

Bachelor of Arts in Interdisciplinary Studies

About This Program

The Bachelor of Arts in Interdisciplinary Studies (BAIS) provides an individually crafted degree for the jobs of the future. The program offers students the opportunity to create a truly customized degree plan. While traditional disciplines are slow to adjust to job demands, Interdisciplinary Studies allows students to build their degree to fit the job students want to be the leaders of tomorrow. Because of the flexibility of the degree, the Interdisciplinary Studies program is intended to meet the needs of creative and intellectually curious students.

Both the Bachelor of Arts and the Bachelor of Science in Interdisciplinary Studies (BSIS) provide students the opportunity to create degrees that will provide access to new careers. Students pursuing the BAIS take more credit hours in foreign language while students pursuing the BSIS take more credit hours in mathematics.

The interdisciplinary studies program (INTS) at the University of Texas at Arlington enables students to build rigorous and coherent personalized degree plans that transcend traditional disciplinary boundaries. The individualized degrees allow students to develop themes or topics that fall outside the usual university departmental boundaries requiring a multi-disciplinary, cross-disciplinary, and trans-disciplinary understanding and analytical techniques.

Students in the program are expected to work closely with their adviser to develop an innovative program of study that draws on the rich academic resources of the University, including existing minors and certificates.

Competencies

1. Upon graduation, INTS students will be able to write with clarity for optimum precision.
2. Upon graduation, INTS students will be able to produce a final project that is well organized.
3. Upon graduation, INTS students will be able to produce a project that incorporates interdisciplinary perspectives related to their chosen field of study.
