This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 2245 and Passing Grade on Sophomore Proficiency Exam.

MUSI 3245. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 3244.

MUSI 3246. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Prerequisite: C or better in MUSI 2247 and Passing Grade on Sophomore Proficiency Exam.

MUSI 3247. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Prerequisite: C or better in MUSI 3246.

MUSI 3248. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 2249 and Passing Grade on Sophomore Proficiency Exam.

MUSI 3249. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 3248.

MUSI 3250. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 2251 and passing grade on Sophomore Proficiency Exam.

MUSI 3251. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 3250.

MUSI 3252. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Prerequisite: C or better in MUSI 2253 or MUSI 2145 and MUSI 2147, and passing grade on Sophomore Proficiency Exam.

MUSI 3253. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Prerequisite: C or better in MUSI 3252.

MUSI 3254. PRIVATE LESSONS IN JAZZ PIANO. 2 Hours.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 2143 and MUSI 2155 and passing grade on Sophomore Proficiency Exam.
MUSI 3255. PRIVATE LESSONS IN JAZZ PIANO. 2 Hours.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 3254.

MUSI 3257. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 2258 and passing grade on Sophomore Proficiency Exam.

MUSI 3258. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 3257.

MUSI 3259. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset. Prerequisite: C or better in MUSI 3238.

MUSI 3267. PRIVATE LESSONS IN HARPSICHORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 2268 and passing grade on Sophomore Proficiency Exam.

MUSI 3268. PRIVATE LESSONS IN HARPSICHORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 3267.

MUSI 3294. APPLIED PEDAGOGY. 2 Hours.
A study of teaching techniques as they apply to studio or class instruction in applied music. Specific areas of study will change from semester to semester. May be repeated for credit. Prerequisite: Faculty approval.

MUSI 3295. PIANO PEDAGOGY. 2 Hours.
Open to music majors only. Teaching methods of beginning level private and class instruction. Prerequisite: Faculty approval.

MUSI 3300. MUSIC HISTORY I. 3 Hours.
The music of western civilization from ancient times to 1750. Prerequisite: C or better in MUSI 2326 or faculty approval.

MUSI 3301. MUSIC HISTORY II. 3 Hours.
The music of western civilization from 1750 to the present. Prerequisite: C or better in MUSI 2326 or faculty approval.

MUSI 3302. FORM AND ANALYSIS. 3 Hours.
Structure and analysis of the major forms of music literature. Prerequisite: C or better in MUSI 2326 and a passing grade on the Music Theory Proficiency Exam.

MUSI 3303. COUNTERPOINT. 3 Hours.
Overview of modal counterpoint; detailed study of harmonic counterpoint including canon, invention, and fugue. Prerequisite: C or better in MUSI 2326 and a passing grade on the Music Theory Proficiency Exam.

MUSI 3305. MUSIC FOR CHILDREN. 3 Hours.
A study of musical activities and the role of music in childhood. Includes music fundamentals, folk song literature, and musical characteristics of children. Cannot be counted toward a Bachelor of Music Degree.

MUSI 3308. INSTRUMENTAL CONDUCTING I. 3 Hours.
A practical study of basic instrumental conducting and score reading techniques. Open to music majors only. Prerequisites: C or better in MUSI 2186, MUSI 2326 and successful completion of the second semester lessons or above.

MUSI 3309. CHORAL CONDUCTING I. 3 Hours.
A practical study of the technical and expressive skills required of choral conductors, as well as the development of score study techniques and error detection skills necessary to successfully conduct choral ensembles. Open to music majors only. Prerequisites: C or better in MUSI 2186, MUSI 2326 and successful completion of the Sophomore Proficiency Exam.

MUSI 3316. STRATEGIES AND ASSESSMENT IN MUSIC EDUCATION. 3 Hours.
Open to music education majors only. Current trends in music education will be examined. Topics include effective differentiated instruction, positive classroom management, strategies for working with diverse learners, and examination of major learning theories and principles of cognitive, social, emotional, physical and aesthetic development. This course will also examine a variety of assessment techniques that are used in a music classroom. Assessment tools such as rubrics, rating scales, National Standards, TEKS, STAAR, and TExES will be examined and implemented into lesson planning. Prerequisite: C or better in MUSI 2112.

MUSI 3317. SINGING FOR THE ACTOR. 3 Hours.
An applied study of the vocal apparatus, vocal placement, the voice/body relationship, character, working with text, phrasing, and auditioning as they relate to singing in musical theatre for the Broadway or West End theatre. Emphasis is placed on integrating singing and acting skills. Prerequisites: THEA 1307, THEA 2352 and permission of faculty. Same as offering THEA 3317; may not be repeated and credit will only be granted in one department.

MUSI 3320. MUSIC AND TECHNOLOGY IN GAME AUDIO. 3 Hours.
Explores basics of music and audio for computer games, including composition, workflow, working with animation, and dialog/non-music sound. May be repeated for credit as topics change. Prerequisite: C or better in MUSI 3394 or permission of instructor.
MUSI 3321. KEYBOARD SYNTHESIZER PROGRAMMING AND TECHNIQUES. 3 Hours.
Explores the framework, process, and implementation of electronic music synthesis in composition and performance idioms. Topics covered are electronic sound design, hardware and soft synths.

MUSI 3322. INTRODUCTION TO SONGWRITING. 3 Hours.
Open to music majors only. Addresses strategies, techniques, and the craft of composing popular song. Prerequisite: MUSI 3126 or MUSI 1326.

MUSI 3323. BUSINESS OF MUSIC. 3 Hours.
A study of the structure of the music business and relationships among occupations in the industry. Topics include publishing, copyright licensing, artist management, the record industry, music in film and broadcasting, and career development and planning.

MUSI 3324. POST-TONAL ANALYSIS. 3 Hours.
Study of pitch, harmony, rhythm, & form in music from Debussy to the present. Prerequisite: C or better in MUSI 2186 and MUSI 2326 and passing grade on the Music Theory Proficiency Exam.

MUSI 3350. PRIVATE LESSONS IN VOICE. 3 Hours.
Courses meet the requirements of performance majors in voice. Performance of a junior (half) recital must be completed prior to the end of the 3351 semester. Prerequisite: C or better in MUSI 2241 and passing grade on Sophomore Proficiency exam.

MUSI 3351. PRIVATE LESSONS IN VOICE. 3 Hours.
Courses meet the requirements of performance majors in voice. Performance of a junior (half) recital must be completed prior to the end of the 3351 semester. Prerequisite: C or better in MUSI 3350.

MUSI 3352. PRIVATE LESSONS IN PIANO. 3 Hours.
Courses meet the requirements of performance majors in piano. Performance of a junior (half) recital is the minimum requirement for completion of this course. Prerequisite: C or better in MUSI 2243 and passing grade on Sophomore Proficiency exam.

MUSI 3353. PRIVATE LESSONS IN PIANO. 3 Hours.
Courses meet the requirements of performance majors in piano. Performance of a junior (half) recital must be completed prior to the end of the 3353 semester. Prerequisite: C or better in MUSI 3352.

MUSI 3354. PRIVATE LESSONS IN STRINGS. 3 Hours.
These courses meet the requirements of performance majors in strings. Performance of a junior (half) recital must be completed prior to the end of the 3355 semester. Prerequisite: C or better in MUSI 2245 and passing grade on Sophomore Proficiency exam.

MUSI 3355. PRIVATE LESSONS IN STRINGS. 3 Hours.
These courses meet the requirements of performance majors in strings. Performance of a junior (half) recital is required prior to the end of the 3355 semester. Prerequisite: C or better in MUSI 3354.

MUSI 3356. PRIVATE LESSONS IN WOODWINDS. 3 Hours.
Courses meet the requirements of performance majors in woodwinds. Performance of a junior (half) recital must be completed prior to the end of the 3357 semester. Prerequisite: C or better in MUSI 2247 and passing grade on Sophomore Proficiency Exam.

MUSI 3357. PRIVATE LESSONS IN WOODWINDS. 3 Hours.
Courses meet the requirements of performance majors in woodwinds. Performance of a junior (half) recital must be completed prior to the end of the 3357 semester. Prerequisite: C or better in MUSI 3356.

MUSI 3358. PRIVATE LESSONS IN BRASS. 3 Hours.
Courses meet the requirements of performance majors in brass. Performance of a junior (half) recital must be completed prior to the end of the 3359 semester. Prerequisite: C or better in MUSI 2249 and passing grade on Sophomore Proficiency exam.

MUSI 3359. PRIVATE LESSONS IN BRASS. 3 Hours.
Courses meet the requirements of performance majors in brass. Performance of a junior (half) recital must be completed prior to the end of the 3359 semester. Prerequisite: C or better in MUSI 3358.

MUSI 3360. PRIVATE LESSONS IN PERCUSSION. 3 Hours.
Courses meet the requirements of performance majors in percussion. Performance of a junior (half) recital must be completed prior to the end of the 3361 semester. Prerequisite: C or better in MUSI 2251 and passing grade on Sophomore Proficiency exam.

MUSI 3361. PRIVATE LESSONS IN PERCUSSION. 3 Hours.
Courses meet the requirements of performance majors in percussion. Performance of a junior (half) recital must be completed prior to the end of the 3361 semester. Prerequisite: C or better in MUSI 3360.

MUSI 3367. PRIVATE LESSONS IN ORGAN. 3 Hours.
Courses meet the requirements of performance majors in organ. Performance of a junior (half) recital must be completed prior to the end of the 3368 semester. Prerequisite: C or better in MUSI 2258 and passing grade on Sophomore Proficiency Exam.

MUSI 3368. PRIVATE LESSONS IN ORGAN. 3 Hours.
Courses meet the requirements of performance majors in organ. Performance of a junior (half) recital must be completed prior to the end of the 3368 semester. Prerequisite: C or better in MUSI 3367.
MUSI 3377. PRIVATE LESSONS IN HARPSICHORD. 3 Hours.
Courses meet the requirements of performance majors in harpsichord. Performance of a junior (half) recital must be completed prior to the end of the 3378 semester. Prerequisite: C or better in MUSI 2268.

MUSI 3378. PRIVATE LESSONS IN HARPSICHORD. 3 Hours.
Courses meet the requirements of performance majors in harpsichord. Performance of a junior (half) recital must be completed prior to the end of the 3378 semester. Prerequisite: C or better in MUSI 3377.

MUSI 3390. SCHENKERIAN ANALYSIS. 3 Hours.
An introduction to the methods of Schenkerian analysis and harmonic reduction. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory. Prerequisite: C or better in MUSI 2186, MUSI 2326, and a passing grade on the Music Theory Proficiency Exam.

MUSI 3391. ADVANCED SONATA THEORY. 3 Hours.
An in-depth examination of sonata form drawing on the concepts of Caplin’s formal functions and Hepokoski and Darcy’s sonata theory, including intensive writing and analysis assignments. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory. Prerequisite: C or better in MUSI 2186 and MUSI 2326 and passing grade on the Music Theory Proficiency Exam.

MUSI 3392. COMPOSITION I. 3 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: B or better in MUSI 2227, MUSI 2325, MUSI 2326, and MUSI 2186 and a passing grade on the Music Theory Proficiency Exam.

MUSI 3393. COMPOSITION II. 3 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: C or better in MUSI 3392.

MUSI 3394. DIGITAL MUSIC TECHNOLOGY. 3 Hours.
An introduction to the computer and to its use in the field of music. Topics include basic computer operation, information-management software, computer-assisted instruction in music, and music notation and sequencing software, MIDI (Musical Instrument Digital Interface).

MUSI 3395. JAZZ COMPOSITION. 3 Hours.
An introduction to jazz composition, focusing on no more than four distinct melodic voices plus rhythm section. Functional and non-functional harmonic and melodic techniques are explored. Prerequisite: C or better in MUSI 3226 or permission of instructor and successful completion of the Jazz Proficiency Exam.

MUSI 3396. RECORD LABEL AND STUDIO MANAGEMENT. 3 Hours.
Practical experience in the business of running a recording studio and recording label. Topics may include, but are not limited to, website management, marketing, physical and digital distribution models, streaming services, equipment maintenance and inventory, facility supervision, and basic arts accounting practices. Prerequisite: Permission of instructor required.

MUSI 4101. GERMAN AND ENGLISH DICTION. 1 Hour.
A guide to correct pronunciation of German and English in vocal music.

MUSI 4102. VOCAL LITERATURE. 1 Hour.
Survey of major solo vocal works from the Classical Era to the present. Prerequisite: C or better in MUSI 2241 or permission of instructor.

MUSI 4111. ORCHESTRAL EXCERPTS. 1 Hour.
Study of orchestral excerpts for individual instruments. Topics will vary by semester. May be repeated for credit. Permission of instructor required.

MUSI 4117. MUSIC EDUCATION FIELD-BASED EXPERIENCE. 1 Hour.
Supervised and directed professional practice in local schools. The student will be assigned to a public school site for five hours per week. Weekly seminars are required. Field-based experience must be taken the semester immediately preceding student teaching residency.

MUSI 4128. ADVANCED AUDIO RECORDING. 1 Hour.
Further study and practical studio work for students who have successfully completed the required recording techniques sequence utilizing Studio 301 in an independent study format. Prerequisite: C or better in MUSI 4326.

MUSI 4129. RECORDING ENSEMBLE. 1 Hour.
This course is open to Music Industry Studies students. This ensemble provides practical and artistic experience in a frequently encountered recording studio setting. Prerequisite: C or better in MUSI 4390 and Approval of the ensemble director.

MUSI 4140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 4140 and THEA 4140; credit will be granted only in one department. Prerequisite: C or better in MUSI 3141 or THEA 3141. Open to Musical Theatre majors only or by permission of the Department Chair.

MUSI 4141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 4141 and THEA 4141; credit will be granted only in one department. Prerequisite: C or better in MUSI 4140 or THEA 4140. Open to Musical Theatre majors only or by permission of the Department Chair.
MUSI 4188. ADVANCED CONDUCTING. 1 Hour.
Open to music majors only. An intensive study of conducting that will include score-study techniques, left and right hand independence, video analysis, rehearsal observation, and other topics related to the art of conducting. Can fulfill one of the 3 elective hours for Performance majors. Prerequisite: MUSI 3308 or MUSI 3309, and permission of instructor.

MUSI 4191. CONFERENCE COURSE. 1 Hour.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: Consent of the instructor or chair of the department.

MUSI 4205. ADVANCED FUNCTIONAL PIANO. 2 Hours.
Concentrated study of keyboard skills which include: sightreading, transposition, harmonization, and open score reading. Prerequisite: C or better in MUSI 2181 or faculty approval.

MUSI 4211. ELEMENTARY MUSIC. 2 Hours.
Focus on perception as it relates to children's development and participation in music through singing and playing instruments. Prerequisite: C or better in MUSI 3211.

MUSI 4213. INSTRUMENTAL MATERIALS AND TECHNIQUES II. 2 Hours.
A study of literature, music selection, rehearsal planning, sound production, and performance practices for intermediate and advanced instrumental ensembles. Prerequisite: C or better in MUSI 3213 or faculty approval.

MUSI 4214. CHORAL MATERIALS AND TECHNIQUES II. 2 Hours.
A study of literature, music selection, rehearsal planning, vocal production, and performance practices for intermediate and advanced choral ensembles. Prerequisite: C or better in MUSI 3214 or faculty approval.

MUSI 4225. JAZZ IMPROVISATION III - ADVANCED. 2 Hours.
A continuation of Jazz Improvisation II. This course explores advanced techniques of contemporary jazz solo performance. Prerequisite: C or better in MUSI 3226 and successful completion of the Jazz Proficiency Exam.

MUSI 4236. PRIVATE LESSONS IN JAZZ GUITAR. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz guitar. Prerequisite: C or better in MUSI 3237.

MUSI 4238. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset. Prerequisite: C or better in MUSI 3259.

MUSI 4240. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3241.

MUSI 4241. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice. Prerequisite: C or better in MUSI 4240.

MUSI 4242. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3243.

MUSI 4243. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Prerequisite: C or better in MUSI 4242.

MUSI 4244. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3245.

MUSI 4245. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 4244.

MUSI 4246. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3247.

MUSI 4247. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Prerequisite: C or better in MUSI 4246.

MUSI 4248. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3249.

MUSI 4249. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 4248.
MUSI 4250. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3251.

MUSI 4251. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 4250.

MUSI 4252. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3253.

MUSI 4253. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 3255.

MUSI 4254. PRIVATE LESSONS IN JAZZ PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3258.

MUSI 4257. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3257.

MUSI 4258. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 4257.

MUSI 4267. PRIVATE LESSONS IN HARPSCORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3268.

MUSI 4268. PRIVATE LESSONS IN HARPSCORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 4267.

MUSI 4280. SPECIAL TOPICS IN MUSIC. 2 Hours.
Special studies in music. Topics will vary from semester to semester. May be repeated for credit when topics vary.

MUSI 4291. CONFERENCE COURSE. 2 Hours.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: Consent of the instructor or chair of the department.

MUSI 4300. JAZZ PERSPECTIVES. 3 Hours.
An in-depth study of the history, literature, and styles of the jazz idiom. Open to music majors only. Prerequisite: Successful completion of the Jazz Proficiency Exam.

MUSI 4301. ORCHESTRATION. 3 Hours.
Scoring for strings, woodwinds, brass, percussion, and voice as related to orchestra, band, and choir. Prerequisite: C or better in MUSI 2186, MUSI 2326 and a passing grade on the Music Theory Proficiency Exam.

MUSI 4302. JAZZ ARRANGING. 3 Hours.
Arranging in the jazz and commercial idioms with emphasis on the large jazz ensemble. Prerequisite: C or better in MUSI 3125, MUSI 3225, and MUSI 3395, or consent of the instructor, and successful completion of the Jazz Proficiency Exam.

MUSI 4303. ADVANCED STRING CLASS. 3 Hours.
Open to music majors only. An advanced study of orchestral string instruments with emphasis on advanced technique and pedagogy. Prerequisite: C or better in MUSI 3191.

MUSI 4305. HISTORY OF MUSIC THEORY. 3 Hours.
Theorists and theoretical tracts from the ancient Greeks to the present day. Prerequisite: C or better in MUSI 2186, MUSI 2326, and a passing grade on the Music Theory Proficiency exam.

MUSI 4308. INSTRUMENTAL CONDUCTING II. 3 Hours.
Open to music majors only. A study of advanced conducting techniques, including score reading, rehearsal techniques, ensemble concepts, articulations and musical style. Prerequisite: C or better in MUSI 3308.

MUSI 4309. CHORAL CONDUCTING II. 3 Hours.
Open to music majors only. Application of the technical and expressive aspects of choral conducting, score study techniques, error detection skills, and rehearsal planning and implementation techniques in a laboratory-conducting situation. Offered every spring odd year. Prerequisite: C or better in MUSI 3309.

MUSI 4324. HISTORY OF MUSICAL THEATRE. 3 Hours.
A historical survey of American theatre music from the colonial period to the present. Open to all students as a fine arts elective.
MUSI 4325. RECORDING TECHNIQUES II. 3 Hours.
Students will continue to learn recording engineering through audio analysis, recording practice, and audio theory. Signal processing, analog tape techniques, mastering, and studio business will be discussed. Students will work independently on jazz and pop/rock recording projects in Studio 301. Prerequisite: C or better in MUSI 4390.

MUSI 4326. RECORDING TECHNIQUES III. 3 Hours.
This course builds upon the previous two courses by introducing students to more advanced aspects of audio engineering, such as combining MIDI and audio, syncing audio to video, advanced aural skills, and mixing automation. Students will be able to utilize Studio 301 and Irons Hall in order to pursue their recording work in a more independent fashion. Prerequisite: C or better in MUSI 4325.

MUSI 4327. TECHNIQUES AND TECHNOLOGY IN FILM COMPOSITION. 3 Hours.
Study in the technical and artistic requirements of film composition and the realization of film scores. Prerequisite: C or better in MUSI 3394.

MUSI 4328. ELECTRONIC MUSIC COMPOSITION AND PERFORMANCE. 3 Hours.
An exploration of strategies for composing electronic music that apply to a broad range of contemporary styles and genres. Through a series of guided exercises and projects, the class provides an opportunity for students to explore compositional approaches using electronic instruments and digital audio technologies. Prerequisite: C or better in MUSI 4325.

MUSI 4329. SOUND FOR NEW MEDIA. 3 Hours.
Explores the techniques and application of audio integration within media-centered environments, focusing on live broadcast audio applications over internet and other mediums for broadcast. Prerequisite: C or better in MUSI 4325.

MUSI 4349. FORMAL-FUNCTION THEORY. 3 Hours.
Introduction to William Caplin's Formal-Function Theory, including mastery of formal functions, harmonic progressions, the principal theme types, and full-movement forms. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory. Prerequisites: C or better in MUSI 2186, MUSI 2326, and a passing grade on the Music Theory Proficiency exam.

MUSI 4350. 20TH CENTURY FORM & TECHNIQUE. 3 Hours.
Introduction to twentieth-century form and techniques, as well as relevant analytical methods and compositional strategies. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory. This course formerly MUSI 4490. Prerequisite: C or better in MUSI 2186 and MUSI 2326 and passing grade on the Music Theory Proficiency Exam.

MUSI 4351. MUSIC THEORY CAPSTONE/SEMINAR. 3 Hours.
Seminar designed to meet the needs of students desiring to become theorists or teachers of theory; includes preparation and presentation of a senior research project in music theory in a conference setting. This course formerly MUSI 4491. Prerequisite: Grade of C or better in MUSI 4390 (formerly MUSI 4490).

MUSI 4357. ANALYSIS OF POPULAR MUSIC. 3 Hours.
This course will explore form, melody, harmony, and voice-leading in a variety of popular styles since the early 20th century. Prerequisite: C or better in MUSI 2326 and a passing grade on the Theory Proficiency exam.

MUSI 4390. RECORDING TECHNIQUES I. 3 Hours.
Live performance and studio recording techniques. Topics include microphone selection and placement, equalization techniques, overdubbing, console-mixing, sound synchronization, and related recording techniques. Prerequisite: C or better in MUSI 3394.

MUSI 4391. CONFERENCE COURSE. 3 Hours.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: Consent of the instructor or chair of the department.

MUSI 4392. JAZZ STUDIES SENIOR RECITAL/PROJECT. 3 Hours.
Senior recital or project for jazz studies majors. Designed in consultation with the Director of Jazz Studies. Prerequisites: completion of performance lesson requirements; consent of instructor or music department chair.

MUSI 4393. CAPSTONE IN MUSIC THEORY. 3 Hours.
Senior project in music theory, culminating in a professional presentation on a selected topic in music theory. Prerequisite: MUSI 4490.

MUSI 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or a project under the direction of a faculty member in the major department.

MUSI 4395. INTERNSHIP. 3 Hours.
The Internship course is designed to give students practical experience in a variety of music media and music business settings. The student must work with a local business for at least ten hours per week (140 hours total).

MUSI 4450. PRIVATE LESSONS IN VOICE. 4 Hours.
These courses meet the requirements of performance majors in voice. Performance of a senior (full) recital must be completed prior to the end of the 4451 semester. Prerequisite: C or better in MUSI 3351.

MUSI 4451. PRIVATE LESSONS IN VOICE. 4 Hours.
These courses meet the requirements of performance majors in voice. Performance of a senior (full) recital must be completed prior to the end of the 4451 semester. Prerequisite: C or better in MUSI 4450.
MUSI 4452. PRIVATE LESSONS IN PIANO. 4 Hours.
These courses meet the requirements of performance majors in piano. Performance of a senior (full) recital must be completed prior to the end of the 4453 semester. Prerequisite: C or better in MUSI 3353.

MUSI 4453. PRIVATE LESSONS IN PIANO. 4 Hours.
These courses meet the requirements of performance majors in piano. Performance of a senior (full) recital must be completed prior to the end of the 4453 semester. Prerequisite: C or better in MUSI 4452.

MUSI 4454. PRIVATE LESSONS IN STRINGS. 4 Hours.
These courses meet the requirements of performance majors in strings. Performance of a senior (full) recital must be completed prior to the end of the 4455 semester. Prerequisite: C or better in MUSI 3355.

MUSI 4455. PRIVATE LESSONS IN STRINGS. 4 Hours.
These courses meet the requirements of performance majors in strings. Performance of a senior (full) recital must be completed prior to the end of the 4455 semester. Prerequisite: C or better in MUSI 4454.

MUSI 4456. PRIVATE LESSONS IN WOODWINDS. 4 Hours.
These courses meet the requirements of performance majors in woodwinds. Performance of a senior (full) recital must be completed prior to the end of the 4457 semester. Prerequisite: C or better in MUSI 4456.

MUSI 4457. PRIVATE LESSONS IN WOODWINDS. 4 Hours.
These courses meet the requirements of performance majors in woodwinds. Performance of a senior (full) recital must be completed prior to the end of the 4457 semester. Prerequisite: C or better in MUSI 4456.

MUSI 4458. PRIVATE LESSONS IN BRASS. 4 Hours.
These courses meet the requirements of performance majors in brass. Performance of a senior (full) recital must be completed prior to the end of the 4459 semester. Prerequisite: C or better in MUSI 4458.

MUSI 4459. PRIVATE LESSONS IN BRASS. 4 Hours.
These courses meet the requirements of performance majors in brass. Performance of a senior (full) recital must be completed prior to the end of the 4459 semester. Prerequisite: C or better in MUSI 4458.

MUSI 4460. PRIVATE LESSONS IN PERCUSSION. 4 Hours.
These courses meet the requirements of performance majors in percussion. Performance of a senior (full) recital must be completed prior to the end of the 4461 semester. Prerequisite: C or better in MUSI 3361.

MUSI 4461. PRIVATE LESSONS IN PERCUSSION. 4 Hours.
These courses meet the requirements of performance majors in percussion. Performance of a senior (full) recital must be completed prior to the end of the 4461 semester. Prerequisite: C or better in MUSI 4460.

MUSI 4462. PRIVATE LESSONS IN ORGAN. 4 Hours.
These courses meet the requirements of performance majors in organ. Performance of a senior (full) recital must be completed prior to the end of the 4468 semester. Prerequisite: C or better in MUSI 4462.

MUSI 4463. PRIVATE LESSONS IN ORGAN. 4 Hours.
These courses meet the requirements of performance majors in organ. Performance of a senior (full) recital must be completed prior to the end of the 4468 semester. Prerequisite: C or better in MUSI 4462.

MUSI 4477. PRIVATE LESSONS IN HARPSCICORD. 4 Hours.
This course meets the requirements of performance majors in harpsichord. Performance of a senior (full) recital must be completed prior to the end of the 4478 semester. Prerequisite: C or better in MUSI 3378.

MUSI 4478. PRIVATE LESSONS IN HARPSCICORD. 4 Hours.
These courses meet the requirements of performance majors in harpsichord. Performance of a senior (full) recital must be completed prior to the end of the 4478 semester. Prerequisite: C or better in MUSI 4477.

MUSI 4492. COMPOSITION III. 4 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: C or better in MUSI 3393.

MUSI 4493. COMPOSITION IV. 4 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: C or better in MUSI 4492.

MUSI 5000. WIND SYMPHONY. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5001. SYMPHONIC WINDS. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.
MUSI 5002. A CAPPELLA CHOIR. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5004. UNIVERSITY SINGERS. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5005. MUSICAL THEATRE/OPERA LAB. 0 Hours.
Exploration of opera roles, staging techniques, and repertoire. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5007. JAZZ ORCHESTRA. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5008. JAZZ ENSEMBLE. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5010. STUDIO CLASS. 0 Hours.
Departmental performance classes, master classes, guest artist performances and lectures related to performance specializations. Students enroll concurrently with private lesson in specialization.

MUSI 5011. ORCHESTRA. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5012. CHAMBER MUSIC. 0 Hours.
This course is an in-depth study of the repertoire of standard chamber ensembles such as string quartets and piano trios, woodwind quintets and brass quintets. Weekly coaching with professors culminates in a public performance where students demonstrate skills in music performance. Prerequisite: Approval of Ensemble Director and Graduate Advisor.

MUSI 5022. JAZZ COMBO. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5100. WIND SYMPHONY. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5101. SYMPHONIC WINDS. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5102. A CAPPELLA CHOIR. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5103. CHAMBER SINGERS. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5104. UNIVERSITY SINGERS. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5106. KEYBOARD ENSEMBLE. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5107. JAZZ ORCHESTRA. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5108. JAZZ ENSEMBLE. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5109. VOCAL JAZZ. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5110. JAZZ COMBO. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5111. ORCHESTRA. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5112. CHAMBER MUSIC. 1 Hour.
This course is an in-depth study of the repertoire of standard chamber ensembles such as string quartets and piano trios, woodwind quintets and brass quintets. Weekly coaching with professors culminates in a public performance where students demonstrate skills in music performance. Prerequisite: Approval of Ensemble Director.

MUSI 5113. ORCHESTRAL EXCERPTS. 1 Hour.
Study of orchestral excerpts for individual instruments. Topics will vary by semester. May be repeated for credit. Permission of instructor required.
MUSI 5114. SAX CHOIR. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Permission of Instructor.

MUSI 5115. VOCAL COACHING. 1 Hour.
Advanced instruction in diction, interpretation, and style for singers and collaborative instrumentalists. By permission of instructor.

MUSI 5116. ELECTRIC GUITAR ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5117. MUSIC EDUCATION FIELD-BASED EXPERIENCE. 1 Hour.
Supervised and directed professional practice in local schools. The student will be assigned to a public school site for five hours per week. Weekly seminars are required. This course must be taken the semester immediately preceding clinical student teaching.

MUSI 5120. PRIVATE LESSONS IN VOICE. 1 Hour.
This course provides private instruction in voice. This course may be repeated for credit as often as course content changes.

MUSI 5121. PRIVATE LESSONS IN PIANO. 1 Hour.
This course provides private instruction in piano. This course may be repeated for credit as often as course content changes.

MUSI 5122. PRIVATE LESSONS IN ORGAN. 1 Hour.
This course provides private instruction in organ. This course may be repeated for credit as often as course content changes.

MUSI 5123. PRIVATE LESSONS IN HARPSCICHORD. 1 Hour.
This course provides private instruction in harpsichord. This course may be repeated for credit as often as course content changes.

MUSI 5124. PRIVATE LESSONS IN JAZZ PIANO. 1 Hour.
This course provides private instruction in jazz piano. This course may be repeated for credit as often as course content changes.

MUSI 5125. PRIVATE LESSONS IN VIOLIN. 1 Hour.
This course provides private instruction in violin. This course may be repeated for credit as often as course content changes.

MUSI 5126. PRIVATE LESSONS IN VIOLA. 1 Hour.
This course provides private instruction in viola. This course may be repeated for credit as often as course content changes.

MUSI 5127. PRIVATE LESSONS IN CELLO. 1 Hour.
This course provides private instruction in cello. This course may be repeated for credit as often as course content changes.

MUSI 5128. PRIVATE LESSONS IN BASS. 1 Hour.
This course provides private instruction in bass. This course may be repeated for credit as often as course content changes.

MUSI 5129. PRIVATE LESSONS IN JAZZ BASS. 1 Hour.
This course provides private instruction in jazz bass. This course may be repeated for credit as often as course content changes.

MUSI 5130. PRIVATE LESSONS IN GUITAR. 1 Hour.
This course provides private instruction in guitar. This course may be repeated for credit as often as course content changes.

MUSI 5131. PRIVATE LESSONS IN CLARINET. 1 Hour.
This course provides private instruction in clarinet. This course may be repeated for credit as often as course content changes.

MUSI 5132. PRIVATE LESSONS IN OBOE. 1 Hour.
This course provides private instruction in oboe. This course may be repeated for credit as often as course content changes.

MUSI 5133. PRIVATE LESSONS IN FLUTE. 1 Hour.
This course provides private instruction in flute. This course may be repeated for credit as often as course content changes.

MUSI 5134. PRIVATE LESSONS IN SAXOPHONE. 1 Hour.
This course provides private instruction in saxophone. This course may be repeated for credit as often as course content changes.

MUSI 5135. PRIVATE LESSONS IN BASSOON. 1 Hour.
This course provides private instruction in bassoon. This course may be repeated for credit as often as course content changes.

MUSI 5136. PRIVATE LESSONS IN TRUMPET. 1 Hour.
This course provides private instruction in trumpet. This course may be repeated for credit as often as course content changes.

MUSI 5137. PRIVATE LESSONS IN FRENCH HORN. 1 Hour.
This course provides private instruction in French horn. This course may be repeated for credit as often as course content changes.

MUSI 5138. PRIVATE LESSONS IN TROMBONE. 1 Hour.
This course provides private instruction in trombone. This course may be repeated for credit as often as course content changes.

MUSI 5139. PRIVATE LESSONS IN TUBA. 1 Hour.
This course provides private instruction in tuba. This course may be repeated for credit as often as course content changes.

MUSI 5140. PRIVATE LESSONS IN EUPHONIUM. 1 Hour.
This course provides private instruction in euphonium. This course may be repeated for credit as often as course content changes.
MUSI 5145. PRIVATE LESSONS IN JAZZ DRUMSET. 1 Hour.
This course provides private instruction in jazz drumset. This course may be repeated for credit as often as course content changes.

MUSI 5150. PEDAGOGY IN MUSIC THEORY. 1 Hour.
Survey of materials and methods for teaching music theory at the undergraduate level. Observation of teaching methods and supervision of undergraduate teaching.

MUSI 5160. FLUTE CHOIR. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5161. WOODWIND ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5171. ELECTIVE PERFORMANCE. 1 Hour.
For students who desire elective private instruction in string, woodwinds, brass, keyboard, voice, or percussion.

MUSI 5188. ADVANCED CONDUCTING. 1 Hour.
Open to music majors only. An intensive study of conducting that will include score-study techniques, left and right hand independence, video analysis, rehearsal observation, and other topics related to the art of conducting. Permission of instructor required. Prerequisite: Permission of instructor.

MUSI 5190. KEYBOARD ACCOMPANIMENT. 1 Hour.
This course entails the student accompanying performances as specified and supervised by the instructor.

MUSI 5191. CONFERENCE COURSE IN MUSIC. 1 Hour.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: permission of instructor and Graduate Advisor.

MUSI 5205. MUSIC THEATRE/OPERA LAB. 2 Hours.
Exploration of opera roles, staging techniques, and repertoire. Prerequisite: Approval of the ensemble director.

MUSI 5211. EARLY CHILDHOOD MUSIC. 2 Hours.
Musical characteristics of children, folksong and composed literature, performance activities, song analysis, and techniques for reading and writing music.

MUSI 5212. ELEMENTARY MUSIC. 2 Hours.
Focus on perception as it relates to children's development and participation in music through singing and playing instruments.

MUSI 5213. CHORAL MATERIALS AND TECHNIQUES I. 2 Hours.
A study of literature, music selection, rehearsal planning, vocal production, and performance practices for beginning and intermediate choral ensembles.

MUSI 5214. CHORAL MATERIALS AND TECHNIQUES II. 2 Hours.
A study of literature, music selection, rehearsal planning, vocal production, and performance practices for intermediate and advanced choral ensembles.

MUSI 5215. INSTRUMENTAL MATERIALS AND TECHNIQUES I. 2 Hours.
A study of literature, music selection, rehearsal planning, sound production, and performance practices for beginning and intermediate instrumental ensembles.

MUSI 5216. INSTRUMENTAL MATERIALS AND TECHNIQUES II. 2 Hours.
A study of literature, music selection, rehearsal planning, sound production, and performance practices for intermediate and advanced instrumental ensembles.

MUSI 5220. PRIVATE LESSONS IN VOICE. 2 Hours.
This course provides private instruction in voice. This course may be repeated for credit as often as course content changes.

MUSI 5221. PRIVATE LESSONS IN PIANO. 2 Hours.
This course provides private instruction in piano. This course may be repeated for credit as often as course content changes.

MUSI 5222. PRIVATE LESSONS IN ORGAN. 2 Hours.
This course provides private instruction in organ. This course may be repeated for credit as often as course content changes.

MUSI 5223. PRIVATE LESSONS IN HARPSICHORD. 2 Hours.
This course provides private instruction in harpsichord. This course may be repeated for credit as often as course content changes.

MUSI 5224. PRIVATE LESSONS IN JAZZ PIANO. 2 Hours.
This course provides private instruction in jazz piano. This course may be repeated for credit as often as course content changes.

MUSI 5225. PRIVATE LESSONS IN VIOLIN. 2 Hours.
This course provides private instruction in violin. This course may be repeated for credit as often as course content changes.

MUSI 5226. PRIVATE LESSONS IN VIOLA. 2 Hours.
This course provides private instruction in viola. This course may be repeated for credit as often as course content changes.
MUSI 5227. PRIVATE LESSONS IN CELLO. 2 Hours.
This course provides private instruction in cello. This course may be repeated for credit as often as course content changes.

MUSI 5228. PRIVATE LESSONS IN BASS. 2 Hours.
This course provides private instruction in bass. This course may be repeated for credit as often as course content changes.

MUSI 5229. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This course provides private instruction in jazz bass. This course may be repeated for credit as often as course content changes.

MUSI 5230. PRIVATE LESSONS IN GUITAR. 2 Hours.
This course provides private instruction in guitar. This course may be repeated for credit as often as course content changes.

MUSI 5231. PRIVATE LESSONS IN CLARINET. 2 Hours.
This course provides private instruction in clarinet. This course may be repeated for credit as often as course content changes.

MUSI 5232. PRIVATE LESSONS IN OBOE. 2 Hours.
This course provides private instruction in oboe. This course may be repeated for credit as often as course content changes.

MUSI 5233. PRIVATE LESSONS IN FLUTE. 2 Hours.
This course provides private instruction in flute. This course may be repeated for credit as often as course content changes.

MUSI 5234. PRIVATE LESSONS IN SAXOPHONE. 2 Hours.
This course provides private instruction in saxophone. This course may be repeated for credit as often as course content changes.

MUSI 5235. PRIVATE LESSONS IN BASSOON. 2 Hours.
This course provides private instruction in bassoon. This course may be repeated for credit as often as course content changes.

MUSI 5236. PRIVATE LESSONS IN TRUMPET. 2 Hours.
This course provides private instruction in trumpet. This course may be repeated for credit as often as course content changes.

MUSI 5237. PRIVATE LESSONS IN FRENCH HORN. 2 Hours.
This course provides private instruction in French horn. This course may be repeated for credit as often as course content change.

MUSI 5238. PRIVATE LESSONS IN TROMBONE. 2 Hours.
This course provides private instruction in trombone. This course may be repeated for credit as often as course content changes.

MUSI 5239. PRIVATE LESSONS IN TUBA. 2 Hours.
This course provides private instruction in tuba. This course may be repeated for credit as often as course content changes.

MUSI 5240. PRIVATE LESSONS IN EUPHONIUM. 2 Hours.
This course provides private instruction in euphonium. This course may be repeated for credit as often as course content changes.

MUSI 5241. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This course provides private instruction in percussion. This course may be repeated for credit as often as course content changes.

MUSI 5242. PRIVATE LESSONS IN IMPROVISATION. 2 Hours.
This course provides private instruction in improvisation. This course may be repeated for credit as often as course content changes.

MUSI 5245. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This course provides private instruction in jazz drumset. This course may be repeated for credit as often as course content changes.

MUSI 5271. ELECTIVE LESSONS. 2 Hours.
For students who desire elective private instruction in strings, woodwinds, brass, keyboard, voice, or percussion. May be repeated eight times for credit.

MUSI 5291. CONFERENCE COURSE IN MUSIC. 2 Hours.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: permission of instructor and Graduate Advisor.

MUSI 5301. FORM AND STYLE ANALYSIS. 3 Hours.
A survey of the forms and styles of Western art music employing relevant analytical techniques.

MUSI 5302. THEORY & COMPOSITION SPECIAL TOPICS. 3 Hours.
This course covers topics which vary from semester to semester, and includes in-depth study of selected topics in music theory. This course may be repeated for credit as often as the content changes. (Formerly MUSI 5330.).

MUSI 5303. ADVANCED COUNTERPOINT. 3 Hours.
Advanced work in specialized areas of counterpoint.

MUSI 5305. HISTORY OF MUSIC THEORY. 3 Hours.
Theorists and theoretical tracts from the ancient Greeks to the present day.

MUSI 5308. MUSIC HISTORY SELECTED TOPICS. 3 Hours.
This course will consist of an in-depth study of a particular genre, composer, or period. It may be repeated as the course content changes.
MUSI 5316. STRATEGIES AND ASSESSMENT IN MUSIC EDUCATION. 3 Hours.
Open to music education majors only. Current trends in music education will be examined. Topics include effective differentiated instruction, positive classroom management, strategies for working with diverse learners, and examination of major learning theories and principles of cognitive, social, emotional, physical and aesthetic development. This course will also examine a variety of assessment techniques that are used in a music classroom. Assessment tools such as rubrics, rating scales, National Standards, TEKS, STAAR, and TExES will be examined and implemented into lesson planning.

MUSI 5320. PRIVATE LESSONS IN VOICE. 3 Hours.
This course provides private instruction in voice. This course may be repeated for credit as often as course content changes.

MUSI 5321. PRIVATE LESSONS IN PIANO. 3 Hours.
This course provides private instruction in piano. This course may be repeated for credit as often as course content changes.

MUSI 5322. PRIVATE LESSONS IN ORGAN. 3 Hours.
This course provides private instruction in organ. This course may be repeated for credit as often as course content changes.

MUSI 5323. PRIVATE LESSONS IN HARPSCICHORD. 3 Hours.
This course provides private instruction in harpsichord. This course may be repeated for credit as often as course content changes.

MUSI 5324. PRIVATE LESSONS IN JAZZ PIANO. 3 Hours.
This course provides private instruction in jazz piano. This course may be repeated for credit as often as course content changes.

MUSI 5325. PRIVATE LESSONS IN VIOLIN. 3 Hours.
This course provides private instruction in violin. This course may be repeated for credit as often as course content changes.

MUSI 5326. PRIVATE LESSONS IN VIOLA. 3 Hours.
This course provides private instruction in viola. This course may be repeated for credit as often as course content changes.

MUSI 5327. PRIVATE LESSONS IN CELLO. 3 Hours.
This course provides private instruction in cello. This course may be repeated for credit as often as course content changes.

MUSI 5328. PRIVATE LESSONS IN BASS. 3 Hours.
This course provides private instruction in bass. This course may be repeated for credit as often as course content changes.

MUSI 5329. PRIVATE LESSONS IN JAZZ BASS. 3 Hours.
This course provides private instruction in jazz bass. This course may be repeated for credit as often as course content changes.

MUSI 5330. PRIVATE LESSONS IN OBOE. 3 Hours.
This course provides private instruction in oboe. This course may be repeated for credit as often as course content changes.

MUSI 5331. PRIVATE LESSONS IN FLUTE. 3 Hours.
This course provides private instruction in flute. This course may be repeated for credit as often as course content changes.

MUSI 5332. PRIVATE LESSONS IN SAXOPHONE. 3 Hours.
This course provides private instruction in saxophone. This course may be repeated for credit as often as course content changes.

MUSI 5333. PRIVATE LESSONS IN BASSOON. 3 Hours.
This course provides private instruction in bassoon. This course may be repeated for credit as often as course content changes.

MUSI 5334. PRIVATE LESSONS IN TRUMPET. 3 Hours.
This course provides private instruction in trumpet. This course may be repeated for credit as often as course content changes.

MUSI 5335. PRIVATE LESSONS IN FRENCH HORN. 3 Hours.
This course provides private instruction in French Horn. This course may be repeated for credit as often as course content changes.

MUSI 5336. PRIVATE LESSONS IN TROMBONE. 3 Hours.
This course provides private instruction in trombone. This course may be repeated for credit as often as course content changes.

MUSI 5337. PRIVATE LESSONS IN TUBA. 3 Hours.
This course provides private instruction in tuba. This course may be repeated for credit as often as course content changes.

MUSI 5338. PRIVATE LESSONS IN EUPHONIUM. 3 Hours.
This course provides private instruction in euphonium. This course may be repeated for credit as often as course content changes.

MUSI 5339. PRIVATE LESSONS IN PERCUSSION. 3 Hours.
This course provides private instruction in percussion. This course may be repeated for credit as often as course content changes.

MUSI 5340. PRIVATE LESSONS IN IMPROVISATION. 3 Hours.
This course provides private instruction in improvisation. This course may be repeated for credit as often as course content changes.

MUSI 5341. PRIVATE LESSONS IN GUITAR. 3 Hours.
This course provides private instruction in guitar. This course may be repeated for credit as often as course content changes.

MUSI 5342. PRIVATE LESSONS IN CLARINET. 3 Hours.
This course provides private instruction in clarinet. This course may be repeated for credit as often as course content changes.
MUSI 5345. PRIVATE LESSONS IN JAZZ DRUMSET. 3 Hours.
This course provides private instruction in jazz drumset. This course may be repeated for credit as often as course content changes.

MUSI 5347. PRIVATE LESSONS IN COMPOSITION. 3 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition.

MUSI 5348. PRIVATE LESSONS IN JAZZ COMPOSITION. 3 Hours.
This course provides private instruction in jazz composition and/or arranging. This course may be repeated for credit as often as course content changes.

MUSI 5349. FORMAL-FUNCTION THEORY. 3 Hours.
Introduction to William Caplin's Formal-Function Theory, including mastery of formal functions, harmonic progressions, the principal theme types, and full-movement forms.

MUSI 5350. SELECTED TOPICS IN MUSIC PEDAGOGY. 3 Hours.
This course covers topics which vary from semester to semester and includes studies of teaching techniques applied to pre-K, elementary grades, the junior high school, the high school, the junior college, and the college or university. This course may be repeated for credit as often as the content changes.

MUSI 5351. PHILOSOPHY, HISTORY, AND CURRICULUM TRENDS IN MUSIC EDUCATION. 3 Hours.
A study of philosophy and history of music education and how curricular trends provide the context for contemporary music education.

MUSI 5352. PSYCHOLOGICAL FOUNDATIONS OF MUSIC EDUCATION. 3 Hours.
A study of the psychological foundations of music education. An investigation of topics such as perception of and responses to music, the nature of musical attributes, music learning, and the measurement of musical behavior.

MUSI 5353. PROJECT IN MUSIC EDUCATION. 3 Hours.
For students enrolled in the non-thesis option. Offers the opportunity to complete a professional project in music education relevant to the student’s background, interest, and/or needs. The project should include, but not necessarily be limited to, appropriate written documentation. May be repeated for credit, but not more than 3 hours will apply to the Master of Music degree. Enrollment is required each term in which the project is in progress.

MUSI 5354. SELECTED TOPICS IN MUSIC LITERATURE. 3 Hours.
This course covers topics which vary from semester to semester and includes studies in musical literature for the following: 1) Wind Band Literature; 2) Orchestral Literature; 3) Choral Literature; 4) World Music Literature; 5) Jazz Literature. This course may be repeated for credit as often as the content changes.

MUSI 5355. REHEARSAL TECHNIQUES. 3 Hours.
A study of rehearsal techniques, including tone development, phrasing, rehearsal score study, and rehearsal organization. Topics, which may vary by semester, are 1) Choral; 2) Instrumental; 3) Jazz. May be repeated for credit when topics vary. Topics may be taken concurrently.

MUSI 5356. ORCHESTRAL EXCERPTS. 3 Hours.
Study of orchestral excerpts for individual instruments. Topics will vary by semester. May be repeated for credit. Permission of instructor required.

MUSI 5357. CURRENT TRENDS IN MUSIC EDUCATION. 3 Hours.
Current trends, social foundations and issues in music education.

MUSI 5358. TEACHING MUSIC IN HIGHER EDUCATION. 3 Hours.
Components of successful teaching in higher education will be explored. Topics will include developing a syllabus, creating a vitae, and preparing a lecture.

MUSI 5359. ADVANCED DICTION FOR SINGERS. 3 Hours.
A study of performance diction for singers and the pronunciation of the language as it applies to public performance. Topics include English, French, Italian, and German. May be repeated for credit when topics vary.

MUSI 5360. ADVANCED TECHNOLOGY FOR MUSICIANS. 3 Hours.
Intensive and extensive student-centered study topics to be selected from MIDI sequencing, multimedia development, advanced music notation and digital sampling and synthesis.

MUSI 5361. EARLY CHILDHOOD MUSIC. 3 Hours.
Practical application in authentic early childhood experiences.

MUSI 5362. INTRODUCTION TO RESEARCH IN MUSIC. 3 Hours.
An introduction to the methods and materials of research in music, including instruction on appropriate style formats for papers and theses.

MUSI 5363. RESEARCH IN MUSIC EDUCATION. 3 Hours.
An introduction to historical, philosophical, descriptive, and experimental research in music education and present research practices in music education.

MUSI 5364. ASSESSMENT IN MUSIC EDUCATION. 3 Hours.
Assessment techniques that are appropriate to music study will be reviewed and examined. The focus will include interpreting standardized test results and the development of appropriate and effective measurement tools to use in music classrooms.
MUSI 5365. MEANING & REPRESENTATION IN MUSIC. 3 Hours.
This course will explore the basic questions of meaning in music, including the question of whether or not music can truly have meaning at all. Students will explore various philosophical, scientific, and musical (i.e. from composers and performers) viewpoints through readings, discussion, and writing.

MUSI 5366. JAZZ STYLE AND ANALYSIS. 3 Hours.
An in depth examination of the improvisational techniques used by prominent jazz musicians. Topics will include transcription and theoretical analysis over different periods and styles in jazz.

MUSI 5367. ANALYSIS OF POPULAR MUSIC. 3 Hours.
This course will explore form, melody, harmony, and voice-leading in a variety of popular styles since the early 20th century.

MUSI 5368. 20TH CENTURY FORM & TECHNIQUE. 3 Hours.
Introduction to twentieth-century form and techniques, as well as relevant analytical methods and compositional strategies.

MUSI 5369. POST-TONAL ANALYSIS. 3 Hours.
Study of pitch, harmony, rhythm, & form in music from Debussy to the present.

MUSI 5370. SCHENKERIAN ANALYSIS. 3 Hours.
An introduction to the methods of Schenkerian analysis and harmonic reduction. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory.

MUSI 5391. CONFERENCE COURSE IN MUSIC. 3 Hours.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: Permission of instructor and Graduate Advisor.

MUSI 5392. ADVANCED SONATA THEORY. 3 Hours.
An in-depth examination of sonata form drawing on the concepts of Caplin's formal functions and Hepokoski and Darcy's sonata theory, including intensive writing and analysis assignments.

MUSI 5393. CONDUCTING. 3 Hours.
Applied lessons in conducting. This course is an in-depth study of conducting technique as applied to choral or instrumental ensembles. It may be repeated for credit as the content changes.

MUSI 5398. THESIS. 3 Hours.
The graduate student must be registered for MUSI 5398 when in consultation over the thesis with the advisor or supervisory committee. Prerequisite: MUSI 5363.

MUSI 5698. THESIS. 6 Hours.
The graduate student must be registered for MUSI 5698 in the semester or term in which the Master of Music degree will be conferred. Prerequisite: MUSI 5363.
Music - Graduate Programs

Graduate Programs in Music

The University of Texas at Arlington Department of Music features intensive programs in Music Education, Music Performance, Conducting, Jazz Studies, Jazz Composition, and Music Theory as well as a Performance Certificate in all instruments, conducting, and voice types. Located in the heart of a culturally vibrant metropolitan area, UT Arlington is perfectly situated to help students realize their educational and career goals. Large enough to offer a broad range of opportunities, but small enough to value you as an individual, we're sure you'll find UT Arlington the right place to study your craft.

Fellowships

Fellowships, when available, will be awarded on a competitive basis. The Graduate Advisor should be notified of your interest in these fellowships at the time of your application. Nominees for the Graduate School Master’s Fellowship in Music will be selected based on the following criteria:

- Candidates must be new students entering in the fall semester, with a minimum of 9 hours of enrollment in both long semesters to retain their fellowships.
- The minimum undergraduate GPA requirement is 3.00, as calculated by the Graduate School, plus a GPA of 3.0 for any graduate credit hours.
- Transcript of a completed bachelor’s degree in music from an accredited institution (or its demonstrated equivalent).
- Three letters of recommendation

Master of Music in Music Education

Admission Requirements

The Department of Music has the following requirements for entry into the Master of Music in Music Education Degree.

Unconditional Admission

Requirements for unconditional admission into the program are:

1. Three letters of recommendation speaking to the student’s potential for success from references familiar with the student’s academic background.
2. Philosophy of Music Education (no more than 2 pages-typed).
3. A minimum 3.0 GPA in the last 60 hours of undergraduate work as calculated by Graduate Admissions.
4. Bachelor’s degree in music or its demonstrated equivalent.
5. Submitted application to the Department of Music (see the departmental website (https://www.uta.edu/music/) for more information).

Probationary Status

A student showing a deficiency in any of the above criteria and showing promise for successful graduate study may still be admitted on a probationary basis upon the recommendation of the Graduate Studies Committee. The conditions of the probation will be outlined in the letter of admission. (The Music Department does not have the authority to lower University TOEFL score requirements for any student.)

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Denied Admission

An applicant can be denied admission based on the recommendation of the Graduate Studies Committee. Applicants may reapply for admission if the deficiencies in credentials that led to denial are remedied.

Deferred Admission

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

TOEFL Requirement

Applicants whose native language is not English must demonstrate proficiency in English by earning a score of at least 550 on the paper-based Test of English as a Foreign Language (TOEFL) or a score of at least 213 on the computer-based test, or a minimum score of 40 on the Test of Spoken English (TSE). The Internet-based TOEFL examination (TOEFL iBT) will be accepted as an alternative to the paper and computer-based TOEFL for admission purposes. Students taking TOEFL iBT must attain a minimum total test score of 79.

Those who do not meet the English proficiency requirement must satisfactorily complete courses in the ESOL area, as approved by the program and the Graduate Admissions.
## Degree Requirements

The program is designed for the student who has a Bachelor's degree in music. A minimum of 30 semester hours is required if the student chooses to write a thesis. If the student chooses not to write a thesis, a minimum of 36 semester hours is required. Advisory examinations in music history and written theory may be administered to all students prior to enrollment or during their first semester as a degree-seeking student.

### Non-Thesis Option

Coursework for the program includes:

<table>

</table>
Six (6) hours of free choice electives may be selected from ensembles, private instruction, music history, music theory, jazz studies and repeated special topics courses. Up to six (6) hours of graduate credit from other disciplines may be considered if relevant to the degree, subject to approval by the Graduate Studies Committee. No more than two (2) semester hours of music ensembles may be counted toward the degree.

Total Hours

30

"Students who write a thesis will work closely with one or more members of the graduate faculty from the Department of Music on a research project in a specialized area of interest within the music education field. The student must register for MUSI 5398 when in consultation over the thesis with the advisor or supervisory committee. Students will receive a grade of R (Research in Progress), F (Fail), or W (Withdrawn). These hours do not count towards the degree hours.

**Master of Music**

**Admission Requirements**

**Unconditional Admission**

1. Bachelor’s degree in music or its demonstrated equivalent (such as a music conservatory degree).
2. Three letters of recommendation are required, speaking to the student’s potential for success from references familiar with the student’s academic background.
3. A minimum 3.0 GPA in the last 60 hours of undergraduate work as calculated by the Graduate Admissions.
4. Submitted application to the Department of Music (see the departmental website for more information).

All admission criteria will be considered equally. Students meeting all the criteria, plus any track-specific requirements, will be granted unconditional admission.

**Probationary Status**

A student showing a deficiency in any of the above criteria and showing promise for successful graduate study may still be admitted on a probationary basis upon the recommendation of the Graduate Studies Committee. The conditions of the probation will be outlined in the letter of admission. (The Music Department does not have the authority to lower University TOEFL score requirements for any student.)

**Provisional Admission**

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

**Denied Admission**

An applicant can be denied admission based on the recommendation of the Graduate Studies Committee. Applicants may reapply for admission if the deficiencies in credentials that led to denial are remedied.

**Deferred Admission**

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

Tracks are offered in Music Performance, Jazz Studies, Jazz Composition, Music Theory, and Conducting. The program is designed for the student who has a Bachelor’s degree in music.

**TOEFL Requirement**

Applicants whose native language is not English must demonstrate proficiency in English by earning a score of at least 550 on the paper-based Test of English as a Foreign Language (TOEFL) or a score of at least 213 on the computer-based test, or a minimum score of 40 on the Test of Spoken English (TSE). The Internet-based TOEFL examination (TOEFL iBT) will be accepted as an alternative to the paper and computer-based TOEFL for admission purposes. Students taking TOEFL iBT must attain a minimum total test score of 79.

Those who do not meet the English proficiency requirement must satisfactorily complete courses in the ESOL area, as approved by the program and Graduate Admissions.

Advisory examinations in music history and written theory may be administered to all students prior to enrollment or during their first semester as a degree-seeking student.

**Music Performance Track (Instrumental and Vocal)**

In addition to the general admission requirements, applicants for the Music Performance Track must perform the following:

1. Applicants must audition (in person or by submitting a tape or video link) with repertoire of at least college senior recital level. A repertoire list must be submitted for evaluation at the time of the audition. For further information, contact the Graduate Advisor.
Coursework for the program includes:

## Jazz Composition Track

In addition, to the general admission requirements, applicants for the Jazz Composition Track must submit the following:

1. A portfolio of works, to include at least two (2) but not more than four (4) scores and recordings representing the applicant’s best work. At least two of these should be in the jazz genre. Live recordings are preferred; MIDI recordings are discouraged but will be accepted as a last resort. At least one of the works should be scored for a large jazz ensemble (ten or more performers). Links to both scores and audio files housed online for the included pieces (via SoundCloud, DropBox, etc.) should be sent in an email to the graduate advisor. Please do not attach the files in the email.

2. A performance audition is also required on your primary jazz instrument. Applicants should prepare two jazz pieces in contrasting styles and tempos, with at least one jazz standard included. A pianist will be available to accompany you, or you may arrange for your own accompaniment (such as a play-along recording). Stereo equipment may be provided but only upon advance notice by the applicant.

Coursework for the program includes:

## Music Theory Track

In addition, to the general admission requirements, applicants for the Music Theory Track must submit the following:

1. Samples of writing (minimum 2; at least 1 should have substantial analytical content).
2. Statement of purpose (max. 250 words).
3. Applicants must take Theory and History Proficiency exams upon admission. Students needing remedial work will be required to enroll in MUSI 5301 FORM AND STYLE ANALYSIS and/or MUSI 5354 SELECTED TOPICS IN MUSIC LITERATURE, as appropriate.*

* Piano Proficiency exam will be administered before, and as a condition of, graduation from the Masters program. Students are encouraged to enroll in Keyboard lessons as appropriate to prepare for these.

Total Hours: 34

### Final Master's Examination

A final program examination is required of all Master of Music degree candidates. A final Master’s examination may result in:

1. An unconditional pass with a recommendation to the Graduate Dean that the candidate be certified to receive the degree.
2. A conditional pass with the requirement that additional conditions be met, which may include further work on the thesis or thesis substitute, additional coursework with a minimum specified grade point average or both (in all cases the final master’s examination must be repeated within a specified period).
3. Failure, with permission to be re-examined within a specified period; or
4. Failure, with recommendation to the Dean of Graduate Studies that the candidate be dismissed from the program. The Music Department limits to 2 the number of times the examination can be taken.

### Admission Requirements

#### Certificate Admission Requirements

Students wishing to enroll only in the certificate program but not a graduate degree program may apply for admission to UT Arlington as a special student (non-degree seeking). Admission requires an undergraduate degree in music or its demonstrated equivalent and would be contingent upon an audition for a minimum of two faculty members. Students in this certificate program who later seek graduate degrees at UT Arlington may apply 12 hours of certificate coursework within six years of completion and award of the certificate, if they meet the admission requirements for the graduate degree and receive approval from the appropriate Graduate Studies Committee and the Dean of Graduate Studies. Admission as a special student in no way guarantees subsequent unconditional admission into a graduate program or into the Graduate School.
TOEFL Requirement

Applicants whose native language is not English must demonstrate proficiency in English by earning a score of at least 550 on the paper-based Test of English as a Foreign Language (TOEFL) or a score of at least 213 on the computer-based test, or a minimum score of 40 on the Test of Spoken English (TSE). The Internet-based TOEFL examination (TOEFL iBT) will be accepted as an alternative to the paper and computer-based TOEFL for admission purposes. Students taking TOEFL iBT must attain a minimum total test score of 79.

Certificate in Performance

The Certificate in Performance requires 15 hours of coursework, including 4 semesters of lessons with the last semester including a full-length recital, and three semesters of a Major Ensemble or a combination of a Major Ensemble or Keyboard Accompaniment (for Keyboard Players only). It is currently available for all instruments and voice types:

Music - Undergraduate Programs

Overview

The University of Texas at Arlington is a member of the National Association of Schools of Music.

The Department of Music offers the Bachelor of Music degree (1) in preparation for E.C -12 teacher certification; (2) in Performance (woodwind, brass, percussion, keyboard, strings, or voice); (3) in Theory; (4) in Composition; (5) in Jazz Studies; (6) in Music/Business; and (7) in Audio Production and a Bachelor of Arts degree in Music Industry Studies. Music students must meet all the requirements of one of these specializations to receive the Bachelor of Music degree. All degree plans leading to a Bachelor of Music degree include offerings which provide a solid foundation in music theory, history, and literature and require a concentration in a specific instrument/voice. The music department also offers a Bachelor of Arts in Music Industry Studies that requires the student to meet all of the requirements for that specialization.

The mission of the UT Arlington Department of Music is to create an environment in which individuals are inspired to become innovative and creative musical leaders by offering integrated curricular content, skill development, and exceptional programming relevant to a culturally diverse urban community.

The Music Department's goals and objectives for academic and artistic enrichment of the university and the extended community include: (1) offering curricula leading to a baccalaureate degree and graduate programs that provide students with the opportunity to realize their inherent musical potential, (2) offering degree options that recognize and nurture students' abilities and talents to make contributions of excellence in the fields of music, and (3) preparing students for further graduate study and/or professional careers in music by meeting curricula criteria, performance standards, and academic expectations.

All prospective music majors must audition for proper placement in their respective performance areas and take a music theory placement test. Information concerning auditions and placement tests is available in the Music Office.

All Bachelor of Music majors are required to pass the sophomore proficiency exam on their major instrument. For transfer students who transfer in at least four semesters of lessons, the audition serves as the proficiency exam. Students can only attempt the proficiency exam two times. If they fail the sophomore proficiency exam the first time, they will be required to enroll in MUSI 2222 the following semester. At the end of MUSI 2222, students will be required to attempt the proficiency exam for a last time. If students do not successfully pass the proficiency exam, they will not be allowed to remain a Bachelor of Music major.

All students wishing to pursue the Bachelor of Music Degree with the Jazz Studies Option must pass the jazz performance proficiency exam upon completion of MUSI 3226. Students can attempt the proficiency exam two times. Students failing to pass the jazz proficiency exam on the second attempt will not be permitted to continue in the Jazz Studies Option. Successful completion of the jazz proficiency exam is a prerequisite for enrollment in:

MUSI 3395 JAZZ COMPOSITION  
MUSI 4300 JAZZ PERSPECTIVES  
MUSI 4302 JAZZ ARRANGING  
MUSI 4225 JAZZ IMPROVISATION III - ADVANCED

All students wishing to pursue the Bachelor of Music Degree in Preparation for Teacher Certification must pass the music education proficiency exam before enrolling in:

MUSI 3211 EARLY CHILDHOOD MUSIC  
MUSI 3213 INSTRUMENTAL MATERIALS AND TECHNIQUES I  
MUSI 3214 CHORAL MATERIALS AND TECHNIQUES I

An audition or permission of the instructor is required for all large ensembles. All University students, regardless of major, are permitted to audition for and participate in all music department ensembles: concert bands, marching band, jazz ensembles, choirs, and orchestra.

All Bachelor of Music students are required to pass the Theory Proficiency exam.

All Bachelor of Music students are required to enroll in a large ensemble each semester in residence. Any student not enrolled in a large ensemble by the end of Late Registration will be given a warning and advised to do so, and students that are still not registered in a large ensemble after Census date may be removed from the music program and required to re-audition in a subsequent semester in order to be re-admitted. Ensembles that meet this requirement, as well as any minimum requirements for number(s) of semester in specific ensembles, are determined by each degree plan. Residence is defined as any semester that a student is enrolled in any private lesson section or enrolled in 6 or more semester hours at the university, except during student teaching or music industry studies internship.
All Bachelor of Arts students pursuing the classical track are required to participate in a classical large ensemble (band, choir, or orchestra) while they are enrolled in their degree-required private lessons. All Bachelor of Arts students on the jazz track are required to participate in a jazz large ensemble while they are enrolled in their degree-required private lessons.

All students are strongly urged to refer to the sections on Academic Regulations and Degree Programs in the current UT Arlington Undergraduate Catalog. Students seeking teacher certification should read the College of Education section of this catalog concerning admission to teacher education programs and state requirements for certification.

In addition to fulfilling University and the College of Liberal Arts requirements for admission to a degree program, students planning to be music majors must also fulfill the listed Music Department requirements.

Students must receive a C or better in all music courses in order to graduate. If a student does not earn a C or better, it may not count as a prerequisite for any other course.

Students should expect, in addition to attending weekly private lessons, a minimum preparation (individual practice) of five hours per week in courses granting two hours credit, 10 hours per week in courses granting three hours credit, and 12 hours per week in courses granting four hours credit.

All private instruction, except MUSI 0171, requires a jury.

Music majors must complete a minimum of 36 hours at the 3000/4000 level, at least 24 of which must be in music.

Those music courses available to non-music majors are indicated in the course description. Individual instruction courses are open in limited numbers to all University students.

### Requirements for a Bachelor of Music Degree (Performance Option, Theory Option, or Composition Option)

COURSES

PHIL 1301. FUNDAMENTALS OF REASONING. 3 Hours.
The analysis of arguments and rhetorical forms. Deals with common forms of valid and fallacious reasoning and includes exercises and drill in practical reasoning.

PHIL 1304. CONTEMPORARY MORAL PROBLEMS. 3 Hours. (TCCN = PHIL 2306)
Examination of ethical problems and theories which have a bearing on contemporary life. Texts may include both classical and contemporary ethical writings and deal with problems such as the conditions under which life may be taken (abortion, capital punishment, medical ethics), business ethics, social justice, and individual rights.

PHIL 2300. INTRODUCTION TO PHILOSOPHY. 3 Hours. (TCCN = PHIL 1301)
An examination of one or more basic problems of lasting interest to philosophers. Typical problems may include human nature and limits of knowledge. Formerly listed as PHIL 1300. Credit cannot be received for both PHIL 1300 and PHIL 2300.

PHIL 2311. LOGIC. 3 Hours. (TCCN = PHIL 2303)
The development of formal and symbolic systems (categorical, propositional, and predicate) for the analysis of arguments.

PHIL 2312. ETHICS. 3 Hours.
Ethics is the philosophical study of morality. This course is an introduction to the main normative ethical theories, such as theological voluntarism, utilitarianism, and Kantianism. A normative ethical theory provides an answer to the question, "What is it that makes right acts right?.

PHIL 2313. PHILOSOPHY OF THE ARTS. 3 Hours.
Problems in the philosophy of art and art criticism; the history of aesthetic theory.

PHIL 2314. PERSPECTIVES ON SCIENCE AND MATHEMATICS. 3 Hours.
Topics and episodes in the history of science and mathematics from a philosophical point of view. Students are brought to understand that science has a fascinating history, is underpinned by deep philosophical presuppositions, and depends upon special social and cultural factors for its continued growth and revision.

PHIL 2315. TOPICS IN PHILOSOPHY. 3 Hours.
In-depth treatment of philosophical topics or movements, such as Existentialism, Philosophy of Science Fiction, Brain and Mind, Asian Philosophy. May be repeated for credit as content changes.

PHIL 2316. COMPUTATION, MIND, AND PARADOX. 3 Hours.
A philosophical and historical introduction to the foundations of logic and mathematics, the psychology of reasoning, and the computational theory of mind. Topics may include: logic, set theory, axiom systems; number and infinity; fallacies of deductive and probabilistic reasoning; Bayesian epistemology; algorithms; artificial intelligence, computational theories of mind and brain.

PHIL 3301. HISTORY OF PHILOSOPHY: ANCIENT PHILOSOPHY. 3 Hours.
The beginning and the early developments of the western philosophic tradition. Ancient Greek philosophy, basically the Pre-Socratics, Socrates, Plato and Aristotle.

PHIL 3302. HISTORY OF PHILOSOPHY: ROMAN AND MEDIEVAL PHILOSOPHY. 3 Hours.
Post-Aristotelians (e.g., the later Stoics, the Epicureans, Neo-Platonists); philosophy of the early Church Fathers through Aquinas and later Scholastics.

PHIL 3303. HISTORY OF PHILOSOPHY: RENAISSANCE AND EARLY MODERN EUROPEAN PHILOSOPHY. 3 Hours.
The philosophical views of Galileo, Newton, Bacon, and Hobbes, the Continental Rationalists and British Empiricists, and a brief introduction to the philosophy of Immanuel Kant.

PHIL 3304. HISTORY OF PHILOSOPHY: NINETEENTH AND EARLY TWENTIETH CENTURY PHILOSOPHY. 3 Hours.
Major philosophers from Kant to the early 20th century.
PHIL 3307. SEMINAR IN RESEARCH METHODS AND PHILOSOPHICAL WRITING. 3 Hours.
Examination of philosophical methodology; philosophical analysis, philosophical writing, discipline-specific bibliographic tools, etc. Students write a series of short papers on topics of interest. Prerequisite: PHIL 2311 and one other PHIL course.

PHIL 3315. EXISTENTIALISM. 3 Hours.
Readings in existentialist philosophy and literature with a special emphasis on such themes as alienation, anxiety, the self, absurdity, value, freedom, and responsibility. Texts may include writings from Kierkegaard, Nietzsche, Heidegger, Sartre, Camus, de Beauvoir, Jaspers, and others.

PHIL 3316. PHILOSOPHY OF RELIGION. 3 Hours.
Problems that engage philosophy of religion (e.g., the existence of God, theologoc, religious language) and the way these problems have been treated by some outstanding Western thinkers.

PHIL 3317. PHILOSOPHICAL LOGIC. 3 Hours.
Begins with predicate calculus and includes such topics as definite descriptions, identity, modal logic, second-order logic, set theory, philosophy of logic and mathematics, and philosophical applications of logic. Prerequisite: PHIL 2311 or consent of the instructor.

PHIL 3318. THE PHILOSOPHY OF SCIENCE AND TECHNOLOGY. 3 Hours.
The method and goals of scientific scholars and inquiry. The distinction between formal and empirical sciences, laws and theories, measurement, the role of observation and experiment, and probability. Formerly listed as PHIL 4315. Credit cannot be received for both PHIL 4315 and PHIL 3318.

PHIL 3319. BIOMEDICAL ETHICS. 3 Hours.
Major ethical problems which arise in modern medicine and in medical/biological research (euthanasia, abortion, patient-physician relations, allocations of medical resources, genetic research, etc.).

PHIL 3320. PHILOSOPHY OF LAW. 3 Hours.
Examination of the institution of law, legal concepts, legal reasoning, and the legal process. Topics may include the nature of law; the moral limits of the criminal law; legal rights; liberty, justice, and equality; punishment; responsibility; the private law (property, contract, and tort); constitutional law; and feminist jurisprudence.

PHIL 3321. PHILOSOPHY OF LANGUAGE. 3 Hours.
Topics to be investigated include the nature of language and communication; the distinction between natural and artificial language; the traditional division of the field into syntax, semantics, and pragmatics; and such specialized subtopics as meaning, reference, truth, and speech acts. Completion of PHIL 2311 is recommended, but not required.

PHIL 3324. BUSINESS ETHICS. 3 Hours.
Selected ethical issues in business, such as the nature and moral status of capitalism; corporate moral agency and responsibility; issues and challenges in the workplace (e.g., civil liberties, personnel policies, unionization, privacy, and safety); moral choices facing employees (e.g., loyalty, insider trading, and whistleblowing); job discrimination (e.g., affirmative action, comparable worth, and sexual harassment); consumer protection; environmental protection; and globalization.

PHIL 3330. SOCIAL AND POLITICAL PHILOSOPHY. 3 Hours.
Investigation of the basis (if any) of political obligation. Analysis of social and political concepts, such as equality, liberty, rights, and justice. Discussion of social and political theories, such as anarchism, contractarianism, Marxism, and conservatism.

PHIL 3340. TOPICS IN APPLIED ETHICS. 3 Hours.
Investigation of a single moral issue or a cluster of issues that arise in the context of a particular profession. Examples of the former are abortion, punishment, freedom of speech, the environment, and the moral status of animals. Examples of the latter are business ethics, legal ethics, engineering ethics, nursing ethics, and computer ethics. May be repeated for credit as content changes.

PHIL 3341. TOPICS IN BIOETHICS. 3 Hours.
Investigation of a single moral issue or a cluster of issues that arise in the context of the medical profession. Examples of possible topics are resource allocation, surrogate decision-making, the philosophy of mental illness, research ethics, reproductive ethics, and end of life care. May be repeated for credit as content changes. Prior completion of PHIL 3319 (Biomedical Ethics) is strongly recommended, but not required.

PHIL 3350. TOPICS IN ANCIENT GREEK PHILOSOPHY. 3 Hours.
An in-depth examination of a particular figure or topic in the field of ancient Greek philosophy. Works studied may include those of the Pre-Socratics, Plato, Aristotle, Hellenistic, and Neoplatonic philosophers.

PHIL 3390. HONORS COLLOQUIUM. 3 Hours.
An interdisciplinary course designed to meet the needs of advanced undergraduates in the Honors College.

PHIL 4191. UNDERGRADUATE CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering research of individual students or study in designated areas. May be repeated for credit.

PHIL 4192. CONFERENCE COURSE IN BIOETHICS. 1 Hour.
This course is an independent study offering students an opportunity for in-depth study of a specific topic in bioethics. Requires permission of the department chair and the instructor.

PHIL 4291. UNDERGRADUATE CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering research of individual students or study in designated areas. May be repeated for credit.
PHIL 4292. CONFERENCE COURSE IN BIOETHICS. 2 Hours.
This course is an independent study offering students an opportunity for in-depth study of a specific topic in bioethics. Requires permission of the department chair and the instructor.

PHIL 4318. PHILOSOPHY AND LITERATURE. 3 Hours.
The role of ideas in literature and an analysis of the actual contacts between philosophy and the dominant world views of the great writers of literature.

PHIL 4380. PHENOMENOLOGY. 3 Hours.
Phenomenology is a major philosophical movement based on the methodically controlled description of conscious experience, as uncovered at first introspectively. This course focuses on (1) the origin of the movement in common epistemological problems arising in philosophy, psychology, mathematics, and the natural sciences, (2) the development of the movement’s method, and (3) a close study of some influential phenomenologists, including Husserl, Sartre, and Merleau-Ponty. Contemporary connections to the neuroscientific study of consciousness are also explored.

PHIL 4381. THEORIES OF INTERPRETATION. 3 Hours.
Philosophical hermeneutics—the theory or study of interpretation—dates back at least to Aristotle and grew in the 20th century from a focus on texts to an analysis of the interpretation of every human act and idea. This course traces the history of the problems of interpretation from Aristotle to the present.

PHIL 4383. PHILOSOPHY OF MIND. 3 Hours.
This course is a non-exhaustive survey of topics central to contemporary analytic philosophy of mind: the mind/body problem, functionalism, consciousness, intentionality, mental causation, and perception. Readings include work by figures such as Smart, Armstrong, Putnam, Block, Kripke, Chalmers, and Siegel. Evaluation will likely involve some subset of: a midterm examination, short papers, a more substantial research project, and a final examination, on each of which students will be assessed for conceptual clarity, communicative economy, and critical reasoning.

PHIL 4385. THEORY OF KNOWLEDGE. 3 Hours.
Problems which arise from attempts to give an account of human knowledge. Skepticism, perception, induction, or the nature of truth. Note: Although there are no prerequisites for this course, students who have had no previous philosophy courses may find the material difficult.

PHIL 4386. METAPHYSICS. 3 Hours.
Problems which arise from attempts to give an account of reality and its manifestations. Possibility and necessity, causality, the nature of events, mind-body, and universals. Note: Although there are no prerequisites for this course, students who have had no previous philosophy courses may find the material difficult.

PHIL 4387. TOPICS IN VALUE THEORY. 3 Hours.
In-depth treatment of an issue or topic within value theory, which is broadly construed to include moral philosophy (and its subfields, such as moral epistemology and moral psychology), social philosophy, political philosophy, philosophy of law, aesthetics, philosophy of religion, and feminist philosophy. May be repeated for credit with permission of the department.

PHIL 4388. TOPICS IN THE HISTORY OF PHILOSOPHY. 3 Hours.
In-depth treatment of a single important philosophical writer, a related group of writers, or an extended tradition. May be repeated for credit with permission of the department.

PHIL 4389. TOPICS IN PHILOSOPHY AND THE SOCIAL SCIENCES. 3 Hours.
In-depth treatment of one or more of the social sciences from a philosophical perspective: may include the philosophy of history, social philosophy, political philosophy, philosophy of the social sciences, or any specific subject therein. Credit may not be granted for PHIL 4311 or PHIL 4317 (no longer offered) and PHIL 4389. May be repeated for credit with permission of the department.

PHIL 4391. UNDERGRADUATE CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering research of individual students or study in designated areas. May be repeated for credit.

PHIL 4392. CONFERENCE COURSE IN BIOETHICS. 3 Hours.
This course is an independent study offering students an opportunity for in-depth study of a specific topic in bioethics. Requires permission of the department chair and the instructor.

PHIL 4394. SENIOR THESIS. 3 Hours.
During the senior year, the student completes a thesis under the direction of a faculty member in the major department. Required of all pre-professional track philosophy majors and of all philosophy majors who are members of the University Honors College.

PHIL 5391. CONFERENCE COURSE IN PHILOSOPHY. 3 Hours.
May be taken only with the permission of the instructor and Graduate Advisor.

PHIL 5392. TOPICS IN THE HISTORY OF PHILOSOPHY. 3 Hours.
Consideration in depth of the work of a single philosopher or a related philosophical school against the background of the development of philosophy. May be repeated for credit as the topic changes.

PHIL 5393. PHILOSOPHICAL PERSPECTIVES ON THE HUMANITIES. 3 Hours.
A philosophical inquiry into problems and issues of relevance in humanistic disciplines. May be repeated for credit as the topic changes.

PHIL 6389. SEMINAR IN PHILOSOPHICAL ANALYSIS. 3 Hours.
Seminar-style treatment of some major problem in contemporary philosophy. May be repeated for credit as the topic changes.
PHIL 6394. TOPICS IN SYSTEMATIC PHILOSOPHY. 3 Hours.
In-depth treatment of an issue or issues in metaphysics, epistemology, ethics, aesthetics or related subdisciplinary areas. May be repeated for credit as the topic changes.
Philosophy - Graduate Program

The Philosophy Doctoral Program at the University of North Texas

Students in the Ph.D. program in philosophy at the University of North Texas may, but are no longer required to, take up to 15 graduate semester credit hours in the Department of Philosophy at UT Arlington. Visit the web page of UNT's Department of Philosophy and Religion Studies (http://philosophy.unt.edu/graduate-program). For more information, contact Dr. Dale Wilkerson (dale.wilkerson@unt.edu) at the University of North Texas.
Philosophy, Classics, and Humanities - Undergraduate and Certificate Programs

Overview
A major in philosophy is built on the central texts in the history of Western thought. Philosophy focuses on the perennial problems raised by the encounter of human beings with their history, culture, and the world. It emphasizes methods of analysis and clarity of argumentation. Students who major in philosophy have the broadest possible preparation in the liberal arts.

Students who complete a major in philosophy are prepared to enter either graduate programs or the world of work. In addition to providing vocational skills and a solid foundation for graduate work in the discipline, a major in philosophy constitutes appropriate and strong preparation for graduate work in other academic disciplines as well as in professional programs in a broad variety of fields. The Department of Philosophy and Humanities is prepared to work with students who are interested in postgraduate professional education to assure that their preparation meets disciplinary and/or professional criteria and expectations in areas including law, business administration, and theology. The faculty of the Department of Philosophy and Humanities also work with advisors in the Health Professions Advising Office of the College of Science to ensure that philosophy majors pursuing a pre-medical curriculum are kept abreast of required and recommended courses outside the major.

Requirements for Admission to a Major in Philosophy
Students should have completed 30 hours of core with 30 hours at UT Arlington, or 40 hours of core with 12 hours at UT Arlington with an overall GPA greater than 2.0. Before being accepted into the major in philosophy, students must also have passed a course in symbolic logic (PHIL 2311 LOGIC or the equivalent). Students may be accepted as pre-philosophy majors if the above standards are not met.

Requirements for a Minor in Philosophy
A minor in philosophy requires 18 semester hours, at least six of which must be 3000/4000 level.

Requirements for a Minor in Classical Studies
A minor in classical studies requires at least 18 semester hours, at least six of which must be 3000/4000 level, in approved classical studies courses. There are four options for the classical studies minor: Greek Language, Latin Language, Classical Civilization, and Ancient Studies.

Requirements for a Minor in Medical Humanities and Bioethics
A minor in medical humanities and bioethics requires 18 hours. There are three required courses: HUMA 3300, PHIL 3319, and the student’s choice from a list of Disability Studies courses.

Requirements for the Certificate in Ethics
The certificate in ethics requires at least 15 semester hours in approved ethics courses.

Requirements for the Certificate in Medical Humanities
The certificate in medical humanities requires at least 12 semester hours in approved courses.

Undergraduate Advising
All philosophy majors are directed in their program by a designated undergraduate advisor. In addition, the following special advisors are available:

Graduate Work in Philosophy: Majors who are interested in graduate work in philosophy should consult the departmental graduate advisor during their junior year.

Pre-Law: Majors who intend to apply to law school will find courses in logic, philosophy of law, political philosophy, and ethics particularly useful. Interested students should consult the Philosophy/Pre-law faculty advisor for assistance in course selection and application procedures.

Philosophy/Business Administration Minor: It is possible to combine the philosophy major with a business administration minor in preparation for admission to the UT Arlington MBA program. (See Liberal Arts Major/Business Administration Minor section in the introduction of the College of Liberal Arts.) The Philosophy/Business Administration faculty advisor will assist students in coordinating their program and meeting admissions requirements either at UT Arlington or other schools.

Pre-Theological: Majors who plan to enter a school of theology should consider a minor in classics and foreign language preparation in Greek and/or Latin. Electives in ethics and philosophy of religion are particularly recommended. Interested students should consult the Philosophy/Pre-ministerial faculty advisor for additional assistance.
Pre-Medical: A departmental faculty advisor is available to assist majors who intend to apply to medical school. The major program will be coordinated with the Health Professions Advising Office of the College of Science.

**Oral Communication Competency**

Students majoring in philosophy may demonstrate competency in oral communication by

1. successful completion of a specific course approved by the Department of Philosophy and Humanities for this purpose, or
2. successful completion of any course from among those approved by the Undergraduate Assembly.

**Computer Use Competency**

Students majoring in philosophy may demonstrate competency in computer use by

1. successful completion of PHIL 3307 SEMINAR IN RESEARCH METHODS AND PHILOSOPHICAL WRITING, or
2. successful completion of any course from among those approved by the Undergraduate Assembly for this purpose, or
3. passing the University proficiency examination in computer use.

Requirements for a Bachelor of Arts Degree in Philosophy (Mind, Language, and Cognition Option)

Students interested in the Mind, Language, and Cognition (MLC) Option must complete the requirements for the General Track degree in philosophy, with a minor in linguistics, and psychology as their area of secondary emphasis for elective course work. Although specific major, minor, and elective courses should be selected in consultation with the MLC advisor in philosophy, typical courses include

<table>

PSYC 4355  THE HISTORY OF PSYCHOLOGY  3

(Students who intend to apply to graduate school may elect to complete the requirements for the Pre-Professional Track degree in philosophy, with the
minor in linguistics and elective course work in psychology.)

Requirements for a Bachelor of Arts Degree in Philosophy (Philosophy and Classics Option)

Students interested in the Philosophy and Classics Option typically complete the requirements for the General Track degree in Philosophy, with a minor
in Classical Studies, and are required to fulfill their language requirement with Greek; with advisors’ approval, students may choose to substitute Latin,
French or German. Specific major, minor and elective courses should be selected in consultation with the philosophy undergraduate advisor and the
director of Classical Studies. (Students who intend to apply to graduate school may elect to complete the requirements for the Pre-Professional Track
degree in Philosophy, with the minor in Classical Studies, and the language hours in Greek.)

Minor in Philosophy

18 hours, at least six of which must be  3000/4000 level.

Minor in Classical Studies

The Minor in Classical Studies (p. 723) requires 18 hours, at least six of which must be  3000/4000 level. There are four options for the classical studies
minor: Greek Language, Latin Language, Classical Civilization, and Ancient Studies. Interested students must consult with the advisor to determine
which courses are required for each option.

Minor in Medical Humanities and Bioethics

The Minor in Medical Humanities and Bioethics (p. 843) requires 18 hours. There are three required courses: HUMA 3300, PHIL 3319, and the student’s
choice from the listed Disability Studies courses.

Certificate in Ethics

To receive the certificate, a student must complete five courses from the following list:

PHIL 1304  CONTEMPORARY MORAL PROBLEMS  3
  or PHIL 2312  ETHICS
  or PHIL 3319  BIOMEDICAL ETHICS
  or PHIL 3320  PHILOSOPHY OF LAW
  or PHIL 3324  BUSINESS ETHICS
  or PHIL 3330  SOCIAL AND POLITICAL PHILOSOPHY
  or PHIL 3340  TOPICS IN APPLIED ETHICS
Topics in Value Theory

With the permission of the departmental adviser, one of the five required courses may be replaced by a course from the following list:

<table>

</tbody>
</table>

Certificate in Medical Humanities

To receive the certificate, a student must complete HUMA 3300 and three courses from an approved list (p. 844). Students can count toward the certificate no more than two courses from a single department. At least three courses must be from the College of Liberal Arts.
Political Science

Undergraduate Degrees

• Bachelor of Arts in Political Science (p. 956)
• Minor in Political Science (p. 958)
• Fast Track Program (p. 958)

Graduate Degree

• Political Science, M.A. (p. 951)

COURSES

POLS 2311. GOVERNMENT OF THE UNITED STATES. 3 Hours. (TCCN = GOVT 2305)
(GOVT 2305). The constitution and government of the United States. The organization, procedures, and duties of the branches of the government, together with their accomplishments and defects.

POLS 2312. STATE AND LOCAL GOVERNMENT. 3 Hours. (TCCN = GOVT 2306)
(GOVT 2306). The principles and organization of American state, county, and municipal government, together with current problems and the constitution and government of Texas.

POLS 3301. INTRODUCTION TO GLOBAL ISSUES. 3 Hours.
Comparative perspectives on a broad range of cultural, linguistic, economic, political, and social issues confronting a globalized world today. Designed to draw attention to the multifaceted connections among nation-states, nongovernmental organizations, diverse ethnic, cultural, and religious groups, and populations around the world. Course taught as POLS 3301 and GLOBAL 2301. Credit will be granted in only one department.

POLS 3302. INTRODUCTION TO INTERNATIONAL RELATIONS. 3 Hours.
Introduction to the interplay between states, international organizations, multinational corporations, and popular or militant movements within the international system and to their continued search for wealth, power, and security.

POLS 3303. INTRODUCTION TO PUBLIC ADMINISTRATION. 3 Hours.
The scope and development of public administrative organizations; both the traditional and behavioral approaches to the treatment of administrative principles, decision making, and organizational environment.

POLS 3304. INTRODUCTION TO COMPARATIVE POLITICS. 3 Hours.
Cross-national and cross-cultural comparisons of political systems. Institutional structure, political process, dynamics of change, and ideology.

POLS 3305. GOVERNMENT IN URBAN AMERICA. 3 Hours.
Problems associated with the growth, diversity, and complexity of urban areas and governmental solutions. Urban regimes, neighborhood governments, electoral politics, and intergovernmental relations. Useful for students interested in urban management.

POLS 3306. LEGISLATIVE ORGANIZATION AND PROCEDURE. 3 Hours.
Internal and external influences on the U.S. Congress: rules, norms, committees, seniority, political parties, presidents, media, constituents and interest groups.

POLS 3307. COMPARATIVE STATE AND LOCAL POLITICS. 3 Hours.
Comparison of state and local political institutions and policy choices in the United States. Useful for students interested in state and local government policy innovations.

POLS 3308. POLITICS OF A TEXAS CITY: ARLINGTON CITY POLITICS. 3 Hours.
Describes the political processes over a period of fifty years from the immediate post-World War II years to the present. The outlines of Arlington city government, its structure, the changes, and personalities that have shaped it and held power. This course does not satisfy area distribution requirements.

POLS 3309. HEALTH POLITICS, POLICY, AND ADVOCACY. 3 Hours.
Explores health politics, policy, and advocacy in modern American politics in areas such as health care costs, the opioid epidemic, natural disasters, smoking and vaping, vaccines, and scooters. Considers how stakeholders such as patients, advocacy groups, hospitals, medical professionals, and insurance companies influence policy-making, and how health care policies shape patient care.

POLS 3310. RESEARCH METHODS AND POLITICAL ANALYSIS. 3 Hours.
How to study politics scientifically, through proper research design, quantitative and qualitative methods. Students are familiarized with a statistical package to analyze political data, which will fulfill the computer competency requirement. Prerequisites: POLS 2311, POLS 2312, Math 1301 or Math 1302, and Math 1308. Exceptions as approved by the Department.

POLS 3311. PUBLIC OPINION. 3 Hours.
Measurement of attitudes, public opinion and ideology, the learning and influencing of public opinion, and expression of public opinion in elections and mass political movements. The logic and practice of survey research.
POLS 3312. INTRODUCTION TO PUBLIC POLICY ANALYSIS. 3 Hours.
The American policymaking process from issue creation to program administration and evaluation. Policy models and methods of policy analysis. Oriented toward providing students with skills as a professional policy analyst.

POLS 3313. MODERN CRITICS OF SOCIETY AND POLITICS. 3 Hours.
Designed for both political science and other majors. Focus on writers like Banfield, Galbraith, Marcuse, Reich, Revel, Skinner, and Toffler.

POLS 3315. VIOLENCE & REPRESSION IN THE AMERICAS. 3 Hours.
Examination of extra-legal behavior in the Americas (particularly Latin America). Topics include human rights violations, repression, insurrection, terrorism, and revolution. Analysis of different causes and outcomes of such political participation. Prerequisite: POLS 2311 and POLS 2312.

POLS 3317. MEXICAN POLITICS AND U.S.-MEXICO RELATIONS. 3 Hours.
Current economic and political systems of Mexico and relevant issues in U.S.-Mexico relations. Trade, immigration, economic dependency, energy, contraband, and other topics. Offered as MAS 3317 and POLS 3317; credit will be given in only one department.

POLS 3319. CAUSES OF WAR. 3 Hours.
Introduces students to the causes of war including rationalist explanations, genetic and evolutionary impulses, psychological motivations, and group and structural incentives.

POLS 3327. AMERICAN POLITICAL PARTIES. 3 Hours.
The development and characteristics of the American political party system, including systematic goals, formal organizations, membership recruitment, ideological and issue orientations, electoral and participatory functions, and linkages in the political system.

POLS 3328. INTRODUCTION TO MIDDLE EAST POLITICS. 3 Hours.
The historical developments that have led to the current political, social, economic, and security order of the Middle East, as well as the contemporary challenges facing the region and its inhabitants. Prerequisites: POLS 2311 and POLS 2312.

POLS 3330. JUDICIAL BEHAVIOR AND THE JUDICIAL PROCESS. 3 Hours.
Decision making, role perception, recruitment and socialization of judges, and the relationship between attitudes and values of justices and their decisions. The judicial process and how courts relate to the larger political system and society. Especially recommended for pre-law majors.

POLS 3331. CONTEMPORARY ISSUES IN CIVIL LIBERTIES. 3 Hours.
The status and function of civil liberties in modern America emphasizing problem areas of Equal Employment Opportunity, invasion of privacy by government, obscenity and pornography, and corporate and industrial assaults on civil liberties.

POLS 3333. JURISPRUDENCE. 3 Hours.
An empirical and normative examination of the nature of law, legal reasoning, and modern legal systems, particularly in the U.S. Other topics: the origins of American legal concepts as they have evolved from earlier legal systems in the Western world and a comparative treatment of legal systems in the world today. Especially recommended for pre-law majors.

POLS 3336. STATE COURTS. 3 Hours.
An examination of state judicial institutions emphasizing the role of processes in determining judicial behavior and the composition of state courts. Examines the role of law and courts, judicial system structures, and judicial policy-making in state government. Prerequisite: POLS 2311 and POLS 2312.

POLS 3390. HONORS COLLOQUIUM. 3 Hours.
An interdisciplinary course designed to meet the needs of advanced undergraduates in the honors program.

POLS 4101. MOOT COURT. 1 Hour.
An understanding of legal debate from the perspective of student competitions, discussions of legal doctrines, and legal research methods. Statewide competitions required. This course does not satisfy area distribution requirements. May be repeated for total of 3 hours credit.

POLS 4102. POLITICAL SCIENCE SERVICE LEARNING. 1 Hour.
Students will engage in service learning placements to supplement political science course work with the goal of civic education and community involvement. Placements will be coordinated with the Center for Community Service Learning and students will be required to fulfill not only placement hours, but also additional reflection in writing with the faculty advisor. This course does not satisfy area distribution requirements.

POLS 4300. POLITICS IN POPULAR CULTURE. 3 Hours.
Use of film and video film, video television, novels, music, or other social media in the presentation of political ideas, opinions, and facts. Techniques, subject matter, and alternative forms of presentation. This course does not satisfy area distribution requirements.

POLS 4303. PUBLIC ADMINISTRATION AND THE POLITICAL PROCESS. 3 Hours.
The relationships of public administration at all levels with democratic institutions, including its interactions in the formulation and execution of public policies with the chief executive, the legislative and judicial branches, political parties, clientele groups, and the public at large.

POLS 4310. RESEARCH IN POLITICAL SCIENCE. 3 Hours.
Provides a hands-on research experience in political science suitable for students who are pursuing research-related careers or who aspire to attend graduate school. Students will gain exposure to best practices in data collection and political analysis. Prerequisite: previous or concurrent enrollment in POLS 3310 and permission of instructor.
POLS 4311. INTERNATIONAL RELATIONS AND POLITICAL PSYCHOLOGY. 3 Hours.
Examines psychological approaches to international politics. Topics may include personality and leadership traits, cognitive and emotional approaches, genetic characteristics and evolution, group decision-making, elite attitudes, public opinion, and social identity.

POLS 4312. INTERNATIONAL ORGANIZATIONS. 3 Hours.
This course introduces students to the institutions, decision-making, and activities of the world's leading multilateral organizations. Examples include the United Nations, NATO, the African Union, and the European Union. Students will focus on how organizations respond to contemporary global challenges such as civil wars, terrorism, human rights abuses, and economic crises. The course also teaches students how to apply theories of international relations to real-world policy problems.

POLS 4316. WOMEN IN THE POLITICAL PROCESS. 3 Hours.
This course introduces students to the unique experiences of women in the political process, the impact of these experiences on the political system, and theories of gender and politics. Offered as POLS 4316 and WOMS 4316; credit will be granted only once.

POLS 4318. POLITICS OF AFRICAN AMERICANS. 3 Hours.
The influence of African-American politics on United States government and policies with special attention given to organizational development, participation in political parties, leadership, ideology, the Civil Rights movement, current issues, and relations with other ethnic groups. Offered as AAST 4317 and POLS 4318; credit will be granted in only one department.

POLS 4319. POLITICS OF MEXICAN AMERICANS. 3 Hours.
The influence of Mexican-American politics on United States government and policies with special attention given to organizational development, participation in political parties, leadership, ideology, the Chicano Movement, current issues, and relations with other ethnic groups. Offered as MAS 4319 and POLS 4319; credit will be given in only one department.

POLS 4320. CIVIC ENGAGEMENT, CIVIL SOCIETY, AND COMMUNITY. 3 Hours.
The study of civic engagement, leadership, and political participation. The relationship of community to public policy, political elites and disenfranchised groups. May employ service learning.

POLS 4321. INTEREST GROUPS AND POLITICAL ADVOCACY. 3 Hours.
Examines the role and importance of organized interests in American politics and evaluates group influence and lobbying.

POLS 4322. ISSUES IN POLITICAL THEORY. 3 Hours.
Each time this course is offered it will focus on one particular issue central to the study of political theory for example, authority, justice, citizenship, methodology of the social sciences. May be repeated for credit when content varies.

POLS 4323. FEMINIST POLITICAL THOUGHT. 3 Hours.
Issues raised by the feminist critique of political theory; the exclusion of women from the political sphere until the 20th century; Marxist, liberal, and radical feminist political thought; alternative feminist conceptions of the political. Offered as POLS 4323 and WOMS 4323; credit will be granted only once.

POLS 4324. ELECTORAL BEHAVIOR. 3 Hours.
Major theories of candidate strategy and voter choice, including rational behavior and empirical democratic theory. Introduction to voting behavior analysis in contemporary elections.

