

Bachelor of Business Administration in Information Systems

About This Program

The Bachelor of Business Administration in Information Systems provides students with a generalized business knowledge as well as specialized skills for addressing technical and operations needs of an organization. Students are prepared for a variety of jobs including business analyst, programmer/developer, systems designer, supply chain management, and operations process and control.

Competencies

1. Upon completion, students will be able to gather requirements for business applications and develop application software.
2. Upon completion, students will be able to design and implement databases to manage business data.
3. Upon completion, students will be able design and deploy computer networks to support business data communication.
4. Upon completion, students will demonstrate critical thinking and communication skills.
5. Upon completion, students will understand core business concepts in various functional areas and apply these concepts to develop, deploy, and manage information systems that effectively address strategic business challenges.

Curriculum

Students must meet all lower division requirements before enrolling for upper division courses. Specified prerequisites are designated for certain courses.
