industry, a student may also pursue professional objectives leading to a career in private, governmental, or public accounting. The B.B.A. in International

Business is a dual concentration program requiring specific international business course work and 26 to 32 hours in one modern language (French, German, Russian, or Spanish). The second major degree program is a Bachelor of Science (B.S.). A B.S. degree in accounting is offered for students planning a career in professional accounting who also desire in-depth study in a related business discipline such as economics, finance, or information systems. This degree program permits a maximum 27 semester hour concentration in accounting and, depending on the area, 15 to 24 semester hours in a related business discipline. A B.S. degree in information systems is offered for the student planning a professional career in business information systems. A B.S. degree in economics is also offered for the benefit of the student planning a career as a professional economist; a minor is required for degree completion. The requirements for the B.B.A. in International Business are found later in this section. The requirements for the additional B.B.A. degree programs and the B.S. degree programs are found in their respective departmental sections.

Undergraduate Admission Policy

ADMISSION TO THE COLLEGE OF BUSINESS

Admission to the College of Business as a business-intended student is based on the University's undergraduate admission requirements plus the following additional admission criteria for the College of Business.

Students Entering Directly from High School

Students entering directly from high school or with less than 24 hours of transfer credit will be evaluated on the basis of the following admission criteria:

- Meeting the UT Arlington admission requirements.

Students Entering with Transfer Credit

Transfer students with less than 24 hours of transferable credit are admitted under the criteria for students entering directly from high school as stated above.

Transfer students with 24 hours of more of transferable credit will be evaluated on the basis of the following admission criteria:

- Meeting the UT Arlington admission requirements,
- Transfer GPA at the point of admission to UT Arlington calculated on all college coursework, and
- Progress of the College of Business (CoB) undergraduate math requirement. (The CoB math requirement includes MATH 1315 COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS and MATH 1316 MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS, or equivalent courses as transfer credits.)

Probationary Business Majors: Students with lower than 2.75 transfer GPA on all courses completed and/or CoB math requirement incomplete will be considered probationary admits to the College of Business and will be placed in the Probationary Business (PBUSINT) major. A performance contract will be implemented for the first semester to determine if the student may continue in the College of Business.

Undeclared Business Majors: Students with a 2.75 transfer GPA on all courses completed and the CoB math requirement completed will be admitted to Undeclared Business Intended (UBUSINT). These students will have no restrictions and will be monitored for progress toward the Business Degree Program Admission standards as follows.

ADMISSION TO A COLLEGE OF BUSINESS DEGREE PROGRAM

Direct Admission Criteria

Business-intended students who have completed 30 or more hours of transferable college credit will be directly admitted to a business major based on the following criteria:

- Students must meet all UT Arlington admission requirements and
- Students must have a grade point average of 3.25 or better for all college level credit earned.

In addition to meeting the criteria stated above, students must attend a Business Success Workshop. Students are notified about the workshop in writing.

Applicants Who Do Not Meet Direct Admission Criteria

Academic performance of all business-intended students is monitored for progress toward meeting the following Degree Program Admission Requirements. To declare a major, a business-intended student must meet the following criteria:

- Complete twelve (12) hours of business course work at UT Arlington;
- An overall grade point average of 2.25 at UT Arlington;
- A business grade point average of 2.50 at UT Arlington; and
- Completion of the CoB math requirement. (The CoB math requirement includes MATH 1315 COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS and MATH 1316 MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS, or equivalent courses as transfer credits.)

College of Business Probation and Dismissal

If at any time a business-intended student does not meet the above standards, the student is on College of Business Probation. If the Admission Criteria can be met by eighteen (18) hours of business coursework at UT-Arlington, the student may be allowed to continue as a business-intended major up to the semester containing the eighteenth hour of business course work under an enrollment contract. Depending on the circumstances, a student on CoB probation may have restrictions on course load, course selection, and will be given specific course grade requirements that must be met. All business hours will be used to calculate a business grade point average for the CoB admission purposes.

Students who do not meet the requirements for declaring a business major after eighteen (18) hours of business course work or do not meet the requirements outlined in the enrollment contract will not be allowed to take additional business courses at UT Arlington. The student will be dismissed from the CoB and must choose a major other than business in order to remain enrolled at UT Arlington.

Degree Progress and Major Dismissal

Students who have been accepted to a business degree program must maintain satisfactory progress in their field of study (major). Declared business majors are subject to dismissal from a business degree program and will not be permitted to enroll for additional courses in that major if they:

- Receive a grade of D or F in more than one upper level major course, or
- Receive any combination of grades of D or F in two attempts of the same major course.

Course Transfer Policy

The College of Business has the authority for determining which transfer courses apply toward any undergraduate business degree program or business minor. Students transferring business classes taken at another institution will be required to submit both a catalog course description and a syllabus for each course to the Business Undergraduate Advising Center for approval.

Permission through the College of Business Transfer Credit Approval Form is required **before** a student can take courses outside of UT Arlington for credit transfer. Courses should be completed at the same level (freshman, sophomore, junior, senior) as the UT Arlington course. A course completed at the freshman or sophomore level at another institution will not be considered an equivalent of an upper level (junior or senior) course or degree requirement. Upper level business courses must be completed at an AACSB accredited institution. Transfer credit for courses from institutions outside the United States will be evaluated independently.

College of Business Residency and Graduation Requirements

In addition to meeting the credit hour and course requirements for a specific College of Business degree program, the student must meet the following requirements:

- Be a declared business major;
- A minimum overall grade point average of 2.0;
- A minimum grade point average of 2.0 in all course work taken from the College of Business;
- A minimum grade point average of 2.0 for courses taken within the major/concentration area for those majors having a concentration (This requirement also applies to modern language course work for International Business degree programs);
- Students must complete at least 50 percent of their business course work with the UT Arlington College of Business;
- Students must complete at least 24 of the last 30 semester hours of advanced (3000/4000 level) course work with the UT Arlington College of Business, to include a minimum of 12 hours of advanced courses in their major/concentration subject area beyond business core requirements; and
- A grade of "C" or better must be earned in all major/concentration courses required for the degree.

Computer Literacy and Oral Competency

Students majoring in business administration obtain competencies in computer literacy and oral presentation via required course work. They are required to take a computer course, INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING. Students are also required to take an oral communication course, COMS 1301 FUNDAMENTALS OF PUBLIC SPEAKING, or COMS 2305 BUSINESS AND PROFESSIONAL COMMUNICATION

Special Undergraduate Programs and Opportunities

DOUBLE MAJORS

The College of Business allows select Bachelor of Business Administration (BBA) programs to be combined resulting in a degree with a double major. If all specified requirements are completed at the same time as outlined in the departmental sections of the University Catalog, one diploma recognizing both business majors will be awarded. These may restrict the option of participating in a Fast Track or Certificate program. The double majors available to business students in the College of Business are:

- BBA in Accounting and Finance
- BBA in Accounting and Information Systems

- BBA in Economics and Finance
- BBA in Management and Marketing

BUSINESS HONORS PROGRAM

The Business Honors Program (BHP) operates as a part of UT Arlington's Honors College. Its primary objective is to establish a cohesive community of exceptionally intelligent and motivated students who will pursue the study of business together in a stimulating learning environment. Participation in the BHP is open to students who maintain a total cumulative grade point average of 3.2 or higher. Students who complete the program successfully will receive a special citation on their diplomas. The University honors degree requirements are compatible with all College of Business degree programs.

INTERNSHIP FOR DEGREE CREDIT

One approved internship can be used as an advanced business elective for eligible students. Students must be a declared business major, junior or senior standing, have an overall UT Arlington GPA of 2.5 or better, have 3 hours of advanced business electives available, and complete the approval forms before the appropriate semester deadline.

The internship must be related to the student's major and is graded on a pass/fail basis. No credit will be given for previous experience or activities. For specific course requirements, refer to the internship approval forms. If a change of major occurs, the internship no longer applies to the degree.

SALES CERTIFICATE PROGRAM

The Sales Certificate program prepares undergraduate students for a challenging and rewarding career in the sales profession. The program will enhance students' abilities to sell themselves, their ideas, products, and services. It also equips students with knowledge and skills related to managing mutually beneficial relationships with customers. The Sales Certificate is available to business and non-business majors. Certificate requirements can be found in the Department of Marketing section of the catalog.

FAST TRACK MASTER'S DEGREES IN ACCOUNTING

This program emphasizes preparation for a career as a professional accountant, including preparation for the Certified Public Accountant designation. Most states, including Texas, require completion of at least 150 semester hours of college study of which at least 37 semester hours must be in accounting in order for an individual to be licensed as a Certified Public Accountant. The Fast Track Program in Accounting is designed to fulfill these requirements and enable outstanding senior undergraduate Accounting students to satisfy degree requirements leading to a Master's of Science in Accounting or a Master's of Science in Taxation while completing their undergraduate studies and thereby completing fewer courses to earn both undergraduate and graduate degrees in accounting.

An undergraduate Accounting student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed 12 hours of specified undergraduate Fast Track foundation courses with a minimum GPA of 3.5 in these courses. These courses are mandatory and must be completed at UT Arlington. The foundation courses required for admission to the various Fast Track programs are:

ACCT 3311	FINANCIAL ACCOUNTING I	3
ACCT 3312	FINANCIAL ACCOUNTING II	3
FINA 3313	BUSINESS FINANCE	3
BSTAT 3321	BUSINESS STATISTICS I (whichever is taken first at UTA)	3
or BSTAT 3322	BUSINESS STATISTICS II	
Total Hours		12

Once admitted, a student will be allowed to take select graduate courses that may be used to satisfy both bachelor's and master's degree requirements. These students will be allowed to enroll in Auditing, Effective Business Communication, and an Accounting elective at the graduate level and these courses should not be completed as an undergraduate.

An undergraduate student who successfully completes the Fast Track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to the Graduate School at that time. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

For more details about this program, please consult the graduate accounting advisor (graduate.accounting.advisor@uta.edu).

FAST TRACK MASTER'S DEGREES IN BUSINESS

Fast Track Programs enable outstanding senior undergraduate Business students to satisfy degree requirements leading to select master's degrees in business while completing their undergraduate studies.

An undergraduate Business student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.2 or better
- with an overall GPA of 3.2 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed 12 hours of specified undergraduate Fast Track foundation courses with a minimum GPA of 3.5 in these courses. These courses are mandatory and must be completed at UT Arlington. The foundation courses required for admission to the various Fast Track programs are:

MBA or MS-INSY or MS-HR

ECON 3310	MICROECONOMICS (first completed at UTA)	3
or ECON 3312	MACROECONOMICS	
FINA 3313	BUSINESS FINANCE	3
MANA 3318	MANAGING ORGANIZATIONAL BEHAVIOR	3
BSTAT 3321	BUSINESS STATISTICS I (first completed at UTA)	3
or BSTAT 3322	BUSINESS STATISTICS II	
Total Hours		12

MS-REAE

ECON 3310	MICROECONOMICS (first completed at UTA)	3
or ECON 3312	MACROECONOMICS	
FINA 3313	BUSINESS FINANCE	3
REAE 3325	REAL ESTATE FUNDAMENTALS	3
BSTAT 3321	BUSINESS STATISTICS I (first completed at UTA)	3
or BSTAT 3322	BUSINESS STATISTICS II	
Total Hours		12

MA-ECON

ECON 3310	MICROECONOMICS	3
ECON 3312	MACROECONOMICS	3
FINA 3313	BUSINESS FINANCE	3
BSTAT 3321	BUSINESS STATISTICS I (first completed at UTA)	3
or BSTAT 3322	BUSINESS STATISTICS II	
Total Hours		12

Once admitted, a student will be allowed to take select graduate courses that may be used to satisfy both bachelor's and master's degree requirements.

An undergraduate student who successfully completes the Fast Track graduate coursework with grades of B or better will graduate with the undergraduate degree will be automatically admitted to the Graduate School at that time. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

For more details about this program, please refer the appropriate graduate advisor.

PROFESSIONAL PROGRAM IN ACCOUNTING (PPIA)

This program emphasizes preparation for a career as a professional accountant, including preparation for the Certified Public Accountant designation. Most states, including Texas, require completion of at least 150 semester hours of college study, of which at least 36 semester hours must be in accounting for an individual to be licensed as a Certified Public Accountant. The Professional Program in Accounting (PPIA) is designed to fulfill these requirements and allow the simultaneous granting of a bachelor's degree and a master's degree. Students accepted into the PPIA program generally complete fewer courses to earn both degrees than non-participants.

After completing ACCT 3311 with a B or better, interested persons should consult with the undergraduate accounting advisor to review eligibility requirements and the application process. Students admitted to the program will complete a plan of study that results in the fulfillment of requirements for the bachelor's degree (excluding BCOM 3360 and the undergraduate Advanced Accounting Elective, which are waived and completed at the graduate level) and sufficient additional graduate course work to fulfill the requirements for the Master of Science in Accounting degree or the Master of Science in Taxation degree.

Applications for admission to PPIA are reviewed individually with consideration given to the following criteria:

- Undergraduate grade point average (GPA)
- Accounting grade point average (GPA)
- GMAT score
- Professional work experience
- Personal accomplishments
- Personal Statement and Letters of Reference

For details about the application process and deadlines consult the Department of Accounting Graduate Program section of the University Catalog or the Department of Accounting website, www.uta.edu/accounting.

Requirements for a Bachelor of Business Administration in International Business/ Modern Language

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Pre-Professional Course Requirements - Fulfill the University General Core Requirements (36 hours)		
General Core Requirements (p. 93)		39
Communication (minimum 6 hours required)		
ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
Mathematics (minimum 6 hours required)		
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	3
MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	3
Life and Physical Sciences (minimum 6 hours required)		6
From Approved University General Core Requirement List		
Language, Philosophy & Culture (minimum 3 hours required)		
Satisfied by Modern Language Level IV (See Modern Language Options below)		
Creative Arts		3
From Approved University General Core Requirement List		
US History (minimum 6 hours required)		
HIST 1311	HISTORY OF THE UNITED STATES TO 1865	3
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	3
Government/Political Science (minimum 6 hours required)		
POLS 2311	GOVERNMENT OF THE UNITED STATES	3
POLS 2312	STATE AND LOCAL GOVERNMENT	3
Social & Behavioral Sciences (minimum 3 hours required)		
Satisfied by completion of ECON 2305 in the Business Core		
Foundational Component Area (minimum 3 hours required)		
COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING	3
Professional Course Requirements - Business Core (36 hours)		
ACCT 2301	PRINCIPLES OF ACCOUNTING I	3
ACCT 2302	PRINCIPLES OF ACCOUNTING II	3
ECON 2305	PRINCIPLES OF MACROECONOMICS (Social & Behavioral Sciences University Core Requirement)	3
ECON 2306	PRINCIPLES OF MICROECONOMICS	3

BLAW 4310	BASIC INTERNATIONAL LAW FOR BUSINESS	3
Select one of the following:		3
ECON 4306	COMPARATIVE ECONOMIC SYSTEMS	
ECON 4321	INTERNATIONAL TRADE	
ECON 4322	INTERNATIONAL FINANCE	
FINA 4324	INTERNATIONAL CORPORATE FINANCE	3
MANA 4321	INTERNATIONAL MANAGEMENT	3
MARK 4325	INTERNATIONAL MARKETING	3
Modern Language Requirements (26 hours)		
Select one of the following areas (beyond all other requirements):		26
French		
German		
Russian		
Spanish		
See Modern Language Options section below for specific courses		
Advanced Electives (9 hours)		
Upper level, advisor approved electives. (Students are encouraged to include six hours of degree specific language in this area.)		9
Total Hours		119

Students are strongly encouraged to study abroad. The College of Business, the Department of Modern Languages, and the International Office currently work together in assisting student participation in existing exchange programs. Furthermore, the University will continue to develop exchange agreements with other recognized international universities.

MODERN LANGUAGE OPTIONS

French

Students concentrating in International Business/French should be certain they meet the requirements specified previously under the heading Requirements for a Bachelor of Business Administration Degree. Within the framework of these conditions, a student must complete:

FREN 1441	BEGINNING FRENCH I ¹	4
FREN 1442	BEGINNING FRENCH II ¹	4
FREN 2313	INTERMEDIATE FRENCH I ¹	3
FREN 2314	INTERMEDIATE FRENCH II (Satisfies Language, Philosophy & Culture University General Core Requirement)	3
FREN 3300 or FREN 3303	PHONOLOGY & PRONUNCIATION ADVANCED FRENCH CONVERSATION	3
FREN 4314	ADVANCED FRENCH GRAMMAR AND COMPOSITION	3
FREN 4334	CONTEMPORARY FRENCH CULTURE	3
FREN 4335	BUSINESS FRENCH	3
Total Hours		26

German

Students concentrating in International Business/German should be certain they meet the requirements specified previously under the heading Requirements for a Bachelor of Business Administration Degree. Within the framework of these conditions, a student must complete:

GERM 1441	BEGINNING GERMAN I ¹	4
GERM 1442	BEGINNING GERMAN II ¹	4
GERM 2313	INTERMEDIATE GERMAN I ¹	3

GERM 2314	INTERMEDIATE GERMAN II (Satisfies the Language, Philosophy & Culture University General Core Requirement)	3
GERM 3313	TOPICS IN GERMAN CULTURE & CONVERSATION	3
GERM 3314		3
GERM 4334	THE CULTURE OF BUSINESS	3
GERM 4335	BUSINESS GERMAN	3
Total Hours		26

Russian

Students concentrating in International Business/Russian should be certain they meet the requirements specified previously under the heading Requirements for a Bachelor of Business Administration Degree. Within the framework of these conditions, a student must complete:

RUSS 1441	BEGINNING RUSSIAN I ¹	4
RUSS 1442	BEGINNING RUSSIAN II ¹	4
RUSS 2313	INTERMEDIATE RUSSIAN I ¹	3
RUSS 2314	INTERMEDIATE RUSSIAN II (Satisfies the Language, Philosophy & Culture University General Core Requirement)	3
RUSS 3333	CONVERSATION AND TOPICS IN RUSSIAN CULTURE	3
RUSS 4362	RUSSIA AND THE SUCCESSOR STATES TODAY	3
RUSS 4334	THE CULTURE OF BUSINESS	3
RUSS 4335	BUSINESS RUSSIAN	3
Total Hours		26

Spanish

Students concentrating in International Business/Spanish should be certain they meet the requirements specified previously under the heading Requirements for a Bachelor of Business Administration Degree. Within the framework of these conditions, a student must complete

SPAN 1441	BEGINNING SPANISH I ¹	4
SPAN 1442	BEGINNING SPANISH II ¹	4
SPAN 2313	INTERMEDIATE SPANISH I ¹	3
SPAN 2314	INTERMEDIATE SPANISH II (Satisfies the Language, Philosophy & Culture University General Core Requirement)	3
SPAN 3311	SPANISH CULTURE AND CIVILIZATION	3
or SPAN 3312	LATIN AMERICAN CULTURE AND CIVILIZATION	
SPAN 3314	ADVANCED SPANISH GRAMMAR	3
SPAN 4334	CULTURE AND ECONOMIC GLOBALIZATION IN THE HISPANIC WORLD	3
SPAN 4335	BUSINESS SPANISH	3
Total Hours		26

Non-heritage speakers should plan to take SPAN 3303 ADVANCED SPANISH CONVERSATION as an advanced business elective. Heritage speakers should plan to take SPAN 2315 in place of SPAN 2314 and SPAN 3305 ADVANCED SPANISH FOR HERITAGE SPEAKERS in place of SPAN 3314 ADVANCED SPANISH GRAMMAR.

¹ Students will be placed in appropriate language level upon completion of a written and/or a verbal competency exam administered by the Modern Language Department.

Undergraduate Minors

The College of Business offers several minors to undergraduate Non-Business majors. The requirements for the Business Administration Minor follow. The requirements for the minors in Accounting, Economics, and Information Systems are found in their respective departmental sections.

Minor in Business Administration

The College of Business:

- Requires half of the course work for a minor in business be completed in residence at UT Arlington. For an 18-hour minor requirement, this would require a minimum of 9 hours of business course work at UT Arlington.
- Requires a grade of C or better in all minor requirement courses.
- Will not use vocational and technical courses (including WECM courses) toward any business minor.

BUSINESS ADMINISTRATION

Select three of the following:

Special Graduate Programs and Opportunities

THE GRADUATE ADVANCED STUDIES PROGRAM

This is a certificate program open to those holding a graduate degree in a business field. Applicants must meet normal MBA admissions requirements and complete 12-21 semester hours of graduate courses in a specified area. This is an excellent way for business professionals to update their business skills in advanced areas.

SPECIAL STUDENTS

An applicant can gain admission as a special student in the College of Business, but he/she must meet the same admission requirements as those unconditionally admitted. In order to take masters and/or doctoral level courses in the College of Business, a student must be admitted as a graduate student.

DUAL DEGREE PROGRAMS

The college offers a rich array of dual degree opportunities that build synergistic skill sets that prepare students for more advanced career opportunities. While most dual degree programs include two graduate business degrees, the Professional Management Option in the MBA program allows professionals with undergraduate degrees in engineering, architecture, nursing, education, and urban affairs to complete a master's degree in that field along with the MBA. Dual degree programs allow students to earn two degrees with a substantial reduction in course requirements.

FAST TRACK PROGRAMS

The Fast Track Program enables outstanding undergraduate UT Arlington Business students to satisfy degree requirements that will lead to a master's degree in Business Administration (MBA), Accounting, Human Resource Management, Taxation, Information Systems, Real Estate or Economics while completing their undergraduate studies. If admitted, students will be allowed to take select graduate courses that may be used to satisfy both bachelor's and master's degree requirements. Admitted students will be allowed to complete 6 to 9 hours of selected graduate coursework as an undergraduate student. A GPA of 3.0 in the graduate work is required to continue taking graduate courses. Any Fast Track student who completes the 6 to 9 hours of graduate coursework with grades of B or better will be automatically admitted to Graduate School. The student would then be awarded his or her bachelor's degree. The student will not be required to take the GMAT, complete the graduate application, and will have the related application fees waived.

FACILITATED ADMISSION OF OUTSTANDING UT ARLINGTON UNDERGRADUATES

The following programs participate in the Facilitated Admissions program: Master of Business Administration, Master of Science in Economics, Master of Science in Human Resource Management, Master of Science in Information Systems, Master of Science in Real Estate and Master of Science in Marketing Research. Students pursuing Facilitated Admission must demonstrate quantitative proficiency. For details on admission into the program please refer to UT Arlington's Graduate Catalog Special Admissions Programs under Admission Requirements and Procedures.

INTERNSHIP PROGRAM

Graduate students are encouraged to participate in internships to supplement and complement classroom education by providing valuable experience and training in their chosen area of expertise. Internships allow students to meet and interact with professionals in the work setting, identify and develop

critical professional skills, clarify their own career goals and interests, and develop important contacts for future development. This internship program is open to all graduate students who have completed the required number of graduate courses per their program, are in good academic standing (GPA => 3.0), and have secured their advisor's approval for up to three hours of graduate credit. Interested students should ask for a fact sheet and an application in the Graduate Business Services Office. After gaining the advisor's approval, students will complete an application and meet with the appropriate departmental internship coordinator. Once an internship is obtained, the coordinator will monitor progress and assign a Pass/Fail grade.

STUDY ABROAD/EXCHANGE PROGRAMS

The leaders for the 21st century will be deeply involved in business opportunities around the world. Study abroad/exchange programs are available to help students prepare in both curricular and extracurricular ways for these future international leadership roles. Students wishing to study abroad are encouraged to review the many opportunities contained in the Study Abroad Library in the International Office. Once a specific program is identified, students discuss the available courses with their advisor to ensure they meet degree requirements. Depending on their terms, study abroad/exchange programs may allow students to complete courses as resident credit or as transfer credit.

Waivers and Transfer Credit

There are three types of required courses: deficiency, core and advanced. Applicants may have both deficiency and core courses waived without the requirement for a substitute course if they have completed a similar course, during the last 10 years, at a recognized college or university and received a "B" or better grade (3.0) in that course or have a business degree in the same field of study.* Extensions to this 10-year limit may be granted for managers and executives who have completed educational activities to remain current or have extensive related experience. Course waivers are determined by each program's Graduate Studies Committee. Check with the program advisor for more details.

A maximum of 9 hours of advanced coursework may be transferred in from other AACSB accredited schools if approved by the program advisor. Transfer of graduate courses from other universities will be considered on a case-by-case basis. All work submitted for transfer credit must have been completed no more than six years before completion of a graduate program at the University of Texas at Arlington.

* Note: The University of Texas at Austin offer Business Foundations Programs (BFP) for non-business majors that provide solid foundations in basic business concepts. BFP courses and courses from equivalent programs for non-business majors at other colleges/universities may not be used for course waiver credit.

Doctoral Program

The objective of the Doctor of Philosophy in Business Administration degree is primarily to develop scholars with an ability to teach and conduct independent research in various areas of business administration. The program prepares students for careers as creative teachers and researchers by providing thorough preparation in both the theory and practice of business administration. The curriculum emphasizes and develops the rigorous analytical skills needed to make significant contributions in fields of business. Graduates of the program will assume significant roles in the world's educational and research institutions.

Coursework is offered in the following areas: accounting, banking and finance, business economics, business policy/strategic management, business statistics, personnel/human resource management, insurance and risk management, international business management, investments and securities, labor/industrial relations, management information systems, management sciences, marketing management and research, organizational behavior, organizational theory, production/operations management, real estate, small business management and ownership, and taxation. Coursework in these areas of study supports the following major fields: Accounting, Finance, Information Systems, Management, Marketing, and Operations Management.

Accounting

Mission of the Department

The mission of the Department of Accounting is to:

1. prepare students from diverse backgrounds for professional careers in accounting,
2. create, interpret, and disseminate knowledge of accounting, and
3. provide service to the University and accounting profession.

Accreditation

The College of Business is fully accredited by the AACSB International- The Association to Advance Collegiate Schools of Business The Department of Accounting has separate accounting accreditation by the AACSB. The department is also a member of the Federation of Schools of Accountancy, an organization to promote and support high quality accredited graduate programs in accounting.

Scholastic Activity and Research Interests of the Faculty

The Department of Accounting values strong academic scholarship. The faculty are involved in a broad spectrum of pure and applied research that are publishable in top tier journals such as The Accounting Review, Journal of Accounting Research and Journal of Accounting and Economics, and in practitioner journals such as The CPA Journal, Journal of Accountancy, among others. Many of the faculty also have professional certifications and

years of experience in the business world, including serving as consultants, expert witnesses, and in other professional capacities. They actively engage in research that enables them to be at the forefront of the discovery of new knowledge in their fields. All these activities allow them to bring academic and professional experiences to enhance the quality of teaching in the classroom.

Careers in Accounting

Accountants serve as analysts, consultants, and problem-solvers in business and government. Earning an accounting degree opens up a diverse array of career opportunities including: partner in an international accounting or consulting firm, corporate controller, chief financial officer, director of internal auditing, financial planner, or commercial lender. Compensation is highly competitive with excellent geographic mobility. Upward career mobility is outstanding.

Students of accounting learn to use and control information technology systems, prepare and analyze financial reports, structure business transactions, and develop effective business plans. Individuals who like being challenged by a variety of situations and technologies and who enjoy identifying, analyzing, and solving problems are well-suited to majoring in accounting.

Accounting - Graduate Programs

Objective

The objective of the Master of Professional Accounting, the Master of Science in Accounting, and the Master of Science in Taxation degree programs is to prepare students for professional careers in the public, private, or governmental sector. As a part of this objective, these programs are designed to provide the educational background to become a Certified Public Accountant or to attain other professional certifications. The MPA program, appropriate for students without significant prior study in accounting, is also designed to provide an understanding of selected fields such as management, finance, economics, and business law. The MS in Accounting and MS in Taxation are more specialized degrees which build on the individual's prior background in accounting and business-related subjects.

The department also offers a Certificate in Taxation. The objective of this certificate program is to serve degreed professionals who wish to update or add to their knowledge of taxation.

Careers in Accounting

Accounting is a career without limits. Accountants serve as analysts, consultants, and problem-solvers in business and government. Earning an accounting degree opens up a diverse array of career opportunities including: partner in an international accounting or consulting firm, corporate controller, chief financial officer, director of internal auditing, financial planner, or commercial lender. Compensation is highly competitive with excellent geographic mobility.

Students of accounting learn to use and control information technology systems, prepare and analyze financial reports, structure business transactions, and develop effective business plans. Individuals who like being challenged by a variety of situations and technologies and who enjoy identifying, analyzing, and solving problems are well-suited to majoring in accounting. Additional information about the accounting profession and its diverse opportunities can be obtained at <http://www.aicpa.org/BECOMEACPA/Pages/BecomeaCPA.aspx>.

Accreditation

The College of Business and the Department of Accounting are accredited by AACSB - International. The department is also a member of the Federation of Schools of Accountancy.

University and College Fellowship/Scholarship Awards

The Department of Accounting follows all applicable Graduate admission criteria when awarding graduate fellowships and scholarships. Students who are unconditionally admitted, have a minimum undergraduate grade point average of 3.0 as calculated by Graduate Admissions (or 3.0 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support. A standardized test score (GMAT) will not be used as a sole criterion or the primary criterion for determining fellowship and/or scholarship support.

Fast Track Program

The Fast Track Program in Accounting enables outstanding undergraduate UT Arlington accounting students to satisfy degree requirements that will lead to a Master's of Science in Accounting or Master's of Science in Taxation degree while completing their undergraduate studies. If admitted, students will be allowed to take select graduate courses that may be used to satisfy both bachelor's and master's degree requirements. Admitted students will be allowed to complete 6 to 9 hours of selected graduate coursework as an undergraduate student. A GPA of 3.0 on the graduate work is required to continue taking graduate courses. Any Fast Track student who completes the 6 to 9 hours of graduate coursework with grades of B or better will be automatically admitted to Graduate School. The student would then be awarded his or her bachelor's degree. The student will not be required to take the GMAT, complete the Graduate School Application, and will have the related application fees waived.

Professional Program in Accounting

The Department of Accounting offers a Professional Program in Accounting (PPIA) that allows students to earn both a bachelor's degree and master's degree upon completion of an integrated 152-hour program. This integrated program can be completed in approximately one less semester than required to earn separate bachelor's and master's degrees. Students completing this program will have earned sufficient hours to sit for the CPA exam.

PPIA Enrollment and Course Sequence

Students will get maximum effectiveness from the PPIA program if they apply two semesters before completing undergraduate coursework.

Upon admission to the PPIA, students will meet with the Graduate Advisor to obtain their graduate degree plan. Students will continue following their undergraduate plan until all appropriate undergraduate coursework is completed. Courses omitted from the undergraduate coursework will be taken as part of the MS program. These courses will be taken later as part of the graduate program and will be applied to both the graduate degree and the undergraduate accounting degree. At the beginning of the last semester of undergraduate enrollment, PPIA students will formally apply for graduate admission. At this point, students should again meet with the graduate advisor to ensure a smooth transition to graduate school.

PPIA Admission Requirements

The Department of Accounting's (the department) admission criteria for its PPIA program have been developed to conform to State of Texas requirements and are based on the general admission requirements of the Graduate School. Applicants are encouraged to include a resume that highlights professional and personal accomplishments with their application.

All applications for admission to the PPIA program are reviewed individually. Admission decisions are based on factors associated with academic success in graduate study and may include any of the following criteria: (1) undergraduate grade point average, (2) performance in accounting classes at UTA, (3) GMAT scores, (4) professional work experience, (5) personal accomplishments, (6) letters of reference, and (7) the applicant's personal statement. Standardized test scores are not used as the sole criterion for admitting applicants or denying admission to applicants.

Admission Criteria

The Department has two alternative sets of conditions that allow applicants to be unconditionally admitted to the PPIA program without review by the Departmental Admission and Petition Committee. The Departmental Graduate Advisor reviews all applications and determines if they qualify for admission under one of these two sets of criteria. Applicants who do not satisfy any of the following sets of conditions for unconditional admission are referred to the Departmental Admission and Petition Committee for consideration.

Option #1: Unconditional Admission with GMAT Waiver

This unconditional admission option #1 focuses on the applicant's performance in UTA's undergraduate accounting program. Individuals who meet **all** of the following **three** conditions are given unconditional admission:

- Majoring in accounting at UTA with having completed at least 9 semester hours of accounting study (beyond principles) at UTA;
- At least a 3.25 GPA in their overall UTA undergraduate and UTA accounting course work;
- Completed a minimum of 60 semester hours at UTA with a GPA of at least 3.25 for the most recent 60 semester hours of courses completed at UTA.

Option #2: Unconditional Admission without Committee Review

Individuals who meet **each** of the following **three** conditions are given unconditional admission:

- At least a 3.0 GPA in their overall undergraduate, UTA undergraduate and UTA accounting GPA;
- Have completed at least 45 semester hours of coursework at UTA with at least 9 semester hours of accounting courses (beyond principles) at UTA;
- GMAT total score of at least 550 with a verbal and quantitative score both at the 40th percentile or higher

Option #3: Admission with Committee Review

PPIA applicants who require Committee review are considered for admission using the following factors, with no single factor used as the primary criterion for making admission decisions:

- Undergraduate GPA (overall, UTA undergraduate) and performance in accounting courses at UTA;
- Score on the GMAT (including separate scores on the verbal and quantitative sections);
- Applicant's professional work experience and personal accomplishments;

- Letters of reference and personal statement provided by the applicant.

Unconditional admission is granted to applicants whose documentation clearly demonstrates a readiness for graduate study. By considering the totality of the applicant's circumstances, including the factors listed above, the Graduate Accounting Admission and Petition Committee will evaluate an applicant's readiness to successfully complete one of the Department's graduate programs. To qualify for unconditional admission with committee review, applicants are expected to show significant strength in at least three of the four areas listed above. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission. Provisional status lasts through the initial semester of admission. Applicants whose documentation does not satisfactorily demonstrate readiness for graduate study may be denied admission. A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate. The decision of the Committee is final.

Classroom Time Flexibility

All of the graduate degree programs offered by the Department of Accounting can be completed by individuals who work full-time and wish to attend class in the evenings. Each student's program of work must be approved by the Accounting Graduate Advisor and must include a minimum of 37 semester hours. A minimum of 28 semester hours must be taken at The University of Texas at Arlington. During the final semester, students who have written a thesis must defend the thesis in an oral examination.

Transfer Credit Applied to Master's Degree

University policy allows students to transfer in no more than nine hours of transfer credit into a graduate program. Equivalent coursework completed at other institutions of recognized standing prior to admittance into the UTA masters' program may be transferred to a masters' degree program after evaluation and approval. Courses from other universities taken after a student has been admitted into a masters' program at UT Arlington must be approved in advance by the Department of Accounting Graduate Studies Committee. To request transfer credit, students must complete the Transfer of Graduate Credit form and obtain approvals from the Department of Accounting's graduate advisor and chair of the Department of Accounting's Committee on Graduate Studies. As a general rule, transfer credits will not be approved for core graduate courses in any of the department's masters' programs or for transfer credits taken without prior approval. Other courses which are not considered suitable to a student's program of work will not be approved. The department's transfer credit policy is in addition to the university's regulation on transfer credit and course waivers. Transferred courses do not appear on the UT Arlington Official Transcript and grades earned in transferred courses are not included in calculating a student's UT Arlington graduate grade-point average.

Departmental Grade and Graduation Requirements

Students enrolled in accounting degree programs are subject to the grade requirements for academic probation and graduation as specified under the general regulations of the Graduate Admissions.

Admissions Requirements

ADMISSION CRITERIA

The Department has two alternative sets of conditions that allow applicants to be unconditionally admitted without review by the Department's Admission and Petition Committee. The Departmental Graduate Advisor reviews all applications and determines if they qualify for admission under one of these two sets of criteria. Applicants who do not satisfy any of the following sets of conditions for unconditional admission are referred to the Departmental Admission and Petition Committee for consideration.

UNCONDITIONAL ADMISSION WITHOUT COMMITTEE REVIEW

Applicants qualify for unconditional admission without the need for review by the Departmental Admission and Petition Committee if they meet any one of the following two sets of unconditional admission criteria:

Unconditional Admission Set #1: GMAT Condition

Individuals who meet each of the following two conditions are given unconditional admission:

- Applicant holds an earned bachelor's degree from an AACSB accredited college or university, with a minimum GPA of 3.0 on the last 60 hours of undergraduate work and
- GMAT total score is at least 550 with verbal and quantitative score at the 40th percentile or higher, on both.

Unconditional Admission Set #2: GMAT Waiver Condition

This unconditional admission set #2 focuses on satisfying any one of the following criteria.

- Graduated from UTA within three years of expected entrance into the graduate program with a BBA in Accounting with a minimum of 3.25 overall GPA and 3.25 accounting GPA ;

- Graduated from an AACSB accredited college or university with an earned bachelor's degree, with a minimum GPA of 3.0 in the major and overall, holds a current recognized professional accounting credential or license (e.g., certified public accountant, certified management accountant, certified financial analyst, chartered accountant);
- Graduated from an AACSB accredited college or university with an earned bachelor's degree, with a minimum GPA of 3.0 in the major and overall, and completed another postbaccalaureate degree (e.g., master's degree, JD degree, LLM degree, MD degree, Ph.D. degree).

ADMISSION WITH COMMITTEE REVIEW

Applicants who require committee review are considered for admission using the following factors, with no single factor used as the primary criterion for making admission decisions.

- Undergraduate and graduate GPA (overall, major, and last 60 hours) and program accreditation status of the applicant's degree granting institution;
- Score on the GMAT (including separate scores on the verbal and quantitative portions);
- Applicant's professional work experience and professional certification/licensure; and
- Letters of reference and personal statement provided by the applicant.

By considering the totality of the applicant's circumstances, including the factors listed above, the Admission and Petition Committee will evaluate an applicant's readiness to successfully complete one of the Department's graduate programs. Depending on the judgment of the committee, the decision may be to grant unconditional admission, probationary admission, provisional admission, deferred admission, or to deny admission. The decision of the committee is final.

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog. International applicants must submit a TOEFL score or IELTS score that meets the standards as listed in the admission requirements.

Pre-enrollment Competency (or deficiency) Requirements

If students have not satisfactorily completed all of their pre-enrollment competency (deficiency) requirements, they will, in addition to their program of work, also be required to complete those pre-enrollment competency courses. If college courses constituting the pre-enrollment competency requirements have not been completed with a grade of A or B, students must include these courses in their program of work. A grade of A or B is required for each pre-enrollment competency (deficiency) course included in the program of work. Deficiency courses may be completed at the undergraduate level but core courses must be completed at the graduate level.

Master of Science in Accounting

This program is designed for students who have an undergraduate degree in accounting or a degree in business administration with a major in accounting who wish to specialize in an area of accounting other than tax. The student, with the assistance and consent of the Graduate Advisor, will develop a course of study designed to meet his or her educational needs in light of previous academic work and career objectives.

The M.S. in Accounting requires the student to complete a minimum of 37 semester hours of coursework, 24 of which must be in the accounting discipline.

M.S. IN ACCOUNTING TRACKS

Students can select various specialization tracks in an accounting-related discipline such as external reporting, audit/systems or managerial. Students may also choose to direct their 12 hours of business electives toward a specialized track such as finance, economics, information systems, management or marketing. Recommended course sequences for both the accounting and external tracks can be obtained by consulting the "Advising" section of the departmental Web site at www.uta.edu/accounting.

Master of Professional Accounting (MPA)

The MPA program is designed for individuals who hold an undergraduate degree in any major other than accounting (economics, engineering, finance, liberal arts, management, mathematics, science, etc.) . The MPA program requires the student to complete a minimum of 43 semester hours of coursework.

For those individuals who hold an undergraduate business degree, the MPA will normally require 43 hours of coursework. For those individuals who hold an undergraduate degree in a non-business discipline, the MPA will normally require 46 hours of coursework for those with a science or engineering undergraduate degree and 52 hours for most other non-business undergraduate degrees. Regardless of undergraduate background, the MPA degree requires a total of 27 hours of accounting plus 6 hours of accounting principles as a pre-enrollment requirement. Thus, MPA graduates will have a total of 33 hours of accounting.

Master of Science in Taxation

The Master of Science in Taxation (MST) is designed for students who have an undergraduate degree in accounting or a degree in business administration with a major in accounting who wish to specialize in taxation. The student, with the assistance and consent of the Graduate Advisor, will develop a course of study designed to meet his or her educational needs in light of previous academic work and career objectives.

The degree requires a minimum of 37 semester hours, of which 27 semester hours must be accounting. Of the required accounting semester hours, 15 of those semester hours must be in the area of taxation beyond ACCT 5314 PRINCIPLES OF FEDERAL INCOME TAX.

Certificate in Taxation

To support The University of Texas at Arlington's mission to provide lifelong learning opportunities to the community, the Department of Accounting offers qualified applicants an opportunity to participate in a Graduate Certificate in Taxation. The program offers graduate courses in specific areas of taxation as a means of

- maintaining and promoting their professional development in an interactive environment;
- acquiring continuing education hours necessary to maintain a professional certification;
- furthering their opportunity to participate in a graduate degree program. Subject to the applicable degree requirements, up to 4 courses taken in the certificate program can be applied toward a master's degree;
- providing quality cost-efficient staff training;
- interacting with other professionals and developing a dialogue that can improve your practice's efficiency and effectiveness. A number of our professors in the program are either currently with the Internal Revenue Service or in practice in the area of specialization associated with the course.

ADMISSION REQUIREMENTS

This certification program is a post-baccalaureate educational opportunity available to degreed professionals. It is narrower in scope and shorter in duration than any of the department's graduate degree programs. To qualify, an applicant must

- have an undergraduate degree;
- have a grade point average of 3.0;
- follow the admission procedures required for a special student.

A GMAT score and letters of recommendation are not required for admission to the program.

INFORMATION ABOUT YOUR STATUS AS A SPECIAL STUDENT

Special student status characteristics:

- Good for only one semester
- Must be approved by the Dean of Graduate Studies
- No more than twelve (12) hours of work earned as a special student may be applied to a graduate degree at UT Arlington.

A person who is admitted as a special student and later seeks admission to a degree program must submit a regular Graduate Admissions Application form, pay the application fee, submit all required documents, and meet all admission requirements, including admission tests and any additional requirements established by the degree program.

APPLICATION TO A GRADUATE PROGRAM

Admission as a special student in no way guarantees subsequent unconditional admission into a graduate program or the Graduate School. Anyone who enters the Certification Program and later seeks a graduate degree at the College of Business may apply 12 hours of coursework toward that degree program if done within 6 years of completion of the certificate by petitioning Graduate Admissions through her/his prospective academic department. Only grades of A and B may be so applied toward graduate credit.

TERMS OF ADMISSION

Once admitted, participants may take up to four (4) of the approved courses. The terms of admission allow participants to take only the specific courses approved for the program. Participants would not be allowed to take courses outside of their program without applying for and having been accepted into the graduate program.

CURRENT GRADUATE STUDENTS

Graduate students currently enrolled in a UT Arlington graduate program may also earn the certificate by notifying the Chair of the Department of Accounting of their intent to participate in the certification program and by successfully completing the prescribed number of classes.

Available Courses

The Certificate in Taxation requires students to take and successfully complete, with a minimum GPA of 3.0, four advanced tax courses. Those students entering the Certificate Program without having taken the equivalent of the undergraduate tax course will also be required to take a "foundation" course, ACCT 5314 PRINCIPLES OF FEDERAL INCOME TAX. The four advanced tax courses are limited to ACCT 5339 TAX PLANNING AND RESEARCH and three additional courses selected from the following:

ACCT 5341	TAXATION OF PASSTHROUGH ENTITIES	3
ACCT 5342	TAX PROBLEMS OF CORPORATIONS AND SHAREHOLDERS	3
ACCT 5345	STATE AND LOCAL TAXATION	3
ACCT 5346	TAX PRACTICE AND PROCEDURE	3
ACCT 5347	FEDERAL TAXATION OF GIFTS AND ESTATES	3

Courses appropriate for the Certificate Program have been selected because their subject matters directly relate to materials needed by professionals engaged in tax-related activities. Full course descriptions for these advanced courses are included in The University of Texas at Arlington's Graduate Catalog.

Grade Point Average While in the Certificate Program

All participants in the program must meet the normal GPA requirements of Graduate Admissions, College and Department of Accounting. In particular, they must maintain an overall GPA of 3.0 in order to receive the Certificate.

Accounting - Undergraduate Programs

Overview of Degree Programs

To support its mission, the Department of Accounting offers two undergraduate degree programs: the Bachelor of Business Administration with a major in accounting and the Bachelor of Science with a major in accounting. Both degree programs provide accounting and business knowledge sufficient to enable the pursuit of professional opportunities in government, industry, and public practice. The Bachelor of Business Administration degree is intended for those individuals who seek a broader education while the Bachelor of Science degree is appropriate for individuals who wish to complete significant course work in a related business discipline such as finance, economics, or information systems.

The Department of Accounting also offers a Fast Track in Accounting and a Professional Program in Accounting for students who wish to pursue both a bachelor's and master's degree in accounting. Students accepted into either program complete fewer courses to earn both, Bachelors and Masters, degrees than non-participants.

Objective

The objective of the Bachelor in Business Administration and Bachelor of Science in Accounting is to prepare students for graduate study and/or for professional careers in the public, private, government and non-for profit sector as internal auditors, management accountants, government auditors and other accounting related functions. As a part of this objective, these programs are designed to provide the educational background to become a Certified Management Accountant, Certified Internal Auditor, Certified Fraud Examiner or to attain other professional certifications.

Students of accounting learn to use and control information technology systems, prepare and analyze financial reports, structure business transactions, and develop effective business plans. Individuals who like being challenged by a variety of situations and technologies and who enjoy identifying, analyzing, and solving problems are well-suited to majoring in accounting.

Accreditation

The accounting program in the Department of Accounting is fully accredited by the AACSB International.

Transfer Credit

Acceptance of transfer credit for accounting courses will generally be limited to those courses taught in the freshman and sophomore years in the Department of Accounting at UT Arlington. Junior and senior level accounting courses taught at UT Arlington, but completed at another institution, must be validated if they are to be used to fulfill degree requirements for an undergraduate degree in accounting. Courses are ordinarily validated from an examination of course materials and acceptable performance on a validation examination. Students must earn a grade of C or higher on the validation examination for transfer credit. Information about the validation examination can be obtained from the undergraduate advisor.

Entrance Examination for ACCT 3311 (Intermediate I)

A student's performance in ACCT 3311 FINANCIAL ACCOUNTING I (Intermediate I) is often viewed as an important indicator of aptitude for success in the accounting profession. To help ensure that each student enrolling in ACCT 3311 FINANCIAL ACCOUNTING I has the preparation to succeed, student must pass an entrance examination prior to enrolling in ACCT 3311 FINANCIAL ACCOUNTING I. Students who score in the top one-third of a UT-Arlington ACCT 2301 PRINCIPLES OF ACCOUNTING I comprehensive exam (with no less than a B on that exam), and earn a B or better in

the UT-Arlington ACCT 2301 PRINCIPLES OF ACCOUNTING I are exempt from the ACCT 3311 FINANCIAL ACCOUNTING I entrance examination. Details regarding this entrance examination may be obtained on the departmental website.

Degree Progress and Major Dismissal

Students who have been admitted to an accounting degree program must maintain satisfactory progress in their field of study. Declared accounting majors are subject to dismissal from accounting degree programs and will not be permitted to continue to enroll in accounting courses at UT Arlington if they:

- Receive a grade of D or F in more than two upper level accounting courses, or
- Receive a combination of grades of D or F on two attempts of the same accounting course.

Graduation Requirements

In addition to requirements imposed by the University and College of Business, students must earn a grade of C or higher in each accounting course presented to satisfy the requirements for a degree with a major in accounting.

Fast Track Master's Degree in Accounting

This program emphasizes preparation for a career as a professional accountant, including preparation for the Certified Public Accountant designation. Most states, including Texas, require completion of at least 150 semester hours of college study of which at least 37 semester hours must be in accounting in order for an individual to be licensed as a Certified Public Accountant. The Fast Track Program in Accounting is designed to fulfill these requirements and enable outstanding senior undergraduate Accounting students to satisfy degree requirements leading to a Master's of Science in Accounting or a Master's of Science in Taxation while completing their undergraduate studies and thereby completing fewer courses to earn both undergraduate and graduate degrees in accounting.

An undergraduate Accounting student will apply:

- within 30 hours of completing a bachelor's degree
- upon completion of at least 30 hours at UTA, achieving an overall UTA GPA of 3.3 or better
- with an overall GPA of 3.3 or better in all college courses (at all schools), and
- with a UTA Business GPA of 3.3 or better.

Additionally, a candidate must have completed 12 hours of specified undergraduate Fast Track foundation courses with a minimum GPA of 3.5 in these courses. These courses are mandatory and must be completed at UT Arlington. The foundation courses required for admission to the various Fast Track programs are:

ACCT 3311	FINANCIAL ACCOUNTING I	3
ACCT 3312	FINANCIAL ACCOUNTING II	3
FINA 3313	BUSINESS FINANCE	3
BSTAT 3321 or BSTAT 3322	BUSINESS STATISTICS I (whichever is taken first at UTA) BUSINESS STATISTICS II	3
Total Hours		12

Once admitted, a student will be allowed to take select graduate courses that may be used to satisfy both bachelor's and master's degree requirements. These students will be allowed to enroll in Auditing, Effective Business Communication, and an Accounting elective at the graduate level and these courses should not be completed as an undergraduate.

An undergraduate student who successfully completes the Fast Track graduate coursework with grades of B or better will graduate with the undergraduate degree and will be automatically admitted to the Graduate School at that time. The student will not be required to take the Graduate Management Admissions Test (GMAT), will not have to complete the normal Graduate School application for admission, and will not have to pay the related application fee.

For more details about this program, please consult the graduate accounting advisor (graduate.accounting.advisor@uta.edu).

Professional Program in Accounting (PPIA)

This program emphasizes preparation for a career as a professional accountant, including preparation for the Certified Public Accountant designation. Most states, including Texas, require completion of at least 150 semester hours of college study, of which at least 36 semester hours must be in accounting for an individual to be licensed as a Certified Public Accountant. The Professional Program in Accounting (PPIA) is designed to fulfill these requirements and allow the simultaneous granting of a bachelor's degree and a master's degree. Students accepted into the PPIA program generally complete fewer courses to earn both degrees than non-participants.

After completing ACCT 3311 with a B or better, interested persons should consult with the undergraduate accounting advisor to review eligibility requirements and the application process. Students admitted to the program will complete a plan of study that results in the fulfillment of requirements for the bachelor's degree (excluding BCOM 3360 and the undergraduate Advanced Accounting Elective, which are waived and completed at the graduate level) and sufficient additional graduate course work to fulfill the requirements for the Master of Science in Accounting degree or the Master of Science in Taxation degree.

Applications for admission to PPIA are reviewed individually with consideration given to the following criteria:

- Undergraduate grade point average (GPA)
- Accounting grade point average (GPA)
- GMAT score
- Professional work experience
- Personal accomplishments
- Personal Statement and Letters of Reference

For details about the application process and deadlines consult the Department of Accounting Graduate Program section of the University Catalog or the Department of Accounting website, www.uta.edu/accounting.

Requirements for a Bachelor of Business Administration Degree in Accounting

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Pre-Professional Course Requirements - Fulfill the University General Core Requirements (42 hours and 3 elective hours)

Total Hours 117

DOUBLE MAJORS

Two Double Major options for the Bachelor of Business Administration (BBA) in Accounting are available. Accounting undergraduates who pursue one of the following Double Major programs will not have the option of participating in the Fast Track Program in Business. The option of participating in the Fast Track Program in Accounting is still available.

Completion of the Double Major is attained by including all of the following courses in the BBA Accounting plan and completing with grades of C or better in each of the double major courses listed below:

BBA in Accounting and Finance

FINA 3315	INVESTMENTS
FINA 3317	FINANCIAL INSTITUTIONS AND MARKETS
FINA 4315	ADVANCED BUSINESS FINANCIAL ANALYSIS
FINA 33xx or 43xx	
ECON 3303	MONEY AND BANKING
or ECON 3310	MICROECONOMICS

BBA in Accounting and Information Systems

INSY 3300	INTRODUCTION TO PROGRAMMING
INSY 3303	COMPUTER NETWORKS AND DISTRIBUTED COMPUTING
INSY 3304	DATABASE MANAGEMENT SYSTEMS
INSY 3305	INFORMATION SYSTEMS ANALYSIS AND DESIGN
INSY 4305	ADVANCED APPLICATION DEVELOPMENT
INSY 33xx or 43xx

Recommended Advanced Business Elective Tracks for Accounting Majors

FINANCE INDUSTRY TRACK

In addition to the Core Business Requirement of FINA 3313, Business Finance.

ECON 3303	MONEY AND BANKING
FINA 3317	FINANCIAL INSTITUTIONS AND MARKETS
FINA 4311	MONEY AND CAPITAL MARKETS
FINA 4315	ADVANCED BUSINESS FINANCIAL ANALYSIS
FINA 4319	FINANCIAL DERIVATIVES

INFORMATION SYSTEMS TRACK

In addition to the Business Core Requirement of INSY 2303, Introduction to MIS and Data Processing.

INSY 3303	COMPUTER NETWORKS AND DISTRIBUTED COMPUTING
INSY 3309	DATA ANALYTICS USING PYTHON PROGRAMMING
INSY 4312	FUNDAMENTALS OF INFORMATION SECURITY

SALES AND MARKETING TRACK

In addition to the Business Core Requirements of BCOM 3360, Effective Business Communication, and MARK 3321, Principles of Marketing.

MARK 3322	PROFESSIONAL SELLING
MARK 3323	INTEGRATED MARKETING COMMUNICATION
MARK 4308	MANAGEMENT AND LEADERSHIP OF THE SALES FORCE
MANA 4341	NEGOTIATIONS AND CONFLICT RESOLUTION

Students will receive a Sales Certificate if all courses are completed and the student has applied for the certificate.

Minor in Accounting

The College of Business:

- Requires half of the course work for a minor in business be completed in residence at UT Arlington. For an 18-hour minor requirement, this would require a minimum of 9 hours of business course work at UT Arlington.
- Requires a grade of C or better in all minor requirement courses.
- Will not use vocational and technical courses (including WECM courses) toward any business minor.

ACCOUNTING

ACCT 2301	PRINCIPLES OF ACCOUNTING I	3
ACCT 2302	PRINCIPLES OF ACCOUNTING II ¹	3
ACCT 3311	FINANCIAL ACCOUNTING I ¹	3
ACCT 33xx or 43xx ¹		3
ACCT 33xx or 43xx ¹		3
ACCT 33xx or 43xx ¹		3
Total Hours		18

Students must complete at least 9 hours of upper level accounting coursework at UT Arlington.

The following ACCT prefix courses may not be used to satisfy the minor requirements:

ACCT 3309	ACCOUNTING FOR MANAGERS
-----------	-------------------------

A minimum accounting GPA of 2.0 must be maintained for accounting classes completed at UT Arlington. ACCT 3309 ACCOUNTING FOR MANAGERS will NOT be included in the accounting GPA calculation.

¹ *Mandatory Prerequisites: Prerequisites MUST be met before enrollment in the course. A student should consider these when selecting courses to satisfy the minor requirement and when registering. For a complete list of prerequisites see the Undergraduate Catalog or the Business Undergraduate Advising Office.*

Business Administration - Graduate Programs

Master of Business Administration

The Master of Business Administration program prepares leaders and managers for careers within all types of organizations. The faculty's research contributes to educational excellence. Different MBA delivery formats and certificates serve a wide variety of interests.

Doctor of Philosophy in Business Administration

At UTA we are committed to mentoring and producing the next generation of business educators and researchers. The College of Business doctoral program is small and flexible, involving in-depth study in the functional areas of accounting, finance, information technology, marketing, operations management, organizational behavior, or strategic management.

While most graduates undertake careers as teachers, scholars and researchers working within academic environments, the doctoral degree can lead to careers in industry and government.

Master of Business Administration

ADMISSIONS

Admission to the MBA program is based upon a score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) and the record of one's undergraduate academic performance. These scores are calculated into an index score. To calculate the index score use approximately the last 60 hours of the undergraduate GPA, multiply this GPA by 200 and add the GMAT total score. A GMAT or GRE score need not be the sole criterion for determining admission to the MBA program. Multiple criteria may be used to make admission decisions. Because the GRE is scored differently, the percentile on the GRE will be matched to that of the GMAT, to convert the GRE score to a GMAT score please visit: https://www.ets.org/gre/institutions/about/mba/comparison_tool.

A graduate grade point average is used in the index when it is 3.0 or above and is based on at least 24 semester hours.

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined in the TOEFL and IELTS Test Score Minimums section under Admissions Requirements and Procedures the Graduate Catalog.

To apply please visit: https://www.applytexas.org/adappc/gen/c_start.WBX

UNCONDITIONAL ADMISSION

For unconditional admission, the applicant's composite total from the index is 1080 or greater which demonstrates a potential for successful academic performance as a graduate business student. Applicants may submit other documents (as listed in 1-6 below) as further proof of ability of to succeed in graduate studies.

PROBATIONARY ADMISSION

An applicant with an index score below 1080 or an applicant who shows deficiency in other areas may be granted probationary admission. Probationary admission requires the student to maintain a 3.00 grade point average for the first two semesters of enrollment. Additionally the student may be required to take deficiency courses. Items 1-6 below will be used to indicate potential for successful academic performance and identify positive indicators for a probationary admission.

1. A resume that highlights professional and personal accomplishments, linguistic abilities, computer expertise and leadership experience. Applicants with two to five years of experience are preferred.
2. Grades in specified undergraduate business and non-business courses (math, accounting, economics, statistics, for example). The focus is on the last 60 hours of coursework.
3. Educational objectives and quality of written expression of the 200 word application essay.
4. Letters of recommendation from three persons familiar with the applicant's academic background and/or work experience who can assess the applicant's potential success in graduate school.
5. General and specific program accreditation status of degree-granting institution.
6. Professional certification or licensure.

PROVISIONAL ADMISSION

An applicant unable to supply all required official documentation prior to the admission deadline but otherwise appears to meet admission requirements may be granted provisional admission. Complete and satisfactory credentials must be received by Graduate Admissions before the end of the semester in which the student has registered in a provisional status. Provisional admission does not guarantee subsequent admission on an unconditional basis.

DEFERRED AND DENIED ADMISSION

A deferred decision may be made when an applicant's file is not sufficiently complete to make an admission decision, or when an applicant needs to improve certain criteria to enhance their competitive status for future admission consideration. For an applicant lacking sufficient evidence to indicate potential for academic success as an MBA student, admission will likely be denied. All applicant data will be carefully reviewed before an admission denial is made. The decision to defer/deny admission is not based on any single criterion.

SCHOLARSHIP INFORMATION

Students unconditionally admitted, have a minimum undergraduate GPA of 3.0 as calculated by Graduate Admissions (or 3.0 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support. A standardized test score (GMAT or GRE) will not be used as the sole criterion for determining fellowship and/or scholarship opportunity.

MBA Requirements

The 45-hour program is designed to accommodate both full-time and part-time students from widely divergent backgrounds. It is not necessary to have completed prior academic work in business administration. Core courses, which are an integral part of the program, are designed to prepare all students for advanced program coursework.

WAIVERS

A waiver is provided in the campus MBA format if a student holds an undergraduate degree in an area of study that aligns with an MBA core course. A prerequisite is considered fulfilled when the student is granted a waiver of that specific MBA core course. MBA core courses may not be taken as electives in the advanced program.

DEFICIENCY COURSES

Applicants may be required to complete deficiency courses at the beginning of their studies. A graduate level course in business statistics may be required. Students who are deficient in written and/or oral communication may be required to take GESP.

BSTAT 5301	INTRODUCTION TO STATISTICS	3
------------	----------------------------	---

CORE COURSES

There are eleven MBA core and advanced courses (33 hours). The following courses are considered core MBA courses:

ACCT 5301	ACCOUNTING ANALYSIS I ¹	3
ECON 5311	ECONOMIC ANALYSIS ¹	3
OPMA 5361	OPERATIONS MANAGEMENT	3
MARK 5311	MARKETING	3
FINA 5311	BUSINESS FINANCIAL MANAGEMENT ¹	3
MANA 5312	MANAGEMENT	3
Total Hours		18

¹ Indicates a core course that is a pre-requisite for courses taken in the advanced portion of the MBA program. Pre-requisite courses should be taken early in the MBA Program.

ADVANCED PROGRAM

The advanced program provides each student the opportunity to tailor their studies to enhance their career interest.

Requirements for the advanced program include the following courses:

BSTAT 5325	ADVANCED STATISTICAL METHODS ¹	3
BLAW 5330	LEGAL ENVIRONMENT OF BUSINESS	3
or MANA 5337	ETHICS AND THE BUSINESS ENVIRONMENT	
ECON 5313	MANAGERIAL ECONOMICS ¹	3
ACCT 5302	ACCOUNTING ANALYSIS II ¹	3
MANA 5336	STRATEGIC MANAGEMENT (Capstone course - taken in second to last or last semester of program)	3
Total Hours		15

¹ If relevant academic background is extensive in this subject area, the program advisor may allow course substitutions which will correspondingly expand the number of electives in the advanced portion of the program.

SPECIALTY AND BREADTH ELECTIVES

A total of twelve hours (four courses) beyond the core and required advanced courses are required to complete the 45-hour degree. MBA students can take courses in different areas or may choose to specialize in a given area such as accounting, business analytics, economics, finance, information systems, management, marketing, operations management, or real estate. Students may wish to tailor their program of work to develop business skills and perspectives essential to their career goals and objectives. A variety of specialties may be considered. Courses taken outside the area of specialty are considered breadth electives. However, the advanced portion of the program must have a minimum of five courses (15 semester hours) outside the area of specialty which may be satisfied by the required advanced courses. Regardless of specialty or not, the diploma will read Master of Business Administration only.

Students may take breadth electives in any of the curriculum areas of the MBA program. Students may take up to six semester hours in non-business coursework as part of their breadth electives, subject to the approval of the MBA Graduate Advisor. An approved study abroad program or internship can also be used to satisfy a breadth elective.

PROFESSIONAL MANAGEMENT ELECTIVES

Students holding bachelor's or master's degrees in professional fields such as architecture, education, engineering, nursing, social work, and urban studies have the option of taking, with program advisor approval, up to 12 hours of approved breadth electives in their professional area as part of their

MBA degree requirements. With these electives, professionals can develop advanced management skill in a functional area by declaring a 9-12 hour specialty, or pursue a more general management approach by declaring "no specialty."

Professional Cohort format (also referred to as CMBA or PMBA)

Besides the MBA program on the main campus, the professional cohort format (PMBA or CMBA) of the MBA program is designed for working professionals who desire to continue full-time employment. In this specially designed, team-based (cohort) format, MBA courses are taken in sequence, in accelerated 5- or 8-week sessions. This format, which is only offered at the Fort Worth campus, allows students to complete their MBA degree in 24 months. Like the on-campus program, this program is 45 semester hours and includes the same curriculum requirements as the on-campus MBA program detailed above.

Grade and Graduation Requirements

The MBA program follows the grade requirements for probation as specified under the general regulations of the Graduate Catalog. In addition, students must have at least a 3.0 grade point average in all coursework and area of specialty to graduate.

Executive MBA Program

The Executive MBA (EMBA) program is designed to provide high-quality graduate management education to experienced mid-level and upper-level managers and executives. The program covers all functional areas of business management and exhibits several content integrating themes associated with successful management of modern business organizations. These include leadership and ethics, international business operations, innovation, and effective utilization of teams.

The program is a 15 to 24 month, cohort-based design with a lock-step, fixed curriculum. The schedule of classes is non-traditional and utilizes weekend and accelerated formats. Students, who are usually fully employed, enter the program as a group and progress through courses together. Course content is delivered by senior faculty, many of whom have extensive industry experience. Frequent guest speakers are utilized for content expertise. The focus of the program is to use methods that maximize student interaction and connects classroom discussion directly to each student's job situation.

Executive MBA (EMBA)-International Option

The Executive MBA program is designed to provide high-quality, graduate management education to mid-level and upper-level managers and executives. The program covers all functional areas of business management and has an international focus in its course offerings. Other program content themes may include project management, total quality management, strategic resource alignment, leadership, entrepreneurship, big data or other specific areas as determined by the local needs and demand.

The program provides an opportunity for experienced professionals to obtain a master's degree in Business Administration on a schedule that minimizes disruption of work and personal pursuits. It includes a cohort class structure that offers a lock-step, planned curriculum in an executive setting. In other words, members of each class begin the program at the same point, move through the curriculum together, and typically complete the degree requirements for graduation as a group. Executive MBA students are required to complete their degrees in two years or less.

The program consists of 12 courses (36 credit hours). A single course is offered every 6-8 weeks.

CRITERIA FOR ADMISSION

The EMBA admission process takes a holistic view of the candidate to determine the likelihood of success in the program and the extent to which each candidate will contribute to the overall success of the class. Factors taken into account in evaluating a candidate include:

Completion of a four-year undergraduate degree or internationally recognized equivalent

Minimum of 5 years of professional work experience, with 2 years of managerial experience

High potential for advancement and proven academic capability

Ability to contribute to the Executive MBA experience

Ability to read, write and speak English. If candidates do not have standardized tests results (e.g. TOEFL, IELTS), they will be required to take an in-house English test and pass an oral English interview. This requirement is waived for custom-designed cohorts for companies or government entities, which are taught in Mandarin.

Strong interest in a U.S. educational experience.

PROBATIONARY ADMISSION

If applicants do not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Any available test scores will not constitute the sole or primary basis for ending consideration of an applicant. Probationary admission may require that the applicant receive a B or better in at least their first 9 hours of graduate coursework applicable to their degree being sought at UT Arlington.

Curriculum

- Accounting Analysis II (ACCT5302)
- Managerial Economics (ECON5313)
- Strategic Management (MANA5336)
- Financial Applications (FINA5340)
- Management of Information Technologies (INSY5375)
- International Marketing (MARK5331)
- Management of Multinational Enterprises (MANA5331)
- Strategic Human Resource Management (MANA5340)
- Organizational Behavior* (MANA5320)
- Entrepreneurship* (MANA5339)
- Global Supply Chain Management* (OPMA5368)
- Operations Management* (OPMA5361)

Courses marked with an asterisk (*) are electives.

Course Descriptions – International EMBA

ACCOUNTING ANALYSIS II (ACCT 5302)

- Introduction to concepts, purposes, problems, methodology, and terminology of managerial accounting.

MANAGERIAL ECONOMICS (ECON 5313)

- Application of economic analysis in formulating business decisions based on the theoretical foundations of demand, cost, production, profits, and competition. Macroeconomic topics of particular relevance to managers are included.

STRATEGIC MANAGEMENT (MANA 5336)

- Strategic management uses a general management perspective in addressing issues related to the formulation and implementation of corporate and business level strategy. The course involves developing the ability to identify issues, evaluate strategic options and understand the organizational process by which strategies get formed and executed. It builds on the knowledge gained in functional area courses and uses case studies and projects to improve students' analytical and decision-making skills.

FINANCIAL APPLICATIONS (FINA 5340)

- Analysis of financial problems of business concerns, presented in case materials. Considers determination of capital needs, choosing among alternative capital investments, planning methods of financing new capital expenditures, and planning recapitalizations, mergers, and reorganizations.

MANAGEMENT OF INFORMATION TECHNOLOGIES (INSY 5375)

- This course covers topics on the management of information technologies (IT) from the view point of senior managers. Subjects discussed include the strategic role of IT to gain competitive advantage, Internet-based business models, building a lean and agile organization through IT, managing IT security and reliability, evolving models of IT service delivery, such as cloud computing and open source, management of outsourcing, IT governance, and ethical issues in the digital era.

INTERNATIONAL MARKETING (MARK 5331)

- Management of marketing in international business. Includes marketing research, pricing, promotion, and distribution in the international environment. Examines marketing problems arising from various degrees of foreign involvement (exports, licensing, foreign subsidiaries).

MANAGEMENT OF MULTINATIONAL ENTERPRISES (MANA 5331)

- Focuses on the international dimensions of strategy and organization and provides a framework for formulating strategies in an increasingly complex global economy. The course seeks to provide students with an understanding of the cultural, political, competitive, technological, legal, and demographic environments in which multinational firms operate. It then examines the nature of global competition by exploring the characteristics of global industries and strategies that have been successful in an international context. Also covered are issues related to organizational design and strategic control in the management of multinational enterprises.

STRATEGIC HUMAN RESOURCE MANAGEMENT (MANA 5340)

- Emphasizes strategic perspective of modern human resource management theory and practice. Topics include human resource planning, staffing, training and development, compensation, performance appraisal, and labor and employee relations.

ORGANIZATIONAL BEHAVIOR* (MANA 5320)

- Systematic study of behavioral problems in the complex organization. Analyzes the interaction of environmental and internal factors and their effects upon organizational behavior.

ENTREPRENEURSHIP* (MANA 5339)

- New venture opportunity assessment, formation, and development in startup and corporate environments. Students will understand the role of entrepreneurship in the economy and the attributes of entrepreneurial behavior. Students will learn how to assess the market and financial feasibility of a new venture as well as understand how to use equity and debt financing, how to select between starting up, franchising, or buying a business, how to lead the growing company, and how to address family business dilemmas. The cornerstone of the course will be a feasibility assessment project that leads to a business plan for a new venture of the student's choice. For the project, students can explore either an original new venture idea, an already existing venture concept (for example, a franchise), or a new business opportunity in need of assessment for an existing firm or their current employer.

GLOBAL SUPPLY CHAIN MANAGEMENT* (OPMA 5368)

- Course covers concepts and issues important in managing supply chains. A strategic view is taken of the way companies coordinate their operations with suppliers and customers in a global marketplace. The strategic use of information systems to better manage supply chains is also covered.

OPERATIONS MANAGEMENT* (OPMA 5361)

- Introduction to concepts and problem-solving techniques important in production management and operations management. Topics include demand forecasting, capacity management, resource allocation, inventory management, supply chain management, quality control, and project management.

DUAL DEGREE OPTION

Students may pair the MBA degree with a specialized graduate degree. Students requesting the dual degree program must be admitted to each participating program. The number of hours that may be used jointly will be determined by the total number of hours required by both degree programs if completed separately as defined in the graduate catalog. Dual degree programs are available at the master's level only.

JOINT DEGREE: BACHELOR OF SCIENCE IN BIOLOGY AND MASTER OF BUSINESS ADMINISTRATION

A program designed to prepare students for careers as managers with specific knowledge of the biomedical science field. Students are required to take courses from life sciences, business, and liberal arts, culminating in a joint Master of Business Administration Degree (MBA), including a Bachelor of Science Degree in Biology. The curriculum is offered jointly by the College of Business and the College of Science. The BS in Biology will be conferred at the same time as the MBA. If students in this joint degree program are not accepted into the MBA program, or if students enter the MBA program and fail to complete the requirements for the MBA, then, in order to earn a BS in Biology they must take the same, full complement of courses required for a BS as students not enrolled in the joint program. Students interested in this integrated undergraduate and graduate degree plan should consult with the Biology undergraduate advisor. If eligible for the program, the Biology undergraduate advisor will direct them to contact Graduate Business Services. Application procedures will be discussed at that stage.

GRADUATE ADVANCED STUDIES CERTIFICATE

Individuals who hold a graduate degree in business and wish to pursue additional graduate studies in business solely for the purpose of professional development may apply to the MBA Program as a special student. Applicants should outline their professional development objectives in their written essay that accompanies their application. Additionally, they must meet all requirements for admission to the MBA program. Coursework in this program must meet the grade requirements of Graduate Admissions and be completed within a three year time-limit. A certificate will be granted upon successful completion of 12-21 hours of approved coursework in an area of business. Executives completing courses from two or more areas will be awarded a certificate in the area of executive development. Managers or functional specialists completing courses in one area of study will be awarded a certificate for their professional development area. Some courses taken under this program may not be applied in the future toward another graduate degree at this University.

SPECIALTY OR PROFESSIONAL MANAGEMENT OPTION

Please review the Specialty and Breadth or Professional Management Elective sections under the Master's tab for specific requirements. This option is for current MBA students.

Ph.D. in Business Administration**ADMISSION**

Admission to the Ph.D. program is based upon the completion of the general admission requirements of the Graduate School. For Ph.D. program admission a score on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE), and a record of undergraduate and master level academic performance are required. Students for whom English is not their native language must achieve a TOEFL score of at least 550. International applicants that score below minimum acceptable levels on the verbal portion of entrance examinations may be admitted under the condition that they pass an English proficiency exam or complete U.T. Arlington's Graduate English Skills Program prior to beginning graduate coursework. Applicants are encouraged to submit with their application a resume that highlights professional and personal accomplishments, linguistic abilities, computer expertise and leadership experience. A standardized test score (GMAT or GRE) will not be used as the sole criterion for denying an applicant's admission to the Ph.D. program.

Specifically, multiple criteria are used to make admission decisions. Quantitative measures include an applicant's GMAT or GRE score and grade point averages on undergraduate and master level work as calculated by the Graduate School. No formula is used nor weights assigned to these factors. The Ph.D. Graduate Studies Committee and the field coordinator for the student's track in the Ph.D. program give consideration to these and other factors (educational objectives, letters of recommendation, etc.) in the entire file to arrive at a decision. Interviews with prospective students are encouraged and given consideration in the decision process. There are no set minimum scores for GMAT or GRE required for admission and no cutoff scores on grade point averages. Prospective students are encouraged to work with their track's field coordinator to work through the admission process.

CATEGORIES OF ADMISSION DECISIONS

An applicant is unconditionally admitted when all factors for consideration indicate very strong potential for academic success as a business doctoral student. When multiple factors indicate lack of potential, admission will be denied. Probationary admission is not available for the doctoral program.

A provisional decision to admit may be granted when the applicant meets criteria for unconditional admission but an item of applicant information has not been received by the Graduate School. A deferred decision may be made when an applicant's file is not sufficiently complete to make an admit or deny decision.

UNIVERSITY AND COLLEGE FELLOWSHIP/SCHOLARSHIP AWARDS

Doctoral students who are newly admitted, have a minimum undergraduate grade point average of 3.0 as calculated by the Graduate School (and 3.0 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support. A standardized test score (GMAT or GRE) will not be used as the sole criterion for determining fellowship and/or scholarship eligibility.

DEGREE REQUIREMENTS

All students must complete work in a major (dissertation) field and a research field. Additional minor area courses may be external to the College of Business. If deemed appropriate by the student's committee, examples are industrial engineering, mathematics, computer science, sociology, and psychology. The student must petition for approval of an external minor field.

The following minimum semester hours must be included in the student's Program of Study.

	Minimum Semester Hours
Business Foundation	0-15 ¹
Major Field	24 ²
Research Field	12 ²
Dissertation	18

¹ From 0-15 hours depending upon the student's background at the time of admission to the doctoral program.

² Previous equivalent advanced coursework may be accepted.

Residence Requirements

Each student enrolled in the doctoral program must enroll for and successfully complete a minimum of 15 hours in one 12-month period prior to completion of the comprehensive examinations. Each student must enroll for at least 12 hours every year. All students enrolled in the program must successfully complete all coursework and comprehensive examinations within a maximum of 60 months from initial enrollment in the program. A minimum of 24 graduate hours in residence, excluding dissertation, are required for all candidates.

Diagnostic and Annual Performance Evaluations

All doctoral students are expected to show steady progress toward their degree and to demonstrate satisfactory advances in their ability and motivation to conduct independent research throughout their program. During a student's program, a diagnostic evaluation will be conducted near the end of the first year, but no later than 24 credit hours. After the first year, an annual performance evaluation will take place each subsequent year. The evaluation will be conducted by the major area Ph.D. advisor in consultation with a faculty committee. If the student has not yet passed all comprehensive examinations or does not have a formal dissertation committee, the faculty committee will consist of the faculty in the major area. If the student has passed all comprehensive examinations and has a formal dissertation committee, the faculty committee will consist of the Dissertation Committee.

Upon completion of the evaluation, a recommendation of continuation or discontinuation in the program is made to the College of Business Ph.D. program director for a final decision. For a discontinuation decision resulting from the first year diagnostic evaluation, the student will immediately be discontinued in the Ph.D. program. For a discontinuation decision in the annual performance review in the second year and beyond, the student will have one regular semester (Fall or Spring) to demonstrate satisfactory improvement in their performance. At that time the major area Ph.D. advisor in consultation with the appropriate faculty committee, and the Ph.D. program director, will make a final decision on whether the improvements are satisfactory. An unsatisfactory decision at that time will result in the immediate discontinuation of the student in the program.

During the diagnostic and annual performance reviews, reasons for poor performance include: grade point averages below minimum GPA requirements, unsatisfactory progress in completing coursework, unsatisfactory progress in completing dissertation, and inadequate demonstration of ability and motivation to conduct independent research.

Comprehensive Examinations

Students must demonstrate competence in all their fields of study by the successful completion of comprehensive examinations. Written comprehensive examinations in each field will be given at the start of each fall and spring semester of each year and may be given during the summer term. A student is eligible for a written comprehensive examination when that student has completed:

1. the Business Foundation with a GPA of at least 3.25 and
2. prescribed coursework in the field.

If a student fails a written comprehensive examination and continues in that field, the examination must be retaken by the end of the next long semester. If a student fails a second comprehensive examination, that student will not be permitted to continue in the program.

A student must complete all written examinations within 25 months or retake any examinations which fall outside the 25-month period. When a student successfully completes all the written examinations, that student is scheduled for a comprehensive oral examination which is administered by the student's Supervisory Committee. A student who fails the comprehensive oral examination is given a second oral examination within 12 months of the date of the first examination. If a student fails the second comprehensive oral examination, that student will not be permitted to continue in the program.

Upon successful completion of written and oral comprehensive examinations, the student is admitted to candidacy.

Dissertation

The Dissertation Committee consists of a minimum of four members, at least two of whom must be from the major field. The chair of the Dissertation Committee must be from the major field. At least one member of the committee must be from the research field and one member of the committee must be from outside the major field. With the approval of the Graduate Dean, one of the four members may be a nationally or internationally recognized non-U.T. Arlington scholar.

The dissertation must be completed within four years of the oral comprehensive examination.

Economics

Economics examines how individuals, businesses, and societies interact. By studying economics, you can gain a better understanding of the costs and benefits of a course of action and thus make informed decisions. Decision-making skills are necessary in multiple areas of the economy including the government and business workplaces.

Economics teaches you to think critically and to solve problems, skills that are highly valued in the workplace. You learn not only how to find data, but how to work with that data and then logically explain insights gained from the analyses. Current research interests of economics faculty include topics in technology, telecommunications, behavioral economics, forecasting, environment, labor, health, international trade, and international finance. The diverse skills and interests of the economics faculty will provide opportunities for learning and growth to the student in our modern economy.

Economics - Graduate Programs

Economics examines how individuals, businesses, and societies interact. By studying economics, you gain a better understanding of the costs and benefits of alternative courses of action and thus make informed decisions. Decision-making skills are necessary in all areas of the economy including the government and business.

Economics teaches you to think critically and to solve problems, skills that are highly valued in the workplace. You learn not only how to find data, but how to work with that data and then logically explain insights gained from the analyses. Current research interests of economics faculty include topics in technology, telecommunications, behavioral economics, forecasting, environment, labor, health, international trade, and international finance. The diverse skills and interests of the economics faculty provide opportunities for learning and growth to the student in our modern economy.

Admission Requirements

Admission to the MS in Economic Data Analytics is based upon the completion of the general admission requirements of the Graduate Admissions Office. For admission to the MS Economics program a score on either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) and record of one's academic undergraduate performance are required. Students for whom English is not their native language must achieve a TOEFL score of at least 550 (213 on computer-based test). International applicants who score below minimum acceptable levels on the verbal portion of entrance examinations may be admitted under the condition that they pass an English proficiency exam or complete UT Arlington's Graduate English Skills Program prior to beginning graduate coursework. Applicants are encouraged to submit with their application a resume that highlights professional and personal accomplishments, linguistic abilities, computer expertise, and leadership experience. A standardized test score (GMAT or GRE) will not be used as the sole criterion for admitting applicants or the primary criterion for denying admission to the MS Economics program.

Multiple criteria are used to make admission decisions. Unconditional acceptance is based on consideration of all the information listed below and the decision to deny admission is not based on any single criterion alone.

1. A bachelor's degree from an accredited general or specific program.
2. An acceptable undergraduate GPA as calculated by Graduate Admissions (approximately the last 60 hours), generally greater than a 3.0 on a 4.0 scale.
3. An acceptable score on the GRE or GMAT. Successful students generally have a minimum score of 148 (600 old GRE scale) on the quantitative section and 150 (450 old GRE scale) on the verbal section of the GRE or a minimum score of 480 on the GMAT.
4. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential success in graduate school.
5. Grades in specified undergraduate business and non-business courses (e.g., math, accounting, economics, statistics).
6. For applicants whose native language is not English, see UT Arlington's requirements: <http://www.uta.edu/admissions/graduate/apply/how-to-apply.php>

UNCONDITIONAL ADMISSION

For unconditional admission, the applicant's composite total from the index (this index is derived by using a formula that multiplies the GPA by 200 and adds the resulting value to the GMAT score) must be 1080 or greater and items 1 through 5 above should strongly indicate potential for successful academic performance as an MS Economics student.

For unconditional admission, the applicant can score 148 (600 old GRE scale) or higher on the Quantitative section and 150 (450 old GRE scale) or higher on the Verbal section of the GRE and items 1 through 5 above should strongly indicate potential for successful academic performance as an MS Economics student.

The GRE/GMAT test requirement for admissions to the economics MS program can, under extraordinary circumstances, be waived at the discretion of the department if the applicant already has been awarded a terminal graduate degree from a regionally or professionally accredited program.

PROBATIONARY ADMISSION

If applicants do not meet items 1 through 6 for unconditional admission, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that an applicant earn a GPA of 3.0 or better in the first two semesters of graduate coursework at UT Arlington.

DEFERRED AND PROVISIONAL ADMISSION

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission.

DENIAL OF ADMISSION

After a thorough review of the application file, a candidate may be denied admission if he or she has less than satisfactory performance on any two of the admission criteria. All applicant data will be carefully reviewed before an admission denial is made.

FELLOWSHIPS AND SCHOLARSHIPS ([HTTP://WWW.UTA.EDU/ECONOMICS/SCHOLARSHIPS.HTML](http://www.uta.edu/economics/scholarships.html))

Students admitted with no provisional conditions to satisfy are eligible for available scholarship and/or fellowship support. A limited number of merit-based scholarships and fellowships may be awarded to graduate students currently enrolled who meet the minimum requirements.

Degree Requirements

MS in Economic DATA ANALYTICS (pending SACSCOC approval)

The MS in Economic Data Analytics program focuses on the major growth area of data analytics. Hal Varian, chief economist at Google, has explained why the demand for data analysis is growing rapidly. Organizations have low-cost computer time, huge quantities of data, and access to software tools that allow data analysis. The problem in using these assets is a shortage of qualified empirical analysts. One must know how to find data, be critical of it, develop it by use of software packages, and explain what has been learned by analysis through the lens of economic theory. Advances in econometrics analysis allow us to better understand key issues, such as pricing and cost, inventory management, population trends, and other issues that impact business and government.

The focus of the MS Economics program is on quantitative analysis based on economic logic. It is a 10-course, 30-hour program highly focused on development of relevant economic theory and empirical tools needed by successful analysts.

There are eight required courses and two electives as indicated in the list of courses:

ECON 5314	ECONOMIC ANALYSIS FOR BUSINESS DECISIONS	3
INSY 5378	DATA SCIENCE: A PROGRAMMING APPROACH	3

ECON 5336	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS I	3
Select 1 of the following 4:		
ECON 5331 or ECON 5321 or ECON 5315 or CE 5338	PROJECT EVALUATION AND FEASIBILITY ANALYSIS GLOBAL BUSINESS ANALYTICS COMPETITION, INNOVATION, AND STRATEGY SYSTEM EVALUATION	
ECON 5327	MONETARY POLICY AND FINANCIAL SYSTEM ANALYSIS	3
ECON 5339	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS II	3
ECON 5341	ADVANCED BUSINESS AND ECONOMIC DATA ANALYTICS	3
ECON 5337	BUSINESS & ECONOMIC FORECASTING	3
ECON 5343	CAUSAL INFERENCE FOR BUSINESS DECISIONS	3
Select 1 of the following 5:		
ECON 5338 or INSY 5377 or INSY 5376 or CIRP 5356 or CIRP 5357	APPLIED TIME SERIES WEB AND SOCIAL ANALYTICS BIG DATA ANALYTICS INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS INTERMEDIATE GEOGRAPHIC INFORMATION SYSTEMS	
Total Hours		24

Graduates of this program are expected to develop knowledge and competencies needed to contribute to data analysis in public policy and private/business fields. An economic theoretical framework is a key part of the program, but the coursework also focuses on the empirical skills required to effectively extract/scrape data from the web and various private and public sources, and carefully analyze it to uncover patterns/trends, and answer significant data-driven real-life questions, relevant to both local and global environments. The program provides our students with an understanding of issues involved in operating in any data environment and equips them with skills needed to analyze a variety of data and present research findings in reports.

The MS Economics program participates in both the Fast Track and Facilitated Admission programs for UT Arlington undergraduates.

Economics - Undergraduate Programs

Overview

Students who plan to earn a degree in economics in one of the specialized fields listed below should consider the following suggestions as to their choice of elective economics courses:

- Those planning to do **graduate work** in economics should include two semesters of calculus, as well as linear algebra in their program. Additional math courses are encouraged and should be selected with assistance from the Economics Department's graduate advisor.
- Those planning to apply for **law school** admission should include ECON 3305 LAWS AND ECONOMICS and ECON 3335 ECONOMICS OF PUBLIC POLICIES among their economics electives.
- Those planning to pursue careers in the **health sector** should include ECON 3301 THE ECONOMICS OF HEALTH and ECON 4311 ECONOMICS FOR MANAGERS among their economics electives.
- Those planning to work as an **economic analyst** should include Industrial ECON 3313 INDUSTRIAL ORGANIZATION AND PUBLIC POLICY, and ECON 4311 ECONOMICS FOR MANAGERS among their economics electives.

Requirements for a Bachelor of Business Administration Degree in Economics

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Pre-Professional Course Requirements - Fulfill the University General Core Requirements (42 hours and 3 elective hours)

DOUBLE MAJORS

A Double Major option for the Bachelor of Business Administration (BBA) in Economics is available. Economics undergraduates who pursue the following Double Major program will not have the option of participating in the Fast Track Program in Business.

Completion of the Double Major is attained by including all of the following courses in the BBA Economics plan and completing with grades of C or better in each of the double major courses listed below:

BBA in Economics and Finance

ACCT 3311	FINANCIAL ACCOUNTING I
Advanced Accounting Elective (ACCT 33xx or 43xx)	
FINA 3315	INVESTMENTS
FINA 3317	FINANCIAL INSTITUTIONS AND MARKETS
FINA 4315	ADVANCED BUSINESS FINANCIAL ANALYSIS
Advanced Finance Elective (FINA 33xx or 43xx)

Minor in Economics for Non-Business Majors

The College of Business:

- Requires half of the course work for a minor in business be completed in residence at UT Arlington. For an 18-hour minor requirement, this would require a minimum of 9 hours of business course work at UT Arlington.
- Requires a grade of C or better in all minor requirement courses.
- Will not use vocational and technical courses (including WECM courses) toward any business minor.

ECONOMICS

ECON 2337	ECONOMICS OF SOCIAL ISSUES (Optional)	0 - 3
ECON 2305	PRINCIPLES OF MACROECONOMICS	3
ECON 2306	PRINCIPLES OF MICROECONOMICS	3

¹ *Mandatory Prerequisites: Prerequisites MUST be met before enrollment in the course. A student should consider these when selecting courses to satisfy the minor requirement and when registering. For a complete list of prerequisites see the Undergraduate Catalog or the Business Undergraduate Advising Office.*

Finance and Real Estate

The Department of Finance and Real Estate at UTA is committed to providing one of the highest quality finance programs in Texas. Located in the center of the Dallas/FortWorth Metroplex, UTA is in the midst of a dynamic employment market. The Department of Finance and Real Estate at UTA has ten full-time faculty. The department offers a full complement of classes in corporate finance, investments, financial institutions and capital markets, and international finance. The opportunity exists for students to participate in the finance industry through internships and part-time employment, while continuing their business education. Firms hiring finance students focus on many issues including managerial finance, banking, investment, brokerage, international money markets, insurance, personal financial planning, and mortgage activities. Firms hiring real estate students focus on topics such as environmental consulting, property tax, investment consulting, property development and management, property financing, mortgage banking, appraisal and valuation, site location analysis, and syndication. The departmental student organizations have ranked among the top student organizations in the country and have been placed high in nationwide competition.

The Finance and Real Estate Department seeks excellence in the providing of education, research and service to its various constituencies. Our mission has several dimensions: to achieve and maintain a reputation of high quality in all our degree programs (undergraduate, masters and doctoral); to generate research that will enhance theory and its real-world application; and to provide requisite service in facilitating the fullest realization of potential of all our fellow participants - students, businesses, governments and society at large.

Finance and Real Estate - Graduate Programs

Master of Science in Quantitative Finance

The Master of Science in Quantitative Finance degree program is designed to meet the growing demand for financial professionals equipped to implement state-of-the-art analytical techniques in support of financial decision-making. Students complete a rigorous seven-course sequence that includes: finance theory, mathematical finance, financial modeling, economic theory, and econometrics. Students then complete a five-course elective program designed jointly by the student and the program advisor. The Master of Science in Quantitative Finance degree program is a specialized degree program designed to build upon the candidate's prior background.

Master of Science in Real Estate (Not currently admitting students)

The purpose of the Master of Science in Real Estate degree program is to provide students an opportunity to obtain a better understanding of the mechanics of real estate decision making in modern society and a greater depth of training in the discipline of real estate decision making than is

possible at the baccalaureate level. The specific objectives of the program are to prepare students for careers in business, government, research, and teaching and for further graduate study. In this program, students are exposed to the theory, research, and practical applications of numerous real estate content areas, including investment analysis, appraisal, real estate development, primary and secondary mortgage markets, and mortgage backed securities. The Master of Science in Real Estate degree program is a specialized degree program designed to build upon the candidate's background.

Accreditation

Both programs are accredited by AACSB-International.

Admission - Master of Science in Quantitative Finance

Admission to the M.S. in Quantitative Finance (MSQF) program is based upon the completion of the general graduate admission requirements of the University. For admission into the MSQF program, an acceptable score in the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) and acceptable undergraduate performance are required. The GMAT is strongly preferred. Preference is given to individuals having extensive mathematics or computer science backgrounds. Students whose native language is not English must also take the Test of English as a Foreign Language (TOEFL), TOEFL iBT, Test of Spoken English (TSE) or International English Language Testing System (IELTS). International applicants scoring below acceptable levels on verbal portions of entrance examinations may be admitted conditional upon passing an English proficiency exam or upon completing the University's Graduate English Skills Program prior to beginning graduate coursework. The GMAT or GRE score shall not be used as the sole criterion for admitting applicants or the primary criterion for denying an applicant's admission into the MSQF program. Specifically, multiple criteria are used to make admission decisions. Unconditional acceptance is based on consideration of all the information listed below, and the decision to deny admission is not based on any single criterion.

Applicants are encouraged to submit with their application a resume that highlights professional and personal accomplishments, linguistic abilities, computer expertise and leadership experience.

Along with the grade point average and GMAT or GRE scores, admission criteria include the following:

1. An undergraduate GPA of at least 3.0 on a 4.0 scale as calculated by Graduate Admissions. The grade point average is calculated on your undergraduate degree using approximately the last 60 hours. A graduate grade point average is used in the index along with GMAT scores when it is a 3.0 or above and based on at least 24 hours.
2. GMAT or GRE sub-scores (verbal and quantitative) are also considered in the admission decision. A typical successful candidate will score at or above the 75th percentile on the quantitative portion, and at or above the 40th percentile on the verbal portion of either exam.
3. International Applicants must submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section to meet this requirement.
4. Grades in specified undergraduate business and non-business courses (math, accounting, economics, statistics, for example)
5. Mathematics coursework through multivariate calculus (calculus III).
6. A satisfactory 200 word essay outlining the role that the MSQF degree is intended to play in the applicant's career objectives.
7. Positive letters of recommendation from three persons familiar with the applicant's academic background and/or work experience who can assess the applicant's potential for success in graduate school.
8. General and specific program accreditation status of degree-granting institution.
9. Professional work experience.
10. Professional certification or licensure.

UNCONDITIONAL ADMISSION

For unconditional admission, items 1 through 6 above should indicate strongly the potential for successful academic performance at the master's level. Students who are unconditionally admitted, have a minimum undergraduate grade point average of 3.0 as calculated by Graduate Admissions (or 3.0 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support. A standardized test score (GMAT or GRE) will not be used as the sole criterion or the primary criterion for determining fellowship and/or scholarship eligibility.

PROBATIONARY ADMISSION

An applicant deemed deficient in one or more of the above criteria may be considered for probationary admission upon careful review of his/her materials. Probationary admission requires the student to maintain a 3.00 grade point average for the first two semesters of enrollment. Additionally, the student may be required to take deficiency courses.

PROVISIONAL, DEFERRED AND DENIED ADMISSION

Provisional admission may be granted if an applicant is unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements. A deferred decision may be granted when a file is incomplete or when denial is inappropriate.

An applicant will likely be denied admission when three or more of items one through six above indicate lack of potential for success in the program. All applicant data will be evaluated carefully before a denial is issued.

Degree Requirements

The M.S. in Quantitative Finance is designed to provide a specialized, highly analytical graduate education to financial managers, financial analysts, and technical personnel. The program consists of 36 credit hours of coursework in finance, economics, mathematics, statistics, and computer science. All students will complete a twenty-one-hour set of foundation classes consisting of:

ECON 5310	MICROECONOMIC THEORY	3
FINA 5323	INVESTMENTS	3
FINA 5327	FINANCIAL DERIVATIVES	3
FINA 5330	REAL OPTIONS	3
FINA 5350	MATHEMATICAL FINANCE	3
FINA 5351	SEMINAR IN FINANCIAL MODELING	3
ECON 5336	APPLIED BUSINESS AND ECONOMICS DATA ANALYSIS I	3
Total Hours		21

The remaining fifteen-hours of coursework are selected by the student, subject to the approval of the program advisor. Courses will be chosen from a list that includes:

1. finance elective classes (international finance, financial institutions, capital markets, real options, and capital budgeting),
2. economics (macroeconomic theory, econometrics, time series analysis),
3. mathematics (advanced calculus, real analysis, differential equations, stochastic processes, and numerical methods),
4. statistics (probability theory, mathematical statistics), and
5. computer science (programming languages, numerical methods, parallel processing, software engineering).

Students who do not have the appropriate background may have to take additional foundation coursework. Quantitative background appropriate to begin the MSQF program consists of a minimum of 6 credit hours of calculus and 3 credit hours each in linear algebra, statistics, and computer programming. Other foundation coursework would include at least 3 credit hours each of microeconomics and finance.

Master of Science in Real Estate (Not currently admitting students)

ADMISSION - MASTER OF SCIENCE IN REAL ESTATE

Along with the grade point average and GMAT or GRE scores, admission criteria include the following:

1. An undergraduate grade point average (GPA) of 3.0 on a 4.0 scale, as calculated by Graduate Admissions, is typical of a successful candidate. This will be integrated into a formula or index that multiplies the GPA by 200 and adds the resulting value to the GMAT Score. An index score greater than 1070 or higher is typical of a successful candidate.
2. GMAT sub scores (verbal and quantitative) are also considered in the admission decision. GMAT sub scores greater than the 30th percentiles are typical of a successful candidate.
3. A GRE quantitative percentile greater than the 30th percentile and Verbal percentile greater than the 30th percentile is typical of a successful applicant.
4. International applicants must submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section to meet this requirement.
5. Grades in specified undergraduate business and non-business courses (math, accounting, economics, statistics, for example)
6. Educational objectives and quality of written expression of the 200 word application essay.
7. Letters (2 are required) of recommendation from two persons familiar with the applicant's academic background and/or work experience who can assess the applicant's potential success in graduate school.
8. General and specific program accreditation status of degree-granting institution.
9. Professional work experience.
10. Professional certification or licensure.

UNCONDITIONAL ADMISSION

For unconditional admission, the applicant's composite total from the index must be 1070 or higher and items 1 through 5 above should strongly indicate potential for successful academic performance as a graduate real estate student.

Students who are unconditionally admitted, have a minimum undergraduate grade point average of 3.0 as calculated by Graduate Admissions (or 3.0 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support. A standardized test score (GMAT) will not be used as the primary criterion for determining fellowship and/or scholarship eligibility.

PROBATIONARY ADMISSION

For an applicant with an index score below 1070, probationary admission may be available if items 1-10 indicate a potential for successful academic performance as a graduate real estate student. Probationary admission requires the student to maintain a 3.00 grade point average for the first two semesters of enrollment. Additionally, the student may be required to take deficiency courses.

PROVISIONAL, DEFERRED AND DENIED ADMISSION

A provisional decision to admit may be granted when the applicant meets criteria for unconditional or probationary status but one or more applicant credentials are incomplete. A deferred decision may be made when an applicant's file is not sufficiently complete to make a final admission decision.

For an applicant with an index score less than 1000 and if items 1-10 do not indicate a potential for successful academic performance as a graduate real estate student admission will likely be denied. All applicant data will be carefully reviewed before an admission denial is made.

WAIVER OF GMAT SCORE FOR GRADUATE CERTIFICATE IN REAL ESTATE DEVELOPMENT STUDENTS

Students who successfully complete the Graduate Certificate in Real Estate Development with a GPA of 3.5 or higher will, upon the recommendation of the Real Estate Admissions Committee and approval of the Dean of Business, be granted a waiver of the GMAT requirement for their application to the Master of Science in Real Estate program.

DEGREE REQUIREMENTS

The program, which can be completed by part-time students who attend classes during the late afternoon, evening hours, and Saturdays, is designed to accommodate students with divergent educational backgrounds and career interests. Each student's program of work must be approved by the Real Estate Graduate Advisor and it must contain a minimum of 15 semester hours in approved advanced graduate real estate courses taken at The University of Texas at Arlington.

A minimum of 36 semester hours is required. All classes must be approved by the Graduate Advisor in Real Estate. Students who do not have a bachelor's degree in business administration may have to take additional coursework (up to 3 semester hours) to acquire a sufficient general business foundation. Students may have foundation courses waived by the Graduate Advisor if they have completed equivalent courses.

ECON 3310 or ECON 3312	MICROECONOMICS (first completed at UTA) MACROECONOMICS	3
FINA 3313	BUSINESS FINANCE	3
REAE 3325	REAL ESTATE FUNDAMENTALS	3
BSTAT 3321 or BSTAT 3322	BUSINESS STATISTICS I (first completed at UTA) BUSINESS STATISTICS II	3
Total Hours		12

A minimum of 36 semester hours including six hours of thesis (REAE 5698 THESIS) is required if the student chooses to write a thesis. The thesis hours will involve working closely with one or more members of the graduate faculty from the Department of Finance and Real Estate on a research project in a specialized area of interest in real estate.

FAST TRACK PROGRAM

The MS in Real Estate participates in the Fast Track program. Students interested in this program should first contact their Undergraduate Advisor.

Graduate Certificate in Real Estate Development

OBJECTIVE

In keeping with the mission of The University of Texas at Arlington to provide lifelong learning opportunities, the Department of Finance and Real Estate now offers a Graduate Certificate in Real Estate Development. The Graduate Certificate in Real Estate Development is designed to provide qualified real estate professionals advanced instruction in real estate development and allow them to further their professional development. This post-baccalaureate Certificate provides an educational opportunity that is narrower in scope, and shorter in duration, than graduate degree programs. It is ideal for people transitioning from one sector of real estate into real estate development, or those in the process of satisfying education requirements for various professional real estate licenses.

ADMISSION

Admissions to the Graduate Certificate in Real Estate Development is based upon the general graduate admission requirements of the University. Generally applicants must have an undergraduate grade point average of at least 2.9 as calculated by Graduate Admissions. A graduate grade point average is used when the applicant has attained at least 24 graduate semester hours.

Applicants whose undergraduate GPA was less than a 2.9 may still be admitted to the Graduate Certificate in Real Estate Development program by meeting the admissions requirements for the M.S. Real Estate program.

Finance and Real Estate - Undergraduate Programs

Finance is the branch of business concerned with management of money. The specific nature of the money management function depends to some extent on the type of organization. Based on similarity of the finance function, finance is generally classified into three areas: corporate finance, investments and securities, and financial institutions. Career opportunities may be available in each of these areas. A brief description of each area along with some courses applicable to each is provided below. A faculty advisor should be consulted before making final decisions relative to a degree program.

Financial Institutions: Commercial banks, savings and loan associations, credit unions, mutual funds, pension funds, finance companies, and insurance companies. Also, various governmental bodies that regulate financial institutions are included.

Investments and Securities: Firms such as investment banks, stockbrokers, institutional investors, and investment advisory services.

Corporate Finance: Manufacturing firms, wholesalers, retailers, and firms engaged in providing all types of non-financial services.

Requirements for a Bachelor of Business Administration in Finance

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

DOUBLE MAJORS

Two Double Major options for the Bachelor of Business Administration (BBA) in Finance are available. Finance undergraduates who pursue one of the following Double Major programs will not have the option of participating in the Fast Track Program in Business.

Completion of the Double Major is attained by including all of the following courses in the BBA Finance plan and completing with grades of C or better in each of the double major courses listed below:

BBA in Finance and Accounting

ACCT 3303	INTRODUCTION TO ACCOUNTING INFORMATION SYSTEMS
ACCT 3311	FINANCIAL ACCOUNTING I
ACCT 3312	FINANCIAL ACCOUNTING II
ACCT 3315	PRINCIPLES OF FEDERAL INCOME TAX
ACCT 4302	ACCOUNTING IN MANAGERIAL PLANNING AND CONTROL
ACCT 4318	AUDITING
ACCT 4304	COST ACCOUNTING
or ACCT 4325	GOVERNMENTAL ACCOUNTING

BBA in Finance and Economics

ECON 3303	MONEY AND BANKING
ECON 3310	MICROECONOMICS
ECON 3312	MACROECONOMICS
ECON 3318	INTRODUCTION TO ECONOMETRICS
ECON 4311	ECONOMICS FOR MANAGERS
or ECON 4323	INTRODUCTION TO MATHEMATICAL ECONOMICS
or ECON 4325	ECONOMIC FORECASTING

Health Care Administration - Graduate Programs

Objectives

The program in Health Care Administration is designed to provide graduate students an integrated, contemporary, and multidisciplinary education. Diverse topics are integrated into the curriculum, research and residencies to provide:

1. An understanding of the modern health industry
2. Knowledge, skills and abilities to assume administrative roles in various organizations in the health industry
3. Opportunities to develop leadership skills
4. Interactions with diverse specialists in the health industry to evaluate and resolve administrative problems

Admission

Admission to the M.S. in Health Care Administration (HCAD) program is based upon the completion of the general admission requirements of Graduate Admissions. For HCAD program admission a score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) and record of one's undergraduate academic performance are required. Students for whom English is not their native language must achieve a TOEFL score of at least 575 (paper-based) or 230 (computer-based). International applicants that score below minimum acceptable levels on the verbal portion of entrance examinations may be admitted under the condition that they pass an English proficiency exam or complete UT Arlington's Graduate English Skills Program prior to beginning graduate coursework. Applicants are encouraged to submit with their application a resume that highlights professional

and personal accomplishments, linguistic abilities, computer expertise and leadership experience. A standardized test score (GMAT or GRE) will not be used as the sole criterion for admitting applicants or the primary criterion for denying an applicant's admission to the HCAD program.

Multiple criteria are used to make admission decisions. Quantitative measures include an applicant's GMAT or GRE scores and grade point average as calculated by Graduate Admissions. These measures are integrated into a formula, or index, that multiplies the grade point average by 200 and adds the total GMAT score. Index factors are weighed equally at the outset of applicant evaluation. A graduate grade point average is used in the index when it is 3.0 or above and is based on at least 24 semester hours. For unconditional admission, the applicant's composite total from the index must be 1050 or higher and items 1 through 5 above should strongly indicate potential for successful academic performance as a graduate health care administration student.

Along with grade point average and GMAT or GRE scores, admission criteria include the following:

1. GMAT or GRE sub scores (verbal and quantitative)
2. GMAT or GRE writing sample
3. Grades in specified undergraduate business and non-business courses (math, accounting, economics, statistics, for example)
4. Educational objectives and quality of written expression of the application essay
5. Letters of recommendation from three persons familiar with the applicant's academic background and/or work experience
6. Undergraduate Major
7. General and specific program accreditation status of degree granting institution
8. Professional work experience
9. Professional certification or licensure
10. A personal interview, at the discretion of the program advisor

UNCONDITIONAL ADMISSION

The GMAT or GRE test may be waived for applicants with an earned graduate degree in an appropriate health care related discipline or profession.

The GMAT or GRE test may also be waived for applicants with five or more years of increasing responsibility in managerial, professional, and/or technical positions in the health care industry, and with a 3.0 grade point average on undergraduate work as calculated by Graduate Admissions; detailed work history required with application.

The GMAT or GRE test may also be waived for applicants who have (within the last 3 years) or will receive an undergraduate degree from UT Arlington with a GPA of 3.2 or higher, as calculated by the graduate school.

Students who are unconditionally admitted, have a minimum undergraduate grade point average of 3.0 as calculated by the Graduate School (or 3.0 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support. A standardized test score (GMAT or GRE) will not be used as the sole criterion or the primary criterion for determining fellowship and/or scholarship eligibility.

PROBATIONARY ADMISSION

For an applicant with an index score below 1050, probationary admission may be available when at least three items of 1 through 5 above strongly indicate potential for successful academic performance as a graduate health care administration student. Items 6 through 10 will also be used to identify positive indicators for admission. Probationary admission requires the student to maintain a 3.00 grade point average for the first two semesters of enrollment. Additionally the student may be required to take deficiency courses.

PROVISIONAL, DEFERRED AND DENIED ADMISSION

A provisional decision to admit may be granted when the applicant meets criteria for unconditional or probationary status but one or more applicant credentials are incomplete. A deferred decision may be made when an applicant's file is not sufficiently complete to make an admit or deny decision.

For an applicant with an index score less than 1000 and other evidence that indicates lack of potential for academic success as a graduate health care administration student, admission will likely be denied. However, all applicant data will be carefully reviewed before an admission denial is made.

Degree Requirements

The M.S. Degree in Health Care Administration requires 39 hours of specified coursework. The thirteen courses are normally taken in the following sequence.

HCAD 5301	HEALTH CARE ADMINISTRATION I	3
HCAD 5337	ETHICS, LEADERSHIP, AND TEAMWORK	3
HCAD 5305	FINANCIAL ACCOUNTING FOR HEALTH CARE INDUSTRY	3
HCAD 5306	MANAGERIAL ACCOUNTING FOR HEALTH CARE INDUSTRY	3
FINA 5315	HEALTH CARE FINANCIAL MANAGEMENT	3

HCAD 5310	HEALTH CARE LAW	3
INSY 5350	HEALTH CARE INFORMATION SYSTEMS	3
OPMA 5377	HEALTH CARE QUALITY ASSESSMENT	3
MARK 5330	SERVICES MARKETING MANAGEMENT	3
BSTAT 5315	STATISTICAL METHODS FOR HEALTH CARE ADMINISTRATORS	3
ECON 5333	ECONOMICS OF HEALTH	3
HCAD 5390	STRATEGIC MANAGEMENT FOR HEALTH CARE ORGANIZATIONS	3
HCAD 5399	GRADUATE HEALTH CARE ADMINISTRATION INTERNSHIP	3
Total Hours		39

Together these courses provide the student with a general background in business and economics and industry relevant knowledge in all of the fundamental areas of managing health care organizations. The residence or internship course requirement can be satisfied in either of two methods. The residence options are as follows:

WORKING RESIDENCE/INTERNSHIP

The completion of a residence/Internship is a primary component of the program for students who do not have prior appropriate professional work experience in a health-related organization. The residence provides students the opportunity to acquire firsthand professional knowledge of and experience with the functioning of a health-related organization. The working residence requires the completion of 240 hours of approved work experience in a professional capacity and a final written report, related to the student's residence, supervised by a member of the faculty of the degree program. The Graduate Advisor will provide overall supervision and coordination of the residence.

RESIDENCE/INTERNSHIP SUBSTITUTE

A student who has substantial and acceptable work experience in a supervisory or professional position may qualify for the residence substitute. Work experience is approved by the Graduate Advisor. Accordingly, a student may request:

Option I

Design, conduct and complete a supervised research project, an effort equivalent in scope to three (3) hours of graduate research-oriented courses, that is highly relevant to the student's intended future professional focus in lieu of a working residence; the project will be supervised by at least one member of the faculty of the degree program, or

Option II

Complete an approved graduate course with significant research content highly relevant for the student's intended future professional field of specialty.

Integrated Degree Plans

BACHELOR OF SCIENCE IN BIOLOGY AND MASTER OF SCIENCE IN HEALTH CARE ADMINISTRATION

A five-year curriculum designed to prepare students for careers in health care administration. The curriculum also prepares students for medical school and advanced study. Students are required to take courses from life sciences, business and liberal arts, culminating in a five-year Master of Science Degree in Health Care Administration (HCAD), including a Bachelor of Science Degree in Biology. The curriculum is offered jointly by the College of Business and the College of Science. The BS in Biology will be conferred at the same time that the student is awarded the MS in Health Care Administration. If a student engaged in this joint degree program is not accepted into the HCAD graduate program, or enters the HCAD program and fails to complete the requirement for the master's degree in HCAD, then in order to earn a BS in Biology, the student must take the same, full complement of courses required to earn the BS as taken by students not enrolled in the BIOL/HCAD joint program.

Students interested in this integrated undergraduate and graduate degree plan should consult with the Biology undergraduate advisor and the Health Care Administration Graduate Advisor.

Graduate Certificate Program

ADMISSION

The certificate program is available to any student who has been admitted into Graduate Studies at UT Arlington. The student should contact the Graduate Advisor to declare the intent to earn the certificate before enrolling in courses to satisfy certificate requirements.

Program of Study

The certificate requires the completion of at least 12 hours of courses. HCAD 5301 is required.

HCAD 5301	HEALTH CARE ADMINISTRATION I	3
Select at least three of the following:		9

ECON 5333	ECONOMICS OF HEALTH
FINA 5315	HEALTH CARE FINANCIAL MANAGEMENT
INSY 5350	HEALTH CARE INFORMATION SYSTEMS
MARK 5330	SERVICES MARKETING MANAGEMENT
Total Hours	12

A grade of A or B must be received for all courses that can be applied to meet certificate requirements.

CHANGE OF PROGRAM TO THE M.S. HEALTH CARE ADMINISTRATION PROGRAM

A student in the Certificate Program must apply for a change of program and meet all admission requirements to enter the M.S. Health Care Administration program.

Information Systems and Operations Management

The Department of Information Systems and Operations Management (ISOM) offers a rich environment for studying and excelling in the fields of technology and/or operations. Students learn the business and technical skills for a more effective and efficient organization. Faculty are dedicated to teaching and nurturing students to help them achieve their full potential. ISOM fosters relationships with the community and works closely with industry to address their technology and operations needs.

The ISOM Department offers a BBA in Information Systems, BBA in Operations Management, an MS in Business Analytics, an MS in Information Systems, and a Ph.D. in Business Administration with emphasis in Operations Management or Information Systems. Students are prepared for a variety of careers in these fields.

Scholastic Activity and Research Interests of the Faculty

Faculty conduct research in their respective fields and make significant contributions to industry and academia by publishing, speaking and attending conferences. All faculty are eager to share their experiences and research knowledge. Research topics include business analytics, security, business intelligence, quality management, operations process and control, and many more.

Information Systems and Operations Management - Graduate Programs

The ISOM Department offers the MS in Business Analytics and the MS in Information Systems. These programs are AACSB-International accredited and STEM approved.

Our graduate students are prepared for advancement in rewarding and challenging careers in such fields as business analyst, systems analyst, project management, systems design, and business analytics. Other College of Business graduate students can enhance their expertise in specific areas by using Information Systems, Operations Management, and Business Statistics courses as electives.

Our advisors are:

Dr. Kay-Yut Chen, Ph.D. Coordinator

Statistics and Operations Management (Business Administration)

Dr. Carolyn Davis, Graduate Advisor

Information Systems, MS

Business Analytics, MS

Dr. Radha Mahapatra, Ph.D. Coordinator

Information Systems (Business Administration)

Master of Science in Business Analytics (MSBA)

OBJECTIVE

The Master of Science in Business Analytics is designed to prepare graduates to identify and implement opportunities for the strategic use of business analytics with an emphasis on business. Students gain knowledge of a broad range of disciplines and functions in the business as well as specialized knowledge of business analytics and its accompanying skill set. An intensive curriculum covering business intelligence, data mining, econometrics, marketing research, statistical techniques prepares students for careers in the field of business analytics.

ADMISSION REQUIREMENTS

Admission to the M.S. in Business Analytics (MSBA) program is based on completion of the general admission requirements of the Graduate School as specified under the Graduate Admissions Requirements and Procedures in the Graduate Catalog.

Admission criteria include the following:

1. An undergraduate grade point average (GPA) of 3.25 on a 4.0 scale, as calculated by Graduate Admissions, is typical of a successful candidate. This will be integrated into a formula or index that multiplies the GPA by 200 and adds the resulting value to the GMAT score. An index score greater than 1200 is typical of a successful candidate.
2. The GMAT or the GRE will be considered for an admission decision. Quantitative and Verbal percentiles on the GMAT/GRE should be above the 50th percentile. A GMAT score of 580 is typical of a successful candidate.
3. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog. In addition, the applicant must successfully complete a face-to-face interview (either in person or online) with the MSBA Graduate Advisor.
4. Educational objectives and quality of written expression of the application essay.
5. Letters of recommendation from three persons familiar with the applicant's academic background and/or work experience who can assess the applicant's potential success in graduate school.
6. Professional work experience. Applicants should submit a resume that highlights professional and personal accomplishments, linguistic abilities, computer expertise, analytics expertise, and leadership experience.

UNCONDITIONAL ADMISSION

For unconditional admission, an applicant must meet criteria 1 through 5.

PROBATIONARY ADMISSION

For an applicant with an index score below 1200, probationary admission may be available when other criteria show positive indicators for admission. Students admitted on probationary status must meet probationary admission conditions as specified by the MSBA Graduate Advisor.

PROVISIONAL, DEFERRED AND DENIED ADMISSION

Provisional, deferred, and denied admission decisions meet the criteria as defined under Admissions Requirements and Procedures in the Graduate Catalog.

DEGREE REQUIREMENTS

The MSBA is a non-thesis program consisting of 36 semester hours to include required courses in the areas of business acumen and communication, data acquisition and architecture, and statistics and analytics. Electives sufficient to complete the program are selected with approval of the MSBA Graduate Advisor. When there is equivalent work/course experience, the student must meet with the MSBA Graduate Advisor to select alternate coursework.

ACCT 5307	MEASUREMENT AND ANALYSIS FOR BUSINESS DECISION-MAKING	3
MANA 5344	EVIDENCE-BASED MANAGEMENT	3
INSY 5337	DATA WAREHOUSING AND BUSINESS INTELLIGENCE	3
INSY 5339	PRINCIPLES OF BUSINESS DATA MINING	3
ECON 5337	BUSINESS & ECONOMIC FORECASTING	3
INSY 5379	BUSINESS ANALYTICS CAPSTONE PROJECT	3

Elective courses as approved by the MSBA Graduate Advisor. Foundation courses may not be used as advanced electives.

FOUNDATION REQUIREMENTS

When the applicant does not have a business degree, three of the following foundation courses are required making the program a total of 45 semester hours.

ACCT 5301	ACCOUNTING ANALYSIS I	3
ECON 5311	ECONOMIC ANALYSIS	3
FINA 5311	BUSINESS FINANCIAL MANAGEMENT	3
MARK 5311	MARKETING	3
MANA 5312	MANAGEMENT	3

Transfer Credit

A maximum of 9 hours of advanced coursework may be transferred in from other AACSB-accredited schools if approved by the MSBA Graduate Advisor.

Master of Science in Information Systems (MSIS)

OBJECTIVE

The Master of Science in Information Systems is designed to provide graduates with both a general knowledge of business and a specialized knowledge of information systems. Students are exposed to the theory, research, and practical applications of numerous information systems areas including management information systems, database management systems, systems analysis and design, and data communications; and may take electives in general systems concepts, electronic commerce, business analytics, problem formulation, computer science, management sciences, research, and other related fields. The program is designed to prepare students for information systems careers in business and industry, as well as in government and nonprofit organizations.

ADMISSION REQUIREMENTS

Admission to the M.S. in Information Systems (MSIS) program is based on completion of the general admission requirements as specified under Admissions Requirements and Procedures in the Graduate Catalog.

Admission criteria include the following:

1. An undergraduate grade point average (GPA) of 3.00 on a 4.0 scale (as described in the Graduate Catalog) is typical of a successful candidate. This will be integrated into a formula or index that multiplies the GPA by 200 and adds the resulting value to the GMAT score. An index score greater than 1080 is typical of a successful candidate.
2. The GMAT or the GRE will be considered for an admission decision. Quantitative and Verbal percentiles on the GRE should be above the 40th percentile. Quantitative and verbal percentiles on the GMAT should be above the 30th percentile. The GMAT is preferred. A GMAT score of 480 is typical of a successful candidate. The GMAT or GRE test may be waived for applicants with an earned graduate degree in an appropriate information systems related discipline or profession. The GMAT or GRE test may also be waived for applicants with five or more years of increasing responsibility in managerial, professional, and/or technical positions in the information systems or related field as proven by their resume and supervisor confirmation. The GMAT/GRE test may also be waived for applicants who meet the Facilitated Admission and Fast Track criteria as defined under Admissions Requirements and Procedures in the Graduate Catalog.
3. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog.
4. Educational objectives and quality of written expression of the application essay.
5. Letters of recommendation from three persons familiar with the applicant's academic background and/or work experience who can assess the applicant's potential success in graduate school.
6. Professional work experience. Applicants should submit a resume that highlights professional and personal accomplishments, linguistic abilities, computer expertise, professional certification or licensure, and leadership experience. In addition, the immediate supervisor should submit a letter confirming work experience.

Unconditional Admission

For unconditional admission, an applicant must meet criteria 1 through 5.

Probationary Admission

For an applicant with an index score below 1080, probationary admission may be available when other criteria show positive indicators for admission. Students admitted on probationary status must meet probationary admission conditions as specified by the MSIS Graduate Advisor.

Provisional, Deferred and Denied Admission

Provisional, deferred, and denied admission decisions meet the criteria as defined under Admissions Requirements and Procedures in the Graduate Catalog.

DEGREE REQUIREMENTS

The Department of Information Systems and Operations Management provides two Master's tracks: a Thesis Option for those intending to later pursue a Ph.D. in Information Systems, and a Non-Thesis track, a traditional flexible option. The thesis track program provides preparation for entry into a Ph.D. program. The second option is the flexible non-thesis program enabling a degree candidate greater flexibility in designing their program.

The thesis option consists of a minimum of 30 semester hours

Master of Science in Information Systems: Thesis Option

BSTAT 5325	ADVANCED STATISTICAL METHODS	3
INSY 5337	DATA WAREHOUSING AND BUSINESS INTELLIGENCE	3
INSY 5339	PRINCIPLES OF BUSINESS DATA MINING	3
INSY 5342	ADVANCED SYSTEMS DESIGN	3
INSY 5373	INFORMATION SYSTEMS PROJECT MANAGEMENT	3
Elective courses approved by the Graduate Advisor. Foundation courses may not be used as advanced electives.		9
Thesis work taken in the last semester		6
Total Hours		30

The thesis student must be enrolled in six hours of thesis. Once the student is enrolled in the thesis course, continuous enrollment is expected. The student must be enrolled in six hours of thesis during the semester in which the thesis is defended and the final Master's Examination is unconditionally passed. The degree candidate must defend the thesis in a final oral examination open to all members of the Faculty.

The non-thesis option consists of 33 semester hours.