POLS 4326. ELECTION STRATEGY AND CAMPAIGN MANAGEMENT. 3 Hours.
Strategies relating to elections and various aspects of managing campaigns, including the techniques of demographic survey, voting behavior analysis, opinion survey, issue research, and candidate research.

POLS 4327. POLITICAL IDEAS OF THE ANCIENT WORLD. 3 Hours.
Principal theorists and schools of political thought prior to 1500, with emphasis upon those making significant contributions to the political heritage of Western Europe.

POLS 4328. MODERN POLITICAL IDEAS. 3 Hours.
The development of political thought from Machiavelli to Marx. Emphasis on the Renaissance, Classical Liberalism, French Radicalism and Marxism.

POLS 4329. CONTEMPORARY CONTROVERSIES IN POLITICAL THEORY. 3 Hours.
Examination of twentieth-century approaches to political thought and central controversies in the field. Topics may include: liberal, conservative, and socialist theories; critical theory; communitarianism; postmodernism; feminism; and identity politics.

POLS 4330. THE U.S. PRESIDENCY. 3 Hours.
The U.S. Presidency, including sources of power, changes in the office over time, and the relationship between the individual and the institution.

POLS 4331. U.S. CONSTITUTIONAL LAW: GOVERNMENT POWER. 3 Hours.
U.S. Supreme Court decisions regarding the structure of government in the United States. Focus on Congress, the President, Federalism, and the relation of the judicial process to these topics. Recommended for pre-law majors.
POL 4332. U.S. CONSTITUTIONAL LAW: FUNDAMENTAL RIGHTS. 3 Hours.
U.S. Supreme Court decision making involving the Bill of Rights and other fundamental rights. Especially recommended for pre-law majors.

POL 4333. PRESIDENTIAL LEadership IN DOMESTIC POLICy MAKING. 3 Hours.
Explores the policy process from the perspective of the U.S. president, examining the president's influence through the policy stages. Prerequisite: POLS 2311 and POLS 2312.

POL 4336. CONTEMPORARY UNITED STATES FOReign POLICy. 3 Hours.
Theories and analytical structure for understanding United States foreign policy. Policy examined from theoretical, structural, regional, and topical perspectives.

POL 4340. FEDERAl SOCIAL POLICy. 3 Hours.
This course examines public policies, including Social Security, Medicare, Medicaid, and various public assistance programs that emerged from the federal government's attempts to create a "safety net" for American citizens beginning in the 1930s, and from attempts to confront poverty during the 1960s. This course also considers the importance of federal "tax expenditures" in prompting private actors to provide services, such as employer-sponsored health insurance. The course also examines attempts to alter, roll back, or expand the federal role in social policy over recent decades.

POL 4350. HEALTH POLITICS AND POLICy. 3 Hours.
Debates over the role of government in providing access to health care have been a prominent feature of American politics for the past century. This course examines the politics of health care debates in America as well as major features of federal health policy. Prerequisite: POLS 2311 and POLS 2312.

POL 4360. THEORIES OF INTERNATIONAL RELATIONS. 3 Hours.
Evaluates major theories, methodologies, and approaches to international relations in order to understand contemporary world affairs.

POL 4361. THE POLITICAL ENVIRONMENT OF RUSSIA AND THE SUCCeSSOR STATES. 3 Hours.
The domestic political systems of Russia and the other former Soviet republics. The communist state in retrospect. Development of political actors, institutions, and parties. Offered as POLS 4361 and RUSS 4361; credit will be given in only one department. Taught in English; for Russian language credit, research will be done in Russian.

POL 4362. RUSSIA AND THE SUCCeSSOR STATES TODAY. 3 Hours.
The metamorphosis of the Communist Party and the current political philosophies of the post-Soviet states. Examination of attitudes and self-perceptions of citizens in these states in the post-period. Emphasis is on area studies and culture. The course will be taught in English, but for Russian language credit; research will be done in the Russian language. May be repeated for credit as topics change. Offered as POLS 4362 & RUSS 4362. Credit will be granted in only one department.

POL 4365. FOREIGN POLICIES OF RUSSIA AND THE SUCCeSSOR STATES. 3 Hours.
The foreign policies of Russia and other former Soviet republics. Development of their policymaking structures and the major issues confronting them. Emphasis on Russia and the superpower relationship, European security and cooperation, relations with developing states, and the interactions of the former Soviet republics. Also listed as RUSS 4365; credit will be given in only one department.

POL 4369. THE ARAB-ISRAELI CONFLICT. 3 Hours.
Explores the origins, development, and continuation of the Arab-Israeli and Israeli-Palestinian conflicts through personal stories, national narratives, public images, and popular discourses.

POL 4370. INTERNATIONAL RELATIONS OF THE MIDDLE EAST. 3 Hours.
This course will focus on the international interactions among actors in the Middle East. Topics to be covered include: theoretical and conceptual approaches to understanding regional politics; main conflicts in the region; contemporary challenges and issues; and a survey examination of the foreign policies of select countries.

POL 4371. THE POLITICS AND FOREIGN POLICY OF ISRAEL. 3 Hours.
This course will examine the domestic politics and foreign policies of Israel. The course will be divided into two sections. The first section will focus on the domestic institutions and politics of Israel, while the second section will focus on Israel's foreign policies and the impact of domestic politics on them. Topics to be covered include: the rise of Zionism; the pre-state period in Palestine; efforts at state-building and institutional development; domestic politics (including institutions, parties, electoral system); divisions in Israeli society; and determinants and examples of foreign policy. Prerequisite: POLS 2311 and POLS 2312.

POL 4372. HUMAN SECURITY, VIOLENCE, AND SCARCITY. 3 Hours.
This course explores patterns of violence, scarcity, and norms in world politics, particularly as they pertain to the emerging paradigm of human security. This approach calls into question conventional notions of national and international security by focusing on the security of people rather than states. It explores challenges to basic human needs and desires which undermine the ability to be safe, free, and secure -- such as infectious disease, genocide, environmental degradation, migration, and transnational crime. It also examines international responses to such problems.

POL 4373. POLITICS OF INTERNATIONAL LAW. 3 Hours.
Examines the role of law in the international system including international treaties and agreements, states' compliance with international law, non-governmental actors, international courts. Topics include force, human rights, crimes against humanity, protection of the environment, and terrorism.

POL 4389. THE POLITICS OF NATIONAL MEMORY. 3 Hours.
An examination of power in Washington, focusing on what lies outside the Executive and Legislative branches. Students visit and study significant institutions and monuments in the city as windows into complex political and social issues. Enrollment is restricted to designated Archer Fellows.
POLS 4390. POLICYMAKING IN WASHINGTON. 3 Hours.
An analysis of the central role of Congress in shaping public policy. Emphasis on real-world policymaking. Students play the role of legislative assistants to members of Congress and produce analyses of the public policy issues. Enrollment is restricted to designated Archer Fellows. Prerequisite: POLS 2311 and POLS 2312.

POLS 4392. SPECIAL TOPICS IN POLITICAL SCIENCE. 3 Hours.
May be repeated for credit as topics change.

POLS 4393. PREPARING FOR CAREERS IN POLITICAL SCIENCE. 3 Hours.
Supervised employment in a government or government-related organization with the student performing duties related to the academic curricula of political science. Students are required to submit a term paper, case study, or an approved academic project related to the work performed. Work is generally graded pass/fail. A maximum of six semester hours of credit in Political Science Internship may be used to satisfy a political science elective requirement for graduation. Students must be classified as juniors or seniors, be political science majors or minors, and have a minimum 3.0 GPA in their major and overall. Majors must have completed 21 hours of political science; minors must have completed 12 hours of political science. Contact the Department for a complete description of requirements. Departmental consent required before enrollment.

POLS 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or a project under the direction of a faculty member in the major department.

POLS 4395. CONFERENCE COURSE READINGS IN POLITICAL SCIENCE. 3 Hours.
Designed for the advanced undergraduate student who is capable of independent study. An in-depth examination of one area of political science not necessarily covered in regular course work. May be repeated for credit when the subject matter varies, but only with permission of the department. Only two such courses will be counted on a student's degree plan. Prerequisites: permission of the undergraduate advisor; appropriate previous coursework; written consent of the instructor. Students must be Political Science majors or minors, have a minimum of 60 credit hours/junior status, have a 3.0 grade point average, and have completed at least 9 hours of Political Science.

POLS 4691. ARCHER PROGRAM INTERNSHIP. 6 Hours.
One-semester work experience in Washington, DC carried out during the student's tenure of an Archer Fellowship. The internship is custom-designed with the assistance of the director of the Archer Program based on the student's academic and professional goals. Enrollment is restricted to designated Archer Fellows. Prerequisite: POLS 2311 and POLS 2312.

POLS 5197. MASTER'S COMPREHENSIVE EXAMINATION. 1 Hour.
Required of all non-thesis Master of Arts students in the semester of their graduation. Graded P/F/R.

POLS 5300. AMERICAN GOVERNMENT AND POLITICS. 3 Hours.
A survey of the major theories and subfields in the study of American politics. Readings comprise a representation of scholarship illustrating a variety of substantive and methodological approaches.

POLS 5301. JUDICIAL POLITICS AND THE U.S. SUPREME COURT. 3 Hours.
This course focuses on judicial decision-making and behavior. While the entire American court system will be considered, primary attention will be given to the U.S. Supreme Court and constitutional issues.

POLS 5302. BUREAUCRATIC LEADERSHIP: TRENDS IN PUBLIC ADMINISTRATION AND POLICY MANAGEMENT. 3 Hours.
Recent literature in organizational theory, government restructuring, and policy management problems.

POLS 5303. COMPARATIVE POLITICAL SYSTEMS. 3 Hours.
Theories, concepts, and methods that dominate modern comparative political analysis. The state of the discipline and controversies in the comparative method are evaluated.

POLS 5305. TOPICS IN POLITICAL THEORY. 3 Hours.
This course will cover both historical and contemporary topics central to the discipline of political theory. It will consider the major figures in the field as well as themes such as citizenship, democracy, freedom, and authority. May be repeated for credit as the topic changes.

POLS 5310. ANALYZING POLITICS: RESEARCH DESIGN AND METHODS. 3 Hours.
This course introduces students to the practice of analyzing politics. It begins with a foundation in research design, covering topics such as how to develop testable hypotheses, measure concepts, and identify causal relationships. The course then takes a hands-on review of a range of tools used by political scientists—from basic data analysis and statistics, to experiments, elite interviews, content analysis, surveys, and the study of networks.

POLS 5311. CAMPAIGNS AND ELECTIONS. 3 Hours.
Describes important trends in modern campaigns and elections practices, focusing on contemporary American elections, including campaign finance, voter turnout, campaign advertising, and voter choices. Class presentations, a short research paper, and journal article readings.

POLS 5312. AGENDAS, INFORMATION, AND DECISION-MAKING IN PUBLIC POLICY. 3 Hours.
This course examines the role of organized interests in American politics and policymaking. It explores topics such as group formation and organization, strategies of political advocacy, access to decision-makers, and influence in the policy process.

POLS 5315. PUBLIC OPINION. 3 Hours.
Describes the development of survey research and commonly-encountered problems in surveys. Focuses most heavily on the contemporary practice of public opinion research, particularly in the American setting. Class presentations, a short research paper, and journal article readings.
POLS 5316. PUBLIC LEADERSHIP: RACE, ETHNICITY, & GENDER. 3 Hours.
Study of leadership theories, skills and traits, with focus on the intersections of race, ethnicity, and gender on public leadership in the public arena.

POLS 5317. RACE AND ETHNICITY IN AMERICAN POLITICS. 3 Hours.
Explores the political behavior of racial and ethnic groups in the U.S. as well as the contemporary influence of race and ethnicity on American political institutions and public policy debates.

POLS 5318. WOMEN IN THE POLITICAL PROCESS. 3 Hours.
This course examines women and gender in the political process, exploring various theoretical and methodological approaches helpful in studying gender and politics.

POLS 5319. CONGRESSIONAL BEHAVIOR. 3 Hours.
This course addresses several major questions regarding the nature of Congress as an institution, the behaviors of its members, and the role Congress plays in shaping public policy and the general nature of a representative democracy. Students are expected to have the ability to comprehend readings that are heavily quantitative. Course requirements will include weekly writings, a research paper and exams.

POLS 5320. THE AMERICAN PRESIDENCY. 3 Hours.
An overview course on the U.S. Presidency, exploring the institution as well as its relationship to other branches and political actors.

POLS 5321. THE PRESIDENCY AND DOMESTIC POLICY. 3 Hours.
This course examines presidential and domestic policy making, exploring how the president makes policy, focusing on theories of presidential leadership, White House organization and presidential-congressional interactions.

POLS 5322. SEPARATION OF POWERS IN AMERICAN POLITICAL DEVELOPMENT. 3 Hours.
Theories behind institutional design and the historical development of the executive, legislative, and judicial branches in the United States. Emphasis is placed on interactions of these institutions of government and current separation of powers controversies.

POLS 5323. STATE COURT SYSTEMS. 3 Hours.
Examination of the major theories of judicial politics and public law applied to the state court level. Topics include attention to the institutional, strategic, and attitudinal perspectives of judicial behavior.

POLS 5324. PUBLIC POLICY: ISSUES AND ANALYSIS. 3 Hours.
This course examines the important role of analysis in the policy process. It provides an understanding of the major actors and institutions involved in policymaking, explores major theories of policy change, and equips students with the skills necessary to conduct effective public policy analysis.

POLS 5325. STATE POLITICS. 3 Hours.
This course surveys the substantial literature and research programs in the study of state politics and policy.

POLS 5326. STATE/LOCAL GOVERNMENT POLICYMAKING. 3 Hours.
Focus on policy problems. Emphasis is on trends in state policy, interstate policy innovation and diffusion, and the effects of federal programs on state policy choices.

POLS 5327. URBAN POLICYMAKING AND ADMINISTRATION. 3 Hours.
Focus on the influence of economic, political, institutional, and organizational factors on urban policymaking and administration. A variety of regime and power structure models facilitate the analysis of urban policymaking.

POLS 5328. PUBLIC POLICY AND MEXICAN AMERICAN COMMUNITIES. 3 Hours.
Focus on the public policy process and the limited role Mexican Americans have had in national and state (TX) policymaking. Select topic areas are utilized to focus on state actors, issues, allocation of resources, and the power structure for analytical purposes.

POLS 5329. PUBLIC BUDGETING. 3 Hours.
The concepts, processes, and policy impacts of taxation and public budgeting. Introduction to current research techniques, budgetary issues, and the relevant political economy literature.

POLS 5330. ENERGY AND THE ENVIRONMENT. 3 Hours.
Analysis of the politics, economics, and administration of energy and environmental policies in the United States.

POLS 5331. POLITICAL SYSTEMS OF EAST ASIA. 3 Hours.
Comparative analysis of the political institutions and processes of China and Japan, with emphasis on the aspects of political development.

POLS 5332. PARADIGMS AND PROBLEMS IN INTERNATIONAL RELATIONS. 3 Hours.
This course surveys the major theoretical approaches in the field of International Relations. Students will learn to apply these paradigms to contemporary global issues such as conflict, trade, nuclear proliferation, terrorism, and protection of human rights.

POLS 5333. IDENTITY AND POLITICS IN THE MIDDLE EAST. 3 Hours.
Deeper examination of processes of state building and political development; state-society relations; Arabism; authoritarianism and democratization; oil and economic issues; Islamist politics; the role of transnational ideas.

POLS 5334. VIOLENCE AND DEPRIVATION IN WORLD POLITICS. 3 Hours.
Focuses on theoretical frameworks, empirical analysis, and policy relevance of myriad threats to individuals and communal groups. Examples include: human rights, failed states, violence, health issues, slavery and migration, environmental security.
POLS 5335. LATIN AMERICAN POLITICS. 3 Hours.
Designed to give students knowledge of the political development of Latin America by first examining general topics and then analyzing events in specific countries. Utilizes themes and concepts that are universal to all Latin American nations, but also stresses the different paths to political development that have been taken in each of these countries.

POLS 5336. REPRESSION AND REVOLUTION IN LATIN AMERICA. 3 Hours.
Examines issues of political repression and revolutionary participation in Latin America. Topics range from human rights violations to coups and revolutions.

POLS 5337. THE POLITICAL SYSTEM OF THE RUSSIAN FEDERATION. 3 Hours.
This course emphasizes the analytical means by which researchers approach the Russian Federation in the post-Soviet period. Russia is considered from institutional, cultural, rationalist, and economic perspectives to develop a comprehensive orientation about the nature and scope of Russian politics.

POLS 5338. AMERICAN FOREIGN POLICY. 3 Hours.
Evaluation of some of the primary theories and models used in explaining American Foreign Policy. The course attempts to bridge the gaps that exist between theory and reality through approaches such as realism, neo-realism, deterrence, and others.

POLS 5339. ISRAELI IDENTITY AND THE ARAB-ISRAELI CONFLICT. 3 Hours.
This course will explore the deeper threads of Israeli identity, and how these impact Israeli policy toward the Arab-Israeli conflict. Topics to be covered include: diverse and clashing identities (e.g., Jewish, democratic, Middle Eastern, Israeli); how identity clashes have played out in politics; outlines of Israeli foreign policy; specific policies toward the Palestinians.

POLS 5341. COGNITION, EMOTION, AND EVOLUTION IN INTERNATIONAL RELATIONS. 3 Hours.
This course focuses on psychological approaches to international relations and examines how these perspectives advance the study of world politics. Approaches to be studied include: behavioral traits, trust, risk, values, personality, leadership, group decision-making, emotions, and evolutionary dynamics. These will be applied to different policy areas, including U.S. foreign policy, the use of force, and international cooperation.

POLS 5342. INTERNATIONAL ORGANIZATIONS. 3 Hours.
This course describes the institutions, decision-making and activities of the world's leading international organizations to establish an understanding of the role of international organizations in managing contemporary global problems.

POLS 5348. TOPICS IN U.S. POLITICS. 3 Hours.
This course will focus on a specific issue-area of international relations and world politics. (May be repeated for credit when topics vary.)

POLS 5391. CONFERENCE COURSE IN POLITICAL SCIENCE. 3 Hours.
Research and reading in a specialized field under the direction of a member of the graduate faculty. Graded P/F/W.

POLS 5392. INSIDE WASHINGTON: POLICYMAKING FROM THE GROUND UP. 3 Hours.
This course provides students with an overview of the U.S. federal policymaking process and the various public/private stakeholders and institutions that participate in this process. Specifically, the course focuses on three key elements of federal policymaking: separation of powers and original constitutional intent, influencing federal policy, and creating effective advocacy strategies. Students will examine a sampling of the extensive literature on political theory/philosophy, political institutions, political behavior, public policy and public administration. Students will also meet regularly with practitioners, such as officials from Congress, the White House, executive branch agencies, think tanks, organized interest groups, media/communications, and lobbying firms.
POLS 5393. ARCHER CENTER WASHINGTON INTERNSHIP. 3 Hours.
This course consists of an internship in a governmental or non-governmental organization in Washington, D.C. The student is expected to work full-time (40 hours a week) at the internship, which may be paid or unpaid. Students are responsible for seeking and selecting their internships. The Archer Center does not guarantee any internship placements, but Archer Center faculty and staff will provide students with information about internship opportunities and advice about placements. The Archer Center faculty meet regularly with students to debrief and to integrate this practical training with other lessons in professional development.

POLS 5394. ARCHER CENTER INDEPENDENT STUDY AND RESEARCH. 3 Hours.
This course is tailored to each student's graduate program of study. An Archer Center faculty member will work independently with each student to develop a research project that is designed to advance the student's academic and research goals. The project will align with the requirements of the student’s graduate degree.

POLS 5398. THESIS. 3 Hours.
Original research designed to augment existing studies of problems or topics related to one of the major fields of study.

POLS 5698. THESIS. 6 Hours.
Original research designed to augment existing studies of problems or topics related to one of the major fields of study. POLS 5398 graded R/F only; POLS 5698 graded P/F/R.
Political Science - Graduate Programs

Overview
The program leading to a Master of Arts degree in Political Science emphasizes a variety of skills in preparation for many different types of employment. Students develop the ability to conduct research and critically analyze complex information, understand decision-making processes, present their findings and conclusions in a succinct and easily-understood manner, think creatively to resolve problems and concerns, and communicate information clearly. These skills are considered valuable in a wide range of jobs and careers, including in: the private sector, non-profit and non-governmental organizations, education, government, research and policy analysis, media, and international affairs. In addition, the Political Science MA is often used as a stepping stone for enrollment in business and law degrees. Finally, the Department of Political Science also endeavors to equip students with the research techniques and substantive background for coursework undertaken beyond the master's level.

Admissions
The program is committed to a holistic admissions approach. As a result, decisions on whether to admit or deny an application include: grade point averages, letters of recommendation, personal statements, advanced degrees, graduate courses taken as a degreed student or in another program, and professional work experience. The major purpose of the admissions criteria is to promote access to our program, but maintain standards that will enable the department to determine if the applicant demonstrates the requisite skill level to master the requirements of the program.

Admission to the MA program in political science is based upon the completion of the general admission requirements of the Graduate School. Applicants are required to submit all official transcripts, a personal statement, and three (3) letters of recommendation. The department will review the application package in its entirety. The package is evaluated to determine if a student has achieved a 3.00 grade point average (GPA) in the last 60 hours of their undergraduate work as calculated by the Graduate School, and meets other admission requirements. If a student has already earned an advanced degree, the department will evaluate the student’s academic performance in obtaining that degree equally with the undergraduate performance. International students must meet or exceed the minimum university standard on the TOEFL (550 for paper examination, 213 for computer examination), TOEFL iBT (total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section), TSE (40), or the IELTS (6.5).

Several factors matter for a decision to accept or deny an applicant. To this end the department has three categories of acceptance: unconditional admission, probationary admission, and provisional admission.

Application Requirements
All applications must include the following four components. All four will be considered, without specific weights, in the decision to accept or deny.

1. A bachelor’s degree from an accredited general or specific program. A bachelor’s degree in political science, however, is not required.
2. A copy of all university and college transcripts.
3. A written personal statement (200 words) explaining the applicant’s interest and motivation in studying for a graduate degree in political science.
4. Three letters of recommendation (including at least two from university/college faculty) that favorably assess the applicant’s potential success in a graduate program and in the field of political science. Letters must be mailed directly from the recommenders to the Graduate Adviser of political science.

Unconditional Admission
An applicant may be accepted for unconditional admission if all of the above components of the application package are properly submitted, and all three of the following criteria are met and all three give strong indication of likely success in the program.

1. An undergraduate GPA of 3.00 or greater (as calculated by the Graduate School) in the last 60 credit hours of completing an undergraduate B.A. or B.S. degree from an accredited institution (verified by the Graduate School from official transcripts from each college or university previously attended).
2. Adequate preparation and satisfactory performance in political science courses or courses in related disciplines.
3. Three letters of recommendation (including at least two from university/college faculty) that indicate satisfaction with the applicant’s work and demonstrate a strong likelihood for success in the program and in the field of political science.

Probationary Admission
Students who do not qualify for unconditional admission may be considered for probationary admission if they satisfy any two of the three requirements for unconditional admission listed above as well as demonstrate potential for success in line with the necessary application materials. Students with a reported grade point average below 2.70, however, will not be eligible for probationary admission. Being admitted on probationary status means that the student will be able to take graduate level classes, but the student must earn a B or better in the first 12 hours of graduate coursework at UT Arlington. This regulation will be strictly enforced.
Provisional Admission
An applicant unable to supply all required documentation prior to the admission deadline, but otherwise appears to meet admission requirements, may be granted provisional admission. Provisionally admitted students must adequately satisfy any incomplete documentation by the end of the semester in which they are admitted. If the applicant fails to do so, the department may then reclassify the applicant's admission status as probationary or ask the student to leave the program.

Deferral
A deferred decision may be granted when a file is incomplete or when a denial decision is not appropriate.

Denial
An application will be denied if it does not meet the criteria listed above, does not demonstrate potential for success, or the applicant’s grade point average is below 2.70.

Fast Track Program
The Fast Track program allows outstanding senior undergraduate Political Science (POLS) students to take two or three graduate courses (5000-level courses) to replace six or nine credit hours of advanced POLS undergraduate courses (3000- or 4000-level courses). The credit hours earned in these graduate courses can then be applied to both the Bachelor of Arts (BA) and to the Master of Arts (MA) in Political Science. Those who successfully complete the program will be automatically admitted to the Graduate School. They will not be required to take any qualifying test, complete an application for admission to the Graduate School, arrange for letters of reference, or pay an application fee. This enables students to complete their MA degree in a shorter time period.

Applying to the POLS Fast Track Program
Undergraduate students apply to the Department of Political Science by completing a Fast Track application form available from the POLS academic adviser. Students will be notified by the Department of their acceptance into the Fast Track program.

Unconditional Admission
1. The student must be within 30 hours of completing a BA in Political Science at UTA.
2. The student must have completed 30 hours of coursework at UTA.
3. The student must have an overall GPA of at least 3.3 in all coursework at all schools and an overall GPA of at least 3.3 in all coursework completed at UTA.
4. The student must have an overall GPA of at least 3.5 in all POLS courses completed at UTA.
5. The student must have completed 12 credit hours of the following specific undergraduate POLS courses, with a GPA of at least 3.5 in these courses. (Courses from other universities or colleges that cover the same or similar material cannot replace any of these specific UTA courses.)
   • POLS 2312 State and Local Government or its equivalent from another institution
   • POLS 3310 Analyzing Politics
   • POLS 3302 Introduction to International Relations, POLS 3303 Introduction to Public Administration, POLS 3304 Introduction to Comparative Politics, POLS 3305 Government in Urban America, POLS 3307 Comparative State and Local Politics, POLS 3311 Public Opinion, POLS 3312 Introduction to Public Policy Analysis, OR POLS 3333 Jurisprudence
   • One substantive 4000-level POLS course from any of the area concentrations (excluding internships and conference or directed readings courses).

Provisional Admission
A student may gain provisional admission if, by the semester in which application is made, he or she has already completed 3 out of the 4 required POLS courses (listed above) with a GPA of at least 3.5 in them, with the 4th course to be completed in the semester of application. All other requirements above must be met. Provisional admission will be changed to unconditional admission upon satisfactory completion of remaining requirements. Students failing to meet all requirements at the end of their semester of application will be removed from the Fast Track program. Any credits earned prior to removal from the program will be applied to the undergraduate degree only. None of the other benefits of the Fast Track program will apply. Provisionally admitted students who have been removed from the program may subsequently apply to graduate programs via the normal application process, paying all fees and meeting all relevant admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the Department of Political Science and of the Office of Graduate Studies.
Denial
Students who do not meet the requirements set out shall be denied admission to the Fast Track program. They may still apply to the graduate program through the regular application process. Admission will not be automatic as it will be subject to the normal admission practices of the Department of Political Science and of the Office of Graduate Studies.

Good Standing
In order to remain in the Fast Track program, students must meet the following requirements:

1. Students must maintain an overall GPA of at least 3.0 and must earn grades of B or better in all Fast Track-approved graduate courses that will be used to satisfy undergraduate and graduate degree requirements of the Fast Track program.

2. Students must enroll in at least 2 graduate courses prior to receiving their bachelor’s degree, and receive at least a B in each course.

Students who, at any time, do not meet these requirements will be obliged to leave the Fast Track program. Any graduate credits earned will be applied only to the undergraduate degree, and none of the other benefits of participation in the Fast Track program will apply. They may apply to the MA program as a regular student after receiving their BA.

Fellowships
Fellowships, when available, will be awarded on a competitive basis. Fellowships are selected on the basis of the following criteria. Please see the Graduate Adviser for more information.

- Candidates must be enrolled full time in the department of political science (at least 9 hours of courses per semester).
- A minimum undergraduate GPA of 3.00 in the last 60 undergraduate hours, as calculated by the Graduate School, and unconditional admission status, or a minimum GPA of 3.25 in political science graduate hours completed.
- Transcript of a completed bachelor’s degree in political science (or appropriate related field) from an accredited institution.
- Three letters of recommendation. These letters may be the same submitted for admission.
- A written statement explaining the applicant’s reasons for graduate study in political science.

Master’s Degree Requirements
The non-thesis degree plan requires 36 hours of coursework, including three hours of POLS 5310 ANALYZING POLITICS: RESEARCH DESIGN AND METHODS, and a minimum of two courses in each of the first two area concentrations: American Politics and Policymaking, and International Studies.

The thesis degree plan requires 24 hours of coursework, including three hours of POLS 5310 ANALYZING POLITICS: RESEARCH DESIGN AND METHODS. Of the remaining 21 hours, a minimum of one course must be taken in each of the first two area concentrations: American Politics and Policymaking, and International Studies.

Students should consult the Political Science Graduate Student Handbook for regulations on transfer courses, undergraduate courses, conferences, internships, and special courses. It is recommended that students complete at least one general field seminar (POLS 5300, POLS 5301, POLS 5302, POLS 5332) prior to taking the topics courses. See the Graduate Advisor for more detail.

All candidates for the degree of Master of Arts with a major in political science must pass a final examination, written, oral, or both written and oral. See the Department of Political Science Graduate Student Handbook or the Graduate Adviser for more details. In the event of failure of the final examination, the student may petition the Committee on Graduate Studies to retake the examination on a date no sooner than 60 days after the first examination. Students will not be permitted more than one reexamination after failure of the initial examination.

**International Studies Option**
The International Studies option of the Master of Arts program in political science emphasizes the study of comparative politics and international relations within the framework of political science. This option requires 12 hours of coursework in International Studies. Upon satisfying the requirements for this option, students will receive a letter of completion. Completion will not be reflected on student transcripts.

**U.S. Political Institutions and Processes Option**
The U.S. Political Institutions and Processes option of the Master of Arts program in political science emphasizes political behavior and processes and public law and jurisprudence within the framework of political science. This option requires 12 hours of coursework focused on American politics and/or public law and jurisprudence. Upon satisfying the requirements for this option, students will receive a letter of completion. Completion will not be reflected on student transcripts.

**Dual Degree Program**
Students in political science may participate in a dual degree program whereby they can earn a Master of Arts in political science and a Master of Arts in another program, such as criminal justice or sociology. By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from nine to 18 hours, subject to the approval of Graduate Advisers from both programs. To participate in the dual degree program, students must make separate application to each program and must submit a separate program of work for each degree. Those interested in a dual degree program should consult the appropriate Graduate Adviser(s) for further information on course requirements. See also the statement on "Dual Degree Programs" in the general information section of this catalog.
Political Science - Undergraduate Programs

Overview

The goal of the political science undergraduate curriculum is to maximize students’ capacities to analyze and interpret political events and governmental processes. In addition to acquiring general knowledge about government and political behavior, students also learn the analytical skills relevant to particular political systems (their own and others’), and to problems of most immediate consequence and concern to them.

The four major objectives of the department's curriculum are to:

• Identify and describe political structures, rules, behaviors and environments which shape political action.
• Explain and employ statistical and methodological techniques to analyze information.
• Identify, comprehend, and apply comparative, theoretical, or conceptual approaches to actors and their policies.
• Develop the ability to analyze, synthesize, and evaluate political phenomena.

The major courses are designed to present a coherent portrait of the discipline. Students begin with a general introduction to national, state, and local politics followed by required courses in political methodology and political theory. Finally, students are exposed to at least four major areas of the discipline. The department also offers options for students who desire a concentration in pre-law, public policy/administration, or international studies. Students may choose any 18 hours (6 advanced) for a minor. Those who want a specialization may concentrate courses in areas of public law; policy and administration; comparative and international politics; American national government; political parties, group politics, and elections; or political theory.

The political science student is exposed to a multifaceted and highly regarded faculty, many of whom have received regional and national honors for teaching, service, and research. Upon graduation, UT Arlington political science majors are prepared to compete for a wide variety of jobs in both the private and public sectors.

Admission to Department of Political Science Degree Programs

Students should have completed 30 hours of core with 30 hours at UT Arlington, or 40 hours of core with 12 hours at UT Arlington with an overall GPA greater than 2.0. Students may be accepted as pre-political science majors if the above standards are not met.

Teacher Certification

Students interested in Texas Teacher Certification should consult the College of Education section of this catalog for the most recent changes in requirements regarding admission to Teacher Education, completion of University programs in preparation for certification, and eligibility for certification after graduation.

Oral Communication and Computer Use Competencies

Students majoring in political science are required to demonstrate computer use and oral communication competencies. Computer use proficiency can be demonstrated by one of the following:

1. successful completion of POLS 3310 RESEARCH METHODS AND POLITICAL ANALYSIS; or
2. successful completion of CSE 1301 COMPUTER LITERACY or INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING; or
3. successful completion of other courses approved by the Undergraduate Assembly; or
4. passing the University computer use competency exam.

Oral communication proficiency can be demonstrated by one of the following:

COMS 1301 FUNDAMENTALS OF PUBLIC SPEAKING 3
COMS 2305 BUSINESS AND PROFESSIONAL COMMUNICATION 3
COMS 3315 COMMUNICATION FOR EDUCATORS 3

1. successful completion of specific political science courses approved by the department; or
2. successful completion of one of the following:
3. successful completion of other courses approved by the Undergraduate Assembly.

Students should discuss these options with their undergraduate advisor who may also provide a list of other courses approved by the University to meet these requirements.
# Requirements for a Bachelor of Arts Degree in Political Science

All students who wish to earn a Bachelor of Arts degree in Political Science must complete the following coursework. In completing this coursework, they will satisfy the University's core curriculum requirements.

## Pre-Professional Courses

<table>

Requiring a minimum of 12 hours in the Policy/Public Administration area of Political Science

International Studies:
Requiring a minimum of 12 hours in any combination of the Comparative Politics and International Politics areas of Political Science

Political Behavior and Processes:
Requiring a minimum of 12 hours in the Political Behavior and Processes area of Political Science

Total Hours: 120

1. Students are required to complete 12 hrs of 3000/4000 level POLS coursework to bring their total number of POLS coursework hours to 36. The 36 hours to include POLS 2311 and POLS 2312

Students majoring in Political Science will pursue this general course of study in the discipline AND they may declare a specific area of concentration by filing a statement of intent with the Political Science Department. The area of concentration will require that the student complete the requirements for the general degree plan while also fulfilling certain requirements for the concentration. All students will receive the B.A. in Political Science. Those completing the selected specialization will also receive recognition of completion.

The purpose of the specializations is to provide the student with a focused, systematic, and in-depth educational experience in the context of a broad liberal arts education.

Political Science classes may be used toward the major requirements or minor requirements (at the discretion of the department offering the minor), but not both.

**Oral Communication and Computer Use Competencies**

Students majoring in political science are required to demonstrate computer use and oral communication competencies. Computer use proficiency can be demonstrated by one of the following:

1. successful completion of POLS 3310 RESEARCH METHODS AND POLITICAL ANALYSIS; or
2. successful completion of CSE 1301 COMPUTER LITERACY or INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING; or
3. successful completion of other courses approved by the Undergraduate Assembly; or
4. passing the University computer use competency exam.

Oral communication proficiency can be demonstrated by one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 1301</td>
<td>FUNDAMENTALS OF PUBLIC SPEAKING</td>

<tr>
<td>COMS 3315</td>
<td>COMMUNICATION FOR EDUCATORS</td>
<td>3</td>
</tr>
</tbody>
</table>

1. successful completion of specific political science courses approved by the department; or
2. successful completion of one of the following:
3. successful completion of other courses approved by the Undergraduate Assembly.

Students should discuss these options with their undergraduate advisor who may also provide a list of other courses approved by the University to meet these requirements.

**Requirement for a Minor in Political Science**

A minor in political science requires 18 semester hours, at least six of which must be 3000/4000 level.

Political Science classes may be used toward the major requirements or minor requirements (at the discretion of the department offering the minor), but not both.

**Fast Track Program in Political Science** The Fast Track program allows outstanding senior undergraduate Political Science (POLS) students to take up to three graduate courses (5000-level courses) to replace up to nine credit hours of advanced POLS undergraduate courses (3000- or 4000-level courses); the credit hours earned in these graduate courses can then be applied to both the Bachelor of Arts (BA) and to the Master of Arts (MA) in Political Science. Those who successfully complete the program will be automatically admitted to the Graduate School. They will not be required to take any qualifying test, complete an application for admission to the Graduate School, arrange for letters of reference, or pay an application fee. This enables students to complete their MA degree in a shorter time period.

**Applying to the POLS Fast Track Program** Undergraduate students apply to the Department of Political Science by completing a Fast Track application form available from the POLS academic advisor. Students will be notified by the Department of their acceptance into the Fast Track program.

*Unconditional Admission*
1. The student must be within 30 hours of completing a BA in Political Science at UTA.

2. The student must have completed 30 hours of coursework at UTA.

3. The student must have an overall GPA of at least 3.3 in all coursework at all schools and an overall GPA of at least 3.3 in all coursework completed at UTA.

4. The student must have an overall GPA of at least 3.5 in all POLS courses completed at UTA.

5. The student must have completed 12 credit hours of the following specific undergraduate POLS courses, with a GPA of at least 3.5 in these courses. (Courses from other universities or colleges that cover the same or similar material cannot replace any of these specific UTA courses.)

   - POLS 2312 State and Local Government or its equivalent from another institution
   - POLS 3310 Analyzing Politics
   - POLS 3302 Introduction to International Relations, POLS 3303 Introduction to Public Administration, POLS 3304 Introduction to Comparative Politics, POLS 3305 Government in Urban America, POLS 3307 Comparative State and Local Politics, POLS 3311 Public Opinion, POLS 3312 Introduction to Public Policy Analysis, OR POLS 3333 Jurisprudence
   - One substantive 4000-level POLS course from any of the area concentrations (excluding internships and conference or directed readings courses).

Provisional Admission

A student may gain provisional admission if, by the semester in which application is made, he or she has already completed 3 out of the 4 required POLS courses (listed above) with a GPA of at least 3.5 in them, with the 4th course to be completed in the semester of application. All other requirements above must be met. Provisional admission will be changed to unconditional admission upon satisfactory completion of remaining requirements. Students failing to meet all requirements at the end of their semester of application will be removed from the Fast Track program. Any credits earned prior to removal from the program will be applied to the undergraduate degree only. None of the other benefits of the Fast Track program will apply. Provisionally admitted students who have been removed from the program may subsequently apply to graduate programs via the normal application process, paying all fees and meeting all relevant admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the Department of Political Science and of the Office of Graduate Studies.

Denial

Students who do not meet the requirements set out shall be denied admission to the Fast Track program. They may still apply to the graduate program through the regular application process. Admission will not be automatic as it will be subject to the normal admission practices of the Department of Political Science and of the Office of Graduate Studies.

Good Standing

In order to remain in the Fast Track program, students must meet the following requirements:

1. Students must maintain an overall GPA of at least 3.0 and must earn grades of B or better in all Fast Track-approved graduate courses that will be used to satisfy undergraduate and graduate degree requirements of the Fast Track program.

2. Students must enroll in at least 2 graduate courses prior to receiving their bachelor’s degree, and receive at least a B in each course.

Students who, at any time, do not meet these requirements will be obliged to leave the Fast Track program. Any graduate credits earned will be applied only to the undergraduate degree, and none of the other benefits of participation in the Fast Track program will apply. They may apply to the MA program as a regular student after receiving their BA.

For more information about the POLS Fast Track Program, please contact the undergraduate advisor in the Department of Political Science.
Sociology and Anthropology

Undergraduate Degrees

- Bachelor of Arts in Sociology (p. 977)
- Bachelor of Arts in Anthropology (p. 982)
- Minor in Sociology (p. 979)
- Minor in Anthropology (p. 982)
- Minor in Popular Culture (p. 979)

Graduate Degrees

- Sociology, M.A. (http://catalog.uta.edu/liberalarts/sociology/graduate/#masterstext/#masociology)
- Sociology, M.A. Thesis Substitute (http://catalog.uta.edu/liberalarts/sociology/graduate/#masterstext/#masociologythesissub)
- Sociology, M.A. Non-Thesis (http://catalog.uta.edu/liberalarts/sociology/graduate/#masterstext/#masociologythesissub)

COURSES

ANTH 1200. PERSONAL AND PROFESSIONAL SUCCESS IN THE SOCIAL SCIENCES. 2 Hours.
A first year experience course for new students and new transfer students interested in a career in the social sciences. Provides the necessary foundation for success in a college environment while balancing personal and/or work obligations. Orientes students to life on campus, demonstrates how to leverage campus resources to achieve career and academic goals, and emphasizes engagement outside the classroom through collaborative and co-curricular opportunities. Fulfills the University requirement for either UNIV 1101 or UNIV 1131. Offered as SOCI 1200 and ANTH 1200; credit will be granted only once.

ANTH 1306. INTRODUCTION TO ANTHROPOLOGY. 3 Hours. (TCCN = ANTH 2346)
This course, primarily intended for nonmajors and as a first course for students considering majoring in anthropology, provides an overview of the subdisciplines of anthropology: ethnology (cultural anthropology), archaeology, physical (biological) anthropology, and linguistic anthropology.

ANTH 1310. GREAT DISCOVERIES IN ARCHAEOLOGY. 3 Hours.
A survey of some of the most spectacular and otherwise significant archaeological discoveries worldwide over the past three centuries. Consideration of particular archaeological sites as case studies to illustrate cultural development from the Stone Age to Medieval times.

ANTH 2307. BIOLOGICAL ANTHROPOLOGY. 3 Hours. (TCCN = ANTH 2301)
Human variation and human evolution. Genetics, living and fossil nonhuman primates, the human skeleton, the fossil record of human evolution, modern human variation and biological adaptation.

ANTH 2322. GLOBAL CULTURES. 3 Hours. (TCCN = ANTH 2351)
Methods and theories of sociocultural anthropology. Examines systems of social organization and cultural meaning in contemporary human societies. Topics include fieldwork, cross-cultural analysis, applied anthropology, and global perspectives on political, economic, and social institutions.

ANTH 2339. INTRODUCTION TO ARCHAEOLOGY. 3 Hours. (TCCN = ANTH 2302)
Archaeology is the study of the human past through physical evidence and material remains. This evidence ranges from entire landscapes to small objects. Students learn how archaeological sites are discovered, investigated, and interpreted, and how this knowledge contributes to our understanding of human society.

ANTH 2349. HONORS PRINCIPLES OF ARCHAEOLOGY. 3 Hours.
Methods and theories of prehistoric archaeology. Techniques and approaches employed in recovering, dating and interpreting prehistoric cultural materials. Writing-intensive course including group and individual projects and oral presentations. Prerequisite: Membership in the Honors College or permission of instructor.

ANTH 2357. ANTHROPOLOGY IN ACTION. 3 Hours.
Anthropological examination of a particular culture, region or cultural industry. Topics include identity, heritage, commoditization, historical and cultural representation, and authenticity. May be offered on campus or as a field course or study abroad course.

ANTH 2358. ARCHAEOLOGICAL CULTURES. 3 Hours.
Survey of a particular archaeo-cultural region or culture. Can be offered on campus or as a field course or study abroad course.

ANTH 2359. MYTHS AND MYSTERIES IN ARCHAEOLOGY. 3 Hours.
This course will critically examine pseudoscience, cult archaeology and creationism from a scientific perspective. Through the close examination of case studies we will dispel archaeological myths and mysteries which are often depicted as fantastic or cult archaeology. This course will demonstrate that a strong adherence to scientific investigation can uncover facts about prehistory that are as interesting as the myths.

ANTH 3300. DEBATES IN CULTURAL ANTHROPOLOGY. 3 Hours.
Explores core concepts, critiques of past applications, and current challenges of theory and practice in cultural anthropology.
ANTH 3301. ARCHAEOLOGICAL METHOD AND THEORY. 3 Hours.
Explores core concepts, critiques of past applications, and current challenges of theory and practice in archaeology. Topics include history of archaeological thought, processual and actualistic approaches, ethnoarchaeology, evolutionary archaeology, stewardship of the archaeological past, and post-processual critiques. Prerequisite: ANTH 2339 or permission of instructor.

ANTH 3307. EVOLUTIONARY MEDICINE. 3 Hours.
The application of evolutionary theory to the practice of medicine from an anthropological perspective. Topics include diet/paleodiet, sleep habits, infectious diseases, the developmental origins of health and disease, mental health, women's health and reproduction, and aging/senescence, among others. Offered as BIOL 3307 and ANTH 3307; credit will only be granted in one department.

ANTH 3308. FORENSIC ANTHROPOLOGY. 3 Hours.
Explores the role of skeletal biology and physical anthropology in criminal investigation. Topics include determination of victim identity and context of death. Case studies will be used to demonstrate application of the methods studied.

ANTH 3310. LATINOS IN THE U.S.. 3 Hours.
Examines the Latino experience in the U.S. from an interdisciplinary perspective. Discusses the commonalities and cultural differences among various Latino groups, and focuses on important contemporary Latino issues such as education, employment, family and gender, identity, immigration, and politics. May receive credit for either MAS 3310 or ANTH 3310.

ANTH 3311. HUMAN ADAPTATION AND THE CONCEPT OF RACE. 3 Hours.
The study of modern human biological variation in the context of the history of the concept of race. Detailed historical review explores changing perspectives on variation within our species. Course examines physiological adaptations to environmental stress among a variety of human populations and implications of recent genetic research. Offered as BIOL 3311 and ANTH 3311; credit will only be granted in one department.

ANTH 3313. PRIMATE EVOLUTION AND BEHAVIOR. 3 Hours.
An overview of the Primate Order covering primate origins, evolution, ecology, adaptation, and behavior. Examination of the environmental context within which primates live, how the form of their bodies reflects their activities, and how they relate behaviorally to their environments and to one another. Offered as BIOL 3314 and ANTH 3313; credit will only be granted in one department.

ANTH 3316. LATINO HEALTH ISSUES. 3 Hours.
A cross-cultural examination of issues in Latino health and relevant health practices in the United States through the lenses of social sciences. Themes include the Latino Threat Narrative, acculturation histories and health care status of major Latino ethnic enclaves in the U.S. Listed as SOCI 3316, MAS 3316, and ANTH 3316; may receive credit for either SOCI 3316, MAS 3316, or ANTH 3316.

ANTH 3318. BORDERS, CULTURES, AND CARTELS. 3 Hours.
Critically examines life on the Mexico-U.S. border through ethnography, taking into account the impact of the U.S. war on drugs and the influence of cartels on the lives of those living in the southern border region. Topics may include impacts and influences of drugs and narco life on religion, crime, music, and daily life at the nexus of US-Mexico relations. Listed as ANTH 3318 and MAS 3318; may receive credit for either ANTH 3318 or MAS 3318.

ANTH 3325. ETHNOGRAPHY OF SOUTH AMERICA. 3 Hours.
The indigenous groups of South America, with emphasis on the Aymara and Quechua of the Andes. Topics include culture change, environmental destruction, and preservation of cultural heritage.

ANTH 3328. CIVILIZATIONS OF SOUTH AMERICA. 3 Hours.
Complex agrarian civilizations in South America, concentrating on political, social, and cultural developments of the Chavin, Nazca, Moche, Tiahuanaco, Wari-Tiahuanaco, Inca, and Conquest periods. Formerly listed as ANTH 4328. Credit cannot be given for both ANTH 3328 and ANTH 4328.

ANTH 3329. CONTEMPORARY AFRICAN CULTURES. 3 Hours.
A comparative study of African communities with an emphasis on sub-Saharan Africa. Covers regional cultural geography and history as well as ethnography of specific communities. Explores both the challenges facing contemporary African nations as well as emerging solutions. Includes exposure to African art, literature, music, cinema, and food. Offered as AAST 3329 and ANTH 3329; credit will be granted in only one department.

ANTH 3330. CULTURAL DIVERSITY AND IDENTITY. 3 Hours.
The ways identity is constructed in contemporary societies in an increasingly complex and multicultural world. Ethnic, racial, gender, and class identities. How and when identity is asserted and assigned, and how it can both draw boundaries and forge ties between peoples. Formerly listed as ANTH 2350. Credit cannot be given for both ANTH 2350 and ANTH 3330. Also listed as MAS 3330; credit cannot be granted for both ANTH 3330 and MAS 3330. Offered as AAST 3330 and ANTH 3330; credit will be granted in only one department.

ANTH 3331. CULTURE AND PERSONALITY. 3 Hours.
The interplay of culture and personality in various Western and non-Western societies. The relationship of specific practices to the development of personality and the psychological effects of colonization, modernization, and economic development of traditional societies.

ANTH 3332. FOOD AND CULTURE. 3 Hours.
Considers food systems from biological, ecological, and political-economic perspectives. May include food history, cuisines, food preferences, and other areas of anthropological scholarship on food and culture. May cover food and economic development, hunger and overnutrition, food and religion, and the globalization of foods and food systems.

ANTH 3333. NORTH AMERICAN INDIANS. 3 Hours.
North American Indian cultures and their development both before and after European contact.
ANTH 3334. ANTHROPOLOGY OF SOUTH ASIA. 3 Hours.
With a focus on the Indian subcontinent, this course introduces students to the culture, history and politics of South Asia. Drawing upon anthropological studies and a range of materials, including Bollywood films, music, tourist brochures, advertisements, Gandhi’s writings, and South Asian literature, students will gain an increased understanding of the region’s past and present.

ANTH 3335. GANDHI: CULTURE AND POLITICS IN A GLOBAL WORLD. 3 Hours.
Introduction to the life and times of Mahatma Gandhi in order to explore the cultural politics of religion, food, animal welfare, sexuality, social movements, and globalization processes. Students gain understanding of Gandhi’s enduring significance in the contemporary world.

ANTH 3336. ANTHROPOLOGY OF RELIGION. 3 Hours.
A crosscultural study of magic and religion. Theories of the origin and function of magic and religion in pre-industrial societies.

ANTH 3338. COMPARATIVE KINSHIP AND FAMILY SYSTEMS. 3 Hours.
Variation in kinship and family systems from crosscultural and evolutionary perspectives. Structure, function, and dynamics of kinship and family systems as adaptations to diverse ecological, social, and historical circumstances. Implications of this approach for understanding kinship and family in American society also addressed. Formerly listed as ANTH 4338. Credit cannot be given for both ANTH 3338 and ANTH 4338. Also offered as WOMS 3338; credit will be granted only once. Offered as AAST 3332 and ANTH 3338; credit will be granted in only one department.

ANTH 3339. URBAN ANTHROPOLOGY. 3 Hours.
Examines main issues, theoretical approaches and ethnographic methods used by anthropologists working in cities. Also discusses relevant contemporary topics such as growth of global cities, gentrification, poverty and inequality, and the economic, social and cultural integration of international immigrants in U.S. cities.

ANTH 3341. RESEARCH METHODS IN CULTURAL ANTHROPOLOGY. 3 Hours.
Observational techniques, participant-observation, hypothesis testing, research design, use of the computer in research, analysis, and report writing, and oral presentations of research reports. Satisfies oral communication and computer use competence requirements. Prerequisite ANTH 1306 or ANTH 2322 or permission of instructor.

ANTH 3343. APPLIED ANTHROPOLOGY. 3 Hours.
Explores the use of anthropological knowledge and skills to address practical problems in today’s global society, and examines how these are used in government, non-profit, and private sector industries. Addresses issues of health, education, environment, human rights, economic development, and others.

ANTH 3345. VISUALIZING CULTURE: MEDIA, IDENTITY AND POLITICS IN THE GLOBAL WORLD. 3 Hours.
Introduces students to key concepts in Visual Anthropology. This course highlights the contribution of anthropological methods in theorizing the visual in everyday life for the construction of nationalist, gender, ethnic, and class identities. Readings are drawn from diverse geographical regions. Visual material discussed in class may include ethnographic films, art, graphic novels, comics, illustrated magazines, virtual exhibitions and soap operas. Assignments include a writing and research component, and team-based exercises. Offered as ANTH 3345 and COMM 3345; credit will be granted only in one department.

ANTH 3346. ANTHROPOLOGY OF TOURISM. 3 Hours.
Examines the cultural practices of travel and the impact of tourism on both host and guest communities. Various forms of tourism are addressed including, but not limited to, ethnic, historical, regional, health and medical, and ecotourism. Themes of the “tourist gaze” authenticity, identity, consumption, ritual, borders, and pilgrimage will be explored.

ANTH 3348. ANTHROPOLOGY OF MIGRATION. 3 Hours.
This course focuses on the expanding field of migration studies in social and cultural anthropology. It traces the history of migration studies in anthropology, discusses the major theoretical contributions of anthropologists to the interdisciplinary field of migration, and addresses key contemporary topics in migration studies including globalization, transnational communities, gender, identity, and citizenship. The course heavily relies on ethnographic case studies of different immigrant populations in the U.S. written by anthropologists in the recent past.

ANTH 3349. ANTHROPOLOGY OF GLOBALIZATION. 3 Hours.
The forces of economic globalization now reach every corner of the world to the point that few societies have been untouched by their impact. This course examines the forces that drive globalization and their repercussions upon local communities around the world. It examines how economic globalization affects the lives of real people in developing and industrialized countries as well as in small-scale societies traditionally studied by anthropologists.

ANTH 3350. NORTH AMERICAN ARCHAEOLOGY. 3 Hours.
Prehistoric cultural adaptations in North America from human arrival to European contact. Topics treated include the question of when and where the first Native Americans arrived; the beginnings of village and farming life; and the development of Puebloan and “Mound-building” cultures.

ANTH 3351. ARCHAEOLOGY OF THE AMERICAN SOUTHWEST. 3 Hours.
This course investigates the peoples and places of the prehistoric North American Southwest. The focus is on the period of increasing settlement, diversity, movement, and change from 500 to 1500 C.E. Focuses on the archaeological record, ethnographies and comparative research to understand the past and present peoples of the Southwest.

ANTH 3352. ARCHAEOLOGY OF AFRICA. 3 Hours.
Course follows the African archaeological record from earliest evidence for human behavior through beginnings of state society. Topics may include stone tool technologies, forager strategies, agricultural systems, early iron technology, and trade and social networks. This is a lecture course, with an emphasis on student research. No prerequisites required, but ANTH 2339 is recommended preparation.
ANTH 3353. STONE AGE HUNTERS AND FARMERS. 3 Hours.
Human adaptations and cultural evolution in the Old World from the earliest African sites over two million years ago to the domestication of plants and animals about ten thousand years ago. Formerly ANTH 2353; credit cannot be granted for both ANTH 2353 and ANTH 3353.

ANTH 3354. ANTHROPOLOGY OF HUNTING. 3 Hours.
Covers a broad range of topics exploring hunting through time, from the prehistoric to the present. Topics include cross-cultural issues of meat and diet, hunter-gatherer subsistence behavior, overkill and animal extinction, and sport hunting. Course is relevant to environmental studies and sustainability studies.

ANTH 3355. THE RISE OF CIVILIZATION. 3 Hours.
The development of complex cultures from village farming societies in various regions of the Old and New Worlds. The civilizations of Mesopotamia, Egypt, and Mesoamerica, among others, will be treated, along with general questions concerning the rise, development, and collapse of early civilizations. Formerly ANTH 2355; credit will not be granted for both ANTH 2355 and ANTH 3355.

ANTH 3356. MESOAMERICAN ARCHAEOLOGY. 3 Hours.
Covers cultural developments in Mesoamerica through the rise of complex societies and the Spanish conquest. Topics include the emergence of Olmecs, Zapotecs, Maya, Toltecs, and the Aztecs, and explore the factors that contributed to their appearance and decline. New discoveries within the field of Mesoamerican archaeology will be examined.

ANTH 3357. COLLAPSE AND SUSTAINABILITY OF SOCIETIES. 3 Hours.
This course investigates the collapse of past societies. Understanding why and how archaeologically-known societies collapsed may provide insights to help us understand contemporary social and environmental sustainability problems.

ANTH 3358. UNDERWATER ARCHAEOLOGY. 3 Hours.
Explores the field of underwater archaeology and research methods. Topics include shipwrecks, submerged terrestrial sites, the use of scuba diving, robots, and sonar in excavation and survey, and the history and development of the discipline.

ANTH 3359. STONE TOOLS. 3 Hours.
Covers the evolution of stone tools from the first modified stone objects to the use of stone tools in complex societies such as the ancient Maya and Egyptians. Introduces students to lithic analysis and manufacture, emphasizing hands-on learning.

ANTH 3360. ARCHAEOLOGY IN PRACTICE. 3 Hours.
Covers the practical aspects of archaeology with a focus on hands-on activities and experiential learning. Students learn archaeological skills and understand the life and research of archaeologists. Topics may include research design, survey, and the laws protecting archaeological sites.

ANTH 3366. SEX, GENDER, AND CULTURE. 3 Hours.
The ways gender and sexuality are culturally constructed. Readings include ethnographies, life histories, and fiction. Debates within anthropology and within specific cultures over maleness and femaleness. Offered as ANTH 3366 and WOMS 3366; credit will be granted only once.

ANTH 3369. MEDICAL ANTHROPOLOGY. 3 Hours.
Medical systems studied cross-culturally to understand how environmental, biological, social, and cultural factors affect disease and health. The cultural dynamics of traditional practitioners and rituals within the health care system. Methods of articulating modern medicine with traditional medicine are discussed.

ANTH 3370. ARCHAEOLOGY OF THE PREHISTORIC AEGEAN. 3 Hours.
Origin, evolution and decline of the first high civilizations in Europe, namely the Minoans on the island of Crete and the Mycenaean in Greece. Stone Age background and Early Bronze Age seafaring in the Cycladic Islands; Late Bronze Age society, economy, and religion; art and architecture of the Minoan and Mycenaean palaces; Linear A and B tablets; Mycenaean collapse and the beginning of the Iron Age; Homer’s Iliad, archaeology and the Trojan War.

ANTH 3371. ARCHAEOLOGY OF GREECE. 3 Hours.
Material evidence relevant to our understanding of classical Greek culture and society from the collapse of the Mycenaean Empire through the Hellenistic Period (ca. 1200-31 B.C.). Examination of the magnificent (temples, sculpture, athletic monuments, ships) and the mundane (domestic architecture, pottery, crafts, coinage, inscriptions, architecture and artifacts of civic life, burials). Archaeological evidence will be considered in light of contemporary historical sources.

ANTH 3372. ARCHAEOLOGY OF THE ANCIENT NEAR EAST. 3 Hours.
Survey of the cultures of Mesopotamia, Syria, Palestine, and Anatolia from the earliest agricultural settlements to the late first millennium B.C. based on the surviving archaeological remains. Among the topics covered: Nature of early urbanism; development of religious and economic hierarchies; origins and impact of writing; interrelationships among early states.

ANTH 3373. ARCHAEOLOGY OF EGYPT. 3 Hours.
The culture of ancient Egypt from its earliest occupation until the Arab invasion (7th century A.C.), with emphasis on the first 20 pharaohic dynasties (third and second millennia B.C.). Egyptian social, religious, economic and political development traced through the surviving material culture (architecture, art, industries, artifacts of daily life, funerary remains, etc.) supplemented by historical and literary evidence as pertinent. Egypt’s relations with neighboring regions (Crete, Anatolia, Palestine, Nubia and Libya) considered. Offered as AAST 3373 and ANTH 3373; credit will be granted in only one department.
ANTH 3374. ARCHEOLOGY OF EUROPE. 3 Hours.
Ancient Europe is a mosaic of archaeological regionalism whose complexity is arguably unparalleled elsewhere in the world. This course surveys the material remains of several prominent ancient cultures from Iberia to the Danube, from Scandinavia to Greece, dating from stone age to medieval times. Emphasis will be on understanding the various regional traditions and their interactions, and on explicating trends in technology, economy and religion in European society during this long period. Among the topics to be examined: Paleolithic hunters and artists; agricultural origins; megalithic monuments; bronze metallurgy and its ramifications; the first high civilizations in the Mediterranean; the rise of the Celts; the coming of iron; impact of Romanization; the nature of Viking exploration and expansion.

ANTH 3375. NEANDERTHALS AND THE ICE AGE WORLD. 3 Hours.
Explores the archaeological record of Neanderthals, early modern humans, and their contemporaries. Topics include new genetic and isotopic analyses, ancient environments, early art and symbolism, and how the Paleolithic is imagined in modern society.

ANTH 3390. SPECIAL TOPICS IN ANTHROPOLOGY. 3 Hours.
Selected, specialized topics in anthropology. These may be cultural, archaeological, or biological in focus, and vary each semester. Contact the department or click on the course link to find current course title and description. May be repeated for credit with departmental permission as topics vary.

ANTH 3409. PALEOANTHROPOLOGY. 4 Hours.
Paleoanthropology: an exploration of fossil evidence for human origins and human evolution. Course focuses on the evolution of humans and our close relatives, from our origins as a distinct lineage to “anatomically modern” Homo sapiens, including the relationship between biological and cultural/behavioral evolution. Offered as BIOL 3409 and ANTH 3409; credit will be granted only once.

ANTH 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in the designated area. Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of the instructor.

ANTH 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of the instructor.

ANTH 4315. GROWTH, DEVELOPMENT, AND EVOLUTION. 3 Hours.
A survey of topics at the nexus of modern human biological research in growth and development and the evolutionary record of hominid subadults. Offered as BIOL 4316 and ANTH 4315; credit will be granted only in one department. Prerequisite: is only required for students registering for ANTH 4315. Prerequisite: ANTH 2307 or permission of the instructor.

ANTH 4322. PROBLEMS IN ANTHROPOLOGY. 3 Hours.
Intensive examination of an important problem in anthropological research selected by the instructor. May be repeated for credit whenever the topic varies.

ANTH 4342. TOPICS IN CULTURAL ANTHROPOLOGY. 3 Hours.
Selected topics, to include anthropological theory, population and cultural ecology, semiotics, and humanistic anthropology. May be repeated for credit with departmental permission. Also offered as ANTH 4342. Credit will be granted in only one department.

ANTH 4348. POLITICAL ANTHROPOLOGY. 3 Hours.
Relationships among power, identity, and culture in cross-cultural perspective. Traditional political systems, political symbols and rituals, gender and power, and the relationship between domination and resistance. How culture influences the ways in which men and women get power, use power, and resist power.

ANTH 4358. TOPICS IN ARCHAEOLOGY. 3 Hours.
Selected topics, to include examination of specific archaeological cultures of the Old World, archaeological theory, and archaeology and pseudoscience. May be taken up to four times for a total of 12 hours credit.

ANTH 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of the instructor.

ANTH 4393. INTERNSHIP IN ANTHROPOLOGY. 3 Hours.
Supervised internship program, in which students intern at various companies, non-profit and governmental agencies, and museums in the Metroplex. Applied use of anthropology in a non-academic setting. Students will learn skills of career development in anthropology. Requirements include several short assignments and a final report to the instructor. Prerequisite: ANTH 2307, ANTH 2322, OR ANTH 2339; permission of the instructor; and junior standing.

ANTH 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or project of equivalent difficulty under the direction of a faculty member in the major department.

ANTH 4398. SUMMER FIELD SCHOOL IN ANTHROPOLOGY. 3 Hours.
(3 or 6 hours credit). Offered only during the summer session. Experience in methods of field research in ethnography or archaeology. May be repeated for credit if research topic changes.
ANTH 4406. HUMAN OSTEOLOGY. 4 Hours.
Detailed examination of human skeletal morphology. Topics include form and function of all skeletal elements in the human body, differentiation of each bone, left and right side identification, identification or fragmented remains, and muscle attachments and articulations. Content useful in forensic anthropology, archaeology, and hominid paleontology. Offered as BIOL 4406 and ANTH 4406; credit will be granted only in one department.

ANTH 4459. BIOARCHAEOLOGY. 4 Hours.
The study of human remains in archaeological contexts in order to reconstruct individual identity, life history, and past population characteristics. No formal prerequisites, but familiarity with the human skeleton is helpful. Lab component is required. Offered as BIOL 4459 and ANTH 4459; credit will be granted only in one department.

ANTH 4460. ZOOARCHAEOLOGY. 4 Hours.
The study of faunal remains from archaeological contexts to understand past human economic strategies and ecological circumstances. Topics include skeletal and taxonomic identification, taphonomic processes, mortality profiles, biometric analyses, and human behavioral ecology. Lab component is required. Offered as BIOL 4460 and ANTH 4460; credit will be granted only once.

ANTH 4698. SUMMER FIELD SCHOOL IN ANTHROPOLOGY. 6 Hours.
(3 or 6 hours credit). Offered only during the summer session. Experience in methods of field research in ethnography or archaeology. May be repeated for credit if research topic changes.

ANTH 5191. CONFERENCE COURSE. 1 Hour.

ANTH 5307. FORENSIC ANTHROPOLOGY. 3 Hours.
Estimating age, sex, race, stature, pathology, cause of death, and time since death from human remains. The role of skeletal biology and physical anthropology in criminal investigation. Case studies will be used to demonstrate application of the methods studied. Requires enrollment in the undergraduate lab section.

ANTH 5310. HISTORY OF ANTHROPOLOGICAL THEORY. 3 Hours.
This course is a critical examination of major theoretical trends in ethnological theory, from mid-19th century to the present.

ANTH 5315. ARCHAEOLOGICAL METHODS. 3 Hours.
An examination of research methods and underlying theory in archaeology and their evolution since the era of European antiquarianism. Origins and development of archaeology as a scholarly discipline. Emphasis on the period 1960-present; consideration of recent trends in analysis and reportage.

ANTH 5317. ARCHAEOLOGY OF EXPLORATION. 3 Hours.
Archaeological evidence for travel in antiquity. Technology of travel (horse/camel, wheeled vehicles, boats) and related topics (navigation; development of trade and trade routes; nature of discovery, settlement and colonization in antiquity). Case studies drawn from ancient cultures of the Old World from the Stone Age through Medieval times.

ANTH 5320. METHODS IN BIOLOGICAL ANTHROPOLOGY. 3 Hours.
This course covers several topical areas relevant to biological anthropologists specializing in human biology, including osteology and skeletal biology, skeletal maturation (both postcranial and craniofacial), growth and development from birth to biological maturity, and selected topics in forensics, anthropometry, physiology, nutrition, genetics, epidemiology, and demography.

ANTH 5325. QUALITATIVE METHODS. 3 Hours.
Students do fieldwork in anthropology. Students practice participant observation, conduct an interview, collect a kinship chart, map blocks, collect life histories and participate in rituals. Course emphasizes methods of data collection, analysis/interpretation of data, and critical writing.

ANTH 5341. POSTCOLONIAL SOUTH ASIA. 3 Hours.
It approaches the competing and complementary claims on postcolonial theory by mapping the intersections in historical anthropology, literary theory, and cultural analysis. More broadly it brings to focus the shifts from Marxist to Poststructuralist directions. Though the regional focus is on India, the endeavor is also to assess dialogues among varying strands of cultural perspectives and its impact in other postcolonial contexts, both within and beyond the South Asian subcontinent.

ANTH 5342. ADVANCED ETHNOLOGY. 3 Hours.
Seminar based on student reports and critiques of assigned readings. Major emphasis on the areas of ethnology and social anthropology.

ANTH 5344. CULTURES OF LATIN AMERICA. 3 Hours.
An ethnological comparison of societies and cultures in Central and South America. Emphasis on gender, ethnicity, and political economy.

ANTH 5345. RELIGION AND CULTURE. 3 Hours.
An ethnological comparison of native religions to understand non-western belief systems. Emphasis on rituals, myths, totemic systems, taboos, and cosmology.

ANTH 5346. MESOAMERICAN ARCHAEOLOGY. 3 Hours.
An examination of the diversities of several prehistoric Mesoamerican cultures including the Olmec, Maya, Teotihuacan, Zapotec, and the Aztec. Current issues including the beginnings of agriculture, early village life, the rise of complexity and the institution of kingship, warfare, and Mesoamerican ideology and cosmology will be addressed.

ANTH 5349. TOPICS IN ANTHROPOLOGY. 3 Hours.
May be repeated for credit as the topic changes.
ANTH 5351. EMERGENCE OF HUMANKIND. 3 Hours.
An intensive review of the evidence for, and main outlines of, human biological and cultural evolution up to agricultural origins.

ANTH 5353. MEDICAL ANTHROPOLOGY. 3 Hours.
An examination of anthropological concepts for understanding curing practices and attitudes toward health programs in various cultures.

ANTH 5355. HUNTERS AND GATHERERS. 3 Hours.
Cross-cultural approach to the ecological, social, and historical contexts of hunters, gatherers, and foragers.

ANTH 5363. ETHNOGRAPHY AND PERSONAL NARRATIVE. 3 Hours.
Focus is on anthropology and autobiography, autoethnography, life history, and narrative constructions of selfhood in different cultural contexts. Development of the life history approach in ethnographic research. Methods in the collections and analysis of life stories.

ANTH 5365. GLOBALIZATION AND INTERNATIONAL MIGRATION. 3 Hours.
Examines how the expansion of global capitalist economy has contributed to the growth of international migration around the world. Focuses on how transnational migration affects the economic, social, political, and cultural practices of immigrants in both their countries of origin and destination.

ANTH 5369. FOLKLORE AND MYTHOLOGY. 3 Hours.
Function, forms, and interpretation of folklore and myth in traditional societies; examination of oral literature as an expression of continuity and change; emphasis on a structural analysis of myth.

ANTH 5370. APPLIED ANTHROPOLOGY. 3 Hours.
Examines the application of anthropological knowledge to solve practical problems in today's global world. We learn how anthropological concepts, methods, and insights are applied to understand and solve important problems related to economic development, health, environmental issues, immigration, international business, and others.

ANTH 5371. RESEARCH PRACTICUM / INTERNSHIP. 3 Hours.

ANTH 5373. ARCHAEOLOGY FIELD SCHOOL. 3 Hours.
This course, conducted during the summer sessions, consists of on-site and classroom instruction in techniques of archaeological survey, excavation, laboratory, processing, and analysis. Students can receive either three or six hours of credit. Enrollment by permission of instructor only. Prior coursework in anthropology desirable but not necessary.

ANTH 5389. TEACHING ANTHROPOLOGY. 3 Hours.
To learn strategies of coping with practical problems of teaching undergraduate anthropology, students confer with one or more professors to discuss preparing syllabi and lectures, constructing and evaluating examinations, etc. Not to be counted toward the degree requirement.

ANTH 5392. CONFERENCE COURSE IN ANTHROPOLOGY. 3 Hours.

ANTH 5398. THESIS. 3 Hours.

ANTH 5406. HUMAN OSTEOLOGY. 4 Hours.
Detailed examination of human skeletal morphology. Topics include form and function of all skeletal elements in the human body, differentiation of each bone, left and right side identification, identification of fragmented remains, and muscle attachments and articulations. Content useful in forensic anthropology, archaeology, and hominid paleontology. If taken for undergraduate credit either as ANTH 4306 or ANTH 4406, cannot be repeated for graduate credit.

ANTH 5673. ARCHAEOLOGY FIELD SCHOOL. 6 Hours.
This course, conducted during the summer sessions, consists of on-site and classroom instruction in techniques of archaeological survey, excavation, laboratory, processing, and analysis. Students can receive either three or six hours of credit. Enrollment by permission of instructor only. Prior coursework in anthropology desirable but not necessary.

ANTH 5698. THESIS. 6 Hours.

COURSES

SOCI 1200. PERSONAL AND PROFESSIONAL SUCCESS IN THE SOCIAL SCIENCES. 2 Hours.
A first year experience course for new students and new transfer students interested in a career in the social sciences. Provides the necessary foundation for success in a college environment while balancing personal and/or work obligations. Orient students to life on campus, demonstrates how to leverage campus resources to achieve career and academic goals, and emphasizes engagement outside the classroom through collaborative and co-curricular opportunities. Fulfills the University requirement for either UNIV 1101 or UNIV 1131. Offered as SOCI 1200 and ANTH 1200; credit will be granted only once.

SOCI 1310. INTRODUCTION TO POPULAR CULTURE. 3 Hours.
This course will introduce students to the role of popular culture in American society. It examines culture as a process through which people make symbolic meaning out of the world. Since everyone has access to popular culture, it constructs the way that people think about the world around them. The course will explore the creation, production, dissemination, reception and consumption of popular culture.

SOCI 1311. INTRODUCTION TO SOCIOLOGY. 3 Hours. (TCCN = SOCI 1301)
(SOCI 1301). A scientific approach to the analysis and explanation of culture, personality, and social organization. The social processes and mechanisms of interaction involved in the natural process of cultural development, dissemination, assimilation, and the institutions of the group. This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences.
SOCI 2312. SOCIAL PROBLEMS. 3 Hours. (TCCN = SOCI 1306)
A survey of contemporary social problems in the United States. Emphasis is on applying different theoretical perspectives and systematic procedures to understand social problems as public issues rather than personal problems. This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences.

SOCI 3312. JUVENILE DELINQUENCY. 3 Hours.
The delinquent as a person and delinquency as a social problem, theories of delinquency, and methods of correctional treatment and preventive programs.

SOCI 3313. CRIMINOLOGY. 3 Hours.
Crime-related social issues. Defining and measuring crime, surveying major theoretical explanations of criminal behavior, and society's formal responses to crime and criminals.

SOCI 3314. THE LATINA EXPERIENCE. 3 Hours.
Examines the social, cultural and economic experiences of Latin American women in the United States, with particular emphasis on Mexican-origin women. The course surveys the historical and contemporary experiences of Latinas in the United States with respect to family dynamics, religion, education, politics, health and illness, the labor market, mass media, and the arts. Offered as MAS 3314, SOCI 3314, SOCW 3314, WOMS 3314, and AAST 3321. Credit will be granted in only one department.

SOCI 3315. SOCIAL PSYCHOLOGY OF CRIME. 3 Hours.
Selected concepts in social psychology applied to issues in crime and justice, such as the actions of victims, criminals, and criminal justice professionals. Topics include aggression, social perception, cognitions, conformity, obedience, and deviance.

SOCI 3316. LATINO HEALTH ISSUES. 3 Hours.
A cross-cultural examination of issues in Latino health and relevant health practices in the United States through the lenses of social sciences. Themes include the Latino Threat Narrative, acculturation histories and health care status of major Latino ethnic enclaves in the U.S. Listed as SOCI 3316, MAS 3316, and ANTH 3316; may receive credit for either SOCI 3316, MAS 3316, or ANTH 3316.

SOCI 3317. INDIVIDUAL AND SOCIETY. 3 Hours.
How society influences individual thought, feeling, and behavior. Includes interpersonal perception, attitudes, norms, roles, conformity, and such social issues as aggression, helping behavior, prejudice, and interpersonal attraction.

SOCI 3318. SELF AND SOCIAL IDENTITY. 3 Hours.
The social self. Topics include factors in the development, organization, evaluation and presentation of self in everyday life and processes by which social categories and roles influence self concept.

SOCI 3319. SMALL GROUPS. 3 Hours.
The process and structures of small-scale interaction systems, including an analysis of the process of leadership, the exercise of influence, the effect of groups on individuals and of individuals on groups, the relation and function of the small group as a part of a larger whole, and the process of group formation, development, and disintegration.

SOCI 3320. DEVIANCE: SOCIAL AND PERSONAL. 3 Hours.
Theoretical perspectives on societal definitions of behavior as deviant or disorganized. Selected studies, representative of current problems, examined critically in terms of the structural-cultural conditions of contemporary society.

SOCI 3321. SOCIALIZATION AND SOCIAL CONTROL. 3 Hours.
The relationship between social structure and the individual. The influence of social factors on cognitive development, personality formation, and the behavior of individuals throughout the lifecycle. The effect of socialization on conformity and deviance. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3322. COLLECTIVE BEHAVIOR. 3 Hours.
Provides an overview of the elementary forms of collective behavior including riots, panics, fads, fashion, cults and crazes. Explanatory theories and specific instances of the different forms of collective behavior are examined. Prerequisite: SOCI 1311.

SOCI 3324. SOCIAL MOVEMENTS. 3 Hours.
Focuses on twentieth and twenty-first century social movements, including the U.S. civil rights movement, the student and anti-war movements of the 1960s, the women's movement, the environmental movement, and anti-globalization movements. Status politics movements, such as pro-choice/pro-life and gay rights movements, are also explored. Compares these movements with their counterparts in other countries and identifies the reasons for their successes and failures.

SOCI 3327. INTERCULTURAL INTERACTION. 3 Hours.
Patterns and variations in interactions involving people from different cultures and subcultures. Intercultural interaction, both within multicultural societies and between persons from different societies.

SOCI 3328. MARITAL AND SEXUAL LIFESTYLES. 3 Hours.
Contemporary American lifestyles selected from: singles, traditional marriage, homosexuals, single-parent families, open marriage, non-marital sexuality, cohabitation, dual-career marriage, childless couples, egalitarian marriage, families in later life. Offered as DIVR 3328, SOCI 3328 and WOMS 3328; credit will be granted only once.
SOCI 3331. SOCIOLOGY OF THE FAMILY. 3 Hours.
The family's role in American society and in other cultures past, present, and future. Family research methods, comparative family systems, child
development/parenting, culture and personality, minority families, social class variation in families, work and family. Prerequisite: sophomore standing or
permission of the instructor. Offered as SOCI 3331 and WOMS 3331; credit will be granted only once.

SOCI 3332. SOCIOLOGY OF REPRODUCTION. 3 Hours.
Investigates historical and contemporary cultural customs, social institutions, and personal experiences related to reproduction. Topics may include
assisted reproduction, pregnancy loss, living "child-free," sperm/egg donation, and surrogacy. Examines how changing economic conditions,
technologies, and social norms shape the meaning of children, childbirth education, infertility, and the experience of birth for both men and women.

SOCI 3334. SOCIOLOGY OF GENDER. 3 Hours.
Examination of theoretical and empirical approaches to understanding the formation of gender. Assesses individual and structural dimensions of gender
in various social institutions including work, education, and families. Offered as SOCI 3334 and W OMS 3334; credit will be granted only once.

SOCI 3336. SOCIAL INEQUALITY. 3 Hours.
Examines the processes, characteristics, and consequences of social inequality in society. Topics include the social class structure, status groups, and
elite power structure as they influence people's life chances. Offered as AAST 3336 and SOCI 3336; credit will be granted in only one department.

SOCI 3337. RACIAL & ETHNIC GROUPS IN US. 3 Hours.
Compares the immigration, acculturation, and adjustment processes of various racial/ethnic groups in the U.S. Examines historical and contemporary
discrimination in relation to the social conditions of racial/ethnic minority groups in the U.S. Topics include classical and contemporary theory;
individualistic, cultural, and structural arguments about social arrangements; and conflict among majority and minority groups. Offered as AAST 3337,
MAS 3337, and SOCI 3337; credit will be granted in only one department. Credit will not be granted for both SOCI 3337 and SOCI 4310 or for MAS
3337 and MAS 4310.

SOCI 3338. CONTEMPORARY BLACK EXPERIENCE. 3 Hours.
An overview of recent research concerning the African American experience in the post-civil rights era. Topics include explanations for racial differences
across spheres of society such as income, education, and occupation; the debate over race versus social class; the persistence of racial discrimination;
and emerging disputes within the black community regarding "what it means to be black." Offered as AAST 3338 and SOCI 3338; credit will be granted
in only one department.

SOCI 3339. RACE, SPORT AND MEDIA. 3 Hours.
The media, including television, film, print, audio, and online outlets, influence how we view the world. This course analyzes overt, subtle and subliminal
messages about culture, race, ethnicity, and sport as presented to us through various forms of the media. Through examinations of media portrayals
of race, both past and present, students will analyze media artifacts, identify recurring themes, and examine research focused on the societal effects of
stereotypical media portrayals. Offered as AAST 3339 and SOCI 3339; credit will be granted in only one department.

SOCI 3340. SOCIOLOGY OF EDUCATION. 3 Hours.
Social relations between the school and society, teachers and parents, teachers and school management, and other relevant relationships. Studying
cooperation and conflict, values, complex organizational structure, and social change. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3341. SOCIOLOGY OF SPORT. 3 Hours.
Sociological examination of the institution of sport in U.S. society. By examining selected topics such as sport and socialization, sport and politics, sport
and education, the Olympics, race and sport, violence in sport, women in sport, and the business of sport, this course will address the social significance
of sport and its function as a major social institution.

SOCI 3342. SOCIOLOGY OF THE HUMAN BODY. 3 Hours.
Drawing from the social sciences, cultural and gender studies, and exercise physiology, this course in body sociology addresses several contemporary
issues relating to diet, nutrition and exercise. Specific topics include eating disorders, factory farming, and "body industries" involving weight-loss diets,
gyms, fashion, and cosmetic and bariatric surgery. The medical model of bodies is also examined. Also listed as KINE 3342; credit will not be granted
for both.

SOCI 3343. SOCIOLOGY OF RELIGION. 3 Hours.
This course provides an overview of the scientific study of religion from a sociological perspective. The focus is on theories, research and trends
relevant to religion in the contemporary United States. Topics include, but are not limited to, religious traditions, practices, and beliefs; declining religious
participation; and religion and social change. The relationship between religion, politics, race relations, sex and gender will also be examined. Offered as
SOCI 3343 and AAST 3342; credit will be granted in only one department.

SOCI 3345. SOCIOLOGY OF THE 1960S. 3 Hours.
This course presents a sociological analysis of the sixties, stressing the connection between grassroots mobilization and large structures of power, war,
race and gender. The legacy of the sixties is examined through stories told by and about activists of the period. Parallels between the sixties and the
present are identified. Movements covered may include civil rights, black power, anti-war and women's rights. Offered as AAST 3344 and SOCI 3345;
credit will be granted in only one department.

SOCI 3346. U.S. INTO THE TWENTY-FIRST CENTURY. 3 Hours.
Selected problems, prospects, and dilemmas examined in the context of contemporary perspectives in sociology as the United States enters the new
millennium as a global actor.
SOCI 3347. ENVIRONMENT AND SOCIETY. 3 Hours.
Explores the causes, consequences, and potential resolutions of environmental issues as they relate to human society. Topics include the social roots of environmental problems, inequalities in the distribution of environmental risks and harms, and new directions in sustainable development.

SOCI 3348. SOCIAL ASPECTS OF RISK. 3 Hours.
An examination of the social aspects of risk in everyday life. The course covers the relationship between risk and thrill-seeking behavior, risk assessment and the management of risk by technical experts, risk perceptions among the general public, and how technology and culture change the nature and meaning of risk over time.

SOCI 3351. WORK, OCCUPATIONS, AND CAREER DEVELOPMENT. 3 Hours.
Combines applied information on career development with a sociological perspective on work and occupations. Career development topics may include academic majors and career options, networking, career mentorship and sponsorship, job searches, resume writing, and interviewing. Other topics may include the historical development of work, occupational structures (professional, managerial, service, and blue-collar occupations), inequalities, work satisfaction, work-life balance, and the future of work.

SOCI 3352. SOCIAL STATISTICS. 3 Hours.
Descriptive statistics including measures of central tendency, measures of dispersion, and measures of association. Emphasis is on probability theory and testing hypotheses. Specific models include T-Test, chi-square, gamma, lambda, theta, analysis of variance and covariance, regression and correlation analysis. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3353. SOCIAL CLIMATE OF CITIES. 3 Hours.
A comparative study of urban communities and metropolitan areas in terms of their distinctive social life and culture. Topics touching on power and urban politics, race and ethnic relations, poverty, and leisure and lifestyles will be examined in terms of their contribution to the unique social climate of cities. Offered as AAST 3353 and SOCI 3353; credit will be granted in only one department.

SOCI 3355. COMPUTER APPLICATIONS IN THE SOCIAL SCIENCES. 3 Hours.
Students will learn how to develop a research proposal, collect and analyze data based on the proposal, and present the results. The course will emphasize computer analysis, graphics and presentation skills through the use of popular software packages such as Word, Excel, Access, Power Point, and SPSS. Internet data collection and web publishing will also be covered. Individual and group oral presentation is a cornerstone of the course mission. Satisfies the university requirements for computer literacy and oral communication. Prerequisite: SOCI 3352 or equivalent.

SOCI 3356. WOMEN, WORK AND SOCIAL CHANGE. 3 Hours.
Women’s work experiences, how these experiences are changing, and relationship between paid employment and non-wage household labor. Paid and unpaid work experiences are empirically examined in terms of a variety of theoretical perspectives. Offered as DIVR 3356, SOCI 3356 and WOMS 3356; credit will be granted only once.

SOCI 3357. LAW AND SOCIETY. 3 Hours.
Law as a social institution. The processes of defining criminal conduct and the social functions of law and of legal processes and systems. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3360. TOPICS IN SOCIOLOGY. 3 Hours.
Selected topics in social issues, policy, processes and/or structure. May be repeated for credit with departmental permission.

SOCI 3365. PROGRAM EVALUATION & NEEDS ASSESSMENT. 3 Hours.
Introduces basic concepts in evaluation research addressing the need for and implementation, effectiveness, and efficiency of social intervention efforts. Students will advance their skills in quantitative and qualitative research in partnership with community organizations. The course provides an opportunity to learn about and apply techniques for needs assessment, formative and summative program evaluation, developing and testing social impact models, examining costs and benefits, and communicating findings. Prerequisite: SOCI 3462.

SOCI 3366. POPULATION TRENDS AND PROCESSES. 3 Hours.
Examines the fact that all people are born, usually move from one place to another, and inevitably die. Societal patterns in human fertility, migration and mortality contribute to widely varied life-chances for people over time and across the planet. This course explores theories and research on demographic dimensions of human behavior as they affect social and economic issues. The course provides an understanding of how vital population trends and processes are for assessing social problems and offering solutions. Credit will not be granted for both SOCI 4325 and SOCI 3366.

SOCI 3372. SOCIOLOGICAL THEORY. 3 Hours.
This course introduces students to major theories and figures who have provided sociology with interpretations of the social world. Students will consider how sociologists use theoretical concepts to understand social interactions, social problems, and social change. Students will apply sociological theories to social phenomena. Prerequisite: junior standing or permission of the instructor.

SOCI 3373. SOCIAL THEORY THROUGH POPULAR CULTURE. 3 Hours.
This course examines major theories and figures who have provided sociology with interpretations of the social world. Students will read major social, cultural, and political theories through popular culture texts (including movies, television, music, video games, and comic books) in order to interpret sociological theory. The course is designed to demonstrate the relevance of social theory in students’ everyday lives.

SOCI 3380. SCIENCE AND TECHNOLOGY IN SOCIETY. 3 Hours.
Explores the complex relationship between society, science, and technology. Themes include historical perspectives on the production and deployment of scientific knowledge, critical approaches to the social, cultural, and ethical impacts of scientific and technological developments, and the role of democracy in the advancement of science and technology.
SOCI 3381. GIG WORKERS. 3 Hours.
This course examines the way employers increasingly rely on temporary flexible labor, and what it feels like to be employed precariously. Themes may include creative labor, cultural production, automation, algorithmic hiring, labor contracts, and exploitation.

SOCI 3390. HONORS COLLOQUIUM. 3 Hours.
An interdisciplinary course designed to meet the needs of advanced undergraduates in the Honors College. Prerequisite: participation in the Honors College and/or permission of the instructor.

SOCI 3462. SOCIAL RESEARCH. 4 Hours.
Required of all sociology majors. Examines the major quantitative and qualitative techniques for sociological research. Topics include setting up and implementing a research project, interpreting findings, and preparing a final report. Lab includes sampling, instrumentation, data analysis, and communicating results. Prerequisite: SOCI 3352 or permission of the instructor.

SOCI 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in the designated areas. Prerequisite: permission of the instructor.

SOCI 4193. INTERNSHIP IN SOCIOLOGY. 1 Hour.
Supervised internship program in which a student interns at a company, non-profit organization, or governmental agency. Involves the application of sociology in a non-academic setting. Students may complete a maximum of 6 hours in any combination of SOCI 4193, SOCI 4293, and SOCI 4393. Prerequisite: SOCI 1311 or SOCI 2313; permission of the instructor; and junior standing.

SOCI 4195. SERVICE LEARNING INDEPENDENT STUDY. 1 Hour.
This course involves the investigation and application of sociological knowledge through community based service. Involves structured academic analysis of service experiences. The student and supervising faculty will identify the partner agency and social issue to be addressed. Prerequisite: permission of the instructor.

SOCI 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in the designated areas. Prerequisite: permission of the instructor.

SOCI 4293. INTERNSHIP IN SOCIOLOGY. 2 Hours.
Supervised internship program in which a student interns at a company, non-profit organization, or governmental agency. Involves the application of sociology in a non-academic setting. Students may complete a maximum of 6 hours in any combination of SOCI 4193, SOCI 4293 and SOCI 4393. Prerequisite: SOCI 1311 or SOCI 2312; permission of the instructor; and junior standing.

SOCI 4295. SERVICE LEARNING INDEPENDENT STUDY. 2 Hours.
This course involves the investigation of sociological knowledge through community based service. Involves structured academic analysis of service experiences. The student and supervising faculty will identify the partner agency and social issue to be addressed. Prerequisite: permission of the instructor.

SOCI 4303. WOMEN IN SOCIETY. 3 Hours.
Women's status in contemporary American society, including the family, workplace, and politics. Women's status will also be examined in historical and crosscultural perspectives. Offered as SOCI 4303 and WOMS 4303; credit will be granted only once.

SOCI 4306. QUALITATIVE RESEARCH METHODS. 3 Hours.
Conceptual frameworks and techniques for planning, conducting, analyzing, reporting and evaluating qualitative research. Topics include interviewing, participant observation, coding, case studies and focus groups. Prerequisite: sophomore standing or permission of the instructor.

SOCI 4309. WRITING FOR THE SOCIAL SCIENCES. 3 Hours.
This course blends the theory and practice of social science writing in order to teach students how to move from the first draft to the final draft of term papers, theses, dissertation, and articles. The primary skill taught is self-editing --appraising one's work from the outside. The goal is to learn how to write for publication, drawing from postmodern perspectives on writing. Prerequisite: SOCI 1311 or permission of instructor.

SOCI 4315. VIOLENCE IN SOCIETY. 3 Hours.
Violence as a group process directed toward social change. Historical perspectives, current events, preventive and control techniques, public reaction, and individual behavior. Prerequisite: sophomore standing or permission of the instructor.

SOCI 4320. MEDICAL SOCIOLOGY. 3 Hours.
The relationships between different societies and social groups and their incidence of disease and mortality. Also examines culture-related causes of disease and treatment approaches, medicine as an occupation, healer-patient relationships, and the modern hospital as a bureaucratic organization.

SOCI 4331. RACE, ETHNICITY & FAMILY FORMATION. 3 Hours.
Investigates the ways in which cultural understandings of race and ethnicity have shaped historical and contemporary variations in family structure, familial experiences, and the legal possibilities for family formation. Junior standing (60 hours) or permission of the instructor required to enroll in this course. Offered as AAST 4331 and SOCI 4331; credit will be granted in only one department.

SOCI 4341. INEQUALITIES IN PUBLIC EDUCATION. 3 Hours.
This course examines the manner in which race, ethnicity, and class affect the quality of education in the public schools. Topics include the resegregation of schools, class and race based achievement and funding gaps, and the role the schools play in reproducing inequality. This course has a service learning component and requires volunteering in programs designed to reduce inequality in the schools. Offered as AAST 4341 and SOCI 4341; credit will be granted in only one department.
This seminar course provides a graduate-level introduction to inequality, poverty, and mobility. We will focus on the United States, exploring the social, political, and economic conditions of minority groups living in the United States. A sociological approach to the topic begins with the assumption that race and ethnicity are socially and politically constructed phenomena. Race/ethnic categories within the United States have varied significantly across time and place. An advanced seminar on Race and Ethnicity in the United States. Past and present discrimination will be examined in relation to the current social conditions of minority groups living in the United States. Sociology connects the concepts of race and ethnicity to social structures of inequality, power, and stratification. Scholarship on race and ethnicity is central to American sociology. We will empirically and theoretically explore: 1) the social, political and historical conditions under which segregation, racial hierarchies and racial conflict emerge, and 2) the institutions through which racial boundaries and hierarchies are produced and reproduced in the United States.

This seminar course compares and contrasts the immigration, acculturation, and adjustment processes of various racial and ethnic groups in the United States. We will examine conventional and controversial arguments, as well as classical and contemporary theories concerning the dynamics of inter-group relations in America. Some of the more controversial topics in sociology such as debates over assimilation, Americanization, and enduring conflicts between groups are the foremost intellectual topics to be addressed. The reading list includes a diverse group of scholars who advance relevant research on race and ethnic relations.

This seminar course overviews the process of designing, conducting, and presenting research. Topics include writing literature reviews, formulating research questions and hypotheses, designing measures for concepts, crafting research instruments, collecting data, analyzing data, and reporting the results. The course examines both quantitative methods, such as surveys and experiments, as well as qualitative methods, such as interviews and ethnographic observation.

This course reviews univariate and bivariate descriptive and inferential statistics, focuses on ordinary least squares multivariate regression (including statistical control, path analysis, dummy variables, interaction effects, nonlinear relationships, and regression assumptions), and introduces the generalized linear model (binary logistic regression). Emphasis is on the application of these methods to social science data.

This course provides sociology majors with an opportunity to gain practical experience in social research through in-depth participation in a cooperative research project. Integrates substantive knowledge with methodological and statistical skills. Oral, written, and computer application components are included. Prerequisite: SOCI 3352 and SOCI 3462 or permission of the instructor.

This course involves the investigation and application of sociological knowledge through community based service. Involves structured academic analysis of service experiences. The student and supervising faculty will identify the partner agency and social issue to be addressed. Prerequisite: Permission of the Instructor.

This course is a comprehensive review, analysis, and evaluation of the dominant conceptual perspectives, and their proponents, in sociological theory.

This seminar course provides a graduate-level introduction to inequality, poverty, and mobility. We will focus on the United States, exploring the contemporary structure as well as long term trends in the distribution of material and nonmaterial resources and the economic, social, and cultural forces that generate and perpetuate the unequal distribution of resources. Our focus will be on inequalities in the areas and intersections of social class, gender, and race.
SOCI 5308. COMPARATIVE ETHNIC AND RACIAL CONFLICT. 3 Hours.
This seminar course provides a graduate-level introduction to ethnic and racial conflict from a comparative perspective. The course will focus on topics, such as the creation and maintenance of ethnic, racial, and national identities; the sources of conflict; the consequences of conflict; conflict prevention and resolution; and attaining justice. We will use a variety of cases to examine conflict, such as former Yugoslavia and Rwanda.

SOCI 5309. CONTEMPORARY BLACK EXPERIENCE. 3 Hours.
This seminar course is an overview of the contemporary sociological literature on the black experience in America. Some of the topics to be addressed include (but are not limited to) the debate over the "significance of race," tensions over the cultural/attitudinal adaptation to inequality, and emerging disputes within the black community regarding what it "means to be black" in the post-Civil Rights Era. By the end of this course, students should be more aware of the important role that class position plays in shaping African-American identities and ideologies.

SOCI 5310. SEMINARS IN SOCIAL PSYCHOLOGY. 3 Hours.
Introduction and discussion of theoretical and methodological perspectives in social psychology. Focusing on particular domains of social life, these seminars examine fundamental processes of social interaction and the influence of social situations and social experience on the thought, feeling, and behavior of individuals. (May be repeated for credit when topics vary.).

SOCI 5311. SOCIOLOGY OF FAMILIES. 3 Hours.
This seminar course explores major areas of inquiry in the sociological study of families in the contemporary U.S. We will examine the evolution of American families and the historical processes that have shaped them. Throughout the course, the interconnections between families and social structures will be emphasized. Particular attention will be given to the ways in which gender, class, race and ethnicity influence families.

SOCI 5312. SOCIOLOGY OF REPRODUCTION. 3 Hours.
This seminar course investigates the history and sociology of reproduction in the United States. We examine the history of reproductive politics, the changing meaning of children, childbirth education, the experience of birth for both men and women, pre-natal diagnostic testing, pregnancy loss, adoption, infertility, living "child-free," new reproductive technologies, sperm/egg donation, surrogacy, and the burgeoning "baby business." The course explores the cultural norms, social institutions, and experiences of women and men as they navigate contemporary reproduction, mindful of variations by race, class, and gender.

SOCI 5313. RACE AND FAMILY. 3 Hours.
Who can become a family? This seminar course investigates this question from a socio-historical perspective, focusing on the ways in which dominant cultural understandings of race and ethnicity have shaped the legal possibilities for family formation, family structure, and the experiences of families in the U.S. The course inspects historical and contemporary families, looking at the intersection of race and family formation.

SOCI 5314. GENDER AND FAMILY. 3 Hours.
This seminar course focuses on current issues in the sociology of families, focusing on the intersection of gender and family. The course is organized to provide an overview of the issues of particular interest to contemporary scholars, with theoretical, conceptual and empirical research/work included in the readings. We focus particularly on how gender affects how family is experienced.

SOCI 5315. WOMEN AND WORK. 3 Hours.
This seminar course focuses on current issues in the sociology of women and work. We address contemporary and historical patterns of women's paid and unpaid work focusing on theoretical, conceptual and empirical research.

SOCI 5316. THE SOCIAL MIND AND INTERPERSONAL PROCESSES. 3 Hours.
This seminar course is a study of the influence of the social context on human thoughts, feelings and actions, and on the processes that constitute social interaction. Relevant theories in social psychology and microsociology and original-source readings will be covered.

SOCI 5317. CULTURAL SOCIOLOGY. 3 Hours.
This seminar course examines the relationship between culture and society. Students will study contemporary debates around culture. Students will pay special attention to the use and experience of popular symbols for the ways that their use involves the creation of meanings.