Master of Science in Information Systems: Non-Thesis Option

BSTAT 5325	ADVANCED STATISTICAL METHODS	3
INSY 5337	DATA WAREHOUSING AND BUSINESS INTELLIGENCE	3
INSY 5339	PRINCIPLES OF BUSINESS DATA MINING	3
INSY 5342	ADVANCED SYSTEMS DESIGN	3
INSY 5373	INFORMATION SYSTEMS PROJECT MANAGEMENT	3
INSY 5375	MANAGEMENT OF INFORMATION TECHNOLOGIES	3
Elective courses approved by the Graduate Advisor. Foundation courses may not be used as advanced electives.		15
Total Hours		33

The non-thesis option electives can be focused in two tracks: systems development and business analytics. The systems development track concentrates on the analysis, design, and implementation of business systems and their management issues. Courses in this track cover such topics as object-oriented technology, data base design, advanced systems design techniques, and project management. The business analytics track concentrates on technologies and skills needed to analyze big data to gain insights which help improve business decisions and planning. Courses in this track would cover such topics as data mining, data warehousing, statistical computing, and selective statistics topics. The student must meet with the MSIS Graduate Advisor to determine the appropriate coursework for the selected track.

When there is equivalent work/course experience, the student must meet with the MSIS Graduate Advisor to select alternate coursework. An approved 3-credit hour graduate internship (INSY 5399 GRADUATE INFORMATION SYSTEMS INTERNSHIP) may also be taken as an elective. Students who do not have work/course experience in information systems will be required to take INSY 5309, INSY 5335, and INSY 5341 as part of their electives.

Transfer Credit

A maximum of 9 hours of advanced coursework may be transferred in from other AACSB-accredited schools if approved by the MSIS Graduate Advisor.

Information Systems and Operations Management - Undergraduate Programs

The Department of Information Systems and Operations Management offers the BBA in Information Systems, the BBA in Operations Management, the BS in Information Systems, and a minor in Information Systems. Students develop generalized business knowledge as well as specialized skills for addressing technical and operations needs of an organization. Students are prepared for a variety of jobs including business analyst, programmer/developer, systems designer, supply chain management, and operations process and control.

Requirements for a Bachelor of Business Administration in Information Systems

The student concentrating in information systems is encouraged to take a computer science course as an outside elective. Required information systems electives and advanced business electives should be selected with the advice of an academic advisor.

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Pre-Professional Course Requirements - Fulfill the University General Core Requirements (42 hours and 3 elective hours)

DOUBLE MAJORS

A Double Major option for the Bachelor of Business Administration (BBA) in Information Systems is available. Information Systems undergraduates who pursue the following Double Major program will not have the option of participating in the Fast Track Program in Business.

Completion of the Double Major is attained by including all of the following courses in the BBA Information Systems plan and completing with grades of C or better in each of the double major courses listed below:

BBA in Information Systems and Accounting

ACCT 3303	INTRODUCTION TO ACCOUNTING INFORMATION SYSTEMS
ACCT 3311	FINANCIAL ACCOUNTING I
ACCT 3312	FINANCIAL ACCOUNTING II
ACCT 3315	PRINCIPLES OF FEDERAL INCOME TAX
ACCT 4302	ACCOUNTING IN MANAGERIAL PLANNING AND CONTROL
ACCT 4318	AUDITING
ACCT 4304	COST ACCOUNTING
or ACCT 4325	GOVERNMENTAL ACCOUNTING
Advanced Economics Elective (ECON 33xx or 43xx)

Minor in Information Systems

The College of Business:

- Requires half of the course work for a minor in business be completed in residence at UT Arlington. For an 18-hour minor requirement, this would require a minimum of 9 hours of business course work at UT Arlington.
- Requires a grade of C or better in all minor requirement courses.
- Will not use vocational and technical courses (including WECM courses) toward any business minor.

For a complete list of prerequisites see the Undergraduate Catalog or the Business Undergraduate Advising Office.*

Management

The Management Department offers a BBA in Management, a MS in Human Resource Management and a Ph.D. in Business Administration with emphasis in Strategic Management, Organizational Behavior, Human Resource Management, and International Business. The department also offers courses that support the Master of Business Administration (MBA), Master of Health Care Administration (HCAD), as well as many of the College's other specialized Masters programs.

Regardless of the degree program, the Department of Management is committed to providing a high quality educational experience for students to develop the knowledge and skills necessary for leadership roles in society. We are also committed to the creation and dissemination of new knowledge through active research agendas. Our dedicated and talented faculty regularly publish in some of the field's leading journals and serve on a number of editorial boards.

Management - Graduate Programs

Objective

The basic purpose of the Master of Science degree in Human Resource Management is to provide students with both a general knowledge of business and a specialized knowledge in human resource management. Students are exposed to the theory, research and practical applications of numerous

content areas, including human resource strategy and policy, human resource planning, human resource information systems, career planning and development, employee relations law, organization change and development, employee selection, compensation, training and development and employee diversity in organizations. The program is designed to prepare students for human resource management careers in business and industrial firms, as well as government and nonprofit organizations.

Accreditation

The Master of Science in Human Resource Management is accredited by the AACSB-International (Association to Advance Collegiate Schools of Business-International).

The Master of Science in Human Resource Management curriculum is also accredited by SHRM National Association to meet their guidelines.

The Master of Science in Human Resources Management curriculum has been certified to meet the guidelines for the HRCI re-accreditation.

Admission Requirements to the Master of Science in Human Resource Management

Admission to the Master of Science in Human Resource Management (MSHRM) program is based upon the completion of the general admission requirements of Graduate Admissions. For admission into the MSHRM program an acceptable score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) and acceptable academic undergraduate performance are required. The GMAT is strongly preferred.

Students for whom English is not their native language must also take the Test of English as a Foreign Language (TOEFL), TOEFL iBT, Test of Spoken English (TSE) or International English Language Testing System (IELTS). International applicants that score below minimum acceptable levels on the verbal portion of entrance examinations may be admitted under the condition that they pass an English proficiency exam or complete UT Arlington's Graduate English Skills Program prior to beginning graduate coursework.

A standardized test score (GMAT or GRE) will not be used as the sole criterion or the primary criterion for determining an applicant's admission to the MSHR program. Specifically, multiple criteria are used to make admission decisions. Unconditional acceptance is based on consideration of all the information listed below and the decision to deny admission is not based on any single criterion.

Applicants are encouraged to submit with their application a resume that highlights professional and personal accomplishments, linguistic abilities, computer expertise and HR experience.

Along with the grade point average and GMAT or GRE scores, admission criteria include the following:

1. An undergraduate grade point average (GPA) of 3.00 on a 4.0 scale, as calculated by Graduate Admissions, is typical of a successful candidate. This will be integrated into a formula or index that multiplies the approximately the last 60 hours of the undergraduate GPA by 200 and adds the resulting value to the GMAT Score. An index score greater than 1100 is typical of a successful candidate.
2. GMAT sub scores (verbal and quantitative) are also considered in the admission decision. A GMAT total score greater than 500 is typical of a successful candidate.
3. A GRE quantitative percentile greater than 50% and Verbal percentile greater than 50% is typical of a successful applicant.
4. An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined in the TOEFL and IELTS Test Score Minimums section under Admissions Requirements and Procedures in the Graduate Catalog.
5. Grades in specified undergraduate business and non-business courses (math, accounting, economics, statistics, for example)
6. Educational objectives and quality of written expression of the 200 word application essay.
7. Letters of recommendation from three persons familiar with the applicant's academic background and/or work experience who can assess the applicant's potential success in graduate school.
8. General and specific program accreditation status of degree-granting institution.
9. Professional work experience.
10. Professional certification or licensure.

UNCONDITIONAL ADMISSION

For unconditional admission, the applicant's composite total from the index must be 1100 or higher.

Students who are unconditionally admitted, have a minimum undergraduate grade point average of 3.00 as calculated by Graduate Admissions (or 3.00 at the graduate level), and enroll for a minimum of six semester credit hours will be eligible for available fellowship and/or scholarship support. A standardized test score (GMAT) will not be used as the sole criterion or the primary criterion for determining fellowship and/or scholarship eligibility.

PROBATIONARY ADMISSION

For an applicant with an index score below 1100, probationary admission may be available when at least three items of 1 through 5 above strongly indicate potential for successful academic performance as a graduate HR student. Items 6 through 10 will also be used to identify positive indicators for

admission. Probationary admission requires the student to maintain a 3.00 grade point average for the first two semesters of enrollment. Additionally the student may be required to take deficiency courses.

PROVISIONAL, DEFERRED AND DENIED ADMISSION

A provisional decision to admit may be granted when the applicant meets criteria for unconditional or probationary status but one or more applicant credentials are incomplete. A deferred decision may be made when an applicant's file is not sufficiently complete to make an admit or deny decision.

For an applicant with an index score less than 1040 and other evidence indicating lack of potential for academic success as a graduate HR student, admission will likely be denied. However, all applicant data will be carefully reviewed before an admission denial is made.

Degree Requirements

The program is designed primarily for the student who has a bachelor's degree in business administration. A minimum of 30 semester hours is required if the student chooses to write a thesis. If the student chooses not to write a thesis, a minimum of 36 semester hours is required. Students who do not have bachelor's degrees in business administration may have to take additional coursework (up to 18 semester hours) to acquire sufficient general business knowledge for effective performance as a human resource executive.

Coursework for the program includes six hours of required work in research and statistical methods, 15 hours of required work in human resources and policy, and thesis or elective hours in related management courses to complete the 30- or 36-hour requirements. For the students who choose to write a thesis, the six hours of thesis (taken in the final semester) will involve working closely with one or more members of the graduate faculty from the Department of Management on a research project in a specialized area of interest in human resource management.

The curriculum is as follows:

Core Courses	18
ACCT 5301	ACCOUNTING ANALYSIS I
ECON 5311	ECONOMIC ANALYSIS
OPMA 5361	OPERATIONS MANAGEMENT
MARK 5311	MARKETING
FINA 5311	BUSINESS FINANCIAL MANAGEMENT
MANA 5312	MANAGEMENT
Advanced Courses (thesis and non-thesis)	
Required human resource and policy courses:	21
MANA 5340	STRATEGIC HUMAN RESOURCE MANAGEMENT
MANA 5341	STAFFING AND PERFORMANCE MANAGEMENT
MANA 5322	COMPENSATION & REWARD SYSTEMS
MANA 5323	TRAINING AND DEVELOPMENT
MANA 5327	HUMAN RESOURCE LAW
MANA 5336	STRATEGIC MANAGEMENT
MANA 5334	ORGANIZATION CONSULTING & RESEARCH
Required research courses:	6
BSTAT 5325	ADVANCED STATISTICAL METHODS
MANA 5329	HR METRICS AND ANALYTICS (Prerequisite BSTAT 5325)
Additional electives as required based on core waiver policy	
Total Hours	45

WAIVERS AND TRANSFER CREDIT

There are three types of required courses: deficiency, core and advanced. Programs of work will normally vary in length from 36 to 45 hours (plus deficiency courses), depending upon waivers granted. The first three waivers of core courses will be used to expand the number of electives in the advanced program rather than shorten the overall program. Additional waivers of core courses may reduce the program to a minimum of 36 hours. Applicants may have both deficiency and core courses waived without the requirement for a substitute course if they have completed, during the last 10 years, a similar course at a recognized college or university and received a "B" or better grade.¹ Extensions to this 10 year limit may be granted for managers and executives who have completed educational activities to remain current or have extensive related experience. Additionally, a maximum of 9 hours of advanced coursework may be transferred in from other AACSB accredited schools if approved by program advisor. Transfer of graduate classes from other universities will be considered on a case by case basis.

- ¹ Note: The University of Texas at Austin offer Business Foundations Programs (BFP) for non-business majors that provide solid foundations in basic business concepts. BFP courses and courses from equivalent programs for non-business majors at other colleges/universities may not be used for course waiver credit.

Management - Undergraduate Programs

Requirements for a Bachelor of Business Administration Degree in Management

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.

Marketing

Marketing is critically important to businesses. Top management realizes that a company must understand the marketplace and buyer needs and wants if it is to grow and compete effectively. Marketing centers on the customer and focuses on processes aimed at creating, delivering, and communicating value to customers.

The discipline of marketing will provide you with outstanding career opportunities in professional selling, marketing research, advertising, purchasing, distribution management, product development, wholesaling, and product management. The demand for marketing professionals continues to grow as today's organizations place greater emphasis on effective marketing as a means of achieving their goals.

Ever increasing worldwide competition, expanding global market, and accelerating technological advancements provide exciting business challenges that UTA's marketing curriculum is uniquely designed to address. With a diverse faculty experienced in both practical and theoretical applications, the marketing department at UTA provides insightful learning opportunities that will equip you with the knowledge to meet the challenges of the new economy.

Marketing - Graduate Programs

Objective: Master of Science in Marketing Research

The objective of the Master of Science in Marketing Research (MSMR) is to prepare students for successful careers in marketing research, marketing planning, product or brand management, and related fields. The program is project oriented; many of the required advanced courses conduct client projects as a part of the course requirements. The projects are team-based; class members work in teams to accomplish project objectives.

Assistantships

Graduate Teaching Assistantships may be offered to students who have been accepted in the program. The Marketing Department will request and evaluate the applications and make the selection of applicants for the positions based on departmental needs and university requirements. Graduate

Research Assistantships may be offered on an as needed basis. When GRA positions are available, the Marketing faculty involved in the project will solicit applications from students who have been admitted to the program. The applicants will be evaluated by the appropriate faculty.

Scholarships

Students who have been accepted into the program are encouraged to pursue scholarship opportunities within the College of Business and the university.

Scholarship funds from the member firms of the MSMR Advisory Board and the MSMR Alumni Association may be available to support students who have been accepted into the program and are enrolled full-time and in good standing with the University.

Students are advised that scholarship opportunities are available. A faculty committee and, if appropriate, MSMR alumni select recipients based on a rank ordering of eligible students

Accreditation

The Master of Science in Marketing Research degree is accredited by the AACSB International - The Association to Advance Collegiate Schools of Business.

Admission Requirements

Admission to the Master of Science in Marketing Research (MSMR) program is based on completion of the general admission requirements of Graduate Admissions. For MSMR program admission a score on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) and the official record of undergraduate (and post-graduate, if applicable) are required. The GMAT is preferred.

Applicants for whom English is not their native language must also present official results of the Test of English as a Foreign Language (TOEFL), TOEFL iBT, Test of Spoken English (TSE) or International English Language Testing System (IELTS). The MSMR program's objective is to have all applicants qualified to be either Graduate Teaching Assistants (GTA) or Graduate Research Assistants. (GRA).

A standardized test score (GMAT or GRE) will not be used as the sole criterion for determining an applicant's admission to the MSMR program. The admission decision is made based on the totality of information listed below:

1. An undergraduate grade point average (GPA) greater than 3.25 on a 4-point scale (as calculated by Graduate Admissions) is indicative of an applicant who is likely to be successful in the program. The GPA calculated by the Graduate School is based on the last 60 hours of the undergraduate program. A graduate GPA is used when it is 3.0 or above and based on at least 24 hours.
2. Either the GMAT or the GRE will be considered for the admission decision. On both the GMAT and GRE, both quantitative and verbal component percentiles above the 50th percentile are indicative of an applicant who can be successful in the program. A GMAT combined score of 580 or above is indicative of an applicant who is likely to be successful in the program. There is no commonly accepted conversion from GRE to GMAT for combined scores. The algorithm provided by the Educational Testing Service (ETS) is used to estimate the likely GMAT combined score for student who have submitted GRE score to be considered for admission. The midpoint of the confidence interval is assumed to be an estimator for a likely GMAT combined score. The results from 1 and 2 above are combined to create an index. The index is created by multiplying the GPA by 200 and adding the GMAT combined score (or the estimate based on GRE scores.) An index score of 1200 or greater is indicative of an applicant who is likely to be successful in the program.
3. International applicants must submit official scores of measures designed to demonstrate English language proficiency. English language proficiency is indicative of an applicant who is likely to be successful in the program. The MSMR program's objective is to have all students qualified to be able to perform as Graduate Teaching Assistants and/or Graduate Research Assistants. The MSMR program requires a minimum of 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with section scores of at least 22 for the writing section, 23 for the speaking section, 20 for the reading section, and 16 for the listening section. International students who do not meet program requirements may be asked to provide additional information to demonstrate English language proficiency.
4. Grades in specific undergraduate business and non-business courses (math, accounting, economics, statistics, for example).
5. Educational objectives and passion for marketing research, as well as quality of written expression of the 200 word application essay or the personal statement.
6. Letters of recommendation from three persons familiar with the applicant's work ethic as evidenced in academic background or work experience.
7. A personal interview in person or by telephone.
8. General and specific program accreditation status of degree-granting institution.
9. Professional work experience.
10. Professional certification or licensure.

UNCONDITIONAL ADMISSION

To be considered for Unconditional Admission, the applicant's index score should be 1200 or higher, and items 3 through 10 above should be indicative of strong potential to be successful in this program.

PROBATIONARY ADMISSION

For an applicant with an index score below 1200, probationary admission may be available when items of 1 through 10 above strongly indicate potential for successful academic performance as an MSMR student. When GMAT Verbal or Quantitative percentiles are below the 50th percentile, probationary admission may be available. For applicants submitting the GRE as part of the application for admission, when GRE verbal or Quantitative percentiles are below the 50th percentile, probationary admission may be available. Students admitted on probationary status for low verbal or quantitative percentiles must satisfactorily complete one or more English and/or math courses in the first two semesters as specified by the Graduate Advisor. Probationary admission requires the student to maintain a 3.00 grade point average for the first two semesters of enrollment. Additionally the student may be required to take deficiency courses.

PROVISIONAL ADMISSION

A provisional decision to admit an applicant may be granted when the applicant meets the criteria for unconditional or probationary admission but one or more applicant credentials are missing from the applicant file.

ADMISSION DENIAL

If an applicant's record does not provide sufficient evidence of likelihood of being successful in the program following careful review of all available information, admission will be denied.

Degree Requirements

The program is designed primarily for students who have earned a Bachelor of Business Administration (BBA or equivalent). For those students, the program consists of the 36 semester hours of Advanced Courses.

Students with degrees other than BBA are required to take up to 21 Hours of Foundation courses required by the College of Business. Foundation courses may be waived if equivalent coursework has been completed with a grade of B or better within the previous 5 years.

Students are encouraged to complete deficiency requirements prior to admission or at the beginning of their studies. College courses in business math (including probability and set theory, linear equations, matrix algebra, compound interest, annuities, and differential and integral calculus), business statistics, and computers (including general topics, spreadsheets and word processing and electronic communications) may be taken prior to entry into the program.

Total Hours

57

Marketing Research Internship

The Marketing Research Internships (MARK 5396 MARKETING RESEARCH INTERNSHIP I and MARK 5397 MARKETING RESEARCH INTERNSHIP II) represent an integrative component of the MSMR program. MSMR students are responsible for developing the relationships necessary to secure an internship offer. The internship opportunities developed by the students require approval by the Marketing Department.

The internships each consist of a minimum of 240 hours (12 weeks half-time); the typical internship parallels the start and end of a semester (spring, summer and fall) but internship opportunities may require a more lengthy commitment on the part of the student.

The MSMR intern must be working on marketing research projects; they must have some managerial input into the project; and they must be supervised by someone with a background in marketing research.

Admission and Degree Requirements

Please see the Ph.D.in Business Administration (p. 174) section of this catalog for admission and degree requirements for the Ph.D.in Business Administration (Marketing emphasis)

Marketing - Undergraduate Programs

The Department of Marketing offers a Bachelor of Business Administration (B.B.A.) in Marketing and an undergraduate Certificate in Sales. Students will develop knowledge centered on a customer centric view of the market, long-term customer satisfaction, and the development of mutually beneficial relationships. The discipline of marketing prepares students for exciting and rewarding career opportunities where they serve their internal and external customers.

Sales Certificate Program

The Sales Certificate program prepares students for a challenging and rewarding career in the sales profession. The program will enhance students' abilities to sell themselves, their ideas, as well as products and services. It also equips students with knowledge and skills related to managing mutually beneficial relationships with customers. The certificate program stresses the ethical aspects of sales, deemed essential for sustainable growth, and combines a strong theoretical background with emphasis on applications and practice. The Sales Certificate is available to business and non-business majors.

ADMISSION AND ELIGIBILITY REQUIREMENTS

Students seeking admission to the Sales Certificate program must have completed 45 hours of college credit with a minimum UTA GPA of 2.0.

To remain eligible for the Sales Certificate, a student must maintain a 2.0 or better GPA in program coursework and earn a grade of C or better in every Sales Certificate course.

A student who receives any combination of grades of D or F in more than one Sales Certificate course or in two attempts of the same Sales Certificate course will be dismissed from the program.

CERTIFICATE REQUIREMENTS FOR BUSINESS MAJORS

The Sales Certificate requires 18 credit hours for business majors: 12 credit hours required and an additional 6 credit hours from elective options as listed.

Required

BCOM 3360	EFFECTIVE BUSINESS COMMUNICATION	3
MARK 3321	PRINCIPLES OF MARKETING	3

Certificate in Entrepreneurship

The Certificate in Entrepreneurship provides students skills and training in: identifying innovations and market opportunities, writing a business plan, obtaining funding, and launching a new company. The certificate enhances a student's general education, academic major and/or career preparation in innovation and entrepreneurship. All students will take a common course that will present the fundamentals of entrepreneurship. Two additional courses will be taken, based on the students' interests, drawn from a list of approved courses across academic disciplines. This certificate is designed for current UT Arlington students and can be earned as part of a degree program at both the undergraduate and graduate level. It can also be earned by non-degree seeking students as a stand-alone certificate.

UNDERGRADUATE CERTIFICATE IN ENTREPRENEURSHIP

The certificate requires a total of nine semester credit hours of coursework, which can be completed in conjunction with an existing undergraduate degree in any field or independently as a special student.

ADMISSION REQUIREMENTS

Undergraduate students in good standing at UT Arlington

For non-enrolled students (special, certificate only students)

- High school degree or GED, and
- 1100 on the SAT

UNDERGRADUATE CERTIFICATE REQUIREMENTS

To receive the certificate, all courses must be completed at UT-Arlington with a grade of B or higher.

MANA 3325	ENTREPRENEURSHIP AND VENTURE MANAGEMENT	3
Select two from the following list reflecting appropriate area of study		6
ART 4382	ENTREPRENEURSHIP IN THE ARTS	
ENGR 4302	ENGINEERING ENTREPRENEURSHIP

MANA 4345	SOCIAL ENTREPRENEURSHIP	
placeholder for URPA 4354 NONPROFIT MANAGEMENT AND SOCIAL ENTREPRENEURSHIP		
Total Hours		9

For additional information or questions about the undergraduate certificate, please contact the College of Business Undergraduate Advising Office at 817-272-3368 or email ugadvise@uta.edu

GRADUATE CERTIFICATE IN ENTREPRENEURSHIP

The certificate requires a total of nine semester credit hours of coursework, which can be completed in conjunction with an existing Master's or PhD degree in any field or independently as a special student.

ADMISSION REQUIREMENTS

Graduate students in good standing at UT Arlington

For non-enrolled students (special, certificate only students)

- Bachelor's Degree from an accredited university, and
- GPA of 3.0 for last 60 hours of undergraduate coursework.

GRADUATE CERTIFICATE REQUIREMENTS

To receive the certificate, all courses must be completed at UT-Arlington with a grade of B or higher.

URPA 5356	ENTREPRENEURSHIP IN PUBLIC AND NON-PROFIT MANAGEMENT	
Total Hours		9

For additional information or questions about the graduate certificate, please contact the College of Business Graduate Business Services Office at 817-272-3004 or email gradbiz@uta.edu.

College of Education

Mission

The mission of the College of Education (CoEd) is to be a global leader of excellence in the education sciences.

History and Overview

In 1979, The Center for Professional Teacher Education, now the College of Education, began offering coursework at the graduate level. In the late 1980s, a Master of Education and Teaching degree (M.Ed.T.) was approved. This degree served teachers who wanted the opportunity to extend their knowledge base in education and related fields with graduate coursework. The degree enabled students to combine graduate coursework in education with study in an academic discipline related to their teaching field or specialization. Its success led to the expansion of education offerings to include additional certifications in Reading and Educational Administration as well as supplemental certification in Bilingual Education (BIL), English as a Second Language (ESL), and Gifted and Talented (G/T).

As one of only a few Texas universities authorized to offer post baccalaureate teacher certification at the graduate level, the College of Education began offering graduate level teacher certification with an M.Ed.T. in the summer of 1998. With expansion of program offerings, the M.Ed.T. no longer met the needs of all degree-seeking students. In 1999, the College of Education added two new master's degree programs, a Master of Education (M.Ed.) in Educational Leadership and Policy Studies and a Master of Education (M.Ed.) in Curriculum and Instruction.

The M.Ed.T. is now offered exclusively to students seeking teacher certification (early childhood - grade 6, middle level, secondary and all level) at the graduate level. The M.Ed. in Educational Leadership and Policy Studies is available to students pursuing principal certification, principal certification emphasizing dual language, as well as higher education administration. The M.Ed. in Curriculum and Instruction (C&I) is for educators wanting to extend their knowledge in education and related fields, including science and mathematics. The M.Ed. in C&I also serves students wanting to earn a master's degree along with Reading Specialist Certificate and the Master Reading Teacher Certificate. The Department also offers the M.Ed. in C&I with science, mathematics, or social studies education as specialization areas. Supplemental certification in Bilingual Education and English as a Second Language may also be added to the M.Ed. in C&I. Superintendent certification is also available.

The Doctor of Philosophy (Ph.D.) in K-16 Educational Leadership and Policy Studies was first offered in the summer of 2007. With advancements in technology, many graduate courses are available via the Internet with additional courses being added each semester. The College of Education has an enrollment of more than 1,000 students with approximately 600 students pursuing graduate level degrees certificates.

Conceptual Framework

The conceptual framework of the UT Arlington College of Education was developed collaboratively and has evolved over time. Following the identification of a set of core values held by all involved in the preparation of candidates enrolled in the College, members of the University, PK-12 districts, and area business and foundation communities worked together to develop a shared vision for education.

All activities in the College are guided by the premise that we are Partners for the Future, committed to fostering critical, creative thinkers prepared to engage meaningfully in a dynamic society. This premise is characterized and distinguished by three core values: Professionalism, Knowledge, and Leadership. Research, Diversity, and Technology are themes woven throughout each core value. The College mission, core values, and themes serve as the coherent thread running through all professional programs, guiding the systematic design and delivery of clinical/field experiences, course curricula, assessments, and evaluation. The Conceptual Framework consists of six interrelated and interacting components, which are viewed as essential contexts for shaping informed, skilled, and responsible partners:

- The first core value, **Professionalism**, represents the contention that candidates develop an expertise and specialized knowledge of their field. A high quality of work, standard of professional ethics and behaviors, as well as work morale and motivation are all necessary factors of a developed interest and desire to excel in job performance.
- The second core value, **Knowledge**, represents candidate theoretical or practical understanding of a subject. In today's world, candidate knowledge includes not only academic content mastery, but also skills such as critical thinking, communication, technology literacy, and collaboration, each of which is required for success in college, life, and career.
- The third core value, **Leadership**, represents candidate ability to organize, assist, and support others in the achievement of a common task. Candidates develop and refine their leadership skills within the context of their interactions with PK-20 students, curricula, faculty, and other professionals. The additional three components of the model, Research, Diversity, and Technology, represent themes woven into the core values:
- **Research** encompasses the investigation of ideas and theories with the purpose of discovering, interpreting, and developing new systems, methods, and support for knowledge, behaviors, and attitudes.
- **Diversity** is an indispensable component of academic excellence. A commitment to diversity means a dedication to the inclusion, welcome, and support of individuals from all groups, encompassing the various characteristics of persons in our community such as race, ethnicity, national origin, gender, age, socioeconomic background, religion, sexual orientation, and disability.
- **Technology** is emphasized throughout all programs and is used to support and improve content delivery and student learning.

Scholarly Activity and Research Interests of the Faculty

College of Education faculty members strive to model the characteristics of the most proficient professional educators for all students aspiring to membership in the education professions. Faculty members in the College of Education have consistently achieved recognition for their excellence in teaching in the University and beyond. They have received numerous honors, including the University of Texas System Board of Regents Outstanding Teaching Award, UT System Chancellor's Council Teaching Award, election to UT Arlington's Academy of Distinguished Teachers, and the Piper Professor award at the state level. They have also served as guest lecturers at universities across the country. In addition, numerous faculty members have received recognition for their scholarly publications and professional contributions.

The College of Education also values faculty scholarship for its potential impact on the increased effectiveness of teaching and learning in professional education preparation programs and in public and private school settings. Scholarly and research activities cover a variety of areas represented by the expertise of each individual faculty member.

Evidence of service to the College of Education, the University, the community and the practicing profession is also expected of the faculty. This includes service to local constituencies such as school districts, education service centers, parent-teacher groups, professional associations, and/or other agencies and organizations dedicated to the improvement of teaching and learning. It also encompasses outreach programs, community events, civic leadership, and the promotion of alumni support and involvement. The extensive service activities of faculty members in the various departments have garnered additional awards from the University, the community, the state, and a variety of professional organizations.

Department of Curriculum and Instruction (p. 222)

Curriculum & Instruction faculty scholarship focuses on a wide range of topics associated with teaching and learning. These include improving the effectiveness of instruction in various content areas; studying family support for learning; addressing issues associated with social sciences; using technology to enhance distance education instruction and student mentoring; online supplemental student teacher supervision; the effectiveness of service learning; the connections among brain physiology, cognition, and education; and effective practices in school counselor preparation. Funded projects include providing UT Arlington students as mentors to high school students for college success, math and science cohorts and camps, improving retention in post-secondary education, including college success strategies in educator preparation coursework. For more information about programs in Curriculum and Instruction in the College of Education, go to <http://www.uta.edu/coehp/curricandinstruct>.

Department of Educational Leadership and Policy Studies (p. 235)

In the area of educational administration, research activities and publications have focused on school leadership trends, developing collaborations among the University, public, private and charter schools, fostering creativity in learning organizations, and studying school legal, policy, governance, and finance issues. Current focus is on transition research relative to students, faculty, and leadership across PK-16 school settings, between high school and beyond, and transitions between leadership levels. Other research examines how the media portrays educators and the education profession. See <http://www.uta.edu/coehp/educleadership> for additional information about programs in Educational Leadership and Policy Studies in the College of Education.

Resources

CERTIFICATION AND ADVISING SERVICES

Patty Motlagh (<http://www.uta.edu/coehp/personnel/emp.php?id=29>), Assistant Dean for Student Affairs/Certification Officer, 501 Carlisle Hall (<http://www.uta.edu/maps/index.php?id=8>)

Certification and Advising Services helps students succeed by providing the information and support services needed to achieve their academic and career goals. The Academic Advisors are available to assist students in various stages of preparing for or furthering their careers as educators and school administrators.

Certification and Advising Services also provides information and advising regarding admission requirements and degree plan options, as well as the academic content areas.

To schedule an advising appointment: 817.272.2956

For certification and advising questions: coehpadvising@uta.edu

Information concerning state examinations and application procedures needed to obtain teacher, principal, superintendent, and special program certification in Texas may also be provided by Certification and Advising Services.

To be eligible for certification under all programs, a candidate must meet specific criteria set by the College of Education, the University, and the State Board for Educator Certification. To be recommended to the State Board for Educator Certification/Texas Education Agency for initial teacher certification, a teacher candidate must have successfully completed the following:

- All course work required for certification, including a baccalaureate degree.
- All College of Education certification courses with a grade of C or better and with a minimum GPA of 3.0.

- For purposes of determining eligibility for certification, all applicable grades, including those earned at other institutions, will be used in the calculation of grade point averages.
- Pass all required Texas Examinations for Educator Standards (TExES).

PROFESSIONAL DEVELOPMENT

The Office of Professional Development supports partnerships between the College of Education and PK-16 schools and their communities. Partner public school districts and the College of Education collaborate to provide high-quality learning environments for future teachers. Prospective teacher candidates apply their knowledge of content and pedagogy during both a Field-Based Experience semester and a Student Teaching semester arranged through the Office of Professional Development. The Field-Based Experience semester gives teacher education candidates the opportunity to observe and interact with diverse student populations in variety of formal and informal educational settings at partnership schools. During the Student Teaching semester, these pre-service teachers refine their teaching skills by working directly with students in classrooms, at designated public schools in the candidate's area of certification, guided by a cooperating mentor teacher and supervising university faculty. Contact: Dr. Denise Collins, Director of the Office of Professional Development, 817.272.7448, dacollins@uta.edu.

EDUCATION CAREER SERVICES

www.uta.edu/coehp/career, 817.272.2831, or careerservices@uta.edu.

The Education Career Services office assists education students who are seeking positions as teachers and administrators. Positive collaborative relationships with partners in the various school districts are important to the College, the districts and students. The annual College of Education and Health Professions Career Day is held in March and typically hosts over 50 school districts. Employers can list position vacancies as well as district job fairs with Education Career Services. In addition, Education Career Services offers career planning seminars, which include guidance on resume writing and developing strong interviewing and networking skills. The ultimate goal is to prepare UT Arlington students for the next step in their career development as professional educators and administrators.

UTEACH ARLINGTON

UTeach Arlington is the undergraduate science and mathematics secondary teacher preparation program jointly offered by the College of Science and the College of Education. The program features early field experiences in K-12 schools, courses taught by faculty in both Colleges, guidance from Master Teachers, and scholarship and internship opportunities. Secondary teacher certification that may be earned through UTeach Arlington includes (grades 7-12) Life Science, Physical Science, Chemistry, Physics, Science (Composite), Physics/Mathematics, and Mathematics. UTeach provides teaching kits for science and mathematics teacher education students, as well as certification exam preparation materials, books, journals, and a resource room/student lounge. The UTeach Arlington main office is located in 224 Science Hall. For information, contact: Erin Gonzales, UTeach Arlington Academic Advisor, 817.272.0784, egonzales@uta.edu; or contact Dr. Ann Cavallo, Co-director, College of Education, cavallo@uta.edu; Dr. Greg Hale, Co-director, College of Science, greg@hale.uta.edu; or Dr. Ramon Lopez, Co-director, College of Science, relopez@uta.edu. Visit the UTeach Arlington website at: <http://www.uta.edu/cos/uteach/index.html>.

OFFICE OF DEVELOPMENT AND LEADERSHIP GIFTS

The Office of Development and Leadership Gifts plans, manages and directs the College of Education's comprehensive development program. This entails working with alumni, corporations, foundations, and friends to raise private gifts that will support and enhance the College's strategic priorities for academic programs, student services, research efforts and outreach activities. The office works with the College of Education faculty and administration in the identification, cultivation, solicitation and stewardship of donors and prospects. Contact: Anne Robillard, Director of Development, 817.272.7451 or 817.272.2842, anne.robillard@uta.edu.

ASSESSMENT AND NATIONAL ACCREDITATION

The Office of the Associate Dean for Assessment provides leadership, direction, and oversight for the assessment and continuous improvement processes and analytics for national accreditation in the College of Education, including unit effectiveness and academic affairs as they relate to assessment and accreditation requirements. Contact: Dr. Carrie Y. Barron Ausbrooks, Associate Dean for Assessment, 817.272.5310, causbrooks@uta.edu.

Centers in the College of Education

SOUTHWEST CENTER FOR MIND, BRAIN, EDUCATION

The mission of the Southwest Center for Mind, Brain, Education is to facilitate collaborative relationships among educators, policymakers, and researchers in the cognitive and developmental sciences. The Center seeks to identify and support promising research agendas at the intersection of mind, brain and education. Researchers, educators, and policymakers will find a forum where ideas are welcomed and at the same time critically and rigorously examined. The Center invites individuals interested in how advances in neuroscience, genetics, and cognitive science can inform educational practice and leadership. The Center also seeks to advance educational research by recognizing, and profiting from, the role that practical experience plays in defining promising research directions. Contact: Dr. Marc Schwartz, Director, 817.272.5641, schwarma@uta.edu.

SCIENCE EDUCATION AND CAREER CENTER

The College of Education and the College of Science work collaboratively through the Science Education and Career Center (SECC) to offer our science and mathematics teacher certification students a quiet place to study, and also access to study guides, models, and electronic resources in Biology, Chemistry & Biochemistry, Mathematics, Physics, and Psychology. The SECC is located in room 106 Life Science Building. SECC contact information: 817.272.2129, <http://www.uta.edu/cos/SECC/login.php>.

CENTER FOR BILINGUAL EDUCATION

Created in response to the growing number of English language learners, the Center for Bilingual Education strives to increase the number of qualified bilingual and ESL teachers in Texas. The Center prepares pre-service and in-service teachers to work with linguistically and culturally diverse student populations. The Center also provides technical support to school districts in their implementation of dual language, bilingual, and ESL education programs. Additionally, the Center offers preparation for the certification examinations in the areas of the EC-6 Bilingual Generalist and the Bilingual Target Language Proficiency Test--Spanish. For information, contact Dr. Luis Rosado, Director, 817.272.7567, rosado@uta.edu.

CENTER FOR SOCIAL STUDIES EDUCATION

The goals of the Center for Social Studies Education are to advance social studies education research, improve social studies teacher preparation, and provide outreach to social studies learners and their teachers. The Center includes faculty from the College of Education and Health Professions, the College of Liberal Arts, and the College of Business. The Center faculty coordinate social studies teacher certification at UT Arlington, establish targeted partnerships to advance educational opportunities and excellence in social studies for under-represented and under-served populations, and facilitate collaborative relationships across colleges and universities for the advancement of PK-16 teaching and learning in disciplines such as history, geography, economics, and political science. Contact: Dr. Mary Curtis, Director, mary.curtis@uta.edu.

CENTER FOR PK-16 EDUCATION POLICY AND RESEARCH

The mission of the Center for PK-16 Education Policy and Research, founded in the Department of Educational Leadership & Policy Studies at UT Arlington, is to produce and disseminate cutting-edge research on PK-16 education to inform education policy and practice. We are guided by the belief that educational leadership and opportunity are strengthened by research that takes systemic, integrated approaches to understanding persistent problems across the educational continuum. Contact: Dr. Daniel Saunders, Director, saunders@uta.edu.

Curriculum and Instruction

Undergraduate Degrees

- Bachelor of Arts in Interdisciplinary Studies with EC-6 Bilingual Teacher Certification (p. 229)
- Bachelor of Arts in Interdisciplinary Studies with EC-6 ESL Teacher Certification (p. 229)
- Bachelor of Arts in Interdisciplinary Studies with 4-8 Middle-Level English Language Arts/Social Studies Teacher Certification (p. 232)
- Bachelor of Science in Interdisciplinary Studies with 4-8 Middle-Level Math/Science Teacher Certification (p. 233)
- Bachelor of Science in Interdisciplinary Studies with 4-8 Middle Level Generalist Teacher Certification (p. 229)

Graduate Degrees

- Master of Education in Teaching (M.Ed.T.) with Teacher Certification (p. 223)
- Master of Education in Curriculum and Instruction (p. 225)
- Master of Education in Curriculum and Instruction - Science Education (p. 225)
- Master of Education in Curriculum and Instruction - Mathematics Education (p. 225)
- Master of Education in Curriculum and Instruction - Literary Studies (p. 223)
- Master of Education in Mind, Brain, and Education (p. 223)
- Master of Education in Curriculum and Instruction - Social Studies Education (p. 223)

Certificates

- Initial Teacher Certification (p. 226)
- Master Reading Teacher Certificate (p. 226)
- Reading Specialist Certification (p. 226)
- English as a Second Language (ESL) (p. 226)
- Bilingual Education (BIL) (p. 227)
- School Counseling Certification (p. 227)

Curriculum and Instruction - Graduate Programs

Degrees / Certificates

MASTER'S DEGREES (P. 223)

- Academic Partnership Ed. Curriculum & Instruction, M.Ed. Mathematics
- Academic Partnership Ed. Curriculum & Instruction, M.Ed. Science
- Academic Partnership Ed. Curriculum & Instruction, M.Ed. Triple Literacy
- Ed. Curriculum & Instruction, M.Ed.
- Ed. Curriculum & Instruction, M.Ed. Non Thesis Mathematics
- Ed. Curriculum & Instruction, M.Ed. Non Thesis Science
- Ed. Curriculum & Instruction, M.Ed. Writing Focus
- Mind, Brain and Education, M.Ed. Non Thesis
- Reading Specialist, M.Ed.
- Teaching - Early Childhood, M.Ed.T.
- Teaching - Middle Level, M.Ed.T.
- Teaching - Secondary Level, M.Ed.T.

CERTIFICATES (P. 226)

- Education in Teaching, All Level Certificate
- Education in Teaching, ESL EC6 Generalist Certificate
- Education in Teaching, Mid-Level Certificate
- Education in Teaching, Secondary Level Certificate
- English Secondary Language Certificate
- Gifted & Talented Certificate
- Master Reading Teacher Certificate
- Master Tech. Teaching Certificate
- Reading Specialist Certificate
- School Counselor Certificate
- Teaching - Teacher Certification Only

Programs

The Department of Curriculum and Instruction currently offers the Master of Education in Teaching (M.Ed.T.) and the Master of Education in Curriculum and Instruction (M.Ed.) degrees. Certification and supplemental certifications are offered for: Reading Specialist, Master Reading Teacher, Bilingual Education (BEEP), and English as a Second Language (ESL). Distance learning opportunities in some degree programs are available for those interested (see section on Distance Learning Options). Students pursuing a master's degree are required, with the assistance of the Graduate Advisor and graduate faculty, to complete a tentative program of work. This program of work is filed in the College of Education Graduate Advising Office and may be modified as needed. All master's degrees in Curriculum and Instruction comprise a minimum of 36 semester hours and are non-thesis. Candidates for master's degrees are required to submit a final program of work and complete a designated capstone course for their program: EDUC 5397 IMPLEMENTING AND DISSEMINATING CLASSROOM RESEARCH for M.Ed.T. and M.Ed. in Curriculum and Instruction, and LIST 5317 LITERACY PRACTICUM II for M.Ed. with emphasis in Literacy Studies.

Objective

The Master of Education in Teaching (M.Ed.T.) degree is designed for those wishing to pursue initial teacher certification at the graduate level. The Master of Education in Curriculum and Instruction (M.Ed.) degree provides opportunities for those interested in developing effective teaching, research, and leadership skills that are congruent with an ever-expanding theoretical knowledge base in the field. The M.Ed. enables teachers to specialize in advanced coursework in their teaching fields and other professional certification areas designed to meet a variety of professional goals. Both degrees help prepare graduates to reflect upon their own teaching as well as on the state of education as a whole and to better understand the linkage between the theory and practice of teaching. Each student's program of study is planned individually and provides academic and/or pedagogical specialization within the context of the general field of education. Graduate faculty in the College of Education as well as those in departments and in the colleges throughout the University work closely with students in formulating study plans that meet the students' objectives and individual goals for professional growth. Each program of work includes both professional and academic components.

Admissions Requirements

UNCONDITIONAL ADMISSION

- Current GRE score of 400 on quantitative section (140 on the revised GRE) and 500 on verbal section (153 on the revised GRE)
- 3.0 GPA during the last 60 hours of undergraduate coursework and a 3.0 average on all graduate work
- 3 letters of reference on file

PROBATIONARY ADMISSION

Applicants who score less than 400 (140 on the revised GRE) on the quantitative and 500 (153 on the revised GRE) on the verbal sections of the GRE will be considered for probationary admission on the basis of the following:

- 3.0 GPA during the last 60 hours of undergraduate coursework AND a 3.0 average on all graduate work
- Professionally relevant experience
- Writing sample evaluated by the COEHP Graduate Studies Committee. When available, the GRE writing sample will be required for probationary admission.

Terms of Probation upon Acceptance: All students admitted under probation status will be required to earn a 3.0 GPA during the first 12 hours of graduate coursework in the program, with no grade lower than a "B."

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admissions deadline, but who otherwise appear to meet admission requirements, may be granted provisional admission.

DEFERRED ADMISSION

An applicant's admission may be deferred when a file is not complete or when denying admission is not appropriate.

DENIED ADMISSION

An applicant may be denied admission if the conditions for unconditional and probationary admission have not been met.

In addition, if a student has been suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic reasons, that student may be denied admission or readmission to an educator preparation program in the College of Education.

ELIGIBILITY FOR SCHOLARSHIPS/FELLOWSHIPS

To be eligible, candidates must be new students coming to UT Arlington in the fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Office of Graduate Studies, and must be enrolled in a minimum of six (6) hours of coursework in both long semesters to retain their fellowships.

DISTANCE LEARNING OPTIONS

Many graduate courses in the Department of Curriculum and Instruction are offered on campus as well as over the Internet. For the distance learning option, students enroll in the Internet course and complete all course requirements from the convenience of their home or school computers. Basic computer competence is necessary (logging on to a Web site, sending and receiving e-mail). Students need a reliable Internet connection and a consistent e-mail address. All assignments are submitted electronically according to an established calendar of deadlines. Students proceed at their own pace in a highly interactive learning environment.

Degree Requirements

MASTER OF EDUCATION IN TEACHING (M.ED.T.) WITH TEACHER CERTIFICATION

The Master of Education in Teaching (M.Ed.T.), a 36-hour non-thesis degree, is a unique and specialized degree that enables a student holding a baccalaureate degree to pursue initial teacher certification and use those hours toward requirements of a master's degree. In addition to being accepted by the Office of Graduate Studies, students must also be admitted into the Teacher Certification program (consult a teacher certification advisor for current admittance requirements). For teacher certification, students must meet state requirements for their teaching field(s) or specialization and complete the graduate-level coursework for early childhood - grade 6, middle level, secondary, or early childhood - grade 6 bilingual certification. They must also fulfill the student teaching requirements and pass the appropriate certification exams (consult a teacher certification advisor for current certification information). Up to 18 hours of teacher certification coursework may be applied to the total 36 hours required for completion of the M.Ed.T.; however, students must complete teacher certification courses and pass the appropriate certification exams before proceeding to courses that apply to the master's degree. Students may earn teacher certification without completing a master's degree. See the College of Education Web site at www.uta.edu/coehp for more details on all programs.

MASTER OF EDUCATION (M.ED.)

The Master of Education degree in Curriculum and Instruction (M.Ed.), a 36-hour non-thesis degree, is a broad-based degree that enables students to pursue academic and professional goals within an individualized program. Following are possible master's degree options.

M.ED. IN CURRICULUM AND INSTRUCTION

This particular master's degree option is ideal for students desiring a pedagogical foundation in education in addition to an 18-hour concentration of a particular resource area or academic discipline. A common core of 18 hours of graduate education coursework in instructional strategies, curriculum design, and research are required. Students also choose from a variety of certifications available through the College of Education and Health Professions to incorporate into their master's degree plan (see the section on Professional Certifications), or they may choose to incorporate up to 18 hours of graduate coursework from disciplines outside of Education. For example, a degree plan for a student who desires TESOL (Teaching English to Speakers of Other Languages) certification would include the required 18 hours of coursework in Education along with the 18 hours of Linguistics coursework from the Program in Linguistics. The Graduate Advisor works with students in creating a degree plan that meets their professional needs and goals. (Note: The Graduate Advisor and graduate faculty must approve all coursework included in a degree plan.) This degree does not require a student to hold a teacher certificate. See the College of Education Web site at www.uta.edu/coehp for more details on the program.

M.ED. IN CURRICULUM AND INSTRUCTION - SCIENCE EDUCATION

M.ED. IN CURRICULUM AND INSTRUCTION - MATHEMATICS EDUCATION

The *M.Ed. in Curriculum and Instruction - Science Education* and *M.Ed. in Curriculum and Instruction - Mathematics Education* offer opportunity for students to pursue graduate studies by taking a *Core component* of 6 courses (18 credit hours) in the College of Education focusing on topics such as inquiry-based, problem-based teaching and learning, diversity, and classroom research, and a *Concentration area component* of 6 courses (18 credit hours). The six *concentration area* courses may be taken either in the Department of Curriculum and Instruction for a science and mathematics content-curriculum integration emphasis and/or in the College of Science for deeper subject matter emphasis in the various science and mathematics disciplines. These programs offer flexibility in course selection, yet are focused on science and mathematics teaching and learning in K-16 educational settings.

A version of this program is offered online through the Academic Partnership program. For more information on the online program please visit: <http://academicpartnerships.uta.edu/> For information on the on-campus science and mathematics education program and scholarships available for teachers, contact: Dr. Ann Cavallo, cavallo@uta.edu or Jamie Williams, robin@uta.edu, 817.272.2832.

M.ED. IN CURRICULUM AND INSTRUCTION - LITERACY STUDIES (AVAILABLE ONLINE)

One of the most popular M.Ed. degree plans is the M.Ed. in Curriculum and Instruction with an emphasis in Literacy Studies. In this program, students specialize in advanced coursework designed to meet a variety of professional goals related to literacy. For instance, students may pursue professional certificates including the following.

- **Reading Specialist** is a national certification available in all states. Literacy coaches generally work with teachers to help them with best literacy practices. Reading Specialist is an advanced certificate that certified teachers may add to their existing credential upon completion of two year's teaching experience and a master's degree with at least 27 hours of graduate coursework in literacy. Once recommended for the Reading Specialist from UTA, students may also apply for the Master Reading Teacher (MRT) certificate without the additional MRT exam.
- **English as a Second Language** is a national certification available in all states. All states have some type of English as a Second Language (ESL) designation. In Texas, ESL is an add-on certificate that individuals with an initial teaching certificate can add to their existing credential with only 12 hours of graduate coursework.
- **Master Reading Teacher (MRT)** is a Texas only certificate. MRTs work in designated schools to tutor struggling readers and may also serve as literacy coaches. The MRT sequence includes 12 graduate hours of coursework. Students who hold the Reading Specialist Certificate can apply for the MRT without additional coursework or the MRT test.
- **Triple Literacy** is a degree option that leads to Reading Specialist, ESL, and Master Reading Teacher certification.
- **Writing Focus** is a 36-hour, non-certificate, degree focus area providing extra coursework in writing instruction and assessment.

Out of state students seeking certification should go to <http://www.uta.edu/coehp/distaneducation/> for information about their certification options.

In addition to these professional certificates, students may choose focused coursework in areas including:

- Writing
- Working with culturally and linguistically diverse students

This program requires 36 credit hours (12 courses). Once students have successfully completed all coursework, they will graduate with a Master of Education in Curriculum and Instruction. In addition, on passing the appropriate TExES tests, students will also have the Reading Specialist Certification, Master Reading Teacher Certification, and/or supplemental certification in English as a Second Language. The ESL is a 12-hour, four-course program that can be taken as part of this master's degree plan or separately in preparation for the TExES test for supplemental certification in ESL. For additional information, contact Dr. Kathleen Tice at KTice@uta.edu.

M.ED. IN MIND, BRAIN, AND EDUCATION

The master's degree in Mind, Brain, and Education integrates research in the cognitive and neurosciences and education along with classroom practice to develop more effective teaching methods as well as a deeper understanding of how to support life-long learning. The degree is a 36-hour non-thesis, non-certification program, focused on integrating cognitive science, neuroscience, and education to challenge and information pedagogy. The program focuses on the potential and limits of cognitive neuroscience in education and the central role educators can play in shaping research agendas in MBE. Graduates are expected to serve their community and the field by completing a project defined and carried out during the two-year program. Applicants must be accepted by the Office of Graduate Studies and admitted to the program as part of a cohort. Students complete nine required courses (27 credits), choose two additional courses from a list of approved electives (6 credits) and choose one unrestricted additional course that meets the needs of the candidate (3 credits). For additional information, contact Dr. Marc Schwartz at schwarma@uta.edu.

Coursework and Completion Requirements

- Coursework that is more than six years old at the time of graduation or teacher/administrator certification program completion cannot be used toward meeting the requirements for a master's degree or graduate-level certification.
- Master's degree and graduate level certification programs must be completed within six years (time in military service excluded) from initial registration in the Graduate School.
- Appropriate state exams and application to the State Board for Educator Certification for a standard certificate must be made within six months of completion of student teaching. If a candidate allows the six month period to go by without passing all state exams and applying for certification, additional coursework and/or state exams will be required.
- Each candidate in the College of Education of UT Arlington will be evaluated on professional dispositions (http://www.uta.edu/coehp/_downloads/professionaldispositions.pdf) by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as "unacceptable" in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions.

Professional-Level Certifications

The Department of Curriculum and Instruction offers graduate-level programs leading to professional certificates. Certifications include Initial Teacher Certification (Early Childhood - Grade 6, Middle Level, Secondary, and All-Level) and the Reading Specialist and Master Reading Teacher Certification. Supplemental certification is available for English as a Second Language (ESL), Bilingual (BIL) and Gifted and Talented. The graduate-level coursework required for these programs may be applied toward a master's degree (M.Ed.T.). The Graduate Advisor works with the student to build an individual degree plan that incorporates one or more of these certification areas. See the College of Education Web site at www.uta.edu/coehp for more details on these programs.

INITIAL TEACHER CERTIFICATION

Students holding a baccalaureate degree may pursue initial teacher certification at the graduate level. Students must be admitted to the Graduate School as master's-degree-seeking students (students may elect to complete certification only) and be admitted to Teacher Certification in the College of Education (see a Teacher Certification advisor for current requirements). Up to 18 hours of graduate-level teacher certification hours may be applied toward an M.Ed.T. Students must also complete the student teaching requirements and pass the appropriate TExES exams. Candidates for Teacher Certification must also meet all state requirements for coursework in their teaching field/academic specialization. Note, certification students must be advised and cleared to take teacher certification courses through Teacher Certification Advising. See the College of Education Web site at www.uta.edu/coehp for more details on the program.

MASTER READING TEACHER CERTIFICATE (AVAILABLE ONLINE)

This certification focuses on the needs of the multicultural and multilingual classrooms of today. To qualify for the Master Reading Teacher (MRT) Certificate, students must complete nine semester credit hours and pass the Master Reading Teacher TExES. Students who complete the requirements for the Reading Specialist certificate and are recommended for that certificate may apply for the MRT as well without taking the MRT exam. See the College of Education Web site at www.uta.edu/coehp for more details on the program.

READING SPECIALIST CERTIFICATION (AVAILABLE ONLINE)

Teachers interested in focusing on the important area of reading may pursue the Reading Specialist Certificate, an all-level (K-12) certificate. This unique program focuses on the needs of the multicultural and multi-linguistic classrooms of today with the possibility of integrating the requirements for the Master Reading Teacher and the supplemental certification for ESL into the total program if desired. To qualify for the Reading Specialist Certificate, students must complete a master's degree, hold a valid Texas teacher certificate, document two years of acceptable classroom teaching experience, and pass the Reading Specialist TExES. Those who already hold a master's degree and who are seeking only the Reading Specialist Certificate are required to complete 27 semester credit hours. See the College of Education Web site at www.uta.edu/coehp for more details on the program.

ENGLISH AS A SECOND LANGUAGE (ESL) (AVAILABLE ONLINE)

The English as a Second Language (ESL) certification prepares candidates to teach children from all cultural and language backgrounds (speakers of Spanish, Vietnamese, etc.), and is required for those teachers working with students in grades PK-12 whose first language is not English. (No foreign language background is required for the ESL certificate.) The ESL endorsement may be added to any valid Texas teacher certificate. Students are

required to take four required courses in any sequence, complete a practicum in an ESL classroom or one year of successful teaching experience in an ESL or Bilingual Education program approved by the Texas Education Agency, and pass the ESL TExES. (The four courses may be applied toward a master's degree and to the Reading Specialist Certificate.) See the College of Education Web site at www.uta.edu/coehp for more details on the program.

BILINGUAL EDUCATION (BIL)

Teachers who are fluent in Spanish and wish to specialize in bilingual education will want to add the Bilingual Education to their initial certification. The required 12 hours of coursework may be incorporated into a master's degree program developed in consultation with the Graduate Advisor and graduate faculty. Students are required to take four courses and provide documentation of one year of successful teaching experience in a bilingual setting approved by the Texas Education Agency. Candidates must also pass the EC-6 Bilingual Generalist, and the Bilingual Target Language Proficiency Test--Spanish. See the College of Education Web site at www.uta.edu/coehp for more details on the program.

SCHOOL COUNSELING CERTIFICATION

UTA's Counseling Certification Program is designed for teachers who hold a master's degree in Education and who have at least two years of teaching experience. At the end of the required 15 hours of coursework, successful candidates must pass the TExES certification examination for School Counselors. This will qualify them to hold positions as school guidance counselors at any level from kindergarten through grade 12 in Texas schools. The six-course, 15-hour counseling program will be taught on campus during after-school hours. A six-hour supervised counseling practicum will take place in schools or on campus with school-age children. The practicum hours must be successfully accomplished in order for the candidate to be approved by the UTA to take the state exam. A school counselor needs to acquire the academic knowledge and skills necessary to do the job but additionally must have a personality or disposition appropriate for helping professions. Candidates will be expected to complete the supervised practicum that will allow them the opportunity to demonstrate they can work successfully with students and others in the educational environment. Admission requirements include a completed master's degree from an accredited university in any approved area of education, transcript of both undergraduate and graduate coursework, and a minimum of two completed years of successful teaching either in public or private schools in any grade, K-12. A letter of support documenting the successful teaching experience will be required. See the College of Education Web site at www.uta.edu/coehp or contact program director Dr. Mary Lynn Crow (mlcrow@uta.edu) for more details on the program.

Curriculum and Instruction - Undergraduate Programs

The mission of the Department of Curriculum and Instruction is to prepare and support effective professional educators who can meet students' diverse academic, social, and personal needs. Department faculty members also contribute to education by generating and disseminating high-quality research, developing innovative programs to meet education needs, and through providing meaningful professional service.

The Department of Curriculum and Instruction offers five programs: Early Childhood - Grade 6, Middle-level (grades 4 - 8), Secondary (grades 8 - 12), Early Childhood - Grade 6 Bilingual, and Literacy. All of the programs are based on state certifications and state standards. The department offers the following undergraduate degrees:

- Bachelor of Arts in Interdisciplinary Studies with EC-6 Bilingual Teacher Certification
- Bachelor of Arts in Interdisciplinary Studies with EC-6 ESL Teacher Certification
- Bachelor of Arts in Interdisciplinary Studies with 4-8 Middle-Level English Language Arts/Social Studies Teacher Certification
- Bachelor of Science in Interdisciplinary Studies with 4-8 Middle-Level Math/Science Teacher Certification
- Bachelor of Science in Interdisciplinary Studies with 4-8 Middle Level Generalist Teacher Certification

Please consult the College of Education and Health Professions Web site for current information on degree plans.

Degreed students may choose the post-baccalaureate program for initial teacher certification at the graduate level. See the College of Education and Health Professions Web site (<http://www.uta.edu/coed>) or a graduate academic advisor for details.

Field Experience

The application deadline is March 1 for the Fall semester and October 1 for the Spring semester Field Experience placements.

Early Childhood - 6th Grade Field Experience occurs in the fall semester. Students enroll in three on-campus courses. They also spend one day per week in a public school classroom. In this classroom, they will work with a cooperating teacher and complete assignments from their on-campus courses. Candidates may be offered opportunities for employment as early childhood teaching assistants in a kindergarten setting. Candidates must complete all core and support system courses and meet all requirements (GPA, THEA scores, and prerequisite courses) prior to the Field Experience semester.

The first year of the Middle-Level certification includes a minimum of 40 hours of field-based experiences each semester. The second year in the program includes a fall field-based experience on Monday through Thursday for the entire school day. The spring semester is a student teaching experience, which begins with the school district calendar and lasts for 18 weeks (Monday through Friday the entire school day).

To be eligible to enter the second year of the Middle-Level education program, a candidate must have completed:

EDML 4300	PRE-ADOLESCENT/ADOLESCENT GROWTH AND DEVELOPMENT	3
EDML 4350	NATURE & CURRICULUM NEEDS OF THE YOUNG ADOLESCENT LEARNER	3
EDML 4370	SOCIAL STUDIES & DIVERSITY IN THE MIDDLE LEVEL GRADES	3
LIST 4343	CONTENT AREA READING AND WRITING	3
BEEP 4384	LITERACY METHODS FOR ESL/BILINGUAL CLASSROOMS	3

Be currently enrolled in:

EDML 4371	SCIENCE IN THE MIDDLE LEVEL GRADES	3
EDML 4372	MATHEMATICS IN THE MIDDLE LEVEL GRADES	3
EDML 4676	MIDDLE LEVEL FIELD-BASED EXPERIENCE	6
LIST 4378	TEACHING , READING, WRITING, AND LITERATURE IN THE MIDDLE LEVEL GRADES	3

- Have filed a degree plan with the College of Education and Health Professions.
- Have an overall (or last 60 hours) GPA of 3.0.
- Have completed the required content area courses.
- Have a minimum GPA of 3.0 in all College of Education and Health Professions certification courses.

Middle-level certification candidates also have a field experience during fall of the second year (EDML 4676 MIDDLE LEVEL FIELD-BASED EXPERIENCE). This experience involves observing and teaching in assigned schools working with cooperating teachers, university supervisors, and middle-level students.

Field Experience for Secondary Certification is a one-semester experience for students. Eligible secondary certification students must make application (<http://www.uta.edu/coehp/academics/advising/fieldexperience/applying.php>) for secondary Field Experience before the deadline early in the semester preceding the Field Experience assignment. Secondary Field Experience applications are then reviewed by partner schools, and students are subsequently assigned by the Office of Professional Development to appropriate school sites (based on student's area of specialization and the partner school's needs). Criminal background checks are required by school districts prior to field experience school placement.

For purposes of determining eligibility for Field Experience, all applicable grades, including those earned at other institutions, will be used in the calculation of grade point averages. Students are urged not to take more than 15 semester credit hours during the Field Experience semester.

Students must attend a mandatory orientation to become familiar with the Field Experience Handbook and the requirements prior to beginning the Field Experience assignment.

To be eligible to enter the Field Experience in the secondary certification program, the student must:

- Have filed a degree plan with major academic department and have provided a copy to the College of Education and Health Professions advising office.
- Have an overall (or last 60 hours) GPA of 3.0.
- Have a minimum GPA of 3.0 in all College of Education and Health Professions certification courses with a grade of C or better in all College of Education and Health Professions certification courses.

For 15 weeks during the UT Arlington Field Experience semester, secondary students will spend five instructional clock hours and a one-hour planning period per week in their assigned schools working with cooperating teachers and secondary students.

Student Teaching

Early Childhood - 6th Grade Student Teaching is a full-time supervised and directed practice in an approved Pre-K- 6th grade classroom. Student teachers will have at least two placements. Student teachers who are employed as early childhood teaching assistants in the fall will remain in a kindergarten setting for Student Teaching. Student Teaching is in the spring and begins and ends with the public school district calendar.

Middle-level 4th-8th Grade Student Teaching is the final semester. Candidates spend 720 hours in the field during student teaching. They attend faculty meetings, parent-teacher conferences and professional development experiences, as well as regularly scheduled university seminars that involve presentations by partner school principals and university faculty. Student Teaching takes place during the spring semester, begins with the public school district calendar, and lasts 18 weeks.

Student Teaching for Secondary Certification immediately follows the Field Experience semester for students seeking Secondary certification and All-level certification. It is a one-semester experience scheduled to begin and end with the public school district calendar that involves working full-time with cooperating teachers and grades 8-12 students in the school setting five days a week. Student Teaching is considered full-time enrollment.

Students must attend a mandatory orientation to become familiar with the Student Teaching Handbook and the requirements prior to beginning the Student Teaching assignment.

For purposes of determining Student Teaching eligibility for all education students, the following must be completed:

- 3.0 GPA overall.
- 3.0 GPA in all College of Education and Health Professions certification courses with a grade of C or better in all College of Education and Health Professions certification courses.
- Additional requirements specific to each certification level.

Oral Communication Competency Requirement

All students will satisfy the oral communication requirement during the professional development sequence leading to initial teacher certification. Students must complete the Field Experience semester with an acceptable evaluation of oral communication by university supervisors and assigned cooperating teachers in the field.

Admission, Enrollment and Program Continuation

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from a University College academic advisor during their first year. After the first year, students should seek advisement from the College of Education and Health Professions. Transfer students must seek academic advising from the College of Education and Health Professions academic advisors immediately.

ELIGIBILITY FOR ADMISSION AND ENROLLMENT

Students seeking admission to the College of Education and Health Professions must meet specific criteria established by the College of Education and Health Professions for unconditional admission:

- Satisfy credit hour requirements for admission to a degree plan.
- Application for admission.
- Submit transcripts from each college or university the student has attended (reflecting all current/completed semesters).
- Meet College of Education and Health Professions requirements on the THEA: Reading-270 (Bilingual Education-260); Writing-220; Math-230.
- Have a GPA of at least 3.0.
- Any other assessment requirements deemed necessary by the College of Education and Health Professions.
- Students who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education and Health Professions.

ELIGIBILITY FOR PROGRAM CONTINUATION

Each candidate for certification must:

- Demonstrate suitability for admission to the teaching profession.
- Demonstrate knowledge of and adherence to the Code of Ethics and Standard Practices for Texas Educators.
- Demonstrate the speech competencies associated with proficient oral communication in instructional settings. If a student is found to be deficient in these competencies, successful completion of COMS 3315 COMMUNICATION FOR EDUCATORS or an approved substitute will be required.
- Demonstrate progress through committee assessment of the teaching field(s) or specialization(s) and maintain a 3.0 GPA in all College of Education and Health Professions certification courses with a grade of C or better.

Students/candidates who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education and Health Professions.

Each student/candidate in the College of Education and Health Professions of UT Arlington will be evaluated on Professional Dispositions by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as "unacceptable" in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions. Should questions be raised by UT Arlington faculty or professional practitioners regarding a student's program continuation, the student will be referred to the Department in which he or she is enrolled.

Degrees with Teacher Certification

Degrees with EC-6 Certification

BACHELOR OF ARTS IN INTERDISCIPLINARY STUDIES WITH ESL EC-6 TEACHER CERTIFICATION

Pre-Professional Courses

General Core Requirements (p. 93)

ENGL 1301

RHETORIC AND COMPOSITION I

ENGL 1302	RHETORIC AND COMPOSITION II	
ENGL 2309	WORLD LITERATURE	
ENGL 2319	BRITISH LITERATURE	
or ENGL 2329	AMERICAN LITERATURE	
HIST 1311	HISTORY OF THE UNITED STATES TO 1865 ¹	
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT ¹	
POLS 2311	GOVERNMENT OF THE UNITED STATES	
POLS 2312	STATE AND LOCAL GOVERNMENT	
MATH 1302	COLLEGE ALGEBRA	
MATH 1330	ARITHMETICAL PROBLEM SOLVING	
Natural Science (lab science, Biology recommended) 8 credit hours		
Program Requirements		
Foreign Language, two courses, Spanish preferred, at 1441 and 1442 level. No sign language.		
MATH 1331	GEOMETRICAL INFERENCE AND REASONING	
MATH 1332	FUNCTIONS, DATA, AND APPLICATIONS	
Select two of the following:		6
SCIE 3301	PHYSICAL SCIENCE - PHYSICS	
SCIE 3302	PHYSICAL SCIENCE - CHEMISTRY	
SCIE 3303	GEOLOGY, METEOROLOGY, AND OCEANOGRAPHY	
SCIE 3304	ASTRONOMY	
SCIE 3305	ENVIRONMENTAL SYSTEMS	
Art, dance, music, theatre arts, or other approved course. (MUSI 3305 or ART 1301 recommended)		3
Early Childhood Support System - 9 hours at 2000 level or above. See advisor.		
Professional Courses		
Courses that focus on children, families, schools and communities, especially those concerned with diversity and learning (PSYC, SOCI, SOCW, WOMS)		12

¹ One Texas History may be taken in place of one US History: HIST 3363 TEXAS TO 1850 or HIST 3364 TEXAS SINCE 1845.

Educational Leadership and Policy Studies

Undergraduate Degrees

- Leadership Minor (p. 242)
- Leadership Certificate (p. 242)

Graduate Degrees

- Master of Education in Educational Leadership and Policy Studies, with Principal Certificate (p. 236)
- Master of Education in Educational Leadership and Policy Studies, with Principal Certificate, Dual-Language Emphasis (p. 236)
- Master of Education in Educational Leadership and Policy Studies, with Higher Education Administration Emphasis (p. 236)
- Doctor of Philosophy (Ph.D.) in Educational Leadership (p. 236)

Certificates

- Principal Certificate (p. 236)
- Superintendent Certificate (p. 236)

Educational Leadership & Policy Studies - Graduate Programs

Programs

The Department of Educational Leadership and Policy Studies offers the Master of Education (M.Ed.) in Educational Leadership and Policy Studies. In addition to core courses in educational leadership and policy studies, three distinct emphases are available: Principal Certificate, Principal Certificate with Dual Language, and Higher Education Administration.

For those with a master's degree, the Department offers certification preparation courses for candidates seeking a Principal Certificate or a Superintendent Certificate. The Department also offers the Ph.D. in Educational Leadership.

Degrees and Certifications

Graduate work in Educational Leadership and Policy Studies at UT Arlington may lead to the following degrees and certifications:

DEGREES

- Master of Education (M.Ed.) in Educational Leadership and Policy Studies
- Doctor of Philosophy (Ph.D.) in Educational Leadership

ONLINE ACADEMIC PARTNERSHIP DEGREE PROGRAMS

- Master of Education (M.Ed.) in Educational Leadership and Policy Studies (AP)

EDUCATOR PREPARATION PROGRAMS

- Principal (offered through on-campus and Academic Partnerships programs)
- Superintendent (offered online through Academic Partnerships)

Admissions Requirements - Master's Degree Program

All students, including those enrolled in the Educational Leadership and Policy Studies master's program, must meet qualifications specified in Texas Administrative Code §227.10 in order to participate in educator preparation programs. Per §227.10, the minimum overall grade point average is 2.5 or at least 2.5 in the last 60 semester credit hours of coursework. Students who do not meet the grade point average requirement should consult with the Educational Leadership and Policy Studies graduate advisor to determine if there are extenuating circumstances by which they might be admitted. Please note that out-of-state students will not qualify for Texas educator certification. Therefore, students should review their state's requirements to determine if completion of a program at UT Arlington will lead to certification in their state.

Please see other departmental requirements listed below.

UNCONDITIONAL ADMISSION

Applicants are typically offered unconditional admission if they meet two of the three following criteria:

- An undergraduate grade point average (GPA) of 3.0 or higher on a 4.0 scale, as calculated by the Graduate School or a graduate GPA of 3.5 or higher on a 4.0 scale on 12 or more hours as calculated by the Graduate School may be used in lieu of the undergraduate GPA
- A minimum of two of the following three Graduate Record Examination (GRE) scores: (1) verbal minimum score of 153, (2) quantitative score of 144, (3) written analytical minimum score of 3.5. For exams taken before August 1, 2011, a minimum of two of the three scores are required: (1) verbal minimum score of 500, (2) quantitative minimum score of 500, (3) written analytical minimum score of 3.5.
- Three letters of reference on file, completed by three persons who can assess the applicant's aptitude, academic skills, and abilities needed for success in the Educational Leadership and Policy Studies master's program

PROBATIONARY ADMISSION

Applicants are typically offered probationary admission if they meet two of the three following criteria:

- An undergraduate grade point average (GPA) of at least 2.8 on a 4.0 scale, as calculated by the Graduate School or a graduate GPA of 3.3 or higher on a 4.0 scale on 12 or more hours as calculated by the Graduate School may be used in lieu of the undergraduate GPA
- A minimum of two of the following three Graduate Record Examination (GRE) scores: (1) verbal minimum score of 146, (2) quantitative score of 140, (3) written analytical minimum score of 3.0. For exams taken before August 1, 2011, a minimum of two of the three scores are required: (1) verbal minimum score of 400, (2) quantitative minimum score of 400, (3) written analytical minimum score of 3.0.
- Three letters of reference on file, completed by three persons who can assess the applicant's aptitude, academic skills, and abilities needed for success in the Educational Leadership and Policy Studies master's program

Terms of Probation upon Acceptance: All students admitted under probation status will be required to earn a 3.5 GPA during the first 12 hours of graduate coursework in the program.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admissions deadline, but whom otherwise appears to meet admissions requirements may be granted provisional admission.

DEFERRED ADMISSION

An applicant's admission may be deferred when a file is not complete or when denying admission is not appropriate.

DENIED ADMISSION

An applicant may be denied admission if the conditions for unconditional and probationary admission have not been met.

In addition, if a student has been suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic reasons, that student may be denied admission or readmission to an educator preparation program in the College of Education.

Master's Degree Programs

MASTER OF EDUCATION IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES, WITH PRINCIPAL CERTIFICATE COURSES

Core Courses

EDAD 5322	EDUCATIONAL RESEARCH AND EVALUATION	3
EDAD 5360	LEADERSHIP THEORY	3
EDAD 5365	LEADING LEARNING ORGANIZATIONS	3
EDAD 5380	DIVERSITY AND EQUITY IN EDUCATION	3
EDAD 5388	EDUCATIONAL POLICY ISSUES IN THE PUBLIC SCHOOLS	3
or EDAD 5376	EDUCATIONAL GOVERNANCE	
EDAD 5399	CAPSTONE PRACTICUM IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES	3

Principal Certificate Courses

EDAD 5305	CURRICULUM DESIGN, IMPLEMENTATION, AND EVALUATION	3
EDAD 5330	LEADERSHIP IN THE INSTRUCTIONAL SETTING	3
EDAD 5381	GOVERNANCE, POLITICAL AND LEGAL ASPECTS OF EDUCATION	3
EDAD 5383	THE PRINCIPALSHIP	3
EDAD 5384	RESOURCE MANAGEMENT IN EDUCATION	3
EDAD 5389	ADMINISTRATIVE PRACTICUM	3

Total Hours		36
-------------	--	----

MASTER OF EDUCATION IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES, WITH PRINCIPAL CERTIFICATE COURSES, DUAL-LANGUAGE EMPHASIS

Core Courses

EDAD 5322	EDUCATIONAL RESEARCH AND EVALUATION	3
EDAD 5360	LEADERSHIP THEORY	3
EDAD 5365	LEADING LEARNING ORGANIZATIONS	3
EDAD 5380	DIVERSITY AND EQUITY IN EDUCATION	3
EDAD 5388	EDUCATIONAL POLICY ISSUES IN THE PUBLIC SCHOOLS	3
or EDAD 5376	EDUCATIONAL GOVERNANCE	
EDAD 5399	CAPSTONE PRACTICUM IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES	3

Principal Certificate/Bilingual Courses

BEEP 5321	ESL METHODS FOR EC-6 LEARNERS	3
EDAD 5330	LEADERSHIP IN THE INSTRUCTIONAL SETTING	3
EDAD 5381	GOVERNANCE, POLITICAL AND LEGAL ASPECTS OF EDUCATION	3
BEEP 5366	SPANISH FOR SCHOOL ADMINISTRATORS & TEACHERS	3
BEEP 5318	FOUNDATIONS IN BILINGUAL EDUCATION	3
BEEP 5365	ORGANIZATION & ADMINISTRATION OF DUAL LANGUAGE PROGRAMS	3

Total Hours		36
-------------	--	----

MASTER OF EDUCATION IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES, WITH HIGHER EDUCATION ADMINISTRATION EMPHASIS

Core Courses

EDAD 5322	EDUCATIONAL RESEARCH AND EVALUATION	3
EDAD 5360	LEADERSHIP THEORY	3
EDAD 5365	LEADING LEARNING ORGANIZATIONS	3
EDAD 5380	DIVERSITY AND EQUITY IN EDUCATION	3
EDAD 5388	EDUCATIONAL POLICY ISSUES IN THE PUBLIC SCHOOLS	3
or EDAD 5376	EDUCATIONAL GOVERNANCE	
EDAD 5399	CAPSTONE PRACTICUM IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES	3

Higher Education Emphasis Courses

EDAD 5305	CURRICULUM DESIGN, IMPLEMENTATION, AND EVALUATION	3
EDAD 5351	HIGHER EDUCATION ADMINISTRATION AND STUDENT AFFAIRS	3
EDAD 5352	HIGHER EDUCATION LAW	3
EDAD 5354	THE AMERICAN COMMUNITY COLLEGE	3
EDAD 5356	HISTORY, PRINCIPLES, AND PHILOSOPHY OF HIGHER EDUCATION ADMINISTRATION	3
EDAD 5357	HIGHER EDUCATION TRENDS AND ISSUES	3

Total Hours		36
-------------	--	----

Coursework and Degree Completion Requirements

The Department of Educational Leadership and Policy Studies offers two routes to earn the Master of Education in Educational Administration (M.Ed.) and Principal Certification: the self-paced program, and several cohort programs (i.e., groups of candidates following the same sequence of courses). The Department also offers courses for candidates seeking Superintendent Certification.

COURSEWORK AND COMPLETION REQUIREMENTS

- Coursework that is more than six years old at the time of graduation or teacher/administrator certification program completion cannot be used toward meeting the requirements for a master's degree or graduate-level certification.
- Master's degree and graduate level certificate programs must be completed within six years (time in military service excluded) from initial registration in the Office of Graduate Studies.
- Appropriate state exams and application to the State Board for Educator Certification for a standard certificate must be made within six months of completion of residency/practicum/program. If a candidate allows the six month period to go by without passing all state exams and applying for certification, additional coursework and/or state exams will be required.
- All transfer credits must be approved by the Faculty Advisor.
- Each candidate in the College of Education of UT Arlington will be evaluated on professional dispositions (http://www.uta.edu/coehp/_downloads/professionaldispositions.pdf) by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as "unacceptable" in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions.

Doctoral Degree Program

DOCTOR OF PHILOSOPHY (PH.D.) IN EDUCATIONAL LEADERSHIP

The Ph.D. degree is designed for candidates who seek to enter careers in research, institutional assessment, policy analysis, institutional leadership, or the professoriate. The program challenges the conventional wisdom that higher education and K-12 education are different worlds by bringing together scholars and students from all levels of education to work and study together. Particularly, the program focuses on narrowing achievement gaps by studying and creating efficacious transitions within the educational experience. Working from the premise that all people can learn at high levels, the program includes the study of the systemic barriers at all levels of education that prevent so many children, adolescents, and young adults from being as successful as they can possibly be.

In addition to becoming experts in their particular area of inquiry, graduates will have a broad foundation in the study of educational leadership and policy at all levels. Students in the Ph.D. program will be part of a cohort throughout their coursework.

Admission Requirements - Ph.D. Program

A select number of qualified applicants are admitted each session to the cohort-based program. Each cohort begins coursework during the fall semester. Specific guidelines for applying to this program are found on the departmental website. Admission into this program is very competitive. The departmental admissions committee considers prior educational experiences, prior work experiences, GRE scores, writing samples, and professional

references and so forth. Meeting admission standards does not guarantee admission to the program. Finalists may be invited to campus to interview with the committee.

In addition to the general Office of Graduate Studies admission requirements, applicants must meet the following requirements for unconditional admission.

- Master's degree in education or other field appropriate for the doctorate in Educational Leadership
- Grade point minimum average of 3.5 out of a possible 4.0 from the master's degree
- Successful applicants for unconditional admission are expected to present a minimum of two of the following three Graduate Record Examination (GRE) scores: (1) verbal minimum score of 153, (2) quantitative score of 144, and (3) written analytical minimum score of 4. For exams taken before August 1, 2011, a minimum of two of the three scores are required: (1) verbal minimum score of 500, (2) quantitative minimum score of 500, and (3) written analytical minimum score of 4.
- Applicants who do not meet the minimum score requirement for a standardized test will be considered for probationary admission status when other factors are taken into account in a holistic review.
- A minimum score of 550 on the Test of English As a Foreign Language (TOEFL) for applicants whose native language is not English
- At least three years of documented experience in a work environment in which the primary professional responsibility at any level has been education (e.g., teaching, administration, curriculum development, professional development, post secondary education, government or private industry settings)
- Admission is very competitive. Meeting admission standards does not guarantee admission to the program.
- Applicants who have been suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

Required Courses

1. Research Methods Core (15 hours)		
EDAD 6304	K-16 QUANTITATIVE RESEARCH DESIGN & METHODOLOGY	3
EDAD 6308	QUALITATIVE RESEARCH DESIGN & METHODOLOGY	3
EDAD 6310	STATISTICAL METHODS	3
EDAD 6315	ADVANCED STATISTICAL METHODS	3
EDAD 6318	ADVANCED QUALITATIVE METHODS	3
2. Core Content Courses (15 hours)		
EDAD 6301	INTRODUCTION TO K-16 DOCTORAL STUDIES	3
EDAD 6320	K-16 PHILOSOPHY & HISTORY POLICY RESEARCH	3
EDAD 6327	K-16 POLICY & LAW ANALYSIS RESEARCH	3
EDAD 6342	K-16 ORGANIZATIONAL & LEADERSHIP THEORY RESEARCH	3
EDAD 6343	SOCIAL & CULTURAL CONTEXTS OF EDUCATION	3
3. Elective Courses (18 hours)		
Approved elective courses		
4. Dissertation (18 semester credit hours minimum) selected from:		
EDAD 6399	DISSERTATION	3
EDAD 6699	DISSERTATION	6

Written and Oral Comprehensive Examinations

To be elevated to candidacy for the Ph.D., students must successfully pass a written and oral qualifying examination.

Dissertation

The dissertation is the culmination of the Ph.D. program and represents a distinct contribution to the field of knowledge. A dissertation defense is required.

Grade Point Average Requirement

All students, including those enrolled in the Educational Leadership and Policy Studies master's program, must meet qualifications specified in Texas Administrative Code §227.10 in order to participate in educator preparation programs. Per §227.10, the minimum overall grade point average is 2.5 or at least 2.5 in the last 60 semester credit hours of coursework. Students who do not meet the grade point average requirement should consult with the Educational Leadership and Policy Studies graduate advisor to determine their eligibility.

Please see other departmental requirements listed below.

Recommendation to the State Board for Educator Certification

To be eligible for certification under all programs, a candidate must meet specific criteria set by the College of Education, the University, and the Texas Education Agency/State Board for Educator Certification. To be recommended to the Texas Education Agency/State Board for Educator Certification for initial teacher certification, a teacher candidate must have successfully completed the following:

Effective fall 2007, students must pass all appropriate state exams and apply for appropriate state certifications with the State Board for Educator Certification/Texas Education Agency within six months of the completion of their residency/practicum/program. If a student allows the six-month period to go by without passing all state exams and applying for certification, additional coursework and/or state exams will be required for recommendation for certification. Additional coursework will be determined by the appropriate Program Director in consultation with the faculty.

PRINCIPAL OR SUPERINTENDENT

Before you apply for certification as a Principal or Superintendent, please make sure you have completed the following requirements (subject to verification by the Assistant Dean for Student Affairs):

1. Conferred Master's Degree (or higher);
2. Completed all courses on the certification plan;
3. Completed all appropriate TExES exams (to be eligible for the TExES exam, a student's practicum must be completed in a TEA-approved school);
4. Valid Texas teaching certificate;
5. Two years of classroom teaching experience.

If you are a candidate who is applying for Principal or Superintendent certification, you must request that your school district mail a copy of your teacher service record indicating you taught for at least two years. Please request that your school district mail your teacher service record to the Assistant Dean for Student Affairs in the College of Education at UT Arlington. Then, apply to the State Board for Educator Certification (SBEC). Out-of-state students will not qualify for Texas educator certification. Therefore, students should review their state's requirements to determine if completion of a certification program at UT Arlington will lead to certification in their state.

MASTER'S DEGREE WITH PRINCIPAL CERTIFICATION COURSES

The Master's Degree includes courses required for candidates seeking the Texas Principal Certification. In addition to obtaining the Master's Degree, candidates must also pass the Texas Principal Certification exam, have a valid Texas Teacher Certificate, and have at least two years of accredited classroom teaching experience. Candidates must have their school district send via U.S. mail (not fax) their official Texas Teacher Service Record to the Certification Officer in the UT Arlington College of Education. Courses for the Master's Degree are offered at the UT Arlington and the Fort Worth Santa Fe Campus. The Department also offers the Master's Degree with Principal Certification courses entirely on-line through Academic Partnerships.

PROBATIONARY PRINCIPAL CERTIFICATE

A candidate who has completed EDAD 5389 Administrative Practicum may be eligible for a Probationary Principal Certificate if a school district hires him/her for a district assistant principal/principal employment assignment for which certification is required by the state of Texas. The Probationary Principal Certificate issued by the state is valid for one year from the date of issuance, renewable annually for 2 consecutive years for a maximum of 3 years total.

Principal certification candidates on a Probationary Principal Certificate must maintain continual enrollment in the Educational Leadership and Policy Studies department by taking courses approved by the ELPS faculty graduate advisor. This applies to all of the three years allowed for probationary certificates.

For more information on how to apply, contact the College of Education Certification Office.

SUPERINTENDENT CERTIFICATE

The Department of Educational Leadership and Policy Studies offers coursework and practicums leading to a Superintendent Certificate. Upon completion of superintendency coursework, Texas administrators seeking a Texas Superintendent Certificate must make a passing score on the Superintendent Texas Examination of Educator Standards (TExES) and provide evidence of Principal or equivalent certification before they will be recommended to the State Board for Educator Certification (SBEC) for issuance of the certificate.

Required EDAD courses for the Superintendent Certificate: 6179, 6279, 6371, 6373, 6374, and 6378. Currently, courses are offered in an online-only format through Academic Partnerships.

Out of state students will not qualify for Texas educator certification. Therefore, students should review their state's requirements to determine if completion of the Superintendent Certification program at UTA will lead to certification in their state.

Admissions requirements for superintendent certificate program:

- Certified Administrator in state of residence (if applicable)
- Currently serving in an administrative position or 2 years of administrative experience at building or district level

- Master's GPA of 3.75 or 3 recommendation forms submitted

Superintendent Certificate

EDAD 6179	SUPERINTENDENCY PRACTICUM	1
EDAD 6279	SUPERINTENDENCY PRACTICUM	2
EDAD 6371	PERSONNEL & SCHOOL LAW	3
EDAD 6373	THE SUPERINTENDENCY	3
EDAD 6374	ADVANCED SCHOOL BUSINESS ADMINISTRATION	3
EDAD 6378	ADVANCED CURRICULUM AND PROGRAM ASSESSMENT	3
Total Hours		15

Currently, courses are offered in an online-only format through Academic Partnerships.

PRINCIPAL CERTIFICATION PREPARATION ONLY (PCO)

For students with a Master's Degree, the Department has a Principal Certification Only (PCO) program that is 21 hours (seven courses). These candidates must also pass the Texas Principal Certification exam, have a valid Texas Teacher Certificate, and have at least two years of accredited classroom teaching experience. Candidates must have their school district send via U.S. mail (not fax) their official Texas Teacher Service Record to the Certification Officer in the UT Arlington College of Education. Courses for the Master's Degree are offered at both the UT Arlington and the Fort Worth Santa Fe campuses. The PCO program is not available online through Academic Partnerships.

Principal Certification Preparation Only (for students who already have a master's degree)

Core Courses

EDAD 5365	LEADING LEARNING ORGANIZATIONS	3
EDAD 5330	LEADERSHIP IN THE INSTRUCTIONAL SETTING	3
EDAD 5381	GOVERNANCE, POLITICAL AND LEGAL ASPECTS OF EDUCATION	3
EDAD 5383	THE PRINCIPALSHIP	3
EDAD 5384	RESOURCE MANAGEMENT IN EDUCATION	3

Practicum Courses

EDAD 5389	ADMINISTRATIVE PRACTICUM	3
EDAD 5399	CAPSTONE PRACTICUM IN EDUCATIONAL LEADERSHIP AND POLICY STUDIES	3
Total Hours		21

Coursework and Degree Completion Requirements

The Department of Educational Leadership and Policy Studies offers two routes to earn the Master of Education in Educational Administration (M.Ed.) and Principal Certification: the self-paced program, and several cohort programs (i.e., groups of candidates following the same sequence of courses). The Department also offers courses for candidates seeking Superintendent Certification.

COURSEWORK AND COMPLETION REQUIREMENTS

- Coursework that is more than six years old at the time of graduation or teacher/administrator certification program completion cannot be used toward meeting the requirements for a master's degree or graduate-level certification.
- Master's degree and graduate level certificate programs must be completed within six years (time in military service excluded) from initial registration in the Office of Graduate Studies.
- Appropriate state exams and application to the State Board for Educator Certification for a standard certificate must be made within six months of completion of residency/practicum/program. If a candidate allows the six month period to go by without passing all state exams and applying for certification, additional coursework and/or state exams will be required.
- All transfer credits must be approved by the Faculty Advisor.
- Each candidate in the College of Education of UT Arlington will be evaluated on professional dispositions (http://www.uta.edu/coehp/_downloads/professionaldispositions.pdf) by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as "unacceptable" in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions.

Educational Leadership and Policy Studies - Undergraduate Programs

The Department of Educational Leadership and Policy Studies offers one undergraduate minor (18 hours) and certificate (15 hours) in Leadership. This Leadership Minor/Certificate program prepares students to be relational, ethical, and global leaders armed with the knowledge and skills to make a positive contribution in the workplace, the communities in which they live, and throughout the world. The courses are designed to help students explore the dimensions of leadership so that they may engage in leadership that is constructive, purposeful, and oriented toward improving the human condition.

Required Courses

EDAD 2330	THEORIES IN LEADERSHIP	3
EDAD 4330	CAPSTONE IN LEADERSHIP STUDIES	3

Elective Course

Select a course in each area:	9
Ethics	
Global Issues	
Field Experience (Travel/trip or Service Learning course)	

Total Hours	15
-------------	----

ADMISSION REQUIREMENTS

The 18-hour minor is open to all degree-seeking students. The 15-hour certificate is available to degree and non-degree-seeking students enrolled at UT Arlington.

The Leadership Minor and Certificate program is a joint initiative between the Department of Educational Leadership and The Leadership Center in the Division of Student Affairs. Program management and oversight will be shared by the Chair and Director of these two areas. Interested students should initiate a request for the preparation of their program by sending an email to the following contacts:

Dr. Casey Brown, Department of Educational Leadership and Policy Studies
College of Education, 104A Trimble Hall
817.272.5166 - cgbrown@uta.edu

Loretta Pequeno-Griffin, Associate Director, The Leadership Center
E.H.Hereford University Center, Lower Level - Suite B160
817.272.9220 - lgriffin@uta.edu (%20lgriffin@uta.edu)

For information on graduate programs in the Department of Educational Leadership and Policy Studies, see the Graduate Catalog.

College of Engineering

Overview

Engineering combines science and mathematics to economically use information, materials and forces of nature to solve real world problems that improve the world around us and touch the lives of all of humanity. Engineers are able to take an abstract thought or idea and make it a reality. Students in the College of Engineering are changing the world as they work with award-winning faculty in state-of-the-art facilities to acquire the knowledge and skills they'll need to start tackling important problems and developing innovative technology.

For more than 50 years, the College of Engineering at UT Arlington has helped set the standard for educational excellence. With 7 departments, 10 bachelor's, 14 master's and 9 doctoral degrees, more than 6,000 students and 24,000 alumni, it is the fourth-largest college of engineering in the state, providing the local, regional, and national workforce with motivated and highly skilled graduates. UT Arlington is classified as a Research University / High Activity by the Carnegie Foundation for the Advancement of Teaching. Faculty research expenditures are more than \$37 million per year. The College has active research grants from the National Science Foundation, National Institutes of Health, the U.S. Departments of Defense and Energy, NASA, DARPA, and the American Heart Association, among others, in key areas such as healthcare, security, energy, and environment. The University recently invested \$160 million to construct an additional 295,000 square feet of engineering facilities. This brings the college's total footprint to 417,359 square feet in seven buildings, including the new 234,000-square-foot Engineering Research Building.

Undergraduate Education:

The College of Engineering provides the opportunity for study in a wide variety of engineering disciplines under the guidance of an excellent faculty. Baccalaureate degree programs are offered in aerospace engineering, architectural engineering, bioengineering, civil engineering, computer engineering, computer science, electrical engineering, industrial engineering, mechanical engineering, and software engineering. The programs in aerospace engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, and software engineering are accredited by the Engineering Accreditation Commission (EAC) of ABET, <http://www.abet.org>. The program in computer science is accredited by the Computing Accreditation Commission (CAC) of ABET. Graduate degrees are offered in each of these disciplines and in another area of specialization: materials science and engineering. (All of these graduate programs offer both master's and doctoral degrees except software engineering, engineering management, logistics, and systems engineering, which offer a master's degree only.) A combined BS (Biology)/MS (Biomedical Engineering) degree is available for students interested in tissue engineering and biotechnology; see the Other Engineering Subject Areas section and the Biology section of the Undergraduate Catalog and the Biomedical Engineering section of the UT Arlington Graduate Catalog for details. There are several Fast Track Programs in the college of engineering where seniors with outstanding academic background may begin taking graduate classes for dual credit while still being undergraduates. More details on the Fast Track Programs are provided in a later section.

Preparation in High School for Admission to the College of Engineering

For students intending to pursue a major in engineering, the recommended curriculum is defined by the "Recommended Texas High School Program Graduation Requirements" approved by the State Board of Education beginning with School Year 2004-2005. This listing below reflects the current State Board recommendation and expands upon the University requirements stated earlier in this catalog:

English	
English	4
Mathematics	
Algebra I, II	2
Geometry	1
Additional Advanced Mathematics ¹	1
Science	
Chemistry	1
Physics	1
Other Science Courses	2
Computer Science	
Computer Science ²	1
Single Foreign Language	
Single Foreign Language ³	2
Social Science	
U.S. History	1
World History Studies	1
World Geography	1
U.S. Government	.5

Economics	.5
Other Courses	5
Total Hours	24

- 1 For the College of Engineering, this must explicitly include trigonometry
- 2 Most desirable syllabus would include computer programming in C, C++ or Java, and instruction in computer applications including word processing, spreadsheets, and database management.
- 3 For the College of Engineering, two levels of the same language are required.

In addition to the above, an additional year of advanced mathematics such as calculus is strongly recommended. Further, students planning careers in the health professions or biomedical engineering should take one year of biology. In all areas, students are urged to take advantage of advanced placement opportunities and honors programs. A student who enrolls without having completed the above courses will not be optimally prepared, and the duration of the student's undergraduate program will likely be extended. In particular, the engineering programs offered by the college are based upon a student being fully prepared to begin study with the following courses:

MATH 1426	CALCULUS I	4
PHYS 1443	GENERAL TECHNICAL PHYSICS I	4

Prerequisites for the above courses are considered deficiencies and are not counted toward an engineering degree.

Admission to the College of Engineering

Admission to the College of Engineering is based on the University's undergraduate admission requirements plus the following additional admission criteria for the College of Engineering.

STUDENTS ENTERING DIRECTLY FROM HIGH SCHOOL

Students entering directly from high school or with less than 24 hours of transfer credit will be evaluated on the basis of the following admission criteria:

- meeting the UT Arlington admissions requirements.
- presenting a satisfactory SAT or ACT score (successful applicants typically have an SAT score of 1200 or higher or a composite ACT score of 27 or higher).
- completing the prerequisites necessary to enroll in MATH 1426 CALCULUS I.

Students for whom English is the primary language must present a minimum of two high school units in a single foreign language. Students otherwise qualified, but not presenting such credit, will be admitted with a foreign language deficiency that must be removed prior to graduation.

Students entering directly from high school or with less than 24 hours of transferrable credit will initially be advised by the University College. Transitioning to advisement by the College of Engineering advisors will occur as the student accomplishes certain GPA and course completion milestones.

STUDENTS ENTERING WITH TRANSFER CREDIT

Transfer students include those from other units within UT Arlington as well as those from other educational institutions. Transfer students from outside UT Arlington must furnish an official transcript (or copy) to the Dean of Engineering and/or department to which they are applying to permit an evaluation of all college level work completed. Transfer students with less than 24 hours of transferable credit are admitted under the criteria for students entering directly from high school.

Transfer students with 24 hours or more of transferable credit will be evaluated on the basis of the following admission criteria:

- meeting the UT Arlington admissions requirements.
- completing at least the prerequisites necessary to enroll in MATH 1426 CALCULUS I.
- having a GPA of 3.0 or above calculated on transferred credits applicable to the degree they are seeking.
- complying with the C-grade rule. (See Academic Regulation 5 below.) Consequently, the student must be prepared to repeat any such courses until a grade of C or higher is obtained prior to enrolling in any course for which such courses are a prerequisite. Note: this applies to all transfer students whether from other educational institutions or from within UT Arlington.

Students for whom English is the primary language must present a minimum of two high school units in a single foreign language. Students otherwise qualified, but not presenting such credit, will be admitted with a foreign language deficiency that must be removed prior to graduation

Advising

Students entering directly from high school and those with less than 24 hours of transferrable credit are advised initially in the University College. Students are transitioned to advising in the College of Engineering as they progress successfully in their degree programs.

Students with 24 hours or more of transferrable credit are advised in the College of Engineering. New transfer students who are undecided about their engineering major or who are conditionally admitted are advised in Engineering Student Services; others are advised in their major department. New students, when reporting for advising, must have a transcript (original or copy) of high school work, a transcript (original or copy) of any college transfer credit applicable to an engineering degree, and a copy of SAT or ACT scores that have been used as a basis for admission. New students will not be able to register for classes without first being advised and obtaining an approval to register.

Continuing students in all engineering majors must receive advising by their major departments before registering. One period in October and another in March are designated for preregistration advising. Students must be cleared (showing that they have been advised) before proceeding with registration.

The advising goal for students who have not yet attained professional program status is to strengthen their academic background sufficiently so that they are able to subsequently complete courses in their engineering degree plans. To this end, a student's advisor may require him or her to enroll in fewer courses than specified by the University and may require him or her to take courses for which credit has already been received. See individual department program descriptions for requirements.

The College of Engineering's Engineering Student Services, located in 242 Nedderman Hall, houses the Co-op program and coordinated tutoring, assessment, and academic advising for engineering students.

Admission into the Professional Program

Students who have successfully completed the initial program of studies may apply to their department for advancement to the professional program. Prior to admission to the professional program, students are required to demonstrate their intellectual talent, work habits, and professional ethics to warrant acceptance for study toward an engineering or computer science degree.

Hereafter, the term "pre-professional courses" is used for courses required in the first two years of the degree program as specified by the department, and the term "professional courses" is used for courses required in the third and fourth years of the degree program. The professional program includes students who have been accepted by an engineering department into the professional program course sequence. An official degree plan is filed upon acceptance into this category. For advancement to a department's professional program, students must meet the following requirements:

- 1. Academic performance:** Students must have completed all pre-professional courses with a grade of C or better, complied with the Three-Attempt Rule, and achieved a minimum three-calculation GPA as specified by the department. Refer to the College of Engineering Academic Regulations and individual department program descriptions for specific requirements in the desired program.
- 2. Limitations on Enrollment:** The University and the College of Engineering reserve the right to limit enrollment in any program, based on the availability of facilities and staff. To achieve such limitations, grade point averages and other measures of student potential beyond the minimum stated above may be applied.

Competence in Oral Communication and Computer Use

Students in engineering satisfy the oral communication requirement by successfully completing COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING. The various programs in the College of Engineering have different requirements for demonstrating computer literacy. Students should consult their particular degree program for details.

College of Engineering Academic Regulations

All students pursuing a degree in one of the College's academic programs must abide by the academic regulations of the University and the following additional rules established by the College of Engineering:

REGULATIONS REGARDING WORK AT OTHER INSTITUTIONS

- 1. Enrollment in Other Institution(s):** To ensure adequate coverage of needed material, once enrolled at UT Arlington as an engineering major, a student must obtain written permission from the department before enrolling in courses intended to be transferred to UT Arlington for credit toward a UT Arlington engineering degree.
- 2. Transfer Courses:** Only equivalent courses in a program accredited by ABET, Inc. (formerly the Accreditation Board for Engineering and Technology) or those freshman and sophomore courses accepted by the College of Engineering or the student's major department can be counted toward an engineering degree.
- 3. Validation of Transfer Credit:** Transfer credit that constitutes a part of a continuing course sequence in the same area will be validated only upon satisfactory completion of the succeeding course in the sequence at UT Arlington. Students whose performance in the subsequent courses at UT Arlington is poor may be required to repeat courses taken elsewhere.

REGULATIONS REGARDING WORK AT UT ARLINGTON

4. Academic Honesty: The College of Engineering takes academic honesty and ethical behavior very seriously. Engineers are entrusted with the safety, health, and well being of the public. Students found guilty of academic dishonesty will be punished to the full extent permitted by the rules and regulations of UT Arlington. In particular, a student found guilty of a second offense by the Office of Student Judicial Affairs will be subject to dismissal from the College of Engineering.

5. C-Grade Rule: A grade of D or lower in a pre-professional course indicates unsatisfactory preparation for further engineering education. Any such course in which a D or lower is received must be repeated before enrolling in any course for which it is a prerequisite. This requirement is subject to the Three-Attempt Rule. A student unable to raise his or her grade to at least a C in a pre-professional course within three enrollments (attempts) shall be required to change his or her major to a field outside of the College of Engineering.

6. English as a Foreign Language: Courses in English as a foreign language will not substitute for either ENGL 1301 RHETORIC AND COMPOSITION I or ENGL 1302 RHETORIC AND COMPOSITION II.

7. Foreign Language Deficiency Removal: Students admitted to the College of Engineering with a deficiency in foreign language must remove that deficiency prior to graduation by taking two courses in a single modern or classical language totaling not less than six semester hours credit (eight semester hours are required in the current UT Arlington introductory modern and classical languages sequence).

8. Academic Load: A student may not enroll in more than the University's maximum permitted academic load without receiving the permission of the student's department and the Dean of Engineering. The College of Engineering considers 12 semester hours in the fall and spring terms and nine semester hours in the 11-week summer term to be a minimum "full load" for undergraduates.

9. Three-Attempt Rule: A student may not attempt a course (at UT Arlington and/or at any other institution) more than three times and apply that course toward an engineering degree. Enrollment in a course for a period of time sufficient for assignment of a grade, including a grade of W, is considered an attempt.

REGULATIONS REGARDING ACADEMIC STANDING

10. Three-Calculation GPA: The College of Engineering uses three GPA calculations to evaluate students for admission and continuation. These calculations employ only the grades received in courses that are applicable to the engineering degree being sought. Any references in this catalog to the three-calculation GPA requirement mean that the student's GPA must meet or exceed the requirement in each of the following three categories:

- all courses
- all math, science, and engineering courses, and
- all courses, if any, taken in the major subject. (The college will use the University's current grade-repeat policy or grade-exclusion policy in determining the three-GPA calculations.)

11. Satisfactory Academic Standing: An engineering student is in satisfactory academic standing if the student is not on University probation and at the same time meets the GPA requirements of his/her major program. (See the major department section of the catalog for the requirement.)

12. College of Engineering Probation: Students in an engineering pre-major or classified Undecided Engineering (UENG) will be placed on College of Engineering probation if any of the three parts of their three-calculation GPA falls below their program's requirement for advancement to the professional program. Students in an engineering major will be placed on College of Engineering probation if their major GPA or overall GPA falls below their program's requirement for graduation (2.0 for all programs). A student's academic standing is determined as soon as grades are reported by the Registrar at the end of each semester. Depending on the circumstances, a student on College of Engineering probation may have restrictions on course load or course selection, may be given specific course grade requirements, and ultimately may be required to change his/her major to one outside of the College of Engineering.

Fees

In addition to fees applicable to the entire University, each engineering course carries a "designated tuition" charge (authorized by the Board of Regents per statute 54.0513) detailed under Description of Tuition and Fees (<http://www.uta.edu/uta/tuition>).

Minors in the College of Engineering

A number of the undergraduate programs in the college of engineering offer students in other disciplines the opportunity to earn a minor. In most cases the a student has to complete 18 hours of course work as designated by the program to earn a minor. In many cases some of the courses in the minor may be used as an elective in the program the student is majoring in. The following departments in the college of engineering offer minors: Mechanical and Aerospace Engineering Department offers minors in Aerospace Engineering (<http://www.uta.edu/engineering/future-students/undergraduate/programs/aerospace-engineering-minor.php>) and Mechanical Engineering (<http://www.uta.edu/engineering/future-students/undergraduate/programs/mechanical-engineering-minor.php>). Computer Science and Engineering Department offers a minor in Computer Science (<http://www.uta.edu/engineering/future-students/undergraduate/programs/computer-science-minor.php>). Electrical Engineering Department offers a minor Electrical Engineering (<http://www.uta.edu/engineering/future-students/undergraduate/programs/electrical-engineering-minor.php>). Industrial and Manufacturing Systems Engineering Department offers a minor in Industrial Engineering (<http://www.uta.edu/engineering/future-students/undergraduate/programs/industrial-engineering-minor.php>). Materials Science and Engineering Department offers a minor in Materials Science and Engineering (<http://www.uta.edu/engineering/future-students/undergraduate/programs/materials-science-and-engineering-minor.php>).

www.uta.edu/engineering/future-students/undergraduate/programs/materials-science-and-engineering.php). The College of Engineering offers a minor in Nuclear Engineering and a minor in Sustainable Engineering, as detailed in the following section

Requirements for a Minor in Nuclear Engineering

To receive a minor in Nuclear Engineering, a student must complete the following courses with a grade of C or better in each:

NE 3301	INTRODUCTION TO NUCLEAR ENGINEERING	3
NE 4302	NUCLEAR REACTOR THEORY/ANALYSIS	3
NE 4303	REACTOR THERMAL HYDRAULICS	3
Select three of the following (with a grade of C or better in each):		9
MAE 3311	THERMODYNAMICS II	
MAE 3309	THERMAL ENGINEERING	
MAE 3314	HEAT TRANSFER	
MAE 4347	HEAT EXCHANGER DESIGN	
MAE 4310	INTRODUCTION TO AUTOMATIC CONTROL	
EE 3302	FUNDAMENTALS OF POWER SYSTEMS	
EE 4314	CONTROL SYSTEMS	
PHYS 3446	NUCLEAR AND PARTICLE PHYSICS	
Total Hours		18

Requirements for a Minor in Sustainable Engineering

To receive a minor in Sustainable Engineering, a student must complete the following courses with a grade of C or better in each:

ENGR 2300	INTRODUCTION TO SUSTAINABLE ENGINEERING	3
IE 3315	OPERATIONS RESEARCH I	3
ENGR 4395	SUSTAINABLE ENGINEERING DESIGN PROJECT	3
Select 1 of the following Societal Context Electives (3 hours)		
ECON 2305	PRINCIPLES OF MACROECONOMICS	3
IE 2308	ECONOMICS FOR ENGINEERS	3
Select 2 of the following Sustainable Engineering Electives (6-7 hours)		
CE 3334	PRINCIPLES OF ENVIRONMENTAL ENGINEERING	3
CE 4323	LANDFILL DESIGN	3
CE 4350	INTRODUCTION TO AIR POLLUTION	3
CE 4351	PHYSICAL UNIT PROCESSES	3
CE 4353	WATER CHEMISTRY	3
CE 4354	INTRODUCTION TO SOLID AND HAZARDOUS WASTE MANAGEMENT	3
CE 4355	DESIGN OF WATER AND WASTEWATER TREATMENT FACILITIES	3
CE 5338	SYSTEM EVALUATION	3
EE 4328	CURRENT TOPICS IN ELECTRICAL ENGINEERING	3
EE 2403	ELECTRONICS I	4
MAE 4301	SPECIAL TOPICS IN MECHANICAL AND AEROSPACE ENGINEERING	3
MSE 4390	SPECIAL TOPICS IN MATERIALS SCIENCE & ENGINEERING	3

Requirements for an "Engineering Math Minor"

The Mathematics Department supports an "Engineering Math Minor" available to students with a major in the College of Engineering. For specific requirements, please see the departmental advisor in the major program.

Undergraduate Certificates in the College of Engineering

Undergraduate certificates in areas of specializations are offered in the College of Engineering. These certificates include a Certificate in Nanotechnology and a Certificate in Unmanned Vehicle Systems. Typically students have to complete between 12 to 15 hours of course work as detailed in the requirements for specific programs to earn a certificate. These certificates can be earned by either students who are currently pursuing their undergraduate degree at UT Arlington or by students who are enrolled in other institutions or students who have already completed a degree

in another institution and wish to specialize in a new field. More information about the certificates offered in the College of Engineering is provided in individual department sections of the catalog as well as in the web pages of the respective departments offering the certificates.

Honors Degrees in Engineering

College of Engineering students who wish to graduate with an Honors Degree in Engineering must be members of the Honors College in good standing. They must complete the major degree requirements and the requirements of the Honors College, which include at least 24 hours of Honors course work while maintaining an overall GPA of 3.0 or greater. Honors Degree requirements are compatible with all departmental and college requirements, but specific requirements vary with each engineering department's program. It is particularly important that students pursuing an Honors Degree in Engineering consult carefully with an advisor in the College of Engineering and also in the Honors College before each registration to be sure all requirements are met.

Fast Track Master's Degrees in Engineering

The Fast Track Program enables outstanding UT Arlington senior undergraduate students in several disciplines to satisfy degree requirements leading to a master's degree in that discipline while completing their undergraduate studies. When senior-level students are within 15 hours of completing their undergraduate degree requirements, they may take up to nine hours of graduate level coursework designated by the program to satisfy both undergraduate and graduate degree requirements. Interested UT Arlington undergraduate students should discuss this option with their advisors. Information is provided in the department section of this catalog, with details available in departmental offices.

At this time, there are Fast Track programs in the following undergraduate programs:

- Aerospace Engineering leading to a Master's Degree in Aerospace Engineering
- Biochemistry leading to a Master's Degree in Biomedical Engineering
- Civil Engineering leading to a Master of Engineering Degree in Civil Engineering
- Computer Engineering leading to a Master's Degree in Computer Engineering
- Computer Science leading to a Master's Degree in Computer Science
- Electrical Engineering leading to a Master's Degree in Electrical Engineering
- Industrial Engineering leading to a Master's Degree in Industrial Engineering
- Mechanical Engineering leading to a Master's Degree in Mechanical Engineering
- Physics leading to a Master's Degree in Materials Science and Engineering
- Physics leading to a Master's Degree in Biomedical Engineering
- Software Engineering leading to a Master's Degree in Software Engineering

Professional Engineering Licensure

The protection of the public welfare requires that those who practice engineering do so ethically and competently. Professional licensure requires an individual to meet examination and practice requirements defined by the laws of the state or states in which he or she intends to practice.

The first step toward licensure as a Professional Engineer (P.E.) is to pass the Fundamentals of Engineering (FE) examination. Graduating seniors are permitted to take the FE examination during their final year. The FE examination is offered by the Texas Board of Professional Engineers in both the fall and spring semesters. Since this examination is over topics common to all engineering degree programs, students are strongly urged to avail themselves of this opportunity at a time when their academic preparation is at a peak.

Pre-med and Pre-law Studies

Students graduating with degrees in engineering occasionally choose to go on to medical schools or law schools. Those students are advised to consult early with the pre-med or pre-law advisors at UT Arlington so that additional requirements can be taken in a timely way. For example, a minimum set of additional courses for an engineer planning to apply to medical school consists of 4 chemistry courses (2 in general chemistry, 2 in organic chemistry), and 4 biology courses (2 in general biology plus genetics and animal physiology).

Cooperative Education

The Cooperative Education Program (Co-op Program) at UT Arlington is a partnership between the University and various organizations of businesses, government, and industries that provides students with an opportunity to obtain experience in their chosen engineering discipline by alternating periods of formal study with periods of work or through a parallel program which allows students to work part time while taking courses at UT Arlington. This program enhances a student's education through work-related experiences and by association with participating professional engineers, and provides a competitive salary when working, as well.

Students who successfully complete the Co-op Program will receive cooperative education certificates and have this accomplishment entered on their transcripts. Co-op Program students are expected to register each work term in an engineering course (ENGR 2100 SUPERVISED ENGINEERING WORK EXPERIENCE, ENGR 3100 SUPERVISED ENGINEERING WORK EXPERIENCE, ENGR 4100 SUPERVISED ENGINEERING WORK EXPERIENCE, ENGR 3000 SUPERVISED ENGINEERING WORK EXPERIENCE) specified by the Director of the Co-op Program. For enrollment

reporting purposes only, students registered for one of these four courses will be considered full-time students. Students classified as full-time students under the Co-op Program are not eligible for financial aid, but can use this designation for enrollment reporting for insurance purposes. Students requiring financial aid must meet state and federal enrollment guidelines for enrollment in the required minimum semester credit hours each semester where aid is sought. The College of Engineering provides assistance in placing students with companies that are related to their specific needs and program of study.

Information on prerequisites for application and requirements for acceptance are available in the Cooperative Education Office, 242 Nedderman Hall, and on the College of Engineering Web site (<http://www.uta.edu/engineering>).

Research and Graduate Education:

The seven departments in the College of Engineering offer 9 doctoral degrees and 14 master's degrees in engineering, with more than 2,100 master's students and 500 doctoral students. In addition to two Organized Research Centers of Excellence (<http://www.uta.edu/engineering/research/centers.php>), there are 75 research centers, laboratories and groups (<http://www.uta.edu/engineering/research/department-labs-centers-groups.php>) producing more than \$37 million in research for government and private industry.

The college is a leader in distance education, providing a convenient way for working engineers to pursue a master's degree. Starting with TAGER, a dedicated microwave communications link in 1975, courses are now distributed on the Internet in streaming video, providing a very convenient access to students. More information can be found at Engineering Online (<http://www.uta.edu/engineering/future-students/engineering-online>).

RESEARCH INTERESTS OF FACULTY

Bioengineering (<http://www.uta.edu/bioengineering>)

Biological signal processing; biosensors; neuroscience engineering; soft- and hard-tissue mechanics; tissue engineering; artificial- and hybrid-organ design; biomaterials; medical imaging with ultrasound, magnetic resonance imaging, electron and confocal microscopy, stem cell research, acousto-optical imaging, regenerative medical engineering.

Civil Engineering (<http://www.uta.edu/ce>)

Environmental engineering; construction; infrastructure; transportation planning; hazardous- and toxic-waste abatement; hydrology; structural analysis; analytical methods in structural dynamics; steel structures and marine riser mechanics; bridge design and rehabilitation; disaster mitigation; biological and chemical processes in water quality control; water reclamation and reuse; natural systems for wastewater treatment; structural analysis and design of reinforced concrete, steel, timber, and masonry systems; soil mechanics; soil stabilization; foundation engineering; traffic flow theory; traffic engineering; highway capacity analysis; transportation systems analysis; operations research; properties and behavior of structural concrete; experimental stress analysis.

Computer Science and Engineering (<http://cse.uta.edu>)

Computer systems architecture and modeling, interconnection networks, simulation and performance evaluation, mobile computing, telecommunications, computer security, parallel processing, distributed systems, databases, big data analysis, cloud computing, knowledge-based systems, artificial intelligence, multi-agent systems, image processing, robotics, neural networks, machine learning, object-oriented systems, software engineering, software testing, object-oriented testing, software development methodologies, software and hardware systems specification, distributed multimedia and video processing, data mining, embedded systems, pervasive computing, image databases, bioinformatics, instrumentation and sensors, assistive technologies, human-centered computing.

Electrical Engineering (<http://www.uta.edu/ee>)

Nanotechnology, quantum optics, electron-device modeling, power electronics, holography, integrated optics, quantum well devices, microwave and millimeter-wave integrated circuits, molecular beam epitaxy, electrooptics, power systems, industrial power electronics, renewable energy and vehicular technology, remote sensing and wave scattering, robotics, robust control, signal processing, flight simulation, utility deregulation issues, neural networks, computer vision, telecommunications, fiber optics, microwave communications, instrumentation, modeling and simulation, photovoltaics, nanoelectronics, MEMS, mixed signals.

Industrial, Manufacturing & Systems Engineering (<http://www.uta.edu/ie>)

Design for producibility and reliability, manufacturing systems, automation, CAD/CAM, robotics, engineering design and development process, ergonomics, computer-integrated enterprise, enterprise design and analysis, statistical process control, manufacturing error analysis, linear models, work sampling, discrete event computer simulation, economic decision making, production and inventory control, project control, manufacturing, logistics, enterprise engineering, operations research, statistics.

Materials Science and Engineering (<http://www.uta.edu/mse>)

Nanomaterials; nanoelectronics, single electron and carbon nanotube devices; semiconductor processing; optoelectronics; piezoelectric materials; solar cells; biomaterials and bio-sensors; thin films, coatings and surface engineering; tribology; corrosion, fatigue and fracture mechanics; mechanical and thermal properties of advanced composites; structural materials; intermetallic systems; electrically conductive polymers; materials for energy applications including solar cells, fuel cells, battery technology; environmental degradation of materials.

Mechanical & Aerospace Engineering (<http://www.uta.edu/mae>)

Computational and experimental fluid dynamics, flight dynamics and controls, supersonic and hypersonic aerodynamics, pulse detonation engines, smart structures/materials. Dynamic systems and controls, design and manufacturing, fluid mechanics, heat transfer, sprays, and combustion, solid mechanics and structures, electronic packaging, biomedical applications of heat and mass transfer. Composites: Damage Tolerance, Fatigue and Fracture Analysis

There are two formal research centers, the University of Texas at Arlington Research Institute (UTARI) and the Nanotechnology Research and Teaching Facility (NRTF), where a significant amount of the ongoing research is related to engineering and a number of the graduate students and faculty from the College of Engineering participate.

Many College of Engineering faculty members collaborate with professors and researchers in other colleges at UT Arlington and other institutions in the state, around the U.S., and around the world. Therefore, for those interested in doing research as part of graduate training, there are many opportunities to work on research projects that are either within the home department or interdisciplinary with other departments.

PROGRAMS

Graduate work in engineering at UT Arlington may lead to the master of science, master of engineering or doctor of philosophy in the following programs:

- Aerospace Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/mechanical-and-aerospace-engineering/msae.php>), ME (<http://www.uta.edu/engineering/future-students/programs-masters/mechanical-and-aerospace-engineering/meae.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/aerospace-engineering-phd.php>))
- Biomedical Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/bioengineering/msb.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/biomedical-engineering-phd.php>))
- Civil Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/civil-engineering/msce.php>), ME (<http://www.uta.edu/engineering/future-students/programs-masters/civil-engineering/mece.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/civil-engineering-phd.php>))
- Computer Science (MS (<http://www.uta.edu/engineering/future-students/programs-masters/computer-science-and-engineering/mscs.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/computer-science-phd.php>))
- Computer Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/computer-science-and-engineering/msce.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/computer-engineering-phd.php>))
- Electrical Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/electrical-engineering/msee.php>), ME (<http://www.uta.edu/engineering/future-students/programs-masters/electrical-engineering/meee.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/electrical-engineering-phd.php>))
- Industrial Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/industrial-and-manufacturing-systems-engineering/msie.php>), ME (<http://www.uta.edu/engineering/future-students/programs-masters/industrial-and-manufacturing-systems-engineering/meie.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/industrial-engineering-phd.php>))
- Materials Science and Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/materials-science-and-engineering/msmse.php>), ME (<http://www.uta.edu/engineering/future-students/programs-masters/materials-science-and-engineering/memse.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/materials-science-and-engineering-phd.php>))
- Mechanical Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/mechanical-and-aerospace-engineering/msme.php>), ME (<http://www.uta.edu/engineering/future-students/programs-masters/mechanical-and-aerospace-engineering/meme.php>) and Ph.D. (<http://www.uta.edu/engineering/future-students/programs-phd/mechanical-engineering-phd.php>))

In addition master's degree programs are also available in:

- Logistics (MS (<http://www.uta.edu/engineering/future-students/programs-masters/industrial-and-manufacturing-systems-engineering/msl.php>))
- Engineering Management (MS (<http://www.uta.edu/engineering/future-students/programs-masters/industrial-and-manufacturing-systems-engineering/msem.php>))
- Software Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/computer-science-and-engineering/msse.php>))
- Systems Engineering (MS (<http://www.uta.edu/engineering/future-students/programs-masters/industrial-and-manufacturing-systems-engineering/msse.php>))

Graduate work leading to a practice-oriented master's degree usually requires a design project, report, internship or additional coursework. Details are given in the individual program descriptions that follow.

Biomedical Engineering is a joint program of the UT Arlington Bioengineering Department in association with The University of Texas Southwestern Medical Center at Dallas. The Master of Science in Logistics and Master of Science in Engineering Management are offered in partnership with the College of Business Administration.

In addition to specific graduate degrees, students currently enrolled in degree earning graduate programs as well as applicants who have earned undergraduate degrees elsewhere may also enroll in and earn Graduate Certificates in various areas of specialization. Typically the graduate certificates

require the completion of 12-15 hours of graduate course work in a specified set of courses to earn a Graduate Certificate. Details of the Graduate Certificates are provided in individual departmental sections of the catalog.

Please visit the graduate program Web Site <http://www.uta.edu/engineering/future-students/index.php> for detailed information.

Bioengineering

Undergraduate Degrees

- Bachelor of Science in Biomedical Engineering (p. 255)
- Fast Track for Master of Science in Biomedical Engineering and Bachelor of Science in Physics (p. 255)
- Fast Track for Master of Science in Biomedical Engineering and Bachelor of Science in Biochemistry (p. 255)
- Bachelor of Science in Biology and Master of Science in Biomedical Engineering (p. 255)

Graduate Degrees

- Biomedical Engineering, M.S. (p. 251)
- Biomedical Engineering, B.S. to Ph.D. (p. 251)
- Biomedical Engineering, Ph.D. (p. 251)

Bioengineering - Graduate Programs

Objectives

The Biomedical Engineering Program is jointly offered by The University of Texas at Arlington and The University of Texas Southwestern Medical Center at Dallas (UT Southwestern). Research and teaching efforts of various departments in the biological, engineering, mathematical, physical, and medical sciences of both institutions are coordinated through the Committee on Graduate Studies in Bioengineering. The goal of the program is to prepare students for bioengineering careers requiring skills in research, development, and teaching in a variety of settings in industry, in hospitals, in research facilities of educational and medical institutions and in government regulatory agencies. Internships are aimed to further prepare students for careers in the bioengineering industry.

The program includes coursework and research in medical imaging, biosensors, physiological control systems, biomedical signal processing, biomedical instrumentation, rehabilitation, orthopedics, biomechanics, biomaterials and tissue engineering and neurosciences. Specifically, during the first year of their studies, students in the master's and doctoral programs must select one of the concentration tracks in Bioengineering:

1. Bioinstrumentation
2. Biomaterials/Tissue Engineering
3. Biomechanics
4. Medical Imaging

A track advisor is available to advise students on the relevant courses and the research opportunities in each track.

MASTER'S PROGRAM

The master's program is based upon graduate level work in Bioengineering, life sciences and related physical sciences.

DOCTORAL PROGRAM

The doctoral program is based upon graduate level work in Bioengineering, and extensive graduate training in the life sciences and related physical sciences. The program is aimed at the development of professional biomedical engineers capable of independent research.

COMBINED DEGREE PLAN: BACHELOR OF SCIENCE IN BIOLOGY AND MASTER OF SCIENCE IN BIOENGINEERING

This five-year curriculum prepares students for careers in the fast growing biotechnology and Bioengineering industries. The curriculum also prepares students for medical school and advanced study. Students are required to take courses from engineering, life sciences and liberal arts, culminating in a five-year Master of Science Degree in Biomedical Engineering, including a Bachelor of Science Degree in Biology. The curriculum is offered jointly by the College of Engineering and the College of Science.

FAST TRACK PROGRAMS FOR A MASTER'S DEGREE IN BIOMEDICAL ENGINEERING

The Fast Track program enables outstanding undergraduate Physics or Biochemistry students to receive dual undergraduate and graduate course credit leading to receiving both a Bachelor of Science Degree in either Physics or Biochemistry and a Master's Degree in Biomedical Engineering. See the departmental advisors for additional information on these programs.

Description

Bioengineers use quantitative methods and innovation to analyze and to solve problems in biology and medicine. Students choose the Bioengineering field to serve people, to partake in the challenge and excitement of working with living systems, and to apply advanced technology to complex problems of medical care. Through this program, students learn the essentials of life science, engineering theory, and the analytical and practical tools that enable them to be successful in the biotechnology and Bioengineering industries. The program includes coursework in the basic sciences, core engineering, Bioengineering, and advanced biotechnology disciplines. Both didactic classroom lectures and hands-on laboratory experience are emphasized. Additionally, students are required to take general educational courses in literature, fine arts, history, political science, and social science.

Career Opportunities

The program prepares students as biomedical engineers for careers in industry, in hospitals, in research facilities of educational and medical institutions, and in government regulatory agencies. It also provides a solid foundation for those wishing to continue for advanced degrees. For those planning to pursue a medical degree, this cross-disciplinary curriculum offers a solid foundation in engineering, which is an advantage in preparing for a medical career.

See the UT Arlington Undergraduate Catalog (<http://www.uta.edu/catalog>) for a more detailed description of this program.

Continuation

The Biomedical Engineering Graduate Program has established certain policies to fulfill its responsibility to graduate highly qualified professional engineers. In addition to the requirements of the Graduate School listed in this catalog under Advanced Degrees and Requirements, each bioengineering graduate student who wants to continue in the program must:

1. Maintain at least a B (3.0) overall GPA in all coursework, and
2. Demonstrate suitability for professional engineering practice.

At such time as questions are raised by bioengineering graduate faculty regarding either of the above, the student will be notified and will be provided the opportunity to respond to the Committee on Graduate Studies in Bioengineering. The Committee on Graduate Studies will review the student's performance and make a recommendation concerning the student's eligibility to continue in the program. Appeal of a decision on continuation may be made through normal procedures outlined in the section of this catalog entitled "Grievances Other than Grades."

Master's Admission

Application for admission should be made at either UT Arlington or U.T. Southwestern. Normally, the institution through which the student applies and is admitted is the student's home institution.

In addition to admission requirements of the Graduate School, the bachelor's degree held by applicants to the program may be in engineering, biological, physical, or mathematical sciences. Depending on the applicant's background, some preparatory coursework may be required, prior to admission into the program. The UT Arlington Biomedical Engineering Program uses the following guidelines in the admission review process:

UNCONDITIONAL ADMISSION

1. Minimum undergraduate GPA of 3.0 in the last 60 hours of undergraduate work in an engineering discipline as calculated by the Graduate School.
2. GRE Total (quantitative plus verbal) must be greater than 301 with a verbal score of 146 or better.
3. A minimum total TOEFL score of 575 for Paper-based testing and a score of 90 for Internet-based testing or better for international applicants whose native language is not English.

PROBATIONARY ADMISSION

1. If the applicant meets any two of the above items 1, 2, and 3.
2. A minimum total TOEFL score of 575 for Paper-based testing and a score of 90 for Internet-based testing or better for international applicants whose native language is not English.

PROVISIONAL ADMISSION

An applicant who is unable to supply all required documents prior to the admission deadline, but who otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRAL

If an applicant does not present adequate evidence of meeting admission requirements, the admission decision may be deferred until admission records are complete or the requirements are met.

DENIAL

A candidate may be denied admission if he/she has less than satisfactory performance in two out of the three admission criteria, excluding TOEFL.

Degree Requirements

MASTER OF SCIENCE DEGREE PLANS

Students in the Thesis Degree plan must take a minimum of 31 credit hours, and students in the Thesis-Substitute Degree plan must take a minimum of 34 credit hours as specified below.

Required Bioengineering

BE 5101	SEMINAR IN BIOENGINEERING	1
BE 5382	LABORATORY PRINCIPLES	3
One additional laboratory course in Bioengineering approved by the graduate advisor such as BE 5324, BE 5365 or BE 5373 (Two additional laboratory courses required for students under the Thesis Substitute Degree Plan)		3-6

Bioengineering

Select four of the following (consistent with the student's track of study and approval of the Graduate Advisor):

BE 5300	SELECTED TOPICS IN BIOENGINEERING	3
BE 5324	BIOMEDICAL OPTICS LABORATORY	3
BE 5325	FLUORESCENCE MICROSCOPY	3
BE 5327	TISSUE OPTICS	3
BE 5329	NEURAL ENGINEERING	3
BE 5331	POLYMERS IN BIOMEDICAL ENGINEERING	3
BE 5333	NANOBIMATERIALS	3
BE 5335	BIOLOGICAL MATERIALS, MECHANICS, & PROCESSES	3
BE 5337	TRANSPORT PHENOMENA IN BIOMEDICAL ENGINEERING	3
BE 5344	BIOINSTRUMENTATION I	3
BE 5346	MEDICAL IMAGING	3
BE 5352	DIGITAL PROCESSING OF BIOLOGICAL SIGNALS	3
BE 5361	BIOMATERIALS AND BLOOD COMPATIBILITY	3
BE 5364	TISSUE ENGINEERING LECTURE	3
BE 5365	TISSUE ENGINEERING LAB	3
BE 5366	PROCESS CONTROL IN BIOTECHNOLOGY	3
BE 5370	BIOMATERIAL - LIVING SYSTEMS INTERACTION	3
BE 5373	DRUG DELIVERY LAB	3

Engineering

Select one course from Bioengineering or other engineering departments, with the approval of the Graduate Advisor

3

Required Life Sciences

BE 5309	HUMAN PHYSIOLOGY IN BIOENGINEERING	3
One Three-Credit-Hour approved Life Science course.		3

Thesis Plan

BE 5698	THESIS (at the semester in which the student expects to submit and defend the thesis)	6
---------	---	---

Thesis Substitute Plan

One Three-Credit-Hour BE elective course		3
One Three-Credit-Hour Biostatistics Course		3

After completion, the student will receive his or her Masters Degree in Biomedical Engineering.

Doctoral Admission

In addition to admission requirements of the Graduate School, the bachelor's degree held by applicants to the program may be in engineering, biological, physical, or mathematical sciences. Depending on the applicant's background, some preparatory coursework may be required, prior to admission into the program. The UT Arlington Biomedical Engineering Program uses the following guidelines in the admission review process:

UNCONDITIONAL ADMISSION

1. Minimum GPA of 3.4 in the last 60 hours taken in the major field of study of engineering or physical sciences as calculated by the Graduate School.
2. GRE Total (quantitative plus verbal) must be greater than 308 with a verbal score of 146 or better.
3. Three favorable letters of recommendation.

4. A minimum total TOEFL score of 575 for Paper-based testing and a score of 90 for Internet-based testing or better for international applicants whose native language is not English.

PROBATIONARY ADMISSION

1. If an applicant meets any two of the above items 1, 2, and 3.
2. A minimum total TOEFL score of 575 for Paper-based testing and a score of 90 for Internet-based testing or better for international applicants whose native language is not English.

PROVISIONAL ADMISSION

An applicant who is unable to supply all required documents prior to the admission deadline, but who otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRAL

If an applicant does not present adequate evidence of meeting admission requirements, the admission decision may be deferred until admission records are complete or the requirements are met.

DENIAL

A candidate may be denied admission if he/she has less than satisfactory performance in two out of the three admission criteria, excluding TOEFL.

FELLOWSHIP

No additional requirements besides the information published by the Graduate School.

Degree Requirements

DOCTOR OF PHILOSOPHY DEGREE PLAN

The Ph.D. degree program consists of a minimum of 47 credit hours beyond the bachelor's degree level and includes the courses as specified below.

Required Bioengineering

BE 5101	SEMINAR IN BIOENGINEERING	1
Ph.D. Seminar for at least two semesters:		
BE 6103	PhD SEMINAR IN BIOENGINEERING	1
BE 6103	PhD SEMINAR IN BIOENGINEERING	1
Laboratory Course (BE 5324, BE 5365, BE 5373 or BE 5382)		3

Elective Bioengineering

Select five of the following:

BE 5300	SELECTED TOPICS IN BIOENGINEERING	3
BE 5324	BIOMEDICAL OPTICS LABORATORY	3
BE 5325	FLUORESCENCE MICROSCOPY	3
BE 5327	TISSUE OPTICS	3
BE 5329	NEURAL ENGINEERING	3
BE 5331	POLYMERS IN BIOMEDICAL ENGINEERING	3
BE 5333	NANOBOMATERIALS	3
BE 5335	BIOLOGICAL MATERIALS, MECHANICS, & PROCESSES	3
BE 5337	TRANSPORT PHENOMENA IN BIOMEDICAL ENGINEERING	3
BE 5344	BIOINSTRUMENTATION I	3
BE 5346	MEDICAL IMAGING	3
BE 5347	PRINCIPLES OF FUNCTIONAL MAGNETIC RESONANCE IMAGING	3
BE 5352	DIGITAL PROCESSING OF BIOLOGICAL SIGNALS	3
BE 5361	BIOMATERIALS AND BLOOD COMPATIBILITY	3
BE 5364	TISSUE ENGINEERING LECTURE	3
BE 5365	TISSUE ENGINEERING LAB	3
BE 5366	PROCESS CONTROL IN BIOTECHNOLOGY	3
BE 5370	BIOMATERIAL - LIVING SYSTEMS INTERACTION	3

Other courses with the approval of the Graduate Advisor

Elective (3 credit hours)

One Three-Hour-Course from other engineering departments or a life science course with the approval of the Graduate Advisor 3

Life Sciences (9 Credit Hours)

BE 5309 HUMAN PHYSIOLOGY IN BIOENGINEERING 3

Select one of the following: 3

Cell Physiology

Neuroscience

Tumor Physiology

Select one of the following: 3

Biochemistry

Molecular Biology

Immunology

Mathematics, Statistics, Computer and Physical Sciences

One Three-Credit-Hour Biostatistics course as approved by the Graduate Advisor.

Ph.D. Examinations and Dissertation

All doctoral students must satisfactorily complete the following exams at the semester in which the student expects to submit and defend the dissertation:

BE 6194 DOCTORAL DIAGNOSTIC EXAMINATION 1

BE 6195 DOCTORAL COMPREHENSIVE EXAMINATION 1

BE 6999 DISSERTATION 9

Although qualified applicants may be accepted into the Ph.D. program without earning the Master of Science in Biomedical Engineering, all students must satisfactorily pass BE 6194 DOCTORAL DIAGNOSTIC EXAMINATION. This examination will cover all relevant coursework taken by the student. The examination may be written, oral, or both and consists of a timed, written analysis of a major problem in the student's general area of research interest, followed by an oral examination covering the same material. Elements of engineering, physical and biological science, mathematics, computer science and statistics may be included in this examination.

For additional information, applicants and students should contact the BE Graduate Advisor for a copy of the "Information Brochure" for related and amplified information about the graduate program. The information can also be found at <http://www.uta.edu/bioengineering/>.

After completion, the student will receive his or her PhD in Biomedical Engineering.

Bioengineering - Undergraduate Programs

Overview

The Department of Bioengineering offers a Bachelor of Science (BS) degree in Biomedical Engineering (BS BME). The goal of the program is to prepare students for bioengineering careers requiring skills in research, development, and teaching in a variety of setting in industry, hospitals, research facilities of educational and medical institutions and government regulatory agencies. Graduates may also pursue their continuing education in the medical and dental field or graduate studies in bioengineering.

BS BME degree offers two areas for concentration: Biomaterials and Tissue Engineering; and Medical Imaging.

Educational Objectives of the Undergraduate Program

The purpose of the Bioengineering Department is to advance the cause of the profession through teaching and research and to produce technically knowledgeable, well rounded graduates who have the capability of developing into professionally competent engineers pursuing lifelong learning and assuming leadership roles in the profession. The BE Department supports the University and College of Engineering mission by offering a broad-based undergraduate education leading to a degree of bachelor of science in Biomedical Engineering with emphasis on technical, professional, ethical, and societal responsibilities associated with the practice of engineering. Advanced masters and doctoral degrees are offered with emphasis on technical specialization and the advancement of knowledge in several areas of bioengineering.

The overall goal of the Biomedical Engineering undergraduate program is to promote intellectual development of those interested in the bioengineering profession, and to produce graduates who possess the knowledge, tools and traits necessary for a successful career, and for assuming a leadership role in the bioengineering profession. More specifically, the educational program objectives are to produce graduates who:

- Possess a broad-based bioengineering education to successfully obtain professional positions, and practice bioengineering in a wide range of professional settings including industries, healthcare facilities, and consulting firms.
- Exhibit professional growth throughout their careers by taking on increasing professional responsibilities, and pursue life-long learning by participation in job-related advanced training activities, and/or attending graduate school, or professional school (medical or dental school).

- Demonstrate success and leadership in practice of engineering by contributing to the economic well-being of their employers and society, and by dedicated service to professional societies.

Student Outcomes of the Undergraduate Program

From these Program Educational Objectives, the department designed its baccalaureate program to offer its graduates:

- a. an ability to apply knowledge of mathematics, physical and life science, and engineering, especially bioengineering
- b. an ability to design, conduct in-vitro and in-vivo experiments to analyze and interpret data from living systems
- c. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- d. an ability to function on multi-disciplinary teams
- e. an ability to identify, formulate, and solve engineering problems, including those associated with the interactions between living and non-living systems
- f. an understanding of professional and ethical responsibility
- g. an ability to communicate effectively
- h. the broad education necessary to understand the impact of bioengineering solutions in a global, economic, environmental, and societal context
- i. a recognition of the need for, and an ability to engage in life-long learning
- j. a knowledge of contemporary issues
- k. an ability to use the techniques, skills, and modern engineering tools necessary for bioengineering practice

Minor Field of Study

The Bioengineering program does not currently offer the option of pursuing a minor in Bioengineering by other engineering or non-engineering majors.

Admission Requirements

Requirements for admission as a Biomedical Engineering major are governed by the requirements stated under the College of Engineering section of this catalog. Biomedical Engineering majors are only allowed to enroll in pre-professional courses until they meet the requirements for the professional program as outlined below. They must register only for courses approved by their faculty advisor and obtain their advisor's authorization for add/drops.

Undergraduate Advising

Students entering directly from high school and those with less than 24 hours of transferrable credit are advised initially in the University College. Students are transitioned to advising in the College of Engineering as they progress successfully in their degree programs.

Biomedical Engineering majors are required to be advised by an assigned advisor during the period set aside each semester by the College of Engineering for this purpose. Students are responsible for meeting with their advisors during the advising period. Periods set aside for advising and registration may be different, and students who do not meet with their advisors during the regular advising period may not be able to complete registration. All students should consult the departmental bulletin board for advisors' names and periods set aside for advising.

Biomedical Engineering students who have not been admitted to the professional program must register only for courses approved by their faculty advisor and obtain their advisor's authorization for add/drops. Failure to do so is grounds for dismissal from the Biomedical Engineering program. Students, including those in the professional program, who enroll in courses before taking the proper prerequisites or co-requisites, will be subject to dismissal from the Biomedical Engineering program.

Transfer students registering for the first time are advised separately prior to the beginning of the semester they enroll in courses. They should contact the department to set up an appointment for advising with a departmental undergraduate advisor prior to registration.

Admission to the Professional Program

Requirement for admission to the professional program in Biomedical Engineering are in accordance with those of the College of Engineering and additional requirements as follows.

- Application to the professional program is to be submitted to the BE Department after completion of all the pre-professional required courses and prior to taking any Bioengineering 3000 level course.
- No 3000 level Bioengineering course may be taken until the student is admitted into the professional program or obtains the written consent for the BE Department Chair.

- Each student must complete all the courses in the pre-professional required courses with a minimum grade of C in each course and a minimum GPA of 2.25
 - a. in all courses,
 - b. in math, science, and engineering courses.
- Upon receipt of the application, a student's record is individually reviewed including grades, academic and personal integrity, record of drops and course withdrawals, the order in which courses have been taken, the number of times a student has attempted a course for credit, and any other aspect of the student's record that may be deemed pertinent to admission.

The student must be admitted to the professional program and have an approved degree plan on file in order to graduate. The degree plan is generated upon entry to the professional program. Graduating seniors should apply to graduate during the next-to-last semester.

Prior Preparation and Course Requirements

The undergraduate baccalaureate degree in Biomedical Engineering is a four-year program and requirements for the degree are based upon prior high school preparation through either an honors or college track program. Students who have not had the appropriate prior preparation should contact the departmental advising office for a curriculum guide that will assist them in structuring a study plan that will include leveling courses. Students requiring leveling courses may require a period of time greater than four years to complete their undergraduate degree.

Academic Requirements

Academic performance requirements establishing satisfactory progress and grade point requirements are given in the College of Engineering section of this catalog.

GRADE REQUIREMENTS FOR BE COURSE PREREQUISITES

Biomedical Engineering majors (BE-Intended or BE) may not attempt a BE course until they have earned a grade of C or better in the prerequisite course(s).

REPEATING COURSES

Biomedical Engineering majors (BE-Intended or BE) may not attempt any course more than three times and apply that course toward a degree in Biomedical Engineering. Enrollment in a course for a period of time sufficient for assignment of a grade, including a grade of W, is considered an attempt.

GROUND FOR DISMISSAL FROM THE BE PROGRAM

Requirements for grounds for dismissal as a Biomedical Engineering major are governed by the requirements stated under the College of Engineering section of this catalog.

Requirements for a Bachelor of Science Degree in Biomedical Engineering

Pre-Professional Courses

Recommended Core Requirements

BIOL 1441	CELL AND MOLECULAR BIOLOGY	4
ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGR 1300	ENGINEERING PROBLEM SOLVING	3
HIST 1311	HISTORY OF THE UNITED STATES TO 1865	3
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	3
MATH 1426	CALCULUS I ¹	4
MATH 2425	CALCULUS II	4
PHYS 1443	GENERAL TECHNICAL PHYSICS I	4
POLS 2311	GOVERNMENT OF THE UNITED STATES	3
POLS 2312	STATE AND LOCAL GOVERNMENT	3
	A course on Creative Arts chosen by the student.	3
	A course on Language, Philosophy, & Culture (for Biomedical Engineering majors, PHIL 1304 must be used to satisfy this requirement.)	3
	A course on Social and Behavioral Sciences chosen by the student.	3
	A course on Communication (for Biomedical Engineering majors, COMS 2302 must be used to satisfy this requirement)	3

Program Requirements

BE 1105	MEDICAL APPLICATIONS OF ENGINEERING	1
BE 1225	INTRODUCTION TO BIOENGINEERING	2
BIOL 1442	EVOLUTION AND ECOLOGY	4

CHEM 1441	GENERAL CHEMISTRY I	4
CHEM 1442	GENERAL CHEMISTRY II	4
CHEM 2321 & CHEM 2181	ORGANIC CHEMISTRY and ORGANIC CHEMISTRY I LABORATORY	4
CHEM 2322 & CHEM 2182	ORGANIC CHEMISTRY and ORGANIC CHEMISTRY II LABORATORY	4
CHEM 4311	BIOCHEMISTRY I	3
CSE 1311	INTRODUCTION TO PROGRAMMING FOR ENGINEERS	3
MATH 2326	CALCULUS III	3
MATH 3319	DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA	3
PHYS 1444	GENERAL TECHNICAL PHYSICS II	4
Professional Courses		
BE 3301	CELL PHYSIOLOGY FOR BIOENGINEERS	3
BE 3320	MEASUREMENT LABORATORY	3
BE 3380	HUMAN PHYSIOLOGY IN BE	3
BE 4325	FUNDAMENTALS OF BIOENGINEERING	3
BE 4350	SENIOR DESIGN PROJECT I	3
BE 4355	SENIOR DESIGN PROJECT II	3
BE 4382	LABORATORY PRINCIPLES	3
IE 3301 or MATH 3316	ENGINEERING PROBABILITY STATISTICAL INFERENCE	3

¹ The Mathematics Department requires passing a placement test provided by the Mathematics Department before enrolling in MATH 1426 CALCULUS I.

Biomaterials and Tissue Engineering Concentration

BE 3310	BIOMECHANICS AND FLUID FLOW WITH COMPUTATIONAL LABORATORY	3
BE 3367	CELL CULTURE AND DRUG DELIVERY LABORATORY	3
BE 4334	INTRODUCTORY NANO AND BIOPOLYMER MATERIALS	3
BE 4337	TRANSPORT PHENOMENA IN BIOMEDICAL ENGINEERING	3
BE 4368	AN INTRODUCTION TO TISSUE ENGINEERING AND DRUG DELIVERY	3
Choose one additional course from list available at BE Advising Office.		3

Medical Imaging Concentration

BE 3344	BIOINSTRUMENTATION	3
BE 3346	MEDICAL IMAGING	3
BE 3352	DIGITAL PROCESSING OF BIOLOGICAL SIGNALS	3
BE 4324	BIOMEDICAL OPTICS LABORATORY	3
EE 2440	CIRCUIT ANALYSIS WITH LAB	4
Choose one additional course from list available at BE Advising Office.		3

More hours may be required to strengthen student's program or demonstrate proficiency. See Prior Preparation and Course Requirements.

Note: Total hours will depend upon prior preparation and academic qualifications. Also, students who do not have two units of high school foreign language will be required to take modern and classical languages courses in addition to the previously listed requirements.

Refer to the College of Engineering section of this catalog for information concerning the following topics: Admission into Engineering, Admission into Pre-Engineering, Admission into the Professional Program, Counseling or Advising, Transfer and Change of Major Policies, Honors Program, Academic Regulations, Professional Engineering Registration, Cooperative Education, Academic Probation, Repeating Course Policy and Academic Dishonesty.

Pre-Med or Pre-Dental Option

For those who plan to pursue degrees in medicine or dental science, the following additional course are required in preparation for taking MCAT or DAT

BIOL 3312	IMMUNOBIOLOGY	3
BIOL 3315	GENETICS	3
BIOL 3442	PRINCIPLES OF ANIMAL PHYSIOLOGY	4

BIOL 3444	GENERAL MICROBIOLOGY	4
CHEM 4312	BIOCHEMISTRY II	3
Beginning 2015 MCAT includes:		
PSYC 1315	INTRODUCTION TO PSYCHOLOGY	3
SOCI 1311	INTRODUCTION TO SOCIOLOGY	3

One of the above two can be taken under Social and Behavioral Science of General Core Requirement.

For details, please visit Health Professions Advisor, UT Arlington College of Science (<http://www.uta.edu/cos/hp.php>)

Transfer Students and Transfer Credit

When a student transfers to the Bioengineering Department from another department or institution or vice versa, a loss of credit can occur and his/her academic plans may have to be changed. Courses that appear to be similar may be different in either content or level of difficulty and, as a result, cannot be used for degree credit. When a student's record indicates weakness in certain areas of study, he/she will be required to retake courses or to take additional courses. Transfer students should contact the Department of Bioengineering after admission and prior to registration.

Transfer students with 24 hours or more of transferable credit must meet the following requirements:

- Completed prerequisites necessary to enroll in MATH 1426 CALCULUS I and PHYS 1443 GENERAL TECHNICAL PHYSICS I
- Students for whom English is a primary language must present two high school units in a single foreign language or will be admitted with a foreign language deficiency that must be removed prior to graduation.
- A GPA of 3.0 or above calculated on transferred credits which include at least 15 hours of applicable math, science, and engineering courses.
- Students must be prepared to repeat any transferred courses below a C until a grade of C or higher is obtained prior to enrolling in any course for which such courses are prerequisite. To transfer bioengineering course credits, the limitation on the number of times a course can be repeated is three.

Students who do not meet these criteria will be reviewed and considered on individual merits for admission into the BE Intended (or Pre) Major.

Prior to advising, a transfer student should present to an undergraduate advisor a transcript (official or copy) from each school previously attended. Only the equivalent courses in a program accredited by ABET or equivalent freshman and sophomore courses accepted by the department can be counted toward a degree in Biomedical Engineering. To be acceptable as an equivalent course, it must be equivalent to our corresponding course in credit value and course content. Junior and senior level courses taken at a college or university which does not have a Bioengineering program accredited by ABET cannot be used to satisfy the requirements for a degree in Biomedical Engineering.

A student in the Department of Bioengineering at UT Arlington who wishes to enroll in courses at another college or university for transfer credit toward a degree in Biomedical Engineering should, first, consult with an undergraduate advisor to verify that the course credits can be used in the student's Biomedical Engineering degree plan.

Competence in Oral Communication and Computer Use

Completion of COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING, with a grade of C or better, is required to earn a degree in Biomedical Engineering. Also, successful completion of COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING meets the University's oral communication requirement.

All Bioengineering students are required to complete BE 1104 INTRODUCTION TO ENGINEERING, and BE 1225 INTRODUCTION TO BIOENGINEERING, with a grade of C or better. Successful completion of these courses satisfies the University's computer proficiency requirement.

Bioengineering Degree Programs at UT Arlington

At the undergraduate level, the department offers a Bachelor of Science in Biomedical Engineering degree with two concentrations for the undergraduate program:

1. Biomaterials and Tissue Engineering and,
2. Medical Imaging.

Descriptions of BE degree options are available in the BE Advising Office. All degree options are designed to provide a strong foundation in science, mathematics, and engineering science; technical competence in multiple areas of Bioengineering practice; and an understanding of the importance of ethics, safety, professionalism, and socioeconomic concerns in resolving technical problems through synthesis, planning, and design. Elements of design are introduced at the freshman level. This is followed by an analysis and design component in professional program courses, culminating in a comprehensive design experience.

At the graduate level, the Master of Engineering, Master of Science, and Doctor of Philosophy degrees are offered. Graduate bioengineering degrees are concentrated in one of the areas of specialization available within the department: Bioinstrumentation, Biomaterial/Tissue Engineering, Biomechanics/Orthopedics, Medical Imaging, or Protein Engineering (Doctor of Philosophy only)

The Department of Bioengineering has active student chapters associated with the Biomedical Engineer Student Society (BMESS). Students are encouraged to participate in the activities of the organization. Membership is by election and is limited to students in the upper third of the junior and senior classes who satisfy other requirements listed in the society's bylaws.

Fast Track Programs for a Master of Science in Biomedical Engineering and a Bachelor of Science in Physics or Biochemistry

The Department of Bioengineering also offers Fast Track dual degree program in collaboration with the Chemistry and Biochemistry, and Physics departments at UT Arlington. These programs offer the interested students an opportunity to earn a Master's Degree in Biomedical Engineering (MS) and a Bachelor of Science Degree in Biochemistry, or Physics. The Fast Track Program enables outstanding senior undergraduate Physics or Biochemistry students to receive dual undergraduate and graduate course credits leading to receiving both a Bachelor of Science Degree in either Physics or Biochemistry and a Master's Degree in Biomedical Engineering. See the departmental advisors for additional information on these programs.

Further, undergraduate students in other engineering disciplines may develop a fundamental knowledge of the field of bioengineering. Student having permission from their department's undergraduate advisor may enroll in the courses listed below and obtain an emphasis in bioengineering. Ordinarily, the student will take these courses as technical elective, free electives and science electives. Interested students should contact the undergraduate advisor of the Department of Bioengineering for additional information.

Elective courses for students who wish to obtain an emphasis in bioengineering:

BE 1225	INTRODUCTION TO BIOENGINEERING	2
BE 4325	FUNDAMENTALS OF BIOENGINEERING	3

At the graduate level, the Department of Bioengineering offers a program of studies leading to masters and doctoral degree in Biomedical Engineering.

Combined Degree Plan: Bachelor of Science in Biology and Master of Science in Biomedical Engineering

This five-year curriculum prepares students for careers in the fast growing biotechnology and bioengineering industries. The curriculum also prepares students for medical school and advanced study. Students are required to take courses from engineering, life sciences and liberal arts, culminating in a five-year Master of Science Degree in Biomedical Engineering and a Bachelor of Science Degree in Biology. The curriculum is offered jointly by the College of Engineering and the College of Science. In this program, two areas of emphasis are offered: Medical Imaging, and Biomaterials and Tissue Engineering.

DESCRIPTION

Bioengineers use quantitative methods and innovation to analyze and to solve problems in biology and medicine. Students choose the bioengineering field to be of service to people, to partake in the excitement of working with living systems, and to apply advanced technology to complex problems of medical care.

Through this program, students learn the essentials of life science, engineering theory, and the analytical and practical tools that enable them to be successful in the biotechnology and bioengineering industries. The program includes course work in the basic sciences, core engineering, biomedical engineering, and advanced biotechnology disciplines. Both didactic classroom lectures and hands-on laboratory experience are emphasized. Additionally, students are required to take general educational courses in literature, fine arts, history, political science, and social science.

CAREER OPPORTUNITIES

The program prepares students as bioengineers for careers in industry, in hospitals, in research facilities of educational and medical institutions, and in government regulatory agencies. It also provides a solid foundation for those wishing to continue for advanced degrees. For those planning to pursue a medical degree, this cross-disciplinary curriculum offers a solid foundation in engineering, which is an advantage in preparing for a medical career.

REQUIREMENTS

Regardless whether a student chooses Medical Imaging or Biomaterials and Tissue Engineering emphasis, after completion of 120 semester credit hours of the undergraduate courses from the list for the emphasis (below) and prior to taking any graduate course, the student must apply to the UT Arlington Graduate School for admission to the Bioengineering Department. A minimum grade point average of 3.0 in the 120 semester credit hours as well as a minimum average of 3.0 in the required English courses and a minimum average of 3.0 in the required Mathematics courses is required for admission to the Bioengineering Department.

ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
MATH 1426	CALCULUS I	4
MATH 2425	CALCULUS II	4
MATH 2326	CALCULUS III	3

MATH 3319	DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA	3
Total Hours		20

The student should also submit two letters of recommendation, one from the Bioengineering five-year program advisor or a faculty member and one from the Biology undergraduate advisor.

Medical Imaging Emphasis Courses

Pre-Professional Courses

Recommended Core Requirements

BIOL 1441	CELL AND MOLECULAR BIOLOGY	4
CHEM 1441	GENERAL CHEMISTRY I	4
ENGL 1301	RHETORIC AND COMPOSITION I	3

Civil Engineering

Undergraduate Degree

- Bachelor of Science in Civil Engineering (p. 271)
- Bachelor of Science in Architectural Engineering (p. 263)

Graduate Degrees

- Civil Engineering, M.Engr. (p. 267)
- Civil Engineering, M.Engr. Fast Track (p. 267)
- Civil Engineering, M.S. (p. 267)
- Civil Engineering, Ph.D. (p. 267)
- Construction Management, M. (p. 275)

Architectural Engineering - Undergraduate Program

Educational and Professional Career Paths

Architectural engineering is interdisciplinary, requiring expertise in structural engineering and architecture. An Architectural Engineer can be responsible for the individual design of each of a building's systems: structural, heating, ventilation, and air conditioning, lighting and electrical, plumbing, and fire protection. An Architectural Engineer can be responsible for the coordinated design of all these systems and, then, for the construction of the entire building with the goal of a safe, economical, and sustainable building system that satisfies the use requirements and provides a secure and comfortable environment for its occupants.

This degree program is designed to provide a strong foundation in science, mathematics, and engineering science; technical competence in the structural engineering area of civil engineering; and an understanding of the importance of ethics, safety, professionalism, and socioeconomic concerns in resolving technical problems through synthesis, planning, and design. Elements of design are introduced at the freshman level. This is followed by an analysis and design component in professional program courses, culminating in a comprehensive design experience.

Architectural engineering graduates are prepared for advanced graduate degrees and a wide range of career paths with consulting firms, industry and governmental agencies.

The Civil Engineering Department will seek accreditation by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. ABET is recognized by the U. S. Department of Education as the sole agency responsible for accreditation of education programs leading to degrees in

engineering. Graduation from an ABET accredited program is an important factor in attaining registration as a Professional Engineer in the State of Texas and other states. The Architectural Engineering program is housed in the Civil Engineering Department.

Architectural Engineering: BS Degree at UT Arlington

Initially, the Bachelor of Science in Architectural Engineering will emphasize the building structures area. The remaining three areas of Architectural Engineering (building mechanical systems, building electrical systems, and construction / construction management) will be included at various levels but with less emphasis. As resources are added to the program and additional courses can be added, all four areas will become available as the major area.

Advising

Students entering directly from high school with no more than 24 hours of transferable credit are advised initially in the University Advising Center of University College. Students are transitioned to advising in the College of Engineering as they progress successfully in their degree programs.

Transfer students with 24 or more hours of transferable credit, registering for the first time, must be advised prior to the beginning of the semester they enroll in courses. They should contact a department undergraduate advisor to set up an appointment as soon after admission as possible, but certainly prior to registration.

Architectural engineering majors are required to be advised by an assigned undergraduate advisor during a specified period each semester. Students are responsible for meeting with their advisors during the advising period. Continuing students will receive instructions prior to each advising period. Students who do not meet with their advisors during the regular advising period may have fewer alternatives when selecting courses.

Architectural engineering students must register only for courses approved by their faculty advisor and must obtain their advisor's written authorization to add a course. Students must follow the current prerequisite sequence rules when enrolling in courses. Failure to follow advising rules may be grounds for dismissal from the architectural engineering program.

Transfer Students and Transfer Credit

When a student transfers, a loss of credit can occur and his/her academic plans may have to be changed. Courses that appear to be similar may be different in either content or level of difficulty and, as a result, cannot be used for degree credit. When a student's record indicates weakness in certain areas of study, he/she will be required to retake courses or to take additional courses. Transfer students should contact the Department of Civil Engineering after admission and prior to registration.

Prior to advising, a transfer student should present to an undergraduate advisor a transcript (official or copy) from each school previously attended. A freshman or sophomore level course will be accepted in transfer toward a degree in architectural engineering when it has determined to be equivalent to a required course. To be accepted in transfer, a junior or senior level course must be determined to be equivalent to a required course and must be from a program with the same accreditation.

A continuing student in the Department of Civil Engineering at UT Arlington who wishes to enroll in courses at another college or university for transfer credit toward a degree in architectural engineering should, first, consult with a civil engineering undergraduate advisor to verify that the course can be used in the student's AREN degree plan and to obtain written permission.

Educational Objectives of the Undergraduate Program

Most alumni of the AREN program will attain the following Program Educational Objectives (PEOs) within a few years after graduation:

- Obtain professional position and practice architectural engineering, or pursue graduate studies.
- Be involved in continuing education and professional development activities.
- Obtain PE licensure or other professional certification.

Student Outcomes of the Undergraduate Program

In order to produce graduates who will achieve the Program Educational Objectives a few years after graduation, it is expected that the undergraduate students will attain the following Student Outcomes by the time of graduation:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments
- an ability to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams

- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Requirements for a Bachelor of Science Degree in Architectural Engineering

Courses Fulfilling the University General Core Requirements (minimum 42 hours required)

46

Communication (minimum 6 hours required)

¹ Course in the Architectural Engineering Pre-Professional Program

² Completion of COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING satisfies the University's communication requirement.

³ The Mathematics Department requires MATH 1421 PREPARATION FOR CALCULUS or passing a placement test provided by the Mathematics Department before enrolling.

⁴ Completion of CE 1105 INTRODUCTION TO CIVIL ENGINEERING satisfies the University's computer proficiency requirement.

More hours may be required to strengthen student's program or demonstrate proficiency. See Prior Preparation and Course Requirements.

Total hours will depend upon prior preparation and academic qualifications. Also, students who do not have two units of high school foreign language will be required to take modern and classical languages courses in addition to the previously listed requirements.

Refer to the College of Engineering section of this catalog for information concerning the following topics: Admission to the College of Engineering, Advising, Admission into the Professional Program, College of Engineering Academic Regulations, Honors Degrees in Engineering, Professional Engineering Licensure, and Cooperative Education.

SUGGESTED COURSE SEQUENCE

A suggested course sequence for the Pre-Professional (first two years) and Professional Program courses (final two years) is available on the CE Department's web site.

Admission Requirements

Requirements for admission as an Architectural Engineering major are governed by the requirements stated under the College of Engineering section of this catalog.

ADMISSION TO THE PROFESSIONAL PROGRAM

Requirements for admission to the professional program in Architectural Engineering are in accordance with those of the College of Engineering with the following added stipulations:

- Application to the professional program is to be made to the CE Department during the semester that the advancement requirements are being completed.
- No professional program courses may be taken until the student is admitted into the professional program or obtains the written consent of the Department Chair.
- Each student must complete all pre-professional courses stipulated under "Requirements for a Bachelor of Science Degree in Architectural Engineering" with a minimum grade of C in each course and a minimum GPA of 2.25 in:
 - a. all courses,
 - b. in all math, science, and engineering courses, and
 - c. in all CE courses.

- Upon receipt of the application, a student's record is individually reviewed including grades, academic and personal integrity, record of drops and course withdrawals, the order in which courses have been taken, the number of times a student has attempted a course for credit, and any other aspect of the student's record that may be deemed pertinent to admission.

The student must be admitted to the professional program and have an approved degree plan on file in order to graduate. The degree plan is generated upon entry to the professional program. Graduating seniors should apply to graduate during the next-to-last semester.

Prior Preparation and Course Requirements

The undergraduate baccalaureate degree in architectural engineering is a four-year program and requirements for the degree are based upon prior high school preparation through either an honors or college track program. Students who have not had the appropriate prior preparation should contact the departmental advising office for a curriculum guide that will assist them in structuring a study plan that will include leveling courses. Students requiring leveling courses may require a period of time greater than four years to complete their undergraduate degree.

Academic Requirements

Academic performance requirements establishing satisfactory progress and grade point requirements are given in the College of Engineering section of this catalog.

GRADE REQUIREMENTS FOR AREN COURSE PREREQUISITES

Architectural Engineering majors (AREN-UCOL, AREN-Intended or AREN) may not attempt a course until they have earned a grade of C or better in the prerequisite course(s).

REPEATING COURSES

Architectural Engineering majors (AREN-UCOL, AREN-Intended or AREN) may not attempt any course more than three times and apply that course toward a degree in architectural engineering. Enrollment in a course for a period of time sufficient for assignment of a grade, including a grade of W, is considered an attempt.

GROUND FOR DISMISSAL FROM THE AREN PROGRAM

Architectural Engineering majors (AREN-UCOL, AREN-Intended or AREN) who the UTA Office of Student Conduct has found to have violated the UTA code of Conduct a second time are subject to dismissal from the AREN program.

Civil Engineering - Graduate Programs

Objective

The objective of the graduate program in civil engineering is to prepare students for continued professional and scholarly development consistent with their technical interests. Students, with the assistance of a faculty advisor in their area of interest, plan their programs of study in one of the technical areas in civil engineering. Typical program and research areas are:

1. Environmental (water and air quality control, and solid and hazardous materials control);
2. Geotechnical (soil mechanics and foundations);
3. Infrastructure Systems Engineering and Management;
4. Structures and Applied Mechanics;
5. Transportation (traffic planning, highways, airports and transit);
6. Water Resources (hydrology and hydraulics);
7. Construction Engineering and Management

MASTERS (M.S. AND M.ENGR.) STUDENT LEARNING OUTCOMES

1. *Fundamental Knowledge:* Graduates will have extensive basic and applied knowledge in their selected Civil Engineering Program (CEP) interest area.
2. *Independent Abilities:* Graduates will have the ability to conduct independent and original study ranging from gathering of information to application, analysis, creation, documentation of the study, and its resolution.
3. *Critical Thinking:* Graduates will have extensive breadth and ability to critique and synthesize literature, review results and to apply this knowledge in developing new ideas, in designing and evaluating scientific investigations, and in assessing, interpreting and understanding data relating to their selected CEP interest area.
4. *Advanced Knowledge:* Graduates will demonstrate extensive mastery of the subject matter at a deeper theoretical and applied level beyond the fundamental knowledge gained in his/her undergraduate course sequence.

5. *Effective Communication:* Graduates will have the ability to present scientific results in both written and oral format in various forums including thesis defense, master's defense, project reports, manuscripts, professional society meetings, journals, and performing class lectures, presentations, and reports.
6. *Professional Development:* A student graduating with a master's degree in civil engineering is expected to demonstrate interest in pursuing lifelong learning by attaining professional licenses, and obtaining professional development hours by attendance at conferences, higher educational classes, short courses and seminars, conducting classes, and publishing.

PH.D. STUDENT LEARNING OUTCOMES

1. *Fundamental Knowledge:* Graduates will command profound basic and applied knowledge in their specialty area within their Civil Engineering Program (CEP) interest area.
2. *Independent Abilities:* Graduates will have the ability to conduct a major independent and original research study that includes gathering of information, gaining an understanding of the process of academic or commercial exploitation of research results, demonstrating an understanding of contemporary research issues, effective project management, synthesis and evaluation, and appropriate dissemination of research findings.
3. *Critical Thinking:* Graduates will have a profound ability to critique and synthesize literature, review results and to apply knowledge gained from literature to develop new ideas, to design and evaluate scientific investigations, and to assess, interpret and understand data related to their specialty area within their CEP interest area.
4. *Advanced Knowledge:* Graduates will demonstrate profound mastery of the subject matter at a deeper theoretical and applied level well beyond fundamental knowledge gained in the undergraduate course sequence and the higher-level knowledge gained in the master's level course sequence.
5. *Effective Communication:* Graduates will have the ability to construct coherent arguments and articulate ideas clearly to an audience, through a variety of techniques, constructively defend research outcomes, justify their research to the profession and promote the public understanding of their research fields.
6. *Professional Development:* A student graduating with a doctoral degree in civil engineering is expected to demonstrate interest in pursuing life long learning by attaining professional licenses, and obtaining professional development hours by attendance at conferences, higher educational classes, short courses and seminars, conducting classes, and publishing.

Grade Requirements and Continuation

The Civil Engineering Graduate Program has established rules, regulations, policies, and procedures for continuation in the graduate program and fulfilling graduation requirements. These can be found in the Civil Engineering Graduate Handbook available in the Civil Engineering Office. In addition to the requirements of the Graduate Studies listed elsewhere, to continue in the program each civil engineering graduate student must:

- For the M.S. program maintain an overall GPA 3.00 or higher.
- For the M.E. program maintain an overall GPA for 3.00 or higher and GPA of 3.00 or higher in core courses.
- A Ph.D. or a BS- Ph.D. student must maintain a minimum GPA of 3.50 or higher in their Ph.D. Civil Engineering coursework and a 3.25 GPA outside of the CE average to take the comprehensive examination and to graduate from the Civil Engineering Ph.D. program BS- Ph.D. program.

No organized course in which a grade of P is received can be used to satisfy course requirements for a graduate degree in civil engineering.

Degree Requirements

The responsibility rests with each student for knowing the rules, regulations, and filing deadlines of the Graduate School and the Civil Engineering Committee on Graduate Studies (see Civil Engineering Graduate Handbook available in Civil Engineering Office). Requirements of the Graduate Studies and the Civil Engineering Committee on Graduate Studies must be met. The degrees offered and minimum course requirements are identified in the Master's (p. 268) and Doctoral (p. 270) tabs in the Civil Engineering section of this catalog.

Undergraduate Coursework Credit

A limited number (not to exceed a total of nine semester hours) of 4000 level Civil Engineering elective courses may be applicable toward a graduate degree if approved in advance by the Civil Engineering Graduate Advisor.

Admission Requirements

Performance on the GRE will not be the sole criterion for admitting applicants or the primary criterion to deny admission to either the Master's or Ph.D. program. In cases where GRE performance is relatively poor all other qualifications presented by the applicant will be carefully evaluated for evidence of potential for success.

UNCONDITIONAL ADMISSION

A student must meet the following requirements for unconditional admission:

1. A Bachelor's Degree in Civil Engineering (Applicant with an appropriate Bachelor's Degree in another discipline is considered, subject to satisfactory completion of deficiency courses for area of interest.)

2. An undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School, is typical of a successful applicant.
3. A Graduate Record Exam (GRE) Quantitative score of 700 (old score system) or 155 (new score system) or higher is typical of a successful applicant.
4. A Graduate Record Exam Verbal score of 390 (old score system) or 146 (new score system) or higher is typical of a successful applicant.
5. For applicants whose native language is not English, a minimum score of 550 on the written Test of English as a Foreign Language (TOEFL), 213 on the computer TOEFL, 79 on TOEFL iBT, 40 on the TSE-A, 50 on the SPEAK, 400 on Verbal GRE, 85 on METLAB (Michigan English Language Assessment Battery), or 6.5 on the IELTS (International English Language Testing System). (METLAB and IELTS are used only when other tests are not available in the applicant's country.)
6. Optional - Recommended if seeking financial aid.

PROBATIONARY ADMISSION

If applicants do not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission may require that the applicant receive a B or better in at least their first 9 hours of graduate coursework applicable to their degree being sought at UT Arlington, take additional English courses, and/or deficiency courses as required.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline, but whom otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRED ADMISSION

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate.

DENIAL OF ADMISSION

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

WAIVER OF GRE ADMISSION

A waiver of the GRE may be considered for a UT Arlington graduate who has completed an undergraduate degree within the past 3 years from normal undergraduate feeder program for CE degree. Students must complete the last 60 hours of study and in all undergraduate coursework completed at UT Arlington. The student must comply with all other requirements for admission to the Graduate School, i.e., submitting application, paying fees, providing required transcripts, letters of reference, etc. The applicant's record will be assessed for evidence of strengths relevant to success in the Civil Engineering graduate program. Meeting the minimum GPA requirement shall not be the sole determinant or the primary criterion for granting a waiver.

FACILITATED ADMISSION OF OUTSTANDING UT ARLINGTON UNDERGRADUATES

Facilitated Admission may be considered for a student who has graduated from UT Arlington no more than one academic year prior to proposed entrance to the graduate program. Students must complete the last 60 hours of study at UT Arlington. The student's UT Arlington GPA must equal or exceed 3.5 in the last 60 hours of undergraduate study and all undergraduate coursework completed at UT Arlington. The applicant's record will be assessed for evidence of strengths relevant to success in the Civil Engineering graduate program. Meeting the minimum GPA requirement shall not be the sole determinant or the primary criterion for granting facilitated admission.

FAST TRACK PROGRAM FOR MASTER'S DEGREE IN CIVIL ENGINEERING

The Fast Track Program enables outstanding senior undergraduate Civil Engineering students to receive undergraduate and graduate credit for up to six hours of coursework. Technical electives which are dual-listed as graduate courses will satisfy both bachelor's and master's degree requirements. Students pursuing an MECE degree may take up to two courses for dual credit.

Interested undergraduate Civil Engineering students should apply to the Graduate School for admission to the Fast Track Program when they are within 30 hours of completing their bachelor's degree (and before graduation). For admission consideration, they must have completed at least 30 hours at UT Arlington and have an overall and College of Engineering GPA of at least 3.0 (in both). Additionally, they must have completed a set of three basic undergraduate foundation courses with a grade of B or higher in each course and a GPA of at least 3.30 in these three courses. The specific foundation courses vary according to the student's desired specialty area for the master's degree.

In their final semester as an undergraduate, Fast Track students in good standing will be automatically admitted to graduate school with consent of the Graduate Advisor. No fees, transcripts, or test scores will be required. For further information about this program, contact an undergraduate advisor or the Graduate Advisor in Civil Engineering.

DEPARTMENTAL SCHOLARSHIPS

Students that are unconditionally admitted will be eligible to apply for available scholarships. Recipients must maintain at least a 3.0 overall GPA, and must be enrolled in a minimum of 9 hours of coursework in both long semesters to retain their scholarship. Additional requirements may be imposed by the department selection committee.

Master's Degree Requirements

The Master of Science degree is a research-oriented program in which completion of a thesis is mandatory. The program consists of a minimum of 24 credit hours of coursework and an acceptable thesis (six credit hours). The Master of Engineering degree is an engineering practice-oriented program requiring a minimum of 36 credit hours. A maximum of six hours may be a special project. A final program examination is required of all master's degree candidates. Thesis degree candidates will be required to present an oral defense of the thesis.

Dual Program Degree

Students in the Civil Engineering program may participate in a dual degree program whereby they can earn a Master's Degree in Civil Engineering and a Master of City and Regional Planning. By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours required to earn both degrees separately. The number of hours that may be jointly applied ranges from six to 18 hours, subject to the approval of each program's Committee on Graduate Studies and Graduate Advisor. Those interested in the dual degree program should consult the appropriate graduate programs for further information on course requirements, including information regarding which courses are suitable for joint application of credit hours.

To participate in the dual degree program, students must make a separate application to each program, be accepted by each program, and must submit separate Programs of Work for each degree showing only courses that meet requirements for the specified degree, including those joint courses that meet requirements for both degrees. A student must be admitted to the second program before completing more than 15 semester hours in the first, exclusive of leveling, deficiency, or foundation courses, and must complete the second degree within one academic year following completion of the first. See also the statement on "Dual Degree Programs" in the general admission section of this catalog.

Admissions Requirements

Performance on the GRE will not be the sole criterion for admitting applicants or the primary criterion to deny admission to either the Master's or Ph.D. program. In cases where GRE performance is relatively poor all other qualifications presented by the applicant will be carefully evaluated for evidence of potential for success.

UNCONDITIONAL ADMISSION

A student must meet the following requirements for unconditional admission:

1. A Master's Degree or at least 30 hours of graduate coursework in Civil Engineering. (Applicant with a Master's Degree in another discipline is considered, subject to satisfactory completion of deficiency courses for the CE area of interest.)
2. No specific GPA requirement (application considered as a whole). However, a graduate coursework GPA of 3.5 on a 4.0 scale, as calculated by the Graduate School, is typical of a successful applicant.
3. A Graduate Record Exam (GRE) Quantitative score of 740 (old score system) or 158 (new score system) or higher is typical of a successful applicant.
4. A competitive Graduate Record Examination Verbal score. A successful applicant typically has a Verbal score of 420 (old score system) or 148 (new score system).
5. For applicants whose native language is not English, a minimum score of 550 on the written Test of English as a Foreign Language (TOEFL), 213 on the computer TOEFL, 79 on TOEFL iBT, 40 on the TSE-A, 50 on the SPEAK, 425 on Verbal GRE, 86 on METLAB (Michigan English Language Assessment Battery), or 6.5 on the IELTS (International English Language Testing System). (METLAB and IELTS are used only when other tests are not available in the applicant's country.)
6. Favorable letters of recommendation from people familiar with the applicant's academic work and/or professional work.

PROBATIONARY ADMISSION

If applicants do not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission may require that the applicant receive a B or better in at least their first 9 hours of graduate coursework applicable to their degree being sought at UT Arlington, take additional English courses, and/or deficiency courses as required.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline, but whom otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRED ADMISSION

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate.

DENIAL OF ADMISSION

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

CE BS-PH.D. PROGRAM

Unconditional Admission

A student must meet the following requirements for unconditional admission:

1. No Specific GPA requirement (application considered as a whole). However, an undergraduate coursework GPA of 3.5 on a 4.0 scale, as calculated by the Graduate School, is typical of a successful applicant.
2. A Graduate Record Exam (GRE) Quantitative score of 740 (old score system) or 158 (new score system) or higher is typical of a successful applicant.
3. A competitive Graduate Record Examination Verbal score. A successful applicant typically has a Verbal score of 420 (old score system) or 148 (new score system).
4. For applicants whose native language is not English, a minimum score of 550 on the written Test of English as a Foreign Language (TOEFL) 213 on the computer TOEFL, 79 on the TOEFL iBT, 40 on the TSE-A, 50 on the SPEAK, 86 on METLAB (Michigan English Language Assessment Battery), or 6.5 on the IELTS (International English Language Testing System). (METLAB and IELTS are used only when other tests are not available in the applicant's country.)
5. Favorable letters of recommendation from people familiar with the applicant's academic work and/or professional work.

Probationary Admission

If applicants do not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission may require that the applicant receive a B or better in at least their first 9 hours of graduate coursework applicable to their degree being sought at UT Arlington, take additional English courses, and/or deficiency courses as required.

Doctoral Degree Requirements

The Ph.D. degree is a research degree and, as such, requires the candidate to successfully carry out original, independent research in an area acceptable to the civil engineering faculty. Normally, a minimum of one year of advanced coursework beyond the master's degree is required. The student must pass diagnostic comprehensive, and dissertation defense exams administered by his/her committee.

The BS-Ph.D. degree is a research degree and, as such, requires the candidate to successfully carry out original, independent research in an area acceptable to the civil engineering faculty. Normally, a minimum of 48 credits of coursework beyond the bachelor's degree is required.

Civil Engineering - Undergraduate Programs

Educational and Professional Career Paths

Civil engineering is the oldest and broadest of the engineering disciplines. A civil engineer works with a wide spectrum of individuals in both the public and private sectors to meet today's challenges of pollution, infrastructure rehabilitation, traffic congestion, floods, earthquakes, and urban development. Civil engineers plan, design, construct, maintain, manage, and operate facilities essential to modern, civilized human life. Projects requiring civil engineering expertise vary widely in nature, size, and scope, such as: bridges, tunnels, transportation systems, airports, storm water drainage systems, dams, buildings, foundations, water treatment and distribution, wastewater collection and treatment, hazardous waste treatment, environmental remediation, environmental protection, and air pollution control.

Civil engineering graduates are prepared for advanced graduate degrees and a wide range of career paths in civil engineering including consulting, governmental agencies, and industry. In addition to the traditional careers in civil engineering, graduates may take advantage of their strong, broad-based engineering education to pursue careers in professions such as medicine, law, business, or teaching.

Fast Track Program for Master's Degrees in Civil Engineering

The Fast Track Program enables outstanding senior undergraduate Civil Engineering students to receive undergraduate and graduate credit for up to six hours of coursework. Technical electives which are dual-listed as graduate courses will satisfy both bachelor's and master's degree requirements. Students pursuing an MECE or MSCE degree may take up to two courses for dual credit.

Interested undergraduate Civil Engineering students should apply to the Graduate School for admission to the Fast Track Program when they are within 30 hours of completing their bachelor's degree (and before graduation). For admission consideration, they must have completed at least 30 hours at UT Arlington and have an overall and College of Engineering GPA of at least 3.00 (in both) for the MECE option and at least 3.50 (in both) for the MSCE option. Additionally, they must have completed a set of three basic undergraduate foundation courses with a grade of B or higher in each course and a GPA of at least 3.30 in these three courses. The specific foundation courses vary according to the student's desired specialty area for the master's degree.

In their final semester as an undergraduate, Fast Track students in good standing will be automatically admitted to graduate school with consent of the Graduate Advisor. No fees, transcripts, or test scores will be required. For further information about this program, contact an undergraduate advisor or the Graduate Advisor in Civil Engineering. Descriptions of CE Fast Track degree options are also available in the CE Advising Office.

Minor Field of Study

The Civil Engineering program does not support the option of pursuing a minor in Civil Engineering by other engineering or non-engineering majors.

Advising

Students entering directly from high school and those with no more than 24 hours of transferrable credit are advised initially in the University Advising Center of University College. Students are transitioned to advising in the College of Engineering as they progress successfully in their degree programs.

Transfer students with 24 or more hours of transferrable credit, registering for the first time, must be advised prior to the beginning of the semester they enroll in courses. They should contact a department undergraduate advisor to set up an appointment as soon after admission as possible, but certainly prior to registration.

Civil engineering majors are required to be advised by an assigned undergraduate advisor during a specified period each semester. Students are responsible for meeting with their advisors during the advising period. Continuing students will receive instructions prior to each advising period. Students who do not meet with their advisor during the regular advising period may have fewer alternatives when selecting courses.

Civil engineering students must register only for courses approved by their advisor and must obtain their advisor's written authorization to add a course. Students must follow the current prerequisite sequence rules when enrolling in courses. Failure to follow advising rules may be grounds for dismissal from the civil engineering program.

Transfer Students and Transfer Credit

When a student transfers, a loss of credit can occur and his/her academic plans may have to be changed. Courses that appear to be similar may be different in either content or level of difficulty and, as a result, cannot be used for degree credit. When a student's record indicates weakness in certain areas of study, he/she will be required to retake courses or to take additional courses. Transfer students should contact the Department of Civil Engineering after admission and prior to registration.

Prior to advising, a transfer student should present to an undergraduate advisor a transcript (official or copy) from each school previously attended. Only the equivalent courses in a program accredited by ABET or equivalent freshman and sophomore courses accepted by the department can be counted toward a degree in civil engineering. To be acceptable as an equivalent course, it must be equivalent to our corresponding course in credit value and course content. Junior and senior level courses taken at a college or university which does not have a civil engineering program accredited by ABET cannot be used to satisfy the requirements for Professional Program courses for a degree in civil engineering.

A student in the Department of Civil Engineering at UT Arlington who wishes to enroll in courses at another college or university for transfer credit toward a degree in civil engineering should, first, consult with an undergraduate advisor to verify that the course can be used in the student's CE degree plan.

Educational Objectives of the Undergraduate Program

Most alumni of the CE program will attain the following Program Educational Objectives (PEOs) within a few years after graduation:

- Obtain professional position and practice civil engineering, or pursue graduate studies.
- Be involved in continuing education and professional development activities.
- Obtain PE licensure or other professional certification.

Student Outcomes of the Undergraduate Program

In order to produce graduates who will achieve the Program Educational Objectives a few years after graduation, it is expected that the undergraduate students will attain the following Student Outcomes by the time of graduation:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments
- an ability to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multi-disciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues

- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Civil Engineering BS Degree at UT Arlington

At the undergraduate level, the department offers a Bachelor of Science in Civil Engineering degree designed to provide a strong foundation in science, mathematics, and engineering science; technical competence in multiple areas of civil engineering practice; and an understanding of the importance of ethics, safety, professionalism, and socioeconomic concerns in resolving technical problems through synthesis, planning, and design. Elements of design are introduced at the freshman level. This is followed by an analysis and design component in professional program courses, culminating in a comprehensive design experience.

The UT Arlington Civil Engineering BS degree has been accredited since October 1967 by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. ABET is recognized by the U.S. Department of Education as the sole agency responsible for accreditation of educational programs leading to degrees in engineering. Graduation from an ABET accredited program is an important factor in attaining registration as a Professional Engineer in the State of Texas and other states.

Requirements for a Bachelor of Science Degree in Civil Engineering

Courses Fulfilling the University General Core Requirements (minimum 42 hours required)

46

Communication (minimum 6 hours required)

ENGL 1301	RHETORIC AND COMPOSITION I
COMS 2302	PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING ²

Creative Arts (minimum 3 hours required)

Any course which satisfies the University Core Curriculum requirement for Creative Arts is accepted.

Government/Political Science (minimum 6 hours required)

POLS 2311	GOVERNMENT OF THE UNITED STATES
POLS 2312	STATE AND LOCAL GOVERNMENT

Language, Philosophy & Culture (minimum 3 hours required)

Any course which satisfies the University Core Curriculum requirement for Language, Philosophy & Culture is accepted.

Mathematics (minimum 6 hours required)

MATH 1426	CALCULUS I ¹
MATH 2425	CALCULUS II

Life & Physical Sciences (minimum 6 hours required)

PHYS 1443	GENERAL TECHNICAL PHYSICS I
PHYS 1444	GENERAL TECHNICAL PHYSICS II

Social & Behavioral Sciences (minimum 3 hours required)

IE 2308	ECONOMICS FOR ENGINEERS
---------	-------------------------

US History (minimum 6 hours required)

HIST 1311	HISTORY OF THE UNITED STATES TO 1865
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT

Foundational Component Area Option (minimum 3 hours required)

MATH 2326	CALCULUS III
-----------	--------------

Other Pre-Professional Program Courses

35

MATH 3319	DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA
CHEM 1465	CHEMISTRY FOR ENGINEERS
GEOL 3340	GEOLOGY FOR ENGINEERS
ENGR 1300	ENGINEERING PROBLEM SOLVING
CE 1105	INTRODUCTION TO CIVIL ENGINEERING ³
CE 1252	COMPUTER TOOLS - AUTOCAD
CE 2152	COMPUTER TOOLS - MATHCAD
CE 2221	DYNAMICS
CE 2311	STATICS
CE 2313	MECHANICS OF MATERIALS I
CE 2331	ENGINEERING MEASUREMENT AND COMPUTER MODELING
CE 3301	STOCHASTIC MODELS FOR CIVIL ENGINEERING
or IE 3301	ENGINEERING PROBABILITY

CE 3305	BASIC FLUID MECHANICS	
CE Professional Program Courses		49
CE 3131	ENVIRONMENTAL ANALYSIS	
CE 3142	APPLIED FLUID MECHANICS LAB	
CE 3143	PROPERTIES AND BEHAVIOR OF SOILS	
CE 3161	CIVIL ENGINEERING MATERIALS LABORATORY	
CE 3210	CIVIL ENGINEERING COMMUNICATIONS	
CE 3261	PROPERTIES AND BEHAVIOR OF CIVIL ENGINEERING MATERIALS	
CE 3302	TRANSPORTATION ENGINEERING	
CE 3311	CONSTRUCTION ENGINEERING	
CE 3334	PRINCIPLES OF ENVIRONMENTAL ENGINEERING	
CE 3341	STRUCTURAL ANALYSIS	
CE 3342	WATER RESOURCES ENGINEERING	
CE 3343	SOIL MECHANICS	
CE 4347	REINFORCED CONCRETE DESIGN	
CE 4352	PROFESSIONAL PRACTICE	
CE 4383	SENIOR PROJECT	
15 hours of senior technical electives		
Twelve hours of CE technical electives to be selected from four of the following six areas: Construction, Environmental, Geotechnical, Structures, Transportation or Water Resources. One remaining three-hour course may be from any CE technical elective area, CE 4393 (Industrial Internship), or CE 4394 (Research Internship).		
Total Hours		130

- 1 The Mathematics Department requires MATH 1421 PREPARATION FOR CALCULUS or passing a placement test provided by the Mathematics Department before enrolling.
- 2 Completion of COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING satisfies the University's communication requirement.
- 3 Completion of CE 1105 INTRODUCTION TO CIVIL ENGINEERING satisfies the University's computer proficiency requirement.

More hours may be required to strengthen student's program or demonstrate proficiency. See Prior Preparation and Course Requirements.

Total hours will depend upon prior preparation and academic qualifications. Also, students who do not have two units of high school foreign language will be required to take modern and classical languages courses in addition to the previously listed requirements.

Refer to the College of Engineering section of this catalog for information concerning the following topics: Admission to the College of Engineering, Advising, Admission into the Professional Program, College of Engineering Academic Regulations, Honors Degrees in Engineering, Fast Track Master's Degrees in Engineering, Professional Engineering Licensure, and Cooperative Education.

SUGGESTED COURSE SEQUENCE

A suggested course sequence for the Pre-Professional (first two years) and Professional Program courses (final two years) is available on the CE Department's web site.

Admission Requirements

Requirements for admission as a Civil Engineering major are governed by the requirements stated under the College of Engineering section of this catalog.

ADMISSION TO THE PROFESSIONAL PROGRAM

Requirements for admission to the professional program in Civil Engineering are in accordance with those of the College of Engineering with the following added stipulations:

- Application to the professional program is to be made to the CE Department during the semester that the advancement requirements are being completed.
- No professional civil engineering courses may be taken until the student is admitted into the professional program or obtains the written consent of the Department Chair.
- Each student must complete all pre-professional courses stipulated under "Requirements for a Bachelor of Science Degree in Civil Engineering" with a minimum grade of C in each course and a minimum GPA of 2.25 in:

- a. all courses,
 - b. in all math, science, and engineering courses, and
 - c. in all CE courses.
- Upon receipt of the application, a student's record is individually reviewed including grades, academic and personal integrity, record of drops and course withdrawals, the order in which courses have been taken, the number of times a student has attempted a course for credit, and any other aspect of the student's record that may be deemed pertinent to admission.

The student must be admitted to the professional program and have an approved degree plan on file in order to graduate. The degree plan is generated upon entry to the professional program. Graduating seniors should apply to graduate during the next-to-last semester.

Prior Preparation and Course Requirements

The undergraduate baccalaureate degree in civil engineering is a four-year program and requirements for the degree are based upon prior high school preparation through either an honors or college track program. Students who have not had the appropriate prior preparation should contact the departmental advising office for a curriculum guide that will assist them in structuring a study plan that will include leveling courses. Students requiring leveling courses may require a period of time greater than four years to complete their undergraduate degree.

Academic Requirements

Academic performance requirements establishing satisfactory progress and grade point requirements are given in the College of Engineering section of this catalog.

GRADE REQUIREMENTS FOR CE COURSE PREREQUISITES

Civil Engineering majors (CE-Intended or CE) may not attempt a CE course until they have earned a grade of C or better in the prerequisite course(s).

REPEATING COURSES

Civil Engineering majors (CE-Intended or CE) may not attempt any course more than three times and apply that course toward a degree in civil engineering. Enrollment in a course for a period of time sufficient for assignment of a grade, including a grade of W, is considered an attempt.

GROUND FOR DISMISSAL FROM THE CE PROGRAM

Civil Engineering majors (CE-Intended or CE) who the UTA Office of Student Conduct has found to have violated the UTA Code of Student Conduct a second time are subject to dismissal from the CE program.

Construction Management - Graduate Program

Admission

UNCONDITIONAL ADMISSION REQUIREMENTS

NOTE: Performance on the GRE will not be the sole criterion for admitting applicants or the primary criterion to deny admission to either the master's or Ph.D. program. In cases where GRE performance is relatively poor, all other qualifications presented by the applicant will be carefully evaluated for evidence of potential for success.

A student must meet the following requirements for unconditional admission:

1. A Bachelor's Degree in Civil Engineering (Applicant with an appropriate Bachelor's Degree in another discipline is considered, subject to satisfactory completion of leveling courses).
2. An undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School, is typical of a successful applicant.
3. A Graduate Record Exam (GRE) Quantitative score of 700 (old score system) or 155 (new score system) or higher is typical of a successful applicant.
4. A Graduate Record Exam Verbal score of 390 (old score system) or 146 (new score system) or higher is typical of a successful applicant.
5. For applicants whose native language is not English, a minimum score of 558 on the written Test of English as a Foreign Language (TOEFL), 79 on TOEFL iBT, 40 on the TSE-A, 50 and 400 on Verbal and 710 on quantitative GRE (146 new Verbal, and 155 new quantitative), or 6.5 on the IELTS (International English Language Testing System). (METLAB and IELTS are used only when other tests are not available in the applicant's country.)
6. Favorable letters of recommendation from people familiar with the applicant's academic work.

Computer Science and Engineering

The Department of Computer Science and Engineering is one of seven departments in the College of Engineering, the fourth-largest engineering college in Texas. Its mission is to serve the needs of the region, the state, and the nation by providing quality educational and innovative, relevant research programs in computer science and engineering. The department strives to offer first-rate undergraduate, graduate, and continuing education

opportunities; conduct research and development technologies in selected areas, and facilitate technology transfer for the betterment of the quality of life. Its internationally recognized faculty members are engaged in breakthrough research across the leading areas of computer science and engineering.

Undergraduate Opportunities (p. 280)

- Bachelor of Science degrees (p. 280)
 - Bachelor of Science in Computer Engineering
 - Bachelor of Science in Computer Science
 - Bachelor of Science in Software Engineering
- Minor in Computer Science (p. 287)
- Certificate in Unmanned Vehicle Systems (p. 287)

Graduate Opportunities (p. 276)

- Master's degrees (p. 276)
 - Master of Science in Computer Engineering (thesis and non-thesis)
 - Master of Science in Computer Science (thesis and non-thesis)
 - Master of Software Engineering (non-thesis)
- PhD. degrees (p. 278)
 - Ph.D. in Computer Engineering / Computer Science
 - B.S. to Ph.D. in Computer Engineering / Computer Science
- Graduate Certificate in Big Data Management and Data Sciences (p. 279)

Computer Science and Engineering - Graduate Programs

Objective

The purpose of the graduate programs in Computer Science (CS) and Computer Engineering (CpE) is to facilitate the student's continued professional and scholarly development. The Master of Science (M.S.) programs are designed to extend the student's knowledge and emphasize a particular area of concentration. The Master of Software Engineering (SwE.) program is designed to provide the student with the opportunity for professional development in the software engineering field. Students who have completed a bachelor's degree in CS, CpE or closely related fields wishing to pursue a doctoral degree may apply for admission in the B.S. to Ph.D. track. The admission requirements to this highly competitive track are the same as those for "advanced admission" (see B.S. to Ph.D. Accelerated Programs). The Doctor of Philosophy (Ph.D.) programs are designed to prepare the student to conduct research and development in an area of concentration.

Areas of study include

1. **Systems and Architecture:** parallel processing, cloud computing, distributed systems, scheduling and load balancing, computer architecture, tools for parallel programming, performance evaluation, fault-tolerant computing, real-time systems, embedded systems;
2. **Intelligent Systems and Robotics:** machine learning, robotics, pattern recognition, multi-agent environments, assistive technologies, human-centered computing, decision support, health informatics, bioinformatics;
3. **Software Engineering:** software life cycles, agile methodologies, formal specifications, object-oriented software engineering, design methodologies, software testing, software evolution, software re-engineering, software processes;
4. **Database and Data Analysis:** spatio-temporal data, data mining, big data analysis, database models and languages, indexing and hashing techniques, conceptual modeling, data security, query optimization, user interfaces, ontologies, Web search and ranking, social networks;
5. **Networking and Security:** sensor networks, wireless networks, information security, secure programming, mobile and distributed computing, multimedia systems, pervasive computing, networking architectures.

For a complete list of graduate programs and disciplines please refer to <http://cse.uta.edu/graduate/>

Admission

The CSE graduate admission committee bases its decision for M.S. graduate admission on the following criteria (in no specific order):

- An overall GPA of 3.0 or higher in undergraduate coursework.
- A GPA of 3.2 or higher on CS/CpE/SwE related coursework in the last two years of undergraduate degree.
- Relevance of the student's degree (background) to the CS/CpE/SwE curriculum.
- Rigor of the student's bachelor's degree. A four-year degree is considered more rigorous than a three-year degree.
- Reputation of the university/college that the student has received his/her previous degrees from.

- GRE Test: Admitted students typically earn the following scores on the GRE
 - GRE quantitative score of at least 155 for MS
 - GRE verbal score of at least 145 for MS
 - A sum of verbal and quantitative GRE scores of at least 300 for MS.
 - International applicants test of English as a Foreign Language (TOEFL) score of 90 or higher on the IBT or a score of 7.0 or higher on the IELTS.

Applicants for the MS degree with (or completing in the near future) a BS in CS, CpE or SwE from UT Arlington and a GPA of at least 3.2 should contact the graduate advisor regarding a GRE waiver. Those with a GPA of at least 3.5 should contact the graduate advisor regarding nomination for Advanced Admission (i.e. admission without application and fee). The GRE waiver may be extended to include non-UT Arlington candidates that have undergraduate degrees in CS, CpE or SwE (with GPA of 3.2 or above) from reputable universities with an ABET accredited program or other select universities subject to graduate advisor's approval.

The above criteria are used as follows in relevance to the three possible admission decisions, i.e., *Unconditional Status*; *Probationary Status*; and *Denied*.

- *Unconditional Status*: Applies to an applicant who meets the first six criteria above to a degree satisfactory to the graduate admissions committee.
- *Probationary Status*: Applies to an applicant who meets at least five of the six criteria to a degree satisfactory to the graduate admissions committee and whose record shows promise for success in the program or to an applicant who does not fulfill all the deficiency course requirements.
- *Denied*: Applies to an applicant who does not meet five of the first six criteria to a degree satisfactory to the graduate admissions committee.

WAIVER OF GRADUATE RECORD EXAMINATION

Upon recommendation of the Graduate Advisor, outstanding UT Arlington graduates may qualify for waiver of the requirements for the Graduate Record Examination (GRE). To qualify, the applicant must meet the following minimum requirements:

- The student must have graduated from a commensurate bachelor's degree program at UT Arlington no more than three academic years prior to admission to the graduate program (as measured from the start of the semester for which admission is sought). A commensurate bachelor's degree program is one that is a normal feeder program for the master's degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, admission with the GRE waiver is contingent upon successful completion of the bachelor's degree.
 - as calculated for admission to the Graduate School ;
 - overall;
 - in the major field; and
 - in all upper-division work.
- The student's UT Arlington grade-point average must equal or exceed 3.0 in the following calculations:

Applicants qualifying for waiver of GRE who do not qualify for advanced admission, must comply with all other requirements for admission, i.e., submitting the application for admission, paying fees, providing official transcripts from other institutions, and meeting any requirements established by the admitting graduate program. The GRE waiver must be recommended by the Graduate Advisor at the time of admission. The waiver of GRE program applies to applicants for master's degree programs only. Some programs may require higher grade-point averages to qualify and some will not waive the GRE under any circumstances.

Additionally, some programs may waive the GRE requirement for non-UT Arlington graduates who seek admission as a master's student and meet qualifications listed in those programs' specific admission requirements. Such waivers are not offered by all graduate programs.

Degree Requirements

MASTER OF SCIENCE IN COMPUTER SCIENCE - THESIS

The Master of Science in Computer Science degree program is designed to develop the scholarship and research skills of the student. Thirty-one credit hours, which include one orientation seminar credit and six thesis credits, are required.

MASTER OF SCIENCE IN COMPUTER ENGINEERING - THESIS

The Master of Science in Computer Engineering, which is intended for students with a baccalaureate degree in engineering, requires 31 credit hours of which one is orientation seminar and six are thesis credits, and is designed to develop the scholarship and research skills of the student.

MASTER OF SCIENCE IN COMPUTER SCIENCE - NON THESIS

The Master of Science in Computer Science non-thesis options provide professional development in computer science. The structured option requires 37 credit hours of which one is orientation seminar.

MASTER OF SCIENCE IN COMPUTER ENGINEERING - NON THESIS

The Master of Science in Computer Engineering non-thesis options are intended for students with an engineering baccalaureate degree. The structured option requires 37 credit hours of which one is orientation seminar.

MASTER OF SOFTWARE ENGINEERING - NON THESIS

The Master of Software Engineering provides professional development in software engineering. The program requires 37 credit hours of which one is orientation seminar. It includes a 2-course sequence devoted to implementation of a software project.

Admission

The CSE graduate admission committee bases its decision for Ph.D. graduate admission on the following criteria (in no specific order):

- An overall GPA of 3.0 or higher in undergraduate coursework.
- A GPA of 3.2 or higher on CS/CpE/SwE related coursework in the last two years of undergraduate degree.
- For students holding an M.S. degree, similar criteria apply.
- Relevance of the student's degree(s) (background) to the CS/CpE/SwE curriculum.
- Rigor of the student's bachelor's degree and M.S. degree if applicable..
- Reputation of the university/college that the student has received his/her previous degrees from.
- GRE General Test: Admitted students typically earn the following scores on the GRE
 - GRE quantitative score of at least 160 for PhD
 - GRE verbal score of at least 150 for PhD
 - A sum of verbal and quantitative GRE scores of at least 310 for Ph.D. applicants.
- For Ph.D. applicants, three letters of recommendation are needed, as well as a statement of purpose. These should be addressed to Head of Ph.D. Admissions and emailed to: csephd@uta.edu
- For Ph.D. applicants, the following are optional. Meeting these criteria will improve both a student's chances of securing admission and receiving financial support.
 - Publication in scholarly conferences/journals.
 - A percentile of 80 score or higher on the Computer Science subject GRE.

The above criteria are used as follows in relevance to the three possible admission decisions, i.e., *Unconditional Status*; *Probationary Status*; and *Denied*.

- *Unconditional Status*: Applies to an applicant who meets the first six criteria above to a degree satisfactory to the graduate admissions committee.
- *Probationary Status*: Applies to an applicant who meets at least five of the six criteria to a degree satisfactory to the graduate admissions committee and whose record shows promise for success in the program or to an applicant who does not fulfill all the deficiency course requirements.
- *Denied*: Applies to an applicant who does not meet five of the first six criteria to a degree satisfactory to the graduate admissions committee.

REQUIREMENTS FOR BS TO PHD ACCELERATED PROGRAM

- An undergraduate degree in CS or CpE or closely related field.
- An overall GPA of 3.0 or higher in undergraduate coursework.
- A 3.2 grade point average (on a 4.0 scale) on the last two years of undergraduate course-work. In particular, performance on CS/CpE related courses are emphasized.
- Rigor of the student's Bachelors degree. A three-year degree is not considered rigorous enough.
- Reputation of the University/College that the student has received his/her previous degrees from.
 - GRE quantitative score - 160 or higher
 - GRE verbal score - 150 or higher
 - A sum of verbal and quantitative scores of 310 or more on the GRE¹ :
 - (International Applicants)
A Test of English as a Foreign Language (TOEFL) score - 90 or higher (iBT)

CONTINUATION

To fulfill its responsibility to graduate highly qualified professionals, the Department has established certain requirements that must be met by students continuing in the graduate programs. In addition to the requirements of the Graduate School listed elsewhere in the catalog, the Computer Science and Engineering Department has established additional requirements detailed in its Guide to Graduate Programs.

ASSISTANTSHIPS

Students admitted without any probation may qualify for financial support of the following forms:

- Graduate Teaching Assistant (GTA)
- Graduate Research Assistant (GRA)
- Priority is given to PhD students.

Degree Requirements

B.S. TO PH.D. TRACK

The B.S. to Ph.D. track in Computer Science or Computer Engineering requires 30 credit hours with 21 hours of diagnostic requirements and nine hours of advanced research-oriented coursework. This is in addition to the Ph.D. requirements.

PH.D. (COMPUTER SCIENCE)

The Ph.D. in Computer Science continues the development of the student's research capability for students who already have an MS degree. Coursework selection in each student's program is designed to support the dissertation area selected by the student.

PH.D. (COMPUTER ENGINEERING)

The Ph.D. in Computer Engineering is available to students with a prior degree in engineering. It contains essentially the same requirements as the Ph.D. (Computer Science) degree except that it permits interdisciplinary research between Computer Science and one or more of the various engineering disciplines.

For all programs, a minimum of two semesters of full-time study is required during the dissertation phase. There is no foreign language requirement.

Graduate Certificate in Big Data Management and Data Sciences

PROGRAM OBJECTIVE

The Graduate Certificate in Big Data Management and Data Sciences is intended to give those who successfully complete it:

- an ability to understand fundamental concepts of big data management and data sciences, such as data storage and management, and data analysis and mining.
- knowledge of current topics in large scale data analysis, such as relational and non-relational data management, big data analytics, data mining, machine learning, cloud computing, software tools for big data, Web data, and social and information networks.
- an ability to apply this knowledge to subject areas such as business analytics, computational science, health informatics and bioinformatics, and social networks data.

ADMISSION REQUIREMENTS

Students are required to have an undergraduate preparation equivalent to a baccalaureate degree in Computer Science or Computer Engineering or in a technical field relevant to the CSE curriculum. Students without a proper academic background, as determined by the graduate advisor at the time of the admission review, will be required to complete all assigned deficiency courses with passing grades (in addition to the normal graduate certificate courses). The required foundation (deficiency) courses (the name is followed by the UTA course number) are:

- C Programming (CSE 1320)
- Discrete Structures (CSE 2315)
- Theoretical Computer Science (CSE 3315)
- Algorithms & Data Structures (CSE 2320)

Those who desire to complete the certificate program without enrolling in a graduate degree program must be admitted to UTA as a non-degree seeking student. If these students choose to enroll in the CSE graduate degree program later, their course non-foundation credits can be used to satisfy their MS degree requirements. Note that, for admission to the MS degree program, all UTA and CSE graduate admission requirements, including GRE and GPA, would need to be met.

A one-page essay detailing the applicant's interest in big data management and data sciences and his/her expected benefit from completing this program.

Two recommendation letters explaining how the applicant will benefit by completing this program and commenting on prospective student's ability to complete the coursework.

ACADEMIC REQUIREMENTS

Students must choose one concentration track: Big Data Management or Data Sciences. Students must complete 15 hours of coursework (5 courses) from those listed below, based on their chosen track. All courses used to satisfy the certificate requirements must be passed with a grade of C or better and the overall GPA must be 3.0 or higher. Alternate courses may be substituted based on consultation with the graduate curriculum advisors in the program.

15 hours from the following list:

CSE 5301	DATA ANALYSIS & MODELING TECHNIQUES	3
CSE 5330	DATABASE SYSTEMS	3
CSE 5331	DBMS MODELS AND IMPLEMENTATION TECHNIQUES	3
CSE 5333	Cloud Computing	3
CSE 5334	DATA MINING	3
CSE 5335	WEB DATA MANAGEMENT	3
CSE 5339	SPECIAL TOPICS IN DATABASE SYSTEMS ¹	3
CSE 6331	ADVANCED TOPICS IN DATABASE SYSTEMS	3
CSE 6339	SPECIAL TOPICS IN ADVANCED DATABASE SYSTEMS ²	3
CSE 6363	MACHINE LEARNING	3

¹ This course may be taken when the topic is Data Management for Big Data or Health Informatics.

² This course may be taken when the topic is Advanced Data Mining or Data Exploration.

This certificate is structured around two tracks:

Big Data Management:

- 2 required core courses: CSE5339 - Special Topics in Database Systems (Data Management for Big Data), CSE5333 - Cloud Computing.
- 3 electives from the following 6 courses: CSE5330 - Database Systems, CSE5331 - DBMS Models and Implementation Techniques, CSE5334 - Data Mining, CSE5335 - Web Data Management, CSE6331 - Advanced Topics in Database Systems (Mining, Stream/Complex, Cloud), CSE6339 - Special Topics in Advanced Database Systems (Data Exploration).

Data Sciences:

- 2 required core courses: CSE 5334 - Data Mining, CSE 6363 - Machine Learning.
- 3 electives from the following 6 courses: CSE5301 - Data Analysis and Modeling Techniques, CSE5333 - Cloud Computing, CSE5339 - Special Topics in Database Systems (Health Informatics), CSE5362 - Social Networks and Search Engines, CSE6339 - Special Topics in Advanced Database Systems (Advanced Data Mining), CSE6339 - Special Topics in Advanced Database Systems (Data Exploration).

Computer Science and Engineering - Undergraduate Programs

The Department of Computer Science and Engineering offers three programs of study leading to the bachelor's degree: the Bachelor of Science in Computer Science, the Bachelor of Science in Computer Engineering, and the Bachelor of Science in Software Engineering.

In all three programs of study, design experiences are included throughout the first three years of the curriculum and culminate in a major team-oriented project in the senior year that approximates an industrial work experience. All programs strive to provide students with opportunities to interface with the profession through avenues such as cooperative education programs, professional society activities, plant trips, special projects, and industry speakers programs.

Bachelor of Science in Computer Science (BSCS)

The BSCS program has been formulated so that graduates may:

1. enter the computing profession or advanced studies supported by their knowledge of computing and mathematics, along with abilities in computational problem-solving and software system construction;
2. advance in this profession supported by their ability to work in teams, consider trade-offs in the design of computer-based systems, design solutions to meet desired needs and implement these solutions using current computer software tools and technologies; and
3. demonstrate success and leadership while advancing the practice of computing by contributing to the growth of their employers, communities, and professional societies through their proficiency in communication, understanding of professional issues and the broad impact of computing, and the ability to engage in continuing professional development.

The BSCS program has been accredited since 2002 by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

Bachelor of Science in Computer Engineering (BSCpE)

The BSCpE program has been formulated so that graduates may:

1. enter the engineering profession or advanced studies supported by their fundamental knowledge of mathematics, basic science, engineering principles, computing systems and science;
2. advance in the engineering profession supported by their ability to work in teams, analyze complex computing systems, design solutions and engineer these solutions using computer software and hardware tools and technologies; and
3. demonstrate success and leadership while advancing the practice of engineering by contributing to the growth of their employers, communities, and professional societies through their proficiency in communication, understanding of professional ethics, and the need for life-long learning.

The BSCpE program has been accredited since 1983 by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Bachelor of Science Degree in Software Engineering (BSSE)

The BSSE program has been formulated so that graduates will:

1. pursue the software engineering profession or advanced studies supported by their abilities to apply knowledge of mathematics, science, computer science and supporting disciplines, and software engineering;
2. advance in the software engineering profession supported by their abilities to effectively communicate and work in one or more significant application domains, function in multi-disciplinary teams, analyze, design, verify, validate, implement, and maintain software systems using software engineering technologies and tools; and
3. demonstrate success and leadership while advancing the practice of software engineering by contributing to the growth of their employers, communities, and professional societies through life-long learning, understanding professional ethics and responsibilities, and the impact of engineering solutions in a global and societal context.

The BSSE program has been accredited since 2002 by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Student Learning Outcomes

From the educational objectives of the BSCS program (described above), the department designed the program to develop in its graduates:

- an ability to apply knowledge of computing and mathematics appropriate to the discipline
- an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- an ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
- an ability to function effectively on teams to accomplish a common goal
- an understanding of professional, ethical, legal, security, and social issues and responsibilities
- an ability to communicate effectively with a range of audiences
- an ability to analyze the impact of computing on individuals, organizations, and society
- a recognition of the need for and an ability to engage in continuing professional development
- an ability to use current techniques, skills, and tools necessary for computing practice
- an ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs in design choices
- an ability to apply design and development principles in the construction of software systems of varying complexity

From the educational objectives of the BSCpE and BSSE programs (described above), the department designed these programs to develop in their graduates:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and construct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global and societal context
- a recognition of the need for, and the ability to engage in, lifelong learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Admission Requirements

Requirements for admission as a CS, CpE or SE pre-major or major are governed by the requirements stated under the College of Engineering section of this catalog. CS, CpE or SE pre-majors become majors upon completion of required pre-professional English, science, mathematics, and CSE courses, with a 2.25 or better grade point average.

All entering students majoring in computer science, computer engineering, or software engineering are permitted to enroll in general education and pre-professional courses for which they are qualified. Students completing these pre-professional courses must meet the academic requirements specified by the College of Engineering prior to applying for admission to the professional program. The Computer Science and Engineering Department requires a 2.25 overall grade point average on a 4.0 scale in each of three categories: (1) overall, (2) required science, mathematics, and engineering courses, and (3) required CSE courses. Students not in the professional program must have permission from the department chairperson to receive credit for courses listed in the professional program category. Application for admission to the professional program is made to the Department of Computer Science and Engineering.

Prior Preparation

The BSCS, BSCpE, and BSSE are four-year programs and requirements for the degrees are based upon prior high school preparation through either an honors or college track. More specifically, entering students are expected to have a background in mathematics through precalculus, high school chemistry, and programming in a high-level language such as C, C++, Java or Python.

Students who have not had the appropriate preparation should contact the departmental advising office for assistance in structuring a degree plan that will include leveling courses. Students requiring leveling courses may require a longer period of time to complete their undergraduate program.

Readiness Examinations

Students will be required to pass readiness examinations before enrolling in the courses listed below unless the course prerequisite was taken at UT Arlington and passed with a C or better grade. Students not passing the readiness examination must take the prerequisite course. A readiness examination may be taken only once per course and only before enrolling in any CSE courses. Additional information is available in the departmental office.

CSE 1320	INTERMEDIATE PROGRAMMING	3
CSE 1325	OBJECT-ORIENTED PROGRAMMING	3

Student Advising

CS, CpE, and SE pre-majors and majors are required to be advised by a departmental advisor each semester. Consult the departmental bulletin boards or Web site for advising hours. New and transfer students must also be advised prior to the beginning of the semester in which they first enroll.

Transfer Students and Transfer Credit

After admission and prior to registration, transfer students should contact the Department of Computer Science and Engineering for advising. At the time of advising, a transfer student must present to the undergraduate advisor an official transcript (or copy) from each school previously attended. Only the equivalent courses in a program accredited by ABET or equivalent freshman, sophomore, or general education courses accepted by the department chairperson can be counted toward a degree in computer science and engineering.

A student, once admitted to The University of Texas at Arlington and enrolled in the CS, CpE or SE program, cannot enroll in courses at another college or university and transfer those courses for credit toward a CS, CpE or SE degree without having obtained prior written permission from the chairperson of the Department of Computer Science and Engineering.

Cooperative Education Program

Cooperative education or Co-op programs are arrangements where students alternate periods of full-time employment with periods of full-time study, usually during the last two years of a degree program. The employment is directly related to the student's major and pays an attractive salary. Thus, Co-op students gain valuable career related experience before graduating, while earning a meaningful income. Cooperative education opportunities are plentiful for CS, CpE, and SE students.

Honors Programs

The Computer Science and Engineering Department encourages qualified CS, CpE, and SE majors to participate in the Honors College described elsewhere in this catalog. Projects may be pursued in any one of the areas of concentration within the Department of Computer Science and Engineering.

Graduate Degree Paths

Computing is a rapidly changing discipline requiring lifelong learning by its professionals. Completing a graduate degree enhances an individual's ability to assimilate and apply their knowledge and skills to meet on the job challenges and the needs of society. Pursuing a graduate degree on a full-time

basis immediately after completing the baccalaureate is an attractive option for many students. Students are encouraged to discuss possibilities with a Graduate Advisor upon advancement to a Bachelor of Science professional program.

FAST TRACK PROGRAM FOR MASTER'S DEGREE IN COMPUTER ENGINEERING, COMPUTER SCIENCE OR SOFTWARE ENGINEERING

The Fast Track Program enables outstanding UT Arlington senior undergraduate students in Computer Engineering to satisfy degree requirements leading to a master's degree in Computer Engineering while completing their undergraduate studies. Similarly, the Fast Track Program enables Computer Science students to satisfy degree requirements leading to a master's degree in Computer Science, and Software Engineering students to satisfy degree requirements leading to a master's degree in Software Engineering.

When senior-level students are within 15 hours of completing their undergraduate degree requirements, they may take up to nine hours of graduate level coursework designated by the program to satisfy both undergraduate and graduate degree requirements. In the limiting case, a student completing the maximum allowable hours (9) while in undergraduate status would have to take only 21 additional hours to meet minimum requirements for graduation in a 30-hour thesis master's degree program (M.S.) or 27 additional hours for a non-thesis master's degree program (M.S.)

Interested UT Arlington undergraduate students should apply to the appropriate graduate program when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UT Arlington, achieving a GPA of at least 3.0 in those courses, and have an overall GPA of 3.0 or better in all college courses. Additionally, they must have completed a set of specified undergraduate foundation courses with a minimum GPA of 3.3 in those courses. Contact the Undergraduate Advisor or Graduate Advisor in Computer Science and Engineering for more information about the program.

DIRECT ACCEPTANCE TO DOCTORAL PROGRAMS FROM BACHELOR'S DEGREE PROGRAM

Excellent undergraduate students may qualify for acceptance to doctoral studies without the intermediate completion of a masters degree. Students should discuss the expected level of commitment and possibilities for long-term support with a Graduate Advisor.

Oral Communication and Computer Competency Requirement

CS, CpE, and SE students will satisfy the oral competency requirement by completing COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING. They will satisfy the computer use competency requirement by completing CSE 1105 INTRODUCTION TO COMPUTER SCIENCE AND ENGINEERING.

Course Offerings

All 1000- and 2000-level CSE courses are typically offered each semester and in the 11-week summer session. All 3000-level courses and required 4000-level courses are typically offered at least twice per year. Other 4000-level courses are typically offered only once per year unless there is a high demand. Refer to the CSE department bulletin boards or Web site for more specific and current information. The CSE department reserves the right to move students among equivalent sections of the same course.

Minor in Computer Science

To receive a minor in Computer Science, a student must not be receiving his/her major degree from the department and must complete all courses listed with a grade of C or better in each course. Any substitutions must be approved in advance by the department chairperson.

REQUIREMENTS FOR A MINOR IN COMPUTER SCIENCE

To receive a minor in Computer Science, a student must complete the following courses with a grade of C or better in each:

CSE 1320	INTERMEDIATE PROGRAMMING	3
CSE 1325	OBJECT-ORIENTED PROGRAMMING	3
CSE 2315	DISCRETE STRUCTURES	3
CSE 2320	ALGORITHMS & DATA STRUCTURES	3
Any two 3000 or 4000 level courses with a grade of C or better in each as well as all required prerequisites for the chosen courses		6
Total Hours		18

- ¹ Grade of C or better in each, as well as all required prerequisites for the chosen courses.

Certificate in Unmanned Vehicle Systems

PROGRAM OBJECTIVE

The Certificate in UVS (Unmanned Vehicle Systems) is offered through the Computer Science and Engineering Department and will educate undergraduate students in the knowledge and skills required for design, development and operation of UVS including UAS (Unmanned Aircraft Systems), UGS (Unmanned Ground Systems), and UMS (Unmanned Maritime Systems). The certificate program will emphasize the common aspects of UVS such as sensors, actuators, communications, and more importantly, decision-making capabilities (autonomy). This program aims at the dual goal of providing the UVS industry with a knowledgeable, locally available workforce and developing career opportunities for its participants. To this end, the Certificate in UVS will be awarded concurrently with an undergraduate degree. More information about this program is available on the College of Engineering website.

ADMISSION REQUIREMENTS

The certificate is open to all degree-seeking students.

ACADEMIC REQUIREMENTS

Students must complete 15 hours of coursework as outlined below that include 6 hours of a core curriculum that is interdisciplinary and forms the basis of a common core in UVS Certificate and 9 hours of discipline specific curriculum. A combined GPA of 3.0 or better must be earned on all courses used to satisfy the certificate requirements.

For Computer Science majors

Required classes		6
CSE 4378	INTRODUCTION TO UNMANNED VEHICLE SYSTEMS	3
CSE 4379	UNMANNED VEHICLE SYSTEM DEVELOPMENT	3
9 credit hours from the following list		9
CSE 4319	MODELING AND SIMULATION	3
CSE 4308	ARTIFICIAL INTELLIGENCE I	3
CSE 4309	ARTIFICIAL INTELLIGENCE II	3
One 3 hour alternate UVS related course may be substituted based on consultation with the undergraduate curriculum advisor in the program.		

For Computer Engineering majors

Required classes		6
CSE 4378	INTRODUCTION TO UNMANNED VEHICLE SYSTEMS	3
CSE 4379	UNMANNED VEHICLE SYSTEM DEVELOPMENT	3
9 credit hours from the following list		9
CSE 3313	INTRODUCTION TO SIGNAL PROCESSING	3
CSE 3442	EMBEDDED SYSTEMS I	4
CSE 4342	EMBEDDED SYSTEMS II	3
One 3 hour alternate UVS related course may be substituted based on consultation with the undergraduate curriculum advisor in the program.		

Electrical Engineering

Undergraduate Degrees

- Bachelor of Science in Electrical Engineering (p. 293)
- Minor in Electrical Engineering (p. 293)

Graduate Degrees

- Electrical Engineering, M.Engr. Non-Thesis (p. 289)
- Electrical Engineering, M.S. (p. 289)
- Electrical Engineering, M.S. Fast Track (p. 289)
- Electrical Engineering, B.S. to Ph.D. (p. 292)
- Electrical Engineering, Ph.D. (p. 292)

Electrical Engineering - Graduate Programs

Objective

The course offerings provide the student with an opportunity to broaden as well as to intensify his or her knowledge in a number of areas of electrical engineering. The student, with the aid of a faculty adviser, may plan a program in any one of a number of fields of specialization within electrical engineering or from the offerings of related departments in science and engineering.

Graduate study and research are offered in the areas of:

1. Digital and Microprocessor/Controller Systems: Digital Signal Processors, Embedded Microcontrollers, Microprocessors, Advanced Microprocessor Systems
2. Solid-State Devices, Circuits and Systems: Semiconductor Theory, Microwave Devices and Circuits, Analog Electronics.
3. Systems and Controls: Systems, Controls, Manufacturing, Discrete Event Control, Neural and Fuzzy Control, Nonlinear Modern Control, Biomedical Signal Processing and Instrumentation

4. Electromagnetic Fields and Applications: Remote Sensing, Electromagnetic Fields, Propagation, Scattering, Radiation, and Microwave Systems.
5. Digital Signal and Image Processing: Vision Systems, Neural Networks, Statistical Signal Processing, Nonlinear Image Processing, Virtual Prototyping, and Virtual Environments.
6. Telecommunications and Information Systems: Information Transmission and Communication Systems
7. Power Systems: Efficient Operation, Generation, Transmission, Distribution, Deregulation
8. Optical Devices and Systems: Optics, Electro-optics, Diffractive Optics, Nonlinear Optics, and Lasers
9. Nanotechnology and MEMS - Materials and Devices: Quantum Electronic Devices, Semiconductor Surfaces and Interfaces, Single Electron Devices, Sensors and Detectors, Carbon Nanotube Devices, Noise and Reliability in Nano-Electronic Devices, Microactuators, RF MEMS, Polymer Electronics, and Nanophotonics
10. Renewable Energy Systems and Vehicular Technology: Power Electronics Engineering, Motor Drives, Renewable Energy Systems, Grid-Integration, and Vehicular Power Structure

The program is designed to satisfy the needs of students pursuing master's and doctoral degrees and to provide for the student seeking to increase knowledge in areas of electrical engineering related to engineering practice. The courses offered will provide practicing engineers with advanced, up-to-date education in electrical engineering.

Continuation

The Electrical Engineering Graduate Program, in fulfillment of its responsibility to graduate highly qualified engineers, has established certain policies and procedures. In addition to the requirements of the Graduate School listed elsewhere, to continue in the program each electrical engineering graduate student must maintain at least a B (3.0) GPA in all electrical engineering coursework and at least a B (3.0) GPA in all coursework for M.S. students. A student working toward a Ph.D. must maintain a 3.5 GPA in all electrical engineering coursework and at least a 3.5 GPA in all coursework.

Admission Criteria

The admission process considers all of the application material including official transcripts, GRE scores, letters of recommendation, and the statement of purpose. No single objective factor is used to finalize the decision for admission or to deny admission. It is expected that an applicant have background in such areas as linear systems, dc and ac electronics circuits, static and dynamic electromagnetic fields, microprocessors, among the courses completed in a typical electrical engineering curriculum. Students with a BS in other fields are encouraged to apply, but they may be required to remedy a lack of required EE courses by taking some undergraduate EE courses. An attempt will be made to match the technical aspirations of the potential graduate students with the departmental resources in order to provide a stimulating academic environment for the students and their graduate education.

Criteria concerning (1) unconditional admission, (2) provisional admission, (3) deferred admission, (4) denial of admission, and (5) fellowship, are given below.

1. Admission with Unconditional Status: A typical applicant who is "admitted" will have met the following admission requirements.

- The minimum undergraduate GPA requirement
 - i For MSEE admission 3.25 (on a 4.0 scale) based on upper division coursework (junior and senior level or equivalent)
- Relevance of the student's undergraduate degree (background) to the EE curriculum.
- Rigor of the student's Bachelor's degree.
- Reputation of the University/College that the student received his/her previous degrees
- Three recommendation letters from individuals who can judge the probability of success of the student's graduate study.
- GRE scores of at least the following:
- Quantitative score
 - = 720 (new scale: 156) for M.S.
 - or
 - = 750 (new scale: 159) for Ph.D.
- Verbal score = 400 (new scale: 146)
- Analytical Writing = 3 for M.S. or =3.5 for Ph.D
- For an International student, an additional requirement beyond those stated above:

TOEFL = 560 for the paper and pencil test, 220 for the computer-based test and 83 for the internet based test. A minimum of 19 in each of the four categories.

2. Admission with Provisional status: An applicant unable to supply all required official documentation prior to the admission deadline, but whose available documentation otherwise appears to meet admission requirements may be granted provisional admission.
3. Deferred status: A deferred decision may be granted when a file is incomplete.
4. Denied Status: An applicant that does not meet categories 1, 2 or 3 above will be denied admission.

5. Fellowships: Award of a fellowship will be based on the criteria required by the sponsor agency (including the graduate school) on a competitive basis.

Master's Degree Requirements

Master's degree requirements are described in the general catalog section titled Requirements for the Master's Degree/Degree Plans and Hours Required. The MSEE degree options available are thesis option, thesis substitute option and non-thesis option. The courses taken for all degrees must be distributed over three of the nine areas given in the Objective section. The MSEE program of work in electrical engineering may include up to nine graduate level semester hours of supporting courses outside the Electrical Engineering Department in math, science and engineering. The Graduate Advisor must approve supporting courses that are permitted on a degree plan. The courses approved outside electrical engineering may be used in lieu of one of the three distribution areas. The thesis option requires 24 semester hours plus six semester hours of thesis (). The thesis substitute option requires 33 semester hours of which three semester hours must be in the thesis substitute project. The non-thesis option requires 36 semester hours. may not be used to satisfy course requirements in either the Thesis or Thesis-substitute degree plans. may be used one time as part of the non-Thesis degree plan. may not be used toward the MSEE or MENGGR degrees. The M.Engr. emphasizes design engineering and management. This program requires 36 semester hours distributed in the same manner as the MSEE program, except that up to 12 semester hours outside the department may be included.

Technical Areas, Courses, and Technical Proficiency Courses

MSEE students must take courses from three Technical Areas. Non-thesis students must take one technical proficiency course from each of three areas, and earn at least a 3.3 GPA in those three courses.

Technical Areas	Courses	Technical Proficiency Courses
1. Digital and Microprocessor/Controller Systems	EE 5313	EE 5313 - Microprocessor Systems

9. Nanotechnology and MEMS - Materials and Devices	EE 5343	EE 5343 - Silicon IC Fab Technology
	EE 5344	EE 5344 - Introduction to MEMS
	EE 5345	EE 5381 - Foundations in Semiconductors
	EE 5381	Approved Substitution: EE
	EE 6342	
	EE 6343	
	EE 6344	
	EE 6345	
10. Renewable Energy Systems and Vehicular Technology	EE 5309 (Grid-Integration of Renewable Energy Systems)	EE 6375 - Power Electronics Engineering
	EE 5309 (Renewable Energy Systems)	
	EE 5309 (Electric Motor Drive)	
	EE 5309 (Hybrid Electric Drive)	
	EE 6375	

Admission Criteria

The admission process considers all of the application material including official transcripts, GRE scores, letters of recommendation, and the statement of purpose. No single objective factor is used to finalize the decision for admission or to deny admission. It is expected that an applicant have background in such areas as linear systems, dc and ac electronics circuits, static and dynamic electromagnetic fields, microprocessors, among the courses completed in a typical electrical engineering curriculum. Students with a BS in other fields are encouraged to apply, but they may be required to remedy a lack of required EE courses by taking some undergraduate EE courses. An attempt will be made to match the technical aspirations of the potential graduate students with the departmental resources in order to provide a stimulating academic environment for the students and their graduate education.

Criteria concerning (1) unconditional admission, (2) provisional admission, (3) deferred admission, (4) denial of admission, and (5) fellowship, are given below.

- Admission with Unconditional Status: A typical applicant who is "admitted" will have met the following admission requirements.
 - The minimum undergraduate GPA requirement
 - For Ph.D. admission 3.5 based on MSEE or equivalent
 - Relevance of the student's undergraduate degree (background) to the EE curriculum.
 - Rigor of the student's Bachelor's degree.
 - Reputation of the University/College that the student received his/her previous degrees
 - The publications in scholarly conferences/journals are optional but will improve both a student's chances of securing admission and receiving financial support.
 - Three recommendation letters from individuals who can judge the probability of success of the student's graduate study.
 - GRE scores of at least the following:
 - Quantitative score
 - = 720 (new scale: 156) for M.S.
 - or
 - = 750 (new scale: 159) for Ph.D.
 - Verbal score = 400 (new scale: 146)
 - Analytical Writing = 3 for M.S. or =3.5 for Ph.D
 - For an International student, an additional requirement beyond those stated above:

TOEFL = 560 for the paper and pencil test, 220 for the computer-based test and 83 for the internet based test. A minimum of 19 in each of the four categories.
- Admission with Provisional status: An applicant unable to supply all required official documentation prior to the admission deadline, but whose available documentation otherwise appears to meet admission requirements may be granted provisional admission.
- Deferred status: A deferred decision may be granted when a file is incomplete.
- Denied Status: An applicant that does not meet categories 1, 2 or 3 above will be denied admission.
- Fellowships: Award of a fellowship will be based on the criteria required by the sponsor agency (including the graduate school) on a competitive basis.

Doctoral Degree Requirements

The Ph.D. is a degree with emphasis on research. Requirements for the doctoral degree are described elsewhere in the general catalog section on Degree Offerings/Requirements. Permission to continue beyond the master's degree will be based on the grade point average and GRE scores as described above. Approval to continue in the doctoral program is given by satisfactory completion of the following procedure:

1. Obtaining the approval of a dissertation adviser, and
2. Passing the Diagnostic Examination. This exam will be over the three Technical Proficiency areas selected by the student.

Review courses for the Diagnostic Examination should be completed during the M.S. degree or during the first 30 graduate hours required for entrance into the Ph.D. program.

This procedure must be completed within the year of coursework toward the Ph.D. A student not having attempted the Diagnostic Examination by this time will be allowed one more opportunity to take the examination during the next full semester.

The program of work is expected to include a minimum of 15 semester hours of advanced graduate level coursework beyond the master's degree and sufficient dissertation semester hours as required to complete the dissertation. All graduate level courses are counted in the 15 hour minimum. Among the 15 hour minimum, a minimum of 6 semester hours of advanced graduate level coursework is required. In addition, 2 semesters of 1 semester hour seminar course (EE 5190 ELECTRICAL ENGINEERING GRADUATE SEMINAR) are required. The seminar course is not counted in the 15 hour minimum. The supervising professor may require additional coursework beyond the 15 hour minimum if deemed necessary to accomplish the research required for the dissertation. These courses may include graduate level mathematics, science, or engineering relevant to the student's dissertation program, but only with approval of the Graduate Advisor.

For the direct PhD program, the program of work is expected to include a minimum of 30 semester hours of graduate level coursework beyond the bachelor's degree and sufficient dissertation semester hours as required to complete the dissertation. Among the 30 hour minimum, a minimum of 6 semester hours of advanced graduate level coursework is required. In addition, 2 semesters of 1 semester hour seminar course (EE 5190 ELECTRICAL ENGINEERING GRADUATE SEMINAR) are required. The seminar course is not counted in the 30 hour minimum.

The status of a doctoral candidate is approved for students who have passed an oral Comprehensive Examination (a comprehensive dissertation proposal) and submitted a Final Program of Work. The Comprehensive Examination will be required by the time the student has completed the required coursework. If the student fails the examination, he/she would be given one more chance to pass it no later than during the following semester. Upon completion of the Comprehensive Examination, the candidate should enroll in the dissertation course EE 6699 DISSERTATION or EE 7399 DOCTORAL DEGREE COMPLETION. The student can only enroll in EE 7399 DOCTORAL DEGREE COMPLETION one time. If the student does not graduate in the semester EE 7399 is used, all future semesters the student must enroll in EE 6699 DISSERTATION until the dissertation is defended. 9 semester hours of Dissertation is required to graduate.

Ph.D. Supervisory Committee

A doctoral student's committee shall consist of at least five members of the Graduate Faculty, a majority of whom must be in Electrical Engineering.

Electrical Engineering - Undergraduate Programs

501 Nedderman Hall · Student Advising Office

Accreditation

Accreditation is an assurance that the professionals that serve us have a solid educational foundation and are capable of leading the way in innovation, emerging technologies, and in anticipating the welfare and safety needs of the public. The Electrical Engineering Department at the University of Texas at Arlington has been continuously accredited since 1965 by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Overview of Electrical Engineering

Electrical Engineering is a broad field that includes power systems, control systems, microelectronics and nanoelectronics, microprocessors and computer networks, telecommunications (wire, wireless, satellite and fiber optic), remote sensing, signal processing, neural networks, medical devices, optics (electro-optics, optoelectronics and photonics) and other emerging technologies.

Electrical engineers must be prepared to apply fundamental concepts in the applications of new technologies and to contribute to the growth of these technologies. They must also have the skills to communicate their ideas and to manage projects within a schedule and budget. Because of the broad nature of the field, electrical engineers are involved in a wide range of engineering design projects and they must be able to employ knowledge from other disciplines in electrical engineering designs. They must also be prepared to support engineers in other disciplines.

Engineering designs are a team effort and require good communication skills, both oral and written. Therefore it is important that each student develops these necessary communication skills.

The benefit of having an education in electrical engineering is that the student is prepared for a career not only in technical areas but also for further training in other disciplines such as medicine, law, public policy, business, economics, management, and teaching.

Educational Objectives of the Undergraduate Program

The Program Educational Objectives are to produce graduates who:

- Advance the mission of their organization by significantly contributing to any of the following disciplines: component and/or system design, R&D, manufacturing, customer support, technical training, sales and marketing.
- Demonstrate leadership in one or more significant roles since graduation, as evidenced for example by successful entrepreneurship in a start-up, significant promotions and awards in a company or engineering firm.
- Successfully build on the BSEE degree from UTA by: completing a graduate degree; or taking professional course(s); or earning professional certificate(s).

Student Outcomes of the Undergraduate Program

From these Program Educational Objectives, the department designed its baccalaureate program to offer its graduates the following student learning outcomes:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multi-disciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills and modern engineering tools necessary for engineering practice
- an ability to apply probability and statistics, including applications appropriate to electrical engineering

The program has been continuously accredited since 1965 by the Engineering Accreditation Commission (EAC) of ABET, <http://www.abet.org>.

Admission Requirements

Requirements for admission as an EE major are governed by the requirements as stated in the College of Engineering section of this catalog. EE majors are only allowed to enroll in pre-professional courses until they meet the requirements for the professional program as outlined below.

Undergraduate Advising

General academic advising for new students (excluding transfer course evaluation) is done during the scheduled orientation period prior to registration. Academic advising for continuing students will be done during each semester prior to registration. The dates for advising new and continuing students will be listed in the appropriate schedule of classes. Personal academic advising is available in the office of the Undergraduate Advisor during the semester by appointment. To graduate, the student must have an approved degree plan on file in the Registrar's Office.

The students can use the course sequences described above to plan their studies. Recommended electives are listed in the advising office and on the Web site at www.uta.edu/engineering/ee. A supplemental EE Undergraduate Program Guide is available in the Advising Office; it provides more details of the different areas of specialization in Electrical Engineering as well as on other matters relevant to completing the BSEE degree.

Admission to the Professional Program

Requirements for admission to the professional program in Electrical Engineering are in accordance with those of the College of Engineering with the following added stipulations:

- Application to the professional program is to be made to the Undergraduate Advisor during the semester that the advancement requirements are being completed.
- No professional electrical engineering courses may be taken until the student is admitted into the professional program or obtains the written consent of the Undergraduate Advisor.
- Each student must complete all pre-professional courses stipulated under "Requirements for a Bachelor of Science Degree in Electrical Engineering" with a minimum grade of C in each course and a minimum GPA of 2.25 in:

- a. all courses,
- b. in all math, science, and engineering courses, and
- c. in all EE courses.

To graduate, the student must be admitted to the professional program and have an approved degree plan on file in the Registrar's office. The degree plan is generated upon entry to the professional program. Graduating seniors should apply to graduate during the next-to-last semester. Each student must complete all professional level electrical engineering courses stipulated under "Requirements for a Bachelor of Science Degree in Electrical Engineering" with a minimum grade of C in each course. All engineering courses used on the BSEE degree plan must be C or better.

Program Features

The pre-professional program reflects a concentration of preliminary science, mathematics, and engineering courses to prepare the student for the professional engineering program. EE students are admitted to the professional program as described above. The pre-professional program consists of core courses in electronics; digital systems, microprocessors, and computer programming. The professional program consists of core courses in electromagnetics; power systems and energy conversion; continuous and discrete time systems; controls; and communications. The core curriculum provides the needed foundation for a variety of technical areas in electrical engineering. The design experience is emphasized throughout the program, with particular emphasis on the team concept in the engineering design courses. Through careful selection of technical electives, the student may specialize in certain fields of electrical engineering. Information on these areas is available in the Electrical Engineering Department Advising Office. In addition, there are opportunities to participate in ongoing research projects of the faculty in Electrical Engineering. Independent study credit can be obtained through EE 4391 ADVANCED PROBLEMS IN ELECTRICAL ENGINEERING.

Cooperative Education Program

Cooperative education opportunities are plentiful for EE students. Interested students should contact the Cooperative Education Office in the College of Engineering.

Master's Degree Path

The electrical engineering field is continually evolving in all areas from power systems to optics. To stay current in technical areas requires a commitment to lifelong learning. Completing a master's degree certainly gives the student a head start on this.

Students graduating with a GPA of 3.0 or higher and GRE scores of 146 verbal or higher, 156 quantitative or higher, and 3.0 writing can be admitted to the EE master's program upon application. Interested students should contact the graduate advisor. Students can take a project course, EE 4391 ADVANCED PROBLEMS IN ELECTRICAL ENGINEERING, as one of their technical electives to begin their studies on a topic that they may use for their MS research and thesis. Also, students that require less than 12 hours to graduate can dual enroll in the graduate program in the last semester of their BS program.

Fast Track Program for Master of Science in Electrical Engineering

Students within 30 credit hours of completing their bachelor's degree with a GPA of at least 3.5 may be eligible for admission into the Fast Track Program for Master of Science in Electrical Engineering. Once admitted, students will be allowed to take select graduate courses that may be used to satisfy both bachelor's and master's degree requirements. Interested students should contact the graduate advisor.

Competence in Oral Communication and Computer Use

Electrical Engineering students will satisfy the University Competence in Oral Presentations requirement by completing the course COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING. They will satisfy the University Competence in Computer Use requirement by completing EE 2347 MATHEMATICAL FOUNDATIONS OF ELECTRICAL ENGINEERING.

Requirements for a Bachelor of Science Degree in Electrical Engineering

The program is divided into a pre-professional program and a professional engineering program, with the division essentially occurring between the sophomore and junior years.

Pre Professional Requirements that may also satisfy Core requirements ¹

ENGL 1301	RHETORIC AND COMPOSITION I
ENGL 1302	RHETORIC AND COMPOSITION II
MATH 1426	CALCULUS I ²
MATH 2425	CALCULUS II
MATH 2326	CALCULUS III
PHYS 1443	GENERAL TECHNICAL PHYSICS I
PHYS 1444	GENERAL TECHNICAL PHYSICS II

General Education

Select one Engineering Elective course (also includes Electrical Engineering) ³		3
3000/4000 courses in Mathematics or Science Elective ³		3
MAE 3309	THERMAL ENGINEERING	3
Total Hours		125-126

¹ All pre-professional courses must be completed before enrolling in professional program courses

² The Mathematics Department requires passing a placement test provided by the Mathematics Department before enrolling.

³ A list of acceptable electives is available in the EE Dept. advising office.

⁴ Chem 1465 can be substituted with Chem 1441 and Chem 1442 (8 hours).

Note: Total hours will depend upon prior preparation and academic qualifications. Also, students who do not have two units of high school foreign language will be required to take two courses of foreign language in addition to the previously listed requirements.

RECOMMENDED CORE CURRICULUM

Electrical Engineering students will satisfy the university core curriculum requirement by completing all General Education courses specified under "Requirements for a Bachelor of Science Degree in Electrical Engineering" along with ENGL 1301, ENGL 1302, MATH 1426, MATH 2425, MATH 2326, MATH 3319, PHYS 1443 and PHYS 1444, which are also part of the Pre-Professional Program. For more information, see [University Core Curriculum](#).

Refer to the College of Engineering section of this catalog for information concerning the following topics: Admission into Engineering, Admission into Pre-Engineering, Admission into the Professional Program, Counseling or Advising, Transfer and Change of Major Policies, Honors Program, Academic Regulations, Professional Engineering Registration, Cooperative Education, Academic Probation, Repeating Course Policy, and Academic Dishonesty.

Refer to the Electrical Engineering Department website for the suggested course sequence (<http://www.uta.edu/ee>).

Requirements for a Minor in Electrical Engineering

To receive a minor in Electrical Engineering, a student must complete the following five courses with a grade of C or better in each:

EE 2415	CIRCUIT ANALYSIS I	4
EE 2403	ELECTRONICS I	4
EE 2441	DIGITAL LOGIC AND MICROPROCESSORS 1	4
EE 3407	ELECTROMAGNETICS	4
EE 3417	CONTINUOUS SIGNALS AND SYSTEMS	4
Total Hours		20

Industrial, Manufacturing and Systems Engineering

Undergraduate Degree

- Bachelor of Science in Industrial Engineering (p. 303)

Graduate Degrees

- Engineering Management, M.S. (p. 300)
- Industrial Engineering, M.Engr. (p. 299)
- Industrial Engineering, M.S. (p. 298)
- Logistics, M.S. (p. 301)
- Systems Engineering, M.S. (p. 300)
- Industrial Engineering, Ph.D. (p. 302)

Industrial, Manufacturing and Systems Engineering - Graduate Programs

Programs in Industrial Engineering

The graduate program in industrial engineering is designed to provide the student with fundamental knowledge in the various areas of industrial engineering and with the opportunity to emphasize in a particular area. A student pursuing a master's or doctoral degree may concentrate in any area of industrial engineering such as General Industrial Engineering, Operations Research and Applied Statistics, Manufacturing Systems, Logistics, Enterprise Systems, Enterprise Management, and Ergonomics.

In addition, the department offers the Master of Science in Systems Engineering Program. The Department also participates in a college-wide Manufacturing Certificate program. The Master of Science in Logistics Program and the Master of Science in Engineering Management Program are offered in partnership with the College of Business Administration.

Program in Systems Engineering

The Systems Engineering program is designed to provide students with both the fundamental and applied management and technical knowledge to support the development of complex systems. Systems Engineering is that branch of engineering that develops systems, where a system is a collection of elements that work together as a unit.

Systems Engineering considers the total systems life-cycle from customer requirements and concept through design and development, system use, system maintenance, and system disposal. A Systems Engineering curriculum must encourage a broad view rather than a focus on individual system elements or phases of development. This broad view, a systems view, enables better system performance and reduces the likelihood of unintended consequences.

Students may obtain a Master of Science in Systems Engineering and then pursue a PhD in Industrial Engineering with a focus on Systems Engineering.

Program in Engineering Management

The Engineering Management Program is offered as an interdisciplinary program that integrates engineering and business concepts. The curriculum prepares an experienced professional engineer or scientist for a leadership role in planning, developing and managing firm's technological resources including people, technology and processes. Graduates acquire an understanding how to use the technical base to accomplish the organization's operational, strategic and competitive objectives.

Program in Logistics

The Logistics Program is designed to meet an increasing state, national, and international demand for professionals with technical or business education and experience in the area of logistics and supply chain. Such professionals will need a unique combination of technical and business knowledge and skills and will have technical experience and degrees in engineering, mathematics or business.