SOCI 5318. MEDIA, CULTURE, AND SOCIETY. 3 Hours.
Media saturate our everyday lives. As such, they have a tremendous impact on the way we understand and interact with society. This seminar course will take a critical approach to the study of culture in order to examine the fundamental role of media in society. We will pay particular attention to the influence of the Culture Industry.

SOCI 5319. SEMINARS IN SOCIAL INSTITUTIONS AND CHANGE. 3 Hours.
Seminars in this area are concerned with the structure and change of the basic elements of society that represent ordered and regulated aspects of social life. Also examined are collective behavior and social movements which result from instability in institutional arrangements and represent efforts to enact social change. (May be repeated for credit when topics vary.).

SOCI 5320. SOCIOLOGY OF EDUCATION. 3 Hours.
This seminar course will examine the relationships between U.S. education institutions and society by reviewing a variety of sociological theories and empirical studies. A primary area of focus will be on the relationship between formal education and class, race/ethnicity, and gender-based inequality. Topics will include, but are not limited to, the following: the history and development of U.S. educational institutions, social mobility and stratification, social reproduction, the dynamics of race, class and gender in education, student teacher relationships, teaching as a profession, higher education, and an exploration of educational reforms.
SOCI 5321. ENVIRONMENTAL SOCIOLOGY. 3 Hours.
This seminar course covers advanced topics in environmental sociology. We will investigate how human social organization affects environmental problems and responses. Specifically, we will explore topics such as environmental inequality, the social construction of nature, risk assessment, consumption and materialism, environmental values and identities, and environmental social movements. We will also look at social problems tied to environmental issues, such as those stemming from disasters, climate change, and food production. We will conclude with new directions in sustainable development.

SOCI 5322. SOCIOLOGY OF SPORT. 3 Hours.
An advanced seminar on the Sociology of Sport. This course is a sociological examination of the institution of sport in American society. By examining selected topics (such as sport and socialization, sport and politics, sport and education, race and sport, violence in sport, women in sport, and the business of sport) this course will address the social significance of sport and its function as a major social institution. We will examine the manner in which society has been shaped by the institution of sport and how sport has been shaped by society.

SOCI 5323. SOCIOLOGY OF RELIGION. 3 Hours.
This seminar course provides an overview of the scientific study of religion from a sociological perspective. The focus in the course will be on theories, research, and trends concerning religion in the contemporary United States. Some of the topics to be addressed include (but are not limited to) understanding the rich variety of religious traditions and affiliations, religious practices and beliefs, as well as the role that religion plays in facilitating and limiting social change as well as conflict in society. We will also examine differences across various religious traditions such as "mainline" and "fundamentalist" believers, secularization, and the often-controversial ways that religion intersects with other spheres of society such as morality, politics, race and ethnic relations, sex and gender.

SOCI 5324. QUALITATIVE RESEARCH METHODS. 3 Hours.
This seminar course introduces students to the qualitative tradition in sociology. We will study the assumptions underlying qualitative methods and important ethical and theoretical issues in field work. Students will become familiar with ethnographic research techniques (participant-observation and in-depth interviewing) and implement those methods in an individual small-scale research project.

SOCI 5325. READING THE QUALITATIVE CLASSICS. 3 Hours.
What makes a classic a classic? In this seminar course we will sample-read, examine, and analyze the wealth of "classic" ethnographies within the field of Sociology. We will study the classics with an eye to exploring the qualities that make these exemplary texts which often connect people to and excite them about the field of Sociology.

SOCI 5326. SOCIAL MOVEMENTS. 3 Hours.
Examines core concepts and theoretical perspectives in social movements. Topics include recruitment and participation, tactics in activism, countermobilization, repression, and the effectiveness of movements in changing both policy and cultural norms.

SOCI 5330. SEMINARS IN SOCIAL DIFFERENTIATION. 3 Hours.
In all human societies, perceptions of differences in individuals, social positions and groups arise and form a basis for social evaluation. Seminars in this area examine the processes involved in social differentiation, social evaluation, and resulting forms of social inequality. (May be repeated for credit when topics vary).

SOCI 5341. SEMINARS IN THEORY AND RESEARCH METHODS. 3 Hours.
Research methods seminars address a variety of issues related to quantitative and qualitative approaches to data collection and analysis. Theory courses offer extended treatment of topics in theory and theory construction, reflecting systematic efforts to understand the nature and operation of human society and social behavior. (May be repeated for credit when topics vary).

SOCI 5385. NON-THESIS PROJECT. 3 Hours.
A written essay synthesizing the students' coursework in response to one of two supplied prompts. The topic and scope of the written project must be approved by the non-thesis committee chair. A final presentation of the project to the non-thesis committee, composed of the non-thesis committee chair and two additional members of the graduate faculty, is required.

SOCI 5388. RESEARCH PRACTICUM / INTERNSHIP. 3 Hours.

SOCI 5389. TEACHING SOCIOLOGY. 3 Hours.
To learn strategies of coping with practical problems of teaching undergraduate sociology, students assist one or more professors in lecture preparation, grading, and examination construction. Not to be counted toward the degree requirement.

SOCI 5392. CONFERENCE COURSE IN SOCIOLOGY. 3 Hours.
There is not currently a description listed for this course since the content varies.

SOCI 5393. THESIS SUBSTITUTE. 3 Hours.
An academic literature review, research design, or an internship report on a selected sociological topic of individual interest. The topic and scope of the written project must be approved by the final thesis committee, which is composed of three graduate faculty members. A proposal defense and a final oral defense of the project is required.

SOCI 5398. THESIS. 3 Hours.

SOCI 5698. THESIS. 6 Hours.
Substantial original empirical or theoretical research project on a sociological topic of individual interest. The topic and scope of the written project must be approved by the final thesis committee, which is composed of three graduate faculty members. A proposal defense and a final oral defense of the project is required.
Objectives: M.A. in Sociology

The Master of Arts program in sociology is designed to provide students with a firm substantive background in sociological theory and in the techniques of contemporary research methodology and statistical analyses. In addition to these core concerns, the program offers a variety of seminars, as well as practicum opportunities, to help prepare students for a wide range of professional careers in both the private and public sectors or continued graduate education at the Ph.D. level.

Graduate Assistantships and Fellowships in Sociology

Graduate teaching and research assistantships and other forms of financial support will be awarded on a competitive basis. In addition to performance in any graduate courses the student may have taken, the same criteria used to determine admission status will be used in evaluating applications for such awards. No single factor, including standardized test scores, will be used to end consideration of any graduate assistantships.

Admissions Requirements: Sociology

All successful applicants must satisfy the basic graduate admission requirements of UT Arlington as outlined in the University Catalog in the Admissions section. The Sociology graduate program makes admission decisions based on several factors, including grade point averages, preparation in the field of Sociology or related disciplines, letters of recommendation, and statements of interest. There are four categories for acceptance: Facilitated Admission, Unconditional Admission, Probationary Admission, and Provisional Admission.

Facilitated Admission

Available to UTA graduates who have completed their BA from UTA within one year prior to admission. Applicants admitted through Facilitated Admission meet the following three criteria:

1) Overall UTA GPA of 3.5, as calculated by Graduate Studies.
2) Minimum GPA of 3.5 in last 60 hours, as calculated by Graduate Studies.
3) A grade B or better in SOCI 3372 (Sociological Theory), SOCI 3352 (Social Statistics), and SOCI 3462 (Social Research)

To apply for Facilitated Admission, contact the Director of Graduate Studies for Sociology.

Applicants who do not qualify for Facilitated Admission must apply on-line at www.applytexas.org

Letters of Recommendation must be mailed directly from recommenders to the Director of Graduate Studies for Sociology. Statements of Interest must be mailed directly from the applicant to the Director of Graduate Studies for Sociology.

Unconditional Admission

Unconditional Admission is available to applicants who have completed a BA or BS in Sociology or a related discipline from an accredited institution.

Applicants with undergraduate degrees from UTA admitted on Unconditional Admission meet the following three criteria:

1) Minimum GPA of 3.0, as calculated by Graduate Studies.
2) Two letters of recommendation that favorably assess the applicant's potential for success in a graduate program in Sociology.
3) A satisfactory 2-3 page statement of interest describing the applicant's academic background, research or study interests, and professional goals as they relate to the field of Sociology.

Applicants with an undergraduate degree from an institution other than UTA meet the three conditions above for Unconditional Admission plus the following condition:

1) GRE scores of at least 150 on the verbal sub-test (500 on the prior scale) and 144 on the quantitative sub-test (500 on the prior scale).

Probationary Admission

Probationary Admission is available to applicants who have completed a BA or BS in Sociology or a related discipline from an accredited institution but who do not qualify for Unconditional Admission due to a GPA below 3.0, as calculated by Graduate Studies. Applicants admitted on probationary admission meet the following three criteria:

1) GRE scores of at least 150 on the verbal sub-test (500 on the prior scale) and 144 on the quantitative sub-test (500 on the prior scale).
2) Two letters of recommendation that favorably assess the applicant's potential for success in a graduate program in Sociology.

3) A satisfactory 2-3 page statement of interest describing the applicant's academic background, research or study interests, and professional goals as they relate to the field of Sociology.

**Provisional Admission**

Provisional Admission is available to applicants unable to supply all required documentation prior to the admission deadline, but who otherwise appear to meet admission requirements. Provisionally admitted students must satisfy any incomplete documentation by the end of the semester in which they are admitted.

**Deferral**

An applicant may be deferred when a file is incomplete or when a denial decision is not appropriate.

**International Students**

To qualify for admission, international students must score 550 or above on the TOEFL.

**Degree Requirements: Sociology**

Students may select from three options: the non-thesis, thesis substitute, or thesis degree plan.

**The Non-Thesis degree plan** is designed for students who wish to complete a written essay synthesizing their coursework in response to one of two supplied prompts. The non-thesis degree plan requires satisfactory completion of a minimum of 36 hours of coursework, including core courses in theory, methods, and statistics, and the three hour non-thesis course SOCI 5385. Non-thesis students must form a non-thesis faculty committee, consisting of a non-thesis chair and two additional members of the graduate faculty. Non-thesis degree seeking students are required to give a presentation on their written essay to their non-thesis faculty committee. The scope, content, and form of the non-thesis document must be approved by the student’s non-thesis committee chair. SOCI 5385.

**The Thesis-substitute degree plan** is designed for students who wish to complete an academic literature review, research design, or an internship report on a selected sociological topic of personal interest. The thesis-substitute degree plan requires satisfactory completion of a minimum of 33 hours of coursework, including core courses in theory, methods, and statistics, and the three hour thesis substitute course SOCI 5393. Thesis-substitute degree students are required to write and orally defend a proposal for their thesis-substitute project in addition to writing and orally defending their thesis-substitute document. Thesis-substitute students must form a thesis-substitute faculty committee, consisting of a thesis-substitute chair and two additional members of the graduate faculty. The scope, content, and form of the thesis-substitute document shall be determined by the student’s thesis committee. SOCI 5393.

**The Thesis degree plan** is designed for students who wish to research and write a substantial, original empirical or theoretical work on a sociological topic of personal interest. The thesis degree plan requires satisfactory completion of a minimum of 30 hours of coursework, including core courses in theory, methods, and statistics, and the six hour thesis course SOCI 5698. Thesis degree students are required to write and orally defend a proposal for their research project in addition to completing original research and writing and orally defending their thesis. Thesis students must form a thesis faculty committee, consisting of a thesis chair and two additional members of the graduate faculty. The scope, content, and form of the thesis shall be determined by the student’s thesis committee. SOCI 5698.

**Dual Degree Program**

Students in sociology may participate in a dual degree program where by they can earn a Master of Arts in Sociology and another field, such as Master of Public Administration or Master of Science in Social Work. By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. Six or more hours may be jointly applied depending on the total number of hours required for both degrees, and subject to the approval of graduate advisors from both programs.

To participate in the dual degree option, students must make separate application to each program and must submit a separate Program of Work for each program. Admission to and enrollment in the two programs must be concurrent (admitted to the second program before completing more than 24 hours in the first). Those interested should consult each of the appropriate graduate advisors for coursework requirements and refer to Graduate Studies catalog entry on Dual Degree Program in the Advanced Degrees and Requirements section for further details.

**Fast Track Program in Sociology**

The Fast Track Program allows outstanding undergraduate students in sociology at UT Arlington to take up to three graduate seminars in sociology that will earn credit toward both the Bachelor’s degree and the Master’s degree in Sociology. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA. Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor’s degree. To qualify, students must have completed at least 30 hours at UTA with a GPA of 3.0 in all courses and 3.25 in the last 30 hours. Before entering the Fast Track, students must also have completed the
four required core courses in the Sociology major with a GPA of at least 3.5, or three of the four with a GPA of 3.66 or more. Additionally, they must have already taken at least two non-core sociology courses with a GPA of 3.5 or higher.

Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies to continue their graduate work in the Sociology MA Program once the Bachelor’s degree is awarded. They will not be required to take the GRE, complete an additional application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option.

To remain in the Fast Track Program, students must receive no grade lower than a B in any graduate seminars taken as an undergraduate, selected with the advice and approval of the Sociology Graduate Advisor. Undergraduate students who do not maintain grades of B or A in the graduate courses taken will be unable to continue in the Fast Track Program but, if the courses are completed passing, will still receive credit toward their undergraduate degree requirements. Students originally denied entry into the Fast Track Program, discontinued after provisional admission, subsequently dropped or opting out are still welcome to apply to the Sociology MA Program in the usual way and will be considered without prejudice.

For an application form or to obtain more details about this program, contact the Sociology Undergraduate Advisor.
Sociology - Undergraduate Programs

Overview
The principal common educational objective in the Department of Sociology and Anthropology is to develop a systematic understanding of social behavior, human culture, and social institutions. Knowledge of human social and cultural relationships is vital to a meaningful perspective on and understanding of the society in which we live. Contemporary societies are characterized by diversity, rapid change, complex organization, and extensive specialization. Programs of study in the Department of Sociology and Anthropology pursue the challenge of:

1. creating and disseminating general knowledge that will render this world more understandable and
2. providing an educational base for more effective and humane planning and social intervention in society.

Each of the programs of study relates to this general objective in a somewhat different manner. Students are encouraged to visit with the faculty and learn more about the programs offered in the department.

Sociology
A program of study in sociology has three principle objectives: to foster the ability to analyze human relationships from a sociological perspective, to develop the theoretical, methodological, and statistical skills necessary for asking and answering sociological questions, and to enhance individuals' awareness of the relationship between events in their own lives and the structure of the society in which they live. The program is designed to prepare students both to pursue graduate work in sociology and to seek a career in a variety of private and public settings where knowledge of human relationships and/or social research skills is particularly useful. Students seeking certification to teach in the public schools can use sociology as a teaching area.

Popular Culture Minor
The Popular Culture Minor allows students from across campus to develop important skills no matter their major. Students in the Popular Culture Minor prepare themselves to 1) work in the entertainment industry; and/or 2) understand the role and power of popular culture in their everyday lives. Whether students seek employment in the creative industries (video games, music, film, social media, etc.) or other employment areas, they will be able to look at complex problems and develop innovative solutions. Students will have the opportunity to analyze popular culture, its production, consumption, and reception. The minor mixes a classic approach to a liberal arts education with opportunities to prepare for real-world employment.

Fast Track Program
The Fast Track Program in Sociology allows outstanding seniors in sociology to take up to three graduate seminars for credit toward both the Bachelor's degree and the Master's degree in Sociology. Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's Degree. Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies. They will not be required to take the Graduate Record Examination, complete an application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA program with only five additional courses and a thesis remaining to complete the requirements for thesis option. For more details about the program contact the Undergraduate Advisor for the Department of Sociology and Anthropology and consult the on-line catalog.

Requirements for a Bachelor of Arts Degree in Sociology

Pre-professional Courses
UNIV 1131 STUDENT SUCCESS or UNIV 1101 STUDENT SUCCESS (for transfer students) or meet the requirement through SOCI 1200 PERSONAL AND PROFESSIONAL SUCCESS IN THE SOCIAL SCIENCES

General Core Requirements
POLS 2311 GOVERNMENT OF THE UNITED STATES
POLS 2312 STATE AND LOCAL GOVERNMENT
HIST 1301 HISTORY OF THE UNITED STATES TO 1865
HIST 1302 HISTORY OF THE UNITED STATES, 1865 TO PRESENT

Communication - 6 hours from approved list.
8 hours in the same modern or classical language (1441, 1442).
Creative Arts - 3 hours from approved list.
Language Philosophy and Culture - 3 hours from approved list.
Life and Physical Sciences - 6 hours from approved list.

Mathematics - 6 hours MATH 1301 or higher. Math 1308 is recommended.

Required Component Area Option - Any course listed above. A course may fulfill only one component area.

**Major Courses**

37 hours including:

- SOCI 1311 INTRODUCTION TO SOCIOLOGY
- SOCI 3352 SOCIAL STATISTICS
- SOCI 3372 SOCIOLOGICAL THEORY or SOCI 3373 SOCIAL THEORY THROUGH POPULAR CULTURE
- SOCI 3462 SOCIAL RESEARCH
- One course in Anthropology

**Electives**

Sufficient to give the total number of hours required for the degree.

**Total**

120 hours, at least 36 of which must be 3000/4000 level.

**Optional Concentrations in Sociology**

Students majoring in Sociology may pursue a general course of study in the discipline or concentrate in a specific area or areas. The purpose of specialization is to provide the student with a focused, systematic, and in-depth educational experience in the context of a broad liberal arts education. These specializations are also related to different career paths. Please see the Sociology academic advisor for more information on completing an area concentration.

**General Requirements:**

Completing four courses in any area fulfills requirements for the concentration. See the Sociology academic advisor for more information.

The areas of specialization are:

**Human Capital and Work**

- SOCI 3317 INDIVIDUAL AND SOCIETY
- SOCI 3319 SMALL GROUPS
- SOCI 3331 SOCIOLOGY OF THE FAMILY
- SOCI 3336 SOCIAL INEQUALITY
- SOCI 3351 WORK, OCCUPATIONS, AND CAREER DEVELOPMENT
- SOCI 3356 WOMEN, WORK AND SOCIAL CHANGE
- SOCI 3381 GIG WORKERS

**Social Services and Diverse Populations**

- SOCI 3317 INDIVIDUAL AND SOCIETY
- SOCI 3319 SMALL GROUPS
- SOCI 3320 DEVIANCE: SOCIAL AND PERSONAL
- SOCI 3331 SOCIOLOGY OF THE FAMILY
- SOCI 3332 SOCIOLOGY OF REPRODUCTION
SOCI 3337 RACIAL & ETHNIC GROUPS IN US
SOCI 3338 CONTEMPORARY BLACK EXPERIENCE
SOCI 3339 RACE, SPORT AND MEDIA
SOCI 3343 SOCIOLOGY OF RELIGION
SOCI 4306 QUALITATIVE RESEARCH METHODS
SOCI 4331 RACE, ETHNICITY & FAMILY FORMATION

Non-Profit and Community Organizations
SOCI 3319 SMALL GROUPS
SOCI 3324 SOCIAL MOVEMENTS
SOCI 3331 SOCIOLOGY OF THE FAMILY
SOCI 3332 SOCIOLOGY OF REPRODUCTION
SOCI 3343 SOCIOLOGY OF RELIGION
SOCI 3347 ENVIRONMENT AND SOCIETY
SOCI 4331 RACE, ETHNICITY & FAMILY FORMATION

Health, Science and Technology
SOCI 3316 LATINO HEALTH ISSUES
SOCI 3317 INDIVIDUAL AND SOCIETY
SOCI 3332 SOCIOLOGY OF REPRODUCTION
SOCI 3341 SOCIOLOGY OF SPORT
SOCI 3347 ENVIRONMENT AND SOCIETY
SOCI 3348 SOCIAL ASPECTS OF RISK
SOCI 3380 SCIENCE AND TECHNOLOGY IN SOCIETY
SOCI 4320 MEDICAL SOCIOLOGY

The following courses may be used to complete any of the area concentrations if the content is related to the concentration (approval is required):
SOCI 3360 TOPICS IN SOCIOLOGY
SOCI 4365 TOPICS IN SOCIOLOGY
SOCI 4391 CONFERENCE COURSE
SOCI 4393 INTERNSHIP IN SOCIOLOGY
SOCI 4395 SERVICE LEARNING INDEPENDENT STUDY

Requirements for a Minor in Sociology
A minor in sociology requires 18 hours in sociology, at least six of which must be at the 3000/4000 level.

Requirements for a Minor in Popular Culture
A minor in popular culture requires 18 semester hours, including 6 required hours and 3 experiential learning hours.

• Required (6 credit hours)
  • SOCI 1310. INTRODUCTION TO POPULAR CULTURE
  • SOCI 3373. SOCIAL THEORY THROUGH POPULAR CULTURE
• Experiential Learning – 3 Credit hours from the following
  • Internship, Independent Study or Conference Course related to Popular Culture – with prior approval of the advisor of the Popular Culture Minor
    • SOCI 4396. INTERNSHIP IN POPULAR CULTURE
    • MUSI 4395. INTERNSHIP
    • SOCI 4391. CONFERENCE COURSE
    • THEA 4391. INDEPENDENT STUDY
    • THEA 4395. THEATRE INTERNSHIP LEVEL I
    • COMM 4395, ADVT 4395, BCMN 4395, COMS 4395, CTEC 4395, JOUR 4395, PREL 4395 (Internships in Communication)
    • DS 4395. DISABILITY STUDIES INTERNSHIP
    • ART 4382. ENTREPRENEURSHIP IN THE ARTS
    • MUSI 3396. RECORD LABEL AND STUDIO MANAGEMENT
    • SOCI 3381. GIG WORKERS
  • Choose 9 credit hours related to popular culture
    • SOCI 3380. SCIENCE AND TECHNOLOGY IN SOCIETY
    • SOCI 3339. RACE, SPORT AND MEDIA.
    • SOCI 3341. SOCIOLOGY OF SPORT
    • SOCI 3318. SELF AND SOCIAL IDENTITY
    • ADVT 3304. STRATEGIC COMMUNICATION
    • ADVT 3305. ADVERTISING MEDIA
    • ADVT 3308. DIGITAL ADVERTISING DESIGN
    • ANTH 2322. GLOBAL CULTURES
    • ANTH 3332. FOOD AND CULTURE
    • ANTH 3334. ANTHROPOLOGY OF SOUTH ASIA

• THEA 4304. MODERN THEATRE HISTORY
• THEA 4310. MUSICAL THEATRE HISTORY
• POLS 4300. POLITICS IN POPULAR CULTURE

Note: Special Topics courses will be considered on a course-by-course basis. Approval will be made by the advisor of the Popular Culture Minor.

Fast Track Program in Sociology

The Fast Track Program allows outstanding undergraduate students in sociology at UT Arlington to take up to three graduate seminars in sociology that will earn credit toward both the Bachelor’s degree and the Master’s degree in Sociology. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA. Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor’s degree. To qualify, students must have completed at least 30 hours at UTA with a GPA of 3.0 in all courses and 3.25 in the last 30 hours. Before entering the Fast Track, students must also have completed the four required core courses in the Sociology major with a GPA of at least 3.5, or three of the four with a GPA of 3.66 or more. Additionally, they must have already taken at least two non-core sociology courses with a GPA of 3.5 or higher.

Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies to continue their graduate work in the Sociology MA Program once the Bachelor’s degree is awarded. They will not be required to take the GRE, complete an additional application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option.

To remain in the Fast Track Program, students must receive no grade lower than a B in any graduate seminars taken as an undergraduate, selected with the advice and approval of the Sociology Graduate Advisor. Undergraduate students who do not maintain grades of B or A in the graduate courses taken will be unable to continue in the Fast Track Program but, if the courses are completed passing, will still receive credit toward their undergraduate degree requirements. Students originally denied entry into the Fast Track Program, discontinued after provisional admission, subsequently dropped or opting out are still welcome to apply to the Sociology MA Program in the usual way and will be considered without prejudice.

For an application form or to obtain more details about this program, contact the Sociology Undergraduate Advisor.
Anthropology Undergraduate Programs

Overview
The principal common educational objective in the Department of Sociology and Anthropology is to develop a systematic understanding of social behavior, human culture, and social institutions. Knowledge of human social and cultural relationships is vital to a meaningful perspective on and understanding of the society in which we live. Contemporary societies are characterized by diversity, rapid change, complex organization, and extensive specialization. Programs of study in the Department of Sociology and Anthropology pursue the challenge of:

1. creating and disseminating general knowledge that will render this world more understandable and
2. providing an educational base for more effective and humane planning and social intervention in society.

Each of the programs of study relates to this general objective in a somewhat different manner. Students are encouraged to visit with the faculty and learn more about the programs offered in the department.

Anthropology
A program of study in anthropology has the objective of grounding students in three main subfields of anthropology: cultural anthropology (the comparative analysis of human lifeways around the world), archaeology (the systematic analysis of the material remains of past cultures), and physical anthropology (the study of humans as a biological species). The program prepares students both for graduate work in anthropology and for many careers in which anthropological perspectives and training are useful.

Requirements for a Bachelor of Arts Degree in Anthropology

UNIVERSITY CORE REQUIREMENTS (P. 50)

College of Liberal Arts Requirements
8 hours in the same modern or classical language (first-year college-level: 1441, 1442)

Anthropology Program Requirements
BIOLOGICAL ANTHROPOLOGY (ANTH 2307)
GLOBAL CULTURES (ANTH 2322)
INTRODUCTION TO ARCHAEOLOGY (ANTH 2339)
One approved ANTH method course
One approved ANTH theory course
One advanced (3000/4000 level) elective in Sociology (SOCI)
6 hours of modern or classical languages
24 additional hours of approved ANTH electives

Summary: 40 hours, including ANTH 2307, 2322, and 2339; one approved ANTH course in Methods; one approved ANTH course in Theory; one advanced (3000/4000 level) SOCI elective; 6 hours of modern or classical languages, and 24 additional hours of approved ANTH electives. Contact the department advisor for the list of approved courses for method, theory, and electives.

Additional University Requirements
UNIV 1131 STUDENT SUCCESS or UNIV 1101 STUDENT SUCCESS (for transfer students) which may also be met by completing ANTH 1200 PERSONAL AND PROFESSIONAL SUCCESS IN THE SOCIAL SCIENCES.

Additional elective hours sufficient to reach 120 total credit hours, with 36 advanced (3000/4000) hours; may include an optional minor.

Requirement for a Minor in Anthropology
The Anthropology minor (6 courses/18 hours total) can be fulfilled by successfully completing:
Select two of the following:

ANTH 2307 BIOLOGICAL ANTHROPOLOGY
ANTH 2322 GLOBAL CULTURES
ANTH 2339 INTRODUCTION TO ARCHAEOLOGY

Any other four ANTH courses, at least two of which must be at the advanced level (3000 or above)

Questions about the Anthropology minor may be directed to the department advisor.
The Theatre Arts program offers several undergraduate degrees and minors, as well as various courses.

### Undergraduate Degrees

- **Bachelor of Arts in Theatre Arts** ([http://catalog.uta.edu/liberalarts/theatre/undergraduate/#bachelorstext/#batheatrearts](http://catalog.uta.edu/liberalarts/theatre/undergraduate/#bachelorstext/#batheatrearts))
- **Bachelor of Fine Arts in Theatre Arts** ([http://catalog.uta.edu/liberalarts/theatre/undergraduate/#bachelorstext/#bfatheatrearts](http://catalog.uta.edu/liberalarts/theatre/undergraduate/#bachelorstext/#bfatheatrearts)), **Design and Technology Sub-plan**
- **Bachelor of Fine Arts in Theatre Arts** ([http://catalog.uta.edu/liberalarts/theatre/undergraduate/#bachelorstext/#bfatheatrearts](http://catalog.uta.edu/liberalarts/theatre/undergraduate/#bachelorstext/#bfatheatrearts)), **Musical Theatre Sub-plan**
- **Bachelor of Fine Arts in Theatre Arts** ([http://catalog.uta.edu/liberalarts/theatre/undergraduate/#bachelorstext/#bfatheatrearts](http://catalog.uta.edu/liberalarts/theatre/undergraduate/#bachelorstext/#bfatheatrearts)), **Acting Sub-plan**
- **Minor in Theatre Arts** (p. 1001)
- **Minor in Dance** (p. 1001)

### Courses

**THEA 0181. THEATRE PRACTICUM. 1 Hour.** (TCCN = DRAM 1120)
Open to all students interested in participating in dramatic productions on-stage, backstage, or front of house. Considers aspects of play production which may include scenery construction, publicity, costumes, and lighting. Practicum students participate in auditions and are assigned to production crews. May be repeated for credit. All Theatre Arts majors register for THEA 0181 each semester. Prerequisite: Permission of advisor.

**THEA 1101. THEATRE ARTS SYMPOSIUM. 1 Hour.**
An orientation to academic and professional theatre skills and resources. Prerequisite: Permission of advisor.

**THEA 1140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.**
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 1140 and THEA 1140; credit will be granted only in one department. Prerequisite: Open to Musical Theatre majors only or by permission of the Department Chair.

**THEA 1141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.**
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 1141 and THEA 1141; credit will be granted only in one department. Prerequisite: C or better in MUSI 1140 or THEA 1140. Open to Musical Theatre majors only or by permission of the Department Chair.

**THEA 1302. VOCAL FUNDAMENTALS. 3 Hours.** (TCCN = DRAM 2336)
Introduction to the fundamentals of vocal production for the stage and oral communication skills in presentations, including interaction in the classroom setting to meet the needs of course work. Emphasis on relaxation, breathing techniques, the creation of vocal sound, the interconnection of voice and body, and the use of acceptable grammar and pronunciation in formal presentations. Prerequisite: Permission of advisor.

**THEA 1303. FUNDAMENTALS OF PRESENTATION. 3 Hours.**
The fundamentals of vocal performance as it relates to effective oral communication. Students develop ideas for the purpose of communication and learn effective techniques for clarity of expression, ideas, and message while considering the effect on an audience. Theatrical communication techniques are one of several skill sets taught. Oral, aural, written, and visual literacy are all explored, with intense focus on oral presentation. This course satisfies the University of Texas at Arlington core curriculum requirement in Communication.

**THEA 1304. STAGECRAFT I. 3 Hours.** (TCCN = DRAM 1330)
An introduction to all areas of theatre craft, technology, and production. The development and application of technical skills, production organization, and an orientation to production facilities, equipment, and materials. Prerequisite: Permission of Advisor.
THEA 1305. INTRODUCTION TO THEATRICAL DESIGN. 3 Hours.
Fundamentals of design elements, theory and practice as applied to costume, scenic, properties, lighting, and sound design. Prerequisite: Permission of advisor.

THEA 1307. ACTING I: BASIC TECHNIQUES. 3 Hours. (TCCN = DRAM 1351)
Study and exercise in fundamentals of the actor's craft utilizing the Stanislavsky Method. Emphasis on the development of basic acting techniques including: characterization, objectives, beats, action, and script analysis. Performance requirements include improvisation, monologues, and scene study. Attendance at productions outside of the classroom may be required. Prerequisite: Permission of advisor.

THEA 1315. THEATRICAL MAKEUP. 3 Hours.
Types, styles, and techniques of make-up application for stage, television, and film. May not be repeated for credit. Prerequisite: Permission of advisor.

THEA 1342. THEATRE AND FILM APPRECIATION. 3 Hours.
Develops awareness of and appreciation for dramatic art as reflected in theatre and film. Designed to increase the student's enjoyment and knowledge of drama and its historical, social and cultural contexts. Students may be required to attend plays. Theatre Arts BFA and BA majors and minors may not use this course in place of THEA 1343. This course satisfies the University of Texas at Arlington core curriculum requirement in Creative Arts.

THEA 1343. INTRODUCTION TO THEATRE. 3 Hours. (TCCN = DRAM 1310)
Acquaints the student with major phases of theatrical activity and production research. Considers the duties and contributions of director, actor, scene designer, costumer, and others involved in play production. Students may be required to attend and review productions. This course satisfies the University of Texas at Arlington core curriculum requirement in Creative Arts.

THEA 2140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 2140 and THEA 2140; credit will be granted only in one department. Prerequisite: C or better in MUSI 1141 or THEA 1141. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 2141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 2141 and THEA 2141; credit will be granted only in one department. Prerequisite: C or better in MUSI 2140 or THEA 2140. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 2306. COSTUME TECHNOLOGY. 3 Hours. (TCCN = DRAM 1342)
Introduction to the process and application of the fundamental skills of costuming and costume design preparation methods. Prerequisite: Permission of advisor.

THEA 2308. SCRIPT ANALYSIS. 3 Hours.
An investigation of dramatic structure from the points of view of the director, actor, and designer. Elements of dramatic theory are included. Prerequisite: Permission of advisor.

THEA 2337. IMPROVISATION. 3 Hours.
The study of modern improvisational skills and techniques for the performer, director, playwright, and instructor. Improvisation I focuses on short form improv, defined as unrelated games, scenes, and exercises that encourage spontaneity and group cohesion. Prerequisite: Permission of advisor.

THEA 2352. ACTING II: SCENE STUDY. 3 Hours. (TCCN = DRAM 1352)
Acting technique exercise to enhance and develop acting skills through scene study. Methods of characterization, research, and role preparation. Prerequisite: THEA 1307 and permission of advisor.

THEA 3140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 3140 and THEA 3140; credit will be granted only in one department. Prerequisite: C or better in MUSI 2141 or THEA 2141. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 3141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 3141 and THEA 3141; credit will be granted only in one department. Prerequisite: C or better in MUSI 3140 or THEA 3140. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 3300. DIRECTING I. 3 Hours.
The techniques of staging plays. Play interpretation, casting, rehearsal procedure, staging, and the role of the director in character analysis and creation. Prerequisite: THEA 1305, THEA 1307, THEA 1343, and THEA 2309 or permission of advisor.

THEA 3301. SCENE DESIGN I. 3 Hours.
History, theory, and basic concepts of design methods with application for stage, television, and film. Aesthetic skills of color, line, texture, and form, and the interactions of these elements. Mechanics and techniques of illustration and rendering of design ideas. Prerequisites: THEA 1304, THEA 1305, THEA 1343, THEA 3309, THEA 3318, and permission of advisor.

THEA 3302. FILM STUDIES. 3 Hours.
Principles of film study, including history, genre, aesthetics, theory, and criticism of U.S. and international films. Lecture and discussion, including the viewing of selected films.
THEA 3303. SOUND DESIGN. 3 Hours.
The study of the fundamentals of sound design as related to the theatrical production environment. The study of basic sound design tools and the practical application of these tools through project work. Prerequisites: THEA 1305, THEA 3316, or permission of advisor.

THEA 3304. STAGECRAFT II. 3 Hours.
An overview of and hands-on training in advanced production techniques, including metalworking and welding, theatrical rigging, automation principles, advanced wood joinery, and fabrication utilizing new materials, as well as an in-depth study of theatrical safety practices. Prerequisites: THEA 1304 or permission of advisor.

THEA 3305. LIGHTING DESIGN I. 3 Hours.
The study of basic design principles and techniques and their application in theatrical lighting design. The practical application of computer-aided design tools and the use of theatrical lighting equipment in realized design projects. Prerequisites: THEA 1304, THEA 3316, and THEA 3318 or permission of advisor.

THEA 3306. SCENE PAINTING FOR THE STAGE. 3 Hours.
Instructional and demonstrative approaches to scenic painting for the stage. Prerequisite: THEA 1304 or permission of advisor.

THEA 3307. COSTUME HISTORY. 3 Hours.
Historical styles and trends of fashion to the present as applied to stage, television, and film. Prerequisite: Permission of advisor.

THEA 3308. ACTING FOR THE CAMERA. 3 Hours.
An advanced acting course to acquire performance technique on camera. Credit will be granted only once. Prerequisite: THEA 1307, THEA 2352, or permission of instructor.

THEA 3310. CREATIVE DRAMA. 3 Hours.
The theory and practice of creative dramatics exercises and activities. The application of the artistic elements in creative drama and interdisciplinary applications of creative drama activities.

THEA 3311. DIALECTS IN PERFORMANCE. 3 Hours.
The study and application of selected dialects for performance. Prerequisite: Permission of advisor.

THEA 3312. THEATRE FOR YOUNG AUDIENCES. 3 Hours.
The theory and practice of creating and producing plays for young audiences. Students shall be required to act in selected works. Prerequisite: Permission of advisor.

THEA 3313. PERIOD STYLES. 3 Hours.
Survey of architectural elements, fashion, and decorations throughout history and their relationship to theatrical design. Provides a foundation in visual history and an historical framework in which to develop inspiration for visual ideas and needs for stage design.

THEA 3314. VOICE AND MOVEMENT. 3 Hours.
An intermediate course in vocal production and its integration with movement. Primarily focuses on articulation, breath support, and voice/movement interaction. Only Theatre Arts majors or minors may enroll. Prerequisite: Must be a Theatre Arts major or minor; permission of advisor.

THEA 3316. LIGHTING AND SOUND TECHNOLOGY. 3 Hours.
An introduction to the equipment, technologies, terminology, and careers in the theatrical areas of lighting and sound. Examines the theories and application of optical control and distribution, the physics of audio, distribution of acoustical energy, and lighting color theory. Prerequisite: Permission of advisor.

THEA 3317. SINGING FOR THE ACTOR I. 3 Hours.
An applied study of the vocal apparatus, vocal placement, the voice/body relationship, character, working with text, phrasing, and auditioning as they relate to singing in musical theatre for the Broadway or West End theatre. Emphasis is placed on integrating singing and acting skills. Same as offering MUSI 3317; may not be repeated and credit will only be granted in one department. Prerequisites: THEA 1307 or permission of advisor.

THEA 3318. DRAFTING FOR THE ARTS. 3 Hours.
The principles and application of computer-aided drafting techniques for the entertainment industry. Prerequisite: Permission of advisor.

THEA 3320. PLAYWRITING I. 3 Hours.
The art and craft of constructing a play. Students write playlets, scenes, and one-act plays for in-house performance and/or instructor evaluation.

THEA 3337. IMPROVISATION II: LONG FORM. 3 Hours.
Revisits concepts learned from Improvisation I and applies them to an advanced structure of interrelated scenes, monologues, and stories based on a theme or idea. The students will explore this long-form structure as it applies to playwriting, acting, and directing.

THEA 3340. MOVEMENT PERFORMANCE I: FUNDAMENTALS. 3 Hours.
Development of movement techniques and movement performances. Freeing the body through exercises and experiences in relaxation, physical awareness, and movement through space. Focus on body awareness and the release of habitual patterns that restrict the body. Prerequisite: THEA 1307 and permission of advisor.

THEA 3342. COSPLAY COSTUME FABRICATION. 3 Hours.
Exploration and practice of theatrical construction and fabrication techniques used in the cosplay industry.

THEA 3343. MAKEUP FOR THE CAMERA. 3 Hours.
Exploration and practice of styles, techniques, and types of make-up and make-up application for film, photography and fashion.
THEA 3346. STAGE COMBAT. 3 Hours.
An introduction to stage combat. Students will safely explore the choreographed illusion of stage violence through the skills of unarmed and armed combat. Prerequisite: Permission of advisor.

THEA 3350. FABRIC MODIFICATION AND COSTUME CRAFTS. 3 Hours.
Exploration and practice of the process and application of techniques in fabric modification and costume crafts. Prerequisite: Permission of advisor.

THEA 3351. ROBOTS, DIGITAL HUMANITIES, AND THEATRE. 3 Hours.
Lecture and applied practices of the emerging emotional interaction between robots and humans utilizing theatrical methodologies. Course will emphasize human and robot interactions from interdisciplinary approaches including cultural, historical, sociological, health-care, disability studies, and performing arts frameworks.

THEA 3352. STAGE MANAGEMENT & THEATRE ADMINISTRATION. 3 Hours.
Managerial activities and responsibilities as applicable to community or professional theatre. Prerequisite: THEA 1343 or permission of advisor.

THEA 3355. UNIVERAL DESIGN & ACCESSIBILITY IN THE PERFORMING ARTS. 3 Hours.
Explores the principles of Universal Design using the performing arts as a case study: creating environments, events, buildings, and products to accommodate the broadest spectrum of human ability, size, age, and other characteristics. Investigates how to put into practice the accessibility guidelines of the Americans with Disabilities Act of 1990. Performing is not required. Offered as THEA 3355 and DS 3355; credit will only be granted in one department.

THEA 3360. GENDER AND THE PERFORMING ARTS. 3 Hours.
Examines the role of gender in the performing arts, including theory and practice focused on gender. Additional topics may include female pioneers in the performing arts, the image of gender in different media, the way gender affects actors and artists, and the effect of cultural definitions of gender on audience reception. Offered as THEA 3360 and WOMS 3360. Credit will be granted only once.

THEA 3361. WOMEN IN THEATRE. 3 Hours.
Examines the history, theory, and practice of women in theatre. Pioneering female writers, directors, producers, actors, designers, and activists will be explored as will their influence upon drama in its historical, social, and cultural contexts. Students will also be introduced to theory that examines female characters in plays and their impact on the artist and audience. Offered as THEA 3361 and WOMS 3361. Credit will be granted only once.

THEA 3387. ART DIRECTION I. 3 Hours.
The history, theory, and basic concepts of art direction methods and basic construction techniques for television and film. Prerequisite: Permission of advisor.

THEA 4110. THEATRE PEDAGOGY FIELD-BASED EXPERIENCE. 1 Hour.
Supervised and directed professional practice in local schools. The student will be assigned to a public-school site for five hours per week. Weekly seminars are required. Field-based experience must be taken the semester immediately preceding student teaching residency. Prerequisite: Permission of advisor.

THEA 4140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 4140 and THEA 4140; credit will be granted only in one department. Prerequisite: C or better in MUSI 3141 or THEA 3141. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 4141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 4141 and THEA 4141; credit will be granted only in one department. Prerequisite: C or better in MUSI 4140 or THEA 4140. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering individual research or study in a designated area. May be repeated as the topic changes. Prerequisite: Permission of advisor.

THEA 4270. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 2 Hours.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music Degree. Prerequisite: THEA 3141 and permission of Advisor.

THEA 4271. PRIVATE LESSONS IN VOICE - MUSICAL THEATRE. 2 Hours.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music Degree. Prerequisite: C or better in THEA 4270 and permission of advisor.

THEA 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering individual research or study in a designated area. May be repeated as the topic changes. Prerequisite: Permission of advisor.

THEA 4300. DIRECTING II. 3 Hours.
Continuation of THEA 3300. Students will direct scenes and/or one-act plays. Prerequisite: THEA 3300 and permission of advisor.

THEA 4301. ACTING III: ADVANCED ACTING ENSEMBLE. 3 Hours.
Students will perform solo and/or group performances devised from their own and/or other artists’ research and development in a collaborative, ensemble environment. May not be repeated for credit. Prerequisite: THEA 1307, THEA 2352, THEA 3340, or permission of advisor.
THEA 4303. CLASSICAL THEATRE HISTORY. 3 Hours.
The development of world theatre from its beginnings through the Renaissance. Analysis of representative plays of each period with particular emphasis on drama in its historical context. History of acting, costuming, and directing. Prerequisite: THEA 1343 and permission of advisor.

THEA 4304. MODERN THEATRE HISTORY. 3 Hours.
The development of Western theatre from the Renaissance to the present. Analysis of representative plays from Europe, England, and America. Development of the modern stage, acting methods, and production techniques. Prerequisite: THEA 1343 and permission of advisor.

THEA 4305. SCENE DESIGN II. 3 Hours.
Continuation of THEA 3301. Distinctions among stage, television, and film design, interaction of one with another, advanced methods, and application of scene design concepts. Prerequisite: THEA 3301 and permission of advisor.

THEA 4306. LIGHTING DESIGN II. 3 Hours.
Specialized topics and advanced design technique and application principles. Participation on light crews in departmental productions required. Prerequisite: THEA 3305 and permission of advisor.

THEA 4310. MUSICAL THEATRE HISTORY. 3 Hours.
The history, development, and contemporary manifestations of the musical theatre art form in America and London's West End, and its relation to the continually changing social milieu. The course follows the development of musical theatre from its inception to the present.

THEA 4311. SHAKESPEARE AND VERSE IN PERFORMANCE. 3 Hours.
The study and performance of iambic pentameter and verse as found in Shakespearean and verse plays. Prerequisite: THEA 1303 and permission of instructor.

THEA 4314. ADVANCED PRODUCTION TECHNIQUES. 3 Hours.
An advanced examination of theatre craft, technology, and production. Prerequisite: THEA 3304.

THEA 4315. SPECIAL EFFECTS MAKEUP DESIGN. 3 Hours.
The examination of styles and techniques of specialty makeup applications for the stage and how these relate to television and film.

THEA 4317. SINGING FOR THE ACTOR II. 3 Hours.
The advanced study of musical theatre performance as it relates to the integration of acting, singing and dance skills into an effective performance. The script, score, character, vocal demands, and movement requirements of both solo and ensemble works will be studied, and the works will be performed in a culminating, musical revue-styled performance. This course may be repeated once for credit. Prerequisite: THEA 1307 and THEA 3317, or permission of instructor.

THEA 4320. STAGE WELDING, RIGGING, AND FABRICATION. 3 Hours.
Styles and techniques of welding, rigging, and specialized materials fabrication for the stage and in video and film production. Prerequisite: THEA 1304 and permission of advisor.

THEA 4322. PLAYWRITING II. 3 Hours.
The art and craft of constructing a full-length, two-act play. Course content will include references to the work of major playwrights and playwriting theory. Students will receive course content through a combination of class lectures and one-on-one writing conferences with the instructor. Prerequisites: THEA 3320 or permission of faculty.

THEA 4330. U.S. THEATRE HISTORY. 3 Hours.
The evolution of theatre in the United States from its beginning in colonial times to the present day. Representative plays from various periods are studied.

THEA 4333. MUSICAL THEATRE PORTFOLIO AND SHOWCASE. 3 Hours.
Advanced principles of character development for musical theatre are explored with emphasis on the development of a role through script, music, and character analysis. The semester is structured toward the development of an actor's final portfolio culminating in an audition context presentation or showcase. Prerequisite: THEA 2352, THEA 4317, DNCE 3335 and permission of instructor.

THEA 4340. MOVEMENT PERFORMANCE II: PHYSICAL THEATRE. 3 Hours.
The study and performance of physical theatre techniques. Prerequisites: THEA 3340 and permission of advisor.

THEA 4341. ACTING IV: PERFORMANCE, PORTFOLIO & SHOWCASE. 3 Hours.
The development and presentation of a professional audition with an additional emphasis on advanced character development, acting as a business, entrepreneurial opportunities, and the planning and research needed to establish an acting career in a city or region. (Formerly THEA 3341; may not be repeated for credit). Prerequisite: THEA 1303, THEA 1307, THEA 1343, THEA 2352, THEA 2309, and THEA 3340, or permission of advisor.

THEA 4343. COSTUME DESIGN. 3 Hours.
Theory and practice of costume design and application of those principles to theatrical production. Prerequisites: THEA 1343, THEA 1305, THEA 2309 or permission of instructor.

THEA 4344. PORTFOLIO AND RENDERING. 3 Hours.
The application of the principles of developing and disseminating professional materials in the 21st century, including résumés, business cards, digital portfolios, and web-based portfolios. Includes developing interview skills and practices, accounting for the independent contractor, job searching, and research into unions on the theatrical industry. The lab component focuses on rendering techniques, both traditional and digital. Prerequisite: Permission of advisor.
THEA 4345. SUMMER THEATRE ACTIVITIES. 3 Hours.
The study and application of specialized production and performance activities in a summer repertory theatre setting.

THEA 4346. THEATRICAL WEAPONRY. 3 Hours.
This course fosters a practical and theoretical understanding for the process of creating the illusion of safe and credible violence for the stage. Emphasis is placed on textual characterization and working with the weapons most frequently used in stage violence. Depending upon the semester, the student may be trained in broadsword, single rapier, rapier and dagger, small sword, or quarterstaff.

THEA 4355. STRATEGIES, ASSESSMENT, AND CHILD DEVELOPMENT IN THEATRE PEDAGOGY. 3 Hours.
Open to theatre majors only. Current trends in theatre education will be examined. Topics include effective differentiated instruction, classroom management, strategies for working with diverse learners, and examination of major learning theories and principles of cognitive, social, emotional, physical and aesthetic development. This course will also examine a variety of assessment techniques that are used in a theatre classroom. Assessment tools such as rubrics, rating scales, National Standards, TEKS, STAAR, and TExES will be examined and implemented into lesson planning. Prerequisite: For Theatre Arts majors only. Admission into the College of Education.

THEA 4387. ART DIRECTION II. 3 Hours.
An applied course in art direction methods, construction practices and techniques in video and film production. Prerequisite: Permission of faculty.

THEA 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering individual research or study in a designated area. May be repeated as the topic changes. Prerequisite: Permission of advisor.

THEA 4393. SPECIAL TOPICS. 3 Hours.
Special studies in drama and theatre. Topic varies from semester to semester. May be repeated as topic changes or until a maximum of six credit hours is attained. Prerequisite: Permission of advisor.

THEA 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or project of equivalent difficulty under the direction of a faculty member in the major department. Prerequisite: Permission of advisor.

THEA 4395. THEATRE INTERNSHIP LEVEL I. 3 Hours.
Individual research through working with a professional theatre or performing arts organization. Individual conference to be arranged. Graded on a pass/fail basis. Prerequisite: Theatre Arts major with permission of advisor and department chair.

THEA 4396. THEATRE INTERNSHIP LEVEL II. 6 Hours.
Individual research through working with a professional theatre or performing arts organization. Individual conference between sponsor and departmental advisor required. Graded on a pass/fail basis. Prerequisite: Theatre Arts major with permission of advisor and department chair.

THEA 4397. THEATRE INTERNSHIP LEVEL III. 9 Hours.
Individual research through working with a professional theatre or performing arts organization. Individual conference between sponsor and departmental advisor required. Graded on a pass/fail basis. Prerequisite: Theatre Arts major with permission of advisor and department chair.

THEA 5391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering individual research or study in a designated area. May be repeated as the topic changes. Prerequisite: Permission of instructor.

THEA 5393. TOPICS IN THEATRE ARTS. 3 Hours.
Special topics in theatre; offered periodically with subject matter determined by instructor and student interest. Previous topics have included: Design Portfolio Workshop; Alternative Actor Training Workshop; Playwriting; Improvisation; and Styles in Acting. Prerequisite: Permission of advisor.
Theatre Arts - Graduate Programs

Objective

A few graduate course offerings in theatre arts are provided to support other graduate degree programs and to meet the express needs of students. These 5000-level courses may be found in the undergraduate course list. No program leading to a graduate degree in theatre arts exists at this time.
Theatre Arts - Undergraduate Programs

The mission of the Department of Theatre Arts in the College of Liberal Arts at The University of Texas at Arlington is to provide a comprehensive undergraduate education through theory, research, and practice in the theatre arts and dance.

The objective of the department is to provide an extensive and wide-ranging education in the theatrical and dance professions through applied and practical experiences acquired through performance and production opportunities. Undergraduate students in the Department of Theatre Arts explore the components which comprise the performance and production event. The research of new theories and their applications to the art, craft, and management of Theatre Arts and Dance is highly encouraged through one-on-one mentoring and supervision by specialized, professional faculty. A primary aspect of the Department of Theatre Arts is to provide a challenging educational environment for each student characterized by shared values, unity of purpose, diversity of opinion, mutual respect, and a commitment to lifelong learning. The following degrees are offered:

- Bachelor of Arts (B.A.) in Theatre Arts
- Bachelor of Fine Arts (B.F.A.) in Theatre Arts, with sub-plans in:
  - Design and Technology
  - Musical Theatre
  - Acting

In addition, the Department offers the following minors:

- Minor in Dance
- Minor in Theatre Arts

Dance courses are listed as Dance (DNCE). Several approved University core courses are also offered by the Department that satisfies core degree requirements in other disciplines.

Production and Performance

Maverick Theatre Company

The Maverick Theatre Company is the production company of the Department of Theatre Arts at the University of Texas at Arlington, providing a showcase for the creative research of the academic program. A resident company of professional artists and students present a wide variety of plays and musicals from past and current theatrical literature with a special focus on new play development. Every student, upon admission to a theatre degree program in the department, becomes a Maverick Theatre Company member. These activities directly support the academic objectives of the department.

Maverick Dance Company

The Maverick Dance Company is the resident dance company of the Department of Theatre Arts, producing performances featuring the University of Texas at Arlington dance students, faculty, and guest artists. Directors, choreographers, and performers of Maverick Dance Company emphasize creative research to develop original, progressive dance works for the concert stage. Every student enrolled in a Dance Performance course becomes a Maverick Dance Company member. Each performance activity expands upon a variety of theories and practices studied within the dance curriculum.

The Bachelor of Arts (B.A.) in Theatre Arts

Liberal Arts Requirements

The Bachelor of Arts degree provides a general background in Theatre Arts and Liberal Arts. The B.A. allows students the opportunity, through elective coursework in Theatre Arts, to tailor their degree program in areas of interest that the student may wish to explore.

Admission

In addition to the general requirements for admission to the University, the aspiring undergraduate must meet the following requirement for admission to the Bachelor of Arts degree program:

- Participation in advisement and a personal interview.

To be fully accepted in the Bachelor of Arts (B.A.) in Theatre Arts degree program, all students must complete at least one semester as a "Theatre Arts Intended" student and earn a 2.25 cumulative grade point average in all courses including theatre courses taken at UT Arlington. Once these standards are met, the student may be declared as a Bachelor of Arts in Theatre Arts major.
B.A. in Theatre Arts - Academic Requirements

All Theatre Arts majors shall enroll in THEA 0181 for one hour per semester in residence in order to graduate. Eight (8) hours of THEA 0181 are required. Students should see their advisor regarding practicum obligations.

All B.A. students are encouraged to audition for each major production each semester they are enrolled, though they may choose to decline being considered for a role at the time of the audition. Production activities and Theatre Arts disciplinary rules are governed by a student handbook that is available to the student through the Department of Theatre Arts.

A minimum 2.25 overall grade point average is required for all courses, including theatre courses, taken at UT Arlington in order to remain in the B.A. degree program. Students currently enrolled at UT Arlington who wish to declare Theatre Arts as a major must have a minimum grade point average of 2.25 in overall coursework taken at UT Arlington in order to be admitted.

A student will be placed on departmental academic probation in the Department of Theatre Arts if her/his grade point average drops below the minimum requirements for the degree plan in which they are enrolled. A theatre arts student who is on academic probation is not allowed to audition for or accept an acting role or serve as a designer, stage manager or other significant production position for any of the productions during the next regular semester they are enrolled. If after a regular semester the student's grade point average returns to at least the minimum required grade point average for their degree plan, then the probation is removed. However, if after a regular semester the student's grade point average does not meet the minimum required grade point average, the student may, at the discretion of the department chair, be removed from the degree program and will be advised as to other degree plan alternatives, should they exist.

Department Scholarships

The Department of Theatre Arts offers limited scholarships to deserving students based upon talent, academic excellence, and merit. Work-study positions are also available. Contact the Department of Theatre Arts for information.

The Bachelor of Fine Arts (B.F.A.)

Liberal Arts Requirements

The Bachelor of Fine Arts degree is a specialized, pre-professional degree that provides a background in the liberal arts with specialized sub-plans in: Design and Technology, Musical Theatre, or Acting.

· The Design and Technology Sub-plan is for students seeking a professional career as a scenic, lighting, sound or costume designer, technical director, and/or theatre technician.

· The Musical Theatre Sub-plan is designed for students seeking a professional career in musical theatre performance.

· The Acting Sub-plan is designed for students seeking a professional career as an actor.

Students seeking the B.F.A. elect additional courses chosen from the University and Liberal Arts core curricula outside the Department of Theatre Arts.

Admission - B.F.A.

The aspiring undergraduate must meet the following requirements for admission to the Bachelor of Fine Arts (B.F.A.) degree program:

* Participation in advisement.

* A personal interview with a designated faculty member (all students).

* A design/technical production portfolio review for the Design and Technology BFA Sub-plan or an audition and interview for the Musical Theatre B.F.A. Sub-plan and the Acting B.F.A. Sub-plan are required for admittance into one of these three B.F.A. sub-plans.

* Upon acceptance by the University and the Department of Theatre Arts, an indication of an area of specialization (Design and Technology, Musical Theatre, or Acting) is required.

B.F.A. - Academic Requirements

All Theatre Arts majors shall enroll in THEA 0181 for one hour per semester in residence in order to graduate. Eight (8) hours of THEA 0181 are required. Students should see their advisor regarding practicum obligations. Transfer students must discuss THEA 0181 requirements with the Theatre Arts academic advisor.
• **B.F.A. Design and Technology Sub-plan** students are required to present an updated portfolio and resume of production and course work at a formal portfolio review session at the end of each semester enrolled. Students are required to perform an assigned production position each semester enrolled. The production position is in addition to the requirements of the THEA 0181 Theatre Practicum course and will be assigned by the Area Head of the Design and Technology Sub-plan. Upon completion of the final semester of the B.F.A. Design and Technology Sub-plan, students shall present their work at an exit portfolio presentation: all accumulated design and production work completed while enrolled in the B.F.A. sub-plan shall be presented.

• **B.F.A. Musical Theatre Sub-plan** students are required to audition for each major production each semester they are enrolled and must accept roles for which they are cast, unless special permission has been obtained in advance of the audition from the Musical Theatre Sub-plan Chair or the Chair of the Department.

• **B.F.A. Acting Sub-plan** students are required to audition for each major production each semester they are enrolled and must accept roles for which they are cast, unless special permission has been obtained in advance of the audition from the Acting Sub-plan Chair or the Chair of the Department.

A **minimum grade point average of 2.25 is required in overall coursework** taken at UT Arlington in order to remain in the B.F.A. degree program. A **minimum grade point average of 2.50 is required for all Theatre courses** taken at UT Arlington in order to remain in the B.F.A. degree program. Students currently enrolled at UT Arlington who wish to declare Theatre Arts as an intended B.F.A. major must have a minimum grade point average of 2.25 in overall coursework taken at UT Arlington, in addition to the admission requirements stated above, in order to be admitted.

Concurrent enrollment in more than one B.F.A. sub-plan is not allowed. A student must complete a B.F.A. sub-plan and graduate with that sub-plan before being allowed to enroll in a second B.F.A. sub-plan.

Students wishing to change their B.F.A. sub-plan from one plan to another must reapply for and be accepted by the faculty to the new sub-plan according to the application procedures applicable for that sub-plan. Students should be aware that changing B.F.A. sub-plans may result in additional semesters of study. Students should contact their academic advisor to obtain a new graduation date when changing sub-plans.

A student will be placed on [departmental academic probation](#) in the Department of Theatre Arts if their grade point average drops below the minimum requirements for the degree plan in which they are enrolled. A theatre arts student who is on academic probation is not allowed to audition for or accept an acting role or serve as a designer, stage manager or other significant production position for any of the productions during the next regular semester they are enrolled. If after a regular semester the student’s grade point average returns to at least the minimum required grade point average for their degree plan, then the probation is removed. However, if after a regular semester the student’s grade point average does not meet the minimum required grade point average, the student may be removed from the degree program as determined by the Department Chair and will be advised as to other degree plan alternatives, should they exist.

Production activities and Theatre Arts disciplinary rules shall be governed by a student handbook that is available to the student upon request through the Department of Theatre Arts or at <https://www.uta.edu/theatre>.

**Department Scholarships**

The Department of Theatre Arts offers limited scholarships to deserving students based upon talent, academic excellence, and merit. Work-study positions are also available. Contact the Department of Theatre Arts for information.

1 Satisfies core requirement.

2 UNIV 1131 is for entering Freshman Theatre Arts majors only. If a student is transferring in as a Theatre Arts major, the student shall enroll in UNIV 1101 instead of UNIV 1131. Entering and Transfer Freshman, Sophomore, Junior, and Senior-level students must also take THEA 1101 Theatre Symposium. Discuss requirement with the Theatre Arts academic advisor.

3 All Theatre Arts majors shall enroll in one (1) hour per semester in residence in THEA 0181 in order to graduate. Eight (8) hours of THEA 0181 THEATRE PRACTICUM are required. Students should see their advisor regarding practicum obligations. Transfer students must discuss THEA 0181 THEATRE PRACTICUM requirements with the Theatre Arts advisor.

* NOTE: The study grid above is for informational purposes only and is not an official degree plan. See the department's academic advisor for more information.

**Oral Communication Competency**

Students majoring in Theatre Arts may demonstrate competency in oral communications by taking any course approved by the Undergraduate Assembly for this purpose. Alternatively, they may demonstrate this competency by passing the University proficiency examination in oral communication.

**Computer Use Competency**

Students majoring in Theatre Arts may demonstrate competency in computer use by taking any course approved by the Undergraduate Assembly for this purpose. Alternatively, they may demonstrate this competency by passing the University proficiency examination in computer use.

**Requirements for a Minor in Theatre Arts**

Students who are not majoring in Theatre Arts may elect to minor in it. Eighteen (18) hours of Theatre Arts courses are required. This includes:

<table>

<td></td>
<td>18</td>
</tr>
</tbody>
</table>

Students interested in theatre arts as a minor should consult a Theatre Arts Department advisor to determine the most advantageous selection of courses in light of their interests and experience. With such consultation, departmental prerequisites may be waived for the purposes of a Theatre Arts minor.

**Requirements for a Minor in Dance (DNCE)**

Any undergraduate student may elect to minor in Dance (DNCE). The Dance Minor offers a variety of dance technique and theory courses to develop a well-rounded artist/scholar. Students have some flexibility in designing their coursework with the ability to choose from a variety of DNCE elective courses towards the Dance Minor.

**Requirements:**

- At least four (4) credit hours in level 2 dance technique courses DNCE 3232, DNCE 3235, or DNCE 3236 must be completed at UT Arlington.
- A placement exam may be required prior to enrolling in level 2 technique courses.
- A maximum of two (2) credits of DNCE 1139 Dance Performance may be applied towards the Dance Minor.

- Eighteen (18) hours of specified Dance courses are required:

Students interested in a minor in Dance should consult with a Theatre Arts Department academic advisor to enroll in the appropriate courses.
Women's and Gender Studies - Undergraduate Program

Overview

The Women's and Gender Studies Program provides students with the opportunity to engage in critical analysis of issues related to women, gender, and sexuality. Courses typically emphasize how women, gender, and sexuality have shaped and been shaped by history, culture, and society, with particular attention to the role of race, ethnicity, class, nation, age, and religion in forming gender identities. This interdisciplinary program is taught by faculty from diverse fields and offers a unique opportunity for students to complement their work in traditional disciplines with courses that can be tailored to meet specific interests and needs.

Students may receive a Minor in Women's and Gender Studies by taking 18 credit hours from a selection of courses offered across several disciplines. Most of our courses are cross-listed with courses offered in other departments. Students should consult the Women's and Gender Studies website for a list of the courses being offered in any specific semester.

Women's and Gender Studies Minors are encouraged to take two foundation courses: WOMS 2310: Introduction to Women's & Gender Studies and WOMS 2315: Introduction to Gay & Lesbian Studies.

Women's and Gender Studies Minors may also consider taking the Internship course, which involves working off campus at a local organization that addresses women's or gender issues.

Students seeking the Women's and Gender Studies minor should first consult with the advisors in their major departments or programs for approval, then with the Women's and Gender Studies Program advisor.

A Graduate Certificate program in Women’s & Gender Studies is an interdisciplinary program that advances knowledge and research in the fields of women’s and gender studies. A Graduate Certificate demonstrates students’ understanding of the issues related to women, gender, and sexuality that have shaped social structures, institutions, and identities across human history. Students gain a specialization within the fields of women’s and gender studies that enhances their graduate educations and equips them with skills to succeed in their chosen careers.

Applicants seeking the Women's & Gender Studies Graduate Certificate will be restricted to students currently enrolled in a Masters or PhD program at UT Arlington, having met their admission standards. In these cases, the Women's & Gender Studies Program will defer to the admissions standards of each individual graduate program, s/he may be admitted to the Women's & Gender Studies Graduate Certificate Program. Students should consult with the Graduate Studies Advisory of their Masters or Ph.D. program before applying to the Graduate Certificate in Women's and Gender Studies.

Students may receive a Graduate Certificate in Women's & Gender Studies by taking 12 hours of courses that are designated by the Women's and Gender Studies Program as having a central focus on women, gender, sexuality, or related topics. These courses may be taken within the graduate student's primary degree-granting department, or within other participating graduate programs. Courses may be counted twice, for both the student's primary graduate degree and her/his Graduate Certificate in Women’s & Gender Studies. A list of approved classes will be generated at the beginning of each semester, posted on the Women’s & Gender Studies website, and circulated to all certificate-seeking students.

COURSES

WOMS 2301. TOPICS IN WOMEN'S AND GENDER STUDIES. 3 Hours.
Special topics of interest in the disciplines of Women's and Gender Studies. May be repeated for credit when the topic changes.

WOMS 2307. WOMEN IN THE ANCIENT WORLD. 3 Hours.
Exploration of roles and images of women in ancient Greece and Rome, using a variety of primary (ancient) sources: literature, legal and medical texts, visual art, and inscriptions. Offered as CLAS 2307 and WOMS 2307. Credit will be granted only once.

WOMS 2310. INTRO TO WOMEN'S & GENDER STUDIES. 3 Hours.
Provides an introduction to Women's Studies and Gender Studies as fields that place women and gender at the center of inquiry. Examines topics such as work, family, reproduction, sexuality, politics, art, literature, and contemporary media. Explains the diversity of methods and theories employed in Women's and Gender Studies scholarship, emphasizing the intersection of gender, sexuality, race, ethnicity, and class. Satisfies the University of Texas at Arlington core curriculum requirement in Language, Philosophy, and Culture.

WOMS 2315. INTRODUCTION TO LGBTQ+ STUDIES. 3 Hours.
Provides an introduction to Gay and Lesbian Studies, including the study of transsexual, transgender, and queer identities. May address topics such as LGBTQ history; sexuality and civil rights; the representation of LGBTQ in art, literature, and popular culture; and/or feminist analysis of sex, gender, and sexuality. Explains the methods and theories employed in gay and lesbian studies, emphasizing the intersection of gender, sexuality, race, ethnicity, class, and ability/disability. Satisfies the University of Texas at Arlington core curriculum requirement in Language, Philosophy, and Culture. This course is offered as WOMS 2315 and DIVR 2315. Credit will be granted in only one department.
WOMS 2317. BASIC CONCEPTS IN HUMAN SEXUALITY. 3 Hours.
The physiological, psychological, and sociological aspects of human sexuality. Offered as BIOL 2317, HEED 2317, PSYC 2317, and WOMS 2317. Credit will be granted for one of these courses only. Students seeking certification in Health Education must enroll in HEED 2317. Students seeking credit toward their science requirement must enroll in BIOL 2317. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, medical technology, psychology, or sociology.

WOMS 3300. TOPICS IN WOMEN'S AND GENDER STUDIES. 3 Hours.
Special topics of interest in the disciplines of Women's and Gender Studies. May be repeated for credit when the topic changes. Offered as WOMS 3300 and AAST 3300; credit will be granted in only one department.

WOMS 3301. INTRODUCTION TO LATINA/HISPANIC FEMINISM. 3 Hours.
This interdisciplinary course explores Latina/Hispanic feminism through the intersection of race, class, gender, and sexuality. This course is organized around the following issues: colonization, immigration, globalization, sexism, health, and violence. Through an analysis of cultural production, politics, socio-economics, literary texts, and feminist methodology, the goal of this course is to develop a robust understanding of how Latina/Hispanic feminist methodologies can be used as tools for social change and social justice. Offered as WOMS 3301, MAS 3301, and DIVR 3301. Credit will only be granted in one department.

WOMS 3305. WOMEN'S HEALTH ISSUES. 3 Hours.
Will address specific issues of importance to women and their health, including growth and development, nutrition, reproductive health, pregnancy, chronic diseases, and relationship/family issues. Offered as DIVR 3305, HEED 3305 and WOMS 3305. Credit will be granted only once.

WOMS 3313. CULTURAL PSYCHOLOGY. 3 Hours.
Theory and research regarding psychological issues related to gender and cultural diversity. These issues will be approached from different perspectives within psychology, including clinical, developmental, social, health, and cognitive psychology. Prerequisite: PSYC 1315. Offered as PSYC 3313 and WOMS 3313; credit will be granted only once.

WOMS 3314. THE LATINA EXPERIENCE. 3 Hours.
A course on the social, cultural, and economic experiences of Latina and Latin American origin women in the United States. Offered as MAS 3314, SOCI 3314, SOCW 3314, WOMS 3314, and AAST 3321. Credit will be granted in only one department.

WOMS 3324. U.S. WOMEN'S HISTORY. 3 Hours.
An examination of women in US politics, work and society from the colonial era to the present. Offered as HIST 3324 and WOMS 3324; credit will be granted only once.

WOMS 3328. MARITAL AND SEXUAL LIFESTYLES. 3 Hours.
Contemporary American lifestyles selected from: singles, traditional marriage, homosexuals, single-parent families, open marriage, non-marital sexuality, cohabitation, dual-career marriage, childless couples, egalitarian marriage, families in later life. Offered as DIVR 3328, SOCI 3328 and WOMS 3328; credit will be granted only once.

WOMS 3331. SOCIOLOGY OF THE FAMILY. 3 Hours.
The family's role in American society and in other cultures past, present, and future. Family research methods, comparative family systems, child development/parenting, culture and personality, minority families, social class variation in families, work and family. Prerequisite: sophomore standing or permission of the instructor. Offered as SOCI 3331 and WOMS 3331; credit will be granted only once.

WOMS 3334. SOCIOLOGY OF GENDER. 3 Hours.
Examination of theoretical and empirical approaches to understanding the formation of gender. Assesses individual and structural dimensions of gender in various social institutions including work, education, and families. Offered as SOCI 3334 and WOMS 3334; credit will be granted only once.

WOMS 3338. COMPARATIVE KINSHIP AND FAMILY SYSTEMS. 3 Hours.
Variation in kinship and family systems from crosscultural and evolutionary perspectives. Structure, function, and dynamics of kinship and family systems as adaptations to diverse ecological, social, and historical circumstances. Implications of this approach for understanding kinship and family in American society also addressed. Formerly listed as ANTH 4338. Credit cannot be given for both ANTH 3338 and ANTH 4338. Also offered as WOMS 3338; credit will be granted only once. Offered as AAST 3332 and ANTH 3338; credit will be granted in only one department.

WOMS 3356. WOMEN, WORK AND SOCIAL CHANGE. 3 Hours.
Women's work experiences, how these experiences are changing, and relationship between paid employment and non-wage household labor. Paid and unpaid work experiences are empirically examined in terms of a variety of theoretical perspectives. Offered as DIVR 3356, SOCI 3356 and WOMS 3356; credit will be granted only once.

WOMS 3360. GENDER AND THE PERFORMING ARTS. 3 Hours.
Examines the role of gender in the performing arts, including theory and practice focused on gender. Additional topics may include female pioneers in the performing arts, the image of gender in different media, the way gender affects actors and artists, and the effect of cultural definitions of gender on audience reception. Offered as THEA 3360 and WOMS 3360. Credit will be granted only once.

WOMS 3361. WOMEN IN THEATRE. 3 Hours.
Examines the history, theory, and practice of women in theatre. Pioneering female writers, directors, producers, actors, designers, and activists will be explored as well as their influence upon drama in its historical, social, and cultural contexts. Students will also be introduced to theory that examines female characters in plays and their impact on the artist and audience. Offered as THEA 3361 and WOMS 3361. Credit will be granted only once.
WOMS 3364. TOPICS IN LGBTQIA+ LITERATURE AND THEORY. 3 Hours.
Studies representations of the sexual and/or gender identities of LGBTQIA+ people and the intersectionality among them through a variety of texts. Specific topics may include the history of marginalized sexualities, crossdressing in literature, or transvestite saints; the texts may be philosophical, political, literary, and/or scientific. Offered as ENGL 3364 and WOMS 3364; credit will be granted in only one department. May be repeated for credit as course content changes. Prerequisite: English majors must have earned a C or better in ENGL 3350 or must be concurrently enrolled in ENGL 3350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

WOMS 3366. SEX, GENDER, AND CULTURE. 3 Hours.
The ways gender and sexuality are culturally constructed. Readings include ethnographies, life histories, and fiction. Debates within anthropology and within specific cultures over maleness and femaleness. Offered as ANTH 3366 and WOMS 3366; credit will be granted only once.

WOMS 3368. TOPICS IN FEMINIST THEORY, GENDER, AND SEXUALITY. 3 Hours.
Examines issues of gender and sexuality through literary, theoretical, and philosophical texts that foreground questions feminist theory raises about desire, sexual identity, and gender asymmetry. Considers how gender and sexuality shape and are shaped by race, ethnicity, class, ability/disability, religion, and age. May be repeated for credit as course content changes. Offered as ENGL 3368 and WOMS 3368; credit will be granted in only one department. Prerequisite: English majors must have earned a C or better in ENGL 3350 or must be concurrently enrolled in ENGL 3350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

WOMS 3370. HISTORY OF WOMEN'S WRITING. 3 Hours.
Examines women's writing in English from the Medieval period to the present. Offered as ENGL 3370 and WOMS 3370; credit will be granted in only one department. Prerequisite: English majors must have earned a C or better in ENGL 3350 or must be concurrently enrolled in ENGL 3350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

WOMS 3385. WOMEN AND CRIME. 3 Hours.
This course examines criminology and criminal justice issues as they relate specifically to women. The three major areas of coverage include (1) women and girls as victims of crime, (2) women and girls as criminal offenders; and (3) women working in the criminal justice system. Offered as DIVR 3385, CRCJ 3385 and WOMS 3385; credit will be granted only once.

WOMS 4190. CONFERENCE COURSE. 1 Hour.
Independent study for the advanced undergraduate. A close examination of a chosen topic through research and/or reading; format designed by instructor and student. May be repeated for credit when the subject matter varies, but only with permission of director of Women's and Gender Studies Program.

WOMS 4290. CONFERENCE COURSE. 2 Hours.
Independent study for the advanced undergraduate. A close examination of a chosen topic through research and/or reading; format designed by instructor and student. May be repeated for credit when the subject matter varies, but only with permission of director of Women's and Gender Studies Program.

WOMS 4301. ART AND GENDER. 3 Hours.
Approaches to the interpretation of art from the stance of gender and feminism. Emphasis is placed on the work of significant female artists and on the gendered representations of art. Offered as ART 4301 and WOMS 4301; credit will be granted only once. Fulfills the Social/Cultural Studies requirement. Prerequisite: Any two of the three courses ARTS 1309, ART 1310, and ART 1317; or permission from the instructor.

WOMS 4302. WOMEN AND WORK IN TRANSATLANTIC PERSPECTIVE. 3 Hours.
Examines the history of women and work, both waged and nonwaged, in Europe and the Americas, including the United States. Highlights differences within women's work cultures as well as variation in women's employment opportunities and their efforts to achieve equality with men in the workplace, by ethnicity, region, and nation. Offered as HIST 4302 and WOMS 4302; credit will be granted only once.

WOMS 4303. WOMEN IN SOCIETY. 3 Hours.
Women's status in contemporary American society, including the family, workplace, and politics. Women's status will also be examined in historical and crosscultural perspectives. Offered as SOCI 4303 and WOMS 4303; credit will be granted only once.

WOMS 4305. TRANSNATIONAL FEMINISMS. 3 Hours.
Explores transnational feminist frameworks and the heterogeneous processes used in the cultural construction of gender in a global context. Centering non-Western perspectives, the class analyzes the intersectional inequalities experienced by women in different cultural contexts and explores the workings of power and gender that shape the lives of women around the world. Topics may include reproductive rights, poverty, education, and religious, economic, political, and legal mechanisms of women's subordination and inequality.

WOMS 4307. 'EVIL' WOMEN: WITCHES, HARLOTS & 'MADWOMEN'. 3 Hours.
Examines the definition of "evil" women as a mechanism for the control of women and the maintenance of patriarchal gender relations in Western societies. Will address the philosophical and religious ideologies that underpin manifestations of misogyny and the extreme, narrow boundaries Western societies historically used in defining female gender roles. Topics include witch hunts, policing of women's sexual behavior, and using labels of mental illness to punish women for social transgressions.
WOMS 4316. WOMEN IN THE POLITICAL PROCESS. 3 Hours.
This course introduces students to the unique experiences of women in the political process, the impact of these experiences on the political system, and theories of gender and politics. Offered as POLS 4316 and WOMS 4316; credit will be granted only once.

WOMS 4318. LANGUAGE AND GENDER. 3 Hours.
The role of language in the expression and creation of gender identities. Gender differences in language structure and use, women's and men's language in other cultures, the acquisition of gendered ways of speaking, and sexism in language. Offered as LING 4318 and WOMS 4318; formerly offered as LING 4392/WOMS 4392; credit will be granted only once. Prerequisite: LING 3311.

WOMS 4323. FEMINIST POLITICAL THOUGHT. 3 Hours.
Issues raised by the feminist critique of political theory; the exclusion of women from the political sphere until the 20th century; Marxist, liberal, and radical feminist political thought; alternative feminist conceptions of the political. Offered as POLS 4323 and WOMS 4323; credit will be granted only once.

WOMS 4325. WOMEN IN SCIENCE. 3 Hours.
Explores the role of women in science. Emphasis on gender and science, the history of women in science, gender equity in the classroom, strategies for the retention of women scientists, the current culture/climate for women in science, and contemporary women in science. Offered as EDUC 4325, SCIE 4325, and WOMS 4325. Credit will be granted only once.

WOMS 4326. DIVERSITY IN ORGANIZATIONS. 3 Hours.
This course examines the implications of employee diversity in organizations, an issue of increasing importance. It includes study of the changing demographics of workers, including multiple demographic groups and areas of difference important to organizational treatment and outcomes. This course examines research on treatment, access, and customer discrimination. Legislation related to diversity is also reviewed. This course also provides suggestions for individuals and organizations to increase opportunities and outcomes for workers of all backgrounds. Offered as MANA 4326, AAST 4326 and WOMS 4326; credit will be granted in only one department. Prerequisite: Junior standing.

WOMS 4327. WOMEN IN HISPANIC LITERATURE. 3 Hours.
Considers women as characters in and writers of Hispanic literature. Includes the analysis of themes, language, and how the writings of women often give voice to lesser known aspects of culture. Offered as SPAN 4327, MAS 4327, and WOMS 4327; credit will be granted only once. Prerequisite: SPAN 3315 with a grade of C or better.

WOMS 4340. TOPICS IN WOMEN'S WRITING. 3 Hours.
Focuses on women's writing in a particular genre or historical period or on a concept or issue of importance to women writers. May be repeated for credit as course content changes. Offered as ENGL 4340 and WOMS 4340; credit will be granted in only one department. Prerequisite: English majors must have earned a C or better in ENGL 3350 or must be concurrently enrolled in ENGL 3350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

WOMS 4390. CONFERENCE COURSE. 3 Hours.
Independent study for the advanced undergraduate. A close examination of a chosen topic through research and/or reading; format designed by instructor and student. May be repeated for credit when the subject matter varies, but only with permission of director of Women's and Gender Studies Program.

WOMS 4392. SPECIAL TOPICS IN WOMEN'S STUDIES. 3 Hours.
Special topics related to women's and gender studies. May be repeated for credit when the topic changes, with permission of the director of the Women's and Gender Studies Program.

WOMS 4393. WOMEN'S STUDIES INTERNSHIP. 3 Hours.
Supervised internship through which students apply the academic skills they have acquired in Women's and Gender Studies courses by working in a related business or non-profit environment. Required coursework will be determined by instructor. Prerequisite: WOMS 2310 and permission of Director of Women's and Gender Studies.

WOMS 5301. TOPICS WOMEN'S & GENDER STUDIES. 3 Hours.
Special topics of interest in the discipline of Women's and Gender Studies. May be repeated for credit when the topic changes.
College of Nursing and Health Innovation

CONHI Website

Mission and Vision

The College of Nursing and Health Innovation is an integral component of The University of Texas at Arlington and subscribes to the mission of the University.

The mission of the College of Nursing and Health Innovation is to advance global health and the human condition through transdisciplinary collaboration by engaging in high quality teaching, research, scholarship, practice and service to prepare a diverse population of health professionals and to reduce health disparities. The vision of the College of Nursing and Health Innovation is to provide innovative, exceptional education through research and practice to advance health and the human condition globally.

History and Overview

The UT Arlington College of Nursing was established in 1971 as the U.T. System College of Nursing in Fort Worth and was housed in John Peter Smith Hospital. The first baccalaureate class enrolled in fall of 1972; the graduate program (MSN) began in 1975. In 1976, the school became an academic unit of UT Arlington, moving to the campus in 1977. Degree program offerings continued to expand to include a PhD in Nursing in fall 2003. In fall of 2014, the Department of Kinesiology was combined with the College of Nursing to create the College of Nursing and Health Innovation. Before joining with the College of Nursing, the department of Kinesiology was a department in the College of Education and Health Sciences at UTA.

The Undergraduate Nursing Department consists of the BSN and the RN to BSN programs. In addition to the Arlington campus, these programs are offered online through the UT Arlington Academic Partnership program.

The Graduate Nursing Department offers a Master of Science in Nursing (MSN) with preparation as a nurse practitioner in the population areas of Adult-Gerontology Acute Care, Adult Gerontology Primary Care (previously Adult and Gerontology), Family, Neonatal, Acute Care Pediatric, Primary Care Pediatric and Psychiatric-Mental Health. Post-master's certificates are available in all the above nurse practitioner specialties. In addition, the UT Arlington MSN Program offers preparation in Nursing Administration, Nursing Education, Family Nurse Practitioner, Adult Gerontology Primary and Acute Care Nurse Practitioner, and Pediatric Primary and Acute Care Nurse Practitioner options in an online accelerated format. An RN to MSN option is also available in an accelerated online format in Nursing Education, Nursing Administration and Family Nurse Practitioner. Post baccalaureate certificates are offered in Nursing Administration and Nursing Education. Post Master's Certificates options are available in all Nurse Practitioner tracks and in Nursing Administration. Many of the Post Master's Certificates are also available in the accelerated online format. The PhD in Nursing was approved in April 2003 with classes beginning in Fall 2003. A BSN-to-PhD entry option was approved in 2005, with classes beginning in Fall 2006. The Doctor of Nursing Practice (DNP) began in Fall 2009.

The undergraduate programs within the Department of Kinesiology are organized into four areas: exercise science, physical education teacher education, sports leadership & management and public health. The graduate programs include a Graduate Certificate in Public Health, a Master of Science in Exercise Science, a Master of Science in Athletic Training and a PhD in Kinesiology. Each of these academic programs provide students with a strong foundation in the sciences of their respective fields and provides a comprehensive discipline-specific program of study designed to prepare students for a specific career path. Some of the degree options work towards meeting the prerequisite requirements for admission to physical therapy, occupational therapy and physician's assistant graduate programs, as well as medical and dental schools (e.g., BS in Exercise Science - Clinical Health Professions). Other degree plans prepare students for state and national certification/licensure (e.g., Physical Education Teacher Education and Athletic Training) programs. The Public Health programs prepare students for careers in public health, as well as preparation for advanced degrees in public health. The PhD in Kinesiology prepares students for careers in research, academic and related industry settings.

Accreditation

The baccalaureate degree program in nursing, master's degree program in nursing, Doctor of Nursing Practice program, and post-graduate APRN certificate program at The University of Texas at Arlington is accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791.

The Kinesiology Athletic Training Program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). CAATE ensures that accredited institutions and education programs that offer athletic training meet the rigorous standards for professional athletic training education and encourages continuous enhancement in the quality of preparing athletic trainers.
Research Interests of Faculty

The research programs of the College of Nursing and Health Innovation faculty are diverse. A sampling of their areas of study includes oncology, health disparities, leadership in nursing education, technology in the care of older adults, simulation and technology in health professional education, exercise interventions to mitigate heart disease, inter-professional collaborations education, statistical models, gerontology, bone and muscle disease and heart disease. Other faculty research interests include adapted sports, sports pedagogy, applied biomechanics, motor development, cardiovascular physiology, autonomic function, environmental physiology, cardiac function, pulmonary responses to exercise, postural control in the elderly, dynamic regulation of blood pressure, assessment and management of sports-related concussions, the effects of therapeutic modalities on the treatment of athletic injuries, and the effects of hyperbaric oxygen on the treatment of diseases.

Special

Smart Hospital™

Assistant Dean: Jennifer Roye

The Smart Hospital™ is a simulated hospital environment complete with state-of-the-science equipment and furnishings. In this facility, students interact with and provide care to a full array of simulated patients who occupy the Emergency Department, ICU, Labor and Delivery suite, pediatric unit, Neonatal ICU, adult medical/surgical beds and the resuscitation room for large team training. Students learn utilizing simulation technology including full body interactive patient simulators, computerized scenario-based programs and individual trainers for specific skills.

The "patients" who populate our Smart Hospital are life-sized computerized manikins that actually interact with the learners. Patients include infants, children, adults, and even a mother in labor who goes through the labor process and delivers a newborn. Some manikins are static but others are interactive and responsive—they can speak and breathe, have heart sounds and lung sounds, and can progress through the various stages of numerous clinical states from birth through death. In addition, we have specially trained actors who can serve as patients or family members in clinical teaching scenes. In each clinical scenario, the students are exposed to situations and changes in patient conditions, both subtle and obvious, that they will experience in actual practice. With repeated exposure to these situations, students develop a deeper understanding of clinical conditions and become more adept at critical and clinical thinking. With this foundation, our students move more quickly from novice to expert and in so doing enhance the quality of patient care they provide.

Center for Research and Scholarship

Associate Dean: Dr. Paul J. Fadel

Scholarship is an essential component of the professional role in the College of Nursing. The Center provides support services to faculty and students: identifying funding sources; developing competitive proposals; writing grant applications; retrieving literature; collecting, entering and analyzing data; and disseminating research results and other scholarly products. Collaborative relationships for research with Metroplex health care agencies are in place.

Center for Hispanic Studies in Nursing and Health

The Center is dedicated to fostering an understanding between health care professionals and people of Hispanic origin for the purpose of increasing understanding of health and healing through research of individual experience, cultural meanings, and the structure of institutions as important variables influencing health outcomes. The Center is also committed to the provision of educational programs and services which will assist health care providers to gain the necessary knowledge and skills to deliver increasingly culturally sensitive and competent care. The Center promotes interdisciplinary and interuniversity collaboration as a strategy for development of resources to solve or deal with bi-cultural issues facing health care professionals.

Rural Health Outreach Program

The purpose of the Center is to provide appropriate, affordable, accessible continuing education to the nursing staffs of acute care and psychiatric hospitals, long term care facilities, home health agencies, and other health care facilities in the rural communities of North Central Texas.

Center for Healthy Living and Longevity

Associate Dean: Dr. David Keller

The Department of Kinesiology's Center for Healthy Living and Longevity provides a multidisciplinary approach to improving health throughout the lifespan. Research and education initiatives focus on keeping older adults active, decreasing the incidence of sedentary-related diseases (diabetes, cardiovascular disease, osteoporosis, obesity, etc.), and the assessment and management of concussions. Contact: Dr. David Keller, kellerd@uta.edu.

Programs

BACHELOR’S DEGREES

- Bachelor of Arts in Kinesiology (Sport Leadership and Management) (p. 1082)
- Bachelor of Arts in Physical Education Teacher Education (PETE) (p. 1082)
- Bachelor of Science in Exercise Science - Clinical Health Professions (CHP) (p. 1082)
• Bachelor of Science in Exercise Science - Fitness/Wellness (F/W) (p. 1082)
• Bachelor of Science in Nursing, B.S.N. (p. 1038)
• Bachelor of Science in Public Health (p. 1083)

MASTER'S DEGREES
• Master of Science in Athletic Training (p. 1068)
• Master of Science in Exercise Science (p. 1068)
• Master of Public Health (p. 1068)
• Master of Science in Nursing - Administration, M.S.N. (p. 1027)
• Master of Science in Nursing - Education, M.S.N. (p. 1027)
• Master of Science in Nursing - Nurse Practitioner, M.S.N. (p. 1027)

DOCTORAL DEGREES
• Doctor of Nursing Practice, D.N.P. (p. 1032)
• PhD in Nursing (p. 1032)
• PhD in Kinesiology (p. 1068)

CERTIFICATES
• Gerontology Healthcare Certificate (p. 1034)
• Nurse Educator Certificate (p. 1034)
• Nurse Practitioner, Acute Care Pediatric (p. 1034)
• Nurse Practitioner, Adult Gerontology Acute Care (p. 1034)
• Nurse Practitioner, Adult Gerontology Primary Care
• Nurse Practitioner, Family (p. 1034)
• Nurse Practitioner, Neonatal (p. 1034) – Gainful Employment Disclosure (http://grad.pci.uta.edu/prospective/programs/degrees/gainfulemployment/#neonatal)
• Nurse Practitioner, Pediatric Pediatric (p. 1034)
• Nurse Practitioner, Family Psychiatric/Mental Health (p. 1034)
• Graduate Certificate of Public Health Studies (p. 1080)
• Telehealth and Health Informatics (p. 1048)

Elizabeth Merwin, PhD, RN, FAAN
Dean & Professor

Kathryn Daniel, PhD, RN, A/GNP-BC, GS-C, AGSF, FAAN
Associate Dean, Academic Affairs, Nursing & Associate Professor

Paul Fadel, PhD
Associate Dean, Research & Professor

David Keller, PhD
Associate Dean & Chair, Kinesiology & Professor

Kimberly A. Siniscalchi, DNP, RN, FAAN
Professor of Practice

Candice Calhoun-Butts, PhD
Assistant Dean, Enrollment and Student Services

Lalita Thompson, B.A.
Assistant Dean, Administrative Affairs

John Gonzalez, DNP, RN, ACNP-BC, ANP-C
Chair, Graduate Nursing & Assistant Clinical Professor

Jeanne Boyd, DNP, RN
Chair, Undergraduate Nursing & Assistant Clinical Professor
NURS 2200. CONCEPTS IN PROFESSIONAL NURSING. 2 Hours.
Designed to introduce the pre-nursing student to specific professional concepts in nursing. Selected concepts and processes for professional nursing will include an introduction to nursing’s theoretical, philosophical, ethical, and legal dimensions with an emphasis on professional formation. Course activities will focus on development of teamwork, communication skills, effective decision-making and reflective practice.

NURS 2232. LEARNING PROFESSIONAL NURSING AND LIFE SKILLS. 2 Hours.
This course focuses on the development and successful use of time management, test-taking skills, study methods, and additional student success strategies that can support students enrolled in the upper division prelicensure Bachelor of Science in Nursing (BSN) program. Required for students who fail an upper division nursing course. Prerequisite: Admission to the BSN program.

NURS 2300. INTRODUCTION TO PROFESSIONAL AND CLINICAL CONCEPTS IN NURSING. 3 Hours.
Designed to introduce the pre-nursing student to specific professional concepts in nursing as well as academic success strategies. Selected concepts and processes for professional nursing will include an introduction to nursing’s theoretical, philosophical, ethical, and legal dimensions with an emphasis on professional formation. Course activities will focus on development of teamwork, communication skills, effective decision making and reflective practice.

NURS 3100. COOPERATIVE NURSING WORK EXPERIENCE. 1 Hour.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. This course is graded as pass/fail. Prerequisite: Consent of instructor.

NURS 3137. INDEPENDENT STUDY. 1 Hour.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3147. SPECIALIZED TOPICS IN NURSING. 1 Hour.
Areas of special interest. May be repeated with varied topics. Must complete with C or better for credit. Prerequisite: Junior standing and consent of instructor.

NURS 3200. COOPERATIVE NURSING WORK EXPERIENCE. 2 Hours.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. This course is graded as pass/fail. Prerequisite: Consent of instructor.

NURS 3237. INDEPENDENT STUDY. 2 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3247. SPECIALIZED TOPICS IN NURSING. 2 Hours.
Areas of special interest. May be repeated with varied topics. Must earn C or better for credit. Prerequisite: Junior standing and consent of instructor.

NURS 3261. NURSING OF OLDER ADULTS. 2 Hours.
Selected concepts and issues related to aging and its impact on society and health care. Introduction to gerontologic nursing principles. Clinical application in diverse settings across the continuum of care. Prerequisite: NURS 3632, NURS 3320.

NURS 3300. COOPERATIVE NURSING WORK EXPERIENCE. 3 Hours.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. Must earn a C or better to earn credit. Prerequisite: Admission into nursing degree program.

NURS 3309. MEDICAL TERMINOLOGY FOR HEALTHCARE PROVIDERS. 3 Hours.
This course will enable the student to speak, use, and understand commonly used terms in the healthcare field. This course can be used as the upper division elective. Formerly taught as BIOL 3309. Credit will not be given for both.

NURS 3315. RN-BSN HOLISTIC HEALTH ASSESSMENT ACROSS THE LIFESPAN. 3 Hours.
Theory and practice of holistic health assessment of individuals and families across the life span designed for the registered nurse. RN-BSN students only. Prerequisite: or Corequisite NURS 3345.

NURS 3320. HOLISTIC HEALTH ASSESSMENT ACROSS THE LIFESPAN. 3 Hours.
Theory and practice of holistic health assessment of individuals and families across the life span with emphasis on normal findings. Prerequisite: or Corequisite: NURS 3632.

NURS 3321. NURSING RESEARCH. 3 Hours.
Basic concepts, processes and applications of nursing research. Research role of the nurse in decision making and clinical practice. Prerequisite: NURS 3632.

NURS 3325. RN-BSN HOLISTIC CARE OF THE OLDER ADULT. 3 Hours.
Introduction to gerontologic nursing principles and standards. Selected concepts and issues related to aging and its impact on society and health care. RN-BSN students only. Previously listed as NURS 3322. Prerequisite: or Corequisite: NURS 3345.
NURS 3333. PROMOTING HEALTHY LIFESTYLES. 3 Hours.
Focus on health promotion and disease prevention strategies that promote healthy lifestyles and empower individuals, families, and populations to achieve optimal health and wellness. The role of the nurse in health promotion is emphasized. Students will examine the impact of nurses’ overall wellness on patient safety. Prerequisite: Acceptance into the upper division nursing program.

NURS 3335. RN-BSN PROMOTING HEALTHY LIFESTYLES. 3 Hours.
Focus on health promotion and disease prevention strategies that promote healthy lifestyles and empower individuals, families, and populations to achieve optimal health and wellness. The role of the nurse in health promotion is emphasized. Students will examine the impact of nurses’ overall wellness on patient safety. RN-BSN students only. Previously NURS 3435. Prerequisite: NURS 3345.

NURS 3337. INDEPENDENT STUDY. 3 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn a grade of C or better for credit. Prerequisite: Consent of Instructor.

NURS 3344. ENHANCING NURSING PRACTICE AND SAFETY WITH HISPANIC PATIENTS THROUGH BETTER COMMUNICATION. 3 Hours.
Explores and augments the understanding of factors which facilitate or inhibit effective communication with Spanish-speaking clients. Focus on vocabulary specific to assessment and intervention with persons whose primary language is Spanish.

NURS 3345. ROLE TRANSITION TO PROFESSIONAL NURSING. 3 Hours.
Course addresses the role transition to Professional Nursing, nursing theory, ethics, decision making, critical thinking/clinical judgment, introduction to evidence-based practice, and informatics/technology in practice. Identifies strategies for personal and professional empowerment. Prerequisite: Accepted to RN to BSN program.

NURS 3347. SPECIALIZED TOPICS IN NURSING. 3 Hours.
Areas of special interest. May be repeated with varied topics. Must earn a C or better to earn credit.

NURS 3352. THE LEGACY OF THE FAMILY. 3 Hours.
Explore and enhance understanding and application of the principles of family science knowledge in therapeutic relationships with families across the lifespan.

NURS 3365. PHARMACOLOGY IN NURSING PRACTICE. 3 Hours.
Introduction to current concepts of pharmacology and their relationship to nursing practice. Included are basic principles of drug actions, side effects for major drug classifications, and the role of the nurse in drug therapeutics. Must be taken no more than three years prior to acceptance into the nursing program. Prerequisite: BIOL 2457, BIOL 2458, CHEM 1451.

NURS 3366. PATHOPHYSIOLOGIC PROCESSES: IMPLICATIONS FOR NURSING. 3 Hours.
Pathophysiologic alterations, their interactions, and effects on persons across the life span as a basis for therapeutic nursing interventions. Must be taken no more than three years prior to acceptance into the nursing program. Prerequisite: BIOL 2457, BIOL 2458, CHEM 1451.

NURS 3375. RN-BSN HEALTH POLICY, LEGAL ASPECTS AND INFORMATICS IN NURSING. 3 Hours.
This course provides an introduction to legal and ethical concepts, values, and behaviors necessary for transitioning to a professional nursing role. Topics include health care policy development, legal overview and peer-review process, health care informatics, economic and political issues, laws, rules, challenges, boundaries, malpractice and societal issues and trends influencing health care. Prerequisite: NURS 3345.

NURS 3381. PSYCHIATRIC MENTAL HEALTH NURSING OF INDIVIDUALS, FAMILIES, AND GROUPS. 3 Hours.
Application of the nursing process with emphasis on critical thinking, therapeutic nursing interventions, and effective communication and interpersonal skills as they relate to persons with psychiatric mental health conditions. Prerequisite: NURS 3632 and NURS 3320.