Logistics is an interdisciplinary field of study which comprises the entire set of functions associated with the flow of goods, information, and payments among suppliers and consumers from organization of raw material to final recycling or disposal of finished goods. The integration of engineering and business content is done in a fashion that prepares an experienced professional engineer or manager for a leadership role in planning, developing, implementing and managing the firm's logistics and supply chain capabilities in the global marketplace. The overall purpose of the Logistics Program at UT Arlington is to provide graduates with the understanding needed to manage the firm's logistics and supply chain systems and infrastructure and to accomplish the organization's operational, strategic and competitive objectives.

Admission Criteria for Master's Program in Industrial Engineering

Applicants for the master's degree who hold a baccalaureate degree in engineering must meet the general minimum requirements described below. Applicants not meeting all criteria may be admitted on a probationary basis.

For applicants with no prior training in engineering, the same minimum admission criteria will apply. In addition, their records will be reviewed in relation to the intended program of study, and specific remedial work may be required.

The acceptance of applicants who have already received a master's degree in engineering, other than industrial engineering, will be based on the above-mentioned minimum criteria and results of graduate work.

Performance on the GRE will not be the sole criterion for admitting applicants or the primary criterion to deny admission to the master's program. In cases where GRE performance does not meet the minimum requirements, all other qualifications presented by the applicant will be carefully evaluated for evidence of potential for success.

UNCONDITIONAL ADMISSION CRITERIA

Unconditional Admission into the M.S. Industrial Engineering program is granted if all of the following conditions are met.

- A GPA of at least 3.0 in the last 60 hours of undergraduate coursework.
- A GPA of at least 3.0 in all prior graduate work.
- A minimum score of 148 on the GRE Quantitative section and 146 on the GRE Verbal section (600 and 400, respectively, on the old scale).
- A minimum score of 500 on the handwritten TOEFL (213 on the computer-based version, or 79 on the TOEFL iBT, or 6.5 on the IELTS) if English is not the applicant's native language.
- Adequate preparation in mathematics, science, and industrial engineering.

PROBATIONARY ADMISSION CRITERIA

Prospective students not meeting the conditions for unconditional admission may be granted probationary admission if their GPA is at least 2.6 and if their qualifications indicate a potential for success. Deficiency coursework in IE, mathematics, or other courses relevant to the IE degree program may be required, at the discretion of the graduate advisor. Probationary status may be cleared by satisfying all deficiency requirements and achieving a GPA of at least 3.0 in the first two semester of graduate work.

PROVISIONAL ADMISSION

An applicant unable to supply all required official documentation prior to the admission deadline, but whose available documentation otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRAL

The admission decision is deferred if sufficient information is not available to make an admission decision.

DENIAL

Prospective master's students with a GPA below 2.6 may be denied admission at the discretion of the Graduate Advisor. The Graduate Advisor may grant probationary admission if other factors suggest a potential for success in the graduate program.

CONTINUATION

The Industrial Engineering Graduate Program, in fulfillment of its responsibility to graduate highly qualified professional engineers, has established certain policies and procedures. In addition to requirements of the Graduate School listed elsewhere, to continue in the program toward graduation each industrial engineering graduate student must:

1. Maintain at least a B (3.0) overall GPA in all coursework taken as a graduate student and in the MSIE program, and
2. Demonstrate suitability for professional engineering practice.

At such time as questions are raised by industrial engineering graduate faculty regarding either of the above, the student will be notified and will be provided the opportunity to respond to the Committee on Graduate Studies in Industrial Engineering. The Committee on Graduate Studies will review the student's performance and make a recommendation concerning the student's eligibility to continue in the program. Appeal of a decision on continuation may be made through normal procedures outlined in the section of this catalog entitled "Grievances Other than Grades."

Degree Requirements for Master's Program in Industrial Engineering

The MS degree in Industrial Engineering requires 36 hours of coursework beyond the baccalaureate degree in Industrial Engineering for the non-thesis option, and 24 hours plus a thesis for the thesis option.

Engineering students without a baccalaureate industrial engineering degree must take seven or eight courses (21 or 24 credit hours) for the industrial engineering core curriculum. The remaining 12 or 15 hours will be IE electives. For the thesis option, these students must satisfy all core course requirements, in addition to the thesis. The core curriculum is as follows:

1. Three hours of introductory Industrial Engineering coursework for students without a baccalaureate industrial engineering degree.
2. Three hours of coursework in engineering statistics approved by the graduate advisor.
3. Three hours of coursework in operations research approved by the graduate advisor.
4. Three hours of coursework in engineering economy approved by the graduate advisor.
5. Twelve hours of industrial engineering design approved by the graduate advisor.

A final comprehensive examination is required for each master's candidate. For the thesis option, the examination will be oral and will cover the thesis. For the non-thesis option, the examination will be written.

MASTER OF SCIENCE

The Master of Science Degree is a 36 credit hour research-oriented program which consists of a thesis option, thesis-substitute option, and a non-thesis option. M.S. degree requirements are given under the catalog section entitled "Advanced Degrees and Requirements."

MASTER OF ENGINEERING

The Master of Engineering Degree is an engineering practice-oriented program. The degree is a 36 credit-hour program in which a maximum of six credit hours may be earned by an acceptable design project report, internship, or additional coursework. Applicants for this degree must have a baccalaureate degree in an engineering discipline. M.E. degree requirements are given under the catalog section entitled "Advanced Degrees and Requirements."

Fast Track Program for a Master's Degree in Industrial Engineering

The Fast Track Program enables outstanding UT Arlington senior undergraduate students in Industrial Engineering to satisfy degree requirements leading to a master's degree in Industrial Engineering while completing their undergraduate studies. When senior-level students are within 15 hours of completing their undergraduate degree requirements, they may take up to 9 hours of coursework designated by the Industrial Engineering Program to satisfy both undergraduate and graduate degree requirements. In the limiting case, a student completing the maximum allowable hours (9) while in undergraduate status would have to take only 27 additional hours to meet minimum requirements for graduation.

Interested UT Arlington undergraduate Industrial Engineering students should apply to the Industrial Engineering Program when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UTA, achieving an overall GPA of 3.0 or better in all work done at UTA and in the last 30 hours. Additionally, they must have completed 9 hours of specified foundation courses with a minimum GPA of 3.3 in those courses. Contact the Undergraduate Advisor or Graduate Advisor in Industrial Engineering for more information about the program.

Admission Criteria for M.S. in Systems Engineering

UNCONDITIONAL ADMISSION

Unconditional admission into the M.S. Systems Engineering program is granted if all of the following conditions are met.

- A GPA of at least 3.0 in the last 60 hours of undergraduate coursework or prior graduate work.
- A minimum score of 148 on the GRE Quantitative section and 146 on the GRE Verbal section (600 and 400, respectively, on the old scale).
- A minimum score of 500 on the handwritten TOEFL (213 on the computer-based version, or 79 on the TOEFL iBT, or 6.5 on the IELTS) if English is not the applicant's native language.
- Adequate preparation in mathematics, science, and engineering, or other appropriate field.
- A minimum of two years of industry experience.

PROBATIONARY ADMISSION CRITERIA

Prospective students who do not meet the conditions for unconditional admission are granted probationary admission if their GPA is 2.6 or greater. Students granted probationary admission must achieve a GPA of at least 3.0 for the first two semesters completed at UTA. Unconditional admission may then be granted. Other conditions, such as deficiency courses, may be specified by the Graduate Advisor.

PROVISIONAL ADMISSION

An applicant unable to supply all required official documentation prior to the admission deadline, but whose available documentation otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRAL

The admission decision is deferred if sufficient information is not available.

DENIAL

Prospective students with a GPA below 2.6 may be denied admission at the discretion of the Graduate Advisor. The Graduate Advisor may grant probationary admission if other factors suggest a potential for success in the graduate program. Denial will not be based solely or primarily on GRE performance. In cases where test performance is relatively poor, all other qualifications presented by the applicant will be carefully evaluated for evidence of potential for success in the program.

Degree Requirements for M.S. in Systems Engineering

The M.S. degree in Systems Engineering requires 36 hours of coursework. The coursework is in the Department of Industrial and Manufacturing Systems Engineering. The program includes such courses as:

- Introduction to Systems Engineering
- Systems Engineering I
- Systems Engineering II
- Systems Engineering III
- Advanced Operations Research
- Advanced Engineering Statistics
- Simulation and Optimization
- Enterprise Engineering Methods
- Enterprise Architectures and Frameworks
- Engineering Management I
- Engineering Management II
- Project Management
- Advanced Engineering Economy
- Management of Knowledge and Technology

Admission Requirements for M.S. in Engineering Management

Applicants must hold a baccalaureate degree in science, mathematics, engineering or other appropriate field.

UNCONDITIONAL ADMISSION

Unconditional admission into the Engineering Management Program is granted if all of the following conditions are met.

- A GPA of at least 3.0 in the last 60 hours of undergraduate coursework or and in all prior graduate work.
- A minimum score of 148 on the GRE Quantitative section and 146 on the GRE Verbal section (600 and 400, respectively, on the old scale).
- A minimum score of 500 on the handwritten TOEFL (213 on the computer-based version, or 79 on the TOEFL iBT, or 6.5 on the IELTS) if English is not the applicant's native language.
- Adequate preparation in mathematics, science, and engineering or other appropriate field. Industrial experience is preferred.

PROBATIONARY ADMISSION CRITERIA

Prospective Engineering Management students not meeting the conditions for unconditional admission may be granted probationary admission if their GPA is 2.6 or greater. Students granted probationary admission must maintain a GPA of at least 3.0 for the first two semesters completed at UT Arlington. Other conditions, such as deficiency courses, may be specified by the Graduate Advisor.

PROVISIONAL ADMISSION

An applicant unable to supply all required official documentation prior to the admission deadline, but whose available documentation otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRAL

The admission decision is deferred if insufficient information is available.

Denial

Prospective students with a GPA below 2.6 may be denied admission at the discretion of the Graduate Advisor. The Graduate Advisor may grant probationary admission if other factors suggest a potential for success in the graduate program.

Degree Requirements for M.S. in Engineering Management

The M.S. degree in Engineering Management requires 36 hours of coursework. The coursework is divided between the Department of Information Systems and Operations Management and the Department of Industrial and Manufacturing Systems Engineering. The program includes such courses as:

- Accounting Analysis
- Engineering Management
- Engineering Economics
- Management Sciences
- Quality Management
- Product Management
- Project Management
- Management of Knowledge and Technology
- Simulation and Optimization
- Technology Development and Deployment

Admission Requirements for M.S. in Logistics

UNCONDITIONAL ADMISSION

Unconditional admission into the M.S. Logistics program is granted if all of the following conditions are met.

- A GPA of at least 3.0 in the last 60 hours of undergraduate coursework or prior graduate work.
- A minimum score of 148 on the GRE Quantitative section and 146 on the GRE Verbal section (600 and 400, respectively, on the old scale) or 500 on the GMAT.
- A minimum score of 500 on the handwritten TOEFL (213 on the computer-based version, or 79 on the TOEFL iBT, or 6.5 on the IELTS) if English is not the applicant's native language.
- Adequate preparation in mathematics, science, and engineering or other appropriate field, and three years of experience.

PROBATIONARY ADMISSION CRITERIA

Prospective students not meeting the conditions for unconditional admission may be granted probationary admission if their GPA is 2.6 or greater. Students granted probationary admission must maintain a GPA of at least 3.0 for the first two semesters completed at UT Arlington. Other conditions, such as deficiency courses, may be specified by the Graduate Advisor.

PROVISIONAL ADMISSION

An applicant unable to supply all required official documentation prior to the admission deadline, but whose available documentation otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRAL

The admission decision is deferred if insufficient information is available.

DENIAL

Prospective students with a GPA below 2.6 may be denied admission at the discretion of the Graduate Advisor. The Graduate Advisor may grant probationary admission if other factors suggest a potential for success in the graduate program.

Degree Requirements for M.S. in Logistics

The M.S. degree in Logistics requires 36 hours of coursework. The coursework is divided between the Department of Industrial and Manufacturing Systems Engineering and the Department of Information Systems and Operations Management. The program includes such courses as:

- Probability and Statistics
- Operations Research
- Production and Inventory Control
- Production Systems Design
- Enterprise Modeling
- Logistics Information Systems
- Logistics Transportation Systems Design
- Logistics Distribution Systems Design
- Business Logistics
- Purchasing and Materials Management
- Supply Chain Management Approved Electives

Doctor of Philosophy

The Ph.D. degree should normally require approximately four years or less of full-time study after completion of the BS degree. A student's program will consist of coursework, independent study, and a dissertation in a field pertinent to the student's areas of interest. The program for each student will be planned by the student and a committee of faculty members. There is no foreign language requirement for the Ph.D. degree.

Students with undergraduate degrees in fields other than engineering will be required to take necessary courses to establish a background in science, mathematics, and engineering. Students with non-IE engineering degrees may be required to take deficiency IE courses. Ph.D. requirements are listed in the catalog section entitled "Advanced Degrees and Requirements."

UNCONDITIONAL ADMISSION CRITERIA

Unconditional Admission into the Ph.D. programs in Industrial Engineering is granted if all of the following conditions are met.

- A GPA of at least 3.0 in the last 60 hours of undergraduate coursework.
- A GPA of at least 3.3 in all prior graduate work for Ph.D. students.
- A minimum score of 155 on the GRE Quantitative section and 150 on the Verbal section (700 and 450, respectively, on the old scale).
- A minimum score of 500 on the handwritten TOEFL (213 on the computer-based version, or 79 on the TOEFL iBT, or 6.5 on the IELTS) if English is not the applicant's native language.
- Adequate preparation in mathematics, science, and industrial engineering.

PROBATIONARY ADMISSION CRITERIA

Prospective students not meeting the conditions for unconditional admission, but whose records otherwise indicate adequate preparation for starting the Ph.D. degree, may be granted probationary admission. Students granted probationary admission must achieve a GPA of at least 3.0 for the first two semesters as a doctoral student, after which unconditional admission may be granted, providing all other requirements for unconditional admissions are met. Other conditions, such as deficiency courses, may be specified by the Graduate Advisor.

PROVISIONAL ADMISSION

An applicant unable to supply all required official documentation prior to the admission deadline, but whose available documentation otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRAL

The admission decision is deferred if sufficient information is not available.

DENIAL

Applicants who do not satisfy the conditions for any of the above categories of admission will be denied admission.

CONTINUATION

The Industrial Engineering Graduate Program, in fulfillment of its responsibility to graduate highly qualified professional engineers, has established certain policies and procedures. In addition to requirements of the Graduate School listed elsewhere, to continue in the program each industrial engineering graduate student must:

1. Maintain at least a B (3.0) overall GPA in all coursework taken as a graduate student and in all IE courses taken , and
2. Demonstrate suitability for professional engineering practice.

At such time as questions are raised by industrial engineering graduate faculty regarding either of the above, the student will be notified and will be provided the opportunity to respond to the Committee on Graduate Studies in Industrial Engineering. The Committee on Graduate Studies will review the student's performance and make a recommendation concerning the student's eligibility to continue in the program. Appeal of a decision on continuation may be made through normal procedures outlined in the section of this catalog entitled "Grievances Other than Grades."

BS to PhD Program

In addition to the basic PhD requirements, the BS to PhD track in Industrial Engineering requires 30 credit hours including 18 hours of diagnostic coursework, a three credit hour elective and 9 credit hours of research coursework.

Industrial, Manufacturing and Systems Engineering - Undergraduate Program

Overview

Industrial Engineering students will be prepared for engineering practice through a curriculum culminating in a major design experience based on the knowledge and skills in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. The curriculum will prepare graduates to design, develop, implement, and improve integrated systems that include people, materials, information, equipment and energy. The curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and experimental practices.

Program Educational Objectives

Industrial engineers analyze, design, and transform complex systems of people, processes, and technology to accomplish organizational goals. To this end, the program educational objectives of the Industrial Engineering program are what we expect our students to attain within three to five years of graduation.

The graduates of the UTA industrial engineering program:

- enter industrial engineering or other professions and make contributions that benefit society, their employers, and themselves.
- broadly apply knowledge of:
 - a. the mathematical, physical and social sciences;
 - b. economic, operational, and engineering analysis, and
 - c. the principles and practices of engineering design.
- analyze, design, and transform the complex systems of people, processes and technology that enable the extended enterprise.
- continue to expand their capabilities through professional development and advanced education.

The following student outcomes prepare graduates to attain the program educational objectives:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multi-disciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively

- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in, life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Students will be prepared for engineering practice through a curriculum culminating in a major design experience based on the knowledge and skills in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. The curriculum will prepare graduates to design, develop, implement, and improve integrated systems that include people, materials, information, equipment and energy. The curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and experimental practices.

ABET Accreditation

Accreditation is an assurance that the professionals that serve us have a solid educational foundation and are capable of leading the way in innovation, emerging technologies, and in anticipating the welfare and safety needs of the public. The program in Industrial Engineering has been accredited since 1967 by the Engineering Accreditation Commission (EAC) of ABET, <http://www.abet.org>.

Admission to Industrial Engineering Program

For admission to the industrial engineering program, all students must meet the requirements for admission to the College of Engineering. A grade point average of 2.25 in science, mathematics, and engineering courses is required for unconditional transfer into the department.

Advancement into Industrial Engineering Professional Program

Requirements for advancement into the Professional Program in Industrial Engineering are in accordance with those in the College of Engineering with the added stipulations that:

- Application to the Professional Program is to be made to the Undergraduate Advisor during the semester following completion of the last pre-professional course.
- No professional Industrial Engineering course may be taken unless the student is admitted into the professional program or obtains the consent of the Undergraduate Advisor. Professional courses may be taken to fill out a schedule in the semester that the last pre-professional course is taken.
- Each student must complete all pre-professional courses stipulated under "Requirements for a Bachelor of Science Degree in Industrial Engineering" with a minimum grade of C in each course and a minimum GPA of 2.25 in each of three categories: (1) overall, (2) required math, science, and engineering courses, and (3) required IE courses.

Most professional Industrial Engineering courses are offered only once a year. Students are urged to plan their course sequence schedules carefully to avoid delaying their graduation

Advising

The advising process is designed to assist students as they make important decisions related to their academic progress at UTA and career goals in general.

Specifically, the purpose of advising is:

- To empower students to clarify and achieve their educational goals by providing timely and accurate information about degree requirements, as well as College and University policies and procedures.
- To provide every student with the opportunity to develop a relationship with a knowledgeable advisor in order to obtain sound academic advising with a degree of continuity.
- To provide students with information about additional services, programs, and support systems available within the College and University as appropriate.

Ultimately, the student is responsible for seeking academic advice, making decisions regarding goals, meeting degree requirements, and enrolling in appropriate courses. The academic advisor is to provide assistance in these decisions. Each student is responsible for understanding and complying with University and College practices and procedures.

During each long semester, the Industrial and Manufacturing Systems Engineering Department conducts pre-enrollment advising weeks. All students must receive this pre-enrollment advising prior to registering for classes.

Oral Communication and Computer Use Competency Requirements

Students majoring in Industrial Engineering may use COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING, to demonstrate oral communication competency. Students majoring in Industrial Engineering are required to take IE 1205 INTRODUCTION TO INDUSTRIAL ENGINEERING AND COMPUTING and IE 3343 METRICS AND MEASUREMENT. A computer competency examination will be administered in IE 1205 INTRODUCTION TO INDUSTRIAL ENGINEERING AND COMPUTING. For transfer students and others

who do not take IE 1205 INTRODUCTION TO INDUSTRIAL ENGINEERING AND COMPUTING, the computer literacy test will be administered in IE 3343 METRICS AND MEASUREMENT.

Academic Honesty

The College of Engineering takes academic honesty and ethical behavior very seriously. Engineers are entrusted with the safety, health, and well being of the public. Students found guilty of academic dishonesty will be punished to the full extent permitted by the rules and regulations of UT Arlington. In particular, any student found guilty of a second offense by the Office of Student Judicial Affairs will be subject to dismissal from the College of Engineering.

Other Provisions

Refer to the College of Engineering section of this catalog for information concerning the following topics: Preparation in High School for Admission to the College of Engineering, Admission to the College of Engineering, Admission to the Professional Program, Counseling, College of Engineering Academic Regulations, Transfer Policies, College of Engineering Probation, Repeating Course Policy, Academic Honesty, and Modern and Classical Languages Requirement.

Requirements for a Bachelor of Science Degree in Industrial Engineering

General Education Courses

HIST 1311	HISTORY OF THE UNITED STATES TO 1865	3
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	3
POLS 2311	GOVERNMENT OF THE UNITED STATES	3
POLS 2312	STATE AND LOCAL GOVERNMENT	3
COMS 2302	PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING	3
Language, Philosophy, or Culture Elective		3
Creative Arts Elective		3

Pre-Professional Courses ¹

ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGR 1300	ENGINEERING PROBLEM SOLVING	3
MATH 1426	CALCULUS I ²	4
MATH 2425	CALCULUS II	4
MATH 2326	CALCULUS III	3
MATH 3319	DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA	3
PHYS 1443	GENERAL TECHNICAL PHYSICS I	4
PHYS 1444	GENERAL TECHNICAL PHYSICS II	4
CHEM 1441 & CHEM 1442	GENERAL CHEMISTRY I and GENERAL CHEMISTRY II	8
Or:		
CHEM 1465	CHEMISTRY FOR ENGINEERS	
& Approved Science Elective		

MAE 1351	INTRODUCTION TO ENGINEERING DESIGN	3
IE 1205	INTRODUCTION TO INDUSTRIAL ENGINEERING AND COMPUTING	2
IE 2305	COMPUTER APPLICATIONS IN INDUSTRIAL ENGINEERING (or approved alternative)	3
IE 2308	ECONOMICS FOR ENGINEERS	3
IE 3301	ENGINEERING PROBABILITY	3
IE 3315	OPERATIONS RESEARCH I	3

Professional Courses

IE 3314	ENGINEERING RESEARCH METHODS	3
IE 3343	METRICS AND MEASUREMENT	3
IE 4302	ENGINEERING ADMINISTRATION AND ORGANIZATION	3
IE 4303	PRODUCTION AND INVENTORY CONTROL	3
IE 4308	QUALITY SYSTEMS	3
IE 4315	OPERATIONS RESEARCH II	3
IE 4318	ENTERPRISE DESIGN	3
IE 4322	ENTERPRISE SIMULATION	3

IE 4325	AUTOMATION AND ROBOTICS I	3
IE 4339	PRODUCT DEVELOPMENT, PRODUCIBILITY AND ENTREPRENEURSHIP	3
IE 4340	ENGINEERING PROJECT MANAGEMENT	3
IE 4343	FACILITIES PLANNING AND DESIGN	3
IE 4344	HUMAN FACTORS ENGINEERING	3
IE 4345	APPLIED KNOWLEDGE ENGINEERING AND DATA ANALYTIC APPLICATIONS	3
IE 4350	INDUSTRIAL ENGINEERING CAPSTONE DESIGN	3
Technical Electives		9
Total Hours		128

¹ All pre-professional courses must be completed before enrolling in professional courses.

² Placement in MATH 1426 CALCULUS I is based on UT Arlington math placement scores.

Note: Total hours will depend upon prior preparation and academic qualifications. Also, students who do not have two units of high school foreign language will be required to take modern and classical languages courses in addition to the previously listed requirements.

The Industrial and Manufacturing Systems Engineering Department conducts academic advising each semester. Each student must make an appointment to meet with the undergraduate advisor.

Recommended Core Curriculum

Industrial Engineering students will satisfy the university core curriculum requirement by completing all General Education courses specified under "Requirements for a Bachelor of Science Degree in Industrial Engineering" along with ENGL 1301, ENGR 1300, MATH 1426, MATH 2425, PHYS 1443, PHYS 1444, and IE 2308, which are within the Pre-Professional Program. The university core curriculum allows each degree plan to designate a component area to satisfy three hours of the core requirement. For the industrial engineering degree plan, the designated component area is Mathematics and ENGR 1300 and is selected to satisfy the requirement. For more information, see <https://nextcatalog.uta.edu/degree/requirements/generalcorerequirements/>.

Suggested Course Sequence

For a suggested course sequence see the departmental website.

Requirements for a Minor in Industrial Engineering

To receive a minor in Industrial Engineering, a student must complete the following courses with a grade of C or better in:

IE 2308	ECONOMICS FOR ENGINEERS	3
IE 3301	ENGINEERING PROBABILITY	3
IE 3315	OPERATIONS RESEARCH I	3
Three upper division IE courses for which the prerequisites are satisfied		9
Total Hours		18

Certificate in Unmanned Vehicle Systems

PROGRAM OBJECTIVE

The Certificate in UVS (Unmanned Vehicle Systems) is offered through the Industrial, Manufacturing, and Systems Engineering Department and will educate undergraduate students in the knowledge and skills required for design, development and operation of UVS including UAS (Unmanned Aircraft Systems), UGS (Unmanned Ground Systems), and UMS (Unmanned Maritime Systems). The certificate program will emphasize the common aspects of UVS such as sensors, actuators, communications, and more importantly, decision-making capabilities (autonomy). This program aims at the dual goal of providing the UVS industry with a knowledgeable, locally available workforce and developing career opportunities for its participants. To this end, the IMSE Certificate in UVS will be awarded concurrently with a BSIE undergraduate degree.

ADMISSION REQUIREMENTS

The certificate is open to all degree-seeking students. Students should see the undergraduate advisor for the Industrial, Manufacturing, and Systems Engineering Department for admission to the program.

ACADEMIC REQUIREMENTS

Students must complete 15 hours of coursework as outlined below that include 6 hours of a core curriculum that is interdisciplinary and forms the basis of a common core in UVS Certificate and 9 hours of discipline specific curriculum. A combined GPA of 3.0 or better must be earned on all courses used to satisfy the certificate requirements.

Required classes		6
IE 4378	INTRODUCTION TO UNMANNED VEHICLES SYSTEMS	
IE 4379	UNMANNED VEHICLE SYSTEM DEVELOPMENT	
9 credit hours from the following list		9
IE 2305	COMPUTER APPLICATIONS IN INDUSTRIAL ENGINEERING	
IE 3314	ENGINEERING RESEARCH METHODS	
IE 4325	AUTOMATION AND ROBOTICS I	
One 3 hour alternate UVS related course may be substituted based on consultation with the undergraduate curriculum advisor in the program.		

Fast Track Program for a Master's Degree in Industrial Engineering

The Fast Track Program enables outstanding UT Arlington senior undergraduate students in Industrial Engineering to satisfy degree requirements leading to a master's degree in Industrial Engineering while completing their undergraduate studies. When senior-level students are within 15 hours of completing their undergraduate degree requirements, they may take up to nine hours of coursework designated by the Industrial Engineering Program to satisfy both undergraduate and graduate degree requirements. In the limiting case, a student completing the maximum allowable hours (9) while in undergraduate status would have to take only 27 additional hours to meet minimum requirements for graduation.

Interested UT Arlington undergraduate Industrial Engineering students should apply to the Industrial Engineering Program when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UT Arlington, achieving an overall GPA of 3.0 or better in all work done at UT Arlington and in the last 30 hours. Additionally, they must have completed nine hours of specified foundation courses with a minimum GPA of 3.3 in those courses. Contact the Undergraduate Advisor or Graduate Advisor in Industrial Engineering for more information about the program.

BS to PhD Program

The BS to PhD track in Industrial Engineering requires 30 credit hours including 18 hours of diagnostic coursework, a three credit hour elective and nine credit hours of research coursework. This is in addition to the PhD requirements.

Materials Science and Engineering

The Materials Science and Engineering Department is the oldest, largest and most diversified program in North Texas. It is a university-wide, highly-interdisciplinary graduate program with eight core materials faculty and approximately 25 affiliated faculty spanning from physics and chemistry to electrical, mechanical, aerospace, civil and bio engineering. It offers minor, masters and doctoral degree programs in Materials Science and Engineering. It has courses in nanoscale materials and nanotechnology, magnetic, optical and energy materials, bio/nano materials and surface engineering and thin film technology. The department's growth is aided by high levels of research funding from NSF, DOE, ONR, NASA, DOD and other federal, industrial and state sources in the areas of micro/nano electronic devices, self-assembled nanomaterials, multifunctional, nanocomposite thin films, bio/nanomagnets, optoelectronics, solar cells and materials for clean energy, advanced lubricants, and coatings.

Undergraduate Degree

- Minor in Materials Science and Engineering (p. 312)
- Certificate in Nanotechnology (p. 313)

Graduate Degrees

- Materials Science and Engineering, M.Engr. (p. 308)
- Materials Science and Engineering, M.S. (p. 308)
- Materials Science and Engineering, B.S. to Ph.D. (p. 310)
- Materials Science and Engineering, Ph.D. (p. 310)
- Materials Science and Engineering - Physics Fast Track (p. 308)

Materials Science and Engineering - Graduate Programs

Objective

The graduate program in materials science and engineering is designed to provide students with a fundamental understanding of phenomena occurring in materials and their associated chemical, electrical, mechanical, and physical properties. The master's program prepares students for professional careers in materials science and engineering or for additional studies at the doctoral level.

Candidates for a master's or doctoral degree may elect programs emphasizing metals, polymers, ceramics, composite materials, or electronic materials, as well as a number of other areas. Although the program is administered through the College of Engineering, it is broadly interdisciplinary, actively involving faculty in both the College of Science and the College of Engineering. In addition to materials science and engineering courses, applicable courses are in the disciplines of aerospace engineering, biomedical engineering, chemistry, civil engineering, computer science engineering, electrical engineering, mechanical engineering, and physics.

Continuation

The Materials Science and Engineering Graduate Program, in fulfillment of its responsibility to graduate highly qualified professional engineers and scientists, has established certain policies and procedures. In addition to the requirements of the Graduate School listed elsewhere in this catalog, to continue in the program each materials science and engineering graduate student must:

1. Maintain at least a B (3.0) overall GPA in all coursework, and
2. Demonstrate suitability for professional practice.

At such time as questions are raised by materials science and engineering graduate faculty regarding either of the above, the student will be notified and will be given the opportunity to respond to the Committee on Graduate Studies for Materials Science and Engineering. The Committee on Graduate Studies will review the student's performance and make a recommendation concerning the student's eligibility to continue in the program. Appeal of a decision on continuation may be made through normal procedures outlined in the section of this catalog entitled "Grievances Other than Grades."

Admission Requirements

Applicants for the master's degree must have either a baccalaureate or master's degree in engineering or science. Applicants who have completed a bachelor's degree and wish to pursue a doctoral degree without completing a master's degree may apply for admission into the B.S. to Ph.D. Track (p. 310). All applicants must meet the general requirements of the University as stated in the Graduate Admissions (p. 23) section of the catalog. Applicants not meeting all criteria may be admitted on a provisional or probationary basis.

For applicants with no prior training in engineering or with insufficient undergraduate materials coursework, the same minimum criteria will apply. Additionally, their records will be reviewed in relation to their materials backgrounds, and probationary status with specific remedial work required may be a basis for acceptance of such applicants.

The UT Arlington Materials Science and Engineering Program uses the following guidelines in the admission review process:

UNCONDITIONAL ADMISSION

Unconditional admission into the Materials Science and Engineering Program requires the submission of items 1 through 5 below for each degree program. A typical successful applicant will have met the following admission requirements:

1. Minimum undergraduate GPA of 3.0 in the last 60 hours of undergraduate work in an appropriate engineering or science discipline. (For some international applicants where GPA calculation based on a 4.0 scale is not performed, a minimum performance level of 70 percentile is expected. This minimum expectation may be higher for some countries, where less stringent grading criteria are used.) Performance in core materials-related courses is of particular importance.
2. A GRE score of at least 400 (verbal) and 700 (quantitative). For those applicants whose GRE verbal score falls below 400, high TOEFL scores may be considered to offset the GRE verbal score.
3. Three favorable, veracious recommendations, via the university's recommendation form or via recommendation letter.
4. A Statement of Purpose detailing the applicant's background, education, professional goals, technical interests, and research interests.
5. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: paper-based TOEFL score of 550 with a TWE of 3.5, computer-based TOEFL score of 223, TSE-A score of 45, IELTS score of 6.5, or TOEFL iBT total score of 84 with sectional scores of 22 for writing, 21 for speaking, 20 for reading, and 20 for listening.

PROBATIONARY ADMISSION

Probationary admission into the Materials Science and Engineering Program may be permitted under the following conditions for each degree program:

1. If an applicant meets any two of the items 1, 2, and 3 above for the master's program.
2. A Statement of Purpose detailing the applicant's background, education, professional goals, technical interests, and research interests.

3. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: paper-based TOEFL score of 550 with a TWE of 3.5, computer-based TOEFL score of 223, TSE-A score of 45, IELTS score of 6.5, or TOEFL iBT total score of 84 with sectional scores of 22 for writing, 21 for speaking, 20 for reading, and 20 for listening.

PROVISIONAL ADMISSION

An applicant who is unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

DEFERRED

If an applicant does not present adequate evidence of meeting admission requirements, the admission decision may be deferred until admission records are complete or the requirements are met.

DENIAL OF ADMISSION

A candidate may be denied admission if he/she has less than satisfactory performance in two out of three of the first three admission criteria.

WAIVER OF GRADUATE RECORD EXAM

A waiver of the Graduate record Exam may be considered for a UT Arlington graduate who graduated within the past three years and has completed an engineering or science degree closely related to materials science and engineering. The student's GPA must equal or exceed 3.0 in each of two calculations:

1. in the last 60 hours of study and
2. in all undergraduate coursework completed at UT Arlington.

The GRE waiver may be extended to include non-UT Arlington candidates that have undergraduate degrees (with GPA of 3.3 or above) from U.S. universities with an ABET accredited engineering program or other select U.S. universities subject to graduate advisor's approval. The waiver of the GRE applies only to applicants for the master's degree programs. Interested applicants should contact the Materials Science and Engineering Graduate Advisor.

ELIGIBILITY FOR SCHOLARSHIPS/FELLOWSHIPS

Students that are admitted will be eligible for available scholarship or fellowship support. Award of scholarships or fellowships will be based on the student's relative standing with respect to other qualified applicants.

Master's Degree Requirements

The **Master of Science** degree options available are: thesis option and thesis substitute option.

The thesis option is a research-oriented degree in which completion of a thesis is mandatory. The program consists of a minimum of 24 credit hours of coursework (a minimum of 18 credit hours in MSE courses) and an acceptable thesis (minimum of six credit hours).

The thesis-substitute option must take a minimum of 33 credit hours as specified below:

- 27 credit hours of coursework (a minimum of 18 credit hours in MSE courses);
- 1 credit hour MSE 5193 SEMINAR IN MATERIALS SCIENCE AND ENGINEERING;
- 3 credit hour MSE 5394 Master's Research Project in Materials Science and Engineering I;
- 2 credit hour Master's Comprehensive Examination MSE 5292 MASTER'S COMPREHENSIVE EXAMINATION at the semester in which the student expects to graduate.

Master of Engineering in Materials Science and Engineering:

The Master of Engineering degree is an engineering practice-oriented program requiring a minimum of 36 credit hours (A minimum of 24 credit hours of coursework must be in MSE courses.). A maximum of six hours may be a special project (MSE 5394 Master's Research Project in Materials Science and Engineering I and MSE 5395 Master's Research Project in Materials Science and Engineering II).

MSE 5300 INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING: This course must be taken by any students whose academic backgrounds are different from Materials Science and Engineering. An exemption may be granted by the Graduate Advisor if it is determined that the student has a solid foundation for Materials Science and Engineering. The credit for MSE 5300 INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING will not be counted towards the total credits required for graduation. However, the grade of MSE 5300 INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING will be counted in calculating the GPA.

The M.S. and M. Engr. degree programs require successful completion of the following three of four core courses:

MSE 5304	ANALYSIS OF MATERIALS	3
MSE 5305	SOLID STATE PHYSICS AND THERMODYNAMICS OF MATERIALS	3
MSE 5312	MECHANICAL BEHAVIOR OF MATERIALS	3
MSE 5321	PHASE TRANSFORMATIONS OF MATERIALS	3

Admission Requirements

Applicants for the master's or doctoral degrees must have either a baccalaureate or master's degree in engineering or science. Applicants who have completed a bachelor's degree and wish to pursue a doctoral degree without completing a master's degree may apply for admission into the B.S. to Ph.D. Track. The minimum admission requirements to this highly competitive track are the same as those for all doctoral applicants. Doctoral candidates shall also demonstrate through previous academic preparation the potential to carry out independent research in materials science and engineering. All applicants must meet the general requirements of the University as stated in the Graduate Admissions (p. 23) section of this catalog. Applicants not meeting all criteria may be admitted on a provisional or probationary basis.

For applicants with no prior training in engineering or with insufficient undergraduate materials coursework, the same minimum criteria will apply. Additionally, their records will be reviewed in relation to their materials backgrounds, and probationary status with specific remedial work required may be a basis for acceptance of such applicants.

The UT Arlington Materials Science and Engineering Program uses the following guidelines in the admission review process:

UNCONDITIONAL ADMISSION

Unconditional admission into the Materials Science and Engineering Program requires the submission of items 1 through 5 below for each degree program. A typical successful applicant will have met the following admission requirements:

1. Minimum undergraduate GPA of 3.3 in the last 60 hours of undergraduate work in an appropriate engineering or science discipline. (For some international applicants where GPA calculation based on a 4.0 scale is not performed, a minimum performance level of 75 percentile is expected. This minimum expectation may be higher for some countries, where less stringent grading criteria are used.) Performance in core materials-related courses is of particular importance.
2. A GRE score of at least 425 (verbal) and 750 (quantitative). For those applicants whose GRE verbal score falls below 425, high TOEFL scores may be considered to offset the GRE verbal score.
3. Three favorable, veracious recommendations, via the university's recommendation form or via recommendation letter.
4. A Statement of Purpose detailing the applicant's background, education, professional goals, technical interests, and research interests.
5. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: paper-based TOEFL score of 550 with a TWE of 3.5, computer-based TOEFL score of 223, TSE-A score of 45, IELTS score of 6.5, or TOEFL iBT total score of 84 with sectional scores of 22 for writing, 21 for speaking, 20 for reading, and 20 for listening.

PROBATIONARY ADMISSION

Probationary admission into the Materials Science and Engineering Program may be permitted under the following conditions for each degree program:

1. If an applicant meets any two of the items 1, 2, and 3 above for the doctoral program.
2. A Statement of Purpose detailing the applicant's background, education, professional goals, technical interests, and research interests.
3. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: paper-based TOEFL score of 550 with a TWE of 3.5, computer-based TOEFL score of 223, TSE-A score of 45, IELTS score of 6.5, or TOEFL iBT total score of 84 with sectional scores of 22 for writing, 21 for speaking, 20 for reading, and 20 for listening.

PROVISIONAL ADMISSION

An applicant who is unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

DEFERRED

If an applicant does not present adequate evidence of meeting admission requirements, the admission decision may be deferred until admission records are complete or the requirements are met.

DENIAL OF ADMISSION

A candidate may be denied admission if he/she has less than satisfactory performance in two out of three of the first three admission criteria.

WAIVER OF GRADUATE RECORD EXAM

A waiver of the Graduate record Exam may be considered for a UT Arlington graduate who graduated within the past three years and has completed an engineering or science degree closely related to materials science and engineering. The student's GPA must equal or exceed 3.0 in each of two calculations:

1. in the last 60 hours of study and
2. in all undergraduate coursework completed at UT Arlington.

The GRE waiver may be extended to include non-UT Arlington candidates that have undergraduate degrees (with GPA of 3.3 or above) from U.S. universities with an ABET accredited engineering program or other select U.S. universities subject to graduate advisor's approval. The waiver of the GRE applies only to applicants for the master's degree programs. Interested applicants should contact the Materials Science and Engineering Graduate Advisor.

ELIGIBILITY FOR SCHOLARSHIPS/FELLOWSHIPS

Students that are admitted will be eligible for available scholarship or fellowship support. Award of scholarships or fellowships will be based on the student's relative standing with respect to other qualified applicants.

Doctoral Degree Requirements

B.S. TO PH.D. TRACK

In addition to the requirements listed below for the Ph.D. degree, a B.S.-Ph.D. Track student will be required to enroll in at least three hours of research each semester during the student's first two years, receiving a pass/fail grade (no R grade) in these hours. A B.S.-Ph.D. student must have a faculty research (dissertation) advisor prior to the start of the student's second full semester. A B.S.-Ph.D. student must take the Ph.D. diagnostic examinations prior to the start of the student's third full semester.

DOCTOR OF PHILOSOPHY

The Ph.D. degree program involves an interdisciplinary and multidisciplinary approach which requires students to complete a set of Materials Science and Engineering core courses augmented by elective offerings in aerospace engineering, biomedical engineering, chemistry, civil engineering, electrical engineering, materials science, mechanical engineering and physics. The degree is a research degree which requires the candidate successfully to carry out independent research in an area acceptable to the Committee on Graduate Studies for Materials Science and Engineering. A student's research is directed by a faculty member from any of the departments or programs participating in the Materials Science and Engineering Program.

The Ph.D. degree program requires successful completion of the following curriculum components:

1. A minimum of 24 semester hours of graduate coursework is expected for students entering with an appropriate master's degree or, for highly qualified students, a minimum of 42 semester hours of graduate coursework is expected for student's entering with a bachelor's degree, as approved by the Committee on Graduate Studies for Materials Science and Engineering. The 42 semester hours may include MSE 5392 Research Project in Materials Science and Engineering I and MSE 5393 Research Project in Materials Science and Engineering II Additional coursework may be required by the student's doctoral dissertation committee.

2. Four core courses or their equivalent are required for all doctoral students:

MSE 5304	ANALYSIS OF MATERIALS	3
MSE 5305	SOLID STATE PHYSICS AND THERMODYNAMICS OF MATERIALS	3
MSE 5312	MECHANICAL BEHAVIOR OF MATERIALS	3
MSE 5321	PHASE TRANSFORMATIONS OF MATERIALS	3
Total Hours		12

3. One of these two courses is required for all doctoral students:

MSE 5345	CERAMIC MATERIALS	3
MSE 5347	POLYMER MATERIALS SCIENCE	3
Total Hours		6

4. Three of the following supplemental elective courses must be taken by all doctoral students, as approved by the Committee on Graduate Studies for Materials Science and Engineering. Courses from other disciplines may also be taken, which requires permissions from the Graduate Advisor and student's Supervising Advisor.

MSE 5315	FATIGUE OF ENGINEERING MATERIALS	3
MSE 5316	TRIBOLOGY AND LUBRICATION	3
MSE 5320	NANOSCALE MATERIALS	3

MSE 5330	CORROSION	3
MSE 5333	MAGNETIC PROPERTIES OF MATERIALS	3
MSE 5336	ELECTRICAL PROPERTIES OF MATERIALS	3
MSE 5341	TRANSMISSION ELECTRON MICROSCOPY IN MATERIALS SCIENCE	3
MSE 5345	CERAMIC MATERIALS	3
MSE 5347	POLYMER MATERIALS SCIENCE	3
MSE 5351	CURRENT TOPICS IN NANOTECHNOLOGY	3
MSE 5352	SOLAR ENERGY MATERIALS AND DEVICES	3
MSE 5353	FUNDAMENTALS OF SUSTAINABLE ENERGY	3
MSE 5354	SOLID STATE ELECTRONIC DEVICES	3
MSE 5355	Materials for Energy	3
Total Hours		42

- Elective courses will be taken by all doctoral students which will allow specialization within a particular academic discipline. Graduate courses in chemistry, physics and engineering will be selected for this purpose in consultation with the student's research advisor, subject to approval by the Committee on Graduate Studies for Materials Science and Engineering.
- MSE 5300 INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING: This course must be taken by any students whose academic backgrounds are different from Materials Science and Engineering. An exemption may be granted by the Graduate Advisor if it is determined that the student has a solid foundation for Materials Science and Engineering. The credit for MSE 5300 INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING will not be counted towards the total credits required for graduation. However, the grade of MSE 5300 INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING will be counted in calculating the GPA.

After completion of the first year's coursework (i.e., core courses), students must satisfactorily complete diagnostic examinations which may be written or oral or written and oral with a supplemental interview with faculty members, as determined by the Committee on Graduate Studies in Materials Science and Engineering.

Upon completion of all or nearly all of the coursework requirements and after having demonstrated research ability through partial completion of dissertation research, a student must satisfactorily complete a comprehensive examination.

The dissertation research will be formulated in conjunction with the student's faculty research advisor who may be associated with any of the following academic disciplines participating in the Materials Science and Engineering Program: aerospace engineering, biomedical engineering, chemistry, civil engineering, electrical engineering, materials science, mechanical engineering, and physics. The dissertation research represents the culmination of the student's academic efforts and is expected to demonstrate original and independent research activity and be a significant contribution to knowledge in the field.

Materials Science and Engineering - Undergraduate Programs

Overview

The interdisciplinary field of materials science and engineering has become critical to many emerging areas of science and advanced technology. As a result, there is a growing demand for engineers and scientists with education and training in materials science and engineering. The Materials Science and Engineering Department provides students with such education and training through its graduate master's and doctoral degree programs. Additionally, the department offers undergraduate courses for use as electives in science and engineering, in Fast Track Programs in Materials Science and Engineering, in minor programs in this discipline and in Certificate in Nanotechnology.

Minor Program in Materials Science and Engineering

OUTCOMES AND GOALS

The goal of the minor program in Materials Science and Engineering is to give students a foundation in the governing principles of materials science which complements their major field of study, as well as an understanding of the latest trends. As such, the program is flexible in coursework requirements and can be tailored to each student's interest.

ADMISSION TO THE MINOR PROGRAM IN MATERIALS SCIENCE AND ENGINEERING

Admission to the minor program in Materials Science and Engineering requires GPA of 2.0 or higher and approval by the Materials Science and Engineering Department undergraduate advisor as well as the student's home department. Information on admissions and course requirements can be obtained from the Materials Science and Engineering undergraduate program advisor. The minor will be conferred at the same time the degree is conferred and the degree and minor will be recorded on the student's transcript. The minor will not be on the diploma. Minors may not be conferred retroactively upon students who have graduated.

SCHOLARSHIPS AND RESEARCH EXPERIENCE

Scholarships may be available for students who meet the academic requirements set by the Materials Science and Engineering minor program. Minor program students may also work as undergraduate research assistants for Materials Science and Engineering faculty.

REQUIREMENTS FOR A MINOR IN MATERIALS SCIENCE AND ENGINEERING

To receive a minor in Materials Science and Engineering, a student must complete 18 hours of the following courses with a grade of C or better in each course. Courses must be approved in advance by the MSE undergraduate program advisor. A student must complete:

MSE 3300	MATERIALS SCIENCE (MAE 3324 for MAE majors)	3
MSE 3324	STRUCTURE & MECHANICAL BEHAVIOR OF MATERIALS (MAE 3324 for MAE majors)	3
MSE 4320	NANOSCALE MATERIALS	3
Select three of the following courses for which the prerequisites are satisfied:		9
MSE 4310	POLYMER MATERIALS SCIENCE	
MSE 4315	INTRODUCTION TO COMPOSITES (MAE 4315 for MAE majors)	
MSE 4336	ADVANCED MECHANICAL BEHAVIOR OF MATERIALS (MAE 4336 for MAE majors)	
MSE 4337	FATIGUE OF ENGINEERING MATERIALS (MAE 4390 for MAE majors)	
MSE 4338	FAILURE ANALYSIS (MAE 4338 for MAE majors)	
MSE 4339	FRACTURE MECHANICS (MAE 4339 for MAE majors)	
MSE 4390	SPECIAL TOPICS IN MATERIALS SCIENCE & ENGINEERING (e.g., electrical, optical and magnetic properties of materials)	
CHEM 3307	INTRODUCTION TO POLYMER CHEMISTRY	
CHEM 3315	INTRODUCTION TO BIOPHYSICAL CHEMISTRY	
CHEM 3321	PHYSICAL CHEMISTRY I	
CHEM 4318	INORGANIC CHEMISTRY	
CHEM 4346	ADVANCED SYNTHETIC METHODS	
MAE 3344	INTRODUCTION TO MANUFACTURING ENGINEERING	
PHYS 3313	INTRODUCTION TO MODERN PHYSICS	
PHYS 3455	ELECTRONICS	
PHYS 4324	ADVANCED ELECTRICITY AND MAGNETISM	
PHYS 4325	SOLID STATE PHYSICS	
PHYS 4326	INTRODUCTION TO QUANTUM MECHANICS	

Total Hours

18

Certificate in Nanotechnology

Program Objective

The objective of the Certificate in Nanotechnology is to provide the fundamentals, principles and applications of the emerging and exciting field of nanotechnology in the areas of energy, environment, security and human health, with weighted emphasis on the development of new materials and their applications. This program aims at the dual goal of exploring the potential of nanotechnology in addressing current global technological needs while acting as a resource for developing and educating the future workforce. Course material can be available over the internet upon request to accommodate participants from industry who do not have regular access to campus.

Admission Requirements

The certificate is open to all current science and engineering degree-seeking students and holders of a bachelor's degree in science or engineering. For those who have not completed a bachelor's degree, the Certificate in Nanotechnology will be awarded concurrently with an undergraduate degree. The completed certificate program of study will be forwarded to the Office of Admissions, Records and Registration for verification and notation on the student's transcript. A formal certificate will be prepared for the student by the university and recognition will be given at the graduation ceremonies.

Academic Requirements

Students must complete 15 hours of coursework as outlined below. Transferred course credit cannot be used for the certificate. Prerequisites must be met for all courses and all courses used to satisfy the certificate requirements must be passed with a minimum grade of C and their combined GPA must be at least 3.0. Consultation with the Materials Science and Engineering (MSE) advisor is encouraged to check the course availability and any changes in the course requirements.

Required Courses (6 Hours):

MSE 3300 MATERIALS SCIENCE

MSE 4320 NANOSCALE MATERIALS

Three elective courses are required from a single track below:

Micro/Nano Electronic Track

MSE 4354 SOLID STATE ELECTRONIC DEVICES

MSE 4359 FAILURE ANALYSIS AND RELIABILITY ENGINEERING

EE 4320 DIGITAL VLSI DESIGN

MAE 3309 THERMAL ENGINEERING

MAE 4301 SPECIAL TOPICS IN MECHANICAL AND AEROSPACE ENGINEERING

3 hour Undergraduate Research Course: research course under listed faculty, with appropriate course number, and research topic selected in agreement with the faculty and MSE advisor. The letter grade will be given after evaluation of student's performance by evaluation committee.

Nanobio Track

MSE 4343 NANOBIO TECHNOLOGY

BE 3372 DRUG DELIVERY

BE 4373 DRUG DELIVERY LABORATORY

BE 4333 NANOBIO MATERIALS

BE 4300 SPECIAL TOPICS IN BIOENGINEERING (with MSE advisor approval)

3 hour Undergraduate Research Course: research course under listed faculty, with appropriate course number, and research topic selected in agreement with the faculty and MSE advisor. The letter grade will be given after evaluation of student's performance by evaluation committee.

Energy Materials Track

MSE 4353 FUNDAMENTALS OF SUSTAINABLE ENERGY

MSE 4355 MATERIALS FOR ENERGY

EE 3302 FUNDAMENTALS OF POWER SYSTEMS

EE 4328 CURRENT TOPICS IN ELECTRICAL ENGINEERING

MAE 4301 SPECIAL TOPICS IN MECHANICAL AND AEROSPACE ENGINEERING (with MSE advisor approval)

3 hour Undergraduate Research Course: research course under listed faculty, with appropriate course number, and research topic selected in agreement with the faculty and MSE advisor. The letter grade will be given after evaluation of student's performance by evaluation committee.

Faculty for Undergraduate Research Course

Wei Chen (Physics, nanomaterials for energy conversion)

Hyeok Choi (CE, Environmental Nanotechnology)

Yaowu Hao (MSE, nanostructured bio-sensors)

Yi Hong (BE, NanoBiomaterials)

Choong-Un Kim (MSE, micro/nano electronics)

Seong-Jin Koh (MSE, nanoelectronics and bio-sensors)

Fuqiang Liu (MSE, energy storage/conversion materials)

Ping Liu (Physics, nanomagnetism)

Cheng Luo (MAE, NEMS)

Robert Magnusson (EE, NanoPhotonics)

Stathis Meletis (MSE, thin films and nanostructured devices)

Hyejin Moon (MAE, Nanothermal)

Kytai Nguyen (BE, Nanobiomaterials)

Donghyun Shin (MAE, Energy Storage material)

Kyungsuk Yum (MSE, nanomaterials for bio applications)

Weidong Zhou (EE, NanoPhotonics)

Mechanical and Aerospace Engineering

The Department of Mechanical and Aerospace Engineering (MAE) offers baccalaureate, masters and doctoral degree programs in Mechanical Engineering and Aerospace Engineering, and Certificate Programs in Automotive Engineering, Electronic Packaging, and Unmanned Vehicle Systems. The Mechanical and Aerospace Engineering programs have been accredited since 1967 and 1968, respectively, by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. Major focus areas within the Department include Design, Manufacturing and Multidisciplinary Optimization; Dynamic Systems and Controls; Fluid Mechanics, Aerodynamics and Propulsion; Structural Mechanics and Structural Optimization; and Thermal Sciences and Energy Systems.

Undergraduate (p. 330)

- Bachelor of Science in Aerospace Engineering
- Bachelor of Science in Mechanical Engineering
- Double Major in Mechanical and Aerospace Engineering
- Minor in Aerospace Engineering
- Minor in Mechanical Engineering
- Undergraduate Certificate in Automotive Engineering
- Undergraduate Certificate in Unmanned Vehicle Systems

Graduate (p. 315)

- Aerospace Engineering, M.Engr.
- Aerospace Engineering, M.S.
- Mechanical Engineering, M.Engr.
- Mechanical Engineering, M.S.
- Aerospace Engineering, B.S. to Ph.D.
- Aerospace Engineering, Ph.D.
- Mechanical Engineering, B.S. to Ph.D.
- Mechanical Engineering, Ph.D.
- Graduate Certificate in Automotive Engineering
- Graduate Certificate in Electronic Packaging

Mechanical and Aerospace Engineering - Graduate Programs

Objective - Aerospace Engineering

The overall objective of the graduate program in Aerospace Engineering is to develop in a student the ability to define a technical problem, establish an appropriate mathematical or experimental model based on a firm understanding of the physical nature of the problem, analyze the problem by theoretical, numerical, or experimental techniques, and evaluate the results. Although this ability is developed in the context of aerospace problems, it is applicable to the engineering of any physical system. The program is designed for a student with any of the following specific objectives:

1. A sound foundation in advanced mathematics, science, and engineering which will equip the student well for research and development work or for further advanced study toward a doctoral degree in engineering.

2. A program of advanced study which allows specialization in one of the following areas:
 - Fluid dynamics, aerodynamics and propulsion (theoretical and applied aerodynamics, gas dynamics, viscous fluid mechanics, turbulence, computational and experimental fluid dynamics, bio-fluidics, hypersonic flow theory, high-temperature gas dynamics, V/STOL and rotorcraft aerodynamics, air-breathing and rocket propulsion);
 - Structural mechanics and structures (solid mechanics, aerospace structures, structural dynamics, composite structures and material characterization, damage tolerance and durability, smart structures, structure optimization, sensor technology, high-temperature structures and materials, aeroelasticity);
 - Flight mechanics and controls (atmospheric and space flight mechanics, orbital mechanics, guidance, navigation and control);
 - Vehicle design (conceptual aircraft design, atmospheric flight vehicle design, spacecraft design, computer-aided engineering).
3. A balanced but non-specialized program of advanced study in aerodynamics, astronautics, flight dynamics, structural analysis, propulsion, and fluid mechanics, with emphasis on experimental techniques and modern mathematical analysis.

Objective - Mechanical Engineering

The graduate program provides opportunities for professional development in such forms as: instructional courses to enhance technical competence in areas of mechanical engineering practice; training through a variety of experiences in design, development, research, experimentation, and/or analysis in joint efforts with faculty and peers; specialized courses of study required for entry into career fields allied to the mechanical engineering discipline; guided individual study under faculty supervision; and supportive coursework for programs leading to careers that require interdisciplinary competence.

A student with aid from a faculty advisor plans a program that will be consistent with his or her technical interests and the available facilities and course offerings. Typically, programs are classified as:

- Thermal Science
- Fluid Science
- Mechanical Design and Manufacturing
- Solid Mechanics and Structures
- Controls and Systems

Admission Requirements for Master's Program in Aerospace Engineering

Applicants for the master's degrees must have a baccalaureate degree in engineering or science. Applicants who have completed a bachelor's degree and wish to pursue a doctoral degree without completing a master's degree may apply for admission in the Bachelor of Science (B.S.) to Ph.D. Track. The minimum admission requirements to this highly competitive track are the same as those for all doctoral applicants. All applicants must meet the general requirements of the Graduate School as stated in the section of this catalog entitled "Admission Requirements and Procedures". Applicants not meeting all criteria may be admitted on a provisional or probationary basis.

For applicants with no prior training in engineering or with insufficient undergraduate Aerospace Engineering coursework, the same minimum criteria will apply. Additionally, their records will be reviewed in relation to their mathematics, engineering, and science backgrounds, and probationary status may be a basis for acceptance of such applicants, with specific undergraduate remedial work required.

The UT Arlington Aerospace Engineering Program uses the following guidelines in the admission review process:

UNCONDITIONAL ADMISSION FOR MASTER'S PROGRAM IN AEROSPACE ENGINEERING

Unconditional admission into the Aerospace Engineering Program requires the submission of items 1 through 5 below for each degree program. To be unconditionally admitted, an applicant must at least meet conditions 1, 2, 3, and 4.

1. Minimum undergraduate GPA of 3.0 in the last 60 hours of undergraduate work in an appropriate engineering or science discipline. (For some international applicants where GPA calculations based on a 4.0 system are not performed, a minimum performance level of 65 percentile is expected. This minimum expectation may be higher for some countries, where less stringent grading criteria are used.) Performance in core Aerospace Engineering courses is of particular importance.
2. A GRE score of at least 146 (verbal) and 155 (quantitative). For those applicants whose GRE verbal score falls below 146, high TOEFL scores may be considered to offset the GRE verbal score.
3. Three favorable recommendations, via the university's recommendation form or via recommendation letter.
4. A Statement of Purpose detailing the applicant's background, education, professional goals, technical interests, and research interests.
5. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: paper-based TOEFL-PBT score of 550 with a TWE of 3.5, IELTS score of 6.5, or TOEFL-iBT total score of 84 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 20 for the listening section.

PROBATIONARY ADMISSION FOR MASTER'S PROGRAM IN AEROSPACE ENGINEERING

Probationary admission into the Aerospace Engineering Program may be permitted under the following conditions for each degree program:

1. If the applicant meets any three of the items 1, 2, 3, and 4 above for the master's program.
2. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: paper-based TOEFL score of 550 with a TWE of 3.5, computer-based TOEFL score of 223, TSE-A score of 45, IELTS score of 6.5, or TOEFL iBT total score of 84 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 20 for the listening section.

PROVISIONAL ADMISSION FOR MASTER'S PROGRAM IN AEROSPACE ENGINEERING

An applicant who is unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

DEFERRED FOR MASTER'S PROGRAM IN AEROSPACE ENGINEERING

If an applicant does not present adequate evidence of meeting admission requirements, the admission decision may be deferred until admission records are complete or the requirements are met.

DENIAL OF ADMISSION FOR MASTER'S PROGRAM IN AEROSPACE ENGINEERING

A candidate may be denied admission if he/she has less than satisfactory performance in two out of the first three admission criteria.

CRITERIA FOR AWARD OF FELLOWSHIPS AND ASSISTANTSHIPS

Applicants who demonstrate skills, experience or interests that meet the needs of the AE Graduate Program will be considered for fellowships or assistantships.

FAST TRACK PROGRAM FOR MASTER'S DEGREE IN AEROSPACE ENGINEERING

The Fast Track Program enables outstanding UT Arlington senior undergraduate students in Aerospace Engineering to satisfy degree requirements leading to a master's degree in Aerospace Engineering while completing their undergraduate studies. When senior-level students are within 15 hours of completing their undergraduate degree requirements, they may take up to 9 hours of graduate level coursework designated by the Aerospace Engineering Program to satisfy both undergraduate and graduate degree requirements. In the limiting case, a student completing the maximum allowable hours (9) while in undergraduate status would have to take only 24 additional hours to meet minimum requirements for graduation in a 33 hour thesis master's degree program (M.S.) or 28 additional hours for a 37 hour non-thesis master's degree program (M. Engr.)

Interested UT Arlington undergraduate Aerospace Engineering students should apply to the Aerospace Engineering Program when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UT Arlington, achieving a GPA of at least 3.0 in those courses, and have an overall GPA of 3.0 or better in all college courses. Additionally, they must have completed at least 16 hours of specified undergraduate foundation courses with a minimum GPA of 3.3 in those courses. Program details are provided in the UT Arlington Undergraduate Catalog. Contact the Undergraduate Advisor or Graduate Advisor in Aerospace Engineering for more information about the program.

Master's Degree Requirements

ALL GRADUATE DEGREES

- All entering students must be proficient in mathematics, engineering analysis, and computer programming. (*Students not meeting these requirements may be admitted on a probationary basis and given a plan of remedial undergraduate coursework*).
- No graduate credit will be granted for courses that are required in the undergraduate Aerospace Engineering curriculum.
- The Master of Science and Doctoral candidates in Aerospace Engineering shall enroll in AE 5101 GRADUATE SEMINAR a minimum of three times (see course description).

All candidates are required to select a Supervising Professor and obtain an approved program of work in the second full semester or after 12 hours are completed.

MASTER OF SCIENCE OR MASTER OF ENGINEERING DEGREES

The Department of Mechanical and Aerospace Engineering offers both the Master of Science and the Master of Engineering degrees in Aerospace Engineering.

CORE AREAS IN THE AEROSPACE ENGINEERING PROGRAM

The four core areas in the Aerospace Engineering program along with the recommended courses in each core area are listed below:

1. Fluid Mechanics, Aerodynamics and Propulsion

AE 5313

FLUID DYNAMICS

AE 5326	AIR-BREATHING PROPULSION	3
AE 5342	GAS DYNAMICS	3
2. Solid Mechanics and Structures		
AE 5310	FINITE ELEMENT METHODS	3
AE 5311	STRUCTURAL DYNAMICS	3
AE 5339	STRUCTURAL ASPECTS OF DESIGN	3
3. Flight Mechanics and Controls		
AE 5302	ADVANCED FLIGHT MECHANICS	3
AE 5362	GUIDANCE, NAVIGATION, AND CONTROL OF AEROSPACE VEHICLES	3
4. Flight Vehicle Design		
AE 5368	FLIGHT VEHICLE SYNTHESIS AND SYSTEMS ENGINEERING	3

Requirements for the Master of Science Degree in Aerospace Engineering

The Master of Science (M.S.) Degree in Aerospace Engineering is a research-oriented program in which completion of a thesis is mandatory. A minimum of 33 credit hours is required as follows:

Two Core Courses:	6
One course from either core areas one or two	
One course from another of the four core areas	
Two Math or Engineering Analysis courses	6
Four courses related to a specialty in Aerospace Engineering. At least nine-credit hours of coursework should be from Aerospace Engineering program.	12
Thesis:	6
The student must enroll in AE 5398 or AE 5197, AE 5297, or AE 5397 every semester in which the student is actively involved in thesis preparation or research, respectively, except that the student must enroll in AE 5698 in the semester of graduation.	
Graduate Seminar (minimum of three credit hours):	3
AE 5101 GRADUATE SEMINAR	
Total Hours	33

Requirements for the Masters of Engineering Degree in Aerospace Engineering

The Master of Engineering (M.Engr.) Degree in Aerospace Engineering is an engineering practice-oriented program. A minimum of 37 credit hours is required as follows:

Three Core Courses:	9
One course each from core areas one and two	
A third course from either areas three or four	
Two Math/Engineering Analysis courses	6
Seven elective courses relating to the student's areas of interest. At least 15-credit hours of coursework should be from Aerospace Engineering program.	21
The elective courses may include no more than six hours of special project courses.	
AE 5191 ADVANCED STUDIES IN AEROSPACE ENGINEERING	
AE 5291 ADVANCED STUDIES IN AEROSPACE ENGINEERING	
AE 5391 ADVANCED STUDIES IN AEROSPACE ENGINEERING	
AE 5101 GRADUATE SEMINAR (minimum one credit hour)	1
Total Hours	37

For both the M.S. and the M. Engr. degrees, the balance of the required coursework hours may be chosen in consultation with the Supervising Professor to meet the student's needs and interests. Courses taken outside the Aerospace Engineering program require approval of the student's Supervising Professor as well as the Graduate Advisor.

Admission Requirements for Master's Program in Mechanical Engineering

Admission to the graduate program in ME is based on equal weighting of the following five criteria:

1. An overall GPA, as calculated by the Graduate School, of 3.0 or higher in undergraduate coursework is required for admission to the M.S. program. (For some international applicants where GPA calculations based on a 4.0 system are not performed, a minimum performance level of 65 percentile.

This minimum expectation may be higher for some countries, where less stringent grading criteria are used.) Performance in core Mechanical Engineering courses is of particular importance.

2. A GRE score of at least 146 (400 in old scaling) (verbal) and 155 (700 in old scaling) (quantitative) for M.S. applicants.
3. Three favorable, veracious recommendations, via the university's recommendation form or via recommendation letter. More detailed instructions for submitting recommendation letters can be found at <http://www.uta.edu/mae/>.
4. A written essay on the student's goals and reasons for pursuing graduate studies.
5. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. For M.S. applicants, minimum performance levels expected for each test are: TOEFL iBT total score of 84 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 20 for the listening section, paper-based TOEFL score of 550 with a TWE of 3.5, computer-based TOEFL score of 223, TSE-A score of 45, or IELTS score of 6.5.
6. Students who are currently enrolled in either the Master of Engineering or Master of Science in Mechanical Engineering program, may be admitted to the BS-Ph.D program in Mechanical Engineering after completing 15 hours of graduate mechanical engineering lecture coursework with a GPA of 3.6 or higher in addition to satisfying the same admission requirements as the BS-Ph.D. program.

ADMISSION STATUS FOR MASTER'S PROGRAM IN MECHANICAL ENGINEERING

1. Unconditional Admission: To be unconditionally admitted, an applicant must at least meet conditions 1, 2, 3, and 4.
2. Probationary Admission: M.S. applicants who fail to meet the conditions for unconditional admission, but satisfy any three of items 1, 2, 3 and 4, will be considered for probationary admission.
3. Provisionary Admission: Applicants who are unable to supply all of the required documentation prior to the admission deadline, but who otherwise appear to meet the admission criteria, may be granted provisional admission.
4. Denial: Applicants who fail to meet at least two of the first four admission criteria will normally be denied admission.
5. Deferral: A deferred decision may be granted when an application file is incomplete or when a denied decision is not appropriate.

PROBATIONARY ADMISSION FOR MASTER'S PROGRAM IN MECHANICAL ENGINEERING

Probationary admission into the Mechanical Engineering Program may be permitted under the following conditions for each degree program:

PROVISIONAL ADMISSION FOR MASTER'S PROGRAM IN MECHANICAL ENGINEERING

An applicant who is unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

WAIVER OF THE GRADUATE RECORD EXAM FOR MASTER'S PROGRAM IN MECHANICAL ENGINEERING

A waiver of the Graduate Record Examination may be considered for a UT Arlington graduate who has completed a BSME degree within the past 3 years. The student's GPA must equal or exceed 3.0 in each of two calculations: (a) in the last 60 hours of study and (b) in all undergraduate coursework completed at UT Arlington. The GRE waiver may be extended to include non-UT Arlington candidates that have undergraduate degrees in mechanical engineering (with GPA of 3.25 or above) from U.S. universities with an ABET accredited engineering program or other select U.S. universities subject to graduate advisor's approval. The waiver of the GRE applies only to applicants for the master's degree programs. Interested applicants should contact the Mechanical Engineering Graduate Advisor.

CORE COURSES

Thermal Science

ME 5316	THERMAL CONDUCTION	3
ME 5317	CONVECTION HEAT TRANSFER	3
ME 5318	RADIATIVE HEAT TRANSFER	3
ME 5321	ADVANCED CLASSICAL THERMODYNAMICS	3

Fluid Science

ME 5313	FLUID DYNAMICS	3
ME 5342	GAS DYNAMICS	3
ME 5344	VISCOUS FLOWS	3

Design, Mechanics and Manufacturing

ME 5310	FINITE ELEMENT METHODS	3
ME 5337	INTRODUCTION TO ROBOTICS	3
ME 5339	STRUCTURAL ASPECTS OF DESIGN	3
ME 5311	STRUCTURAL DYNAMICS	3

Controls and Systems

ME 5303	CLASSICAL METHODS OF CONTROL SYSTEMS ANALYSIS AND SYNTHESIS	3
---------	---	---

ME 5305	DYNAMIC SYSTEMS MODELING	3
ME 5341	CONTROL SYSTEM COMPONENTS	3
Analysis Courses		
ME 5331	ANALYTIC METHODS IN ENGINEERING	3
ME 5332	ENGINEERING ANALYSIS	3
Approved Mathematics courses		

Requirements for the Master of Science Degree in Mechanical Engineering

The Master of Science degree is a research-oriented program in which completion of a thesis is mandatory. A minimum of 30 credit hours is required as follows: three core courses (one course each in three of the four areas) and the two analysis courses listed above; three graduate courses (nine credit hours) related to a specialty in mechanical engineering (registration in elective courses outside the ME department requires prior approval of the ME graduate advisor and the students committee chair otherwise they will not count towards graduation requirements); and six credit hours of thesis. In addition, all GTA/GRA Master of Science students are required to enroll in ME 5101 GRADUATE SEMINAR course. The student must enroll in ME 5398 THESIS or ME 6397 RESEARCH IN MECHANICAL ENGINEERING every semester in which the student is actively involved in thesis preparation or research, except that the student must enroll in ME 5698 THESIS in the semester of graduation.

Requirements for the Master of Engineering Degree in Mechanical Engineering

The Master of Engineering degree is an engineering practice-oriented program. A minimum of 36 credit hours is required as follows: four core courses (one in each area) and the two analysis courses listed above; six courses (18 credit hours) of elective graduate courses in engineering, mathematics, and/or science relating to the student's interest areas. The elective courses cannot include special project courses (for example, ME 5391 ADVANCED STUDIES IN MECHANICAL ENGINEERING) or research courses (for example, ME 6397 RESEARCH IN MECHANICAL ENGINEERING). Registration in elective courses outside the ME department requires prior approval of the ME graduate advisor; otherwise they will not count towards graduation requirements.

Admission Requirements for Ph.D. in Aerospace Engineering

Applicants for the doctoral degree must have either a baccalaureate or master's degree in engineering or science. Applicants who have completed a bachelor's degree and wish to pursue a doctoral degree without completing a master's degree may apply for admission in the Bachelor of Science (B.S.) to Ph.D. Track. The minimum admission requirements to this highly competitive track are the same as those for all doctoral applicants. Doctoral candidates shall also demonstrate through previous academic preparation the potential to carry out independent research in Aerospace Engineering. All applicants must meet the general requirements of the Graduate School as stated in the section of this catalog entitled "Admission Requirements and Procedures". Applicants not meeting all criteria may be admitted on a provisional or probationary basis.

For applicants with no prior training in engineering or with insufficient undergraduate Aerospace Engineering coursework, the same minimum criteria will apply. Additionally, their records will be reviewed in relation to their mathematics, engineering, and science backgrounds, and probationary status may be a basis for acceptance of such applicants, with specific undergraduate remedial work required.

The UT Arlington Aerospace Engineering Program uses the following guidelines in the admission review process:

UNCONDITIONAL ADMISSION FOR PH.D. IN AEROSPACE ENGINEERING

Unconditional admission into the Aerospace Engineering Program requires the submission of items 1 through 5 below for each degree program. To be unconditionally admitted, an applicant must at least meet conditions 1, 2, 3, and 4.

1. Minimum GPA of 3.3 in the last 60 hours taken in the major field of study in an appropriate engineering or science discipline. (For some international applicants where GPA calculations based on a 4.0 system are not performed, a minimum performance level of 70 percentile is expected. This minimum expectation may be higher for some countries, where less stringent grading criteria are used.) Performance in core Aerospace Engineering courses is of particular importance.
2. A GRE score of at least 150 (verbal) and 159 (quantitative). For those applicants whose GRE verbal score falls below 150, high TOEFL scores may be considered to offset the GRE verbal score.
3. Three favorable recommendations via the university's recommendation form or via recommendation letter.
4. A Statement of Purpose detailing the applicant's background, education, professional goals, technical interests, and research interests.
5. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: TOEFL-PBT score of 560 with a TWE of 3.5, IELTS score of 7.0, or TOEFL-iBT total score of 89 with sectional scores that meet or exceed 23 for the writing section, 21 for the speaking section, 24 for the reading section, and 21 for the listening section.

PROBATIONARY ADMISSION FOR PH.D. IN AEROSPACE ENGINEERING

Probationary admission into the Aerospace Engineering Program may be permitted under the following conditions for each degree program:

1. If an applicant meets any three of the items 1, 2, 3, and 4 above for the doctoral program.
2. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: paper-based TOEFL score of 560 with a TWE of 3.5, computer-based TOEFL score of 230, TSE-A score of 45, IELTS score of 7.0, or TOEFL iBT total score of 89 with sectional scores that meet or exceed 23 for the writing section, 21 for the speaking section, 24 for the reading section, and 21 for the listening section.

PROVISIONAL ADMISSION FOR PH.D. IN AEROSPACE ENGINEERING

An applicant who is unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

DEFERRED FOR PH.D. IN AEROSPACE ENGINEERING

If an applicant does not present adequate evidence of meeting admission requirements, the admission decision may be deferred until admission records are complete or the requirements are met.

DENIAL OF ADMISSION FOR PH.D. IN AEROSPACE ENGINEERING

A candidate may be denied admission if he/she has less than satisfactory performance in two out of the first three admission criteria.

CRITERIA FOR AWARD OF FELLOWSHIPS AND ASSISTANTSHIPS

Applicants who demonstrate skills, experience or interests that meet the needs of the AE Graduate Program will be considered for fellowships or assistantships.

B.S. to Ph.D. Program

The B.S. to Ph.D. Program is an accelerated program in which the student bypasses the M.S. thesis and proceeds directly to the Ph.D. dissertation research. Requirements for unconditional admission to the B.S. to Ph.D. Degree Program include:

- An overall GPA, as calculated by the Graduate School, of 3.3 or higher in undergraduate coursework.
- Relevance of the student's previous degrees to the AE curriculum.
- Reputation of the universities or colleges the student has attended.
- A GRE score of at least 153 (verbal) and 159 (quantitative).
- Three satisfactory written recommendation forms from prior professors or supervisors.
- A written essay on the student's goals and reasons for pursuing graduate studies.

Doctoral Degree Requirements

ALL GRADUATE DEGREES

- All entering students must be proficient in mathematics, engineering analysis, and computer programming. (*Students not meeting these requirements may be admitted on a probationary basis and given a plan of remedial undergraduate coursework*).
- No graduate credit will be granted for courses that are required in the undergraduate Aerospace Engineering curriculum.
- The Master of Science and Doctoral candidates in Aerospace Engineering shall enroll in AE 5101 GRADUATE SEMINAR a minimum of three times (see course description).

All candidates are required to select a Supervising Professor and obtain an approved program of work in the second full semester or after 12 hours are completed.

Degree Requirements for Ph.D. in Aerospace Engineering

DOCTOR OF PHILOSOPHY

- The Ph.D. degree requires a minimum of 24 hours of graduate-level course work beyond the Master's degree, and will include a scholarly dissertation that provides a significant original contribution to Aerospace Engineering.
- The Ph.D. degree course requirement can be tailored to satisfy the individual student's aspirations in choice of the area of specialization. However, to meet the educational goals of a broad-based technical background in Aerospace Engineering, it is expected that each student will take sufficient course work to obtain in-depth knowledge in at least two core areas of Aerospace Engineering.
- Students whose background is in a field other than Aerospace Engineering must satisfy the Master's degree core requirements.
- There is no foreign language requirement for the Ph.D.
- **Diagnostic Exam:** All students entering the Ph.D. program are required to take the Ph.D. Diagnostic Exam. Students admitted into AE Ph.D. program with MS degree in Aerospace Engineering or equivalent must take the diagnostic exam at the end of the 1st semester. This exam is offered twice per year, during the week preceding the start of classes for the fall and spring semesters. Possible outcomes of this evaluation are:

- a. continuation in the doctoral program,
 - b. approval to continue with certain specified remedial work,
 - c. failure with approval to retake,
 - d. termination in the program.
- **Comprehensive Exam:** Students are eligible to take the comprehensive examination after satisfying all requirements stipulated by the Diagnostic Exam Committee and giving evidence to their doctoral committee of adequate academic achievement by having completed all or most coursework requirements. The comprehensive examination is used to determine if the student has the necessary background and specialization required for the dissertation research and if the student can organize and conduct the research. *An applicant must pass this examination to be admitted to candidacy for the Ph.D. degree.*

B.S. TO PH.D. TRACK

- In addition to the requirements listed above for the Ph.D. degree, a B.S.-Ph.D. Track student will be *required to enroll in at least three hours of research each semester during the student's first two years, receiving a pass/fail grade (no R grade) in these hours.*
- A student may be exempted from enrolling in research hours in the student's initial semester.
- A B.S.-Ph.D. Track student must have a faculty research (dissertation) advisor prior to the start of the student's second full semester.
- Students in the BS-Ph.D. program must take the Ph.D diagnostic exam within the first year from the start of their Ph.D.

Admission Requirements for Ph.D. in Mechanical Engineering

ADMISSION STATUS

1. Unconditional Admission: To be unconditionally admitted, an applicant must at least meet conditions 1, 2, 3, and 4.
2. Probationary Admission: Ph.D. applicants who fail to meet the conditions for unconditional admission, but satisfy any three of items 1, 2, 3 and 4, will be considered for probationary admission.
3. Provisional Admission: Applicants who are unable to supply all of the required documentation prior to the admission deadline, but who otherwise appear to meet the admission criteria, may be granted provisional admission.
4. Denial: Applicants who fail to meet at least two of the first four admission criteria will normally be denied admission.
5. Deferral: A deferred decision may be granted when an application file is incomplete or when a denied decision is not appropriate.

ADMISSION REQUIREMENTS FOR B.S. TO PH.D. TRACK

1. An overall GPA, as calculated by the Graduate School, of 3.3 or higher in undergraduate coursework.
2. A GRE score of at least 150 (450 in old scaling) (verbal) and 159 (750 in old scaling) (quantitative).
3. Three satisfactory written recommendation forms from prior professors or supervisors.
4. A written essay on the student's goals and reasons for pursuing graduate studies.
5. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: TOEFL iBT total score of 89 with sectional scores that meet or exceed 23 for the writing section, 21 for the speaking section, 24 for the reading section and 21 for the listening section, paper-based TOEFL score of 560 with a TWE of 3.5, computer-based TOEFL score of 230, TSE-A score of 45, or IELTS score of 7.0.

PROBATIONARY ADMISSION

Probationary admission into the Mechanical Engineering Program may be permitted under the following conditions for each degree program:

Doctoral Program and BS to PhD track

1. If an applicant meets any three of the items 1, 2, 3, and 4 above for the doctoral program or BS to PhD track.
2. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: TOEFL iBT total score of 89 with sectional scores that meet or exceed 23 for the writing section, 21 for the speaking section, 24 for the reading section and 21 for the listening section, paper-based TOEFL score of 560 with a TWE of 3.5, computer-based TOEFL score of 230, TSE-A score of 45, or IELTS score of 7.0.

PROVISIONAL ADMISSION

An applicant who is unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

DEFERRED ADMISSION

If an applicant does not present adequate evidence of meeting admission requirements, the admission decision may be deferred until admission records are complete or the requirements are met.

DENIAL OF ADMISSION

A candidate may be denied admission if he/she has less than satisfactory performance in two out of the first three admission criteria.

Admission Requirements for B.S. to Ph.D. Track

The B.S. to Ph.D. program is an accelerated program in which a student proceeds directly to the Ph.D. dissertation research and bypasses the M.S. thesis. Requirements for unconditional admission to this program include the following:

1. Minimum GPA of 3.3 in the last 60 hours taken in the major field of study in an appropriate engineering or science discipline. (For some international applicants where GPA calculations based on a 4.0 system is not performed, a minimum performance level of 70 percentile is expected. This minimum expectation may be higher for some countries, where less stringent grading criteria are used.) Performance in core mechanical engineering courses is of particular importance.
2. A GRE score of at least 150 (450 in old scaling) (verbal) and 159 (750 in old scaling) (quantitative).
3. Three favorable, veracious recommendations, via the university's recommendation form or via recommendation letter.
4. A Statement of Purpose detailing the applicant's background, education, professional goals, technical interests, and research interests.
5. An applicant whose native language is not English must submit TOEFL, TSE, or IELTS English proficiency test scores. Minimum performance levels expected for each test are: TOEFL iBT total score of 89 with sectional scores that meet or exceed 23 for the writing section, 21 for the speaking section, 24 for the reading section and 21 for the listening section, paper-based TOEFL score of 560 with a TWE of 3.5, computer-based TOEFL score of 230, TSE-A score of 45, or IELTS score of 7.0.

WAIVER OF THE GRADUATE RECORD EXAM

There is no GRE waiver for Ph.D. applicants.

CRITERIA FOR AWARD OF FELLOWSHIPS AND ASSISTANTSHIPS

Applicants who demonstrate skills, experience or interests that meet the needs of the ME Graduate Program will be considered for fellowships or assistantships.

Degree Requirements for Ph.D. in Mechanical Engineering

DOCTOR OF PHILOSOPHY

There is no foreign language requirement for the Ph.D. degree.

B.S.-PH.D. TRACK STUDENTS

To meet the educational goal of a broad-based technical background in Mechanical Engineering, it is expected that each student will take sufficient graduate coursework to obtain in-depth knowledge in at least two areas of Mechanical Engineering. Students whose background is in a field other than Mechanical Engineering must satisfy the BS core requirements. Note that registration in elective courses outside the ME department requires prior approval of the ME graduate advisor and student's committee chair. Otherwise they will not count towards the graduation requirements. The doctoral degree program consists of a minimum of 42 credit hours of coursework beyond the bachelor's degree level plus 9 hours of dissertation and 2 hours of seminar and requires the successful completion of the following requirements:

ME 5331	ANALYTIC METHODS IN ENGINEERING	3
ME 5332	ENGINEERING ANALYSIS	3

Or other approved mathematics courses

1. Three core courses (9 credit hours) from at least two different areas, as listed below:

ME 5316	THERMAL CONDUCTION	3
ME 5317	CONVECTION HEAT TRANSFER	3
ME 5318	RADIATIVE HEAT TRANSFER	3
ME 5321	ADVANCED CLASSICAL THERMODYNAMICS	3
ME 5313	FLUID DYNAMICS	3
ME 5342	GAS DYNAMICS	3
ME 5344	VISCOUS FLOWS	3
ME 5310	FINITE ELEMENT METHODS	3
ME 5337	INTRODUCTION TO ROBOTICS	3
ME 5339	STRUCTURAL ASPECTS OF DESIGN	3
ME 5311	STRUCTURAL DYNAMICS	3

ME 5303	CLASSICAL METHODS OF CONTROL SYSTEMS ANALYSIS AND SYNTHESIS	3
ME 5305	DYNAMIC SYSTEMS MODELING	3
ME 5341	CONTROL SYSTEM COMPONENTS	3

a. **Thermal Science:**

b. **Fluid Science:**

c. **Design, Mechanics and Manufacturing:**

d. **Controls and Systems:**

- One additional course (3 credit hours) at the graduate level in one of the broad areas of Mechanical Engineering outside the student's major area of specialization. A core course is also acceptable for meeting this requirement.
- Eight additional courses (24 credit hours) in the student's major area of research
- Two courses (6 credit hours) of engineering analysis:
- Two credit hours of seminar
- Nine credit hours for Dissertation

ME 6299	DISSERTATION	2
ME 6399	DISSERTATION	3
ME 6699	DISSERTATION	6
ME 6999	DISSERTATION	9

- Doctoral students must register for a minimum total of 9 hours of dissertation research over the course of their programs of work. These hours may be accumulated over several terms or completed in a single term. The course hours of ME 6299 DISSERTATION, ME 6399 DISSERTATION, ME 6699 DISSERTATION, ME 6999 DISSERTATION, and/or ME 7399 DOCTORAL DEGREE COMPLETION are all counted towards this nine-hour requirement.
- Doctoral students must be enrolled in 9 hours while completing organized coursework and 6 hours while exclusively enrolled in dissertation research in order to be considered full time except in the term they designate as their "completion term." The completion term is typically the term in which a student successfully defends his or her dissertation, fully completes all degree requirements and graduates. Students may designate only one term as the completion term.
- Doctoral students must enroll in a minimum of 3 dissertation hours (ME 7399 DOCTORAL DEGREE COMPLETION) in the term designated as their completion term. Alternatively, students may complete and defend their dissertation while enrolled in 6 or 9-hour dissertation courses:
- Doctoral students who do not graduate at the end of their completion term will receive a grade of R, W, or F and must enroll in a minimum of 6 hours of dissertation research (ME 6299 DISSERTATION, ME 6399 DISSERTATION, ME 6699 DISSERTATION or ME 6999 DISSERTATION) every term until graduation.
- Students enrolled in the completion term meet enrollment requirements for holding fellowships awarded by the Office of Graduate Studies and GTA or GRA positions by enrolling in the required 3-hour completion term dissertation course.
- Students who wish to remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours each term as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Students should consult with the Office of Financial Aid and other funding agencies to be certain they enroll in sufficient hours to retain support.

Final course requirements are determined by the student's supervising committee.

M.S.-PH.D. TRACK MECHANICAL STUDENTS

To meet the educational goal of a broad-based technical background in Mechanical Engineering, it is expected that each student will take sufficient graduate coursework to obtain in-depth knowledge in at least two areas of Mechanical Engineering. Students whose background is in a field other than Mechanical Engineering must satisfy the Masters of Science core requirements. Note that registration in elective courses outside the ME department requires prior approval of the ME graduate advisor and student's committee chair. Otherwise they will not count towards the graduation requirements. The doctoral degree program consists of a minimum of 24 credit hours of coursework beyond the Master's degree level plus 9 hours of dissertation and 2 hours of seminar and requires the successful completion of the following requirements:

ME 5331	ANALYTIC METHODS IN ENGINEERING	3
ME 5332	ENGINEERING ANALYSIS	3

Or other approved mathematics courses

- Three core courses (9 credit hours) from at least two different areas, as listed below:

ME 5316	THERMAL CONDUCTION	3
ME 5317	CONVECTION HEAT TRANSFER	3

ME 5318	RADIATIVE HEAT TRANSFER	3
ME 5321	ADVANCED CLASSICAL THERMODYNAMICS	3
ME 5313	FLUID DYNAMICS	3
ME 5342	GAS DYNAMICS	3
ME 5344	VISCOUS FLOWS	3
ME 5310	FINITE ELEMENT METHODS	3
ME 5337	INTRODUCTION TO ROBOTICS	3
ME 5339	STRUCTURAL ASPECTS OF DESIGN	3
ME 5311	STRUCTURAL DYNAMICS	3
ME 5303	CLASSICAL METHODS OF CONTROL SYSTEMS ANALYSIS AND SYNTHESIS	3
ME 5305	DYNAMIC SYSTEMS MODELING	3
ME 5341	CONTROL SYSTEM COMPONENTS	3

- a. **Thermal Science:**
- b. **Fluid Science:**
- c. **Design, Mechanics and Manufacturing:**
- d. **Controls and Systems:**

2. One additional course (3 credit hours) at the graduate level in one of the broad areas of Mechanical Engineering outside the student's major area of specialization. A core course is also acceptable for meeting this requirement.
3. Three additional courses (9 credit hours) in the student's major area of research
4. One course (3 credit hours) of engineering analysis:
5. Two credit hours of seminar
6. Nine credit hours (ME 6999 DISSERTATION) for Dissertation.

ME 6299	DISSERTATION	2
ME 6399	DISSERTATION	3
ME 6699	DISSERTATION	6
ME 6999	DISSERTATION	9

- a. Doctoral students must register for a minimum total of 9 hours of dissertation research over the course of their programs of work. These hours may be accumulated over several terms or completed in a single term. The course hours of ME 6299 DISSERTATION, ME 6399 DISSERTATION, ME 6699 DISSERTATION, ME 6699 DISSERTATION, and/or ME 7399 DOCTORAL DEGREE COMPLETION are all counted towards this nine-hour requirement.
- b. Doctoral students must be enrolled in 9 hours while completing organized coursework and 6 hours while exclusively enrolled in dissertation research in order to be considered full time except in the term they designate as their "completion term." The completion term is typically the term in which a student successfully defends his or her dissertation, fully completes all degree requirements and graduates. Students may designate only one term as the completion term.
- c. Doctoral students must enroll in a minimum of 3 dissertation hours (ME 7399 DOCTORAL DEGREE COMPLETION) in the term designated as their completion term. Alternatively, students may complete and defend their dissertation while enrolled in 6 or 9-hour dissertation courses:
- d. Doctoral students who do not graduate at the end of their completion term will receive a grade of R, W, or F and must enroll in a minimum of 6 hours of dissertation research (ME 6299 DISSERTATION, ME 6399 DISSERTATION, ME 6699 DISSERTATION or ME 6999 DISSERTATION) every term until graduation.
- e. Students enrolled in the completion term meet enrollment requirements for holding fellowships awarded by the Office of Graduate Studies and GTA or GRA positions by enrolling in the required 3-hour completion term dissertation course.
- f. Students who wish to remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours each term as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Students should consult with the Office of Financial Aid and other funding agencies to be certain they enroll in sufficient hours to retain support

Final course requirements are determined by the student's supervising committee. In addition, a student must pass three examinations before being awarded the Ph.D. degree: the Diagnostic Exam, the Comprehensive Exam, and the Final Exam (or Dissertation Examination).

A Diagnostic Examination will be administered to the student prior to the start of the student's second long semester. The Diagnostic Exam is a written test of the student's capability to pursue successfully the doctorate degree, and it aids in developing the program of study for the student. The Diagnostic

Examination tests fundamental knowledge in two technical areas of mechanical engineering. The student and the student's research advisor jointly choose the technical areas from the following five:

1. thermal science,
2. fluid science,
3. mechanical design and manufacturing,
4. solid mechanics and structures, and
5. controls and systems.

The exam topics for the technical areas are given in the ME Ph.D. Diagnostic Exam handout. The diagnostic examination is normally offered twice a year the week prior to the beginning of the Fall and/or Spring semesters. A student should inform the ME graduate advisor in advance and no later than the middle of the long semester prior to the planned time of taking the exam and consult with the ME graduate advisor for the time and place of the diagnostic examination.

A comprehensive examination will be administered to the student after the successful completion of all phases of the diagnostic examination and before the student's research work for the dissertation. The comprehensive examination is used to determine if the student has the necessary background and specialization required for the dissertation research and if the student can organize and conduct the research. An applicant must pass this examination to be admitted to candidacy for the Ph.D. degree.

The student must enroll in at least three hours of dissertation courses (ME 6399 DISSERTATION - ME 6999 DISSERTATION) or research courses (ME 6397 RESEARCH IN MECHANICAL ENGINEERING - ME 6999 DISSERTATION) every semester in which the student is actively involved in dissertation preparation or research, except that the student must enroll in ME 6999 DISSERTATION in the semester of graduation.

The student must submit the Application for Candidacy and Final Program of Work to the Mechanical Engineering Committee on Graduate Studies immediately after completion of the Comprehensive Examination. Coursework taken for the Master's degree at this institution may be used to meet these requirements; however, courses listed for the Master's degree or any other degree cannot be listed as the actual course requirement on the Final Program of Work. Transfer work is not accepted in doctoral programs; however, such courses may provide a basis for waiving some course requirements.

The student must file the Request for Dissertation Defense form with the Graduate School at least two weeks prior to the defense. At the same time of requesting the exam, the student must also announce the exam to the members of the university community by posting fliers on the departmental bulletin boards and by providing an electronic statement to the ME graduate advisor to be posted on the departmental web page indicating details (title, abstract, advisor, time and place) of the exam. Approval of the dissertation by the members of the Dissertation Committee is required.

Please see the section entitled General Graduate School Regulations and Information in this Catalog for further details.

The grade of R (research in progress) is a permanent grade; completing course requirements in a later semester cannot change it. To receive credit for an R-graded course, the student must continue to enroll in the course until a passing grade is received.

An incomplete grade (the grade of I) cannot be given in a course that is graded R, nor can the grade of R be given in a course that is graded I. To receive credit for a course in which the student earned an I, the student must complete the course requirements. Enrolling again in the course in which an I was earned cannot change a grade of I. At the discretion of the instructor, a final grade can be assigned through a change of grade form.

Three-hour thesis courses and three- and six-hour dissertation courses are graded R/F/W only. The grade of P (required for degree completion for students enrolled in thesis or dissertation programs) can be earned only in six-hour thesis or nine-hour dissertation courses. In the course listings below, R-graded courses are designated either "Graded P/F/R" or "Graded R." Occasionally, the valid grades for a course change. Students should consult the appropriate Graduate Advisor or instructor for valid grade information for particular courses. (See also the sections titled "R" Grade, Credit for Research, Internship, Thesis or Dissertation Courses and Incomplete Grade in this catalog.)

B.S. TO PH.D. TRACK

In addition to the requirements listed below for the Ph.D. degree, a B.S.-Ph.D. Track student will be required to enroll in at least three hours of research each semester during the student's first two years, receiving a pass/fail grade (no R grade) in these hours. A B.S.-Ph.D. student must have a faculty research (dissertation) advisor prior to the start of the student's second full semester. A B.S.-Ph.D. student must take the Ph.D. diagnostic examination prior to the start of the student's third long semester.

Fast Track Program for Master's Degree in Aerospace Engineering

The Fast Track Program enables outstanding UT Arlington senior undergraduate students in Aerospace Engineering to satisfy degree requirements leading to a master's degree in Aerospace Engineering while completing their undergraduate studies. When senior-level students are within 15 hours of completing their undergraduate degree requirements, they may take up to 9 hours of graduate level coursework designated by the Aerospace Engineering Program to satisfy both undergraduate and graduate degree requirements. In the limiting case, a student completing the maximum allowable hours (9) while in undergraduate status would have to take only 24 additional hours to meet minimum requirements for graduation in a 33 hour thesis master's degree program (M.S.) or 28 additional hours for a 37 hour non-thesis master's degree program (M. Engr.)

Interested UT Arlington undergraduate Aerospace Engineering students should apply to the Aerospace Engineering Program when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UT Arlington, achieving a GPA of at least 3.0 in those courses, and have an overall GPA of 3.0 or better in all college courses. Additionally, they must have completed at least 16 hours of specified undergraduate foundation courses with a minimum GPA of 3.3 in those courses. Program details are provided in the UT Arlington Undergraduate Catalog. Contact the Undergraduate Advisor or Graduate Advisor in Aerospace Engineering for more information about the program.

Fast Track Program for Master's Degree in Mechanical Engineering

The Fast Track Program enables outstanding UT Arlington senior undergraduate students in Mechanical Engineering to satisfy degree requirements leading to a master's degree in Mechanical Engineering while completing their undergraduate studies. When senior-level students are within 15 hours of completing their undergraduate degree requirements, they may take up to 9 hours of graduate level coursework designated by the Mechanical Engineering Program to satisfy both undergraduate and graduate degree requirements. In the limiting case, a student completing the maximum allowable hours (9) while in undergraduate status would have to take only 21 additional hours to meet minimum requirements for graduation in a 30 hour thesis master's degree program (M.S.) or 27 additional hours for a non-thesis master's degree program (M. Engr.)

Interested UT Arlington undergraduate Mechanical Engineering students should apply to the Mechanical Engineering Program when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UT Arlington, achieving a GPA of at least 3.0 in those courses, and have an overall GPA of 3.0 or better in all college courses. Additionally, they must have completed at least 11 hours of specified undergraduate foundation courses with a minimum GPA of 3.3 in those courses. Fast Track Program details are provided in the UT Arlington Undergraduate Catalog. Contact the Undergraduate Advisor or Graduate Advisor in Mechanical Engineering for more information about the program.

Graduate Certificate in Automotive Engineering

PROGRAM OBJECTIVE

The University of Texas at Arlington is pleased to offer a Graduate Certificate in Automotive Engineering through the Arnold E. Petsche Center for Automotive Engineering. This certificate confirms the student's commitment to automotive engineering and the learning experience gained from being a contributing team member of a student design competition. Students shall be awarded the Graduate Certificate for Automotive Engineering by the College of Engineering and the Graduate School upon satisfactory completion of the certificate requirements with an overall grade point average of 3.0.

ADMISSION REQUIREMENTS

Students wishing to enroll only in the Graduate Certificate in Automotive Engineering but NOT a graduate degree program may apply for admission to UT Arlington as a non-degree seeking student. The GRE is not necessary. Admission to the certificate program allows participants to take the specific courses approved for the certificate program. Student are not allowed to take courses in excess of those required for the certificate. A Bachelor's degree in engineering with a GPA of 2.8 is required for admission through the Graduate School. Students with GPAs lower than 2.8 may be recommended for admission as special student by the Director of the Arnold E. Petsche Center for Automotive Engineering, based on the following admission enhancing factors:

1. the applicant's work experience and level of responsibility;
2. two letters of recommendation.

Students already enrolled in a Master's degree program at TU Arlington may enroll by submitting the appropriate application form to the certificate program director and his or her academic graduate advisor. Students who have completed a Master's degree may apply for admission to UT Arlington as a non-degree seeking student. In either case, a minimum GPA of 3.0 in Master's degree work is required.

ACADEMIC REQUIREMENTS

Participants must satisfactorily complete 12 hours of required courses according to the following criteria:

9 hours from the following list:

ME 5340	AUTOMOTIVE ENGINEERING	9
ME 5358	Racecar Engineering	
ME 5359	APPLIED AUTOMOTIVE ENGINEERING ¹	

No more than 3 hours from the following list: ²

ME 5341	CONTROL SYSTEM COMPONENTS	3
EE 5313	MICROPROCESSOR SYSTEMS	

Total Hours

12

¹ May be taken twice for credit toward the certificate.

² Or other graduate level engineering course approved by the Director of the Arnold E. Petsche Center for Automotive Engineering.

Students can take ME 5010 AUTOMOTIVE ENGINEERING PRACTICUM (no credit hours) to be recognized as full team members on a competition team such as Formula SAE.

Graduate Certificate in Electronic Packaging

PROGRAM OBJECTIVE AND REQUIREMENTS

The Certificate in Electronic Packaging program provides graduate-level knowledge in the field of electronic packaging, with a concentration on numerical and experimental characterization of thermo/mechanical issues. Courses are taught by faculty of the departments of Mechanical and Aerospace Engineering and Materials Science and Engineering, plus other UT Arlington faculty and adjunct faculty as needed. Technical material covered in the classroom will be complemented by a number of seminars by industry leaders in the packaging field. Completion of the certificate program will provide a head start for UT Arlington students when joining industry and skills-enhancement opportunities for current industry employees.

There are two enrollment options: as a student pursuing a graduate degree or as a non-degree-seeking special student. The special student avenue is tailored for individuals currently employed in an electronics-related industry. Students will receive the certificate after completing 12 credit hours of packaging courses, as advised by the certificate program director, and must have a cumulative GPA of 3.0 in the four selected courses. The time limit for completion of the Certificate in Electronic Packaging program is six years.

Applicants on a degree track must be admitted to the Master's degree program. Non-degree students must have a BS degree and a minimum GPA of 2.5. Special students who decide that they want to pursue a graduate degree after starting as a special student may transfer up to 12 credit hours of graduate level courses.

ME 5314	FRACTURE MECHANICS IN STRUCTURAL DESIGN	3

Graduate Certificate in Unmanned Vehicle Systems

PROGRAM OBJECTIVE

The Certificate in UVS (Unmanned Vehicle Systems) is offered through the Mechanical and Aerospace Engineering Department and will educate graduate students and train practicing engineers in selected areas required for the design, development and operation of UVS including UAS (Unmanned Aircraft Systems), UGS (Unmanned Ground Systems) and UMS (Unmanned Maritime Systems). The certificate program will emphasize the common aspects of UVS including sensors, actuators, communications and more importantly decision-making capabilities (autonomy), while also covering development of domain-specific mobile platforms such as airplane, rotorcraft, Ackerman steering car and boat. A student after completing this program will be familiar with the UVS-related concepts, theories and enabling technologies, and their interrelations while at the same time gaining a focused experience in specific areas of his/her choice. This program will also give students the opportunity to gain practical experience contributing to a larger system by working in a multidisciplinary environment. This program aims at the dual goal of providing the UVS industry with a knowledgeable, locally available workforce and developing career opportunities for its participants.

ADMISSION REQUIREMENTS

1. A Bachelor's degree in an engineering discipline with a minimum GPA of 3.0 or a current enrollment in an engineering graduate program at UTA with a minimum GPA of 3.0.
2. Those who desire to complete the certificate program without enrolling in graduate degree program must be admitted to UTA as a non-degree seeking student.
3. An essay detailing the applicant's background and skills as pertaining to UVS, his/her interest in a specific domain and his/her expected benefit from completing this program.
4. Two recommendation letters explaining how the applicant will contribute to the certificate program and how he/she will benefit by completing the program.

ACADEMIC REQUIREMENTS

Students must complete 15 hours of coursework with a 3.0 grade point average or better. A grade of C or better is required in all courses counted towards the completion of the certificate.

The recommended progression in the program is (1) start with AE 5378 or ME 5378, which will raise awareness with UVS-related subjects in the following coursework, (2) take 9 credit hours of coursework and any prerequisite if applicable for the elective course selected, and (3) complete the certificate program with AE 5379 or ME 5379. Prerequisite to the elective courses will not be counted towards the 15 hour requirement.

3 credit hours from the following list: 3

AE 5378	INTRODUCTION TO UNMANNED VEHICLE SYSTEMS ¹
---------	---

ME 5378	INTRODUCTION TO UNMANNED VEHICLE SYSTEMS ²

1	New Course.	
2	New Course.	
3	Advanced and special topics courses must be approved by the certificate advisor.	

Mechanical and Aerospace Engineering - Undergraduate Programs

Overview

The Department of Mechanical and Aerospace Engineering (MAE) offers three programs of study leading to the bachelor's degree. They are the Bachelor of Science in Aerospace Engineering, the Bachelor of Science in Mechanical Engineering, and a double degree of Bachelor of Science in Aerospace Engineering and Bachelor of Science in Mechanical Engineering. Both Aerospace Engineering and Mechanical Engineering degree programs offer a Fast Track option which enables outstanding undergraduate students to receive dual undergraduate/ graduate course credit for up to nine hours of coursework. Minor degrees are also offered in Aerospace Engineering and Mechanical Engineering. The Aerospace and Mechanical Engineering programs have been accredited since 1968 and 1967, respectively, by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

This section contains Department policies governing admission and academic progress which are common to both aerospace and mechanical degree programs.

Admission

For admission to the aerospace engineering and mechanical engineering programs, students must meet the requirements for admission to the College of Engineering. A grade point average of 2.25 in science, mathematics and engineering courses is required for unconditional transfer into the department.

Advising

The advising process is designed to assist students as they make important decisions related to their academic progress at UT Arlington and career goals in general.

Specifically, the purpose of advising is:

- To empower students to clarify and achieve their educational goals by providing timely and accurate information about degree requirements, as well as College and University policies and procedures.
- To provide every student with the opportunity to develop a relationship with a knowledgeable advisor in order to obtain sound academic advising with a degree of continuity.
- To provide students with information about additional services, programs, and support systems available within the College and University as appropriate.

Ultimately, the student is responsible for seeking academic advice, making decisions regarding goals, meeting degree requirements, and enrolling in appropriate courses. The academic advisor is to provide assistance in these decisions. Each student is responsible for understanding and complying with University and College policies and procedures.

During each long semester, the Mechanical and Aerospace Engineering Department conducts pre-enrollment advising weeks. Returning students (i.e., students who are or have previously been students at The University of Texas at Arlington) shall meet with their assigned advisors during advising weeks and complete a Registration Advising Form. Returning students who are unable to be present for advising during advising weeks should contact their advisor at the earliest opportunity. New students may receive pre-enrollment advising following advising weeks during normal advising hours.

Goal of the Undergraduate Program

The overall goal of the undergraduate program is to provide the graduate an educational background for lifelong learning and the ability to assume a leadership role in the mechanical or aerospace engineering professions. The programs are broad-based and designed to provide a strong foundation in science, mathematics, and engineering science; technical competence in multiple areas of mechanical or aerospace engineering practice; and an understanding of the importance of ethics, safety, professionalism, and socioeconomic concerns in resolving technical problems.

Educational Objectives and Student Outcomes

Degree Programs

EDUCATIONAL OBJECTIVES

A primary goal of the mechanical engineering and aerospace engineering degree programs is to provide an educational experience and training that will prepare graduates to excel within the broad scope of the mechanical and aerospace engineering professions. Our Program Educational Objectives are to enable our graduates to attain the following professional and career accomplishments during the first few years following graduation:

- Be employed in a professional mechanical, aerospace or related engineering organization, or be admitted to graduate programs in engineering or other professional areas,
- Become an active participant in professional society activities,
- Demonstrate the initiative, motivation and ability to grow professionally in their chosen endeavor.

STUDENT OUTCOMES

Mechanical engineering and aerospace engineering student outcomes established to accomplish the educational objectives are as follows.

- an ability to apply knowledge of mathematics, science and engineering
- an ability to design and construct experiments, as well as to analyze and interpret data
- an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- an ability to understand through a broad education, the impact of engineering solutions in a global, economic, environmental and societal context
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
- a recognition of the need for, and the ability to engage in, lifelong learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills and modern engineering tools necessary for engineering practice

The mechanical engineering and aerospace engineering programs offer broad technical backgrounds for students who may choose other engineering fields for advanced study.

Academic Regulations

ACADEMIC HONESTY

The College of Engineering takes academic honesty and ethical behavior very seriously. Engineers are entrusted with the safety, health, and well being of the public. Students found guilty of academic dishonesty will be punished to the full extent permitted by the rules and regulations of UT Arlington. In particular, a student found guilty of a second offense by the Office of Student Judicial Affairs will be subject to dismissal from the College of Engineering

ADVANCEMENT INTO MECHANICAL AND AEROSPACE ENGINEERING PROFESSIONAL PROGRAMS

Requirements for advancement into the Professional Programs in Mechanical Engineering and Aerospace Engineering are in accordance with those in the College of Engineering with the added stipulation that:

- Each student must complete all pre-professional courses stipulated under "Requirements for a Bachelor of Science Degree in Aerospace Engineering" or "Requirements for a Bachelor of Science Degree in Mechanical Engineering" with a minimum grade of C in each course and a minimum GPA of 2.25 on a 4.0 scale in each of three categories:
 - a. overall,
 - b. required math, science, and engineering courses, and
 - c. required MAE courses.
- Application to the Professional Program is to be made to the Undergraduate Advisor during the semester following completion of the last pre-professional course.
- No professional Mechanical and Aerospace Engineering course may be taken unless the student is admitted into the professional program or obtains the consent of the Undergraduate Advisor. Professional courses may be taken to fill out a schedule in the semester that the last pre-professional course is taken.

- Some professional Mechanical and Aerospace Engineering courses are offered only once a year. Students are urged to plan their course sequence schedules carefully to avoid delaying their graduation.

ADDITIONAL REQUIREMENTS

Requirements for the bachelor of science in mechanical engineering and bachelor of science in aerospace engineering are in accordance with those of the University and the College of Engineering with the added stipulation that:

- Each student must complete all professional courses stipulated under "Requirements for a Bachelor of Science Degree in Aerospace Engineering" or "Requirements for a Bachelor of Science Degree in Mechanical Engineering" with a minimum grade of C in each course.
- Each student must have a minimum UTA cumulative GPA of 2.0, and a minimum major GPA of 2.0. The major GPA includes all MAE courses in the degree plan.
- The College of Engineering requires that students who do not have two units of high school foreign language take six hours, in the same language, of modern or classical language courses in addition to the previously listed requirements.
- Mechanical Engineering and Aerospace Engineering students will satisfy the university core curriculum requirement by completing all General Education courses specified under "Requirements for a Bachelor of Science Degree in Aerospace Engineering" or "Requirements for a Bachelor of Science Degree in Mechanical Engineering" along with ENGR 1300, Engl 1301, Math 1426, Math 2425, Phys 1443 and Phys 1444, which are also required in the Pre-Professional program.

ORAL COMMUNICATION AND COMPUTER USE COMPETENCY REQUIREMENTS

Mechanical Engineering and Aerospace Engineering students will satisfy the Oral Communication Competency requirement by completing COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING, and the Computer Use Competency requirement by completing MAE 2360 NUMERICAL ANALYSIS & PROGRAMMING.

Other Provisions

Refer to the College of Engineering section of this catalog for information concerning the following topics: (p. 243)

- Preparation in High School for Admission to the College of Engineering
- Admission to the College of Engineering
- Advising in the College of Engineering
- Admission into the Professional Program
- College of Engineering Academic Regulations
- Course Transfer Policies
- College of Engineering Probation
- Repeating Course Policy
- Modern and Classical Languages Requirement

Bachelor of Science in Aerospace Engineering (BSAE)

Academic requirements governing the bachelor of science in aerospace engineering. (p. 330)

Rapid advances in aerospace systems require the successful aerospace engineer to develop new concepts and bring them into reality as reliable, competitive, and environmentally acceptable products. Successful completion of a balanced study of basic science and engineering topics, further complemented by humanities, will ensure that graduates are well prepared to tackle tomorrow's challenges. The curriculum covers the broad areas of aerodynamics and fluid mechanics, propulsion and combustion, flight mechanics and controls, structural mechanics and material behavior, structural dynamics, and system design and optimization supplemented by appropriate laboratory experiences. The culmination of the curriculum is a vehicle design project. Students may broaden their education by choosing elective courses in a secondary field of interest or by taking a second bachelor's degree in mechanical engineering.

REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE IN AEROSPACE ENGINEERING

Communication: COMS 2302		3
Creative arts elective: any course which satisfies the University Core Curriculum requirements for Creative Arts is accepted.		3
Social/behavioral elective: ECON 2305 or IE 2308		3
Total Hours		130

Total hours completed will depend upon prior preparation and academic qualifications.

¹ All pre-professional courses must be completed before enrolling in professional courses.

² Technical electives must be approved in advance by the student's academic advisor. Normally, they are selected from the senior elective 4000 level courses in Mechanical and Aerospace Engineering.

RECOMMENDED CORE CURRICULUM

Aerospace Engineering students will satisfy the university core curriculum requirement by completing all General Education courses specified under "Requirements for a Bachelor of Science Degree in Aerospace Engineering" along with ENGR 1300 ENGINEERING PROBLEM SOLVING, ENGL 1301 RHETORIC AND COMPOSITION I, MATH 1426 CALCULUS I, MATH 2425 CALCULUS II, PHYS 1443 GENERAL TECHNICAL PHYSICS I and PHYS 1444 GENERAL TECHNICAL PHYSICS II, which are within the Pre-Professional Program. The university core curriculum allows each degree plan to designate a component area to satisfy three hours of the core requirement. For the aerospace engineering degree plan, the designated component area is Math and ENGR 1300 selected to satisfy the requirement. For more information, see University Core Curriculum. (p. 93)

Bachelor of Science in Mechanical Engineering (BSME)

Academic requirements governing the bachelor of science in mechanical engineering. (p. 330)

The mechanical engineer needs to be extremely versatile and can be found in a large variety of private and public sector organizations. He or she may be involved in product design and development, manufacturing, project management, power generation or other operations. Therefore, the mechanical engineering curriculum is broad-based and emphasizes fundamental engineering sciences and applications. Approximately equal emphasis is given to machine design, structural analysis, thermodynamics and energy, systems and control, and materials science. Classroom lectures are supplemented by laboratories. The student completes a capstone design project as the culmination of the undergraduate program.

Total Hours		130

Total hours completed will depend upon prior preparation and academic qualifications.

- 1 All pre-professional courses must be completed before enrolling in professional courses.
- 2 Technical electives must be approved in advance by the student's academic advisor. Normally, they are selected from the senior elective 4000 level courses in Mechanical and Aerospace Engineering.

RECOMMENDED CORE CURRICULUM

Mechanical Engineering students will satisfy the university core curriculum requirement by completing all General Education courses specified under "Requirements for a Bachelor of Science Degree in Mechanical Engineering" along with ENGR 1300 ENGINEERING PROBLEM SOLVING, ENGL 1301 RHETORIC AND COMPOSITION I, MATH 1426 CALCULUS I, MATH 2425 CALCULUS II, PHYS 1443 GENERAL TECHNICAL PHYSICS I and PHYS 1444 GENERAL TECHNICAL PHYSICS II, which are within the Pre-Professional Program. The university core curriculum allows each degree plan to designate a component area to satisfy three hours of the core requirement. For the mechanical engineering degree plan, the designated component area is Math and ENGR 1300 ENGINEERING PROBLEM SOLVING selected to satisfy the requirement. For more information, see University Core Curriculum. (p. 93)

Mechanical and Aerospace Engineering Double Major

A student wishing to obtain a double major in mechanical engineering and aerospace engineering under a single degree, simultaneously prior to graduation, can integrate the courses for the double major requirement throughout his/her undergraduate career at UT Arlington. When applying for graduation, a student should note on the application that he/she will be completing an additional major. One diploma is issued and both majors are recorded on a student's transcript and diploma. The student is encouraged to consult with the Undergraduate Advisor on the appropriate course of study.

Fast Track Program of Master's Degree in Aerospace Engineering

The Fast Track Program enables outstanding senior undergraduate Aerospace Engineering students to receive dual undergraduate/ graduate course credit for up to nine hours of coursework. These designated graduate courses satisfy both bachelor's and master's degree requirements if they are completed within the last 15 hours of the undergraduate degree program. In the limiting case, a student completing the maximum allowable hours (9) while in undergraduate status would have to take only 21 additional hours to meet minimum requirements for graduation in a 30-hour thesis master's degree program (M.S.) or 27 additional hours for a non-thesis master's degree program (M. Engr.)

Interested undergraduate students should apply to the appropriate program when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UT Arlington, achieving a GPA of at least 3.0 in those courses, and have an overall GPA of 3.0 or better in all college courses. Additionally, they must have completed a specific set of undergraduate foundation courses that are listed below with a minimum GPA of 3.3 in these courses.

Aerospace Engineering Foundation Courses Required for Admission into the Fast Track Program:

MAE 3303	COMPRESSIBLE FLOW	3
MAE 3315	AEROSPACE STRUCTURAL STATICS	3
MAE 3316	AEROSPACE STRUCTURAL DYNAMICS	3
MAE 3405	FLIGHT DYNAMICS	4
MAE 3406	FLIGHT PERFORMANCE & STABILITY	4
Total Hours		17

Fast Track students can take two graduate core courses to serve as undergraduate elective courses. Further, students can substitute one of the core graduate courses for one required undergraduate course (AE 5326 AIR-BREATHING PROPULSION in place of MAE 4321 AIR-BREATHING ENGINE PROPULSION).

Students who successfully complete the Fast Track Program will be automatically admitted to Graduate School. They will not be required to take the Graduate Record Examination, complete an application for admission to the Graduate School or pay an application fee. For more details about the specifics of the program contact the Undergraduate Advisor or Graduate Advisor in Aerospace Engineering.

Fast Track Program of Master's Degree in Mechanical Engineering

The Fast Track Program enables outstanding senior undergraduate Mechanical Engineering students to receive dual undergraduate/ graduate course credit for up to nine hours of coursework. These designated graduate courses satisfy both bachelor's and master's degree requirements if they are completed within the last 15 hours of the undergraduate degree program. In the limiting case, a student completing the maximum allowable hours (9) while in undergraduate status would have to take only 21 additional hours to meet minimum requirements for graduation in a 30-hour thesis master's degree program (M.S.) or 27 additional hours for a non-thesis master's degree program (M. Engr.)

Interested undergraduate students should apply to the appropriate program when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UT Arlington, achieving a GPA of at least 3.0 in those courses, and have an overall GPA of 3.0 or better in all college courses. Additionally, they must have completed a specific set of undergraduate foundation courses that are listed below with a minimum GPA of 3.3 in these courses.

Mechanical Engineering Foundation Courses Required for Admission into the Fast Track Program:

MAE 3242	MECHANICAL DESIGN I	2
MAE 3314	HEAT TRANSFER	3
MAE 3318	KINEMATICS AND DYNAMICS OF MACHINES	3
MAE 3319	DYNAMIC SYSTEMS MODELING AND SIMULATION	3
Total Hours		11

Fast Track students can take two graduate core courses to serve as undergraduate elective courses. Further, students can substitute one of the core graduate courses for one required undergraduate course (ME 5303 CLASSICAL METHODS OF CONTROL SYSTEMS ANALYSIS AND SYNTHESIS for MAE 4310 INTRODUCTION TO AUTOMATIC CONTROL).

Students who successfully complete the Fast Track Program will be automatically admitted to Graduate School. They will not be required to take the Graduate Record Examination, complete an application for admission to the Graduate School or pay an application fee. For more details about the specifics of the program contact the Undergraduate Advisor or Graduate Advisor in Aerospace Engineering or Mechanical Engineering.

MINOR IN AEROSPACE ENGINEERING

To receive a minor in Aerospace Engineering, a student must complete 18 hours of course work as listed below. Prerequisites must be met for all courses. All courses used to satisfy AE Minor requirements must be completed with a grade of C or better. In addition, at least 9 hours must be MAE courses taken in residence at UTA and approved in advance by the MAE undergraduate advisor.

9 hours required:		9
MAE 2312	SOLID MECHANICS	
MAE 2323	DYNAMICS	
MAE 2315 or MAE 2314	FLUID DYNAMICS FLUID MECHANICS I	
9 hours of courses selected from the following:		9
MAE 3303	COMPRESSIBLE FLOW	
MAE 3304	ASTRONAUTICS I	
MAE 3405	FLIGHT DYNAMICS	
MAE 3406	FLIGHT PERFORMANCE & STABILITY	
MAE 3315	AEROSPACE STRUCTURAL STATICS	
MAE 3316	AEROSPACE STRUCTURAL DYNAMICS	
MAE 4321	AIR-BREATHING ENGINE PROPULSION	
Total Hours		18

MINOR IN MECHANICAL ENGINEERING

To receive a minor in Mechanical Engineering, a student must complete 18 hours of course work as listed below. Prerequisites must be met for all courses. All courses used to satisfy ME Minor requirements must be completed with a grade of C or better. In addition, at least 9 hours must be MAE courses taken in residence at UTA and approved in advance by the MAE undergraduate advisor.

9 hours required:		9
MAE 2312	SOLID MECHANICS	
MAE 2323	DYNAMICS	
MAE 3310	THERMODYNAMICS I	

9 hours of coursework selected from the following:

9

MAE 2314	FLUID MECHANICS I
MAE 3183	MEASUREMENTS LABORATORY II
MAE 3242	MECHANICAL DESIGN I
MAE 3311	THERMODYNAMICS II
MAE 3314	HEAT TRANSFER
MAE 3318	KINEMATICS AND DYNAMICS OF MACHINES
MAE 3319	DYNAMIC SYSTEMS MODELING AND SIMULATION
MAE 3324	STRUCTURE & MECHANICAL BEHAVIOR OF MATERIALS
MAE 3344	INTRODUCTION TO MANUFACTURING ENGINEERING
MAE 4310	INTRODUCTION TO AUTOMATIC CONTROL
MAE 4342	MECHANICAL DESIGN II
MAE 4344	COMPUTER-AIDED ENGINEERING

Total Hours

18

Certificate in Automotive Engineering

PROGRAM OBJECTIVE AND REQUIREMENTS

The University of Texas at Arlington is pleased to offer a Certificate in Automotive Engineering through the Arnold E. Petsche Center for Automotive Engineering. This certificate confirms the student's commitment to automotive engineering and the learning experience gained from being a contributing team member of a student design competition. The Certificate in Automotive Engineering will be awarded concurrently with an undergraduate degree. The completed certificate program of study will be forwarded to the Office of Admissions, Records and Registration for verification and notation on the student's transcript. A formal certificate will be prepared for the student by the university and recognition will be given at the graduation ceremonies.

The Certificate in Automotive Engineering is offered through the Mechanical and Aerospace Engineering Department.

ADMISSION REQUIREMENT

The certificate is open to all degree-seeking students.

ACADEMIC REQUIREMENTS

The Certificate in Automotive Engineering requires 15 credit hours of appropriate coursework as well as two semesters of practical training experience. All courses must be passed with a grade of C or better to apply to the Certificate in Automotive Engineering.

At least 9 hours from the following list of courses.

EE 2347	MATHEMATICAL FOUNDATIONS OF ELECTRICAL ENGINEERING
EE 2403	ELECTRONICS I
EE 3446	CIRCUIT ANALYSIS II
EE 2441	DIGITAL LOGIC AND MICROPROCESSORS 1
MAE 2312	SOLID MECHANICS
MAE 2314	FLUID MECHANICS I
MAE 2315	FLUID DYNAMICS
MAE 3309	THERMAL ENGINEERING
MAE 3310	THERMODYNAMICS I
MAE 3315	AEROSPACE STRUCTURAL STATICS
MAE 3318	KINEMATICS AND DYNAMICS OF MACHINES

At least 3 hours from the following:

MAE 4357	AUTOMOTIVE ENGINEERING
MAE 4358	RACECAR ENGINEERING

Two courses from the following (courses may be repeated): ¹

MAE 2010	AUTOMOTIVE ENGINEERING PRACTICUM I
MAE 4010	AUTOMOTIVE ENGINEERING PRACTICUM II

¹ MAE 2010 and 4010 are Engineering Practicum courses that have no academic credit and do not require a tuition fee. Students must gain approval to enroll in these courses from the faculty of the Arnold E. Petsche Center for Automotive Engineering.

Certificate in Unmanned Vehicle Systems

PROGRAM OBJECTIVE

The Certificate in UVS (Unmanned Vehicle Systems) is offered through the Mechanical and Aerospace Engineering Department and will educate undergraduate students in the knowledge and skills required for design, development and operation of UVS including UAS (Unmanned Aircraft Systems), UGS (Unmanned Ground Systems) and UMS (Unmanned Maritime Systems). The certificate program will emphasize the common aspects of UVS such as sensors, actuators, communications, and more importantly, decision-making capabilities (autonomy), while also covering development of domain-specific mobile platforms such as airplane, rotorcraft, Ackerman steering car and boat. This program aims at the dual goal of providing the UVS industry with a knowledgeable, locally available workforce and developing career opportunities for its participants. To this end, the Certificate in UVS will be awarded concurrently with an undergraduate degree.

ADMISSION REQUIREMENTS

The certificate is open to all degree-seeking students. Students should see the certificate advisor for admission to the program.

ACADEMIC REQUIREMENTS

Students must complete 15 hours of coursework as outlined below. All courses used to satisfy the certificate requirements must be passed with a grade of B or better.

Required courses:

MAE 4378	INTRODUCTION TO UNMANNED VEHICLE SYSTEMS	6
MAE 4379	UNMANNED VEHICLE SYSTEM DEVELOPMENT	

Nine credit hours from the following list:

MAE (Mechanical and Aerospace Engineering) Courses: 9

MAE 2312	SOLID MECHANICS
MAE 2315 FLUID DYNAMICS or MAE 2314 FLUID MECHANICS	
MAE 3309 THERMAL ENGINEERING or MAE 3310 THERMODYNAMICS I	
MAE 3315	AEROSPACE STRUCTURAL STATICS
MAE 3318	KINEMATICS AND DYNAMICS OF MACHINES
MAE 3405	FLIGHT DYNAMICS
MAE 3306	
MAE 4315	INTRODUCTION TO COMPOSITES
MAE 3319	DYNAMIC SYSTEMS MODELING AND SIMULATION
MAE 3316	AEROSPACE STRUCTURAL DYNAMICS
MAE 4301	SPECIAL TOPICS IN MECHANICAL AND AEROSPACE ENGINEERING ²
MAE 4310	INTRODUCTION TO AUTOMATIC CONTROL
MAE 3242	MECHANICAL DESIGN I
MAE 4350	AEROSPACE VEHICLE DESIGN I
MAE 4307	FINITE ELEMENT METHODS
MAE 4345	INTRODUCTION TO ROBOTICS

EE (Electrical Engineering) Courses:

EE 2441	DIGITAL LOGIC AND MICROPROCESSORS 1
EE 3318	DISCRETE SIGNALS AND SYSTEMS
EE 3317	LINEAR SYSTEMS
EE 4314	CONTROL SYSTEMS
EE 4318	DIGITAL SIGNAL PROCESSING
EE 4315	INTRODUCTION TO ROBOTICS
EE 4330	FUNDAMENTALS OF TELECOMMUNICATIONS SYSTEMS

CSE (Computer Science and Engineering) Courses:

CSE 3313	INTRODUCTION TO SIGNAL PROCESSING
CSE 3442	EMBEDDED SYSTEMS I
CSE 4342	EMBEDDED SYSTEMS II
CSE 4308	ARTIFICIAL INTELLIGENCE I
CSE 4319	MODELING AND SIMULATION
CSE 4360	AUTONOMOUS ROBOT DESIGN AND PROGRAMMING

IE (Industrial Engineering) Courses:

IE 2305	COMPUTER APPLICATIONS IN INDUSTRIAL ENGINEERING
IE 3314	ENGINEERING RESEARCH METHODS
IE 4325	AUTOMATION AND ROBOTICS I
IE 4339	PRODUCT DEVELOPMENT, PRODUCIBILITY AND ENTREPRENEURSHIP

ENGR (Engineering) Courses:

ENGR 4302	ENGINEERING ENTREPRENEURSHIP
-----------	------------------------------

PHYS (Physics) Courses:

PHYS 2321	COMPUTATIONAL PHYSICS
PHYS 3445	OPTICS
PHYS 3455	ELECTRONICS
PHYS 4315	THERMODYNAMICS AND STATISTICAL MECHANICS
PHYS 4319	ADVANCED MECHANICS

Total Hours

15

² Special topics courses must be approved by the certificate advisor.

College of Liberal Arts

UNDERGRADUATE

Overview

The mission of the College of Liberal Arts is to provide a learning community wherein students are provided both broad-based and specialized education and to vitalize the educational process by creating and transmitting knowledge through research, scholarship and creative activity.

The College of Liberal Arts offers a 21st century education by inculcating skills which students will apply throughout their lifetimes in increasingly complex and interdisciplinary ways: skills in critical thinking, oral and written communication, multilingual and multicultural competency, textual analysis, analytic reasoning and the scientific method. Faculty research scholarship and creative expertise in the visual and performing arts, humanities, and social sciences advance knowledge and contribute toward civic engagement and improvement of local and global communities through interdisciplinary and cross-disciplinary initiatives across the College of Liberal Arts and the UT Arlington academic community, and in partnership with national and international colleagues

The college is characterized by a diversity of intellectual styles and interests. Departments and programs cluster into social sciences, humanities and fine arts. Liberal Arts disciplines address the rich meanings of human experience and expression and liberate the imagination.

The traditional objectives of liberal arts in the University are:

1. to develop the tools for analysis, appreciation and communication; for written and oral expression; for comprehension, interpretation, and analysis of textual material; for analytic reasoning and scientific method; and for appreciation of aesthetic experience;
2. to prepare students for a range of careers in academia and public and private sector organizations. Graduates of the college contribute to the region, the state and the nation as college and university professors, elementary and secondary teachers, legal professionals, in government agencies, social services, international business and industry, media and advertising, health and recreation, and cultural and entertainment industries; and
3. to promote understanding and critical evaluation of the cultural milieu of the attitudes and the ideas that shape institutions and strategies in societies.

A liberal arts education prepares the student for leadership in whatever profession or vocation he or she chooses and is designed to help students live enlightened, purposeful, and effective lives in a challenging, complex, and global technological environment.

A center of learning and scholarship, the College of Liberal Arts and its departments and programs help students achieve an understanding and knowledge of the past, a comprehension of the realities of the present, and a sense of the vision and potential of the future. Our courses of study not only develop habits of mind (such as mastery in reading, communication, and critical thinking skills), but also address the meaning of human experience and expression.

The college promotes these goals in the following ways:

- By enabling students to develop the tools for analysis, appreciation and communication; for written and oral expression; for comprehension, interpretation, and analysis of textual material; for analytic reasoning and scientific method; and for appreciation of aesthetic experience;
- By enabling students to prepare for professions or careers by offering specialized major programs; and
- By enabling students to understand and evaluate critically the attitudes and ideas that shape contemporary society.

Because they deal with the meanings of human experience, the Liberal Arts are the oldest and most central study in higher education, with a past that reaches back to the origins of the university in the Middle Ages. The disciplinary units of the college provide current perspectives on the individual, society, culture, and the cosmos; the various courses of study taken together offer students a range of approaches to the human condition. Through their research and teaching, the faculty of the college seek to prepare students to achieve success in many different professions, to contribute to the community, and to lead enriched and enlightened lives.

Departments and Programs

The College of Liberal Arts offers programs of study in 12 academic units.

- Art and Art History (<http://www.uta.edu/art>)
- Communication (<http://www.uta.edu/communication>)
- Criminology and Criminal Justice (<http://www.uta.edu/criminology>)
- English (<http://www.uta.edu/english>)
- History (<http://www.uta.edu/history>)
- Linguistics and (<http://www.uta.edu/linguistics>)TESOL
- Modern Languages (<http://www.uta.edu/modl>)

- Music (<http://www.uta.edu/music>)
- Philosophy and Humanities (<http://www.uta.edu/philosophy>)
- Political Science (<http://www.uta.edu/pols>)
- Sociology and Anthropology (<http://www.uta.edu/socio-anthro>)
- Theatre Arts (<http://www.uta.edu/theatre>)

The college also offers interdisciplinary programs of undergraduate study in the Charles T. McDowell Center for Critical Languages and Area Studies, Mexican American Studies, Southwestern Studies, Women's and Gender Studies, African American Studies and Disability Studies. Military Science offers a program that leads to a commission in the U.S. Army. The Pre-Law Center is an advising and information resource for students in the Liberal Arts as well as in any other major at the university, who are considering legal and law-related careers.

INTERDISCIPLINARY MINORS

Medieval and Early Modern Studies (<http://www.uta.edu/libarts/mems>)

Disability Studies

Women's and Gender Studies (<http://www.uta.edu/womens-studies>)

African American Studies

Mexican American Studies

Southwestern Studies

Military Science (ROTC)

Liberal Arts Advising

Individual degree programs (<http://www.uta.edu/libarts/departments.html>) in the College of Liberal Arts have undergraduate advisors who are available to help students with academic planning, course selection, and professional career advice.

Admission to the College of Liberal Arts

Admission is determined by application to the academic unit offering the degree of interest. Individual departments and programs in the College of Liberal Arts may set more specific and restrictive requirements than those stipulated in the Core Curriculum statement (See Degree Program), and may set additional requirements for admission to the major. Information may be obtained in department and program offices.

The College of Liberal Arts has a modern and classical languages requirement. Students must demonstrate proficiency at the second year college level of a foreign or classical language. This requirement for the B.A. degree at UT Arlington is designed to help students become effective members of the global community. It is not only essential for a broad education, but also provides a basis for practical benefits to students with widely varying and highly specific objectives. Proficiency may be demonstrated through the prescribed score on the CLEP test for the language, transfer of credits from another institution, completion of the second year at UT Arlington, or proof of a secondary education in a foreign language (as evidenced by a diploma from a high school in which the language is the primary language of instruction). Students who choose to fulfill the requirement through proof of secondary education in another language must complete an additional six hours of English courses in order to ensure their mastery of English.

COMPUTER USE AND ORAL COMMUNICATION COMPETENCIES

Students majoring in Liberal Art disciplines are also required to demonstrate computer use proficiency and oral communication competency. Methods for demonstrating these competencies vary across departments and programs within the College of Liberal Arts and are detailed in the sections of this catalog pertaining to the various majors.

TRANSFER CREDITS

Students entering the College of Liberal Arts may transfer up to 72 hours of academic credit from two-year institutions to be applied to a degree.

Teacher Certification

The College of Education, in cooperation with the College of Liberal Arts, offers programs leading to elementary, secondary and all-level certification. Students interested in teacher certification should consult the advisor or his/her major department or the Advising Center of the College of Education for more information.

Honors Degree in Liberal Arts

In addition to earning a disciplinary degree with Latin honors (summa, magna, cum laude), Liberal Arts students who wish to graduate with an Honors Degree in a Liberal Arts discipline must be members of the Honors College in good standing, have an overall GPA of 3.2, and complete the degree requirements in a disciplinary major. Please see the Honors College (<http://www.uta.edu/honors>) website for more information.

Study Abroad

The College of Liberal Arts offers many opportunities for students wishing to study abroad. Programs in Mexico, Spain, France, Italy, Germany and other locations are led by faculty from different departments. Semester-long programs with affiliated institutions are also available. Start with the Office for International Education's Study Abroad site. (<http://studyabroad.uta.edu>)

Scholarships

Scholarships for outstanding undergraduate students are available from the College of Liberal Arts. Information about scholarships and applications may be found here (<http://www.uta.edu/libarts/scholarship.html>). Students should also speak with their advisor about major-specific scholarships.

Pass-Fail

Any student majoring in the College of Liberal Arts may, with the permission of an advisor from his/her major department and of the department or academic unit offering the course, take any course approved with a pass/fail grading option on a pass-fail basis, provided that the course is not required for the student's degree and provided the student has sophomore standing (30 hours credit). Students seeking teacher certification may not take education courses on a pass-fail basis with the exception of student teaching which is offered only on a pass-fail basis. Junior-senior level military science courses also may not be taken on a pass-fail basis.

GRADUATE

Mission and Philosophy

The mission of the College of Liberal Arts is to provide a learning community wherein students are provided both broad-based and specialized education and to vitalize the educational process by creating and transmitting knowledge through research, scholarship and creative activity.

The College is characterized by a diversity of intellectual styles and interests. Departments and programs cluster into social sciences, humanities and fine arts. Liberal Arts disciplines address the rich meanings of human experience and expression and liberate the imagination by producing knowledge and creating beauty.

The faculty and administration of the college address the traditional objectives of liberal arts in the University:

1. to develop the tools for analysis, appreciation and communication; for written and oral expression; for comprehension, interpretation, and analysis of textual material; for analytic reasoning and scientific method; and for appreciation of aesthetic experience;
2. to prepare students for a range of careers in academia and public and private sector organizations. Graduates of the College contribute to the region, the state and the nation as college and university professors, elementary and secondary teachers, legal professionals, in government agencies, social services, international business and industry, media and advertising, health and recreation, and cultural and entertainment industries; and
3. to promote understanding and critical evaluation of the cultural milieu and of the attitudes and the ideas that shape institutions and strategies in societies.

Accomplishing these objectives culminates in students reaping the creative, utilitarian and life enriching benefits of a liberal arts education.

History and Overview

The University of Texas at Arlington's College of Liberal Arts acquired its first graduate degrees in 1968, with the establishment of M.A. programs in English and History. Since that time, the number of M.A. programs offered has expanded to 13. In 1974, the college established its first Ph.D. level program, Humanities. The Humanities Program was reorganized in 1997 and replaced by three new Ph.D. level programs in English (Literature and Rhetoric/Composition tracks), History (transatlantic) and Linguistics.

Scholastic Activity and Research Interests of the Faculty

The faculty in the College of Liberal Arts excel in their roles as educators, creative scholars and researchers, and professional performers. Numerous faculty have received recognition for their work, including a Guggenheim Fellowship and two Pulitzer Prize nominations. The Jenkins and Virginia Garrett Endowed Chair in Greater Southwestern Studies and the History of Cartography was created in 1995 and is currently held by Professor Imre Demhardt. Ya'Ke Smith is the current Morgan Woodward Endowed Distinguished Professor in Film & Video. Sixteen faculty members have been members of the Academy of Distinguished Teachers, and eight faculty are Chancellor's Teaching Award recipients. Six of our faculty have won the prestigious Piper Award from the UT System. Thirteen faculty members have won the UT System Regents Outstanding Teaching Awards (instituted in 2009) and one has been inducted into the Regents Academy of Distinguished Teachers (instituted in 2013). Eighteen faculty members have won the University Outstanding Research Achievement Award and nine have been awarded the Distinguished Record of Research Award. Eight faculty from the College of Liberal Arts have been selected to be members of the Academy of Distinguished Scholars.

The scholarly activities and research of the faculty cover a range of areas represented within the 13 disciplines in the college. History faculty research interests center on transatlantic broadly defined, and research specializations of faculty include southern, western and southwestern history, frontier development, women and gender, urban and labor and public history. English faculty research strengths lie in the areas of American, British and

comparative literatures; and rhetoric, composition and criticism. Linguistics faculty specialize in experimental linguistics, field linguistics, corpus linguistics and documentation of endangered languages. Numerous faculty throughout the college also conduct research on gender and women's issues. Anthropology faculty members recently became the first foreign archaeological team to excavate in Albania in more than 50 years.

Special Programs and Opportunities

The College of Liberal Arts provides a number of special programs and opportunities for graduate students. College lecture series and seminars, conferences, publications, academic centers, library collections and an art gallery provide a mosaic of events and resources that enrich the university community.

LECTURE SERIES, SEMINARS AND CONFERENCES

- Each year the English Department sponsors the Hermann Lecture series, which brings scholars from UT Arlington and other universities together for discussions and master classes on an issue of general theoretical interest.
- The History Department presents the Walter Prescott Webb Memorial Lectures each March. Nationally prominent speakers make presentations on an annual topic, followed by a dinner in the University Center and a keynote address.
- Graduate students in Linguistics sponsor The UTA Conference in Linguistics and TESOL each year. This conference provides an opportunity for students to begin their professional careers by organizing the sessions, reviewing paper abstracts and presenting their own research.
- The Women's and Gender Studies Program hosts an annual, month-long Women's History Month Lecture Series during March that features a range of events from scholarly talks to film screenings to gallery exhibits to roundtable discussions. Speakers are invited from around the nation and around the globe and have included Pulitzer Prize-winners, ground-breaking scholars, and prominent female politicians.
- The Criminal Justice and Criminology Program sponsors a Brown Bag Lecture Series every spring semester, and students have the opportunity to receive credit for practicums.
- The Department of Political Science hosts the annual Haggard Lectures, bringing in nationally and internationally known scholars in the field.
- The Department of History hosts an annual student conference for the graduate students.

PUBLICATIONS

- The History Department publishes an annual volume comprised of Webb Lecture Series papers.
- The English Department houses the online journal, "Agora: A Graduate Journal of Theory" and "Early Modern Studies Journal."
- The Center for Theory houses the online journal, "Fast Capitalism."
- Individual departments/programs publish newsletters which provide news and information about and for students, faculty and alumni.

CENTERS

The College of Liberal Arts houses numerous centers designed to promote scholarship, research and teaching. These centers organize conferences, lecture series and workshops and provide a conduit for making faculty expertise available to the community. College of Liberal Arts centers are listed below and described in the Facilities for Advanced Studies and Research section of this catalog.

- The Center for Criminal Justice Research and Training
- The Center for Greater Southwestern Studies and the History of Cartography
- The Center for Mexican American Studies
- The Charles McDowell Center for Critical Languages and Area Studies
- The Center for African American Studies
- The Center for Social Research
- The Center for Theory
- The English Language Institute
- The Language Acquisition Center

OTHER RESOURCES

- In support of the history M.A. and Ph.D. programs, the UT Arlington Library Special Collections houses the Jenkins Garrett Library of Texana and Mexican War historical material and the Cartographic History Library. In addition, Special Collections has material on UT Arlington's history since 1895, the history of organized labor in Texas and the Southwest, and Yucatan and Honduran archival materials.
- The Gallery at UT Arlington presents a full program of major exhibitions in its 4,000-square-foot gallery, including lectures, symposia, screenings and publications. The Gallery's program demonstrates the complementary roles of visual and verbal literacy.
- The Department of Music offers laboratory facilities and the Fine Arts Library contains an extensive collection of recordings and publications relating to musical performance and theory.
- Numerous student organizations exist on campus to provide students with the opportunity to interact with peers in their disciplines. These student groups include interdisciplinary organizations for graduate students interested in Medieval Studies and Rhetoric; and honor societies for Communication, Criminal Justice, English, History, Political Science, and Sociology, as well as specialized interest groups.

- Student awards, scholarships and teaching and research assistantships are available in many College of Liberal Arts departments and programs. Each spring the History Department awards an outstanding graduate student the Wolfskill Prize, a cash award and plaque representing superior attainment in history studies. The English Language Institute, a part of the Program in Linguistics, provides graduate teaching assistantships.
- The College also awards funds for research travel and for travel to conferences for presentation of original research.

Graduate Teaching Assistantships, Fellowships and Scholarships

The College of Liberal Arts offers a wide variety of research, travel, fellowship and dissertation funding for deserving students. Typically, these awards are designed to encourage research or creative activity that leads to the completion of your graduate degree. The College also maintains a Graduate Studies blog (http://blog.uta.edu/cola_grad_studies/) and a graduate listserv that regularly announces awards.

A limited number of Graduate Teaching & Research Assistantships are awarded by most departments. You are encouraged to visit with faculty on availability and requirements of departmental assistantships during the application process.

Programs

The College of Liberal Arts offers the following graduate degree programs:

- Studio Art, M.F.A
- Communication, M.A.
- Criminology and Criminal Justice, M.A.
- English, M.A., Ph.D.
- History, M.A.; Transatlantic History, Ph.D.
- Linguistics, M.A., Ph.D.; TESOL, M.A.
- Modern Languages (French and Spanish), M.A.
- Music Education, M.M.
- Music Performance, M.M.
- Political Science, M.A.
- Sociology, M.A.

The College of Liberal Arts offers the following Dual Degree Programs:

Criminology and Criminal Justice M.A. & Social Work M.S.
 Criminology and Criminal Justice M.A. & Political Science, M.A.
 Criminology and Criminal Justice M.A. & Master of Public Administration
 Political Science M.A. & Master of Public Administration

The College of Liberal Arts offers three Graduate Certificates:

Archival Administration
 TESOL Certificate Program
 Graduate Certificate in French and Spanish

Aerospace Studies

Overview

The United States Air Force Reserve Officer Training Corps (AFROTC) provides women and men at Texas Christian University, Texas Wesleyan University, Dallas Baptist University, The University of Texas at Arlington, Weatherford College, and Tarrant County College the education and training necessary to develop the management and leadership skills vital to professional Air Force officers.

Enrollment in the General Military Course (first two years) is voluntary for eligible students and does not obligate non-scholarship students for further military service. The Professional Officer Course (last two years) is also voluntary but competitive. Because the POC leads to a commission in the United States Air Force, those selected to continue training incur military obligation.

Aerospace studies courses are taken concurrently with other degree programs. No degree is offered in aerospace studies, but up to 24 semester hours may be earned in aerospace studies over the four-year period. Some of the classes may be used to meet major elective requirements. See your academic advisor for confirmation. Students who enroll in aerospace studies classes must attend both classroom and leadership laboratory classes located at Texas Christian University, Rickel Academic Wing (3005 Stadium Drive) Office 247, Fort Worth, Texas 76109. The laboratory classes give students firsthand experience in leadership and organizational skills while preparing them for enrollment in the Professional Officer Course.

Program Requirements

Four-Year Program

This program enables students to take advantage of four years of aerospace studies courses. Each semester, for the first two years, cadets take a one-credit hour academic class and a one-credit hour Pass/No-Credit Leadership Laboratory (LLab). The first two years collectively are referred to as the General Military Course (GMC). Upon successful completion of the GMC and an ensuing four-week Air Force paid field training course, qualified and selected students may elect to enroll in the final two years, referred to as the Professional Officer Course (POC). Each semester in the POC, students take a three-credit hour academic class and a one-credit hour Pass/No-Credit LLab. AFROTC uniforms and textbooks are issued by the unit.

Aerospace Studies General Qualifications

A student enrolling in AFROTC must:

- Be a full-time student (12 semester hours or more);
- Be a U.S. citizen;
- Be in good physical condition/health;
- Have good moral character; and
- Be no older than 34 years old upon commissioning.

Program Benefits

As Air Force ROTC cadets, students are entitled to selective benefits. Social and co-curricular activities, together with leadership and academic training, are all part of Air Force ROTC. Contracted cadets receive a nontaxable subsistence allowance each month during the school year. The detachment sponsors a Civil Air Patrol where cadets can obtain front-seat and back-seat flying time in Cessna aircraft. Drill team, honor guard and Arnold Air Honor Society are just a few social outlets for the cadets. Summer opportunities for cadets can include a paid visit to a military installation for two weeks, freefall parachuting, combat survival training, flight nurse shadowing and cadet training assistant duty at field training.

Scholarships

Air Force ROTC offers scholarships that vary in length of award and amount based on academic major and applicant qualifications. All awarded scholarships pay a stipend for textbooks and fees, plus a monthly, nontaxable, stipend during the school year. Scholarship awards are based on specific academic majors related to the needs of the U.S. Air Force. These scholarship opportunities for in-college students are determined at the national level by Air Force ROTC and are subsequently administered by the detachment/Department of Aerospace Studies. Scholarship applicants are selected using the whole-person concept, which includes objective factors (i.e., GPA, standardized test scores (SAT/ACT), and physical fitness test) and subjective factors (i.e., personal evaluations). Students who are enrolled in Air Force ROTC generally improve their scholarship selection opportunity.

In addition to meeting the general qualifications mentioned above, scholarship applicants must be at least 17 years of age when the scholarship is activated and must be less than 31 years of age as of the end of their commissioning year. Because the scholarship program varies according to budget and needs of the Air Force, interested applicants should contact the Department of Aerospace Studies at 817.257.7461 or www.afrotc.com for specific details.

Commissioning

Upon successful completion of the AFROTC Program and baccalaureate or graduate degree, a student is commissioned a second lieutenant in the U.S. Air Force. In some instances, active service can be delayed by students continuing in post-baccalaureate degree programs.

Additional Information

More detailed information about the Air Force ROTC program is available through the Department of Aerospace Studies. The department is located at Texas Christian University, Rickel Academic Wing (3005 Stadium Drive) Office 247, Fort Worth, Texas 76109.

Art and Art History

Undergraduate Degrees

- Bachelor of Fine Arts in Art (p. 351)
- Bachelor of Fine Arts in Art (with teacher certification) (p. 358)
- Bachelor of Arts in Art (p. 351)
- Bachelor of Arts in Art History (p. 351)
- Minor in Art (p. 358)

Graduate Degree

- Art, M.F.A. (p. 346)

Art + Art History - Graduate Program

Objective

The mission of the Program in Studio Art is to:

1. Encourage and guide MFA students to successfully complete the recognized terminal degree in the practice of art.
 - a. Self discipline
 - b. Self confidence
 - c. Proficiency in their work
 - d. Open Communication
2. Enable artists, filmmakers, and designers in the program to develop habits of:
 - a. Make connections with various media and mediums to expand visual and conceptual vocabulary
 - b. Meet distinguished artists, filmmakers and designers to enhance the meaningful on-going dialogue related to their work and future.
3. Enable students to:
4. Provide studio space for students to explore methods of concept development, the exploration of time based media, reflection and development of personal work.
5. Encourage students to develop new skills and enhance existing ones. Expand the conventional concepts of the "studio" and are encouraged to develop their personal style and direction.
6. Encourage graduates to compete for professional positions in teaching, artistic fields and pursue careers as exhibiting artists, filmmakers/writers, and designers.

Graduate Teaching Assistants and Enhanced Graduate Teaching Assistants

To be considered for a Graduate Teaching Assistant position, the candidate must be admitted unconditionally. There is no separate application for consideration, and decisions regarding funding are based on the needs of the department and the quality of the applicant. Students being considered for funding will be interviewed prior to decisions being made to award. All GTA and EGTA students must mentor with faculty for 18 credit hours, taking ART 5000, Supervised Teaching in Art prior to being assigned as Instructor of Record. GTA and EGTA's are subject to all university standards and requirements for funding, and must maintain a 3.0 to have their awards renewed. Candidates whose native language is not English must submit a score of 45 on the Test of Spoken English (TSE-A), a score of 23 on the TOEFL iBT Speaking subtest, or a score of 45 on UT Arlington's SEA test. GTA positions in the Department of Art and Art History are limited and are very competitive.

Departmental Scholarships

The Department of Art and Art History attempts to provide some level of funding to all students admitted into the program. The amount of this funding varies based on the needs of the department and the quality of the applicant. There is no separate application for consideration. The student must be unconditionally admitted and meet all of the admission standards of the university and the department.

Advisement and Supervisory Committees

The MFA Director will advise all incoming graduate students. After a student has selected a supervisory committee and submitted a program of work, the major professor becomes his/her adviser. Students should consult the Graduate Student Handbook, the MFA Director or their Major Professors for details on forming a supervisory committee, creating a program of work and other requirements.

Admissions Requirements

An visit to campus to meet faculty and graduate students is recommended.

Three letters of recommendation are required, and it is suggested that at least two of the letters come from former educators or academic contact. A portfolio, transcripts, and letter of intent are also required. Please review the Art and Art History website, www.uta.edu/art for materials due dates.

UNCONDITIONAL ADMISSION

Applicants must possess a bachelor's degree from an accredited college or university. Submit transcripts from all previous college or university work, and three letters of recommendation are required of all applicants. In addition, applicants should have a minimum Grade Point Average (GPA) of 3.0, as calculated by Graduate Admissions. Applicants must submit a portfolio and statement of intent. The Art and Art History faculty review all materials and positively recommend acceptance into the M. F. A. program.

PROVISIONAL ADMISSION

Those who have submitted their applications forms, but whose packets are incomplete, can be admitted provisionally if their GPA is at least 3.0, and if the program and Graduate Admissions have received official transcripts. In this case, incomplete materials could include letters of recommendation.

PROBATIONARY ADMISSION

Those who have weaknesses in no more than two of the Degree Requirements (letters of recommendation, portfolio, statement of intent, and GPA), can be admitted on probation, with the condition that they make no less than a B in the first 12 hours of coursework in their art concentration. Such students must complete no fewer than 9 credits during the semester in which they are on probation.

DEFERRED ADMISSION

Those who have weaknesses in no more than two of the Degree Requirements (letters of recommendation, portfolio, statement of intent, and GPA), and/or who have not submitted all of the materials required for unconditional admission, can have their applications deferred for one semester, until outstanding requirements and criteria are met.

INTERNATIONAL STUDENT ADMISSION

International applicants must have a bachelor's degree from a regionally accredited U.S. college or university or its foreign equivalent, a GPA of at least 3.0 as calculated by the Graduate School, 3 letters of recommendation, portfolio and letter of intent to be considered for admission. In addition, applicants whose native language is not English must demonstrate proficiency in English by earning a score of at least 550 on the paper-based Test of English as a Foreign Language (TOEFL) or a score of at least 213 on the computer-based test, or a minimum score of 40 on the Test of Spoken English (TSE). The Internet-based TOEFL examination (TOEFL iBT) will be accepted as an alternative to the paper and computer-based TOEFL for admission purposes. Students taking TOEFL iBT must attain a minimum total test score of 79 and meet or exceed the following scores on each of the sections of the test:

- Writing: 22
- Speaking: 21
- Reading: 20
- Listening: 16

Those who do not meet the English proficiency requirement must satisfactorily complete courses in the ESOL area, as approved by the program and the Graduate School.

Degree Requirements

M.F.A. COURSE REQUIREMENTS

The graduate course requirements for the M.F.A. of 60 semester credit hours are normally distributed over six semesters of a three-year program. The student will be required to spend a minimum of three semesters in the M.F.A. program with one academic year in residency as a full time student.

SPECIFIC COURSE REQUIREMENTS

Area of Concentration	39
Supporting Studio Courses	9
Art History	9
Free electives	3
<hr/>	
Total Hours	60

Courses outside the area of concentration (supporting and free electives) should be taken from faculty other than the major professor. It is strongly recommended that the students study with a minimum of three additional faculty members during the course of his/her program. Students are also encouraged to take a free elective outside the Art and Art History Department.

The supervisory committee will approve the course options (work) and scholarly research. It is emphasized that this is a committee/department option, not a student option.

STUDIO ART (ART)

Concentration Required Courses in Studio Intermedia, Glass, Visual Communication and Film/Video & Screenwriting

ART 5330	CRITICAL PERSPECTIVE IN THE VISUAL ARTS & VISUAL COMMUNICATION	3
ART 5340	RESEARCH IN STUDIO INTERMEDIA (Studio)	3
or ART 5640	RESEARCH IN STUDIO INTERMEDIA	
ART 5342	RESEARCH IN GLASS	3

or ART 5642	RESEARCH IN GLASS	
ART 5355	RESEARCH IN VISUAL COMMUNICATION	3
or ART 5655	RESEARCH IN VISUAL COMMUNICATION	
ART 5360	TOPICS IN THE HISTORY OF ART & DESIGN (varied)	3
ART 5383	RESEARCH IN FILM/VIDEO & SCREENWRITING	3
or ART 5683	RESEARCH IN FILM/VIDEO & SCREENWRITING	
Total Hours		18

Prescribed Elective Courses for Supporting Studio in Studio Intermedia, Glass, Visual Communication, Film/Video & Screenwriting

ART 5320	ART CRITICISM & THEORY	3
ART 5341	RESEARCH IN SCULPTURE	3
or ART 5641	RESEARCH IN SCULPTURE	
ART 5342	RESEARCH IN GLASS	3
or ART 5642	RESEARCH IN GLASS	
ART 5343	RESEARCH IN PRINTMAKING	3
or ART 5643	RESEARCH IN PRINTMAKING	
ART 5347	RESEARCH IN DRAWING	3
or ART 5647	RESEARCH IN DRAWING	
ART 5353	RESEARCH IN METALS	3
or ART 5653	RESEARCH IN METALS	
ART 5355	RESEARCH IN VISUAL COMMUNICATION	3
or ART 5655	RESEARCH IN VISUAL COMMUNICATION	
ART 5359	RESEARCH IN PHOTOGRAPHY DIGITAL IMAGING	3
or ART 5659	RESEARCH IN PHOTOGRAPHY DIGITAL IMAGING	
ART 5363	RESEARCH IN CLAY	3
or ART 5663	RESEARCH IN CLAY	
ART 5371	RESEARCH IN PAINTING	3
or ART 5671	RESEARCH IN PAINTING	
ART 5391	INDEPENDENT STUDY	3

Example Course Sequence

First Year

First Semester	Hours	Second Semester	Hours
ART 5330	3	ART 5320	3
56xx Research in Concentration	6	56xx Research in Concentration	
		53xx Research in Supporting Studio	
	9		3

Second Year

First Semester	Hours	Second Semester	Hours
ART 5360	3	53xx Research in Supporting Studio	
56xx Research in Concentration	0	56xx Research in Concentration	
53xx Free Elective	0		
Mid-Program Review ¹	0		
	3		0

Third Year

First Semester	Hours	Second Semester	Hours
53xx Research in Supporting Studio		53xx Research in Concentration	3
56xx Research in Concentration		56xx Thesis Exhibition (Research in Concentration) ²	6
	0		9

Total Hours: 24

- ¹ Mid-Program review completed after 30 credits.
- ² Thesis Exhibition, Oral Exam and research paper completed during this semester. Summer opportunities may be available to complete required course work. This is dependent upon the faculty availability.

GRADUATE REVIEW EXHIBITION REQUIREMENTS

Each spring semester, the graduate students will be required to organize a summer exhibition of their recent work.

1. The number of work each student may exhibit will depend upon the number of exhibitors, size of work, etc., but we would expect that each student will be able to exhibit or screen several pieces.
2. These exhibitions and screenings will be drawn from the work done by each student in the previous spring and fall semesters-and will therefore represent each student's most recent efforts.
3. Each student will write an "artist's statement" to accompany his/her work on exhibit.

At the end of the exhibition, the graduate students will hold a formal "closing". All graduate students are expected to attend.

MID-PROGRAM REVIEW REQUIREMENTS

The preliminary examination for the M.F.A. degree at the University of Texas Arlington is the Mid-Program Review.

When the student has completed one-half of her/his program of study, the supervisory committee will conduct a comprehensive review of the student's work in order to ascertain if satisfactory progress is being made toward completion of the degree. The student will present all visual work done to this point, along with an outline and preliminary draft of the written document which is part of the thesis requirement (see below).

To pass, the student must receive a unanimous vote of the committee members. A failed review may be retaken once with permission from the Director of the MFA program and the MFA Graduate Studies Committee. If the student still does not pass, the Director of the MFA program will report the failure and the termination of the student's enrollment in the M.F.A. program to the Graduate School.

M.F.A. THESIS REQUIREMENTS

The thesis requirement for the M.F.A. degree consists of the following:

- The Thesis Exhibition: A substantial body of original works of art to be exhibited or screened on campus at a time announced to all graduate faculty.
- A written document in which the candidate demonstrates proficiency in conducting research and in analyzing, interpreting and organizing material, as well as demonstrating the ability to communicate perceptions, insights, and conclusions.
- During the last semester of the MFA candidates study a final oral examination coordinated by the supervising committee will be completed.
- Satisfactory completion of the visual and written portions of the thesis and the final oral examination is required for the awarding of the M.F.A. degree.

Specific requirements for the written document are found in Guidelines for the M.F.A.

Art and Art History - Undergraduate Programs**Overview**

Areas of study for the BA and BFA degrees include:

- [Visual Communication Design](#) (Graphic Design, Web Design, App Design, Game Design and Illustration)
- [Film and Video](#) (Filmmaking, Animation-2D/3D, and Screenwriting)
- [3D Studio](#) (Sculpture, Clay, Glass, and Intermedia)
- [2D Studio](#) (Drawing, Painting, Photography, Printmaking, and Intermedia)
- [Art History](#)

- [Art Education](#)

For additional details, please review the Art and Art History Department's website: http://www.uta.edu/art/index.php/advising/degree_plans/

The mission of the Department of Art and Art History in the College of Liberal Arts at The University of Texas at Arlington is to provide and encourage education in visual arts and art history. The curriculum provides students with an extensive education through an understanding of professional, theoretical, visual and analytical processes. To assist students in comprehending the fundamental nature of the visual arts, its boundaries, methods and technologies, the department offers a comprehensive range of media and methodologies. Students will be able to create work in a number of unique and exciting media and articulate an understanding of their work in the context of art, its history, society and culture. The Department of Art and Art History offers degrees in the following:

- Bachelor of Fine Arts (B.F.A.) in Art
- Bachelor of Fine Arts (B.F.A.) in Art Education (Teacher Certification)
- Bachelor of Arts (B.A.) in Art
- Bachelor of Arts (B.A.) in Art History

Students are constantly challenged to think in experimental and creative as well as disciplined and established ways as they take their places in a changing and increasingly complex world. They may choose among such varied options as: teaching, visual communication (graphic design), studio art, photography, curatorial studies, art historical research, film production, or a variety of Web-based or online content creation.

The Gallery at UT Arlington (<http://www.uta.edu/gallery>) is an exceptionally valuable resource for students in the department. It presents a full program of major exhibitions in its 4,900-square-foot gallery, including lectures, symposia, screenings and publications.

Situated in the center of two major metropolitan cities, each supporting a nationally significant cultural community, the Department of Art and Art History extends and enhances its programs through co-sponsorship of projects with area museums, off-campus courses and student internships. This unique blend of resources and programs gives graduates of the department a distinctive point of view and better prepares them to make the transition into a challenging professional world.

Facilities

The Department of Art & Art History studios and classrooms are located in two facilities:

The Fine Arts Building at 502 S. Cooper Street houses Art History, Film/Video, Photography, Visual Communication, Animation, Drawing, 2-D Design, 3-D Design as well as the Digital Design foundation classes. Also included are Departmental Offices, The Gallery at UT Arlington and the Visual Resources Commons.

The Studio Arts Center at 810 S. Davis Street houses the following studios: Clay, Glass, Painting, Printmaking, Neon and Sculpture. It is also the site of Gallery West, a student-run exhibition space.

Student Concentration Portfolio Review

The student concentration portfolio review is a method of assessing art student's progress and their preparedness to enter advanced classes in the B.F.A. program. The review will be able to recommend either acceptance into the B.F.A./B.A. programs (a pre-professional program) or placement into the B.A. degree (a more general program).

Transfer and new students would be allowed to register for the B.F.A./B.A. as "Art intended." Those students designated as "Art" would be scheduled by the Art Advising Office into a set calendar of entrance reviews, by panels of appropriate faculty members.

As 21 and 36 studio class hours are achieved, each potential B.F.A./B.A. student will be reviewed by appropriate faculty (not by a standing committee). At 21 hours, the review would have the purpose of "entrance" into the B.F.A./B.A. programs.

For more information concerning the student concentration portfolio review, visit here (http://www.uta.edu/art/index.php/advising/concentration_portfolio_review_cpr) or contact the Art and Art History advisor.

Computer and Oral Competency

Students majoring in Art or Art History are required to demonstrate computer use and oral communication competency.

Computer use proficiency can be demonstrated by completion of:

- ART 2304 DIGITAL DESIGN (Required for Studio majors)
- ART 2300 METHODS FOR THE STUDY OF ART HISTORY (Required for Art History majors)
- or by completion of the University administered computer competency exam.

Oral communication competency can be demonstrated by completion of:

- ART 2300 METHODS FOR THE STUDY OF ART HISTORY (Required for Art History majors)
- ART 4100 SENIOR EXHIBITION (Required for Studio, Art Education¹, and Art History¹ majors) or ART 4201 PORTFOLIO PRESENTATION (Required for BA Studio majors)
- COMS 1301 FUNDAMENTALS OF PUBLIC SPEAKING, COMS 2305 BUSINESS AND PROFESSIONAL COMMUNICATION, , or COMS 3315 COMMUNICATION FOR EDUCATORS.

¹ Art Education and Art History majors will select a specific section, with the assistance of advisors, of ART 4100 for Senior Lecture and Senior Research Presentation.

Degree Programs

BACHELOR OF FINE ARTS IN ART

Areas of study for the BFA degree include:

- [Visual Communication Design](#) (Graphic Design, Web Design, App Design, Game Design, and Illustration)
- [Film and Video](#) (Filmmaking, Animation-2D/3D, and Screenwriting)
- [3D Studio](#) (Sculpture, Clay, Glass, and Intermedia)
- [2D Studio](#) (Drawing, Painting, Photography, Printmaking, and Intermedia)
- [Art Education](#) (see the *CERTIFICATE, Art Education (Teacher Certification)* section for additional requirements and information)

For additional details, please review the Art and Art History Department's website: http://www.uta.edu/art/index.php/advising/degree_plans/

The B.F.A. degree program offers intensive pre-professional preparation in the field of studio art. This program is designed for those aspiring to work in their field of interest as professionals or to enter graduate school upon completion of the degree. In addition to fulfilling University and the College of Liberal Arts requirements, students planning to graduate with a B.F.A. in Art degree must complete:

ART 1305	TWO-DIMENSIONAL DESIGN	3
ART 1306	THREE-DIMENSIONAL DESIGN	3
ART 1307	DRAWING FUNDAMENTALS	3
ART 2304	DIGITAL DESIGN	3
Select two of the following:	Consult with an advisor regarding satisfying Core requirements.	6
ART 1309	ART OF THE WESTERN WORLD I: GREECE THROUGH RENAISSANCE	
ART 1310	ART OF THE WESTERN WORLD II: BAROQUE TO MODERN	
ART 1317	THE ART OF NONWESTERN TRADITIONS	
Select one course in each of the following areas:		9
2-D Studio		
3-D Studio		
Media Studio		
Total Hours		27

- Maintain a 3.0 GPA within the major.
- Complete 8 credit hours of Modern/Classical Language, in a single language.
- Complete 27 credit hours of Art Foundation courses.
- Complete 6 credit hours of advanced Art History courses.
- Complete 6 credit hours of required Art electives, per accreditation standards, to be discussed with an advisor in support of student's interest.
- Complete 39 credit hours of advanced studio, that includes ART 4100 SENIOR EXHIBITION and ART 4200 PROFESSIONAL PRACTICES--or ART 4356 PROFESSIONAL PREPARATION for Visual Communications majors--to complete the Art Concentration requirements.

BACHELOR OF ARTS IN ART

Areas of study for the BA degree include:

- [Visual Communication Design](#) (Graphic Design, Web Design, App Design, Game Design, and Illustration)
- [Film and Video](#) (Filmmaking, Animation-2D/3D, and Screenwriting)
- [3D Studio](#) (Sculpture, Clay, Glass, and Intermedia)
- [2D Studio](#) (Drawing, Painting, Photography, Printmaking, and Intermedia)
- [Art History](#) (see *Bachelor of Arts in Art History* section below)

For additional details, please review the Art and Art History Department's website: http://www.uta.edu/art/index.php/advising/degree_plans/

The B.A. program in Art is of a more general nature, and is more suited to those whose current academic interests and/or prior work are directed toward a broad overview of art and its relationship to other disciplines. In addition to fulfilling University and the College of Liberal Arts requirements, students planning to graduate with a B.A. degree in Art must complete:

ART 1305	TWO-DIMENSIONAL DESIGN	3
ART 1306	THREE-DIMENSIONAL DESIGN	3
ART 1307	DRAWING FUNDAMENTALS	3
ART 2304	DIGITAL DESIGN	3
Select two of the following: Consult with an advisor regarding satisfying Core requirements.		6
ART 1309	ART OF THE WESTERN WORLD I: GREECE THROUGH RENAISSANCE	
ART 1310	ART OF THE WESTERN WORLD II: BAROQUE TO MODERN	
ART 1317	THE ART OF NONWESTERN TRADITIONS	
Select one course in each of the following areas:		9
2-D Studio		
3-D Studio		
Media Studio		
<hr/> Total Hours		27

- Maintain a 2.5 GPA within the major.
- Complete 14 credit hours of Modern/Classical Language, in a single language.
- Complete 27 credit hours of Art Foundation area courses.
- Complete 6 credit hours of advanced Art History courses.
- Complete 3 credit hours of a required Art elective, per accreditation standards, to be discussed with an advisor in support of student's interest.
- Complete at least 14 credit hours of advanced studio courses, that includes a portfolio presentation (ART 4201 PORTFOLIO PRESENTATION, 2 credits) to fulfill Art Concentration requirements.
- Complete 18 credit hours of coursework to earn the Minor in a non-studio or studio subject area.

BACHELOR OF ARTS IN ART HISTORY

The B.A. program in Art History emphasizes historical research, preparing students for graduate work in art history or museum studies.

In addition to fulfilling University and the College of Liberal Arts requirements, students planning to graduate with a B.A. in Art History must also fulfill the following requirements:

Select two of the following: Consult with an advisor regarding satisfying Core requirements.		6
ART 1309	ART OF THE WESTERN WORLD I: GREECE THROUGH RENAISSANCE	
ART 1310	ART OF THE WESTERN WORLD II: BAROQUE TO MODERN	
ART 1317	THE ART OF NONWESTERN TRADITIONS	
Required:		
ART 2300	METHODS FOR THE STUDY OF ART HISTORY	3
<hr/> Total Hours		9

- Maintain a 3.0 GPA within the major.
- Complete 14 credit hours of Modern/Classical Language, in a single language.
- Complete 9 credit hours in Art History Foundation courses.
- Complete 30 credit hours in Advanced Art History and 1 credit hour Senior Research Presentation.
- *Art History majors are **required** to complete at least one Art History course in a Non-Western Art History area.*
- Complete 18 credit hours of coursework to earn a Minor in a studio or non-art history academic area.
- Complete 3 credit hours in studio art.
- Complete 3 credit hours of a required Art elective, per accreditation standards, to be discussed with an advisor in support of student's interest.
- Electives to satisfy total degree credits.

Requirements for a Bachelor of Fine Arts Degree in Art

Areas of study for the BFA degree include:

- Visual Communication Design (Graphic Design, Web Design, App Design, Game Design, and Illustration)
- Film and Video (Filmmaking, Animation-2D/3D, and Screenwriting)
- 3D Studio (Sculpture, Clay, Glass, and Intermedia)
- 2D Studio (Drawing, Painting, Photography, Printmaking, and Intermedia)
- Art Education (see the *CERTIFICATE, Art Education (Teacher Certification)* section for additional requirements and information)

For additional details, please review the Art and Art History Department's website: http://www.uta.edu/art/index.php/advising/degree_plans/

Students who are interested in a B.F.A. in Art can choose from diverse studio concentrations incorporating fine arts and/or media arts components. Both expand aesthetic awareness and develop personal expression in clay, drawing, glass, metals, painting, printmaking and sculpture in addition to technology-related emphases exploring concerns related to contemporary applications in visual communication, photography and film/video.

Regardless of which emphasis is selected, students are required to complete the Art Foundation requirements prior to beginning work in the concentration.

Pre-Professional Courses

General Core Requirements (p. 93) 39

Requirements for a Bachelor of Arts Degree in Art History

The B.A. in Art History is intended to provide a strong academic preparation for scholarly research and further study at the graduate level. In this degree program, the 18-hour minor requirement may be in studio art. Other suggested fields for the minor are history, literature, anthropology, psychology, philosophy, and modern languages. Students seeking the B.A. degree in art history must complete all the requirements established by the College of Liberal Arts for the B.A. degree and an additional three hours of a 3000/4000-level history course.

Students are advised to complete the foundation requirements (the two-part survey and ART 2300) before beginning work in 3000/4000-level art historical courses. Students are required to take at least one course in each of the three groups: Ancient to Medieval (Group I), Medieval to Modern (Group II), and Modern (Group III). Art History majors are required to complete at least one Art History course in a Non-Western Art History area. One course in a studio medium is required. An additional Art supportive elective course is also required to satisfy accreditation standards. Art history majors may take an additional studio course in their 30 hours of 3000/4000-level art historical studies, upon faculty approval. Students have a 1 credit hour open elective option to satisfy overall degree credits.

Art History majors are required to complete at least one Art History course in a Non-Western Art History area.		
Select two of the following: Consult with an advisor regarding satisfying Core requirements.		6
ART 1309	ART OF THE WESTERN WORLD I: GREECE THROUGH RENAISSANCE	
ART 1310	ART OF THE WESTERN WORLD II: BAROQUE TO MODERN	
ART 1317	THE ART OF NONWESTERN TRADITIONS	
Required:		
ART 2300	METHODS FOR THE STUDY OF ART HISTORY	3
Studio Art course		3
ART 4100 Senior Research Presentation Class		1
Advanced art history, with at least one course chosen from each of the following three groups: ¹		30
Group I (Ancient to Medieval):		
ART 3302	ART OF ANTIQUITY	
ART 3304	JAPANESE ART & ARCHITECTURE	
ART 3306	BYZANTINE AND MEDIEVAL ART	
ART 3316	ANCIENT EGYPTIAN & NEAR EASTERN ART	
ART 3319	ART & ARCHITECTURE OF INDIA	
ART 3320	ART OF THE ANCIENT AMERICAS	
ART 3321	CHINESE ART & ARCHITECTURE	
Group II (Medieval to Modern):		
ART 3307	THE EARLY RENAISSANCE	
ART 3308	HIGH RENAISSANCE	
ART 3310	FILM AS ART	
ART 3312	NEO-CLASSICISM AND ROMANTICISM	
ART 3313	BACKGROUNDS OF MODERN ART	
ART 3315	IMPRESSIONISM	
ART 3319	ART & ARCHITECTURE OF INDIA	
ART 3321	CHINESE ART & ARCHITECTURE	
ART 3325	STUDIES IN THE BAROQUE	
ART 3331	BRITISH ART	
ART 3391	HISTORY OF PHOTOGRAPHY	
ART 4301	ART AND GENDER	
ART 4306	MID-RENAISSANCE	
ART 4312	TOPICS IN NINETEENTH CENTURY ART.	
ART 4330	18TH CENTURY ART	
Group III (Modern):		
ART 3310	FILM AS ART	
ART 3311	AMERICAN ART	
ART 3313	BACKGROUNDS OF MODERN ART	
ART 3314	MODERN ART	

ART 3315	IMPRESSIONISM	
ART 3331	BRITISH ART	
ART 3389	CONTEMPORARY ART	
ART 3391	HISTORY OF PHOTOGRAPHY	
ART 3392	HISTORY AND AESTHETICS OF THE VIDEO IMAGE	
ART 4301	ART AND GENDER	
ART 4308	MUSEUM PRACTICE	
ART 4310	TOPICS IN FILM STUDY	
ART 4314	TOPICS IN 20TH CENTURY ART	
ART 4315	ASPECTS OF CONTEMPORARY ART	
The following courses will have varied topics. Group placement will be determined by that topic:		
ART 4307	SPECIAL TOPICS IN ASIAN ART	
ART 4317	ART AND ISLAM	
ART 4396	SPECIAL STUDIES IN ART HISTORY	
Minor		
18 hours, with at least six hours at 3000/4000 level		18
Total Hours		127

¹ An additional three hours of studio work may be included in these 30 advanced hours with the approval of Art History faculty.

Computer and Oral Competency

Students majoring in Art or Art History are required to demonstrate computer use and oral communication competency.

Computer use proficiency can be demonstrated by completion of:

- ART 2304 DIGITAL DESIGN (Required for Studio majors)
- ART 2300 METHODS FOR THE STUDY OF ART HISTORY (Required for Art History majors)
- or by completion of the University administered computer competency exam.

Oral communication competency can be demonstrated by completion of:

- ART 2300 METHODS FOR THE STUDY OF ART HISTORY (Required for Art History majors)
- ART 4100 SENIOR EXHIBITION (Required for Studio, Art Education², and Art History² majors) or ART 4201 PORTFOLIO PRESENTATION (Required for BA Studio majors)
- COMS 1301 FUNDAMENTALS OF PUBLIC SPEAKING, COMS 2305 BUSINESS AND PROFESSIONAL COMMUNICATION, or COMS 3315 COMMUNICATION FOR EDUCATORS.

²Art Education and Art History majors will select a specific section, with the assistance of advisors, of ART 4100 for Senior Lecture and Research Presentation.

Minor in Art

The student's major department must approve any minor. **However, students interested in Art as a minor (Art History) must consult with the Art and Art History department's Academic Advisor to determine the selection of an approved sequence of courses and to see if there will be courses available for non-art majors.** A minor in Art History requires at least 18 semester hours in Art History, including nine semester hours of advanced work. **Interest in a studio Art minor must be discussed with an Art and Art History department's Academic Advisor to determine availability.**

Art Education (Teacher Certification)

Texas Teacher Certification in Art entails completion of 133 credit hours earned within the Department of Art and Art History and College of Education and Health Professions academic programs. It entails earning the B.F.A. degree in Art in addition to 15 hours of College of Education coursework that are required to fulfill minimum certification guidelines in Texas. Students earning the B.F.A. within this program are required to complete B.F.A. standard courses as well as:

ART 3322	INTRODUCTION TO ART EDUCATION (Lecture)	3
ART 3359	APPLYING AND TEACHING ART CURRICULA (Lecture/Studio)	3
ART 3323	PLANNING AND CONSTRUCTING ART CURRICULA (Lecture/Studio)	3

ART 4365	TECHNOLOGY IN ART EDUCATION (Lecture/Studio)	3
Total Hours		12
EDML 4300	PRE-ADOLESCENT/ADOLESCENT GROWTH AND DEVELOPMENT	3
EDUC 4352	TEACHING DIVERSE POPULATIONS	3
LIST 4343	CONTENT AREA READING AND WRITING	3
EDUC 4647	SECONDARY STUDENT TEACHING	6

- Maintain a 3.0 GPA within the Art major.
- Maintain a 3.0 overall GPA as required by the College of Education and Health Professions.
- Earn a minimum score of 220 on Writing and 230 on Math portion of the THEA in addition to a 270 minimum score on the English portion of the Texas Success Initiative (Texas Higher Education Assessment) test.
- Submit official transcripts for credit hours earned at ALL colleges attended prior to enrollment at UT Arlington.
- Have maintained a sufficient overall GPA at previous colleges to be considered for admission to the College of Education and Health Professions Teaching Program. Acceptance into the college may be delayed if the student's overall GPA does not meet the minimum 3.0 required by the College.
- Must complete 12 credit hours of art methods courses and a Senior Presentation class¹ within the Art major.
- Must complete 15 credit hours of certification coursework within the College of Education and Health Professions.

Art majors are encouraged to apply to the Teacher Education Program within the College of Education and Health Professions after one full semester of coursework has been completed at this university.

¹ Graduating Art Education students will be required to give a lecture open to the public based on experiences within their concentration (K-12 Education). This lecture will be structured around the student's teaching philosophy, curriculum management issues from their internship, an overview of undergraduate Art Education classroom projects and residency material, as well as examples of the student's personal portfolio.

Art Education students will still have the option to exhibit work by petitioning the media areas for faculty review in the 4100 B.F.A. Exhibition at the end of their graduating term under the same terms and conditions as established for other Studio Concentrated majors.

Consult the College of Education and Health Professions Advising Office for information concerning any additional application requirements and/or State of Texas requirements for certification.

Classical Studies - Undergraduate Program

Overview

Classical Studies ultimately touches upon almost every field of human inquiry. Indeed, the Western cultural tradition begins with the achievements of the ancient Greeks and Romans in a wide range of fields including politics, literature, art, and philosophy.

The Program in Classical Studies draws on the faculty of various departments in the College of Liberal Arts and acknowledges the importance of approaching the civilizations of the ancient Mediterranean world from a variety of disciplinary perspectives.

INTS Bachelor of Arts

It is also possible to develop a customized bachelor of arts degree plan using Classical Studies component courses when majoring in UT Arlington's Interdisciplinary Studies (INTS) program. See www.uta.edu/ints.

Ancient Language Courses

In addition to courses that are taught in English, the Classical Studies program also offers instruction in ancient Greek and Latin. Either of these languages satisfies the language requirement for liberal arts majors.

Minor

The Minor in Classical Studies aims to help students expand the depth and scope of their knowledge of ancient cultures and learn about different approaches to them. It will be of particular interest to those students majoring in anthropology, art, art history, history, modern languages, music, philosophy, political science, or theatre arts. In addition to these majors, students who intend to pursue graduate or professional studies in medicine, the law, art, classics, Biblical studies, ancient Near Eastern studies, or medieval studies will find a Minor in Classical Studies to their advantage.

Students seeking a minor in Classical Studies should first consult with advisors in their departments or programs for approval of the minor, then with the Director of Classical Studies. Students may combine courses in Classical Studies in various ways to comprise the following four minor options:

OPTION 1: GREEK LANGUAGE

(20 hours, at least six of which must be 3000/4000 level) Required courses:

GREK 1441	GREEK LEVEL I	4
GREK 1442	GREEK LEVEL II	4
GREK 2313	GREEK LEVEL III	3
GREK 2314	GREEK LEVEL IV	3
Two upper-level courses:		6
GREK 4335	TOPICS IN GREEK LITERATURE	
GREK 4391	CONFERENCE COURSE	
Total Hours		20

OPTION 2: LATIN LANGUAGE

(20 hours, at least six of which must be 3000/4000 level) Required courses:

LATN 1441	LATIN LEVEL I	4
LATN 1442	LATIN LEVEL II	4
LATN 2313	LATIN LEVEL III	3
LATN 2314	LATIN LEVEL IV	3
Two upper-level courses:		6
LATN 4335	TOPICS IN LATIN LITERATURE	
LATN 4391	CONFERENCE COURSE	
Total Hours		20

OPTION 3: CLASSICAL CIVILIZATION

(20 hours, at least six of which must be 3000/4000 level) Required:

Select one of the following:		8
GREK 1441 & GREK 1442	GREEK LEVEL I and GREEK LEVEL II	
LATN 1441 & LATN 1442	LATIN LEVEL I and LATIN LEVEL II	
Select four of the following, provided that they include 6 hours at 3000/4000 level:		12
GREK 1441	GREEK LEVEL I (if requirement above is met by LATN 1441)	
GREK 1442	GREEK LEVEL II (if requirement above is met by LATN 1442)	
GREK 2313	GREEK LEVEL III	
GREK 2314	GREEK LEVEL IV	
GREK 4335	TOPICS IN GREEK LITERATURE	
GREK 4391	CONFERENCE COURSE	
LATN 1441	LATIN LEVEL I (if requirement above is met by GREK 1441)	
LATN 1442	LATIN LEVEL II (if requirement above is met by GREK 1442)	
LATN 2313	LATIN LEVEL III	
LATN 2314	LATIN LEVEL IV	
LATN 4335	TOPICS IN LATIN LITERATURE	
LATN 4391	CONFERENCE COURSE	
CLAS 1300	INTRODUCTION TO CLASSICAL MYTHOLOGY	
CLAS 2300	HOLLYWOOD CLASSICS: THE ANCIENT WORLD IN FILM	
CLAS 2303	THE CLASSICAL ROOTS OF ENGLISH VOCABULARY	
CLAS 2307	WOMEN IN THE ANCIENT WORLD	
CLAS 3310	INTRODUCTION TO GREEK CIVILIZATION	
CLAS 3320	INTRODUCTION TO ROMAN CIVILIZATION	
CLAS 3323	TOPICS IN CLASSICAL MYTHOLOGY	
ANTH 2339	INTRODUCTION TO ARCHAEOLOGY	
ANTH 2349	HONORS PRINCIPLES OF ARCHAEOLOGY	

ANTH 3370	ARCHAEOLOGY OF THE PREHISTORIC AEGEAN
ANTH 3371	ARCHAEOLOGY OF GREECE
ANTH 3372	ARCHAEOLOGY OF THE ANCIENT NEAR EAST
ANTH 3373	ARCHAEOLOGY OF EGYPT
ART 3302	ART OF ANTIQUITY
ENGL 3339	CLASSICAL BACKGROUNDS
HIST 3374	ANCIENT GREECE
HIST 3375	ANCIENT ROME
HIST 3380	HISTORY OF ANCIENT SPORT
PHIL 3301	HISTORY OF PHILOSOPHY: ANCIENT PHILOSOPHY
PHIL 3302	HISTORY OF PHILOSOPHY: ROMAN AND MEDIEVAL PHILOSOPHY
POLS 4327	POLITICAL IDEAS OF THE ANCIENT WORLD

Total Hours

20

OPTION 4: ANCIENT STUDIES

(18 hours, at least six of which must be 3000/4000 level) This option may be satisfied using any combination of the courses listed under Option 3, provided that they include six hours at the 3000/4000 level.

Communication

Undergraduate Degree

- Bachelor of Arts in Communication (p. 364)

Graduate Degree

- Master of Arts in Communication (p. 361)

Certificates

- Certificate in Emerging Media (p. 368)

Communication - Graduate Program

Objective

The Master of Arts in Communication program includes the areas of Communication Studies and Mass Communication. It is designed to meet the educational needs of recent graduates and professionals.

The program's curriculum emphasizes the integrated nature of the communication discipline. For example, the program offers education in the management of media resources, the changing role of media and technology in an information society, and a theoretical and ethical framework for considering the impact of media on society.

Educational and organizational professionals can focus on working with both external and internal constituencies and communication processes of management, training and development, and human resources. A broader knowledge of communication processes at the interpersonal, organizational, and mass media levels provides the opportunity for career enhancement and/or further graduate studies.

Admission Standards

Prospective students must apply for admission through, and supply all information required by the Graduate School. In addition, the following information will be considered in determining admission status into the program: undergraduate GPA, GRE scores, letters of recommendation and an essay. All criteria are considered together; no single factor will eliminate a prospective student from consideration.

The following table outlines specific requirements for unconditional and probationary admission.

GRADUATE ADMISSION STANDARDS

Admissions Criteria	Unconditional	Probationary	
GPA on last 60 hours of Undergraduate Program (as calculated by Graduate School of UT Arlington)	3.3	3.0 ¹	2.8-2.99
GRE	Evaluated	Evaluated	Evaluated

3 letters of recommendation	Evaluated	Evaluated	Evaluated
Essay	Evaluated	Evaluated	Evaluated

¹ Minimum undergraduate GPA requirement for unconditional admission is a 3.0 on a 4.0 scale.

Students not meeting unconditional criteria will be reviewed by a committee of Chair of the Department of Communication, Graduate Advisor, and Graduate Program Committee. The committee will review the following: a minimum undergraduate GPA of 2.8 (in last 60 hours of undergraduate work); GRE scores (verbal, analytical and quantitative); letters of recommendation; and essay. An applicant who performs successfully on a majority of these criteria may be admitted on probation. The committee will make a final admission decision and document that decision for the student record.

UNCONDITIONAL ADMISSION

Criteria for unconditional admission status are designated in the previous table. Decisions on unconditional admission are made after considering the minimum GPA noted in the graduate admission standards and all other criteria noted in the preceding paragraph.

PROBATIONARY ADMISSION

Criteria for probationary admission status are designated in the previous table. When on probation, students can make no grade lower than a 3.0 in their first 12 semester hours of graduate coursework.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements.

DEFERRED STATUS

Deferred decision is granted when a file is incomplete or when a denied decision is not appropriate.

DENIAL OF ADMISSION

An applicant will be denied admission if he or she has less than satisfactory performance on a majority of admission criteria listed in the previous table.

FELLOWSHIP CRITERIA

Fellowship selection will be based on the highest GPA in the last 60 hours of the bachelor's degree program. Candidates for fellowships must meet the following criteria:

1. New students coming to UT Arlington in the fall of each semester.
2. Have a GPA of at least 3.0 in their last 60 hours of their bachelor's degree program.
3. Minimum 3.0 GPA in graduate credit hours.
4. Enrolled in a minimum of 6 semester hours in the long semesters.

Degree Requirements

The Master of Arts in Communication degree offers non-thesis/coursework and thesis options. The non-thesis/coursework option will require 36 hours of coursework. The thesis option will require 30 hours that will include 24 credit hours of coursework and a 6-credit-hour thesis. A final comprehensive examination will be required of students in all options.

Courses required of all students in the program in the first semester: 6

COMM 5300	ADVANCED THEORIES IN COMMUNICATION
COMM 5305	COMMUNICATION RESEARCH METHODS

Course required of all students in the program in the second semester: 3

COMM 5306	QUALITATIVE RESEARCH METHODS ¹
-----------	---

Courses students may elect to take: 6-18

Thesis Option: Select at least two of the following communication electives:

Non-Thesis/coursework Option: Select at least six of the following communication electives:

COMM 5307	HISTORICAL RESEARCH METHODS IN COMMUNICATION
COMM 5310	THEORIES IN PERSUASION
COMM 5316	CORPORATION COMMUNICATION STRATEGIES
COMM 5320	ADVANCED VISUAL COMMUNICATION
COMM 5321	ADVANCED INTERNET MARKETING COMMUNICATION
COMM 5323	COMPUTER-MEDIATED COMMUNICATION
COMM 5332	ADVANCED PROFESSIONAL COMMUNICATION

COMM 5335	GLOBAL COMMUNICATION
COMM 5341	MEDIA MANAGEMENT
COMM 5345	COMMUNICATION CAMPAIGNS
COMM 5346	MEDIA AND PUBLIC POLICY
COMM 5347	CRISIS COMMUNICATION
COMM 5349	COMMUNICATION IN VIRTUAL ORGANIZATIONS
COMM 5350	HEALTH COMMUNICATION
COMM 5351	POLITICAL COMMUNICATION
COMM 5391	CONFERENCE COURSE
COMM 5392	SEMINAR
COMM 5399	GRADUATE COMMUNICATION INTERNSHIP
The following three courses are not electives	
COMM 5398	THESIS
COMM 5698	THESIS
COMM 5301	SUPERVISED TEACHING

Total Hours

15-27

- ¹ An advanced quantitative research methods course from another department may be substituted for this course with the permission of the communication graduate advisor.

Graduate courses outside the department may be taken with the approval of the Graduate Studies Committee. Students should submit a letter to the graduate advisor including course title, course description, and statement of value to the program of study.

Non-Thesis Option. (36 semester hours total) 36 semester credit hours of coursework are given. The final comprehensive examination will consist of a written and oral exam covering the coursework. Additional remedial work may be required if deemed necessary by the student's committee. Students failing the examination will not be allowed to test again.

Thesis Option. (30 semester hours total) 24 semester credit hours of coursework and a thesis, for which 6 semester hours are given. The final comprehensive examination will consist of an oral defense of the thesis prospectus and an oral defense of the thesis. Additional remedial work may be required if deemed necessary by the student's committee.

Communication - Undergraduate Programs

Overview

The degree Bachelor of Arts in Communication is offered with multiple specializations. The department curricula provide students with an overview of the role and function of communication in society. These courses present a broad academic exposure, including theories, skills, techniques, critical analysis, historical perspectives, and aesthetic appreciation.

The Department of Communication seeks to emphasize theories and techniques which give students the ability to adapt to rapid changes in communication technology.

Within the major disciplines, specializations are available in advertising, broadcasting, communication technology, journalism, public relations, organizational communication, and speech communication. Additionally, there are two specializations for teacher certification: secondary teaching level in journalism and secondary teaching level in speech communication. Contact the College of Education for more information.

All majors in the Department of Communication must complete the following core courses. COMM 2315 must be completed before taking any three or four thousand level course in the department. The department math requirement must be completed before reaching 60 hours.

COMM 2315	COMMUNICATION THEORY	3
COMM 3300	COMMUNICATION TECHNOLOGY	3
COMM 3310	COMMUNICATION LAW & ETHICS	3

Declaring a Major in the Department of Communication

I. ADMISSION TO MAJOR

All undergraduate students seeking to declare a major in the Department of Communication (ADVT, BCMN, COMS, CTEC, JOUR, PREL) must meet the following criteria:

Completion of a minimum of 12 hours in residence at The University of Texas at Arlington with a minimum cumulative GPA of 2.25/4.0.

Students that do not meet these minimum requirements can request to be admitted as a COMM Intended major. Please see restrictions below.

II. ADMISSION AS A COMM INTENDED MAJOR

1. Completion of a minimum of 12 hours in residence at The University of Texas at Arlington with a minimum cumulative GPA of 2.0/4.0.
2. COMM Intended majors may enroll in up to a total of 18 hours in the Department of Communication (ADVT, BCMN, COMS, CTEC, JOUR, PREL).
3. Students who do not achieve a cumulative UT Arlington GPA of 2.25/4.0 by the completion of 18 hours in the Department of Communication will not be cleared to continue in the department.

III. DISMISSAL FROM DEPARTMENT OF COMMUNICATION COMM INTENDED STATUS

Students who do not meet the requirements for declaring a Department of Communication major after completing eighteen (18) hours of communication course work will not be allowed to take additional communication courses at UT Arlington. The student will be suspended from the Department of Communication COMM Intended status and must choose a major other than COMM Intended at that time in order to remain enrolled at UT Arlington.

General Academic Standards in the Department of Communication

1. Graduation as a major in the Department of Communication must meet the UT Arlington graduation standard of a minimum GPA of 2.0/4.0.
2. Graduation as a major in the Department of Communication must meet the department graduation standard of a minimum cumulative GPA of 2.0/4.0 in all department courses (ADVT, BCMN, COMS, CTEC, JOUR, PREL).

Certificate in Emerging Media

This certificate provides students with expertise in using and managing emerging media to communicate effectively to audiences in a variety of situations, across multiple platforms.

To earn this certificate students must complete the following classes with a grade of C or better:

BCMN 2370	MULTIMEDIA PRODUCTION (Broadcast majors must take BCMN 2358)	3
PREL 3320	STRATEGIC SOCIAL MEDIA COMMUNICATION	3
CTEC 2350	WEB COMMUNICATION DESIGN AND DEVELOPMENT 1	3
COMM 3303	COMMUNICATION GRAPHICS	3
COMM 4360	EMERGING MEDIA STRATEGY	3
Total Hours		15

ADVT 2337	INTRODUCTION TO ADVERTISING	3
ECON 2305	PRINCIPLES OF MACROECONOMICS	3

Total Hours 42

¹ with a grade of C (2.0/4.0) or higher

² PREL 2338 INTRODUCTION TO PUBLIC RELATIONS must be completed with a grade of C (2.0/4.0 scale) or higher before enrolling in any upper-level PREL courses.

Public relations majors must meet the following math requirement: MATH 1308 ELEMENTARY STATISTICAL ANALYSIS, with a grade of C (2.0/4.0 scale) or higher.

Teacher Certification

Department specializations that provide for teacher certification are the following: secondary teaching level in journalism or speech communication. Students interested in Texas Teacher Certification should consult the College of Education section of this catalog for the most recent changes in requirements regarding admission to teacher education, completion of University programs in preparation for certification, and eligibility for certification after graduation. Students whose major is taken in the Department of Communication will complete all of the hours listed in the major field. Students seeking teacher certification with a major in a communication field should follow the sections below:

Criminology and Criminal Justice

Undergraduate Degree

- Bachelor of Arts in Criminology and Criminal Justice (p. 371)
- Online Bachelor Degree in Criminology and Criminal Justice (p. 374)
- Minor in Criminology and Criminal Justice (p. 375)

Graduate Degree

- Criminology and Criminal Justice, M.A. (p. 369)

Certificates

- Certificate in Crime Analysis (p. 375)
- Certificate in Crime Scene Technology (p. 375)
- Certificate in Law Enforcement Administration (p. 375)
- Certificate in Legal Studies (p. 375)

Criminology & Criminal Justice - Graduate Program

Overview

The program leading to the MA degree in criminology and criminal justice offers a comprehensive examination of the criminal justice system, an exploration of criminal and delinquent behaviors, a foundation in research and statistics, and an opportunity to explore other relevant topics of interest to the student.

It is designed for:

1. Pre-professional students who wish to pursue a career in some aspect of criminal justice, or in a related field, and to develop the perspectives and knowledge appropriate to doing so;
2. In-service professionals who wish to enhance and broaden their knowledge in this and related areas of study;
3. Students pre-professional or in-service who wish to pursue further relevant post-graduate studies, whether academic or professional.

To meet these objectives, and to develop a broadly educated student, the program offers both thesis and non-thesis options. Both options require the student to complete 18 hours of core courses within the department.

The coursework (non-thesis) option is generally recommended for students who do not intend to pursue doctoral-level studies. It does not require applicants to have prior criminal justice employment and is designed to provide a base of knowledge and skills necessary to enter and/or administer criminal justice related programs.

The non-thesis option requires students to research, analyze, and present recommendations on a criminal justice related policy. Students must be enrolled in the semester in which they complete and present their policy research and recommendations. Student presentations to the faculty are scheduled once each long semester, typically in mid November and again in mid April.

The thesis option is generally recommended for students wishing to pursue further education in professional schools or doctoral level studies. It is designed to prepare students to conduct research in criminology and criminal justice and actively participate in the development of knowledge. Students choosing the thesis option are required to take a six-hour thesis course during the semester in which the thesis is defended. Non-thesis students take two additional courses constituting six credit hours. Students are required to defend their thesis proposal at least one semester prior to defending their final thesis and before submission of materials to IRB.

With the approval of the Graduate Advisor, students may also use their elective hours to concentrate on a particular field of study, such as sociology, political science, corrections, policing, or a multidisciplinary approach to a particular focus, such as administration-or research. Thesis students take 12 hours of elective courses and non-thesis students take 18 hours.

Admission Requirements

The criminology and criminal justice graduate program adheres to the following admission criteria.

UNCONDITIONAL ADMISSION

In addition to having satisfied the basic graduate admission requirements of UT Arlington outlined in this Catalog in the Admissions section under University Requirements & Procedures, applicants seeking unconditional admission to the CRCJ graduate program are required to meet the following four criteria:

1. Must have successfully completed a baccalaureate degree in criminology/criminal justice or related discipline.
2. A minimum GPA of 3.0 in the last 60 hours of undergraduate work as calculated by the Graduate School.
3. A minimum of 149 on both verbal and quantitative subsets of the GRE (minimum of 440 on both verbal and quantitative subsets under old scoring system). The GRE is not required of an applicant who satisfies all of the following requirements:
 - Has three or more years of professional experience with increasing responsibility in a criminal justice (or closely related) occupation and provides a detailed work history documenting this experience.
 - Submits an acceptable sample of professional writing authored solely by the applicant. This will be evaluated to assess writing and analytical skills.
 - Successfully completes a personal interview with the graduate advisor, where credentials, goals and objectives of graduate studies, and views related to the study and profession of Criminology/Criminal Justice will be discussed.
4. Must submit three letters of recommendation addressing the applicant's potential for success in the graduate program from persons knowledgeable of the applicant's abilities.

Applicants meeting all four of the criteria will be granted unconditional admission into the CRCJ Graduate Program. Applicants who lack one of the above criteria may be considered for probationary admission.

PROBATIONARY ADMISSION

Applicants who fail to meet the four criteria for unconditional admission may be considered for probationary admission. Applicants who fail to meet the GPA or GRE requirements for unconditional admission may be granted probationary admission if any of the following three conditions is met:

1. the GPA falls between 2.5 and 3.0 and the remainder of the application package is satisfactory;
2. the GPA falls between 2.25 and 2.49, the remainder of the application package is satisfactory, and the applicant has five years of professional experience in a criminal justice (or closely related) occupation and a detailed work history documenting this experience; or
3. the GPA fall between 2.00 and 2.24, the remainder of the application package is satisfactory, and the applicant has 10 or more years of professional experience in a managerial or administrative position within a criminal justice (or closely related) occupation and a detailed work history documenting that experience.

In addition to providing a work history, applicants using their work history for admission must also provide a writing sample and complete a personal interview. Applicants admitted on probation will remain in that status until completing 12 hours of graduate coursework with no grade lower than a B.

DEFERRED ADMISSION

In the event an applicant does not meet the minimum criteria established for unconditional or probationary admission, yet nonetheless is judged by the graduate advisor, in consultation with the CRCJ Graduate Studies Committee, to show promise, the admission decision may be deferred, with instructions provided to the student indicating the course of action to be taken prior to subsequent review. Admission decisions may also be deferred if the application package is incomplete.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements may be granted provisional admission.

DENIAL

Applicants who do not satisfy all of the criteria for any of the above categories will be denied admission.

FELLOWSHIPS

Fellowships, when available, will be awarded on a competitive basis. Nominees for the Graduate School Master's Fellowship in the criminology/criminal justice graduate program will be selected based on the following criteria:

- Candidates must be new students entering in the fall semester, with a minimum of 6 hours of enrollment in both long semesters to retain their fellowships.
- The minimum undergraduate GPA requirement is 3.00, as calculated by the Graduate School, plus a GPA of 3.0 for any graduate credit hours.
- Transcript of a completed bachelor's degree in criminology/criminal justice (or appropriate related field) from an accredited institution.
- Three letters of recommendation (may use the same letters submitted for consideration into the criminology/criminal justice graduate program).
- A written statement explaining the applicant's reasons for graduate study in criminology/criminal justice.

MA Degree Requirements

The MA degree in criminology and criminal justice requires a minimum of 36 semester hours, regardless of the option selected, and includes 18 semester hours of required core coursework.

Core		
CRCJ 5301	PROSEMINAR IN CRIMINOLOGY AND CRIMINAL JUSTICE	3
CRCJ 5309	RESEARCH METHODS IN CRIMINAL JUSTICE	3
CRCJ 5310	STATISTICS & RESEARCH PRACTICES IN CRIMINAL JUSTICE	3
CRCJ 5327	CONSTITUTIONAL ISSUES IN THE CRIMINAL JUSTICE SYSTEM	3
CRCJ 5342	ETHICS IN CRIMINAL JUSTICE	3
CRCJ 5350	THEORETICAL CRIMINOLOGY	3

Electives		
The number of semester hours available for electives ranges from a minimum of 12 to 18, depending on the option selected (thesis or non-thesis). Ordinarily, elective hours are taken in areas of particular interest to the student, with the advice and approval of the Graduate Advisor.		12-18

Thesis		
CRCJ 5698	THESIS	6
Students opting for the Thesis track must take 6 hours of thesis credits the semester they plan to defend their thesis and graduate.		6

All candidates for the graduate degree must pass a final comprehensive examination, written, oral, or both written and oral. The scope, content, and form of this examination will be determined by the student's supervising committee.

Dual Degree Requirements

The M.A. degree in criminology and criminal justice requires 36 semester hours and includes 18 semester hours of required core coursework. Up to 9 hours of courses outside of CRCJ may be allocated as electives for the CRCJ degree, with the prior approval of the graduate advisor.

Core		
CRCJ 5301	PROSEMINAR IN CRIMINOLOGY AND CRIMINAL JUSTICE	3
CRCJ 5309	RESEARCH METHODS IN CRIMINAL JUSTICE	3
CRCJ 5310	STATISTICS & RESEARCH PRACTICES IN CRIMINAL JUSTICE	3
CRCJ 5327	CONSTITUTIONAL ISSUES IN THE CRIMINAL JUSTICE SYSTEM	3
CRCJ 5342	ETHICS IN CRIMINAL JUSTICE	3
CRCJ 5350	THEORETICAL CRIMINOLOGY	3

Electives		
The number of semester hours available for electives is 12 hours in the Thesis track and 18 hours in the non-thesis track. Upon approval of the graduate advisor, up to 9 hours of electives may be taken outside of CRCJ.		12-18

Thesis		
CRCJ 5698	THESIS	6
Students opting for the thesis track within CRCJ must take 6 hours of thesis credits the semester they plan to defend their thesis and graduate.		

Criminology and Criminal Justice - Undergraduate Programs

Overview

The Department of Criminology and Criminal Justice (CRCJ) at The University of Texas at Arlington is designed to strike a balance between theory and application. The department's curriculum emphasizes the theoretical foundations necessary to understand human behavior; the criminal justice system; and the application of theoretical knowledge to the development and critical analysis of policy implications. The curriculum provides strong preparation for graduate work in both academic and professional programs and prepares students to more fully understand, analyze, and operate in a variety of settings within or related to the justice system.

The curriculum includes

- general education courses required to provide a foundation in the liberal arts,
- disciplinary courses that provide valuable theoretical and methodological perspectives, and
- courses that examine various aspects of crime and the judicial systems; law enforcement, and correctional processes designed to respond to the crime problem.

Requirements to Major in Criminology and Criminal Justice

Students admitted to UT Arlington from high school or transfer students who have completed less than 30 hours of transferable college credit will be admitted as Criminology and Criminal Justice (CRCJ)-Intended majors, and will be allowed to declare CRCJ as their major based on the following criteria:

- Completed at least 15 hours of the University core courses with a minimum 2.0 GPA
- Completed both CRCJ 2334 INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM, and one other CRCJ core course with at least a C, and earned at least 15 grade points in the two courses combined (2.5 GPA).

Students admitted to UT Arlington who have completed 30 or more hours of transferable college credit will allowed to declare CRCJ as their major based on the following criteria:

- Achieved a minimum 2.25 GPA for all college credit earned, and
- Completed CRCJ 2334 INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM, or an equivalent course, and one other UT Arlington CRCJ core course, or equivalent course with at least a C, and earned at least 15 grade points in the two courses combined (2.5 GPA).

Students already admitted to UT Arlington, who previously declared a major other than CRCJ, who desire to change to CRCJ as their major will be accepted based on the following criteria:

- Completed at least 15 hours of the College of Liberal Arts core courses,
- Achieved a minimum 2.25 GPA in all hours completed at UT Arlington, and
- Completed both CRCJ 2334 INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM, and one other CRCJ core course with at least a C, and earned at least 15 grade points in the two courses combined (2.5 GPA).

Requirements for a Bachelor of Arts Degree in Criminology and Criminal Justice

Pre-Professional Courses

General Core Requirements (p. 93)		39
Program Requirements (These courses also fulfill requirements in the General Core)		
ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
Mathematics (MATH 1301 or higher; MATH 1301 and MATH 1308 are recommended)		
Modern and Classical Languages: 1441, 1442, 2313, 2314 (with a total of 14 hours)		

Professional Courses

Major

A CRCJ major consists of 54 hours, including 33 hours of required CRCJ core courses and 21 hours of major electives (See additional requirements below)

CRCJ Core (Required)		
CRCJ 2334	INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM ¹	3
CRCJ 2335	ETHICS AND THE CRIMINAL JUSTICE SYSTEM	3
CRCJ 2350	INTRODUCTION TO LAW ENFORCEMENT	3
CRCJ 3300	THEORETICAL CRIMINOLOGY	3
CRCJ 3310	PROFESSIONAL WRITING FOR CRCJ MAJORS	3
CRCJ 3338	JUVENILE JUSTICE SYSTEMS	3
CRCJ 3340	CRIMINAL JUSTICE STATISTICS	3
or SOCI 3352	SOCIAL STATISTICS	
CRCJ 3350	INTRODUCTION TO RESEARCH METHODS IN CRIMINOLOGY AND CRIMINAL JUSTICE	3
CRCJ 4301	THE AMERICAN JUDICIAL SYSTEM	3
CRCJ 4332	COMMUNITY CORRECTIONS	3
or CRCJ 4333	INSTITUTIONAL CORRECTIONS	
CRCJ 4380	COMPARATIVE CRIMINAL JUSTICE SYSTEMS	3
CRCJ Major Electives (of which at least 15 hours must be CRCJ-prefix courses):		
CRCJ 2340	CRIMINAL INVESTIGATION	
CRCJ 3307	INTRODUCTION TO SECURITY SYSTEMS	
CRCJ 3320	CYBERCRIME	
CRCJ 3330	FUNDAMENTALS OF LAW	

CRCJ 3336	POLICE MANAGEMENT AND ADMINISTRATION
CRCJ 3337	ADVANCED CRIMINAL PROCEDURE
CRCJ 3370	INTRODUCTION TO FORENSICS
CRCJ 3371	CRIME SCENE INVESTIGATION
CRCJ 3380	RACE, CRIME, AND JUSTICE
CRCJ 3385	WOMEN AND CRIME
CRCJ 3390	VICTIMOLOGY
CRCJ 3395	DRUG USE AND ABUSE
CRCJ 4309	PRIVATE SECURITY ADMINISTRATION
CRCJ 4315	CRIMINAL CAREERS AND BEHAVIOR SYSTEMS
CRCJ 4325	GANGS
CRCJ 4332	COMMUNITY CORRECTIONS
or CRCJ 4333	INSTITUTIONAL CORRECTIONS
CRCJ 4340	FORENSIC DEATH INVESTIGATION
CRCJ 4341	FORENSIC EXAMINATION OF IMPRESSION EVIDENCE
CRCJ 4342	FORENSIC HAIR AND FIBER IDENTIFICATION
CRCJ 4343	FORENSIC EXPERT TESTIMONY
CRCJ 4345	CRIME AND THE CRIMINAL JUSTICE SYSTEM IN THE MEDIA
CRCJ 4352	TERRORISM AND MASS VIOLENCE
CRCJ 4355	ORGANIZED CRIME: NATIONAL AND INTERNATIONAL
CRCJ 4365	CAPITAL PUNISHMENT
CRCJ 4386	TOPICS IN CORRECTIONS
CRCJ 4387	TOPICS IN CRIME AND CRIMINOLOGY
CRCJ 4388	TOPICS IN LAW AND JUDICIAL PROCESSES
CRCJ 4389	TOPICS IN LAW ENFORCEMENT AND PRIVATE SECURITY
CRCJ 4390	INTERNSHIP IN CRIMINAL JUSTICE
CRCJ 4191	CONFERENCE COURSE
CRCJ 4291	CONFERENCE COURSE IN CRIMINAL JUSTICE
CRCJ 4391	CONFERENCE COURSE IN CRIMINAL JUSTICE
CRCJ 4394	HONORS THESIS/SENIOR PROJECT

6 hours of electives can be taken from the following courses:

ECON 3302	THE ECONOMICS OF CRIME
HIST 3317	U.S. LEGAL AND CONSTITUTIONAL HISTORY, COLONIAL TO 1877
HIST 3318	U.S. LEGAL AND CONSTITUTIONAL HISTORY, 1877 TO PRESENT
POLS 3331	CONTEMPORARY ISSUES IN CIVIL LIBERTIES
POLS 3333	JURISPRUDENCE
POLS 3335	CRIMINAL LAW
POLS 4332	U.S. CONSTITUTIONAL LAW: FUNDAMENTAL RIGHTS
SOCI 3320	DEVIANCE: SOCIAL AND PERSONAL
SOCI 3357	LAW AND SOCIETY

Other courses may be used for elective credit with advisor approval

Minor

A minor is not required, but is optional. A minor, if chosen, consists of 18 hours, with at least six hours at 3000/4000 level.

Total Hours

99

Computer and Communication Competency

Computer Use: Students majoring in Criminology and Criminal Justice may demonstrate competency in computer use by taking either CSE 1301 COMPUTER LITERACY, INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING, or any other course approved by the Undergraduate Assembly for this purpose. They may also demonstrate competency by passing the University proficiency examination in computer use.

Communication: Students majoring in Criminology and Criminal Justice may demonstrate competency in communication by taking either:

COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING	3
COMS 2305	BUSINESS AND PROFESSIONAL COMMUNICATION	3
COMS 3315	COMMUNICATION FOR EDUCATORS	3
or any other course approved by the Undergraduate Assembly for this purpose		

MAJOR

In addition to fulfilling University and College of Liberal Arts requirements, students planning to graduate with a B.A. in Criminology and Criminal Justice (CRCJ) must also fulfill the following requirements:

- Be a declared CRCJ major,
- Achieve a minimum overall 2.0 GPA in all courses taken at UT Arlington,
- Earn a C or better in all major courses required for the degree, and
- Maintain a minimum 2.5 GPA in all CRCJ courses taken, including approved electives selected from ECON, HIST, POLS, and SOCI.

Requirements for the Online Bachelor Degree in Criminology and Criminal Justice

This degree is offered via the UT TeleCampus and is designed with the criminal justice and law enforcement professional in mind. Students who have already completed the first two years of undergraduate courses, can complete the bachelor degree program by taking the upper level courses online, taught by the same faculty who teach on-campus courses. The courses are taught entirely online and do not require any on-campus visits. This 66-credit hour program, combined with the appropriate lower-division undergraduate course work, will lead to a Bachelor in Criminology and Criminal Justice degree from UT Arlington. To earn a Bachelor in Criminology and Criminal Justice degree from UT-Arlington, students must earn grades of C or better in all major courses required for the degree. Students must maintain a minimum 2.5 GPA in major courses to remain in the program and must graduate with 2.5 GPA or higher in all major courses. To learn more about this program, please visit: www.utcoursesonline.org (<http://www.utcoursesonline.org>).

Pre-Professional Courses

General Core Requirements (p. 93)		39
Program Requirements (These courses also fulfill requirements in the General Core)		
ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
Mathematics (MATH 1301 or higher; MATH 1301 and MATH 1308 are recommended)		

Professional Courses

Major		
CRCJ 2334	INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM (CCJO 2310) (UTA)	3
CRCJ 3350	INTRODUCTION TO RESEARCH METHODS IN CRIMINOLOGY AND CRIMINAL JUSTICE (CCJO 3320) (UTA)	3
CRCJ 3380	RACE, CRIME, AND JUSTICE (CCJO 3370) (UTA)	3
CRCJ 4301	THE AMERICAN JUDICIAL SYSTEM (CCJO 4330) (UTA)	3
CRCJ 4380	COMPARATIVE CRIMINAL JUSTICE SYSTEMS (CCJO 4336) (UTA)	3
CRCJ 4333	INSTITUTIONAL CORRECTIONS (CCJO 4350) (UTA)	3
CRCJ 4315	CRIMINAL CAREERS AND BEHAVIOR SYSTEMS (CCJO 4352) (UTA)	3
CRIJ 3315 (CCJO 3322) Legal Aspects of Evidence (UTB)		
CRIJ 3331 (CCJO 3326) Legal Aspects of Corrections (UTB)		
CRIJ 4370 (CCJO 4338) Senior Seminar in Criminal Justice (UTB)		
CRIJ 4312 (CCJO 4358) Principles of Law Enforcement Supervision (UTB)		
CRIJ 4341 (CCJO 4360) Correctional Casework and Counseling (UTB)		
CRIJ 4313 (CCJO 4362) Seminar of Issues in Law Enforcement (UTB)		
CCJO 3312 (formerly CRIM 3340) Criminal Justice Administration (UTPB)		
CCJO 3332 (formerly CRIM 3365) Juvenile Delinquency and Justice (UTPB)		
CCJO 4316 (formerly CRIM 4332) Theories of Criminal Behavior (UTPB)		
CCJO 4354 (formerly CRIM 4381) Ethics in Criminal Justice (UTPB)		
CCJO 4356 (formerly CRIM 4321) Probation and Parole (UTPB)		
CCJO 4364 (formerly CRIM 4382) Police and the Community (UTPB)		
PSYC 4305 (CCJO 4372) Drugs and Behavior (UTPB)		
Select two of the following electives:		
CRIJ 3325 Violet Crime and Offenders (UTB)		

CRIJ 4363 (CCJO 4366) Gangs and Gang Behavior (UTB)	
CRIJ 4300 (CCJO 4300) Forensics DNA Analysis (UTEP)	
BIOL 3320 (CCJO 3324) Genetics (UTEP)	
BIOL 4395 (CCJO 4395) Toxicology (UTEP)	
INSS 4350 Selected Problems in Intelligence Crime & Border Security (UTEP)	
Electives	10
Total Hours	76

Note: UT Arlington denotes classes offered by The University of Texas at Arlington; UTB denotes classes offered by The University of Texas at Brownsville; UTPB denotes classes offered by The University of Texas at Permian Basin; and UTEP denotes classes offered by The University of Texas at El Paso.

Students will satisfy the computer and communications competencies during completion of the online core courses required for the BCRCJ degree.

Requirements for a Minor in Criminology and Criminal Justice

A minor in CRCJ consists of 18 semester hours, of which at least 12 must be 3000/4000 level. CRCJ 2334 INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM, and CRCJ 4301 THE AMERICAN JUDICIAL SYSTEM, are required courses for a CRCJ minor. Students must earn a 2.0 GPA in all CRCJ courses taken toward the minor.

Certificate in Crime Analysis

A Certificate in Crime Analysis is offered by the Department for students interested in pursuing a law enforcement career in crime analysis. Students must complete seven required courses (21 credit hours) to qualify. The courses are:

CRCJ 3336	POLICE MANAGEMENT AND ADMINISTRATION	3
CRCJ 3340	CRIMINAL JUSTICE STATISTICS	3
CRCJ 3350	INTRODUCTION TO RESEARCH METHODS IN CRIMINOLOGY AND CRIMINAL JUSTICE	3
GEOL 4330	UNDERSTANDING GEOGRAPHIC INFORMATION SYSTEMS	3
CSE 1301	COMPUTER LITERACY	3
CSE 1310	INTRODUCTION TO COMPUTERS & PROGRAMMING	3
CRCJ 4390	INTERNSHIP IN CRIMINAL JUSTICE ¹	3
Total Hours		21

¹ Participation in CRCJ 4390 INTERNSHIP IN CRIMINAL JUSTICE requires a minimum GPA of 3.0 in both CRCJ courses and in all courses completed at UT-Arlington.

Certificate in Crime Scene Technology

CRCJ students interested in beginning a career as a crime scene technician are offered a Certificate in Crime Scene Technology. Students must complete seven required courses (21 credit hours) to qualify. The courses are:

CRCJ 2334	INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM	3
CRCJ 2340	CRIMINAL INVESTIGATION	3
CRCJ 3337	ADVANCED CRIMINAL PROCEDURE	3
CRCJ 3370	INTRODUCTION TO FORENSICS	3
CRCJ 3371	CRIME SCENE INVESTIGATION	3
CRCJ 4340	FORENSIC DEATH INVESTIGATION	3
Optional Courses		
CRCJ 3320	CYBERCRIME	
CRCJ 4341	FORENSIC EXAMINATION OF IMPRESSION EVIDENCE	
CRCJ 4342	FORENSIC HAIR AND FIBER IDENTIFICATION	
CRCJ 4343	FORENSIC EXPERT TESTIMONY	
CRCJ 4390	INTERNSHIP IN CRIMINAL JUSTICE ¹	
Total		21

¹ Participation in CRCJ 4390 INTERNSHIP IN CRIMINAL JUSTICE requires a minimum GPA of 3.0 in both CRCJ courses and in all courses completed at UT-Arlington.

Certificate in Law Enforcement Administration

The Department of Criminology and Criminal Justice (CRCJ) at UT-Arlington and the Institute for Law Enforcement Administration (ILEA), which is one of seven institutes within the Center for American and International Law, Plano, TX, combine to offer a Certificate in Law Enforcement Administration for police officers, supervisors, and managers. To receive the certificate, officers must complete four courses offered by ILEA (13 credit hours) and five courses (15 credit hours) offered by the CRCJ Department at UT Arlington.

Courses to be taken at or through ILEA are:

- LEA 200, School of Police Supervision;
- LEA 220, Fair Labor Standards Act Law;
- ETH 100, Ethical Decision Making; and
- ETH 150, Ethics Train-the-Trainer.

Courses offered by the CRCJ Department at UT-Arlington are online courses and include:

CRCJ 2334	INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM	3
CRCJ 3380	RACE, CRIME, AND JUSTICE	3
CRCJ 4301	THE AMERICAN JUDICIAL SYSTEM	3
CRCJ 4380	COMPARATIVE CRIMINAL JUSTICE SYSTEMS	3
CRCJ 4315	CRIMINAL CAREERS AND BEHAVIOR SYSTEMS	3

Total Hours		15
-------------	--	----

Certificate in Legal Studies

The Department of Criminology and Criminal Justice (CRCJ) at UT-Arlington, offers a Certificate in Legal Studies for students interested in working in the legal field. To receive the certificate, students must complete six courses (18 credit hours) offered by the department. The courses are:

CRCJ 2334	INTRODUCTION TO THE CRIMINAL JUSTICE SYSTEM	3
CRCJ 3330	FUNDAMENTALS OF LAW	3
CRCJ 3337	ADVANCED CRIMINAL PROCEDURE	3
CRCJ 4301	THE AMERICAN JUDICIAL SYSTEM	3

Select two of the following:		6
------------------------------	--	---

CRCJ 4365	CAPITAL PUNISHMENT	
CRCJ 4380	COMPARATIVE CRIMINAL JUSTICE SYSTEMS	
CRCJ 4388	TOPICS IN LAW AND JUDICIAL PROCESSES	
CRCJ 4390	INTERNSHIP IN CRIMINAL JUSTICE ¹	

Total		18
--------------	--	-----------

¹ Participation in CRCJ 4390 INTERNSHIP IN CRIMINAL JUSTICE requires a minimum GPA of 3.0 in both CRCJ courses and in all courses completed at UT-Arlington.

Disability Studies

Minor in Disability Studies

The interdisciplinary field of disability studies explores the experiences of people with disabilities—one of the largest minorities in the United States and worldwide—as well as the ways in which conceptions and representations of disability and “the normal” have shaped human experiences more generally. Treating disability as a crucial element of human diversity, the Minor in Disability Studies approaches disability as a social, cultural, and political construct rather than just a medical condition (as it is commonly viewed). Taught by faculty from the Colleges of Liberal Arts, Education and Health Professions, Architecture, Business, and Social Work, this flexible and multidisciplinary minor prepares students for a variety of graduate programs and for careers in law, education, public health, nursing, architecture, urban planning, and social work.

Students seeking to minor in Disability Studies should first consult with advisors in their major departments or programs for approval, then meet with the Director of the Minor in Disability Studies. A minor in Disability Studies consists of 18 hours, including two required courses: a core course on History of Disability (HIST 3307) and the Disability Studies Internship (DS 4395). Students must take at least 6 hours of other courses in Group A: Disability Studies and may take up to 6 hours of approved electives (Group B). No more than 12 hours may be completed in a single discipline.

History of Disability (HIST 3307) should be taken as early as possible; this course introduces students to disability studies and the histories of ideas about disability, the lives of people with disabilities, and disability policy. The Disability Studies Internship (DS 4395) is a supervised internship through which students apply the academic skills they have acquired in Disability Studies courses to work in a related business, academic, or non-profit

environment. Students should complete DS 4395 as one of their last courses for the minor. In rare cases and with the director's permission, students may be allowed to substitute another course for DS 4395.

Some of the following courses change focus from term to term and may therefore not be relevant to the minor during a particular semester. Credit will only be given when the topic of the course (or a substantial portion) focuses on issues related to disability. Other relevant courses not listed below may also be used to fulfill the minor, with the approval of the Director of the Minor in Disability Studies. For that reason, it is important that students consult with the advisor for the minor before registering each semester. Students should consult the catalog and/or the appropriate department for course prerequisites.

Required Courses (six hours)

HIST 3307	HISTORY OF DISABILITY	3
or DS 3307	HISTORY OF DISABILITY	
DS 4395	DISABILITY STUDIES INTERNSHIP	3

Group A: Disability Studies (at least six hours)

DS 3321	TOPICS IN DISABILITY STUDIES	3
DS 3331	RESEARCH IN DISABILITY STUDIES	3
DS 4391	CONFERENCE COURSE	3
KINE 3304	ADAPTED PHYSICAL EXERCISE & SPORT	3

Group A: Disability Studies (with prior approval from the director)

HIST 3300	INTRODUCTION TO HISTORICAL RESEARCH	3
HIST 4388	SELECTED TOPICS IN HISTORY	3

Group B: Approved electives

ANTH 3369	MEDICAL ANTHROPOLOGY	3
HIST 3317	U.S. LEGAL AND CONSTITUTIONAL HISTORY, COLONIAL TO 1877	3
HIST 3318	U.S. LEGAL AND CONSTITUTIONAL HISTORY, 1877 TO PRESENT	3
POLS 4340	FEDERAL SOCIAL POLICY	3
POLS 4350	HEALTH POLITICS AND POLICY	3
SOCI 3318	SELF AND SOCIAL IDENTITY	3
SOCI 3342	SOCIOLOGY OF THE HUMAN BODY	3
or KINE 3342	SOCIOLOGY OF THE HUMAN BODY	
SOCI 4320	MEDICAL SOCIOLOGY	3

Group B: Approved electives (with prior approval from the director)

ANTH 3330	CULTURAL DIVERSITY AND IDENTITY	3
ECON 3301	THE ECONOMICS OF HEALTH	3
ENGL 3368	TOPICS IN GENDER AND SEXUALITY	3
ENGL 4345	TOPICS IN CRITICAL THEORY	3
GEOG 4350	SPECIAL TOPICS IN MODERN GEOGRAPHY	3
HIST 4388	SELECTED TOPICS IN HISTORY	3
KINE 2307	SPORTS AND SOCIETY	3
LING 2371	LANGUAGE IN A MULTICULTURAL USA	3
SOCI 3336	SOCIAL INEQUALITY	3
SOCW 3317	HUMAN BEHAVIOR AND DIVERSE POPULATIONS	3

Undergraduate Degrees

- Bachelor of Arts in English (p. 381)
- Bachelor of Arts in English with Teacher Certification (p. 381)
- Minor in English (p. 383)
- Minor in Writing (p. 383)
- Minor in Creative Writing (p. 383)
- Minor in Medieval and Early Modern Studies (p. 383)

Graduate Degrees

- English, M.A. (p. 378)
- English, Ph.D. (p. 379)

English - Graduate Programs

Objectives

The Department of English offers a wide variety of graduate courses to meet the needs of students with a diversity of interests and academic backgrounds who wish to enhance their awareness of their literary and cultural environment by additional formal instruction or to increase their professional competence.

The Master of Arts program in English is designed to enable students to learn about, critique, and work in teaching, scholarship, writing, or other fields which value a strong background in language, rhetoric, and the study of culture through texts.

Early in the program each student takes one core course which serves as an introduction to theory as it is currently used in English scholarship. Each student plans an individual program of coursework, with the help of the Graduate Advisor. This program draws on the department's varied courses, which offer students ways to study literature, rhetoric, and criticism, as well as methods of studying culture through texts and traditions of discourse.

The M.A. in English provides a strong grounding in scholarly methods and in theory, making it an ideal preparation for doctoral study in disciplinary or interdisciplinary programs. M.A. graduates in English pursue careers in journalism, educational administration and services, publishing, and many business fields that demand writing and communication skills. The M.A. in English is also useful for prospective or experienced teachers who want both to sharpen their ability to teach literature and writing and to advance professionally.

The doctoral program in English prepares students at the most advanced stage in the interpretation and composition of texts. The program emphasizes rigorous critical study in the fields of rhetoric, composition, critical theory, cultural studies, pedagogy and literary studies. Rather than offering separate tracks, the program allows students in consultation with the Graduate Advisor and the dissertation committee, to design a program of work that best suits their particular scholarly interests and career goals. The combination of a diversity of course offerings, required and elected courses, and the requirement that each student define a focus that reflects his or her intellectual and career interests provides students with the flexibility to adapt to changes in English studies. Specifically, the English doctoral program prepares students for careers in writing, including electronic and technical writing, as well as in teaching in community colleges, small colleges or regional state universities. The department trains students for college-level teaching in several ways, including graduate courses in the teaching of literature and of composition. Doctoral students in English present papers at scholarly conferences, publish essays in scholarly journals and participate in other professional activities.

Fellowships

The same four criteria used to determine admission to the M.A. or Ph.D. programs will be considered when awarding graduate fellowships.

The Graduate School stipulates that "Fellowships, when available, will be awarded on a competitive basis based on the following criteria: Candidates must be new students entering in the fall semester, with a minimum of 6 hours of enrollment in both long semesters to retain their fellowships. The minimum undergraduate GPA requirement is 3.00, as calculated by the Graduate School."

Graduate Teaching Assistantships

Please consult the Director of First Year English for more information on Graduate Teaching Assistantships.

Admissions Requirements

ADMISSION PROCEDURES

In addition to the basic graduate admission requirements of UT Arlington described in this Catalog in the Admission section under University Policies & Requirements, the English Department requires all international students to have speaking, reading, and writing competence in English. For both the M.A. and the Ph.D., we consider four different admission criteria:

1. GPA
2. GRE
3. writing sample, and
4. letters of recommendation.

Prospective students must submit all the required materials and scores, i.e., official transcripts, GRE scores, a writing sample, and recommendation letters in order for their application to be processed. All criteria are considered together, in a holistic way, and no single factor will eliminate a prospective student from consideration. For unconditional admission, candidates must meet the following standards for at least three of the four criteria.

CRITERIA FOR ADMISSION: MASTER'S PROGRAM

1. A minimum GPA of 3.0 in undergraduate work, with a minimum of 3.4 in the English major or upper-level English courses.
2. GRE scores: a minimum of 500 on the old verbal scale or at least 153 on the new verbal scale and a score of 4.5 on analytic writing. We will not consider the math scores. We do not require the English subject test.
3. A writing sample of 10 to 15 pages that demonstrates a sophisticated prose style and the ability to construct complex arguments.
4. Three letters of recommendation that attest to the prospective student's intellectual and scholarly potential. At least two of these should be from former professors.

DEFERRED DECISION

A deferred decision may be granted when a file is incomplete or when a denial is not appropriate.

PROVISIONAL ADMISSION

An applicant who is unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

PROBATIONARY ADMISSION

For both the M.A. and Ph.D. programs, students may be admitted on probation under one of two scenarios:

1. if the prospective student's application materials do not meet two of the four standards, but are outstanding in the remaining two categories, or
2. if the prospective student's materials come extremely close to meeting the standards in at least three of the four areas.

Students on academic probation must make no grade lower than a "B" in the first 12 hours of their graduate work in order to remain in the program.

DENIAL

Admission will be denied if the application materials:

1. do not meet the standards in three of the four categories, or
2. do not meet the standards in two of the categories, and in the remaining two categories meet the standards but in an unexceptional manner.

DEFICIENCY COURSES

Students who wish to pursue the Master's degree but who do not have an undergraduate major in English will probably be required to take between 3 and 12 hours in specified advanced undergraduate courses and make no grade lower than a "B." These courses will not be counted for graduate credit, but instead will provide the necessary background for pursuit of the advanced degree.

Degree Requirements

MASTER OF ARTS

1. ENGL 5300 THEORY AND PRACTICE IN ENGLISH STUDIES is required. It must be taken within a student's first 12 hours of study and the student must pass it with at least a grade of B.
2. The program has thesis and non-thesis options.
3. The thesis option is a 30 credit-hour program and requires 24 hours of coursework (a three credit-hour core course and 21 hours of electives) and at least six hours of thesis. The degree culminates with defense of the thesis.
4. Students wishing the thesis option must apply for it during their 24th hour of coursework. A student who elects to write a thesis must select a topic in consultation with his/her thesis director. Before the student registers for thesis hours, a Thesis Committee (a director and two readers) must be established.
5. The non-thesis option requires a 36 credit-hour program of coursework (a three credit-hour core course and 33 hours of electives). The final requirement for a non-thesis MA is submission of a portfolio. This will consist of a variety of writing assignments designed to prepare the student to enter the professional and/or academic workplace.

Admission Requirements

In addition to the basic graduate admission requirements of UT Arlington described in this Catalog in the Admission section under University Policies & Requirements, the English Department requires all international students to have speaking, reading, and writing competence in English. For both the M.A. and the Ph.D., we consider four different admission criteria: 1) GPA; 2) GRE; 3) writing sample; and 4) letters of recommendation. Prospective students should submit all the required materials and scores i.e. official transcripts, GRE scores, a writing sample, and recommendation letters in order for their application to be processed. All criteria are considered together, in a holistic way. No single factor will eliminate a prospective student from consideration. For unconditional admission, candidates must meet the following standards for at least three of the four criteria.

CRITERIA FOR ADMISSION: PH.D. PROGRAM

1. A minimum GPA of 3.5 in the student's M.A. in English or a very closely related field. (If the M.A. is not in English, we will consider the undergraduate GPA as well as that of the M.A. Moreover, if the M.A. is not in a very closely related field, the prospective student will be admitted to the M.A. program in English, not the Ph.D.)
2. GRE scores: a minimum of 550 on the old verbal scale or at least 156 on the new verbal scale and a score of 4.5 on analytic writing. We will not consider the math scores. We do not require the English subject test.
3. A writing sample of 15 to 20 pages that demonstrates a sophisticated prose style, the ability to engage in intellectually rigorous modes of analysis, and a strong knowledge of rhetoric, composition studies, literary studies, cultural studies, or interdisciplinary critical theory.
4. Letters of recommendation that attest to the student's intellectual and scholarly potential. At least two of these must be from former professors; at least one must be a professor from the student's Master's program.

DEFERRED DECISION

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

PROBATIONARY ADMISSION

For both M.A. and Ph.D., students may be admitted on probation under one of two scenarios: 1) if the prospective student's application materials do not meet two of the four standards, but are outstanding in the remaining two categories; or 2) if the prospective student's materials come extremely close to meeting the standards in at least three of the four areas. Students on academic probation must make no grade lower than a "B" in the first 12 hours of their graduate work in order to remain in the program.

DENIAL

Admission will be denied if the application materials 1) do not meet the standards in three of the four categories; or 2) if the materials do not meet the standards in two of the categories, and in the remaining two categories meet the standards but in an unexceptional manner.

DEFICIENCY COURSES

Students who wish to pursue the Master's degree but who do not have an undergraduate major in English will probably be required to take between 3 and 12 hours in specified advanced undergraduate courses and make no grade lower than a "B." These courses will not be counted for graduate credit, but instead will provide the necessary background for pursuit of the graduate degree.

Degree Requirements

DOCTOR OF PHILOSOPHY

1. The Ph.D. requires thirty semester hours of coursework beyond the M.A., followed by a minimum of 9 hours of dissertation work.
2. ENGL 5300 THEORY AND PRACTICE IN ENGLISH STUDIES is required. It must be taken within a student's first 12 hours of study unless they have already taken ENGL 5300 while in the M.A. program and received a grade of B or higher.
3. All students are also required to take ENGL 5311 FOUNDATIONS OF RHETORIC AND COMPOSITION OR ENGL 5359 ARGUMENTATION THEORY as early in their programs as possible.
4. Students are allowed to take 9 hours of coursework outside the English department.
5. The Ph.D. track in English requires basic proficiency in translation in one natural language other than English.

Students must consult with the Graduate Advisor and the chair of their dissertation committee to carefully construct a coherent focus for their coursework and comprehensive examinations. After completing coursework and satisfying the foreign language requirement, students will take a written comprehensive examination. While studying for the comprehensive exams, students may enroll in ENGL 6391 GRADUATE READINGS, supervised reading for the Ph.D. exam, graded R. By the end of the first semester after successfully completing the comprehensive examinations, the students must submit a dissertation prospectus to their committee. The dissertation must be an original, substantial and significant contribution to a scholarly field. Students should work closely with the chair of their committee while researching and writing their dissertation. While researching and writing their dissertation, students must enroll in dissertation hours (ENGL 6399 DISSERTATION, ENGL 6699 DISSERTATION or ENGL 6999 DISSERTATION). In the final semester of dissertation work, students must enroll in ENGL 7399 DOCTORAL DEGREE COMPLETION. Once the student, the chair of the committee, and the primary readers agree that the dissertation is sufficiently completed, the student may schedule the defense. The student must furnish each committee member with a copy of the dissertation, including notes and bibliography, at least three weeks prior to the defense date. The defense of the dissertation is oral. The defense is open to all members of the faculty, graduate students and invited guests of the university community. Questioning of the candidate will be directed by the student's dissertation supervising committee, but any person attending the defense may participate. Committee members may request that the dissertation be further revised and may withhold final approval of the dissertation until the revisions have been made. For more specific information regarding degree requirements, please consult the Graduate Handbook of the Department of English.

English - Undergraduate Programs

Overview

By majoring in English, students are involved simultaneously with two activities that are essentially and uniquely human: language and art. The mission of the Department of English in the College of Liberal Arts at The University of Texas at Arlington is to educate students about the powers and pleasures of literary and other kinds of language.

The curriculum provides students with an understanding of theoretical and analytical processes which enable them to assimilate a variety of textual materials representing many cultures and historical periods. Students will learn to read closely, critically, and with empathy. In addition, students will learn to conduct scholarly research and to produce clear and cogent arguments in both written and oral form. These skills are widely applicable for English graduates who seek out and create careers in the arts, education, business, research and development, government, media, and publishing.

The English department offers two degree options: a BA in English and a BA in English with Teacher Certification (BATCH). Students choosing the BA in English will meet several distribution requirements but also have the flexibility to specialize in one of six different concentrations: Generalist, Multicultural and Comparative Literatures, Language and Rhetoric, Gender and Sexuality, Critical Theory, and Environment. In addition to the majors, the English Department offers minors in English, in Writing, and in Creative Writing. The English Department frequently cross-lists courses with Women's Studies, Mexican American Studies, African American Studies, Environmental and Sustainability Studies, and Medieval and Early Modern Studies.

Requirements for a Bachelor of Arts Degree in English

Pre-Professional Courses

General Core Requirements (p. 93) 39

Recommended Core Requirements

Electives sufficient to complete the total number of hours required for the degree

Modern and Classical Languages: 1441, 1442, 2313, and 2314 or equivalent

Professional Courses

Major. To count toward the major, all English courses must be completed with a grade of C or better. ¹

ENGL 1301 RHETORIC AND COMPOSITION I (or waiver for advanced standing) 3

ENGL 1302 RHETORIC AND COMPOSITION II (or waiver for advanced standing) 3

ENGL 2350 INTRODUCTION TO ANALYSIS AND INTERPRETATION (This course is a pre- or co-requisite for all upper-level English courses. English majors must pass this course with a C or better in order to receive credit toward the major for any 3000/4000-level English courses.) ² 3

ENGL 2384 STRUCTURE OF MODERN ENGLISH (This course is a pre- or co-requisite for all upper-level English courses. English majors must pass this course with a C or better in order to receive credit toward the major for any 3000/4000 level English courses) 3

6 hours of sophomore literature or 3 hours with a grade of A 3

18 hours of 3000/4000-level courses, distributed as follows: AREA A, Literature written in English before mid-seventeenth century (3 hours); ABEA B, Literature written between mid-seventeenth century and mid-nineteenth century (3 hours); AREA C, Literature written between mid-nineteenth century and contemporary (3 hours); AREA D, Language, Rhetoric, and Theory (3 hours);

ENGL 4399 SENIOR SEMINAR (capstone course) 3

3000/4000-level elective (3 hours) 9

12 hours of 3000/4000 level courses organized in a Concentration. A Concentration consists of 12 hours selected from any 3000- or 4000-level courses. No course which has been counted toward an Area requirement may also be counted toward a Concentration. Any upper-level topics course may be counted toward a Concentration if the topic is directly related to the subject of the Concentration. A topics course may be repeated for credit toward a Concentration when content changes, if the new topic is directly related to the subject of the Concentration. Under special circumstances and with the approval of the Associate Chair of Undergraduate Studies, students may count one course from another department toward the Concentration. The possible Concentrations are as follows. GENERALIST: This Concentration consists of a combination of courses in any topic, theme, or period of British or American literature. LANGUAGE AND RHETORIC: This concentration focuses on the history, theory, and practice of language use and on rhetoric from its inception as the art of public speaking to contemporary applications. MULTICULTURAL AND COMPARATIVE: This concentration consists of courses in multicultural, ethnic, and/or world literature. CRITICAL THEORY: This concentration focuses on a range of critical and philosophical questions central to the interpretation of texts, which include how to understand language, culture, power, subjectivity, knowledge, history, race, and other issues. GENDER AND SEXUALITY: This concentration focuses on representations of gender and sexuality in literature as well as in social, cultural, political, economic, and/or scientific contexts. ENVIRONMENT: This concentration overlaps with science studies and also brings together several recent areas of inquiry into the relations between texts and environments, including ecocriticism, the environmental humanities, animal studies, and posthumanism.

Total Hours

66

- ¹ To count toward the major, each English course must be completed with a grade of C or better.
- ² English majors must pass this course with a grade of C or better in order to receive credit toward the major for any 3000/4000-level English courses.

Teacher Certification

Students wishing to take a Bachelor of Arts Degree in English with Secondary Teacher Certification must complete LIST 4343 CONTENT AREA READING AND WRITING and 36 hours in English. To count toward the major, each English course must be completed with a grade of C or better. The required English courses are:

ENGL 1301	RHETORIC AND COMPOSITION I (or waiver for advanced standing)	3
ENGL 1302	RHETORIC AND COMPOSITION II (or waiver for advanced standing)	3
ENGL 2350	INTRODUCTION TO ANALYSIS AND INTERPRETATION ¹	3
ENGL 2384	STRUCTURE OF MODERN ENGLISH	3
Literature on the sophomore level or above		3
ENGL 3340	HISTORY OF AMERICAN LITERATURE	3
ENGL 3351	HISTORY OF BRITISH LITERATURE I	3
ENGL 3361	HISTORY OF WORLD LITERATURE I	3
or ENGL 3362	HISTORY OF WORLD LITERATURE II	
Select one of the following (Writing/Composition Group):		3
ENGL 3371	ADVANCED EXPOSITION	
ENGL 3372	COMPUTERS AND WRITING	
ENGL 4371	ADVANCED ARGUMENTATION	
ENGL 3374	WRITING, RHETORIC, AND MULTIMEDIA AUTHORING	
ENGL 4374	WRITING, RHETORIC, AND MULTIMEDIA AUTHORING II	
Select one of the following (Cultural Diversity Group):		3
ENGL 3343	US CHICANO/LATINO LIT	
ENGL 3344	AMERICAN INDIAN LITERATURE	
ENGL 3345	AFRICAN AMERICAN LITERATURE	
ENGL 3346	MEXICAN AMERICAN LITERATURE	
ENGL 3347	TOPICS IN MULTICULTURAL LITERATURES	
ENGL 3355	POST-COLONIAL LITERATURE IN ENGLISH	
ENGL 3364	GAY AND LESBIAN LITERATURE	
ENGL 3370	WOMEN IN LITERATURE	
ENGL 4340	LITERATURE BY WOMEN	
ENGL 4326	SHAKESPEARE	3
ENGL 4370	RHETORIC AND COMPOSITION FOR SECONDARY SCHOOL TEACHERS	3
Total Hours		36

- ¹ BATCH majors must pass this course with a C or better in order to receive credit toward the major for any 3000/4000-level English courses.

The requirement of six hours of English or world history does not pertain to students obtaining teacher certification.

Competence in Oral Presentations

Students obtaining a Bachelor of Arts degree in English can demonstrate oral proficiency by passing:

COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING	3
COMS 1302	VOICE AND DICTION	3
COMS 2305	BUSINESS AND PROFESSIONAL COMMUNICATION	3
COMS 3315	COMMUNICATION FOR EDUCATORS (or equivalent)	3
Total Hours		12

Competence in Computer Use

Students obtaining a Bachelor of Arts degree in English can demonstrate computer proficiency by:

1. passing ENGL 3372 COMPUTERS AND WRITING, ENGL 3374 WRITING, RHETORIC, AND MULTIMEDIA AUTHORING or ENGL 4374 WRITING, RHETORIC, AND MULTIMEDIA AUTHORING II; or
2. passing CSE 1301 COMPUTER LITERACY (or equivalent); or
3. passing the University computer literacy examination.

Information on Sophomore Courses

Unless otherwise indicated, six hours of first-year English credit is prerequisite to all 2000-level courses. Students who are not majoring in English may register for ENGL 2303 TOPICS IN LITERATURE, ENGL 2309 WORLD LITERATURE, ENGL 2319 BRITISH LITERATURE or ENGL 2329 AMERICAN LITERATURE. Students who plan to major in English must complete ENGL 2350 INTRODUCTION TO ANALYSIS AND INTERPRETATION and ENGL 2384 STRUCTURE OF MODERN ENGLISH with a grade of C or better, even if they have already completed six hours of sophomore literature.