NURS 3437. INDEPENDENT STUDY. 4 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3447. SPECIALIZED TOPICS IN NURSING. 4 Hours.
Areas of special interest. May be repeated with varied topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3537. INDEPENDENT STUDY. 5 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3547. SPECIALIZED TOPICS IN NURSING. 5 Hours.
Areas of special interest. May be repeated with varied topics. Must earn C or better for credit. Prerequisite: Junior standing and consent of instructor.

NURS 3632. CLINICAL NURSING FOUNDATIONS. 6 Hours.
Basic therapeutic nursing interventions with individuals and families in diverse settings using nursing process framework. Prerequisite: or Corequisite: NURS 3320.

NURS 3637. INDEPENDENT STUDY. 6 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be offered with any combination of lecture/lab hours. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3647. SPECIALIZED TOPICS IN NURSING. 6 Hours.
Areas of special interest. May be repeated with varied topics. Must earn C or better for credit. Prerequisite: junior standing and consent of instructor.
NURS 3661. NURSING OF ADULTS. 6 Hours.
Application of the nursing process with emphasis on critical thinking, therapeutic nursing interventions, and effective communication for persons experiencing medical-surgical problems. Theory and clinical application in diverse settings. Prerequisite: NURS 3632 and NURS 3320.

NURS 4100. COOPERATIVE NURSING WORK EXPERIENCE. 1 Hour.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. Prerequisite: Consent of instructor.

NURS 4199. ROLE DEVELOPMENT IN PROFESSIONAL NURSING SEMINAR. 1 Hour.
The course addresses professional nursing role development integrating concepts of professional comportment. Prerequisite: NURS 3661, NURS 3381.

NURS 4200. COOPERATIVE NURSING WORK EXPERIENCE. 2 Hours.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. Prerequisite: Consent of instructor.

NURS 4223. PROFESSIONAL NURSING TRENDS. 2 Hours.
Analysis of societal issues and trends influencing health care. Application of ethical, legal, economic, and political concepts. Identification of strategies for personal and professional empowerment. Prerequisite: NURS 4431, NURS 4441, and NURS 4581.

NURS 4300. COOPERATIVE NURSING WORK EXPERIENCE. 3 Hours.
Designed for nursing cooperative education student to integrate classroom study with career-related practical experience in the workplace. Prerequisite: Admission into nursing degree program.

NURS 4323. HEALTH POLICY, LEGAL ASPECTS AND INFORMATICS IN NURSING. 3 Hours.
This course provides an introduction to legal and ethical concepts, values, and behaviors necessary for transitioning to a professional nursing role. Topics include health care policy development, legal overview and peer-review process, health care informatics, economic and political issues, laws, rules, challenges, boundaries, malpractice and societal issues and trends influencing health care. Prerequisite: NURS 4331, NURS 4341, and NURS 4581.

NURS 4325. RN-BSN NURSING RESEARCH. 3 Hours.
Basic concepts, processes and applications of nursing research. Research role of the nurse in decision making and clinical practice. RN-BSN students only. Prerequisite: ENGL 2338 or equivalent, Math 1308 or equivalent, and NURS 3345 or NURS 3645.

NURS 4331. NURSING OF CHILDREN AND ADOLESCENTS. 3 Hours.
Nursing care for infants, children, adolescents, and their families. Theory and clinical application in diverse settings. Prerequisite: NURS 3661, NURS 3381.

NURS 4341. NURSING OF THE CHILDBEARING FAMILY. 3 Hours.
Application of the nursing process with emphasis on critical thinking, communication and therapeutic nursing interventions as related to care of individuals and families during the childbearing experience. Prerequisite: NURS 3381 and NURS 3661.

NURS 4350. CAPSTONE: Transition to Professional Nursing. 3 Hours.
Focus on the synthesis of knowledge acquired throughout the curriculum and the enactment of the professional nurse role in a concentrated practicum. Prerequisite: or Corequisite: NURS 4350, NURS 4462, NURS 4323.

NURS 4351. BSN NURSING LEADERSHIP AND MANAGEMENT. 3 Hours.
Exploration of organizational strategies, leadership theories and societal trends with implications for decision making in health care. Introduction to management skills needed by professional nurses in diverse settings. Prerequisites: NURS 4331, NURS 4341, NURS 4581.

NURS 4393. NURSING CERTIFICATION. 3 Hours.

NURS 4455. RN-BSN NURSING LEADERSHIP & MANAGEMENT. 4 Hours.
Exploration of organizational strategies, leadership theories and societal trends with implications for decision making in health care. Introduction to management skills needed by professional nurses with clinical application in diverse settings. RN-BSN students only. Prerequisite: or Corequisite: NURS 3345.

NURS 4462. POPULATION AND COMMUNITY HEALTH NURSING. 4 Hours.
Integrate knowledge from nursing theory and public health science in assessing health care needs of aggregates, communities, and society. Prerequisite: NURS 4331, NURS 4341, NURS 4581.

NURS 4465. RN-BSN POPULATION AND COMMUNITY HEALTH NURSING. 4 Hours.
Integrates knowledge from nursing theory and public health science in assessing health care needs of aggregates, communities, and society for the Registered Nurse. RN-BSN students only. Prerequisite: NURS 3345.

NURS 4581. NURSING OF ADULTS WITH COMPLEX NEEDS. 5 Hours.
Use of critical thinking, therapeutic nursing interventions and communication skills in promoting quality of life for persons with complex health needs. Application of nursing roles in diverse settings. Prerequisite: NURS 3661, NURS 3381.

NURS 4685. RN-BSN CAPSTONE. 6 Hours.
Synthesis of knowledge acquired in the RN-BSN curriculum and development of the Nurse Role with evolving professional issues, health care environment, lifelong learning, and promotion of the Nursing profession designed for Registered Nurses RN-BSN student only. Prerequisite: NURS 4325, NURS 4455 Corequisite: NURS 4465.
NURS 5110. NEONATAL ASSESSMENT LAB. 1 Hour.
Conduct comprehensive health assessment in the neonatal population. Prerequisite: NURS 5220 or concurrent enrollment or permission of instructor or Certificate Program Standing.

NURS 5112. THERAPY CONCEPTS FOR PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONERS. 1 Hour.
This course provides evidenced based practice principles of non-pharmacological individual, family and group therapies for psychiatric disorders and mental health problems across the lifespan. Prerequisite: NURS 5315, NURS 5410 or concurrent enrollment, NURS 5140 or concurrent enrollment, or Certificate Program Standing.

NURS 5120. ADULT-GERONTOLOGY ASSESSMENT LAB. 1 Hour.
Conduct comprehensive health assessment in the adult-gerontology population. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURS 5130. PEDIATRIC ASSESSMENT LAB. 1 Hour.
Conduct comprehensive health assessment in the pediatric population. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURS 5140. PSYCHIATRIC ASSESSMENT LAB FOR THE PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER. 1 Hour.
Introduces the PMHNP student to the psychiatric mental health assessment applied to the pediatric, adult, and geriatric patient with a mental health disorder through knowledge acquisition and skill development. Prerequisite: NURS 5220, NURS 5120, and NURS 5130, NURS 5410 or concurrent enrollment, NURS 5112 or concurrent enrollment, or Certificate Program Standing.

NURS 5170. INDEPENDENT STUDY IN NURSING. 1 Hour.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, P, R. Prerequisite: Graduate standing.

NURS 5190. TOPICS IN NURSING. 1 Hour.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 5204. NEONATAL NURSING I. 2 Hours.
Clinical management of the high-risk neonate with a focus on the perinatal and transition periods as well as stabilization of the ill newborn at birth. Includes fluid and electrolyte management, nutrition, and identification of the indications and complications associated with invasive skills and procedures relevant to the high-risk neonate. Prerequisite: NURS 5315; NURS 5316 or NURS 5220 or concurrent enrollment and NURS 5110 or concurrent enrollment or Certificate Program Standing.

NURS 5210. NEUROSCIENTIFIC BASES IN PSYCHIATRY AND MENTAL HEALTH. 2 Hours.
This course provides the scientific foundations of neurobiology for various psychiatric disorders and mental health problems across the lifespan. An analysis of the relationships between neurobiology, psychopharmacology and genetics for various psychiatric disorders and mental health problems will be provided. Prerequisite: NURS 5315, NURS 5220, NURS 5120, NURS 5130, or Certificate Program Standing.

NURS 5211. DIAGNOSTIC PRINCIPLES IN PSYCHIATRY AND MENTAL HEALTH. 2 Hours.
This course provides the scientific foundations for diagnostics for various psychiatric disorders and mental health problems across the lifespan. Prerequisite: NURS 5315; NURS 5210 or concurrent enrollment or Certificate Program Standing.

NURS 5212. THERAPY CONCEPTS FOR THE PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER. 2 Hours.
This course provides evidenced based practice principles of non-pharmacological individual, family and group therapies for psychiatric disorders and mental health problems across the lifespan. Prerequisite: NURS 5315; NURS 5210 or concurrent enrollment, NURS 5211 or concurrent enrollment or Certificate Program Standing.

NURS 5213. PSYCHOPHARMACOLOGY FOR THE PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER. 2 Hours.
This course provides advanced study of clinical psycho-pharmacological therapeutics for the psychiatric mental health nurse practitioner. Foundations of advanced psychopharmacology in common and complex mental health disorders and conditions in populations across the lifespan are explored. Prerequisite: NURS 5334, NURS 5410, NURS 5140, NURS 5112, NURS 5222 or concurrent enrollment, NURS 5223 or concurrent enrollment.

NURS 5220. ADVANCED HEALTH ASSESSMENT AND DIAGNOSTIC REASONING. 2 Hours.
Apply theoretical foundations of comprehensive health assessment across the lifespan. Prerequisite: Graduate or Certificate Program Standing. NURS 5315 or Special Permission.

NURS 5222. CHILD, ADOLESCENT, AND SPECIAL POPULATIONS PSYCHIATRIC MENTAL HEALTH FOR THE PMHNP. 2 Hours.
This course provides the scientific foundations and evidence-based practice principles necessary for managing children, adolescents, and special populations (and/or at risk for) various commonly occurring and complex psychiatric disorders and mental health problems as well as comorbid medical illnesses. Prerequisite: NURS 5410, NURS 5213, NURS 5112, NURS 5222 or concurrent enrollment, or Certificate Program Standing.

NURS 5223. ADULT AND GERIATRIC PSYCHIATRIC MENTAL HEALTH FOR THE PMHNP. 2 Hours.
This course provides the scientific foundations and evidence-based practice principles necessary for managing adult and geriatric populations with (and/or at risk for) commonly occurring and complex psychiatric disorders and mental health problems as well as co-morbid medical illnesses. Prerequisite: NURS 5410, NURS 5140, NURS 5213 or concurrent enrollment, NURS 5222 or concurrent enrollment, or Certificate Program Standing.

NURS 5270. INDEPENDENT STUDY IN NURSING. 2 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, P, R. Prerequisite: Graduate Standing and permission of instructor.
NURS 5290. TOPICS IN NURSING. 2 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 5302. CURRICULUM DEVELOPMENT IN NURSING EDUCATION. 3 Hours.
Explore the nature of nursing education. Focus on the curriculum process and its application to nursing education programs. Prerequisite: Graduate standing.

NURS 5308. NURSING INFORMATICS. 3 Hours.
Focus on application of computer technology that supports the dissemination of health care data, information and knowledge. Selected software packages/applications are presented and used. Prerequisite: NURS 5367.

NURS 5310. TEACHING AND LEARNING THEORIES AND STRATEGIES IN NURSING EDUCATION. 3 Hours.
Teaching/Learning theories, strategies, and evaluation for educators. Prerequisite: Graduate standing.

NURS 5311. NURSING MANAGEMENT IN THE HEALTH CARE ENVIRONMENT. 3 Hours.
Considers development of management and organizational theories as applied to health care organizations and their environment. Prerequisite: NURS 5367.

NURS 5312. ASSESSMENT AND EVALUATION STRATEGIES IN NURSING EDUCATION. 3 Hours.
Integration of concepts of assessment and evaluation into a nursing evaluation framework. Prerequisite: Graduate standing.

NURS 5313. CLINICAL PROCEDURES FOR ADVANCED PRACTICE NURSES. 3 Hours.
A theory and clinical procedures course designed for the Advanced Practice Nurse to acquire skills and procedures in the clinical management of selected patients. Prerequisite: NURS 5220; NURS 5120; NURS 5130 or concurrent enrollment and NURS 5334 or Certificate program standing.

NURS 5315. ADVANCED PATHOPHYSIOLOGY. 3 Hours.
Builds on a previous understanding of anatomy and physiology and focuses on developing advanced knowledge of physiologic and pathophysiologic concepts across the life span. Prerequisite: Graduate Standing.

NURS 5318. ADVANCED PATHOPHYSIOLOGY FOR NURSE EDUCATORS. 3 Hours.
This course develops advanced knowledge of pathophysiology. Principles of advanced physiology and pathophysiology are applied to disease processes, plans of care, and teaching plans. This course prepares Nurse Educators to educate clients, students, colleagues to facilitate patients and/or their support systems understanding of the disease process plan of care. Prerequisite: NURS 5367 and NURS 5310 and NURS 5329 and NURS 5302 and NURS 5312.

NURS 5319. ADVANCED PHARMACOLOGY FOR NURSE EDUCATORS. 3 Hours.
This course develops advanced knowledge of clinical pharmacological therapeutics through the evaluation of classes of drugs and pharmacologic plans of care. This course prepares Nurse Educators to educate clients, students, and colleagues to facilitate patients and/or their support systems understanding of the pharmacologic plan of care. Prerequisite: NURS 5318.

NURS 5322. CHILD, ADOLESCENT AND GERIATRIC PSYCHIATRIC MENTAL HEALTH FOR THE PSYCH NP. 3 Hours.
This course provides the scientific foundations and evidenced based practice principles necessary for managing children, adolescents, and geriatric populations with (and/or at risk for) various commonly-occurring and complex psychiatric disorders and mental health problems and comorbid medical illnesses. Prerequisite: NURS 5210 and NURS 5211. NURS 5212 or concurrent enrollment or Certificate Program Standing.

NURS 5323. ADULT PSYCHIATRIC MENTAL HEALTH FOR THE PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER. 3 Hours.
This course provides the scientific foundations and evidence based practice principles necessary for managing adults with (and/or at risk for) commonly occurring and complex psychiatric disorders and mental health problems as well as co-morbid medical illnesses. Prerequisite: NURS 5210 and NURS 5211. NURS 5212 or concurrent enrollment; NURS 5322 or concurrent enrollment or Certificate Program Standing.

NURS 5324. PSYCHIATRIC MENTAL CLINICAL PRACTICE I. 3 Hours.
This course provides application of theoretical knowledge and clinical skills to patients with commonly occurring psychiatric and mental health disorders across the life span in the context of advanced nursing practice. Prerequisite: NURS 5222 and NURS 5223 or Certificate Program Standing. Good academic standing (GPA 3.0).

NURS 5325. PSYCHIATRIC MENTAL HEALTH CLINICAL PRACTICE II. 3 Hours.
This course provides application of theoretical knowledge and clinical skills to patients with various commonly occurring and complex psychiatric and mental health disorders across the life span in the context of advanced nursing practice. Prerequisite: NURS 5324 or concurrent enrollment, or Certificate Program Standing. Good academic standing (GPA 3.0).

NURS 5327. EXPLORATION OF SCIENCE AND THEORIES FOR NURSING. 3 Hours.
This course provides a critical examination of the philosophical and theoretical bases for nursing science. Prerequisite: Graduate standing.

NURS 5329. ROLE OF THE NURSE EDUCATOR. 3 Hours.
Investigation of the roles and functions of the nurse educator. Prerequisite: Graduate program standing.

NURS 5333. FAMILY I. 3 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on pediatric wellness, women's health, men's health, and geriatrics concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 and NURS 5313 or Certificate Program Standing.
NURS 5334. ADVANCED PHARMACOLOGY FOR NURSE PRACTITIONERS. 3 Hours.
Study of clinical pharmacological therapeutics for advanced nursing practice. Prerequisites: NURS 5315 or Certificate Program Standing.

NURS 5335. FAMILY II. 3 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of commonly occurring conditions seen in primary care patients across the lifespan. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 and NURS 5313 or Certificate Program standing.

NURS 5336. FAMILY III. 3 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on adult wellness, psychiatric, and cardiometabolic concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 and NURS 5313 or Certificate Program standing.

NURS 5337. FAMILY CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the family nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5432, NURS 5433, NURS 5434 and Good academic standing (GPA 3.0) or certificate program standing.

NURS 5338. FAMILY CLINICAL PRACTICE 2. 3 Hours.
Continued clinical preceptorship with opportunities for increased clinical knowledge in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the family nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5432, NURS 5433, NURS 5434, NURS 5337 or concurrent enrollment; Good academic standing (GPA 3.0) or Certificate Program standing.

NURS 5339. ROLES AND FUNCTIONS OF THE NURSE ADMINISTRATOR. 3 Hours.
Examine and implement administrative and managerial roles in health care organizations. Prerequisite: NURS 5311.

NURS 5340. MANAGEMENT SEMINAR AND PRACTICE. 3 Hours.
Synthesize management, organizational, and leadership concepts and theories in selected health care settings. Prerequisite: NURS 5308; NURS 5311; NURS 5339; NURS 5341; NURS 5343; NURS 5342; NURS 5382. Good Academic Standing (3.0 GPA).

NURS 5341. FINANCIAL MANAGEMENT IN NURSING. 3 Hours.
Analyze and apply financial management concepts to financial planning, budgeting, and reimbursement systems in health care. Prerequisite: NURS 5311.

NURS 5342. MANAGEMENT OF NURSING OPERATIONS. 3 Hours.
Examine strategic planning for health care systems. Prerequisite: NURS 5311.

NURS 5343. NURSING LEADERSHIP AND COMPLEX HEALTH CARE SYSTEMS. 3 Hours.
Analyze leadership strategies in current and predicted health care systems including dimensions of workforce and workplace issues, leadership, and evidenced-based decision-making. Prerequisite: NURS 5367.

NURS 5344. NURSING CARE AT THE END OF LIFE. 3 Hours.
Addresses concepts of palliative care of patients with life limiting disease and their families. Explores the physiology of end stage disease processes, clinical approaches to pain and symptom management, societal issues and trends in end of life care, models of care delivery and the impact of personal values and beliefs about death. Prerequisite: Graduate Standing.

NURS 5350. ROLE OF THE NURSE IN ADVANCED PRACTICE. 3 Hours.
Theory and application of the multiple roles of the advanced practice nurse within the health care system. Prerequisite: Graduate Standing.

NURS 5352. ADULT GERONTOLOGY PRIMARY CARE CLINICAL PRACTICE 1. 3 Hours.
Clinical experience in primary and long term health care settings with focus on managing adolescents, adults, and elders with common episodic acute and chronic health care needs. Prerequisite: NURS 5462 or concurrent enrollment; Good academic standing (GPA 3.0) or certificate program standing.

NURS 5353. ADULT GERONTOLOGY PRIMARY CARE CLINICAL PRACTICE 2. 3 Hours.
Continued clinical experience in primary and long term health care settings with focus on managing adolescents, adults, and elders with common episodic acute and chronic health care needs. Prerequisite: NURS 5462 and NURS 5352 or concurrent enrollment and Good academic standing (GPA 3.0) or certificate program standing.

NURS 5354. ADULT GERONTOLOGY ACUTE CARE CLINICAL PRACTICE 1. 3 Hours.
Clinical experience in specialty practice and high acuity health care settings with focus on managing adolescents, adults, and elders with common secondary and tertiary health care needs. Prerequisite: NURS 5463 or concurrent enrollment and Good academic standing (GPA 3.0) or certificate program standing.

NURS 5355. ADULT GERONTOLOGY ACUTE CARE CLINICAL PRACTICE 2. 3 Hours.
Continued clinical experience in specialty practice and high acuity health care settings with focus on managing adolescents, adults, and elders with common secondary and tertiary health care needs. Prerequisite: NURS 5354 or concurrent enrollment; Good academic standing (GPA 3.0) or certificate program standing.

NURS 5356. GLOBAL HEALTH POLICY, HEALTH LITERACY, AND MODELS OF CARE FOR OLDER ADULTS. 3 Hours.
This course will focus on healthcare policy issues and models of healthcare delivery for older adults at the state, national and global levels. Prerequisite: Graduate Standing.
NURS 5357. ADVANCED CLINICAL MANAGEMENT OF OLDER ADULTS WITH COMPLEX MULTIMORBIDITY. 3 Hours.
This course will focus upon an inter-professional approach to develop advanced knowledge in the chronic health care management of older adults, their families, and communities in a variety of health care settings. Prerequisite: Graduate Standing or permission of instructor.

NURS 5358. ADVANCED CLIN MGMT OF OLDER ADULTS W/COMPLEX MULTIMORBIDITY DURING ACUTE ILLNESS CRISIS. 3 Hours.
This course will focus upon an inter-professional approach to develop advanced knowledge in aging issues and paradigms of care for the older adult; in addition, this course will accentuate the management of older adults with acute health problems, their families, and communities in a variety of health care settings. Prerequisite: Graduate Standing or permission of instructor.

NURS 5360. SIMULATION APPLICATION IN NURSING. 3 Hours.
Application of and active learning strategies in nursing education. Prerequisite: NURS 5367, NURS 5220.

NURS 5362. TEACHING PRACTICUM. 3 Hours.
Nursing education preceptorship in selected health care sites with opportunities to apply clinical and educational knowledge, skills, and concepts in a guided, progressive context of nursing education. Graded F,R,P,W. Prerequisite: Completion of all courses in the Nursing Education Program and Good academic standing (GPA 3.0).

NURS 5366. PRINCIPLES OF RESEARCH IN NURSING. 3 Hours.
This course focuses on integration of theoretical and empirical principles of nursing research to generate evidence for nursing practice. Prerequisite: Graduate Standing.

NURS 5367. EVIDENCE BASED PRACTICE. 3 Hours.
Preparation to lead evidence-based practice teams, to interpret best evidence, to plan for change, to evaluate outcomes, and to disseminate the project. Prerequisite: Graduate standing; NURS 5366 and NURS 5327.

NURS 5370. INDEPENDENT STUDY IN NURSING. 3 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F,R,P,W. Permission of instructor. Graduate standing.

NURS 5371. PEDIATRIC PRIMARY CARE CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5465. Good academic standing (GPA 3.0) or Certificate program standing.

NURS 5372. PEDIATRIC PRIMARY CARE CLINICAL PRACTICE 2. 3 Hours.
Continue clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5371 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate Program Standing.

NURS 5373. PEDIATRIC ACUTE CARE CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected acute and chronic care health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric acute care nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5467 or concurrent enrollment. NURS 5466 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURS 5374. PEDIATRIC ACUTE CARE CLINICAL PRACTICE 2. 3 Hours.
Continue clinical preceptorship in selected acute and chronic care health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5466; NURS 5373 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURS 5380. INDEPENDENT STUDY IN RESEARCH. 3 Hours.
Detailed study and participation in a faculty sponsored research project. Topic and mode of study are agreed upon by the student and instructor prior to registration. Permission of instructor. Graded F,R,P,W.

NURS 5382. NURSING AND HEALTH CARE POLICY: ISSUES AND ANALYSIS. 3 Hours.
Analyze historical, current, and predicted national, state, and local health care policy processes. Prerequisite: NURS 5367.

NURS 5388. STATISTICS FOR HEALTH CARE. 3 Hours.
This course provides students with the basic knowledge and skills to effectively use biostatistics in different research design and data analysis, and to understand articles in related professional journals. Topics include choosing correct statistical methods and study designs in nursing research and practice; descriptive statistics; probability and probability distributions; estimation and hypothesis testing, simple linear regression, introduction to analysis of variance and an introduction to the use of statistical software packages. Prerequisite: Undergraduate Statistics.

NURS 5390. TOPICS IN NURSING. 3 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 5392. GENOMICS AND NANOTECHNOLOGY IN HEALTH CARE PRACTICE. 3 Hours.
Genomics and nanotechnology are emerging as principal drivers to improve human diagnosis and treatment modalities. This course is designed to introduce tools used in these fields. Health care outcomes, in relation to innovations produced from these fields, will be described. Prerequisite: Graduate standing.
NURS 5393. ADVANCED CLINICAL NURSING PRACTICE I. 3 Hours.
Development of advanced knowledge base of specialized clinical concepts and the application of this knowledge in selected clinical areas. Prerequisite: Graduate standing.

NURS 5395. HEART FAILURE PATHOPHYSIOLOGY AND EXERCISE REHABILITATION. 3 Hours.
The goal of this course is to provide students with fundamental knowledge related to heart failure (HF) pathophysiology, and the role of evidence based exercise rehabilitation to improve overall health related physical fitness and quality of life. Prerequisite: Graduate Standing or Approval of Instructor.

NURS 5396. CURRENT BIOTECHNOLOGY IN HEALTH CARE. 3 Hours.
The goal of this course is to provide students with fundamental knowledge and current advances of biotechnology in medicine and healthcare, and train them how to apply these new technologies in their pertinent fields. Prerequisite: Graduate Standing. Approval of instructor.

NURS 5397. ETHICAL RESEARCH AND THE PROPOSED IRB/IACUC PROTOCOL. 3 Hours.
Ethical research practices that the learner will be able to demonstrate through a written research protocol using good clinical practice (GCP) to ensure protection of subjects/animals. Related topics include social-behavioral and biomedical research certifications, and issues related to scientific misconduct. Prerequisite: Graduate standing or permission of instructor.

NURS 5398. THESIS. 3 Hours.
Graded F,R.

NURS 5410. INTRODUCTION TO PSYCHIATRIC MENTAL HEALTH FOR THE PMHNP. 4 Hours.
This course provides the neuroscientific foundations for various psychiatric disorders and mental health problems across the lifespan. An analysis of the relationships between the neurobiology, neurophysiology, genetic, and epigenetic aspects of various psychiatric disorders and mental health problems will be explored. Prerequisite: NURS 5315, NURS 5220, NURS 5120, NURS 5130, or Certificate Program Standing.

NURS 5432. FAMILY I. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on pediatric wellness, women’s health, men’s health, and geriatrics concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURS 5433. FAMILY II. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of commonly occurring conditions seen in primary care patients across the lifespan. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURS 5434. FAMILY III. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on adult wellness, psychiatric, and cardiometabolic concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURS 5447. NEONATAL NURSING III. 4 Hours.
This course focuses on advanced concepts of pharmacological and technological therapies and evidence based knowledge for the management of designated complex acute and chronic health problems affecting infants (birth to 2 years of age) and their families including ethical issues. Prerequisite: NURS 5537 or Certificate Program Standing.

NURS 5450. NEONATAL NP CLINICAL PRACTICE. 4 Hours.
Integration of clinical management of the high-risk neonate through clinical preceptorships in selected health practice sites with application of knowledge, skills and concepts in a guided, progressive context of advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisites: NURS 5334 and NURS 5316 or NURS 5220 and NURS 5110 and NURS 5204 and NURS 5537 or concurrent enrollment and Good academic standing (GPA 3.0) or Certificate Program Standing.

NURS 5461. ADULT GERONTOLOGY MANAGEMENT ACROSS THE CONTINUUM OF CARE. 4 Hours.
Foundations of advanced knowledge of common acute and chronic health problems in adolescents, adults, and elders across health care settings. Prerequisite: NURS 5220; NURS 5120 and NURS 5334, and NURS 5367 or concurrent enrollment, or Certificate Program Standing.

NURS 5462. ADULT GERONTOLOGY PRIMARY CARE. 4 Hours.
Focus on an inter-professional approach and the development of advanced knowledge in the primary care management of adults from adolescence through old age, their families, and communities in a variety of health care settings. Prerequisite: NURS 5461 or Certificate Program Standing.

NURS 5463. ADULT GERONTOLOGY ACUTE CARE. 4 Hours.
Focuses on a collaborative, inter-professional approach in the evaluation, diagnosis, and management of adolescents, adults, and gerontological patients who are experiencing acute, critical, and complex chronic illnesses across the continuum of care. Prerequisite: NURS 5461 or Certificate Program Standing.

NURS 5465. PRIMARY PEDIATRIC CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioners management of designated minor acute, chronic and chronic health problems of pediatric patients and their families in primary care healthcare settings. Prerequisite: NURS 5334; NURS 5220; NURS 5130; NURS 5367 or concurrent enrollment.
NURS 5466. PEDIATRIC ACUTE CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner management of designated critical, acute, chronic and complex health problems of pediatric patients and their families in an acute care facility. Prerequisite: NURS 5465.

NURS 5467. PEDIATRIC COMPLEX CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner management of designated acute, chronic and complex health problems of pediatric patients and their families in multiple healthcare settings. Prerequisite: NURS 5465 or concurrent enrollment or Certificate program standing.

NURS 5470. INDEPENDENT STUDY IN NURSING. 4 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Prerequisite: Permission of instructor. Graded F,R,P,W.

NURS 5537. NEONATAL NURSING II. 5 Hours.
This course focuses on advanced concepts of pharmacological and technological therapies and evidence based knowledge for the management of designated complex, acute health problems affecting infants (birth to 2 years of age). Prerequisite: NURS 5204 and NURS 5334 and NURS 5316 or NURS 5220 and NURS 5110; NURS 5367 or concurrent enrollment or Certificate Program Standing.

NURS 5610. NEONATAL NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of neonatal advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: NURS 5447 and NURS 5450. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5640. ADULT GERONTOLOGY ACUTE CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of adult gerontology acute care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5640: NURS 5354 and NURS 5355. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5640: NURSC 5354 and NURSC 5355. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5645. ADULT GERONTOLOGY PRIMARY CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of adult gerontology primary care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5645: NURS 5352 and NURS 5353. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5645: NURSC 5352 and NURSC 5353. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5650. PSYCHIATRIC MENTAL HEALTH NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of family psychiatric mental health care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: NURS 5324 and NURS 5325. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5660. FAMILY NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of Family Primary Care Advanced Nursing Practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5660: NURS 5337 and NURS 5338. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5660: NURSC 5337 and NURSC 5338. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSG: NURSG 5337 and NURSG 5338. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5670. INDEPENDENT STUDY IN NURSING. 6 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Prerequisite: Permission of instructor. Graded F,R,P,W.

NURS 5680. PEDIATRIC ACUTE CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of pediatric acute care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5680: NURS 5373 and NURS 5374. Good Academic Standing (GPA 3.0) or Certificate Program standing. For NURSC 5680: NURSC 5373 and NURSC 5374. Good Academic Standing (GPA 3.0) or Certificate Program standing.

NURS 5685. PEDIATRIC PRIMARY CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of pediatric primary care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5685: NURS 5371 and NURS 5372. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5685: NURSC 5371 and NURSC 5372. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5698. THESIS. 6 Hours.
Graded F, R, P.

NURS 6170. INDEPENDENT STUDY IN NURSING. 1 Hour.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F,R, P.
NURS 6190. SPECIAL TOPICS IN NURSING. 1 Hour.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 6270. INDEPENDENT STUDY IN NURSING. 2 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, R, P.

NURS 6290. TOPICS IN NURSING. 2 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 6301. THEORETICAL EVOLUTION IN SCIENCE. 3 Hours.
Philosophies of science and epistemologies, their influence on knowledge development for nursing practice, and strategies for theory development and analysis. Prerequisite: Graduate standing.

NURS 6302. ISSUES IN STUDying THE HEALTH OF CULTURALLY DIVERSE AND VULNERABLE POPulations. 3 Hours.
Social and cultural factors affecting health among sub-populations defined by age, education, gender, ethnicity, culture, religion, occupation, vulnerability, income and geography. Prerequisite: Graduate Standing. DNP or PhD program.

NURS 6304. MEASUREMENT IN CULTURALLY DIVERSE AND VULNERABLE POPulations. 3 Hours.
Evaluate measurement tools/instruments for studying culturally diverse and vulnerable populations. Prerequisite: NURS 6301, Theoretical Evolution in Science, or permission of instructor. Course is predicated on prior learning related to concept analysis, basic statistics including correlation.

NURS 6305. QUALITATIVE RESEARCH. 3 Hours.
Philosophical foundation for and methodological issues in using qualitative approaches for scientific and knowledge development. Prerequisite: Graduate standing.

NURS 6306. RESEARCH DESIGN. 3 Hours.
Application of advanced nursing research methods to design studies that improve health outcomes in culturally diverse populations. Prerequisites: NURS 6304 or permission of instructor.

NURS 6307. POPULATION HEALTH. 3 Hours.
This course focuses on analyzing determinants of health, then designing health strategies to improve outcomes of populations. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B). 6327 if in DNP Program.

NURS 6308. STATE OF THE SCIENCE: BACKGROUND IN RESEARCH. 3 Hours.
Application of criteria for appraising strengths and weaknesses of published studies; Synthesis of research literature on a selected topic. Prerequisite: Graduate standing.

NURS 6311. MANUSCRIPT DEVELOPMENT FOR PUBLICATION. 3 Hours.
This course provides a frame for which students focus their prose in order to disseminate their work to a broad audience of clinical, education, or research oriented practitioners. This course allows participants to critique peers’ work to enhance their own skills as a peer reviewer, to enhance their career, and support other authors’ writing efforts. The participants will write and explore the differences between peer reviewing and editing by critiquing sample review comments. Prerequisite: Approval of instructor. Doctoral Graduate standing.

NURS 6318. PARAMETRIC STATISTICS FOR HEALTHCARE RESEARCH. 3 Hours.
Advanced knowledge and skills to use biostatistics effectively in different research designs and data analyses. Use of a statistical software package to manipulate datasets and perform statistical analyses. Emphasis will be placed on parametric statistical methods for complex research questions and designs. Prerequisite: Graduate-level introductory statistics course.

NURS 6319. PSYCHOMETRIC AND NONPARAMETRIC STATISTICS FOR HEALTHCARE RESEARCH. 3 Hours.
Basic knowledge and skills to select the appropriate biostatistical analysis for different research designs, analyze data, interpret statistical results, and understand research articles in professional journals. Emphasis will be placed on reliability and validity of instruments commonly used in healthcare; outcome measurement in health care; common research designs in health care research; nonparametric statistics for dependent samples and independent samples; logistic regression; and survival analysis. Prerequisite: Graduate-level introductory statistics course.

NURS 6320. LEADERSHIP IN HEALTH CARE SYSTEMS. 3 Hours.
This course focuses on the DNP nurse influencing health systems change at any level. Prerequisite: Doctoral Standing. Prerequisite or co-requisite with NURS 6327 if full time.

NURS 6321. EPIDEMIOLOGY. 3 Hours.
Introduces the basic principles and biostatistical methods of epidemiology and demonstrates their applicability to population health. Prerequisite: Graduate Standing.

NURS 6322. TRANSLATIONAL RESEARCH. 3 Hours.
This course provides a review of core research concepts as a foundation for evidence appraisal and translation. New practice-based clinical inquiry methods and strategies are explored to promote translation science for application in the DNP role. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B). NURS 6327, NURS 6320.

NURS 6323. EVIDENCE APPRAISAL. 3 Hours.
In this course, students will use analytical methods to critically appraise existing research and literature to select and implement the best evidence for practice. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B). NURS 6327, NURS 6320, and NURS 6322.
NURS 6324. CLINICAL INFORMATION SYSTEMS. 3 Hours.
This course focuses on the selection, assessment, and use of information systems, technology, and data to evaluate and monitor outcomes of care, care systems, and quality improvement. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B) NURS 6327, NURS 6320.

NURS 6326. PROJECT PROPOSAL DEVELOPMENT. 3 Hours.
This course provides the student an opportunity to design an evidence-based process and intervention to improve practice and the practice environment. Prerequisite: Doctoral Standing. NURS 6327, NURS 6307, NURS 6382, NURS 6320, NURS 6322, NURS 6323, and NURS 6324.

NURS 6327. CLINICAL SCHOLARSHIP TO IMPROVE HEALTHCARE OUTCOMES. 3 Hours.
This course will develop clinical scholarship and analytical methods to improve healthcare outcomes. Prerequisite: Graduate Standing; Graduate Level Statistics (with minimum of a B).

NURS 6326. PROJECT PROPOSAL DEVELOPMENT. 3 Hours.
This course provides the student an opportunity to design an evidence-based process and intervention to improve practice and the practice environment. Prerequisite: Doctoral Standing. NURS 6327, NURS 6307, NURS 6382, NURS 6320, NURS 6322, NURS 6323, and NURS 6324.

NURS 6327. CLINICAL SCHOLARSHIP TO IMPROVE HEALTHCARE OUTCOMES. 3 Hours.
This course will develop clinical scholarship and analytical methods to improve healthcare outcomes. Prerequisite: Graduate Standing; Graduate Level Statistics (with minimum of a B).

NURS 6350. LARGE DATABASES. 3 Hours.
This course is designed to educate students on the theoretical framework behind the design, administration, and analysis of population-based health surveys. The focus is on datasets containing health and behavioral variables, but the skills learned are transferable to other areas of research as well. At the conclusion of this course students will be prepared to produce descriptive statistics about a population using data collected under complex survey design. With the collaboration of the instructor, this course culminates in the development, analysis, and reporting of a research conducted using a CDC database.

NURS 6351. DNP PRACTICUM I PRACTICE. 3 Hours.
During this course, students implement evidence-based solutions that influence health outcomes. Prerequisite: NURS 6307, NURS 6320, NURS 6321, NURS 6322, NURS 6323, NURS 6324, NURS 6326, and NURS 6382. DNP status and good academic standing (GPA 3.0).

NURS 6353. DNP PRACTICUM II PRACTICE. 3 Hours.
During this course, students implement and evaluate evidence-based solutions that influence health outcomes. Prerequisite: NURS 6307, NURS 6320, NURS 6321, NURS 6322, NURS 6323, NURS 6324, NURS 6326, and NURS 6382. Good academic standing (GPA 3.0).

NURS 6370. INDEPENDENT STUDY IN NURSING. 3 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, R, P.

NURS 6381. RESEARCH PRACTICUM. 3 Hours.
With the active guidance and under the supervision of an active researcher, the student will complete at least 75 hours of research activities, such as designing studies, seeking IRB and organizational approvals, obtaining informed consent, collecting and analyzing data, conducting laboratory experiments, or disseminating findings. This is practical research experience in preparation for the student's dissertation in the PhD Program in Nursing. Prerequisite: Doctoral standing. By permission of Research Advisor.

NURS 6382. HEALTH CARE POLICY. 3 Hours.
Critique policies and processes to provide leadership in developing and implementing policies and/or regulations that influence institutional, local, state, federal, and/or international healthcare outcomes. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B). NURS 6327 if in DNP program.

NURS 6390. TOPICS IN NURSING. 3 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 6399. DISSERTATION. 3 Hours.
Graded F, R, P. Prerequisite: Admission to candidacy for the Doctor in Nursing degree.

NURS 6470. INDEPENDENT STUDY IN NURSING. 4 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, R, P.

NURS 6490. TOPICS IN NURSING. 4 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 6620. DNP PRACTICUM I. 6 Hours.
During this course, students implement evidence-based solutions that influence health outcomes. Prerequisite: NURS 6307, NURS 6320, NURS 6322, NURS 6323, NURS 6324, NURS 6326, NURS 6327, and NURS 6382. Good academic standing (GPA 3.0).

NURS 6621. DNP PRACTICUM II. 6 Hours.
During this course, students evaluate evidence-based solutions that influence health outcomes. Prerequisite: NURS 6620 and DNP status, Good academic standing (3.0).

NURS 6699. DISSERTATION. 6 Hours.
Graded F, R, P, W. Prerequisite: Admission to candidacy for the Doctor in Nursing degree.

NURS 6699. DISSERTATION. 9 Hours.
Graded F, R, P. Prerequisite: Admission to candidacy for the Doctor in Nursing degree.
NURS 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

Department of Graduate Nursing

MSN Programs (Nurse Practitioner, Nurse Educator, Nurse Administrator, Post Master's Certificate)

Our master's specialty degree prepares students for advanced practice, education and management and research endeavors to address a change in health care landscape. Both full-time and part-time study options are available as well as online and classroom-based programs.

ADMISSION REQUIREMENTS

The applicant for the Master of Science in Nursing (MSN) degree must meet the general requirements of Graduate Admissions.

The College of Nursing and Health Innovation admission criteria are detailed in the MSN Graduate Admission table below. The admission status options are described below.

Unconditional Admission

Applicants must meet all criteria for unconditional admission.

Probationary Admission

Criteria for probationary admission status and minimum GRE scores are listed in the MSN Graduate Admission table below. When admitted on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program. Probationary students are admitted for part-time study only.

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Deferred Status

Deferred decision is granted when a file is incomplete or when a denial decision is not appropriate.

Denial of Admission

An applicant will be denied admission if they have less than satisfactory performance on a majority of admission criteria listed in the MSN Admission Table.

MSN Graduate Admission Table (Nurse Practitioner, Nurse Educator, Nurse Administrator, Post Master’s Certificate)

<table>
<thead>
<tr>
<th>Admission Criteria</th>
<th>Unconditional</th>
<th>Probationary</th>
</tr>
</thead>
<tbody>
<tr>
<td>GPA</td>
<td>3.0 on last 60 hours of courses of the bachelor's degree program (as calculated by Graduate Admission of UTA) for MSN students. 3.0 GPA in master’s degree program for post-master’s certificate students.</td>
<td>2.8-2.99 for MSN students</td>
</tr>
<tr>
<td>GRE(^4) Two highest GRE scores will be used in admission process</td>
<td>Not required</td>

Clinical Experience

1. Two years clinical experience as a Registered Nurse (RN) is required for the MSN in Psychiatric Mental Health NP specialty, Nursing Education, and Nursing Administration.

2. For all high-acuity MSN NP Programs, (Acute Care Pediatrics and Adult Gerontology Acute Care), two years clinical experience as an RN in an acute care setting within the previous five (5) years is required. (Evaluated by the Associate Dean and/or designee.)

3. For the Neonatal NP Program, two (2) years full time clinical experience as an RN in a Level III or IV NICU within the previous five (5) years and current employment (minimum of one shift per week) in a Level III or IV NICU. (Evaluated by the Associate Dean and/or designee).

4. For the MSN in Adult Gerontology Primary Care, Family and Primary Care Pediatrics, no experience is required.

5. International students are required to have two years RN clinical experience in a healthcare system in the United States (or equivalent).

6. Two years clinical experience as an RN in an acute care setting within the previous five (5) years is required for admission to the dual Adult Gerontology Acute and Primary Care Nurse Practitioner track.

7. Two years of clinical experience as a RN in an acute care setting within the previous five (5) years is required for admission to the dual Pediatric Acute and Primary Care Nurse Practitioner track.

Current and unencumbered RN License from Texas, a compact state, or other state board of nursing

Evaluated by Associate Dean or designee

Neonatal Resuscitation Program (NRP)

Required only for the Neonatal Nurse Practitioner Program.

Pediatric Advanced Life Support (PALS)

Required only for the Acute Care Pediatric Nurse Practitioner Program; Neonatal NP applicants may complete the NRP (Neonatal Resuscitation Program).

BSN from ACEN or CCNE Accredited Program

Evaluated by Associate Dean or designee

MSN from an Accredited Program

For post-master's certificate students only. Evaluated by the Associate Dean or designee

Undergraduate Level Statistics

Minimum grade of "C"

Cardiopulmonary Resuscitation

Required for all programs.

1 Minimum undergraduate GPA requirement for unconditional admission is a 3.0 on a 4.0 scale as calculated by Graduate Admissions.

2 If a person does not meet probationary admission requirements, he or she may request review by a Committee of the Graduate Nursing Faculty. The Committee may request completion of coursework and/or additional information to support the individual's petition for admission.

3 If admitted on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program. Probationary students are admitted for part-time study only.

4 Verbal, Quantitative, and Analytical Writing GRE scores will be reviewed and the two highest scores will be considered for the admission process.

5 All graduate nursing students must have an unencumbered Registered Nursing License as designated by the Board of Nursing (BON) for clinical courses. It is imperative that any student whose license becomes encumbered by the BON must immediately notify their department chair. The complete policy regarding encumbered RN license is available online at: http://www.uta.edu/nursing/MSN/unencumbered
For applicants with an undergraduate GPA of 2.8-2.99 on the last 60 hours, but have completed a graduate level degree following the BSN, the GRE is not required.

If a student has master's level coursework, we will consider the information in the review of the applicant.

References or Letters of Recommendation are not required for admission into the MSN Program.

Admission Policy for Individuals Ineligible to Continue Graduate Study

Applicants who are on academic probation or who are ineligible to continue graduate study at another university are ineligible for admission. However, applicants may submit a petition to be reviewed by a Committee of the Graduate Nursing Faculty.

The committee will make a decision regarding admission based on the following:

1. GPA on the last 60 hours of BSN, graduate GPA, GRE scores (if applicable), and English language score (if applicable);
2. Official transcripts from BSN and all universities attended following completion of BSN;
3. A narrative statement from the potential student providing a rationale for their ineligibility in the previous graduate program;
4. A letter of reference from a graduate faculty in the previous program; and
5. A plan for successful study at UT Arlington.

The admission committee reserves the right to ask for additional materials as needed. The committee will make its recommendation regarding admission to the Associate Dean or their designee of the Graduate Nursing Programs.

Post Master's Certificates

Applicants must meet the admission criteria for the MSN degree program in which they are applying and have a bachelor's degree in nursing from a program accredited by the Accreditation Commission for Education in Nursing (ACEN) or the Commission on Collegiate Nursing Education (CCNE) or proof of equivalent education at a foreign institution.

RN to MSN Program

The RN to MSN program will enable outstanding undergraduate students who are registered nurses to satisfy degree requirements leading to a master's degree (MSN) in Nursing Administration, Nursing Education, or Family Nursing Practice while completing their undergraduate studies through the RN to BSN online program. The RN to MSN online program is designed to encourage outstanding registered nurses to complete a master's degree at UT Arlington. It is also intended to decrease the cost of the combined degree and save time for students seeking the BSN and MSN degrees.

ADMISSION REQUIREMENTS

Registered nurses holding an associate's degree in nursing may apply for the RN to MSN program. All applicants must meet the admission criteria prior to being accepted into the graduate program, including completion of all non-nursing courses required for the BSN with the exception of the 6 hours of electives.

The criteria for unconditional admission to the RN to MSN require that applicants meet the standards for graduate admissions as follows:

- Current licensure as a registered nurse (RN)
- Two-years of experience as an RN for the Nursing Administration and Nursing Education program. No RN experience is required for the Family Nurse Practitioner program
- Undergraduate prerequisite courses completed
- Admission GPA of 3.0 or higher

Students who are not admissible under the conditions specified above shall be denied admission to the Fast Track program. However, they may apply to the RN to BSN program via the regular application process, paying all required fees and meeting all admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the program to which application is made. Upon completion of the RN to BSN program, the graduate can apply for the master's program in nursing through the regular application process and must meet all admission criteria.

DNP Program

The Doctor of Nursing Practice Program builds on a foundation of previous advanced practice education in nursing and prepares advanced practice nurse providers who demonstrate leadership, clinical expertise and innovation in problem recognition and resolution. The required courses identified for the DNP curriculum meet the American Association of Colleges of Nursing Essentials for Doctoral Education for Advanced Nursing Practice (AACN, August 2006). Our innovative DNP Program prepares clinical and research leaders to advance nursing and improve health care in our local community and around the world. This program is offered with two formats: accelerated online asynchronous and traditional semester online with synchronous online classes.
ADMISSION REQUIREMENTS

The applicant for the Doctor of Nursing Practice (DNP) degree must meet the general requirements of Graduate Admissions. Applicants with an MSN which prepares them for a role in advanced nursing practice as defined in *The Doctor of Nursing Practice: Current Issues and Clarifying Recommendations* paper, Published by AACN in 2015, are eligible for admission.

The UTA Doctor of Nursing Practice (DNP) Program is open to individuals who have completed their program at an institution accredited by the Commission on Collegiate Nursing Education (CCNE), Accreditation Commission for Education in Nursing (ACEN), National League for Nursing Commission for Nursing Education accreditation (NLN-CNEA), or an equivalent accrediting body, including Board certified Advanced Practice Registered Nurses (APRN's), Nurse Practitioners (NP); Nurse Midwives (CNM); Certified Registered Nurse Anesthetist (CRNA); Clinical Nurse Specialists (CNS); and Nurse Administrators who completed a Master's of Science in Nursing with a Nursing Administration specialty (MSN-ADM).

Master Nursing Education Degree is not eligible for the DNP program.

The DNP Program does not accept course transfers from other DNP programs. All required courses must be completed at UTA.

The College of Nursing and Health Innovation admission criteria are detailed in the DNP Graduate Admission Table below. The admission status options are described below.

**Unconditional Admission**

Applicants must meet all criteria for unconditional admission.

**Probationary Admission**

3.0 to 3.49 on a 4.0 scale

**Provisional Admission**

An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission.

**Deferred Status**

Deferred decision is granted when a file is incomplete or when a denial decision is not appropriate.

**Denial of Admission**

An applicant will be denied admission if they have less than satisfactory performance on a majority of admission criteria listed in the DNP Graduate Admission Table.

APRNs: Current certification by an APRN national certifying board with unencumbered APRN license in any U.S. State or Territory. Students will need to submit a copy of active certification during admission as evidence of clinical hours. 

Administrators: Current National certification as a Nurse Administrator preferred. Applicants must submit a completed and signed practice/clinical hour verification form with school seal or a certified letter on university letterhead verifying the number of MSN clinical/practice hours completed during the program of study. Evaluated by the Associate Dean or designee.

Current NP practice or current Nurse Administrator practice. Evaluated by Admissions Committee.

Current CPR, ACLS, or PALS if required for their Specialty Area. Evaluated by the Associate Dean or designee.

Immunizations required by the College of Nursing. Evaluated by the Associate Dean or designee.

Clear criminal background check, which satisfies the Dallas/Fort Worth Hospital Council and the Texas Board of Nursing. Evaluated by the Associate Dean or designee.

Negative drug screen prior to clinical and research activities in health care agencies. Evaluated by the Associate Dean or designee.

Practice Hours: A minimum of 1000 clinical practice hours are required for the UTA Doctor of Nursing Practice program. Up to 500 clinical/practice hours obtained during the student's MSN program may be applied to the 1000 post-bachelors practice hours. Evaluated by the Associate Dean or designee.

---

1. All DNP Program NP students must have an unencumbered APRN and RN license as designated by the Board of Nursing (BON) for clinical courses. It is imperative that any student whose license becomes encumbered by the BON must immediately notify the Associate Dean for the Graduate Nursing Programs. The complete policy regarding encumbered RN license is available online at: https://www.uta.edu/conhi/_doc/gnurs/MSN_student_handbook.pdf

2. GPA of 3.5 or higher in an earned master's degree in nursing (Master of Science, Master of Arts, Master of Science in Nursing) or a postmaster's Nurse Practitioner (NP) or Nursing Administration (Admin) Certificate from a program or school accredited by the National League for Nursing Accrediting Commission (NLNAC), the Commission on Collegiate Nursing Education (CCNE), or equivalent accrediting body.

Admission Policy for Individuals Ineligible to Continue Graduate Study at Another University:

If potential students are ineligible to continue graduate study at another university and apply to The University of Texas at Arlington DNP Program, they may request to be reviewed by an admission committee. The admissions committee will be composed of (at a minimum):

1. Two representative faculty, and
2. DNP Graduate Advisor

The Admissions Committee will make their recommendation for admission or denial based on the following:

1. Admission materials (GPA on the Master in Nursing or Post-Master's certificate, grade of B or higher in graduate statistics, current vita, and English language score if applicable);

2. A narrative statement from the potential student providing a rationale for their ineligibility at another university; and

3. A plan for successful study at UT Arlington.

The committee reserves the right to ask for additional materials as needed. The admissions committee will make its recommendation of admission or denial to the Graduate Office for the University.

PhD Program

The Doctor of Philosophy in Nursing Program is built on a foundation of prior nursing education and prepares the student for original research and theory development. The PhD in Nursing Program is designed to prepare nurse scientists to meet the health needs of a rapidly changing and culturally diverse
society. The central focus of the PhD in Nursing Program is to prepare researchers and teachers who understand how communities evolve, interact, and change and how they prescribe, understand, and sanction health, illness, and health seeking behaviors.

The PhD in Nursing Program offers two routes of entry: BSN-PhD or MSN-PhD. Potential students should refer to admission criteria below.

**ADMISSION REQUIREMENTS**

The applicant for the Doctor of Philosophy in Nursing (PhD) degree must meet the general requirements of Graduate Admissions and have a Bachelor's degree in Nursing (BSN-PhD entry) or a Master of Science in Nursing degree (MSN-PhD entry) from a program accredited by the Accreditation Commission for Education in Nursing (ACEN) or the Commission on Collegiate Nursing Education (CCNE) or proof of equivalent education at a foreign institution. Applicants must submit to the Office of Graduate Admissions official transcripts from each college or university attended.

**PhD Admission Status Options**

The College of Nursing admission criteria are detailed in the PhD Program Requirements table below. The admission status options are described below.

**Unconditional Admission**

Applicants must meet all criteria for unconditional admission.

**Probationary Admission**

Criteria for probationary admission status are designated in the PhD Program Requirements table below. When on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.

**Provisional Admission**

Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be admitted provisionally.

**Deferred Status**

Deferred decision is granted when a file is incomplete or when a denied decision is not appropriate.

**Denial of Admission**

An applicant will be denied admission if he/she has less than satisfactory performance on a majority of admission criteria listed in the table below. The PhD Admissions Committee will make a recommendation for denial.

1 A student on probation must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.

2 A new goal statement and a new interview are required with every application.

Health Insurance Coverage

All UT Arlington nursing students enrolled in clinical course(s) will be required to provide verification of medical insurance coverage that includes Emergency Department evaluation and follow-up treatment for needle-stick and blood borne disease exposure. This mandatory clinical requirement has been authorized by The University of Texas System Board of Regents.

As such, UT Arlington will not cover initial and follow up treatment for needle-stick injuries and/or exposure to blood borne diseases which may occur while students are enrolled in clinical courses.

While the UT Arlington College of Nursing and Health Innovation recognizes the financial impact this clinical requirement presents for students, we also support the need for students to have health coverage for sudden illness, accidents, emergencies and exposure treatments that may occur in the clinical setting in a variety of clinical agencies.

Fees

Course fee information is available at www.uta.edu/fees. Additional costs beyond tuition, fees and books that may be incurred by a nursing student will include those items listed on the CON website. In addition, some clinical agencies charge a nominal fee for parking passes.

E-mail Accounts

Each student will be provided a UT Arlington e-mail address. Official communications from the College of Nursing will be distributed to this e-mail address and learning management system accounts required by many courses. Students will be held responsible for information distributed in this manner.

MSN Degree Requirements

A degree plan is developed for the student upon admission to the MSN Program. Students are required to have any changes in degree plan approved by a Graduate Academic Advisor prior to registration. A minimum of 36 semester hours, thesis or non-thesis option, is required for the degree. Elective coursework that supports the selected nursing study area must be approved by a Graduate Academic Advisor prior to registration. Students electing the thesis option do not have elective course requirements.

MSN students must complete hours in required courses, nursing specialty area, functional role, and elective(s) depending on specific plan.

**RN to MSN (p. 1038)**

Students who have successfully met the criteria for the RN-MSN undergraduate portion of the program, will be allowed to take two designated graduate courses that can be used to replace 6 hours of upper-division electives in the BSN program. The 6 hours of graduate courses will be counted toward both degrees.
Continuing in the RN to MSN program requires a 3.3 GPA on the three indicator courses. Students who make a 3.3 GPA in the indicator courses and maintain 3.0 each semester are eligible to take the graduate courses when the student is within 12 hours of completing BSN courses. The student completes a short form to indicate the desire to continue in the RN to MSN program and take the graduate courses. There is no need to apply for graduate admission; the graduate application fee and essay are not required. The hours required for them to complete their BSN degree will be adjusted to include the two MSN courses that are replacing upper division electives.

When students complete their undergraduate degree requirements, they may apply for conferral of the BSN degree, while continuing in the RN to MSN program. They will subject to the usual fees for graduation and diplomas. When the student has applied for conferral of his/her undergraduate degree, the responsibility for advising the student will be transferred to a graduate advisor within the College.

**Dual Degree Programs**

**Nurse Practitioner Dual Adult Gerontology Acute and Primary Care Program**

The Adult Gerontology Dual Nurse Practitioner Program prepares students to the acute and primary care nurse practitioner roles. This program provides one with an expanded scope of practice and upon graduation students are eligible for national certification and licensure in both roles.

Applicants must meet the admission criteria for the Master of Science in Nursing, including a minimum of 2 years of RN experience, within the last 5 years, in an acute care setting. Students may not transfer into this program without having the required RN experience.

Electives/Independent Study
Elective courses may be taken in Nursing or other departments of the University. Electives can also be transferred from other universities with the approval of a Graduate Advisor. Independent study offers the student the opportunity to explore topics of special interest.

DNP Degree Requirements
A degree plan is developed for the student upon admission to the DNP Program. Students are required to have any changes in planned program approved by the DNP Graduate Advisor prior to registration. The DNP Program includes 36 semester hours of required courses. Students will complete a Scholarly Project and Clinical Practica.

DNP Project Proposal:
This applies to students who have passed NURS 6326. To ensure timely completion of the degree program, a student unable to implement their planned project will be enrolled in DNP Practicum 6331 to have faculty supervision for developing a new project proposal. Students will be able to start earning practicum hours up to a maximum of 180 hours and will complete a project proposal to be implemented in NURS 6620. It is the student’s responsibility to notify the DNP program director and Academic Adviser if they have lost their job or otherwise are unable to complete the project at their work site.

PhD Degree Requirements
Students are required to have each semester’s planned program approved by the Graduate Advisor prior to registration. A minimum of 45 semester hours is required for the degree.

BSN-to-PhD Students will complete all PhD requirements.

**ACADEMIC STANDING**

To graduate from the PhD program, the student must have a 3.0 GPA.

1. Student who does not earn at least a B in a course or independent study is required to submit to graduate advisor an evaluation of his or her engagement in the course, reason for less than satisfactory performance, and plan to acquire knowledge and skills to continue.
2. Student who earns a second course or independent study grade that is C or lower will be dismissed from the program

**PROGRAM MILESTONES**

**Diagnostic Evaluation**

Before the completion of the first 18 hours beyond appropriate master's level coursework to assess progress and potential for completion

**Comprehensive Examination**

Examination scheduled no earlier than during the last nine hours of coursework. It may also be scheduled after all coursework and research tools are completed. Guidelines for the comprehensive examination are available in the PhD Student Handbook.

**Proposal Defense**

Dissertation Committee reviews the study proposal and meets with the student privately to approve or not approve the proposal.

**Dissertation Defense**

Open meeting during which student presents study findings and responds to questions posed by the dissertation committee and other attendees. Successful defense of the dissertation is the final step toward completion of the doctoral degree.

**BSN-to-PhD Master's Level Courses**

Students accepted into the BSN-to-PhD entry option will work with an advisor to develop individualized degree plans based on their career goals and research interests. Students will complete 12 hours of core master's courses and an additional 10-18 hours of master's coursework based on their area of focus.

**CORE MASTER'S COURSES TAKEN BY ALL BSN-TO-PHDS**

Post-Master's Certificate Requirements

Post-Master's Certificate applicants must meet the admission criteria for the MSN degree program in which they are applying and must complete the required courses for the nursing specialty area and functional role.

Post-Master's Nursing Administration Certificate

Post-Master's Certificate applicants must complete the required courses included in the Master of Nursing Administration graduate degree program. The Post Master's Nursing Administration Certificate enables individuals with a master's degree in Nursing to advance in professional roles of nursing administration as well as provide a pathway toward doctoral programs in nursing practice.

The MSN Administration core courses may be taken in the Accelerated Online format only, or an equivalency course with credit hours transferred to UTA. Required courses will be determined by a Gap Analysis completed by the program director.

Post-Master's Nurse Practitioner Certificate

The nurse practitioner certificate enables individuals with a Master's Degree in Nursing to take a national certification exam in their area of specialization and to be recognized by the Board of Nursing as an Advanced Practice Registered Nurse. Required courses will be determined by a Gap Analysis completed by the program director.

Department of Undergraduate Nursing

Bachelor of Science in Nursing Degree

The undergraduate nursing degree consists of two programs: pre-licensure BSN and post-licensure RN to BSN or RN to MSN. We offer two delivery options: traditional Campus Based (CB) Program and Accelerated Online (AO) Program. The Accelerated Online Program (AO BSN and AO RN-BSN) is an online format developed by UT Arlington’s College of Nursing to serve nurses in Texas and beyond by offering high quality, affordable, and convenient nursing programs. AO outside of Texas is for the RN to BSN or RN to MSN students only. As there are some differences in policies between the programs, there may also be differences between the CB program and the AO Program; those will be noted throughout the catalog.

The faculty of the College of Nursing takes academic honesty and ethical behavior very seriously. Nurses are entrusted with the health, safety and well-being of the public. Students found guilty of academic dishonesty will be punished to the full extent permitted by the rules and regulations of UT Arlington.

BSN (Preliminary) Program

This is a program consisting of nursing courses, university core courses and other required prerequisite courses. Upon successful completion of the program, the student is awarded the Bachelor of Science in Nursing degree and is eligible to take the National Council Licensure Examination (NCLEX) for licensure as a Registered Nurse. This program is offered as a campus based or accelerated online option.

RN to BSN Program

This program is designed for Registered Nurses who have completed an accredited Associate Degree or Diploma nursing program. Full-time students may complete the Upper-Division nursing courses in one academic year. Upon successful completion of the program, the student is awarded the Bachelor of Science in Nursing degree. This is offered as a campus based or accelerated online option.

RN to MSN Program (Nursing Administration, Nursing Education or Nurse Practitioner)

The RN to MSN Program is an option for RNs who want to move seamlessly between the RN to BSN program and the MSN program. The university calls this a Fast-Track program. The Fast-Track RN to MSN program will enable outstanding undergraduate students who are registered nurses to satisfy degree requirements leading to a Bachelor of Science in Nursing (BSN) and master’s degree (MSN) in Nursing Administration, Nursing Education, or Nurse Practitioner.

Undergraduate Outcomes - For the BSN Degree

The University of Texas at Arlington Undergraduate Nursing Program prepares graduates to provide professional nursing care to persons/clients (individuals, families, groups, and communities) in diverse settings through the roles of provider of care, coordinator of care, and member of the profession.

On completion, the graduate will be able to:

• Apply the art and science of nursing using current evidence in the delivery of competent, culturally sensitive, developmentally appropriate holistic care.
• Utilize analytical, systematic, and critical reasoning for clinical judgment and nursing decision-making.
• Demonstrate accountability and responsibility for: optimal nursing care, legal and ethical standards, lifelong learning, professional development, promoting the nursing profession, and participating as a citizen in society.
• Collaborate and communicate respectfully and effectively with persons/clients and interdisciplinary teams using oral, nonverbal, written and electronic communication to promote and maintain optimal health outcomes to persons/clients.
• Demonstrate ethical behaviors and conflict management skills that inspire others and create effective working relationships to shape and implement change.
• Coordinate human and material resources in providing comprehensive, efficient, and cost-effective care to persons/clients.
• Articulate the importance of active and intentional life-long learning that includes self-reflection and awareness.
• Utilize standards of practice to provide safe nursing care in all patient care settings with an awareness of one’s role in preventing errors and promoting quality improvement.
• Access and utilize information and computer sciences to perform nursing functions.

BSN Preliminary Program

Core Performance Standards for Admission and Progression in the College of Nursing

It is the philosophy of the University of Texas at Arlington College of Nursing (UTACON) that the baccalaureate program is designed to prepare a competent, self-directed, general practitioner of nursing who can assume increasing responsibility and leadership in the delivery of nursing care. In
consideration of the preparation of a general practitioner, all individuals who apply for admission and are enrolled in the undergraduate program must be able to perform the essential functions of a student of nursing.

The College of Nursing has identified essential nursing skills: communication, cognitive, motor and sensory, observation, tactile, hearing, smell, psychomotor and ethical and professional integrity. The student enrolled in the program must demonstrate mastery of these components. Because providing direct patient care is physically demanding, students need to meet the physical requirements of a staff nurse in the same setting in which they are completing a clinical rotation. Upon BSN program acceptance, students must attest to their ability to meet these standards with or without an accommodation. If at that time a student requests an accommodation, the OSD and the CON must determine if the accommodation is reasonable PRIOR to the student beginning Upper-Division coursework.

If a student requires an accommodation to meet these standards, then within five (5) business days of being accepted into the BSN program, and in order to prevent a delay in the start of the programs, the student must contact OSD to initiate the review process.

Qualified applicants are admitted without discrimination with regard to race, color, national origin or ancestry, gender, age, religion, sexual orientation, veteran status or disability (reasonable accommodations will be made within the Americans with Disabilities Act guidelines).

More detailed information is available in the UG Nursing Policy Library http://www.uta.edu/conhi/students/policy/index.php (https://na01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.uta.edu%2Fconh%2Fstudents%2Fpolicy%2Findex.php&data=02%7C01%7Chwoods%40uta.edu%7Ca22f4ae411c944090a3408d6982d924d%7C7C5c5b43d7be4ca8173729e3b0a62d9%7C0%7C0%7C636863718822037407&sdata=R5nEuXM%2BlsDT%2Fpy4ZcoHjx9nhhDvhdHiJMeq%2Fqhvc%3D&reserved=0)

ADMISSION REQUIREMENTS

Students may be admitted to UT Arlington upon meeting the admission requirements established by the University. Students who designate themselves as nursing majors will be advised by the College of Nursing in the Office of Enrollment and Student Services. Official transcripts must be submitted to the UT Arlington Office of Admissions, Records and Registration.

NOTE: All freshmen are advised by University College. A designated College of Nursing advisor will advise students in the Freshman Nursing Scholars Program.

BSN students desiring admission to the sequence of upper-division nursing courses leading to the degree of Bachelor of Science in Nursing must:

• Submit College of Nursing application and official transcripts by January 15 for following fall semester or June 1 for following spring semester.
• Complete with a C or better all specified nursing prerequisites and prenursing courses (N2300 Introduction to Professional and Clinical Concepts in Nursing or N2200 Concepts in Professional Nursing; N3366 Pathophysiology Processes: Implications for Nursing, and N3365 Pharmacology in Nursing Practice) prior to starting Junior I nursing courses. (See lower-division course list for details.) Both N3365 and N3366 must be taken within 3 years of starting the nursing program.
• Complete all 4 Natural Sciences.
• Have 2 GPAs calculated: science and overall prerequisite.
• Have minimum science and prerequisite GPAs of 2.75.
• Completion of designated sections of the Test of Essential Academic Skills (TEAS) with a score in the proficient range (58.7 - 77.3) for each of the following sections:
  • Reading
  • Math
  • Science
  • English and Language Usages

Admission to Junior level (upper-division course work) is by ranking order based on space availability. A student who accepts their spot, but decides not to start will get 2 (two) times to do this before they must wait 1 year (two application cycles) to reapply.

Additional consideration will be given to applicants who complete the following by the application deadline:

• Thirty (30) or more required College of Nursing prerequisite lower division credit hours earned at UT Arlington
• Twelve (12) or more required College of Nursing prerequisite lower-division natural science credit hours earned at UT Arlington.
• Nine (9) hours of UT Arlington ROTC courses (Must be active in ROTC) (Campus Based only)
• Previous baccalaureate, masters or doctorate degree earned in the United States or international degree approved by UTA Office of Admissions.
• Veteran, including Reservist and National Guard
• First-time full-time freshman if all four Natural Sciences and all three prenursing courses are completed at UTA. N2300 Intro to Professional Nursing/ N2200 and N1131 Concepts in Professional Nursing and N3366 Pathophysiology Processes: Implication for Nursing must be completed by application deadline and N3365 Pharmacology in Nursing Practice in the semester following the application.
• Complete N3365 or N3366 with a B or higher on first attempt prior to the application deadline. Note: If both courses are completed with a grade of B or higher of the first attempt prior to the application deadline, students will receive priority rather than the additional consideration.

NOTE: Students entering the AO BSN program must complete all prerequisites including the Upper-Division elective prior to beginning the program. Priority will be given to off-campus AO applicants employed by partner hospital systems offering clinical sites during that semester of admission. Partner hospital clinical sites vary each semester. To receive AO priority, an applicant must be employed at the time of application through the first day of class. For consideration, applicants must submit documentation of employment at time of application. Employment at a partner hospital is not a guarantee of admission into the upper-division nursing program. Students that complete both N3365 and N3366 prior to the application deadline with a grade of B of better of the first attempt will also receive priority in the application for either the campus-based or accelerated online program.

TOEFL REQUIREMENT
Applicants must receive a minimum score, as defined by the University, on the Test of English as a Foreign Language (TOEFL) if the applicant's native/first language is not English and if he or she does not hold a bachelor's or higher degree from an accredited U.S. institution. The exam is required for admission to the College of Nursing even if the student has met one of the stated University exemptions for the TOEFL.
Applicants who have graduated from secondary schools or colleges in the following countries are exempt from the TOEFL: Anguilla, Antigua, Australia, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Canada (except Quebec), Cayman Islands, Dominica, Grenada, Grand Cayman, Guyana, Ireland, Jamaica, Kenya, Liberia, Montserrat, New Zealand, Nigeria, Sierra Leone, St. Kitts and Nevis, St. Lucia, St. Vincent, Trinidad/Tobago, Turks and Caicos Islands, and United Kingdom.

Students who are not exempt based on the countries listed above, but who can provide documentation of attendance and graduation from a secondary English-speaking school in their native country or the US, will be exempt from the requirement.

LOWER-DIVISION COURSES
Students must successfully complete prerequisite courses as indicated on the Admission Brochure (http://www.uta.edu/conhi/academics/nursing-undergrad/bsn/bsn.php). Specific courses are subject to the Two Attempt and Grade Improvement policies. Under the Two-Attempt Policy each course taken at UT Arlington and/or any other approved institution may be attempted a maximum of two times to earn a passing grade. By the second attempt a grade of “C” or better must be earned.

• Withdrawals (W) are exempt from this policy.
• Any non-passing grade is valid for a three-year period. At the conclusion of three years, a non-passing grade is no longer considered an attempt.

The Grade Improvement Policy is unique to the CON and is used for the College selection process only. This policy differs from the CON Two Attempt Policy and from the University’s Grade Replacement, Exclusion, and Forgiveness polices. Grades of C or above may be replaced to improve GPAs for the College selection process with the following limitations:

• A limit of four courses may be retaken. The three prenursing courses (N2300/N2200 Intro to Professional and Clinical Concepts in Nursing, N3366 Pathophysiologic Processes: Implication for Nursing, and N3365 Pharmacology in Nursing Practice) are not eligible for the Grade Improvement Policy.
• All earned grades of C or higher are valid indefinitely.
• The first four courses retaken are the grades used in the selection process. Any courses retaken thereafter are not used in the selection process.
• The higher of the two grades is used in the selection process.
• Withdrawals (W) are exempt from this policy.

UPPER-DIVISION COURSES
Upper-Division prenursing courses include N3366 Pathophysiologic Processes: Implication for Nursing, and N3365 Pharmacology in Nursing Practice and are subject to the Failure of Pre-nursing Course Policy.

One failed grade = probationary status with the CON indefinitely

Conditions of Probationary Status

• A student who earned a failed grade (D or F) in the term prior to BSN application deadline must re-take the course, pass with a C or better and have not violated the UT Arlington or College policies to be considered a viable applicant.
• A student who earned a failed grade (D or F) in the term directly following the BSN application deadline may not start the program, even if the course is retaken and passed during the subsequent term. A student is eligible to re-apply for the following application period; however, the failed grade will be used in the selection process.

Two failed grades = inability to continue with CON for a period of three years. Upon return, a student is eligible to apply under the conditions of the CON’s Re-entry policy.

• Re-entry policy refers to a student who is ineligible to continue a nursing program due to academic failure. This includes a student who was accepted into a pre-licensure program and has not completed an Associate Degree in Nursing (ADN) or Bachelor of Science in Nursing (BSN)
program. During this three-year timeframe, a student may not enroll in the University as a prenursing major or apply to the upper-division nursing program under another major for three years.

Conditions of Re-entry

• A student must provide a letter from previous nursing school stating program dismissal was for academic reasons.
• Must meet the eligibility requirements of the application requirements and submit a new application by the desired start date application deadline
• Pathophysioligic Processes: Implication for Nursing, and Pharmacology in Nursing Practice must be re-taken

CRITERIA FOR READMISSION OF UPPER-DIVISION STUDENTS

Students who withdraw from the UT Arlington College of Nursing Program for more than one semester in good standing who wish to return to complete the program must submit a written request for readmission to the Office of Enrollment and Student Services by the following deadlines:

Returning spring – September 1st
Returning summer - March 1st
Returning fall - June 1st

• Readmission is dependent upon space availability.
• A student is eligible for readmission to the program only once.
• If a clinical course is to be repeated, the student must repeat both the theory and clinical components of the course.
• Student must repeat the drug screening process.

Time out of the Program:

One semester:

• All of requirements listed above plus:
• Completion of a clinical skills assessment. This assessment will be completed no later than three weeks prior to the start of the semester in which the student is planning to return. The assessment will focus on the skills associated with the last clinical course completed. Input related to skills to be assessed may be sought from faculty in the previous course(s) completed. Should clinical deficiencies be identified, faculty will remediate clinical skill areas that are questionable or inadequate and provide the results to the lead teacher of the course the student is scheduled to enter. Failing to demonstrate adequate clinical skills after three attempts will result in the student being required to retake the last clinical course taken to re-establish clinical competency.
• If the student is in the AO BSN program, he/she will be required to come to the UT Arlington campus to complete the special skills assessment.

Two Long Semesters CB or Two Semesters AO (based on course availability):

• All of requirements listed above plus:
• Repeat criminal background check.

More than two long semesters CB or Two Semesters AO:

• Not eligible for readmission. Student must apply for admission as a beginning student.

TRANSFER FROM ANOTHER NURSING PROGRAM

Nursing transfer students are defined as those students who have successfully completed prerequisite courses with a C or above and Junior I courses for the BSN Program: Holistic Health Assessment and Clinical Nursing Foundations at another college or university. Students who have not completed the required courses will be ranked with the incoming junior class. Admission as a transfer student to the College of Nursing is contingent upon available space. Transfer students must attend orientation. Transfer students ready to start as a Junior 2 can be admitted in either the CB or AO programs.

• Transfer students must transfer all nursing courses and the grade received from those courses.
• No D's or F's in nursing courses.

Students must:

• Meet minimum requirements as stated on the admission brochure (http://www.uta.edu/conhi/academics/nursing-undergrad/bsn/bsn.php).
• Submit a course syllabus and a content outline of the course(s) to the Office of Enrollment and Student Services. If the course is a clinical course, a list of nursing skills learned in the course(s) must also be submitted.
• The lead teacher in the course, using the Field of Study Criteria Guidelines and other criteria related to the course, will review courses provided by the student for substitution of UT Arlington courses. Faculty may request additional information to clarify their decision. The course is then accepted as a substitution for a core nursing course, as an elective, or denied.
• Submit a letter from previous school stating that the student is in good standing.

• Meet minimum 2.75 GPA in the prerequisite natural science and prerequisite lower-division courses.

• Meet application deadlines of:
  - March 1 - Fall Semester
  - September 1 - Spring Semester

Processing of the transfer procedure will not be initiated until the student has applied to the College of Nursing and Health Innovation.

**ORIENTATIONS**

All Junior I BSN students and transferring students are required to complete the general online orientation in the Learning Management System and attend the mandatory in-person orientation held prior to the fall and spring semesters.

Clinical orientation is mandatory for all BSN students, as established by the Dallas/Fort Worth Hospital Council. BSN students are required to complete the Standard Hospital Student Orientation annually. Clinical requirements must be valid through the entire semester. If the annual orientation will expire during the current semester, it must be updated.

**SPECIAL PARAPHERNALIA/EQUIPMENT REQUIREMENTS**

All students enrolled in the College of Nursing must have internet access and a laptop computer meeting minimum computing recommendations. A list of computer specifications is outlined on the College of Nursing website, [https://www.uta.edu/conhi/](https://www.uta.edu/conhi/). Students may be asked to purchase and download software to meet course and/or program requirements.

Smart Phone or similar device highly recommended.

**IMMUNIZATIONS**

The UT Arlington College of Nursing standards require that all students in BSN programs complete the following immunizations by the time of acceptance.

If you know you will be applying to our Nursing Program within the next year, you will need to start these now because some will take up to 6 months to complete.

In order to be eligible to start the program, you will need to submit valid documentation that you have completed the following by Friday of the 2nd full week in March for Fall starts or Friday of the 2nd full week in September for Spring starts.

- Measles, Mumps, Rubella (MMR): 2 doses required (minimum of 28 days between doses) or positive/immune antibody titer
- Varicella (Chicken Pox): 2 doses required (minimum of 28 days between doses) or positive/immune antibody titer
- Tdap: within past 10 years
- Hepatitis B: a positive antibody titer or 2 full series (5-6 vaccines) and negative titer
- Hepatitis A: 2 doses required (minimum of 6 months between doses) or positive/immune antibody titer
- Current seasonal flu vaccine

View the website ([https://na01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.uta.edu%2Fconhi%2Fstudents%2Fimm-prelic%2Findex.php&data=02%7C01%7Chwoods%40uta.edu%7C7C24d15f45992841752c370bd6605814f0%7C5cdcc5b43d7be4caa8173729e3b0a62d9%7C0%7C636802328753838757&sdata=Rp6ezM2%2B0xhUuct9X](https://na01.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.uta.edu%2Fconhi%2Fstudents%2Fimm-prelic%2Findex.php&data=02%7C01%7Chwoods%40uta.edu%7C7C24d15f45992841752c370bd6605814f0%7C5cdcc5b43d7be4caa8173729e3b0a62d9%7C0%7C636802328753838757&sdata=Rp6ezM2%2B0xhUuct9X)) for more information on the vaccines, titers and valid documentation options.

**CERTIFICATION-CARDIOPULMONARY RESUSCITATION**

Undergraduate nursing students are required to obtain American Heart Association Basic Life Support (BLSC) CPR for Healthcare Providers.

Evidence of current CPR certification is required during clinical course enrollment from admission to graduation. The CPR must be valid throughout an entire semester with a clinical. If the current card will expire during the semester, the student must retake the course and have a card that will not expire during the semester.

**HEALTH INSURANCE COVERAGE**

All UT Arlington nursing students enrolled in clinical course(s) will be required to provide verification of medical insurance coverage that includes Emergency Department evaluation and follow-up treatment for needle-stick and blood borne disease exposure. This mandatory clinical requirement has been authorized by The University of Texas System Board of Regents.

As such, UT Arlington will not cover initial and/or follow up treatment for needle-stick injuries and/or exposure to blood borne diseases which may occur while students are enrolled in clinical courses.
While the UT Arlington College of Nursing recognizes the financial impact this clinical requirement presents for students, we also support the need for students to have health coverage for sudden illness, accidents, emergencies and exposure treatments that may occur in the clinical setting in a variety of clinical agencies.

**DRUG SCREEN POLICY**

All students accepted to the BSN AO or CB programs will complete a drug screen.

At any time if there is a confirmation of a positive drug screening, the student will be removed from clinical courses for a period of one calendar year. Upon returning to the program, random drug screenings will be conducted throughout the program. A second positive test will result in immediate dismissal from the nursing program.

Random and / or for cause drug screens are at the student's expense and must be completed as required. Failure/refusal to undergo a drug screen on the designated day will result in immediate dismissal from the nursing program. Full Policy (https://www.uta.edu/conhi/students/policy/drug.php)

**CRIMINAL BACKGROUND SCREEN**

Accepted students complete two criminal background checks (CBC): Texas Board of Nursing (BON) and a 3rd party provider as designated by CON.

Students should complete the Texas BON CBC prior to program application. Students who have completed NURS 2300, Introduction to Professional Nursing/NURS 2200 Concepts in Professional Nursing, or are currently enrolled in NURS 2300/NURS 2200, should submit their BON CBC during that course. Students, who have not taken NURS 2300/NURS 2200 by the application deadline, should contact CONHIadmin@uta.edu, provide the necessary information, give permission to send the information to the BON, and schedule the fingerprinting appointment within one month of the application deadline. Full Policy (https://www.uta.edu/conhi/_doc/unurs/CBCDeclaratoryOrderPolicyGuidelines.pdf)

The second CBC is completed after program acceptance.

A student with a positive criminal background screen will not be admitted into the program without a Declaratory Order from the Texas Board of Nursing stating that the individual has been granted permission to sit for the National Council Licensure Examination for Registered Nurses (NCLEX-RN Examination) upon completion of the requirements for graduation and payment of any required fees. Eligibility to take the NCLEX-RN Examination may be affected by any inaccuracies in the petition, and any subsequent violations of the Nursing Practice Act that may affect eligibility to sit for the examination or the later revocation of a license obtained through misrepresentation.

**ELIGIBILITY TO WRITE THE NATIONAL COUNCIL LICENSURE EXAMINATION FOR REGISTERED NURSES (NCLEX RN) - DECLARATORY ORDERS**

The Texas Board of Nursing (BON) has set out guidelines and criteria on the eligibility of persons with criminal convictions to obtain a license as a registered nurse. The BON may refuse to admit persons to its licensure examinations, may refuse to issue a license or certificate of registration, or may refuse to issue a temporary permit to any individual who has any criminal offense. Detailed information related to determining eligibility and required processes to determine eligibility for your specific circumstances is available from the Texas Board of Nursing and on their Web site (www.bon.state.tx.us (http://www.bon.state.tx.us)). Students who are unable to obtain clearance from the BON will not be allowed to begin the nursing program.

Once admitted to the nursing program, any student that commits an offense that would require a Declaratory Order will be removed from current and future clinical courses until the Declaratory Order is obtained from the Texas BON and submitted to the College of Nursing Director of Student Support.

**Professional Liability Insurance**

Nursing students are required to have evidence of professional liability insurance coverage for a minimum of $1,000,000 limit each claim and $3,000,000 limit aggregate. The charge for coverage will be assessed as a mandatory fee at the time of registration.

**FEES**

Course fee information is available at www.uta.edu/fees (http://www.uta.edu/fees/). Additional costs beyond tuition, fees and books that may be incurred by a nursing student will include those items listed on the CONHI website. In addition, some clinical agencies charge a nominal fee for parking passes and utilizing their scrubs.

**ORAL COMMUNICATION PROFICIENCY REQUIREMENT**

Oral proficiency is recognized to be a critical component of providing safe nursing care. In addition to content-specific presentations in various nursing courses, all nursing students are required to communicate effectively with clients, members of the health care team, and faculty. Contact the Associate Chair of Undergraduate Programs for more information.
E-MAIL ACCOUNTS
Each student will be provided a UT Arlington e-mail address. Official communications from the College of Nursing will be distributed to this e-mail address and Learning Management System accounts required by many courses. Students will be held responsible for information distributed in this manner.

NURSING COURSE WITHDRAWAL POLICY
Students within the pre-licensure BSN program, enrolled in an Upper-Division NURS course are permitted to drop the course one time. Students cannot drop the course again for academic reasons. Upon attempting the course for the second time, the earned grade is retained. Students who retake a course after earning a grade of W and who are unable to meet the course requirements will receive a non-passing grade. Students may drop no more than three Upper-Division NURS courses during their undergraduate career.

Elective and prenursing courses are exempt from this policy but may be affected by other CON policies.

Exceptions to this policy may be entertained because of extraordinary non-academic circumstances.

MOVEMENT BETWEEN PROGRAMS
Movement between the AO and CB BSN programs is at the discretion of program administration. Students will be required to sign a Program Transfer Agreement.

BSN STUDENTS WHO DROP OR FAIL A COURSE
Pre-Licensure BSN students who withdraw or fail a course can repeat the course the next available time the course is offered.

AO Students:

• Students who seek readmission after failing or withdrawing for any reason must meet with an academic advisor to discuss clinical and course options.

• If no sites are available, the student will be delayed until a seat is available at a future admission date. See the student handbook for full policy http://www.uta.edu/conhi/students/policy/index.php (http://www.uta.edu/conhi/students/policy/)

*If there are more students than seats available, the students will be placed in the order in which they request the move (first come, first placed).

CLINICAL COURSES
To pass a clinical course, the student must pass both the didactic and the clinical components of that course. Clinical attendance expectations, Clinical Performance Requirements and Evidence of Clinical Competence information can be found in the UG Student Handbook at: http://www.uta.edu/conhi/students/policy/index.php (http://www.uta.edu/conhi/students/policy/)

CLINICAL ATTENDANCE DURING SCHEDULED UNIVERSITY CLOSINGS
Some programs in the College of Nursing, such as the AO BSN Program, may require students to attend clinical on evenings, nights, weekends, or holidays. Students are expected to attend their assigned clinical rotation as scheduled, even when the University is otherwise scheduled for closure, i.e. Spring Break.

PROGRESSION IN THE NURSING PROGRAM
Students in the Prelicensure BSN Program will not be permitted to continue in the nursing program nor to enroll for additional courses if they:

• receive a grade of D or F in more than one required nursing or prenursing course, or
• receive any combination of grades of D or F on two attempts of the same course
• score less an 70% on weighted exam or assignment average
• do not meet requirements of the Comprehensive Assessment and Preparation Program (https://www.uta.edu/conhi/_doc/unurs/capp_procedure.pdf)
• do not achieve minimum score requirements on Medication Administration Competency Assessment (p. ...
• receive a Clinical Failure (more information in the BSN Handbook (https://www.uta.edu/conhi/students/policy/))

If a student fails a course they must take NURS2232 if they have not already taken it.

HONORS DEGREE IN NURSING
Nursing students who wish to graduate with an Honors Degree in Nursing must be members of the Honors College in good standing. Students must complete the Nursing degree requirements and the requirements of the Honors College. Contact the College of Nursing Honors Coordinator for further information. Due to the accelerated nature of the AO program the Honors Degree is limited to students in the Campus Based program.
RN to BSN Program

CORE PERFORMANCE STANDARDS FOR ADMISSION AND PROGRESSION IN THE COLLEGE OF NURSING

It is the philosophy of the University of Texas at Arlington College of Nursing (UTACON) that the baccalaureate program is designed to prepare a competent, self-directed, general practitioner of nursing who can assume increasing responsibility and leadership in the delivery of nursing care. In consideration of the preparation of a general practitioner, all individuals who apply for admission and are enrolled in the undergraduate program must be able to perform the essential functions of a student of nursing.

The College of Nursing has identified essential nursing skills: communication, cognitive, motor and sensory, observation, tactile, hearing, smell, psychomotor and ethical and professional integrity. The student enrolled in the program must demonstrate mastery of these components. Because providing direct patient care is physically demanding, students need to meet the physical requirements of a staff nurse in the same setting in which they are completing a clinical rotation. Upon BSN program acceptance, students must attest to their ability to meet these standards with or without an accommodation. If at that time a student requests an accommodation, the OSD and the CON must determine if the accommodation is reasonable PRIOR to the student beginning Upper-Division coursework.

If a student requires an accommodation to meet these standards, then within five (5) business days of being accepted into the BSN program, and in order to prevent a delay in the start of the programs, the student must contact OSD to initiate the review process.

Qualified applicants are admitted without discrimination with regard to race, color, national origin or ancestry, gender, age, religion, sexual orientation, veteran status or disability (reasonable accommodations will be made within the Americans with Disabilities Act guidelines).

More detailed information is available in the UG Nursing Policy Library (http://www.uta.edu/conhi/students/policy/).

ADMISSION REQUIREMENTS

Students may be admitted to UT Arlington upon meeting the admission requirements established by the university which are described in the university catalog and website. Official transcripts must be submitted to the university Office of Admissions.

Registered nurses desiring admission to this program must:

• Apply for admission to the University of Texas at Arlington
• Meet the University of Texas at Arlington transfer student admission requirements
• Have a current, unencumbered license as an RN in the U.S.A.
• Be complete in Texas Success Initiative (TSI) requirements
• Meet the University of Texas at Arlington English proficiency requirement, TOEFL, if applicable

CREDIT BY RN LICENSURE

Transcripts of RN students are evaluated with consideration of the Coordinating Board Field of Study Curriculum guidelines. Credit is given for all courses listed in the Field of Study Curriculum as transferable as well as any additional courses that may be applicable for transfer for a total of 29 hours.

Certain other conditions apply:

• If the student earned one D or F in a nursing course at another college or school of nursing, they will be admitted unconditionally. If the student earns a subsequent D or F at UT Arlington, he/she will be placed on probation. The student must earn a C or above in all subsequent courses in order to remain in the program.
• If the student has earned more than one D or F, but no more than two, in nursing courses at another college or school of nursing, the student will enter UT Arlington on a probationary basis. The student must earn a C or above in all subsequent courses at UT Arlington in order to remain in the program.

ORIENTATION

All Campus Based Junior RN-BSN students and transferring RN-BSN students are required to attend the general orientation held prior to entering their Junior semester.

PROGRESSION IN THE NURSING PROGRAM

The University grade replacement/exclusion policy is limited by the College of Nursing and is not applicable to nursing courses.
- A student in the RN to BSN Program who earns a second D or F will be placed on probation. The student must earn a C or above in all subsequent courses in order to remain in the program.

**ORAL COMMUNICATION PROFICIENCY REQUIREMENT**

Oral proficiency is recognized to be a critical component of providing safe nursing care. In addition to content-specific presentations in various nursing courses, all nursing students are required to communicate effectively with clients, members of the health care team, and faculty. Contact RN-BSN Program Director for more information.

**E-MAIL ACCOUNTS**

Each student will be provided a UT Arlington e-mail address. Official communications from the College of Nursing will be distributed to this e-mail address and Learning Management System accounts required by many courses. Students will be held responsible for information distributed in this manner.

**MOVEMENT BETWEEN PROGRAMS**

Movement between AO and CB RN-BSN program is at the discretion of program administration.

**Telehealth Certificate**

**ADMISSIONS REQUIREMENTS**

Students may be admitted to UT Arlington upon meeting the admission requirements established by the University. Students will be advised by the College of Nursing in the Office of Enrollment and Student Services. Official transcripts must be submitted to the UT Arlington Office of Admissions, Records and Registration.

**BSN Prelicensure Program**

**PRIOR TO ENROLLMENT**

The following semester hours must be completed prior to enrollment in upper-division nursing courses except as noted:

\(^1\) Elective credit may be awarded for national certifications. Electives may be taken as a junior or as a senior.

New Footnote: Will accept up to 29 credit hours transferred from a diploma or Associate Degree in nursing.

### TELEHEALTH AND HEALTH INFORMATICS CERTIFICATE

Certificate Advisor: telehealthadvising@uta.edu

**Associate Dean for Academic Affairs, Nursing: Kathy Daniel, PhD**

This 9-semester credit hour certificate will prepare upper division undergraduate students from any related discipline to have fundamental skills needed for telehealth and health informatics. Telehealth is the distribution of health-related services via electronic and telecommunication technology. Health Informatics is the storage and use of health care information to foster better collaboration among various health-related providers.

The courses for this certificate are offered all online, but are campus based. They are not available in the accelerated online format. Students may enroll in the certificate alone or include the certificate as part of an undergraduate degree plan from any related major. There are 3 required courses in the certificate.

Department of Kinesiology

Undergraduate Degrees

• Bachelor of Arts in Physical Education Teacher Education (PETE) (p. 1082)
• Bachelor of Arts in Kinesiology - Sports Leadership and Management (SLAM) (p. 1082)
• Bachelor of Science in Exercise Science - Clinical & Applied Physiology (CAP) (p. 1082)
• Bachelor of Science in Exercise Science - Health, Fitness, & Wellness (HFW) (p. 1082)
• Bachelor of Science in Exercise Science - Motor & Rehabilitation Services (MRS) (p. 1082)
• Bachelor of Science in Public Health (BSPH) (p. 1082)

Graduate Degrees

• Master of Science in Athletic Training (p. 1068)
• Master of Science in Exercise Science (p. 1068)
• Doctor of Philosophy in Kinesiology (http://catalog.uta.edu/nursing/kinesiology/graduate/#doctoraltext)
• Graduate Certificate in Public Health (http://catalog.uta.edu/nursing/kinesiology/graduate/#certificatetext)
• Master of Public Health (https://catalog.uta.edu/nursing/kinesiology/graduate/)

COURSES

KINE 1100. LAB SKILLS IN KINESIOLOGY AND EXERCISE SCIENCE. 1 Hour.
The course is designed to provide basic lab measurement and testing experiences for Kinesiology and Exercise Science students. Prerequisite: or Co-requisite: KINE 1300.

KINE 1230. FIRST AID / CPR / AED TRAINING. 2 Hours.
This course is designed to cover the components of Standard First Aid, Cardio-Pulmonary Resuscitation (CPR) for the Professional Rescuer, and Automated External Defibrillator (AED) training. Certification is possible upon successful course completion. Offered as HEED 1230 and KINE 1230. Students seeking credit in HEED should enroll in HEED 1230 and students seeking credit in KINE should enroll in KINE 1230. Credit will not be granted for both courses.

KINE 1300. INTRODUCTION TO KINESIOLOGY AND EXERCISE SCIENCE. 3 Hours.
Introduction to key concepts concerning the anatomical, motor, biomechanical, and physiological basis of exercise science. The student is introduced to cardiovascular responses to training, analysis of human and motor behavior, and basic principles of exercise prescription.

KINE 1315. INTRODUCTION TO PHYSICAL EDUCATION AND SPORT. 3 Hours.
This course is an introduction to, and observation of, practices in pedagogical kinesiology and sports leadership.

KINE 1400. INTRODUCTION TO EXERCISE SCIENCE. 4 Hours.
Introduction to key concepts concerning the anatomical, biomechanical, and physiological basis of exercise science. Through lecture and laboratory experiences, the student is introduced to cardiovascular responses to training, analysis of human movement, and basic principles of exercise prescription. Credit cannot be given for both KINE 1400 and the combination of courses it replaces: KINE 1124 and KINE 1314.

KINE 2130. ATHLETIC TRAINING CLINICAL PRACTICUM I. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Clinical Proficiencies with an instructional emphasis on preventive and protective taping and wrapping procedures. This course requires the completion of 120 clinical hours under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI).

KINE 2230. INTRODUCTION TO MUSCULOSKELETAL INJURIES. 2 Hours.
This course is designed to introduce students to the mechanisms of musculoskeletal injury and their associated signs, symptoms, and tissue responses. Students will also be introduced to the basic principles of musculoskeletal assessment. This course is a prerequisite for admission to the Athletic Training Education Program. Prerequisite: KINE 2120, KINE 2320; must be concurrently enrolled in KINE 2130.

KINE 2301. TEACHING GAMES FOR UNDERSTANDING. 3 Hours.
The course will provide students with theoretical concepts with which they can design and analyze various short- and long-term plans related to the Teaching Games for Understanding theoretical model. Students will learn various tactical strategies and modification principles for applying learned concepts in instructional settings. The instructor will use expertise from given sports to help students transfer the common themes across the spectrum of the model's category of games. KINE 1315 is a co-requisite for this course. Prerequisite: Co-requisite KINE 1315.

KINE 2302. DANCE AND MOVEMENT ACTIVITIES. 3 Hours.
This course is designed to enhance the students performance knowledge of skills and strategies in dance and movement activities to acquaint them with effective teaching behaviors appropriate for these activities. Co-requisite KINE 1315. Prerequisite: Co-requisite KINE 1315.
KINE 2307. SPORTS AND SOCIETY. 3 Hours.
This course will examine the bidirectional impact of sport and societal institutions. The class will explore the co-dependent nature of sport and society and attempt to separate fact from fiction to aid in the understanding of the true role of sport as it fits into society. Topics to be addressed include the potentially controversial areas of race, gender, disability, institutional rule violations, and ethics in the contemporary sports arena. This is a lower level elective. Credit cannot be received for this course and KINE 3307.

KINE 2330. CARE AND PREVENTION OF ATHLETIC INJURIES. 3 Hours.
An introduction to the profession of Athletic Training. Common sports-related injuries and illnesses will be discussed with an emphasis on the proper methods for prevention, recognition, and immediate care. Offered as HEED 2330 and KINE 2330. Kinesiology majors must take KINE 2330.

KINE 2350. PUBLIC HEALTH: PRINCIPLES AND POPULATIONS. 3 Hours.
This course will provide students with an overview of Public Health: what it is, how it works, and why it is important. Topics include current health issues, global health, health disparities and how Public Health impacts community settings. Class requirement includes participation in community-based, experiential-learning activities. Examination of public health concepts, values and functions. Exploration of the underlying science of human health and disease as that is impacted by socioeconomic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities. This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences.

KINE 2351. HEALTH ISSUES IN DIVERSE & VULNERABLE POPULATIONS. 3 Hours.
Cultural competence is attracting increased attention across the spectrum of public health. However, many vulnerable populations continue to be "invisible," resulting in a lack of awareness and knowledge in public health and healthcare workers. This course provides students with information related to the multi-faceted disparities that exist beyond ethnic differences to investigate the many other facets of cultural diversity and health issues.

KINE 2420. INTRODUCTION TO ATHLETIC TRAINING. 4 Hours.
Classroom and laboratory experiences that provide an introduction to the profession of Athletic Training with an emphasis on prevention and immediate care of sports related injuries. Specific topics will include injury prevention techniques; emergency first aid and acute care; superficial application of therapeutic modalities; proper use and fitting of protective equipment; and environmental considerations. Credit cannot be given for KINE 2420 and the combination of courses it replaces: KINE 2320 and KINE 2120.