Minoring in English

An English minor may be achieved by completing eighteen hours in English with a grade of C or better. At least six of the hours must be on the 3000- or 4000-level. In addition to this minor, English also offers a minor in Writing and a minor in Creative Writing.

OPTION FOR MINOR IN WRITING

The Writing minor is offered for students who wish to concentrate in writing as a part of their undergraduate curriculum. Students selecting the Writing minor should consult first with the undergraduate advisor in their department or program for approval of the minor, and then with the English department undergraduate advisor. Working with advisors, students will select a sequence of advanced courses to fulfill their minor requirements. To count toward the minor, all English courses must be completed with a grade of C or better. This minor consists of 21 hours, distributed as follows.

Required Courses for Students Selecting the Writing Option:

ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
Select one of the following:		3
ENGL 2303	TOPICS IN LITERATURE	
ENGL 2309	WORLD LITERATURE	
ENGL 2319	BRITISH LITERATURE	
ENGL 2329	AMERICAN LITERATURE	
ENGL 3371	ADVANCED EXPOSITION	3
Select three of the following:		9
ENGL 3372	COMPUTERS AND WRITING	
ENGL 3373	TECHNICAL COMMUNICATION	
ENGL 3374	WRITING, RHETORIC, AND MULTIMEDIA AUTHORING	
ENGL 3376	BUSINESS & PROFESSIONAL WRITING	
ENGL 4371	ADVANCED ARGUMENTATION	
ENGL 4374	WRITING, RHETORIC, AND MULTIMEDIA AUTHORING II	
<hr/> Total Hours		<hr/> 21

OPTION FOR MINOR IN CREATIVE WRITING

The Creative Writing minor is offered for students wishing to do intensive work in creative writing to supplement an English major or another major. Students selecting the Creative Writing minor should consult first with the undergraduate advisor in their department or program for approval of the minor, and then with the English department undergraduate advisor. Working with advisors, students will select a sequence of advanced courses to fulfill their minor requirements. To count toward the minor, all English courses must be completed with a grade of C or better. This minor requires 24 hours, distributed as follows:

Required Courses for Students Selecting the Minor in Creative Writing:

ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
Select two of the following:		6
ENGL 2303	TOPICS IN LITERATURE	
ENGL 2309	WORLD LITERATURE	
ENGL 2319	BRITISH LITERATURE	
ENGL 2329	AMERICAN LITERATURE	

ENGL 3375	CREATIVE WRITING	3
Select three of the following Advanced Creative Writing courses:		9
ART 3350	INTRODUCTION TO NARRATIVE SCREENWRITING	
ART 4354	ADVANCED NARRATIVE SCREENWRITING	
THEA 3320	PLAYWRITING I	
ENGL 4330	ADVANCED CREATIVE WRITING: TOPICS	
ENGL 4347	ADVANCED CREATIVE WRITING: FICTION	
ENGL 4348	ADVANCED CREATIVE WRITING: POETRY	
ENGL 4349	ADVANCED CREATIVE WRITING: CREATIVE NON-FICTION	
Total Hours		24

¹ ART 3350 INTRODUCTION TO NARRATIVE SCREENWRITING is a prerequisite for this course

The Medieval and Early Modern Studies Minor

The medieval and early modern world saw major social and cultural changes--the rise of the middle class, the development of the individual, the emergence of the nation state, and the consolidation of many modern languages. The Medieval and Early Modern Studies minor fosters interdisciplinary study of these periods, encouraging students to explore and connect topics in language, literature, history, art, and philosophy. The minor in Medieval and Early Modern Studies comprises courses taught by members of the Art, English, French, German, History, Latin, Philosophy, and Spanish departments in the College of Liberal Arts.

Students seeking to minor in Medieval and Early Modern Studies should first consult with advisors in their departments or programs for approval of the minor, then with the Director of the Minor in Medieval and Early Modern Studies (currently Dr. Jacqueline Stodnick of the Department of English). A minor in Medieval and Early Modern Studies consists of six courses (18 hours total; six hours upper level) selected from approved courses, with no more than nine hours to be completed in any single discipline. Relevant topics courses may be used to fulfill the minor, with the approval of the Director of the Minor in Medieval and Early Modern Studies. Students should consult the catalog and/or the appropriate department for prerequisites.

For information on the Medieval and Early Modern Studies minor, contact the Director at stodnick@uta.edu.

History - Graduate Programs

Objectives

Graduate study in history seeks not only to train students in historical methods and analysis but also to nurture in them a sense of the excitement and relevance of studying the past. Exploring the historical diversity of human experience broadens and deepens our understanding of both the past and the contemporary world. Students who complete graduate studies in history pursue careers in teaching, research and archival or museum administration, as well as in government and business.

The Master's Degree Program offers students a general graduate degree, with courses in a broad array of geographic and temporal topics, including U.S., European, African, Latin American, Transatlantic and Transnational histories. In the flexible Master's degree curriculum, apart from two required courses early in the program, students tailor their course of study among available course offerings to meet individual interests and career objectives.

Students choose either Thesis or Non-Thesis programs. Coursework and internships in Archival Administration certification and/or Public History are also available as part of the Master's degree program.

The Doctoral Degree Program in Transatlantic History offers students comparative study of the historical development of peoples on the continents bordering the Atlantic Ocean. This exciting Ph.D. program is part of recent developments within the discipline of history that broaden the study of the past, transcend national histories, and contribute to a new transnational and comparative perspective. Utilizing specific research resources in the UT Arlington Libraries, the Ph.D. program in Transatlantic History (1492 to the present) offers a structured and focused curriculum of both required and elective courses. Prerequisite: B.A. or M.A. degree in history.

Admission Standards

In compliance with HB 1641, the History Department does not assign a specific weight to any one factor being considered, and does not use standardized tests (i.e., the GRE) in the admissions process as the sole criterion for consideration or as the primary criterion to end consideration of an applicant to either the M.A. or Ph.D. program. However, the GRE is required and used as a criterion, without specific weight, in the Department's evaluation of candidates for admission to programs at each of three levels: Unconditional, Provisional, and Probationary Admission.

The Department wishes to be as thorough and fair as possible in evaluating applicants for admission. It recognizes that some applicants may appear to be stronger according to some criteria than according to other criteria. When an applicant does not completely meet the minimum expectations for Unconditional Admission, the Department may consider the applicant for possible Provisional or Probationary Admission. When the applicant is not granted any of the three levels of admission, the decision may be deferred or the application is denied. We do not wish to exclude a qualified and potentially successful candidate who perhaps has approached but not met all the criteria completely. However, we do not wish to admit candidates who, based on the criteria, are deemed to have a poor chance of successfully completing the graduate program.

Admission Standards

UNCONDITIONAL ADMISSION

The criteria for admission below are used, without specific weights, as positive indicators of potential success in the program. In all but the most exceptional cases, all four criteria for unconditional admission must be met in order to receive unconditional admission.

- Undergraduate GPA of 3.0 (as calculated by Graduate Admissions) in the last 60 credit hours in the course of completing a B.A. degree in History (or an appropriate other field) from an accredited institution (verified by official transcripts from each college or university previously attended sent directly from the registrar of that institution to Graduate Admissions).
- A writing sample, sent to the Graduate Advisor. The Department prefers that applicants send a research paper written in an upper-division history course, but other examples are acceptable. The essay should demonstrate the applicant's writing, research, and analytical skills where possible. There is not a specific page minimum, but papers should not be over 25 pages.
- Three letters of recommendation (from faculty if possible) mailed directly from the recommenders to the History Graduate Advisor.
- A minimum score of 153 on the verbal section and a minimum score of 4 on the analytical writing section of the GRE aptitude test (verified by official GRE scores sent to Graduate Admissions). However, standardized test performance is not the sole criterion for admission or the primary criterion to end consideration for admission.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation (e.g. GRE scores have not yet arrived) prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission. Provisionally admitted students must adequately satisfy any incomplete documentation by the end of the semester in which they are admitted. If the applicant fails to do so, the Department may then reclassify the applicant as Probationary, defer the decision, or ask the candidate to leave the program.

PROBATIONARY ADMISSION

An applicant whose performance, according to the criteria, approximates but does not meet minimum admission standards may be granted Probationary Admission. Students admitted under this category must earn no grade lower than a B in his/her first 12 semester hours of graduate work taken at UT Arlington.

DEFERRAL OR DENIAL

If two or more of the criteria have not been met satisfactorily, the applicant will not be admitted on any of the three levels above but will receive deferral or denial. A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate. A deferred decision may also be granted when the student does not have adequate preparation in the discipline of history. In the latter case, students will be required to take "leveling" courses (make-up coursework) and earn a B or better before reapplying.

M.A. Degree Requirements

Courses taken toward a master's degree should fit into a unified program aimed at providing students with both a comprehensive background and a depth of understanding in U.S., European, African, Latin American, Transatlantic, or Transnational history. All students are required to take HIST 5339 HISTORICAL THEORY AND METHODOLOGY and the Issues & Interpretations course corresponding to their major field (either HIST 5340 ISSUES

AND INTERPRETATIONS IN U.S. HISTORY or HIST 5341 APPROACHES TO WORLD HISTORY. Except for those specializing in Public history, all students must take a minimum of six hours in both the Colloquium and the Seminar courses. Master's students are eligible to take courses at the 6000 level as well as 5000 level, subject to any particular course prerequisites. Students may take upper-division under-graduate courses for graduate credit under certain conditions. In this case and others, students must consult with the Graduate Advisor to determine their program.

Competency in one foreign language is required to obtain the Master's degree. This may be demonstrated by one of three methods:

- four semesters of credit in an approved language verifiable in an official transcript
- successful completion of an examination administered by an approved UTA faculty member or by an approved outside source such as a CLEP test
- a passing grade in a graduate-level translation course (MODL 5301) offered by the Department of Modern Languages

The Thesis degree plan is designed for students who wish to research and write a substantial, original work on a historical topic of personal interest. The plan requires completion of 30 credit hours (24 hours of coursework, plus 6 hours of thesis preparation). With the approval of the Graduate Advisor, thesis students may have a minor of as many as six hours of graduate and/or advanced undergraduate courses in a discipline other than history. A maximum of six hours of advanced undergraduate history coursework may be taken for graduate credit. Thesis candidates should consult with the Graduate Advisor to form their thesis faculty committee, which consists of one supervising professor and two other professors.

The Non-Thesis degree plan requires completion of 36 credit hours of coursework. With the approval of the Graduate Advisor, non-thesis students may have a minor of as many as nine hours of graduate and/or advanced undergraduate courses in a discipline other than history. A maximum of nine hours of advanced undergraduate coursework may be taken for graduate credit. In the final semester, the non-thesis students are required to form a nonthesis faculty committee in consultation with the Graduate Advisor, consisting of three members of the graduate faculty. The student must submit to this committee a portfolio containing their seminar paper(s) and a selection of three papers that required an analysis of historiography. After reviewing the portfolio, the committee will devise a new assignment for the student to complete based on its determination of what best fits the needs of the student, keeping in mind that the assignment will constitute less than the equivalent of 3 credit hours of course work. The student will complete the assignment during his/her final semester and turn it into the faculty committee, where it must receive an evaluation of "adequate" or better. The committee will meet the student for a final oral exam, in which the student discusses his/her project.

Non-thesis

Requirements for Non-Thesis option:

HIST 5339	HISTORICAL THEORY AND METHODOLOGY	3
HIST 5340	ISSUES AND INTERPRETATIONS IN U.S. HISTORY	3
or HIST 5341	APPROACHES TO WORLD HISTORY	
Content courses (reading colloquia and research seminars) in U.S., European, African, Latin American, Transatlantic or Transnational history		30
Students may take up to 9 hours in another discipline that has a history-related focus with advisor approval.		
Final Term: Portfolio submitted; portfolio project completed and defended		
Total Hours		36

Thesis

Requirements for Thesis option:

HIST 5339	HISTORICAL THEORY AND METHODOLOGY	3
HIST 5340	ISSUES AND INTERPRETATIONS IN U.S. HISTORY	3
or HIST 5341	APPROACHES TO WORLD HISTORY	
Content courses (reading colloquia and research seminars) in U.S., European, African, Latin American, Transatlantic or Transnational history		18
Students may take up to 6 hours in another discipline that has a history-related focus with advisor approval.		
Thesis		6
Total Hours		30

Archival Administration

Requirements for Archival Administration option:

HIST 5339	HISTORICAL THEORY AND METHODOLOGY	3
HIST 5340	ISSUES AND INTERPRETATIONS IN U.S. HISTORY	3
or HIST 5341	APPROACHES TO WORLD HISTORY	
Content courses (reading colloquia and research seminars) in U.S., European, African, Latin American, Transatlantic or Transnational history		18
Students may take up to 9 hours in another discipline that has a history-related focus with advisor approval.		
HIST 5342	PRINCIPLES OF ARCHIVES AND MUSEUMS I	3
HIST 5343	PRINCIPLES OF ARCHIVES AND MUSEUMS II	3

HIST 5644	ARCHIVAL/PUBLIC HISTORY INTERNSHIP	6
Final Term: Portfolio submitted; portfolio project completed and defended		
Total Hours		36

Public History

Students desiring public history as an area of study as part of the Master of Arts in History must take:

Requirements for Public History option:

HIST 5339	HISTORICAL THEORY AND METHODOLOGY	3
HIST 5340	ISSUES AND INTERPRETATIONS IN U.S. HISTORY	3
or HIST 5341	APPROACHES TO WORLD HISTORY	
Content courses (reading colloquia and research seminars) in U.S., European, African, Latin American, Transatlantic or Transnational history		12
HIST 5342	PRINCIPLES OF ARCHIVES AND MUSEUMS I	3
HIST 5343	PRINCIPLES OF ARCHIVES AND MUSEUMS II	3
HIST 5345	INTRODUCTION TO PUBLIC HISTORY	3
HIST 5348	TOPICS IN PUBLIC HISTORY	3
HIST 5644	ARCHIVAL/PUBLIC HISTORY INTERNSHIP	6
Final Term: Portfolio submitted; portfolio project completed and defended		
Total Hours		36

Students electing to complete an internship in archival management will also earn the certificate in archival administration (see Certificate section).

Students interested in either archival administration (see Certificate section) or public history as an area of study are encouraged to consult the Graduate Advisor to discuss a program of work.

Master of Education in Teaching (M.Ed.T.)

History may be chosen as an appropriate academic specialization or teaching field for students enrolled in the Master of Education in Teaching Degree Program. The History Department offers courses that qualify as an academic area or teaching field for elementary and secondary teachers. HIST 5340 ISSUES AND INTERPRETATIONS IN U.S. HISTORY and/or HIST 5341 APPROACHES TO WORLD HISTORY are especially recommended for students in the M.Ed.T. program, and for others who wish to broaden their historical knowledge for classroom teaching. See Master of Education in Teaching Degree Program (p. 223).

Ph.D. Program

UNCONDITIONAL ADMISSION

The criteria for admission below are used, without specific weight, as positive indicators of potential success in the program. All criteria must be met in order to receive consideration for unconditional admission.

- A prior academic degree (B.A. or M.A. in History or related fields) from an accredited institution (verified by transcripts from each college or university previously attended sent directly from the registrar of that institution to Graduate Admissions).
- A minimum undergraduate GPA of 3.0 in the course of completing a B.A. degree in History or a related field from an accredited institution (verified by official transcripts from each college or university previously attended sent directly from the registrar of that institution to Graduate Admissions).
- An academic writing sample (e.g. research essay) from a previous course assignment.
- A letter of intent, describing the student's historical interests and how they intersect with the faculty and transatlantic focus of the Ph.D. program.
- Three letters of recommendation (from university or college professors) mailed directly from the recommenders to the History Ph.D. Advisor.
- A score of 156 or higher on the verbal section and a score of 5 or higher on the analytical writing section of the GRE aptitude test (verified by official GRE scores sent to Graduate Admissions). However standardized test performance is not the sole criterion for admission or the primary criterion to end consideration for admission.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation (e.g., GRE scores) prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission. Provisionally admitted students must adequately satisfy any incomplete documentation by the end of the semester in which they are admitted. If the applicant fails to do so, the student will be dropped from the program. He or she may seek readmission when provisional requirements are complete.

PROBATIONARY ADMISSION

An applicant whose credentials approximate but do not meet minimum admission standards, may be granted Probationary Admission subject to the condition that the candidate must earn no grade lower than a B in his/her first 12 semester hours of graduate work taken at UT Arlington.

DEFERRAL OR DENIAL

If two or more of the criteria have not been met satisfactorily, the applicant will not be admitted on any of the three levels above but will receive deferral or denial. A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

APPLICATION DEADLINE

The Ph.D. admissions committee will begin its evaluation of completed applications on January 15 and will continue to meet periodically until the Graduate School deadline of June 15. Decisions concerning fellowships and assistantships will be made beginning March 15 and will continue thereafter depending on availability.

PH.D. FELLOWSHIP STANDARDS

Fellowships, when available, will be awarded on a competitive basis. The criteria for Liberal Arts Special (Transatlantic) Doctoral Fellowships in History are:

- Candidates must be new students entering in the fall semester, with a minimum of 6 hours of enrollment in both long semesters to retain their fellowships.
- Undergraduate GPA of 3.25 for the last 60 undergraduate hours from an accredited institution.
- Three letters of recommendation (from faculty if possible)
- An academic writing sample (e.g. research essay, thesis chapter) from a previous undergraduate course assignment.

Ph.D. Degree Requirements

Students accepted into the transatlantic PhD program are expected to take a total of 48 semester credit hours in a three-year period: During the first year, students take HIST 5339 HISTORICAL THEORY AND METHODOLOGY, HIST 5340 ISSUES AND INTERPRETATIONS IN U.S. HISTORY, HIST 5341 APPROACHES TO WORLD HISTORY and HIST 5349 INTRODUCTION TO TRANSATLANTIC HISTORY, as well as two colloquia (reading courses). During their second and third year, students take HIST 5347 INTRODUCTION TO TEACHING COLLEGE HISTORY and four additional colloquia and four seminars (research courses). At least two of the six colloquia and at least two of the four seminars must be in transatlantic history. At least one of the transatlantic colloquia must be labelled "early" and another "late". In their sixth semester, students commonly enroll in HIST 6690 DIRECTED STUDIES FOR PhD STUDENTS to prepare for the Comprehensive Exam.

REQUIRED COURSES

HIST 5339	HISTORICAL THEORY AND METHODOLOGY	3
HIST 5340	ISSUES AND INTERPRETATIONS IN U.S. HISTORY	3
HIST 5341	APPROACHES TO WORLD HISTORY	3
HIST 5349	INTRODUCTION TO TRANSATLANTIC HISTORY	3
HIST 5360	READING COLLOQUIUM IN EARLY TRANSATLANTIC HISTORY	3
HIST 5361	READING COLLOQUIUM IN LATE TRANSATLANTIC HISTORY	3
HIST 6360	RESEARCH SEMINAR IN EARLY TRANSATLANTIC HISTORY	3
HIST 6361	RESEARCH SEMINAR IN LATE TRANSATLANTIC HISTORY	3

Full time doctoral students are expected to take nine hours each semester. Part time students are required to take at least six hours each semester. Each semester a student must consult the Graduate Advisor before he/she can be cleared to register.

RECOMMENDED COURSE OF STUDY FOR FULL-TIME STUDENTS

First Year

First Semester	Hours	Second Semester	Hours

Sixth Year

First Semester	Hours	Second Semester	Hours
HIST 6699	6	HIST 7399	3
	6		3

Total Hours: 90

Diagnostic Evaluation

At the end of the first academic year or after the student has completed the first 18 hours of coursework, each student will have to pass a diagnostic evaluation. History faculty with whom the student has worked will be asked to submit a written evaluation of the student's potential to continue in the program, using a form developed by the Graduate Advisor. The Graduate Studies Committee will review these evaluations and give each student one of four results:

1. approval to continue in the doctoral program;
2. approval to continue with specified remedial work;
3. failure, but with permission for assessment through a second diagnostic evaluation after no more than one year;
4. failure and referral of the student to the MA program, in which the student will be allowed to work towards a terminal MA degree.

Language Requirement

If the student has not already fulfilled the foreign language requirement before entering the MA/PhD program, he/she is expected to use the first three years in the program to satisfy the foreign language requirement. The student is expected to choose a language that will be required to work on the PhD topic of his/her choice. Each student is expected to have a solid reading knowledge in at least one transatlantic language (modern languages of the European and African peoples other than English). The language proficiency can be demonstrated in three different ways:

1. If the student has not already taken four semesters (from an accredited university) in a single foreign language with at least a B before being admitted to the MA/PhD program (within 10 years prior to admission), the student needs to complete four semesters in one foreign language with at least a grade of B prior to taking the Comprehensive Exam.
2. Demonstrating proficiency in a foreign language by taking the CLEP test and scoring 71-80 in German, 68-80 in French, and 67-80 in Spanish.
3. Taking the Reading Comprehension Exercise by an appropriate faculty member in which the student during one semester must read one monograph (about 200-300 pages) in a language other than English and submit a five-seven page summary in English, which must include up to three pages of direct translation.

The language requirement must be satisfied before the student can take the Comprehensive Exam. For the student at the dissertation stage, the candidate's doctoral committee may require that the student demonstrates competency in a second foreign language in the same fashion as the first foreign language if that second language is judged essential for the student's dissertation research.

Comprehensive Exam

COMPREHENSIVE EXAM COMMITTEE

If the student is allowed to stay in the program, he/she should, after consultation with the Ph.D. Advisor, consider establishing a five-member Comprehensive Exam Committee. The student must first ask a graduate faculty member whose research closely relates to the student's anticipated dissertation topic to chair the committee. The chair of the committee will then assist the student in assembling the rest of the committee. Four of the five committee members must be from UTA's History Department. The PhD advisor reserves the right to attend the oral portion of the Comprehensive Exam. One member can be from outside the department or even from another university. All five members of the committee will read and assess the comprehensive examination and the dissertation prospectus.

COMPREHENSIVE EXAM

After the student has completed all or most of the 48 hours of coursework and satisfied the language requirement, he/she, upon consultation with the Ph.D. Advisor and the Comprehensive Exam Committee, should begin preparing for the Ph.D. Comprehensive Exam. It is strongly recommended that students wait until they have completed all 48 hours of coursework before they take the Exam. To prepare for the Comprehensive Examination, students may enroll in Independent Study courses, HIST 6190 DIRECTED STUDIES FOR PhD STUDENTS, HIST 6390 DIRECTED STUDIES FOR PhD STUDENTS, HIST 6690 DIRECTED STUDIES FOR PhD STUDENTS, or HIST 6990 DIRECTED STUDIES FOR PhD STUDENTS during their sixth semester.

Only after the student has the approval of the Ph.D. Advisor, he/she may arrange the date of the exam in consultation with all committee members. Please make sure to file the **Request for the Comprehensive Examination** in the first four weeks of the semester. (See the graduate program assistant in the History Department office to file the form.)

The Comprehensive Examination is meant to test the student's knowledge in at least three broad areas of study and to determine whether the student is prepared to teach in those areas. Students work with their professors to define each of their three exams. At least one of the three must be on a broad aspect of transatlantic history. The Department recommends that another of the three exams focus on a teaching field, perhaps defined in traditional regional or national terms, and that the third exam be defined in terms of a transnational historical theme or topic, like "History of Cartography," "Labor and Citizenship," "Gender and Power."

The written portion of the exam will be taken over a period of three consecutive days, seven hours each day, from 9:00 a.m. to 4:00 p.m. The students will be examined over one area each day. Beginning with the first morning, the student should report to the graduate program assistant in the History Department office, who will issue the student the relevant question(s) for that day's examination. Students may use a personal computer available in the department to take their examination. They may not use texts or notes during the exam. Chairs should ensure that time-limits for individual parts of the examination are observed.

After the written exams are completed and the committee has read all three parts, students will take the oral exam (within a week of the written exam). Students must take both the written and oral exams or they will automatically fail the comprehensive exam. After the oral exam is over, the committee members will discuss the exam as a whole (written and oral). Then the committee will decide on one of the four options listed below.

1. Passed, approval and recommendation to begin dissertation research under the supervision of the committee chair.
2. Passed, approval to remain in the program upon meeting certain specified additional requirements.
3. Failed, with permission to retake the examination after a certain period as specified by the examining committee.
4. Failed: Recommendation not to continue in the program.

Students are required to pass this examination before they proceed to the dissertation (ABD) phase of the program.

Dissertation Guidelines

By the end of the first semester after the successful completion of the Comprehensive Examination, the student should submit a dissertation prospectus to his/her committee and the Ph.D. Advisor who assures that it fulfills the expectations of a doctoral project in transatlantic history. The dissertation committee ordinarily consists of three of the five professors involved in the Comprehensive Examination of the student. **All three members of the dissertation committee must be members of the UT Arlington History Department. The student together with his/her primary supervisor may,**

if deemed necessary, invite outside readers to become additional members of the dissertation committee. Students should work closely with the chair of their committee while researching and writing their dissertation.

During the dissertation phase of the program, students enroll in HIST 6399 DISSERTATION, HIST 6699 DISSERTATION or HIST 6999 DISSERTATION and, in exceptional cases with prior approval of the Ph.D. Advisor, in HIST 6190 DIRECTED STUDIES FOR PhD STUDENTS. HIST 6190 DIRECTED STUDIES FOR PhD STUDENTS may be taken by students following their Comprehensive Exams for a maximum of four semesters, if their dissertation chair concludes that in a given semester they are not engaged **full-time in work** on their dissertation. In the final semester of dissertation work, students must enroll in HIST 7399 DOCTORAL DEGREE COMPLETION to be in compliance with the requirement of the Graduate School. Students should be aware that the dissertation defense should occur **after NO more than four years from the Comprehensive Examination**. If the student takes more time to finish the doctoral dissertation, he/she has to file for an extension with the Graduate School.

Once the student, the chair of the committee, and the primary readers agree that the dissertation is ready to be defended, the student must submit the **request for dissertation defense** form and schedule the **dissertation defense**. Before he/she **applies for graduation**, the student must receive approval from the Ph.D. Advisor. The student should furnish each committee member with a copy of the dissertation, including notes and bibliography, at least three weeks prior to the defense date. The oral defense of the dissertation generally lasts 1-2 hours. Questioning of the candidate will be supervised by the chair of the student's dissertation committee. Committee members may request that the dissertation be further revised and may withhold final approval of the dissertation until the revisions have been made. If the dissertation has been approved by the committee, the student has to submit the **dissertation** and the **dissertation defense report** to the Graduate School. The deadline dates for each semester are published in the Graduate School Calendar.

Certificate Requirements

These studies involve application of historical knowledge and methodology in non-academic settings such as private businesses or public historical agencies (e.g., archives, museums, preservation societies).

Students desiring a certificate of archival administration or a certificate in public history should consult course requirements (p. 385).

Students already holding a M.A. or Ph.D. degree in history or a related field, as well as students enrolled in graduate programs other than history, who desire only a certificate in archival administration should consult the Graduate Advisor.

History - Undergraduate Programs

Overview

The study of history explores the basic forces that have shaped human affairs and is therefore a means for dealing with present concerns and future problems. An appreciation of our heritage develops a sense of our identity. Historical inquiry also provides the necessary background for the study of other disciplines such as economics, literature, art, language, and the social as well as natural sciences.

Students of history develop important critical skills that are the hallmark of educated people: the ability to reason and analyze; the capacity to investigate problems and synthesize diverse information; facility in expressing ideas or data clearly and precisely. The History Department encourages an open and questioning attitude toward the diversity of human experiences and ideas. An awareness of cultural differences between various groups of people will provide insights concerning the basic issues of world civilization. Students of history are encouraged to read analytically, speak cogently, and write coherently.

Both the curriculum and the methodology of the History Department are multifaceted. The History Department, therefore, requires that students take courses in both chronological and topical areas in United States and world history. The history faculty specializes in such diverse methodologies as quantitative analysis and social and political history, as well as the more traditional biographical and narrative approaches. Thus students are exposed to the many ways of studying the past and the present.

A degree in history prepares students for a variety of careers, including teaching, archival administration, business, journalism and communications, historical preservation, law, and public affairs. More importantly, by providing insight into the causes and effects of change in society, a knowledge of history prepares every individual for life in a complex world.

Admission to Department of History Degree Programs

There are no special requirements that prospective majors in the Department of History must fulfill beyond entering with a minimum 2.25 GPA. In order to graduate students must have a 2.0 GPA overall and in history courses. Students are strongly encouraged to complete the core requirement before enrolling in upper level history courses.

Requirements for a Bachelor of Arts Degree in History

General Core Requirements

General Core Requirements (p. 93)

Required Core for History

ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
ENGL 2303	TOPICS IN LITERATURE	3
or ENGL 2309	WORLD LITERATURE	
or ENGL 2319	BRITISH LITERATURE	
or ENGL 2329	AMERICAN LITERATURE	
POLS 2311	GOVERNMENT OF THE UNITED STATES	3
POLS 2312	STATE AND LOCAL GOVERNMENT	3
MATH 1301	CONTEMPORARY MATHEMATICS	3
or MATH 1302	COLLEGE ALGEBRA	
or MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	
MATH 1303	TRIGONOMETRY	3
or MATH 1308	ELEMENTARY STATISTICAL ANALYSIS	
or MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	
Life & Physical Sciences (select 6 hours from general core requirements)		6
Social and Behavioral Sciences (Select one course from the general core requirements)		3
Creative Arts elective (Select one course from the general core requirements)		3
Foundational Component Area elective (Select one additional course from the general core requirements)		3
Electives - ten hours from any level		10
Electives - six hours from any 3000-4000 level courses		6
Major Requirements for History		
History Core ¹		
HIST 1311	HISTORY OF THE UNITED STATES TO 1865	3
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	3
HIST 2301	HISTORY OF CIVILIZATION (or 2313 for pre-law majors)	3
HIST 2302	HISTORY OF CIVILIZATION (or 2314 for pre-law majors)	3
HIST 3300	INTRODUCTION TO HISTORICAL RESEARCH	3
History Concentration ²		
Group A - U.S. History (select two courses between 3304 and 3373)		6
Group B - Non U.S. History (select two courses between 3374 and 4384)		6
Group A or B (Select three courses between 3304 and 4388)		9
Modern or Classical Language requirement (must be in same language)		14
Minor (see minor advisor for details)		18
Total Hours		117

It is strongly recommended that history majors complete the core requirements before enrolling in upper level history courses.

Note: Please see undergraduate advisor for up-to-date information on degree totals.

¹ **It is strongly recommended that history majors complete the core requirement before enrolling in upper level history courses.**

² Students with a satisfactory SAT achievement score in U.S. history or other proof of a strong background in U.S. history may wish to enroll in an honors section or opt to substitute six hours of advanced courses in U.S. history.

All history majors will design an appropriate course of upper level study in history in consultation with their advisor .

Field Experience (spring semester only - student teaching)		6
EDUC 4647	SECONDARY STUDENT TEACHING	
Total Hours		117

Note: Please see undergraduate advisor for up-to-date information on degree totals.

Oral Communication Competency

Students majoring in History demonstrate competency in oral communication by successfully completing HIST 3300 INTRODUCTION TO HISTORICAL RESEARCH. The department advisor must certify completion of this requirement.

Computer Use Competency

Students majoring in History demonstrate competency in computer use by successfully completing the sophomore level of a Foreign Language course when taken at UT Arlington. If you satisfy your language requirement otherwise, consult the advisor for ways to satisfy this computer competency requirement. The department advisor must certify completion of this requirement.

Minor in History

18 hours of history courses, at least six of which must be 3000/4000 level classes

Minor in Disability Studies

The interdisciplinary field of disability studies explores the experiences of people with disabilities—one of the largest minorities in the United States and worldwide—as well as the ways in which conceptions and representations of disability and “the normal” have shaped human experiences more generally. Treating disability as a crucial element of human diversity, the Minor in Disability Studies approaches disability as a social, cultural, and political construct rather than just a medical condition (as it is commonly viewed). Taught by faculty from the Colleges of Liberal Arts, Education and Health Professions, Architecture, Business, and Social Work, this flexible and multidisciplinary minor prepares students for a variety of graduate programs and for careers in law, education, public health, nursing, architecture, urban planning, and social work.

Students seeking to minor in Disability Studies should first consult with advisors in their major departments or programs for approval, then meet with the Director of the Minor in Disability Studies. A minor in Disability Studies consists of 18 hours, including two required courses: a core course on History of Disability (HIST 3307) and the Disability Studies Internship (DS 4395). Students must take at least 6 hours of other courses in Group A: Disability Studies and may take up to 6 hours of approved electives (Group B). No more than 12 hours may be completed in a single discipline.

History of Disability (HIST 3307) should be taken as early as possible; this course introduces students to disability studies and the histories of ideas about disability, the lives of people with disabilities, and disability policy. The Disability Studies Internship (DS 4395) is a supervised internship through which students apply the academic skills they have acquired in Disability Studies courses to work in a related business, academic, or non-profit environment. Students should complete DS 4395 as one of their last courses for the minor. In rare cases and with the director's permission, students may be allowed to substitute another course for DS 4395.

Some of the following courses change focus from term to term and may therefore not be relevant to the minor during a particular semester. Credit will only be given when the topic of the course (or a substantial portion) focuses on issues related to disability. Other relevant courses not listed below may also be used to fulfill the minor, with the approval of the Director of the Minor in Disability Studies. For that reason, it is important that students consult with the advisor for the minor before registering each semester. Students should consult the catalog and/or the appropriate department for course prerequisites.

Required Courses (six hours)

HIST 3307	HISTORY OF DISABILITY	3
or DS 3307	HISTORY OF DISABILITY	
DS 4395	DISABILITY STUDIES INTERNSHIP	3

Group A: Disability Studies (at least six hours)

DS 3321	TOPICS IN DISABILITY STUDIES	3
DS 3331	RESEARCH IN DISABILITY STUDIES	3
DS 4391	CONFERENCE COURSE	3
KINE 3304	ADAPTED PHYSICAL EXERCISE & SPORT	3

Group A: Disability Studies (with prior approval from the director)

HIST 3300	INTRODUCTION TO HISTORICAL RESEARCH	3
HIST 4388	SELECTED TOPICS IN HISTORY	3
Group B: Approved electives		
ANTH 3369	MEDICAL ANTHROPOLOGY	3
HIST 3317	U.S. LEGAL AND CONSTITUTIONAL HISTORY, COLONIAL TO 1877	3
HIST 3318	U.S. LEGAL AND CONSTITUTIONAL HISTORY, 1877 TO PRESENT	3

ANTH 3330	CULTURAL DIVERSITY AND IDENTITY	3
ECON 3301	THE ECONOMICS OF HEALTH	3
ENGL 3368	TOPICS IN GENDER AND SEXUALITY	3
ENGL 4345	TOPICS IN CRITICAL THEORY	3
GEOG 4350	SPECIAL TOPICS IN MODERN GEOGRAPHY	3
HIST 4388	SELECTED TOPICS IN HISTORY	3
KINE 2307	SPORTS AND SOCIETY	3
LING 2371	LANGUAGE IN A MULTICULTURAL USA	3
SOCI 3336	SOCIAL INEQUALITY	3
SOCW 3303	SOCIAL WELFARE POLICY AND SERVICES	3
SOCW 3317	HUMAN BEHAVIOR AND DIVERSE POPULATIONS	3

Minor in Southwestern Studies

The Southwestern Studies minor fosters an interdisciplinary examination of an historically and culturally significant region—the southwestern United States and northern Mexico. The program offers opportunities for students to explore important topics in a regional context, including multicultural diversity, economic development, political and social change, art and literature, environment, cultural and historical geography, historical cartography, and architectural and urban history. The minor is supported by faculty from seven departments and is sponsored by the University's Center for Greater Southwestern Studies and the History of Cartography, which promotes the use of the UT Arlington Special Collections and the Minority Cultures Collection in the Central Library.

With the permission of their departmental advisor, students enroll in 18 hours selected primarily from the courses listed below. These hours must be distributed among at least three different departments.

Some of the following courses change content from offering to offering and might not be relevant to the minor during a particular year. In addition, special topics courses and/or courses taught outside the College of Liberal Arts may also be used to fulfill the Southwestern Studies minor with the permission of the Director of Southwestern Studies. For these reasons it is important that students consult with the Southwestern Studies faculty advisor before registering each semester.

Minor in Medieval and Early Modern Studies

The medieval and early modern world saw major social and cultural changes—the rise of the middle class, the development of the individual, the emergence of the nation state, and the consolidation of many modern languages. The Medieval and Early Modern Studies minor fosters interdepartmental study of these periods, encouraging students to explore and connect topics in language, literature, history, art, and philosophy. The minor in Medieval and Early Modern Studies comprises courses taught by members of various departments in the College of Liberal Arts.

Students seeking to minor in Medieval and Early Modern Studies should first consult with advisors in their departments or programs for approval of the minor, then with the Director of the Minor in Medieval and Early Modern Studies. A minor in Medieval and Early Modern Studies consists of 6 courses (18 hours total) selected from the courses listed below, with no more than 9 hours to be completed within any single discipline. In addition, other relevant topics courses not listed below may be used to fulfill the minor, with the approval of the director of the Minor in Medieval and Early Modern Studies. Students should consult the catalog and/or the appropriate department for prerequisites.

Geography Minor

18 hours, at least six advanced.

Geography is the study of humanity's interaction with the physical environment. Geographic conditions have had significant effects on history as interrelationships between place and human activities have changed over time. The study of geographic spatial relationships has a major role in general education because it offers both theoretical and practical foundations for understanding contemporary problems, particularly those related to environmentalism, modernization, and technological progress.

Linguistics

Undergraduate Degree

- Bachelor of Arts in Linguistics (p. 408)
- Minor in Linguistics (p. 409)

Graduate Degrees

- Linguistics, M.A. (p. 401)
- Teaching English to Speakers of Other Languages, M.A. (p. 401)
- Linguistics, B.A. to Ph.D.
- Linguistics, Ph.D. (p. 404)

Certificate

- Undergraduate Certificate in Teaching English to Speakers of Other Languages (TESOL) (p. 409)
- Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) (p. 407)

Linguistics - Graduate Programs

Objectives

Linguistics is the scientific study of language, investigating the systematic aspects of sound patterns, word formation, sentences, and meaning. The Department of Linguistics and TESOL at the University of Texas at Arlington provides training in both linguistics and TESOL. In terms of linguistics degrees, the Department trains students so that they can describe, analyze and apply theories to data representing the core areas of the field: phonology (sound patterns), syntax (sentence structure), semantics (meaning), and pragmatics (meaning in context). Students receive a foundation that requires courses in theoretical phonology, syntax, semantics, and pragmatics, but there are also opportunities to build on these areas in terms of language documentation/field linguistics, corpus approaches, and experimental investigations. Many linguistics students pursue additional studies or doctoral concentrations in second language acquisition or work on an understudied or endangered language, areas in which Department faculty have considerable expertise. In terms of TESOL degrees, the programs cover relevant linguistic training, paired with courses in methodology and pedagogy, to equip graduates for professional careers in teaching English to speakers of other languages (TESOL). The TESOL degree programs include practicum and internship components so that students learn the theories that underlie the practice, but also receive ample opportunities to put those theories and skills into practice. Required course content includes second language acquisition, the phonological and grammatical structure of English, and curriculum design. There are also several courses where linguistics and TESOL students find their studies intersecting, such as in the second language acquisition, pragmatics, bilingualism, or language revitalization courses, which can be used as electives or specialization courses in various degree programs.

For further information on graduate degree programs in Linguistics, consult the program's Web site at <http://www.uta.edu/linguistics/current-students/degrees/index.php> or contact the Graduate Advisor.

TESOL (TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES)

Graduate programs in TESOL are primarily designed for those with a background in English language and literature and/or education who plan to go on to teach English to adult learners. A graduate career in TESOL may also be appropriate to those with undergraduate study in a foreign language, international studies, or community development.

Admission Requirements for Graduate Degree Programs in Linguistics

In evaluating candidates for admissions to its graduate degree programs, the Linguistics & TESOL Faculty has adopted a comprehensive approach that is sensitive to the diversity of backgrounds of its applicants. To this end, the following constellation of quantitative and qualitative factors has been established to make explicit the range of criteria upon which admissions decisions will be based. These factors are then applied to the Admission Metrics established for each degree program. (See below for admission requirements for the Graduate Certificate in TESOL.)

ADMISSION FACTORS

Admission decisions into a degree program in the Department of Linguistics & TESOL are made on the basis of two types of factors, quantitative and qualitative. PhD applicants must include an academic writing sample.

1. Quantitative Factors
 - a. Grade Point Average (GPA)
 - i For M.A. program applicants, undergraduate GPA is determined by the U.T. Arlington Graduate School.
 - ii For Ph.D. program applicants, GPA is based on all graduate work completed and recorded at the time the applicant submits an application for admission.
 - iii For BA-to-PhD applicants, GPA is on the undergraduate GPA as determined by the U.T. Arlington Graduate School.
 - b. Graduate Record Examination (GRE) Scores. All applicants are required to submit GRE scores. There are no exceptions. The Department of Linguistics & TESOL evaluates each applicant's sub-scores separately: verbal, quantitative, and analytical.
 - c. TOEFL Scores (international applications only) Applicants for whom English is not their native language and who have not been granted either an undergraduate or graduate degree by an English-medium institution must also present a Test of English as a Foreign Language (TOEFL) or IELTS equivalent score. There are no exceptions.
2. Qualitative Factors
 - a. Letters of Recommendation. Each applicant must present three (3) letters of recommendation that unequivocally indicate that the applicant is prepared for and capable of successful graduate study in linguistics or TESOL at U.T. Arlington. The letters should further indicate that the applicant is capable of completing the appropriate degree program.
 - b. Statement of intent for academic study in our department. Each applicant must write a statement that explains their plan of study and specialization in our department. The statement will be evaluated on the degree to which it is clear, reasonable, and consistent with the research and teaching agenda of the current faculty in Linguistics & TESOL at U.T. Arlington. Prospective applicants should consider the departmental website and faculty research and teaching areas as they evaluate whether they would be able to accomplish their plan of study in our department, especially if they are applying to the doctoral program. Possible areas of specialization are those outlined at <http://www.uta.edu/linguistics/current-students/degrees/phd-linguistics/index.php>. The statement should also convey a level of commitment and maturity commensurate with the applicant's desired degree goals.
 - c. Undergraduate Preparation. Applicants to the M.A. in TESOL program should have passed the following three courses or reasonable equivalents as determined by the graduate advisor (U.T. Arlington equivalents are noted in parentheses):
 - i English composition (ENGL 1302 RHETORIC AND COMPOSITION II)
 - ii A course on English-language literature (ENGL 2319 BRITISH LITERATURE, ENGL 2329 AMERICAN LITERATURE)
 - iii The equivalent of a fourth-semester course in a foreign language (SPAN 2314 INTERMEDIATE SPANISH II, FREN 2314 INTERMEDIATE FRENCH II, etc.). Students whose undergraduate education was delivered in a language other than English are exempt from this requirement.
 - d. Applicants to the M.A. in Linguistics or Ph.D. in Linguistics programs should have passed the following three courses or reasonable equivalents as determined by the graduate advisor (U.T. Arlington equivalents are noted as in parentheses):
 - i English composition (ENGL 1302 RHETORIC AND COMPOSITION II)
 - ii College-level mathematics (MATH 1302 COLLEGE ALGEBRA)
 - iii A laboratory science (any 1000-level course in BIOL, CHEM, GEOL or PHYS; LING 5322 LABORATORY PHONOLOGY may also be used to fulfill this requirement)
 - e. Applicants to the Ph.D. and the BA-to-Ph.D in Linguistics programs should present all of the following: evidence of research activity during undergraduate studies; an undergraduate transcript showing coursework which demonstrates that the applicant has passed with a B or higher the following three courses or reasonable equivalents as determined by the graduate advisor (U.T. Arlington equivalents are noted as in parentheses):
 - i Introduction to linguistics (LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE/LING 5300 LINGUISTIC ANALYSIS)
 - ii Phonetics and phonology (LING 3330 PHONETICS AND PHONOLOGY)
 - iii Morphology and syntax (LING 3340 GRAMMAR AND MORPHOLOGY)
 - f. Previous Graduate Work (Ph.D. applicants only.) Ph.D. applicants must present at least 30 semester credit hours of previous graduate-level coursework in any field (not necessarily linguistics) and must meet the linguistics course equivalents (LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE/LING 5300 LINGUISTIC ANALYSIS, LING 3330 PHONETICS AND PHONOLOGY, LING 3340 GRAMMAR AND MORPHOLOGY).
 - g. Ph.D. applicants who present fewer than 30 semester credit hours will be assessed based on whether they meet the criteria for unconditional admission for the accelerated Ph.D. in linguistics, and whether their coursework includes the linguistics course equivalents (LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE/LING 5300 LINGUISTIC ANALYSIS, LING 3330 PHONETICS AND PHONOLOGY, LING 3340 GRAMMAR AND MORPHOLOGY). Such candidates who meet the unconditional admission criterion and who also have passed the three linguistics course equivalents will be considered for the BA-to-PhD program (i.e., "doctoral-bound"). Ph.D. applicants who present fewer than 30 semester credit hours and do not meet the unconditional admission criterion AND also the criterion of passing the three linguistics course equivalents will automatically be considered as applicants to the M.A. Linguistics program.

- h. Writing Sample (required for PhD applicants, optional for other programs): Applicants must submit an academic writing sample (research paper) of 20 pages or less. The paper must be in an area of language or linguistic study, and demonstrate a strong prose style, a solid handle on argumentation, and the ability to do academic research in linguistics or a closely related field.

ADMISSION METRICS

In formulating a recommendation for admission, the graduate advisors will apply the following admission metrics to each applicant's admission dossier.

1. M.A. in TESOL

- a. Unconditional Admission. Typically, applicants for the M.A. in TESOL will be offered unconditional admission if they meet either of the following two sets of criteria:
- The applicant presents an undergraduate GPA of at least 3.0, a GRE Verbal score of at least 550 (156 on the 2011 or later version), a GRE Quantitative score of at least 450 (141 on the 2011 or later version), a GRE Analytical score of at least 4.5, and a full set of Qualitative Factors. In addition, applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also present a Test of English as a Foreign Language (TOEFL) score of at least 100 iBt, or 250 if computer based, or 600 if paper based.
 - The applicant presents an undergraduate GPA of at least 3.5, a GRE Verbal score of at least 500 (153 on the 2011 or later version), a GRE Quantitative score of at least 400 (140 on the 2011 or later version), a GRE Analytical score of at least 4.0, and a full set of Qualitative Factors. In addition, applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also present a Test of English as a Foreign Language (TOEFL) score of at least 100 iBt, or 250 if computer based, or 600 if paper based.
- b. Probationary Admission. Applicants for the M.A. in TESOL typically present a complete application that has one of the following:
- includes a GRE Verbal score of less than 500 (153); or
 - includes a GRE Quantitative score of less than 400 (140); or
 - includes a GRE Analytical score of less than 4.0; or
 - lacks the undergraduate preparation specified above but who otherwise meet a majority of the remaining admission criteria (including an undergraduate GPA of at least 3.0), will be eligible for probationary admission. Students on probation must:
 - complete any undergraduate courses necessary for unconditional admission during their first two semesters of study; and
 - achieve a GPA of at least 3.3 in the first 9 graduate-level courses taken as an M.A. TESOL student.

2. M.A. in Linguistics

- a. Unconditional Admission. Typically, applicants for the M.A. in Linguistics will be offered unconditional admission if they meet either of the following sets of criteria:
- The applicant presents an undergraduate GPA of at least 3.0, a GRE Verbal score of at least 450 (150 on the 2011 or later version), a GRE Quantitative score of at least 550 (146 on the 2011 or later system), a GRE Analytical score of at least 4.5, and a full set of acceptable Qualitative Factors. In addition, applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also present a Test of English as a Foreign Language (TOEFL) score of at least 100 iBt, or 250 if computer based, or 600 if paper based.
 - The applicant presents an undergraduate GPA of at least 3.5, a GRE Verbal score of at least 400 (146 on the 2011 or later version), a GRE Quantitative score of at least 500 (144 on the 201a or later system), a GRE Analytical score of at least 4.0, and a full set of acceptable Qualitative Factors. In addition, applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also present a Test of English as a Foreign Language (TOEFL) score of at least 100 iBt, or 250 if computer based, or 600 if paper based.
- b. Probationary Admission. Applicants for the M.A. in Linguistics typically present a complete application that has one of the following:
- includes a GRE Verbal score of less than 400 (146); or
 - includes a GRE Quantitative score of less than 500 (144); or
 - includes a GRE Analytical score of less than 4.0; or
 - lacks the undergraduate preparation specified above, but who otherwise meet a majority of the remaining admission criteria (including an undergraduate GPA of at least 3.0), will be eligible for probationary admission. Students on probation must:
 - complete any undergraduate courses necessary for unconditional admission during their first two semesters of study; and
 - achieve a GPA of at least 3.3 in the first 9 graduate-level credit hours (in LING courses) as an M.A. Linguistics student.

Master's Degree Requirements

LINGUISTICS

Graduate programs in linguistics are primarily designed for those with a background in one or more foreign languages and/or a background in the linguistic aspects of the English language. A graduate career in linguistics may also be appropriate to those with undergraduate study in anthropology, psychology, philosophy, or religion. Applicants without formal training in linguistics are invited to apply, provided that they are prepared to meet the department's requirements for leveling courses.

Requirements for master's and doctoral degrees are given in the Advanced Degrees and Requirements section of this catalog. In addition, the following apply to those pursuing a graduate degree in linguistics:

All students pursuing a graduate degree in linguistics must meet the degree prerequisites (i.e., leveling courses) and must take the core courses appropriate to their degree as published on the department's Web site, <http://www.uta.edu/linguistics/current-students/degrees/index.php>.

LINGUISTICS DEGREE PLANS

M.A. Non-Thesis Degree Plan: 36 hours of graduate-level coursework plus comprehensive examination on the coursework. Students requiring leveling courses must take from three to to nine additional hours, for a total of up to 45 hours.

TESOL DEGREE PLANS

Requirements for master's degrees are given in the Advanced Degrees and Requirements section of this catalog. In addition, the following apply to those pursuing a graduate degree in TESOL:

M.A. Non-Thesis Degree Plan: 36 hours of graduate-level coursework plus comprehensive examination on the coursework.

All M.A. TESOL students must demonstrate knowledge of a foreign language prior to unconditional admission to the degree program. Those without such background may pursue study of a foreign language at U.T. Arlington concurrent with probationary enrollment in the M.A. TESOL program.

For additional information on prerequisites or degree requirements, consult the Graduate Advisor.

Admission Requirements for Graduate Degree Programs in Linguistics

In evaluating candidates for admissions to its graduate degree programs, the Linguistics & TESOL Faculty has adopted a comprehensive approach that is sensitive to the diversity of backgrounds of its applicants. To this end, the following constellation of quantitative and qualitative factors has been established to make explicit the range of criteria upon which admissions decisions will be based. These factors are then applied to the Admission Metrics established for each degree program. (See below for admission requirements for the Graduate Certificate in TESOL.)

ADMISSION FACTORS

Admission decisions into a degree program in the Department of Linguistics & TESOL are made on the basis of two types of factors, quantitative and qualitative. PhD applicants must include an academic writing sample.

1. Quantitative Factors
 - a. Grade Point Average (GPA)
 - i For M.A. program applicants, undergraduate GPA is determined by the U.T. Arlington Graduate School.
 - ii For Ph.D. program applicants, GPA is based on all graduate work completed and recorded at the time the applicant submits an application for admission.
 - iii For BA-to-PhD applicants, GPA is on the undergraduate GPA as determined by the U.T. Arlington Graduate School.
 - b. Graduate Record Examination (GRE) Scores. All applicants are required to submit GRE scores. There are no exceptions. The Department of Linguistics & TESOL evaluates each applicant's sub-scores separately: verbal, quantitative, and analytical.
 - c. TOEFL Scores (international applications only) Applicants for whom English is not their native language and who have not been granted either an undergraduate or graduate degree by an English-medium institution must also present a Test of English as a Foreign Language (TOEFL) or IELTS equivalent score. There are no exceptions.
2. Qualitative Factors
 - a. Letters of Recommendation. Each applicant must present three (3) letters of recommendation that unequivocally indicate that the applicant is prepared for and capable of successful graduate study in linguistics or TESOL at U.T. Arlington. The letters should further indicate that the applicant is capable of completing the appropriate degree program.
 - b. Statement of intent for academic study in our department. Each applicant must write a statement that explains their plan of study and specialization in our department. The statement will be evaluated on the degree to which it is clear, reasonable, and consistent with the research and teaching agenda of the current faculty in Linguistics & TESOL at U.T. Arlington. Prospective applicants should consider the departmental website and faculty research and teaching areas as they evaluate whether they would be able to accomplish their plan of study in our department, especially if they are applying to the doctoral program. Possible areas of specialization are those outlined at <http://www.uta.edu/linguistics/current-students/degrees/phd-linguistics/index.php>. The statement should also convey a level of commitment and maturity commensurate with the applicant's desired degree goals.
 - c. Undergraduate Preparation. Applicants to the M.A. in TESOL program should have passed the following three courses or reasonable equivalents as determined by the graduate advisor (U.T. Arlington equivalents are noted in parentheses):
 - i English composition (ENGL 1302 RHETORIC AND COMPOSITION II)
 - ii A course on English-language literature (ENGL 2319 BRITISH LITERATURE, ENGL 2329 AMERICAN LITERATURE)

- iii The equivalent of a fourth-semester course in a foreign language (SPAN 2314 INTERMEDIATE SPANISH II, FREN 2314 INTERMEDIATE FRENCH II, etc.). Students whose undergraduate education was delivered in a language other than English are exempt from this requirement.
- d. Applicants to the M.A. in Linguistics or Ph.D. in Linguistics programs should have passed the following three courses or reasonable equivalents as determined by the graduate advisor (U.T. Arlington equivalents are noted as in parentheses):
 - i English composition (ENGL 1302 RHETORIC AND COMPOSITION II)
 - ii College-level mathematics (MATH 1302 COLLEGE ALGEBRA)
 - iii A laboratory science (any 1000-level course in BIOL, CHEM, GEOL or PHYS; LING 5322 LABORATORY PHONOLOGY may also be used to fulfill this requirement)
- e. Applicants to the Ph.D. and the BA-to-Ph.D in Linguistics programs should present all of the following: evidence of research activity during undergraduate studies; an undergraduate transcript showing coursework which demonstrates that the applicant has passed with a B or higher the following three courses or reasonable equivalents as determined by the graduate advisor (U.T. Arlington equivalents are noted as in parentheses):
 - i Introduction to linguistics (LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE/LING 5300 LINGUISTIC ANALYSIS)
 - ii Phonetics and phonology (LING 3330 PHONETICS AND PHONOLOGY)
 - iii Morphology and syntax (LING 3340 GRAMMAR AND MORPHOLOGY)
- f. Previous Graduate Work (Ph.D. applicants only.) Ph.D. applicants must present at least 30 semester credit hours of previous graduate-level coursework in any field (not necessarily linguistics) and must meet the linguistics course equivalents (LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE/LING 5300 LINGUISTIC ANALYSIS, LING 3330 PHONETICS AND PHONOLOGY, LING 3340 GRAMMAR AND MORPHOLOGY).
- g. Ph.D. applicants who present fewer than 30 semester credit hours will be assessed based on whether they meet the criteria for unconditional admission for the accelerated Ph.D. in linguistics, and whether their coursework includes the linguistics course equivalents (LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE/LING 5300 LINGUISTIC ANALYSIS, LING 3330 PHONETICS AND PHONOLOGY, LING 3340 GRAMMAR AND MORPHOLOGY). Such candidates who meet the unconditional admission criterion and who also have passed the three linguistics course equivalents will be considered for the BA-to-PhD program (i.e., "doctoral-bound"). Ph.D. applicants who present fewer than 30 semester credit hours and do not meet the unconditional admission criterion AND also the criterion of passing the three linguistics course equivalents will automatically be considered as applicants to the M.A. Linguistics program.
- h. Writing Sample (required for PhD applicants, optional for other programs): Applicants must submit an academic writing sample (research paper) of 20 pages or less. The paper must be in an area of language or linguistic study, and demonstrate a strong prose style, a solid handle on argumentation, and the ability to do academic research in linguistics or a closely related field.

ADMISSION METRICS

In formulating a recommendation for admission, the graduate advisors will apply the following admission metrics to each applicant's admission dossier.

1. BA-to-PhD applicants in Linguistics
 - a. Unconditional admission. Typically, applicants for the BA-to-Ph.D. in Linguistics program must be admitted unconditionally. Unconditional admission requirements are as follows. The applicant presents an undergraduate GPA of at least 3.6 (on a 4.0 scale) based on upper division course work (junior and senior level or equivalent) in a four year BA in linguistics program or a BA or BS in an allied field. Regardless of degree program, the coursework must include courses equivalent to LING 3330 PHONETICS AND PHONOLOGY and LING 3340 GRAMMAR AND MORPHOLOGY. In addition, the applicant presents a GRE Verbal score of at least 450, a GRE Quantitative score of at least 550, a GRE Analytical score of at least 4.0, and a full set of excellent Qualitative Factors. In addition, applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also submit a Test of English as a Foreign Language (TOEFL) score of at least 100 iBt, or 250 if computer based, or 600 if paper based (or its IELTS equivalent) and also submit a score from the Test of Spoken English, the Speaking Section of the TOEFL iBT, or the Speaking Section of the IELTS that documents the applicant's proficiency in spoken English. The speaking score is used for making determination for assistantships; applicants who wish to be considered for an assistantship must receive a score of 45 or higher on the TSE, a score of 23 on the Speaking Section of the TOEFL iBT, or a score of 7 on the Speaking Section of the IELTS. This and other requirements for holding an assistantship are described in the Graduate Assistantship/ Associateship Policy.
2. Ph.D. in Linguistics
 - a. Unconditional Admission. Typically, applicants for the Ph.D. in Linguistics will be eligible for unconditional admission if they meet either of the following sets of criteria:
 - i The applicant presents a graduate GPA of at least 3.3, a GRE Verbal score of at least 500 (153 on the 2011 or later version), a GRE Quantitative score of at least 600 (148 on the 2011 or later version), a GRE Analytical score of at least 4.5, and a full set of excellent Qualitative Factors. In addition, applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also submit scores on the Speaking section of either the Test of English as a Foreign Language (TOEFL) or the IELTS. In addition, applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also submit a Test of English as a Foreign Language (TOEFL) score of at least 100 iBt, or 250 if computer based, or 600 if paper based (or its IELTS equivalent) and also submit a score from the Test of Spoken English, the Speaking Section of the TOEFL iBT, or the Speaking Section of the IELTS. that documents the applicant's proficiency in spoken

English. The speaking score is used for making determinations for assistantships; applicants who wish to be considered for an assistantship must receive a score of 45 or higher on the TSE, a score of 23 on the Speaking Section of the TOEFL iBT, or a score of 7 on the Speaking Section of the IELTS. This and other requirements for holding an assistantship are described in the University's Graduate Assistantship/ Associateship Policy.

- ii The applicant presents an undergraduate GPA of at least 3.6, a GRE Verbal score of at least 450 (150 on the 2011 or later version), a GRE Quantitative score of at least 550 (146 on the 2011 or later version), a GRE Analytical score of at least 4.0, and a full set of excellent Qualitative Factors. In addition, applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also submit a Test of English as a Foreign Language (TOEFL) score of at least 100 iBT, or 250 if computer based, or 600 if paper based (or its IELTS equivalent) and also submit a score from the Test of Spoken English, the Speaking Section of the TOEFL iBT, or the Speaking Section of the IELTS. that documents the applicants' proficiency in spoken English. The speaking score is used for making determinations for assistantships; applicants who wish to be considered for an assistantship must receive a score of 45 or higher on the TSE, a score of 23 on the Speaking Section of the TOEFL iBT, or a score of 7 on the Speaking Section of the IELTS. This and other requirements for holding an assistantship are described in the University's Graduate Assistantship/Associateship Policy.
- b. Probationary Admission. Applicants for the Ph.D. in Linguistics typically present a complete application that has one of the following:
- i includes a GRE Verbal score of less than 450 (150);
 - ii or includes a GRE Quantitative score of less than 550 (146); or
 - iii includes a GRE Analytical score of less than 4.0
 - iv lacks the undergraduate preparation specified above but who otherwise meet a majority of the remaining admission criteria (including a graduate GPA of at least 3.3 and for doctoral admissions, presents strong qualitative materials), will be considered for probationary admission. Students on probation must:
 - Deferred Admission Applicants for whom the admission file is incomplete will have a final decision admission deferred. In such cases, a final decision will be made only when the applicant presents a complete admission file.
 - Denial of Admission Applicants who do not meet a majority of the admission standards (both quantitative and qualitative) set forth above will be denied admission. For doctoral admission in particular, qualitative factors such as writing sample, statement of intent, or area of intended work may result in a student being denied admission even when quantitative factors are met.
 - Regarding Provisional Admission: The Department of Linguistics and TESOL does not permit Provisional Admission. All applicants must present a complete set of credentials before their application will be evaluated.

Doctoral Degree Requirements

LINGUISTICS

Graduate programs in linguistics are primarily designed for those with a background in one or more foreign languages and/or a background in the linguistic aspects of the English language. A graduate career in linguistics may also be appropriate to those with undergraduate study in anthropology, psychology, philosophy, or religion. Applicants without formal training in linguistics are invited to apply, provided that they are prepared to meet the department's requirements for leveling courses.

Requirements for master's and doctoral degrees are given in the Advanced Degrees and Requirements section of this catalog. In addition, the following apply to those pursuing a graduate degree in linguistics:

All students pursuing a graduate degree in linguistics must meet the degree prerequisites (i.e., leveling courses) and must take the core courses appropriate to their degree as published on the department's Web site, <http://www.uta.edu/linguistics/current-students/degrees/index.php>.

PH.D. DEGREE PLAN

Students entering the Ph.D. program (including those entering as doctoral-bound) must enter having the equivalent of LING 5300 LINGUISTIC ANALYSIS/LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE, LING 3330 PHONETICS AND PHONOLOGY, and LING 3340 GRAMMAR AND MORPHOLOGY. The first semester of the program requires enrollment in LING 5320 PHONOLOGICAL THEORY and LING 5330 FORMAL SYNTAX. The doctoral degree requires graduate coursework as follows: 18 hours of linguistic core courses, 9 hours of methods courses, 3 hours of professional development, 6 hours in an area of specialization, 6 hours of seminar courses (separate from other requirements and with at least one in planned area of specialization), 3 hours of electives, 3 hours of dissertation proposal preparation (LING 6391 RESEARCH IN LINGUISTICS) and 9 hours of dissertation (LING 6999 DISSERTATION). Students entering with a M.A. in linguistics may be able to waive up to 15 hours, at the discretion of the department, for equivalent courses completed at a B or higher in their master's program.

Theoretical Core Courses

LING 5320	PHONOLOGICAL THEORY	3
LING 5321	ADVANCED PHONOLOGICAL THEORY	3
LING 5330	FORMAL SYNTAX	3
LING 5331	ADVANCED FORMAL SYNTAX	3
LING 5345	SEMANTICS	3
LING 5347	PRAGMATICS	3

Methods Courses		9
Select three of the following four courses		
LING 5380	FIELD METHODS	
LING 5381	CORPUS LINGUISTICS	
LING 6380	FIELD METHODS SEMINAR	
LING 6381	RESEARCH DESIGN AND STATISTICS (or an approved course in research design or statistics offered by another department)	
Professional Development Course		
LING 6300	PROFESSIONAL WRITING SEMINAR	3
Specialization Courses		6
Elective		3
Seminar Requirement		6
Select two of the following: ¹		
LING 6390	LINGUISTICS SEMINAR	
LING 6392	SEMINAR IN PHONETICS AND PHONOLOGY	
LING 6393	SEMINAR IN SYNTAX	
LING 6394	SEMINAR IN SEMANTICS AND PRAGMATICS	
LING 6395	SEMINAR IN SECOND LANGUAGE ACQUISITION	
Total Hours		45

¹ Students should consult with their advisor in planning choices; at least one seminar must be in area of specialization.

BA-to-PH.D. students must successfully defend their dissertation proposal in order to be granted the M.A. degree in linguistics.

All Ph.D. students must demonstrate knowledge of core areas in linguistics by passing the diagnostic examination requirement outlined on the departmental website.

Doctoral students must satisfy all the coursework requirements of the doctoral program (including specialization and seminar courses) prior to taking courses that do not fulfill the requirements. Any exception to this policy must be approved by a majority vote of the Graduate Studies Committee.

In addition, there are foreign language and professional activities requirements that must be met. Visit <http://www.uta.edu/linguistics/current-students/degrees/phd-linguistics/index.php> for details.

Admissions Requirements for the Graduate Certificate in TESOL

Students wishing to apply to the U.T. Arlington Graduate School solely for the purpose of earning the Graduate Certificate in TESOL must have earned an undergraduate degree at an accredited institution and present an undergraduate GPA of at least 3.0 (as determined by the U.T. Arlington Graduate School). Applicants for whom English is not their native language and who have not been granted an undergraduate degree by an English-medium institution must also present a Test of English as a Foreign Language (TOEFL) score of at least 100 iBt, or 250 if computer based, or 600 if paper based.

Students seeking to transfer from Special Student or Certificate status into a graduate degree program at U.T. Arlington must re-apply to the U.T. Arlington Graduate School as degree-seeking students and meet all published admissions requirements, including those pertaining to standardized tests. No student will be "automatically" or "exceptionally" moved from Special Student or Certificate status into any graduate degree program.

The Web site for the U.T. Arlington Office of Graduate Studies provides additional information about graduate study at U.T. Arlington and about the admission process, including general testing requirements and other paperwork. Students may apply for admission online or request application materials be sent via post.

Certificate in Teaching English to Speakers of Other Languages (TESOL)

This program provides preparation through study and practice for the individual who wishes to teach English to speakers of other languages. It is available to any student who has been admitted to the Graduate School at U.T. Arlington.

The certificate requires:

Course Work

LING 5300	LINGUISTIC ANALYSIS ^{1,3}	3
LING 5301	TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE ^{2,3}	3
LING 5302	METHODS AND MATERIALS FOR TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE	3
LING 5305	SECOND LANGUAGE ACQUISITION	3

LING 5304	PEDAGOGICAL GRAMMAR OF ENGLISH	3
LING 5307 or LING 5306 or LING 5308 or LING 5326	PEDAGOGICAL PHONOLOGY OF ENGLISH TESOL CURRICULUM DESIGN LANGUAGE ASSESSMENT BILINGUALISM	3
Practicum		
LING 5110	TESOL PRACTICUM	1
Total Hours		19

- LING 5300 LINGUISTIC ANALYSIS (or equivalent linguistics course work) is a prerequisite for LING 5301 TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE, LING 5302 METHODS AND MATERIALS FOR TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE, and LING 5305 SECOND LANGUAGE ACQUISITION.
- LING 5301 TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE is a prerequisite for LING 5304 PEDAGOGICAL GRAMMAR OF ENGLISH and LING 5307 PEDAGOGICAL PHONOLOGY OF ENGLISH PEDAGOGICAL PHONOLOGY OF ENGLISH.
- Even if the student presents an equivalency of LING 5300 LINGUISTIC ANALYSIS, LING 5301 TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE, and/or other course work, the 18-hour requirement must be met.

A maximum of three credit hours of course work done at another institution can be transferred and counted toward the certificate.

Upon beginning study for the certificate, the student should contact the Graduate Advisor in TESOL to declare the intention to earn the certificate.

Linguistics and TESOL - Undergraduate Programs

Overview

Linguistics is the discipline that studies the structures, acquisition, and histories of human languages around the world. Linguists are not, then, principally people who know many languages, but rather people who investigate how a language is organized and what features all languages exhibit.

The Department of Linguistics and TESOL at UT Arlington is especially concerned with the study of minority, often endangered, languages. The curriculum offers students enriching insight into the cultural diversity represented in the more than 6,000 living languages currently known on the planet. The department also presents current approaches to the teaching of English to speakers of other languages.

The study of linguistics prepares students for a variety of careers, among them teaching English to speakers of other languages in the United States and abroad, brand naming (lexicon work), information and intelligence analyst, language policy, forensic linguistics and the law, computer analysis of language, language education, and graduate study in linguistics. Above all, students in the Department of Linguistics and TESOL are made especially aware of the complex world in which we live by studying a universal and most definitive human experience: language.

Requirements for a Bachelor of Arts Degree in Linguistics

Pre-Professional Courses		
General Core Requirements (p. 93)		39
Recommended Core Requirements		
LING 2301	INTRODUCTION TO THE STUDY OF HUMAN LANGUAGES	3
LING 2371	LANGUAGE IN A MULTICULTURAL USA	3
Program Requirements		
LING 3345	CRITICAL REASONING IN LINGUISTICS ²	3
Select one of the following: ³		
Sophomore level of a Foreign Language course when taken at UT Arlington		
LING 4330	CORPUS LINGUISTICS	
Electives ⁴		
Professional Courses		
Major		
Linguistics course at the 2000 level		3
LING 3311	INTRODUCTION TO LINGUISTIC SCIENCE	3
LING 3330	PHONETICS AND PHONOLOGY	3
LING 3340	GRAMMAR AND MORPHOLOGY	3
LING 4347	PRAGMATICS	3

LING 3345 or PHIL 2311	CRITICAL REASONING IN LINGUISTICS LOGIC	3
LING 4301 or LING 4303	PHONOLOGICAL THEORY I FORMAL SYNTAX	3
Linguistics courses at 3000/4000 level		12
Service-Learning Requirement (see below)		3
Enhanced Language Requirement (see below)		
Electives ⁴		
Total Hours		84

¹ For a list of approved courses, contact the University Advising Center or the student's major department.

² The department advisor must certify completion of this requirement.

³ If neither of these conditions are met, consult the advisor for ways to satisfy this computer competency requirement. The department advisor must certify completion of this requirement.

⁴ Sufficient number of hours to complete the total hours required for a degree.

Note: The 12 additional hours of linguistics courses at the 3000/4000 level may include linguistics courses offered by other departments, with approval of the department advisor, provided those courses do not satisfy either the Enhanced Language Requirement or the Minor. Under no circumstances can courses used for the Enhanced Language Requirement or Minor be used to satisfy requirements for linguistics major courses.

SERVICE-LEARNING REQUIREMENT

This will be satisfied by the student enrolling in and earning at least a 2.0 in three hours of credit from a departmental course designated as "service-learning." A course may satisfy both the service-learning requirement and the hours requirements for the major. (For example, LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE if taught as service-learning could satisfy the major requirement and the service-learning requirement.) The Department will maintain a list of courses and section numbers by semesters/year (i.e., Fall 2010) for verification of this requirement, and the department advisor must certify completion of this requirement.

ENHANCED LANGUAGE REQUIREMENT

The enhanced language requirement consists of coursework that covers the first year, second year, and third year levels of instruction in a single language. This requirement is equivalent of three years of language instruction, up to and including six hours at the 3000-level in a single language, where that language is not English and is not the student's home language. Classical, modern, signed or indigenous (for example, Native American) languages are all permissible languages to satisfy this requirement.

Requirements for a Minor in Linguistics

All undergraduate students who elect to minor in linguistics must take:

LING 2301	INTRODUCTION TO THE STUDY OF HUMAN LANGUAGES	3
LING 3311	INTRODUCTION TO LINGUISTIC SCIENCE	3
LING 3330 or LING 3340	PHONETICS AND PHONOLOGY GRAMMAR AND MORPHOLOGY	3
One course at the 4000-level with a LING prefix		3
Any undergraduate level course bearing the LING prefix ¹		6
Total Hours		18

¹ Students intending to pursue graduate study in linguistics should, however, follow a course program that includes these courses as part of their minor: LING 2301 INTRODUCTION TO THE STUDY OF HUMAN LANGUAGES, LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE, LING 3330 PHONETICS AND PHONOLOGY, and LING 3340 GRAMMAR AND MORPHOLOGY.

MINOR

18 hours in an allied field (psychology, anthropology, philosophy, education, computer science, classical/modern languages, or another field approved by the undergraduate advisor). A student may choose to use the same 18 hours to simultaneously satisfy the enhanced language requirement and the minor requirement. However, if language courses are used to fulfill both the Enhanced Language Requirement and the Minor Requirement, the student must complete the remaining 18 hrs with a second minor, to maintain a total of 120 hours for the degree.

Requirements for an Undergraduate Certificate in TESOL

Students interested in receiving theoretical and practical training in Teaching English to Speakers of Other Languages (TESOL) are encouraged to consider this five-course certificate program. The Undergraduate Certificate in TESOL offers a sequence of courses which introduces linguistics, second language acquisition, and methods and materials in TESOL instruction, paired with the an internship required to consist of 60 hours of volunteer ESL/ literacy teaching in a local community service organization. Students take:

LING 3311	INTRODUCTION TO LINGUISTIC SCIENCE	3
LING 4327	SECOND LANGUAGE ACQUISITION	3
LING 4353	TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE	3
LING 4354	METHODS AND MATERIALS TO TEACH ENGLISH AS A SECOND OR FOREIGN LANGUAGE	3
LING 4395	INTERNSHIP IN TESOL	3
Total Hours		15

Ideally, students should start the sequence with LING 3311 INTRODUCTION TO LINGUISTIC SCIENCE and use LING 4395 INTERNSHIP IN TESOL as the final course in this sequence. This certificate is ideal for students interested in earning a credential to increase employment opportunities, such as teaching English abroad. This certificate can be paired with a bachelor's degree in another discipline. Students who are interested in earning the BA in Linguistics with the Undergraduate Certificate in TESOL may apply the 4000 level courses required by the certificate to the degree requirement of 12 hours at the 3000/4000 level. This optimal sequencing will allow students to graduate with a BA in Linguistics and an Undergraduate Certificate in TESOL without adding additional hours to their degree requirements. Contact the Undergraduate Advisor for more information on this program.

Mexican American Studies

The Center for Mexican American Studies in the College of Liberal Arts offers a minor that is available to all students. A Mexican American Studies (MAS) minor consists of 18 total credit hours: one required introductory course, one required course taught by Mexican American Studies faculty, and four electives selected from the lists below. Either of the two required courses not taken to fulfill the required course segment of the minor may be taken as an elective towards the minor. After consulting with their major departments or programs, students will file a degree plan for the MAS minor at the Center for Mexican American Studies. Courses not listed below may qualify as electives with the approval of the director of the Center for Mexican American Studies.

Minor in Mexican American Studies

Required Courses

MAS 2300	INTRODUCTION TO MEXICAN AMERICAN STUDIES	3
MAS 3310	LATINOS IN THE UNITED STATES	3
or MAS 3314	THE LATINA EXPERIENCE	
or MAS 3346	MEXICAN AMERICAN LITERATURE	
or MAS 3368	MEXICAN AMERICAN HISTORY	

Electives (Choose four electives from the below) 12

MAS 3312	LATIN AMERICAN CULTURE AND CIVILIZATION	
MAS/POLS 3317	MEXICAN POLITICS AND U.S.-MEXICO RELATIONS	
MAS 3319/SOCW 3317	HUMAN BEHAVIOR AND DIVERSE POPULATIONS	
MAS/ANTH 3330	CULTURAL DIVERSITY AND IDENTITY	
MAS/SOCI 3337	RACIAL & ETHNIC GROUPS IN US	
MAS/ANTH 3348	LATINO IMMIGRATION TO THE U.S.	
MAS/HIST 3352	THE SOUTHWEST	
MAS/HIST 3363	TEXAS TO 1850	
MAS/CRCJ 3380	RACE, CRIME, AND JUSTICE	
MAS/SPAN 4313	TOPICS IN HISPANIC CULTURE	
MAS/SPAN 4315	TOPICS IN CONTEMPORARY LATIN-AMERICAN LITERATURE AND CULTURE, MODERNISM TO THE PRESENT	
MAS/SPAN 4317	CHICANO LITERATURE	
POLS 4317	ETHNIC GROUP POLITICS IN THE UNITED STATES	
MAS/SPAN 4318	MEXICAN LITERATURE	
MAS/POLS 4319	POLITICS OF MEXICAN AMERICANS	
MAS/SPAN/WOMS 4327	WOMEN IN HISPANIC LITERATURE	
MAS 4350	TOPICS IN MEXICAN AMERICAN STUDIES	

SOCI 4365/WOMS 4392	TOPICS IN SOCIOLOGY *
MAS/HIST 4368	HISTORY OF MEXICO
MAS 4391	CONFERENCE COURSE
Total Hours	
18	

* Permitted when the topic pertains to Hispanic women.

Either of the two required courses not taken to fulfill the required course segment of the minor may be taken as an elective towards the minor. After consulting with their major departments or programs, students will file a degree plan for the MAS minor at the Center for Mexican American Studies. Courses not listed below may qualify as electives with the approval of the director of the Center for Mexican American Studies.

Military Science - Undergraduate Program

Purpose

The ROTC program at The University of Texas at Arlington offers a unique opportunity for quality students to assess and develop their leadership skills. A wide variety of settings are provided to expose students to the styles, techniques, and tools of leadership. It also develops college-educated officers for the active Army and the reserve components (U.S. Army Reserve and Army National Guard). This affords the student the opportunity to pursue either a civilian or a military career after completing college.

Programs Available

GENERAL INFORMATION

Classroom: Examine theory, principles and techniques. Review leadership from a historical perspective through case studies and presentations. Communications skills emphasized.

Lab: Practical application of theory and opportunity for each student to be assessed. Immediate feedback provided enabling students to build on the experience gained. Individual skills and team-building emphasized.

Corps of Cadets: Leadership positions assigned according to demonstrated individual progress. Provides a forum for individual growth by working within a structured organization. Emphasis on counseling, coaching, mentorship, and coordination.

Field Training: A unique opportunity to gain experience under stressful and challenging situations. Students are placed in environments to test their abilities and reactions in leading small groups. Emphasis on decision-making, endurance, and reaction under stress to build self-confidence.

Simultaneous Membership Program: An opportunity to serve in a National Guard or Reserve unit as an officer trainee while participating in ROTC and attending UT Arlington. Emphasis on planning and organizing. Programs tailored to meet individual needs.

Army Schools: Develop skills through exposure to other students and soldiers from around the country by attending Airborne, Air Assault, or other schools. Emphasis on increased experience.

Leadership Development Assessment Course: Five weeks of high-intensity training with students from across the nation, designed to evaluate individual leadership potential. Emphasis placed on evaluation/development of the individual. Student receives pay. Travel, lodging and most meal costs are paid for by the Army.

Leadership Training Camp: A five-week summer camp conducted at an Army post. The environment is rigorous and stresses leadership, initiative and self-discipline. No military obligation incurred. The student receives pay. Travel, lodging and most meal costs are paid for by the Army.

Four-Year Program: The traditional program of Army ROTC is a program of instruction which extends over four years of college. The four-year program is divided into two phases—a two-year basic course and a two-year advanced course. The basic course is normally taken by students during their freshman and sophomore years. The purpose of the basic course is to introduce students to general military subjects and leadership principles. There is no military obligation incurred for attending the basic course.

The student who wishes to enter the advanced course, normally taken during the junior and senior years, must apply for it; must meet eligibility requirements including a physical examination; and must sign an agreement to complete the last two years of Army ROTC and accept a commission as a U.S. Army Officer. Students auditing courses or students not eligible for commissioning into the Army will receive P/F grades only.

Two-Year Program: This program is offered for students who have had two years of college remaining to graduate. Students must meet ROTC advanced course eligibility requirements. Prior military service, JROTC experience, and attendance at the Leadership Training Camp (LTC) are some of the ways to meet ROTC advanced course enrollment eligibility.

Scholarships

The U.S. Army Scholarship Program provides an excellent way for young men and young women to obtain assistance in financing a college education. Every scholarship provides for payment of all expenses incurred for fees and tuition, an allowance for books and supplies, and up to \$400 a month for up to 10 months per year. There are scholarships offered in all four years with payments ranging from one to four years. Initial application may be made during the student's senior year in high school or freshman year in college. Each year more scholarships are added to the program. These scholarships are merit based and are not contingent on financial need. All students are encouraged to make application through the Military Science Department.

Minor in Military Science

Military science may be used as a minor course of study in many degree programs at The University of Texas at Arlington.

To be eligible, the student must:

MILS 3341	LEADERSHIP I	3
MILS 3342	LEADERSHIP II	3
MILS 4341	ADVANCED LEADERSHIP I	3
MILS 4342	ADVANCED LEADERSHIP II	3
MILS 4391	CONFERENCE COURSE	3

1. be enrolled in the ROTC program,
2. receive acceptance of military science as a minor from his/her major degree department,
3. successfully complete with a grade of B or better in four of the following:
4. successfully complete 6 additional military science hours with a grade of B or better of any level (MILS 0180 LEADERSHIP LAB can be repeated to meet this requirement),
5. successfully complete the Army's Leader Development and Assessment Course offered annually in the Summer, and,
6. meet all Army prerequisites to earn a commission as an Army officer upon graduation.

Modern Languages

Undergraduate Degrees

- Bachelor of Arts in French (p. 417)
- Bachelor of Arts in French with Secondary Teacher Certification (p. 417)
- Bachelor of Arts in Spanish for Global Competence (p. 417)
- Bachelor of Arts in Spanish Translation and Interpreting (p. 417)
- Bachelor of Arts in Spanish with Secondary Teacher Certification (p. 417)
- Bachelor of Arts in Critical Languages and International Studies (p. 417)
- Bachelor of Business Administration in International Business and French, German, Russian, or Spanish (in cooperation with School of Business Administration) (p. 417)
- Minor in Arabic (p. 420)
- Minor in Chinese (p. 420)
- Minor in French (p. 420)
- Minor in German (p. 420)
- Minor in Korean (p. 420)
- Minor in Portuguese (p. 420)
- Minor in Russian (p. 420)
- Minor in Spanish for Global Competence (p. 420)
- Minor in Spanish Translation and Interpreting (p. 420)
- Minor in Medieval and Early Modern Studies (p. 420)

Graduate Degrees

- Modern Languages, M.A. (Spanish or French Concentration) (p. 413)
- Modern Languages, French Certificate (http://www.uta.edu/modl/gradstudies/current-students/graduate_certificate.html)
- Modern Languages, Spanish Certificate (http://www.uta.edu/modl/gradstudies/current-students/graduate_certificate.html)

Certificates

- Certificate in Spanish Translation (p. 421)
- Certificate in Spanish Interpreting (http://www.uta.edu/modl/translation-studies/certificate_span_trans.html)
- Certificate in Localization and Translation (p. 421)
- Certificate in Dual-Language Localization and Translation (p. 421)

Modern Languages - Graduate Program

Objectives

Graduate programs in modern languages are designed to enhance students' competence in the language and literature of their major language field. Specific objectives are to prepare students for a career in teaching or in any area in private or public life in which knowledge of a modern language is essential and to help them develop the techniques of independent research necessary for work beyond the master's level.

FELLOWSHIPS

Fellowships, when available, will be awarded on a competitive basis. Nominees for the Graduate School Master's Fellowship in Modern Languages will be selected based on the following criteria:

- Candidates must be new students entering in the fall semester, with a minimum of 6 hours of enrollment in both long semesters to retain their fellowships.
- The minimum undergraduate GPA requirement is 3.0, as calculated by the Graduate School, plus as GPA of 3.0 for any graduate credit hours.
- Transcript of a completed bachelor's degree in French or Spanish (or appropriate related field) from an accredited institution.
- Three letters of recommendation.
- A written statement explaining the applicant's reasons for graduate study in Spanish.

TEACHING ASSISTANTSHIPS

Teaching assistantships are available for graduate students in the Department of Modern Languages. Graduate students who obtain teaching assistantships are urged to take MODL 5305 METHODS OF MODERN LANGUAGE TEACHING.

Admission Standards

In compliance with HB 1641, the UT Arlington Department of Modern Languages does not use unwritten criteria, it does not assign a specific weight to any one factor being considered, and it does not use standardized tests (i.e., the GRE) in the admissions or competitive fellowship or scholarship process as the sole criterion for consideration or as the primary criterion to end consideration of an applicant to the M.A. program. However, the GRE is required and it is used as a criterion, without specific weight, in the Department's evaluation of candidates for admission to programs at each of three levels: Unconditional, Provisional, and Probationary Admission.

The Department wishes to be as thorough and fair as possible in evaluating applicants for admission. It recognizes that some applicants may appear to be stronger according to some criteria than according to other criteria. When an applicant does not completely meet the minimum expectations for Unconditional Admission, the Department considers the applicant for possible Provisional or Probationary Admission. When the applicant is not granted any of the three levels of admission, the decision may be deferred or the application is denied. We do not wish to exclude a qualified and potentially successful candidate who perhaps has approached but not met all the criteria completely. However, we do not wish to admit candidates who, based on the criteria, are deemed to have a poor chance of successfully completing the graduate program.

UNCONDITIONAL ADMISSION

The criteria for admission below are used, without specific weights, as positive indicators of potential success in the program. All four criteria for unconditional admission must be met in order to receive unconditional admission.

- degree in the language to be studied of 18 upper level hours in the language or equivalent¹
- 3.0 undergraduate GPA (last 60 hours)
- submission of GRE scores²
- 3 letters of recommendation (from faculty if possible) sent to the Department of Modern Languages Graduate Advisor.

- 1 A student with a bachelor's degree in a field other than French or Spanish may become an unconditionally admitted graduate student after fulfilling the upper level requirements in the language:
 - 18 hours of upper level Spanish, or French or
 - a combination of coursework and testing.
 (A person with a bachelor's degree in a major other than French or Spanish must have the equivalent of 18 hours of upper level French or Spanish in order to become a master's student. The equivalency may take one of the following forms: A student may obtain 18 hours at the 3000 and 4000 level, or s/he may attempt to test out of nine hours of grammar, composition, and conversation. If a student tests out of grammar, composition, and conversation, s/he must take nine hours of literature, in order to demonstrate ability to do literary studies).
- 2 Under specific circumstances the GRE may be waived for those who received their B.A. from UT Arlington or have already earned an advanced graduate degree.. See GRE Waiver or Advanced Admission. International students must also take the TOEFL test and score 550 on the paper-and-pencil test or 213 on the computerized test, in order to qualify for unconditional admission.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRED ADMISSION

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

FAST TRACK PROGRAM IN MODERN LANGUAGES

The Fast Track Program allows outstanding undergraduate students in French or Spanish at UT Arlington to take up to three graduate seminars in Spanish or French that will earn credit toward both the Bachelor's degree and the Master's degree in Modern Languages. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA . Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's degree. To qualify, students must have completed at least 30 hours at UTA with a GPA of 3.0 in all courses and 3.25 in the last 30 hours. Before entering the Fast Track, students must also have completed the four required core courses in the French or Spanish major with a GPA of at least 3.50. Additionally, they must have already completed at least two additional 3000-4000 level courses in either French or Spanish, excluding International Business and/or translation courses, with a GPA of 3.5 or higher.

Students who successfully complete the Fast Track Program will be admitted automatically to the Graduate School to continue their graduate work in the Modern Languages MA Program once the Bachelor's degree is awarded. They will not be required to take the GRE, complete an additional application for admission to the Graduate School, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Modern Languages MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option.

To remain in the Fast Track Program, students must receive no grade lower than a B in any graduate seminars taken as an undergraduate, selected with the advice and approval of the Modern Languages Graduate Advisor. Undergraduate students who do not maintain grades of B or A in the graduate courses taken will be unable to continue in the Fast Track Program but, if the courses are completed passing, will still receive credit toward their undergraduate degree requirements. Students originally denied entry into the Fast Track Program, discontinued after provisional admission, subsequently dropped or opting out are still welcome to apply to the Modern Languages MA Program in the usual way and will be considered without prejudice.

For an application form or to obtain more details about this program, contact the Modern Languages Graduate Advisor.

Master's Degree Requirements

In addition to the Graduate School requirements for Master's degree programs, the following requirements apply in the Department of Modern Languages:

Thesis: A written comprehensive examination may be given at the discretion of the student's committee.

Thesis Substitute: There will be a comprehensive examination on the coursework and appropriate reading list. An oral defense of the thesis substitute may be required at the discretion of the student's supervising committee. At least 30 hours must be in coursework.

Non-thesis: There will be a comprehensive written examination on the coursework, an appropriate reading list, as well as an oral exam.

MODERN LANGUAGES (FRENCH; SPANISH)

Those wishing to major in a modern language or literature must upon admission have a baccalaureate degree with a major in that modern language or have a minimum of 18 advanced hours, or the equivalent in language proficiency and course content.

Modern Languages (French; Spanish) Students pursuing the M.A. in Modern Languages with concentration in French or in Spanish are required to take a minimum of 9 hours in the core MODL courses along with 27 hours in their concentration or alternatively a maximum of 12 hours in the core

MODL courses and 24 hours in their concentration. All students are required to take MODL 5304 CURRENTS IN EUROPEAN AND LATIN AMERICAN LITERATURES AND THOUGHT.

A knowledge of a second foreign language will be required, including listening, speaking, reading and writing skills as demonstrated by the successful completion of two semesters of coursework at the second-year level, MODL 5301 MODERN LANGUAGES FOR GRADUATE READING, or by an appropriate examination.

Modern Languages - Undergraduate Programs

The Department of Modern Languages (MODL) offers courses in Arabic (<http://www.uta.edu/modl/arabic>), Chinese (<http://www.uta.edu/modl/chinese>), French (<http://www.uta.edu/modl/french>), German (<http://www.uta.edu/modl/german>), Korean (<http://www.uta.edu/modl/kore>), Portuguese (<http://www.uta.edu/modl/portuguese>), Russian (<http://www.uta.edu/modl/russian>), and Spanish (<http://www.uta.edu/modl/spanish>).

MODL offers a Bachelor of Arts in French (<http://www.uta.edu/modl/french/undergrad.html>), Spanish for Global Competence (http://www.uta.edu/modl/spanish/undergrad_major.html), Spanish Translation and Interpreting (http://www.uta.edu/modl/spanish/undergrad_major_interp.html), and a Bachelor of Arts with major in Critical Languages and International Studies (<http://www.uta.edu/modl/clis>) (Chinese, German, and Russian), as well as certificate programs in Translation (Spanish) (http://www.uta.edu/modl/translation-studies/certificate_span_trans.html), Interpreting (Spanish) (http://www.uta.edu/modl/translation-studies/certificate_span_interp.html), and Localization and Translation (http://www.uta.edu/modl/translation-studies/certificate_gilt.html) (Arabic, Chinese, French, German, Korean, Portuguese, and Russian). At the graduate level, MODL offers a Master of Arts in Modern Languages with concentrations in French (<http://www.uta.edu/modl/french/grad.html>) or Spanish (<http://www.uta.edu/modl/spanish/graduate.html>). The department also offers minors in Arabic, Chinese, French, German, Korean, Portuguese, Russian, Spanish for Global Competence, and Spanish Translation and Interpreting, as well as area studies and other options.

Learning other languages has always formed a critical part of a well-rounded education. In today's global economy, the ability to communicate in languages other than one's own has become an increasingly valuable asset sought after by employers across the public and private sectors. Our substantive programs prepare students for research, translation, literary studies, linguistic studies, teaching, and business.

The goal of language study is to develop deep translingual and transcultural competence. In view of these aims, MODL provides a full range of language offerings from beginning to advanced courses in a variety of languages from around the globe. In addition to development in the four basic language skills -- speaking, listening, reading, and writing -- a major aim is to gain understanding of the diversity of human culture as represented in several of the world's languages, literatures, and other cultural media.

Ultimately, these aims contribute to the development of informed and capable communication and interaction with educated native speakers of the target language as well as the ability to reflect on the world and oneself through the lens of other languages and cultures.

Criteria for Admission to a Major in the Department of Modern Languages

In addition to satisfying the entrance requirements for the College of Liberal Arts, prospective majors in the Department of Modern Languages must meet the following criteria:

- A 3.0 GPA is required in the 1441-2314 Modern Language sequence, or a grade of B on the Modern Language placement test, or approval of the departmental advisor.
- After admission to the Modern Language major, students must maintain a 2.75 GPA in major classes.

Accelerated Language Program

Students with no previous experience or courses in a modern language may choose to begin by enrolling in one of the Intensive Programs:

- French, German and Russian can be completed by taking Levels I and II (8 credit hours), or Levels III and IV (6 credit hours) of these languages in the Fall, Spring, or Summer sessions.
- An Accelerated Spanish course is offered for Levels III and IV (6 credit hours) during the Fall and Spring semesters.
- Students may also choose to fulfill their language requirement by enrolling in Arabic, Chinese, Korean and Portuguese. These classes may not be offered every semester or every summer. Check with the Department of Modern Languages for available courses.

Students are cautioned to take these courses prior to their senior year because of the possibility of enrollment limitations.

Language Acquisition Center

The Department of Modern Languages maintains a fully equipped computer lab on the third floor of Trimble Hall. The lab has a library of CDs and DVDs for student use, as well as specialized software to assist students in their language studies.

Credit by Examination and Placement Tests

Spanish, French, and German. Students with one year of background in the language they will study are strongly recommended to take an advanced placement examination for placement at the appropriate level. Students wishing to earn credit by examination for any of the first four (1441, 1442, 2313,

2314) levels of French, German, or Spanish must present an official score received on one of two nationally administered examinations recognized by the department:

1. Advanced Placement Examination of the College Entrance Examination Board (CEEB), or
2. College-Level Examination Program (CLEP) of the CEEB.

At UT Arlington the examinations will be administered by the Testing Services Office of Counseling and Career Development on dates to be announced. Native or heritage speakers in the French, German, or Spanish program must take either the CLEP or the CEEB exam, as described above.

Russian. Non-native speakers of Russian with previous exposure to the language, who intend to enroll in Russian courses at UT Arlington, may be eligible to take a placement test at the discretion of the department. Native or heritage speakers intending to major or minor in Russian must take the Russian placement test.

Arabic, Chinese, Korean, and Portuguese. Non-native speakers of Arabic, Chinese, Korean, or Portuguese with previous exposure to the language, who intend to enroll in courses in these languages at UT Arlington, may be eligible to take a placement test at the discretion of the department.

Placement tests for Arabic, Chinese, Korean, Portuguese, and Russian are administered on site in the Department of Modern Languages and not offered by The Testing Services Office. For more information, contact the Department of Modern Languages. Testing fees may apply.

Study Abroad

Students should give serious consideration to the unique learning experience of studying abroad. Students wishing to study for a summer, a semester, or a year may obtain UT Arlington credit, continue with their financial aid, and receive scholarship aid to attend any UT Arlington-approved program for Arabic, Chinese, French, German, Korean, Portuguese, Russian, or Spanish.

Summer Study: The department offers several opportunities for gaining credit while studying abroad. Regular programs are offered which provide opportunities for summer study in various countries, including France, Germany, Mexico, and Russia. All arrangements must be made through the department.

Competence in Computer Use

Students majoring in French, Spanish, or Critical Languages and International Studies may demonstrate competency in computer use by:

- passing CSE 1301 COMPUTER LITERACY (or equivalent); or
- passing any 1441, 1442, 2313 or 2314 FREN, GERM, RUSS or SPAN course(s) in residence at UT Arlington; or
- passing the University computer competency examination; or
- passing any other course approved by the Undergraduate Assembly for this purpose.

Competence in Oral Presentations

Students majoring in French, Spanish, Spanish Translation and Interpreting or Critical Languages and International Studies may demonstrate competence in oral presentations by one of the following:

ARAB 3303	ARABIC CONVERSATION & CULTURE
CHIN 3303	CHINESE CONVERSATION
FREN 3303	ADVANCED FRENCH CONVERSATION
GERM 3313	TOPICS IN GERMAN CULTURE & CONVERSATION
KORE 3303	KOREAN CONVERSATION AND CULTURE I
RUSS 3333	CONVERSATION AND TOPICS IN RUSSIAN CULTURE
SPAN 3303	ADVANCED SPANISH CONVERSATION
COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING
COMS 1302	VOICE AND DICTION
COMS 2305	BUSINESS AND PROFESSIONAL COMMUNICATION (or equivalent)

- Or passing any other course approved by the Undergraduate Assembly for this purpose

Critical Cultures Summer Institute

The Critical Cultures Summer Institute (CCSI) highlights a different, less commonly taught cultural area of the globe each summer, providing up to 9 credits of upper-division coursework, along with GLOBAL 2301 INTRODUCTION TO GLOBAL ISSUES, the anchor course of UTA's Critical Languages and International Studies (CLIS) major.

GLOBAL 2301 will provide an introduction to global studies and couple with GLOBAL 3301 TOPICS IN INTERNATIONAL CULTURES AND CIVILIZATIONS I and GLOBAL 3302 TOPICS IN INTERNATIONAL CULTURES AND CIVILIZATIONS II in such areas as language and civilization, film, media, or other subjects of global study. An introductory class in Localization and Translation will also be offered under the aegis of the Summer Institute as GLOBAL 3310. GLOBAL 3301, 3302, and 3310 will fulfill three of the four international studies courses required for the BA in Critical Languages and Global Studies. GLOBAL 2301 is also a requirement for the degree. GLOBAL 2301 and GLOBAL 3301 will be offered during Summer Session I, and GLOBAL 3302 and 3310 will be offered during Summer Session II. Students at any level of language study may take these courses.

Requirements for a Bachelor of Arts Degree in French, Spanish for Global Competence, Spanish Translation and Interpreting, and Critical Languages & International Studies

GENERAL CORE REQUIREMENTS (P. 93)

Major

1441, 1442, 2313, 2314, or equivalent; plus 24 hours at 3000/4000 level in the major language field, at least nine of which must be at the 4000 level. Of these 24 hours, specific course requirements by language are listed below.

Electives

Sufficient number of hours to complete the total hours required for a degree.

Total

120 hours, at least 36 of which must be 3000/4000 level.

Bachelor of Arts in French

FREN 1441	BEGINNING FRENCH I
FREN 1442	BEGINNING FRENCH II
FREN 2313	INTERMEDIATE FRENCH I
FREN 2314	INTERMEDIATE FRENCH II

or equivalent; plus 24 hours at 3000/4000 level in French, at least nine of which must be at the 4000 level. Of these 24 hours, specific course requirements by language are listed below:

All French majors must take FREN 3311 FRENCH LITERATURE AND CULTURE I and FREN 3312 FRENCH LITERATURE AND CULTURE II

- For Non-heritage speakers: Either FREN 3303 ADVANCED FRENCH CONVERSATION A or FREN 3300 PHONOLOGY & PRONUNCIATION is also required.
- For Native or Heritage speakers: An appropriate substitute for FREN 3303 ADVANCED FRENCH CONVERSATION or FREN 3300 PHONOLOGY & PRONUNCIATION will be selected in consultation with an advisor.

Bachelor of Arts in Spanish for Global Competence

SPAN 1441	BEGINNING SPANISH I
SPAN 1442	BEGINNING SPANISH II
SPAN 2313	INTERMEDIATE SPANISH I
SPAN 2314	INTERMEDIATE SPANISH II
OR	
SPAN 2315	INTERM SPAN HERITAGE SPEAKERS

or equivalent; plus 24 hours at 3000/4000 level in Spanish, at least nine of which must be at the 4000 level. Of these 24 hours, specific course requirements by language are listed below:

All Spanish majors must take SPAN 3315 COMPOSITION THROUGH LITERATURE and SPAN 3319 INTRODUCTION TO SPANISH LINGUISTICS

- For Non-heritage speakers: SPAN 3314 ADVANCED SPANISH GRAMMAR
- For Native or Heritage speakers: SPAN 3305 ADVANCED SPANISH FOR HERITAGE SPEAKERS. Native or heritage speakers of a language may not enroll in courses below 3000, with the exception of SPAN 2315 INTERM SPAN HERITAGE SPEAKERS.

Bachelor of Arts in Critical Languages and International Studies

GLOBAL 2301 INTRODUCTION TO GLOBAL ISSUES as well as 12 advanced hours in the chosen language and 12 hours in global studies from one of the 3 categories: Arts and Humanities (Art, History, Literature, Music), Global Issues (Business, Ethics, Sustainability), Social and Cultural Studies (Anthropology, Political Science, Sociology). See advisor for a complete listing of relevant courses.

All students who wish to earn a Bachelor of Arts degree in Critical Languages and International Studies must complete the following coursework in language and allied fields:

Select one of the following languages:

Chinese	
CHIN 1441	BEGINNING CHINESE I
CHIN 1442	BEGINNING CHINESE II
CHIN 2313	INTERMEDIATE CHINESE I
CHIN 2314	INTERMEDIATE CHINESE II
German	
GERM 1441	BEGINNING GERMAN I
GERM 1442	BEGINNING GERMAN II
GERM 2313	INTERMEDIATE GERMAN I
GERM 2314	INTERMEDIATE GERMAN II
Russian	
RUSS 1441	BEGINNING RUSSIAN I
RUSS 1442	BEGINNING RUSSIAN II
RUSS 2313	INTERMEDIATE RUSSIAN I
RUSS 2314	INTERMEDIATE RUSSIAN II

Students in **German** can choose between two different tracks:

Track A (Global):

Course Requirements:

- Four 3000 or 4000 level courses in German
- Four 3000 or 4000 level courses in International Studies, chosen from one of the following themes:
 - International Issues (Business, Ethics, and Sustainability)
 - Arts and Humanities (Art, History, Literature, and Music)
 - Social and Cultural Studies (Anthropology, Political Science, Psychology, and Sociology)

Track B (Professional Track):

Course Requirements:

- Four 3000 or 4000 level courses in German: GERM 3312 ADVANCED GERMAN GRAMMAR, GERM 3313 TOPICS IN GERMAN CULTURE & CONVERSATION, GERM 3316 GERMAN COMPOSITION & GRAMMAR, GERM 3318 SPECIAL TOPICS IN GERMAN STUDIES I
- Four 3000 or 4000 level courses in International Studies
- Arts and Humanities (Literature): GERM 3317 INTRODUCTION TO LITERATURE AND CULTURE STUDIES, GERM 4313 GERMAN LITERATURE AND CULTURE I, GERM 4314 GERMAN LITERATURE AND CULTURE II, GERM 4321 TOPICS IN LITERATURE & CULTURE

Bachelor of Arts in Spanish Translation and Interpreting

All Spanish Translation and Interpreting majors must take:

SPAN 1441	BEGINNING SPANISH I
SPAN 1442	BEGINNING SPANISH II
SPAN 2313	INTERMEDIATE SPANISH I
SPAN 2314	INTERMEDIATE SPANISH II
OR	
SPAN 2315	INTERM SPAN HERITAGE SPEAKERS

or equivalent; plus 24 hours at 3000/4000 level, at least nine of which must be at the 4000 level. Of these 24 hours, specific course requirements are listed below:

For Non-Heritage Speakers

SPAN 3303	ADVANCED SPANISH CONVERSATION
SPAN 3314	ADVANCED SPANISH GRAMMAR
SPAN 3315	COMPOSITION THROUGH LITERATURE

For Heritage Speakers

SPAN 3305	ADVANCED SPANISH FOR HERITAGE SPEAKERS
SPAN 3312	LATIN AMERICAN CULTURE AND CIVILIZATION
SPAN 3315	COMPOSITION THROUGH LITERATURE

For All Students

SPAN 3340	INTRODUCTION TO TRANSLATION
SPAN 3341	INTRODUCTION TO INTERPRETING
SPAN 4341	BUSINESS AND LEGAL TRANSLATION
SPAN 4342	MEDICAL, SCIENTIFIC & TECH TRANSLATION
SPAN 4343	INTERPRETING IN MEDICAL SETTINGS
SPAN 4344	INTERPRETING IN LEGAL SETTINGS

Suggested Electives

SPAN 3345	INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
SPAN 3311	SPANISH CULTURE AND CIVILIZATION

BUSA 2304	INTRODUCTION TO BUSINESS
HEED 1316	FOUNDATIONS OF HEALTH

Options

The following options may be selected, but courses listed under options do not substitute for courses specified by number in the basic degree plan above.

FAST TRACK PROGRAM IN MODERN LANGUAGES

The Fast Track Program allows outstanding undergraduate students in French or Spanish at UT Arlington to take up to three graduate seminars in Spanish or French that will earn credit toward both the Bachelor's degree and the Master's degree in Modern Languages. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA . Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's degree. To qualify, students must have completed at least 30 hours at UTA with a GPA of 3.0 in all courses and 3.25 in the last 30 hours. Before entering the Fast Track, students must also have completed the four required core courses in the French or Spanish major with a GPA of at least 3.50. Additionally, they

must have already completed at least two additional 3000-4000 level courses in either French or Spanish, excluding International Business and/or translation courses, with a GPA of 3.5 or higher.

Students who successfully complete the Fast Track Program will be admitted automatically to the Graduate School to continue their graduate work in the Modern Languages MA Program once the Bachelor's degree is awarded. They will not be required to take the GRE, complete an additional application for admission to the Graduate School, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Modern Languages MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option.

To remain in the Fast Track Program, students must receive no grade lower than a B in any graduate seminars taken as an undergraduate, selected with the advice and approval of the Modern Languages Graduate Advisor. Undergraduate students who do not maintain grades of B or A in the graduate courses taken will be unable to continue in the Fast Track Program but, if the courses are completed passing, will still receive credit toward their undergraduate degree requirements. Students originally denied entry into the Fast Track Program, discontinued after provisional admission, subsequently dropped or opting out are still welcome to apply to the Modern Languages MA Program in the usual way and will be considered without prejudice.

For an application form or to obtain more details about this program, contact the Modern Languages Graduate Advisor.

TEACHER CERTIFICATION

Students wishing to take a Bachelor of Arts Degree in Modern Language with Secondary Teacher Certification must complete 24 hours of courses in the language, at the 2000 level and above.

In addition, each language requires specific courses (counted toward the overall requirement):

French	
FREN 3303	ADVANCED FRENCH CONVERSATION
FREN 4339	ACQUISITION OF FRENCH
Spanish	
SPAN 4339	THE ACQUISITION OF SPANISH

Students should consult the College of Education for information concerning Teacher Certification and other specific requirements.

LATIN AMERICAN STUDIES

(Bachelor of Arts Degree in Spanish with a concentration in Latin American studies)

POLS 3316	DICTATORSHIP AND DEMOCRACY IN LATIN AMERICAN POLITICS
HIST 4365	HISTORY OF SPAIN AND PORTUGAL
HIST 4366	LATIN AMERICAN HISTORY: ORIGINS THROUGH INDEPENDENCE
HIST 4367	LATIN AMERICAN HISTORY: POST-INDEPENDENCE TO THE PRESENT
ECON 4321	INTERNATIONAL TRADE
ECON 4322	INTERNATIONAL FINANCE (recommended)

Major: Spanish

BBA IN INTERNATIONAL BUSINESS/MODERN LANGUAGE

In cooperation with the Department of Modern Languages, the School of Business Administration offers a Bachelor of Business Administration with dual concentrations in international business and a modern language. The BBA in International Business offers concentrations in French, German, Russian, or Spanish. In addition to 26 hours in a modern language with an additional six hours of modern language electives highly recommended, students in this program get a solid foundation in business courses, including accounting, economics, finance, management, marketing, and information systems. Students are encouraged to include six hours of degree specific language electives.

Requirements for a Minor in Arabic, Chinese, French, German, Korean, Portuguese, Russian, Spanish for Global Competence or Spanish Translation and Interpreting

A minor consists of 19 semester hours (excluding 1441 Language Level I), at least nine of which must be 3000/4000 level.

For a minor in Spanish Translation and Interpreting students need to take at least 3 of the following courses: SPAN 3340 INTRODUCTION TO TRANSLATION, SPAN 3341 INTRODUCTION TO INTERPRETING SPAN 4341 BUSINESS AND LEGAL TRANSLATION, SPAN 4342 MEDICAL, SCIENTIFIC & TECH TRANSLATION, SPAN 4343 INTERPRETING IN MEDICAL SETTINGS, SPAN 4344 INTERPRETING IN LEGAL SETTINGS.

MEDIEVAL AND EARLY MODERN STUDIES MINOR

The Medieval and Early Modern Studies minor fosters interdisciplinary study of the Middle Ages and the Early Modern Era, encouraging students to explore and connect topics in language, literature, history, art, and philosophy. Students seeking to minor in Medieval and Early Modern Studies should first consult with advisors in their departments or programs for approval of the minor, then with the Director of the Minor in Medieval and Early Modern Studies. The minor consists of six courses (18 hours total; six hours upper level) selected from courses in Art History, English, History, Modern Languages (French, German, and Spanish), and Philosophy. No more than nine hours to be completed within any single discipline. Students should consult the catalog or visit <http://www.uta.edu/libarts/mems/index.html> for more information.

Certificate in Spanish Translation

Students interested in receiving theoretical and practical training in Spanish-English and English-Spanish translation are eligible to apply to the Department of Modern Languages for this 15-hour certificate program in translation and translation theory. Topics to be covered by coursework in the Certificate Program include medical, business, technical, scientific, legal, and literary translation. To be admitted to the program, students must demonstrate writing proficiency in both Spanish and English. Students should also have completed SPAN 3305 ADVANCED SPANISH FOR HERITAGE SPEAKERS or SPAN 3314 ADVANCED SPANISH GRAMMAR, and SPAN 3315 COMPOSITION THROUGH LITERATURE, or have consent of the department. Once in the program, students begin by taking SPAN 3340 INTRODUCTION TO TRANSLATION. After completing this class with a grade of B or better, students must take SPAN 4341 BUSINESS AND LEGAL TRANSLATION and SPAN 4342 MEDICAL, SCIENTIFIC & TECH TRANSLATION. SPAN 3340, 4341 and 4342 cannot be applied toward the B.A. in Spanish for Global Competence. To receive the certificate, students are also required to pass an Exit Examination in translation. In order to be eligible to take the Exit Examination, students must pass SPAN 4341 and 4342 with a grade of C or better. The Exit Examination in translation may only be taken once.

Certificate in Spanish Interpreting

Students interested in receiving theoretical and practical training in Spanish-English and English-Spanish interpreting are eligible to apply to the Department of Modern Languages for this 15-hour certificate program in interpreting. Topics to be covered by coursework in the Certificate Program include interpreting in school, legal and medical settings. To enter the program, students must demonstrate oral proficiency in both Spanish and English. Students should also have completed SPAN 3305 ADVANCED SPANISH FOR HERITAGE SPEAKERS or SPAN 3314 ADVANCED SPANISH GRAMMAR. Taking SPAN 3303 ADVANCED SPANISH CONVERSATION (Advanced Spanish Conversation for Non-heritage speakers) before SPAN 3341 is highly recommended for Non-heritage speakers. Once in the program, students begin by taking SPAN 3341 INTRODUCTION TO INTERPRETING (Introduction to Interpreting). After completing this class with a grade of B or better, students must take SPAN 4343 INTERPRETING IN MEDICAL SETTINGS (Interpreting in Medical Settings) and SPAN 4344 INTERPRETING IN LEGAL SETTINGS (Interpreting in Legal Settings). SPAN 3341, 4343 and 4344 cannot be applied toward the B.A. in Spanish to Global Competence. To receive the certificate, students are also required to pass an Exit Examination in interpreting. In order to be eligible to take the Exit Examination, students must pass SPAN 4343 and 4344 with a grade of C or better. The Exit Examination in interpreting may only be taken once.

Certificate in Localization and Translation with options in Arabic, Chinese, French, German, Korean, Portuguese and Russian

In this five-course certificate program students study the processes of localization and develop specialized skills in translation for future employment in the language services industry. Localization adapts language, texts, products, software and websites to the locale for which they are intended. By using specialized computer-assisted translation workflow software and simulating a collaborative work environment, students become conversant with the tools and procedures required for twenty-first century localization and translation work. Extensive practice in translating a variety of oral and written documents in the target language provides the skills to work in business, non-profit, and academic situations. Three required translation and localization courses (ARAB/CHIN/GERM/KORE/PORT/RUSS 3310, 3311, FREN 3320, 3321 and ARAB/CHIN/FREN/GERM/KORE/PORT/RUSS 3345) and two culture courses comprise the certificate. *Three required translation and localization courses (ARAB/CHIN/GERM/KORE/PORT/RUSS 3310, 3311, FREN 3320, 3321 and ARAB/CHIN/FREN/GERM/KORE/PORT/RUSS 3345) and two culture courses comprise the certificate. ARAB 3310 ARABIC LOCALIZATION AND TRANSLATION CHIN 3310 CHINESE LOCALIZATION AND TRANSLATION, FREN 3320 LOCALIZATION AND TRANSLATION I, GERM 3310 LOCALIZATION AND TRANSLATION I, KORE 3310 KOREAN LOCALIZATION AND TRANSLATION I, PORT 3310 PORTUGUESE LOCALIZATION AND TRANSLATION, and RUSS 3310 LOCALIZATION AND TRANSLATION I are strongly recommended before taking ARAB 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION, CHIN 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION, FREN 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION, GERM 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION, KORE 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION, PORT 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION, or RUSS 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION.* A minimum of two years (four semesters) of beginning and intermediate level language study is required for the certificate program

Students in Chinese take a total of five courses as follows:

CHIN 3310	CHINESE LOCALIZATION AND TRANSLATION	
CHIN 3311	CHINESE LOCALIZATION AND TRANSLATION II	
CHIN 3345	INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION	3
Select two additional 3000 or 4000 level courses		

Students in French take a total of five courses as follows:

FREN 3320	LOCALIZATION AND TRANSLATION I
FREN 3321	LOCALIZATION AND TRANSLATION II
FREN 3345	INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION

Select one of the following 3000 level courses:

FREN 3305	FRENCH CULTURE AND CIVILIZATION
FREN 3310	INTRODUCTION TO LITERATURE
FREN 3311	FRENCH LITERATURE AND CULTURE I
FREN 3312	FRENCH LITERATURE AND CULTURE II
FREN 3316	TOPICS IN CITIES OF FRANCE
FREN 3318	PROBLEMS OF IDENTITY

Select one of the following 4000 level courses:

FREN 4328	TOPICS IN TWENTIETH-CENTURY FRENCH STUDIES
FREN 4334	CONTEMPORARY FRENCH CULTURE
FREN 4335	BUSINESS FRENCH
FREN 4338	SELECTED TOPICS IN FRENCH LITERATURE OR CULTURE

Students in German take a total of five courses as follows:

GERM 3310	LOCALIZATION AND TRANSLATION I
or GERM 4334	THE CULTURE OF BUSINESS
GERM 3311	LOCALIZATION AND TRANSLATION II
GERM 3345	INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION

Select two additional 3000 or 4000 level courses

Students in Russian take a total of five courses as follows:

RUSS 3310	LOCALIZATION AND TRANSLATION I
or RUSS 4334	THE CULTURE OF BUSINESS
RUSS 3311	LOCALIZATION AND TRANSLATION II
RUSS 3345	INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION

Select two additional 3000 or 4000 level courses

All courses can be used toward fulfilling the requirements for a major in French and a minor in German, or Russian.

Students in Korean take a total of five courses as follows:

KORE 3310	KOREAN LOCALIZATION AND TRANSLATION I
KORE 3311	KOREAN LOCALIZATION AND TRANSLATION II
KORE 3345	INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION

Select two additional 3000 or 4000 level courses

Students in Arabic take a total of five courses as follows:

ARAB 3310	ARABIC LOCALIZATION AND TRANSLATION
ARAB 3311	ARABIC LOCALIZATION AND TRANSLATION II
ARAB 3345	INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION

Select two additional 3000 or 4000 level courses

Students in Portuguese take a total of five courses as follows:

PORT 3310	PORTUGUESE LOCALIZATION AND TRANSLATION
PORT 3311	PORTUGUESE LOCALIZATION AND TRANSLATION II

Select two additional 3000 or 4000 level courses

PORT 3345	INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
-----------	---

All courses can be used toward fulfilling the requirements for a major in French and a minor in Arabic, Chinese, French, German, Korean, Portuguese or Russian.

Certificate in Localization and Translation Dual-Language Option

Students seeking the certificate in localization and translation with a dual language option must take nine courses according to the following plan:

- One beginning course in each language:
 - ARAB 3310 ARABIC LOCALIZATION AND TRANSLATION
 - CHIN 3310 CHINESE LOCALIZATION AND TRANSLATION
 - FREN 3320 LOCALIZATION AND TRANSLATION I
 - GERM 3310 LOCALIZATION AND TRANSLATION I or GERM 4334 THE CULTURE OF BUSINESS
 - KORE 3310 KOREAN LOCALIZATION AND TRANSLATION I
 - PORT 3310 PORTUGUESE LOCALIZATION AND TRANSLATION
 - RUSS 3310 LOCALIZATION AND TRANSLATION I or RUSS 4334 THE CULTURE OF BUSINESS
- One advanced course in each language:
 - ARAB 3311 ARABIC LOCALIZATION AND TRANSLATION II
 - CHIN 3311 CHINESE LOCALIZATION AND TRANSLATION II
 - FREN 3321 LOCALIZATION AND TRANSLATION II
 - GERM 3311 LOCALIZATION AND TRANSLATION II
 - KORE 3311 KOREAN LOCALIZATION AND TRANSLATION II
 - PORT 3311 PORTUGUESE LOCALIZATION AND TRANSLATION II
 - RUSS 3311 LOCALIZATION AND TRANSLATION II
- One Introduction to Computer-Assisted Translation Course in one of the selected languages:
 - ARAB 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
 - CHIN 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
 - FREN 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
 - GERM 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
 - KORE 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
 - PORT 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
 - RUSS 3345 INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION
- Four additional courses (two in each language) are also required. Students may select from:
 - Arabic (ARAB 3303 ARABIC CONVERSATION & CULTURE, ARAB 3304 ARABIC CONVERS & CULT II)
 - Chinese (CHIN 3303 CHINESE CONVERSATION, CHIN 3304 CHINESE CONVERSATION II)
 - French (FREN 3312 FRENCH LITERATURE AND CULTURE II, FREN 3316 TOPICS IN CITIES OF FRANCE, FREN 3318 PROBLEMS OF IDENTITY, and one of the following FREN 4328 TOPICS IN TWENTIETH-CENTURY FRENCH STUDIES, FREN 4334 CONTEMPORARY FRENCH CULTURE, FREN 4335 BUSINESS FRENCH, FREN 4338 SELECTED TOPICS IN FRENCH LITERATURE OR CULTURE)
 - German (two 3000 or 4000 level courses)
 - Korean (KORE 3303 KOREAN CONVERSATION AND CULTURE I, KORE 3304 KOREAN CONVERSATION AND CULTURE II)
 - Portuguese (PORT 3303 PORTUGUESE CONVERSATION AND CULTURE ,PORT 3304 PORTUGUESE CONVERSATION AND CULTURE II)
 - Russian (two RUSS 3000 or 4000)
- A minimum of two years (four semesters) of beginning and intermediate level language study for each selected language is required for the dual-language certificate program.
- For more information on this option, please see the Modern Language Undergraduate Advisor.

Music

Undergraduate Degrees

- Bachelor of Music (Performance, Theory, or Composition) (p. 429)
- Bachelor of Music (Music/Business, Music/Theatre, or Music/Media) (p. 429)
- Bachelor of Music (Jazz Studies Option) (p. 429)
- Bachelor of Music (preparation for Teacher Certification) (p. 429)
- Minor in Music (p. 438)

Graduate Degrees

- Music Performance, M.M. Non-Thesis (p. 424)
- Music Performance, M.M. Thesis (p. 424)

- Music, M.M. (p. 424)

Certificate

- Performance Certificate (p. 428)

Music - Graduate Programs

Music Education

The Master of Music in Music Education curriculum is designed to impart the knowledge needed to facilitate successful careers and encourage personal development. Through further education, music teachers will become more articulate, reflective practitioners so that they are able to select, adapt, adjust, and assess teaching and learning expectations.

More specifically, the aims of the degree are to:

- improve teaching skills through advanced coursework and research;
- offer graduate courses to improve general musicianship, including performance, theory, and music history;
- prepare students to enter graduate programs leading to the doctoral degree;
- offer highly specialized courses for students interested in researching historical, education or artistic areas;
- provide advanced courses for qualified members of the community.

Fellowships

Fellowships, when available, will be awarded on a competitive basis. The Graduate Advisor should be notified of your interest in these fellowships at the time of your application. Nominees for the Graduate School Master's Fellowship in Music will be selected based on the following criteria:

- Candidates must be new students entering in the fall semester, with a minimum of 9 hours of enrollment in both long semesters to retain their fellowships.
- The minimum undergraduate GPA requirement is 3.00, as calculated by the Graduate School, plus a GPA of 3.0 for any graduate credit hours.
- Transcript of a completed bachelor's degree in music from an accredited institution (or its demonstrated equivalent).
- Three letters of recommendation

The Department has a limited number of Enhanced Graduate Teaching Assistantships (<http://grad.pci.uta.edu/students/finances/fellowships/uta>) available. In addition to the requirements above, applicants for the EGTA positions must adhere to the following:

- A live audition is strongly encouraged whenever possible. (Performance Majors only)
- An interview, either in person or by phone, must be conducted by the Graduate Committee or a subset thereof.
- The Chair of the Department must be present at the audition and/or the interview.

Admission Requirements

The Department of Music has the following requirements for entry into the Master of Music in Music Education Degree.

UNCONDITIONAL ADMISSION

Requirements for unconditional admission into the program are:

1. Three letters of recommendation speaking to the student's potential for success from references familiar with the student's academic background.
2. A minimum 3.0 GPA in the last 60 hours of undergraduate work as calculated by the Graduate Admissions.
3. Bachelor's degree in music or its demonstrated equivalent.

PROBATIONARY STATUS

A student meeting two out of three criteria and showing promise for successful graduate study may still be admitted on probationary status upon the recommendation of the Graduate Studies Committee. Within probationary status, said student will be admitted unconditionally into the degree program upon completion of 12 hours of graduate study with no grade lower than a B.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRED ADMISSION

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

Admission will be denied for students not meeting at least two of the three criteria. Applicants may reapply for admission if the deficiencies in credentials that led to denial are remedied.

TOEFL REQUIREMENT

Applicants whose native language is not English must demonstrate proficiency in English by earning a score of at least 550 on the paper-based Test of English as a Foreign Language (TOEFL) or a score of at least 213 on the computer-based test, or a minimum score of 40 on the Test of Spoken English (TSE). The Internet-based TOEFL examination (TOEFL iBT) will be accepted as an alternative to the paper and computer-based TOEFL for admission purposes. Students taking TOEFL iBT must attain a minimum total test score of 79 and meet or exceed the following scores on each of the sections of the test:

- Writing: 22
- Speaking: 21
- Reading: 20
- Listening: 16

Those who do not meet the English proficiency requirement must satisfactorily complete courses in the ESOL area, as approved by the program and the Graduate Admissions.

Music Performance

ADMISSION REQUIREMENTS

Unconditional Admission

1. Bachelor's degree in music or its demonstrated equivalent (such as a music conservatory degree). Three letters of recommendation are required, speaking to the student's potential for success from references familiar with the student's academic background.
2. A minimum 3.0 GPA in the last 60 hours of undergraduate work as calculated by the Graduate Admissions.
3. Applicants whose native language is not English must demonstrate proficiency in English by earning a score of at least 550 on the paper-based Test of English as a Foreign Language (TOEFL), or a score of at least 213 on the computer-based test, or a minimum score of 40 on the Test of Spoken English (TSE). The Internet-based TOEFL examination (TOEFL iBT) will be accepted as an alternative to the paper and computer-based TOEFL for admission purposes. Students taking TOEFL iBT must attain a minimum total test score of 79 and meet or exceed the following scores on each of the sections of the text:

< >Writing: 22 Speaking: 21 Reading: 20 Listening: 16 **Those who do not meet the English proficiency requirement must satisfactorily complete courses in the ESOL area, as approved by the program and Graduate Admissions.**

4. Applicants must audition (in person or by submitting a tape or video link) with repertoire of at least college senior recital level. A repertoire list must be submitted for evaluation at the time of the audition. For further information, contact the Graduate Advisor.

All admission criteria will be considered equally. Students meeting all four criteria will be granted unconditional admission.

Probationary Status

A student not meeting the above criteria but who shows promise for successful graduate study may be admitted on a probationary basis. This period of probation is not to exceed one semester and the conditions of probation must be resolved during the first semester. The conditions will be in the offer letter of admission. (The Music department does not have the authority to lower University TOEFL score requirements for any student.)

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Deferred Admission

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

Degree Requirements - Master of Music in Music Education

The program is designed for the student who has a Bachelor's degree in music. A minimum of 30 semester hours is required if the student chooses to write a thesis. If the student chooses not to write a thesis, a minimum of 36 semester hours is required. Advisory examinations in music history and written theory may be administered to all students prior to enrollment or during their first semester as a degree-seeking student.

Coursework for the program includes:

Core Courses

MUSI 5301	FORM AND STYLE ANALYSIS	3
MUSI 5308	MUSIC HISTORY SELECTED TOPICS	3
MUSI 5351	PHILOSOPHICAL FOUNDATIONS OF MUSIC EDUCATION	3
MUSI 5352	PSYCHOLOGICAL FOUNDATIONS OF MUSIC EDUCATION	3
MUSI 5363	RESEARCH IN MUSIC EDUCATION	3

Options

Select one of the following options: 9-18

Students following the thesis option will take three hours of music education electives and an additional six hours of free choice electives.

Students following the non-thesis option will take six hours of music education electives and an additional 12 hours of free choice electives.

Total Hours 24-33

Music education electives may be chosen from the following:

MUSI 5350	SELECTED TOPICS IN MUSIC PEDAGOGY	3
MUSI 5354	SELECTED TOPICS IN MUSIC LITERATURE	3
MUSI 5355	REHEARSAL TECHNIQUES	3
MUSI 5359	ADVANCED DICTION FOR SINGERS	3
MUSI 5360	ADVANCED TECHNOLOGY FOR MUSICIANS	3
MUSI 5361	ELEMENTARY MUSIC	3
MUSI 5364	HISTORICAL FOUNDATIONS AND CURRICULAR TRENDS IN MUSIC EDUCATION	3
MUSI 5365	MEANING & REPRESENTATION IN MUSIC	3

Free choice electives may be selected from ensembles, private instruction, music history, music theory, jazz studies and repeated special topics courses. Up to six hours of graduate credit from other disciplines may be considered if relevant to the degree, subject to approval by the Graduate Studies Committee. Students following the non-thesis option will enroll in at least one semester of MUSI 5353 PROJECT IN MUSIC EDUCATION. Students who choose to write a thesis (MUSI 5398 THESIS, MUSI 5698 THESIS) will work closely with one or more members of the graduate faculty from the Department of Music on a research project in a specialized area of interest within the music education field.

Master of Music in Music Performance

Majors are offered in Instrumental Studies, Voice Studies, Jazz Studies, and Conducting. The program is designed for the student who has a Bachelor's degree in music. Advisory examinations in music history and written theory can be administered to all students prior to enrollment or during their first semester as a degree-seeking student.

Coursework for the program includes:

Core Courses

MUSI 5301	FORM AND STYLE ANALYSIS	3
MUSI 5308	MUSIC HISTORY SELECTED TOPICS	3
MUSI 5354	SELECTED TOPICS IN MUSIC LITERATURE	3
4 semesters of Applied Study (MUSI 53XX) with the last semester including a full length recital		12
4 semesters of a Major Ensemble (MUSI 51XX) (For Keyboard Players only-4 semesters of either Major Ensemble 51XX OR Keyboard Accompaniment MUSI 5190)		4

Electives

Select 9 credit hours from the following depending on your major: 9

Instrumental

Prescribed Electives (choose 9 credit hours)

MUSI 3394	DIGITAL MUSIC TECHNOLOGY	
MUSI 5112	CHAMBER MUSIC (maximum of 3 repeats)	
MUSI 5308	MUSIC HISTORY SELECTED TOPICS (may be counted once as an elective if core requirement is met and the course is taken with a different emphasis)	
MUSI 5350	SELECTED TOPICS IN MUSIC PEDAGOGY	
MUSI 5351	PHILOSOPHICAL FOUNDATIONS OF MUSIC EDUCATION	
MUSI 5352	PSYCHOLOGICAL FOUNDATIONS OF MUSIC EDUCATION	
MUSI 5355	REHEARSAL TECHNIQUES	
MUSI 5365	MEANING & REPRESENTATION IN MUSIC	

MUSI 3326	POST-TONAL ANALYSIS
MUSI 3390	SCHENKERIAN ANALYSIS
MUSI 3391	ADVANCED SONATA THEORY (recommended only after taking 5301-Form and Style Analysis)
MUSI 4350	20TH CENTURY FORM & TECHNIQUE
Voice	
Prescribed Electives (choose 9 credit hours)	
MUSI 5115	VOCAL COACHING
MUSI 5359	ADVANCED DICTION FOR SINGERS
MUSI 5205	MUSIC THEATRE/OPERA LAB
MUSI 3394	DIGITAL MUSIC TECHNOLOGY
MUSI 5308	MUSIC HISTORY SELECTED TOPICS (may be counted once as an elective if core requirement is met and the course is taken with a different emphasis)
MUSI 5350	SELECTED TOPICS IN MUSIC PEDAGOGY
MUSI 5351	PHILOSOPHICAL FOUNDATIONS OF MUSIC EDUCATION
MUSI 5352	PSYCHOLOGICAL FOUNDATIONS OF MUSIC EDUCATION
MUSI 5355	REHEARSAL TECHNIQUES
MUSI 5365	MEANING & REPRESENTATION IN MUSIC
MUSI 3326	POST-TONAL ANALYSIS
MUSI 3390	SCHENKERIAN ANALYSIS
MUSI 3391	ADVANCED SONATA THEORY (recommended only after taking 5301-Form and Style Analysis)
MUSI 4350	20TH CENTURY FORM & TECHNIQUE
Jazz	
Prescribed Electives (choose 9 credit hours)	
MUSI 5110	JAZZ COMBO
MUSI 5112	CHAMBER MUSIC (maximum of 3 repeats)
MUSI 5355	REHEARSAL TECHNIQUES
MUSI 5360	ADVANCED TECHNOLOGY FOR MUSICIANS
MUSI 5365	MEANING & REPRESENTATION IN MUSIC
MUSI 5366	JAZZ STYLE AND ANALYSIS
MUSI 3394	DIGITAL MUSIC TECHNOLOGY
MUSI 5308	MUSIC HISTORY SELECTED TOPICS (may be counted once as an elective if core requirement is met and the course is taken with a different emphasis)
MUSI 5350	SELECTED TOPICS IN MUSIC PEDAGOGY
MUSI 5351	PHILOSOPHICAL FOUNDATIONS OF MUSIC EDUCATION
MUSI 5352	PSYCHOLOGICAL FOUNDATIONS OF MUSIC EDUCATION
MUSI 3326	POST-TONAL ANALYSIS
MUSI 3390	SCHENKERIAN ANALYSIS
MUSI 3391	ADVANCED SONATA THEORY (recommended only after taking 5301-Form and Style Analysis)
MUSI 4350	20TH CENTURY FORM & TECHNIQUE
Conducting	
Prescribed Electives (choose 9 credit hours)	
MUSI 3394	DIGITAL MUSIC TECHNOLOGY
MUSI 5359	ADVANCED DICTION FOR SINGERS
MUSI 5112	CHAMBER MUSIC (maximum of 3 repeats)
MUSI 5308	MUSIC HISTORY SELECTED TOPICS (may be counted once as an elective if core requirement is met and the course is taken with a different emphasis)
MUSI 5350	SELECTED TOPICS IN MUSIC PEDAGOGY
MUSI 5351	PHILOSOPHICAL FOUNDATIONS OF MUSIC EDUCATION
MUSI 5352	PSYCHOLOGICAL FOUNDATIONS OF MUSIC EDUCATION
MUSI 5355	REHEARSAL TECHNIQUES
MUSI 5365	MEANING & REPRESENTATION IN MUSIC
MUSI 3326	POST-TONAL ANALYSIS
MUSI 3390	SCHENKERIAN ANALYSIS

MUSI 3391	ADVANCED SONATA THEORY (recommended only after taking 5301-Form and Style Analysis)	
MUSI 4350	20TH CENTURY FORM & TECHNIQUE	
Total Hours		34

Final Master's Examination

A final program examination is required of all Master of Music degree candidates. A final Master's examination may result in:

1. An unconditional pass with a recommendation to the Graduate Dean that the candidate be certified to receive the degree.
2. A conditional pass with the requirement that additional conditions be met, which may include further work on the thesis or thesis substitute, additional coursework with a minimum specified grade point average or both (in all cases the final master's examination must be repeated within a specified period).
3. Failure, with permission to be re-examined within a specified period; or
4. Failure, with recommendation to the Dean of Graduate Studies that the candidate be dismissed from the program. The Music Department limits to 2 the number of times the examination can be taken.

Admission Requirements

CERTIFICATE ADMISSION REQUIREMENTS

Students wishing to enroll only in the certificate program but not a graduate degree program may apply for admission to UT Arlington as a special student (non-degree seeking). Admission requires an undergraduate degree in music or its demonstrated equivalent and would be contingent upon an audition for a minimum of two faculty members; GRE scores and letters of recommendation are not required. Students in this certificate program who later seek graduate degrees at UT Arlington may apply 12 hours of certificate coursework within six years of completion and award of the certificate, if they meet the admission requirements for the graduate degree and receive approval from the appropriate Graduate Studies Committee and the Dean of Graduate Studies. Admission as a special student in no way guarantees subsequent unconditional admission into a graduate program or into the Graduate School.

TOEFL REQUIREMENT

Applicants whose native language is not English must demonstrate proficiency in English by earning a score of at least 550 on the paper-based Test of English as a Foreign Language (TOEFL) or a score of at least 213 on the computer-based test, or a minimum score of 40 on the Test of Spoken English (TSE). The Internet-based TOEFL examination (TOEFL iBT) will be accepted as an alternative to the paper and computer-based TOEFL for admission purposes. Students taking TOEFL iBT must attain a minimum total test score of 79 and meet or exceed the following scores on each of the sections of the test:

- Writing: 22
- Speaking: 21
- Reading: 20
- Listening: 16

Certificate in Performance

The Certificate in Performance requires 15 hours of coursework, including 4 semesters of lessons with the last semester including a full-length recital, and three semesters of a Major Ensemble or a combination of a Major Ensemble or Keyboard Accompaniment (for Keyboard Players only). It is currently available for all instruments and voice types:

Applied Study:

4 semesters of Applied Study (MUSI 53XX) with the last semester including a full length recital	12
AND	
3 semesters of a Major Ensemble (MUSI 51XX) (For Keyboard Players only-3 semesters of either a Major Ensemble 51XX OR Keyboard Accompaniment MUSI 5190)	3
Total Hours	15

Music - Undergraduate Programs

Overview

The University of Texas at Arlington is a member of the National Association of Schools of Music.

The Department of Music offers the Bachelor of Music degree (1) in preparation for all-level teacher certification; (2) in Performance (woodwind, brass, percussion, keyboard, strings, or voice); (3) in Theory; (4) in Composition; (5) in Jazz Studies; (6) in Music/Business; (7) in Music/Theatre; and (8) in Music/Media. Music students must meet all the requirements of one of these specializations to receive the Bachelor of Music degree. All degree

plans leading to a Bachelor of Music degree include offerings which provide a solid foundation in music theory, history, and literature and require a concentration in a specific instrument/voice.

The mission of the Music Department is to further the quest for enrichment and to nurture aesthetics, knowledge, and excellence through experiencing and studying the art and science of music.

The Music Department's goals and objectives for academic and artistic enrichment of the university and the extended community include: (1) offering curricula leading to a baccalaureate degree and graduate programs that provide students with the opportunity to realize their inherent musical potential, (2) offering degree options that recognize and nurture students' abilities and talents to make contributions of excellence in the fields of music, and (3) preparing students for further graduate study and/or professional careers in music by meeting curricula criteria, performance standards, and academic expectations.

All prospective music majors must audition for proper placement in their respective performance areas and take a music theory placement test. Information concerning auditions and placement tests is available in the Music Office.

All music majors (and transfer students) are required to pass the sophomore barrier on their major instrument. Students can only attempt the barrier two times. If they fail the sophomore barrier the first time, they will receive an Incomplete and will be required to enroll in MUSI 2222 DEVELOPMENTAL PRIVATE LESSONS the following semester. At the end of MUSI 2222 DEVELOPMENTAL PRIVATE LESSONS, students will be required to attempt the barrier for a last time. If the student successfully passes the barrier, the Incomplete will be changed to the appropriate grade. If students do not successfully pass the barrier, they will not be allowed to remain a music major.

All students wishing to pursue the Bachelor of Music Degree with the Jazz Studies Option must pass the jazz performance barrier exam upon completion of MUSI 3226 JAZZ IMPROVISATION II. Students can attempt the barrier two times. Students failing to pass the jazz barrier on the second attempt will not be permitted to continue in the Jazz Studies Option. Successful completion of the jazz barrier is a prerequisite for enrollment in:

MUSI 3395	JAZZ COMPOSITION	3
MUSI 4300	JAZZ PERSPECTIVES	3
MUSI 4302	JAZZ ARRANGING	3
MUSI 4225	ADVANCED JAZZ IMPROVISATION	2

All students wishing to pursue the Bachelor of Music Degree in Preparation for Teacher Certification must pass the music education barrier exam before enrolling in:

MUSI 3211	EARLY CHILDHOOD MUSIC	2
MUSI 3213	INSTRUMENTAL MATERIALS AND TECHNIQUES I	2
MUSI 3214	CHORAL MATERIALS AND TECHNIQUES I	2

An audition or permission of the instructor is required for all large ensembles. All University students, regardless of major, are permitted to audition for and participate in all music department ensembles: concert bands, marching band, jazz ensembles, choirs, and orchestra.

All music majors are required to enroll in a large ensemble each semester in residence. Ensembles that meet this requirement, as well as any minimum requirements for number(s) of semester in specific ensembles, are determined by each degree plan. Residence is defined as any semester that a student is enrolled in any private lesson section or enrolled in 6 or more semester hours at the university, except during student teaching or music industry studies internship.

All students are strongly urged to refer to the sections on Academic Regulations and Degree Programs in the current UT Arlington Undergraduate Catalog. Students seeking teacher certification should read the College of Education section of this catalog concerning admission to teacher education programs and state requirements for certification.

In addition to fulfilling University and the College of Liberal Arts requirements for admission to a degree program, students planning to be music majors must also fulfill the listed Music Department requirements.

Students must receive a C or better in all music courses in order to graduate. If a student does not earn a C or better, it may not count as a prerequisite for any other course.

Students should expect, in addition to attending weekly private lessons, a minimum preparation (individual practice) of five hours per week in courses granting two hours credit, 10 hours per week in courses granting three hours credit, and 12 hours per week in courses granting four hours credit.

All private instruction, except MUSI 0171, requires a jury.

Music majors must complete a minimum of 36 hours at the 3000/4000 level, at least 24 of which must be in music.

Those music courses available to non-music majors are indicated in the course description. Individual instruction courses are open in limited numbers to all University students.

Requirements for a Bachelor of Music Degree (In Performance, Theory, or Composition)

Pre-Professional Courses		
General Core Requirements (p. 93)		39
Program Requirements		
Modern and Classical Languages: 1441, 1442, 2313, 2314		14
Professional Courses		
MUSI 1185	SIGHTSINGING AND EAR TRAINING I	1

Teacher Certification

Students interested in Texas Teacher Certification should consult the College of Education section of this catalog for the most recent changes in requirements regarding admission to Teacher Education, completion of University programs in preparation for certificate, and eligibility for certification after graduation.

Oral Communication and Computer Use Competence Requirements

Students majoring in music are required to demonstrate computer use and oral communication competencies.

Computer use proficiency can be demonstrated by:

1. successful completion of MUSI 3394 DIGITAL MUSIC TECHNOLOGY; or
2. successful completion of CSE 1301 COMPUTER LITERACY or INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING; or
3. passing the University computer use competency exam.

Oral communication proficiency can be demonstrated by:

1. successful completion of MUSI 3308 INSTRUMENTAL CONDUCTING I or MUSI 3309 CHORAL CONDUCTING I; or
2. successful completion of one of the following:

COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING	3
COMS 2305	BUSINESS AND PROFESSIONAL COMMUNICATION	3
COMS 3315	COMMUNICATION FOR EDUCATORS	3

Students should discuss these options with their undergraduate advisor who may also provide a list of other courses approved by the University of meet these requirements.

Requirements for a Minor in Music

Eighteen hours of music, six hours of which must be 3000/4000 level.

Philosophy and Classics**Undergraduate Degrees**

- Bachelor of Arts in Philosophy (Pre-Professional Track) (p. 440)
- Bachelor of Arts in Philosophy (General Track) (p. 440)
- Bachelor of Arts in Philosophy (Pre-Law Option) (p. 440)
- Bachelor of Arts in Philosophy (Mind, Language, and Cognition Option) (p. 440)
- Bachelor of Arts in Philosophy (Philosophy and Classics Option) (p. 440)

- Minor in Philosophy (p. 442) or Classical Studies (p. 442)

Philosophy - Graduate Program

The Philosophy Doctoral Program at the University of North Texas

Students in the Ph.D. program in philosophy at the University of North Texas may, but are no longer required to, take up to 15 graduate semester credit hours in the Department of Philosophy at UT Arlington. Visit the web page of UNT's Department of Philosophy and Religion Studies (<http://philosophy.unt.edu/graduate-program>). For more information, contact Dr. Dale Wilkerson (dale.wilkerson@unt.edu) at the University of North Texas.

Philosophy and Classics - Undergraduate and Certificate Programs

Overview

A major in philosophy is built on the central texts in the history of Western thought. Philosophy focuses on the perennial problems raised by the encounter of human beings with their history, culture, and the world. It emphasizes methods of analysis and clarity of argumentation. Students who major in philosophy have the broadest possible preparation in the liberal arts.

Students who complete a major in philosophy are prepared to enter either graduate programs or the world of work. In addition to providing vocational skills and a solid foundation for graduate work in the discipline, a major in philosophy constitutes appropriate and strong preparation for graduate work in other academic disciplines as well as in professional programs in a broad variety of fields. The Department of Philosophy and Humanities is prepared to work with students who are interested in postgraduate professional education to assure that their preparation meets disciplinary and/or professional criteria and expectations in areas including law, business administration, and theology. The faculty of the Department of Philosophy and Humanities also work with advisors in the Health Professions Advising Office of the College of Science to ensure that philosophy majors pursuing a pre-medical curriculum are kept abreast of required and recommended courses outside the major.

Requirements for Admission to a Major in Philosophy

Students should have completed 30 hours of core with 30 hours at UT Arlington, or 40 hours of core with 12 hours at UT Arlington with an overall GPA greater than 2.0. Before being accepted into the major in philosophy, students must also have passed a course in symbolic logic (PHIL 2311 LOGIC or the equivalent). Students may be accepted as pre-philosophy majors if the above standards are not met.

Requirements for a Minor in Philosophy

A minor in philosophy requires 18 semester hours, at least six of which must be 3000/4000 level.

Requirements for a Minor in Classical Studies

A minor in classical studies requires at least 18 semester hours, at least six of which must be 3000/4000 level, in approved classical studies courses. There are four options for the classical studies minor: Greek Language, Latin Language, Classical Civilization, and Ancient Studies.

Requirements for the Certificate in Ethics

The certificate in ethics requires at least 15 semester hours in approved ethics courses.

Undergraduate Advising

All philosophy majors are directed in their program by a designated undergraduate advisor. In addition, the following special advisors are available:

Graduate Work in Philosophy: Majors who are interested in graduate work in philosophy should consult the departmental graduate advisor during their junior year.

Pre-Law: Majors who intend to apply to law school will find courses in logic, philosophy of law, political philosophy, and ethics particularly useful. Interested students should consult the Philosophy/Pre-law faculty advisor for assistance in course selection and application procedures.

Philosophy/Business Administration Minor: It is possible to combine the philosophy major with a business administration minor in preparation for admission to the UT Arlington MBA program. (See Liberal Arts Major/Business Administration Minor section in the introduction of the College of Liberal Arts.) The Philosophy/Business Administration faculty advisor will assist students in coordinating their program and meeting admissions requirements either at UT Arlington or other schools.

Pre-Theological: Majors who plan to enter a school of theology should consider a minor in classics and foreign language preparation in Greek and/or Latin. Electives in ethics and philosophy of religion are particularly recommended. Interested students should consult the Philosophy/Pre-ministerial faculty advisor for additional assistance.

Pre-Medical: A departmental faculty advisor is available to assist majors who intend to apply to medical school. The major program will be coordinated with the Health Professions Advising Office of the College of Science.

Oral Communication Competency

Students majoring in philosophy may demonstrate competency in oral communication by

1. successful completion of a specific course approved by the Department of Philosophy and Humanities for this purpose, or
2. successful completion of any course from among those approved by the Undergraduate Assembly.

Computer Use Competency

Students majoring in philosophy may demonstrate competency in computer use by

1. successful completion of PHIL 3307 SEMINAR IN RESEARCH METHODS AND PHILOSOPHICAL WRITING, or
2. successful completion of any course from among those approved by the Undergraduate Assembly for this purpose, or
3. passing the University proficiency examination in computer use.

Requirements for a Bachelor of Arts Degree in Philosophy (Pre-Professional Track)

Pre-Professional Courses		
General Core Requirements (p. 93)		39
Core Courses Required for this Major		
ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
Program Requirements		
Modern and Classical Languages: 1441, 1442, 2313, 2314		14
Professional Courses		
PHIL 2300	INTRODUCTION TO PHILOSOPHY	3
PHIL 2311	LOGIC	3
PHIL 3301	HISTORY OF PHILOSOPHY: ANCIENT PHILOSOPHY	3
PHIL 3303	HISTORY OF PHILOSOPHY: RENAISSANCE AND EARLY MODERN EUROPEAN PHILOSOPHY	3
PHIL 3307	SEMINAR IN RESEARCH METHODS AND PHILOSOPHICAL WRITING	3
Select at least one course from the "metaphysics and epistemology" group:		3
PHIL 3318	THE PHILOSOPHY OF SCIENCE AND TECHNOLOGY	
PHIL 3321	PHILOSOPHY OF LANGUAGE	
PHIL 4385	THEORY OF KNOWLEDGE	
PHIL 4386	METAPHYSICS	
PHIL 4388	TOPICS IN THE HISTORY OF PHILOSOPHY	
PHIL 4389	TOPICS IN PHILOSOPHY AND THE SOCIAL SCIENCES	
Select at least one course from the "value theory" group:		3
PHIL 2312	ETHICS	
PHIL 2313	PHILOSOPHY OF THE ARTS	
PHIL 3316	PHILOSOPHY OF RELIGION	
PHIL 3319	BIOMEDICAL ETHICS	
PHIL 3320	PHILOSOPHY OF LAW	
PHIL 3330	SOCIAL AND POLITICAL PHILOSOPHY	
PHIL 4387	TOPICS IN VALUE THEORY	
Advanced hours-with a total of at least six hours at the 4000 level ¹		9
PHIL 4394	SENIOR THESIS (complete a senior thesis sometime during their final year)	3
Total Hours		92

¹ Including any 4000-level "metaphysics and epistemology" or "value theory" courses, but not including PHIL 4394 SENIOR THESIS.

Requirements for a Bachelor of Arts Degree in Philosophy (General Track)

Pre-Professional Courses		
General Core Requirements (p. 93)		39
Core Courses Required for this Major		
ENGL 1301	RHETORIC AND COMPOSITION I	3
ENGL 1302	RHETORIC AND COMPOSITION II	3
Program Requirements		
Modern and Classical Languages: 1441, 1442, 2313, 2314		14
Professional Courses		
Major		
PHIL 2300	INTRODUCTION TO PHILOSOPHY	3
PHIL 2311	LOGIC	3
PHIL 3307	SEMINAR IN RESEARCH METHODS AND PHILOSOPHICAL WRITING	3
Additional hours (12 advanced hours, with at least six hours at the 4000 level)		18
Total Hours		86

¹ In consultation with the undergraduate philosophy advisor and in light of individual aims and interests, students in the general track are to select electives concentrated primarily in one or two areas of *secondary emphasis*—for example, business, classical studies, cognitive science, computer science engineering, history, humanities/liberal arts, mathematics, or political science.

Requirements for a Bachelor of Arts Degree in Philosophy (Pre-Law Option)

Students interested in the Pre-Law Option must complete the requirements for the Pre-Professional Track degree in philosophy, while selecting their elective course work in consultation with the Philosophy/Pre-Law faculty advisor. Recommended philosophy courses for the Pre-Law Option include

PHIL 1301	FUNDAMENTALS OF REASONING	3
PHIL 1304	CONTEMPORARY MORAL PROBLEMS	3
PHIL 2312	ETHICS	3
PHIL 3317	INTERMEDIATE LOGIC	3
PHIL 3318	THE PHILOSOPHY OF SCIENCE AND TECHNOLOGY	3
PHIL 3319	BIOMEDICAL ETHICS	3
PHIL 3320	PHILOSOPHY OF LAW	3
PHIL 3321	PHILOSOPHY OF LANGUAGE	3
PHIL 3324	BUSINESS ETHICS	3
PHIL 3330	SOCIAL AND POLITICAL PHILOSOPHY	3
PHIL 3340	TOPICS IN APPLIED ETHICS	3
PHIL 4381	THEORIES OF INTERPRETATION	3
PHIL 4385	THEORY OF KNOWLEDGE	3
PHIL 4387	TOPICS IN VALUE THEORY	3

Requirements for a Bachelor of Arts Degree in Philosophy (Mind, Language, and Cognition Option)

Students interested in the Mind, Language, and Cognition (MLC) Option must complete the requirements for the General Track degree in philosophy, with a minor in linguistics, and psychology as their area of secondary emphasis for elective course work. Although specific major, minor, and elective courses should be selected in consultation with the MLC advisor in philosophy, typical courses include

LING 2301	INTRODUCTION TO THE STUDY OF HUMAN LANGUAGES	3
LING 3311	INTRODUCTION TO LINGUISTIC SCIENCE	3
LING 3330	PHONETICS AND PHONOLOGY	3
LING 3340	GRAMMAR AND MORPHOLOGY	3
LING 3345	CRITICAL REASONING IN LINGUISTICS	3
LING 4303	FORMAL SYNTAX	3
LING 4317	SOCIOLINGUISTICS	3
LING 4335	LANGUAGE UNIVERSALS & LINGUISTIC TYPOLOGY	3

LING 4345	SEMANTICS	3
LING 4347	PRAGMATICS	3
LING 4370	HISTORY OF LINGUISTICS	3
PHIL 2300	INTRODUCTION TO PHILOSOPHY	3
PHIL 2311	LOGIC	3
PHIL 3317	INTERMEDIATE LOGIC	3
PHIL 3318	THE PHILOSOPHY OF SCIENCE AND TECHNOLOGY	3
PHIL 3321	PHILOSOPHY OF LANGUAGE	3
PHIL 4381	THEORIES OF INTERPRETATION	3
PHIL 4385	THEORY OF KNOWLEDGE	3
PHIL 4389	TOPICS IN PHILOSOPHY AND THE SOCIAL SCIENCES (Mind)	3
PSYC 1315	INTRODUCTION TO PSYCHOLOGY	3
PSYC 2443	RESEARCH DESIGN & STATISTICS I	4
PSYC 2444	RESEARCH DESIGN & STATISTICS II	4
PSYC 4332	THEORIES OF HUMAN LEARNING AND MEMORY	3
PSYC 4338	COGNITIVE NEUROSCIENCE	3
PSYC 4355	THE HISTORY OF PSYCHOLOGY	3

(Students who intend to apply to graduate school may elect to complete the requirements for the Pre-Professional Track degree in philosophy, with the minor in linguistics and elective course work in psychology.)

Requirements for a Bachelor of Arts Degree in Philosophy (Philosophy and Classics Option)

Students interested in the Philosophy and Classics Option typically complete the requirements for the General Track degree in Philosophy, with a minor in Classical Studies, and are required to fulfill their language requirement with Greek; with advisors' approval, students may choose to substitute Latin, French or German. Specific major, minor and elective courses should be selected in consultation with the philosophy undergraduate advisor and the director of Classical Studies. (Students who intend to apply to graduate school may elect to complete the requirements for the Pre-Professional Track degree in Philosophy, with the minor in Classical Studies, and the language hours in Greek.)

Minor in Philosophy

18 hours, at least six of which must be 3000/4000 level.

Minor in Classical Studies

18 hours, at least six of which must be 3000/4000 level. There are four options for the classical studies minor: Greek Language, Latin Language, Classical Civilization, and Ancient Studies. Interested students must consult with the advisor to determine which courses are required for each option. Typical courses include:

CLAS 1300	INTRODUCTION TO CLASSICAL MYTHOLOGY	3
CLAS 2300	HOLLYWOOD CLASSICS: THE ANCIENT WORLD IN FILM	3
CLAS 2303	THE CLASSICAL ROOTS OF ENGLISH VOCABULARY	3
CLAS 2307	WOMEN IN THE ANCIENT WORLD	3
CLAS 3310	INTRODUCTION TO GREEK CIVILIZATION	3
CLAS 3320	INTRODUCTION TO ROMAN CIVILIZATION	3
CLAS 3323	TOPICS IN CLASSICAL MYTHOLOGY	3
CLAS 3335	TOPICS IN CLASSICAL STUDIES	3
CLAS 4391	CONFERENCE COURSE	3
CLAS 4394	SENIOR THESIS/HONORS THESIS	3
HIST 3374	ANCIENT GREECE	3
HIST 3375	ANCIENT ROME	3
HIST 3380	HISTORY OF ANCIENT SPORT	3
ANTH 3370	ARCHAEOLOGY OF THE PREHISTORIC AEGEAN	3
ANTH 3371	ARCHAEOLOGY OF GREECE	3
ANTH 3372	ARCHAEOLOGY OF THE ANCIENT NEAR EAST	3
ANTH 3373	ARCHAEOLOGY OF EGYPT	3

GREK 1441	GREEK LEVEL I	4
GREK 1442	GREEK LEVEL II	4
GREK 2313	GREEK LEVEL III	3
GREK 2314	GREEK LEVEL IV	3
GREK 4335	TOPICS IN GREEK LITERATURE	3
GREK 4391	CONFERENCE COURSE	3
LATN 1441	LATIN LEVEL I	4
LATN 1442	LATIN LEVEL II	4
LATN 2313	LATIN LEVEL III	3
LATN 2314	LATIN LEVEL IV	3
LATN 4301	INTENSIVE LATIN FOR READING I	3
LATN 4302	INTENSIVE LATIN FOR READING II	3
LATN 4335	TOPICS IN LATIN LITERATURE	3
LATN 4391	CONFERENCE COURSE	3

Certificate in Ethics

To receive the certificate, a student must complete five courses from the following list:

PHIL 1304	CONTEMPORARY MORAL PROBLEMS	3
or PHIL 2312	ETHICS	
or PHIL 3319	BIOMEDICAL ETHICS	
or PHIL 3320	PHILOSOPHY OF LAW	
or PHIL 3324	BUSINESS ETHICS	
or PHIL 3330	SOCIAL AND POLITICAL PHILOSOPHY	
or PHIL 3340	TOPICS IN APPLIED ETHICS	
or PHIL 4387	TOPICS IN VALUE THEORY	

With the permission of the departmental adviser, one of the five required courses may be replaced by a course from the following list:

BDEC 3311	BUSINESS DECISION MAKING - PLANNING, ETHICS, SUSTAINABILITY, & AGILITY	3
or COMM 3310	COMMUNICATION LAW & ETHICS	
or EDUC 4346	SECONDARY SCHOOL CULTURE AND THE TEACHING PROFESSION	
or JOUR 2346	REPORTING	
or LSHP 4312	LEADER ETHICS	
or MANA 4340	BUSINESS AND SOCIETY	
or MILS 2251	INDIVIDUAL/TEAM DEVELOPMENT	
or NURS 3363	ETHICAL ISSUES IN CONTEMPORARY HEALTH CARE	
or PSYC 3304	ANALYSIS & MANAGEMENT OF BEHAVIOR	

Political Science

Undergraduate Degrees

- Bachelor of Arts in Political Science (p. 447)
- Minor in Political Science (p. 450)

Graduate Degree

- Political Science, M.A. (p. 444)

Political Science - Graduate Programs

Objective

The program leading to a Master of Arts degree in Political Science emphasizes preparation for service in many areas of our national life, both public and private. Students interested in careers in teaching and research or in leadership roles in the public or private sectors may pursue programs adapted to their individual objectives. The Department of Political Science endeavors to equip students with the research techniques and substantive background

for coursework undertaken beyond the master's level. Particular attention is given to newer methodologies and approaches employed by scholars in the field.

Admissions and Fellowship Criteria

The program is committed to a holistic admissions approach. As a result, decisions on whether to admit or deny an application include: grade point averages, letters of recommendation, personal statements, advanced degrees, graduate courses taken as a degreed student or in another program, and professional work experience. The major purpose of the admissions criteria is to promote access to our program, but maintain standards that will enable the department to determine if the applicant demonstrates the requisite skill level to master the requirements of the program.

Admission to the M.A. program in political science is based upon the completion of the general admission requirements of the Graduate School. Applicants are required to submit all official transcripts, a personal statement, and three (3) letters of recommendation. The department will review the application package in its entirety. The package is evaluated to determine if a student has achieved a 3.00 grade point average (GPA) in the last 60 hours of their undergraduate work as calculated by the Graduate School, and meets other admission requirements. If a student has already earned an advanced degree, the department will evaluate the student's academic performance in obtaining that degree equally with the undergraduate performance. International students must meet or exceed the minimum university standard on the TOEFL (550 for paper examination, 213 for computer examination), TOEFL iBT (total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section), TSE (40), or the IELTS (6.5).

Several factors matter for a decision to accept or deny an applicant. To this end the department has three categories of acceptance: unconditional admission, probationary admission, and provisional admission.

APPLICATION REQUIREMENTS

All applications must include the following four components. All four will be considered, without specific weights, in the decision to accept or deny.

1. A bachelor's degree from an accredited general or specific program. A bachelor's degree in political science, however, is not required.
2. A copy of all university and college transcripts.
3. A written personal statement (200 words) explaining the applicant's interest and motivation in studying for a graduate degree in political science.
4. Three letters of recommendation (including at least two from university/college faculty) that favorably assess the applicant's potential success in a graduate program and in the field of political science. Letters must be mailed directly from the recommenders to the Graduate Advisor of political science.

UNCONDITIONAL ADMISSION

An applicant may be accepted for unconditional admission if all of the above components of the application package are properly submitted, and all three of the following criteria are met and all three give strong indication of likely success in the program.

1. An undergraduate GPA of 3.00 or greater (as calculated by the Graduate School) in the last 60 credit hours of completing an undergraduate B.A. or B.S. degree from an accredited institution (verified by the Graduate School from official transcripts from each college or university previously attended).
2. Adequate preparation and satisfactory performance in political science courses or courses in related disciplines.
3. Three letters of recommendation (including at least two from university/college faculty) that indicate satisfaction with the applicant's work and demonstrate a strong likelihood for success in the program and in the field of political science.

PROBATIONARY ADMISSION

Students who do not qualify for unconditional admission may be considered for probationary admission if they satisfy any two of the three requirements for unconditional admission listed above as well as demonstrate potential for success in line with the necessary application materials. Students with a reported grade point average below 2.70, however, will not be eligible for probationary admission. Being admitted on probationary status means that the student will be able to take graduate level classes, but the student must earn a B or better in the first 12 hours of graduate coursework at UT Arlington. This regulation will be strictly enforced.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline, but otherwise appears to meet admission requirements, may be granted provisional admission. Provisionally admitted students must adequately satisfy any incomplete documentation by the end of the semester in which they are admitted. If the applicant fails to do so, the department may then reclassify the applicant's admission status as probationary or ask the student to leave the program.

DEFERRAL

A deferred decision may be granted when a file is incomplete or when a denial decision is not appropriate.

DENIAL

An application will be denied if it does not meet the criteria listed above, does not demonstrate potential for success, or the applicant's grade point average is below 2.70.

FELLOWSHIPS

Fellowships, when available, will be awarded on a competitive basis. Fellowships are selected on the basis of the following criteria:

- Candidates must be enrolled full time in the department of political science (at least 9 hours of courses per semester).
- A minimum undergraduate GPA of 3.00, as calculated by the Graduate School, plus a GPA of 3.0 for any graduate credit hours.
- Transcript of a completed bachelor's degree in political science (or appropriate related field) from an accredited institution.
- Three letters of recommendation. These letters may be the same submitted for admission.
- A written statement explaining the applicant's reasons for graduate study in political science.

Master's Degree Requirements

The thesis degree plan requires 24 hours of coursework including three hours of methods in political science for those who have not had POLS 3310 RESEARCH METHODS AND POLITICAL ANALYSIS or its equivalent. Of the remaining 21 hours, at least one course must be taken from each of four of the following five areas:

Political Behavior and Processes

POLS 5300	AMERICAN GOVERNMENT AND POLITICS	3
POLS 5311	CAMPAIGNS AND ELECTIONS	3
POLS 5315	PUBLIC OPINION	3
POLS 5316	PUBLIC LEADERSHIP: RACE, ETHNICITY, & GENDER	3
POLS 5317	ETHNIC GROUPS AND THE NATION STATE	3
POLS 5318	WOMEN IN THE POLITICAL PROCESS	3
POLS 5319	CONGRESSIONAL BEHAVIOR	3
POLS 5320	THE AMERICAN PRESIDENCY	3
POLS 5321	THE PRESIDENCY AND DOMESTIC POLICY	3
POLS 5322	SEPARATION OF POWERS IN AMERICAN POLITICAL DEVELOPMENT	3
POLS 5380	TOPICS IN U.S. POLITICS: INSTITUTIONS, PROCESS AND BEHAVIOR	3

Comparative Politics

POLS 5303	COMPARATIVE POLITICAL SYSTEMS	3
POLS 5331	POLITICAL SYSTEMS OF EAST ASIA	3
POLS 5333	IDENTITY AND POLITICS IN THE MIDDLE EAST	3
POLS 5335	LATIN AMERICAN POLITICS	3
POLS 5336	REPRESSION AND REVOLUTION IN LATIN AMERICAN	3
POLS 5337	POLITICAL SYSTEMS OF RUSSIA AND EASTERN EUROPE	3
POLS 5381	TOPICS IN COMPARATIVE POLITICS	3

International Politics and Organization

POLS 5332	THEORIES OF THE INTERNATIONAL SYSTEM	3
POLS 5334	VIOLENCE AND DEPRIVATION IN WORLD POLITICS	3
POLS 5338	AMERICAN FOREIGN POLICY	3
POLS 5339	ISRAELI IDENTITY AND THE ARAB-ISRAELI CONFLICT	3
POLS 5341	Political Psychology and International Relations	3
POLS 5342	INTERNATIONAL ORGANIZATIONS	3
POLS 5384	TOPICS IN INTERNATIONAL RELATIONS	3

Public Law and Jurisprudence

POLS 5301	JUDICIAL POLITICS AND THE U.S. SUPREME COURT	3
POLS 5323	STATE COURT SYSTEMS	3
POLS 5382	TOPICS IN PUBLIC LAW AND JURISPRUDENCE	3

Public Administration and Policy Studies

POLS 5302	BUREAUCRATIC LEADERSHIP: TRENDS IN PUBLIC ADMINISTRATION AND POLICY MANAGEMENT	3
POLS 5324	PUBLIC POLICY ANALYSIS	3
POLS 5325	STATE POLITICS	3

POLS 5326	STATE/LOCAL GOVERNMENT POLICYMAKING	3
POLS 5327	URBAN POLICYMAKING AND ADMINISTRATION	3
POLS 5328	PUBLIC POLICY AND MEXICAN AMERICAN COMMUNITIES	3
POLS 5329	PUBLIC BUDGETING	3
POLS 5330	ENERGY AND THE ENVIRONMENT	3
POLS 5368	Health Politics and Policy	3
POLS 5369	SOCIAL POLICY	3
POLS 5383	TOPICS IN PUBLIC ADMINISTRATION AND POLICY MAKING	3

Additional courses may also be taken in the area of political theory, but other than the methods requirement (POLS 5310 EMPIRICAL THEORY AND RESEARCH METHODS) that area is not required for the thesis or non-thesis degree plans. Elective courses in political theory include:

- POLS 5305 TOPICS IN POLITICAL THEORY.

Students should consult the Political Science Graduate Student Handbook for regulations on transfer courses, undergraduate courses, conferences, internships, and special courses. It is recommended that students complete at least one general field seminar (POLS 5300 AMERICAN GOVERNMENT AND POLITICS, POLS 5301 JUDICIAL POLITICS AND THE U.S. SUPREME COURT, POLS 5302 BUREAUCRATIC LEADERSHIP: TRENDS IN PUBLIC ADMINISTRATION AND POLICY MANAGEMENT, POLS 5303 COMPARATIVE POLITICAL SYSTEMS, POLS 5332 THEORIES OF THE INTERNATIONAL SYSTEM) prior to taking the topics courses. See the Graduate Advisor for more detail.

The non-thesis degree plan requires a minimum of 36 hours, including three hours of methodology, and courses from four of the five areas.

All candidates for the degree of Master of Arts with a major in political science must pass a final comprehensive examination, written, oral, or both written and oral. The scope, content, and form of the examination will be determined by the student's supervising committee. In the event of failure of the final comprehensive examination, the student may petition the Committee on Graduate Studies to retake the examination on a date no sooner than 60 days after the first examination. Students will not be permitted more than one reexamination after failure of the initial examination.

INTERNATIONAL STUDIES OPTION

The International Studies option of the Master of Arts program in political science emphasizes the study of comparative politics and international relations within the framework of political science. This option requires courses from three of six areas of political science and 12 hours in comparative politics and/or international politics. Students must have three hours of a methods course. Upon satisfying the requirements for this option, students will receive a letter of completion. Completion will not be reflected on student transcripts.

U.S. POLITICAL INSTITUTIONS AND PROCESSES OPTION

The U.S. Political Institutions and Processes option of the Master of Arts program in political science emphasizes political behavior and processes and public law and jurisprudence within the framework of political science. This option requires courses from three of six areas of political science and 12 hours in political behavior and processes and/or public law and jurisprudence. Students must have three hours of a methods course. Upon satisfying the requirements for this option, students will receive a letter of completion. Completion will not be reflected on student transcripts.

Dual Degree Program

Students in political science may participate in a dual degree program whereby they can earn a Master of Arts in political science and a Master of Arts in another program, such as criminal justice or sociology. By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from nine to 18 hours, subject to the approval of Graduate Advisors from both programs. To participate in the dual degree program, students must make separate application to each program and must submit a separate program of work for each degree. Those interested in a dual degree program should consult the appropriate Graduate Advisor(s) for further information on course requirements. See also the statement on "Dual Degree Programs" in the general information section of this catalog.

Political Science - Undergraduate Programs

Overview

The goal of the political science undergraduate curriculum is to maximize students' capacities to analyze and interpret political events and governmental processes. In addition to acquiring general knowledge about government and political behavior, students also learn the analytical skills relevant to particular political systems (their own and others'), and to problems of most immediate consequence and concern to them.

The four major objectives of the department's curriculum are to:

- Identify and describe political structures, rules, behaviors and environments which shape political action.
- Explain and employ statistical and methodological techniques to analyze information.
- Identify, comprehend, and apply comparative, theoretical, or conceptual approaches to actors and their policies.

- Develop the ability to analyze, synthesize, and evaluate political phenomena.

The major courses are designed to present a coherent portrait of the discipline. Students begin with a general introduction to national, state, and local politics followed by required courses in political methodology and political theory. Finally, students are exposed to at least four major areas of the discipline. The department also offers options for students who desire a concentration in pre-law, public policy/administration, or international studies. Students may choose any 18 hours (6 advanced) for a minor. Those who want a specialization may concentrate courses in areas of public law; policy and administration; comparative and international politics; American national government; political parties, group politics, and elections; or political theory.

The political science student is exposed to a multifaceted and highly regarded faculty, many of whom have received regional and national honors for teaching, service, and research. Upon graduation, UT Arlington political science majors are prepared to compete for a wide variety of jobs in both the private and public sectors.

Admission to Department of Political Science Degree Programs

Students should have completed 30 hours of core with 30 hours at UT Arlington, or 40 hours of core with 12 hours at UT Arlington with an overall GPA greater than 2.0. Students may be accepted as pre-political science majors if the above standards are not met.

Teacher Certification

Students interested in Texas Teacher Certification should consult the College of Education section of this catalog for the most recent changes in requirements regarding admission to Teacher Education, completion of University programs in preparation for certification, and eligibility for certification after graduation.

Oral Communication and Computer Use Competencies

Students majoring in political science are required to demonstrate computer use and oral communication competencies. Computer use proficiency can be demonstrated by one of the following:

1. successful completion of POLS 3310 RESEARCH METHODS AND POLITICAL ANALYSIS; or
2. successful completion of CSE 1301 COMPUTER LITERACY or INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING; or
3. successful completion of other courses approved by the Undergraduate Assembly; or
4. passing the University computer use competency exam.

Oral communication proficiency can be demonstrated by one of the following:

COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING	3
COMS 2305	BUSINESS AND PROFESSIONAL COMMUNICATION	3
COMS 3315	COMMUNICATION FOR EDUCATORS	3

1. successful completion of specific political science courses approved by the department; or
2. successful completion of one of the following:
3. successful completion of other courses approved by the Undergraduate Assembly.

Students should discuss these options with their undergraduate advisor who may also provide a list of other courses approved by the University to meet these requirements.

Requirements for a Bachelor of Arts Degree in Political Science

All students who wish to earn a Bachelor of Arts degree in Political Science must complete the following coursework. In completing this coursework, they will satisfy the University's core curriculum requirements.

Pre-Professional Courses

General Core Requirements (p. 93) 39

Recommended Core Requirements

ENGL 1301	RHETORIC AND COMPOSITION I (or suitable substitute)
ENGL 1302	RHETORIC AND COMPOSITION II (or suitable substitute)
HIST 1311	HISTORY OF THE UNITED STATES TO 1865
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT
MATH 1302	COLLEGE ALGEBRA
MATH 1308	ELEMENTARY STATISTICAL ANALYSIS
POLS 2311	GOVERNMENT OF THE UNITED STATES ¹

POLS 2312	STATE AND LOCAL GOVERNMENT ¹	
Social or cultural anthropology; archaeology; social/political/cultural geography; economics; criminal justice; psychology; sociology; women's studies courses cross-listed with these departments and/or Introduction to Women's Studies (WOMS 2310). This fulfills the Social/Cultural studies requirement		
Program Requirements		
Electives		
Modern and Classical Languages: 1441, 1442, 2313, 2314		14
Sufficient to give the total number of hours required for the degree		
Professional Courses		
Major		
POLS 2311	GOVERNMENT OF THE UNITED STATES ¹	3
POLS 2312	STATE AND LOCAL GOVERNMENT ¹	3
POLS 3310	RESEARCH METHODS AND POLITICAL ANALYSIS (or equivalent)	3
Select one of the following in political thought:		
POLS 3313	MODERN CRITICS OF SOCIETY AND POLITICS	
POLS 4322	ISSUES IN POLITICAL THEORY	
POLS 4323	FEMINIST POLITICAL THOUGHT	
POLS 4327	POLITICAL IDEAS OF THE ANCIENT WORLD	
POLS 4328	MODERN POLITICAL IDEAS	
POLS 4329	CONTEMPORARY CONTROVERSIES IN POLITICAL THEORY	
Or equivalent		
Select at least one course from any four of the five areas listed:		12
Area I Political Behavior and Processes:		
POLS 3306	LEGISLATIVE ORGANIZATION AND PROCEDURE	
POLS 3311	PUBLIC OPINION	
POLS 3327	AMERICAN POLITICAL PARTIES	
POLS 4314	SEPARATION OF POWERS AND AMERICAN INSTITUTIONS	
POLS 4316	WOMEN IN THE POLITICAL PROCESS	
POLS 4317	ETHNIC GROUP POLITICS IN THE UNITED STATES	
POLS 4318	POLITICS OF AFRICAN AMERICANS	
POLS 4319	POLITICS OF MEXICAN AMERICANS	
POLS 4324	ELECTORAL BEHAVIOR	
POLS 4326	ELECTION STRATEGY AND CAMPAIGN MANAGEMENT	
POLS 4330	THE U.S. PRESIDENCY	
POLS 4333	PRESIDENTIAL LEADERSHIP IN DOMESTIC POLICY MAKING	
POLS 4335	LEADERSHIP IN AMERICAN (U.S.) POLITICAL DEVELOPMENT	
Area II Comparative Politics:		
POLS 3304	INTRODUCTION TO COMPARATIVE POLITICS	
POLS 3314	POLITICAL SYSTEMS OF EASTERN AND CENTRAL EUROPE	
POLS 3316	DICTATORSHIP AND DEMOCRACY IN LATIN AMERICAN POLITICS	
POLS 3317	MEXICAN POLITICS AND U.S.-MEXICO RELATIONS	
POLS 3318	POLITICAL SYSTEMS OF EAST ASIA	
POLS 3328	INTRODUCTION TO MIDDLE EAST POLITICS	
POLS 4313	POLITICAL DEVELOPMENT	
POLS 4361	THE POLITICAL ENVIRONMENT OF RUSSIA AND THE SUCCESSOR STATES	
POLS 4362	RUSSIA AND THE SUCCESSOR STATES TODAY	
POLS 4371	THE POLITICS AND FOREIGN POLICY OF ISRAEL	
Area III International Politics:		
POLS 3302	INTRODUCTION TO INTERNATIONAL RELATIONS	3
POLS 3329	THE POLITICS OF INTERNATIONAL CONFLICT	
POLS 4311	INTERNATIONAL RELATIONS, FOREIGN POLICY, AND POLITICAL PSYCHOLOGY	3
POLS 4312	INTERNATIONAL ORGANIZATIONS	3

POLS 4334	PRESIDENTIAL LEADERSHIP IN FOREIGN POLICY	
POLS 4336	CONTEMPORARY UNITED STATES FOREIGN POLICY	
POLS 4355	INTERNATIONAL POLITICS	
POLS 4360	THEORIES OF THE INTERNATIONAL SYSTEM	
POLS 4365	FOREIGN POLICIES OF RUSSIA AND THE SUCCESSOR STATES	
POLS 4370	INTERNATIONAL RELATIONS OF THE MIDDLE EAST	
POLS 4372	HUMAN SECURITY, VIOLENCE, AND SCARCITY	3
Area IV Public Law:		
POLS 3330	JUDICIAL BEHAVIOR AND THE JUDICIAL PROCESS	
POLS 3331	CONTEMPORARY ISSUES IN CIVIL LIBERTIES	
POLS 3333	JURISPRUDENCE	
POLS 3334	WOMEN AND U.S. LAW	
POLS 3335	CRIMINAL LAW	
POLS 4331	U.S. CONSTITUTIONAL LAW: GOVERNMENT POWER	
POLS 4332	U.S. CONSTITUTIONAL LAW: FUNDAMENTAL RIGHTS	
Area V Public Administration and Policy Studies:		
POLS 3303	INTRODUCTION TO PUBLIC ADMINISTRATION	
POLS 3305	GOVERNMENT IN URBAN AMERICA	
POLS 3307	COMPARATIVE STATE AND LOCAL POLITICS	
POLS 3312	INTRODUCTION TO PUBLIC POLICY ANALYSIS	
POLS 4303	PUBLIC ADMINISTRATION AND THE POLITICAL PROCESS	
POLS 4340	FEDERAL SOCIAL POLICY	3
POLS 4350	HEALTH POLITICS AND POLICY	3
POLS 4351	ENERGY POLICY AND ADMINISTRATION	
POLS 4352	U.S. IMMIGRATION POLICY AND THE AMERICAN DREAM	
POLS 4353	PUBLIC BUDGETING AND TAXATION	

Select one of the following areas of specialization: 12-18

Pre-Law:

Requiring a minimum of 9 hours in the Public Law area of Political Science, plus 9 hours of courses to be chosen from the following:

COMS 3310	GROUP COMMUNICATION THEORY
CRCJ 4301	THE AMERICAN JUDICIAL SYSTEM
ENGL 4371	ADVANCED ARGUMENTATION
HIST 3317	U.S. LEGAL AND CONSTITUTIONAL HISTORY, COLONIAL TO 1877
HIST 3318	U.S. LEGAL AND CONSTITUTIONAL HISTORY, 1877 TO PRESENT
HIST 3319	GREAT ANGLO-AMERICAN TRIALS
HIST 3320	U.S. CIVIL LIBERTIES
HIST 4350	BRITISH CONSTITUTIONAL HISTORY
PHIL 1301	FUNDAMENTALS OF REASONING
PHIL 2311	LOGIC
PHIL 3320	PHILOSOPHY OF LAW
SOCI 3313	CRIMINOLOGY
SOCI 3357	LAW AND SOCIETY
BLAW 3311	LAW I
BLAW 3312	LAW II

Policy/Public Administration:

Requiring a minimum of 12 hours in the Policy/Public Administration area of Political Science

International Studies:

Requiring a minimum of 12 hours in any combination of the Comparative Politics and International Politics areas of Political Science

Political Behavior and Processes:

Requiring a minimum of 12 hours in the Political Behavior and Processes area of Political Science

Total Hours

104-110

1 36 hours to include POLS 2311 GOVERNMENT OF THE UNITED STATES and POLS 2312 STATE AND LOCAL GOVERNMENT

Students majoring in Political Science will pursue this general course of study in the discipline AND they may declare a specific area of concentration by filing a statement of intent with the Political Science Department. The area of concentration will require that the student complete the requirements for the general degree plan while also fulfilling certain requirements for the concentration. All students will receive the B.A. in Political Science. Those completing the selected specialization will also receive recognition of completion.

The purpose of the specializations is to provide the student with a focused, systematic, and in-depth educational experience in the context of a broad liberal arts education.

Political Science classes may be used toward the major requirements or minor requirements (at the discretion of the department offering the minor), but not both.

Oral Communication and Computer Use Competencies

Students majoring in political science are required to demonstrate computer use and oral communication competencies. Computer use proficiency can be demonstrated by one of the following:

1. successful completion of POLS 3310 RESEARCH METHODS AND POLITICAL ANALYSIS; or
2. successful completion of CSE 1301 COMPUTER LITERACY or INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING; or
3. successful completion of other courses approved by the Undergraduate Assembly; or
4. passing the University computer use competency exam.

Oral communication proficiency can be demonstrated by one of the following:

COMS 1301	FUNDAMENTALS OF PUBLIC SPEAKING	3
COMS 2305	BUSINESS AND PROFESSIONAL COMMUNICATION	3
COMS 3315	COMMUNICATION FOR EDUCATORS	3

1. successful completion of specific political science courses approved by the department; or
2. successful completion of one of the following:
3. successful completion of other courses approved by the Undergraduate Assembly.

Students should discuss these options with their undergraduate advisor who may also provide a list of other courses approved by the University to meet these requirements.

Requirement for a Minor in Political Science

A minor in political science requires 18 semester hours, at least six of which must be 3000/4000 level.

Political Science classes may be used toward the major requirements or minor requirements (at the discretion of the department offering the minor), but not both.

Sociology and Anthropology

Undergraduate Degrees

- Bachelor of Arts in Sociology (p. 451)
- Bachelor of Arts in Anthropology (p. 457)

- Minor in Anthropology (p. 457)

Graduate Degrees

- Anthropology, M.A. (p. 454)
- Anthropology, M.A. Thesis Substitute (p. 454)
- Sociology, M.A. (p. 455)
- Sociology, M.A. Thesis Substitute (p. 455)
- Sociology, M.A. Non-Thesis (p. 455)

Sociology - Undergraduate Programs

Overview

The principal common educational objective in the Department of Sociology and Anthropology is to develop a systematic understanding of social behavior, human culture, and social institutions. Knowledge of human social and cultural relationships is vital to a meaningful perspective on and understanding of the society in which we live. Contemporary societies are characterized by diversity, rapid change, complex organization, and extensive specialization. Programs of study in the Department of Sociology and Anthropology pursue the challenge of:

1. creating and disseminating general knowledge that will render this world more understandable and
2. providing an educational base for more effective and humane planning and social intervention in society.

Each of the programs of study relates to this general objective in a somewhat different manner. Students are encouraged to visit with the faculty and learn more about the programs offered in the department.

Sociology

A program of study in sociology has three principle objectives: to foster the ability to analyze human relationships from a sociological perspective, to develop the theoretical, methodological, and statistical skills necessary for asking and answering sociological questions, and to enhance individuals' awareness of the relationship between events in their own lives and the structure of the society in which they live. The program is designed to prepare students both to pursue graduate work in sociology and to seek a career in a variety of private and public settings where knowledge of human relationships and/or social research skills is particularly useful. Students seeking certification to teach in the public schools can use sociology as a teaching area.

Fast Track Program

The Fast Track Program in Sociology allows outstanding seniors in sociology to take up to three graduate seminars for credit toward both the Bachelor's degree and the Master's degree in Sociology. Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's Degree. Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies. They will not be required to take the Graduate Record Examination, complete an application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA program with only five additional courses and a thesis remaining to complete the requirements for thesis option. For more details about the program contact the Undergraduate Advisor for the Department of Sociology and Anthropology and consult the on-line catalog.

Requirements for a Bachelor of Arts Degree in Sociology

GENERAL CORE REQUIREMENTS

POLS 2311 GOVERNMENT OF THE UNITED STATES

POLS 2312 STATE AND LOCAL GOVERNMENT

HIST 1311 HISTORY OF THE UNITED STATES TO 1865

HIST 1312 HISTORY OF THE UNITED STATES, 1865 TO PRESENT

Communication - 6 hours from approved list.

14 hours in the same modern or classical language (1441, 1442, 2313, 2314).

Creative Arts - 3 hours from approved list.

Language Philosophy and Culture - 3 hours from approved list.

Life and Physical Sciences - 6 hours from approved list.

Mathematics - 6 hours MATH 1301 or higher. Math 1308 is recommended.

Required Component Area Option - Any course listed above. A course may fulfill only one component area.

MAJOR COURSES

37 hours including:

SOCI 1311 INTRODUCTION TO SOCIOLOGY

SOCI 3352 SOCIAL STATISTICS

SOCI 3372 SOCIOLOGICAL THEORY

SOCI 3462 SOCIAL RESEARCH

One course in Anthropology

ELECTIVES

Sufficient to give the total number of hours required for the degree.

TOTAL

120 hours, at least 36 of which must be 3000/4000 level.

Optional Specializations in Sociology

Students majoring in Sociology may pursue a general course of study in the discipline or concentrate in a specific area or areas. The purpose of specialization is to provide the student with a focused, systematic, and in-depth educational experience in the context of a broad liberal arts education. Please see the Sociology academic advisor for more information on completing an area concentration.

GENERAL REQUIREMENTS:

Each concentration requires the completion of four courses with a grade no lower than a C for each course. Additional courses not listed may be counted with approval. At least three courses must come from Sociology for each concentration. Additional requirements may apply. See the Sociology academic advisor for more information.

The following courses may be used to complete any of the area concentrations if the content is related to the concentration (approval is required):

SOCI 4365 TOPICS IN SOCIOLOGY

SOCI 4391 CONFERENCE COURSE

SOCI 4393 INTERNSHIP IN SOCIOLOGY

SOCI 4395 SERVICE LEARNING INDEPENDENT STUDY

The areas of specialization are:

DIVERSITY: RACE, CLASS, AND GENDER*

Select at least one course from the following:

SOCI 3337 RACIAL & ETHNIC GROUPS IN US

SOCI 3314 THE LATINA EXPERIENCE (may count only within one area)

SOCI 3338 CONTEMPORARY BLACK EXPERIENCE

SOCI 3339 RACE, SPORT AND MEDIA

SOCI 3345 SOCIOLOGY OF THE 1960S

SOCI 4331 RACE, ETHNICITY & FAMILY FORMATION

Select at least one course from the following:

SOCI 3334 SOCIOLOGY OF GENDER

SOCI 3314 THE LATINA EXPERIENCE (may count only within one area)

SOCI 3356 WOMEN, WORK AND SOCIAL CHANGE

Select at least one course from the following:

SOCI 3336 SOCIAL INEQUALITY

SOCI 4341 INEQUALITIES IN PUBLIC EDUCATION

* Those wishing to complete both diversity concentrations must complete at least seven distinct courses.

DIVERSITY: RACE AND ETHNIC RELATIONS*

SOCI 3337 RACIAL & ETHNIC GROUPS IN US

SOCI 3314 THE LATINA EXPERIENCE

SOCI 3338 CONTEMPORARY BLACK EXPERIENCE

SOCI 3339 RACE, SPORT AND MEDIA

SOCI 3345 SOCIOLOGY OF THE 1960S

SOCI 4331 RACE, ETHNICITY & FAMILY FORMATION

* Those wishing to complete both diversity concentrations must complete at least seven distinct courses.

FAMILIES

SOCI 3328 MARITAL AND SEXUAL LIFESTYLES

SOCI 3331 SOCIOLOGY OF THE FAMILY

SOCI 4331 RACE, ETHNICITY & FAMILY FORMATION

ANTH 3338 COMPARATIVE KINSHIP AND FAMILY SYSTEMS

HEALTH AND SPORT**Select at least three courses from the following:**

SOCI 4320 MEDICAL SOCIOLOGY

SOCI 3341 SOCIOLOGY OF SPORT

SOCI 3339 RACE, SPORT AND MEDIA

SOCI 3342 SOCIOLOGY OF THE HUMAN BODY

Up to one of the following courses may be selected:

SOCI 3348 THE SOCIOLOGY OF RISK

ANTH 3332 FOOD AND CULTURE

ANTH 3369 MEDICAL ANTHROPOLOGY

RESEARCH AND EVALUATION**Required:**

SOCI 3352 SOCIAL STATISTICS

SOCI 3462 SOCIAL RESEARCH

SOCI 4370 SENIOR RESEARCH SEMINAR or SOCI 4391 CONFERENCE COURSE

Select one course from the following:

SOCI 3365 PROGRAM EVALUATION & NEEDS ASSESSMENT

SOCI 3366 POPULATION TRENDS AND PROCESSES

SOCI 4306 QUALITATIVE RESEARCH METHODS

ANTH 3341 RESEARCH METHODS IN CULTURAL ANTHROPOLOGY

SOCIAL PSYCHOLOGY

Required:

SOCI 3317 INDIVIDUAL AND SOCIETY

Select three courses from the following:

SOCI 3318 SELF AND SOCIAL IDENTITY

SOCI 3319 SMALL GROUPS

SOCI 3320 DEVIANCE: SOCIAL AND PERSONAL

ANTH 3331 CULTURE AND PERSONALITY

THEORY AND CULTURAL STUDIES

Four courses are required with at least three coming from the following:

SOCI 3372 SOCIOLOGICAL THEORY

SOCI 3345 SOCIOLOGY OF THE 1960S

SOCI 4309 WRITING FOR THE SOCIAL SCIENCES

ANTH 3300 DEBATES IN CULTURAL ANTHROPOLOGY or ANTH 4345 VISUALIZING CULTURE

Additional electives:

ENGL 4355 LITERARY CRITICISM AND THEORY I or ENGL 4356 LITERARY CRITICISM AND THEORY II

Requirement for a Minor in Sociology

A minor in sociology requires 18 semester hours, at least six of which must be 3000/4000 level.

Fast Track Program in Sociology

The Fast Track Program allows outstanding undergraduate students in sociology at UT Arlington to take up to three graduate seminars in sociology that will earn credit toward *both* the Bachelor's degree and the Master's degree in Sociology. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA . Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's degree. To qualify, students must have completed at least 30 hours at UTA with a GPA of 3.0 in all courses and 3.25 in the last 30 hours. Before entering the Fast Track, students must also have completed the four required core courses in the Sociology major with a GPA of at least 3.5, or three of the four with a GPA of 3.66 or more. Additionally, they must have already taken at least two non-core sociology courses with a GPA of 3.5 or higher.

Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies to continue their graduate work in the Sociology MA Program once the Bachelor's degree is awarded. They will *not* be required to take the GRE, complete an additional application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option.

To remain in the Fast Track Program, students must receive no grade lower than a B in any graduate seminars taken as an undergraduate, selected with the advice and approval of the Sociology Graduate Advisor. Undergraduate students who do not maintain grades of B or A in the graduate courses taken will be unable to continue in the Fast Track Program but, if the courses are completed passing, will still receive credit toward their undergraduate degree requirements. Students originally denied entry into the Fast Track Program, discontinued after provisional admission, subsequently dropped or opting out are still welcome to apply to the Sociology MA Program in the usual way and will be considered without prejudice.

For an application form or to obtain more details about this program, contact the Sociology Undergraduate Advisor.

Sociology - Graduate Programs

Objectives: M.A. in Sociology

The Master of Arts program in sociology is designed to provide students with a firm substantive background in sociological theory and in the techniques of contemporary research methodology and statistical analyses. In addition to these core concerns, the program offers a variety of seminars, as well as

practicum opportunities, to help prepare students for a wide range of professional careers in both the private and public sectors or continued graduate education at the Ph.D. level.

Graduate Assistantships and Fellowships in Sociology

Graduate teaching and research assistantships and other forms of financial support will be awarded on a competitive basis. In addition to performance in any graduate courses the student may have taken, the same criteria used to determine admission status will be used in evaluating applications for such awards. No single factor, including standardized test scores, will be used to end consideration of any graduate assistantships.

Admissions Requirements: Sociology

Applicants must apply for admission through, and supply all information required by Graduate Admissions. The Sociology Graduate Advisor, in consultation with other members of the faculty, decides on each applicant.

All of the following criteria will be considered in determining program admission status:

1. Undergraduate grade point average
2. Graduate Record Exam (GRE) scores
3. Letters of recommendation from faculty
4. Preparation in sociology and satisfactory performance in sociology courses and/or courses in related disciplines
5. A statement (2-3 pages) describing the applicant's academic background, research/study interests, and professional goals

CRITERIA FOR UNCONDITIONAL ADMISSION

For unconditional admission, the student must satisfy each of the following criteria.

1. Minimum GPA of 3.0, as calculated by Graduate Studies.
2. Preferred GRE score of at least 150 on the verbal subtest (500 on the prior scale) and 144 on the quantitative subtest (500 on the prior scale).
3. Satisfactory letters of recommendation.
4. Adequate preparation in sociology and satisfactory performance in sociology courses and/or those in related disciplines.
5. Satisfactory statement (2-3 pages) describing the applicant's academic background, research/study interests, and professional goals

CRITERIA FOR AUTOMATIC UNCONDITIONAL ADMISSION

Sociology students who completed their undergraduate degree in Sociology at UT Arlington with a 3.0 overall GPA, a 3.0 GPA in advanced hours, a B or better in SOCI 3372 SOCIOLOGICAL THEORY, SOCI 3352 SOCIAL STATISTICS and SOCI 3462 SOCIAL RESEARCH and satisfactory letters of recommendation from UT Arlington faculty qualify for automatic unconditional admission, pending submission of all required materials.

CRITERIA FOR PROBATIONARY ADMISSION

Students who do not qualify for unconditional admission may be admitted on probation if they satisfy any 4 of the 5 criteria for unconditional admission.

Those entering the program under probationary status will be granted unconditional admission only after completing 12 hours of graduate sociology courses, approved by the Graduate Advisor, earning no grade below a B.

PROVISIONAL ADMISSION

An applicant unable to supply all required information prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

DEFERRED ADMISSION

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

DENIED ADMISSION

Applicants who do not satisfy the requirements for any of the aforementioned forms of admission will not be admitted.

INTERNATIONAL STUDENTS

To qualify for admission, international students must score 550 or above on the TOEFL.

Degree Requirements: Sociology

Students may select from three options: the thesis, thesis substitute, or non-thesis degree plan.

Thesis Option: Satisfactory completion of a minimum of 30 hours of coursework, including core courses in theory, methods, and statistics, and the six hour thesis course SOCI 5698 THESIS.

Thesis Substitute Option: Satisfactory completion of a minimum of 33 hours of coursework, including core courses in theory, methods, and statistics, and the three hour thesis substitute course SOCI 5393 THESIS SUBSTITUTE.

Non-Thesis Option: Satisfactory completion of a minimum of 36 hours of coursework, including core courses in theory, methods, and statistics, and the three hour non-thesis course SOCI 5385 NON-THESIS PROJECT.

All candidates for the degree Master of Arts with a major in sociology must pass a final examination. For thesis candidates, it is the oral defense of the completed thesis. For thesis substitute candidates, it is an oral examination on a project, the scope, content, and form of which shall be determined by the student's supervising committee. A thesis substitute project might be, for example, a review of professional literature on a selected topic, a thematic paper integrating the course of study completed, or an internship report applying sociological concepts. For non-thesis candidates, it is an oral examination, the scope, content, and form of which shall be determined by the student's supervising committee.

Dual Degree Program

Students in sociology may participate in a dual degree program where by they can earn a Master of Arts in Sociology and another field, such as Master of Public Administration or Master of Science in Social Work. By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. Six or more hours may be jointly applied depending on the total number of hours required for both degrees, and subject to the approval of graduate advisors from both programs.

To participate in the dual degree option, students must make separate application to each program and must submit a separate Program of Work for each program. Admission to and enrollment in the two programs must be concurrent (admitted to the second program before completing more than 24 hours in the first). Those interested should consult each of the appropriate graduate advisors for coursework requirements and refer to Graduate Studies catalog entry on Dual Degree Program in the Advanced Degrees and Requirements section for further details.

Fast Track Program in Sociology

The Fast Track Program allows outstanding undergraduate students in sociology at UT Arlington to take up to three graduate seminars in sociology that will earn credit toward *both* the Bachelor's degree and the Master's degree in Sociology. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA . Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's degree. To qualify, students must have completed at least 30 hours at UTA with a GPA of 3.0 in all courses and 3.25 in the last 30 hours. Before entering the Fast Track, students must also have completed the four required core courses in the Sociology major with a GPA of at least 3.5, or three of the four with a GPA of 3.66 or more. Additionally, they must have already taken at least two non-core sociology courses with a GPA of 3.5 or higher.

Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies to continue their graduate work in the Sociology MA Program once the Bachelor's degree is awarded. They will *not* be required to take the GRE, complete an additional application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option.

To remain in the Fast Track Program, students must receive no grade lower than a B in any graduate seminars taken as an undergraduate, selected with the advice and approval of the Sociology Graduate Advisor. Undergraduate students who do not maintain grades of B or A in the graduate courses taken will be unable to continue in the Fast Track Program but, if the courses are completed passing, will still receive credit toward their undergraduate degree requirements. Students originally denied entry into the Fast Track Program, discontinued after provisional admission, subsequently dropped or opting out are still welcome to apply to the Sociology MA Program in the usual way and will be considered without prejudice.

For an application form or to obtain more details about this program, contact the Sociology Undergraduate Advisor.

Anthropology Undergraduate Programs

Overview

The principal common educational objective in the Department of Sociology and Anthropology is to develop a systematic understanding of social behavior, human culture, and social institutions. Knowledge of human social and cultural relationships is vital to a meaningful perspective on and understanding of the society in which we live. Contemporary societies are characterized by diversity, rapid change, complex organization, and extensive specialization. Programs of study in the Department of Sociology and Anthropology pursue the challenge of:

1. creating and disseminating general knowledge that will render this world more understandable and
2. providing an educational base for more effective and humane planning and social intervention in society.

Each of the programs of study relates to this general objective in a somewhat different manner. Students are encouraged to visit with the faculty and learn more about the programs offered in the department.

Anthropology

A program of study in anthropology has the objective of grounding students in three main subfields of anthropology: cultural anthropology (the comparative analysis of human lifeways around the world), archaeology (the systematic analysis of the material remains of past cultures), and physical anthropology (the study of humans as a biological species). The program prepares students both for graduate work in anthropology and for many careers in which anthropological perspectives and training are useful.

Requirements for a Bachelor of Arts Degree in Anthropology

UNIVERSITY CORE REQUIREMENTS (P. 93)

COLLEGE OF LIBERAL ARTS REQUIREMENTS

14 hours in the same modern or classical language (1441, 1442, 2313, 2314)

ANTHROPOLOGY PROGRAM REQUIREMENTS

BIOLOGICAL ANTHROPOLOGY (ANTH 2307)

GLOBAL CULTURES (ANTH 2322)

INTRODUCTION TO ARCHAEOLOGY (ANTH 2339)

One approved ANTH method course

One approved ANTH theory course

One advanced (3000/4000 level) elective in Sociology (SOCl)

22 additional hours of approved ANTH electives (19 hours must be 3000/4000 level)

Summary: 40 hours, including ANTH 2307, 2322, and 2339; one approved ANTH course in Methods; one approved ANTH course in Theory; one advanced (3000/4000 level) SOCl elective; and 22 additional hours (including at least 19 advanced hours) of approved ANTH electives. Contact the department advisor for the list of approved courses for method, theory, and electives.

ADDITIONAL UNIVERSITY REQUIREMENTS

Additional elective hours sufficient to reach 120 total credit hours, with 36 advanced (3000/4000) hours; may include an optional minor.

Requirement for a Minor in Anthropology

The Anthropology minor (6 courses/18 hours total) can be fulfilled by successfully completing:

Select two of the following:

ANTH 2307 BIOLOGICAL ANTHROPOLOGY

ANTH 2322 GLOBAL CULTURES

ANTH 2339 INTRODUCTION TO ARCHAEOLOGY

Any other four ANTH courses, at least two of which must be at the advanced level (3000 or above)

Questions about the Anthropology minor may be directed to the department advisor.

Southwestern Studies

The Southwestern Studies minor fosters an interdisciplinary examination of an historically and culturally significant region—the southwestern United States and northern Mexico. The program offers opportunities for students to explore important topics in a regional context, including multicultural diversity, economic development, political and social change, art and literature, environment, cultural and historical geography, historical cartography,

and architectural and urban history. The minor is supported by faculty from seven departments and is sponsored by the University's Center for Greater Southwestern Studies and the History of Cartography, which promotes the use of the UT Arlington Special Collections and the Minority Cultures Collection in the Central Library.

With the permission of their departmental advisor, students enroll in 18 hours selected primarily from the courses listed below. These hours must be distributed among at least three different departments.

Some of the following courses change content from offering to offering and might not be relevant to the minor during a particular year. In addition, special topics courses and/or courses taught outside the College of Liberal Arts may also be used to fulfill the Southwestern Studies minor with the permission of the Director of Southwestern Studies. For these reasons it is important that students consult with the Southwestern Studies faculty advisor before registering each semester.

Course Descriptions

(Select 6 classes from the below to equal 18 credit hours. 3 credit hours must be distributed among at least 3 different departments.)

Theatre Arts - Graduate Programs

Objective

The graduate course offerings in theatre arts are provided to support other graduate degree programs and to meet the express needs of students. No program leading to a graduate degree in theatre arts exists at this time.

Theatre Arts - Undergraduate Programs

The mission of the Department of Theatre Arts in the College of Liberal Arts at The University of Texas at Arlington is to provide a comprehensive undergraduate education through theory, practice, and research.

The objective of the department is to provide an extensive and wide-ranging education in the theatrical profession through applied and practical experiences acquired through performance and production opportunities. Undergraduate students in the Department of Theatre Arts explore the components which comprise the performance and production event. The research of new theories and their applications to the art, craft, and management of Theatre Arts is highly encouraged through one-on-one mentoring and supervision by specialized, professional faculty. A primary aspect of the Department of Theatre Arts is to provide a challenging educational environment for each student characterized by shared values, unity of purpose, diversity of opinion, mutual respect, and a commitment to lifelong learning. The following degrees are offered:

- **Bachelor of Arts (B.A.) in Theatre Arts degree and**
- **Bachelor of Fine Arts (B.F.A.) in Theatre Arts degree, with sub-plans in: Design and Technology, Musical Theatre, Performance, and Theatre Studies.**

In addition, the Department offers the following minors:

- **Minor in Theatre Arts and**
- **Minor in Dance.**

Dance courses listed as Dance Activity (DNCA) and Dance (DNCE) are also offered. Several approved University core courses are also offered by the Department that satisfy core degree requirements in other disciplines.

MAVERICK THEATRE COMPANY

The Maverick Theatre Company is the production company of the Department of Theatre Arts at the University of Texas at Arlington. A resident company of professional artists and students present a wide variety of plays and musicals from past and current theatrical literature with a special focus on new play development. In addition, MTC produces dance performances each semester. Every student, upon admission to the department, becomes a Maverick Theatre Company member. These activities directly support the academic objectives of the department.

The Bachelor of Arts (B.A.) Degree Program

LIBERAL ARTS REQUIREMENTS

The Bachelor of Arts degree provides a general background in Theatre Arts and Liberal Arts. The B.A. allows students the opportunity, through elective coursework in Theatre Arts, to tailor their degree program in interest areas the student may wish to explore.

ADMISSION

In addition to the general requirements for admission to the University, the aspiring undergraduate must meet the following requirement for admission to the Bachelor of Arts degree program:

- Participation in advisement and a personal interview.

To be fully accepted in the Bachelor of Arts in Theatre degree program, all students must complete at least one semester as a "Theatre Arts Intended" student and earn a 2.25 cumulative grade point average in all courses taken at UT Arlington, and a 2.5 grade point average in all theatre courses taken at UT Arlington. Once these standards are met, the student may be declared as a Bachelor of Arts in Theatre Arts major.

ACADEMIC REQUIREMENTS

All Theatre Arts majors shall enroll in THEA 0181 THEATRE PRACTICUM for one hour per semester in residence in order to graduate. Eight (8) hours of THEA 0181 THEATRE PRACTICUM are required. Students should see their advisor regarding practicum obligations.

All B.A. students are encouraged to audition for each major production each semester they are enrolled, though they may choose to decline being considered for a role at the time of the audition. Production activities and Theatre Arts disciplinary rules shall be governed by a student handbook that is available to the student through the Department of Theatre Arts.

A minimum 2.25 overall grade point average is required for all courses taken at UT Arlington in order to remain in the B.A. degree program. A minimum grade point average of 2.50 is required for all Theatre Arts courses taken at UT Arlington in order to remain in the B.A. degree program. Students currently enrolled at UT Arlington who wish to declare Theatre Arts as a major must have a minimum grade point average of 2.25 in overall coursework taken at UT Arlington in order to be admitted.

A student will be placed on departmental academic probation in the Department of Theatre Arts if her/his grade point average drops below the minimum requirements for the degree plan in which she/he are enrolled. A theatre arts student who is on academic probation is not allowed to audition for or accept an acting role or serve as a designer, stage manager or other significant production position for any of the productions during the next regular semester they are enrolled. If after a regular semester the student's grade point average returns to at least the minimum required grade point average for her/his degree plan, then the probation is removed. However, if after a regular semester the student's grade point average does not meet the minimum required grade point average, the student may be removed from the degree program and will be advised as to other degree plan alternatives, should they exist.

DEPARTMENT SCHOLARSHIPS

The Department of Theatre Arts offers limited scholarships to deserving students based upon talent, academic excellence, and merit. Work-study positions are also available. Contact the Department of Theatre Arts for information.

Teacher Certification

Students interested in Texas Teacher Certification should consult the College of Education for the most recent changes in requirements regarding admission to teacher education, completion of university programs in preparation for certification, and eligibility for certification after graduation. The Department of Theatre Arts does not offer certification courses or certification advising.

The Bachelor of Fine Arts (B.F.A.) Degree Program

LIBERAL ARTS REQUIREMENTS

The Bachelor of Fine Arts degree is a specialized, pre-professional degree that provides a background in the liberal arts with sub-plans in Design and Technology, Musical Theatre, Performance, or Theatre Studies. The Design and Technology Sub-plan is for students seeking a professional career as a scenic, lighting, sound or costume designer, technical director, and/or theatre technician. The Musical Theatre Sub-plan is designed for students seeking a career in musical theatre performance. The Performance Sub-plan is designed for students seeking a professional career as an actor. The Theatre Studies Sub-plan provides a comprehensive study of the theatre arts, suitable for students seeking a career in a variety of fields, including but not limited to: teaching, directing, dramaturgy, and/or stage management. Students seeking the B.F.A. elect additional courses chosen from the University and Liberal Arts core curricula outside the Department of Theatre Arts.

ADMISSION

Entering B.F.A. students are accepted into the B.F.A. degree program as B.F.A.-Intended students.

Students who enter UT Arlington as a freshman or a sophomore B.F.A.-Intended student shall be evaluated by faculty in their sophomore year as to whether they shall be fully admitted into the B.F.A. program. Students who are not admitted may seek advisement regarding the possibility of changing to the B.A. degree.

Students who transfer into UT Arlington and are accepted as B.F.A.-intended students must be evaluated by faculty as to whether they shall be fully admitted into the B.F.A. program. Students who are not admitted may seek advisement regarding the possibility of changing to the B.A. degree.

In addition to the requirements stated above, the aspiring undergraduate must meet the following requirements for admission to the Bachelor of Fine Arts degree program:

- Participation in advisement.
- A personal interview with a designated faculty member (all students).
- A design/technical production portfolio review (Design and Technology Sub-plan), or an audition and interview (Musical Theatre Sub-plan or Performance Sub-plan), or a 1,000 word written essay and interview (Theatre Studies Sub-plan) are required. For the Theatre Studies sub-plan, write a 1,000 word essay about educational and career objectives and experiences, and how past and future training helps to achieve stated objectives. The essay should be word-processed in 12-point type.
- A grade point average or equivalent of at least 3.0 in all Theatre Arts course work from the student's high school or transferring college.
- A letter of recommendation from the student's high school theatre instructor (optional).
- Upon acceptance by the University and the Department of Theatre Arts, an indication of area of specialization (Design and Technology, Musical Theatre, Performance, or Theatre Studies) is required.

ACADEMIC REQUIREMENTS

All Theatre Arts majors shall enroll in THEA 0181 THEATRE PRACTICUM for one hour per semester in residence in order to graduate. Eight (8) hours of THEA 0181 THEATRE PRACTICUM are required. Students should see their advisor regarding practicum obligations. Transfer students must discuss THEA 0181 THEATRE PRACTICUM requirements with the Theatre Arts academic advisor.

B.F.A. Design and Technology Sub-plan students are required to present an updated portfolio and resume of production and course work at a formal portfolio review session at the end of each semester enrolled. Upon completion of the final semester of the B.F.A. Design and Technology Sub-plan, students shall present their work at an exit portfolio presentation: all accumulated design and production work completed while enrolled in the B.F.A. sub-plan shall be presented.

B.F.A. Musical Theatre Sub-plan students are required to audition for each major production each semester they are enrolled and must accept roles for which they are cast, unless special permission has been obtained in advance of the audition from the Musical Theatre Sub-plan Chair or the Chair of the Department.

B.F.A. Performance Sub-plan students are required to audition for each major production each semester they are enrolled and must accept roles for which they are cast, unless special permission has been obtained in advance of the audition from the Performance Sub-plan Chair or the Chair of the Department.

B.F.A. Theatre Studies Sub-plan students are required to present a formal research poster session, or an approved equivalent, of their research project completed in the course "Theatre Studies Research" or by other arrangement through the Theatre Studies Area Head or the Department Chair.

A minimum grade point average of 2.25 is required in overall coursework taken at UT Arlington in order to remain in the B.F.A. degree program. A minimum grade point average of 3.0 is required for all Theatre courses taken at UT Arlington in order to remain in the B.F.A. degree program. Students currently enrolled at UT Arlington who wish to declare Theatre Arts as an intended B.F.A. major must have a minimum grade point average of 2.25 in overall coursework taken at UT Arlington, in addition to the admission requirements stated above, in order to be admitted.

Concurrent enrollment in more than one B.F.A. sub-plan is not allowed. A student must complete a B.F.A. sub-plan and graduate with that sub-plan before being allowed to enroll in a second B.F.A. sub-plan.

Students wishing to change their B.F.A. sub-plan from one plan to another must reapply for and be accepted by the faculty to the new sub-plan according to the application procedures applicable for that sub-plan. Students should be aware that changing B.F.A. sub-plans may result in additional semesters of study. Students should contact their academic advisor to obtain a new graduation date when changing sub-plans.

A student will be placed on departmental academic probation in the Department of Theatre Arts if her/his grade point average drops below the minimum requirements for the degree plan in which she/he is enrolled. A theatre arts student who is on academic probation is not allowed to audition for or accept an acting role or serve as a designer, stage manager or other significant production position for any of the productions during the next regular semester they are enrolled. If after a regular semester the student's grade point average returns to at least the minimum required grade point average for her/his degree plan, then the probation is removed. However, if after a regular semester the student's grade point average does not meet the minimum required grade point average, the student may be removed from the degree program and will be advised as to other degree plan alternatives, should they exist.

Production activities and Theatre Arts disciplinary rules shall be governed by a student handbook that is available to the student through the Department of Theatre Arts.

DEPARTMENT SCHOLARSHIPS

The Department of Theatre Arts offers limited scholarships to deserving students based upon talent, academic excellence, and merit. Work-study positions are also available. Contact the Department of Theatre Arts for information.

Oral Communication Competency

Students majoring in Theatre Arts may demonstrate competency in oral communications by taking any course approved by the Undergraduate Assembly for this purpose. Alternatively, they may demonstrate this competency by passing the University proficiency examination in oral communication.

Computer Use Competency

Students majoring in Theatre Arts may demonstrate competency in computer use by taking any course approved by the Undergraduate Assembly for this purpose. Alternatively, they may demonstrate this competency by passing the University proficiency examination in computer use.

Requirements for a Minor in Theatre Arts

Students who are not majoring in Theatre Arts may elect to minor in it. Twenty-two (22) hours of theatre arts courses are required. This includes:

THEA 1101	THEATRE ARTS SYMPOSIUM	1
THEA 1304	STAGECRAFT I	3
THEA 1307	ACTING I: BASIC TECHNIQUES	3
THEA 1343	INTRODUCTION TO THEATRE	3
THEA 3309	SCRIPT ANALYSIS	3
Electives: a minimum of six (6) of these elective hours must be at the 3000/4000 level		9
Total Hours		22

Students interested in theatre arts as a minor should consult a Theatre Arts Department advisor to determine the most advantageous selection of courses in light of their interests and experience. With such consultation, departmental prerequisites may be waived for the purposes of a Theatre Arts minor.

Requirements for a Minor in Dance

Students may elect to minor in Dance within the Department of Theatre Arts. Requirements:

- Eighteen (18) hours of specified dance courses are required.
- At least 4 credit hours in dance technique courses DNCE 1232, DNCE 1235, or DNCE 1236 must be completed at UT Arlington.

The coursework includes:

DNCE 1300	DANCE APPRECIATION	3
DNCE 1132	MODERN DANCE I	1
DNCE 1135	BALLET I	1
DNCE 1136	JAZZ DANCE I	1
DNCE 1232	MODERN DANCE II	2
DNCE 1235	BALLET II	2
DNCE 1236	JAZZ DANCE II	2
THEA 3335	DANCE FOR MUSICAL THEATRE I	3
THEA 4335	DANCE FOR MUSICAL THEATRE II	3

Total Hours 18

Students interested in a minor in Dance should consult with a Theatre Arts Department academic advisor to enroll in the appropriate courses.

DANCE (DNCA & DNCE)

The Department of Theatre Arts offers a Minor in Dance and courses in Dance Activity (DNCA) and Dance Theory (DNCE).

See the "Minor" tab above for the listing of courses required for the Dance Minor.

Women's and Gender Studies - Undergraduate Program

Overview

The Women's and Gender Studies Program provides students with the opportunity to engage in critical analysis of issues related to women, gender, and sexuality. Courses typically emphasize how women, gender, and sexuality have shaped and been shaped by history, culture, and society, with particular attention to the role of race, ethnicity, class, nation, age, and religion in forming gender identities. This interdisciplinary program is taught by faculty from diverse fields and offers a unique opportunity for students to complement their work in traditional disciplines with courses that can be tailored to meet specific interests and needs.

Students may receive a Minor in Women's and Gender Studies by taking 18 credit hours from a selection of courses offered across several disciplines. Most of our courses are cross-listed with courses offered in other departments. Students should consult the Women's and Gender Studies website for a list of the courses being offered in any specific semester.

Women's and Gender Studies Minors are encouraged to take two foundation courses: WOMS 2310: Introduction to Women's & Gender Studies and WOMS 2315: Introduction to Gay & Lesbian Studies.

Women's and Gender Studies Minors may also consider taking the Internship course, which involves working off campus at a local organization that addresses women's or gender issues.

Students seeking the Women's and Gender Studies minor should first consult with the advisors in their major departments or programs for approval, then with the Women's and Gender Studies Program advisor.

A Graduate Certificate program in Women's & Gender Studies is an interdisciplinary program that advances knowledge and research in the fields of women's and gender studies. A Graduate Certificate demonstrates students' understanding of the issues related to women, gender, and sexuality that have shaped social structures, institutions, and identities across human history. Students gain a specialization within the fields of women's and gender studies that enhances their graduate educations and equips them with skills to succeed in their chosen careers.

Applicants seeking the Women's & Gender Studies Graduate Certificate will be restricted to students currently enrolled in a Masters or PhD program at UT Arlington, having met their admission standards. In these cases, the Women's & Gender Studies Program will defer to the admissions standards of each individual graduate program. As long as the student remains in good standing within her/his primary degree-granting department, s/he may be admitted to the Women's & Gender Studies Graduate Certificate Program. **Students should consult with the Graduate Studies Advisory of their Masters or Ph.D. program before applying to the Graduate Certificate in Women's and Gender Studies.**

Students may receive a Graduate Certificate in Women's & Gender Studies by taking **12 hours** of courses that are designated by the Women's and Gender Studies Program as having a central focus on women, gender, sexuality, or related topics. These courses may be taken within the graduate student's primary degree-granting department, or within other participating graduate programs. Courses may be counted twice, for both the student's primary graduate degree and her/his Graduate Certificate in Women's & Gender Studies. A list of approved classes will be generated at the beginning of each semester, posted on the Women's & Gender Studies website, and circulated to all certificate-seeking students.

College of Nursing and Health Innovation

Mission and Philosophy

The College of Nursing and Health Innovation is an integral component of The University of Texas at Arlington and subscribes to the mission of the University. The College of Nursing and Health Innovation prepares quality health care providers through excellence in education, scholarship, and service. The academic programs prepare individuals for professional roles and for collaboration with other professionals and consumers in the delivery of holistic health care, research and advocate for the improvement of health outcomes.

The faculty believes learning is a continuous lifelong process and a personal responsibility. Students must be actively involved in the learning process to acquire clinical proficiency and to be socialized into professional roles. Learning experiences are implemented to achieve sequence, continuity and synthesis of knowledge and expertise as defined by the educational outcomes. Teaching and learning are dynamic processes involving curriculum evaluation and revision based on research evidence, the needs of a multicultural society, and the changing health care system. The educational process facilitates the development of each person's potential and promotes cultural competence and assimilation of ethical principles.

The College of Nursing and Health Innovation believes in collaboration and partnerships with stakeholders that include education, community and health care organizations, as well as individuals who are impacted by each of the undergraduate and graduate programs. Feedback from the community is used to strengthen the programs and ensure that the graduates are regarded as employees of choice. Innovation and positive change are outcomes of strong collaboration between the college and its alumni and other constituents.

Faculty and students foster an educational climate of mutual respect, honesty, intellectual inquiry, creativity, and effective communication. We contribute to the development of our professions through the conduct of research and the dissemination and application of evidence-based knowledge. Faculty and students provide service to the community through clinical practice and leadership.

Undergraduate nursing education builds on a foundation of studies in the sciences, humanities, and arts. The baccalaureate program prepares competent, self-directed generalist nurses (Registered Nurses) who can assume increasing responsibility and leadership in the delivery of evidence-based nursing care.

Master's education builds on a foundation of undergraduate nursing education and provides specialty practice with an expanded theoretical and empirical knowledge base. The Master of Science in nursing programs prepare Registered Nurses for advanced functional roles that require increased accountability, expertise, and leadership. Graduates are prepared to provide evidence-based health care in collaboration with other health care providers and consumers. Administration graduates are prepared to lead and manage care in a variety of health care settings. Education graduates are prepared to teach in schools of nursing and health care organizations.

Doctoral education develops and advances empirical knowledge to promote evidence-based practice in the discipline of nursing. Research-focused graduates have a background to develop theories and conduct research with vulnerable populations and to assume academic, research, and leadership roles. The research doctorate provides a basis for future research programs and other scholarly activities. Practice-focused graduates have a background to develop and lead patient-centered delivery systems, conduct clinical research projects, and assume professional leadership roles. The practice doctorate provides a basis to translate research findings into practice for future population focused quality improvement and other evidence-based activities.

The Department of Kinesiology at The University of Texas at Arlington is committed to providing quality educational programs that emphasize scientific theory, hands-on learning in the laboratory setting and real-world application through clinical internships and other field-based experiences. The faculty's teaching experience and research expertise provide rich learning experiences across all of the department's academic programs.

History and Overview

The UT Arlington College of Nursing was established in 1971 as the U.T. System College of Nursing in Fort Worth and was housed in John Peter Smith Hospital. The first baccalaureate class enrolled in fall of 1972; the graduate program (MSN) began in 1975. In 1976, the school became an academic unit of UT Arlington, moving to the campus in 1977.

The Undergraduate Program consists of the BSN and the RN to BSN programs. In addition to the Arlington campus, these programs are offered online through the UT Arlington Academic Partnership program. The Graduate Program offers a Master of Science in Nursing (MSN) with preparation as a nurse practitioner in the areas of Acute Care Adult Gerontology --(1996), Acute Care Pediatric (2005), Adult Gerontology Primary Care (previously Adult and Gerontology) (2013), Family (1975), Neonatal (2008), Primary Care Pediatric (1985) and Family Psychiatric-Mental Health (1995). Post-master's certificates are available in all the above nurse practitioner specialties. In addition, the UT Arlington MSN Program offers preparation in Nursing Administration (1982) and Nursing Education (2008) in an online format. Certificates are offered in: Nursing Education (2001) and Advanced Nurse Educator Role (2001). An RN to MSN in Nursing Administration and RN to MSN in Nursing Education programs were approved in 2014. PhD in Nursing was approved in April 2003 with classes beginning in Fall 2003. A BSN-to-PhD entry option was approved in 2005, with classes beginning in Fall 2006. A Doctor of Nursing Practice (DNP) began in Fall 2009.

The undergraduate studies within the Department of Kinesiology are organized into four program areas: athletic training, exercise science, physical education teacher education and kinesiology - generalist. Each of these academic programs share a common core of kinesiology courses that provide

students with a strong foundation in the sciences of human anatomy, biomechanics and exercise physiology, as well as an introduction to research methodology. In addition to the kinesiology core, each undergraduate degree plan provides a comprehensive discipline-specific program of study designed to prepare students for a specific career path.

The Department of Kinesiology offers multiple degree plan options that work towards meeting the prerequisite requirements for admission to physical therapy, occupational therapy and physician's assistant graduate programs, as well as medical and dental schools (e.g., BS in Exercise Science - Clinical Health Professions).

Accreditation

The Bachelor of Science in Nursing, Master of Science in Nursing and Doctor of Nursing Practice Programs are accredited by the Commission on Collegiate Nursing Education (CCNE) and governed by the Texas Board of Nursing. The CCNE address is One Dupont Circle, NW, Suite 530, Washington, DC 20036-1120; Phone is (202) 887-6791 and fax is (202) 887-8476; and Website: www.aacn.nche.edu/accreditation (<http://www.aacn.nche.edu/accreditation>). There are no accrediting agencies for PhD in Nursing programs.

Scholastic Activities and Research Interests of the Faculty

The research programs of the College of Nursing faculty are diverse. A sampling of their areas of study includes oncology, neonatology, chemical dependency, sickle cell disease, Hispanic health care, maternal birth outcomes, leadership in nursing education, chemical dependency and abuse, leadership in nursing education, technology in the care of older adults, and simulation and technology in health professional education.

Research programs of the Department of Kinesiology are also diverse. Faculty research interests and publications in the Department of Kinesiology include adapted sports, sports pedagogy, applied biomechanics, motor development, pulmonary responses to exercise, postural control in the elderly, dynamic regulation of blood pressure, assessment and management of sports-related concussions, the effects of therapeutic modalities on the treatment of athletic injuries, and the effects of hyperbaric oxygen on the treatment of diseases.

Special Programs and Opportunities

SMART HOSPITAL™

Associate Dean for Simulation and Technology: Dr. Judy LeFlore

The Smart Hospital™ is a simulated hospital environment complete with state-of-the-science equipment and furnishings. In this facility, students interact with and provide care to a full array of simulated patients who occupy the Emergency Department, ICU, Labor and Delivery suite, pediatric unit, Neonatal ICU, adult medical/surgical beds and the resuscitation room for large team training. Students learn utilizing simulation technology including full body interactive patient simulators, computerized scenario-based programs and individual trainers for specific skills.

The "patients" who populate our Smart Hospital are life-sized computerized manikins that actually interact with the learners. Patients include infants, children, adults, and even a mother in labor who goes through the labor process and delivers a newborn. Some manikins are static but others are interactive and responsive—they can speak and breathe, have heart sounds and lung sounds, and can progress through the various stages of numerous clinical states from birth through death. In addition, we have specially trained actors who can serve as patients or family members in clinical teaching scenes. In each clinical scenario, the students are exposed to situations and changes in patient conditions, both subtle and obvious, that they will experience in actual practice. With repeated exposure to these situations, students develop a deeper understanding of clinical conditions and become more adept at critical and clinical thinking. With this foundation, our students move more quickly from novice to expert and in so doing enhance the quality of patient care they provide.

LEARNING RESOURCES CENTER

Executive Assistant to the Dean: Lalita Thompson

The mission of the Center is to provide both undergraduate and graduate students support to develop, refine, and apply knowledge in the clinical practice of skills. Computer labs are available for student use. Faculty members are provided resources to support classroom instruction, clinical learning activities, and scholarly endeavors.

CENTER FOR RESEARCH AND SCHOLARSHIP

Associate Dean: Dr. Christopher Ray

Scholarship is an essential component of the professional role in the College of Nursing. The Center provides support services to faculty and students: identifying funding sources; developing competitive proposals; writing grant applications; retrieving literature; collecting, entering and analyzing data; and disseminating research results and other scholarly products. Collaborative relationships for research with Metroplex health care agencies are in place.

CENTER FOR HISPANIC STUDIES IN NURSING AND HEALTH

Director: Dr. Margarita Trevino

The Center is dedicated to fostering an understanding between health care professionals and people of Hispanic origin for the purpose of increasing understanding of health and healing through research of individual experience, cultural meanings, and the structure of institutions as important variables influencing health outcomes. The Center is also committed to the provision of educational programs and services which will assist health care providers to gain the necessary knowledge and skills to deliver increasingly culturally sensitive and competent care. The Center promotes interdisciplinary and interuniversity collaboration as a strategy for development of resources to solve or deal with bicultural issues facing health care professionals.

RURAL HEALTH OUTREACH PROGRAM

Director: Sylvia Rawlings

The purpose of the Center is to provide appropriate, affordable, accessible continuing education to the nursing staffs of acute care and psychiatric hospitals, long term care facilities, home health agencies, and other health care facilities in the rural communities of North Central Texas.

CENTER FOR HEALTHY LIVING AND LONGEVITY

Director: Dr. Christopher Ray

The Department of Kinesiology's Center for Healthy Living and Longevity provides a multidisciplinary approach to improving health and functioning throughout the lifespan. Research and education initiatives focus on keeping senior citizens active, decreasing the incidence of sedentary-related diseases (diabetes, cardiovascular disease, osteoporosis, obesity, etc.), and the assessment and management of concussions. Contact: Dr. Christopher Ray, Director, 817.272.0082, chrisray@uta.edu.

Nursing - Graduate Programs

MSN Program

MSN ADMISSIONS REQUIREMENTS (ALL MSN PROGRAMS)

The applicant for the Master of Science in Nursing (MSN) degree must meet the general requirements of Graduate Admissions and have a Bachelor of Science in Nursing (BSN) degree from a regionally accredited program and accredited by the Accreditation Commission for Education in Nursing (ACEN) or the Commission on Collegiate Nursing Education (CCNE) or proof of equivalent education at a foreign institution. Individual consideration may be given to applicants who hold a BSN degree from non-accredited programs.

Potential students must also possess a current unencumbered RN license from Texas, a compact state, or other state board of nursing.

The College of Nursing and Health Innovation admission criteria are detailed in the MSN Graduate Admission table below. The admission status options are described below.

Unconditional Admission

Applicants must meet all criteria for unconditional admission.

Probationary Admission

Criteria for probationary admission status and minimum GRE scores are listed in the MSN Graduate Admission table below. When admitted on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program. Probationary students are admitted for part-time study only.

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission.

Deferred Status

Deferred decision is granted when a file is incomplete or when a denial decision is not appropriate.

Denial of Admission

An applicant will be denied admission if they have less than satisfactory performance on a majority of admission criteria listed in the MSN Admission Table.

MSN GRADUATE ADMISSION TABLE

Admission Criteria	Unconditional	Probationary
GPA on last 60 hours of Undergraduate Program (BSN) (as calculated by Graduate Admissions of UTA)	3.0 ¹	2.8-2.99 ^{2,3,6}
GRE ⁴ Two highest GRE scores will be used in admission process	Not required	Verbal: 430 or 149 ² or Quantitative: 430 or 141 or Analytical Writing: 3.5 Analytical: 430
TSE (Test of Spoken English) or TOEFL (Test of English as a Foreign Language) or IELTS (International English Language Testing System)	TSE: Score of 40 or higher or TOEFL: Minimum of 550 on paper-based test, 213 on computer-based test, or 79 on the internet-based test and achieve the following minimum scores on subtests: Writing, 22; Speaking, 21; Reading, 20; and Listening, 16 or IELTS minimum score of 7.0	
Clinical Experience	1. Two years clinical experience as a Registered Nurse (RN) within the previous five (5) years is strongly recommended and preferred for all programs. Applicants without 2 years clinical experience should contact the College of Nursing and Health Innovation, Office of Enrollment and Student Services prior to making application.	

	2. For all high-acuity MSN NP Programs, (Acute Care Pediatrics, Neonatal and Adult Gerontology Acute Care), two years clinical experience as an RN in an acute care setting within the previous five (5) years is required. (Evaluated by the Associate Dean and/or designee.)
	3. For the MSN in Nursing Education program, 2 years clinical experience as an RN is required.
	4. International students are required to have two years RN clinical experience in a United States (or equivalent) health care system.
200 word Essay re: Career goals	Evaluated by Associate Dean or designee
Current and unencumbered RN License from Texas, a compact state, or other state board of nursing ⁵	Evaluated by Associate Dean or designee
Neonatal Resuscitation Program (NRP)	Required only for the Neonatal Nurse Practitioner Program.
Pediatric Advanced Life Support (PALS)	Required only for the Acute Care Pediatric Nurse Practitioner Program; Neonatal NP applicants may complete the NRP (Neonatal Resuscitation Program).
BSN from ACEN or CCNE Accredited Program	Evaluated by Associate Dean or designee
Undergraduate Level Statistics	Minimum grade of "C"
Cardiopulmonary Resuscitation	Required for all programs.

- 1 Minimum undergraduate GPA requirement for unconditional admission is a 3.0 on a 4.0 scale as calculated by Graduate Admissions.
- 2 If a person does not meet probationary admission requirements, he or she may request review by a Committee of the Graduate Nursing Faculty. The Committee may request completion of coursework and/or additional information to support the individual's petition for admission.
- 3 If admitted on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program. Probationary students are admitted for part-time study only.
- 4 Verbal, Quantitative, and Analytical Writing GRE scores will be reviewed and the two highest scores will be considered for the admission process.
- 5 All graduate nursing students must have an unencumbered Registered Nursing License as designated by the Board Of Nursing (BON) for clinical courses. It is imperative that any student whose license becomes encumbered by the BON must immediately notify their department chair. The complete policy regarding encumbered RN license is available online at: <http://www.uta.edu/nursing/MSN/unencumbered>
- 6 For applicants with an undergraduate GPA of 2.8-2.99 on the last 60 hours, but have completed a graduate level degree following the BSN, the GRE is not required.

References or Letters of Recommendation are not required for admission into the MSN Program.

ADMISSION POLICY FOR INDIVIDUALS INELIGIBLE TO CONTINUE GRADUATE STUDY AT ANOTHER UNIVERSITY

If potential students are ineligible to continue graduate study at another university and apply to The University of Texas at Arlington MSN Program, they may request review by a Committee of the Graduate Nursing Faculty.

The committee will make their recommendation for admission or denial based on the following:

1. Admission materials (GPA on the last 60 hours of BSN, graduate GPA, GRE scores, grade of C or higher on statistics, essay, and English language score if applicable);
2. A narrative statement from the potential student providing a rationale for their ineligibility at another university; and
3. A plan for successful study at UT Arlington.

The admission committee reserves the right to ask for additional materials as needed. The admission committee will make its recommendation of admission or denial to the Associate Dean, Graduate Nursing Programs.

DNP Program

The Doctor of Nursing Practice Program builds on a foundation of previous advanced practice education in nursing and prepares advanced practice nurse providers who demonstrate leadership, clinical expertise and innovation in problem recognition and resolution. The required courses identified

for the DNP curriculum meet the American Association of Colleges of Nursing Essentials for Doctoral Education for Advanced Nursing Practice (AACN, August 2006).

DNP ADMISSIONS REQUIREMENTS

Please note: Admission requirements for the DNP program will change in May of 2016. To view the new requirements, visit <http://www.uta.edu/nursing/dnp/>

The applicant for the Doctor of Nursing Practice (DNP) degree must meet the general requirements of Graduate Admissions and have a Master's Degree in Nursing as a Nurse Practitioner (NP) or a Post Master's with NP preparation from a program accredited by the Accreditation Commission for Education in Nursing (ACEN) or the Commission on Collegiate Nursing Education (CCNE) or proof of equivalent education at a foreign institution.

Potential students must also possess a current unencumbered APRN-Nurse Practitioner license from Texas a designated compact state, or other board of nursing for admission.

The College of Nursing and Health Innovation admission criteria are detailed in the DNP Graduate Admission Table below. The admission status options are described.

Unconditional Admission

Applicants must meet all criteria for unconditional admission.

Probationary Admission

Criteria for probationary admission status are listed in the DNP Graduate Admission Table. When on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission.

Deferred Status

Deferred decision is granted when a file is incomplete or when a denial decision is not appropriate.

Denial of Admission

An applicant will be denied admission if they have less than satisfactory performance on a majority of admission criteria listed in the DNP Graduate Admission Table.

DNP GRADUATE ADMISSION TABLE

Admission Criteria	Unconditional	Probationary
GPA on master's course work or Post-Master's NP Certificate	3.5 on a 4.0 scale	3.0-3.49 ¹
GRE	Not required.	Not required.
TSE (Test of Spoken English) or TOEFL (Test of English as a Foreign Language) or IELTS (International English Language Testing System)	TSE: Score of 40 or higher or TOEFL: Minimum of 550 on paper-based test, 213 on computer-based test, or 79 on the internet-based test and achieve the following minimum scores of subtests: Writing, 22; Speaking, 21; Reading, 20; and Listening, 16 or IELTS minimum score of 7.0.	
Statistics course	Graduate level with a minimum grade of B.	
Current Vita or Resume	Evaluated by Program Director or Admissions Committee	
Written statement of career vision/goals	Evaluated by Program Director or Admissions Committee	
Currently unencumbered RN license and APRN license.	Evaluated by Program Director of DNP Program	
Current National certification as an NP	Evaluated by Program Director of DNP Program	
Current NP Practice	Evaluated by Program Director or Admissions Committee	
Current CPR, ACLS, PALS or NRP as required for their Specialty Area	Evaluated by Program Director of DNP Program	

- 1 Students admitted on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.
- 2 All DNP Program students must have an unencumbered APRN license as designated by the Board Of Nursing (BON) for clinical courses. It is imperative that any student whose license becomes encumbered by the BON must immediately notify the Associate Dean for the Graduate Nursing Programs. The complete policy regarding encumbered RN license is available online at: <http://www.uta.edu/nursing/MSN/unencumbered>

ADMISSION POLICY FOR INDIVIDUALS INELIGIBLE TO CONTINUE GRADUATE STUDY AT ANOTHER UNIVERSITY:

If potential students are ineligible to continue graduate study at another university and apply to The University of Texas at Arlington DNP Program, they may request to be reviewed by a Committee of the Graduate Nursing Faculty that includes faculty teaching in the DNP Program.

The Admissions Committee will make their recommendation for admission or denial based on the following:

1. Admission materials (GPA on the MSN or Post-Master's certificate, grade of B or higher on graduate statistics, current vita, written statement of career vision, and English language score if applicable);
2. A narrative statement from the potential student providing a rationale for their ineligibility at another university; and
3. A plan for successful study at UT Arlington.

The committee reserves the right to ask for additional materials as needed. The committee will make its recommendation of admission or denial to the Associate Dean, Graduate Nursing Programs.

PhD Program

The Doctor of Philosophy in Nursing Program is built on a foundation of prior nursing education and prepares the student for original research and theory development. The PhD in Nursing Program is designed to prepare nurse scientists to meet the health needs of a rapidly changing and culturally diverse society. The central focus of the PhD in Nursing Program is to prepare researchers and teachers who understand how communities evolve, interact, change and how they prescribe, understand and sanction health, illness and health seeking behaviors.

The PhD in Nursing Program offers two routes of entry: BSN-PhD or MSN-PhD. Potential students should refer to admission criteria below.

PHD ADMISSION REQUIREMENTS

The applicant for the Doctor of Philosophy in Nursing (PhD) degree must meet the general requirements of Graduate Admissions and have a Bachelor's degree in Nursing (BSN-PhD entry) or a Master of Science in Nursing degree (MSN-PhD entry) from a program accredited by the Accreditation Commission for Education in Nursing (ACEN) or the Commission on Collegiate Nursing Education (CCNE) or proof of equivalent education at a foreign institution. Applicants must submit to the Office of Graduate Admissions official transcripts from each college or university attended.

PHD ADMISSION STATUS OPTIONS

The College of Nursing admission criteria are detailed in the PhD Program Requirements table below.

Unconditional Admission

Applicants must meet all criteria for unconditional admission

Probationary Admission

Criteria for probationary admission status are designated in the PhD Program Requirements table below. When on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements.

Deferred Status

Deferred decision is granted when a file is incomplete or when a denied decision is not appropriate.

Denial of Admission

An applicant will be denied admission if he/she has less than satisfactory performance on a majority of admission criteria listed in the table below. The PhD Admissions Committee will make a recommendation for denial.

PHD PROGRAM IN NURSING ADMISSION REQUIREMENTS

Note: A student on probation must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.

Admission Criteria	Unconditional	Probationary
Bachelor's Degree in Nursing (BSN-PhD entry) or Master's Degree in Nursing (MSN-PhD entry) from a National League for Nursing Accrediting Commission (NLNAC) or American Association of Colleges of Nursing's Commission on Collegiate Nursing Education (CCNE) accredited College of Nursing or equivalent.	Evaluated by Admissions Committee	Evaluated by Admissions Committee ¹
GPA on all bachelor's coursework (BSN-PhD) or on master's coursework (MSN-PhD).	3.0 GPA on a 4.0 scale as calculated by Graduate Admissions	3.0 GPA on a 4.0 scale as calculated by Graduate Admissions ¹
GRE for BSN-PhD entry; GRE waived for MSN-PhD entry	GRE with a total minimum score of: 500 or 153 on verbal; 500 or 144 on quantitative; 500/4 on analytical/analytical writing scores	Verbal: 400-490 or 146-152; Quantitative: 400-490 or 140-143; Analytical Writing: 3.0-3.5; Analytical: 400-490; (Based on GPA/GRE ratio) ¹
For international students, TSE (Test of Spoken English) or TOEFL (Test of English as a Foreign Language) or IELTS (International English Language Testing System)	TSE: Score of 40 or higher or TOEFL: Minimum of 550 on paper-based test, 213 on computer-based test, or 79 on the internet-based test and achieve the following minimum scores of subtests: Writing, 22; Speaking, 21; Reading, 20; and Listening, 16. IELTS minimum score of 7.0.	TSE: Score of 40 or higher or TOEFL: Minimum of 550 on paper-based test, 213 on computer-based test, or 79 on the internet-based test and achieve the following minimum scores of subtests: Writing, 22; Speaking, 21; Reading, 20; and Listening, 16. ¹ A student on probation must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.

² A new goal statement and a new interview are required with every application.

Health Insurance Coverage

All UT Arlington nursing students enrolled in clinical course(s) will be required to provide verification of medical insurance coverage that includes Emergency Department evaluation and follow-up treatment for needle-stick and blood borne disease exposure. This mandatory clinical requirement has been authorized by The University of Texas System Board of Regents.

As such, UT Arlington will not cover initial and follow up treatment for needle-stick injuries and/or exposure to blood borne diseases which may occur while students are enrolled in clinical courses.

While the UT Arlington College of Nursing and Health Innovation recognizes the financial impact this clinical requirement presents for students, we also support the need for students to have health coverage for sudden illness, accidents, emergencies and exposure treatments that may occur in the clinical setting in a variety of clinical agencies.

MSN Degree Requirements

A degree plan is developed for the student upon admission to the MSN Program. Students are required to have any changes in degree plan approved by a Graduate Academic Advisor prior to registration. A minimum of 36 semester hours, thesis or non-thesis option, is required for the degree. Elective coursework that supports the selected nursing study area must be approved by the Graduate Academic Advisor prior to registration. Students electing the thesis option do not have elective course requirements.

All non-thesis and thesis candidates shall pass a practicum course at the end of their coursework. All thesis candidates for the degree of Master of Science in Nursing shall present the completed thesis in a final oral examination.

MSN students must complete hours in required courses, nursing specialty area, functional role, and elective(s) depending on specific plan.

MSN REQUIRED COURSES - ALL SPECIALITY AREAS

NURS 5327	EXPLORATION OF SCIENCE AND THEORIES FOR NURSING	3
NURS 5366	PRINCIPLES OF RESEARCH IN NURSING	3
NURS 5367	EVIDENCE BASED PRACTICE	3
Total Hours		9

MSN NURSING SPECIALTY AREAS

Each student must complete the required courses in at least one nursing specialty area and functional role.

Nursing Administration

Specialty Requirements

RN TO MSN (P. 488)

The RN to MSN program will enable outstanding undergraduate students who are registered nurses to satisfy degree requirements leading to a master's degree (MSN) in either Nursing Administration or Nursing Education while completing their undergraduate studies through the RN to BSN online program. The RN to MSN online program is designed to encourage outstanding registered nurses to complete a master's degree at UT Arlington. It is also intended to decrease the cost of the combined degree and save time for students seeking the BSN and MSN degrees. Students who are successful in the three indicator courses will be allowed to take two designated graduate courses that can be used to replace 6 hours of upper division electives in the BSN program. The 6 hours of graduate courses will be counted toward both degrees.

Qualifications: Registered nurses holding an associate's degree in nursing may apply for the RN to MSN program. All applicants must meet the admission criteria prior to being accepted into the program, including completion of all non-nursing courses required for the BSN with the exception of the 6 hours of electives.

Admission Criteria: The criteria for unconditional admission to the RN to MSN require that applicants meet the standards for graduate admissions as follows:

- Current licensure as registered nurse (RN)
- Two-years of experience as an RN prior to beginning the program
- Undergraduate prerequisite courses completed
- Admission GPA of 3.0 or higher on prerequisite courses

Denial: Students who are not admissible under the conditions specified above shall be denied admission to the Fast Track program. However, they may apply to the RN to BSN program via the regular application process, paying all required fees and meeting all admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the program to which application is made. Upon completion of the RN to BSN program, the graduate can apply for the master's program in nursing through the regular application process and must meet all admission criteria.

Continuing in the RN to MSN program requires a 3.3 GPA on the three indicator courses. Students who make a 3.3 GPA in the indicator courses and maintain 3.0 each semester are eligible to take the graduate courses when the student is within 12 hours of completing BSN courses. The student completes a short form to indicate the desire to continue in the RN to MSN program and take the graduate courses. There is no need to apply for graduate admission; the graduate application fee and essay are not required. The hours required for them to complete their BSN degree will be adjusted to include the two MSN courses that are replacing upper division electives.

When students complete their undergraduate degree requirements, they may apply for conferral of the BSN degree, while continuing in the RN to MSN program. They will subject to the usual fees for graduation and diplomas. When the student has applied for conferral of his/her undergraduate degree, the responsibility for advising the student will be transferred to a graduate advisor within the College.

ELECTIVES/INDEPENDENT STUDY

Elective courses may be taken in Nursing or other departments of the University. Electives can also be transferred from other universities with the approval of a Graduate Advisor. Independent study offers the student the opportunity to explore topics of special interest.

DNP Degree Requirements

A degree plan is developed for the student upon admission to the DNP Program. Students are required to have any changes in planned program approved by the DNP Graduate Advisor prior to registration. The DNP Program includes 33 semester hours of required courses and 3 semester hours of elective. Students will select 3 semester hours of electives with the guidance of the graduate advisor to support and/or extend their practice. Students will complete a Scholarly Project and Clinical Practica.

DNP REQUIRED COURSES

NURS 6302	ISSUES IN STUDYING THE HEALTH OF CULTURALLY DIVERSE AND VULNERABLE POPULATIONS	3
NURS 6320	LEADERSHIP IN HEALTH CARE SYSTEMS	3
NURS 6321	EPIDEMIOLOGY	3
NURS 6323	PRACTICE SCHOLARSHIP	3

NURS 6382	HEALTH CARE POLICY	3
NURS 6620	DNP PRACTICUM I	6
NURS 6621	DNP PRACTICUM II	6
Required Elective		3
Total Hours		36

ELECTIVES/INDEPENDENT STUDY

- Elective courses may be taken in Nursing or other departments of the University.
- Independent study offers the student the opportunity to explore topics of special interest.