KINE 3130. ATHLETIC TRAINING CLINICAL PRACTICUM II. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. This course requires the completion of 250 hours of clinical experience performed under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI). Prerequisites: BIOL 2457, Athletic Training Majors only or permission of instructor. Corequisite: KINE 3320.

KINE 3131. ATHLETIC TRAINING CLINICAL PRACTICUM III. 1 Hour.
Laboratory and clinical experiences that provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. This course requires the completion of 250 hours of clinical education experience performed under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI). Prerequisites: BIOL 2457, Athletic Training Majors only or permission of instructor. Corequisite: KINE 3324.

KINE 3300. FUNCTIONAL ANATOMY. 3 Hours.
A study of the musculoskeletal anatomy to include bony landmarks, muscle origin, insertion and action, as well as nerve innervation. Knowledge of the functional anatomy is crucial to the understanding of sports performance, the design of strength training programs, and injury prevention. Prerequisite: KINE 1300, KINE 1100 and BIOL 2457.

KINE 3302. SPORT AND EXERCISE PSYCHOLOGY. 3 Hours.
Analysis of exercise and sport activities in terms of psychological skills and strategies. Topics include motivation, arousal regulation, focus, concentration, group cohesion & imagery.

KINE 3303. ORGANIZATIONAL PRINCIPLES OF EXERCISE AND SPORT ACTIVITIES. 3 Hours.
An organizational analysis of exercise and sport in terms of participation rules, regulations, and responsibilities. Emphasis on knowledge and understanding of the principles governing the organization and conduct of exercise and sport activities.

KINE 3304. ADAPTED PHYSICAL EDUCATION & SPORT. 3 Hours.
Analysis of conditions that impact individuals with special needs. Emphasis on adapted physical education and sport strategies that facilitate the learning of this population. KINE 3388 is a co-requisite for this course. Prerequisite: KINE 1100, KINE 1300 and KINE 1315. Co-requisite KINE 3388.

KINE 3306. MOTOR INTEGRATION. 3 Hours.
Principles of motor skill acquisition, performance, and control. Topics include practice strategies, memory, neuromotor functioning, attention, and learning (assessment, transfer & stages). Prerequisite: KINE 1315, and KINE 1400, or permission of instructor.

KINE 3307. SPORT AND SOCIETY: ISSUES AND DEBATES. 3 Hours.
This course will examine the bidirectional impact of sport and societal institutions. The class will explore the co-dependent nature of sport and society and attempt to separate fact from fiction to aid in the understanding of the true role of sport as it fits into society. Topics to be addressed include the potentially controversial areas of race, gender, disability, institutional rule violations, and ethics in the contemporary sports arena. This is an upper level elective. Credit cannot be received for this course and KINE 2307.

KINE 3309. FOUNDATIONS OF RECREATION. 3 Hours.
Leisure time in our social structure and the agencies which have developed to provide leisure time activities. Program development and leadership skills in the recreation profession.
KINE 3311. RECREATION AND LEISURE SERVICE. 3 Hours.
Application of management and organizational principles, objectives, and procedures involved in implementing recreational and leisure service programs.

KINE 3312. COACHING INVASION GAME PRINCIPLES. 3 Hours.
The course will provide students with theoretical concepts with which they can design and analyze various short and long-term plans related to invasion games. Students will learn various tactical strategies and modification principles for applying learned concepts in instructional settings. The instructor will use expertise from given sports to help students transfer the common themes across the spectrum of invasion games.

KINE 3313. COACHING OF NET/WALL GAME PRINCIPLES. 3 Hours.
The course will provide students with theoretical concepts with which they can design and analyze various short and long-term plans related to net/wall games. Students will learn various tactical strategies and modification principles for applying learned concepts in instructional settings. The instructor will use expertise from given sports to help students transfer the common themes across the spectrum of net/wall games.

KINE 3320. LOWER EXTREMITY EVALUATION. 3 Hours.
A study of the common orthopedic and musculoskeletal injuries involving the lower extremities and lumbar spine, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Prerequisite: BIOL 2457, Athletic Training Majors only or permission of instructor. Corequisite: KINE 3130.

KINE 3324. UPPER EXTREMITY EVALUATION. 3 Hours.
A study of the common orthopedic and musculoskeletal injuries involving the upper extremities, spine, head, face, abdomen, and thorax, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Prerequisite: BIOL 2457, Athletic Training Majors only or permission of instructor. Corequisite: KINE 3131.

KINE 3325. UNDERGRADUATE RESEARCH METHODS. 3 Hours.
Current practices in the conduct of quantitative research, measurement, and evaluation processes applied to programs related to exercise science, pedagogical kinesiology, athletic training and related fields will be examined. Enrolled students will develop and conduct a research project based on their declared discipline. Prerequisite: KINE 1300, KINE 1100, MATH 1302, MATH 1308.

KINE 3330. PATHOLOGY AND PHARMACOLOGY. 3 Hours.
Study of acute and chronic illness and their response to, and impact on, physical activity. Discussion of pharmacological agents used in the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: BIOL 2458, acceptance into the Athletic Training Education Program or permission of instructor.

KINE 3333. THERAPEUTIC INTERVENTION II. 3 Hours.
This course is designed to provide the student with an understanding of upper extremity and low back rehabilitation protocols and the use of electric therapeutic modalities like ultrasound, diathermy, laser, and electric stimulation. Emphasis will be placed on understanding the disablement model and learning how to plan, implement, document, and evaluate programs for the rehabilitation and reconditioning of injuries and illnesses of athletes and others involved with physical activity. Operation of electrical therapeutic modalities and how they can be incorporated into a rehabilitation program will be investigated. The underlying principles and application techniques for each modality, therapeutic exercise progressions, patient clinical goals, legal and safe practice guidelines, and evidence based therapeutic modality science will allow for critical thinking and problem solving in relation to common upper extremity and low back injuries. Both surgical and non-surgical rehabilitation models for the upper extremity and low back will be discussed with a special emphasis on the use of functional progressions. Prerequisites: BIOL 2457 and BIOL 2458. Concurrent enrollment in KINE 4131 is required for all Athletic Training Education Program students.

KINE 3342. SOCIOLOGY OF THE HUMAN BODY. 3 Hours.
Drawing from the social sciences, cultural and gender studies, and exercise physiology, this course in body sociology addresses several contemporary issues relating to diet, nutrition and exercise. Specific topics include eating disorders, factory farming, and “body industries” involving weight-loss diets, gyms, fashion, and cosmetic and bariatric surgery. The medical model of bodies is also examined. Also listed as SOCI 3342; credit will not be granted for both KINE 3342 and SOCI 3342.

KINE 3350. URBANIZATION AND VULNERABLE POPULATIONS. 3 Hours.
Investigation of diversity of individuals and populations in a community, including how diversity may influence policies, programs, services, and the health of a community, and the importance for a diverse public health workforce.

KINE 3351. PUBLIC HEALTH INFORMATICS. 3 Hours.
Explain and apply ethical principles that apply to the use of information technology as those pertain to accessing, collecting, analyzing, using, maintaining, and disseminating data and information. Prerequisite: KINE 2350 and KINE 3350.

KINE 3352. INTRODUCTION TO PUBLIC HEALTH EPIDEMIOLOGY. 3 Hours.
Analysis of factors that affect the health of a community, including how disease spreads, legal aspects of epidemics, and how data is used to drive public health decision making. Overview of how public health practice and science come together to protect the health of the public, or of a specific population. Prerequisite: MATH 1301 or MATH 1302 or MATH 1303 or MATH 1426 and MATH 1308 and KINE 2350 required.

KINE 3353. HEALTH AND THE HUMAN CONDITION IN THE GLOBAL COMMUNITY. 3 Hours.
Study of the history, philosophy and contemporary issues of public health as those apply to public health in both urban and global societies.

KINE 3354. EMERGENCY PREPAREDNESS & MANAGEMENT. 3 Hours.
Inquiry into the structures, functions, and authorizations of governmental public health programs. Identification of tools, processes, and activities related to both practice and policy used to support community responses to public health emergencies and other disasters. Prerequisite: KINE 2350.
KINE 3355. ADDICTIVE BEHAVIORS. 3 Hours.
Students will examine substance abuse including alcohol, drugs (illegal and prescription), smoking, vaping, and gaming from a population-based approach. There will also be a focus on compulsive behaviors including topics such as food over- and undereating, gambling, shopping and internet/technology addictions. While the course emphasis is on addictive behaviors, material and learning activities will also address how diverse and vulnerable populations are impacted by addictive behaviors as those relate to injury and illness prevention.

KINE 3356. PUBLIC HEALTH IN ACADEMIC SETTINGS. 3 Hours.
Public Health in Academic Settings. This course addresses common health issues found throughout educational settings. Topics include chronic stress, health and well-being, school violence and the roles of hunger and obesity as concerns in the school environment. A focus on school climate, the role of school-based healthcare and preventing dropout from public health perspectives will be included.

KINE 3357. PHYSICAL ACTIVITY IN PUBLIC HEALTH. 3 Hours.
Designed for public health and health/fitness/wellness professionals who are interested in the promotion of physical activity in a variety of areas of public health. Emphasis on advocating for the importance of integration of physical activity in community health. This course prepares students to sit for the American College of Sports Medicine/National Physical Activity Society Physical Activity in Public Health Specialist certification examination.

KINE 3388. THEORY AND APPLICATION IN MOTOR DEVELOPMENT. 3 Hours.
A study of motor skill development from infancy to adolescence with emphasis upon motor development theory and aspects that effect motor competence, underlie movement control, and influence change in the acquisition of motor skills. Prerequisite: KINE 1100 and KINE 1300.

KINE 3401. BIOMECHANICS OF HUMAN MOVEMENT. 4 Hours.
Quantitative and qualitative analyses of human movement. Emphasis is on the application of the principles of human movement, with consideration of functional anatomy, kinesiology and mechanical concepts to exercise, sport, and activities of daily living. Course credit may not be granted for both KINE 3301 and KINE 3401. Prerequisite: KINE 1300, KINE 1100, BIOL 2457 and Math 1302.

KINE 3415. PHYSIOLOGY OF EXERCISE. 4 Hours.
Provides the physiology background necessary for an understanding of the acute and chronic effects of exercise on the body. Physiological concepts and their relationship to exercise, sport, and health programs are examined. Laboratory experiences are designed for evaluating physiological responses to exercise. Course credit may not be granted for both KINE 3315 and KINE 3415. Prerequisite: Restricted to Kinesiology, Athletic Training and Exercise Science Majors. KINE 1300, KINE 1100, BIOL 2457, BIOL 2458, and MATH 1302 required.

KINE 4130. ATHLETIC TRAINING CLINICAL PRACTICUM IV. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. The instructional emphasis is the development of functional rehabilitation programs for musculoskeletal injuries and common orthopedic surgeries. This course requires the completion of 250 hours of clinical experience performed under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI). Prerequisite: BIOL 2457 and BIOL 2458; Athletic Training Majors only or permission of instructor. Corequisite: KINE 4336.

KINE 4131. ATHLETIC TRAINING CLINICAL PRACTICUM V. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. Instructional emphasis is on the selection and clinical application of therapeutic modalities. This course requires the completion of 250 hours of clinical experience performed under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI). Prerequisite: BIOL 2457 and BIOL 2458; Athletic Training Majors only or permission of instructor. Corequisite: KINE 3333.

KINE 4132. ATHLETIC TRAINING CLINICAL PRACTICUM VI. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. This course requires the completion of 200 hours of clinical experience performed under the supervision of an Approved Clinical Instructor. Prerequisite: KINE 3130, KINE 3131, KINE 3320, KINE 3324, KINE 3330, KINE 3333, KINE 4130, KINE 4131, KINE 4336, and acceptance into the Athletic Training Education Program or approval of instructor. Must be concurrently enrolled in KINE 4233.

KINE 4188. CLINICAL HEALTH PROFESSIONS INTERNSHIP. 1 Hour.
Individualized academic training in an internal or external clinical health professions setting (e.g. university, hospital, physical therapy clinic, or physician's office) under the direct supervision of a health care professional (MD, PT, OT, PA). Prerequisite: Corequisite: KINE 4315 or successful completion of KINE 4315 and proof of sufficient professional liability insurance.

KINE 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of department chairperson.

KINE 4193. PHYSICAL EDUCATION TEACHER CERTIFICATION PRACTICUM. 1 Hour.
In this course students will be prepared for the TExES PE-EC-12 and PPR-EC-12 exams and prepared for the professional dispositions associated with being a Physical Educator with an emphasis on ethics, interviewing, and role modeling. The students will take and review the PE Content and Pedagogy and Professional Responsibilities practice teaching licensure exams. Through this process teacher candidates will be cleared for official TExES registration. This course is to be taken the semester immediately prior to the student teaching semester.

KINE 4201. ADVANCED TECHNIQUES AND TACTICS OF BASEBALL. 2 Hours.
Development and analysis of skills, offensive and defensive strategies used in the sport of baseball.

KINE 4202. ADVANCED TECHNIQUES AND TACTICS OF BASKETBALL. 2 Hours.
Development and analysis of skills, offensive/defensive strategies used in the sport of basketball.
KINE 4203. ADVANCED TECHNIQUES AND TACTICS OF FOOTBALL. 2 Hours.
Development and analysis of skills, offensive and defensive strategies used in the sport of football.

KINE 4204. ADVANCED TECHNIQUES AND TACTICS OF TRACK AND FIELD. 2 Hours.
Development and analysis of track and field event techniques and strategies.

KINE 4205. ADVANCED TECHNIQUES AND TACTICS OF VOLLEYBALL. 2 Hours.
Development and analysis of skills, offensive and defensive strategies used in the sport of volleyball.

KINE 4233. ATHLETIC TRAINING ORGANIZATION & ADMINISTRATION. 2 Hours.
A study of the administrative issues and management theories that may be encountered in athletic training. Special emphasis is placed on the practical application of concepts related to legal liability, facility design and maintenance, documentation, financial management, health insurance, and general day-to-day operations. Prerequisite: KINE 3130, KINE 3131, KINE 3320, KINE 3324, KINE 3330, KINE 3333, KINE 4130, KINE 4131, KINE 4336, and acceptance into the Athletic Training Education Program or approval of instructor.

KINE 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of department chairperson.

KINE 4293. SEMINAR IN ATHLETIC TRAINING. 2 Hours.
Synthesis of theories and concepts in athletic training. Review of the competencies and proficiencies in athletic training with special emphasis on professional development and the refinement of clinical decision-making. Prerequisite: KINE 3320, KINE 3324, KINE 3330, KINE 3333, KINE 4233, KINE 4336; Athletic Training Majors only.

KINE 4296. SPECIAL TOPICS IN EXERCISE AND SPORT. 2 Hours.
Designed to meet the current needs of students. May be repeated for credit when the topic changes.

KINE 4316. FITNESS PROGRAMMING. 3 Hours.
This course will provide students with practical and theoretical applications of fitness programming. The successful student will acquire a level of proficiency in the development of fitness programs and plans based upon client specific fitness assessment characteristics. Fitness programs shall include, but not be limited to: musculoskeletal symmetry, strength, and flexibility; body composition; cardiovascular endurance, and nutritional recommendations. Additionally, successful students will become proficient in the application of client related historical, nutritional, medical, psychological, and psychosocial factors that impact the development of a properly designed exercise program. Prerequisite: Current CPR certification, MATH 1302, KINE 3300, KINE 3315, and KINE 4315, or permission of instructor.

KINE 4317. EXERCISE PRESCRIPTION FOR SPECIAL POPULATIONS. 3 Hours.
This course will discuss the pathophysiology of prevalent cardiovascular, metabolic and pulmonary diseases. Methods of exercise prescription and issues of concern will also be presented for these populations, as well as, low back pain, pregnancy, osteoporosis, cancer, children, older adults, fibromyalgia, multiple sclerosis and cardiac disease. Prerequisite:MATH 1302, MATH 1308, BIOL 2457, BIOL 2458, KINE 3300, KINE 3415 and KINE 3325.

KINE 4319. FITNESS, HEALTH AND OUTDOOR ADVENTURE ACTIVITIES EDUCATION. 3 Hours.
The course will provide students with theoretical health-related concepts with which they can design and apply fitness learning into various physical education settings. In addition, this course is designed to introduce students to outdoor and adventure education activities and adventure-based learning. Time will be spent on low element group initiatives and high element adventure activities. Prerequisite: KINE 2301 and KINE 2302.

KINE 4320. TEACHING SECONDARY PHYSICAL EDUCATION. 3 Hours.
Designed to enhance teacher candidates’ understanding of curriculum development as it applies to theory of motor learning and the sciences of kinesiology. These progressions are synthesized into a collaborative service-learning project with secondary public school partner(s). Candidates take responsibility for creating, coordinating, and facilitating learning experiences that are developmentally appropriate, motivating, and based on research. Prerequisite: KINE 3304, KINE 3388.

KINE 4321. TEACHING ELEM PHYSICAL EDUCATION. 3 Hours.
This course is designed to synthesize the sciences of anatomy and physiology, biomechanics, motor integration and motor control with sound pedagogical knowledge into an applied elementary physical education setting. Criminal background check required. Prerequisite: KINE 3304 and KINE 3388.

KINE 4323. MOTOR CONTROL AND LEARNING. 3 Hours.
This course will expose students to the theoretical perspectives and current principles associated with the control and learning of movement skills. Specifically, the neural and mechanical mechanisms underlying motor behavior and the variables influencing motor learning will be addressed. Throughout the course, application of theoretical concepts to instructional and clinical settings will be emphasized. Prerequisite: KINE 1300, KINE 1100, MATH 1308, and KINE 3325.

KINE 4329. STRENGTH & CONDITIONING IN SPORT AND PERFORMANCE. 3 Hours.
This course covers the physiology and biomechanics of strength training and conditioning. Additional topics include: testing and evaluation of athletes, resistance training techniques, training program design, and organization administration of a strength training facility. This course is designed to prepare students to take the CSCS, Certified Strength and Conditioning Specialist, certification examination. Prerequisite: MATH 1302, MATH 1308, BIOL 2457, BIOL 2458, KINE 3300, KINE 3415, KINE 3325.
KINE 4330. PROGRAM DESIGN & ADMINISTRATION. 3 Hours.
The development and operation of health/wellness programs and facilities will be presented, including: program design and administration, facility design, organizational development, management theory, marketing, financial management, legal issues, strategic planning, and evaluation models. The student will participate in all phases of program and facility development, such as budget development, recruiting and retaining employees and clients, market niche, and conflict resolution. Prerequisite: KINE 3415 and KINE 3325.

KINE 4331. OBESITY & WEIGHT MANAGEMENT. 3 Hours.
This course is a review of the scientific literature on the causes and consequences of obesity. Topics include: techniques for assessing body composition, metabolic factors promoting obesity, the role of obesity in metabolic and cardiovascular disease, traditional and non-traditional weight loss programs, economic consequences and contributors of obesity, and psychosocial consequences and contributors of obesity. Prerequisite: KINE 3415 and KINE 3325.

KINE 4335. GRADED EXERCISE TESTING & PRESCRIPTION. 3 Hours.
The knowledge and skills necessary for assessment of health history and appraisal, blood pressure, electrocardiogram, cardiovascular fitness and function will be acquired in lecture and laboratory sessions. Various test modalities and protocols will be discussed for health and diseased populations. Prerequisite: BIOL 2457, BIOL 2458, and KINE 3315, KINE 4315, or permission of instructor.

KINE 4336. THERAPEUTIC INTERVENTION I. 3 Hours.
This course is designed to provide the student with an understanding of the scientific theory and the basic principles of musculoskeletal rehabilitation and therapeutic modalities. Emphasis will be placed on understanding the disablement model and learning how to plan, implement, document, and evaluate programs for the rehabilitation and reconditioning of injuries and illnesses of athletes and others involved with physical activity. Operation of superficial heating and cooling therapeutic modalities and how manual treatments (e.g., traction, muscle energy and massage) can be incorporated into a rehabilitation program will be investigated. The underlying principles and application techniques for each modality, therapeutic exercise progressions, patient clinical goals, legal and safe practice guidelines, and evidence based therapeutic modality science will allow for critical thinking and problem solving in relation to common lower extremity injuries. Both surgical and non-surgical rehabilitation modalities for the lower extremity will be discussed with a special emphasis on the use of functional progressions. Prerequisites: BIOL 2457 and BIOL 2458. Concurrent enrollment in KINE 4130 is required for all Athletic Training Education Program students.

KINE 4337. STRENGTH AND CONDITIONING IN GENERAL POPULATIONS: HEALTH AND DISEASE. 3 Hours.
This course covers the physiology and biomechanics of strength training and conditioning as it applies to the general populations across the spectrum of health and disease. This includes: testing, evaluation, resistance training techniques and training program design for individuals with orthopedic injuries and rehabilitation concerns, metabolic conditions (e.g., diabetes), youth, elderly, and pregnant or post-prenatal women. This course is designed to prepare students to take the NSCA-CPT, and apply the skills needed to be a leader within the personal training and physical therapy career paths. Prerequisite: KINE 3415 and KINE 3325.

KINE 4339. SPORTS LEADERSHIP AND MANAGEMENT INTERNSHIP. 3 Hours.
Individualized training and experience in a youth, college, professional or other sport-based organization. Students will work with a mentor and university supervisor in a community-based setting to better understand, explore, and apply principles of coaching and operations. Prerequisite: KINE majors and Senior standing.

KINE 4350. SPORTS PSYCHOLOGY. 3 Hours.
The course will provide an overview of the growing field of Sports Psychology, which involves applying psychological science to sports. Topics such as maximizing sports performance, elite performance and personality, motivation techniques in sports, leadership skills in sports, etc., will be covered.

KINE 4351. ETHICAL PRACTICES IN HEALTH PROFESSIONS. 3 Hours.
Study of ethical standards and how those are incorporated into practice and decision-making that relate to interactions with individuals, organizations, and communities. Exploration of strategies for public health, health care, and other allied healthcare organizations to work together or individually to impact the health of a community. Prerequisite: Junior status, KINE 2350 and KINE 3350.

KINE 4352. PUBLIC HEALTH SCIENCES AND METHODS. 3 Hours.
Identify scientific concepts and research methods of population health, along with the basic processes, approaches, and interventions that identify and address the major health-related needs and concerns of populations. Analysis of project implementation such as planning, assessment and evaluation. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, and KINE 3354.

KINE 4354. PUBLIC HEALTH ADVOCACY AND LEADERSHIP. 3 Hours.
Appraisal of leadership philosophies and actions that reflect and model effective strategies for protecting and promoting the public's health. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, KINE 3354, MANA 4326, KINE 4352, KINE 4355, KINE 4357, HEED 4311. Concurrent enrollment in KINE 4353 recommended.

KINE 4355. COMMUNICATION FOR HEALTH PROFESSIONALS. 3 Hours.
Information and experiences that identify the health literacy of populations, including addressment of barriers and unique situations for vulnerable populations. Communication of information through appropriate, culturally competent methodologies. Integration of basic concepts of public health-specific communication into technical and professional writing. The use of mass media and electronic technology. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353 and KINE 3354.
KINE 4356. PUBLIC HEALTH PROJECT DESIGN & ADMINISTRATION. 3 Hours.
This course includes content designed to develop the knowledge, skills and competencies necessary for public health project management. The course includes experiential learning activities and case studies that integrate practice-based learning on topics such as project design, team dynamics, project evaluation and quality improvement measures. Prerequisite: KINE 2350 and junior status.

KINE 4357. PREPARATION FOR THE PUBLIC HEALTH WORKFORCE. 3 Hours.
The development and operational systems and processes in public health programs and facilities will be presented, including: concepts and experiences necessary for success in the workplace, community dynamics, independent work and development of a personal work ethic, networking and professional communication, and teamwork. The student will participate in multiple career readiness learning experiences through a co-curricular collaboration with UTA Career Services. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, KINE 3354 and MANA 4326.

KINE 4358. APPLIED APPROACHES TO DIVERSITY AND CULTURAL AWARENESS IN PUBLIC HEALTH ORGANIZATIONS. 3 Hours.
Applied Approaches to Diversity and Cultural Awareness in Public Health Organizations This course examines the changing demographics of the public health workforce and organizations, presenting students with varied perspectives, approaches and competencies required for understanding and appreciation of greater diversity across the public health and healthcare systems.

KINE 4359. PUBLIC HEALTH CUMULATIVE EXPERIENCE. 3 Hours.
Individualized learning opportunity to integrate, synthesize and apply knowledge through cumulative and experiential activities. All students complete a cumulative, integrative and scholarly or applied experience or inquiry project that serves as an optimum point to the education experience. These experiences may include, but are not limited to, internships, service-learning projects, senior seminars, portfolio projects, research papers or honors theses. Students are encouraged to gain exposure to local-level public health professionals and/or agencies that engage in public health practice. To be taken during the final semester prior to graduation. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, KINE 3354, KINE 4352, KINE 4355, KINE 4357 and MANA 4326 required. Corequisite: KINE 4354.

KINE 4387. EXERCISE SCIENCE PRACTICUM. 3 Hours.
Academic training within the internal setting of U.T. Arlington’s exercise science laboratories. Each student will receive 135 hours of professional practicum experience in a variety of exercise science settings including wellness, physical fitness activity classes, physical fitness theory classes, the physical fitness center, and/or other exercise science settings. Prerequisite: Current CPR certification, KINE 4315, KINE 4316, and permission of instructor.

KINE 4388. EXERCISE SCIENCE INTERNSHIP. 3 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, cardiac rehabilitation, fitness center) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 135 hours in the field is required for completion of the course. Prerequisite: KINE 4415 (or Corequisite).

KINE 4389. FITNESS MANAGEMENT INTERNSHIP. 3 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, cardiac rehabilitation, fitness center) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 135 hours in the field is required for completion of the course. Prerequisite: KINE 4415 (or Corequisite).

KINE 4390. PRACTICUM IN SPORT PERFORMANCE. 3 Hours.
Designed on an individual basis as a field experience in the observation of sport performance, and the application of performance principles to sport participation. Students must make application for enrollment prior to October 1 for Spring Semester and prior to April 1 for Fall Semester.

KINE 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of department chairperson.

KINE 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or a project under the direction of a faculty member in the major department.

KINE 4395. INDIVIDUAL STUDY IN EXERCISE AND SPORT. 3 Hours.
The completion of an existing course on an individual basis as contracted with an approved faculty member. This procedure is limited to emergency situations, and must be identified through the departmental advising process.

KINE 4396. SPECIAL TOPICS IN EXERCISE AND SPORT. 3 Hours.
Designed to meet the current needs of students. May be repeated for credit when the topic changes.

KINE 4400. APPLIED EXERCISE PHYSIOLOGY. 4 Hours.
Application of physiological principles of training of physical fitness and sport; examination of factors influencing anaerobic and aerobic training methods and their effect on fitness. Physiological responses studied include cardiovascular, bioenergetics, and extreme environments. Site visits, laboratory experiences and a research project enhance the student's understanding of physiological changes and career paths in exercise science. Prerequisite: KINE 3315, KINE 3325, KINE 4315, KINE 4316, MATH 1302 and MATH 1308.

KINE 4415. FITNESS ASSESSMENT/PROGRAMMING. 4 Hours.
Classroom and laboratory experiences provide the student with an opportunity to become familiar with the assessment of physical fitness including graded exercise testing, metabolic studies, basic ECG interpretation, and body composition. The student will also learn risk factor identification and exercise prescription. Course credit may not be granted for both KINE 4315 and KINE 4415. Prerequisite: KINE 3415 and KINE 3325.
KINE 4420. APPLIED MOTOR BEHAVIOR. 4 Hours.
Application of motor behavior and biomechanical principles as well as factors influencing learning, re-learning and enhancing motor skills will be examined. Students will craft a research project to enhance their understanding of principles of motor behavior and will be involved in several case studies that can help understand how to apply motor behavior in their career paths. Prerequisite: KINE 3325; KINE 3388; KINE 4323.

KINE 4490. EXERCISE SCIENCE INTERNSHIP. 4 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, cardiac rehabilitation, fitness center) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 180 hours in the field is required for completion of the course. Prerequisite: KINE 4415 (or Corequisite).

KINE 4491. MRS INTERNSHIP. 4 Hours.
Individualized academic training in an external professional movement or rehabilitation setting (e.g., hospital, OT clinic, SLP clinic, school, recreation center, therapy setting, etc) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 225 hours in the field is required for completion of the course. Prerequisite: KINE 3388; KINE 3415.

KINE 4589. EXERCISE SCIENCE INTERNSHIP. 5 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, cardiac rehabilitation, fitness center) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 225 hours in the field is required for completion of the course. Prerequisite: KINE 4415 (or Corequisite).

KINE 4639. SPORTS LEADERSHIP AND MANAGEMENT INTERNSHIP II. 6 Hours.
Individualized training and experience in a youth, college, professional or other sport-based organization. Students will work with a mentor and university supervisor in a community-based setting to better understand, explore, and apply principles of coaching and operations. Prerequisite: KINE majors and Senior standing.

KINE 4647. CLINICAL TEACHING PHYSICAL EDUCATION EC-12. 6 Hours.
This supervised course is designed as a culminating field experience of pre-service professional preparation giving an opportunity to practically apply theoretical and pedagogical knowledge in real school settings. Applied experience will be attained in both Elementary and Secondary settings. Criminal background check required. Prerequisite: KINE 1315, KINE 2301, KINE 3304, KINE 3306, KINE 3325, KINE 3388, KINE 4193, KINE 4319, KINE 4320, KINE 4321, LIST 4343, and EDUC 4340.

KINE 4659. PUBLIC HEALTH EXTENDED CUMULATIVE EXPERIENCE. 6 Hours.
Individualized practice-based public health work experience in a professional public health-related setting (e.g., public health agency, nonprofit organization, legislative representative office, hospital) under the direct supervision of a public health professional. To be taken during the final semester prior to graduation. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, KINE 3354, KINE 4352, KINE 4355, KINE 4357 and MANA 4326 required. Corequisite: KINE 4354.

KINE 4689. FITNESS MANAGEMENT INTERNSHIP. 6 Hours.
Designed on an individual basis to allow the student to apply academic training in a professional fitness center under the direct supervision of a fitness specialist. Prerequisite: Current CPR certification, KINE 4315, KINE 4316, KINE 4387 (or concurrent enrollment), proof of sufficient professionally liability insurance, and permission of instructor.

KINE 4988. EXERCISE SCIENCE INTERNSHIP. 9 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, university laboratory) under the direct supervision of an exercise science professional. Prerequisite: KINE 4315, KINE 4316, KINE 4387 (or concurrent enrollment), current CPR certification, proof of sufficient professional liability insurance, and permission of instructor.

KINE 4989. FITNESS MANAGEMENT INTERNSHIP. 9 Hours.
Designed on an individual basis to allow the student to apply academic training in a professional fitness center under the direct supervision of a fitness specialist. Prerequisite: Current CPR certification, KINE 4315, KINE 4316, KINE 4387 (or concurrent enrollment), proof of sufficient professionally liability insurance, and permission of instructor.

KINE 5120. ATHLETIC TRAINING CLINICAL I. 1 Hour.
Clinical experiences performed in an athletic training setting or other health care facility under the supervision of a program approved health care provider. Course will also focus on professional development and evidence based practice topics. Prerequisite: Admission to the MSAT Program.

KINE 5125. IMMUNOLOGY. 1 Hour.
This course will include a brief review of the immune system and factors that affect immune function with emphasis on the effect of exercise and stress on muscle and overall immune function. The effect of nutrition and over-training on the immune system and associated syndromes/diseases will also be presented.

KINE 5128. CLINICAL DIAGNOSTIC PROCEDURES. 1 Hour.
This course provides fundamental clinical knowledge of commonly utilized diagnostic procedures and tests in medical practice. Emphasis will be placed on understanding of indications, contraindications, and clinical implications of diagnostic tests and understanding of normal and diseased states. Correlation and integration of test results into clinical examination findings and clinical plan of care will be addressed. Prerequisite: Admission to MSAT Program.
KINE 5130. Clinical Athletic Training II. 1 Hour.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of 250 hours of clinical experience under the supervision of a program approved clinical preceptor. Prerequisite: KINE 5420, KINE 5220, KINE 5120.

KINE 5140. Clinical Athletic Training III. 1 Hour.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of 250 hours of clinical experience under the supervision of a program approved clinical preceptor. Prerequisite: KINE 5130.

KINE 5150. Clinical Athletic Training IV. 1 Hour.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of 250 hours of clinical experience under the supervision of a program approved clinical preceptor. Prerequisite: KINE 5140.

KINE 5160. Clinical Athletic Training V. 1 Hour.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of 250 hours of clinical experience under the supervision of a program approved clinical preceptor. Prerequisite: KINE 5150.

KINE 5170. JOURNAL CLUB IN PHYSIOLOGY. 1 Hour.
This course is designed to provide the students an opportunity to learn the art of critically reading and interpreting research articles. There will be emphasis on identifying strengths and weakness of research studies. There will also be an opportunity for the students to present their research study ideas and / or their preliminary findings of their research to the class. This will provide an opportunity for students to interact and receive / provide feedback regarding methodological approaches and interpretation of findings. Lastly, the student will learn how to prepare and deliver presentations to an audience.

KINE 5190. SPECIAL TOPICS IN KINESIOLOGY. 1 Hour.
In-depth study of selected topics in physical education and exercise science. May be repeated when topics vary. Prerequisite: consent of instructor.

KINE 5191. INTERNSHIP IN CARDIOPULMONARY REHABILITATION. 1 Hour.
The student will complete 400 internship hours in an approved Cardiopulmonary rehabilitation setting. The student may take two semesters of KINE 5191 at 200 hours each. The student will be involved in patient/client assessment, training, rehabilitation, risk factor identification and lifestyle management services provided for individuals with or at risk for cardiovascular, pulmonary, and metabolic diseases. In addition the student will observe common cardiac surgeries and diagnostic procedures to better understand the pathophysiology and treatment of cardiovascular, pulmonary and metabolic disease.

KINE 5192. INTERNSHIP IN GRADED EXERCISE TESTING FOR HIGH RISK POPULATIONS. 1 Hour.
The student will complete 200 hours of graded exercise testing in an approved hospital or outpatient clinical setting which conducts exercise tests for high risk populations, including clients with suspected cardiopulmonary and metabolic diseases. The student will be exposed to noninvasive (echocardiography and graded exercise testing) and invasive methods used to diagnose cardiopulmonary and metabolic disease, including procedures conducted in cath and nuclear testing laboratories.

KINE 5193. PHYSIOLOGY OF EXERCISE INTERNSHIP. 1 Hour.
Individualized academic training in an external professional exercise physiology setting (e.g., physical medicine, athletic training, external laboratory, health/fitness facility, professional teams or sports management) under the direct supervision of an exercise science professional.

KINE 5194. RESEARCH IN KINESIOLOGY. 1 Hour.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 5195. INTERNSHIP IN GRADED EXERCISE TESTING FOR HIGH RISK POPULATIONS. 1 Hour.
The student will complete 200 hours of graded exercise testing in an approved hospital or outpatient clinical setting which conducts exercise tests for high risk populations, including clients with suspected cardiopulmonary and metabolic diseases. The student will be exposed to noninvasive (echocardiography and graded exercise testing) and invasive methods used to diagnose cardiopulmonary and metabolic disease, including procedures conducted in cath and nuclear testing laboratories.

KINE 5196. LABORATORY TECHNIQUES IN EXERCISE SCIENCE. 1 Hour.
A primary objective of this course is to further your understanding of exercise physiology. A second but equally important objective is to enhance your ability for critical thinking on exercise physiology through the scientific process. This includes formation of a research question, hypothesis, designing an experiment, and inferring conclusions from data. Secondary objectives include improving technology skills to assist collecting and analyzing data, and writing and oral communication skills for demonstrating understanding of the physiological principles.

KINE 5198. THESIS. 1 Hour.

KINE 5220. PREVENTATIVE AND ACUTE CARE TECHNIQUES IN ATHLETIC TRAINING. 2 Hours.
Classroom and laboratory experiences designed to provide students with formal instruction and evaluation in the prevention and acute care of activity related injuries and illnesses.
KINE 5221. CLINICAL ATHLETIC TRAINING II. 2 Hours.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of hours of clinical experience under the supervision of a program approved clinical preceptor. The course will also provide instruction in taping, bandaging, orthotics, casting, and durable medical equipment. Prerequisite: KINE 5120, KINE 5230, KINE 5231.

KINE 5222. CLINICAL ATHLETIC TRAINING III. 2 Hours.
Lecture and associated clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of hours of clinical experience under the supervision of a program approved clinical preceptor. The course will also include content related to psychosocial aspects of athletic training. Prerequisite: KINE 5221, KINE 5232, KINE 5348.

KINE 5223. CLINICAL ATHLETIC TRAINING IV. 2 Hours.
Lecture and associated clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of clinical hours of experience under the supervision of a program approved clinical preceptor. The course will also focus on professional development and cultural competence for the athletic trainer. Prerequisite: KINE 5222, KINE 5233, KINE 5354, KINE 5355.

KINE 5224. CLINICAL ATHLETIC TRAINING V. 2 Hours.
Lecture and associated clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of hours of clinical experience under the supervision of a program approved clinical preceptor. The course will include review of major content and steps to prepare for professional exams. Prerequisite: KINE 5223, KINE 5234, KINE 5341, KINE 5356.

KINE 5225. CLINICAL ATHLETIC TRAINING VI. 2 Hours.
Lecture and associated clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of hours of clinical experience under the supervision of a program approved clinical preceptor. The course will also include topics related to effective transition to practice upon graduation. Prerequisite: KINE 5333, KINE 5227, KINE 5224.

KINE 5226. PATHOPHYSIOLOGY AND PHARMACOLOGY II. 2 Hours.
Further study of acute and chronic illnesses and their response to, and impact on, physical activity. Discussion of pharmacological agents used in the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: KINE 5348.

KINE 5227. LITERATURE AND RESEARCH FOR THE ATHLETIC TRAINER. 2 Hours.
This course is an overview of concepts and procedures necessary for designing, conducting, and critically appraising research in Athletic Training from multiple research paradigms. The course will focus on the steps involved in the administration of a research project, including literature review, design, data collection and analysis. Prerequisite: KINE 5223, KINE 5234, KINE 5341, KINE 5356.

KINE 5228. SEMINAR IN ATHLETIC TRAINING. 2 Hours.
A capstone course designed to provide students the opportunity to synthesize and integrate the athletic training theories and concepts taught in the previous courses. Class discussions and projects will emphasize health care administration, professional development, cultural competence, transition to practice, inter-professional education and skills required of the entry-level athletic trainer. Prerequisite: KINE 5333, KINE 5227, KINE 5224.

KINE 5229. FUNCTIONAL ANATOMY AND BIOMECHANICS FOR THE ATHLETIC TRAINER. 2 Hours.
This course builds on prerequisite knowledge of human musculoskeletal anatomy to describe human movement. Principles of biomechanics and kinesiology will guide the understanding of mechanical and physiologic interactions between muscles and joints to form the basis of understanding normal and pathological movement. Prerequisite: Admission to MSAT Program.

KINE 5230. FOUNDATIONS OF ORTHOPEDIC ASSESSMENT AND THERAPEUTIC INTERVENTIONS. 2 Hours.
This course is designed to provide the entry level athletic training student with classroom and laboratory experiences to develop fundamental skills in orthopedic injury assessment and an understanding of the theory and the basic principles of therapeutic interventions including planning, implementing, documenting, and evaluating intervention programs for the rehabilitation and reconditioning of injuries and illnesses of those involved with physical activity. Prerequisite: Admission to MSAT Program.

KINE 5231. FUNDAMENTALS OF ATHLETIC TRAINING I. 2 Hours.
This course is designed to provide the entry level athletic training student with classroom and laboratory experiences to provide an introduction to the profession and the role of athletic trainers in the overall health care environment. Emphasis will be placed on the epidemiology of orthopedic injuries, orthopedic trauma, emergency planning and care, cold and hot therapeutic modalities, and prevention of sudden death. Prerequisite: Admission to MSAT Program.

KINE 5232. FUNDAMENTALS OF ATHLETIC TRAINING II. 2 Hours.
This course is designed to provide the entry level athletic training student with classroom and laboratory experiences to further their development as an athletic trainer in a dynamic health care system. Emphasis will be placed on interprofessional practice, prevention of sudden death, nutrition for the physically active, ergonomics, body composition assessment, and fitness assessment/programming. Prerequisite: Admission to MSAT Program.
KINE 5233. THERAPEUTIC MODALITIES. 2 Hours.
This course is designed to provide the entry level athletic training student with classroom and laboratory experiences to provide an understanding of the theory and application of common therapeutic modalities for the treatment of musculoskeletal injuries. Emphasis will be placed on using the disablement model to plan, implement, and document the use of therapeutic modalities for the treatment and rehabilitation of injuries and illnesses of those involved with physical activity. Critical appraisal of research studies regarding the effectiveness and efficacy of therapeutic modalities will also be emphasized. Prerequisite: Admission to MSAT Program.

KINE 5234. CLINICAL REASONING AND DECISION MAKING. 2 Hours.
This course is designed to provide an understanding and application of theories and frameworks to clinical decision making. Students will work toward becoming an effective practitioner, able to make clinical decisions by studying clinical situations and how health care professionals make clinical decisions. Emphasis will be placed on problem solving strategies, decision making and evidence based rationale. Clinical reasoning will be developed while integrating knowledge and skills in management of complex clinical conditions using scientific and contemporary evidence-based clinical knowledge. Prerequisite: Admission into MSAT Program.

KINE 5235. ADVANCED FUNCTIONAL ASSESSMENT AND CORRECTIVE EXERCISE. 2 Hours.
This course will provide classroom and laboratory experiences that introduce functional assessment and corrective exercises. Specific topics will include advanced manual therapy techniques designed to restore body symmetry and theories of functional movement. Evidence-based application of functional assessment, evaluation and assignment of corrective exercises will be emphasized along with the critical appraisal of research studies regarding the effectiveness and efficacy of a variety of advanced therapeutic interventions. Prerequisite: Admission to MSAT Program.

KINE 5290. SPECIAL TOPICS IN KINESIOLOGY. 2 Hours.
In-depth study of selected topics in physical education and exercise science. May be repeated when topics vary. Prerequisite: consent of instructor.

KINE 5291. INTERNSHIP IN CARDIOPULMONARY REHABILITATION. 2 Hours.
The student will complete 400 internship hours in an approved Cardiopulmonary rehabilitation setting. The student may take two semesters of KINE 5191 at 200 hours each. The student will be involved in patient/client assessment, training, rehabilitation, risk factor identification and lifestyle management services provided for individuals with or at risk for cardiovascular, pulmonary, and metabolic diseases. In addition the student will observe common cardiac surgeries and diagnostic procedures to better understand the pathophysiology and treatment of cardiovascular, pulmonary and metabolic disease.

KINE 5292. SPECIAL TOPICS IN KINESIOLOGY. 2 Hours.

KINE 5293. PHYSIOLOGY OF EXERCISE INTERNSHIP. 2 Hours.
Individualized academic training in an external professional exercise physiology setting (e.g., physical medicine, athletic training, external laboratory, health/fitness facility, professional teams or sports management) under the direct supervision of an exercise science professional.

KINE 5294. RESEARCH IN KINESIOLOGY. 2 Hours.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 5298. THESIS. 2 Hours.

KINE 5300. RESEARCH METHODS IN KINESIOLOGY. 3 Hours.
This course is an overview of concepts and procedures necessary for designing, conducting, and analyzing research in Kinesiology from multiple research paradigms. The course will focus on the steps involved in the administration of a research project, including literature review, design, data collection and analysis.

KINE 5305. APPLIED STATISTICAL PRINCIPLES IN KINESIOLOGY. 3 Hours.
The course covers descriptive statistics, elementary probability, one- and two-population mean and variance comparisons, ANOVA, simple linear regression, and correlations. In addition, more advanced principles in parametric and non-parametric statistics will be emphasized.

KINE 5320. ADVANCED PHYSIOLOGY OF EXERCISE. 3 Hours.
Lecture and laboratory sessions are designed to investigate concepts of energy metabolism, lactate production and accumulation, energy expenditure, excess post exercise oxygen consumption, cardiovascular and temperature regulation, neuromuscular control, aerobic and anaerobic adaptations and ergonomics.

KINE 5322. METABOLISM & EXERCISE BIOCHEMISTRY. 3 Hours.
This course will address the regulation of exercise metabolism as well as the distinct biochemical pathways through which energy transduction occurs. This will allow the student to appreciate not only the end result of metabolism, ultimately the production and maintenance of cellular ATP levels, but also the pathways that biological machines use to achieve ATP homeostasis. Calorimetry, respiratory exchange ratio, and substrate utilization during exercise will be assessed as part of the laboratory section of this course.

KINE 5323. MOTOR CONTROL AND LEARNING. 3 Hours.
This course advances on fundamental concepts of motor behavior and performance combining theoretical principles to a variety of realistic contexts to provide the basis of skilled behavior. Contemporary research in human motor behavior models is used to identify effective solutions to practical problems and to spark ideas for optimizing development, learning, and control of motor skills.

KINE 5326. CARDDIACIRCULATORY PHYSIOLOGY OF EXERCISE. 3 Hours.
The structure and function of the cardiovascular and circulatory system will be studied, as well as, cardiac control, the cardiac cycle, cardiac output, hemodynamics, vascular resistance, arterial-venous oxygen difference and oxygen delivery and consumption. Heat production and thermal control during exercise will also be addressed in lecture and laboratory sessions.
KINE 5327. PULMONARY PHYSIOLOGY OF EXERCISE. 3 Hours.
Examines the structure and function of the pulmonary system including mechanics of breathing, lung capacity tests, pulmonary circulation, lung diseases, gas exchange, ventilation, diffusion, capacity, acid/base balance, neural and chemical regulation of breathing, and blood flow with respect to rest and exercise values in healthy and diseased populations. Prerequisite: KINE 5320.

KINE 5328. NEUROMUSCULAR PHYSIOLOGY OF EXERCISE. 3 Hours.
The structure and function of muscle, including the motor unit, control and integration, central and peripheral modifiers of neuromuscular control and biochemical characteristics of fibers will be studied. These concepts will also be applied to concepts in strength and power development.

KINE 5329. STRENGTH & CONDITIONING IN SPORT AND PERFORMANCE. 3 Hours.
The course covers the physiology and biomechanics of strength training and conditioning. Additional topics include: testing and evaluation of athletes, resistance training techniques, training program design, and organization administration of a strength training facility. This course is designed to prepare students to take the CSCS certification examination. Prerequisite: current CPR certification, KINE 3300, KINE 3301, KINE 3315, or permission of the instructor.

KINE 5330. ENVIRONMENTAL PHYSIOLOGY OF EXERCISE. 3 Hours.
This course will address the impact of environmental stress (e.g., thermal, gravitational, microgravity, etc.) on the cardiovascular system. Related focus will be given to cardiac function, blood pressure regulation and thermoregulation. Topics will be addressed in lecture and laboratory sessions. *Doctoral students will be required to complete an additional research-related assignment.

KINE 5331. OBESITY & WEIGHT MANAGEMENT. 3 Hours.
This course is a review of the scientific literature on the causes and consequences of obesity. Topics include techniques for assessing body composition, factors promoting fat metabolism and deposit, traditional and non-traditional weight-loss programs, and adherence to weight-loss programs. Offered as KINE 4331 and KINE 5331. Credit will be granted only once. Prerequisite: KINE 5320 or permission of department.

KINE 5332. HEALTH CARE ADMINISTRATION. 3 Hours.
A study of the administrative issues and management theories that may be encountered in overseeing an athletic training/sports medicine program. Special emphasis is placed on the practical application of concepts related to legal liability, facility design and maintenance, financial and budget management, common health insurance models, insurance contract negotiation, strategic planning as a means to assess and promote organizational improvement, the impact of organizational structure on the daily operations of a healthcare facility, components of developing and implementing a basic business plan, medical record and documentation systems, federal and state infection control regulations and guidelines, risk management plan development, emergency action planning, and general day to day operations. Prerequisites: KINE 5223, KINE 5234, KINE 5341, KINE 5356.

KINE 5333. Seminar in Athletic Training. 3 Hours.
Synthesis of theories and concepts in athletic training. Review of the competencies and proficiencies in athletic training with special emphasis on professional development and the refinement of clinical decision-making.

KINE 5334. GRADED EXERCISE TESTING AND PRESCRIPTION. 3 Hours.
The knowledge and skills necessary for assessment of health history and appraisal, blood pressure, electrocardiogram, cardiovascular fitness and function will be acquired in lecture and laboratory sessions. Various test modalities and protocols will be discussed for health and diseased populations.

KINE 5335. ECG INTERPRETATION. 3 Hours.
Principles of electrocardiography will be explored, with emphasis on interpretation of resting and stress ECGs. Interpretation of dynamic rhythm strips will prepare students to work in cardiac rehabilitation and other allied health professions.

KINE 5336. STRENGTH AND CONDITIONING IN GENERAL POPULATIONS: HEALTH AND DISEASE. 3 Hours.
This course covers the physiology and biomechanics of strength training and conditioning as it applies to the general populations across the spectrum of health and disease. This includes: testing, evaluation, resistance training techniques and training program design for individuals with orthopedic injuries and rehabilitation concerns, metabolic conditions (e.g., diabetes), youth, elderly, and pregnant or post-prenatal women. This course is designed to prepare students to take the NSCA-CPT, and apply the skills needed to be a leader within the personal training and physical therapy career paths. Prerequisite: KINE 3300, KINE 3315, and KINE 3325.

KINE 5337. EXERCISE PRESCRIPTION FOR SPECIAL POPULATIONS. 3 Hours.
This course will discuss the pathophysiology of prevalent cardiovascular, metabolic and pulmonary diseases. Methods of exercise prescription and issues of concern will also be presented for these populations, as well as, low back pain, pregnancy, osteoporosis, cancer, children, older adults, fibromyalgia, multiple sclerosis and cardiac disease.

KINE 5338. ENVIRONMENTAL PHYSIOLOGY. 3 Hours.
This course will address the impact of environmental stress (e.g., thermal, gravitational, microgravity, etc.) on the cardiovascular system. Related focus will be given to cardiac function, blood pressure regulation and thermoregulation. Topics will be addressed in lecture and laboratory sessions.

KINE 5341. ADVANCED IMMEDIATE AND EMERGENCY CARE. 3 Hours.
This course is designed to provide knowledge and skills related to the immediate and emergent care of injuries/conditions in work settings of athletic trainers. Prerequisite: KINE 5231.

KINE 5342. IMMEDIATE AND EMERGENCY CARE 2. 3 Hours.
This course is designed to build off of Immediate and Emergency Care 1 and include didactic and clinical experiences surrounding best practices in general emergency care and acute management of injuries and illness. Students will also be required to complete a scholarship project concerning general emergency care and acute management of injuries and illnesses. Clinical hours will be required in an emergency medicine environment.
KINE 5343. LITERATURE AND RESEARCH FOR THE ATHLETIC TRAINER. 3 Hours.
This course is an overview of concepts and procedures necessary for designing, conducting, and critically appraising research in Athletic Training from multiple research paradigms. The course will focus on the steps involved in the administration of a research project, including literature review, design, data collection and analysis. Prerequisite: KINE 5432.

KINE 5344. SCHOLARSHIP IN ATHLETIC TRAINING PRACTICE. 3 Hours.
This course is designed to build off of the foundations of Literature and Research for the Athletic Trainer with further study of data collection and analysis as well as evidence-based practice principles. Students will be expected to complete a scholarship project related to athletic training practice. Prerequisite: KINE 5227.

KINE 5345. SPORT NUTRITION. 3 Hours.
Overview of nutrients necessary for healthful living and nutritional impact on reducing risk factors of lifestyle diseases. Application of nutrient recommendations for sports and exercise activities, including fluid replacement, sports supplements, and ergogenic aids. In addition, students will construct plans for dietary intake of athletes during training and competition for both endurance and resistance training. Offered as KINE 5345 and KINE 3301. Credit will be granted only once.

KINE 5346. ADVANCED FUNCTIONAL ASSESSMENT AND CORRECTIVE EXERCISE. 3 Hours.
Classroom and laboratory experiences that provide an introduction to functional assessment and corrective exercises. Specific topics will include an analysis of common biomechanics of movement and the evidence-based application of functional assessment and assignment of corrective exercises. Prerequisite: KINE 5420, KINE 5430, KINE 5431, KINE 5433, KINE 5443, KINE 5434.

KINE 5347. ADVANCED FUNCTIONAL ASSESSMENT AND CORRECTIVE EXERCISE. 3 Hours.
Classroom and laboratory experiences that provide an introduction to functional assessment and corrective exercises. Specific topics will include an analysis of common biomechanics of movement and the evidence-based application of functional assessment and assignment of corrective exercises. Prerequisite: KINE 5420, KINE 5430, KINE 5431, KINE 5433, KINE 5443, KINE 5434.

KINE 5348. PATHOPHYSIOLOGY AND PHARMACOLOGY I. 3 Hours.
This course provides an introduction to the study of acute and chronic illnesses and their response to, and impact on, physical activity. Discussion of pharmacological principles will be incorporated as it relates to the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: KINE 5120, KINE 5231.

KINE 5350. APPLIED BIOMECHANICS. 3 Hours.
Application of Newtonian mechanics to human movement analysis. Biomechanical models using three-dimensional video and force plate data will be used to analyze human movement.

KINE 5353. LOWER EXTREMITY ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the lower extremities, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for lower extremity injuries. Prerequisite: Admission to MSAT Program.

KINE 5354. UPPER EXTREMITY ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the upper extremities, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for upper extremity injuries. Prerequisite: Admission to MSAT Program.

KINE 5355. PATHOPHYSIOLOGY & PHARMACOLOGY II. 3 Hours.
This course provides further study of acute and chronic illnesses and their response to, and impact on, physical activity. Discussion of pharmacological principles will be incorporated as it relates to the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: KINE 5348.

KINE 5356. HEAD AND SPINE ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the head and spine, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for head and spine injuries. Prerequisite: KINE 5353, KINE 5354.

KINE 5357. PREVENTATIVE MEDICINE AND POPULATION HEALTH. 3 Hours.
This course will highlight the athletic trainer's role in promoting and maintaining the health and well-being of individuals and populations. Development, implementation, and assessment of preventative measures to reduce injury risk and long-term health conditions across the lifespan will be addressed. Emphasis will also be placed on population-level problems, including health risks and determinants as well as individual and behavioral factors that affect health outcomes. Prerequisite: Admission to MSAT Program.

KINE 5360. FUNDAMENTAL PRINCIPLES OF INTEGRATIVE PHYSIOLOGY. 3 Hours.
This course is designed to provide a fundamental understanding of human physiology. Physiological function is a complex process that involves a complex interaction among the various physiological systems. As such there will be an emphasis on the integration of cellular, cardiovascular, renal, autonomic, respiratory, and endocrine physiology.

KINE 5362. PRINCIPLES OF MOVEMENT NEUROSCIENCE. 3 Hours.
This course focuses on principles of movement that have emerged from the computational study of motor control. The principles and application to processes such as motor planning, control, estimation, prediction and learning are explored.
KINE 5363. CONDITIONS OF THE MOTOR SYSTEM IN CHILDHOOD. 3 Hours.
This course explores a prevalent dysfunction of the motor system in childhood, known as Developmental Coordination Disorder (DCD). This class explores potential causes of DCD, common mechanisms and impairments, intervention methods and their effectiveness, and associated co-morbidities. In addition, students will understand the current state of research in the field and understand future avenues for research.

KINE 5364. CURRENT PERSPECTIVES IN MOTOR LEARNING AND CONTROL. 3 Hours.
This course explores five aspects of the new directions in research in the Motor Learning and Control field: Perception-Action mechanisms, Dynamical systems, Motor disorders, Learning and intervention for motor behavior, and neural mechanisms.

KINE 5365. ADVANCED MOTOR DEVELOPMENT. 3 Hours.
This course explores the current field of research in Motor Development applied to typical and special populations. More specifically, it discusses issues related to motor skill learning in childhood, the development of motor control, the relationship between motor competence and general health, and how lack of appropriate motor skills affect several domains of development (Developmental Coordination Disorder). To that, we use current research articles that discuss each one of these topics from different perspectives.

KINE 5370. GLOBAL HEALTH. 3 Hours.
Today's public health practice requires an awareness of health threats beyond U.S. borders. “Global health” implies health concerns and solutions that are shared worldwide. In this course, students will study global health priorities among different populations, cultures, and health systems. Students will examine health challenges and disease threats faced in resource-constrained countries, and the roles of health determinants, socioeconomics and health equity in improving health outcomes. In addition, students will learn about the foundational elements of global health, including globalization and health, water, sanitation, the burden of infectious and chronic diseases, human rights and global health partnerships.

KINE 5371. PUBLIC HEALTH PROGRAM PLANNING AND EVALUATION. 3 Hours.
Before we can effectively receive funding and implement programs that benefit our communities, we have to answer many questions. Who is the target audience? What are the program’s goals? What are the intended outcomes of the program? How can we measure program effectiveness? Program evaluation is the methodology to develop scientifically sound answers to these questions. This course will teach you how evaluators work with stakeholders and project teams to tailor an intervention to a target audience, and document program activities, outcomes and impact on a community health issue. This course will allow you to have hands-on experience designing and conducting program evaluation.

KINE 5372. INTRODUCTION TO EPIEMIOLOGY. 3 Hours.
By participating in this course students will learn the critical role that epidemiology plays in preventing and controlling disease. This course provides students with a foundation of the methods and concepts used in epidemiology. Students will learn the measures used in epidemiology and apply principles of causality, study design, disease surveillance, and outbreak investigations. In addition, students will be introduced to sources of data used in epidemiologic studies. The major course project will provide students with hands-on experience using skills sought by employers in public health agencies.

KINE 5373. INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH. 3 Hours.
This course provides an overview of the critical environmental health problems in industrialized and developing countries, discusses their causes and solutions, and emphasizes the role of science in environmental policy decisions. Topics include climate change, water and air contaminants, injury risk and prevention in the workplace, food and water-borne disease, toxic metals, and how the body reacts to environmental pollutants.

KINE 5374. RACE, ETHNICITY AND HEALTH. 3 Hours.
Despite advances in medicine and health policies, racial and ethnic health disparities persist. Americans of color have higher mortality rates and an unequal burden of many health concerns compared to their white counterparts. Such health inequities compromise the cultural and economic fabric of our country. This course will discuss the complex relationship between socioeconomic status, race/ethnicity, and health. In addition, this course will examine the economic and societal threats that health disparities pose to our communities and nation, as well as policies and approaches to addressing such disparities.

KINE 5375. COMMUNITY HEALTH. 3 Hours.
This course explores population health, providing students with learning experiences that facilitate an understanding of what public health is and why it is important. Course activities guide students in exploring their role in population health dynamics of their communities. The course will provide students an investigation of theoretical and evidence-based strategies designed to improve community health from population-based approaches. Students will then narrow those areas of foci to contemplate real-world, practice-based learning experiences.

KINE 5376. INTRODUCTION TO BIOSTATISTICS. 3 Hours.
The course will introduce students to analysis skills applied in the public health sciences. Students will learn how to apply descriptive statistics, t-tests, ANOVA, correlation, multiple regression, and non-parametric statistics to public health problems.

KINE 5377. INTRODUCTION TO HEALTH SYSTEMS AND POLICY. 3 Hours.
What is "population health" and why does it matter? Why are U.S. health care costs so high? How is the U.S. health system financed? What are the basic principles of health insurance? Who are the uninsured? It is critical that public health professionals be able to answer these questions and understand the basic functions that comprise the U.S. health care system. This course will help students answer these questions through an introduction to health systems and policy, including the delivery, quality and costs of health care for individuals and populations. The course will also examine the structure, processes and outcomes of health services, financing, organization, outcomes and accessibility of care.
KINE 5378. FOUNDATIONS OF PUBLIC HEALTH. 3 Hours.
This course teaches students what public health is and how it works. The mission of public health is to assure conditions in which people can be healthy. This course will present the history, frameworks, values, and goals of public health which support this mission. Students will study the principles and core responsibilities of public health from a multidisciplinary perspective, with emphasis on the public health core functions of assessment, policy development, and assurance. This course will provide the foundation for further studies in public health practice through developing public health problem solving and decision-making skills through case studies and applied coursework.

KINE 5379. FUNDAMENTALS OF POPULATION HEALTH. 3 Hours.
Public health is charged with advancing health while reducing health care costs. This requires us to move away from a reactionary model of health care delivery and towards models of disease prevention and health promotion. Students will consider how collaborations among organizations within and outside the health care system, and the integration of public health into clinical care, impacts population health. The course will use case studies and applied learning to discuss the role of incentives, financing, data, measurement, structure of health care delivery, and policy in advancing population health.

KINE 5380. URBAN COMMUNITY HEALTH ASSESSMENT. 3 Hours.
We must learn the health needs in a community before we can address those needs to improve the health of the community. Assessment skills allow us to learn what health needs exist in a community by using sound scientific methods to collect evidence about gaps in health. In this course, students will apply quantitative and qualitative methods, data analysis, community mobilization, and capacity building to assess community health needs and strategies for health improvement.

KINE 5381. SOCIAL AND BEHAVIORAL EPIDEMIOLOGY. 3 Hours.
Social epidemiology considers how social determinants impact population health. Behavioral epidemiology studies how lifestyle and behaviors affect health conditions. The class will explore how social, political, cultural, and economic forces influence our health and health behaviors. The course will focus on social and health inequities, and resulting health behaviors. Theory from social science is integrated with epidemiological methods to learn how social circumstances influence behavior and health, and determine how we can target interventions to reduce health inequities in our community, nation, and world. Prerequisite: KINE 5372 Introduction to Epidemiology.

KINE 5382. CHRONIC DISEASE EPIDEMIOLOGY. 3 Hours.
Chronic diseases are the leading causes of death in the United States and globally. Chronic diseases, such as cardiovascular disease, cancer, diabetes, HIV/AIDS, respiratory conditions, and neurologic disorders have devastating consequences for population health. This class will explore and apply epidemiologic methods which help identify strategies to prevent and treat chronic diseases, emphasizing modifiable risk factors. Coursework will aim to increase student understanding of how epidemiologic methods are used to identify determinants of chronic diseases, and how to identify and target interventions to reduce the burden of chronic disease locally, nationally, and across the globe. Prerequisite: KINE 5372.

KINE 5383. COMMUNITY-BASED INTERNSHIP. 3 Hours.
This course is a required 200-hour service learning experience for Master of Public Health (MPH) students which combines specific learning objectives with reflection. The student will apply skills learned in the MPH program in a "real-life" environment. The student will work independently and in teams to complete a defined project, mutually agreed upon between the MPH Graduate Advisor and the partner organization, which benefit both the student and the partner organization. Students will keep a log of hours, work performed, and competencies addressed throughout the internship experience, and comply with specified reporting periods. Prerequisite: KINE 5372, KINE 5373, KINE 5375, KINE 5376, KINE 5377, KINE 5378, KINE 5379, KINE 5380, KINE 5381, KINE 5382, KINE 5384, KINE 5385, KINE 5386.

KINE 5384. PUBLIC HEALTH CAPSTONE EXPERIENCE. 3 Hours.
This course is the culmination of all previous coursework for Master of Public Health (MPH) students, requiring the student to complete a final paper, poster, and oral presentation about the project completed as part of the Community-Based Internship. In addition, the student will complete a professional portfolio comprised of work illustrating the competencies learned during the MPH program and applied during the Internship. Prerequisite: KINE 5372, KINE 5373, KINE 5375, KINE 5376, KINE 5380, KINE 5381, KINE 5382, KINE 5383, and completion of all MPH coursework required for graduation, or concurrent enrollment in final courses needed for graduation.

KINE 5385. COMMUNICATION AND HEALTH. 3 Hours.
Students will learn how interpersonal, organizational, and mass media communications influence health behaviors and health outcomes. Students will study theories and applied techniques of interpersonal communication in health care and health education settings, as well as the theory and practice of media in achieving desired effects from public health messages.

KINE 5386. BIG DATA FOR EPIDEMIOLOGY. 3 Hours.
Big Data have revolutionized science, including the future of public health. This course prepares future public health practitioners to integrate knowledge of epidemiology methods with the data analytics savvy. Students will gain competence in conducting analysis using large, commonly used health-related databases. Learn how to use large datasets to advance your practice of epidemiology by enrolling in this course. Prerequisite: KINE 5376 or KINE 5305. Prior completion or concurrent enrollment in KINE 5372.

KINE 5387. INFECTIOUS DISEASE EPIDEMIOLOGY. 3 Hours.
From Ebola to COVID-19, tuberculosis to hepatitis A--every outbreak has a team of behind-the-scenes disease detectives tracking its source and pathways. Students will learn the methods of infectious disease epidemiology, studying outbreak investigations, disease surveillance, study designs, laboratory diagnosis, and dynamics of transmission. Students must have completed KINE 5372 Introduction to Epidemiology to enroll in this course. Prerequisite: Prior or concurrent enrollment in KINE 5372.
KINE 5388. GLOBAL HEALTH ON-SITE EXPERIENCE ABROAD. 3 Hours.
Students will study the factors impacting health for populations in a selected country outside of the U.S. Then, students will travel to that country at the end of the course for a real life experience learning from people who are impacted by, and/or who help address the health factors in that region. Prerequisite: MPH student or Instructor Permission.

KINE 5389. RESEARCH MANUSCRIPT SUBMISSION. 3 Hours.
The student will collect scientific data in the Physiology of Exercise laboratories or in a work-related environment under the supervision of a faculty member. The student will analyze the data, write a manuscript, and submit a manuscript for publication in a peer-reviewed journal. This course must be taken in the final semester of graduate work and requires approval of the Graduate Advisor.

KINE 5390. SPECIAL TOPICS IN KINESIOLOGY. 3 Hours.
In-depth study of selected topics in physical education and exercise science. May be repeated when topics vary. Prerequisite: consent of instructor.

KINE 5392. SPECIAL TOPICS IN KINESIOLOGY. 3 Hours.

KINE 5393. PHYSIOLOGY OF EXERCISE INTERNSHIP. 3 Hours.
Individualized academic training in an external professional exercise physiology setting (e.g., physical medicine, athletic training, external laboratory, health/fitness facility, professional teams or sports management) under the direct supervision of an exercise science professional.

KINE 5394. RESEARCH IN KINESIOLOGY. 3 Hours.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 5396. RESEARCH IN ATHLETIC TRAINING. 3 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Prerequisite: consent of the instructor.

KINE 5397. INTERNSHIP ATHLETIC TRAINING. 3 Hours.
Individualized clinical experience in an external athletic training or other medical setting (e.g., physician's office, rehabilitation clinic, professional sports teams) under the direct supervision of a health care professional.

KINE 5398. THESIS. 3 Hours.

KINE 5420. CONCEPTS IN ATHLETIC TRAINING. 4 Hours.
Classroom and laboratory experiences that provide an introduction to the profession of Athletic Training with an emphasis on prevention and acute care of activity related injuries and illnesses. Specific topics will include injury prevention strategies; emergency first aid and acute care; superficial application of therapeutic modalities; nutritional considerations; and environmental considerations.

KINE 5430. ORTHOPEDIC ASSESSMENT I. 4 Hours.
A study of the common orthopedic injuries involving the lower extremities, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Prerequisites: KINE 5120, KINE 5220, and KINE 5420.

KINE 5431. Orthopedic Assessment II. 4 Hours.
A study of the common orthopedic injuries involving the upper extremities, spine, head, and face with a special emphasis on recognition, evaluation, diagnosis, and initial management. Prerequisite: KINE 5430.

KINE 5432. PATHOPHYSIOLOGY AND PHARMACOLOGY. 4 Hours.
A study of acute and chronic illnesses and their response to, and impact on, physical activity. Discussion of pharmacological agents used in the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: KINE 5430, KINE 5433, KINE 5130.

KINE 5433. THERAPEUTIC INTERVENTIONS I. 4 Hours.
A study of the scientific theory and basic principles of musculoskeletal rehabilitation and therapeutic modalities. Emphasis will be placed on understanding the disablement model and learning how to plan, implement, document, and evaluate programs for the rehabilitation and reconditioning of injuries and illnesses of athletes and others involved with physical activity. Operation of superficial heating and cooling therapeutic modalities and how manual treatments (e.g., traction, muscle energy and massage) can be incorporated into a rehabilitation program will be investigated. The underlying principles and application techniques for each modality, therapeutic exercise progressions, patient clinical goals, legal and safe practice guidelines, and evidence based therapeutic modality science will allow for critical thinking and problem solving in relation to common upper extremity injuries. Both surgical and non-surgical rehabilitation models for the lower extremity will be discussed with a special emphasis on the use of functional progressions. Prerequisite: KINE 5432, KINE 5220, KINE 5120.

KINE 5434. THERAPEUTIC INTERVENTIONS II. 4 Hours.
A study of the upper extremity and low back rehabilitation protocols and the use of electric therapeutic modalities (e.g., ultrasound, diathermy, laser, and electric stimulation). Emphasis will be placed on understanding the disablement model and learning how to plan, implement, document, and evaluate programs for the rehabilitation and reconditioning of injuries and illnesses of athletes and others involved with physical activity. Operation of electrical therapeutic modalities and how they can be incorporated into a rehabilitation program will be investigated. The underlying principles and application techniques for each modality, therapeutic exercise progressions, patient clinical goals, legal and safe practice guidelines, and evidence based therapeutic modality science will allow for critical thinking and problem solving in relation to common upper extremity and low back injuries. Both surgical and non-surgical rehabilitation models for the upper extremity and low back will be discussed with a special emphasis on the use of functional progressions. Prerequisite: KINE 5433.
KINE 5498. THESIS. 4 Hours.

KINE 5598. THESIS. 5 Hours.

KINE 5647. CLINICAL TEACHING PHYSICAL EDUCATION EC-12. 6 Hours.
This supervised course is designed as a culminating field experience of pre-service professional preparation giving an opportunity to practically apply theoretical and pedagogical knowledge in school settings with a mentor teacher. Applied experience will be attained in both Elementary and Secondary settings. Additionally, a field-research project will be required to be arranged with course supervisor. Criminal background check required. Prerequisite: KINE 1315, KINE 2301, KINE 2302, KINE 3304, KINE 3388, KINE 4319, KINE 4320, KINE 4321, EDUC 5310, EDUC 5314, and LIST 5345.

KINE 5693. PHYSIOLOGY OF EXERCISE INTERNSHIP. 6 Hours.
Individualized academic training in an external professional exercise physiology setting (e.g., physical medicine, athletic training, external laboratory, health/fitness facility, professional teams or sports management) under the direct supervision of an exercise science professional.

KINE 5694. RESEARCH IN KINESIOLOGY. 6 Hours.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 5698. RESEARCH IN KINESIOLOGY. 6 Hours.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 5994. RESEARCH IN KINESIOLOGY. 9 Hours.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 6100. SEMINAR IN KINESIOLOGY. 1 Hour.
Implements the research process with faculty guidance. Students will attend regularly scheduled lectures from internal and external faculty members. Learning activities based on student and faculty interest.

KINE 6103. PROFESSIONAL DEVELOPMENT. 1 Hour.
The philosophy and methods of conducting a university class for undergraduates are examined. Specific tips and suggestions for managing course materials, lectures, audiovisual aids, grading, etc. will be presented. The role of the university instructor as a researcher as well as a teacher will be elaborated. Specific topics will include the ethics and regulation of research, service as a journal referee, corresponding with peers, participating in a research team, manuscript preparation, presentation at professional conferences, and submitting material for publication.

KINE 6105. LABORATORY TECHNIQUE ROTATIONS IN KINESIOLOGY I. 1 Hour.
A primary objective of this course is to further your understanding of lab work in Kinesiology. A second objective is to enhance your ability for critical thinking in Kinesiology through the scientific process. This includes formation of a research question, hypothesis, designing an experiment, and inferring conclusions from data. Secondary objectives include improving technology skills to assist collecting and analyzing data, and writing and oral communication skills for demonstrating understanding of the kinesiology principles. Prerequisite: Consent of faculty.

KINE 6106. LABORATORY TECHNIQUE ROTATIONS IN KINESIOLOGY II. 1 Hour.
A primary objective of this course is to further your understanding of lab work in Kinesiology. A second objective is to enhance your ability for critical thinking in Kinesiology through the scientific process. This includes formation of a research question, hypothesis, designing an experiment, and inferring conclusions from data. Secondary objectives include improving technology skills to assist collecting and analyzing data, and writing and oral communication skills for demonstrating understanding of the kinesiology principles. This section must occur in a different laboratory than KINE 6105. Prerequisite: KINE 6105 and consent of faculty.

KINE 6126. JOURNAL CLUB IN EX PHYSIOL. 1 Hour.
This course is designed to provide doctoral students an opportunity to learn the art of critically reading and interpreting research articles. There will be emphasis on identifying strengths and weakness of research studies. There will also be an opportunity for the students to present their research study ideas and/or their preliminary findings of their research to the class. This will provide an opportunity for students to interact and receive/provide feedback regarding methodological approaches and interpretation of findings. Lastly, the student will learn how to prepare and deliver presentations to an audience. Prerequisite: Instructor Approval.

KINE 6194. RESEARCH IN KINESIOLOGY. 1 Hour.
Individually approved research projects selected from the various areas of Kinesiology. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: Consent of Instructor.

KINE 6293. GRANT WRITING. 2 Hours.
Students will learn strategies associated with grant applications. Students will prepare an individual proposal associated with a research grant application. Although submission for funding (e.g., pre-doctoral fellowship) is not required for the course, students will develop and complete a grant application.

KINE 6294. RESEARCH IN KINESIOLOGY. 2 Hours.
Individually approved research projects selected from the various areas of Kinesiology. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: Consent of the instructor.

KINE 6320. ADVANCED PHYSIOLOGY OF EXERCISE. 3 Hours.
Lecture and laboratory sessions are designed to investigate concepts of energy metabolism, lactate production and accumulation, energy expenditure, excess post exercise oxygen consumption, cardiovascular and temperature regulation, neuromuscular control, aerobic and anaerobic adaptations and ergonomics. *Doctoral students will be required to complete an additional research related topic. Prerequisite: Instructor Approval.
Department of Kinesiology

KINE 6322. METABOLISM & EXERCISE BIOCHEMISTRY. 3 Hours.
This course will address the regulation of exercise metabolism as well as the distinct biochemical pathways through which energy transduction occurs. This will allow the student to appreciate not only the end result of metabolism, ultimately the production and maintenance of cellular ATP levels, but also the pathways that biological machines use to achieve ATP homeostasis. Calorimetry, respiratory exchange ratio, and substrate utilization during exercise will be assessed as part of the laboratory section of this course. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6323. MOTOR CONTROL AND LEARNING. 3 Hours.
This course advances on fundamental concepts of motor behavior and performance combining theoretical principles to a variety of realistic contexts. Contemporary research in human motor behavior models is used to identify effective solutions to practical problems and to spark ideas for optimizing development, learning, and control of motor skills. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6324. CONDITIONALITY OF THE MOTOR SYSTEM IN CHILDHOOD. 3 Hours.
The structure and function of the cardiovascular and circulatory system will be studied, as well as, cardiac control, the cardiac cycle, cardiac output, hemodynamics, vascular resistance, arterial-venous oxygen difference and oxygen delivery and consumption. Heat production and thermal control during exercise will also be addressed in lecture and laboratory sessions. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6325. PRINCIPLES OF MOVEMENT NEUROSCIENCE. 3 Hours.
The structure and function of muscle, including the motor unit, control and integration, central and peripheral modifiers of neuromuscular control and biochemical characteristics of fibers will be studied. These concepts will also be applied to concepts in strength and power development. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6326. CARDIOVASCULAR PHYSIOLOGY OF EXERCISE. 3 Hours.
This course will address the regulation of exercise metabolism as well as the distinct biochemical pathways through which energy transduction occurs. This will allow the student to appreciate not only the end result of metabolism, ultimately the production and maintenance of cellular ATP levels, but also the pathways that biological machines use to achieve ATP homeostasis. Calorimetry, respiratory exchange ratio, and substrate utilization during exercise will be assessed as part of the laboratory section of this course. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6327. PULMONARY PHYSIOLOGY OF EXERCISE. 3 Hours.
This course will address the regulation of exercise metabolism as well as the distinct biochemical pathways through which energy transduction occurs. This will allow the student to appreciate not only the end result of metabolism, ultimately the production and maintenance of cellular ATP levels, but also the pathways that biological machines use to achieve ATP homeostasis. Calorimetry, respiratory exchange ratio, and substrate utilization during exercise will be assessed as part of the laboratory section of this course. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6328. NEUROMUSCULAR PHYSIOLOGY OF EXERCISE. 3 Hours.
The structure and function of muscle, including the motor unit, control and integration, central and peripheral modifiers of neuromuscular control and biochemical characteristics of fibers will be studied. These concepts will also be applied to concepts in strength and power development. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6329. PULMONARY PHYSIOLOGY OF EXERCISE. 3 Hours.
This course will address the impact of environmental stress (e.g., thermal, gravitational, microgravity, etc.) on the cardiovascular system. Related focus will be given to cardiac function, blood pressure regulation and thermoregulation. Topics will be addressed in lecture and laboratory sessions. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6330. ENVIRONMENTAL PHYSIOLOGY OF EXERCISE. 3 Hours.
This course will address the impact of environmental stress (e.g., thermal, gravitational, microgravity, etc.) on the cardiovascular system.Related focus will be given to cardiac function, blood pressure regulation and thermoregulation. Topics will be addressed in lecture and laboratory sessions. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6331. EXERCISE PRESCRIPTION FOR SPECIAL POPULATIONS. 3 Hours.
This course will address the regulation of exercise metabolism as well as the distinct biochemical pathways through which energy transduction occurs. This will allow the student to appreciate not only the end result of metabolism, ultimately the production and maintenance of cellular ATP levels, but also the pathways that biological machines use to achieve ATP homeostasis. Calorimetry, respiratory exchange ratio, and substrate utilization during exercise will be assessed as part of the laboratory section of this course. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6332. APPLIED BIOMECHANICS. 3 Hours.
This course will address the regulation of exercise metabolism as well as the distinct biochemical pathways through which energy transduction occurs. This will allow the student to appreciate not only the end result of metabolism, ultimately the production and maintenance of cellular ATP levels, but also the pathways that biological machines use to achieve ATP homeostasis. Calorimetry, respiratory exchange ratio, and substrate utilization during exercise will be assessed as part of the laboratory section of this course. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6333. FUNDAMENTAL PRINCIPLES OF INTEGRATIVE PHYSIOLOGY. 3 Hours.
The course is designed to provide a fundamental understanding of human physiology. Physiological function is a complex process that involves a complex interaction among the various physiological systems. As such there will be an emphasis on the integration of cellular, cardiovascular, renal, autonomic, respiratory, and endocrine physiology. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6334. PRINCIPLES OF MOVEMENT NEUROSCIENCE. 3 Hours.
This course focusing on principles of movement that have emerged from the computational study of motor control. The principles and application to processes such as motor planning, control, estimation, prediction and learning are explored. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5362 and KINE 6362.

KINE 6335. CONDITIONS OF THE MOTOR SYSTEM IN CHILDHOOD. 3 Hours.
This course explores a prevalent dysfunction of the motor system in childhood, known as Developmental Coordination Disorder (DCD). This class explores potential causes of DCD, common mechanisms and impairments, intervention methods and their effectiveness, and associated co-morbidities. In addition, students will understand the current state of research in the field and understand future avenues for research. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5363 and KINE 6363.

KINE 6336. CURRENT PERSPECTIVES IN MOTOR LEARNING AND CONTROL. 3 Hours.
This course explores five aspects of the new directions in research in the Motor Learning and Control field: Perception-Action mechanisms, Dynamical systems, Motor disorders, Learning and intervention for motor behavior, and neural mechanisms. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5364 and KINE 6364.
KINE 6365. ADVANCED MOTOR DEVELOPMENT. 3 Hours.
This course explores the current field of research in Motor Development applied to typical and special populations. More specifically, it discusses issues related to motor skill learning in childhood, the development of motor control, the relationship between motor competence and general health, and how lack of appropriate motor skills affect several domains of development (Developmental Coordination Disorder). To that, we use current research articles that discuss each one of these topics from different perspectives. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5365 and KINE 6365.

KINE 6389. RESEARCH MANUSCRIPT SUBMISSION. 3 Hours.
The student will collect scientific data in the Physiology of Exercise laboratories or in a work-related environment under the supervision of a faculty member. The student will analyze the data, write a manuscript, and submit a manuscript for publication in a peer-reviewed journal. This course must be taken in the final semester of graduate work and requires approval of the Graduate Advisor. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6394. RESEARCH IN KINESIOLOGY. 3 Hours.
Individually approved research projects selected from the various areas of Kinesiology. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: Consent of the instructor.

KINE 6399. DISSERTATION. 3 Hours.
Preparation and submission of a doctoral dissertation in an area of kinesiology. Graded R/F only. Prerequisite: Admission to candidacy for the Ph.D. in Kinesiology.

KINE 6694. RESEARCH IN KINESIOLOGY. 6 Hours.
Individually approved research projects selected from the various areas of Kinesiology. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: Consent of the instructor.

KINE 6699. DISSERTATION. 6 Hours.
Preparation and submission of a doctoral dissertation in an area of kinesiology. Graded R/F only. Prerequisite: Admission to candidacy for the Ph.D. in Kinesiology.

KINE 6999. DISSERTATION. 9 Hours.
Preparation and submission of a doctoral dissertation in an area of kinesiology. Graded R/F only. Prerequisite: Admission to candidacy for the Ph.D. in Kinesiology.

KINE 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Kinesiology - Graduate Programs

Master of Science in Athletic Training - Mission and Goals

PROGRAM MISSION

The Master of Science in Athletic Training Program at the University of Texas at Arlington is committed to providing educational advancement and excellence to students pursuing a career in athletic training. The program emphasizes critical inquiry, scientific theory, skill acquisition and application, and professional behaviors that advance health and the human condition across diverse populations of patients. Faculty and preceptor mentoring produce graduates that are competent, creative, and caring clinicians who enhance best-practice patient-centered healthcare, exercise sound judgement, and value lifelong learning.

The Master of Science in Athletic Training (MSAT) is guided by program goals and student outcomes:

Program Goal #1

Provide didactic and clinical educational experiences that provide students with the knowledge, skills, and abilities needed to practice in a variety of practice settings and with a diverse population of patients.

1.1: Provide quality didactic education that incorporates the knowledge, skills, and abilities needed to practice as an athletic trainer.

1.2: Provide quality clinical education that supports students' development of the knowledge, skills, and abilities needed to practice as an athletic trainer.

1.3: Provide clinical learning environments that support student development.

1.4: Students will gain experiences in a variety of practice settings.

1.5: Students will engage in patient encounters with a diverse population of patients, including: throughout the lifespan, of different sexes, with different socioeconomic statuses, of varying levels of activity & athletic ability, who participate in nonsport activities.

Program Goal #2

Recruit, admit, retain, and graduate individuals who meet or exceed the MSAT admissions standards and are committed to a career in athletic training.

2.1: Entering students' GPA will meet or exceed the requirement each year.

2.2: Students will progress through the MSAT according to the curricular plan.

2.3: Graduates will pursue careers in athletic training.

Program Goal #3

Faculty will continually develop contemporary expertise in routine areas of athletic training and will engage in scholarship.

3.1: Faculty will develop and maintain contemporary expertise in areas of athletic training practice.

3.2: Faculty will engage in scholarship as defined by Boyer's model of scholarship.

Student Outcome #1

Students will demonstrate the knowledge, skills, clinical abilities and professional behaviors needed to practice with diverse populations of patients.

1.1: Students will demonstrate increased ability to engage in critical inquiry throughout the program.

1.2: Students will demonstrate competence in scientific theory and other knowledge required of entry-level athletic trainers.

1.3: Students will demonstrate competence in the acquisition and application of clinical skills.

1.4: Students will demonstrate appropriate professional behaviors according to the NATA Code of Ethics and BOC Standards of Professional Practice.

1.5: Students will demonstrate the ability to serve patients with quality care regardless of socioeconomic background, gender, age, ethnicity, race, religion, sexual orientation, or gender identity.

Student Outcome #2

Students and graduates will become competent clinicians who enhance best-practice healthcare, exercise sound judgement, and value lifelong learning.
2.1: Graduates will demonstrate competence and the ability to engage in best practices and exercise sound clinical judgement.

2.2: Students will progressively demonstrate competence and the ability to engage in best practices and exercise sound clinical judgement throughout the program.

2.3: Alumni will demonstrate a value for lifelong learning.

**Student Outcome #3**

Students and graduates will become creative, caring clinicians who engage in patient-centered healthcare.

3.1: Students will demonstrate creativity in clinical practice.

3.2: Students will display a caring demeanor in their clinical practice.

3.3: Graduates will display a caring demeanor in their clinical practice.

3.4: Students will demonstrate patient-centeredness in their clinical practice.

3.5: Graduates will demonstrate patient-centeredness in their clinical practice.

For specific information regarding the Master of Science in Athletic Training in the Department of Kinesiology, please contact us at 817.272.6735 or by email at msat@uta.edu.

**Master of Science in Exercise Science - Objective**

The Kinesiology Department’s Master’s of Science Program provides students with advanced level training in Exercise Science. Students will interact with world-renowned faculty at the forefront of research and discovery, to accomplish three distinct objectives:

1. Provide students with the academic and research skills needed for doctoral study in integrative and applied physiology, movement and rehabilitation sciences, or physical education.
2. Prepare students for employment in clinically oriented environments, associated with physical activity and rehabilitation such as cardiac rehabilitation, strength and conditioning, or sports medicine.
3. Enhance the theoretical background and skills of students seeking employment in Physical and Health Education.

Students can choose to (1) work directly with a faculty member to complete a manuscript project or a thesis OR (2) complete an internship during the final semester in a clinical environment.

For specific information regarding the Master of Science in Exercise Science in the Department of Kinesiology, please contact us at 817.272.3288 or by email at PhDKine@uta.edu.

**Master of Public Health**

**Program Mission**

Educate future public health professionals so they may improve the health of urban and underserved communities locally, nationally, and globally by addressing health determinants and applying core public health functions.

**Values of the UTA Public Health**

- Health Equity
- Opportunity for Health is a Human Right
- Diversity and Inclusion
- Engagement
- Student Success
- Community Voice

**Objective of the Master of Public Health Degree**

The Master of Public Health (MPH) degree is a 42-credit hour, professional master degree program designed to prepare graduates to work in public health career fields. Public health training in the core public health disciplines offer foundational public health knowledge necessary to assess, implement interventions, and evaluate the health of a population with an organization or community. Additional core courses build on the foundation to cultivate practice-based skill sets readily applied to the public health setting. The MPH degree may complement students’ current job skills, or provide students with new public health knowledge and career opportunities. Coursework will emphasize prevention, interdisciplinary approaches, applied skills, and social justice.
The MPH curriculum has been designed to meet current needs in the field of public health, Council on Education for Public Health (CEPH) accreditation criteria, and the College’s mission, goals and objectives.

**The MPH degree offers the following concentrations:**

**Urban Health**

The Urban Health concentration trains students to meet the demand of multi-faceted public health issues facing urban communities, and address health inequities arising from racial, ethnic and socioeconomic health disparities. Concentration coursework represents a variety of disciplines and technical skillsets integral in promoting health in urban settings, including courses focused on advocacy, policy and social justice. Graduates will be equipped to advocate for policies to address health needs in urban communities, as well as apply skills to conduct health needs assessments, program implementation, and program evaluation.

The Urban Health concentration prepares graduates to work in a wide range of settings, including:
- Health care systems
- Public health agencies on local, state, national and international levels
- Nonprofit health organizations
- Research organizations
- Advocacy organizations

**Epidemiology**

The Epidemiology concentration prepares students with the skills and knowledge required to work as epidemiologists or in related jobs. Graduates will be prepared to monitor the trends of chronic and infectious disease in populations, as well as investigate infectious disease outbreaks, while considering how to prevent disease or stop its spread. Concentration coursework includes training in chronic disease epidemiology, infectious disease epidemiology, social epidemiology, and large data set analysis for epidemiology.

The Epidemiology concentration prepares graduates to work in many public health settings such as:
- Local and state health departments
- Federal agencies like Centers for Disease Control and Prevention
- Hospitals
- Research centers
- Infection control
- Laboratories
- Food safety
- Health data analysis
- Non-governmental and non-profit organizations
- Global health

For specific information regarding Public Health studies in the Department of Kinesiology, please contact us at 817.272.1890 or by e-mail at publichealth@uta.edu.

**Doctor of Philosophy in Kinesiology**

The Doctor of Philosophy in Kinesiology prepares students to be scholarly researchers who generate new knowledge in the field of Kinesiology, with the skills to apply existing scholarship to questions concerning the prevention, assessment, and treatment of motor difficulties, chronic diseases, and musculoskeletal injuries.

The program’s interprofessional and multidisciplinary curriculum, as well as research focus, incorporates basic and clinical science approaches to identify disease markers and mechanisms, as well as evidence-based interventions designed to prevent and treat specific health conditions such as chronic illnesses and injuries in vulnerable and at-risk populations comprised of obese, older, and/or minority persons. This program builds and extends the Department of Kinesiology’s existing research, education, and community outreach initiatives in health and the human condition across the lifespan.

Students will work with their advisor to design an individualized program of study to meet their research interests and career goals.

For specific information regarding the Doctor of Philosophy in Kinesiology in the Department of Kinesiology, please contact us at 817.272.3288 or by email at PhDKine@uta.edu.

**Admission Requirements for M.S. in Athletic Training**

Application instructions and materials can be found on the UT Arlington MSAT website.
UNCONDITIONAL ADMISSION

- Earned Bachelor’s degree, with an undergraduate cumulative GPA of 3.0, or a 3.0 GPA during the last 60 hours of undergraduate course work.
- GRE score report (Preferred scores: Verbal = 150; Quantitative = 141)*UT Arlington graduates who have an undergraduate GPA of 3.0 (or higher), in the last 60 credit hours as calculated by Graduate Admissions, a 3.0 cumulative GPA, AND a 3.0 in all upper division work are eligible for a GRE waiver. (only applies to UT Arlington graduates).
- 50 hours of observation with an athletic trainer (LAT and/or ATC credential)
- Meet program technical standards for admission
- Measles, Mumps and Rubella (MMR) vaccination
- Hepatitis B vaccination (three doses)
- International students are required to receive tuberculosis screening and this must be performed at the UTA Student Health Center or another U.S. facility
- International applicants must meet the University’s English language test score requirements for graduate admission.
- Required prerequisite courses *Prerequisite courses must have been completed with a grade of “C” or better and within the last 10 years.
  - Anatomy and Physiology I
  - Anatomy and Physiology II
  - Functional Anatomy (must be upper division and may also be titled Applied Kinesiology, Kinesiology, or Biomechanics)
  - Physiology of Exercise
  - Nutrition
  - Psychology
  - Statistics or Research Design
  - Biology (lecture and lab)
  - Physics (lecture and lab; will accept PHYS 3360 from UTA students)
  - Chemistry (lecture and lab)
    - Preferred Prerequisite Courses
  - Medical Terminology
  - Care and Prevention of Athletic Injuries

PROBATIONARY ADMISSION

Applicants failing to meet the unconditional admission criteria may be considered for probationary admission with documented previous relevant experience and recommendations describing potential for exceptional personal and professional growth. Students who are admitted on a probationary status will be limited in their clinical experience time, will be required to meet with the MSAT faculty to develop a success plan, and must complete their first term with a 3.0 GPA.

START DATE

Each new cohort begins the MSAT program summer (typically the first Monday in June). In addition, an in-service is typically held 1-3 days prior to the start date.

RETENTION CRITERIA

MSAT students’ academic and clinical progress will be closely monitored each semester by the MSAT Program Director and Coordinator of Clinical Education. To remain in the MSAT program, students must:

- Complete each course with a grade of “C” or better.
- Maintain a 3.0 cumulative GPA
Adhere to documents which outline professional behaviors, including but not limited to the MSAT Student Handbook, the BOC Standards of Professional Practice, the NATA Code of Ethics, and course syllabi.

TRANSFER POLICY
No transfer credit will be awarded for MSAT courses.

CRIMINAL BACKGROUND CHECK
All students accepted for admission into the MSAT will be required to complete a criminal background check. Students who have a criminal record are encouraged to meet with the MSAT Program Director to discuss how this may affect their ability to become credentialed as an athletic trainer.

Degree Requirements for M.S. in Athletic Training
All students accepted into the Master of Science in Athletic Training Program will complete 57 hours of coursework.

REQUIRED COURSEWORK
The following courses will be required for completion of the MSAT degree program.

Total Hours 57

Admission Requirements for M.S. in Exercise Science
Admissions Standards for Master's Degree in Exercise Science (Note – Meeting these minimum standards does not guarantee acceptance into the program).

1. Undergraduate degree from a U.S. accredited institution or an equivalent foreign institution.
2. GPA of 3.0 or above during the last 60 hours of undergraduate work or in any previous graduate program.
3. GRE Quantitative score of 144 (500 on old scale) and Verbal score of 153 (500 on old scale). Additionally, satisfactory Writing scores are required. If scores are below these standards the application will still be considered as the Department takes all components of the application into consideration.
4. A minimum score of 550 on the paper-based TOEFL, a minimum score of 213 on the computer-based TOEFL, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section.

5. All Master’s students are originally accepted as “Non-thesis track”.

6. Contact information for references is not required but may be asked for if additional information is needed.

Probationary Admission

Applicants failing to meet the above admission criteria may be considered for probationary admission in which case the following additional criteria will also be considered by the Graduate Studies Committee:

- Professionally relevant experience
- Additional writing samples and/or information may be requested
- Applicants admitted on probation will be required to maintain a B or better average during their first 12 hours of graduate study.

A graduate advisor within the Department of Kinesiology will review transcripts of prospective students to determine what prerequisites are needed prior to enrollment in courses within the proposed program. If deficiencies are identified, a pre-program of study designed to prepare the student for graduate course prerequisites will be written and signed by the prospective student and the graduate advisor.

Waiver of the Graduate Record Examination

Upon recommendation of the Graduate Advisor, outstanding UT Arlington graduates with a degree in Kinesiology or related fields (such as Biology, Chemistry, Mathematics, Computer Science, or Engineering) may qualify for a waiver of the requirements for the Graduate Record Examination (GRE). To qualify, the applicant must meet the following minimum requirements:

1. The student must have graduated from a commensurate bachelor’s degree program at UT Arlington no more than three academic years prior to admission to the graduate program (as measured from the start of the semester for which admission is sought). A commensurate bachelor’s degree program is one that is a normal feeder program for the master’s degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, admission with the GRE waiver is contingent upon successful completion of the bachelor’s degree.

2. The student’s UT Arlington grade-point average must equal or exceed 3.0 in the following calculations:
   - as calculated for admission by the Office of Graduate Studies;
   - overall;
   - in the major field; and
   - in all upper-division work.

Applicants qualifying for waiver of GRE who do not qualify for advanced admission, must comply with all other requirements for admission, i.e., submitting the application for admission, paying fees, providing official transcripts from other institutions, and meeting any requirements established by the admitting graduate program. The GRE waiver must be recommended by the Graduate Advisor at the time of admission.

Graduate Assistantships for M.S Students in Exercise Science

The Department of Kinesiology and faculty offers financial assistance to M.S. students. Assistantships are contingent upon prior acceptance to the Graduate School and are limited and thus offered on a competitive basis. Graduate Assistant applicant evaluation begins on January 1 and continues until all positions are filled. Please direct all inquiries to the graduate program director Dr. R. Matthew Brothers at matthew.brothers@uta.edu.

Degree Requirements for M.S. in Exercise Science

All students are required to complete 36 hours for the master’s degree. All students accepted into the Master of Science in Exercise Science will take a core of 15-semester hours of required KINE courses. In addition, all students are required to complete one of the following in their last semester; KINE 5389: Research Manuscript Submission, KINE 5689: Thesis, or KINE 5389 Physiology of Exercise Internship. The remaining required hours will be completed through various course electives.

All M.S. students are initially accepted on the non-thesis track. The student’s academic advisor within the Department of Kinesiology will review transcripts of prospective students to determine what prerequisites are needed prior to enrollment in courses within the proposed program. If deficiencies are identified, a pre-program of study designed to prepare the student for graduate course prerequisites will be written and signed by the prospective student and the student’s graduate advisor.

KINE 5329  STRENGTH & CONDITIONING IN SPORT AND PERFORMANCE
KINE 5331  OBESITY & WEIGHT MANAGEMENT
KINE 5345  SPORT NUTRITION
KINE 5360  FUNDAMENTAL PRINCIPLES OF INTEGRATIVE PHYSIOLOGY  3
KINE 5390  SPECIAL TOPICS IN KINESIOLOGY
KINE 5393  PHYSIOLOGY OF EXERCISE INTERNSHIP
KINE 5394  RESEARCH IN KINESIOLOGY
KINE 5340  ENVIRONMENTAL PHYSIOLOGY  3

Total Hours  39-45

Coursework that is more than six years old at the time of graduation or teacher/administrator certification program completion cannot be used toward meeting the requirements for a master’s degree or graduate-level certification. Master’s degree and graduate-level certification programs must be completed within six years (time in military service excluded) from initial registration in the Graduate School. Appropriate state exams and application to the State Board for Educator Certification for a standard certificate must be made within six months of completion of residency/practicum/program. If a candidate allows the six-month period to go by without passing all state exams and applying for certification, additional coursework and/or exams will be required.

Admission Requirements for Master of Public Health

Admission to the Master of Public Health degree is based on completion of general admission requirements of the Graduate School as specified under the Graduate School Admissions Requirements and Procedures in the Graduate Catalog.

Admission criteria include:

• Official transcripts showing an earned bachelor’s degree from an accredited school, with a 3.0 or higher grade point average for the last 60 undergraduate or the last 18 graduate/post-baccalaureate credit hours completed.
• Official Graduate Record Examination (GRE) scores taken within the last five years are required of all applicants. Preference will be given to applicants with verbal, quantitative and analytic writing scores above the 50th percentile.

Applicants may request a waiver of the GRE requirement if they meet any of the following criteria:

• Hold a graduate or terminal degree from an accredited U.S. university.
• Completed a UTA Graduate Certificate in Public Health Practice and/or a UTA Bachelor of Science in Public Health degree with a minimum cumulative GPA of 3.0 and no less than a grade of “B” in any required public health course.
• At least 5 years of full-time professional experience in a public health field.

An approved GRE waiver does not guarantee admission into the degree program. To apply for a GRE waiver, applicants should submit the following items via email to the Public Health Graduate Advisor:

• Completed GRE Waiver Application
• Scanned copies of all college or university transcripts (official or unofficial transcripts)
• Current resume or CV

• A one-page personal statement written in English describing the applicant’s interest in earning an MPH degree and potential for contributing to public health, as well as the applicant’s career objectives, self-assessment of abilities and preparation for succeeding in a public health graduate program. The quality of written expression in the applicant’s personal statement will be considered.
• An applicant whose native language is other than English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog.
• Three letters of recommendation from academic or professional references.
• The applicant’s resume or CV, highlighting professional experience such as accomplishments, linguistic abilities, computer expertise, and analytics expertise.

PROBATIONARY ADMISSION
For an applicant who does not meet all admission criteria but shows promise for completing a graduate program based on some admission criteria, in rare cases probationary admission may be granted. Students on probationary admission conditions specified by the Public Health Graduate Advisor.

PROVISIONAL, DEFERRED AND DENIED ADMISSION
Provisional, deferred and denied admission decisions meet the criteria as defined under Admission Requirements and Procedures in the Graduate Catalog.

Degree Requirements for the Master of Public Health

Degree Requirements
The Master of Public Health is a degree program consisting of 42 credit hours to include required core courses in the following areas:

Biostatistics
   KINE 5376 Introduction to Biostatistics
   OR
   KINE 5305 Applied Statistical Principles in Kinesiology

Epidemiology
   KINE 5372 Introduction to Epidemiology

Health Policy and Health Management
   KINE 5377 Introduction to Health Systems and Policy

Social and Behavioral Health
   KINE 5375 Community and Behavioral Health

Health Communications
   KINE 5385 Communication and Health
   OR
   COMM 5385 Seminar in Health Communication

Core Functions of Public Health
   KINE 5378 Foundations of Public Health

Culminating Practice Experience
   KINE 5383 Community Based Internship
   KINE 5384 Capstone Experience

Students have five years to complete the program.

Foundation Requirements - No previous specific coursework is required.

Transfer Credit - Students may transfer three courses (9 SCH) into the MPH program from an accredited school, if approved by the Public Health Graduate Advisor. The course must have been completed at the graduate level at an accredited university, with a grade of “B” or above, and be determined to be equivalent to the course offered at UTA. The course should not have been used for another degree or certificate program. Determination of course equivalency will be made by the course instructor on a case-by-case basis.
In addition to the courses required for all concentrations, students enrolling in the Urban Health concentration will take the following concentration courses:

- KINE 5380 Urban Community Health Assessment
- KINE 5374 Race, Ethnicity, and Health in the U.S.
- KINE 5371 Introduction to Program Planning and Evaluation
- SOCW 5343 Health Policy and Social Justice

In addition, MPH students will select two electives from the following courses:

- KINE 5379 Fundamentals of Population Health
- KINE 5373 Introduction to Environmental and Occupational Health
- KINE 5370 Global Health
- KINE 5385 Chronic Disease Epidemiology
- KINE 5386 Big Data for Epidemiology
- KINE 5381 Social Epidemiology
- KINE 5387 Infectious Disease Epidemiology
- SOCW 5345 Critical Issues in Health Equity
- SOCW 5353 Mental Health Policy and Social Justice
- NURS 5366 Principles of Research in Nursing
- PAPP 5345 Evaluation Research
- PAPP 5329 Financial Management in the Public and Non-Profit Sectors
- PAPP 5309 Local Politics in the Intergovernmental Setting
- PAPP 5311 Public Policy Formation and Analysis
- PAPP 5324 Urban Public Finance

Admission Standards for Doctor of Philosophy in Kinesiology

Faculty Sponsorship

Please note that all PhD students (regardless of Bachelors – Ph.D. or Masters to Ph.D.) must be accepted by a faculty member based on faculty research/mentoring alignment in order to be accepted into the program: https://www.uta.edu/conhi/academics/kinesiology/phd-kinesiology/faculty.php

Admissions Standards

Please make sure to follow the admissions standards that applies to your degree option.

Masters to Ph.D. option:

1. Master’s degree from a US accredited institution or an equivalent foreign institution.
2. GPA of 3.25 on all graduate work.

3. GRE Quantitative score of 150 and Verbal score of 150. Additionally, satisfactory Writing scores are required. If scores are below these standards the application will still be considered as the Department takes all components of the application into consideration.

4. A minimum score of 550 on the paper-based TOEFL, a minimum score of 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section.

5. A resume or CV of the applicant (maximum of 2 pages). This should highlight the educational background of the applicant, work/volunteer history, awards, research experience etc.

6. A Statement of Purpose (maximum of 2 pages). This should highlight the previous achievements and experiences of the applicant that have led to the decision to consider a Doctoral graduate degree in Kinesiology as well as the previous achievements that would qualify the applicant for admission into the Kinesiology Doctoral Program. The statement should also include future career goals following obtaining a Doctoral degree in Kinesiology.

7. Three (3) letters of reference. The Department accepts letters through email and/or postal mail.

§ Recommendation Form (PDF)

§ Email: Reviewers can email recommendations directly to Dr. Matthew Brothers (matthew.brothers@uta.edu).

§ Postal Mail: Reviewers should directly mail physical forms to the address specified at the bottom of this page. We suggest that prospective students provide their reviewers with the form and a stamped envelope with the correct address as a convenience to their reviewers.

Bachelors to Ph.D. Option:

1. Undergraduate degree from a US accredited institution or an equivalent foreign institution.

2. GPA of 3.5 and/or 3.5 GPA during the last 60 hours of undergraduate work.

3. 3.5 GPA on all Kinesiology-related work.

4. GRE Quantitative score of 150 and Verbal score of 150. Additionally, satisfactory Writing scores are required. If scores are below these standards the application will still be considered as the Department takes all components of the application into consideration.

5. A minimum score of 550 on the paper-based TOEFL, a minimum score of 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section.

6. A resume or CV of the applicant (maximum of 2 pages). This should highlight the educational background of the applicant, work/volunteer history, awards, research experience etc.

7. A Statement of Purpose (maximum of 2 pages). This should highlight the previous achievements and experiences of the applicant that have led to the decision to consider a Doctoral graduate degree in Kinesiology as well as the previous achievements that would qualify the applicant for admission into the Kinesiology Doctoral Program. The statement should also include future career goals following obtaining a Doctoral degree in Kinesiology.

8. Three (3) letters of reference. The Department accepts letters through email and/or postal mail.

• Recommendation Form (PDF)

• Email: Reviewers can email recommendations directly to Dr. Matthew Brothers (matthew.brothers@uta.edu).

• Postal Mail: Reviewers should directly mail physical forms to the address specified at the bottom of this page. We suggest that prospective students provide their reviewers with the form and a stamped envelope with the correct address as a convenience to their reviewers.

Address for Letters of Reference

All letters of reference should be mailed to the following address:

Dr. R. Matthew Brothers
Associate Chair for Graduate Programs in Exercise Science and Kinesiology
Department of Kinesiology
P.O. Box 19259
University of Texas at Arlington
500 W. Nedderman Drive
Arlington, TX 76019-0259

Addresses for Transcripts and GRE Scores
Transcripts and GRE scores should be sent directly to the Office of Graduate Admissions using the appropriate address below.

**U.S. Postal Mail for Graduate Admissions**
Graduate Admissions
Box 19167
Arlington, TX 76019

**Courier Service Address for Graduate Admissions** - UPS, FedEx, DHL, etc.
Graduate Admissions
701 S. Nedderman Dr.
University Administration Building Room B17
Arlington, TX 76019

---

**Degree Requirements for Doctor of Philosophy Degree in Kinesiology**

The degree requirements differ slightly depending on if a student enters the B.S. to Ph.D. program or the M.S. to Ph.D. program.

- **B.S. – Ph.D. program**: Requires 18 required course credit hours, 42 credit hours (minimum) of track electives, and 9 – 12 credit hours of dissertation (69 total credit hours minimum).
- **M.S. – Ph.D. program**: Requires 11 required course credit hours, 22 credit hours (minimum) of track electives, and 9 – 12 credit hours of dissertation (69 total credit hours minimum).

**Required Courses (B.S. – Ph.D.)**

KINE 6300 Research Methods
KINE 5305 Applied Statistics in Kinesiology, or KINE 5376 Introduction to Biostatistics
3 hours of advanced statistics OR Advanced Research Methods (course can be taken outside of the department).
KINE 6293 Grant Writing
KINE 6105 Laboratory Techniques in Kinesiology I
KINE 6106 Laboratory Techniques in Kinesiology II
KINE 6103 Professional Development
4 hours of KINE 6100 Seminar in Kinesiology (this is a 1 hour credit course that must be taken in a minimum of 4 different semesters).

**Required Courses (M.S. – Ph.D.)**

KINE 5300 Research Methods
3 hours of advanced statistics OR Advanced Research Methods (course can be taken outside of the department).
KINE 6293 Grant Writing
KINE 6105 Laboratory Techniques in Kinesiology I
KINE 6103 Professional Development
4 hours of KINE 6100 Seminar in Kinesiology (this is a 1 hour credit course that must be taken in a minimum of 4 different semesters).

**Electives for Either Track**

KINE 6322 Metabolism & Exercise Biochemistry
KINE 6326 Cardiocirculatory Physiology of Exercise
KINE 6327 Pulmonary Physiology of Exercise
KINE 6340 Environmental Physiology of Exercise
KINE 6328 Neuromuscular Physiology of Exercise
KINE 5329 Strength & Conditioning
KINE 5331 Obesity and Weight Management
KINE 6338 Exercise Prescription for Special Populations
KINE 6350 Applied Biomechanics
KINE 6360 Fundamental Principles of Integrative Physiology
KINE 6393 Physiology of Exercise Internship
KINE 6394 Research in Kinesiology

Students in the B.S – Ph.D and the M.S. – Ph.D. tracks MUST complete 9 – 12 credit hours of dissertation

Individual graduate advisors / research mentors may require additional courses.

Doctor of Philosophy in Kinesiology – Dissertation Committees and Candidacy

The Dissertation requirement for the Ph.D. in Kinesiology includes two components:

1. A written Dissertation to include at least 2 manuscripts of quality and format that are submitted to a peer-reviewed scientific journal and

The Dissertation Committee is responsible for the evaluation of both the written dissertation and oral defense. The Committee must be comprised of a minimum of four members, including the Committee Chair who will be the student's primary faculty mentor. This Committee Chair must be a member of the Department of Kinesiology Graduate Studies Committee or have status on the Department of Kinesiology Graduate Studies Committee. The remaining Committee members must include at least one additional faculty member from the Department of Kinesiology. If the Committee Chair is not a full time member of the Department of Kinesiology Graduate Studies Committee the remaining Committee members must include at least two members from the Department of Kinesiology. In addition the Committee must include at least one member who is external to the Department of Kinesiology. The external member may include individuals not working within UT Arlington if applicable. All Committee members must hold a terminal degree in their field and/or demonstrate the required expertise and appropriate faculty status for serving on dissertation committees.

Comprehensive Examination

B.S. to Ph.D. students will become eligible for the comprehensive examination when they have completed 36 hours of their graduate work.

M.S. to Ph.D. students will become eligible for the comprehensive examination when they have completed 18 hours of their graduate work (at UT Arlington).

These completed course hours represent the minimum requirement; however, eligibility for the comprehensive examination will be dependent on approval from the Chair of the Dissertation Committee.

Successful completion of the comprehensive examination makes students eligible for PhD candidacy. Students must be enrolled in the semester they take the comprehensive examination.

The purpose of the comprehensive examination is to evaluate the extent to which students have acquired the basic principles / knowledge in pertinent coursework. The expectation will be that students will be able to apply, integrate, and synthesize their knowledge.

When students are eligible for the comprehensive examination, the student's graduate mentor/advisor will recommend the student for the examination to the Department of Kinesiology Graduate Studies Committee for approval.

Upon completion, the comprehensive examination committee will meet to discuss the merits of the student's examination. Comprehensive examinations will only be held in regular, long semesters.

The composition of the comprehensive examination committee will be decided by the Department of Kinesiology Graduate Academic Committee. This comprehensive examination committee will be comprised of at least one member of the Graduate Academic Committee and a minimum of 2 additional members with relevant content expertise.

Following completion of the examination the Committee may recommend any of the following outcomes:

1. Unconditional pass. With an unconditional pass, students become eligible for PhD candidacy and prepare for the defense of their dissertation proposal.

2. Pass with conditions. A pass with conditions requires that students perform each of the conditions satisfactorily in order to become eligible for PhD candidacy.

3. Unsatisfactory with opportunity to retake the examination. With this recommendation, the committee will specify when the retake will occur.

4. Unsatisfactory, do not continue in program.
If the outcome of the comprehensive examination is an unconditional pass, students immediately become eligible for PhD candidacy. If the outcome is a pass with conditions, students may only become eligible for candidacy when the examining committee determines that the student has successfully met the conditions stipulated by the committee.

Dissertation Proposal
Following successful completion of the oral examination the student will then need to draft a grant application to be written in the format of a National Institute of Health Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship (F31) grant (https://grants.nih.gov/grants/guide/pa-files/PA-16-309.html). This grant application will describe the student's dissertation projects and will also serve as the student's dissertation proposal. The student will give an oral presentation of the research proposal outlined in the grant application to his/her dissertation committee. This proposal defense must occur within two long semesters following successful completion of the oral comprehensive examination.

GRADUATE CERTIFICATE IN PUBLIC HEALTH PRACTICE: MISSION AND OBJECTIVES

PROGRAM MISSION
The mission of the University of Texas at Arlington’s graduate Public Health programs is to prepare students to become leading public health practitioners and advocates who serve communities and organizations, promote collaboration between public health and health care practitioners, and protect and advance community health through applying the core public health functions of assessment, policy development and assurance.

PROGRAM OBJECTIVES
Through completing the Graduate Certificate in Public Health Practice (GCPHP), students will:

1. Gain graduate-level introductory knowledge and accompanying foundational skill sets in the five core public health disciplines: Biostatistics, epidemiology, health systems and policy, environmental health, and social and behavioral health.
2. Be prepared to apply fundamental skills from each of the five core public health disciplines to complement current job skills, or gain new public health knowledge and career opportunities.
3. Be equipped to execute skills to assess, implement interventions, and evaluate the health of a population within their organizations or communities.

Admission Requirements for the Graduate Certificate in Public Health Practice

ADMISSION CRITERIA

Official transcripts showing an earned bachelor's degree from an accredited school, with a 3.0 or higher grade point average for the last 60 undergraduate or the last 18 graduate/post-baccalaureate credit hours completed.

- Only GPA will be considered for admission to the program. The Graduate Record Exam (GRE) or other standardized graduate school exam is not required for admission to the certificate program.

A one-page personal statement written in English describing the applicant's interest in and potential for contributing to public health, career objectives, and self-assessment of abilities and preparation for succeeding in a public health graduate program. The quality of written expression in the applicant’s personal statement will be considered.

An applicant whose native language is other than English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog.

The applicant's resume or CV, highlighting professional experience such as accomplishments, linguistic abilities, computer expertise, and analytics expertise.

PROBATIONARY ADMISSION
Applicants who fail to meet the admission criteria may be considered for probationary admission. Applicants admitted on a probationary basis must maintain a 3.0 GPA in the first two semesters of program enrollment.

PROVISIONAL, DEFERRED AND DENIED ADMISSION
Provisional, deferred and denied admission decisions meet the criteria as defined under Admission Requirements and Procedures in the UTA Graduate Catalog.

TRANSFER CREDIT
Students may transfer one course (3 SCH) into the GCPHP program. The course must have been completed at the graduate level at an accredited university, with a grade of “B” or above, and be determined to be equivalent to the course offered at UTA. The course should not have been used for another degree or certificate program. Determination of course equivalency will be made by the course instructor on a case-by-case basis.
Degree Requirements for the Graduate Certificate in Public Health Practice

The Graduate Certificate in Public Health Practice is a certificate program consisting of 15 credit hours to include one required 3-hour course in each of the five public health disciplines:

REQUIRED COURSEWORK

The following courses will be required for completion of the Graduate Certificate in Public Health Program. Students have three years to complete the program.

Biostatistics
KINE 5376 Introduction to Biostatistics

or

KINE 5305 Applied Statistical Principles in Kinesiology

Epidemiology
KINE 5372 Introduction to Epidemiology

Health Policy and Health Management
KINE 5377 Introduction to Health Systems and Policy

Environmental Health
KINE 5373 Introduction to Environmental and Occupational Health

Social and Behavioral Health
KINE 5375 Community and Behavioral Health

FOUNDATION REQUIREMENTS

No previous specific coursework is required.
Kinesiology - Undergraduate Programs

Overview

The Department of Kinesiology is committed to providing quality educational programs that emphasize scientific theory, hands-on learning in the laboratory setting and real-world application through clinical internships and other field-based experiences. The faculty's vast teaching experience and research expertise provide rich learning experiences across all of the department's academic programs.

The undergraduate studies within the Department of Kinesiology are organized into three areas: Bachelor of Arts in Kinesiology (Physical Education Teacher Education, Sports Leadership & Management), Bachelor of Science in Exercise Science (Clinical & Applied Physiology; Health, Fitness, & Wellness; and Motor & Rehabilitation Sciences), and Bachelor of Science in Public Health. Each of these academic programs share a common core of kinesiology courses that provide students with a strong foundation in the sciences of human anatomy, biomechanics, motor behavior, and exercise physiology, as well as an introduction to research methodology. In addition to the kinesiology core, each undergraduate degree plan provides a comprehensive discipline-specific program of study designed to prepare students for a specific career path.

The Department of Kinesiology offers multiple degree plan options that work towards meeting the prerequisite requirements for admission to physical therapy, occupational therapy, speech pathology, and physician's assistant graduate programs, as well as medical and dental schools.

The undergraduate program areas are listed below. Complete degree plans, descriptions, and course requirements are provided on subsequent pages.

Bachelor of Arts in Kinesiology

PHYSICAL EDUCATION TEACHER EDUCATION (PETE)

Bachelor of Arts in Physical Education Teacher Education (PETE) for individuals who wish to teach in the PK-12 setting.

SPORTS LEADERSHIP AND MANAGEMENT (SLAM)

The Bachelor of Arts in Kinesiology - Sports Leadership and Management (SLAM) programs prepare individuals for sport and physical activity program leadership in both the public and private settings such as coaching, youth sports, sport marketing, sport management, sport psychology, or sport sociology. There are two concentrations offered under the SLAM program. Coaching and Youth Sports; and Sports Leadership and Management.

BA MINOR IN COACHING AND YOUTH SPORTS

The minor consists of 18 hours, six of which must be upper level. A 2.5 grade point average must be maintained for a student to remain in the minor.

Bachelor of Science in Exercise Science

CLINICAL & APPLIED PHYSIOLOGY (CAP)

The Bachelor of Science in Exercise Science - Clinical & Applied Physiology (CAP) is designed for individuals who plan to pursue a graduate degree in the fields of physical therapy, physician assistant, and medical/dental schools, or athletic training, as well as careers and research in physiological sciences applied to exercise.

HEALTH, FITNESS, & WELLNESS (HFW)

The Bachelor of Science in Exercise Science - Health, Fitness, & Wellness is designed for individuals who wish to pursue a career in personal fitness training, strength and conditioning, cardiac rehabilitation, or other health and wellness related career paths.

MOTOR & REHABILITATION SCIENCES (MRS)

The Bachelor of Science in Exercise Science - Motor & Rehabilitation Sciences is designed for individuals who plan to pursue careers and research in pediatrics and special populations, biomechanics, motor behavior, and rehabilitation sciences, as well as graduate school programs in occupational therapy or speech & language pathology.

Bachelor of Science in Public Health

BACHELOR OF SCIENCE IN PUBLIC HEALTH (BSPH)

The Bachelor of Science in Public Health is designed to prepare individuals for career opportunities in areas such as community health education, project management, compliance in public sector capacities, environmental science and protection, non-profit organizations, and healthcare services and administration. The Bachelor of Science in Public Health (BSPH) degree consists of two program delivery options: A traditional Campus Based Program and an Accelerated Online Program (AO). The Accelerated Online Program is an online format developed by UT Arlington's Department of Kinesiology and College of Nursing and Health Innovation to serve students in Texas and beyond by offering a high quality, affordable, and convenient undergraduate public health degree program. The BSPH AO program is available to students who have earned a minimum of 45 transfer-credit hours prior to enrollment.
PUBLIC HEALTH MINOR

The Department of Kinesiology offers a minor in public health. The minor consists of 18 credit hours. Students must complete at least nine hours toward the minor at UT Arlington. A 2.5 grade point average must be maintained for a student to remain in the minor.

Oral Communication Competencies

All students declared as majors in the Department of Kinesiology (with the exception of BSPH majors) are required to complete KINE 3325 UNDERGRADUATE RESEARCH METHODS. Embedded in this class is the task of orally presenting research findings as both a formal oral research presentation and also in support of posters presented during the Kinesiology Research Presentation Day. BS Public Health students are required to complete KINE 4352 SCIENCES & METHODS IN PUBLIC HEALTH.

Computer Use Competencies

All students declared as majors in the Department of Kinesiology (with the exception of BSPH majors) are required to pass the University computer competency exam or complete KINE 1100 early in their specialization. Embedded in this class are tasks requiring familiarity with the word processor, spreadsheet and Internet browsing programs common on personal computers. BS Public Health students are required to complete KINE 3351 PUBLIC HEALTH INFORMATICS to meet this requirement. Additionally, the department’s core curriculum requires the demonstration of computer use competencies for completion of the majority of assignments.

The Bachelor of Arts in Kinesiology

The Bachelor of Arts in Kinesiology is designed to prepare individuals for teaching and coaching positions in public and private schools and for sport and physical activity program leadership in both the public and private settings. Majors can choose from one of two degree plan options: Physical Education Teacher Education (PETE) and Sport Leadership & Management (SLAM).

Physical Education Teacher Education (PETE)

The Bachelor of Arts in Kinesiology, Physical Education with All-Level Teacher Certification prepares individuals for teaching and coaching positions in public and private schools. This degree is specifically designed to prepare graduates for certification in teaching PK-12 physical education. The program is designed to provide a scientific and pedagogical foundation with multiple public school experiences that enable students to observe, assist teachers and coaches, experiment with curriculum, create programs, and gain structured experiences in teaching. Because of the emphasis on field experiences, our graduates are well prepared when they enter the workforce. In addition, our graduates work in diverse settings and are able to plan and teach individuals with disabilities successfully. Candidates are also encouraged to earn a second teaching area concentration (such as English, History, Biology/Life Science, Math, Modern Language, Health Education, etc.).

Admission Requirements:

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from an advisor in the Division of Student Success during their first year. After the first year, students should seek advisement from the PETE Advisor in the Department of Kinesiology. Transfer students must seek academic advising from the PETE Advisor in the Department of Kinesiology immediately.

In order to qualify for admission to the Physical Education Teacher Education (PETE) program, students must:

* Satisfy the University's credit hour requirements for admission to a degree plan
* Provide transcripts from each college or university the student has attended (reflecting all current/completed semesters)
* Petition for admission into the College of Education prior to taking education coursework
* Have a cumulative GPA of at least 2.75 for classes taken at UT Arlington, and sustain a 3.00 GPA across the following education sequence:

<table>

</table>
• All classes involving field-based experiences require students to pass a criminal background check. This is also a requirement for all certified teachers in the State of Texas.
• Students who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

Maintaining Major Status:

If a student falls below a 2.75 GPA at any time prior to petitioning for admission into the College of Education, the student will be on departmental probation for one semester. If the student is unable to make up the deficiency in the semester immediately following the probation, the student will lose status as a Bachelor of Arts in Kinesiology with All-Level Certification major and be moved to the Bachelor of Arts in Kinesiology - Sports Leadership and Management major. Courses to make up a GPA deficiency must be taken at UT Arlington. If the student is able to make up the GPA deficiency in the semester immediately following loss of major status, she or he will be eligible to apply for reinstatement as a major by making application to the Departmental Advisor when grades are released. No courses on the degree plan may be taken as pass/fail.

Each candidate in the PETE program will be evaluated on the College of Education Professional Dispositions by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as “unacceptable” in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions.

Application for Student Teaching: Students must apply to the Director of Field Experience in the College of Education by the appropriate deadline to begin. Students must also submit any applicable background checks at registration. The student teaching will be performed in both elementary and secondary (high school or middle school) levels.

Total Hours  120

Sports Leadership and Management (SLAM)
The Bachelor of Arts in Kinesiology - Sports Leadership and Management (SLAM) program prepares individuals for sport and physical activity program leadership in both the public and private settings. The curriculum examines sport in the contexts of historical and contemporary culture. It looks at sport’s cultural relationship with education, the economy, families, the media, and politics, and considers race, class, and gender differences in the sport experience. Two specializations are offered under the SLAM program: Coaching and Youth Sports; and Sports Leadership and Management.

Admission Requirements:
To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from a Division of Student Success academic advisor during their first year. After the first year, students should seek advisement from the BA Kinesiology Advisor in the Department of Kinesiology. Transfer students must seek academic advising from the BA Kinesiology Advisor in the Department of Kinesiology immediately.

- All classes involving field-based experiences require students to pass a criminal background check. This is also a requirement for all certified teachers and professionals that work with school aged children in the State of Texas.

Maintaining Major Status:
Students must maintain an overall GPA of 2.5 and a KINE GPA of 2.5.

Coaching and Youth Sports
This concentration is designed to provide a scientific and pedagogical foundation with multiple experiences that enable students to observe, assist, coach, and create programs that encourage physical activity across the age spectrum: Youth, high school, collegiate, elite-level, or private coaching. In addition to the identified core and specialization courses there are 9 hours available as electives.

**Sports Leadership and Management**

This concentration provides students with managerial, psychosocial, socio-cultural, and developmental knowledge about sport participation to allow them to understand and to provide leadership related to key issues in sport while analyzing and engaging in the business and culture of sport. In addition to the identified core and specialization courses there are 9 hours available as electives.

Total Hours 120

**BA Minor in Coaching and Youth Sports**

The minor consists of 18 hours, six of which must be upper level.

A 2.5 grade point average must be maintained for a student to remain in the minor.

Courses that may be taken toward the minor are:

**Required:**

- KINE 1315 Introduction to Physical Education and Sport
- KINE 2301 Teaching Games for Understanding
- KINE 2302 Dance and Movement Activities

**Electives**

Nine hours from the following.

- KINE 3302 Sport and Exercise Psychology
- KINE 3304 Adapted Exercise and Sport Activities
- KINE 3307 Sport and Society: Issues and Debates
- KINE 3312 Coaching Invasion Games
- KINE 3313 Coaching Net/Wall Game Principles
- KINE 4319 Fitness and Outdoor Adventure

**Bachelor of Science in Exercise Science**

The Bachelor of Science in Exercise Science is designed to provide a foundation of the movement and exercise science to students interested in pursuing careers associated with therapy and rehabilitation, fitness and training, and research with typical and atypical populations. The three tracks are designed to provide a thorough foundation in three areas of Exercise Science: Clinical & Applied Physiology, Health, Fitness, & Wellness, and Motor & Rehabilitation Sciences. All KINE listed courses are designed for majors only.

The Clinical & Applied Physiology (CAP) Track incorporates prerequisites and prepares students for graduate school applications in physical therapy, physician assistant, and medical/dental schools.
The Health, Fitness, & Wellness (HFW) Track prepares students for careers in strength conditioning, personal training, cardiac rehabilitation, and corporate wellness & fitness. It also prepares students for certifications programs such as ACSM, HFS, NSCA, CSCS. In addition, it incorporates prerequisites and prepares students for graduate school applications in athletic training.

The Motor & Rehabilitation Sciences (MRS) Track Incorporates prerequisites and prepares students for graduate school applications in occupational therapy and speech & language pathology, as well as careers and research in pediatrics and special populations, biomechanics, motor behavior and rehabilitation sciences.

Admission Requirements:

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from an advisor in the Division of Student Success during their first year. After the first year, students should seek advisement from the Exercise Science Advisor in the Department of Kinesiology prior to each semester and summer sessions. Transfer students must seek academic advising from the Exercise Science Advisor in the Department of Kinesiology immediately. All incoming freshmen and transfer students wishing to major in Exercise Science are initially classified as Exercise Science pre-majors.

To be classified as an Exercise Science major, students must satisfy the following requirements:

Clinical & Applied Physiology Track

- Completion of 12 hours at UT Arlington
- Overall GPA of 3.00 and KINE GPA of 3.00 by completion of KINE 3415 and a grade of “B” or better at KINE 3415.

Health, Fitness, & Wellness Track

- Completion of 12 hours at UT Arlington
- Overall GPA of 2.5 and KINE GPA of 2.5 by completion of KINE 3415.

Motor & Rehabilitation Sciences Track

- Completion of 12 hours at UT Arlington
- Overall GPA of 2.5 and KINE GPA of 2.5 by completion of KINE 3415.

Maintaining Major Status:

Students accepted as Bachelor of Science in Exercise Science majors in the Department of Kinesiology must maintain the minimum GPAs as indicated above or they will be on departmental probation. Students who are on departmental probation must meet with their academic advisor for future enrollment options. If the student is unable to make up the deficiency in the semester immediately following the probation, the student will lose status as a Bachelor of Science in Exercise Science major. Courses to make up the GPA deficiency must be taken at UT Arlington. No courses on the degree plan may be taken as pass/fail.

Clinical & Applied Physiology - (CAP)

The Exercise Science Clinical & Applied Physiology track incorporates prerequisites and prepares students for graduate school applications in physical therapy, physician assistant, and medical/dental schools, as well as careers and research in physiological sciences applied to exercise.

KINE Electives

There are no electives for this track

Total Hours 120

1 Students planning to pursue graduate programs in physical therapy, occupational therapy or physician’s assistant should meet with their advisor to determine specific elective requirements. (Example for PT: NURS 3309, BIOL 1442, PHYS 1442, KINE 3388 THEORY AND APPLICATION IN MOTOR DEVELOPMENT), PSYC 3318 ABNORMAL PSYCHOLOGY

Many of the courses in the Kinesiology curriculum require prerequisite courses which are identified in the course description.

Health, Fitness, & Wellness Track (HFW)

The Exercise Science – Health, Fitness, & Wellness track is designed for students interested in careers in the commercial and corporate fitness industry as personal fitness trainers and fitness directors, strength and conditioning coaches as well as for students interested in pursuing a graduate degree in exercise science or athletic training.

Bachelor of Science in Public Health (BSPH)

The Bachelor of Science in Public Health (BSPH) degree consists of two program delivery options: A traditional Campus Based Program and an Accelerated Online Program (AO). The Accelerated Online Program is an online format developed by UT Arlington’s Department of Kinesiology and College of Nursing and Health Innovation to serve students in Texas by offering a high quality, affordable, and convenient undergraduate public health degree program. The BSPH AO program is available to those students who have earned a minimum of 24 transfer-credit hours prior to enrollment.

The BSPH degree program aligns well with current science-based degree programs offered in the Department of Kinesiology. In addition, with a unique positioning of public health aligned with nursing and kinesiology programs along a continuum of health-related coursework and practice-based experiences, students may access an intersection point at which individual health and wellness meets population health and prevention of disease. Potential career opportunities exist in job categories such as government, non-profit organizations, medical/healthcare facilities and community agencies.

The Bachelor of Science in Public Health program features a competency-based curriculum built upon a collaborative, interdisciplinary matrix. Relevant coursework, accompanied by experiential and service learning activities anchored throughout the program support a robust program framework, which includes The Council on Education for Public Health (CEPH) accreditation criteria, Association of Schools and Programs of Public Health (ASPPH) undergraduate competencies and The Council on Linkages Between Academia and Public Health Practice Tier I Public Health Workforce competencies. These program elements will enable students to gain a broad knowledge base, along with the skills and abilities necessary to be a competent and effective member of the public health workforce.

The Bachelor of Science in Public Health provides students with a rigorous background in public health education, while also providing multi-disciplinary support for each student to pursue his or her own individual interests and passions through minor degrees (e.g., Disability Studies, Diversity Studies, Psychology, Spanish). The degree program provides coursework and experiential learning activities that intersect individual health, wellness and prevention with population-based health perspectives. Students have the flexibility to choose 20-21 hours of electives, providing providing academic flexibility so that students may individualize components of their academic pathway to meet their unique personal, professional, and academic goals.

Admission Requirements:

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from an advisor in the Division of Student Success during their first year. After the first year, students should seek advisement from the Public Health Advisor in the Department of Kinesiology prior to each semester and summer sessions. Transfer students must seek academic advising from the Public Health Advisor in the Department of Kinesiology immediately. All incoming freshmen and transfer students wishing to major in Public Health are initially classified as Public Health pre-majors (PH.Int).

To be classified as a Public Health major, students must satisfy the following requirements:

BS Public Health

- Completion of 12 hours at UT Arlington
- Completion of KINE 2350 INTRODUCTION TO PUBLIC HEALTH: PRINCIPLES & POPULATIONS EXERCISE SCIENCE with a grade of C or better
- Overall GPA of 2.50.

Maintaining Major Status:

Students accepted as Bachelor of Science in Public Health majors in the Department of Kinesiology must maintain the minimum GPAs as indicated above or they will be placed on departmental probation. In order to take additional Public Health courses, approval must be granted by the Department Chair. If the student is unable to make up the deficiency in the semester immediately following the probation, the student will lose status as a Bachelor of Science in Public Health major. Courses to make up the GPA deficiency must be taken at UT Arlington. If the student is able to make up the GPA deficiency in the semester immediately following loss of major status, he or she can be reinstated as a major by making application to the Departmental Advisor when grades are released. No courses on the degree plan may be taken as pass/fail.

Many of the courses in the Kinesiology curriculum require prerequisite courses, which are identified in the course descriptions.

BS in Public Health - Minor

The Department of Kinesiology offers a minor in public health. The minor consists of 18 credit hours. Students must complete at least nine hours toward the minor at UT Arlington. A 2.5 grade point average must be maintained for a student to remain in the minor.

Courses that may be taken toward the minor are:
**Required**

KINE 2350  PUBLIC HEALTH: PRINCIPLES AND POPULATIONS

**Electives**

Fifteen hours from the following:

KINE 3307  SPORTS AND SOCIETY
KINE 3350  URBANIZATION AND VULNERABLE POPULATIONS
KINE 3351  PUBLIC HEALTH INFORMATICS
KINE 3352  INTRODUCTION TO PUBLIC HEALTH EPIDEMIOLOGY
KINE 3353  HEALTH AND THE HUMAN CONDITION IN THE GLOBAL COMMUNITY
KINE 3354  EMERGENCY PREPAREDNESS & MANAGEMENT
KINE 4330  PROGRAM DESIGN & ADMINISTRATION
KINE 4331  OBESITY & WEIGHT MANAGEMENT
KINE 4351  ETHICAL PRACTICES IN HEALTH PROFESSIONS
HEED 3305  WOMEN'S HEALTH ISSUES
HEED 3330  CONSUMER HEALTH AND PUBLIC HEALTH SYSTEMS
HEED 4320  STUDIES IN HEALTHY AGING
College of Science

UNDERGRADUATE:

Mission and Philosophy

The College of Science graduate programs are committed to excellence in graduate education and research and contribute, along with other institutions in this country and throughout the world, to the expansion of scientific knowledge. Graduates of our programs are highly trained and educated scientists who will be able to contribute to the economic and social well-being of our state and nation.

OVERVIEW

With outstanding departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics and Psychology, the College of Science offers comprehensive graduate studies with our world class faculty and research programs. In addition to providing our students with strong core training in the physical and life sciences, we offer specialized Masters degrees for educators to expand their core science training. Interdisciplinary programs and Research Centers provide students with opportunities to span disciplines, and student research activities are complemented by excellent research facilities and state-of-the-art instrumentation. The College and Departments host a series of seminars to further expose our students to cutting edge science developments.

Master's degrees are offered in all of our departments, and we award Ph.D. degrees in Quantitative Biology, Applied Chemistry, Environmental and Earth Sciences, Mathematics, Applied Physics, and Experimental Psychology. For application and entrance requirements, or more on our graduate programs, please call us or visit our Web site at www.uta.edu/cos (http://www.uta.edu/cos/).

Overview

Pursuit of knowledge through scientific study has been the cornerstone of human accomplishment throughout history. The College of Science continues this tradition by providing undergraduate students with curricula that allow exploration and mastery of both the basic concepts and most recent advances of modern science and preparation for professional scientific careers. The College of Science consists of the departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics, and Psychology. Bachelor of Science (B.S.) and Bachelor of Arts (B.A.) degrees offered by these departments prepare students to pursue a wide variety of rewarding, professional scientific careers or graduate study. Bachelor of Arts and Bachelor of Science degrees are offered in all departments. Bachelor of Arts degrees allow students to develop a broad liberal education with a concentration in science and are particularly appropriate for careers in science teaching. Bachelor of Science degrees provide students with a more intensive background in science, preparing them for advanced graduate study or entry into exciting technological careers in industry, medicine, government, business, or commerce. A wide range of degree options within departmental B.S. programs provide students with career-oriented course work required to pursue professional career paths in specific scientific fields. All departments within the college provide highly accessible student academic and career advising that support customization of degree plans to meet a student's specific career goals.

The College of Science fosters interaction between students and faculty. Faculty actively participate as advisors to student scientific societies and are readily available to assist or advise students both within and outside the classroom. Faculty members in all departments actively participate in research supported by world-class research facilities and modern scientific equipment. Undergraduate science majors are encouraged to engage in research under the supervision of a faculty member of their choice, many of whom have international reputations for their scholarly contributions. Students can receive course credit for supervised research.

Beyond the undergraduate degree, the College of Science offers programs leading to graduate degrees. All departments offer Master of Science degrees (M.S.) that allow students to pursue technologically intensive careers in public or private arenas. The departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics and Psychology offer the Doctor of Philosophy degrees (Ph.D.) that allow students to carry out independent dissertation research within a chosen scientific specialty, leading to careers in research and/or university teaching. The M.S. and Ph.D. degrees offered by the Graduate Program in Environmental Science and Engineering prepare students for careers as environmental professionals. The Graduate Catalog provides details of the college's master's and doctoral degree programs.

Also available to undergraduate students in the College of Science are unique and innovative combined degree programs leading to both a B.S. degree and a graduate or professional degree within an accelerated time frame. These combined degree programs include the five-year Bachelor of Science (B.S.) in Biology/Master of Business Administration (M.B.A.) degree programs in Health Care and Biomedical Sciences Management and a five-year B.S. in Biology/Master of Biomedical Engineering (M.B.E.) degree program (see the Department of Biology section of this catalog for detailed descriptions of these programs).

The College of Science takes pride in offering students outstanding degree programs in all of its departments. These programs are marked by excellent teaching, broad undergraduate research opportunities and superior academic and career advising. Graduates of these degree programs are highly competitive in the job market or when applying to nationally recognized graduate or health professions schools. Please visit the College of Science website to make an appointment with one of our advisors. www.uta.edu/cos (https://www.uta.edu/science/)
Opportunities in Science

The future marvels of the 21st century will spring from science just as did those of the 20th century. The human genome project, miracle drugs, efficient fuels, arrays of new synthetic materials, the transistor, the laser, nuclear power, solar energy, computers, the Worldwide Web, global information systems, the electron microscope, nanotechnology, bioinformatics and sophisticated techniques for locating mineral deposits are merely a few examples of the crowning scientific achievements of the past century. Discoveries of similar or greater magnitude lie ahead in this new century as scientists bring their talents to bear on modern society's pressing problems such as alternative energy sources, environmental protection, and improved health care. Students graduating from College of Science degree programs have the unique opportunity to participate in this century of new and unparalleled scientific discovery.

Requirements for Admission to the College of Science

The University of Texas at Arlington does not admit students to specific degree programs. Instead students wishing to pursue a major in one of the College of Science undergraduate degree programs must apply to the appropriate academic unit for acceptance into that program. Students should familiarize themselves with the general requirements for acceptance to the degree program of their choice as well as the specific requirements for granting of the degree.

ACADEMIC POLICIES FOR COLLEGE OF SCIENCE MAJORS

In the College of Science, students are required to maintain a minimum overall GPA of 2.25 in all their course work as well as a minimum GPA of 2.25 in their major course work in order to remain in good standing within their degree program. Students whose overall or major GPA falls below 2.25 will be dropped as a major in the College of Science and must select an alternative major. The general College of Science policy on academic probation may be superseded by more rigorous policies within specific science degree programs.

ACADEMIC POLICIES FOR SCIENCE MINORS

A science minor consists of 18 credit hours or more in any one of the departments within the college. At least 6 of the 18 hours must be in advanced 3000 or 4000 level courses. All classes that are to be used toward a minor must also be applicable toward a major in the same discipline. Non majors courses may not be applied toward a minor.

A 2.0 grade average must be maintained in the minor in order to be approved by the minor department. All classes for a science minor must be approved by an academic advisor in the minor department. Transfer students must complete at least nine hours toward the minor at UT Arlington, and six of the nine must be 3000 or 4000 level.

Transfer Students

Field of Study

Students who complete an approved field of study curriculum in whole or in part will receive academic credit for the equivalent courses within their selected field of study at UT Arlington. To view the field of study curriculums approved by the Texas Higher Education Coordinating Board, visit www.thecb.state.tx.us (http://www.thecb.state.tx.us/).

Core Complete

Students who transfer from a Texas community college or university and are certified as core complete shall have satisfied the core requirements of UT Arlington. Academic departments may, in some instances, require specific courses outside the major as prerequisites for major course work.

Academic Standards

Students who wish to be admitted to a department within the College of Science must have a grade point average of 2.25 or higher in all college course work completed prior to application for admission to the UT Arlington College of Science.

COMPETENCE IN COMPUTER USE

Graduating students are expected to be proficient in the use of computers. Proficiency is considered to be the ability to utilize word-processing, database/spreadsheet, statistical, graphical and other representative software applications in a student's major discipline. Each student should be able to tap the communications, analytical, and information-retrieval potential of computers to solve scientific problems and evaluate research results. Students should consult with their individual department, school or college undergraduate advisors to determine the mechanisms by which they can demonstrate computer competency. A student may be required to pass a proficiency examination or complete a department- or college-designated computer proficiency course to meet this requirement.

COMPETENCE IN ORAL PRESENTATIONS

Graduating students are expected to have proficiency in oral communication skills including interaction in classroom settings to meet the needs of their course work and utilization of acceptable grammar and pronunciation in formal presentations. Students should consult their individual department, school or college undergraduate advisors to determine the mechanisms by which they can demonstrate oral communication skills competency. A student may be required to pass a proficiency examination or complete a department- or college-designated oral communication skills course to meet this requirement.
Pre-Health Programs

Students interested in graduate health professional fields such as medicine, dentistry, physician assistant, pharmacy, optometry and veterinary medicine may complete required courses with most majors. The Health Professions Office offers pre-health advising on graduate health school requirements and expectations, access to resources, mock interviews, opportunity for a committee letter of recommendation, and feedback/assistance in applying to professional health schools.

In general, health professional admission committees do not state a preference regarding an applicant's undergraduate major, leaving students to choose a degree program best suited to their special abilities and interests. Therefore, a student may choose any major, as long as the minimum requirements for admission to the specific program(s) are met. Science courses for non-science majors do not satisfy the requirements for most graduate health professional schools. The B.S. in Biology meets the requirements for most programs. Additional information can be found on the Health Professions Website: https://www.uta.edu/pre-health (https://www.uta.edu/pre-health/).

Post Baccalaureate Non-Degree Seeking Program

The post baccalaureate program is intended for students who have previously completed a bachelor's degree and wish to pursue admission to a graduate health professional school, usually medical, dental, or PA school. Since student backgrounds vary, courses for the post baccalaureate program are custom designed for the individual student. This informal program does not have special admission requirements. Students in this program may complete prerequisite requirements in one to two years depending upon their undergraduate major and GPA, intended course load, time of entry to the program, and additional criteria that should be discussed with the Health Professions Advisor. Additional information can be found on the Post Bacc Program Page (https://www.uta.edu/science/programs/health-professions/non-traditional-and-post-bacc-applicants.php) on the Health Professions Website: https://www.uta.edu/pre-health (https://www.uta.edu/pre-health/).

Teacher Certification in the Sciences

Programs leading to teacher certification at secondary levels are available in departments of the College of Science in coordination with UTeach Arlington and the College of Education. Included among these are secondary certification in Composite Science or Life Science offered in the Departments of Biology and Earth & Environmental Sciences; in Physical Science offered in the Departments of Physics and Chemistry & Biochemistry; in Chemistry offered in the Department of Chemistry and Biochemistry; in Physics/Mathematics offered in the Department of Physics; and in Mathematics offered in the Department of Mathematics. Descriptions of these programs are provided in each department’s section of this catalog.

Transfer Students

Students transferring from other institutions are invited to explore opportunities in the College of Science. Inquiries about the equivalency of their transferred courses and other questions related to transferring are welcome to make an appointment with the Transfer Advisor, 107B Life Science Building.

Science Constituency Council

The Science Constituency Council is the official representative student organization for the College of Science with Student Government. Meeting twice monthly, the SCC serves both the College and its students. The SCC strives to involve a greater number of students in all aspects of the College of Science. SCC members are majors in the departments of the College. For more information, visit https://mavorgs.campuslabs.com/engage/organization/scienceconstituencycouncil (https://mavorgs.campuslabs.com/engage/organization/scienceconstituencycouncil/).

Science Learning Center

501 S. Nedderman Dr. · 106 Life Science Bldg.

The Science Learning Center is an on-site resource facility designed to support student learning and course work in science and mathematics through self-study modules and a variety of study aids. In cooperation with College of Science faculty, the center offers a full spectrum of multimedia resource materials and study aids for students in biology, chemistry, geology, mathematics, physics and psychology classes. The center also provides students with study areas and a study lounge.

Materials currently available include:

- Study guides and sample exams
- Lab notes and solutions manuals
- Hands-on models (Anatomical and Molecular)
- MCAT Prep Resources
- Networked computers
Chemistry Clinic

The Chemistry Clinic is available to answer questions related to your chemistry courses. This service is free for all UT Arlington students enrolled in the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1400</td>
<td>INTRODUCTORY CHEMICAL PRINCIPLES</td>
<td>4</td>

<td>GENERAL TECHNICAL PHYSICS I</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 1444</td>
<td>GENERAL TECHNICAL PHYSICS II</td>
<td>4</td>
</tr>
</tbody>
</table>

The tutors include graduate students, faculty and outstanding undergraduates. The location and times are posted in the Physics Department Office, 108 Science Hall.

Science and Mathematics for the Non-Science Major

The College of Science provides a wide variety of science courses for non-science majors. These courses, including those listed below, have been specifically designed to be applicable to science and mathematics requirements for non-science majors. Non-major students should examine the requirements for their degrees before selecting science courses to meet those requirements. The listed courses are also intended to stimulate interest in science and mathematics beyond the specific degree requirements for non-science majors. The figures in parenthesis indicate the number of hours
of instruction per week in the Fall and Spring Semesters. The first figure indicates the amount of time devoted to theory, and the second indicates the amount of time devoted to laboratory work.

GRADUATE:

Scholastic Activity and Research Interests of the Faculty

BIOLOGY
The Department of Biology has a wide array of research programs ranging from molecular through ecosystem levels of integration. The program boasts strengths in ecology and systematics, evolution, microbiology, genomics, and molecular biology, and has active funding from a variety of private and public agencies. The department also hosts centers for genomics, biological macromouling, electron microscopy and a collection of vertebrates. The research program emphasizes quantitative aspects of biology and provides students with strong training in statistics and experimental design.

CHEMISTRY AND BIOCHEMISTRY
Research programs include synthetic work on natural products, medically active agents, novel ligands, new catalysts, luminescent materials, photocatalysts, supramolecular and metallosupramolecular compounds, molecular magnetism, molecular recognition, stabilization of reactive intermediates, solar energy conversion and electrically conducting polymers. Biochemical research includes studies of enzymology and molecular biology of bacterial metabolism, and studies on problems involved in anticancer therapy. Physical, analytical and electrochemical research includes studies of colloids and surfaces, electrode modification through thin film surface deposition, MALDI mass spectrometry and characterization of the electrical properties of polymers and other materials. Theoretical studies involve both a major computational program applying molecular orbital theory to a variety of problems.

EARTH AND ENVIRONMENTAL SCIENCES
Department research has a strong orientation toward the application of geochemistry, oceanography, geophysics and paleobiology to earth resources and the environment. Current research interests include analysis and modeling of geologic deformational structures, biostratigraphy of accreted terranes of the Pacific Northwest and the middle Permian of West Texas, sedimentology, paleoclimatology, hydrology, fluvial geomorphology, environmental health, and plate tectonics.

MATHEMATICS
The Department of Mathematics at the University of Texas at Arlington is fast evolving into one of the premier centers in the Dallas/Fort Worth metroplex for mathematics research and education. Our active research faculty have strengths that lie in pure, applied mathematics, statistics, and mathematics education. Many of their research projects are supported by external grants. Recent faculty scholarly accomplishments attest to the high quality of research. The research interests of the faculty in the Mathematics Department include the following areas:

Algebra: homological theory of commutative Noetherian rings; non-commutative algebra using geometric methods; symbolic computations; representations of Lie Algebras and superalgebras.

Differential Equations, Integral Equations and Dynamical Systems: geometric study of integrable Hamiltonian systems; stability and instability of solitary waves; nonlinear dispersive waves; free boundary problems related to phase transition and multi-fluid flow; stochastic differential equations; control theory; inverse problems; computerized tomography.

Geometry: birational algebraic geometry and Mori theory; differential geometry and inverse spectral geometry; finite geometry related to non-associative division algebras.

Mathematical Biology: mathematical modeling of microbial populations, biofilms and competition dynamics; population biology and epidemiology; neuronal dynamics.

Mathematical Education: mathematics program development, impact of reform mathematics learning strategies on mathematics teaching, mathematics problem solving for teaching.

Numerical Analysis: numerical solutions to ordinary and partial differential equations; moving grid, multi-grid and multilevel adaptive methods; fluid dynamics (mechanics); numerical simulation and scientific computation; numerical combustion; software development.

PHYSICS
Current research in the department is primarily in the areas of condensed matter physics, materials science and high energy physics. The theoretical condensed matter group is engaged in cluster, electron transport, electronic structure, molecular dynamics and path integral computations having relevance to the chemical, electrical and magnetic properties of surfaces, metals and semiconductors. The experimental condensed matter group is
engaged in studies of diamond coatings, magnetic multi-layers, metals, semiconductors and surfaces using electron, positron, optical and magnetic resonance spectroscopies. The experimental high energy group is involved in collider experiments at Fermi-lab, Brookhaven Laboratory and CERN to study QCD and to search for super-symmetry and other physics beyond the standard model. Other active research areas include high energy theory, optics, parallel computing and statistical physics.

PSYCHOLOGY
Expertise and research activity include animal behavior, animal and human learning, cognitive processes, social psychology, psycho-biology and developmental psychology. Current research interests include group brainstorming, verbal memory and neuro-psychology, applied psychological measurement, pain systems, decision processes, naturalistic social cognition, stress, genetic and hormonal determinants of aggressive and defensive behaviors and parent-offspring interactions, sea turtle behavior, and infant mental representation of objects.

SCIENCE EDUCATION
The Master of Arts in Interdisciplinary Science (MAIS), a 36 credit hour degree program without a thesis requirement, was designed and developed by science teachers for science teachers. The program will help science educators strengthen and update their knowledge of content in two or more of the following cognate areas: biology, chemistry, earth & environmental sciences, mathematics, and physics. In addition to enhancing content knowledge, the courses will help educators develop teaching strategies that lead to improved student learning, implement high quality instructional materials, and develop skills in using various strategies for assessing student learning. The MAIS degree will serve the needs of classroom teachers, content-area and staff development specialists, curriculum developers, program directors, school administrators, college/university faculty, and educators from informal science institutions who have responsibility for designing, delivering, evaluating, and/or continuously improving standards-based science, mathematics, and technology instruction for students, prekindergarten through the undergraduate degree.

While engaging in the coursework, educators will become learners themselves to deepen their own mastery of scientific and/or mathematical content. The laboratory-based learning activities in the program will help science educators see teaching as less a matter of knowledge transfer and more as an activity of facilitation in which knowledge is generated, content is investigated in depth, and meaning is developed from experience. Graduates of the program will take their place as master science educators who are recognized as proven practitioners in delivering rigorous and relevant instruction and are valued as effective coaches, mentors, and teacher trainers.

- Biology, M.S. (p. 1112)
- Quantitative Biology, B.S. to Ph.D. (p. 1113)
- Quantitative Biology, Ph.D. (p. 1113)

COURSES

BIOI 1301. NUTRITION. 3 Hours. (TCCN = BIOL 1322)
Nutrients essential to an adequate diet and good health and the nutritive values of common foods are reviewed. Offered as BIOL 1301 and HEED 1301: credit will be granted for only one of these courses. Students seeking certification in Health Education must enroll in HEED 1301. Students seeking credit toward their science requirement must enroll in BIOL 1301. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, or medical technology.

BIOI 1333. DISCOVERING BIOLOGY: MOLECULES, CELLS AND DISEASE. 3 Hours. (TCCN = BIOL 1306)
Scientific literacy is crucial for navigating health-related issues in today's society. In this lecture and lab course, non-science majors will learn about the molecules of life, the cell, energy and metabolism, cell division, genetics and inheritance and diseases, such as cancer and diabetes. This course will satisfy the laboratory science requirements for students in the Colleges of Liberal Arts and Business Administration, and in the School of Social Work. Formerly listed as BIOL 1433, credit will not be given for both.

BIOI 1334. LIFE ON EARTH: EVOLUTION, ECOLOGY AND GLOBAL CHANGE. 3 Hours. (TCCN = BIOL 1307)
Scientific literacy is crucial for understanding the natural world and our relationship to it. In this lecture and lab course, non-science majors will learn about biologically-based problems facing today's society. Course themes include evolution, antibiotic resistance, genetic diversity, animal and bacterial and plant diversity, ecosystems, ecology and global change. This course will satisfy the laboratory science requirements for students in the Colleges of Liberal Arts and Business Administration, and in the School of Social Work. Formerly listed as BIOL 1434, credit will not be given for both.

BIOI 1345. BIOLOGY I FOR NURSING STUDENTS. 3 Hours.
This course focuses on the chemical and molecular basis of life, including metabolism, cell structure and function, and genetics to provide knowledge of these subjects for those pursuing a degree in nursing. Note: This course cannot be applied for credit toward a degree in Biology.

BIOI 1441. CELL AND MOLECULAR BIOLOGY. 4 Hours. (TCCN = BIOL 1406)
(BIOL 1406) This course focuses on the chemical and molecular basis of life, including metabolism, cell structure and function, and genetics. Laboratory experiments are designed to complement theory presented in lecture. Formerly listed as BIOL 1449; credit will not be given for both.

BIOI 1442. EVOLUTION AND ECOLOGY. 4 Hours. (TCCN = BIOL 1407)
Reviews significant aspects of organismal biology and presents current hypotheses concerning the origin and diversification of life on earth. The ecological and behavioral interactions between organisms and their biotic/abiotic environments are considered from an evolutionary perspective. The laboratory will examine evolution, ecology and the diversity of life using hands-on observational and experimental approaches. Prerequisite: BIOL 1441.

BIOI 2300. BIOSTATISTICS. 3 Hours.
Introduction to the collection, description, and analysis of data with statistical methods appropriate for biological sciences. Specific topics covered include but are not limited to: descriptive statistics, frequency distributions, random sampling, probabilities, binomial distribution, normal distribution theory and calculations, confidence intervals, t-tests (independent sample and paired designs), Chi-square tests (one-way and two-way analysis), analysis of variance, correlation and linear regression. Prerequisite: BIOL 1441 and BIOL 1442, or permission of the instructor.

BIOI 2317. BASIC CONCEPTS IN HUMAN SEXUALITY. 3 Hours.
The physiological, psychological, and sociological aspects of human sexuality. Offered as BIOL 2317, HEED 2317, PSYC 2317, and WOMS 2317. Credit will be granted for one of these courses only. Students seeking certification in Health Education must enroll in HEED 2317. Students seeking credit toward their science requirement must enroll in BIOL 2317. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, medical technology, psychology, or sociology.
BIOL 2444. GENERAL MICROBIOLOGY. 4 Hours.
Fundamental principles of microbiology including the structure and function of microbial cells and their activities in nature. Bacteria will be used in the laboratory to provide training and experimental methodology. Formerly listed as BIOL 3444; credit will not be granted for both. Prerequisite: BIOL 1441, CHEM 1441 or CHEM 1341.

BIOL 2457. HUMAN ANATOMY AND PHYSIOLOGY I. 4 Hours. (TCCN = BIOL 2401)
Functional morphology of humans, cellular function, principles of support and movement, and neural and endocrine control systems. Laboratory exercises involve both anatomical and experimental aspects of principles introduced in the lecture. This class is designed for students in sport activities (EXSA), medical technology and pre-nursing. Prerequisite: BIOL 1345 or BIOL 1441 or equivalent, or approval of the department. May not be used for biology grade point calculation or biology credit toward a B.S. degree in biology or microbiology.

BIOL 2458. HUMAN ANATOMY AND PHYSIOLOGY II. 4 Hours. (TCCN = BIOL 2402)
Functional morphology of humans, maintenance of the human body, and continuity of life. Topics will include the cardiovascular, respiratory, digestive, urinary, immune, and reproductive systems. Laboratory exercises explore both anatomical and experimental aspects of principles introduced in the lecture. This class is designed for students in sport activities (EXSA), medical technology, and pre-nursing. Prerequisite: BIOL 2457 or equivalent. May not be used for biology grade point calculation or biology credit toward a B.S. degree in biology or microbiology.

BIOL 2460. NURSING MICROBIOLOGY. 4 Hours.
The intention of this course is to present basic information, relevant to nursing practice, with the principles of microbiology and the nature of microbial disease. This course will give the nursing student a fundamental background of knowledge that will be applicable to the care of infectious patients, to the control of microbial diseases, and an understanding of microorganisms. The laboratory will provide practice in aseptic techniques, the use of disinfectants and antimicrobial agents, and microscopic study of bacteria. This course cannot be applied for credit toward a degree in Biology. Prerequisite: BIOL 1345, or BIOL 1441 or equivalent.

BIOL 3101. CURRENT TOPICS IN BIOLOGY. 1 Hour.
Seminar on significant topics and issues in modern biology. Students will present seminars on selected topics and participate in discussions of those topics. Topics will vary depending on instructor. This course will satisfy the oral communication competency required in Biology. May be repeated once for biology credit.

BIOL 3131. SERVICE LEARNING. 1 Hour.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisite: Permission of the Instructor.

BIOL 3149. COOPERATIVE PROGRAM IN BIOLOGY. 1 Hour.
The purpose of this course is to allow students to earn college credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment.

BIOL 3231. SERVICE LEARNING. 2 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisite: Permission of the Instructor.

BIOL 3249. COOPERATIVE PROGRAM IN BIOLOGY. 2 Hours.
The purpose of this course is to allow students to earn college credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment.

BIOL 3301. CELL PHYSIOLOGY. 3 Hours.
An introduction to the basic physical, chemical, and biological principles which govern function in eukaryotic cells, and the relationships between cells and their environments. Prerequisite: BIOL 1441. CHEM 2181 and CHEM 2321 are recommended.

BIOL 3302. UNDERGRADUATE RESEARCH EXPERIENCE. 3 Hours.
In this laboratory course, students will learn core concepts in Biology through an intense research experience. Students will master skills including quantitative data analysis, oral and written communication, and critical thinking. Permission is required to enroll in this course.

BIOL 3303. DRUGS AND BEHAVIOR. 3 Hours.
A survey of the psychoactive agents, their therapeutic uses, and social abuses. Alcohol, nicotine, caffeine, narcotics, hallucinogens, stimulants, and tranquilizers. Offered as BIOL 3303, HEED 3303, and PSYC 3303; credit will be granted only once. May not be used for biology grade point calculation or biology credit toward a B.S. degree in biology, microbiology, or medical technology. Students seeking certification in health education must enroll in HEED 3303.
BIOL 3304. MICROBIAL GENETICS. 3 Hours.
Consideration of the physical, chemical, and functional nature of genetic processes in micro-organisms. Prerequisite: BIOL 2444 or BIOL 3444, or permission of instructor.

BIOL 3306. BACTERIAL PHYSIOLOGY AND ANTIBIOTICS. 3 Hours.
This course will cover the fundamentals of how bacterial cells work, and how antibiotics interfere with essential functions to stop bacterial cells from working. This class is taught largely through reading and discussion of the primary literature, and with active learning and writing assignments. Prerequisite: BIOL 2444 or BIOL 3444.

BIOL 3307. EVOLUTIONARY MEDICINE. 3 Hours.
The application of evolutionary theory to the practice of medicine from an anthropological perspective. Topics include diet/paleodiet, sleep habits, infectious diseases, the developmental origins of health and disease, mental health, women's health and reproduction, and aging/senescence, among others. Offered as BIOL 3307 and ANTH 3307; credit will only be granted in one department.

BIOL 3308. MICROBIAL ECOLOGY AND EVOLUTION. 3 Hours.
The diversity, ecology and evolution of microorganisms in natural systems. Topics will include the role of bacteria and fungi in the functioning of terrestrial ecosystems; microbial biogeography; taxonomic and metabolic diversity; evolutionary diversification; and interactions among microbes and with plant and animal hosts. Prerequisite: BIOL 2444 or BIOL 3444.

BIOL 3310. SELECTED TOPICS IN BIOLOGY. 3 Hours.
Topics in biology not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May be repeated for biology elective credit as different topics are offered. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 3311. SELECTED TOPICS IN MICROBIOLOGY. 3 Hours.
Topics in microbiology not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May be repeated for microbiology elective credit as different topics are offered. Prerequisite: BIOL 1441, BIOL 3444.

BIOL 3312. IMMUNOLOGY. 3 Hours.
An introduction to the components, properties, and manifestations of the adaptive immune response that occurs in vertebrates. Prerequisite: BIOL 1441, BIOL 3444, CHEM 2181, CHEM 2321 are recommended.

BIOL 3313. HUMAN ADAPTATION AND THE CONCEPT OF RACE. 3 Hours.
The study of modern human biological variation in the context of the history of the concept of race. Detailed historical review explores changing perspectives on variation within our species. Course examines physiological adaptations to environmental stress among a variety of human populations and implications of recent genetic research. Offered as BIOL 3313 and ANTH 3311; credit will only be granted in one department.

BIOL 3314. PRIMATE EVOLUTION AND BEHAVIOR. 3 Hours.
An overview of the Primate Order covering primate origins, evolution, ecology, adaptation, and behavior. Examination of the environmental context within which primates live, how the form of their bodies reflects their activities, and how they relate behaviorally to their environments and to one another. Offered as BIOL 3314 and ANTH 3313; credit will only be granted in one department.

BIOL 3315. GENETICS. 3 Hours.
Principles of molecular and classical genetics. The function and transmission of hereditary material in microorganisms, plants, and animals, including humans. Prerequisite: BIOL 1441.

BIOL 3316. ASTROBIOLOGY I. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include properties of life, origin and evolution of life on Earth, terrestrial geology and habitability, environmental forcings, extremophiles, mass extinctions, meteorites, searches for life in the solar system. Offered as BIOL 3316, GEOL 3316 and PHYS 3316; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent.

BIOL 3317. GENOMICS. 3 Hours.
This course presents an integrative approach to genome science, combining elements of genetics, state of the art technologies in genomic analysis. A basic knowledge of genetics and probability concepts is required. Use of the World Wide Web will be an essential part of the course. Prerequisite: BIOL 3315 or permission of instructor.

BIOL 3318. LIMNOLOGY. 3 Hours.
The living and nonliving components of inland waters. An introduction to the geological, physical, and chemical background, and to the major organisms and ecological processes. Prerequisite: BIOL 1441, BIOL 1442 or equivalent.

BIOL 3319. HUMAN GENETICS. 3 Hours.
This course will enable students to comprehend the basic principles of genetics applied to human inheritance and disease, to interpret the research strategies aimed to identify and study the genes responsible for diverse functions and traits, as well as to assess the consequences of the genetic technologies in our society. Prerequisites: BIOL 1441 and BIOL 3315.

BIOL 3320. BIOLOGY OF TEXAS. 3 Hours.
This course is an introduction to habitat diversity and the number of species found in the state of Texas. Students will learn about the physical, climatological, and human geography of Texas and how that affects animal and plant life within the state. Descriptions of state and federal endangered species listing processes will also be covered. Prerequisite: BIOL 1441 and BIOL 1442.
Biol 3321. Infectious Disease. 3 Hours.
This course will cover key concepts that relate to the history and background of infectious diseases, as well as the emergence, spread, and control of infectious disease epidemics. Vaccination, antibiotic resistance, and eradication of diseases will also be discussed. Prerequisite: BIOL 3444.

Biol 3322. Brain and Behavior. 3 Hours.
An introduction to the anatomical structures and physiological processes that determine behavior. Topics include the acquisition and processing of sensory information, the neural control of movement, and the biological bases of complex behaviors (such as learning, memory, sex, language, and addiction), as well as the basic functioning of the nervous system. Offered as BIOL 3322 and PSYC 3322. Credit will be granted only once. BIOL 3322 prerequisite: BIOL 1441, BIOL 1442, PSYC 3322 prerequisite: BIOL 1441 or PSYC 1315.

Biol 3324. Human Ecology of Food. 3 Hours.
Modern food production and consumption is a complex, interdisciplinary topic directly relevant to global environmental and public health issues. This course will examine our place in the food web from ecological, biogeographical, historical, cultural, and sociopolitical perspectives. Course participants will examine the implications of our everyday decisions as consumers who play a key role in an intricate ecological system. Prerequisite: BIOL 1441 and BIOL 1442.

Biol 3326. Animal Behavior. 3 Hours.
A survey of research and theory comparing behavior at various phyletic levels. Offered as BIOL 3326 and PSYC 3326. Credit will be granted for only one of these courses. Prerequisite: BIOL 1441, BIOL 1442.

Biol 3327. Microbial Diversity. 3 Hours.
This course is an introduction to the great diversity of microbial life. The topic material explores this diversity by considering the great age of bacteria, their evolution, biochemistry, habitat and form. The course of study focuses attention on organisms not commonly encountered in General Microbiology laboratories. Prerequisite: BIOL 3444 Microbiology.

Biol 3328. Environmental Microbiology. 3 Hours.
An introduction to the principles, methodology, and practical applications and implications of environmental microbiology. Lecture topics include habitat and community approaches to environmental microbiology, measures of microbial populations and activities, interactions among microbial communities, the role of microorganisms in the origin of mineral resources, microorganisms and pollution, and current developments on energy flow through microbial communities. Prerequisite: BIOL 3444.

Biol 3331. Service Learning. 3 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisite: Permission of the Instructor.

Biol 3339. Introduction to Evolution. 3 Hours.
The goals of this course are: to introduce students to the process of evolution, the patterns that result, and the way that evolutionary history has shaped the diversity of organisms on Earth; to explore how evolutionary biologists formulate and test hypotheses; to investigate applications of evolutionary biology to mainstream medical research; and to investigate current controversies in evolutionary biology. Prerequisites: BIOL 1441 and BIOL 3315 (or equivalent), or permission of instructor.

Biol 3340. Bioinformatics. 3 Hours.
This course is an applied introduction to bioinformatics and computational genomics. The course is geared toward the student with a biology background and limited programming experience. The course provides an introduction to modern data analysis tools and an introduction to numerous aspects of modern genomic data analyses (e.g., identification of coding and regulatory features in novel sequences, expression analysis, and comparative/phylogenetic analyses). Prerequisite: BIOL 1442 and BIOL 3315, or permission of instructor.

Biol 3348. Pre-Medical Preceptorship. 3 Hours.
The purpose of the course is to allow students to earn college credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment. This course offers an introduction to the general principles and the environment of the practice of medicine in various specialties. Students are afforded the opportunity to observe a physician in a real-world setting, often including inpatient and operating theater scenarios. Students will also be exposed to the primary literature and practice oral presentation skills over biomedical topics.

Biol 3349. Cooperative Program in Biology. 3 Hours.
The purpose of this course is to allow students to earn college credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment.

Biol 3352. Introduction to Forensic Lab Science. 3 Hours.
An introduction to the various disciplines of Forensic Science including DNA analysis, drug analysis, and firearms basics. Laboratory consists of hands-on investigation of mock crime scenes, fingerprint enhancement methods, and biological analysis of fluids. Prerequisite: BIOL 1441, BIOL 1442, CHEM 1441.
BIOL 3355. TOXICOLOGY. 3 Hours.
An introduction to the general principles of toxicology with an emphasis on certain classes of toxic agents, their sources and toxic effects, as well as their environmental fates. Pollution of various media (air, water and soil) and the differences between them will be discussed. Prerequisite: BIOL 1441 or 4 hours of BIOLTRAN; CHEM 1441.

BIOL 3356. ENVIRONMENTAL SYSTEMS, BIOLOGICAL ASPECTS. 3 Hours.
Biological components of environmental systems. Population dynamics, species interactions, community structure, biodiversity, bioenergetics, nutrient cycling and human impacts are reviewed. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 3358. ASTROBIOLOGY II. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include basic properties of life, habitability of Earth, studies of possible life regarding Mars, Europa & Titan, space missions, exoplanets and exomoons, stellar habitable zones, multistellar systems, exoEarths, biomarkers, SETI, Fermi paradox, Drake equation, cosmology. Offered as BIOL 3358, GEOL 3358, and PHYS 3358; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent. Note that Astrobiology I is strongly recommended to students to be taken prior to Astrobiology II, but is not a prerequisite.

BIOL 3409. PALEOANTHROPOLOGY. 4 Hours.
Paleoanthropology: an exploration of fossil evidence for human origins and human evolution. Course focuses on the evolution of humans and our close relatives, from our origins as a distinct lineage to “anatomically modern” Homo sapiens, including the relationship between biological and cultural/behavioral evolution. Offered as BIOL 3409 and ANTH 3409; credit will be granted only once.

BIOL 3410. SELECTED TOPICS IN BIOLOGY. 4 Hours.
Topics in biology not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May include lab, service learning or any other experiential learning module. May be repeated for biology elective credit as different topics are offered. Prerequisite: BIOL 1441 or BIOL 1442.

BIOL 3420. GENETICS METHODS LAB. 4 Hours.
Computational and experimental approach to genomics research. The course theme will be transposable elements. Prerequisite: BIOL 3315.

BIOL 3427. PLANT SCIENCE. 4 Hours.
A survey of plant science including the importance of plants to people and the human side of botany; the structure, reproduction, physiology, and classification of plants. The laboratory includes the study of structure, function, reproduction, and classification of plants. Replaces BIOL 3327 and BIOL 3183. Credit cannot be given for BIOL 3427 and BIOL 3327 and 3183. Prerequisite: BIOL 1441, BIOL 1442 or equivalent.

BIOL 3442. HUMAN PHYSIOLOGY. 4 Hours.
A comparative study of vertebrate function. The general principles of physiological mechanisms on the cellular, tissue, organ, and organismal levels will be examined. Laboratory studies will complement lecture material and will stress experimental design, data analysis, and the understanding of critical research in physiology. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 3445. METHODS IN MOLECULAR MICROBIOLOGY. 4 Hours.
An overview of different techniques used during manipulation of microorganisms. It will allow students to gain an historical perspective of techniques used in microbiology as well as learn state of the art molecular characterization of microorganisms and their genetic manipulation. Introduces biochemical, physiological, and molecular biology methods to assess community diversity and microbial activity in a variety of ecosystems. Bacterial growth and survival, population biology, and microbial interactions will also be discussed. Prerequisite: BIOL 1441 and BIOL 3444.

BIOL 3446. HUMAN ANATOMY. 4 Hours.
Study of the gross functional anatomy of the human body. Students will participate in laboratory exercises designed to familiarize them with human anatomical structures and their functions. Use of eponyms for anatomical terms will be minimized. Prerequisite: BIOL 1441, BIOL 1442 or 8 hours of Bioltran.

BIOL 3454. GENERAL ZOOLOGY. 4 Hours.
An overview of animal life including the diversity and evolution of major animal phyla, reproduction, development and aspects of physiological function. The laboratory examines form, function and phyletic relationships in a wide variety of animal types. Prerequisite: BIOL 1441, BIOL 1442, or equivalent, or permission of instructor.

BIOL 3457. GENERAL ECOLOGY. 4 Hours.
A survey of animal life including the diversity and evolution of major animal phyla, reproduction, development and aspects of physiological function. The laboratory examines form, function and phyletic relationships in a wide variety of animal types. Prerequisite: BIOL 1441, BIOL 1442, or equivalent, or permission of instructor.

BIOL 4089. RESEARCH IN BIOLOGY. 0 Hours.
Research problems on an individual basis, conducted under the direction of a member of the biology faculty. Prerequisite: written permission of the supervising instructor prior to registration. This is a non-credit course. Prerequisite: Written permission of the supervising instructor prior to registration.

BIOL 4179. RESEARCH AND DIRECTED STUDY. 1 Hour.
Research or independent study by individual students in biology under the supervision of a biology faculty member. Topics must be approved by the supervising faculty member. Prerequisite: BIOL 1441, BIOL 1442, and permission of instructor.
BIOL 4189. RESEARCH IN BIOLOGY. 1 Hour.
Research problems on an individual basis, conducted under the direction of a member of the biology faculty. A limit of two hours per semester is imposed and only a total of three hours may be counted toward degree requirements. These courses are offered only on a pass/fail basis. Prerequisite: written permission of the supervising instructor prior to registration.

BIOL 4279. RESEARCH AND DIRECTED STUDY. 2 Hours.
Research or independent study by individual students in biology under the supervision of a biology faculty member. Topics must be approved by the supervising faculty member. Prerequisite: BIOL 1441, BIOL 1442, and permission of instructor.

BIOL 4289. RESEARCH IN BIOLOGY. 2 Hours.
Research problems on an individual basis, conducted under the direction of a member of the biology faculty. A limit of two hours per semester is imposed and only a total of three hours may be counted toward degree requirements. These courses are offered only on a pass/fail basis. Prerequisite: written permission of the supervising instructor prior to registration.

BIOL 4307. MOLECULAR EVOLUTION. 3 Hours.
This course focuses on understanding how genes and genomes evolve at the molecular level. Molecular biology provides the data while population genetics provides the theoretical framework. Prerequisite: BIOL 3315, BIOL 3339.

BIOL 4309. NEUROPHARMACOLOGY. 3 Hours.
A survey of how drugs affect the nervous system. General topics will include cellular and molecular foundations of neuropharmacology, receptors and modulation of neural signaling. The specific role of neurotransmitter systems (i.e. acetylcholine, dopamine, norepinephrine, serotonin, and opiate) will be explored. Offered as BIOL 4309 and PSYC 4309; credit will be granted only once. Prerequisite: one or more of the following courses or permission of instructor: BIOL 1441 or PSYC 3322/BIOI 3322 or BIOL 3301.

BIOL 4311. HISTOLOGY. 3 Hours.
Histology is a branch of biological science concerned with structure and function of the organism on a cellular level. The objective in this class is to provide students with the skills and knowledge needed to identify and describe tissues and organs in the microscopic images based on the characteristic morphologies of cells and arrangement of tissues. Students will learn about basic histological techniques used in slide preparation, four basic tissue types and types of tissue, followed by the survey of microscopic images of all organ systems. This course bridges the "whole body" disciplines of anatomy and physiology and cell-level sciences such as cell physiology and genomics. It will help students understand how the differential expression of the genome leads to different cell morphology that in turn leads to different functions. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 4312. INTRODUCTION TO VIROLOGY. 3 Hours.
The nature, reproduction, and host cell interactions of viruses and virus-like agents of bacteria, animals, and plants. Prerequisite: BIOL 3444.

BIOL 4316. GROWTH, DEVELOPMENT, AND EVOLUTION. 3 Hours.
A survey of topics at the nexus of modern human biological research in growth and development and the evolutionary record of hominin subadults. Offered as BIOL 4316 and ANTH 4315; credit will be granted only in one department. Prerequisite is only required for students registering for ANTH 4315. Prerequisite: ANTH 2307 or permission of the instructor.

BIOL 4317. BACTERIAL PATHOGENESIS. 3 Hours.
Host-pathogen relationships in microbial diseases. Topics include bacterium-host interactions; pathogens and pathogenic factors; techniques in pathogenesis research; molecular mechanisms of pathogenesis by major bacterial pathogens; antimicrobial compounds and resistance to antibiotics; and discussion of human genomics and susceptibility to infections. Prerequisites: BIOL 3312, BIOL 3444.

BIOL 4327. BEHAVIORAL GENETICS. 3 Hours.
Genetic influences on behavioral phenotypes. Research strategies, quantitative methods, and pharmacogenetic approaches to the brain; sociality and altruism; the personality, emotionality and intelligence; psychopathology; chromosomal abnormalities; forensic implications of genetic counseling. Offered as BIOL 4327 and PSYC 4327; credit will be granted only once. Students seeking credit toward the science requirement must enroll in BIOL 4327. Prerequisite: PSYC 1315 or BIOL 1441.

BIOL 4329. NEURAL ENGINEERING. 3 Hours.
This course consists of both lecture/discussion and laboratory. Lecture topics include central and peripheral nervous system injury and regeneration, brain/machine interfacing, primary culture of neural cells, neuroinflammatory and neurodegenerative disease. Laboratories include embryonic and neonatal rat derived neuronal culturing, immunostaining and quantitative analysis. Prerequisites: BIOL 3301, CSE 1310, CHEM 2322, and MATH 3319.

BIOL 4332. POLYMERS IN BIOMEDICAL ENGINEERING. 3 Hours.
This is a foundation course in polymeric biomaterial design, synthesis, characterization, and processing. The topics include design, surface-engineering, functionalization, characterization, as well as micro- and nano-fabrication of polymeric biomaterials. The biomedical applications of the polymeric biomaterials and their interaction with cell/tissue is discussed. Prerequisite: BIOL 3301, CSE 1310, CHEM 2322 and MATH 3319.

BIOL 4333. NANOBIOATERIALS. 3 Hours.
Synthesis, fabrication, characterization, and biomedical applications of nanobiomaterials. Topics include synthetic nanobiomaterials, biological nanobiomaterials (DNA nanomaterials, protein and peptide nanomaterials, etc.), biofunctionalization of nanobiomaterials, use of nanobiomaterials in tissue engineering, drug delivery, gene delivery. Prerequisites: BIOL 3301, CSE 1310, CHEM 2322, and MATH 3319.
BIOL 4343. RESEARCH METHODS - UTEACH. 3 Hours.
The purpose of this course is to present UTeach students with the tools scientists use to solve scientific problems. These tools enable scientists to develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in more conventional science classes. These tools include: design of experiments to answer scientific questions; use of statistics to interpret experimental results and deal with sampling errors; mathematical modeling of scientific phenomena; finding and reading articles in the current scientific literature; applying scientific arguments in matters of social importance; writing scientific papers; reviewing scientific papers; oral presentation of scientific work; use of probes and computers to gather and analyze data; ethical treatment of human subjects; laboratory safety. Research Methods is primarily a laboratory course, and most of these topics are developed in connection with 4 independent inquiries UTeach students design and carry out. Written inquiries will be evaluated as examples of scientific writing. Prerequisite: SCIE 1201 or SCIE 1334 or concurrent enrollment; junior or senior standing.

BIOL 4345. MICROBIAL PHYSIOLOGY. 3 Hours.
This course considers the anatomy and physiology of the bacterial cell in detail. Lecture topics consider the molecular architecture of cell walls, membranes and organelles, synthesis of wall material and membranes, insertion of proteins into membranes and regulation of biosynthetic systems at the whole cell level. Prerequisite: BIOL 1441 and BIOL 3444. CHEM 4311 recommended.

BIOL 4350. CONSERVATION BIOLOGY. 3 Hours.
Introduction to theory and practice of conservation biology, with emphasis on applications of modern quantitative and genetic techniques to preservation of organisms and habitats. Topics include identification and prioritization of units for protection; conservation genetics; preserve design; public policy issues; and case studies. Prerequisite: BIOL 3315 or equivalent (Genetics), or permission of the instructor.

BIOL 4352. FORENSIC BIOLOGY. 3 Hours.
A comprehensive review of biological principles, applied to forensic science, including sample recovery and handling, analytical techniques, profile matching/exclusion, reporting, and testimony. Prerequisite: BIOL 3315; statistics course recommended; or permission of instructor.

BIOL 4355. METHODS IN FORENSIC BIOLOGY. 3 Hours.
Analysis of typical biological evidentiary samples including extraction of DNA, quantitation, amplification and electrophoresis of examples. Instrumentation utilized includes thermal cyclers and ABI 377 genetic analyzer. Prerequisite: BIOL 4352 or concurrent enrollment.

BIOL 4357. HEALTH PSYCHOLOGY. 3 Hours.
This course provides a broad introduction to health psychology and its interface with the medical world. The course provides a balanced presentation of the important issues in the field, as well as specific content topics that are especially relevant today to better understand health and illness. Offered as BIOL 4357, HEED 4357, and PSYC 4357. Students seeking science requirement credit must enroll in BIOL 4357; students seeking Certification in Health must enroll in HEED 4357. Prerequisite: PSYC 1315 or BIOL 1333 or BIOL 1441 or BIOL 2457; junior standing recommended.

BIOL 4365. TISSUE ENGINEERING LAB. 3 Hours.
Each student will be given the opportunity to perform the techniques commonly used in tissue engineering and biomaterial research. These techniques are culture media preparation, cell culture/subculture, degradable scaffold preparation, scaffold modification, histological sections and staining, and cell imaging analyses. Prerequisites: BIOL 3301, CSE 1310, CHEM 2322, and MATH 3319.

BIOL 4379. RESEARCH AND DIRECTED STUDY. 3 Hours.
Research or independent study by individual students in biology under the supervision of a biology faculty member. Topics must be approved by the supervising faculty member. Prerequisite: BIOL 1441, BIOL 1442, and permission of instructor.

BIOL 4388. INSTRUCTIONAL TECHNIQUES IN BIOLOGY. 3 Hours.
Students will participate in laboratory instruction and student recitation sessions under the supervision of a faculty member. A maximum of 3 hours can be applied to the major for biology or microbiology credit. Enrollment by departmental permission only. A maximum of 6 hours credit from this class will be used to calculate a student's grade point average. Students on probation or who have not qualified for major status may not enroll in this course.

BIOL 4389. RESEARCH IN BIOLOGY. 3 Hours.
Research problems on an individual basis, conducted under the direction of a member of the biology faculty. A limit of two hours per semester is imposed and only a total of three hours may be counted toward degree requirements. These courses are offered only on a pass/fail basis. Prerequisite: written permission of the supervising instructor prior to registration.

BIOL 4390. INSTRUCTIONAL TECHNIQUES IN MICROBIOLOGY. 3 Hours.
Students will participate in laboratory instruction and laboratory preparation under the supervision of the lab coordinator. A maximum of 3 hours can be applied to the major for biology or microbiology credit. Enrollment by departmental permission only. A maximum of 6 hours credit from this class will be used to calculate a student's grade point average. Students on probation or who have not qualified for major status may not enroll in this course.

BIOL 4392. INSTRUCTIONAL TECHNIQUES IN MICROBIOLOGY LEADER. 3 Hours.
Students will take on a leadership role in laboratory instruction and preparation under the supervision of the lab coordinator. Students will strengthen their skill set and gain experience in a supervisory role. A maximum of 3 hours can be applied to the major for biology or microbiology credit. Enrollment by departmental permission only. A maximum of 6 hours credit from this class will be used to calculate a student's grade point average. Students on probation or who have not qualified for major status may not enroll in this course.

BIOL 4393. HONORS SENIOR PROJECT IN BIOLOGY. 3 Hours.
A topic will be selected after consultation with a supervising professor and will involve both original research and writing a formal report. The work will be evaluated by a faculty honors committee. Completion of this course will satisfy the thesis requirement for the Honors College described elsewhere in this catalog.
BIOL 4395. FORENSICS-EL PA. 3 Hours.

BIOL 4406. HUMAN OSTEOLOGY. 4 Hours.
Detailed examination of human skeletal morphology. Topics include form and function of all skeletal elements in the human body, differentiation of each bone, left and right side identification, identification or fragmented remains, and muscle attachments and articulations. Content useful in forensic anthropology, archaeology, and hominid paleontology. Offered as BIOL 4406 and ANTH 4406; credit will be granted only in one department.

BIOL 4421. ADVANCED TOPICS IN NEUROSCIENCE. 4 Hours.
This course will cover current topics in Neuroscience using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Neuroscience research. Completion of this course is essential for students who are interested in pursuing a career in Neuroscience research. Offered as BIOL 4421 or PSYC 4421. Credit will be granted only once. Junior standing recommended. Prerequisite: C or better in BIOL 3322 or PSYC 3322.

BIOL 4440. LABORATORY METHODS IN BACTERIAL PATHOGENESIS. 4 Hours.
This course is intended to expose students to research techniques for studying bacterial pathogens. Students will use molecular and classical techniques to isolate, identify, and characterize bacteria and their response to stimuli. Techniques will range from polymerase chain reaction (PCR), gene sequencing, sodium dodecyl sulfate polyacrylamide gel electrophoresis (SDS-PAGE) and Immunofluorescence Microscopy. Prerequisites: BIOL 3312, BIOL 3444, BIOL 4317, or permission of instructor.

BIOL 4441. ADVANCED MICROBIOLOGY LAB. 4 Hours.
An overview of advanced microbiology techniques used in microbial genetics and physiology. It will allow students not only to gain an advanced and applicable perspective of techniques used in microbiology, but also to learn current state-of-the-art molecular techniques for genetic manipulation and physiological characterization of microorganisms. Included are molecular, physiological, and biochemical methods as well as metagenomics approaches and basic analysis of sequencing data for studying microbiomes. Enrollment requirements: BIOL 1441, General Microbiology (BIOL 2444), and Microbial Genetics (BIOL 3304). Prerequisite: BIOL 1441, BIOL 2444 or BIOL 3444, BIOL 3304.

BIOL 4449. BIOARCHAEOLOGY. 4 Hours.
The study of human remains in archaeological contexts in order to reconstruct individual identity, life history, and past population characteristics. No formal prerequisites, but familiarity with the human skeleton is helpful. Lab component is required. Offered as BIOL 4459 and ANTH 4459; credit will be granted only in one department.

BIOL 4460. ZOOARCHAEOLOGY. 4 Hours.
The study of faunal remains from archaeological contexts to understand past human economic strategies and ecological circumstances. Topics include skeletal and taxonomic identification, taphonomic processes, mortality profiles, biometric analyses, and human behavioral ecology. Lab component is required. Offered as BIOL 4460 and ANTH 4460; credit will be granted only once.

BIOL 5101. SPECIAL TOPICS IN BIOLOGY. 1 Hour.
Seminar on significant biological research. May be repeated for credit. Prerequisite: consent of the instructor.

BIOL 5102. PROFESSIONAL DEVELOPMENT. 1 Hour.
This course will provide senior graduate students with important information regarding various aspects of their professional development including job searching, interviewing, stress and time management, and professional ethics.

BIOL 5193. RESEARCH IN BIOLOGY. 1 Hour.
Conference course in which the student undertakes intensive investigation of topics under the supervision of a staff member. Prerequisite: consent of the instructor. Graded P/F/R.

BIOL 5291. INDIVIDUAL PROBLEMS IN BIOLOGY. 2 Hours.
Individual research projects supervised by a faculty member. Prerequisite: consent of the instructor.

BIOL 5293. RESEARCH. 2 Hours.

BIOL 5301. LABORATORY ROTATION. 3 Hours.
This course is an elective designed to enable students to choose a major advisor and laboratory. Rotations among two or three faculty laboratories will familiarize students with faculty research interests, sharpen individual research skills, and expose students to different study systems, instruments, and research methods. May only be taken once for credit by MS students; may be repeated for credit once by Ph.D. students.

BIOL 5302. MICROBIAL GENETICS. 3 Hours.
Consideration of the nature, expression and regulation of the genetic processes in micro-organisms.

BIOL 5303. MICROBIOMES: HEALTH AND THE ENVIRONMENT. 3 Hours.
The development, interactions, and change of polymicrobial communities in both humans and the environment with implications in health, nutrition, disease, research, ecology and agriculture.

BIOL 5304. VIROLOGY. 3 Hours.
The nature, reproduction and host-cell interactions of viruses and animals. Emphasizes molecular aspects of viral replication and the molecular basis of pathogenesis. Prerequisite: consent of the instructor.

BIOL 5307. NEUROBIOLOGY. 3 Hours.
General principles of the function, structure, and organization of the nervous system. Topics include the gross and microscopic anatomy of nervous tissues; physical and chemical basis for action potentials and synaptic transmission; sensory and motor pathways of transduction; molecular, cellular, and systems study of learning and memory; development; and a study of neural diseases and disorders.
BIOL 5309. IMMUNOLOGY. 3 Hours.
This course is designed to acquaint students with the cellular processes involved in the generation of an immune response. It will provide students with detailed knowledge of the cells and organs of the immune system, their organization and diversity and their specialized functions at different anatomical locations. The importance of immune cell receptors and cytokines in cellular interactions and co-ordination of immunological mechanisms is also emphasized.

BIOL 5310. SELECTED TOPICS IN BIOLOGY. 3 Hours.
Topics may vary depending on the needs and interests of the students. May be repeated for credit. Prerequisite: consent of the student's thesis committee and the current course instructor.

BIOL 5311. EVOLUTION. 3 Hours.
Study of the origin of living systems and the mechanism of their evolution. Prerequisite: BIOL 3315 or equivalent or consent of the instructor.

BIOL 5312. ADVANCED GENETICS. 3 Hours.
Mechanisms of transmission and function of genetic material. Covers fundamental concepts in transmission genetics including: genotype/phenotype relationships; inheritance; linkage; genome organization; and gene expression. Experimental and quantitative approaches to genetic analyses are emphasized. Prerequisite: consent of the instructor.

BIOL 5314. BIOMETRY. 3 Hours.
An examination of statistical methods and procedures in relation to the design of biological experiments and the analysis of their results. Prerequisite: consent of the instructor.

BIOL 5315. COMMUNITY ECOLOGY. 3 Hours.
An investigation of the effects of interspecific interactions on the distribution and abundance of organisms. Prerequisite: consent of the instructor.

BIOL 5317. BACTERIAL PATHOGENESIS. 3 Hours.
Host-pathogen relationships in microbial diseases. Topics include bacterium-host interactions, pathogens and pathogenic factors: techniques in pathogenesis research: molecular mechanisms of pathogenesis by major bacterial pathogens: antimicrobial compounds and resistance to antibiotics; and discussion of human genomics and susceptibility to infections.

BIOL 5319. HUMAN GENETICS. 3 Hours.
This course will enable students to comprehend the basic principles of genetics applied to human inheritance and disease, to interpret the research strategies aimed to identify and study the genes responsible for diverse functions and traits, as well as to assess the consequences of the genetic technologies in our society.

BIOL 5325. PLANT ECOLOGY. 3 Hours.
An introduction to plant ecology including physiological, population, community and ecosystem ecology.

BIOL 5335. ESSENTIALS OF GENOMICS. 3 Hours.
An integrative approach to genome science, combining elements of genetics, statistics and bioinformatics. Current technologies used in genomics analysis will be presented.

BIOL 5336. MOLECULAR EVOLUTION. 3 Hours.
An exploration of how genes and genomes evolve at the molecular level. The presentation uses the theoretical framework provided by population genetics to analyze molecular biology data.

BIOL 5340. BIOINFORMATICS. 3 Hours.
This course is an applied introduction to bioinformatics and computational genomics. The course is geared toward the student with a biology background and limited programming experience. The course provides an entrance to commonly used programming/scripting languages and an introduction to numerous aspects of modern genomic data analyses (e.g. identification of coding and regulatory features in novel sequences, expression analysis, and comparative/phylogenetic analyses).

BIOL 5349. COOPERATIVE PROGRAM IN BIOLOGY. 3 Hours.
The purpose of this course is to allow students to earn credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment.

BIOL 5350. CONSERVATION BIOLOGY. 3 Hours.
Theory and practice of conservation biology, with emphasis on applications of modern quantitative and molecular genetic techniques to preservation of organisms and habitats. Includes: identification and prioritization of units for protection; conservation genetics; preserve design; public policy; and current case studies. Prerequisites: BIOL 3315 or equivalent or consent of the instructor.

BIOL 5351. ENVIRONMENTAL MICROBIOLOGY. 3 Hours.
Principles, methodology, and practical applications of environmental microbiology. Topics include: habitat and community approaches to environmental microbiology; measures of microbial populations and activities; interactions among microbial communities; role of microorganisms in the origin of mineral resources and pollution and energy flow through microbial communities. Prerequisite: BIOL 3444 or equivalent or consent of the instructor.

BIOL 5354. LIMNOLOGY. 3 Hours.
The study of biotic and abiotic components of inland waters. Prerequisite: consent of the instructor.

BIOL 5355. TOXICOLOGY. 3 Hours.
An introduction to the general principles of toxicology with an emphasis on certain classes of toxic agents, their sources and toxic effects, as well as their environmental fates. Pollution of various media (air, water and soil) and the differences between them will be discussed.
BIOL 5391. INDIVIDUAL PROBLEMS IN BIOLOGY. 3 Hours.
Individual research projects supervised by a faculty member. Prerequisite: consent of the instructor.

BIOL 5393. RESEARCH IN BIOLOGY. 3 Hours.
Conference course in which the student undertakes intensive investigation of topics under the supervision of a staff member. Prerequisite: consent of the instructor. Graded P/F/R.

BIOL 5398. THESIS. 3 Hours.
Graded R/F only. Prerequisite: consent of faculty.

BIOL 5420. GENETICS METHODS LAB. 4 Hours.
Computational and experimental approach to genomics research. The course theme will be transposable elements.

BIOL 5421. METHODS IN MOLECULAR MICROBIOLOGY. 4 Hours.
This course will provide an overview of different techniques used during manipulation of microorganisms. It will allow students to gain a historical perspective of techniques used in microbiology (Winogradsky column, Koch solid agar plating) as well as learn state of the art molecular characterization of microorganisms and their genetic manipulation. This course introduces current biochemical, physiological and molecular biology methods to assess community diversity and microbial activity in a variety of ecosystems. Other topics discussed include bacterial growth and survival, population biology, and microbial interactions.

BIOL 5440. LABORATORY METHODS IN BACTERIAL PATHOGENESIS. 4 Hours.
This course is intended to expose students to research techniques for studying bacterial pathogens. Students will use molecular and classical techniques to isolate, identify and characterize bacteria and their response to stimuli. Techniques will range from PCR, Gene Sequencing, SDS_PAGE and Immunofluorescence Microscopy. Prerequisites BIOL 3312, BIOL 3444, BIOL 4317.

BIOL 5493. RESEARCH. 4 Hours.

BIOL 5593. RESEARCH. 5 Hours.

BIOL 5693. RESEARCH IN BIOLOGY. 6 Hours.
Conference course in which the student undertakes intensive investigation of topics under the supervision of a staff member. Prerequisite: consent of the instructor. Graded P/F/R.

BIOL 5698. THESIS. 6 Hours.
Graded P/F/R. Prerequisite: consent of faculty.

BIOL 5993. RESEARCH IN BIOLOGY. 6 Hours.
Conference course in which the student undertakes intensive investigation of topics under the supervision of a staff member. Prerequisite: consent of the instructor. Graded P/F/R.

BIOL 6191. ADVANCED RESEARCH. 1 Hour.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6291. ADVANCED RESEARCH. 2 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6301. ESSENTIAL TOPICS IN GENOMICS. 3 Hours.
This course will explore diverse aspects of genome biology, including the evolutionary principles that influence how genomes change through time, genome structure, and genome function. Emphasis will be given on how genome technology influences the way we do modern biology and how genomics influences the world around us.