PhD Degree Requirements

Students are required to have each semester's planned program approved by the Graduate Advisor prior to registration. A minimum of 48 semester hours is required for the degree: 30 hours of core courses, 12 hours of Research Tools, 3-9 hours of individualized area of study, and 9 hours of dissertation.

BSN-to-PhD Students will complete all PhD requirements.

PHD REQUIRED COURSES (CORE)

NURS 6301	THEORETICAL EVOLUTION IN SCIENCE	3
NURS 6302	ISSUES IN STUDYING THE HEALTH OF CULTURALLY DIVERSE AND VULNERABLE POPULATIONS	3
NURS 6303	CULTURE OF SCIENCE	3

¹ Graded P/R/F

DIAGNOSTIC EVALUATION

Before the completion of the first 18 hours beyond appropriate master's level coursework to assess progress and potential for completion

ACADEMIC STANDING

To graduate from the PhD program, the student must have a 3.0 GPA.

1. Student who does not earn at least a B in a course or independent study is required to submit to graduate advisor an evaluation of his or her engagement in the course, reason for less than satisfactory performance, and plan to acquire knowledge and skills to continue.
2. Student who earns a second course or independent study grade that is C or lower will be dismissed from the program

COMPREHENSIVE EXAMINATION

Examination scheduled no earlier than during the last nine hours of coursework. It may also be scheduled after all coursework and research tools are completed. Guidelines for the comprehensive examination are available in the PhD Student Handbook.

PROPOSAL DEFENSE

Dissertation Committee reviews the study proposal and meets with the student privately to approve or not approve the proposal.

DISSERTATION DEFENSE

Open meeting during which student presents study findings and responds to questions posed by the dissertation committee and other attendees. Successful defense of the dissertation is the final step toward completion of the doctoral degree.

BSN-to-PhD Master's Level Courses

Students accepted into the BSN-to-PhD entry option will work with an advisor to develop individualized degree plans based on their career goals and research interests. Students will complete 12 hours of core Master's courses and an additional 10-18 hours of Master's coursework based on their area of focus.

CORE MASTER'S COURSES TAKEN BY ALL BSN-TO-PHD STUDENTS

NURS 5327	EXPLORATION OF SCIENCE AND THEORIES FOR NURSING	3
NURS 5370	INDEPENDENT STUDY IN NURSING	3
NURS 5367	EVIDENCE BASED PRACTICE	3
NURS 5366	PRINCIPLES OF RESEARCH IN NURSING	3

10-18 additional hours of Master's coursework in focus area

Total Hours

12

Post-Master's Nurse Practitioner Certificates

Post-Master's Certificate students must complete the required courses for the nursing specialty area and functional role. The nurse practitioner certificate enables individuals with a Master's Degree in Nursing to take a national certification exam in their area of specialization and to be recognized by the Board of Nursing as an Advanced Practice Registered Nurse.

- Adult Gerontology Acute Care Nurse Practitioner
- Acute Care Pediatric Nurse Practitioner
- Adult Gerontology Primary Care Nurse Practitioner
- Family Nurse Practitioner
- Neonatal Nurse Practitioner
- Primary Care Pediatric Nurse Practitioner
- Family Psychiatric Mental Health Nurse Practitioner

Master's Nursing Certificates

Two certificates in Nursing Education are available through the College of Nursing.

NURSE EDUCATOR

A 6-hour certificate that includes two education courses.

NURS 5302	CURRICULUM DEVELOPMENT AND EVALUATION	3
NURS 5309	TEACHING / LEARNING THEORIES, STRATEGIES, AND EVALUATION	3
Total Hours		6

ADVANCED NURSE EDUCATOR ROLE

A 12-hour certificate that includes four educator courses.

NURS 5302	CURRICULUM DEVELOPMENT AND EVALUATION	3
NURS 5309	TEACHING / LEARNING THEORIES, STRATEGIES, AND EVALUATION	3
Select two of the following:		6
NURS 5308	NURSING INFORMATICS	
NURS 5329	ROLE OF THE NURSE EDUCATOR	
NURS 5360	SIMULATION APPLICATION IN NURSING	
Total Hours		12

Nursing - Undergraduate Programs

Bachelor of Science in Nursing Degree

The undergraduate nursing degree consists of two programs, BSN and RN to BSN. We offer two delivery options: traditional in-the-seat and online (off campus). The off campus Academic Partnership Program (AP BSN and AP RN-BSN) is an online format developed by UT Arlington's College of Nursing to serve nurses in Texas and beyond by offering high quality, affordable and convenient nursing programs. As there are some differences in policies between the programs, there may also be differences between the traditional program and the online program; those will be noted throughout the catalog.

The faculty of the College of Nursing takes academic honesty and ethical behavior very seriously. Nurses are entrusted with the health, safety and well-being of the public. Students found guilty of academic dishonesty will be punished to the full extent permitted by the rules and regulations of UT Arlington.

BSN (PRELICENSURE) PROGRAM

This is a four-year program consisting of nursing courses, university core courses and other prerequisite required courses. Upon successful completion of the program, the student is awarded the Bachelor of Science in Nursing degree and is eligible to take the National Council Licensure Examination (NCLEX) for licensure as a Registered Nurse. This is offered as an on-campus or off-campus (on-line) option.

RN TO BSN PROGRAM

This program is designed for Registered Nurses who have completed an accredited Associate Degree or Diploma nursing program. Full-time students may complete the upper division nursing courses in one academic year. Upon successful completion of the program, the student is awarded the Bachelor of Science in Nursing degree. This is offered as an on-campus or off-campus (on-line) option.

RN TO MSN PROGRAM (NURSING ADMINISTRATION OR NURSING EDUCATION)

The RN to MSN program is an option for RNs who want to move seamlessly between the RN to BSN program and the MSN program. The university calls this a Fast Track program. The Fast-Track RN to MSN program will enable outstanding undergraduate students who are registered nurses to satisfy degree requirements leading to a master's degree (MSN) online in either Nursing Administration or Nursing Education while completing their undergraduate studies through the RN to BSN online program.

UNDERGRADUATE OUTCOMES - FOR THE BSN DEGREE

The University of Texas at Arlington Undergraduate Nursing Program prepares graduates to provide professional nursing care to persons/clients (individuals, families, groups, and communities) in diverse settings through the roles of provider of care, coordinator of care, and member of the profession.

On completion, the graduate will be able to:

- Apply the art and science of nursing using current evidence in the delivery of competent, culturally sensitive, developmentally appropriate holistic care.
- Utilize analytical, systematic, and critical reasoning for clinical judgment and nursing decision-making.
- Demonstrate accountability and responsibility for: optimal nursing care, legal and ethical standards, lifelong learning, professional development, promoting the nursing profession, and participating as a citizen in society.
- Collaborate and communicate respectfully and effectively with persons/clients and interdisciplinary teams using oral, nonverbal, written and electronic communication to promote and maintain optimal health outcomes to persons/clients.
- Demonstrate ethical behaviors and conflict management skills that inspire others and create effective working relationships to shape and implement change.
- Coordinate human and material resources in providing comprehensive, efficient, and cost-effective care to persons/clients.
- Articulate the importance of active and intentional life-long learning that includes self-reflection and awareness.
- Utilize standards of practice to provide safe nursing care in all patient care settings with an awareness of one's role in preventing errors and promoting quality improvement.
- Access and utilize information and computer sciences to perform nursing functions.

BSN Prelicensure Program

ESSENTIAL PERFORMANCE STANDARDS FOR ADMISSION AND PROGRESSION IN THE COLLEGE OF NURSING

It is the philosophy of the University of Texas at Arlington College of Nursing (UTACON) that the baccalaureate program is designed to prepare a competent, self-directed, general practitioner of nursing who can assume increasing responsibility and leadership in the delivery of nursing care. In consideration of the preparation of a general practitioner, all individuals who apply for admission and are enrolled in the undergraduate program must be able to perform the essential functions of a student of nursing.

The College of Nursing has identified areas of essential functioning: communication, hearing, visual and motor. The student enrolled in the program must demonstrate mastery of components comprising each of the four areas. Because providing direct patient care is physically demanding, students need to meet the physical requirements of a staff nurse in the same setting in which they are completing a clinical rotation.

Qualified applicants are admitted without discrimination with regard to race, color, national origin or ancestry, gender, age, religion, sexual orientation, veteran status or disability (reasonable accommodations will be made within the Americans with Disabilities Act guidelines).

More detailed information is available on the nursing website www.uta.edu/nursing in the Student Handbook.

ADMISSION REQUIREMENTS

Students may be admitted as freshmen or may transfer to UT Arlington upon meeting the admission or transfer requirements established by the University. Students who designate themselves as nursing majors will be advised by the College of Nursing in Undergraduate Student Services. Official transcripts must be submitted to the UT Arlington Office of Admissions, Records and Registration.

NOTE: All freshmen are advised by University College.

BSN students desiring admission to the sequence of upper-division nursing courses leading to the degree of Bachelor of Science in Nursing must:

- Submit College of Nursing application and official transcripts by January 5 for following fall semester or June 1 for following spring semester.
- Complete with a C or better all specified nursing prerequisites and pre-nursing courses (FS-NURS 1300 Introduction to Professional Nursing; N3366 Pathophysiologic Processes: Implications for Nursing, and N3365 Pharmacology in Nursing Practice) prior to starting Junior I nursing courses. (See lower-division course list for details.)
- Have a minimum of 48 Freshman/Sophomore prerequisites/core credits prior to the Junior I semester.
- Complete 12 or more prerequisite science credit hours at time of application.
- Have 2 GPAs calculated: science and prerequisite.
- Have minimum science and prerequisite GPAs of 2.75.
- Completion of designated sections of the Health Education Systems, Inc. Admissions Assessment Exam (HESI A2) with the following minimum scores:
 - Grammar: 75%
 - Math 75%, however, if accepted to the program, students scoring between 75-79% on the math portion of the HESI A2 will be required to complete a math remediation program prior to beginning the program.
 - Reading Comprehension: 75%
 - Vocabulary: 75%
- Learning Styles and Personality are also required; however, the results are not part of the application criteria.

Admission to Junior level (upper-division course work) is by ranking order based on space available.

Additional consideration will be given to applicants who complete the following by the application deadline:

- Thirty (30) or more required College of Nursing prerequisite lower division credit hours earned at UT Arlington
- Twelve (12) or more required College of Nursing prerequisite lower-division natural science credit hours earned at UT Arlington.
- Nine (9) hours of UT Arlington Honors College courses (Must be active in Honors College) (On-campus only)
- Nine (9) hours of UT Arlington ROTC courses (Must be active in ROTC) (On-campus only)
- Previous baccalaureate, masters or doctorate degree earned in the United States.

NOTE: Students entering the Academic Partnership BSN off-campus program must complete all prerequisites including the upper division elective prior to beginning the program. Priority will be given to off-campus AP applicants employed by partner hospital systems offering clinical sites during that semester of admission. Partner hospital clinical sites vary each semester. To receive off campus AP priority, applicant must be employed at the time of ranking and the first day of class. Employment at a partner hospital is not a guarantee of admission into the upper-division nursing program.

LOWER DIVISION COURSES

Students must complete all nursing prerequisites and Sophomore level nursing courses with a C or better. A grade of D or lower in a prerequisite course indicates unsatisfactory preparation for further nursing education. Any such course in which a D or lower is received must be repeated before enrolling in any nursing course. This requirement is subject to the Two-Attempt Rule. Under this policy, each course taken at UT Arlington and/or any other approved institution may be attempted a maximum of two times to earn a passing grade. By the second attempt a grade of "C" or better must be earned.

- Withdrawals (W) are exempt from this policy
- Any non-passing grade is valid for a five year period. At the conclusion of five years, a non-passing grade is no longer considered an attempt.

CRITERIA FOR READMISSION OF STUDENTS

Students who withdraw from the UT Arlington College of Nursing Program for more than one semester in good standing who wish to return to complete the program must submit a written request for readmission to Undergraduate Student Services (USS) by the following deadlines:

Returning spring –November 15

Returning fall- April 15

- Readmission is dependent upon space availability.
- A student is eligible for readmission to the program only once.
- If a clinical course is to be repeated, the student must repeat both the theory and clinical components of the course.
- Student must repeat the drug screening process.

Criteria for Readmission:

One semester:

- All of requirements listed above plus:
- Completion of a clinical skills assessment at the Smart Hospital™. This assessment will be completed no later than three weeks prior to the start of the semester in which the student is planning to return. The assessment will focus on the skills associated with the last clinical course completed. Input related to skills to be assessed may be sought from faculty in the previous course(s) completed. Should clinical deficiencies be identified, Smart Hospital™ or other designated faculty will remediate clinical skill areas that are questionable or inadequate and provide the results to the lead teacher of the course the student is scheduled to enter. Failing to demonstrate adequate clinical skills after three attempts will result in the student being required to retake the last clinical course taken to re-establish clinical competency.
- If the student is in the AP BSN program, he/she will be required to come to the UT Arlington campus to complete the special skills assessment.

Two Semesters:

- All of requirements listed above plus:
- Satisfactory scores on previous HESI exams. Student must take NURS 2232 if they score below 850 on more than one end of course HESI.
- As the school adopts standardized tests, satisfactory scores covering previous nursing courses must be achieved (i.e. mid-curricular tests).
- Repeat criminal background check if more than one year.

More than two semesters:

- Not eligible for readmission. Student must apply for admission as a beginning student.

TOEFL REQUIREMENT

Applicants must receive a minimum score, as defined by the University, on the Test of English as a Foreign Language (TOEFL) if the applicant's native/first language is not English and if he or she does not hold a bachelor's or higher degree from an accredited U.S. institution. The exam is required for admission to the College of Nursing even if the student has met one of the stated University exemptions for the TOEFL.

Applicants who have graduated from secondary schools or colleges in the following countries are exempt from the TOEFL: Anguilla, Antigua, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (except Quebec), Cayman Islands, Dominica, Grenada, Grand Cayman, Guyana, Ireland, Jamaica, Liberia, Montserrat, New Zealand, Sierra Leone, St. Kitts and Nevis, St. Lucia, St. Vincent, Trinidad/Tobago, Turks and Caicos Islands, and United Kingdom.

Students who are not exempt based on the countries listed above, but who can provide documentation of attendance and graduation from a secondary English speaking school in their native country or the US, will be exempt from the requirement.

TRANSFER FROM ANOTHER NURSING PROGRAM

Nursing transfer students are defined as those students who have successfully completed prerequisite courses with a C or above and Junior I courses for the BSN Program: Holistic Health Assessment and Clinical Nursing Foundations at another college or university. Students who have not completed the required courses will be ranked with the incoming junior class. Admission as a transfer student to the College of Nursing is contingent upon available space. Transfer students must attend orientation. Students may not transfer into the AP BSN Program.

- Transfer students must transfer all nursing courses and the grade received from those courses.
- Minimum required HESI A2 scores as stated on the admission brochure.
- The student must submit a course syllabus and a content outline of the course(s) to Undergraduate Student Services. If the course is a clinical course, a list of nursing skills learned in the course(s) must also be submitted.
- The lead teacher in the course, using the Field of Study Criteria Guidelines and other criteria related to the course, will review courses provided by the student for substitution of UT Arlington courses. Faculty may request additional information to clarify their decision. The course is then accepted as a substitution for a core nursing course, as an elective, or denied.

Students must submit:

- Letter from previous school stating that the student is in good standing

Students must have:

- Minimum 2.75 GPA in the prerequisite natural science and prerequisite lower-division courses.
- No D's or F's in nursing courses
- Must meet application deadlines of:
 - April 1 - Fall Semester
 - October 1 - Spring Semester

Processing of the transfer procedure will not be initiated until the student has applied to the College of Nursing.

ORIENTATIONS

All Junior I BSN students and transferring students are required to complete the general orientation held prior to the fall and spring semesters.

Clinical orientation is mandatory for all BSN students, as established by the Dallas/Fort Worth Hospital Council. BSN students are required to complete Junior Level and Senior Level Orientation annually.

- BSN students - prior to Junior I clinical courses and Senior I clinical courses. Part-time and transfer students must attend annually.

HONORS DEGREE IN NURSING

Nursing students who wish to graduate with an Honors Degree in Nursing must be members of the Honors College in good standing. Students must complete the Nursing degree requirements and the requirements of the Honors College. Contact the College of Nursing Honors Coordinator for further information.

SPECIAL PARAPHERNALIA/EQUIPMENT REQUIREMENTS

All Nursing students entering the Undergraduate BSN pre-licensure program are required to have equipment that is required by health care settings in which students have practice experiences. A complete list of requirements is outlined in the College of Nursing Student Handbook at: <http://www.uta.edu/nursing/bsn-program/>.

All students enrolling in courses/programs must have access to a reliable computer, internet connection, and updated software that meet program specifications. A list of computer specifications is outlined on the College of Nursing website www.uta.edu/nursing.

Smart Phone or similar device highly recommended.

IMMUNIZATIONS

Persons accepted to the College of Nursing must be immunized or provide information reflecting immunization as required by the College of Nursing. Specific requirements are listed on the College of Nursing website www.uta.edu/nursing.

CERTIFICATION-CARDIOPULMONARY RESUSCITATION

Undergraduate nursing students are required to obtain American Heart Association Basic Life Support (BLSC) CPR for Healthcare Providers.

Evidence of current CPR certification is required during clinical course enrollment from admission to graduation. The CPR must be valid throughout an entire semester with a clinical. If the current card will expire during the semester, the student must retake the course and have a card that will not expire during the semester.

HEALTH INSURANCE COVERAGE

All UT Arlington nursing students enrolled in clinical course(s) will be required to provide verification of medical insurance coverage that includes Emergency Department evaluation and follow-up treatment for needle-stick and blood borne disease exposure. This mandatory clinical requirement has been authorized by The University of Texas System Board of Regents.

As such, UT Arlington will not cover initial and follow up treatment for needle-stick injuries and/or exposure to blood borne diseases which may occur while students are enrolled in clinical courses.

While the UT Arlington College of Nursing recognizes the financial impact this clinical requirement presents for students, we also support the need for students to have health coverage for sudden illness, accidents, emergencies and exposure treatments that may occur in the clinical setting in a variety of clinical agencies.

DRUG SCREEN POLICY

Confirmation of a positive drug screening will result in removal from clinical courses for a period of one calendar year. Upon returning to the program, random drug screenings will be conducted throughout the program. A second positive test will render the student ineligible to continue in the program.

Random and / or for cause drug screens are at the student's expense and must be conducted at the UT Arlington Health Center or a Quest Preferred site for Off-Campus Accelerated BSN students. Failure to undergo a drug screen on the designated day will result in immediate withdrawal from the nursing program.

CRIMINAL BACKGROUND SCREEN

A student with a positive criminal background screen will not be admitted into the program without a Declaratory Order from the Texas Board of Nursing stating that the individual has been granted permission to write the National Council Licensure Examination for Registered Nurses (NCLEX-RN Examination) upon completion of the requirements for graduation and payment of any required fees. Eligibility to take the NCLEX-RN Examination may be affected by any inaccuracies in the petition, and any subsequent violations of the Nursing Practice Act that may affect eligibility to sit for the examination or the later revocation of a license obtained through misrepresentation.

ELIGIBILITY TO WRITE THE NATIONAL COUNCIL LICENSURE EXAMINATION FOR REGISTERED NURSES (NCLEX RN) - DECLARATORY ORDERS

The Texas Board of Nursing (BON) has set out guidelines and criteria on the eligibility of persons with criminal convictions to obtain a license as a registered nurse. The BON may refuse to admit persons to its licensure examinations, may refuse to issue a license or certificate of registration, or may refuse to issue a temporary permit to any individual who has any criminal offense. Detailed information related to determining eligibility and required processes to determine eligibility for your specific circumstances is available from the Texas Board of Nursing and on their Web site (www.bon.state.tx.us (<http://www.bon.state.tx.us>)).

PROFESSIONAL LIABILITY INSURANCE

Nursing students are required to have evidence of professional liability insurance coverage for a minimum of \$1,000,000 limit each claim and \$3,000,000 limit aggregate. The charge for coverage will be assessed as a mandatory fee at the time of registration.

FEEES

Course fee information is available at www.uta.edu/fees. Additional costs beyond tuition, fees and books that may be incurred by a nursing student will include those items listed in the catalog under the Special Paraphernalia / Equipment Requirements and detailed on the College of Nursing website www.uta.edu/nursing. In addition, some clinical agencies charge a nominal fee for parking passes and utilizing their scrubs.

ORAL COMMUNICATION PROFICIENCY REQUIREMENT

Oral proficiency is recognized to be a critical component of providing safe nursing care. In addition to content-specific presentations in various nursing courses, all nursing students are required to communicate effectively with clients, members of the health care team, and faculty. Contact Undergraduate Program Director for more information.

E-MAIL ACCOUNTS

Each student will be provided a UT Arlington e-mail address. Official communications from the College of Nursing will be distributed to this e-mail address and Blackboard accounts required by many courses. Students will be held responsible for information distributed in this manner.

NURSING COURSE WITHDRAWAL POLICY

Students within the program, enrolled in an upper division NURS course, are permitted to drop the course one time. Upon attempting the course for the second time, the earned grade is retained. Students may drop no more than three upper division NURS courses during their undergraduate career.

Elective and pre-nursing courses are exempt from this policy but may be affected by the two attempt policy.

Exceptions to this policy may be entertained because of extraordinary non-academic circumstances.

MOVEMENT BETWEEN PROGRAMS

Students who have started the BSN traditional in-the-seat programs cannot move to the AP off-campus BSN program.

OFF CAMPUS AP BSN STUDENTS WHO DROP OR FAIL A COURSE

Students who either withdraw from or fail a Jr I AP-BSN course can repeat that course online the next time the course is offered for the same partner or at another partner hospital if space is available. Students who have not successfully completed Jr I courses cannot move to the on-campus program. If a student requests to move to the on-campus program, they will be placed in the pool of students applying for the next on campus program start date. Off campus AP students will be ranked along with the other applicants who are in the pool and will not be given preference because they had previously been accepted into the off campus AP-BSN program.

AP-BSN students who withdraw or fail a course in Jr II, Sr I, or Sr II can repeat the course online with the same partner hospital the next available time the course is offered, or at another partner hospital if space is available. If the student requests to move to the traditional, in-the-seat program, and they have successfully completed Junior 1 courses, they may do so if space is available in the classroom and clinical. Refer to the below order of preference for clinical placement guidelines.

- Students who seek readmission after withdrawing for any reason will be placed at the same partner site at the next admission date.
- If the partner is not providing a site when the student requests to return, the student who has withdrawn will be placed at another site dependent upon available space. (The site has filled all of their partnered seats and has un-partnered seats open)*
- Students who seek readmission after failing a course will be placed at the same partner site that next admission date.
- If the partner is not providing a site when the student requests to return, the student who has failed a course will be placed at another site dependent upon available space, (The site has filled all of their partnered seats and has an un-partnered seat open)*
- If no sites are available, the student will have to wait until a seat is available at a future admission date.
- Students who have completed Jr. 1, or above, and are wishing to move to the on-campus program will follow the guidelines in the "Student Movement" policy.

*If there are more students than seats available, the students will be placed in the order in which they request the move (first come, first placed).

CLINICAL COURSES

To pass a clinical course, the student must pass both the didactic and the clinical components of that course.

CLINICAL ATTENDANCE DURING SCHEDULED UNIVERSITY CLOSINGS

Some programs in the College of Nursing, such as the Off-Campus AP BSN Program, may require students to attend clinical on evenings, nights, weekends, or holidays. Students are expected to attend their assigned clinical rotation as scheduled, even when the University is otherwise scheduled for closure, i.e. Spring Break. This policy does not include inclement weather closings.

PROGRESSION

Students in the BSN Program will not be permitted to continue in the nursing program nor to enroll for additional courses if they:

- Receive a grade of D or F in more than one nursing course including Pathophysiology and Pharmacology or
- Receive any combination of grades of D or F on two attempts of the same course.
- Do not obtain a passing score on the HESI Comprehensive Exam
- The University grade replacement / exclusion policy is limited by the College of Nursing and is not applicable to nursing courses.

A student in the RN to BSN Program who earns a second D or F in a nursing course will be placed on probation. The student must earn a C or above in all subsequent courses in order to remain in the program.

REQUIRED TESTING

Students are required to take nationally normed tests throughout the Junior and Senior years of the BSN program and to make a satisfactory score on such tests. In the Senior year, students are required to take a comprehensive exam and to make a satisfactory score on such an exam prior to graduation.

RN to BSN Program

ESSENTIAL PERFORMANCE STANDARDS FOR ADMISSION AND PROGRESSION IN THE COLLEGE OF NURSING

It is the philosophy of the University of Texas at Arlington College of Nursing (UTACON) that the baccalaureate program is designed to prepare a competent, self-directed, general practitioner of nursing who can assume increasing responsibility and leadership in the delivery of nursing care. In consideration of the preparation of a general practitioner, all individuals who apply for admission and are enrolled in the undergraduate program must be able to perform the essential functions of a student of nursing.

The College of Nursing has identified areas of essential functioning: communication, hearing, visual and motor. The student enrolled in the program must demonstrate mastery of components comprising each of the four areas.

Qualified applicants are admitted without discrimination with regard to race, color, national origin or ancestry, gender, age, religion, sexual orientation, veteran status or disability (reasonable accommodations will be made within the Americans with Disabilities Act guidelines).

More detailed information is available on the nursing website www.uta.edu/nursing in the Student Handbook.

ADMISSION REQUIREMENTS

Students may be admitted or may transfer to UT Arlington upon meeting the admission or transfer requirements established by the University. Students who designate themselves as nursing majors will be advised by the College of Nursing in Undergraduate Student Services. Official transcripts must be submitted to the UT Arlington Office of Admissions.

Registered nurses desiring admission to this program must:

- Complete listed prerequisites with a minimum prerequisite GPA of 2.5
- Meet the TOEFL requirement (if applicable)
- Have a current license as an RN in the U.S.A.

CREDIT BY RN LICENSURE

Transcripts of RN students are evaluated with consideration of the Coordinating Board Field of Study Curriculum guidelines. Credit is given for all courses listed in the Field of Study Curriculum as transferable as well as any additional courses that may be applicable for transfer for a total of 28 hours.

Certain other conditions apply:

- If the student earned one D or F in a nursing course at another college or school of nursing, they will be admitted unconditionally. If the student earns a subsequent D or F at UT Arlington, he/she will be placed on probation. The student must earn a C or above in all subsequent courses in order to remain in the program.
- If the student has earned more than one D or F, but no more than two, in nursing courses at another college or school of nursing, the student will enter UT Arlington on a probationary basis. The student must earn a C or above in all subsequent courses at UT Arlington in order to remain in the program.

TOEFL REQUIREMENT

Applicants must receive a minimum score, as defined by the University, on the Test of English as a Foreign Language (TOEFL) if the applicant's native/first language is not English and if he or she does not hold a bachelor's or higher degree from an accredited U.S. institution. The exam is required for admission to the College of Nursing even if the student has met one of the stated University exemptions for the TOEFL.

Applicants who have graduated from secondary schools or colleges in the following countries are exempt from the TOEFL: Anguilla, Antigua, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (except Quebec), Cayman Islands, Dominica, Grenada, Grand Cayman, Guyana, Ireland, Jamaica, Liberia, Montserrat, New Zealand, Sierra Leone, St. Kitts and Nevis, St. Lucia, St. Vincent, Trinidad/Tobago, Turks and Caicos Islands, and United Kingdom. Students who are not exempt based on the countries listed above, but who can provide documentation of attendance and graduation from a secondary English speaking school in their native country or the US, will be exempt from the requirement.

ORIENTATION

All Junior RN-BSN students and transferring RN-BSN students are required to attend the general orientation held prior to entering their Junior semester.

PROGRESSION

The University grade replacement/exclusion policy is limited by the College of Nursing and is not applicable to nursing courses.

- A student in the RN to BSN Program who earns a second D or F will be placed on probation. The student must earn a C or above in all subsequent courses in order to remain in the program.

FEES

Course fee information is available at www.uta.edu/fees. Additional costs beyond tuition, fees and books that may be incurred by a nursing student in this program will be detailed on the College of Nursing website www.uta.edu/nursing.

ORAL COMMUNICATION PROFICIENCY REQUIREMENT

Oral proficiency is recognized to be a critical component of providing safe nursing care. In addition to content-specific presentations in various nursing courses, all nursing students are required to communicate effectively with clients, members of the health care team, and faculty. Contact Undergraduate Program Director for more information.

E-MAIL ACCOUNTS

Each student will be provided a UT Arlington e-mail address. Official communications from the College of Nursing will be distributed to this e-mail address and Blackboard accounts required by many courses. Students will be held responsible for information distributed in this manner.

MOVEMENT BETWEEN PROGRAMS

Normally students who have started the RN to BSN traditional in-the-seat programs cannot move to the AP:RN-BSN online program.

BSN Prelicensure Program

PRIOR TO ENROLLMENT

The following semester hours must be completed prior to enrollment in upper-division nursing courses except as noted:

Natural Sciences

Human Anatomy and Physiology I and II ^{1,2,3,4}	8
--	---

Microbiology ^{2,4}	4
-----------------------------	---

General Chemistry and Biological Chemistry ^{2,4}	4
---	---

Behavioral Sciences

Introduction to Psychology ⁴	3
---	---

Sociology or Anthropology ^{3,4,5}	3
--	---

Developmental Psychology (Lifespan) ⁴	3
--	---

Nursing

FS-NURS 1300	INTRODUCTION TO PROFESSIONAL NURSING ⁴	3
NURS 3365	PHARMACOLOGY IN NURSING PRACTICE ⁴	3
NURS 3366	PATHOPHYSIOLOGIC PROCESSES: IMPLICATIONS FOR NURSING ⁴	3
Other		
Creative Arts (architecture, art, dance, music or theatre arts) ^{3,5}		3
MATH 1301	CONTEMPORARY MATHEMATICS (An applicant taking math at UT Arlington is encouraged to complete Contemporary Mathematics (MATH 1301)) ³	3
Statistics ^{3,4}		3
U.S. History I and II ^{3,5,6}		6
U.S. and Texas Government ^{3,5,6}		6
English Composition I and II ³		6
English Literature ^{3,5}		3
Technical Writing ⁴		3
Total Hours		67

¹ If part of a two-semester sequence, both courses are required.

² Must contain a lab component.

³ Degree Plan Core Curriculum courses.

⁴ Degree Plan Program Specific courses.

⁵ On-campus students may complete after enrollment in junior nursing courses.

⁶ House Bill 935, passed by the Sixtieth Legislature, provides that no person may receive an undergraduate degree unless she/he has taken and passed six semester hours in American political science and six semester hours in United States history.

Note: AP BSN students must complete all courses, including the upper division elective, prior to enrollment in junior nursing courses.

SUGGESTED COURSE SEQUENCE

The following semester hours must be completed for graduation.

Third Year

First Semester	Hours	Second Semester	Hours	Summer Session	Hours
NURS 3320	3	NURS 3481	4	Upper-division electives	3
NURS 3333	3	NURS 3561	5		
NURS 3632	6	NURS 3321	3		
		NURS 3261	2

Master of Science in Athletic Training - Mission, Goals, and Outcome Measures

PROGRAM MISSION

The mission of The University of Texas at Arlington Master of Science in Athletic Training (MSAT) program is to provide an active learning environment for students to acquire the critical thinking and clinical decision making skills necessary for a successful career in the ever evolving health care system.

The program of study leading to the Master of Athletic Training (MSAT) is designed to accomplish five major goals:

Program Goal #1

To prepare students to pass the Board of Certification, Inc. (BOC) exam.

Outcome measure:

1. Overall BOC passing rates for program graduates.

Program Goal #2

To prepare students to pass the Texas Advisory Board of Athletic Trainers' (TABAT) state licensure exam.

Outcome measure:

1. Overall TABAT passing rates for program graduates.

Program Goal #3

Prepare students to achieve competence and strive for excellence in evidence-based clinical practice.

Outcome measures:

1. Psychomotor skill evaluations
2. Didactic and laboratory final exams
3. Simulated patient assessments
4. Overall clinical performance evaluations

Program Goal #4

To prepare students to recognize the value and importance of promoting the athletic training profession.

Outcome Measures:

1. Percentage of current students who are actively involved in the Maverick Society of Athletic Training Students (MSATS).
2. Percentage of current students who are members of the National Athletic Trainers' Association (NATA) and the Southwest Athletic Trainers' Association (SWATA).
3. Percentage of program alumni who maintain the membership in the NATA, SWATA, and the Texas State Athletic Trainers' Association (TSATA).
4. Percentage of program alumni who are currently involved, or have been involved in the past, in professional service (committees, task forces, volunteer projects, etc.) to the NATA, SWATA, or TSATA.

Program Goal #5

To facilitate students' efforts in locating and securing an athletic training job or placement in a graduate school.

Outcome measure:

1. Annual student placement rates.

For specific information regarding graduate study in the Department of Kinesiology, please contact the Graduate Advisor at 817.272.3288 or by e-mail at kinegradcoord@uta.edu.

Master of Science in Exercise Science - Objective

The program of study leading to the Master of Science (M.S.) in Exercise Science is designed to accomplish two major objectives:

1. To provide students with the academic and research skills needed for doctoral study in kinesiology, exercise science, physiology of exercise, postural control, athletic training or biomechanics.
2. To prepare students for employment in clinically-oriented environments that place an emphasis on research-based practice such as cardiac rehabilitation, strength and conditioning or sports medicine.

Current departmental faculty members have been academically trained in, and are actively publishing in the areas of physiology of exercise, postural control, athletic training, biomechanics, cardiovascular physiology, physical education (pedagogy), pulmonary physiology, motor-learning, and the general areas of allied health sciences. The ongoing research in these areas provides the primary focus for the M.S. program. Program graduates will be well prepared to work as researchers in laboratories and to enroll in doctoral programs in these content areas.

Students are encouraged to present their research at state and national meetings of the following organizations: American College of Sports Medicine (ACSM), National Athletic Trainers' Association (NATA), National Strength and Conditioning Association (NSCA). The M.S. degree, combined with supervised clinical experience, will assist students in their preparation for national certification exams.

Admission Requirements for M.S. in Athletic Training

UNCONDITIONAL ADMISSION

- Bachelor's Degree (preferably in Kinesiology, Exercise Science or related field).
- Admission to The University of Texas at Arlington.
- Submission of GRE scores (the following scores are preferred but not required:

Verbal - 150 [450], Math 141 [450].

- Undergraduate GPA of 3.0 or 3.0 GPA during the last 60 hours of undergraduate work.
- Completion of Graduate Athletic Training Application.
- Interview with MSAT Admissions Committee.

- Completed Technical Standards Forms.
- Physical Exam and Immunization Records (including Hepatitis B)
- Current Health Care Provider CPR Certification (AHA).3 MSAT reference forms on file.
- Submit documentation of 25 hours of clinical observation in an athletic training setting.
- Meet application deadline of February 1st (or early deadline of December 1st for following summer admission).
- International applicants must meet the Office of Graduate Studies minimum scores for admission for the TOEFL, TSE, TOEFL iBT, and IELTS test: A score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section are required.

PROBATIONARY ADMISSION

Applicants failing to meet the unconditional admission criteria may be considered for probationary admission, in which case the following additional criteria will also be considered by the MSAT Admissions Committee:

- Professionally relevant experience.
- A sample of technical writing may be requested.
- Maintain a 3.0 GPA in the first two long (Fall and Spring) semesters of enrollment in the graduate program.

Required Prerequisites (grade of C or better)

- Care and Prevention of Injuries
- Anatomy and Physiology I and II
- Kinesiology/Biomechanics
- Physiology of Exercise
- Sports Nutrition

Preferred Prerequisites (grade of C or better)

- Physics I
- Chemistry I
- Medical Terminology

RETENTION CRITERIA

MSAT students' academic and clinical progress will be closely monitored each semester by the MSAT Program Director and the MSAT Clinical Education Coordinator. In order to remain in the MSAT program, students must:

1. Maintain a cumulative GPA of 3.0 or higher.
2. Maintain a 3.0 GPA or higher in athletic training core courses.
3. Adhere to the NATA Code of Ethics and to the MSAT Policies and Procedure Manual.

* Students who fail to meet the retention criteria will be placed on probation in the MSAT program for one semester. If standards are not met by the end of the probationary period, the student will be dismissed from the program. Students who earn a grade of C or lower in any required course must repeat that course and earn a grade of B or higher in order to remain in the program. Failure to repeat the course, or earn a grade of B or better, will result in dismissal from the program.

TRANSFER POLICY

Students may transfer up to six hours of elective graduate coursework. No transfer credit will be awarded for any of the athletic training core courses.

WAIVER OF THE GRADUATE RECORD EXAMINATION

Upon recommendation of the Graduate Advisor, outstanding UT Arlington graduates with a degree in Kinesiology or related fields (such as Biology, Chemistry, Mathematics, Nursing, Computer Science, or Engineering) may qualify for a waiver of the requirements for the Graduate Record Examination (GRE). To qualify, the applicant must meet the following minimum requirements:

1. The student must have graduated from a commensurate bachelor's degree program at UT Arlington no more than three academic years prior to admission to the graduate program (as measured from the start of the semester for which admission is sought). A commensurate bachelor's degree program is one that is a normal feeder program for the master's degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, admission with the GRE waiver is contingent upon successful completion of the bachelor's degree.
2. The student's UT Arlington grade-point average must equal or exceed 3.0 in the following calculations:

- As calculated for admission by the Office of Graduate Studies;
- Overall;
- In the major field; and
- In all upper-division work.

Applicants qualifying for waiver of GRE who do not qualify for advance admission, must comply with all other requirements for admission, i.e., submitting the application, paying fees, providing official transcripts from other institutions, and meeting any requirements established by the admitting graduate program. The GRE waive must be recommended by the Graduate Advisor at the time of admission.

Degree Requirements for M.S. in Athletic Training

All students accepted into the Master of Science in Athletic Training Program will complete 52 hours of coursework. Students then have the option of selecting 6-9 hours of electives.

REQUIRED COURSEWORK

The following courses will be required for completion of the MSAT degree program.

Prefix and Number Required Courses SCH

KINE 5120	ATHLETIC TRAINING CLINICAL I	1
KINE 5130	Clinical Athletic Training II	1
KINE 5140	Clinical Athletic Training III	1
KINE 5150	Clinical Athletic Training IV	1
KINE 5160	Clinical Athletic Training V	1
KINE 5220	PREVENTATIVE AND ACUTE CARE TECHNIQUES IN ATHLETIC TRAINING	2
KINE 5300	RESEARCH METHODS IN KINESIOLOGY	3
KINE 5305	APPLIED STATISTICAL PRINCIPLES IN KINESIOLOGY	3
KINE 5329	STRENGTH & CONDITIONING IN SPORT AND PERFORMANCE	3
KINE 5333	Health Care Administration	3
KINE 5334	Seminar in Athletic Training	3
KINE 5420	CONCEPTS IN ATHLETIC TRAINING	4
KINE 5430	ORTHOPEDIC ASSESSMENT I	4
KINE 5431	Orthopedic Assessment II	4
KINE 5432	PATHOPHYSIOLOGY AND PHARMACOLOGY	4
KINE 5433	THERAPEUTIC INTERVENTIONS I	4
KINE 5434	THERAPEUTIC INTERVENTIONS II	4
Total Hours		46

The elective courses listed below are intended to provide MSAT students the opportunity to gain advanced knowledge in select areas related to athletic training. The independent research courses (KINE 5196 LABORATORY TECHNIQUES IN EXERCISE SCIENCE and KINE 5396 RESEARCH IN ATHLETIC TRAINING) are specifically designed to provide students with additional research experiences, particularly those students who may be interested in pursuing a doctoral degree.

PREFIX AND NUMBER PRESCRIBED ELECTIVE COURSES

Select two of the following:

KINE 5196	LABORATORY TECHNIQUES IN EXERCISE SCIENCE	6
KINE 5396	RESEARCH IN ATHLETIC TRAINING	
KINE 5397	INTERNSHIP ATHLETIC TRAINING	
KINE 5320	ADVANCED PHYSIOLOGY OF EXERCISE	
KINE 5328	NEUROMUSCULAR PHYSIOLOGY OF EXERCISE	
KINE 5331	OBESITY & WEIGHT MANAGEMENT	
KINE 5345	SPORT NUTRITION	
KINE 5350	APPLIED BIOMECHANICS	
Total Hours		6

Admission Requirements for M.S. in Exercise Science

UNCONDITIONAL ADMISSION

1. Minimum GRE quantitative score of 144 (500 on old scale) and verbal score of 153 (500 on old scale).
2. 3.0 GPA for the degree and/or 3.0 GPA during the last 60 hours of undergraduate work.
3. Undergraduate and/or graduate course work related to kinesiology.
4. 3.0 GPA on all graduate work.
5. 3 letters of reference on file.
6. International applicants must meet the Office of Graduate Studies minimum scores for admission for the TOEFL, TSE, TOEFL iBT, and IELTS test: A score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section are required.
7. To be eligible for a graduate teaching assistantship, international students must submit a TSE score of at least 45, or a score on the Speaking section of the TOEFL iBT of at least 23 or a score of at least 7 on the Speaking section of the IELTS. Alternatively, students who have not taken the TSE, or who have failed to attain a score of 23 on the Speaking section of the TOEFL iBT or a score of 7 on the Speaking section of the IELTS, may achieve a score of at least 45 on the SEA examination administered by the University of Texas at Arlington's Assessment Services Office.

PROBATIONARY ADMISSION

Applicants failing to meet the unconditional admission GRE criteria or having a GPA less than 3.0 may be considered for probationary admission, in which case the following additional criteria will also be considered by the Graduate Studies Committee:

1. Professionally relevant experience
2. A sample of technical writing may be requested

Applicants admitted on probation will be required to maintain a B or better average during their first 9 hours of graduate study. A Graduate Advisor within the Department of Kinesiology will review transcripts of prospective students to determine what prerequisites are needed prior to enrollment in courses within the proposed program. If deficiencies are identified, a pre-program of study designed to prepare the student for graduate course prerequisites will be written and signed by the prospective student and the Graduate Advisor.

Applicants seeking admission to an educator preparation program in the College of Education and Health Professions may be denied admission or readmission to those programs if they have been suspended or expelled from the University of Texas at Arlington or any other university or program for reasons other than academic reasons.

WAIVER OF THE GRADUATE RECORD EXAMINATION

Upon recommendation of the Graduate Advisor, outstanding UT Arlington graduates with a degree in Kinesiology or related fields (such as Biology, Chemistry, Mathematics, Computer Science, or Engineering) may qualify for a waiver of the requirements for the Graduate Record Examination (GRE). To qualify, the applicant must meet the following minimum requirements:

1. The student must have graduated from a commensurate bachelor's degree program at UT Arlington no more than three academic years prior to admission to the graduate program (as measured from the start of the semester for which admission is sought). A commensurate bachelor's degree program is one that is a normal feeder program for the master's degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, admission with the GRE waiver is contingent upon successful completion of the bachelor's degree.
2. The student's UT Arlington grade-point average must equal or exceed 3.0 in the following calculations:
 - as calculated for admission by the Office of Graduate Studies;
 - overall;
 - in the major field; and
 - in all upper-division work.

Applicants qualifying for waiver of GRE who do not qualify for advanced admission, must comply with all other requirements for admission, i.e., submitting the application for admission, paying fees, providing official transcripts from other institutions, and meeting any requirements established by the admitting graduate program. The GRE waiver must be recommended by the Graduate Advisor at the time of admission.

GRADUATE ASSISTANTSHIPS

The Department of Kinesiology offers graduate teaching and graduate research assistantships. Assistantships are contingent upon prior acceptance to the Graduate School. Graduate Assistant applicant evaluation begins on February 1 and continues until all positions are filled. Please direct all inquiries to the graduate program director Dr. Mark Ricard at ricard@uta.edu.

Degree Requirements for M.S. in Exercise Science

All students accepted into the Master of Science in Exercise Science program will complete 36 hours of coursework consisting of 15-18 semester hours in exercise science, which includes completing either KINE 5389 RESEARCH MANUSCRIPT SUBMISSION or KINE 5698 THESIS. Students then have the option of selecting 18-21 hours of electives. Detailed information concerning the plan of work is available on the Department of Kinesiology website: www.uta.edu/coehp/kinesiology.

Required Coursework

KINE 5300	RESEARCH METHODS IN KINESIOLOGY	3
KINE 5305	APPLIED STATISTICAL PRINCIPLES IN KINESIOLOGY	3
KINE 5320	ADVANCED PHYSIOLOGY OF EXERCISE	3
KINE 5323	MOTOR CONTROL AND LEARNING	3
KINE 5389 or KINE 5698	RESEARCH MANUSCRIPT SUBMISSION THESIS	3-6

Elective Coursework

Select six to seven of the following (based on thesis or non-thesis track):		18-21
KINE 5322	METABOLISM & EXERCISE BIOCHEMISTRY	
KINE 5326	CARDIOCIRCULATORY PHYSIOLOGY OF EXERCISE	
KINE 5327	PULMONARY PHYSIOLOGY OF EXERCISE	
KINE 5328	NEUROMUSCULAR PHYSIOLOGY OF EXERCISE	
KINE 5329	STRENGTH & CONDITIONING IN SPORT AND PERFORMANCE	
KINE 5331	OBESITY & WEIGHT MANAGEMENT	
KINE 5345	SPORT NUTRITION	
KINE 5350	APPLIED BIOMECHANICS	
KINE 5390	SPECIAL TOPICS IN KINESIOLOGY	
KINE 5393	PHYSIOLOGY OF EXERCISE INTERNSHIP	
KINE 5394	RESEARCH IN KINESIOLOGY	

Total Hours

33-39

Coursework that is more than six years old at the time of graduation or teacher/administrator certification program completion cannot be used toward meeting the requirements for a master's degree or graduate-level certification. Master's degree and graduate-level certification programs must be completed within six years (time in military service excluded) from initial registration in the Graduate School. Appropriate state exams and application to the State Board for Educator Certification for a standard certificate must be made within six months of completion of residency/practicum/program. If a candidate allows the six-month period to go by without passing all state exams and applying for certification, additional coursework and/or exams will be required.

Kinesiology - Undergraduate Programs

Overview

The Department of Kinesiology is committed to providing quality educational programs that emphasize scientific theory, hands-on learning in the laboratory setting and real-world application through clinical internships and other field-based experiences. The faculty's vast teaching experience and research expertise provide rich learning experiences across all of the department's academic programs.

The undergraduate studies within the Department of Kinesiology are organized into four program areas: athletic training, exercise science, physical education teacher education, and kinesiology. Each of these academic programs share a common core of kinesiology courses that provide students with a strong foundation in the sciences of human anatomy, biomechanics and exercise physiology, as well as an introduction to research methodology. In addition to the kinesiology core, each undergraduate degree plan provides a comprehensive discipline-specific program of study designed to prepare students for a specific career path.

The Department of Kinesiology offers multiple degree plan options that work towards meeting the prerequisite requirements for admission to physical therapy, occupational therapy and physician's assistant graduate programs, as well as medical and dental schools (e.g., BS in Exercise Science - Clinical Health Professions).

The four undergraduate program areas and their associated degree plans are listed below. Complete descriptions and course requirements are provided on subsequent pages.

PHYSICAL EDUCATION TEACHER EDUCATION (PETE)

Bachelor of Arts in Physical Education Teacher Education (PETE) for individuals who wish to teach in the PK-12 setting.

EXERCISE SCIENCE

Bachelor of Science in Exercise Science - Clinical Health Professions (CHP) for individuals who plan to pursue a graduate degree in a health professions field (e.g., PT, OT, PA). This degree is also preparation for cardiac rehabilitation.

Bachelor of Science in Exercise Science - Fitness/Wellness (F/W) for individuals who wish to pursue a career in personal fitness training, strength and conditioning, cardiac rehabilitation.

ATHLETIC TRAINING

Bachelor of Science in Athletic Training with All Level Teacher Certification.

Bachelor of Science in Athletic Training for those who wish to pursue a career in the health profession of athletic training, specializing in the prevention, evaluation, management and rehabilitation of musculoskeletal injuries and common illnesses.

Bachelor of Arts in Athletic Training for those who wish to pursue a career in the health profession of athletic training, specializing in the prevention, evaluation, management and rehabilitation of musculoskeletal injuries and common illnesses.

KINESIOLOGY

Bachelor of Arts in Kinesiology - Generalist prepares individuals for sport and physical activity program leadership in both the public and private settings.

Oral Communication Competencies

All students declared as majors in the Department of Kinesiology are required to complete KINE 3325 UNDERGRADUATE RESEARCH METHODS. Embedded in this class is the task of orally presenting research findings as both a formal oral research presentation and also in support of posters presented during the Kinesiology Research Presentation Day.

Computer Use Competencies

All students declared as majors in the Department of Kinesiology are required to pass the University computer competency exam or complete KINE 1400 INTRODUCTION TO EXERCISE SCIENCE early in their specialization. Embedded in this class are tasks requiring familiarity with the word processor, spreadsheet and Internet browsing programs common on personal computers. Additionally, the department's core curriculum requires the demonstration of computer use competencies for completion of the majority of assignments.

Physical Education Teacher Education (PETE)

The Bachelor of Arts in Physical Education with All-Level Teacher Certification prepares individuals for teaching and coaching positions in public and private schools. This degree is specifically designed to prepare graduates for certification in teaching K-12 physical education. The program is designed to provide a scientific and pedagogical foundation with multiple public school experiences that enable students to observe, assist teachers and coaches, experiment with curriculum, create programs, and gain structured experiences in teaching. Because of the emphasis on field experiences, our graduates are well prepared when they enter the workforce. In addition, our graduates work in diverse settings and are able to plan and teach individuals with disabilities successfully. Candidates are also encouraged to earn a second teaching area concentration (such as English, History, Biology/Life Science, Math, Modern Language, Health Education, etc.).

Admission Requirements:

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from a University College academic advisor during their first year. After the first year, students should seek advisement from the PETE Advisor in the Department of Kinesiology. Transfer students must seek academic advising from the PETE Advisor in the Department of Kinesiology immediately. .

In order to qualify for admission to the Physical Education Teacher Education (PETE) program, students must:

- Satisfy the University's credit hour requirements for admission to a degree plan
- Provide transcripts from each college or university the student has attended (reflecting all current/completed semesters)
- Petition for admission into the College of Education prior to taking education coursework
- Meet College of Education requirements on the THEA: Reading-270; Writing-220; and Math-230
- Have a cumulative GPA of at least 3.0 for classes taken at UT Arlington. This GPA must also be sustained across the following education sequence:

• KINE 2301	TEACHING GAMES FOR UNDERSTANDING	3
• KINE 2302	DANCE AND MOVEMENT ACTIVITIES	3
• KINE 3304	ADAPTED PHYSICAL EXERCISE & SPORT	3

KINE 3388	THEORY AND APPLICATION IN MOTOR DEVELOPMENT	3
KINE 4319	FITNESS AND OUTDOOR ADVENTURE ACTIVITIES EDUCATION	3
KINE 4193	PHYSICAL EDUCATION TEACHER CERTIFICATION PRACTICUM	1
KINE 4320	TEACHING SECONDARY PHYSICAL EDUCATION	3
KINE 4321	TEACHING ELEM PHYSICAL EDUCATION	3
EDML 4300	PRE-ADOLESCENT/ADOLESCENT GROWTH AND DEVELOPMENT	3
LIST 4343	CONTENT AREA READING AND WRITING	3
EDUC 4352	TEACHING DIVERSE POPULATIONS	3
Total Hours		31

- All classes involving field-based experiences require students to pass a criminal background check. This is also a requirement for all certified teachers in the State of Texas.
- Students who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

Maintaining Major Status in the Physical Education Teacher Education (PETE) program: If a student falls below a 3.0 GPA at any time prior to petitioning for admission into the College of Education, the student will be on departmental probation for one semester. If the student is unable to make up the deficiency in the semester immediately following the probation, the student will lose status as a Bachelor of Arts in Kinesiology with All-Level Certification major and be moved to the Bachelor of Arts in Kinesiology - Generalist major. Courses to make up a GPA deficiency must be taken at UT Arlington. If the student is able to make up the GPA deficiency in the semester immediately following loss of major status, she or he will be eligible to apply for reinstatement as a major by making application to the Departmental Advisor when grades are released. No courses on the degree plan may be taken as pass/fail.

Each candidate in the PETE program will be evaluated on the College of Education Professional Dispositions by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as "unacceptable" in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions.

Application for Student Teaching: Students must apply to the Director of Field Experience in the College of Education by the appropriate deadline to begin . Students must also submit any applicable background checks at registration. The student teaching will be performed in both elementary and high school or middle school levels.

Bachelor of Arts in Physical Education with All Level Teacher Certification (PETE)

Pre-Professional Courses

General Core Requirements (p. 93) 39

Recommended Core Requirements

ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
HIST 1311	HISTORY OF THE UNITED STATES TO 1865	
HIST 1312	HISTORY OF THE UNITED STATES, 1865 TO PRESENT	
MATH 1302	COLLEGE ALGEBRA

Exercise Science

The Exercise Science program is designed to prepare students for health-related fields such as physical therapy, occupational therapy, cardiac rehabilitation and physician's assistant as well as in preparation for medical or dental school. The Exercise Science program is also designed for students interested in careers in the commercial and corporate fitness industry as personal fitness trainers or health club and fitness directors, as well as for students interested in pursuing a graduate degree in exercise science.

Exercise Science majors can choose from one of two degree plan options: the Clinical Health Professions (CHP) and the Fitness/Wellness (F/W) Track. The Clinical Health Professions Track incorporates the science prerequisites required of physical therapy, occupational therapy, and physician's assistant graduate programs. The Fitness/Wellness Track is designed according to the guidelines established by the American College of Sports Medicine. Its purpose is to prepare students for the American College of Sports Medicine (ACSM) Health Fitness Specialist (HFS) certification program, as well as the certification offered by the National Strength and Conditioning Association (NSCA), the Certified Strength and Conditioning Specialist (CSCS).

Admission Requirements:

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from a **University College academic advisor** during their first year. After the first year, students should seek advisement from the Exercise Science Advisor in the Department of Kinesiology prior to each semester and summer sessions. Transfer students must seek academic advising from the Exercise Science Advisor in the Department of Kinesiology immediately. All incoming freshmen and transfer students wishing to major in Exercise Science are initially classified as Exercise Science pre-majors (EXSS_Int).

To be classified as an Exercise Science major, students must satisfy the following requirements:

Clinical Health Professions Track

- Completion of 12 hours at UT Arlington
- Completion of KINE 1400 INTRODUCTION TO EXERCISE SCIENCE with grade of B or better
- Overall GPA of 3.00 and KINE GPA of 3.00

Fitness/Wellness Track

- Completion of 12 hours at UT Arlington
- Completion of KINE 1400 INTRODUCTION TO EXERCISE SCIENCE with grade of C or better
- Overall GPA of 2.5 and KINE GPA of 2.5

Maintaining Major Status: Students accepted as Bachelor of Science in Exercise Science majors in the Department of Kinesiology must maintain the minimum GPAs as indicated above or they will be on departmental probation. In order to take additional Kinesiology courses, approval must be granted by the Department Chair. If the student is unable to make up the deficiency in the semester immediately following the probation, the student will lose status as a Bachelor of Science in Exercise Science major. Courses to make up the GPA deficiency must be taken at UT Arlington. If the student is able to make up the GPA deficiency in the semester immediately following loss of major status, he or she can be reinstated as a major by making application to the Departmental Advisor when grades are released. No courses on the degree plan may be taken as pass/fail.

Each student in the College of Education and Health Professions of UT Arlington will be evaluated on Professional Dispositions by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as “unacceptable” in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions.

Bachelor of Science Degree in Exercise Science

CLINICAL HEALTH PROFESSIONS TRACK

This track is designed for individuals who plan to attend graduate school to pursue degrees in the health professions of physical therapy, occupational therapy, physician's assistant or exercise physiology.

Pre-Professional Courses

General Core Requirements (p. 93) 39

Recommended Core Requirements

ENGL 1301	RHETORIC AND COMPOSITION I	
ENGL 1302	RHETORIC AND COMPOSITION II	
MATH 1308	ELEMENTARY STATISTICAL ANALYSIS	
POLS 2311	GOVERNMENT OF THE UNITED STATES	
POLS 2312	STATE AND LOCAL GOVERNMENT	
PSYC 1315	INTRODUCTION TO PSYCHOLOGY	
BIOL 1441	CELL AND MOLECULAR BIOLOGY	
BIOL 2457	HUMAN ANATOMY AND PHYSIOLOGY I	
Select one of the following:		
MATH 1302	COLLEGE ALGEBRA	
MATH 1303	TRIGONOMETRY	
MATH 1426	CALCULUS I	

Program Science Requirements

BIOL 2458	HUMAN ANATOMY AND PHYSIOLOGY II	3

HEED, KINE or Science (including 3 advanced hours)		15
Total Hours		117

Many of the courses in the Kinesiology curriculum require prerequisite courses, which are identified in the course descriptions.

Athletic Training

Important Notice:

UT Arlington has transitioned from the Bachelor of Science in Athletic Training to a post baccalaureate professional degree (Master of Science in Athletic Training). This transition occurred in summer 2013. The undergraduate degree is being phased out and the final undergraduate applications have been accepted. The program is no longer accepting undergraduate applications. However, post baccalaureate students interested in applying to the Master of Science in Athletic Training should contact Dr. Krawietz for more information (pkrawietz@uta.edu). For accreditation purposes, the information below has been retained until the final undergraduate cohort graduates in May 2016.

The Athletic Training Education Program (ATEP) is designed to prepare students for careers in the health care profession of athletic training. The classroom, laboratory and clinical components of the program are structured around the Athletic Training Educational Competencies published by the National Athletic Trainers' Association (NATA) Education Council and the Role Delineation Study conducted and published by the Board of Certification (BOC). The clinical education component of the program includes six clinical courses. These courses provide formal instruction of clinical skills within a structured laboratory environment and require students to complete clinical education rotations under the supervision of a Certified and Licensed Athletic Trainer or other health care professional. Students are evaluated on their mastery of knowledge and clinical skills through written tests, class projects, and oral practical examinations. Students are also evaluated on their ability to integrate the clinical proficiencies into their daily clinical practice and make sound clinical decisions.

The mission of the Athletic Training Education Program (ATEP) is to provide an active learning environment for students to acquire and master the knowledge, skills, clinical proficiencies, and attitudes necessary for success as an Entry-Level Athletic Trainer. The ATEP goals and objectives include:

- to prepare students to pass the BOC (Board of Certification) Exam,
- to prepare students to pass the Texas Advisory Board of Athletic Trainers' State Licensure Exam,
- to develop students' critical-thinking and decision-making skills for success in the allied health profession of athletic training,
- to instill the value of professionalism,
- to teach students the value of becoming involved in their professional associations through service work, and
- to facilitate students' efforts in locating and securing an athletic training job or placement in a graduate school.

PROGRAM DESCRIPTION

The University's ATEP is accredited through the Commission on Accreditation of Athletic Training Education (CAATE). Students within the ATEP are able to choose from among three possible degree plans:

- BS in Athletic Training with All-Level Teaching Certificate
- BS in Athletic Training (non-teaching)
- BA in Athletic Training (non-teaching)

Students are admitted into the ATEP as Level 1, but must meet retention requirements to matriculate into the Professional Levels 2 through 4 (see admission and retention information below). In addition to formal classroom instruction, athletic training majors also receive structured clinical education to acquire and master the hands-on skills required of the Entry-Level Athletic Trainer. Both the classroom and clinical components of the program are structured around the Competencies in Athletic Training Educational Competencies published by the National Athletic Trainers' Association (NATA) Education Council and the Role Delineation Study conducted and published by the BOC. The clinical education component of the major includes six clinical courses. These courses provide formal instruction of clinical skills within a structured laboratory environment and require students to complete clinical education rotations under the supervision of a Certified and Licensed Athletic Trainer or other health care professional. Students are evaluated on their mastery of knowledge and clinical skills through written tests, class projects, and oral practical examinations. Students are also evaluated on their ability to integrate the clinical proficiencies into their daily clinical practice.

Prior to placement in a clinical education rotation, all athletic training students (Levels I-IV) must meet the following requirements:

- Provide documentation of immunization against hepatitis B¹, measles, mumps, tetanus, polio, and diphtheria.
 - Complete OSHA blood borne pathogen training.
 - Provide documentation of current certification in First Aid and Cardiopulmonary Resuscitation (CPR with AED).
 - Provide proof of current liability insurance.

¹ The hepatitis vaccination is a series of three shots, with the first given initially, the second at one month, and the third at six months. Students must receive the first shot prior to clinical placement.

NOTE: Some clinical rotation assignments may also require students to obtain a personal background check and a tuberculosis (TB) test.

LEVEL I PHASE OF STUDY

The Level I phase of the program is typically completed during the student's freshman spring semester at UT Arlington and includes formal classroom and laboratory instruction, as well as directed clinical experiences in a variety of athletic training settings. The Level I requirements¹ include:

- KINE 2420 INTRODUCTION TO ATHLETIC TRAINING (4 credit hours) [Grade of B or better].
- KINE 2130 ATHLETIC TRAINING CLINICAL PRACTICUM I (1 credit hour) [Grade of B or better].
- Completion/documentation of a minimum of 120 hours of directed clinical experience in the UT Arlington athletic training room(s) and/or other approved clinical education sites.
- Successful completion/documentation of required competencies with a score of 80% or better.

- ¹ Transfer students may complete the Level I course requirements at their current junior or senior college or complete them upon arrival to UT Arlington. Transfer students are encouraged to contact Dr. Paul Krawietz as soon as possible to determine the transferability of athletic training courses.

LEVEL II-IV PHASES OF STUDY

Levels II-IV of the program require a minimum of three years of classroom study and clinical education. Each semester, students are assigned to an approved clinical instructor (ACI) or clinical supervisor who is responsible for providing comprehensive health care services to athletes, patients, or physically active individuals within a variety of clinical sites. Students are expected to work closely with their ACI/CI to practice and integrate their athletic training skills while also developing their clinical decision-making skills. All students are required to complete at least three off-campus clinical rotations; therefore, students will need suitable transportation. Students are required to complete a minimum of 1500 hours of clinical experience under the supervision of an ACI, CI or other licensed or certified health care professional over the course of the program. Completion of the program requirements will enable students to be eligible for the BOC Exam and the Texas Advisory Board of Athletic Trainers' Licensing Exam.

ADMISSION CRITERIA

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from a University College academic advisor during their first year. After the first year, students should seek advisement from the Athletic Training Advisor in the Department of Kinesiology. Transfer students must seek academic advising from the Athletic Training Advisor in the Department of Kinesiology immediately.

Admission to the UT Arlington ATEP is selective and competitive. A limited number of students are admitted each year based upon the number of returning students and the number of clinical instructors. Prospective students must complete the Level I phase of study to be considered for continuance in the ATEP. The technical standards set forth by the ATEP establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an Entry-Level Athletic Trainer, while also meeting the expectations of CAATE. The technical standards are printed in the ATEP handbook and are available on the ATEP Web site (<https://www.uta.edu/coehp/kinesiology/undergrad/athletic-training/program-description.php>).

Students who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education and Health Professions.

Admission to the Level I phase of the program is based on the following criteria¹:

- Admission to UT Arlington.
- Submission of ATEP application.
- Ability to pass a physical exam.
- Ability to meet the technical standards for admission.

Continuance beyond the Level I phase of the program is based on the following criteria:

- Successful completion of the Level I requirements.¹
- Overall GPA of 2.5 or higher.
- Submission of ATEP application with transcripts (for transfer students who did not complete the Level I requirements at UT Arlington).
- Submission of three recommendation forms completed by the students' clinical supervisors (ACI/CI).
- Completion of a personal interview with the ATEP Continuance Committee, which will consist of the Program Director, Clinical Education Coordinator, at least one staff athletic trainer and three upper-level athletic training students.

- ¹ Completion of the Level I requirements does not guarantee continuance to Levels II-IV of the ATEP.

RETENTION CRITERIA

Students must maintain an overall GPA of 2.5. Additionally, students must earn a C or better in all athletic training courses (athletic training courses with an earned grade of D or lower must be repeated) and maintain an athletic training GPA of 3.0. If a student fails to maintain either of the GPA requirements, they will be placed on probation. A student will be afforded two semesters, at most, to raise their GPA to the required 2.5 overall and 3.0 within the major. During the first probationary semester, the student will be allowed to continue accruing clinical experience hours; however, he/she will be required to attend mandatory study sessions. Should a second probationary semester be necessary, the student will be removed from the clinical aspect of the program, preventing him/her from accruing any clinical experience hours. Should the student fail to raise their GPA during the second probationary semester, he/she will be removed from the ATEP.

Each student in the College of Education and Health Professions of UT Arlington will be evaluated on Professional Dispositions by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as "unacceptable" in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions.

GRADUATION REQUIREMENTS

To receive a degree in athletic training, students must:

- Complete all classroom and clinical education requirements
- Complete all athletic training courses with a C or better
- Complete a minimum of 1500 hours of clinical education/field experience
- Earn a minimum cumulative GPA of 2.5
- Earn a minimum GPA of 3.0 within the athletic training core courses
- Successfully take and pass the UT Arlington ATEP Capstone examination with a score of 70% or higher

Requirements for a Bachelor of Science Degree in Athletic Training (All-Level Teacher Certification)

Bachelor of Arts in Kinesiology - Generalist

The Bachelor of Arts in Kinesiology prepares individuals for physical activity program leadership in both the public and private settings. The program is designed to provide a scientific and pedagogical foundation with multiple experiences that enable students to observe, assist, coach and create programs that encourage physical activity across the age spectrum.

SPORTS EMPHASIS

One option in the BA Kinesiology - Generalist program is to undertake an emphasis in sport. As interest in, and the business of, sport continues to increase this emphasis will allow for the development of knowledge in this field. In addition to the core courses identified below there are 24 hours available as electives.

Suggested classes for electives include:

KINE 3302 Sport and Exercise Psychology

KINE 3307 Sport and Society: Issues and Debates

KINE 3312 Coaching Invasion Game Principles

KINE 3313 Coaching of Net/Wall Game Principles

ADMISSION REQUIREMENTS

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from a University College academic advisor during their first year. After the first year, students should seek advisement from the BA Kinesiology Advisor in the Department of Kinesiology. Transfer students must seek academic advising from the BA Kinesiology Advisor in the Department of Kinesiology immediately.

MAINTAINING MAJOR STATUS

Students must maintain an overall GPA of 2.5 and KINE GPA of 2.5. Each student in the College of Education, education sequence at UT Arlington will be evaluated on Professional Dispositions by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as "unacceptable" in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions. Students who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

College of Science

UNDERGRADUATE:

Overview

Pursuit of knowledge through scientific study has been the cornerstone of human accomplishment throughout history. The College of Science continues this tradition by providing undergraduate students with curricula that allow exploration and mastery of both the basic concepts and most recent advances of modern science and preparation for professional scientific careers. The College of Science consists of the departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics, and Psychology. Bachelor of Science (B.S.) and Bachelor of Arts (B.A.) degrees offered by these departments prepare students to pursue a wide variety of rewarding, professional scientific careers or graduate study. Bachelor of Arts and Bachelor of Science degrees are offered in all departments. Bachelor of Arts degrees allow students to develop a broad liberal education with a concentration in science and are particularly appropriate for careers in science teaching. Bachelor of Science degrees provide students with a more intensive background in science, preparing them for advanced graduate study or entry into exciting technological careers in industry, medicine, government, business, or commerce. A wide range of degree options within departmental B.S. programs provide students with career-oriented course work required to pursue professional career paths in specific scientific fields. All departments within the college provide highly accessible student academic and career advising that support customization of degree plans to meet a student's specific career goals.

The College of Science fosters interaction between students and faculty. Faculty actively participate as advisors to student scientific societies and are readily available to assist or advise students both within and outside the classroom. Faculty members in all departments actively participate in research supported by world-class research facilities and modern scientific equipment. Undergraduate science majors are encouraged to engage in research under the supervision of a faculty member of their choice, many of whom have international reputations for their scholarly contributions. Students can receive course credit for supervised research.

Beyond the undergraduate degree, the College of Science offers programs leading to graduate degrees. All departments offer Master of Science degrees (M.S.) that allow students to pursue technologically intensive careers in public or private arenas. A Master of Arts in Science (M.A.I.S.) degree program specifically prepares students for careers as science teachers. The departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics and Psychology offer the Doctor of Philosophy degrees (Ph.D.) that allow students to carry out independent dissertation research within a chosen scientific specialty, leading to careers in research and/or university teaching. The M.S. and Ph.D. degrees offered by the Graduate Program in Environmental Science and Engineering prepare students for careers as environmental professionals. The Graduate Catalog provides details of the college's master's and doctoral degree programs.

Also available to undergraduate students in the College of Science are unique and innovative combined degree programs leading to both a B.S. degree and a graduate or professional degree within an accelerated time frame. These combined degree programs include the five-year Bachelor of Science (B.S.) in Biology/Master of Business Administration (M.B.A.) degree programs in Health Care and Biomedical Sciences Management and a five-year B.S. in Biology/Master of Biomedical Engineering (M.B.E.) degree program (see the Department of Biology section of this catalog for detailed descriptions of these programs).

The College of Science takes pride in offering students outstanding degree programs in all of its departments. These programs are marked by excellent teaching, broad undergraduate research opportunities and superior academic and career advising. Graduates of these degree programs are highly competitive in the job market or when applying to nationally recognized graduate or health professions schools. Please visit the College of Science and speak with one of our advisors. Call 817.272.3491 to make an appointment.

Opportunities in Science

The future marvels of the 21st century will spring from science just as did those of the 20th century. The human genome project, miracle drugs, efficient fuels, arrays of new synthetic materials, the transistor, the laser, nuclear power, solar energy, computers, the Worldwide Web, global information systems, the electron microscope, nanotechnology, bioinformatics and sophisticated techniques for locating mineral deposits are merely a few examples of the crowning scientific achievements of the past century. Discoveries of similar or greater magnitude lie ahead in this new century as scientists bring their talents to bear on modern society's pressing problems such as alternative energy sources, environmental protection, and improved health care. Students graduating from College of Science degree programs have the unique opportunity to participate in this century of new and unparalleled scientific discovery.

Requirements for Admission to the College of Science

The University of Texas at Arlington does not admit students to specific degree programs. Instead students wishing to pursue a major in one of the College of Science undergraduate degree programs must apply to the appropriate academic unit for acceptance into that program. Students should familiarize themselves with the general requirements for acceptance to the degree program of their choice as well as the specific requirements for granting of the degree.

ACADEMIC POLICIES FOR COLLEGE OF SCIENCE MAJORS

In the College of Science, students are required to maintain a minimum overall GPA of 2.25 in all their course work as well as a minimum GPA of 2.25 in their major course work in order to remain in good standing within their degree program. Students whose overall or major GPA falls below 2.25 will be dropped as a major in the College of Science and must select an alternative major.

The general College of Science policy on academic probation may be superseded by more rigorous policies within specific science degree programs.

ACADEMIC POLICIES FOR SCIENCE MINORS

A science minor consists of 18 credit hours or more in any one of the departments within the college. At least 6 of the 18 hours must be in advanced 3000 or 4000 level courses. All classes that are to be used toward a minor must also be applicable toward a major in the same discipline. Non majors courses may not be applied toward a minor.

A 2.0 grade average must be maintained in the minor in order to be approved by the minor department. All classes for a science minor must be approved by an academic advisor in the minor department. Transfer students must complete at least nine hours toward the minor at UT Arlington, and six of the nine must be 3000 or 4000 level.

Transfer Students

Field of Study

Students who complete an approved field of study curriculum in whole or in part will receive academic credit for the equivalent courses within their selected field of study at UT Arlington. To view the field of study curriculums approved by the Texas Higher Education Coordinating Board, visit www.theccb.state.tx.us (<http://www.theccb.state.tx.us>).

Core Complete

Students who transfer from a Texas community college or university and are certified as core complete shall have satisfied the core requirements of UT Arlington. Academic departments may, in some instances, require specific courses outside the major as prerequisites for major course work.

Academic Standards

Students who wish to be admitted to a department within the College of Science must have a grade point average of 2.25 or higher in all college course work completed prior to application for admission to the UT Arlington College of Science.

COMPETENCE IN COMPUTER USE

Graduating students are expected to be proficient in the use of computers. Proficiency is considered to be the ability to utilize word-processing, database/spreadsheet, statistical, graphical and other representative software applications in a student's major discipline. Each student should be able to tap the communications, analytical, and information-retrieval potential of computers to solve scientific problems and evaluate research results. Students should consult with their individual department, school or college undergraduate advisors to determine the mechanisms by which they can demonstrate computer competency. A student may be required to pass a proficiency examination or complete a department- or college-designated computer proficiency course to meet this requirement.

COMPETENCE IN ORAL PRESENTATIONS

Graduating students are expected to have proficiency in oral communication skills including interaction in classroom settings to meet the needs of their course work and utilization of acceptable grammar and pronunciation in formal presentations. Students should consult their individual department, school or college undergraduate advisors to determine the mechanisms by which they can demonstrate oral communication skills competency. A student may be required to pass a proficiency examination or complete a department- or college-designated oral communication skills course to meet this requirement.

SUBSTITUTIONS FOR MODERN AND CLASSICAL LANGUAGES IN THE COLLEGE OF SCIENCE BACHELOR OF ARTS DEGREE REQUIREMENTS

With the approval of the major advisor and the Dean of Science, a student may substitute two courses in a single area cluster for six hours of a modern or classical language. The area clusters¹:

African American Area Cluster

HIST 3365	AFRICAN-AMERICAN HISTORY TO 1865	3
HIST 3366	AFRICAN-AMERICAN HISTORY, 1865-PRESENT	3
POLS 4318	POLITICS OF AFRICAN AMERICANS	3
HIST 4374	AFRICAN HISTORY I	3
HIST 4375	AFRICAN HISTORY II	3
HIST 4376	AFRICAN DIASPORA I	3
HIST 4377	AFRICAN DIASPORA II	3
ENGL 3345	AFRICAN AMERICAN LITERATURE	3

Mexican Area Cluster

HIST 3368	MEXICAN AMERICAN HISTORY	3
HIST 3369	HISTORY OF LATINO RELIGIONS	3
HIST 4368	HISTORY OF MEXICO	3
POLS 3317	MEXICAN POLITICS AND U.S.-MEXICO RELATIONS	3
POLS 4319	POLITICS OF MEXICAN AMERICANS	3
ENGL 3346	MEXICAN AMERICAN LITERATURE	3

American Indian Area Cluster

ANTH 3333	NORTH AMERICAN INDIANS	3
ANTH 3350	NORTH AMERICAN ARCHAEOLOGY	3
HIST 3367	AMERICAN INDIAN HISTORY	3
HIST 3370	THE IMAGE OF THE AMERICAN WEST	3

Russian Area Cluster

ENGL 3301	RUSSIAN LITERATURE IN TRANSLATION	3
HIST 4359	HISTORY OF RUSSIA TO 1855	3
HIST 4360	HISTORY OF RUSSIA SINCE 1855	3
POLS 4365	FOREIGN POLICIES OF RUSSIA AND THE SUCCESSOR STATES	3

Latin America Area Cluster

ART 3320	ART OF THE ANCIENT AMERICAS	3
HIST 4365	HISTORY OF SPAIN AND PORTUGAL	3
HIST 4366	LATIN AMERICAN HISTORY: ORIGINS THROUGH INDEPENDENCE	3
HIST 4367	LATIN AMERICAN HISTORY: POST-INDEPENDENCE TO THE PRESENT	3
POLS 3316	DICTATORSHIP AND DEMOCRACY IN LATIN AMERICAN POLITICS	3
POLS 4319	POLITICS OF MEXICAN AMERICANS	3

¹ One of ANTH 2322 GLOBAL CULTURES, or ANTH 3331 CULTURE AND PERSONALITY, or LING 2301 INTRODUCTION TO THE STUDY OF HUMAN LANGUAGES, may substitute for three hours in one of the area clusters.

Premedical/Pre dental and Post Baccalaureate Professional Programs

Advising of premedical/dental/pharmacy/optometry and veterinary medicine students is provided by the Office of the Dean of Science, Room 206 in the Life Science Building. Services for students include preadmission counseling, career counseling, and assistance in applying to professional schools. Many medical and dental schools request a recommendation from the applicant's undergraduate institution. At The University of Texas at Arlington, this recommendation is provided by the Health Professions Advisory Committee. The purpose of the Committee is to interview and evaluate applicants for admission to medical or dental school. Criteria for obtaining a Committee recommendation are established by the Committee and are periodically reviewed. Students planning to apply to professional schools should contact the Health Professions Advisor in the Office of the Dean of Science at least one year prior to making application.

Medical and dental school applicants should begin the application process in January of the year preceding their intended entry to professional school. An applicant's file should be complete, including the Health Professions Advisory Committee evaluation by the following May 1.

Students who plan to enroll for the fall MCAT and DAT examinations are expected to follow the spring application process. The professional schools will hold the applicant's credentials until MCAT and DAT scores are received.

In general, medical and dental school admission committees do not state a preference regarding an applicant's undergraduate major, leaving students to choose a degree program best suited to their special abilities and interests. Therefore, a student may choose any major, after conferring with the Health Professions Advisor, as long as the minimum requirements for admission to the medical or dental school are met.

Post Baccalaureate Premedical Program

The post baccalaureate premedical program is designed for those students who have previously completed a bachelor's degree and wish to pursue admission to medical school. Since student backgrounds may vary, each post baccalaureate program is custom designed for the individual student. Students in this program may complete premedical requirements in one to two years depending upon their undergraduate major and the time of entry to the program.

Post baccalaureate courses can be completed independently of a structured degree or certificate. The only concern on the part of the medical schools is that all requirements are completed. For those students who wish to receive a certificate in recognition of their studies, the College of Science offers a Certificate in Pre Professional Studies. The certificate requires completion of two upper division biology classes approved by the health professions advisor, two organic chemistry classes (CHEM 2321 ORGANIC CHEMISTRY & CHEM 2181 ORGANIC CHEMISTRY I LABORATORY, CHEM 2322 ORGANIC CHEMISTRY & CHEM 2182 ORGANIC CHEMISTRY II LABORATORY) and the second semester of physics (PHYS 1442 GENERAL COLLEGE PHYSICS II). In order to receive the certificate, students must maintain a 3.6 or higher grade point average in all required courses and the courses must be completed at UTA.

Students pursuing a major in the College of Science who plan to enter a health related profession may pursue courses related to their career goal either as electives or as a minor in Health Studies. A minor in Health Studies consists of 18 hours of course work selected from the following classes. SCIE 4301 ISSUES IN AMERICAN HEALTHCARE is required as a capstone course to pull together a comprehensive picture of healthcare in America.

ANTH 3369	MEDICAL ANTHROPOLOGY	3
BIOL 4357	HEALTH PSYCHOLOGY	3
ECON 3301	THE ECONOMICS OF HEALTH (Pre Req. ECON 2306)	3
HEED 1340	HEALTHY LIFESTYLES	3
HEED 3305	WOMEN'S HEALTH ISSUES	3
HIST 3307	HISTORY OF DISABILITY	3
PHIL 1304	CONTEMPORARY MORAL PROBLEMS	3
PHIL 3319	BIOMEDICAL ETHICS	3
POLS 4350	HEALTH POLITICS AND POLICY	3
SCIE 4301	ISSUES IN AMERICAN HEALTHCARE	3
SOCI 4320	MEDICAL SOCIOLOGY	3

Foreign Clinical Experience

Students who wish to gain experience providing care for underserved persons outside the U.S. may enroll in a summer Foreign Clinical Experience Program jointly coordinated by the School of Nursing and the College of Science. Students in this program first take a class that familiarizes them with the culture of the country they are visiting. They then travel to the host country where they assist in a designated clinical setting. Upon completion of the experience, students submit a paper summarizing what they have learned and are awarded course credit for their experience.

Allied Health Programs

The University of Texas at Arlington offers prerequisites for a number of programs in the allied health sciences. Career counseling, degree plan evaluation and assistance in procuring hands-on experience are available for students seeking degrees in:

Health Care Administration
 Physical Therapy
 Dental Hygiene
 Physician's Assistant
 Prosthetics and Orthotics
 Medical Technology¹
 Dietetics

as well as other related fields. These services are offered through the office of the Allied Health Coordinator, Department of Biology, Room 351, Life Science Building.

¹ The program leading to a Bachelor of Science Degree in Medical Technology is described under the Department of Biology.

Teacher Certification in the Sciences

Programs leading to teacher certification at secondary levels are available in departments of the College of Science in coordination with the College of Education and Health Professions. Included among these are secondary certification in Composite Science offered in the Departments of Biology and Earth and Environmental Sciences; in Life Science offered in the Department of Biology; in Physical Science offered in the Departments of Physics and Chemistry and Biochemistry; in Chemistry offered in the Department of Chemistry and Biochemistry; in Physics/Mathematics offered in the Department of Physics; and in Mathematics offered in the Department of Mathematics. Descriptions of these programs are provided in each department's section of this catalog.

Transfer Students

Students transferring from other institutions are invited to explore opportunities in the College of Science. Inquiries about the equivalency of their transferred courses and other questions related to transferring are welcome in the Office of the Dean of Science, 206 Life Science Building.

Students who plan to attend junior college or another senior college before entering UT Arlington can receive assistance in planning their course work programs and potentially avoid needless delay of graduation by consulting an advisor in the Office of the Dean of Science (206 Life Science Building) before matriculating.

Science Constituency Council

The Science Constituency Council is the official representative student organization for the College of Science with Student Government. Meeting twice monthly, the SCC serves both the College and its students. The SCC strives to involve a greater number of students in all aspects of the College of Science. SCC members are majors in the departments of the College. At least half of the voting members are elected during Student Congress elections. Self-nomination is encouraged.

Science Education and Career Center

501 S. Nedderman Dr. · 106 Life Science Bldg. · 817-272-2129

The Science Education and Career Center is an on-site resource facility designed to support student learning and course work in science and mathematics through self-study modules and a variety of study aids. In cooperation with College of Science faculty, the center offers a full spectrum of multimedia resource materials and study aids for students in biology, chemistry, geology, mathematics, physics and psychology classes. The Science Education and Career Center also provides students with a broad spectrum of information on career opportunities in science and career development presentations from a wide variety of scientific fields. The center also provides students with quiet study areas and a study lounge.

Materials currently available include:

- Videotapes
- VCR viewing stations
- Study guides and sample exams
- Lab notes and solutions manuals
- Interactive CD-ROMs
- Hands-on models
- Science careers resources and counseling
- On-site photocopiers
- Networked computers

Math Clinic

The Math Clinic is a service provided on a walk-in basis for all math students enrolled in:

MATH 0302	FUNDAMENTALS OF ALGEBRA	3
MATH 1301	CONTEMPORARY MATHEMATICS	3
MATH 1302	COLLEGE ALGEBRA	3
MATH 1303	TRIGONOMETRY	3
MATH 1308	ELEMENTARY STATISTICAL ANALYSIS	3
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	3
MATH 1316	MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS	3
MATH 1324	ALGEBRA AND TRIGONOMETRY	3
MATH 1325	ANALYTIC GEOMETRY	3
MATH 1421	PREPARATION FOR CALCULUS	4
MATH 1426	CALCULUS I	4
MATH 2326	CALCULUS III	3
MATH 2425	CALCULUS II	4
MATH 3319	DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA	3

It is located in Room 325, Pickard Hall, and is open seven days a week during the Fall and Spring semesters and with limited hours during the Summer semesters. The tutors are outstanding undergraduate students with demonstrated abilities for helping students.

Physics Clinic

The Physics Clinic is a tutoring service provided on a walk-in basis for students enrolled in:

PHYS 1441	GENERAL COLLEGE PHYSICS I	4
PHYS 1442	GENERAL COLLEGE PHYSICS II	4

PHYS 1443	GENERAL TECHNICAL PHYSICS I	4
PHYS 1444	GENERAL TECHNICAL PHYSICS II	4

The tutors include graduate students, faculty and outstanding undergraduates. The location and times are posted in the Physics Department Office, 108 Science Hall.

Science and Mathematics for the Non-Science Major

The College of Science provides a wide variety of science courses for non-science majors. These courses, including those listed below, have been specifically designed to be applicable to science and mathematics requirements for non-science majors. Non-major students should examine the requirements for their degrees before selecting science courses to meet those requirements. The listed courses are also intended to stimulate interest in science and mathematics beyond the specific degree requirements for non-science majors. The courses named have no prerequisites, few prerequisites, or prerequisites consisting of introductory courses only. The figures in parenthesis indicate the number of hours of instruction per week in the Fall and Spring Semesters. The first figure indicates the amount of time devoted to theory, and the second indicates the amount of time devoted to laboratory work.

BIOLOGY

BIOL 1301	NUTRITION	3
BIOL 1333	DISCOVERING BIOLOGY: MOLECULES, CELLS AND DISEASE	3
BIOL 1334	LIFE ON EARTH: EVOLUTION, ECOLOGY AND GLOBAL CHANGE	3
BIOL 2317	BASIC CONCEPTS IN HUMAN SEXUALITY	3
BIOL 3303	DRUGS AND BEHAVIOR	3

CHEMISTRY

CHEM 1300	INTRODUCTORY CHEMICAL PRINCIPLES	3
CHEM 1445	CHEMISTRY FOR NON-SCIENCE MAJORS	4
CHEM 1446	CHEMISTRY II FOR NON-SCIENCE MAJORS	4
CHEM 1451	CHEMISTRY FOR HEALTH SCIENCES	4

GEOLOGY

MATH 0302	FUNDAMENTALS OF ALGEBRA	3
MATH 1301	CONTEMPORARY MATHEMATICS	3
MATH 1302	COLLEGE ALGEBRA	3
MATH 1308	ELEMENTARY STATISTICAL ANALYSIS	3
MATH 1315	COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS	3

PHYSICS

PHYS 1300	INTRODUCTION TO MUSICAL ACOUSTICS	3
PHYS 1301	PHYSICS FOR NON SPECIALISTS I	3
PHYS 1302	PHYSICS FOR NON SPECIALISTS II	3

PSYCHOLOGY

The psychology courses listed below are of general interest. Such courses contribute significantly to a well-balanced education even though they do not apply to any science requirement.

PSYC 1315	INTRODUCTION TO PSYCHOLOGY	3
PSYC 2317	BASIC CONCEPTS IN HUMAN SEXUALITY ¹	3

PSYC 2443	RESEARCH DESIGN & STATISTICS I	4
PSYC 3301	PSYCHOLOGY OF HUMAN RELATIONS	3
PSYC 3304	ANALYSIS & MANAGEMENT OF BEHAVIOR	3
PSYC 3303	DRUGS AND BEHAVIOR ¹	3
PSYC 3306	PSYCHOLOGY OF CREATIVITY AND CREATIVE THINKING	3
PSYC 3310	DEVELOPMENTAL PSYCHOLOGY	3
PSYC 3311	ADULTHOOD AND AGING	3
PSYC 3312	SOCIAL & PERSONALITY DEVELOPMENT	3
PSYC 3313	CULTURAL PSYCHOLOGY	3
PSYC 3314	PSYCHOLOGY OF PERSONALITY	3
PSYC 3315	SOCIAL PSYCHOLOGY	3
PSYC 3316	ENVIRONMENTAL PSYCHOLOGY	3
PSYC 3317	INTRODUCTION TO CLINICAL AND COUNSELING PSYCHOLOGY	3
PSYC 3318	ABNORMAL PSYCHOLOGY	3
PSYC 3326	ANIMAL BEHAVIOR ¹	3

¹ Course can be taken as biology.

GRADUATE:

Mission and Philosophy

The College of Science graduate programs are committed to excellence in graduate education and research and contribute, along with other institutions in this country and throughout the world, to the expansion of scientific knowledge. Graduates of our programs are highly trained and educated scientists who will be able to contribute to the economic and social well-being of our state and nation.

OVERVIEW

With outstanding departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics and Psychology, the College of Science offers comprehensive graduate studies with our world class faculty and research programs. In addition to providing our students with strong core training in the physical and life sciences, we have a graduate program in Materials Science and Engineering and offer specialized Masters degrees for educators to expand their core science training. Interdisciplinary programs and Research Centers provide students with opportunities to span disciplines, and student research activities are complemented by excellent research facilities and state-of-the-art instrumentation. The College and Departments host a series of seminars to further expose our students to cutting edge science developments.

Master's degrees are offered in all of our departments, and we award Ph.D. degrees in Quantitative Biology, Applied Chemistry, Environmental and Earth Sciences, Mathematics, Applied Physics, Experimental Psychology, and Materials Science and Engineering. For application and entrance requirements, or more on our graduate programs, please call us or visit our Web site at www.uta.edu/cos.

Scholastic Activity and Research Interests of the Faculty

BIOLOGY

The Department of Biology has a wide array of research programs ranging from molecular through ecosystem levels of integration. The program boasts strengths in ecology and systematics, evolution, microbiology, genomics, and molecular biology, and has active funding from a variety of private and public agencies. The department also hosts centers for genomics, biological macrofouling, electron microscopy and a collection of vertebrates. The research program emphasizes quantitative aspects of biology and provides students with strong training in statistics and experimental design.

CHEMISTRY AND BIOCHEMISTRY

Research programs include synthetic work on natural products, medically active agents, novel ligands, new catalysts, luminescent materials, photocatalysts, supramolecular and metallosupramolecular compounds, molecular magnetism, molecular recognition, stabilization of reactive intermediates, solar energy conversion and electrically conducting polymers. Biochemical research includes studies of enzymology and molecular biology of bacterial metabolism, and studies on problems involved in anticancer therapy. Physical, analytical and electrochemical research includes studies of colloids and surfaces, electrode modification through thin film surface deposition, MALDI mass spectrometry and characterization of the electrical properties of polymers and other materials. Theoretical studies involve both a major computational program applying molecular orbital theory to a variety of problems.

EARTH AND ENVIRONMENTAL SCIENCES

Department research has a strong orientation toward the application of geochemistry, oceanography, geophysics and paleobiology to earth resources and the environment. Current research interests include analysis and modeling of geologic deformational structures, biostratigraphy of accreted terranes

of the Pacific Northwest and the middle Permian of West Texas, sedimentology, paleoclimatology, hydrology, fluvial geomorphology, environmental health, and plate tectonics.

MATHEMATICS

The Department of Mathematics at the University of Texas at Arlington is fast evolving into one of the premier centers in the Dallas/Fort Worth metroplex for mathematics research and education. Our active research faculty have strengths that lie in pure, applied mathematics, statistics, and mathematics education. Many of their research projects are supported by external grants. Recent faculty scholarly accomplishments attest to the high quality of research. The research interests of the faculty in the Mathematics Department include the following areas:

Algebra: homological theory of commutative Noetherian rings; noncommutative algebra using geometric methods: symbolic computations; representations of Lie Algebras and superalgebras.

Differential Equations, Integral Equations and Dynamical Systems: geometric study of integrable Hamiltonian systems; stability and instability of solitary waves; nonlinear dispersive waves; free boundary problems related to phase transition and multi-fluid flow; stochastic differential equations; control theory; inverse problems; computerized tomography.

Geometry: birational algebraic geometry and Mori theory; differential geometry and inverse spectral geometry; finite geometry related to nonassociative division algebras.

Mathematical Biology: mathematical modeling of microbial populations, biofilms and competition dynamics; population biology and epidemiology; neuronal dynamics.

Mathematical Statistics, Probability Theory and Stochastic Process: multivariate analysis, statistical inference, sample survey and statistical process control; stochastic processes and applications to stochastic differential equations, random graphs, path integrals, quantum mechanics.

Mathematical Education: mathematics program development, impact of reform mathematics learning strategies on mathematics teaching, mathematics problem solving for teaching.

Numerical Analysis: numerical solutions to ordinary and partial differential equations; moving grid, multigrid and multilevel adaptive methods; fluid dynamics (mechanics); numerical simulation and scientific computation; numerical combustion; software development.

PHYSICS

Current research in the department is primarily in the areas of condensed matter physics, materials science and high energy physics. The theoretical condensed matter group is engaged in cluster, electron transport, electronic structure, molecular dynamics and path integral computations having relevance to the chemical, electrical and magnetic properties of surfaces, metals and semiconductors. The experimental condensed matter group is engaged in studies of diamond coatings, magnetic multilayers, metals, semiconductors and surfaces using electron, positron, optical and magnetic resonance spectroscopies. The experimental high energy group is involved in collider experiments at Fermilab, Brookhaven Laboratory and CERN to study QCD and to search for supersymmetry and other physics beyond the standard model. Other active research areas include high energy theory, optics, parallel computing and statistical physics.

PSYCHOLOGY

Expertise and research activity include animal behavior, animal and human learning, cognitive processes, social psychology, psychobiology and developmental psychology. Current research interests include group brainstorming, verbal memory and neuropsychology, applied psychological measurement, pain systems, decision processes, naturalistic social cognition, stress, genetic and hormonal determinants of aggressive and defensive behaviors and parent-offspring interactions, sea turtle behavior, and infant mental representation of objects.

SCIENCE EDUCATION

The Master of Arts in Interdisciplinary Science (MAIS), a 36 credit hour degree program without a thesis requirement, was designed and developed by science teachers for science teachers. The program will help science educators strengthen and update their knowledge of content in two or more of the following cognate areas: biology, chemistry, earth & environmental sciences, mathematics, and physics. In addition to enhancing content knowledge, the courses will help educators develop teaching strategies that lead to improved student learning, implement high quality instructional materials, and develop skills in using various strategies for assessing student learning. The MAIS degree will serve the needs of classroom teachers, content-area and staff development specialists, curriculum developers, program directors, school administrators, college/university faculty, and educators from informal science institutions who have responsibility for designing, delivering, evaluating, and/or continuously improving standards-based science, mathematics, and technology instruction for students, prekindergarten through the undergraduate degree.

While engaging in the coursework, educators will become learners themselves to deepen their own mastery of scientific and/or mathematical content. The laboratory-based learning activities in the program will help science educators see teaching as less a matter of knowledge transfer and more as an activity of facilitation in which knowledge is generated, content is investigated in depth, and meaning is developed from experience. Graduates of the program will take their place as master science educators who are recognized as proven practitioners in delivering rigorous and relevant instruction and are valued as effective coaches, mentors, and teacher trainers.

Biology - Graduate Programs

Objective

The program leading to the degree of Master of Science in biology is designed to provide graduate education that will prepare students for vocations in industry, government, and teaching, and to pursue further graduate education leading to the doctorate. The doctoral program is designed to train students to apply sophisticated quantitative techniques to solving basic and applied problems in biology. Students in this program will attain substantially greater quantitative skills than in traditional doctoral programs in the biological sciences, providing them with a competitive advantage in business, industry, government, and academia.

Admission Requirements

The following are minimal requirements for entrance into the graduate program in Biology. However, satisfying or exceeding these requirements does not guarantee admission to the program. Admission to the program is determined solely by the Biology Graduate Studies Committee and the Graduate School and is based on an evaluation of all pertinent aspects of an applicant's record.

MASTER OF SCIENCE

Admission status in the Master of Science program is determined as follows:

Unconditional Admission

Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.

1. A Bachelor's degree in Biology or a Bachelor's degree in some other discipline with at least 12 hours of advanced level coursework (junior or senior level courses) in Biology.
2. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. Applicants overall GPA in the Sciences and within Biology are also considered.
3. A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1000 (old GRE scale), or 296 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.
4. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in graduate school.
5. Evidence of previous research experience may also be considered.
6. International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam or a minimum score of 7 on the Speaking portion of the IELTS exam.

Denial of Admission

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

Probationary Admission

If an applicant does not meet a majority of standards for unconditional admission outlined above, he or she may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in his/her first two long semesters of graduate coursework at UT Arlington.

Deferred and Provisional Admission

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Fellowships and Scholarships

Students that are unconditionally admitted will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

Master's Degree Requirements

Supporting work outside the student's major area may be taken in botany, chemistry, earth & environmental sciences, mathematics, microbiology, physics, and zoology. Approved courses in city and regional planning, civil engineering, environmental science and engineering, philosophy, psychology, and sociology may also be taken in support of the student's program. Subject to written approval by the Graduate Advisor and within the limitations stated in the General Graduate School Regulations, a student may take up to nine hours of coursework from among courses listed under Biology at the 3000 or 4000 levels.

MASTER OF SCIENCE

Non-thesis and thesis options are offered. The non-thesis option is designed to meet the needs of practicing teachers or those intending to enter the teaching profession. Students enrolled in the non-thesis option are required to complete 36 hours, including 24 hours of formal coursework in biology plus two hours of BIOL 5101 SPECIAL TOPICS IN BIOLOGY, BIOL 5391 INDIVIDUAL PROBLEMS IN BIOLOGY, and sufficient additional hours to complete course requirements. Students enrolled in the thesis option are required to complete 30 hours, including 18 hours of formal coursework (of which BIOL 5314 BIOMETRY is required), two hours of BIOL 5101 SPECIAL TOPICS IN BIOLOGY, BIOL 5698 THESIS, and sufficient additional hours to complete degree requirements.

Admission Requirements

DOCTOR OF PHILOSOPHY

Students interested in pursuing the Ph.D. in the Biology Department may apply for the B.S. - Ph.D. Track or the doctoral program directly depending on their background. The B.S. - Ph.D. Track is the point of entry into doctoral studies for students with a Bachelor's degree in Biology, but without 30 hours

of graduate level coursework in Biology or a master's degree in Biology. Students who have already accomplished these goals may apply directly for the doctoral program as Ph.D. students. Degree requirements are the same for both groups (see below).

B.S. - PH.D. TRACK STUDENTS

Admission status in the B.S. - Ph.D. Track program is determined as follows:

Unconditional Admission

Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.

1. A Bachelor's degree in Biology or a Bachelor's degree in some other discipline with at least 12 hours of advanced level coursework (junior or senior level courses) in Biology.
2. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. Applicants overall GPA in the Sciences and within Biology are also considered.
3. A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1100 (old GRE scale), 301 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.
4. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in graduate school.
5. Evidence of previous research experience may also be considered.
6. International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam or a minimum score of 7 on the Speaking portion of the IELTS exam.

Denial of Admission

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

Probationary Admission

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first two long semesters of graduate coursework at UT Arlington.

Deferred and Provisional Admission

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Fellowships and Scholarships

Students that are unconditionally admitted will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

PH.D. STUDENTS

Admission status in the doctoral program is determined as follows:

UNCONDITIONAL ADMISSION

Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.

1. A master's degree in Biology or at least 30 hours of graduate level coursework in Biology.
2. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. If an Applicant has a Master's degree, the GPA from their Bachelor's degree, as calculated by the Graduate School, will also be considered. If they have 30 hours of graduate coursework but no degree, the GPA from that 30 hours, as calculated by the Graduate School, will also be considered.
3. A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1100 (old GRE scale), or 301 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.
4. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in a doctoral program in quantitative biology.
5. Evidence of previous research experience including publications resulting from previous graduate work may also be considered.
6. International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam, or a minimum score of 7 on the Speaking portion of the IELTS exam.

Denial of Admission

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

Probationary Admission

The Department of Biology does not as a matter of course admit doctoral students on a probationary basis. Under exceptional circumstances, an applicant that does not meet the standards for unconditional admission outlined above, may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first two long semesters of graduate coursework at UT Arlington.

Deferred and Provisional Admission

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Fellowships and Scholarships

Students that have no provisional admission conditions to meet will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

Doctor of Philosophy Degree Requirements

Supporting work outside the student's major area may be taken in botany, chemistry, earth & environmental sciences, mathematics, microbiology, physics, and zoology. Approved courses in city and regional planning, civil engineering, environmental science and engineering, philosophy, psychology, and sociology may also be taken in support of the student's program. Subject to written approval by the Graduate Advisor and within the limitations stated in the General Graduate School Regulations, a student may take up to nine hours of coursework from among courses listed under Biology at the 3000 or 4000 levels.

The degree of Doctor of Philosophy in Quantitative Biology requires distinguished attainment both in scholarship and in research. In addition to meeting the minimum requirements of a planned course of study, the ultimate basis for conferring the degree must be the demonstrated ability to do independent and creative work and the exhibition of a profound grasp of the subject matter within the field.

Mathematics: Students will be expected to have (or complete during their first year of residence) a strong quantitative background including a formal course in differential and integral calculus (i.e., Calculus I).

General Course Requirements: A total of 45 credit hours should normally be completed including 24 hours of required and elective courses, and 21 hours of research courses. All students in the program are required to take BIOL 5314 (Biometry), Professional Development (BIOL 5102) and two seminar courses (2 x BIOL 5101) as part of their required courses.

Other requirements: Each student will make three research presentations that are open to the entire department. These may include the proposal defense, a research progress report, and the dissertation defense.

Biology Tracks: Students should follow one of the Biology Tracks described below: Ecology and Evolution, Genome Biology, or Microbiology and Molecular Biology.

Track Specific Quantitative Requirements:

Ecology and Evolution: Students in this track are required to take BIOL 5361 ADVANCED BIOMETRY and BIOL 5362 EXPERIMENTAL DESIGN. They will also be expected to have (or complete during their first year of residence) an additional calculus course (i.e., Calculus II).

Genome Biology: Students in this track are required to take one of the following courses in quantitative biology:

BIOL 5340	BIOINFORMATICS	3
BIOL 5420	GENETICS METHODS LAB	4
BIOL 5336	MOLECULAR EVOLUTION	3
BIOL 5364	POPULATION GENETICS	3

Microbiology and Molecular Biology: Students in this track are required to take one of the following courses in quantitative biology:

BIOL 5340	BIOINFORMATICS	3
BIOL 5333	BIOLOGICAL MODELING	3
BIOL 5421	Methods in Molecular Microbiology	4

Track Specific Additional Courses:

Ecology and Evolution: Students in this track are required to take 6 credit hours from among the following courses (or as advised by their supervisory committee):

BIOL 5344	AMPHIBIAN BIOLOGY	3
BIOL 5320	BIOGEOGRAPHY	3
BIOL 5333	BIOLOGICAL MODELING	3
BIOL 5315	COMMUNITY ECOLOGY	3
BIOL 5350	CONSERVATION BIOLOGY	3
BIOL 5351	ENVIRONMENTAL MICROBIOLOGY	3
BIOL 5311	EVOLUTION	3
BIOL 5328	LANDSCAPE ECOLOGY	3
BIOL 5354	LIMNOLOGY	3
BIOL 5357	MARINE BIOLOGY	3
BIOL 5325	PLANT ECOLOGY	3
BIOL 5310	SELECTED TOPICS IN BIOLOGY	3
BIOL 5367	THEORETICAL SYSTEMATICS	3
BIOL 5326	WETLANDS ECOLOGY	3

Genome Biology: Students in this track are required to take 9 credit hours from among the following courses (or as advised by their supervisory committee):

BIOL 5312	ADVANCED GENETICS	3
BIOL 5331	ADVANCED MOLECULAR BIOLOGY	3
BIOL 5335	ESSENTIALS OF GENOMICS	3
BIOL 5311	EVOLUTION	3
BIOL 5308	GENOME ANALYSIS	3
BIOL 5319	HUMAN GENETICS	3
BIOL 5334	MOBILE DNA MECHANISMS & REGULATION	3

Microbiology and Molecular Biology: Students in this track are required to take 9 credit hours from among the following courses including (or as advised by their supervisory committee):

BIOL 5351	ENVIRONMENTAL MICROBIOLOGY	3
BIOL 5309	IMMUNOBIOLOGY	3
BIOL 5302	MICROBIAL GENETICS	3
BIOL 5304	VIROLOGY	3

Additional Courses: Students in the program are required to take 6 hours of additional courses as advised by their supervisory committee.

Research hours:

BIOL 6999	DISSERTATION (final semester)	9
Select 21 hours of the following: ¹		21
BIOL 5101	SPECIAL TOPICS IN BIOLOGY	
BIOL 5291	INDIVIDUAL PROBLEMS IN BIOLOGY	
BIOL 5193 - BIOL 5693		
BIOL 5398	THESIS	
BIOL 5698	THESIS

BIOL 6391	ADVANCED RESEARCH	
BIOL 6491	ADVANCED RESEARCH	
BIOL 6591	ADVANCED RESEARCH	

BIOL 6691

ADVANCED RESEARCH

Total Hours

30

Please Note:

The grade of **R** (research in progress) is a permanent grade; completing course requirements in a later semester cannot change it. To receive credit for an **R**-graded course, the student must continue to enroll in the course until a passing grade is received. This is the case for dissertation hours.

An incomplete grade (the grade of **I**) cannot be given in a course that is graded **R**, nor can the grade of **R** be given in a course that is graded **I**. To receive credit for a course in which the student earned an **I**, the student must complete the course requirements. Enrolling again in the course in which an **I** was earned cannot change a grade of **I**. At the discretion of the instructor, a final grade can be assigned through a change of grade form.

Three-hour thesis courses and three- and six-hour dissertation courses are graded **R/F/W** only (except social work thesis courses.) The grade of **P** (required for degree completion for students enrolled in thesis or dissertation programs) can be earned only in three-, five-, six-, or nine-hour dissertation courses and nine-hour thesis courses and when the student has taken 9 or more hours of dissertation hours BIOL XX99. In the course listings below, **R**-graded courses are designated either "Graded **P/F/R**" or "Graded **R**." Occasionally, the valid grades for a course change. Students should consult the appropriate **graduate advisor** or instructor for valid grade information for particular courses. (See also the sections titled "**R**" Grade, Credit for Research, Internship, Thesis or Dissertation Courses and Incomplete Grade in this catalog.)

¹ these courses can be repeated for credit.

Biology - Undergraduate Programs

Academic Advising: 345 and 346 Life Science Bldg. • 817-272-2408

Overview

The Department of Biology curriculum familiarizes students with basic concepts inherent to biological science and allows them to master new, cutting edge areas of biological research. Its degree programs prepare students to enter exciting and challenging careers in the many diverse and rapidly expanding areas of biological employment, including environmental biology, conservation, microbiology, the health sciences, science teaching, pharmacology, biotechnology, molecular biology, neurobiology, and forensics as well as in basic biological research. Superior teaching and faculty involvement with students is a high priority in the department. Many of its faculty have received university-wide awards for teaching excellence. Biology faculty have internationally recognized research programs in which students are actively encouraged to participate through credit for supervised research. Thus, students can prepare for careers in specific areas of biology by being actively engaged in research related to that career area under faculty supervision.

The Department of Biology offers four programs of study leading to an undergraduate degree. These are the Bachelor of Arts (B.A.) degree in Biology and the Bachelor of Science (B.S.) degrees in Biology, Microbiology or Medical Technology. The Microbiology B.S. degree prepares students to enter careers in the highly diverse field of microbiology, ranging from control of infectious diseases, through public health and environmental microbiology to genetic engineering and molecular biology or to pursue graduate study. The B.S. in Medical Technology combines course work with 16 months of clinical laboratory training in an accredited hospital school of medical technology. This degree prepares students for careers as technicians in medical laboratories, clinics, hospitals and industry. The Biology B.S. program provides students with a strong background in the fundamental tenets of the biological sciences while allowing them to customize their degree plans to meet specific career goals. The Biology B.A. program is suitable for career preparation in a number of biological fields and for teaching certification in Biology or Composite Science.

There are two degree plan options through which students can complete their Biology B.S. degree. Option one in General Biology allows students to choose elective courses beyond the biology core that prepare them to enter a specific professional field, such as medical, dental, veterinary, or graduate school for further study and research. Students pursuing health professions careers should contact the Health Professions Advisor for assistance in selecting course electives pertinent to their specific career path. Students interested in genomics, environmental biology, or other areas of specialization should contact their Biology advisor for assistance with recommended courses. Option two in Forensics provides students with the training necessary to pursue exciting careers in biological forensics, DNA testing or police department laboratories.

All Biology degrees and degree plan options are supported by providing students with ready access to both academic and career advice provided by full-time undergraduate advisors and faculty members knowledgeable with a student's particular areas of academic and/or career interests. Students are strongly encouraged to interact with departmental and faculty advisors throughout their academic careers, particularly through independent research under faculty supervision, to develop the skills and course work background that will allow them to achieve their future academic/career goals. Detailed information on Biology and degree plan options is provided later in this section.

Beyond the undergraduate B.A. and B.S. degrees, the Department of Biology offers programs leading to graduate degrees, including the Master of Science in Biology (M.S.) which allows students to pursue biological careers requiring a greater knowledge base than provided by an undergraduate B.A. or B.S. degree and a Doctor of Philosophy Degree in Quantitative Biology (Ph.D.) which allows students to carry out independent dissertation research within a chosen area of biological research leading to a career in research and/or university teaching. The Ph.D. degree in Biology provides

students with a strong background in modern mathematical approaches to biological research, including biostatistics, experimental design and mathematical modeling of biological systems. The Graduate Catalog provides details of the Biology M.S. and Ph.D. degree programs.

The Department of Biology takes pride in offering students outstanding degree programs supported by excellent teaching, undergraduate research opportunities and superior academic advising. These programs make graduates highly competitive in the job market or when applying to graduate or professional degree programs. Please visit the Biology Department and speak with one of our advisors. Phone 817-272-2408 to make an appointment.

Applying for Major Status in Biology

Freshmen who have no previous college work must complete the following courses before applying to the Biology Department to become a major:

19 hours from the University core (consisting of courses in English, history, political science, et al. See list of general core curriculum requirements set by the University elsewhere in this catalog) and a minimum of 20 hours from the courses below:

BIOLOGY

BIOL 1441	CELL AND MOLECULAR BIOLOGY	4
BIOL 1442	EVOLUTION AND ECOLOGY	4
BIOL 2300	BIOSTATISTICS <small>BIOL 2300 not required for BIOL B.A.</small>	3
BIOL 3315	GENETICS	3

MEDTECH

BIOL 1441	CELL AND MOLECULAR BIOLOGY	4
BIOL 1442	EVOLUTION AND ECOLOGY	4
BIOL 3444	GENERAL MICROBIOLOGY	4

MICROBIOLOGY

BIOL 1441	CELL AND MOLECULAR BIOLOGY	4
BIOL 3444	GENERAL MICROBIOLOGY	4
BIOL 3445	METHODS IN MOLECULAR MICROBIOLOGY	4
BIOL 4302	MICROBIAL GENETICS	3

CHEMISTRY

CHEM 1441	GENERAL CHEMISTRY I	4
CHEM 1442	GENERAL CHEMISTRY II	4

The applicant for status as a biology major **MUST** have a GPA of 2.25 or better in all courses taken, and 2.25 or better in biology courses. An application form is available from the undergraduate advisor (Room 345 or 346 LS).

A suggested course sequence for entering freshmen students for the first two years is:

First Year

First Semester	Hours	Second Semester	Hours
ENGL 1301	3	ENGL 1302	3
MATH 1421	4	MATH 1426	4
CHEM 1441	4	CHEM 1442	4
BIOL 1441	4	BIOL 1442	4
	15		15

Second Year

First Semester	Hours	Second Semester	Hours
CHEM 2321 & CHEM 2181	4	CHEM 2322 & CHEM 2182	4
Lang/Phil/Cult	3	BIOL 3315	3
POLS 2311	3	BIOL 3427 or 3454	4

BIOL 2300	3	POLS 2312	3
BIOL 3444	4		
	17		14

Total Hours: 61

- ¹ Micro majors will substitute BIOL 3444 GENERAL MICROBIOLOGY in the second semester of their freshman year, and another micro class in the first semester of their sophomore year. Med Tech majors will substitute BIOL 3444 GENERAL MICROBIOLOGY during the first semester of their sophomore year.

Transfer students interested in one of the degree programs in biology will, after admission to UT Arlington, be placed into pre-major status: BIOL intended, MEDT intended, or MICR intended major. To apply for status as a major in biology, microbiology, or medical technology, these students must have a minimum of 39 hours which include:

- At least 28 hours in the University core curriculum including eight hours of freshman chemistry, with lab (credit by transfer or earned at UT Arlington).
- At least 11 hours in biology courses taken at UT Arlington that apply to one of the three programs awarded by the department.

At the time of application for major status in biology, the student must have a GPA of 2.25 or better in courses taken at UT Arlington (both overall and in biology courses). An application form for requesting major status is available from the Department Advisor (Room 346 LS). Transfer students will be evaluated for major status only after completing 11 hours in biology in residence at UT Arlington.

Maintaining Major Status

- Students who are accepted as majors in biology, microbiology, or medical technology must thereafter maintain a GPA of 2.25 or better in all courses and in biology courses. Any student whose GPA falls below 2.25 in either of these categories will be returned to undeclared status at the end of the semester in which the deficiency occurs.
- Students who fall into academic difficulty will be required to meet with their Advisor and/or Academic Dean in order to discuss academic consequences and their future status in the College of Science. Please refer to the College of Science section of the catalog, "Academic Policies for College of Science Majors".
- Students who have lost status as a major must have departmental permission to enroll in any junior or senior course in biology at UT Arlington.
- Students in the medical technology program should have a 2.8 GPA or higher after completing three years of course work to be competitive when applying for the final year of training in medical technology.

General Information

- In order to receive a B.A. degree in Biology or a B.S. degree in Biology or Microbiology from UT Arlington, transfer students must complete a minimum of 18 hours of junior or senior level courses (12 of the 18 hours in Biology) at UT Arlington. Transfer students who are approved for admission to the medical technology program must complete at least 13 hours of junior or senior level courses in biology at UT Arlington to qualify for a B.S. Degree in Medical Technology from UT Arlington.
- No student working toward a B.A. degree in Biology or a B.S. degree in Biology, Medical Technology or Microbiology may take any biology course on a Pass/Fail basis other than:

BIOL 3149	COOPERATIVE PROGRAM IN BIOLOGY	1
BIOL 3249	COOPERATIVE PROGRAM IN BIOLOGY	2
BIOL 3349	COOPERATIVE PROGRAM IN BIOLOGY	3
BIOL 4179	DIRECTED STUDY	1
BIOL 4279	DIRECTED STUDY	2
BIOL 4379	DIRECTED STUDY	3
BIOL 4189	RESEARCH IN BIOLOGY	1
BIOL 4289	RESEARCH IN BIOLOGY	2

- Students are not allowed to receive credit for biology courses at the sophomore level or above by special examination.
- Exceptions to the core course prerequisites for advanced courses will be made only for specialized degree programs such as Medical Technology, Nursing, and Physical Education, and for selected non-majors with special needs.

Computer and Oral Communication Competency Requirement

Students majoring in Biology, Microbiology, or Medical Technology are required to demonstrate computer use and oral communication competencies.

The University requirement of competency in computer proficiency is satisfied by completion of the BIOL 1441 or 1442 labs.

Oral communication competency can be demonstrated by completion of COMS 1301 FUNDAMENTALS OF PUBLIC SPEAKING, COMS 2302 PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING, or an approved substitute.

Teacher Certification

A student interested in earning a Bachelor of Science degree with a major in biology with secondary teacher certification, or in biology or life-earth science as a second teaching field, should refer to the “Bachelor of Arts Degree in Biology – Secondary Teacher Certification” and the “Bachelor of Arts Degree in Biology – Composite Science Certification” degree plans for teacher certification requirements and for biology courses recommended for each teaching field option.

Requirements for a Bachelor of Arts Degree in Biology

The Bachelor of Arts Degree in Biology is suitable for career preparation in a number of biological career fields and for students who desire teaching certification with a teaching field in biology or composite science. Students choosing this program are required to consult with the Department of Biology's undergraduate advisor to develop an acceptable degree plan. Students seeking teaching certification with a teaching field in biology or composite science are required to consult with the Department of Biology certification advisor in order to develop an acceptable teaching certification degree program.

Requirements for a Bachelor of Science Degree in Biology

The requirements to receive a Bachelor of Science Degree in Biology can be achieved through degree plans under either of two options (i.e., General Biology, and Forensics Biology) detailed in this section. Before choosing a B.S. degree program under one of these options, please consult with a biology undergraduate advisor and biology faculty associated with the chosen option.

OPTION 1: GENERAL BIOLOGY

The General Biology Option is intended for students studying basic aspects of the biological sciences. Students developing degree plans under the General Biology Option choose elective courses in Biology, other sciences, and nonscience areas to develop either a broad knowledge-base in Biology or to focus their studies in a particular area of Biology (a list of potential areas of study in Biology and the faculty who can assist students in developing degree plan programs in these areas is available from the undergraduate biology advisors). The General Biology Option will prepare students for careers in a variety of the Biological Sciences (including Health Professions, Genomics, Ecology/Environmental Studies, etc.) or for graduate study in Biology at the Master's or Ph.D. levels.

Fourth Year

First Semester	Hours	Second Semester	Hours
BIOL Advanced Electives ^{Ex: BIOL 33xx & BIOL 4189 or 3149}	4	BIOL Advanced Electives	6
HIST 1312	3	Advanced General Electives	5
Social and Behavioral Science	3	Any Level Electives	3
Any Level Electives	5		
	15		14

Total Hours: 120

¹ See /degreerequirements/generalcorerequirements (p. 93)

² Transfer students must present a minimum of six semester credit hours of equivalent or higher level mathematics courses through transfer or placement examination.

OPTION 2: FORENSICS

The option in forensics is intended to prepare students for a career in biological forensics by emphasizing relevant courses in biology and related disciplines. This option is designed for students who wish to seek employment in a forensics, DNA testing, or a police department laboratory upon graduation, and, as such, an internship (BIOL 3349 COOPERATIVE PROGRAM IN BIOLOGY) is recommended when possible. Students pursuing this option are encouraged to seek advice from the faculty forensics advisor.

Pre-Professional Courses

General Core Requirements (p. 93)		39
CORE REQUIREMENTS FOR BIOLOGY		
ENGL 1301	RHETORIC AND COMPOSITION I	3

Bachelor of Science Degree in Medical Technology

A student who completes the special degree plan given below plus 16 months of clinical laboratory training in an accredited hospital school of medical technology may receive the degree of Bachelor of Science in Medical Technology, which will be conferred by The University of Texas at Arlington. Graduates may become certified in medical technology by passing the examination of the Board of Registry of the American Society of Clinical Pathologists (ASCP).

Dual Degree Plan: Bachelor of Science in Biology and Master of Science in Biomedical Engineering

This five-year curriculum prepares students for careers in the fast growing biotechnology and biomedical engineering industries. The curriculum also prepares students for medical school and advanced study. Students are required to take courses from engineering, life sciences and liberal arts, culminating in a five-year Master of Science Degree in Biomedical Engineering, and a Bachelor of Science Degree in Biology. The curriculum is offered jointly by the College of Engineering and the College of Science. In this program, two areas of emphasis are offered:

1. Bioimaging and
2. Biomaterials and Tissue Engineering.

DESCRIPTION

Biomedical engineers use quantitative methods and innovation to analyze and solve problems in biology and medicine. Students choose the biomedical engineering field to be of service to people, to partake in the excitement of working with living systems, and to apply advanced technology to the complex problems of medical care.

Through this program, students learn the essentials of life science, engineering theory, and the analytical and practical tools that enable them to be successful in the biotechnology and biomedical engineering industries. The program includes course work in the basic sciences, core engineering, biomedical engineering, and advanced biotechnology disciplines. Both didactic classroom lectures and hands-on laboratory experience are emphasized. Additionally, students are required to take general educational courses in literature, fine arts, history, political science, and social science.

CAREER OPPORTUNITIES

The program prepares students as biomedical engineers for careers in industry, in hospitals, in research facilities of educational and medical institutions, and in government regulatory agencies. It also provides a solid foundation for those wishing to continue for advanced degrees. For those planning to pursue a medical degree, this cross-disciplinary curriculum offers a solid foundation in engineering, which is an advantage in preparing for a medical career.

REQUIREMENTS

Regardless whether a student chooses Bioimaging or Biomaterials and Tissue Engineering emphasis, after completion of 120 semester credit hours of the undergraduate courses from the list for the emphasis (below) and prior to taking any graduate course, the student must apply to the UT Arlington Graduate School for admission to the Bioengineering Department. A minimum grade point average of 3.0 in the 120 semester credit hours as well as a minimum average of 3.0 in the required English courses (ENGL 1301 RHETORIC AND COMPOSITION I and ENGL 1302 RHETORIC AND COMPOSITION II) and a minimum average of 3.0 in the required Mathematics courses (MATH 1426 CALCULUS I, MATH 2425 CALCULUS II, MATH 2326 CALCULUS III and MATH 3319 DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA) is required for admission to the Biomedical Engineering Graduate Program. The student should also submit two letters of recommendation, one from a faculty member and one from the Biology undergraduate advisor.