BIOL 6302. MICROBIOLOGY, MOLECULAR AND CELLULAR BIOLOGY. 3 Hours.
Using model microorganisms, this course will investigate their (1) Physiology, biochemistry, and genetics, (2) The hosts innate and adaptive immune responses, (3) The molecular basis for virulence and pathogenesis and (4) The ecological and economic impact of microbial pathogens including epidemics and pandemics.

BIOL 6303. BIODIVERSITY IN A CHANGING WORLD. 3 Hours.
Biodiversity, encompassing 8.7 million species, is the most distinctive feature of Earth. In this class, students will learn about the evolutionary and ecological forces shaping biodiversity, the measures of biodiversity from local to global scales, biogeographical patterns of biodiversity, the benefits of biodiversity to humans and ecosystems, and the major threats to biodiversity due to human activities.

BIOL 6310. SELECTED TOPICS IN BIOLOGY FOR PhD STUDENTS. 3 Hours.
Topics may vary depending on the needs and interests of the students. May be repeated for credit. This course is specific to students in the PhD program.

BIOL 6391. ADVANCED RESEARCH. 3 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6399. DISSERTATION. 3 Hours.
BIOL 6399 and BIOL 6699 graded R/F only; BIOL 6999 graded P/F/R. Prerequisite: admission to candidacy for the degree Doctor of Philosophy in Quantitative Biology.

BIOL 6491. ADVANCED RESEARCH. 4 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.
BIOL 6591. ADVANCED RESEARCH. 5 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6691. ADVANCED RESEARCH. 6 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6699. DISSERTATION. 6 Hours.
BIOL 6399 and BIOL 6699 graded R/F only; BIOL 6999 graded P/F/R. Prerequisite: admission to candidacy for the degree Doctor of Philosophy in Quantitative Biology.

BIOL 6999. DISSERTATION. 9 Hours.
BIOL 6399 and BIOL 6699 graded R/F only; BIOL 6999 graded P/F/R. Prerequisite: admission to candidacy for the degree Doctor of Philosophy in Quantitative Biology.

BIOL 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet requirements set by immigration law or by the policies of the student’s degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Biology - Graduate Programs

Objective

The program leading to the degree of Master of Science in biology is designed to provide graduate education that will prepare students for vocations in industry, government, and teaching, and to pursue further graduate education leading to the doctorate. The doctoral program is designed to train students to apply sophisticated quantitative techniques to solving basic and applied problems in biology. Students in this program will attain substantially greater quantitative skills than in traditional doctoral programs in the biological sciences, providing them with a competitive advantage in business, industry, government, and academia.

Admission Requirements

The following are minimal requirements for entrance into the graduate program in Biology. However, satisfying or exceeding these requirements does not guarantee admission to the program. Admission to the program is determined solely by the Biology Graduate Studies Committee and the Graduate School and is based on an evaluation of all pertinent aspects of an applicant's record.

Admission status in the Master of Science program is determined as follows:

Unconditional Admission

Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.

1. A Bachelor's degree in Biology or a Bachelor's degree in some other discipline with at least 12 hours of advanced level coursework (junior or senior level courses) in Biology.
2. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. Applicants overall GPA in the Sciences and within Biology are also considered.
3. A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1000 (old GRE scale), or 296 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.
4. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in graduate school.
5. Evidence of previous research experience may also be considered.
6. International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam or a minimum score of 7 on the Speaking portion of the IELTS exam.

Denial of Admission

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

Probationary Admission

If an applicant does not meet a majority of standards for unconditional admission outlined above, he or she may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in his/her first two long semesters of graduate coursework at UT Arlington.

Deferred and Provisional Admission

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Master of Science Options

Master of Science Thesis Option (MST)

The Master of Science with a major in Biology Thesis option is a 30-hour research degree that requires 24 hours of formal course work, including BIOL 5314 Biometry, BIOL 5340 Bioinformatics, and BIOL 5101 Current Topics in Biology, plus a 6-hour thesis (BIOL 5698) and additional hours to complete the degree requirements. Students have the option to conduct research leading to a thesis in a variety of specializations, including aquatic biology, ecology, genetics, evolutionary biology, genomics, microbiology, and cell biology. The thesis option is intended to prepare students for Ph.D. programs and careers in research and industry by obtaining skills such as the collection and analysis of data, evaluation of primary literature, and essential laboratory techniques.

Master of Science Non-Thesis Option (MSNT)

The Master of Science with a major in Biology non-thesis option is a 30-hour program of formal coursework requiring BIOL 5314 Biometry, BIOL 5340 Bioinformatics, BIOL 5101 Current Topics in Biology, BIOL 5391 Individual Problems in Biology, and sufficient additional hours to complete the degree requirements. The non-thesis option is intended to meet the needs of students looking to advance in their careers or those seeking additional
preparation for professional or health science programs. Graduates of this program can currently be found working in consulting, resource management, state and local agencies, and K-12 education.

Subject to written approval by the Graduate Advisor and within the limitations stated in the General Graduate School Regulations, a student may take up to nine hours of coursework from among courses listed under Biology at the 3000 or 4000 levels. Coursework may be taken in other areas in support of the student's program subject to approval by the graduate advisor.

**Admission Requirements**

**DOCTOR OF PHILOSOPHY**

Students interested in pursuing the Ph.D. in the Biology Department may apply for the B.S. - Ph.D. Track or the doctoral program directly depending on their background. The B.S. - Ph.D. Track is the point of entry into doctoral studies for students with a Bachelor's degree in Biology, but without 30 hours of graduate level coursework in Biology or a master's degree in Biology. Students who have already accomplished these goals may apply directly for the doctoral program as Ph.D. students. Degree requirements are the same for both groups (see below).

**B.S. - PH.D. TRACK STUDENTS**

Admission status in the B.S. - Ph.D. Track program is determined as follows:

**Unconditional Admission**

Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.

1. A Bachelor's degree in Biology or a Bachelor's degree in some other discipline with at least 12 hours of advanced level coursework (junior or senior level courses) in Biology.
2. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. Applicants overall GPA in the Sciences and within Biology are also considered.
3. A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1100 (old GRE scale), 301 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.
4. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in graduate school.
5. Evidence of previous research experience may also be considered.
6. International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam or a minimum score of 7 on the Speaking portion of the IELTS exam.

**Denial of Admission**

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

**Probationary Admission**

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first two long semesters of graduate coursework at UT Arlington.

**Deferred and Provisional Admission**

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

**Fellowships and Scholarships**

Students that are unconditionally admitted will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

**PH.D. STUDENTS**

Admission status in the doctoral program is determined as follows:

**UNCONDITIONAL ADMISSION**

Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.
1. A master's degree in Biology or at least 30 hours of graduate level coursework in Biology.
2. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. If an Applicant has a Master's degree, the GPA from their Bachelor's degree, as calculated by the Graduate School, will also be considered. If they have 30 hours of graduate coursework but no degree, the GPA from that 30 hours, as calculated by the Graduate School, will also be considered.
3. A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1100 (old GRE scale), or 301 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.
4. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in a doctoral program in quantitative biology.
5. Evidence of previous research experience including publications resulting from previous graduate work may also be considered.
6. International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam, or a minimum score of 7 on the Speaking portion of the IELTS exam.

Denial of Admission
A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

Probationary Admission
The Department of Biology does not as a matter of course admit doctoral students on a probationary basis. Under exceptional circumstances, an applicant that does not meet the standards for unconditional admission outlined above, may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first two long semesters of graduate coursework at UT Arlington.

Deferred and Provisional Admission
A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Fellowships and Scholarships
Students that have no provisional admission conditions to meet will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

Doctor of Philosophy Degree Requirements
The degree of Doctor of Philosophy in Quantitative Biology requires distinguished attainment both in scholarship and in research. In addition to meeting the minimum requirements of a planned course of study, the ultimate basis for conferring the degree must be the demonstrated ability to do independent and creative work and the exhibition of a profound grasp of the subject matter within the field.

Mathematics: Students will be expected to have (or complete during their first year of residence) a strong quantitative background including a formal course in differential and integral calculus (i.e., Calculus I).

General Course Requirements: All students are required to complete 15 hours of coursework. All students are required to take BIOL 5314 (Biometry), BIOL 5340 (Bioinformatics), two seminar courses (2 x BIOL 5101), and one elective (see course listings below) as part of their required courses. All students must also complete two of the following three courses (BIOL 6301, BIOL 6302, BIOL 6303).

Other requirements: Each student will make three research presentations that are open to the entire department. These may include the proposal defense, a research progress report, and the dissertation defense.

Students can choose among the following courses to fulfill additional course requirements:

Please Note:

The grade of R (research in progress) is a permanent grade; completing course requirements in a later semester cannot change it. To receive credit for an R-graded course, the student must continue to enroll in the course until a passing grade is received. This is the case for dissertation hours.

An incomplete grade (the grade of I) cannot be given in a course that is graded R, nor can the grade of R be given in a course that is graded I. To receive credit for a course in which the student earned an I, the student must complete the course requirements. Enrolling again in the course in which an I was earned cannot change a grade of I. At the discretion of the instructor, a final grade can be assigned through a change of grade form.

Three-hour thesis courses and three- and six-hour dissertation courses are graded R/F/W only (except social work thesis courses.) The grade of P (required for degree completion for students enrolled in thesis or dissertation programs) can be earned only in three-, five-, six-, or nine-hour dissertation courses and nine-hour thesis courses and when the student has taken 9 or more hours of dissertation hours BIOL XX99. In the course listings below, R-graded courses are designated either "Graded P/F/R" or "Graded R." Occasionally, the valid grades for a course change. Students should consult the appropriate graduate advisor or instructor for valid grade information for particular courses. (See also the sections titled "R" Grade, Credit for Research, Internship, Thesis or Dissertation Courses and Incomplete Grade in this catalog.)

1 these courses can be repeated for credit.
Biology - Undergraduate Programs

Overview

The Department of Biology curriculum familiarizes students with basic concepts inherent to biological science and allows them to master new, cutting edge areas of biological research. Its degree programs prepare students to enter exciting and challenging careers in the many diverse and rapidly expanding areas of biological employment, including environmental biology, conservation, microbiology, the health sciences, science teaching, pharmacology, biotechnology, molecular biology, neurobiology, and forensics as well as in basic biological research. Superior teaching and faculty involvement with students is a high priority in the department. Many of its faculty have received university-wide awards for teaching excellence. Biology faculty have internationally recognized research programs in which students are actively encouraged to participate through credit for supervised research. Thus, students can prepare for careers in specific areas of biology by being actively engaged in research related to that career area under faculty supervision.

The Department of Biology offers four programs of study leading to an undergraduate degree. These are the Bachelor of Arts (B.A.) degree in Biology and the Bachelor of Science (B.S.) degrees in Biology, Microbiology or Medical Technology. The Microbiology B.S. degree prepares students to enter careers in the highly diverse field of microbiology, ranging from control of infectious diseases, through public health and environmental microbiology to genetic engineering and molecular biology or to pursue graduate study. The B.S. in Medical Technology combines course work with 16 months of clinical laboratory training in an accredited hospital school of medical technology. This degree prepares students for careers as technicians in medical laboratories, clinics, hospitals and industry. The Biology B.S. program provides students with a strong background in the fundamental tenets of the biological sciences while allowing them to customize their degree plans to meet specific career goals. The Biology B.A. program is suitable for career preparation in a number of biological fields and for teaching certification in Composite Science.

There are two degree plan options through which students can complete their Biology B.S. degree. Option one in General Biology allows students to choose elective courses beyond the biology core that prepare them to enter a specific professional field, such as medical, dental, veterinary, or graduate school for further study and research. Students pursuing health professions careers should contact the Health Professions Advisor for assistance in selecting course electives pertinent to their specific career path. Students interested in genomics, environmental biology, or other areas of specialization should contact their Biology advisor for assistance with recommended courses. Option two in Forensics provides students with the training necessary to pursue exciting careers in biological forensics, DNA testing or police department laboratories.

All Biology degrees and degree plan options are supported by providing students with ready access to both academic and career advice provided by full-time undergraduate advisors and faculty members knowledgeable with a student's particular areas of academic and/or career interests. Students are strongly encouraged to interact with departmental and faculty advisors throughout their academic careers, particularly through independent research under faculty supervision, to develop the skills and course work background that will allow them to achieve their future academic/career goals. Detailed information on Biology and degree plan options is provided later in this section.

Beyond the undergraduate B.A. and B.S. degrees, the Department of Biology offers programs leading to graduate degrees, including the Master of Science in Biology (M.S.) which allows students to pursue biological careers requiring a greater knowledge base than provided by an undergraduate B.A. or B.S. degree and a Doctor of Philosophy Degree in Quantitative Biology (Ph.D.) which allows students to carry out independent dissertation research within a chosen area of biological research leading to a career in research and/or university teaching. The Ph.D. degree in Biology provides students with a strong background in modern mathematical approaches to biological research, including biostatistics, experimental design and mathematical modeling of biological systems. The Graduate Catalog provides details of the Biology M.S. and Ph.D. degree programs.

The Department of Biology takes pride in offering students outstanding degree programs supported by excellent teaching, undergraduate research opportunities and superior academic advising. These programs make graduates highly competitive in the job market or when applying to graduate or professional degree programs. Please visit the Biology Department and speak with one of our advisors. Phone 817-272-2408 to make an appointment.

Applying for Major Status in Biology

Freshmen who have no previous college work must complete the following courses before applying to the Biology Department to become a major:

19 hours from the University core (consisting of courses in English, history, political science, et al. See list of general core curriculum requirements set by the University elsewhere in this catalog) and a minimum of 20 hours from the courses below:

**BIOLOGY**

<table>

Total Hours: 61

1 Micro majors will substitute BIOL 2444 in the second semester of their freshman year, and another micro class in the first semester of their sophomore year. Med Tech majors will substitute BIOL 2444 during the first semester of their sophomore year.

Transfer students interested in one of the degree programs in biology will, after admission to UT Arlington, be placed into pre-major status: BIOL intended, MEDT intended, or MICR intended major. To apply for status as a major in biology, microbiology, or medical technology, these students must have a minimum of 39 hours which include:

- At least 28 hours in the University core curriculum including eight hours of freshman chemistry, with lab (credit by transfer or earned at UT Arlington).
- At least 11 hours in biology courses taken at UT Arlington that apply to one of the three programs awarded by the department.

At the time of application for major status in biology, the student must have a GPA of 2.25 or better in courses taken at UT Arlington (both overall and in biology courses). An application form for requesting major status is available from the Department Advisor (Room 346 LS). Transfer students will be evaluated for major status only after completing 11 hours in biology in residence at UT Arlington.

Maintaining Major Status

- Students who are accepted as majors in biology, microbiology, or medical technology must thereafter maintain a GPA of 2.25 or better in all courses and in biology courses. Any student whose GPA falls below 2.25 in either of these categories will be returned to undeclared status at the end of the semester in which the deficiency occurs.

- Students who fall into academic difficulty will be required to meet with their Advisor and/or Academic Dean in order to discuss academic consequences and their future status in the College of Science. Please refer to the College of Science section of the catalog, "Academic Policies for College of Science Majors".
• Students who have lost status as a major must have departmental permission to enroll in any junior or senior course in biology at UT Arlington.
• Students in the medical technology program should have a 2.8 GPA or higher after completing three years of course work to be competitive when applying for the final year of training in medical technology.

General Information
• In order to receive a B.A. degree in Biology or a B.S. degree in Biology or Microbiology from UT Arlington, transfer students must complete a minimum of 18 hours of junior or senior level courses (12 of the 18 hours in Biology) at UT Arlington. Transfer students who are approved for admission to the medical technology program must complete at least 13 hours of junior or senior level courses in biology at UT Arlington to qualify for a B.S. Degree in Medical Technology from UT Arlington.
• No student working toward a B.A. degree in Biology or a B.S. degree in Biology, Medical Technology or Microbiology may take any biology course on a Pass/Fail basis.
• Students are not allowed to receive credit for biology courses at the sophomore level or above by special examination.
• Exceptions to the core course prerequisites for advanced courses will be made only for specialized degree programs such as Medical Technology, Nursing, and Physical Education, and for selected non-majors with special needs.

UNIV 1101 Career Preparation and Student Success
All transfer students are required to enroll in a 1 hour career preparation course, UNIV 1101.

UNIV 1131 Issues in College Adjustment
All entering freshmen are required to enroll in a 1 hour college adjustment course, UNIV 1131.

Computer and Oral Communication Competency Requirement
Students majoring in Biology, Microbiology, or Medical Technology are required to demonstrate computer use and oral communication competencies.

The University requirement of competency in computer proficiency is satisfied by completion of the BIOL 1441 or 1442 labs.

Oral communication competency can be demonstrated by completion of COMS 1301, COMS 2302, or an approved substitute.

Teacher Certification
A student interested in earning a degree with a major in biology with secondary teacher certification, should refer to the "Bachelor of Science Degree in Biology – Life Science Certification" and the "Bachelor of Arts Degree in Biology – Composite Science Certification" degree plans for teacher certification requirements and for biology courses recommended for each teaching field option.

Requirements for a Bachelor of Arts Degree in Biology
The Bachelor of Arts Degree in Biology is suitable for career preparation in a number of biological career fields and for students who desire teaching certification with a teaching field in biology or composite science. Students choosing this program are required to consult with the Department of Biology's undergraduate advisor to develop an acceptable degree plan. Students seeking teaching certification with a teaching field in biology or composite science are required to consult with the Department of Biology certification advisor in order to develop an acceptable teaching certification degree program.

**Total Hours: 120**

**Requirements for a Bachelor of Science Degree in Biology**

The requirements to receive a Bachelor of Science Degree in Biology can be achieved through degree plans under either of two options (i.e., General Biology, and Forensics Biology) detailed in this section. Before choosing a B.S. degree program under one of these options, please consult with a biology undergraduate advisor and biology faculty associated with the chosen option.

**OPTION 1: GENERAL BIOLOGY**

The General Biology Option is intended for students studying basic aspects of the biological sciences. Students developing degree plans under the General Biology Option choose elective courses in Biology, other sciences, and nonscience areas to develop either a broad knowledge-base in Biology or to focus their studies in a particular area of Biology (a list of potential areas of study in Biology and the faculty who can assist students in developing degree plan programs in these areas is available from the undergraduate biology advisors). The General Biology Option will prepare students for careers in a variety of the Biological Sciences (including Health Professions, Genomics, Ecology/Environmental Studies, etc.) or for graduate study in Biology at the Master’s or Ph.D. levels.

**Pre-Professional Courses**

Total Hours: 120

1 See general core requirements (p. 50).
2 Transfer students must present a minimum of six semester credit hours of equivalent or higher level mathematics courses through transfer or placement examination.

**OPTION 2: FORENSICS**

The option in forensics is intended to prepare students for a career in biological forensics by emphasizing relevant courses in biology and related disciplines. This option is designed for students who wish to seek employment in a forensics, DNA testing, or a police department laboratory upon graduation, and, as such, an internship (BIOL 3349) is recommended when possible. Students pursuing this option are encouraged to seek advice from the faculty forensics advisor.

**Pre-Professional Courses**

Total Hours: 120

## Dual Degree Plan: Bachelor of Science in Biology and Master of Science in Biomedical Engineering

This curriculum prepares students for careers in the fast growing biotechnology and biomedical engineering industries. The curriculum also prepares students for medical school and advanced study. Students are required to take courses from engineering, life sciences and liberal arts, culminating in a five-year Master of Science Degree in Biomedical Engineering, and a Bachelor of Science Degree in Biology. The curriculum is offered jointly by the College of Engineering and the College of Science. In this program, two areas of emphasis are offered:

1. Bioimaging and
2. Biomaterials and Tissue Engineering.

### DESCRIPTION

Biomedical engineers use quantitative methods and innovation to analyze and solve problems in biology and medicine. Students choose the biomedical engineering field to be of service to people, to partake in the excitement of working with living systems, and to apply advanced technology to the complex problems of medical care.

Through this program, students learn the essentials of life science, engineering theory, and the analytical and practical tools that enable them to be successful in the biotechnology and biomedical engineering industries. The program includes course work in the basic sciences, core engineering, biomedical engineering, and advanced biotechnology disciplines. Both didactic classroom lectures and hands-on laboratory experience are emphasized. Additionally, students are required to take general educational courses in literature, fine arts, history, political science, and social science.

### CAREER OPPORTUNITIES

The program prepares students as biomedical engineers for careers in industry, in hospitals, in research facilities of educational and medical institutions, and in government regulatory agencies. It also provides a solid foundation for those wishing to continue for advanced degrees. For those planning to
pursue a medical degree, this cross-disciplinary curriculum offers a solid foundation in engineering, which is an advantage in preparing for a medical career.

REQUIREMENTS

Regardless whether a student chooses Bioimaging or Biomaterials and Tissue Engineering emphasis, after completion of 120 semester credit hours of the undergraduate courses from the list for the emphasis (below) and prior to taking any graduate course, the student must apply to the UT Arlington Graduate School for admission to the Bioengineering Department. A minimum grade point average of 3.0 in the 120 semester credit hours as well as a minimum average of 3.0 in the required English courses (ENGL 1301 and ENGL 1302) and a minimum average of 3.0 in the required Mathematics courses (MATH 1426, MATH 2425, MATH 2326 and MATH 3319) is required for admission to the Biomedical Engineering Graduate Program. The student should also submit two letters of recommendation, one from a faculty member and one from the Biology undergraduate advisor.

For course listings and suggested course sequences, please see Biomedical Engineering in the Engineering section of this catalog.

Fast Track Degree Plan: Bachelor of Science in Biology and Master of Science in Biology

The Fast Track program will enable outstanding senior undergraduate Biology students to satisfy degree requirements leading to a master's degree in Biology while completing their undergraduate studies.

DESCRIPTION

Undergraduate Biology students will apply when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UTA, achieving a GPA of at least 3.3 in those courses, have an overall GPA of 3.3 or better in all department courses, and have a GPA of at least 3.3 in all biology courses taken at UTA. Additionally, they must have completed 13 hours of specified undergraduate Fast Track foundation courses at UTA that are listed below with a minimum GPA of 3.5 in these courses. If one of these courses is transferred from another school it will not be included, and an equivalent course determined by the undergraduate advisor will be used as a Fast Track foundation course.

Foundation Courses Required for Admission into the Fast Track program:

1. **BIOL 2300** Biostatistics (3-0)
2. **BIOL 3315** Genetics (3-0)
3. **BIOL 3301** Cell Physiology (3-0)
4. **BIOL 2444** General Microbiology (4-0)

BIOL students pursuing the Fast Track master's degree will be allowed to take **BIOL 5309, 5314 and 5304** in place of advanced undergraduate biology electives.

### Requirements for a Minor in Biology

A minor in biology will consist of a minimum of 18 credit hours of approved biology classes that would be applicable toward a major in Biology. Non-majors' courses will not apply toward a minor in biology, such as:

<table>
<thead>
<tr>
<th>Course Code</th>

<td>3</td>
</tr>
</tbody>
</table>

Non-lecture courses such as research, directed study, co-op, or lab TA credit may not be used toward a minor in Biology. A minimum of six of the 18 credit hours required for the minor must be at the 3000 or 4000 level. BIOL 1441 and BIOL 1442, or equivalent, are required for the minor. The remaining 10 hours must be chosen with and approved by a Biology Advisor.

A 2.0 Biology Grade Point Average must be maintained to earn the minor. Transfer students must complete at least nine hours toward the minor at UT Arlington, and six of the nine hours must be 3000 or 4000 level.

- Chemistry, Ph.D. (p. 1146)

COURSES

CHEM 1181. GENERAL CHEMISTRY I LABORATORY FOR ADVANCED CHEMICAL TECHNOLOGIES. 1 Hour.
General, analytical, and synthetic chemistry concepts will be reinforced through problem- and inquiry-based laboratory activities. The Advanced Chemical Technologies track for majors will introduce research and scientific methods in the context of instructor and student-selected research problems. Hand-on experience in the laboratory will be supplemented with mini-lectures, modules, and web resources to increase student readiness for scientific discovery. Students will also learn about contemporary challenges and advances in chemistry and biochemistry. If a student withdraws from CHEM 1181, the student must also withdraw from CHEM 1341. Prerequisite: Concurrent enrollment in CHEM 1341.

CHEM 1182. GENERAL CHEMISTRY II LABORATORY FOR ADVANCED CHEMICAL TECHNOLOGIES. 1 Hour.
General, analytical, and synthetic chemistry concepts will be reinforced through problem- and inquiry-based laboratory activities. Research and scientific methods will be reinforced through the investigation of student-selected research problems and modules on scientific communication. Increased exposure to state-of-the-art analytical techniques and instruments, as well as synthetic methods will culminate in the preparation of a proposal related to the synthesis of new materials and the analysis of their structure and function. If a student withdraws from CHEM 1182, the student must also withdraw from CHEM 1342. Prerequisite: (CHEM 1341 with a grade of C or better) and (CHEM 1181 with a grade of C or better) and (concurrent enrollment in CHEM 1342).

CHEM 1185. CHEMISTRY FOR ENGINEERS LABORATORY. 1 Hour.
This course is intended to provide laboratory credit in chemistry for engineering-majors who transfer into UT-Arlington with credit in Chemistry for Engineers lecture only. Students may register for this course only with specific approval of a Chemistry advisor. Prerequisite: 3 hours of Chemistry for Engineers lecture. Credit cannot be earned for both CHEM 1465 and CHEM 1185.

CHEM 1188. GENERAL CHEMISTRY I LABORATORY. 1 Hour.
This course is intended to provide laboratory credit in freshman chemistry for students who transfer into UT-Arlington with credit in General Chemistry I lecture only. Experiments include: measurement and scientific equipment use, physical properties, separations, synthesis, qualitative analysis, spectroscopy. Students may register for this course only with specific approval of a Chemistry advisor. Prerequisite: 3 hours of General Chemistry I lecture. Credit cannot be earned for both CHEM 1441 and CHEM 1188.

CHEM 1189. GENERAL CHEMISTRY II LABORATORY. 1 Hour.
This course is intended to provide laboratory credit in freshman chemistry for students who transfer into UT-Arlington with credit for General Chemistry lecture only. Experiments include: thermodynamics, electrochemistry, synthesis, quantitative analysis, spectroscopy, stoichiometry, and acid-base chemistry. Students may register for this course only with specific approval of a Chemistry advisor. Prerequisite: CHEM 1188 and 6 hours of General Chemistry II lecture. Credit cannot be earned for both CHEM 1442 and CHEM 1189.

CHEM 1341. GENERAL CHEMISTRY I. 3 Hours.
The lecture covers the fundamentals of atomic structure, chemical bonding, the periodic table, nomenclature, kinetic theory, gas laws, chemical equations, and solutions. Only chemistry majors in the Advanced Chemical Technologies program may take this course. When combined with CHEM 1181, this course will satisfy completion of CHEM 1441 for Chemistry, Biochemistry, and Biological Chemistry majors. Prerequisite: (MATH 1302 or MATH 1303 or MATH 1322 or MATH 1323 or MATH 1402 or MATH 1421 or MATH 1426 or MPT Algebra score =/> 17) and (concurrent enrollment in CHEM 1181). Students must pass the departmental placement assignment. ACT program only.
CHEM 1342. GENERAL CHEMISTRY II. 3 Hours.
The lecture covers study of advanced atomic structure and bonding concepts, acid-base theory, kinetics and equilibria, thermodynamics, electrochemistry, and the chemistry of some elements. Only chemistry majors in the Advanced Chemical Technologies program may take this course. When combined with CHEM 1182, this course will satisfy completion of CHEM 1442 for Chemistry, Biochemistry, and Biological Chemistry majors. Prerequisite: (CHEM 1341 or CHEM 1441 with a grade of C or better) and (CHEM 1181 with a grade of C or better) and (concurrent enrollment in CHEM 1182). ACT program only.

CHEM 1345. CHEMISTRY IN THE WORLD AROUND US. 3 Hours.
This course looks at current issues in society and uses chemical principles to understand them. Topics include sustainability, air pollution, the ozone layer, global climate change, fuels, and water. CHEM 1345/1346 cannot be used to fulfill the CHEM 1441/1442/1451/1465 requirement in any degree program.

CHEM 1346. CHEMISTRY IN THE WORLD AROUND US II. 3 Hours.
This course is a continuation of the study of current issues in society using chemical principles to understand them. Topics include polymers, drug design, nutrition, and genetic engineering. CHEM 1345/1346 cannot be used to fulfill the CHEM 1441/1442/1451/1465 requirement in any degree program. Prerequisite: CHEM 1345 or equivalent with a grade of C or better.

CHEM 1400. INTRODUCTORY CHEMICAL PRINCIPLES. 4 Hours.
Provides a background in fundamental chemical mathematics, in writing and understanding chemical formulas and equations, and in the application of scientific laws to the behavior of matter. Students will learn problem solving skills necessary in general chemistry I by hands-on and interactive approach. This course is designed for the student with little or no previous chemical training who intends to take the CHEM 1441/CHEM 1442 sequence or CHEM 1465 at a later date. CHEM 1400 cannot replace CHEM 1441/CHEM 1442/CHEM 1451/CHEM 1465. Prerequisite: MATH 1302 or equivalent or MPT Algebra score =/> 17.

CHEM 1441. GENERAL CHEMISTRY I. 4 Hours. (TCCN = CHEM 1411)
The lecture covers the fundamentals of atomic structure, chemical bonding, the periodic table, nomenclature, kinetic theory, gas laws, chemical equations, and solutions. The laboratory introduces the scientific method, experiment design, data collection and analysis, as well as illustrates fundamental principles presented in the lecture. Students who have not had high school chemistry are advised to take an introductory chemistry course first. Prerequisite: MATH 1302 or MATH 1303 or MATH 1322 or MATH 1323 or MATH 1402 or MATH 1421 or MATH 1426 or MPT Algebra score =/> 17 or Student Group CHEM 1441. Students must pass the departmental placement assignment.

CHEM 1442. GENERAL CHEMISTRY II. 4 Hours. (TCCN = CHEM 1412)
Study of advanced atomic structure and bonding concepts, acid-base theory, kinetics and equilibria, thermodynamics, electrochemistry, the chemistry of some elements. The laboratory focuses on experimental data, design, collection and analyses as well as chemical syntheses to illustrate fundamental principles presented in the lecture. Prerequisite: CHEM 1441 or equivalent with a grade of C or better or (CHEM 1341 with a grade C or better) or Student Group CHEM 1442.

CHEM 1445. CHEMISTRY FOR NON-SCIENCE MAJORS. 4 Hours. (TCCN = CHEM 1405)
Chemistry of things of everyday life: energy, radioactivity, petroleum products, pollution, the nature of matter, and the applications of chemistry to things we use. CHEM 1445, 1446 cannot be used to fulfill the 1441/1442 requirement in any degree program.

CHEM 1446. CHEMISTRY II FOR NON-SCIENCE MAJORS. 4 Hours. (TCCN = CHEM 1407)
Continuation of the chemistry of things of everyday life. Vitamins, minerals, chemical additives, plastics, cosmetics, proteins, carbohydrates, poisons, fats, and oils. Prerequisite: CHEM 1445 or equivalent with a grade of C or better. CHEM 1445, CHEM 1446 cannot be used to fulfill the CHEM 1441/ CHEM 1442 requirement in any degree program.

CHEM 1451. CHEMISTRY FOR HEALTH SCIENCES. 4 Hours.
Survey of general, organic, and biochemistry with emphasis on applications to the human body. Measurement, atomic theory and structure, bonding, quantitative relationships in chemical reactions, gases, solutions, electrolytes, organic functional groups and nomenclature, organic reactions, carbohydrates, lipids, proteins, enzymes, metabolism, and nucleic acids. CHEM 1451 cannot count for major credit toward a degree in chemistry. Prerequisite: MATH 1301 or MATH 1302 or MATH 1303 or MATH 1315 or MATH 1316 or MATH 1322 or MATH 1323 or MATH 1324 or MATH 1421 or MATH 1426 or equivalent.

CHEM 1465. CHEMISTRY FOR ENGINEERS. 4 Hours.
An introduction to important concepts and principles of chemistry with emphasis on areas considered most relevant in an engineering context. Topics include chemical stoichiometry, bonding, chemical thermodynamics, equilibria, electrochemistry, and kinetics. Engineering students may substitute the eight hour sequence CHEM 1441 and CHEM 1442 for this class, but not either CHEM 1441 or CHEM 1442 alone. Students who complete CHEM 1465 and subsequently change majors to curricula that require both CHEM 1441 and CHEM 1442 may substitute CHEM 1465 for CHEM 1441. Prerequisite: C or better in MATH 1322 or C or better in MATH 1323 or C or better in MATH 1324 or C or better in MATH 1421 (or concurrent enrollment) or MATH 1426 (or concurrent enrollment) or HONR-SC 1426 (or concurrent enrollment) or MATH 2425 (or concurrent enrollment) or HONR-SC 2426 (or concurrent enrollment) or Student Group CHEM 1465.

CHEM 2101. CHEMICAL INFORMATICS I. 1 Hour.
Developing quantitative understanding in chemistry relies heavily on models, from very crude and simple ideas to complex theoretical frameworks. This class aims to introduce students into models and modeling chemical phenomena that develop understanding of chemical processes. Working with observations and data, we develop the art of developing qualitative relations and explore their limitations. The class is delivered as a practical tour with hands-on practice. Good number skills, basic knowledge of coding and handling of computers is required. Prerequisite: CHEM 1442 with a grade of C or better and (MATH 1426 with a grade of C or better or Concurrent enrollment in MATH 1426 or Instructor's permission).
CHEM 2180. RESEARCH IN CHEMISTRY. 1 Hour.
Research for undergraduate students supervised by faculty of the department. May be repeated. Graded pass/fail only. Prerequisite: written permission of the instructor. Students may take a maximum of 12 hours credit on a pass/fail basis.

CHEM 2181. ORGANIC CHEMISTRY I LABORATORY. 1 Hour. (TCCN = CHEM 2123)
Experiments which illustrate laboratory techniques, theoretical concepts, and synthesis. Prerequisite: CHEM 1442 with a grade of C or better or ((CHEM 1342 with a grade C or better) and (CHEM 1343 with a grade C or better)) or Student Group CHEM 2181. Corequisite: CHEM 2321. If student withdraws from CHEM 2321 prior to midterm date, student must also withdraw from CHEM 2181.

CHEM 2182. ORGANIC CHEMISTRY II LABORATORY. 1 Hour. (TCCN = CHEM 2125)
Experiments which will include syntheses, characterization of unknown substances, and use of the chemical literature. Prerequisite: (CHEM 2181 with a grade of C or better) and (CHEM 2321 with a grade of C or better). Corequisite: CHEM 2322. If student withdraws from CHEM 2322 prior to the midterm date, student must also withdraw from CHEM 2182.

CHEM 2283. SYNTHESIS AND ANALYSIS LABORATORY I. 2 Hours.
Students will perform experiments that build mastery in standard laboratory techniques and illustrate theoretical concepts related to organic synthesis and quantitative analysis methods. Students will continue to develop their mastery of analysis through an introduction to the acquisition and statistical analysis of quantitative and qualitative data, acquired in the context of a series of guided inquiry design and synthesis projects. Syntheses may involve small molecules, polymers, and materials designed to perform specific functions. Students will continue to develop their communication and group work skills by sharing independent data and critical feedback with peers. Additionally, laboratory exercises will involve basic titrimetric, spectrophotometric, and chromatographic methods. Prerequisite: CHEM 1442/CHEM 1342 and CHEM 1182 or equivalent with a grade of C or better. Corequisites: Concurrent enrollment or previous credit in CHEM 2321 and CHEM 2335. Students must remain enrolled in at least one of CHEM 2321 and CHEM 2335 beyond the mid-semester date to remain enrolled in CHEM 2283.

CHEM 2284. SYNTHESIS AND ANALYSIS LABORATORY II. 2 Hours.
Experiments will include syntheses and analysis, characterization of unknown substances, and use of the chemical literature. A focus will be placed on advancing the use of modern chemical technologies for both synthetic and analytical work in a guided inquiry format. Prerequisite: CHEM 2283 and CHEM 2321 with a grade of C or better. Corequisite: CHEM 2322.

CHEM 2285. QUANTITATIVE CHEMISTRY LABORATORY. 2 Hours.
An introduction to computers for the acquisition and statistical analysis of data. Laboratory exercises involving basic titrimetric, spectrophotometric and chromatographic methods. Prerequisite: CHEM 1442 or a grade of C or better, and concurrent enrollment/previous credit in CHEM 2335.

CHEM 2321. ORGANIC CHEMISTRY I. 3 Hours. (TCCN = CHEM 2323)
The fundamentals of molecular structure, stereochemistry, and the reactions of aliphatic hydrocarbons. Electronic theory, synthetic methods, and mechanisms. Prerequisite: CHEM 1442 with a grade of C or better or ((CHEM 1342 with a grade C or better) and (CHEM 1182 with a grade C or better)) or Student Group CHEM 2321.

CHEM 2322. ORGANIC CHEMISTRY II. 3 Hours. (TCCN = CHEM 2325)
Organic spectroscopic analysis. The chemistry of aromatic hydrocarbons, alcohols and ethers, aldehydes, ketones, carboxylic acids and derivatives, amines, amino acid, carbohydrates, and other functional groups. Mechanisms and synthesis. Prerequisite: CHEM 2321 with a grade of C or better.

CHEM 2335. QUANTITATIVE CHEMISTRY. 3 Hours.
Basic methods of error analysis, simple and advanced methods for the solution of complex equilibria, fundamentals of titrimetric, spectrophotometric and chromatographic instrumental analysis. Prerequisite: (CHEM 1442 or CHEM 1342 or equivalent) and (MATH 1324 or MATH 1325 or MATH 1421 or MATH 1426 or equivalent or higher) and (CHEM 2285 or CHEM 2283 concurrent enrollment or previous credit).

CHEM 2380. UNDERGRADUATE RESEARCH. 3 Hours.
Research in chemistry supervised by a faculty member of the department. May be repeated. Graded pass/fail only. Prerequisite: written permission of the instructor. Students may take a maximum of 12 hours credit on a pass/fail basis.

CHEM 3101. CHEMICAL INFORMATICS II. 1 Hour.
This course provides a succinct overview of the emerging discipline of Chemical Informatics at the intersection of chemistry, computational science, and information science. Efficient and reliable analysis of chemical analytical data is a great challenge due to the increase in data size, variety and velocity. Attention in this class is drawn to specific opportunities afforded by this new field in accelerating discovery and understanding of cause and effect. The class is delivered as a practical tour with hands-on practice. Good number skills, basic knowledge of coding and handling of computers is required. Prerequisite: (CHEM 2101 with a grade C or better) or (Instructor's permission).

CHEM 3131. CHEMISTRY COMMUNITY SERVICE LEARNING. 1 Hour.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

CHEM 3175. BIOPHYSICAL CHEMISTRY LABORATORY. 1 Hour.
Introduction to the physical experimental techniques used in quantitative biochemical practice. Prerequisite: CHEM 3315 or concurrent enrollment.
CHEM 3181. PHYSICAL CHEMISTRY I LABORATORY. 1 Hour.
The physical and thermodynamic properties of substances, experimentally determined. Prerequisite: Grade of C or better in CHEM 2285 or CHEM 2343, CHEM 2335, and CHEM 3321 or concurrent enrollment.

CHEM 3182. PHYSICAL CHEMISTRY II LABORATORY. 1 Hour.
Experiments in kinetics, equilibria, spectroscopy, and electrochemistry. Modern instrumental techniques. Prerequisite: Grade C or better in CHEM 2285 or CHEM 2343, CHEM 2335, and CHEM 3322 or concurrent enrollment.

CHEM 3231. CHEMISTRY/BIOCHEMISTRY COMMUNITY SERVICE LEARNING. 2 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

CHEM 3307. INTRODUCTION TO POLYMER CHEMISTRY. 3 Hours.
The chemistry and technology of polymeric systems. The chemistry of natural systems such as proteins as well as the synthesis of fibers, films, plastics, and elastomers. Discussion of the characterization of polymers by modern techniques using instrumental analysis is followed by a summary of end-use and processing techniques. Prerequisite: CHEM 2322 with a grade of C or better or permission of instructor.

CHEM 3315. INTRODUCTION TO BIOPHYSICAL CHEMISTRY. 3 Hours.
A basic course introducing the physical principles that govern biological systems and processes, and the methods used for their investigation. Topics include solution thermodynamics, biomolecular interactions, enzyme kinetics, transport processes (diffusion, sedimentation, electrophoresis, viscous flow), and the applications of spectroscopic methods (absorption, emission and scattering of radiation, and the utilization of polarized light). Prerequisites, a grade of C or better in each of the following: CHEM 2335, MATH 2425, and 8 hours of college level physics.

CHEM 3317. INORGANIC CHEMISTRY. 3 Hours.
An overview of descriptive main group chemistry, solid state structures and the energetics of ionic, metallic, and covalent solids, acid-base chemistry and the coordination chemistry of the transition metals. The course is intended to explore and describe the role of inorganic chemistry in other natural sciences with an emphasis on the biological and geological sciences. Important compounds and reactions in industrial chemistry are also covered. Intended for both chemistry and non-chemistry majors. Prerequisite: Grade of C or better in CHEM 2322 or concurrent enrollment.

CHEM 3321. PHYSICAL CHEMISTRY I. 3 Hours.
Thermodynamics, gases, First and Second Law, pure substances, mixtures and solutions, equilibrium; Statistical Thermodynamics; Kinetics, rates, mechanisms, transitions state theory. In this class you will learn to understand the basic principles of Chemistry as the Science of Transformation and Change. We emphasize conceptual understanding and will become skilled in a quantitative description of the phenomena we study. The goal is that at the end of the course every student can outline the basic principles of Thermodynamics, has a sound understanding of ideal and approximate systems, and can apply the tools to engage in self-driven investigations. Prerequisites: CHEM 2335, MATH 2326, both with a grade of C or better and PHYS 1443 and PHYS 1444. MATH 3318 concurrent enrollment recommended.

CHEM 3322. PHYSICAL CHEMISTRY II. 3 Hours.
Quantum theory, introduction, principles. Schrodinger Equation, wavefunction; particle in a box, uncertainty; postulates of quantum mechanics; hydrogen atom, orbitals, structure of multi-electron atoms, atomic spectra and selection rules; molecular structure of diatomic molecules; introduction to molecular spectroscopy; materials and structure: lattices, diffraction methods, properties of solids. In this class you will learn to understand the principles of Quantum Chemistry and how it applies to atoms, molecules, and solids. We emphasize conceptual understanding and will become skilled in quantitative descriptions. The goal is that at the end of the course every student can outline the basic principles of Quantum Chemistry, both qualitatively and quantitatively. Students will obtain a sound understanding of probability, wavefunctions, orbitals, and spectroscopy, and can apply the learned concepts and tools to engage in self-driven investigations. This course is designated as the capstone course. Prerequisite: CHEM 2335, MATH 2326, both with a grade of C or better and PHYS 1443 and PHYS 1444. MATH 3318 concurrent enrollment recommended.

CHEM 3331. CHEMISTRY/BIOCHEMISTRY COMMUNITY SERVICE LEARNING. 3 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

CHEM 4080. UNDERGRADUATE RESEARCH. 0 Hours.
Research problems on an individual basis, conducted on a selected topic under the direction of a member of the chemistry and biochemistry faculty. May be repeated. This is a non-credit course and cannot be used to meet degree requirements. Prerequisite: Permission of the instructor.
CHEM 4101. SEMINAR IN CHEMISTRY. 1 Hour.
Oral and written communication of chemical information. Seminars will be presented by students on topics from the current chemical literature. A term paper is required. The use of the library for researching the chemical literature will be emphasized. May be repeated for a total of two semester hours of credit. Students must be within 12 credits hours from the degree completion. Departmental permission required.

CHEM 4180. UNDERGRADUATE RESEARCH. 1 Hour.
Research under the direction of a member of the department. No more than six hours of CHEM 4180, CHEM 4280, CHEM 4380 and CHEM 4381 may be taken for a letter grade. Prerequisite: Written permission of the instructor and a minimum grade point average of 2.5.

CHEM 4181. COMPUTATIONAL CHEMISTRY LABORATORY. 1 Hour.
Molecular modeling. Application of various computational techniques to chemical problems, including determination of molecular geometry, conformational analysis, and molecular energetics. Prerequisite: CHEM 3321 or CHEM 3322 with a grade C or better.

CHEM 4191. READINGS IN CHEMISTRY. 1 Hour.
May be repeated for a maximum of six hours credit. Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper. Prerequisite: permission of department chair. Graded pass/fail only.

CHEM 4203. COMPUTATIONAL CHEMISTRY. 2 Hours.
A course emphasizing molecular quantum mechanics. Topics include the basic postulates of quantum mechanics, many electron wave functions, the variation method, and molecular orbital theory at various levels of approximation (Hueckel, Extended Hueckel, semi-empirical, ab initio, etc.). Related methods, such as force-field approaches and molecular dynamics, will be discussed. Prerequisite: CHEM 3322, with a grade of "C" or better.

CHEM 4242. LABORATORY TECHNIQUES IN BIOCHEMISTRY. 2 Hours.
Designed to introduce the student to biochemical laboratory methods; a practical approach to the properties of carbohydrates, proteins, enzymes, and nucleotides. Prerequisite CHEM 4311, with a grade of "C" or better.

CHEM 4280. UNDERGRADUATE RESEARCH. 2 Hours.
Research under the direction of a member of the department. No more than six hours of CHEM 4180, CHEM 4280, CHEM 4380 and CHEM 4381 may be taken for a letter grade. Prerequisite: Written permission of the instructor and a minimum grade point average of 2.5.

CHEM 4291. READINGS IN CHEMISTRY. 2 Hours.
May be repeated for a maximum of six hours credit. Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper. Prerequisite: permission of department chair. Graded pass/fail only.

CHEM 4311. BIOCHEMISTRY I. 3 Hours.
The chemistry of the sugars, amino acids, proteins, and nucleic acids, followed by an introduction to enzyme chemistry. The major metabolic pathways of the cell, glycolysis, TCA cycle, and pentose phosphate pathway. Auditing of this class is NOT permitted. Prerequisite: CHEM 2322, with a grade of "C" or better.

CHEM 4312. BIOCHEMISTRY II. 3 Hours.
A continuation of CHEM 4311. The breakdown and biosynthesis of fats and the synthesis of carbohydrates, including photosynthesis. Metabolic utilization of proteins and amino acids together with an introduction to protein synthesis. Prerequisite: CHEM 4311, with a grade of "C" or better, or equivalent.

CHEM 4313. METABOLISM AND REGULATION. 3 Hours.
Selected topics in advanced metabolism including biosynthesis of phospholipids, steroids, porphyrins and related molecules, and prostaglandins. Membranes and transport phenomena, regulation of glycogen and glucose metabolism in muscle and lipid metabolism in adipose tissue. Prerequisite: CHEM 4312 with a grade of C or better.

CHEM 4314. ENZYMEOLOGY. 3 Hours.
A comprehensive study of enzymes including structures, reaction mechanisms, regulation, and kinetics. Prerequisite: CHEM 4311 with a grade of C or better.

CHEM 4316. BIOCHEMICAL GENETICS. 3 Hours.
Aspects of the biochemistry of gene expression in prokaryotic and eukaryotic organisms and its regulation, together with genetic manipulations and the methodology of recombinant DNA technology. Prerequisite: CHEM 4312 with a grade of C or better.

CHEM 4318. INORGANIC CHEMISTRY. 3 Hours.
An overview of the chemistry of the transition metals. Topics include symmetry and applications, bonding models, magnetism, synthesis of metal complexes, modern characterization techniques including IR, NMR, and electronic spectroscopy, organometallic compounds, reaction mechanisms, catalysis, and bioinorganic chemistry. Prerequisite: CHEM 2322 with a grade of C or better.
CHEM 4343. RESEARCH METHODS - UTEACH. 3 Hours.
The purpose of this course is to present UTeach students with the tools scientists use to solve scientific problems. These tools enable scientists to develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in more conventional science classes. These tools include: design of experiments to answer scientific questions; use of statistics to interpret experimental results and deal with sampling errors; mathematical modeling of scientific phenomena; finding and reading articles in the current scientific literature; applying scientific arguments in matters of social importance; writing scientific papers; reviewing scientific papers; oral presentation of scientific work; use of probes and computers to gather and analyze data; ethical treatment of human subjects; laboratory safety. Research Methods is primarily a laboratory course, and most of these topics are developed in connection with four independent inquiries UTeach students design and carry out. Written inquiries will be evaluated as examples of scientific writing. Prerequisite: SCIE 1201 or SCIE 1334 or concurrent enrollment; junior or senior standing.

CHEM 4346. ADVANCED SYNTHETIC METHODS. 3 Hours.
Methods and techniques for the synthesis and characterization of organic, inorganic, and organometallic compounds. Prerequisite: Grade of C or better in CHEM 2182, CHEM 2322, and CHEM 3317 or CHEM 4318.

CHEM 4380. UNDERGRADUATE RESEARCH. 3 Hours.
Research under the direction of a member of the department. No more than six hours of CHEM 4180, CHEM 4280, CHEM 4380 and CHEM 4381 may be taken for a letter grade. Prerequisite: Written permission of the instructor and a minimum grade point average of 2.5.

CHEM 4381. HONORS RESEARCH. 3 Hours.
Research in chemistry under the direction of a member of the department, resulting in a written honors thesis. No more than 6 hours of CHEM 4180, CHEM 4280, CHEM 4380 and CHEM 4381 may be taken for a letter grade. Prerequisite: CHEM 2322, CHEM 2182, and admission to the University Honors College.

CHEM 4385. INSTRUCTIONAL TECHNIQUES IN CHEMISTRY. 3 Hours.
Students participate in undergraduate laboratory instruction or recitation sessions under the supervision of a faculty member. No more than 6 hours of CHEM 4385 may be taken for a letter grade. Enrollment by departmental permission only.

CHEM 4387. UNIVERSITY-INDUSTRY CHEMISTRY COOPERATIVE. 3 Hours.
By special arrangement only. Cooperative study assignment doing chemical research in a local industrial chemical laboratory. Enrollment by departmental permission only. Graded pass/fail only.

CHEM 4391. READINGS IN CHEMISTRY. 3 Hours.
May be repeated for a maximum of six hours credit. Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper. Prerequisite: permission of department chair. Graded pass/fail only.

CHEM 4392. ADVANCED TOPICS IN CHEMISTRY. 3 Hours.
Topics arranged on an individual basis. May be repeated for credit as the topic varies. Prerequisite: permission of instructor.

CHEM 4461. INSTRUMENTAL ANALYSIS. 4 Hours.
The principles involved in the operation of modern analytical instruments and the laboratory use of such instruments. Students must be within 30 hours of completing their bachelor degrees. Prerequisite: Grades of C or better in CHEM 2285 or CHEM 2343 and CHEM 2335.

CHEM 5011. SEMINAR IN CHEMISTRY. 0 Hours.
Students will present a talk, prepare a poster, and engage in scientific writing and communication. Includes learning how to prepare, present, and defend an oral presentation. May not be counted for credit toward the degree requirements.

CHEM 5168. QUANTUM CHEMISTRY LABORATORY. 1 Hour.
Molecular modeling. Application of various computational techniques to chemical problems, including determination of molecular geometry, conformational analysis, and molecular energetics. Prerequisite: concurrent enrollment in CHEM 5262.

CHEM 5191. READINGS IN CHEMISTRY. 2 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: concurrent enrollment in CHEM 5262.

CHEM 5192. RESEARCH IN CHEMISTRY. 2 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5262. COMPUTATIONAL CHEMISTRY. 2 Hours.
Molecular quantum mechanics. Fundamental principles of quantum mechanics, with a special emphasis on molecular electronic structure theory. Topics covered include molecular mechanics, semi-empirical and ab initio molecular orbital theory, density functional theory, calculation of thermodynamic properties and molecular dynamics. Prerequisite: CHEM 5301 or permission of instructor. concurrent enrollment in CHEM 5168 required.

CHEM 5291. READINGS IN CHEMISTRY. 2 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5292. RESEARCH IN CHEMISTRY. 2 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.
CHEM 5300. SELECTED TOPICS IN ADVANCED CHEMISTRY. 3 Hours.
The area may vary (typically analytical, applied, biological, colloid, environmental, inorganic, organic, physical, polymer, materials, theoretical, etc.) and will be announced in advance. More than one area may be covered simultaneously, in parallel courses offered under different section numbers. May be repeated for credit when area or topics vary. Prerequisite: permission of instructor.

CHEM 5324. ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY. 3 Hours.
This course covers modern aspects of atomic and molecular mass spectrometry, as well as spectrochemical analysis. Upon completion of this course, the student will be able to: describe the basic setup and operation of mass spectrometric and spectroscopic instrumentation; interpret spectra from various instruments as a means for qualitative and quantitative analysis; apply basic knowledge of mass spectrometry and spectroscopy for practical problem solving; relate the use of mass spectrometry and spectroscopy to his or her own research interests; and compile, present, and explain modern techniques for analytical research. Written and oral presentations, as well as traditional classroom examinations, homework, and quizzes will be used to assess student performance. Prerequisite includes CHEM 4461 or equivalent; or permission of instructor.

CHEM 5325. SEPARATION SCIENCE. 3 Hours.
A comprehensive examination of most areas involving the separation of molecules and ions. Theoretical, practical and historical aspects of: distillation, sublimation, liquid-liquid extraction, solid phase extraction, chromatography, field flow fractionation, membrane/barrier processes, and crystallization will be considered. Students taking this course must have a good basic background in organic chemistry and physical chemistry.

CHEM 5326. ANALYTICAL CHEMISTRY - CONCEPTS AND IMPLEMENTATION. 3 Hours.
This course familiarizes students with basic electronic design in analytical instrumentation. Familiarization with active and passive components, operational amplifiers, timers, logic gates, and designing analytical instrumentation based on such components, especially in Wet Chemistry. The course covers ionic equilibria and acid-base equilibria and solving complex problems by iterative numerical methods and nonlinear curve fitting using programming in BASIC and MS Excel SolverTM. The course covers present day applications of wet chemical analysis, specific methods and instrumentation, practical aspects of automated liquid phase analytical methods including component availability and cost. A design problem, chosen by lottery, will be given to each student early in the semester. The newly acquired knowledge of chemistry and electronics will be used to design a new instrument and present it. Prerequisite: CHEM 4461 or equivalent undergraduate instrumental analysis course.

CHEM 5327. ANALYTICAL ELECTROCHEMISTRY. 3 Hours.
This course covers modern aspects of electroanalytical chemistry. Upon completion of this course, the student will be able to: understand the concepts of redox potentials and their role in electron transfer, the thermodynamic aspects of electrochemical cells, mass transport in electrochemical systems, and the principles underlying various electroanalytical techniques such as potentiometry, amperometry, coulometry and voltammetry. The instrumental aspects of these techniques will also be addressed, including specialized approaches such as spectrotelelectrochemistry. The student will be able to relate the use of these analytical techniques to his or her own research needs and interests. Written and oral examinations, as well as traditional classroom examinations, will be used to assess student performance. Prerequisite: CHEM 4461 or equivalent; or permission of instructor.

CHEM 5328. ANALYTICAL SPECTROSCOPY. 3 Hours.
This course covers many of the methods of spectrochemical analysis used in the analytical laboratory. At the end of this course, students should be able to: explain the fundamental theory of many spectroscopy methods, including atomic spectroscopy, molecular spectroscopy, UV/Vis spectroscopy, molecular luminescence, and infrared spectrometry, among others; describe basic instrumental components; apply basic statistics (e.g., measurement errors, and calibration methods) for data analysis; and understand the fundamental use and applications of spectroscopy methods for basic research and laboratory measurements. Student performance will be evaluated based on homework assignments, exams, quizzes, and presentations. Prerequisite includes CHEM 4461 or equivalent, or permission of instructor.

CHEM 5331. ADVANCED BIOCHEMISTRY I. 3 Hours.
Vocabulary and conceptual understanding of biochemical processes by which cells break down organic molecules and trap some of the released energy in the form of reactive nucleotides; use these reactive nucleotides to drive the synthesis of organic building blocks such as sugars, lipids, amino acids and nucleic acids from simpler molecules that serve as precursors; critical review of primary research articles in biochemistry related to proteins, expression and purification, kinetics, and metabolis; preparing and presenting an NIH R15 proposal/paper; understanding structures and functions of biological molecules, of intermediary metabolism and its control, and of molecular genetics.

CHEM 5332. ADVANCED BIOCHEMISTRY II. 3 Hours.
The course will cover various aspects of advanced studies in Biochemistry, Metabolism, and Cell Signaling. Selected topics may include gene expression regulation in prokaryotes and eukaryotes, epigenetics, cancer biology, lipid metabolism, cofactors, enzyme kinetics, cell signaling, redox signaling, nitric oxide signaling, metallo-enzyme mechanism and function, unnatural amino acids, protein engineering, and proteomics.

CHEM 5334. GENES, GENOME, AND REACTION MECHANISM. 3 Hours.
Concepts of Gene and genome in prokaryotes and eukaryotes; Gene regulation and epigenetics; Promoter architecture, transcription, mRNA processing and translation Histone modification, chromatin organization and non-coding RNA; Vitamins, hormones and Cell signaling; Transition states/Steady state; Pre-steady state kinetics; Mechanisms (ping-poing, bi-bi). Discuss current literature. Prerequisite: passing of ACS-test in Biochemistry.
CHEM 5335. METHODS AND ENZYMEOLOGY. 3 Hours.
A variety of spectroscopic, physical methods and microscopy techniques are employed to solve biological problems at the atomic and molecular level. The focus of this module is to present the basic theory behind the use and interpretation of such methods. Topics include electronic, infrared and fluorescence absorption spectroscopy, circular dichroism, x-ray diffraction (XRD), multidimensional nuclear magnetic resonance, and electron paramagnetic resonance. Exploration of enzyme properties that include enzyme kinetics, structure, and their function. Evaluation of enzyme functions associated with others, and their significance with respect to human health and diseases; A scope of emerging scientific advances and challenges associated with enzyme actions will also be discoursed through lecture and students’ paper presentation and their term paper proposal. Prerequisite: passed ACS-test in Biochemistry.

CHEM 5336. BIOINORGANIC CHEMISTRY, COFACTORS & COENZYMES. 3 Hours.
Many fundamental life processes (respiration, nitrogen fixation, photosynthesis, and replication) require transition metal ions and/or specialized cofactors to facilitate unique chemical transformations. In this course, all aspects of the bioinorganic chemistry will be covered, including the biosynthesis of complex metal clusters (as far as is known), the biochemical reactions they catalyze, their chemical and spectroscopic properties, and the mechanisms by which they facilitate biochemical reactions.

CHEM 5337. MEDICINAL CHEMISTRY AND DRUG Discovery. 3 Hours.
This course will provide students with an understanding of the history of the modern drug discovery process, drugs and drug ionization states, biological targets, lead molecule discovery and optimization, cell signaling and metabolism, the investigation of structure activity relationships, translation with preclinical models, intellectual property and commercialization, and the regulatory process from target/lead discovery to clinical use. History and introduction to Discovery; Foundations: predicting structural ionization states using concepts from pH/pKa/acidic and bases/buffers; Biological Targets: Enzymes, Receptors, Oligonucleotides; Drug-Target Structures and Interactions, Lead identification and optimization, Structure Activity Relationships; Computational Approaches (ligand based; structure based); Cell signaling and Metabolism, cardiovascular diseases, diabetes, obesity, neurological disorders, and cancer; and current therapies; Translation and intellectual property; FDA regulations and clinical trials. To enroll students must have completed or be concurrently enrolled in CHEM 4311 or receive special permission of the instructor. Prerequisite: CHEM 4311 or permission of the instructor.

CHEM 5341. INORGANIC CHEMISTRY. 3 Hours.
Structures, bonding, and properties of main group and transition element compounds including; symmetry, coordination chemistry, reaction mechanisms, organometallic chemistry, and modern characterization techniques. Prerequisite: CHEM 4318 or permission of instructor.

CHEM 5342. SOLID STATE CHEMISTRY. 3 Hours.
Chemical synthesis and characterization methods of extended structures. Principles of solid-state synthesis, classical equilibrium approaches, diffusion and chemical transport, non-equilibrium and depositions methods; high temperature and high pressure synthesis; basic characterization techniques using X-rays, electrons, and neutrons; basic structure types and symmetry; optical, electrical and magnetic properties; examples will relate to materials used for energy harvesting, sensors, and catalysis.

CHEM 5344. X-RAY DIFFRACTION, SCATTERING AND ABSORPTION. 3 Hours.
The class will focus on modern applications of X-ray diffraction and absorption techniques in crystal and molecular structure determination. A practical component will address aspects of state of the art methods, including how to solve structures using data collected on powder and single-crystal diffractometers, X-ray photoelectron spectroscopy (XPS), etc.

CHEM 5351. ORGANIC CHEMISTRY I. 3 Hours.
Bonding, structure, stereochemistry, substituent effects, isotope effects, solvent effects, kinetics, and linear free-energy relationships in determining reaction mechanisms. Acids and bases, orbital symmetry, pericyclic reactions, photochemistry, and nucleophilic substitution reactions. Prerequisites: CHEM 2322 and CHEM 3322 or equivalent.

CHEM 5354. ORGANIC CHEMISTRY II. 3 Hours.
A survey of organic reaction mechanisms including addition and elimination reactions, nucleophilic carbon species, carbonyl reactions, electrophilic substitution reactions, rearrangement reactions, electron deficient species, and free radical reactions. Prerequisite: CHEM 5309 or permission.

CHEM 5355. ADVANCED ORGANIC SYNTHESIS. 3 Hours.
Synthetically important reactions, strategy in organic synthesis using retrosynthetic analysis and mechanistic understanding of reactions, synths, asymmetric synthesis. Prerequisite: CHEM 5310 or permission of instructor.

CHEM 5356. ADVANCED POLYMER CHEMISTRY. 3 Hours.
Polymer synthesis and reactions including condensation, free-radical, ionic, and coordination polymerizations; principles of polymerization including thermodynamics and kinetic considerations; physical characterizations including determinations of absolute molecular weights, relative molecular weights, morphology, glass transitions, and polymer crystallinity; relationships between macromolecular structure, properties, and uses of polymeric materials. Also offered as MSE 5346. Prerequisite: CHEM 2321 and CHEM 2322 or permission of instructor.

CHEM 5358. DETERMINATION OF MOLECULAR STRUCTURE BY PHYSICAL METHODS. 3 Hours.
The use of modern instrumental techniques to determine structure: infrared, ultraviolet, and magnetic resonance spectroscopy, mass spectrometry, optical rotatory dispersion. Emphasis on interpretation of spectra.

CHEM 5361. INTRODUCTION TO GRADUATE PHYSICAL CHEMISTRY. 3 Hours.
CHEM 5364. ADVANCED GRADUATE PHYSICAL CHEMISTRY. 3 Hours.
Statistical thermodynamics and its application to kinetics and spectroscopy. Quantum theory, ab initio methods and density functional theory. Advanced spectroscopic methods to investigate bonding in molecules and solids. Prerequisite: CHEM 5301 or permission of the instructor.

CHEM 5365. THERMODYNAMICS OF MATERIALS. 3 Hours.
Applications of thermodynamics to the study of materials, thermodynamic properties of liquid and solid solutions and their relationship to surface and crystalline defects.

CHEM 5366. CHEMICAL KINETICS. 3 Hours.
Experimental and theoretical aspects of chemical reaction kinetics. Classical and modern techniques for mechanistic characterization, methods for approximation, analysis and interpretation. Simple and complex reaction matrices are considered (gas, liquid, solid state). Specific topics include microscopic reversibility, transition state theory, homo/heterogenous catalysis, and quantum/statistical mechanical estimation of rate constants and chemical activation. Relevant examples relating to atmospheric and environmental, biological, organic, and inorganic reactions will be discussed.

CHEM 5381. ADVANCED LABORATORY TECHNIQUES IN CHEMISTRY I. 3 Hours.
The course will introduce to advanced laboratory techniques used in research laboratories in the Chemistry department. Handling of chemicals, synthesis procedures, characterization methods, data analysis, and safety regulations. Student will engage in reading primary literature and detailed process descriptions. Goal is to prepare students for successful work on their initial research project.

CHEM 5382. ADVANCED LABORATORY TECHNIQUES IN CHEMISTRY II. 3 Hours.
The course will continue to provide up-to-date laboratory techniques used in research laboratories in the Chemistry department. Synthesis procedures, analytical instrumentation, characterization methods, and data analysis. Free literature studies and assignments by instructor will prepare student for research and development. Goal is to support the research progress of students towards their comprehensive exam. Prerequisite: CHEM 5381.

CHEM 5383. ADVANCED LABORATORY TECHNIQUES IN CHEMISTRY III. 3 Hours.
The course will complete exposure to advanced laboratory techniques used in research laboratories in the Chemistry department and will make students ready for developing their own project proposal. Synthesis procedures, analytical instrumentation, characterization methods, and data analysis. Literature studies and explicit writing of scientific notes will prepare students for their comprehensive exam. Prerequisite: CHEM 5381, CHEM 5382.

CHEM 5391. READINGS IN CHEMISTRY. 3 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5392. RESEARCH IN CHEMISTRY. 3 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5398. THESIS. 3 Hours.
Graded R/F only. Prerequisite: permission of instructor.

CHEM 5421. ANALYTICAL INSTRUMENTATION. 4 Hours.
Theory of instrumentation and chemical signal source. Practical experiments utilizing atomic and molecular absorption and emission spectroscopy, chromatographic analysis, and electrochemical techniques.

CHEM 5491. READINGS IN CHEMISTRY. 4 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5492. RESEARCH IN CHEMISTRY. 4 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5591. READINGS IN CHEMISTRY. 5 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5592. RESEARCH IN CHEMISTRY. 5 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5598. THESIS. 6 Hours.
Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5691. READINGS IN CHEMISTRY. 6 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5692. RESEARCH IN CHEMISTRY. 6 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5698. THESIS. 6_hours.
Graded P/F/R only. Prerequisite: permission of instructor.
CHEM 5998. THESIS. 9 Hours.
Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 6011. TOPICS IN GRADUATE RESEARCH. 0 Hours.
Lectures by departmental and university faculty on current chemical research at U.T. Arlington. All graduate students are required to take this course once. May not be counted toward degree requirements. Graded P/F only.

CHEM 6012. ISSUES IN MODERN CHEMICAL RESEARCH. 0 Hours.
Topics to be discussed include the use of the library, maintenance of a research notebook, ethics in research, aspects of technical writing and presentations, and how research is funded. May not be counted toward degree requirements.

CHEM 6104. CHEMISTRY CAREER DEVELOPMENT. 1 Hour.
Every PhD-bound student is required to spend time for professional development outside his UTA laboratory. Possible opportunities include traditional internships in an industrial setting, working at a national laboratory, international exchange programs, extended collaborative visits, teaching engagements and other educational projects outside UTA. The career advancement may consist of one or multiple portions, in total time no less than three and not more than six months. Prerequisite: Permission of research supervisor and graduate advisor.

CHEM 6202. PRINCIPLES OF INDUSTRIAL CHEMISTRY. 2 Hours.
Survey of industrial inorganic and organic chemical processes. Prerequisite: permission of instructor.

CHEM 6203. REGULATORY ASPECTS OF THE CHEMICAL INDUSTRY. 2 Hours.
Survey of chemical toxicology, regulatory aspects involved in the chemical industry, industrial safety, patents and patent law.

CHEM 6304. CHEMISTRY CAREER DEVELOPMENT. 3 Hours.
Every PhD-bound student is required to spend time for professional development outside his UTA laboratory. Possible opportunities include traditional internships in an industrial setting, working at a national laboratory, international exchange programs, extended collaborative visits, teaching engagements and other educational projects outside UTA. The career advancement may consist of one or multiple portions, in total time no less than three and not more than six months. Prerequisite: Permission of Graduate Advisor and research supervisor.

CHEM 6399. DISSERTATION. 3 Hours.
Graded R/F only. Prerequisite: admission to candidacy for the degree of Ph.D. in Applied Chemistry.

CHEM 6699. DISSERTATION. 6 Hours.
Graded R/F/P/W. Prerequisite: admission to candidacy for the degree of Ph.D. in Applied Chemistry.

CHEM 6904. CHEMISTRY CAREER DEVELOPMENT. 9 Hours.
Every PhD-bound student is required to spend time for professional development outside his UTA laboratory. Possible opportunities include traditional internships in an industrial setting, working at a national laboratory, international exchange programs, extended collaborative visits, teaching engagements and other educational projects outside UTA. The career advancement may consist of one or multiple portions, in total time no less than three and not more than six months. Prerequisite: Permission of Graduate Advisor and research supervisor.

CHEM 6999. DISSERTATION. 9 Hours.
Graded P/F/R only. Prerequisite: admission to candidacy for the degree of Ph.D. in Applied Chemistry.

CHEM 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Objective: Master of Science

The objectives of the Chemistry and Biochemistry Department’s program leading to the Master of Science degree include:

1. developing the individual’s ability to do independent research,
2. preparing students for more advanced study in chemistry and
3. providing advanced training to professional chemists and those employed in technical and business areas in which chemistry at this level is necessary for efficient performance.

Research areas include analytical chemistry, biochemistry, bioinorganic chemistry, colloid and surface chemistry, electrochemistry, inorganic chemistry, medicinal chemistry, organic chemistry, physical chemistry, polymer chemistry, and theoretical chemistry.

Objective: Ph.D. in Chemistry

The program leading to the Doctor of Philosophy degree in Chemistry is designed primarily to prepare doctoral-level chemists for industrial research careers. The student must:

1. demonstrate the ability to carry out independent research and
2. acquire the practical knowledge of the type of research conducted in industry and of the constraints (both practical and philosophical) under which such research is conducted.

The areas of research include analytical chemistry, biochemistry, bioinorganic chemistry, colloid and surface chemistry, electrochemistry, inorganic chemistry, medicinal chemistry, organic chemistry, organometallic chemistry, physical chemistry, polymer chemistry, and theoretical chemistry.

Admission Criteria

In evaluating candidates for admission to its graduate degree programs, the Department of Chemistry and Biochemistry emphasizes the preparedness of the student as evidenced by quality and quantity of coursework and the student’s previous research experience. Recommendations from our own faculty, based on firsthand knowledge of the applicant or a faculty member at the applicant’s institution, are also very important.

UNCONDITIONAL ADMISSION

Unconditional admission may be granted under any one of the following options. The minimum undergraduate GPA requirement for all options is 3.0, as calculated by Graduate Admissions.

Option 1
A satisfactory completion of a Bachelor’s degree or equivalent, official transcripts, and GRE scores, and three letters of recommendation.

Option 2
A satisfactory completion of a Bachelor’s degree or equivalent, official transcripts, and a letter of recommendation from a faculty member at the applicant’s undergraduate institution, plus a recommendation from a UT Arlington Chemistry and Biochemistry faculty member.

Option 3
A satisfactory completion of a bachelor’s degree or equivalent, official transcripts, and a letter of recommendation from a faculty member at the undergraduate institution, plus a recommendation from a UT Arlington Chemistry and Biochemistry faculty member based on a face-to-face interview.

Language Requirements

An applicant whose native language is not English must submit a TOEFL score of at least 550 or a score of at least 213 on the computer-based test. A TSE-A score of 45 or higher can be substituted for the TOEFL. Those who have completed their undergraduate education in English may be eligible for a TOEFL waiver based on the recommendation letters.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.
PROBATIONARY ADMISSION

In rare cases, probationary admission may be granted as the result of a substandard performance on one or more of the admission criteria. In this case, the Graduate Advisor will set additional conditions for admission including, but not limited to, additional undergraduate coursework and/or achieving a B or better in the first 9 hours of graduate coursework.

DENIAL OF ADMISSION

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

ELIGIBILITY FOR SCHOLARSHIPS/FELLOWSHIPS

Students that have no provisional admission conditions to meet will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by Graduate Admissions, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships. (Students with graduate teaching or research assistantships, however, must be enrolled in a minimum of 9 hours of coursework in both long semesters and 6 hours of coursework in the summer sessions.)

Master’s Degree Requirements

A candidate for graduate study must satisfy the general admission requirements of the program.

MASTER’S DEGREE WITH THESIS

This degree requires a minimum of 24 credit hours in course work plus a 6 credit hour thesis class. A minimum of 18 hours in chemistry from courses listed in the Graduate Catalog will be required. Twelve of these hours will be taken from at least four (4) of the chemistry disciplines (Analytical, Biochemistry, Inorganic, Organic, Physical); suggested classes include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 5331</td>
<td>ADVANCED BIOCHEMISTRY I</td>
<td>3</td>
</tr>
<tr>
<td>or CHEM 5336</td>
<td>BIOINORGANIC CHEMISTRY, COFACTORS &amp; COENZYMES</td>
<td></td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>CHEM 5325</td>
<td>SEPARATION SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives (6 hours) shall be graduate division courses in a science or engineering subject selected by the candidate; any elective requires the approval of the graduate advisor.

The 6 credit hour thesis class (CHEM 5698) is a completion course and must be taken in the final semester.

MASTER’S DEGREE WITH THESIS SUBSTITUTE

This degree is available for students with at least five years of professional experience in an industrial, government, or other chemistry laboratory at the time the degree is awarded. Admission to the program requires specific approval of the Graduate Studies Committee.

The degree plan requires a minimum of 30 credit hours, of which at least 24 must be in coursework and at least 3 in a suitable research project (CHEM 5392). A minimum of 18 hours in chemistry from courses listed in the Graduate Catalog will be required. Twelve of these hours will be taken from at least four (4) of the chemistry disciplines (Analytical, Biochemistry, Inorganic, Organic, Physical); suggested classes include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>

<td>SEPARATION SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

Additional electives ill be graduate division courses in a science or engineering subject selected by the candidate; any elective requires the approval of the graduate advisor.
MASTER’S DEGREE NON-THESIS
This option requires a minimum of 30 hours of coursework of which at least 24 hours must be in chemistry. Courses in chemistry will be taken from at least four (4) of the chemistry disciplines (Analytical, Biochemistry, Inorganic, Organic, Physical). Suggested classes include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
<tr>
<td>or CHEM 5325</td>
<td>SEPARATION SCIENCE</td>
<td></td>
</tr>
</tbody>
</table>

Elective courses (6 hours) shall be graduate division courses selected by the candidate. All courses taken for this degree plan including electives must be approved by the graduate advisor.

Admission Criteria
In evaluating candidates for admission to its graduate degree programs, the Department of Chemistry and Biochemistry emphasizes the preparedness of the student as evidenced by quality and quantity of coursework and the student’s previous research experience. Recommendations from our own faculty, based on firsthand knowledge of the applicant or a faculty member at the applicant’s institution, are also very important.

UNCONDITIONAL ADMISSION
Unconditional admission may be granted under any one of the following options. The minimum undergraduate GPA requirement for all options is 3.0, as calculated by Graduate Admissions.

Option 1
A satisfactory completion of a Bachelor’s degree or equivalent, official transcripts, and GRE scores, and three letters of recommendation.

Option 2
A satisfactory completion of a Bachelor’s degree or equivalent, official transcripts, and a letter of recommendation from a faculty member at the applicant’s undergraduate institution, plus a recommendation from a UT Arlington Chemistry and Biochemistry faculty member.

Option 3
A satisfactory completion of a bachelor’s degree or equivalent, official transcripts, and a letter of recommendation from a faculty member at the undergraduate institution, plus a recommendation from a UT Arlington Chemistry and Biochemistry faculty member based on a face-to-face interview.

Language Requirements
An applicant whose native language is not English must submit a TOEFL score of at least 550 or a score of at least 213 on the computer-based test. A TSE-A score of 45 or higher can be substituted for the TOEFL. Those who have completed their undergraduate education in English may be eligible for a TOEFL waiver based on the recommendation letters.

PROVISIONAL ADMISSION
An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

PROBATIONARY ADMISSION
In rare cases, probationary admission may be granted as the result of a substandard performance on one or more of the admission criteria. In this case, the Graduate Advisor will set additional conditions for admission including, but not limited to, additional undergraduate coursework and/or achieving a B or better in the first 9 hours of graduate coursework.

DENIAL OF ADMISSION
A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

ELIGIBILITY FOR SCHOLARSHIPS/FELLOWSHIPS
Students that have no provisional admission conditions to meet will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by
Graduate Admissions, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships. (Students with graduate teaching or research assistantships, however, must be enrolled in a minimum of 9 hours of coursework in both long semesters and 6 hours of coursework in the summer sessions.)

**Ph.D. Degree Requirements**

To be admitted to the Ph.D. program, an applicant must satisfy the general admission requirements of the program and his or her academic record must show preparation for advanced work in chemistry.

Each candidate must complete the following program requirements:

1. Courses for students emphasizing analytical chemistry
   
   Select three of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 5324</td>
<td>ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY</td>

</tbody>
</table>
CHEM 5331  ADVANCED BIOCHEMISTRY I  3
CHEM 5341  INORGANIC CHEMISTRY  3
CHEM 5262  COMPUTATIONAL CHEMISTRY  3
& CHEM 5168  and QUANTUM CHEMISTRY LABORATORY  3

Plus courses as indicated in items 7-11.

5. Courses for students emphasizing physical chemistry:
CHEM 5361  INTRODUCTION TO GRADUATE PHYSICAL CHEMISTRY  3
CHEM 5364  ADVANCED GRADUATE PHYSICAL CHEMISTRY  3
CHEM 5300  SELECTED TOPICS IN ADVANCED CHEMISTRY  3

Plus two (2) courses from two divisions outside of analytical chemistry (biochemistry, inorganic, organic, or physical). Suggestions include:  
CHEM 5324  ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY  3
or CHEM 5326  ANALYTICAL CHEMISTRY - CONCEPTS AND IMPLEMENTATION  3
CHEM 5331  ADVANCED BIOCHEMISTRY I  3
CHEM 5341  INORGANIC CHEMISTRY  3
CHEM 5351  ORGANIC CHEMISTRY I  3

Plus courses as indicated in items 7-11.

6. Courses for students emphasizing polymer chemistry:
All required courses for any of the other emphasis areas 1-5 plus:
CHEM 5356  ADVANCED POLYMER CHEMISTRY  3

Plus courses as indicated in items 7-11.

7. All PhD-bound students must complete a Career Development Course - Select one of the following:  
CHEM 6104  CHEMISTRY CAREER DEVELOPMENT  2
CHEM 6304  CHEMISTRY CAREER DEVELOPMENT  2
CHEM 6904  CHEMISTRY CAREER DEVELOPMENT  2

8. All PhD-bound students must take the following courses:
CHEM 5011  SEMINAR IN CHEMISTRY  0
CHEM 6011  TOPICS IN GRADUATE RESEARCH  0
CHEM 6012  ISSUES IN MODERN CHEMICAL RESEARCH  0

9. All PhD-bound students will enroll in the lecture courses Advanced Laboratory Techniques in their respective 2nd (CHEM 5381), 3rd (CHEM 5382) and 4th (CHEM 5383) long semesters.

10. For successful completion of the doctoral degree program, every student must have taken at least 9 SCH dissertation courses.

11. Additional research and elective courses chosen according to the student’s dissertation topic and area of specialization under the guidance of the supervising committee

1. CHEM 5358 cannot be used to fulfill this requirement. Students who do not have a good instrumentation background should consider taking CHEM 5421.

2. For guidance and options of “Career Development” (possible “Internship”), students will consult with their research supervisor and with the Graduate Advisor.

A course grade may be used to satisfy degree requirements for no more than seven years after the course has been completed.

After admission to the doctoral program, the student must successfully complete the appropriate examination(s) required by the faculty of the student’s discipline.

A supplementary set of guidelines, published by the Department of Chemistry and Biochemistry, should be consulted.
Chemistry and Biochemistry - Undergraduate Programs

Academic Advising: 817-272-9687

Overview

The Department of Chemistry and Biochemistry offers four programs of study leading to a bachelor’s degree and two leading to both a bachelor’s and master’s degree. They are the Bachelor of Arts in Chemistry, the Bachelor of Science in Chemistry - American Chemical Society certified, the Bachelor of Science in Biochemistry - American Chemical Society certified, the Bachelor of Science in Biological Chemistry a combined Bachelor of Science-Master of Science in Chemistry, and a Bachelor of Science in Biochemistry with a Master of Science in Biomedical Engineering.

- Professional Chemist: Students who wish to become professional chemists or whose goals include graduate education in chemistry should pursue the Bachelor of Science in Chemistry - American Chemical Society certified. Alternatively, students may choose the Bachelor of Science-Master of Science combined program. Prospective students should contact the departmental undergraduate advisor.

- Professional Biochemist: Students who wish to become professional biochemists or whose goals include graduate education in biochemistry, should pursue the Bachelor of Science in Biochemistry - American Chemical Society certified. Prospective students should contact the departmental undergraduate advisor.

- Premedical and Predental Programs: Students who wish to prepare for entry into medical or dental school may choose to major in chemistry or biochemistry. While any of the four bachelor’s programs will meet the minimum requirements, the department recommends either the Bachelor of Arts in Chemistry or the Bachelor of Science in Biological Chemistry. Prospective students should contact both the departmental undergraduate advisor and the premedical advisor in the College of Science.

- Preallied Health Programs: Students who wish to prepare for entry into pharmacy or veterinary school, physical therapy, or occupational therapy may choose to major in chemistry. Prospective students should contact the departmental undergraduate advisor.

- Chemistry as a Teaching Field: Although students who intend to teach chemistry at the secondary school level may pursue any of the degrees, the Bachelor of Arts Degree offers the greatest flexibility.

Declaring a Major in Chemistry or Biochemistry

Beginning freshmen who intend to declare chemistry or biochemistry as a major must complete the following courses with a minimum GPA of 2.25 in chemistry and an overall GPA of 2.25.

- CHEM 1441 and CHEM 1442.
- Six hours of mathematics approved by the department.
- Three hours of biology or geology.
- 12 hours from courses in the University core curriculum other than science or mathematics (English, history, political science, social and cultural studies, and fine arts).

Transfer students who transfer part or all of the above requirements must complete a minimum of 11 hours of approved science and mathematics courses in residence with a minimum GPA of 2.25 to be eligible to major in chemistry or biochemistry.

All new students who intend to major in chemistry or biochemistry should schedule an appointment for advising with the departmental undergraduate advisor.

Declaring a Second Major in Chemistry

A person who satisfies the requirements for any other baccalaureate degree qualifies for having chemistry named as a second major upon completion of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1441</td>
<td>GENERAL CHEMISTRY I</td>
<td>4</td>
</tr>
<tr>

<tr>
<td>CHEM 4311</td>
<td>BIOCHEMISTRY I</td>
<td>3</td>
</tr>
</tbody>
</table>
Please note that a second major in Chemistry is not the same as a double major in which students complete the requirements for a second degree.

Please see the undergraduate chemistry advisor for additional information.

**Teacher Certification**

Students interested in earning a Bachelor of Arts or Bachelor of Science degree with a major in chemistry with secondary teacher certification should refer to the “Bachelor of Arts Degree in Chemistry with UTeach Physical Science Certification” degree plan or the "Bachelor of Arts Degree in Chemistry with UTeach Chemistry Certification" degree plan for teacher certification requirements.

**Calculation of Chemistry Grade Point Average**

Only chemistry courses required in the degree program will be used in calculating the chemistry grade point average for chemistry degree candidates.

**Honors Program**

Students who qualify are encouraged to participate in the University Honors College. Students should enroll in honors sections of chemistry courses when available and should include CHEM 4381 as approved by the departmental undergraduate advisor.

**Chemistry Course Registration & Requirements**

Students may not be "pre-enrolled" in chemistry courses while pre-requisite courses at another institution are pending grades. Only UT Arlington credits may be used for pre-enrollment purposes.

Canvas grades (or other learning-management system grades) may not be used as proof of completion for a pre-requisite course. Students must submit either an official transcript to the registrar’s office, or submit a transcript with a letter grade for the pre-requisite course to the undergraduate chemistry advisor in order to be enrolled in a chemistry course. If a student is submitting the transcript via email, the email must be sent from their UTA email address.

The ACS-certified degree programs (Bachelor of Science in Chemistry and Bachelor of Science in Biochemistry) require the capstone course CHEM 3322. The capstone course is meant to test students in their knowledge of Math, Physics, and Chemistry in order to assess their cumulative knowledge of the sciences needed for success in their profession. This course requirement may not be satisfied with transfer credit without the approval of the undergraduate curriculum committee of the Department of Chemistry and Biochemistry.

**Department of Chemistry and Biochemistry Academic Regulations**

All students pursuing a degree in one of the academic programs from the Department of Chemistry and Biochemistry must abide by the academic regulations of the University and the following additional rules established by the Department of Chemistry and Biochemistry.

**Three-Attempt Rule:** A student may not attempt a course (at UT Arlington and/or at any other institution) more than three times and apply that course toward a chemistry/biochemistry degree. Enrollment in a course for a period of time sufficient for assignment of a grade, including a grade of W, is considered an attempt.

**Undergraduate Degrees**

- Bachelor of Arts in Chemistry (p. 1150)
- Bachelor of Arts in Chemistry with UTeach Chemistry Teacher Certification (p. 1152)
- Bachelor of Arts in Chemistry with UTeach Physical Science Teacher Certification (p. 1154)
- Bachelor of Science in Chemistry - American Chemical Society certified (p. 1156)
- Bachelor of Science in Biochemistry - American Chemical Society certified (p. 1157)
- Bachelor of Science in Biological Chemistry (p. 1159)
- Fast-Track Program: Bachelor of Science-Master of Science in Chemistry (p. 1161)
- Fast-Track Program: Bachelor of Science in Biochemistry and Master of Science in Biomedical Engineering (p. 1161)

**Requirements for a Bachelor of Arts Degree in Chemistry**

This program is suitable preparation for admission to medical and dental schools, and other health-related professions.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

**Pre-Professional Courses**

**Recommended Core Requirements**

<sup>2A</sup> Student may take GEOL 1301 and 1302 to meet requirement. This will affect the number of electives needed to reach 120 hours.

<sup>2B</sup> Completion of CHEM 2335 with the grade of "C" or above will satisfy the computer proficiency requirement.

**Requirements for a Bachelor of Science Degree in Biochemistry - American Chemical Society Certified**

This program is recommended to students who plan to enter into graduate study in biochemistry and for those who anticipate professional careers as biochemists. This program is also suitable for premedical and predental students and for training in allied health sciences.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

Total Hours: 120

4A Completion of CHEM 2335 with the grade of “C” or above will satisfy the computer proficiency requirement.

4B When you choose BIOL 3442, you need the three credit hours of an advanced elective.

Requirements for Fast-Track Program: Bachelor of Science and Master of Science in Chemistry

This program is recommended for students who wish to earn graduate level course credit and who wish to obtain graduate level research experience. This program is suitable for those students who plan to pursue doctoral graduate studies in chemistry and for those who anticipate professional careers as chemists. B.S. in Chemistry degree of this Fast-Track program is an American Chemical Society Certified degree.

FOUNDATION COURSES

Students must take the following 4 specific undergraduate CHEM courses in order to be admitted into the Fast Track program. The cumulative GPA required for the foundation courses is a 3.25. Students must also maintain a 3.3 GPA or higher in all CHEM courses completed at UTA, and have a cumulative GPA of a 3.3 or higher.

| CHEM 2322 | ORGANIC CHEMISTRY II | 3 |
| CHEM 2335 | QUANTITATIVE CHEMISTRY | 3 |
| One of the following two courses | 3 |
| CHEM 3317 | INORGANIC CHEMISTRY |
| CHEM 4318 | INORGANIC CHEMISTRY |
| One of the following two courses | 3 |
| CHEM 3321 | PHYSICAL CHEMISTRY I |
| CHEM 3322 | PHYSICAL CHEMISTRY II |

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

Program Requirements
MATH 3318  DIFFERENTIAL EQUATIONS 3
or MATH 3319  DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA

Advanced PHYS course at 3000 level or above: 3
PHYS 3313  INTRODUCTION TO MODERN PHYSICS

Biology or Geology for science majors courses 5A 8

Professional Courses
CHEM 1341  GENERAL CHEMISTRY I 3
CHEM 1181  GENERAL CHEMISTRY I LABORATORY FOR ADVANCED CHEMICAL TECHNOLOGIES 1
CHEM 1342  GENERAL CHEMISTRY II 3
CHEM 1182  GENERAL CHEMISTRY II LABORATORY FOR ADVANCED CHEMICAL TECHNOLOGIES 1
CHEM 2321  ORGANIC CHEMISTRY I 3
CHEM 2322  ORGANIC CHEMISTRY II 3
CHEM 2335  QUANTITATIVE CHEMISTRY 5B 3
CHEM 2283  SYNTHESIS AND ANALYSIS LABORATORY I 2
CHEM 2284  SYNTHESIS AND ANALYSIS LABORATORY II 2
CHEM 3317  INORGANIC CHEMISTRY 3
CHEM 3321  PHYSICAL CHEMISTRY I 3
CHEM 3322  PHYSICAL CHEMISTRY II 3
CHEM 3182  PHYSICAL CHEMISTRY II LABORATORY 1
CHEM 3181  PHYSICAL CHEMISTRY I LABORATORY 1
CHEM 4101  SEMINAR IN CHEMISTRY 1
CHEM 4311  BIOCHEMISTRY I 3
CHEM 4318  INORGANIC CHEMISTRY 3
CHEM 4346  ADVANCED SYNTHETIC METHODS 3
CHEM 4461  INSTRUMENTAL ANALYSIS 4
CHEM 4380  UNDERGRADUATE RESEARCH 3

Advanced electives at the 3000 or 4000 level sufficient to meet the 36 advanced hours requirement. 2
Electives sufficient to complete the total hours requirement for the undergraduate degree. 5

Student's have the option of taking 9-10 hours worth of graduate courses for undergraduate credit that can also be used towards their master's in chemistry. Please see the Chemistry Advisor for possible graduate level coursework that can be used in place of undergraduate coursework.

Refer to the Graduate Catalog and the graduate advisor for MS in Chemistry degree requirements (Master's Degree with Thesis). 30

Total Hours 150

Total Hours: 120

5A  Student may take GEOL 1301 and 1302 to meet degree requirement. This will affect the number of electives needed to reach 120 hours.
5B  Completion of CHEM 2335 with the grade of "C" or above will satisfy the computer proficiency requirement.
5C  Once admitted to this Fast-Track program, students will be allowed to take up to 9 credit hours of CHEM graduate courses (if CHEM 5461 is taken, 10 credit hours are allowed) that may be used to satisfy both bachelor's and master's degree requirements.

## Requirements for Fast Track Program: Bachelor of Science in Biochemistry and Master of Science in Biomedical Engineering

This program is recommended for students who wish to earn graduate level course credit and who wish to obtain graduate level research experience. This program is suitable for those students who plan to pursue doctoral graduate studies in chemistry and for those who anticipate professional careers as chemists. **B.S. in Biochemistry degree of this Fast-Track program is an American Chemical Society Certified degree.**

## FOUNDATION COURSES

Students must take the following 3 specific undergraduate courses in order to be admitted into the Fast Track program. The cumulative GPA required for the foundation courses is a 3.3. Students must also maintain a 3.3 GPA or higher in all CHEM courses completed at UTA, and have a cumulative GPA of a 3.3 or higher.
BE 3380  HUMAN PHYSIOLOGY IN BE  3
CHEM 2335  QUANTITATIVE CHEMISTRY  3
CHEM 4311  BIOCHEMISTRY I  3

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

UNIV 1131  STUDENT SUCCESS  1
or UNIV 1101  CAREER PREPARATION AND STUDENT SUCCESS

Communications Core Requirement:
ENGL 1301  RHETORIC AND COMPOSITION I  3
ENGL 1302  RHETORIC AND COMPOSITION II  3

History Core Requirement:
HIST 1301  HISTORY OF THE UNITED STATES TO 1865  3
HIST 1302  HISTORY OF THE UNITED STATES, 1865 TO PRESENT  3

Political Science Core Requirement:
POLS 2311  GOVERNMENT OF THE UNITED STATES  3
POLS 2312  STATE AND LOCAL GOVERNMENT  3

See General Core Requirements for Social and Behavioral Sciences  3
See General Core Requirements for Language, Philosophy, and Culture  3
See General Core Requirements for Creative Arts  3

Degree Requirements:
Math:
MATH 1426  CALCULUS I  4
MATH 2425  CALCULUS II  4
MATH 2326  CALCULUS III  3
MATH 3319  DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA  3

Biology Requirements:
BIOL 1441  CELL AND MOLECULAR BIOLOGY  4
BIOL 3315  GENETICS  3

Undergraduate Biomedical Engineering Requirements:
BE 3380  HUMAN PHYSIOLOGY IN BE  3
BE 4337  TRANSPORT PHENOMENA IN BIOMEDICAL ENGINEERING  3

Physics Requirements:
PHYS 1443  GENERAL TECHNICAL PHYSICS I  4
PHYS 1444  GENERAL TECHNICAL PHYSICS II  4

Chemistry Requirements:
CHEM 1341  GENERAL CHEMISTRY I  3
CHEM 1181  GENERAL CHEMISTRY I LABORATORY FOR ADVANCED CHEMICAL TECHNOLOGIES  1
CHEM 1342  GENERAL CHEMISTRY II  3
CHEM 1182  GENERAL CHEMISTRY II LABORATORY FOR ADVANCED CHEMICAL TECHNOLOGIES  1
CHEM 2321  ORGANIC CHEMISTRY I  3
CHEM 2322  ORGANIC CHEMISTRY II  3
CHEM 2335  QUANTITATIVE CHEMISTRY  3
CHEM 2283  SYNTHESIS AND ANALYSIS LABORATORY I  2

Total Hours: 120

6A Undergraduate courses being satisfied by these graduate courses are CHEM 4313 (or CHEM 4314), CHEM 4346, and one hour advanced elective. One credit hour difference will be satisfied by other undergraduate courses.

**Oral Communication and Computer Competency Requirements**

For all chemistry degree programs except the UTeach certification degree programs, the university computer competency requirement will be met by: completion of CHEM 2335 QUANTITATIVE CHEMISTRY with the grade of "C" or above or taking CSE 1301 or by passing the University computer
proficiency examination. For the UTeach certification degree programs, completion of EDUC 4331 KNOWING AND LEARNING IN MATH AND SCIENCE fulfills the requirement.

The University oral communication competency requirement may be satisfied by taking CHEM 4101 (required for the Bachelor of Science degree in Chemistry, the Bachelor of Arts degree in Chemistry, and the combined BS-MS degree in Chemistry) or by taking CHEM 4313 or CHEM 4314 (required for the Bachelor of Science degree in Biochemistry and the Bachelor of Science degree in Biological Chemistry). For the UTeach certification degree programs, completion of SCIIE 1201 or SCIIE 1334 (required for the UTeach programs) fulfills the requirement.

Students should refer to the specific degree plans and the chemistry undergraduate advisor for details regarding these requirements.

**Declaring a Minor in Chemistry**

Students who wish to obtain a minor in Chemistry must take at least 18 semester hours of chemistry, of which at least 6 semester hours must be at the 3000/4000 level. Only lecture courses, which satisfy a degree requirement for one of the degrees offered by the Department of Chemistry and Biochemistry may be used. Research courses, Chemistry Readings, and Internship credits may not be used towards the chemistry minor.

**Declaring a Minor in Biochemistry**

Students who wish to obtain a minor in Biochemistry must take at least 18 semester hours of chemistry which must include CHEM 4311 and CHEM 4312. Only courses which satisfy a degree requirement for one of the degrees offered by the Department of Chemistry and Biochemistry may be used.
Data Science - Undergraduate Programs

Academic Advising: 406 Pickard Hall · 817-272-0939

Bachelor's Degrees in Data Science

The Bachelors of Science in Data Science requires students to select a Domain Concentration, where the Domain is one of the supported majors in the College of Science (Biology, Chemistry, Environmental Science, Geoscience, Mathematics, Physics, and Psychology). Beyond the UTA Core Curriculum requirements, the degree requires a sequences of courses in Mathematics, Data Science, and the chosen Domain Concentration. In addition, students must complete a year long Capstone project in collaboration with a supervisor within the College of Science or an Industry Partner.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

Core Data Science Course Requirements

Regardless of the chosen concentration, all students seeking a Bachelors of Science in Data Science will be required to complete the following courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>DATA 3401</td>
<td>PYTHON FOR DATA SCIENCE 1</td>
<td>4</td>

</tr>
</tbody>
</table>

Math Requirements

All concentrations are required to take MATH 1426. The Math and Physics concentrations require either MATH 3330 or MATH 3319 and their prerequisites, while all other concentrations require DATA 3311.

All degrees are Bachelors of Science in Data Science with Domain Concentration. Possible domains are Biology, Chemistry, Earth and Environmental Science, Geoscience, Mathematics, Physics, and Psychology.

* See General Core Requirements (https://catalog.uta.edu/degreerequirements/generalcorerequirements/) for approved courses.  

**TYPICAL COURSE SEQUENCE**  
Details of a personal course sequence should be made with the guidance of the Data Science undergraduate advisor, particularly since many courses are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1421, Preparation for Calculus, in the first semester.

</tbody>
</table>

Total Hours: 120

*See General Core Requirements (https://catalog.uta.edu/degreerequirements/generalcorerequirements/) for approved courses.

**TYPICAL COURSE SEQUENCE**

Details of a personal course sequence should be made with the guidance of the Data Science undergraduate advisor, particularly since many courses are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426, Calculus I, in the first semester.

#### First Year

*TYPICAL COURSE SEQUENCE*

Details of a personal course sequence should be made with the guidance of the Data Science undergraduate advisor, particularly since many courses are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426, Calculus I, in the first semester.

# TYPICAL COURSE SEQUENCE

Details of a personal course sequence should be made with the guidance of the Data Science undergraduate advisor, particularly since many courses are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1421, Preparation for Calculus, in the first semester.

### First Year

Total Hours: 120

**Minor in Data Science**

The College of Science also offers a Minor in Data Science to pair with an existing major. Course schedule may vary based on transferable credits or credits earned.

* See General Core Requirements ([https://catalog.uta.edu/degreerequirements/generalcorerequirements/](https://catalog.uta.edu/degreerequirements/generalcorerequirements/)) for approved courses.
Students must gain advising and approval from both the department that offers the minor and from their major department. Failure to gain Major Department approval can result in no minor applied at graduation and final transcripts.

Students who wish to obtain a minor in Data Science must take at least 19-20 semester hours of DATA or related courses and maintain a minimum GPA of 2.0. Any substitutions to courses listed below must be approved by the department offering the minor.

**COURSE REQUIREMENTS**

**Foundational Courses**

Select 4 of the following courses: 16

- DATA 3401  PYTHON FOR DATA SCIENCE 1  4
- DATA 3402  PYTHON FOR DATA SCIENCE 2  4
- DATA 3421  DATA MINING, MANAGEMENT, AND CURATION  4
- DATA 3441  STATISTICAL METHODS FOR DATA SCIENCE 1  4
- DATA 3442  STATISTICAL METHODS FOR DATA SCIENCE 2  4
- DATA 3461  MACHINE LEARNING  4

**Elective Courses**

Select 1 of the following courses: 4

- DATA 1301  INTRODUCTION TO DATA SCIENCE  3
- BIOL 3340  BIOINFORMATICS  3
- ENVR/GEOL 3454  STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS  4
- GEOL 4330  UNDERSTANDING GEOGRAPHIC INFORMATION SYSTEMS  3
- MATH 3313  INTRODUCTION TO PROBABILITY  3
- MATH 3316  STATISTICAL INFERENCE  3
- PHYS 2321  COMPUTATIONAL PHYSICS  3
- DATA 33xx  Choose from foundational courses list  4

**COURSES**

**DATA 1301. INTRODUCTION TO DATA SCIENCE. 3 Hours.**

This course provides an introduction to the field of data science with a high level overview of basic concepts, data types, and techniques while introducing data-informed decision making.

**DATA 3311. MATHEMATICS FOR DATA SCIENCE. 3 Hours.**

This course covers techniques from linear algebra and probability with an emphasis on how they are used in data science. Working with real data sets will be emphasized, along with basics of Matlab or R programming. Prerequisite: MATH 1426.

**DATA 3401. PYTHON FOR DATA SCIENCE 1. 4 Hours.**

This is the first of a two course sequence offering the foundations of Python programming in the context of data science. It introduces the full syntax of the Python language as it overviews structured, functional, and object oriented programming methodologies. It also provides a basic conceptual understanding of computing and introduces Unix command-line tools, software employed in data science such as git and Jupyter, and Python libraries such as numpy, matplotlib, and Pandas. Prerequisite: MATH 1426 or concurrent enrollment in MATH 1426.

**DATA 3402. PYTHON FOR DATA SCIENCE 2. 4 Hours.**

This is the second of a two course sequence offering the foundations of Python programming in the context of data science. It reinforces concepts presented in DATA 3401 with greater depth with a focus on application to various problems in data science, while exploring the python library ecosystem. Prerequisite: DATA 3401, or consent of instructor.

**DATA 3421. DATA MINING, MANAGEMENT, AND CURATION. 4 Hours.**

This lecture and lab course will provide training in working with databases, including data mining techniques and principles and best practices in data management, storage, and curation. Prerequisite: DATA 3401 or consent of instructor.

**DATA 3441. STATISTICAL METHODS FOR DATA SCIENCE 1. 4 Hours.**

This lecture and lab course will provide an introduction to the fundamental building blocks of advanced data analysis, with emphasis on advanced linear algebra, optimization, statistical inference, and Monte Carlo methods. Working with real data sets will be emphasized, along with basics of R programming. Prerequisite: DATA 3401, DATA 3402 or consent of instructor.

**DATA 3442. STATISTICAL METHODS FOR DATA SCIENCE 2. 4 Hours.**

This lecture and lab course will provide an introduction to the principles and general methods for the analysis of categorical data. This type of data occurs extensively in both observational and experimental studies, as well as industrial applications. While some theoretical statistical detail is given, the primary focus will be on methods of data analysis. Topics include generalized regression models, logistic regression models, Poisson regression models, and multinomial regression models. Problems will be motivated from a scientific perspective. Prerequisite: DATA 3441.
DATA 3461. MACHINE LEARNING. 4 Hours.
This course introduces and surveys Machine Learning techniques and their application to various problems in data science. Prerequisite: DATA 3401, DATA 3402 or consent of instructor.

DATA 4380. DATA PROBLEMS. 3 Hours.
This course is intended for Junior-level Data Science students, and will enable them to identify, define, and explore a number of potential problems and projects, for follow-up in the capstone course sequence. Prerequisite: Permission of instructor.

DATA 4381. DATA CAPSTONE PROJECT 1. 3 Hours.
This is the first of a two-semester sequence that will involve deep engagement in a team or individual project in Data Science. Presentation of written and oral reports will be required. Prerequisite: DATA 4380.

DATA 4382. DATA CAPSTONE PROJECT 2. 3 Hours.
This is the second of a two-semester sequence that will involve deep engagement in a team or individual project in Data Science. Presentation of written and oral reports will be required. Prerequisite: DATA 4381.
Earth and Environmental Sciences

Undergraduate Degrees

- Bachelor of Science in Geology - Professional Option (p. 1201)
- Bachelor of Science in Geology - Environmental Science Option (p. 1201)
- Bachelor of Science in Geology - Engineering Geology Option (p. 1201)
- Bachelor of Science in Environmental Science (p. 1201)
- Bachelor of Arts in Geology - General Option (p. 1201)
- Bachelor of Arts in Geology - Composite Science Teacher Certification Option (UTeach) (p. 1201)

Minors

- Minor in Geology (p. 1213)
- Minor in Data Science (for Majors in Earth and Environmental Sciences) (p. 1213)
- Minor in Biology (for Majors in Earth and Environmental Sciences) (p. 1213)

Undergraduate Certificates

- Certificate in Geographic Information Systems (p. 1214)

Graduate Degrees

- Earth and Environmental Science M.S. (p. 1196)
- Earth and Environmental Science, Ph.D. (p. 1199)

COURSES

**EVSE 5100. SELECTED TOPICS IN ENVIRONMENTAL SCIENCE AND ENGINEERING. 1 Hour.**
May be repeated for credit when topic changes.

**EVSE 5120. ENVIRONMENTAL PROFESSIONAL MENTORING & BUSINESS ETHICS. 1 Hour.**
Provides credit to students participating in an approved mentoring program with an experience environmental professional. May be repeated once for credit.

**EVSE 5199. SEMINAR IN ENVIRONMENTAL & EARTH SCIENCES. 1 Hour.**
Topics presented by faculty, students, and invited lecturers.

**EVSE 5200. SELECTED TOPICS IN ENVIRONMENTAL & EARTH SCIENCES. 2 Hours.**
May be repeated for credit when topic changes.

**EVSE 5294. INDIVIDUAL PROBLEMS IN ENVIRONMENTAL & EARTH SCIENCES. 2 Hours.**
Individual research projects supervised by a faculty member.

**EVSE 5300. SELECTED TOPICS IN ENVIRONMENTAL & EARTH SCIENCE. 3 Hours.**
May be repeated for credit when topic changes.

**EVSE 5303. SUSTAINABILITY ISSUES SEMINAR III. 3 Hours.**
Governmental and regulatory issues as they relate to sustainability.

**EVSE 5309. ENVIRONMENTAL SYSTEMS-BILOGICAL ASPECTS. 3 Hours.**
An introduction to the biological components of environmental systems. Population dynamics, species interactions, community structure, biodiversity, bioenergetics, nutrient cycling and human impacts are reviewed. Focus will be on natural processes and their engineering applications.

**EVSE 5310. ENVIRONMENTAL SYSTEMS-CHEMICAL ASPECTS. 3 Hours.**
An introduction to the chemistries of air at different altitudes, of water systems and of soils. Chemical and physico-chemical processes at phase boundaries, modeling for kinetics and mass transport, analytical techniques and disposal and recycling are included as well as their impact on engineering decisions.

**EVSE 5311. ENVIRONMENTAL SYSTEMS-GEOLOGICAL ASPECTS. 3 Hours.**
Introduction to the tectonic, volcanic, atmospheric, climatic, hydrologic and geochemical processes and natural hazards of the earth, and their interaction with political, economic and engineering decisions.

**EVSE 5312. ENVIRONMENTAL RISK BASED ACTION. 3 Hours.**
This course offers an introduction to environmental risk-based actions including environmental laws and regulations, hazard identification, toxicology, common contaminants, chemical intake models, chemical fate and transport models, and vapor intrusions.
EVSE 5313. ENVIRONMENTAL REGULATION OF CHEMICAL HAZARDS. 3 Hours.
This course offers an introductory knowledge about regulations and management of environmental and life quality in relation to chemical pollution, waste disposal, energy/resources sustainability, public health threats, and food/consumer product safety. Prerequisite: CHEM 1441 or equivalent.

EVSE 5314. TOXICOLOGY FOR ENVIRONMENTAL SCIENTISTS. 3 Hours.
This course offers an introduction to environmental toxicology and methods of measuring and using data on the adverse effects of chemical substances in line with understanding chemical and biochemical phenomena that occur in water, air, terrestrial and living environments, and the impact to human population. Prerequisite: CHEM 1441 or equivalent.

EVSE 5315. PROFESSIONAL EXPERIENCE. 3 Hours.
Provides credit to students participating in an approved internship or part-time work experience.

EVSE 5320. TOXICOLOGY. 3 Hours.
An introduction to the general principles of toxicology with an emphasis on certain classes of toxic agents, their sources and toxic effects, as well as their environmental fate. Prerequisite: CHEM 2322.

EVSE 5321. HEALTH RISK ASSESSMENT. 3 Hours.
An introduction to health considerations relevant to environmental projects. Prepares students to take the Registered Environmental Health Specialist Examination.

EVSE 5322. ENVIRONMENTAL RISK ASSESSMENT. 3 Hours.
An introduction to the health assessment process, presenting methodologies and guidelines for conducting health assessments.

EVSE 5323. ISSUES IN ENVIRONMENTAL HEALTH. 3 Hours.
An introduction to health issues of current concern resulting from environmental exposures. Topics include: environmental asthma, endocrine disruptors, climate change and health, emerging contaminants, nanotechnology and health, airborne particles and pediatric health.

EVSE 5350. CONTAMINANT HYDROGEOLOGY. 3 Hours.
Sources and types of various organic and inorganic contaminants; the physical, chemical, and biological factors and processes that affect the transport and fate of contaminants in the subsurface; non-aqueous phase liquids and multiphase flow; and various remedial techniques of contaminated sites. Prerequisite: GEOL 4320 or GEOL 5328 (or concurrent enrollment).

EVSE 5351. GEOMORPHOLOGY AND QUATERNARY STRATIGRAPHY OF SEDIMENTARY SYSTEMS. 3 Hours.
This course examines those physical processes that sculpt the surface of the Earth and result in deposition of sediments. Surface systems covered include weathering, mass wasting, rivers, shorelines, eolian processes, and glaciers. The course also examines the stratigraphic techniques used to decode the recent (2 million to present) stratigraphic record of these systems. Course is designed for geologists, biologists, and other fields concerned with interpreting and/or managing modern environments.

EVSE 5357. MEDICAL GEOLOGY. 3 Hours.
Introduction to geoscience and health. Students will learn how the geologic and geochemical environment can impact health. The historic background to geoscience and health will be presented followed by discussions on the natural abundance of elements in the earth, and the nature of essential and toxic elements (dose-response). Students will then learn about health responses following exposures in specific geologic/geochemical situations.

EVSE 5394. INDIVIDUAL PROBLEMS IN ENVIRONMENTAL & EARTH SCIENCES. 3 Hours.
Individual research projects supervised by a faculty member. Prerequisite: consent of instructor.

EVSE 5395. MASTER'S PROJECT. 3 Hours.
May be used as elective for students in non-thesis program. Graded F, P.

EVSE 5398. THESIS. 3 Hours.
Graded F, P.

EVSE 5405. METEOROLOGY AND CLIMATOLOGY. 4 Hours.
A quantitative approach to the study of the structure, energy, and motions of the atmosphere.

EVSE 5454. STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of statistics and helps students apply statistics to analyze data and interpret results from the perspective of Earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in Earth and environmental sciences. Offered as EVSE 5454 and GEOL 5454. Credit will not be given for both.

EVSE 5455. MATHEMATICAL MODELING OF ENVIRONMENTAL QUALITY SYSTEMS. 4 Hours.
This course is designed to introduce the process principles that govern contaminant transport and transformations in multimedia environments. This course will cover application of fate and transport models to evaluate pollutant interactions with the biosphere, particularly in the context of human exposure modeling and health risk assessment. Offered as EVSE 5455 and GEOL 5455. Credit will not be given for both.

EVSE 5456. ENVIRONMENTAL RISK ASSESSMENT. 4 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment-hazard identification, dose-response assessment, exposure assessment, and risk characterization. Offered as EVSE 5456 and GEOL 5456, credit will not be given for both.
EVSE 5457. ENVIRONMENTAL ANALYTICAL CHEMISTRY. 4 Hours.
This course offers an introduction to chemical and biochemical phenomena that occur in water, air, terrestrial and living environments, and the effects of human activity on them. Environmental chemistry can broaden as much as atmospheric chemistry, aquatic chemistry, chemistry of soil/geosphere, toxicological chemistry and industrial ecology. In this course, mainly chemical substances in diverse environmental compartments and interactions and exposure impact to human and wildlife receptors will be focus based on analytical chemistry principles and perspective. Prerequisite: CHEM 1442 or equivalent courses.

EVSE 5458. MACHINE LEARNING FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of machine learning and helps students apply machine learning to analyze data, predict outcomes and interpret results from the perspective of earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in earth and environmental sciences. Prerequisite: ENVR 3454 or GEOL 3454 or EVSE 5454 or GEOL 5454 or equivalent.

EVSE 5465. PHYSICAL OCEANOGRAPHY AND LIMNOLOGY. 4 Hours.
An introduction to physical processes in lakes and oceans. Changes in lakes and oceans influence heat, and momentum fluxes at the aquatic/oceanic and atmospheric interface. Topics include ocean/lake structure and circulation, and the impact of global climate change on lakes and oceans. Field excursions to nearby lakes combine theoretical knowledge and field measurements. Prerequisite: PHYS 1441 or PHYS 1443; and MATH 2425.

EVSE 5698. THESIS. 6 Hours.
Graded F, P, R.

EVSE 5998. THESIS. 9 Hours.
Graded F, P, R.

EVSE 6197. RESEARCH IN ENVIRONMENTAL & EARTH SCIENCES. 1 Hour.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6297. RESEARCH IN ENVIRONMENTAL & EARTH SCIENCES. 2 Hours.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6397. RESEARCH IN ENVIRONMENTAL AND EARTH SCIENCES. 3 Hours.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6399. DISSERTATION. 3 Hours.
Graded F, R.

EVSE 6697. RESEARCH IN ENVIRONMENTAL & EARTH SCIENCE. 6 Hours.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6699. DISSERTATION. 6 Hours.
Graded F, R, W.

EVSE 6997. RESEARCH IN ENVIRONMENTAL & EARTH SCIENCE. 9 Hours.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6999. DISSERTATION. 9 Hours.
Graded F, P, R.

EVSE 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

COURSES

GEOL 1135. GEOLOGICAL LABORATORY. 1 Hour.
Experiments and exercises related to geological principles and problems. Prerequisite: Permission from department.

GEOL 1136. GEOLOGICAL LABORATORY II. 1 Hour.
Experiments and exercises related to geological principles and problems of earth history. Prerequisite: Permission from department.

GEOL 1137. GEOLOGICAL LABORATORY III. 1 Hour.
Experiments and exercises related to geological principles and problems of environmental science. Prerequisite: permission from department.
GEOL 1301. EARTH SYSTEMS. 3 Hours.
An integrated study of the earth, emphasizing interactions between plate tectonics, the atmosphere, the oceans, the biosphere, and human activity. Formerly listed as GEOL 1425, credit will not be given for both.

GEOL 1302. EARTH HISTORY. 3 Hours.
History of the earth and evolution of life emphasizing the co-evolution of the atmosphere, oceans, and biosphere. Formerly listed as GEOL 1426, credit will not be given for both.

GEOL 1315. METEORITES, ASTEROIDS, FLOOD VOLCANISMS AND MASS EXTINCTIONS. 3 Hours.
An introduction to the geology of the solar system from the perspectives of earth science, and the fascinating world of meteorites, asteroids, comets, and impact craters. Special emphasis is on the meteorite evidence for our understanding of planetary formation, the age and origin of the earth, and the role of near synchronous impacts and flood basalts in causing two of the largest mass extinctions in earth history. Weekly practicum with hands-on examination of solar system materials, including observations under polarizing light microscopy. Formerly listed as GEOL 1415, credit will not be given for both.

GEOL 1330. GLOBAL WARMING. 3 Hours.
Global environmental challenges confronting humanity such as pollution, depletion of natural resources, ecosystem deterioration, food production, and population growth. Offered as ENVR 1330 and GEOL 1330. Credit will not be given for both.

GEOL 1340. WEATHER AND CLIMATE. 3 Hours.
Nature and variability of weather and climate, including wind, temperature, clouds and precipitation, droughts and flooding. Storm systems, fronts, thunderstorms, tornadoes, hurricanes. Atmospheric chemistry and air pollution. Mean climate, seasonal variations and climatic change. Formerly listed as GEOL 2401, credit will not be given for both.

GEOL 1350. INTRODUCTION TO OCEANOGRAPHY. 3 Hours.
The study of ocean basins and their origin, ocean currents, waves and tides, properties of sea water, and marine ecosystems, emphasizing the role of the ocean in the Earth system. Discussion of weekly ocean news, and incorporation of web-delivered current oceanographic data into the course material. Formerly offered as GEOL 3301 and GEOL 3184 and GEOL 2412; credit will be granted only once. Formerly listed as GEOL 1450, credit will not be given for both.

GEOL 1360. GEOLOGIC HAZARDS. 3 Hours.
Processes producing earthquakes, floods, eruptions and landslides, and their effect on people. Formerly listed as GEOL 2404, credit will not be given for both.

GEOL 2406. NATURAL RESOURCES & SUSTAINABILITY. 4 Hours.
Energy, construction, agricultural, and hydrological resources are evaluated in terms of their production and use, including storage and disposal of waste. Emphasis is placed on the importance of preserving clean water, air and soils. The course will concentrate on what humans take from the Earth, the impacts it has on their environment, and what it takes to make the planet sustainable for human habitation.

GEOL 2410. PLANETARY GEOLOGY. 4 Hours.
The geology, history and landscapes of the terrestrial planets and satellites of the outer planets. Composition of the planets as a guide to the origin and evolution of the solar system.

GEOL 2445. MINERALOGY. 4 Hours. (TCCN = GEOL 2409)
Lectures discuss the physical and chemical principles governing the properties and formation of minerals. There are three major divisions of the subject matter: (a) geometric and optical crystallography; (b) crystal chemistry and properties of minerals, and (c) occurrence, origins, and pressure-temperature stabilities of the major rock-forming minerals. Laboratories are devoted to exercises in crystallography, X-ray diffraction, optical mineralogy and hand-specimen mineral identification. Prerequisites: CHEM 1442 and MATH 1323 or higher-level MATH.

GEOL 3100. GEOSCIENCE PROFESSIONAL ORIENTATION. 1 Hour.
Review of various careers in the Geosciences, and how to prepare a resume, network, and interview. Principles to follow for on-the-job success. Class will involve field trips and guest lectures.

GEOL 3316. ASTROBIOLOGY I. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include properties of life, origin and evolution of life on Earth, terrestrial geology and habitability, environmental forcings, extremophiles, mass extinctions, meteorites, searches for life in the solar system. Offered as BIOL 3316, GEOL 3316 and PHYS 3316; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent.

GEOL 3340. GEOLOGY FOR ENGINEERS. 3 Hours.
Introduction to geological materials and processes important to practice of civil engineering. Includes processes forming minerals and rocks; mechanics and deformation of rocks, weathering, erosion and soils; soil hazards, land subsidence and mass movements; groundwater hydrology, geochemistry and contamination; and rivers. Labs will include introduction to geologic materials and use of GIS software to store, analyze and display geologic and engineering data. Prerequisites: PHYS 1443 and CHEM 1465 or CHEM 1442.
GEOL 3358. ASTROBIOLOGY II. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include basic properties of life, habitability of Earth, studies of possible life regarding Mars, Europa & Titan, space missions, exoplanets and exomoons, stellar habitable zones, multistellar systems, exoEarths, biomarkers, SETI, Fermi paradox, Drake equation, cosmology. Offered as BIOL 3358, GEOL 3358, and PHYS 3358; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent. Note that Astrobiology I is strongly recommended to students to be taken prior to Astrobiology II, but is not a prerequisite.

GEOL 3387. FIELD GEOLOGY I. 3 Hours.
Stratigraphic and structural mapping and analysis of data collected in the field. Taught for three weeks only in the summer session. Special fee covers cost of transportation, room, and board while in the field. Prerequisite: GEOL 2445, GEOL 3442, and GEOL 3443.

GEOL 3388. FIELD GEOLOGY II. 3 Hours.
Mapping and analysis of igneous and metamorphic rock data as well as hydrologic, geochemical and mass wasting data collected in the field. Taught for three weeks after GEOL 3387 only in the summer session. Special fee covers cost of transportation, room, and board while in the field. Prerequisite: GEOL 2445, GEOL 3442, GEOL 3443, and GEOL 3387.

GEOL 3441. BIOSTRATIGRAPHY AND LIFE THROUGH TIME. 4 Hours.
Basic principles of bio- and chronostratigraphy including the classification of fossil groups, how index fossils are used to construct the geologic timescale and correlate strata. Prerequisite: GEOL 1302.

GEOL 3442. SEDIMENTOLOGY AND STRATIGRAPHY. 4 Hours.
An introduction to the description, origin, and historical interpretation of stratified rocks. Prerequisite: GEOL 2445.

GEOL 3443. STRUCTURAL GEOLOGY. 4 Hours.
The genesis, classification, and description of structural features resulting from deformation of the earth's crust. Prerequisite: GEOL 3445 and PHYS 1441 or PHYS 1443.

GEOL 3446. PETROLOGY AND GEOCHEMISTRY. 4 Hours.
Distribution, description, classification, plate-tectonic setting and origins of igneous and metamorphic rocks in the light of theoretical-experimental multicomponent phase equilibria studies; use of trace elements and radiogenic and stable isotopes as tracers in rock genesis; hand specimen and microscopic examinations of the major igneous-metamorphic rock types in the laboratory. Prerequisite: C or better in GEOL 2445.

GEOL 3454. STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of statistics and helps students apply statistics to analyze data and interpret results from the perspective of Earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in Earth and environmental sciences. Offered as ENVR 3454 and GEOL 3454, credit will not be given for both. Prerequisite: GEOL 3454: MATH 1426.

GEOL 4081. RESEARCH IN EARTH & ENVIRONMENTAL SCIENCES. 0 Hours.
Research problems on an individual or group basis, conducted on a selected topic under the direction of a member of the Earth & Environmental Sciences faculty. May be repeated. This is a non-credit course so cannot be used to meet degree requirements. Prerequisite: Permission of the instructor.

GEOL 4181. TOPICS IN ENERGY AND EARTH RESOURCES. 1 Hour.
Lectures will discuss the historical evolution and current status of major research thrusts in the environment, energy, and resources studies, including Superfund and groundwater remediation, carbon sequestration, tight sands and coalbed methane, petroleum production in shale gas and oil reservoirs, geological repository of high-level nuclear waste, geothermal energy exploitation, mining of critical minerals, and gas (methane) hydrate. Prerequisite: GEOL 1301 or equivalent.

GEOL 4189. RESEARCH IN GEOLOGY. 1 Hour.
Supervised undergraduate research in any one of the various fields of geology. May be repeated but will not meet Geology degree requirements. Prerequisite: permission from instructor.

GEOL 4190. GEOSCIENCE INTERNSHIP. 1 Hour.
Work in geoscience for a commercial concern at least 20 hours per week for three months. Requirements include: writing a resume, learning how to interview and function on the job, and a report describing the work. Prerequisite: 16 hours of Geology coursework.

GEOL 4199. TECHNICAL SESSIONS. 1 Hour.
Forum for presentation of results of undergraduate and graduate students and faculty research. Offered as ENVR 4199 and GEOL 4199. Credit will not be given for both. Prerequisite: For ENVR: ENVR 1301 or equivalent. For GEOL: GEOL 1301 or equivalent.

GEOL 4289. RESEARCH IN GEOLOGY. 2 Hours.
Supervised undergraduate research in any one of the various fields of geology. May be repeated but will not meet Geology degree requirements. Prerequisite: permission from instructor.

GEOL 4301. MARINE GEOLOGY & GEOCHEMISTRY. 3 Hours.
Geologic and geochemical processes of the oceans. Chemistry of seawater; geochemical and biogeochemical cycles; carbonate sediment production. Prerequisite: CHEM 1441 and CHEM 1442.
GEOL 4302. GEODYNAMICS. 3 Hours.
A comprehensive and quantitative study of fundamental aspects of plate tectonics. Introduction to heat flow, elasticity and flexure, fluid mechanics, faulting, gravity, and flow in porous media, with a wide range of geological applications. Includes collaborative problem solving. Prerequisite: GEOL 3443 and MATH 2425.

GEOL 4304. SOLID EARTH GEOMECHANICS. 3 Hours.
Application of continuum mechanics to understanding deformation in the earth, including mechanical analysis of natural geologic structures such as faults, folds, lava flows, and dikes, as well as practical problems related to reservoir geomechanics and mining applications. Prerequisites: GEOL 3443, MATH 2425, and PHYS 1444.

GEOL 4305. SELECTED TOPICS IN GEOLOGY. 3 Hours.
Geological topics not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May be repeated for Geology elective credit as different topics are offered.

GEOL 4307. SEQUENCE STRATIGRAPHY. 3 Hours.
This course introduces sequence stratigraphy within context of all stratigraphy and history of sequence stratigraphy. Includes overview of sequence stratigraphy principles. Review of basic fundamental concepts of surface- and facies-based physical stratigraphy. Review of architectural element analysis, sequence stratigraphic in seismic, borehole expression of sequences and overview of subsurface stratigraphic techniques. Prerequisite: GEOL 3442.

GEOL 4308. ENVIRONMENTAL GEOCHEMISTRY. 3 Hours.
The geochemistry of natural waters with emphasis on processes that control solute concentrations including complexation reactions, oxidation and reduction reactions, biogeochemistry, and chemical weathering reactions. Prerequisites: CHEM 1442 or GEOL 2445.

GEOL 4309. INTRODUCTION TO GEOPHYSICS. 3 Hours.
Introduction to the fundamental physical principles, theory, and techniques of geophysics. Topics include gravity and magnetic fields, heat-flow, earthquakes and elastic wave propagation, and geodesy. Emphasis will be on how geophysical data are used to constrain plate tectonic processes as well as the internal structure and dynamics of the solid Earth. Prerequisites: GEOL 3443 and MATH 2425.

GEOL 4323. ISSUES IN ENVIRONMENTAL HEALTH. 3 Hours.
An introduction to health issues of concern resulting from environmental exposures. Topics include: environmental asthma, endocrine disruptors, climate change and health, emerging contaminants, nanotechnology and health, airborne particles and pediatric health. Offered as ENVR 4323 and GEOL 4323. Credit will not be given for both.

GEOL 4330. UNDERSTANDING GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
A practical introduction to GIS and methods of creating, maintaining and displaying spatial data using the ArcGIS software. This course replaces GEOL 4352; credit will not be granted for both. This course is offered as GEOL 4330 and GEOG 4330. Prerequisite: Junior standing.

GEOL 4331. ANALYSIS OF SPATIAL DATA. 3 Hours.
Analyzing spatial data using ArcGIS, Spatial Analyst, and 3-D Analyst, topological surface analysis and modeling; 3-D visualization and viewscapes; spatial statistics and data quality management. Course taught as GEOL 4330 and GEOG 4331. Credit will be granted in only one department. Prerequisite: GEOL 4330 or GEOG 4330.

GEOL 4332. GLOBAL POSITIONING SYSTEM. 3 Hours.
Review of the NAVSTAR Global Positioning System and its segments: space, operational control, and GPS receivers. Mechanics of the satellite constellation; GPS signal structure; datums and coordinate systems; precision and accuracy; error factors; absolute (point) versus relative (differential) positioning. Various positioning techniques using several types of GPS receivers; field data collection and input into GIS programs for data analysis and presentation. Course taught as GEOL 4332 and GEOG 4332. Credit will be granted in only one department. Prerequisite: GEOL 4330 or GEOG 4330.

GEOL 4333. REMOTE SENSING FUNDAMENTALS. 3 Hours.
The electromagnetic spectrum and the interaction of EM waves with matter; various types of sensing devices; spectral and spatial resolution parameters; airborne and satellite sensor platforms; aerial photographs and false-color images. The sequence of data acquisition, computer processing, and interpretation; sources of data; the integration of remote sensing data with other data types in GIS. Course taught as GEOL 4333 and GEOG 4333. Credit will be granted in only one department. Prerequisite: GEOL 4330 or GEOG 4330.

GEOL 4334. GEOGRAPHIC DATA ANALYSIS. 3 Hours.
Acquisition, processing and analysis of a set of spatial data selected by the student with approval of the instructor. A written report of the results is required. Course taught as GEOL 4334 and GEOG 4334. Credit will be granted in only one department. Prerequisite: GEOL 4330 or GEOG 4330.

GEOL 4335. TECTONICS AND ISOTOPES. 3 Hours.
Fundamentals of global tectonics, and the application of isotope geochemistry in sedimentary rocks to understanding tectonic questions. Emphasis will be given to the mechanisms of mountain formation, isotope paleoalitometry, detrital geochronology, and thermochronology. Prerequisite: GEOL 3442, GEOL 3446.

GEOL 4342. MICROFOSSILS & THE CORRELATION OF SEDIMENTARY ROCKS. 3 Hours.
This course is an introduction to microfossil groups useful in the regional and global correlation of sedimentary rock strata throughout the Phanerozoic. Microfossils record plant, animal, and protist life forms including foraminifers, radiolarians, ostracodes, conodonts, algae and coccolithophorids. Morphology, taxonomy and biostratigraphy of these groups will be stressed along with the principles used in the correlation of sedimentary rocks. Prerequisite: GEOL 3441.
GEOL 4343. RESEARCH METHODS - UTEACH. 3 Hours.
The purpose of this course is to present UTeach students with the tools scientists use to solve scientific problems. These tools enable scientists to develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in more conventional science classes. These tools include: design of experiments to answer scientific questions; use of statistics to interpret experimental results and deal with sampling errors; mathematical modeling of scientific phenomena; finding and reading articles in the current scientific literature; applying scientific arguments in matters of social importance; writing scientific papers; reviewing scientific papers; oral presentation of scientific work; use of probes and computers to gather and analyze data; ethical treatment of human subjects; laboratory safety. Research Methods is primarily a laboratory course, and most of these topics are developed in connection with four independent inquiries UTeach students design and carry out. Written inquiries will be evaluated as examples of scientific writing. Prerequisite: C or better in SCIE 1201 or SCIE 1334, or concurrent enrollment; and junior or senior standing.

GEOL 4346. BASIN ANALYSIS. 3 Hours.
The classification and characteristics of of sedimentary basins and the mechanisms forming them; and the tectonic, climatic, and eustatic controls on basin subsidence and the basin fill. Applications include the influence of basin evolution on petroleum generation, migration, and accumulation. Prerequisite: GEOL 3442 and MATH 1426.

GEOL 4350. STABLE ISOTOPE GEOCHEMISTRY. 3 Hours.
Principles governing the fractionation and distribution of stable isotopes (C, H, N, O, S) in nature, and application of stable isotope geochemistry to environmental problems and global climate change. Prerequisite: GEOL 2445 and CHEM 1442, or permission from instructor.

GEOL 4351. ENERGY RESOURCES FOR GEOSCIENTISTS. 3 Hours.
The course will review critical knowledges of minerals, rocks, stratigraphy, surface processes, geophysics, geochemistry, structures and tectonics, and connect these aspects of Earth system with Earth's six energy components: hydrocarbon, critical minerals, geothermal energy, CO2 sequestration, waste management, and green energies. Prerequisite: GEOL 3101, GEOL 3340, or cons. inst.

GEOL 4352. ANALYTICAL METHODS IN GEOCHEMISTRY. 3 Hours.
Principles of geochemical analysis of waters, rocks and soils, and gases. Methods to be covered include x-ray fluorescence and diffraction, mass spectrometry, coulometry, inductively-coupled plasma, and gas/ion chromatography with various detection methods. Prerequisite: CHEM 1442.

GEOL 4353. VOLCANOLOGY. 3 Hours.
A broad survey of volcanic rocks, landforms, products, minerals, volatiles, and processes at a generally descriptive to semi-quantitative level. Introduces areas of interface with other branches of geology and with socioeconomic interest. Prerequisite: GEOL 2446.

GEOL 4356. ENVIRONMENTAL RISK ASSESSMENT. 3 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment-hazard identification, dose-response assessment, exposure assessment, and risk characterization.

GEOL 4357. MEDICAL GEOLOGY. 3 Hours.
Introduction to geoscience and health. Students will learn how the geologic and geochemical environment can impact health. The historic background to geoscience and health will be presented followed by discussions on the natural abundance of elements in the earth, and the nature of essential and toxic elements (dose-response). Students will then learn about health responses following exposures in specific geologic/geochemical situations. Prerequisite: GEOL 1301 or ENVR 1301, or equivalent.

GEOL 4360. GEOLOGICAL PROCESSES OF OCEANS. 3 Hours.
Sedimentation in the oceans, chemistry of seawater, geochemical cycles in the oceans, and physical and biological processes that relate to sediment production, origin of seafloor topography, and seafloor spreading. Prerequisite: GEOL 3442.

GEOL 4367. PALEO EARTH SYSTEMS. 3 Hours.
This course discusses the evolution of Earth's complex dynamic system that is controlled by feedback processes that are both non-linear and stochastic in nature. Prerequisite: GEOL 1301.

GEOL 4368. GEOLOGY OF THE PERMIAN BASIN. 3 Hours.
Overview of the geologic evolution of the Permian Basin of W Texas and SE New Mexico and its petroleum resources. Emphasis on student presentations and term paper. Prerequisite: GEOL 1301 or equivalent.

GEOL 4389. RESEARCH IN GEOLOGY. 3 Hours.
Supervised undergraduate research in any one of the various fields of geology. May be repeated but will not meet Geology degree requirements. Prerequisite: permission from instructor.

GEOL 4393. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or project under the direction of a faculty member in the Earth and Environmental Sciences Department.

GEOL 4402. COMPUTER MODELING IN EARTH SCIENCE. 4 Hours.
An introduction to basic programming and computation in the earth sciences using Matlab®, with emphasis on development of univariate and bivariate statistical models, spatial and image analysis, time series analysis, and the development of basic deterministic physics-based models of geological processes. Prerequisite: MATH 2425.
GEOL 4405. METEOROLOGY AND CLIMATOLOGY. 4 Hours.
A quantitative approach to the study of the structure, energy, and motions of the atmosphere. Prerequisite: MATH 1426 and junior standing, or permission of instructor.

GEOL 4420. HYDROGEOLOGY. 4 Hours.
Hydrologic cycle, Darcy's law, hydraulic properties, aquifer types and materials, groundwater flow to wells, fracture flow, vadose zone flow, groundwater chemistry, and groundwater modeling. Prerequisite: PHYS 1441 or PHYS 1443.

GEOL 4421. GEOCHRONOLOGY. 4 Hours.
Introduction to dating techniques, applied to understand past climate and tectonics. Prerequisite: GEOL 1301 or equivalent.

GEOL 4422. CONTAMINANT HYDROGEOLOGY. 4 Hours.
Sources and types of organic and inorganic contaminants; the physical, chemical, and biological factors and processes that affect the transport and fate of contaminants in the subsurface; non-aqueous phase liquids and multiphase flow; and various remedial techniques of contaminated sites. Prerequisite: GEOL 1301, ENVR 1301, or equivalent.

GEOL 4425. PALEOCLIMATE & CLIMATE CHANGE. 4 Hours.
Climate change throughout geologic time, especially the last 100 million years: models of the climate system, reconstruction and modeling of past climates, abrupt climate change, warm climates, paleoclimatology, climate change and mass extinctions. Prerequisite: GEOL 1301, MATH 1426, and junior standing, or permission from instructor.

GEOL 4443. SEDIMENTARY SYSTEMS. 4 Hours.
Focuses on the processes transporting and archiving siliciclastic sediment, and the approaches using siliciclastic sedimentary rocks to reconstruct earth surface processes. This course includes a heavy component of student-led presentation and discussion. Prerequisite: GEOL 3442.

GEOL 4455. MATHEMATICAL MODELING OF ENVIRONMENTAL QUALITY SYSTEMS. 4 Hours.
This course is designed to introduce the process principles that govern contaminant transport and transformations in multimedia environments. This course will cover application of fate and transport models to evaluate pollutant interactions with the biosphere, particularly in the context of human exposure modeling and health risk assessment. Offered as ENVR 4455 and GEOL 4455. Credit will not be given for both.

GEOL 4456. ENVIRONMENTAL RISK ASSESSMENT. 4 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment-hazard identification, dose-response assessment, exposure assessment, and risk characterization. Offered as ENVR 4456 and GEOL 4456. Credit will not be given for both.

GEOL 4458. MACHINE LEARNING FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of machine learning and helps students apply machine learning to analyze data, predict outcomes and interpret results from the perspective of earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in earth and environmental sciences. Offered as GEOL 4458 and ENVIR 4458. Credit will be not given for both. Prerequisite: GEOL 3454 or ENVIR 3454 or equivalent.

GEOL 4465. PHYSICAL OCEANOGRAPHY AND LIMNOLOGY. 4 Hours.
An introduction to physical processes in lakes and oceans. Changes in lakes and oceans influence heat, and momentum fluxes at the aquatic/oceanic and atmospheric interface. Topics include ocean/lake structure and circulation, and the impact of global climate change on lakes and oceans. Field excursions to nearby lakes combine theoretical knowledge and field measurements. Prerequisite: MATH 2425 and PHYS 1441 or PHYS 1443.

GEOL 5151. TOPICS IN ENERGY AND EARTH RESOURCES. 1 Hour.
This course will discuss the historical evolution and current status of major research thrusts in the environment, energy, and resources studies, including Superfund and groundwater remediation, carbon sequestration, tight sands and coalbed methane, petroleum production in shale gas and oil reservoirs, geological repository of high-level nuclear waste, geothermal energy exploitation, mining of critical minerals, and gas (methane) hydrate. Prerequisite: GEOL 1301 or equivalent.

GEOL 5180. PROFESSIONAL ORIENTATION AND BUSINESS ETHICS. 1 Hour.
A mentoring program using working professionals selected by the Earth and Environmental Sciences Department. Each participant meets at least once a month with a mentor who provides information on practices and skills necessary to succeed in the workplace. Course participants review business ethics statements provided by the mentor's company or other companies and write a critique based on materials from professional business ethics organizations such as the International Business Ethics Institute. Prerequisite or concurrent enrollment GEOL 5345.

GEOL 5181. RESEARCH IN GEOLOGY. 1 Hour.
Independent study in various areas of research including paleontology, stratigraphy, tectonics, structural geology, sedimentology, geochemistry, petrology, geophysics, and volcanology. May be repeated for credit. Graded P/F/R/W.

GEOL 5190. GEOSCIENCE INTERNSHIP. 1 Hour.
Work in geoscience for a commercial concern at least 20 hrs/wk for 3 months. Requirements include writing a resume, learning how to interview and function on the job, and a report describing the work. Prerequisite: GEOL 5345 or concurrent enrollment.

GEOL 5199. TECHNICAL SESSIONS. 1 Hour.
Forum for presentation of results of graduate students and faculty research. Required each semester of all graduate students.
GEOL 5265. TOPICS IN GEO. 2 Hours.
GEOL 5281. RESEARCH IN GEOLOGY. 2 Hours.
Independent study in various areas of research including paleontology, stratigraphy, tectonics, structural geology, sedimentology, geochemistry, petrology, geophysics, and volcanology. May be repeated for credit. Graded P/F/R/W.

GEOL 5301. ENVIRONMENTAL GEOCHEMISTRY. 3 Hours.
Fundamentals of low-temperature aqueous geochemistry, and anthropogenic impacts on natural water systems. Topics include equilibrium thermodynamics, kinetics, aqueous complexation, and oxidation/reduction processes that affect metals and organic matter in natural waters.

GEOL 5302. GEODYNAMICS. 3 Hours.
A comprehensive and quantitative study of fundamental aspects of plate tectonics. Introduction to heat flow, elasticity and flexure, fluid mechanics, faulting, gravity, and flow in porous media, with a wide range of geological applications. Includes collaborative problem solving. Prerequisite: GEOL 3443 and MATH 2425.

GEOL 5303. ROCK FRACTURE MECHANICS. 3 Hours.
Principles and tools of fracture mechanics are applied to the origins and physical behaviors of faults, dikes, joints, veins, and other natural structures in rock. Special emphasis will be given to combining field observations of fractures in rock with the elastic theory of cracks in order to explore the role of natural fractures in brittle rock deformation in the earth’s crust with applications to crustal deformation, structural geology, engineering geology, and induced hydraulic fracture, i.e. Fracking. Prerequisite: GEOL 3443 and MATH 2425; or GEOL 3340 and CE 2313.

GEOL 5304. SOLID EARTH GEOMECHANICS. 3 Hours.
Application of continuum mechanics to understanding deformation in the earth, including mechanical analysis of natural geologic structures such as faults, folds, lava flows, and dikes, as well as practical problems related to reservoir geomechanics and mining applications. Prerequisite: GEOL 3443, MATH 2325, PHYS 1441 or PHYS 1443.

GEOL 5306. ENVIRONMENTAL GEOLOGY. 3 Hours.
Hydrological systems, water quality, and behavior of pollutants; atmospheric systems, air quality, and effects of pollutants; occurrence, prediction, and amelioration of natural environmental hazards including floods, earthquakes, and landslides.

GEOL 5309. GEOMORPHOLOGY & QUATERNARY STRATIGRAPHY OF SEDIMENTARY SYSTEMS. 3 Hours.
This course examines those physical processes that sculpt the surface of the Earth and result in deposition of sediments. Surface systems covered include weathering, mass wasting, rivers, shorelines, eolian processes, and glaciers. The course also examines the stratigraphic techniques used to decode the recent (2 million to present) stratigraphic record of these systems. Course is designed for geologists, biologists, and other fields concerned with interpreting and/or managing modern environments.

GEOL 5312. SANDSTONE PETROLOGY. 3 Hours.
Petrographic examination of terrigenous clastics, including textural, compositional, and diagenetic aspects. Focus on paleogeographic, tectonic, and environmental interpretation. Prerequisite: GEOL 3442.

GEOL 5313. CARBONATE PETROLOGY. 3 Hours.
Nature and composition of ancient and modern carbonate sediments and rocks in terms of their genesis, depositional environments, biological constituents, and processes involved in transport, deposition, diagenesis, and lithification. Knowledge of stratigraphy and paleontology is necessary for success in this course. Prerequisite: GEOL 3442 or permission of the instructor.

GEOL 5320. UNDERSTANDING GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
A practical introduction to GIS and methods of creating, maintaining and displaying spatial data using the ArcGIS software.

GEOL 5321. ANALYSIS OF SPATIAL DATA. 3 Hours.
Analyzing spatial data using ArcGIS, Spatial Analyst, and 3D Analyst, topological surface analysis and modeling; 3D visualization and viewscapes; spatial statistics and data quality management. Prerequisite: GEOL 4330 or GEOL 5320.

GEOL 5322. GLOBAL POSITIONING SYSTEM. 3 Hours.
Review of the NAVSTAR Global Positioning System and its segments: space, operational control, and GPS receivers. Mechanics of the satellite constellation; GPS signal structure; data and coordinate systems; precision and accuracy; error factors; absolute (point) versus relative (differential) positioning. Various positioning techniques using several types of GPS receivers; field data collection and input into GIS programs for data analysis and presentation. Prerequisite: GEOL 4330 or GEOL 5320.

GEOL 5323. REMOTE SENSING FUNDAMENTALS. 3 Hours.
The electromagnetic spectrum and the interaction of EM waves with matter; various types of sensing devices; spectral and spatial resolution parameters; airborne and satellite sensor platforms; aerial photographs and false-color images. The sequence of data acquisition, computer processing and interpretation; sources of data; the integration of remote sensing data with other data types in GIS. Prerequisite: GEOL 4330 or GEOL 5320.

GEOL 5324. GEOGRAPHIC DATA ANALYSIS PROJECT. 3 Hours.
Acquisition, processing and analysis of a set of spatial data selected by the student with the approval of the instructor. A written report of the results is required. Offered as GEOL 5324 and GEOG 5334. Credit will not be given for both. Prerequisite: For GEOL 5324: GEOL 5320.

GEOL 5332. STABLE ISOTOPE GEOCHEMISTRY. 3 Hours.
Principals governing the fractionation and distribution of stable isotopes (C, H, N, O, S) in nature, and application of stable isotope geochemistry to environmental problems and global climate change.
GEOL 5333. FIELD METHODS. 3 Hours.

GEOL 5334. ANALYTICAL METHODS IN ENVIRONMENTAL SCIENCE. 3 Hours.
Principals of geochemical analysis of waters, rocks and soils, and gases. Methods to be covered include x-ray fluorescence and diffraction, mass spectrometry, coulometry, inductively-coupled plasma, and gas/ion chromatography with various detection methods.

GEOL 5335. ISOTOPES AND TECTONICS. 3 Hours.
An Introduction to the fundamentals of clumped isotopes, and major radiogenic and cosmogenic isotope systems and their applications to the study of earth system processes and Earth history; emphasis will be placed on applications to tectonics, geochronology, and thermochronology. Prerequisite: CHEM 1442 or GEOL 4302.

GEOL 5342. MICROFOSSILS AND CARBONATE ROCKS. 3 Hours.
Half of this course consists of an introduction to microfossil groups occurring in sedimentary rocks: foraminifers, conodonts, coccolithophorids and others, and their usefulness in regional and global correlation of Phanerozoic strata. The biostratigraphy of these groups will be discussed along with the principles used in the correlation of sedimentary rocks. The other half of the course consists of the analysis of the lithofacies and biofacies of carbonate rocks, their genesis, depositional environments, and diageneric. Prerequisite: GEOL 3441 and GEOL 3442 or permission of the instructor.

GEOL 5344. DEPOSITIONAL ENVIRONMENTS: TERRIGENOUS CLASTICS. 3 Hours.
Depositional processes, physiographic and environmental components, and facies characteristics and relationships of alluvial, eolian, deltaic, clastic shoreline, shallow siliciclastic sea and deep sea clastic depositional systems. Emphasis on interpretation of ancient analogs. Prerequisite: GEOL 3442.

GEOL 5345. PETROLEUM GEOLOGY. 3 Hours.
Origin, generation and migration of petroleum; reservoirs, seals and traps; the subsurface environment; properties of petroleum; exploration and production methods; use of seismic lines and well logs; types of petroleum basins; reserves and resources. Prerequisite: GEOL 3442 and GEOL 3443.

GEOL 5348. MARINE GEOLOGY AND GEOCHEMISTRY. 3 Hours.
Geologic and geochemical processes of the oceans. Chemistry of seawater; geochemical and biogeochemical cycles; carbonate sediment production.

GEOL 5351. ENERGY RESOURCES FOR GEOSCIENTISTS. 3 Hours.
The course will review critical knowledges of minerals, rocks, stratigraphy, surface processes, geophysics, geochemistry, structures and tectonics, and connect these aspects of Earth system with Earth's six energy components: hydrocarbon, critical minerals, geothermal energy, CO2 sequestration, waste management, and green energies. Prerequisite: GEOL 1301, GEOL 3340, or cons. inst.

GEOL 5365. TOPICS IN GEOLOGY. 3 Hours.
Topics offered depend on student and faculty interest. Such topics might include identification of fossil fragments in thin section; magmatic processes; plate tectonics and sedimentary basin evolution; stratigraphic paleontology; sedimentary or volcanogenic ore deposition; geostatistics; geophysical archeology; and various advanced subjects in sedimentology, stratigraphy, paleontology, geophysics, geochemistry, volcanology and petrology. May be repeated for credit when topic changes.

GEOL 5367. PALEO EARTH SYSTEMS. 3 Hours.
This course discusses the evolution of Earth's complex dynamic system that is controlled by feedback processes that are both non-linear and stochastic in nature. Prerequisite: GEOL 1301.

GEOL 5368. GEOLOGY OF THE PERMIAN BASIN. 3 Hours.
Overview of the geologic evolution of the Permian Basin of W Texas and SE New Mexico and its petroleum resources. Emphasis on student presentations and term paper.

GEOL 5369. SEQUENCE STRATIGRAPHY. 3 Hours.
This course introduces sequence stratigraphy within context of all stratigraphy and history of sequence stratigraphy. Includes overview of sequence stratigraphy principles. Review of basic fundamental concepts of surface- and facies-based physical stratigraphy. Review of architectural element analysis, sequence stratigraphic in seismic, borehole expression of sequences and overview of subsurface stratigraphic techniques. Prerequisite: GEOL 3442.

GEOL 5370. SEDIMENTARY SYSTEMS. 3 Hours.
Carbonate and clastic depositional systems, recognition of facies, systems tracts, diagenetic overprint, shelf to basin profiling, and sequence stratigraphic analysis.

GEOL 5371. BASIN ANALYSIS. 3 Hours.
Topics include: the classification and characteristics of of sedimentary basins and the mechanisms forming them; and the tectonic, climatic, and eustatic controls on basin subsidence and the basin fill. Applications include the influence of basin evolution on petroleum generation, migration, and accumulation. Prerequisite GEOL 3442 (Sedimentology and Stratigraphy).

GEOL 5372. STRUCTURAL GEOMETRY AND TECTONICS OF PETROLEUM FIELDS. 3 Hours.
Structural styles of thin-skinned, basement involved and reactivated systems in shortening, extensional and strike-slip deformation. Use of structural modeling and restoration methods to test the reliability of structural interpretations. Prerequisite: GEOL 3443.

GEOL 5373. RESERVOIR CHARACTERIZATION. 3 Hours.
Principles, protocols, analysis and measurement of petrophysical properties (e.g., fluid content, porosity, permeability, pore size distribution, water retention curve, imbibition) of petroleum reservoir rocks.
GEOL 5374. SEISMIC INTERPRETATION. 3 Hours.
Introduction to the methods of acquisition and processing as they relate to the interpretation of seismic records. Structural and stratigraphic interpretation methods and pitfalls using two and three dimensional seismic data. Introduction to Seismic Interpretation Software such as the Kingdom Suite from Seismic Micro Technology, Inc. Prerequisite: GEOL 3442 and GEOL 3443.

GEOL 5375. INTRODUCTION TO WELL LOG INTERPRETATION AND MAPPING. 3 Hours.
Introduction to the various types of well logs used in the petroleum industry and their petrophysical interpretations, including evaluations of porosity, water saturation, shale volume, permeability, and lithology. Introduction to techniques of contouring data and use of mapping software such as PETRA. Prerequisite: GEOL 3442.

GEOL 5381. RESEARCH IN GEOLOGY. 3 Hours.
Independent study in various areas of research including paleontology, stratigraphy, tectonics, structural geology, sedimentology, geochemistry, petrology, geophysics, and volcanology. May be repeated for credit. Graded R.

GEOL 5395. MASTER'S PROJECT. 3 Hours.
May be used as elective for students in non-thesis program. Graded F,P,R,W. Prerequisite: GEOL 1301 or equivalent course.

GEOL 5398. THESIS. 3 Hours.
Graded F, R.

GEOL 5405. METEOROLOGY AND CLIMATOLOGY. 4 Hours.
A quantitative approach to the study of the structure, energy, and motions of the atmosphere.

GEOL 5409. APPLIED GEOPHYSICS. 4 Hours.
Geophysical Techniques used to determine the presence and extent of deposits of minerals and the subsurface structure of selected localities from field methods.

GEOL 5421. GEOCHRONOLOGY. 4 Hours.
Introduction to dating techniques, applied to understand past climate and tectonics. Prerequisite: GEOL 1301 or equivalent.

GEOL 5425. PALEOCLIMATE AND CLIMATE CHANGE. 4 Hours.
Climate change throughout geologic time, especially the last 100 million years: models of the climate system, reconstruction and modeling of past climates, abrupt climate change, warm climates, paleoclimatology, climate change and mass extinctions.

GEOL 5428. HYDROGEOLOGY. 4 Hours.
Hydrologic cycle, Darcy's law, hydraulic properties, aquifer types and materials, groundwater flow to wells, fracture flow, vadose zone flow, groundwater chemistry, and groundwater modeling; a term paper about the relevant topics covered in the class is required. Prerequisite: GEOL 2446, MATH 2425.

GEOL 5450. CONTAMINANT HYDROGEOLOGY. 4 Hours.
Sources and types of organic and inorganic contaminants; the physical, chemical, and biological factors and processes that affect the transport and fate of contaminants in the subsurface; non-aqueous phase liquids and multiphase flow; and various remedial techniques of contaminated sites.

GEOL 5454. STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of statistics and helps students apply statistics to analyze data and interpret results from the perspective of Earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in Earth and environmental sciences. Offered as EVSE 5454 and GEOL 5454. Credit will not be given for both.

GEOL 5455. MATHEMATICAL MODELING OF ENVIRONMENTAL QUALITY SYSTEMS. 4 Hours.
This course is designed to introduce the process principles that govern contaminant transport and transformations in multimedia environments. This course will cover application of fate and transport models to evaluate pollutant interactions with the biosphere, particularly in the context of human exposure modeling and health risk assessment. Offered as EVSE 5455 and GEOL 5455. Credit will not be given for both.

GEOL 5456. ENVIRONMENTAL RISK ASSESSMENT. 4 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment-hazard identification, dose-response assessment, exposure assessment, and risk characterization. Offered as EVSE 5456 and GEOL 5456; credit will not be given for both.

GEOL 5465. PHYSICAL OCEANOGRAPHY AND LIMNOLOGY. 4 Hours.
An introduction to physical processes in lakes and oceans. Changes in lakes and oceans influence heat, and momentum fluxes at the aquatic/oceanic and atmospheric interface. Topics include ocean/lake structure and circulation, and the impact of global climate change on lakes and oceans. Field excursions to nearby lakes combine theoretical knowledge and field measurements. Prerequisite: PHYS 1441 or PHYS 1443; and MATH 2425.

GEOL 5698. THESIS. 6 Hours.
Graded F, P, R.
Earth and Environmental Sciences - Graduate Programs

Program Objectives

The MS in Earth and Environmental Sciences has four options: an Environmental Science Option; a Geoscience Option; a Professional Environmental Science Option; and a Petroleum Geoscience Option.

The Environmental Science Option provides graduate students with an integrated, multidisciplinary education, requiring a breadth of understanding and mastery of a spectrum of scientific and engineering principles. The thesis option, designed for those interested in an in-depth experience in some particular topic, and a non-thesis option are available. All new students are admitted into the non-thesis option. During the first year, students may transfer to the thesis option after obtaining a faculty thesis supervisor. A thesis supervisor is not guaranteed.

The Geoscience Option is a two year program with specializations in stratigraphy, petrology, paleontology, sedimentology, structural geology, Geomechanics, plate tectonics, computer modeling, hydrology, geochemistry and paleoclimatology. Students in this program are prepared for additional graduate work at the PhD level, or for positions in industry and government. Thesis or non thesis options are available However, all new students are admitted into the non-thesis option. During the first year, students may transfer to the thesis option after obtaining a faculty thesis supervisor. A thesis supervisor is not guaranteed.

The Environmental Science Professional Option is a Professional Master’s Degree for those interested in a career in Environmental Science. Instead of a thesis, students participate in a mentoring program, take a course in project economics, work as an intern or in a part time job in the Environmental Science Profession, and course experiences involving business ethics, teamwork, a small research project, and communication. This is a non thesis program.

The Petroleum Geoscience Professional Option is a Professional Masters Degree for those interested in a career in the Petroleum Industry. In addition to core geology courses, students are required to participate in a networking program with industry professionals, work as an intern or in a part time job in petroleum geoscience, take a course in project economics, and participate in course activities that emphasize business ethics, teamwork and communications. A thesis research project is required. All students are initially admitted to the Geoscience non-thesis option. During the first year, students may transfer to the Petroleum Geoscience option after obtaining a faculty thesis supervisor. A thesis supervisor is not guaranteed.

The PhD in Earth and Environmental Sciences. The program leading to the Doctor of Philosophy degree in Earth and Environmental Sciences is designed primarily to prepare doctoral-level students for research careers in industry, government or academic institutions. Students carry out independent research and acquire practical knowledge of the type of research conducted and the constraints (both practical and philosophical) under which such research is conducted. The areas of research are interdisciplinary using the Earth’s environment, interpreted broadly, as the theme. Research normally comes from the disciplines of Geoscience, Biology, Chemistry and Engineering, but contributions from other disciplines are welcome. The program is designed to provide graduate students an integrated, multidisciplinary education, requiring a breadth of understanding and mastery of a spectrum of scientific and engineering principles. Among the goals is to provide students who have earned engineering or science undergraduate degrees a common ground for interdisciplinary communication, an understanding of the environment, and competence in a research area that will enable them to evaluate complex environmental problems.

Admission

Students applying for MS or PhD degrees should apply to the Graduate School for regular admission to a particular degree program at http://www.uta.edu/admissions/graduate/index.php. (http://www.uta.edu/admissions/graduate/)

CATEGORIES OF ADMISSION

Unconditional - all the admission criteria are met and there are no conditions placed on continued enrollment in the program.

Probationary - Applicants who do not meet the standards for unconditional admission may be considered for probationary admission after careful examination of their application materials. Probationary admission normally requires that the applicant receive a B or better in their first 12 hours of graduate coursework at UT Arlington, and/or make up undergraduate deficiencies.

Deferred and Provisional Admission - A deferred admission may be granted when an application is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission.

INTERNATIONAL STUDENTS

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies. Applicants must submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section to.
An applicant holding either a bachelor’s or a master’s degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, TSE or IELTS score for admission purposes. Any other waivers of the score requirements must be recommended by the applicant’s Graduate Advisor and approved by the Dean of Graduate Studies.

**FINANCIAL AID**

Students that are unconditionally admitted into the MS or PhD programs can also apply for available scholarships and/or Graduate Teaching Assistantships. Award of scholarships or Assistantships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 9 hours of coursework in both long semesters to retain their Financial Aid. To be eligible for a Graduate Teaching Assistantship, a non-native English speaker must receive a TOEFL iBT score of at least 23, or an IELTS score of at least 7 on the speaking section of those exams. Applications Scholarships or Teachings Assistantships must be submitted over the internet at https://uta.academicworks.com/. Deadline is March 1st for the following academic year starting in August.

**DENIAL OF ADMISSION**

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

**Earth and Environmental Sciences Master’s Program Admissions**

For unconditional admission a student must meet the following requirements:

**For the Environmental Science Options:** A B.S. degree in biology, chemistry, geoscience, mathematics, or engineering with the following courses or their equivalent: 1 semester of introductory physics for science majors; 2 semesters of introductory chemistry for science majors; and Calculus I and II. Students with a Bachelor’s Degree in other sciences will also be considered, subject to satisfactory completion of deficiency courses.

**For the Geoscience Options:** A B.S. degree in an Earth Science discipline with the following courses or their equivalent: Mineralogy, Petrology, Structure, Stratigraphy/sedimentology, Field Geology and Geophysics or Paleontology. In addition, one semester of Biology, Calculus I and II, and a year of Chemistry and Physics is required.

**For all Options:**

1. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School.
2. Graduate Record Examination (GRE) scores are used in conjunction with GPA’s. For example a person with a GPA below 3.0 will need a GRE score better than average. Masters students who have succeeded in the Earth and Environmental Science’s Program typically score higher than the 60th Percentile on the verbal and quantitative portion of the GRE.
3. An applicant whose native language is not English must submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section. However, an applicant whose native language is not English with a bachelor’s or a master’s degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, TSE or IELTS score for admission purposes.
4. Favorable letters of recommendation from people familiar with the applicant’s academic work.

DUAL DEGREE PROGRAM

Dual master's degrees can be arranged with any suitable program. By participating in a dual degree program, students may apply 6-18 total semester credit hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from six to 18, subject to the approval of Graduate Advisors from both programs. Degree plans, thesis or professional report proposals and programs of work must be approved by Graduate Advisors from both programs. The successful candidate will be awarded both degrees rather than one joint degree.

To participate in the dual degree program, students must make separate application to each program and must submit a separate program of work for each degree. Those interested in the dual degree program should consult the appropriate Graduate Advisors for further information on course requirements. See also the statement on Dual Degree Programs in the general information section of this catalog.

Arrangements to offer a dual degree have already been made between Earth and Environmental Sciences and the Program in City and Regional Planning (M.C.R.P. degree), School of Urban and Public Affairs.

Admission Requirements

For unconditional admission a student must meet the following requirements:

1. A Masters Degree or at least 30 hours of graduate coursework in environmental science, biology, chemistry, geology, mathematics or engineering. Students with a Bachelor's degree in biology, chemistry, geology, mathematics, or engineering will be considered for the B.S. to Ph.D. track if they meet the other requirements for admission to doctoral studies. Students with a Bachelor's Degree in other sciences will also be considered, subject to satisfactory completion of courses to make up deficiencies.

2. A minimum graduate coursework GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School.

3. Graduate Record Examination (GRE) scores are considered in admission decisions. Doctoral students who have succeeded in the Earth and Environmental Sciences Program typically score higher than the 60th percentile the verbal and the quantitative portion of the GRE.

4. For applicants whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (or an equivalent score on a computer-based test) or a score of 40 on the Test of Spoken English.

5. Favorable letters of recommendation from people familiar with the applicant’s academic work and/or professional work.

6. A statement must be submitted to the program detailing the applicant’s specific research interests and identifying the faculty member who is requested as supervisor of the dissertation research.

7. Students may be considered for unconditional admission if further review of their transcripts, recommendation letters, correspondence or direct interactions with Earth and Environmental Sciences faculty, and statement of research interests indicates that they are qualified to enter the Doctoral Program.

Doctoral Degree Requirements

EARTH AND ENVIRONMENTAL SCIENCES DOCTORAL DEGREE

The Doctoral Program provides students with the interdisciplinary knowledge and skills to conduct independent research in Earth and Environmental Sciences. Students conduct dissertation research under the supervision of a faculty member in one of the participating departments (Biology, Chemistry, Earth and Environmental Sciences, Civil and Environmental Engineering, or Urban and Public Affairs). The supervising professor and a faculty committee assign courses in this primary area of emphasis to support the student’s research and professional goals. To provide interdisciplinary training, additional courses are assigned in a secondary area of emphasis.
If they have not already done so in their previous work, all Doctoral students must take one engineering course; two science courses; and one course in policy or planning.

Students who enter the Doctoral Program with a Master's degree in a science or engineering field, or with 30 semester hours of graduate coursework, take a Diagnostic Examination in the first year of residence to evaluate this previous work. The student's supervising committee must approve all courses taken to meet degree requirements.

Students who enter the Doctoral Program with a Bachelor's degree take 30 semester hours of graduate coursework that includes Engineering, Science and Public Policy courses. These students are encouraged to take the diagnostic exam in their first year of enrollment. The student's supervising committee must approve all courses taken to meet degree requirements.

Students may choose among any of the five participating units for their primary and secondary areas of emphasis. Course selection within these areas of emphasis is guided by the student's supervising committee and must result in a cohesive program that supports the dissertation research.

Other requirements include:

1. Successful completion of the Diagnostic Examination at the end of the first year of residence.
2. Successful completion of the Comprehensive Examination, an oral defense of a research proposal to be pursued for the dissertation, and a specialization examination over areas of the student's proposed research.
3. Demonstration of proficiency in one foreign language or a research tool such as advanced computer skills, statistics, or operations research.
4. Successful defense of the dissertation and acceptance of the dissertation by the supervising committee.
Earth and Environmental Sciences - Undergraduate Programs

Degree Programs

BACHELOR OF SCIENCE IN GEOLOGY

This degree has three options:

1. The **Professional Option** is for students who plan to enter the profession or go to graduate school but are uncertain where they want to concentrate. The program emphasizes breadth and exposes students to most of the geological disciplines.
2. The **Environmental Science Option** emphasizes the application of earth science to environmental problems associated with the hydrosphere, atmosphere and natural hazards.
3. The **Engineering Geology Option** is for students who are interested in combining Geology with Civil Engineering coursework to work with engineering firms on construction and environmental problems.

BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCE

This degree emphasizes on interdisciplinary training related to environmental sciences and is designed for students who plan to enter the profession or go to graduate school.

BACHELOR OF ARTS IN GEOLOGY

This degree has three options:

1. The **General Option** is for students who want to combine Geology with other professional interests.
2. The **Geographic Information Systems Option** is for students who want to combine Geology with computer technology to store and analyze spatial data using GIS software.
3. The **Composite Science Teacher Certification Option** is for students who want teacher certification, and it is offered through the UTeach program.

Requirements for a Bachelor of Science in Geology - Professional Option

This degree is for students who plan to enter the profession or go to graduate school. The program emphasizes breadth and exposes students to most of the geological disciplines.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

**PRE-PROFESSIONAL COURSES**

GEOL 4000-level elective (4 hours) (can not be GEOL4331, 4333, 4334, and 4354): 8

General Elective(s) 4

36 hours of coursework must be advanced (3000/4000-level) to earn degree.

Total Hours 116

* See General Core Requirements (p. 50) for approved courses.

TYPICAL COURSE SEQUENCE

Details of a personal course sequence should be made with the guidance of the Earth and Environmental Sciences undergraduate advisor, particularly since many GEOL courses are not offered every semester. Students should also consult with the appropriate department for minor requirements; Biology minors should consult with the Earth and Environmental Sciences undergraduate advisor.

Total Hours: 120

* See General Core Requirements (p. 50) for approved courses.

**Requirements for a Minor in Geology**

A minimum total of 18 credit hours (including a minimum of 6 hours at the 3000-4000 level) are required. Transfer students must complete a minimum of 9 hours at UTA, 6 of which must be 3000-4000 level. A 2.0 GPA is required for coursework in the minor.

The following courses cannot be used for the minor: GEOL 3100, GEOL 3340, GEOL 4189, GEOL 4190, GEOL 4289, GEOL 4393.

**Requirements for a Minor in Data Science (for Majors in Earth and Environmental Sciences)**

Students who are pursuing a major in the Department of Earth and Environmental Sciences and a minor in Data Science must meet with an Earth and Environmental Science Advisor who approves the minor courses. The following courses normally satisfy the requirements and are recommended by the Earth and Environmental Science Department.

**REQUIRED COURSES**

| DATA 1301 | INTRODUCTION TO DATA SCIENCE | 3 |
| DATA 3401 | PYTHON FOR DATA SCIENCE 1 | 4 |
| DATA 3461 | MACHINE LEARNING | 4 |
| or ENVR 4458 | MACHINE LEARNING FOR EARTH AND ENVIRONMENTAL SCIENTISTS | |

ADVANCED ELECTIVES - choose from the following: 9

| DATA 3402 | PYTHON FOR DATA SCIENCE 2 | |
| DATA 3421 | DATA MINING, MANAGEMENT, AND CURATION | |
| DATA 3441 | STATISTICAL METHODS FOR DATA SCIENCE 1 | |
| DATA 3442 | STATISTICAL METHODS FOR DATA SCIENCE 2 | |
| DATA 4380 | DATA PROBLEMS | |
| DATA 4381 | DATA CAPSTONE PROJECT 1 | |
| other DATA advanced elective(s) approved by the Earth and Environmental Science undergraduate advisor | |

Total Hours | 20 |

**Requirements for a Minor in Biology (for Majors in Earth and Environmental Sciences)**

Students who are pursuing a major in the Department of Earth and Environmental Sciences and a minor in Biology must meet with a Biology Advisor who approves the minor courses. The following courses normally satisfy the requirements of the Biology Department and are recommended by the EES Department.

A minimum total of 18 credit hours (including a minimum of 6 hours at the 3000-4000 level) are required. Transfer students must complete a minimum of 9 hours at UTA, 6 of which must be 3000-4000 level. A 2.0 GPA is required for coursework in the minor.

**REQUIRED COURSES**

| BIOL 1441 | CELL AND MOLECULAR BIOLOGY | 4 |
| BIOL 1442 | EVOLUTION AND ECOLOGY | 4 |

ADVANCED ELECTIVES - choose from the following: 10

| BIOL 2300 | BIOSTATISTICS | |
Requirements for Certification in Geographic Information Systems

Certification in Geographic Information Systems is designed for students in non-Earth and Environmental Sciences majors who want to become proficient in spatial data analysis, which is used in business, liberal arts, engineering and architecture disciplines.

This is a certification program and it does not lead to a second major or minor. However, students may use these courses to count towards a Geology minor. Students who are in the Geology B.A. Geographic Information Systems Option or Geoinformatics B.S. degree plans may not also earn this certificate, as the certificate courses are required for those degrees.

Students must obtain a 3.0 cumulative GPA in the required courses in order to earn the certificate.

Certificate

- Applied Statistics Certificate (p. 1235)

COURSES

MATH 0302. FUNDAMENTALS OF ALGEBRA. 3 Hours.
This course is designed for students whose placement scores or life experience indicate that they may need additional preparation in order to take a college credit bearing mathematics course. Topics may include basic algebraic operations and expressions, linear equations and inequalities, polynomials, rational expressions, factoring, exponents and radicals, graphing, quadratic equations, and mathematical reasoning. Students will use mathematical software to master targeted areas and progress through a self-paced environment in order to achieve college readiness. Immediately following the successful completion of this foundational course, students should register for a credit bearing mathematics course accordingly to their degree plan. Credit in this course does not fulfill any degree requirement.

MATH 0311. FOUNDATIONS FOR CONTEMPORARY MATHEMATICS. 3 Hours.
This course is designed for students whose placement scores or life experience indicate that they may need additional preparation in order to take a college credit-bearing mathematics course. This course provides foundational preparation for MATH 1301. Topics include basic numeric and algebraic operations, expressions, linear and quadratic equations, solving techniques, graphing, mathematical logic and reasoning, as well as a brief introduction to probability and statistics. Students will use mathematical software to master targeted areas and progress through a modified self-paced environment in order to achieve college readiness. Immediately following the successful completion of this foundational course, students should register for a credit-bearing mathematics course according to their degree plan, specifically MATH 1301. Credit in this course does not fulfill any degree requirements.
MATH 0312. FOUNDATIONS FOR ALGEBRA. 3 Hours.
This course is designed for students whose placement scores or life experience indicate that they may need additional preparation in order to take a college credit-bearing mathematics course. This course provides foundational preparation for MATH 1302 or MATH 1315. Topics include basic numeric and algebraic operations and expressions, linear equations and inequalities, polynomials, rational expressions, factoring, exponents and radicals, graphing, and quadratic equations. Students will use mathematical software to master targeted areas and progress through a modified self-paced environment in order to achieve college readiness. Immediately following the successful completion of this foundational course, students should register for a credit bearing mathematics course according to their degree plan, specifically MATH 1302 or MATH 1315. Credit in this course does not fulfill any degree requirements.

MATH 1301. CONTEMPORARY MATHEMATICS. 3 Hours. (TCCN = MATH 1332)
This course covers material in a traditional algebra course together with real-world applications of mathematics. It develops problem-solving and critical thinking skills. Topics include the mathematics of dimensional analysis, mathematical logic, population growth, optimization, voting theory, number theory, graph theory, relations, functions, probability, statistics, and finance. The use of mathematical software and calculators is required. See course syllabus for details. Credit may be received for only one of MATH 1301, MATH 1302, or MATH 1315.

MATH 1302. COLLEGE ALGEBRA. 3 Hours. (TCCN = MATH 1314)
This course is designed as preparation for higher level mathematics courses. Topics include the study of linear, quadratic, polynomial, rational, radical absolute value, logarithmic, and exponential functions, relations and inequalities; graphs, basic characteristics, and operations on functions; real and complex zeros of functions; graphing techniques; systems of equations and matrices. The use of mathematical software and calculators is required. See course syllabus for more details. Non-STEM (Science-Technology-Engineering-Mathematics) majors should enroll in MATH 1301, and Business majors should enroll in MATH 1315. Credit may be received for only one of MATH 1301, MATH 1302, or MATH 1315.

MATH 1303. TRIGONOMETRY. 3 Hours. (TCCN = MATH 1316)
Trigonometric functions, radian measure, solution of triangles, graphs of trigonometric functions, trigonometric identities and equations, and complex numbers. This course is not intended for Science majors. The Math Placement Test (MPT) is required to register for this course. See http://www.uta.edu/math/pages/main/mpt.htm for test details. Prerequisite: C or better in MATH 1301, MATH 1302, MATH 1308, MATH 1315, or a qualifying score on Math Placement Test.

MATH 1308. ELEMENTARY STATISTICAL ANALYSIS. 3 Hours. (TCCN = MATH 1342)
Topics may include collection, analysis, presentation, and interpretation of data. Analysis includes descriptive statistics, probability, relationships between variables and graphs, elementary statistical models, hypothesis testing, inference, estimation, correlation, regression and confidence intervals. The use of mathematical software and calculators is required. See course syllabus for details.

MATH 1313. LIBERAL ARTS HONORS MATHEMATICS. 3 Hours.
Topics include the development of the real number system, different orders of infinity, the idea of convergence and how this led to the development of calculus, the concept of a mathematical proof, the conceptual foundations of topology, networks, and knot theory, and modern applications of mathematics to the sciences.

MATH 1315. COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS. 3 Hours. (TCCN = MATH 1324)
This course covers material in a traditional algebra course with emphasis on business and financial application. The application of common algebraic functions including polynomial, exponential, logarithmic, and rational, to problems in business, economics, and the social sciences are addressed. Additional topics include systems of linear equations and inequalities, linear programming, mathematics of finance, elements of matrix algebra, logic and probability including expected value. Credit may be received for only one of MATH 1301, MATH 1302, or MATH 1315.

MATH 1316. MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS. 3 Hours. (TCCN = MATH 1325)
This course is the basic study of limits and continuity, differentiation, optimization and graphing, and integration of elementary functions, with emphasis on mathematical tools and applications in business, economics, and social sciences. This course is not a substitute for MATH 1426 Calculus I. Prerequisite: C or better in MATH 1301 or MATH 1302, or a qualifying score on Math Placement Test, or student group.

MATH 1324. ALGEBRA AND TRIGONOMETRY. 3 Hours. (TCCN = MATH 2412)
A fast-paced summary study of the topics of MATH 1302 and MATH 1303. This course is not intended for calculus track students; those students should take MATH 1421. Credit cannot be received for MATH 1324 and MATH 1302 or MATH 1303.

MATH 1325. ANALYTIC GEOMETRY. 3 Hours. (TCCN = MATH 1348)
Vectors, lines in two dimensions, circles, conics, transformation of coordinates, polar coordinates, parametric equations, and the solid analytic geometry of vectors, lines, planes, cylinders, spherical and cylindrical coordinates. Prerequisite: C or better in MATH 1301 or MATH 1302 or MATH 1315 or MATH 1324, or a qualifying score on Math Placement Test.

MATH 1327. ARCHITECTURAL CALCULUS WITH ANALYTIC GEOMETRY. 3 Hours.
Topics from Analytic Geometry and Calculus including conics, polar coordinates, parametric equations; concepts of limit, continuity, differentiation and integration; applications of these concepts. This course will not substitute for MATH 1426. Prerequisite: Major or intended major in Architecture or Interior Design and C or better in MATH 1303 or MATH 1421, or a qualifying score on Math Placement Test, or student group.

MATH 1330. ARITHMETICAL PROBLEM SOLVING. 3 Hours.
This is a course in small and large group problem solving, with emphasis on reasoning and writing. Topics include problem solving, sets, operations and relations, arithmetic, place value and bases, propositional logic, fractions, number theory, number systems and estimation. Prerequisite: C or better in MATH 1302 or a qualifying score on the Math Placement Test, and enrollment as an education major.
MATH 1331. GEOMETRICAL INFERENCE AND REASONING. 3 Hours.
A discovery-oriented exploration of two-and three-dimensional geometry, with emphasis on reasoning and writing. Topics include constructions, polygons, tessellations, polyhedra, symmetry, rigid motions in the plane, measurement, and discovering theorems. Prerequisite: C or better in MATH 1330 and enrollment as an education major.

MATH 1332. FUNCTIONS, DATA, AND APPLICATIONS. 3 Hours.
An exploration of interpreting data, using cooperative groups, spreadsheets and mathematical models. Topics include graphs, applications to economics and natural sciences, function concepts, counting principles, and basic probability and statistics. Prerequisite: C or better in MATH 1330 and enrollment as an education major.

MATH 1402. COLLEGE ALGEBRA. 4 Hours.
This course is designed as preparation for higher level mathematics courses. Integrated review materials will be used to master targeted areas as students proceed through the course. Topics include foundational numeric and algebraic operations in addition to the study of linear, quadratic, polynomial, rational, radical absolute value, logarithmic, and exponential functions, relations and inequalities; graphs, basic characteristics, and operations on functions; real and complex zeros of functions; graphing techniques; systems of equations and matrices. The use of mathematical software and calculators is required. See course syllabus for more details. Non-STEM (Science-Technology-Engineering-Mathematics) majors should enroll in MATH 1301, and Business majors should enroll in MATH 1315. Credit may be received for only one of MATH 1301, MATH 1302, MATH 1402, or MATH 1315. Students may not co-enroll in MATH 1302 and MATH 1402.

MATH 1421. PREPARATION FOR CALCULUS. 4 Hours.
This course integrates and builds upon concepts and skills from college algebra and trigonometry that are essential to success in calculus. Problem solving activities form the basis for the establishment of these mathematical connections. Prerequisite: C or better in MATH 1301 or MATH 1302 or MATH 1315, or a qualifying score on Math Placement Test, or student group.

MATH 1426. CALCULUS I. 4 Hours. (TCCN = MATH 2413)
Concepts of limit, continuity, differentiation and integration; applications of these concepts. Prerequisite: A qualifying score on the Math Placement Test (MPT) is required to register for this course, or student group.

MATH 2326. CALCULUS III. 3 Hours. (TCCN = MATH 2315)
Vectors, dot product, cross product, planes, quadric surfaces, partial differentiation, multiple integrals (with applications), line integrals, Green's Theorem, surface integrals, Stokes' Theorem, divergence theorem. Prerequisite: C or better in MATH 2425 or HONR-SC 2425, or student group.

MATH 2330. FUNCTIONS AND MODELING. 3 Hours.
Students engage in explorations and lab activities designed to strengthen and expand their knowledge of the topics found in secondary mathematics. Students collect data and explore a variety of situations that can be modeled using linear, exponential, polynomial, and trigonometric functions. Activities are designed to have them take a second, deeper look at topics they should have been exposed to previously; illuminate the connections between secondary and college mathematics; illustrate good, as opposed to typically poor, sometimes counterproductive, uses of technology in teaching; illuminate the connections between various areas of mathematics; and engage them in serious (i.e., non-routine) problem solving, problem-based learning, and applications of mathematics. While there is some discussion of how the content relates to secondary mathematics instruction, the course primarily emphasizes mathematics content knowledge and content connections, as well as applications of the mathematics topics covered. This course is part of the UTeach program. Prerequisite: C or better in MATH 2425; C or better in SCIE 1201 or SCIE 1334 or concurrent enrollment.

MATH 2425. CALCULUS II. 4 Hours. (TCCN = MATH 2414)
Applications of integration, techniques of integration, parametric equations, polar coordinates, sequences, and series. Prerequisite: C or better in MATH 1426 or HONR-SC 1426, or student group.

MATH 3300. INTRODUCTION TO PROOFS. 3 Hours.
Techniques for constructing proofs for various propositions. The propositions chosen exhibit properties of functions, relations, sets, cardinality, and other ideas in mathematics. An axiomatic approach to some areas in mathematics. Oral presentations of proofs are required. Prerequisite: Math major or math intended major. C or better in MATH 2425 or HONR-SC 2425, or student group.

MATH 3301. FOUNDATIONS OF GEOMETRY. 3 Hours.
A development of the foundations of geometry. Prerequisite: C or better in MATH 2425 or HONR-SC 2425, or student group.

MATH 3302. MULTIVARIATE STATISTICAL METHODS. 3 Hours.
Topics in multivariate data analysis with applications in various areas of interest, including multiple regression, analysis of experimental designs, covariate adjustment, non-linear regression and the use of standard multivariate statistical packages. Offered as MATH 3302 and STATS 3302; credit will be granted in only one department. Prerequisite: C or better in MATH 3313 or STATS 3313 or MATH 3316 or STATS 3316 or MATH 3351 or BIOL 3351 or consent of the instructor.

MATH 3303. MATHEMATICAL GAME THEORY. 3 Hours.
Two-person zero-sum games, solving matrix games by linear programming, two-person non-zero sum games, noncooperative n-person games, Nash equilibrium points and refinements, cooperative n-person games, core, Shapley value, and other concepts of solution. Applications to cost allocation, fair division, and voting power. Prerequisite: C or better in MATH 3330 or MATH 3319, or consent of the instructor.

MATH 3304. LINEAR OPTIMIZATION APPLICATIONS. 3 Hours.
An introduction to basic methods of optimization with applications to optimal resource application, minimal cost allocation and interpersonal decision making in noncooperative and cooperative environments. Includes simplex method, duality, zero sum games, transportation and assignment. Prerequisite: C or better in MATH 3330 or MATH 3319.
MATH 3307. ELEMENTARY NUMBER THEORY. 3 Hours.
Various topics in elementary number theory. Divisibility, congruences, quadratic reciprocity, and multiplicative functions. Prerequisite: 2.0 or better in nine hours of college mathematics, or student group.

MATH 3313. INTRODUCTION TO PROBABILITY. 3 Hours.
Basic concepts in probability, random variables, probability distributions, functions of random variables, moment generating functions, central limit theorem and its role in statistics, joint probability functions and joint probability density functions, joint cumulative distribution functions, conditional and marginal probability distributions, covariance and correlation coefficients, transformation and order statistics. Offered as MATH 3313 and STATS 3313; credit will be granted in only one department. Prerequisite: C or better in MATH 2326, or student group.

MATH 3314. DISCRETE MATHEMATICS. 3 Hours.
An introduction into discrete structures. Propositional calculus, sets and operations, functions, induction, counting, relations and matrices, equivalences and partial orders, graphs and shortest path algorithms, trees and minimal spanning trees, tree traversal, elements of boolean algebra. Prerequisite: C or better in MATH 1426 or HONR-SC 1426, or student group.

MATH 3315. MATHEMATICAL MODELS. 3 Hours.
Methods for solving, by means of mathematics, problems which occur in other disciplines such as physics, engineering, biology, and economics. Basic mathematical tools are chosen from areas such as optimization, probability, differential equations, and computer-oriented mathematics. Problems arising in other disciplines or industrial applications are emphasized. Subject matter will depend on the instructor. Prerequisite: C or better in MATH 2326, or permission of instructor, or student group.

MATH 3316. STATISTICAL INFERENCE. 3 Hours.
A comprehensive study of basic data analysis, focused on reasoning process of statistical investigations from asking question and collecting data to analyzing data and drawing inferences. Topics include exploratory data analysis, sampling, sampling distribution, estimation, hypothesis tests, regression, and ANOVA, with an emphasis on applications of these techniques using statistical software. Offered as MATH 3316 and STATS 3316; credit will be granted in only one department. Prerequisite: C or better in 6 hours from the following: MATH 1302, MATH 1308, MATH 1322, MATH 1323, MATH 1330, MATH 1331, MATH 1332, MATH 1421, MATH 1426, MATH 2425, MATH 2326, MATH 3300, MATH 3307, MATH 3314, MATH 3319, or MATH 3330; HONR-SC 1426, HONR-SC 2425, or student group.

MATH 3318. DIFFERENTIAL EQUATIONS. 3 Hours.
Ordinary differential equations with emphasis on the solutions and analysis of first and higher order differential equations drawn from fields of physics, chemistry, geometry, and engineering. Prerequisite: C or better in MATH 2326 or concurrent registration, or student group.

MATH 3319. DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA. 3 Hours.
Introductory course with emphasis on solution techniques. Ordinary differential equations, vector spaces, linear transformations, matrix/vector algebra, eigenvectors, Laplace Transform, and systems of equations. Math majors will not receive credit for this course. Prerequisite: C or better in MATH 2326 or concurrent enrollment, or student group.

MATH 3321. ABSTRACT ALGEBRA I. 3 Hours.
Groups including Lagrange's Theorem, Cauchy's Theorem, the homomorphism theorems, and symmetric groups. Prerequisite: C or better in MATH 3300 and MATH 3330, or student group.

MATH 3330. INTRODUCTION TO LINEAR ALGEBRA AND VECTOR SPACES. 3 Hours.
Solving systems of linear equations by (reduced) row-echelon form and matrix inversion, matrix operations, linear transformations, projections, characterizing invertibility, determinants, bases, change of basis, real n-dimensional space and its geometric structure, subspaces, kernel and image of a linear transformation, application to abstract vector spaces of arbitrary dimension, dot product, orthogonality, Gram-Schmidt process, eigenvalues and eigenvectors, characteristic polynomial, diagonalization, symmetric matrices, and principal-axis theorem. Prerequisite: C or better in MATH 2425, or student group.

MATH 3335. ANALYSIS I. 3 Hours.
Real numbers, sequences, series, limits of functions, continuity. Prerequisite: Grade of C or better in both MATH 2326 and MATH 3300, or student group.

MATH 3345. NUMERICAL ANALYSIS AND COMPUTER APPLICATIONS. 3 Hours.
Numerical solutions of nonlinear equations, numerical integration and differentiation, polynomial interpolation, solutions of linear systems, and an introduction to spline functions. Prerequisite: C or better in MATH 2326, and C or better in one of MATH 3330 or MATH 3319, or student group.

MATH 3351. PROBABILITY AND RANDOM PROCESSES IN BIOLOGY. 3 Hours.
Introduction to random processes arising in biological modeling. Topics include introduction to probability, Poisson processes, birth-death processes, Markov chains, and Markov processes. Course taught as BIOL 3351 and MATH 3351; credit will be granted only once. Prerequisite: C or better in BIOL 3350 or MATH 3350 or consent of the instructor.

MATH 4093. Undergraduate Research. 0 Hours.
Undergraduate research experiences under supervision of faculty. Students are expected to disseminate research findings by poster or oral presentations in meetings or conferences. Students are also expected to participate in other activities as directed by the grant-funded Research Program Director.
MATH 4150. SEMINAR IN MATHEMATICAL BIOLOGY. 1 Hour.
Formulation and definition of interdisciplinary research problems in Mathematical Biology, the formulation and execution of strategies of solution, and the presentation of results. Research under faculty supervision and mentorship involving collaboration within a small group. Prerequisite: Consent of the instructor.

MATH 4180. ORAL COMMUNICATION OF MATHEMATICS. 1 Hour.
This course trains students in giving effective oral presentations of mathematics and topics involving mathematics. Students will give presentations to the class and evaluate the presentations of their classmates. Topics may be chosen from mathematics and science journals at a level suitable for undergraduates, from books and articles on the history and development of mathematics, or from previous course material.

MATH 4191. SPECIAL TOPICS IN MATHEMATICS. 1 Hour.
Special topics in mathematics are assigned to individuals or small groups. Faculty members closely supervise the projects and assign library reference material. Small groups will hold seminars at suitable intervals. May be repeated for credit. Prerequisite: senior standing and written permission of the instructor and department chair.

MATH 4291. SPECIAL TOPICS IN MATHEMATICS. 2 Hours.
Special topics in mathematics are assigned to individuals or small groups. Faculty members closely supervise the projects and assign library reference material. Small groups will hold seminars at suitable intervals. May be repeated for credit. Prerequisite: senior standing and written permission of the instructor & department chair.

MATH 4303. INTRODUCTION TO TOPOLOGY. 3 Hours.
A first course in topology from the axiomatic point of view. Prerequisite: C or better in MATH 3335.

MATH 4311. STOCHASTIC MODELS AND SIMULATION. 3 Hours.
A study of processes, whose outcomes are governed by chance, through a combination of lectures and computer lab sessions. Experiments include random number generation, coin tossing and other games of chance, random walks, Markov Chains, Poisson processes, birth-death processes, branching processes, and Brownian Motion. A foundation for modeling random phenomena in sciences, engineering and business. Prerequisite: C or better in MATH 2326 and knowledge of basic probability (MATH 3313/STATS 3313 or MATH 3351/BIOL 3351 or equivalent), or consent of instructor, or student group.

MATH 4312. ACTUARIAL RISK ANALYSIS. 3 Hours.
Fundamentals of actuarial science concerning risk theory based on probability. Topics include: utility theory, principles of premium calculations, collective and individual risk models, ruin theory, classical Lundberg's Model. Prerequisite: C or better in MATH 3313/STATS 3313.

MATH 4313. MATHEMATICAL STATISTICS. 3 Hours.
A continuation of MATH 3313. Random sampling and sampling distributions, estimation of unknown parameters and main properties of estimators, confidence intervals for unknown parameters, testing of hypotheses. Prerequisite: C or better in MATH 3313 or STATS 3313.

MATH 4314. ADVANCED DISCRETE MATHEMATICS. 3 Hours.
Finite automata, Turing machines, formal languages, graph theory, combinatorial optimization, complexity of algorithms, P versus NP, and decidable versus undecidable problems. Prerequisite: C or better in MATH 3314.

MATH 4320. ADVANCED DIFFERENTIAL EQUATIONS. 3 Hours.
The existence and properties of solution of differential equations. Prerequisite: C or better in MATH 3318 or MATH 3319.

MATH 4321. ABSTRACT ALGEBRA II. 3 Hours.
Rings and field theory, including polynomial rings and field extensions. Prerequisite: C or better in MATH 3321.

MATH 4322. INTRODUCTION TO COMPLEX VARIABLES. 3 Hours.
An introduction to the theory of functions of a complex variable and also an introduction to applications including uses of the residue theory, contour integration and conformal mapping. Prerequisite: C or better in MATH 2326, or student group.

MATH 4324. INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS. 3 Hours.
Methods of solutions of selected elliptic, parabolic, and hyperbolic partial differential equations with reference to physical applications. Prerequisite: C or better in MATH 3318 or MATH 3319.

MATH 4330. ADVANCED LINEAR ALGEBRA. 3 Hours.
Eigenvalues, eigenvectors, generalized eigenvectors, minimal/characteristic polynomial, Jordan normal/canonical form, companion matrix and rational canonical form, inner products, adjoint of a linear map, positive-definite operators and isometries, polar decomposition and singular-value decomposition, exponential of a matrix and applications to differential equations, least squares and curve fitting, bilinear and quadratic forms, dual spaces and transpose of a matrix, quotient spaces, multilinear maps, tensor products. Prerequisite: Math 3330 or consent of instructor.

MATH 4334. ADVANCED MULTIVARIABLE CALCULUS. 3 Hours.
Topics include properties of limits of mappings, continuity of mappings, derivatives of mappings, and integrals of mappings from n-dimensional Euclidean space to m-dimensional Euclidean space. Prerequisite: C or better in MATH 3335, and MATH 3330.

MATH 4335. ANALYSIS II. 3 Hours.
Differentiation, integration, and selected topics in sequences and series of functions and metric spaces. Prerequisite: C or better in MATH 3335.

MATH 4345. NUMERICAL ANALYSIS & COMPUTER APPLICATIONS II. 3 Hours.
Numerical solutions for ordinary differential equations, boundary value problems, minimizations of multivariate functions, and methods of least squares. Prerequisite: C or better in MATH 3345.
MATH 4350. PRECALCULUS FOR MID-LEVEL MATHEMATICS TEACHERS. 3 Hours.
This course serves to bridge the gap between algebra and calculus for middle level teachers. It will develop a firm understanding of the concept of function, how to graphically represent various functions, analyze their behavior and create new functions from old. Functions will be used to model real-life situations. The course will focus on the essential elements of precalculus, as given by the TEKS. It will develop the foundations for functions and explore functions as a unifying theme. This includes transformations, inverses, and solving equations. These foundational ideas will be explored and applied to specific functions, including exponential, logarithmic, power, polynomial, rational, and trigonometric functions. There will be an emphasis on multiple representations of mathematical ideas: verbal, concrete, pictorial, tabular, symbolic and graphical. Throughout, the mathematical connections between precalculus and school mathematics will be highlighted. Prerequisite: C or better in MATH 1302, MATH 1308, MATH 1330, MATH 1331 and MATH 1332. This course does not count toward a degree in mathematics.

MATH 4351. CALCULUS FOR MID-LEVEL MATHEMATICS TEACHERS. 3 Hours.
This course serves to introduce the basic concepts of calculus to middle level teachers. The primary goal is to help teachers develop a fundamental understanding of the key mathematical ideas in calculus in order to broaden their mathematical perspective and gain insight into the topics in the middle level curriculum which are related and foundational to its development. Participants will develop conceptual knowledge of the processes of differentiation and integration, and understanding of their applications and an understanding of the relationship between the two processes. Prerequisite: C or better in MATH 4350. This course does not count toward a degree in mathematics.

MATH 4381. MATHEMATICS RESEARCH. 3 Hours.
Formulation and definition of research problems, the formulation and execution of strategies of solution, and the presentation of results. Prerequisite: consent of instructor. Recommendation by other faculty encouraged.

MATH 4391. SPECIAL TOPICS IN MATHEMATICS. 3 Hours.
Special topics in mathematics are assigned to individuals or small groups. Faculty members closely supervise the projects and assign library reference material. Small groups will hold seminars at suitable intervals. May be repeated for credit. Prerequisite: senior standing and written permission of the instructor & department chair.

MATH 4392. ADVANCED TOPICS IN MATHEMATICS. 3 Hours.
Varies from semester to semester. New developments in mathematics, in-depth study of a topic not covered in other courses, or a special faculty expertise made available to undergraduates. May be repeated for credit as topic varies. Prerequisite: permission of instructor.

MATH 4393. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year the student must complete a thesis or a project under the direction of a faculty member in the math department. Prerequisite: enrollment in the University Honors College and written permission of the instructor and chair.

MATH 4394. UNDERGRADUATE RESEARCH EXPERIENCES. 3 Hours.
Research under faculty supervision and mentorship involving collaboration within a small group. The topic varies from semester to semester, is determined by the faculty teaching the course, and is announced in advance. The course promotes active learning based on inquiry, development of higher-order thinking skills, and meaningful scientific research. Prerequisite: consent of instructor.

MATH 4390. INTERNSHIP FOR MATHEMATICAL SCIENCES. 1 Hour.
Practical experiences in the mathematical sciences. May be repeated for credit when the content changes. Prerequisite: Successful completion of 18 graduate credit hours in the program of study and in good academic standing (i.e. graduate GPA 3.0/4.0 or higher).

MATH 4391. SEMINAR FOR TEACHING ASSISTANTS. 1 Hour.
This course is mandatory for all mathematics graduate teaching assistants. Students will be instructed on classroom procedures and effective teaching strategies and will be required to deliver teaching demonstrations under the supervision of mathematics faculty. The purpose is to enhance students’ capacity to facilitate mathematics learning in a variety of settings. Admittance to this course is restricted to Math TAs.

MATH 5300. INTRODUCTION TO SCIENTIFIC COMPUTING. 3 Hours.
Introduction to scientific computing utilizing algorithmic languages and operating environment such as Fortran, MATLAB, C, and C++ and UNIX (LINUX) operating system. Prerequisite: consent of the instructor.

MATH 5302. FUNDAMENTALS OF MATHEMATICAL SCIENCES I. 3 Hours.
Matrices and operators, linear spaces, multivariable calculus, dynamical systems, applications. Prerequisites: MATH 3318 and MATH 3330 or consent of the instructor.

MATH 5303. FUNDAMENTALS OF MATHEMATICAL SCIENCES II. 3 Hours.
Wave propagation, potential theory, complex variables, transform techniques, perturbation techniques, diffusion, applications. Prerequisite: MATH 5302 or consent of the instructor.

MATH 5304. GENERAL TOPOLOGY. 3 Hours.
Introduction to fundamentals of general topology. Topics include product spaces, the Tychonoff theorem, Tietzes Extension theorem, and metrization theorems. Prerequisite: MATH 4304 or MATH 4335.

MATH 5305. STATISTICAL METHODS. 3 Hours.
Topics include descriptive statistics, numeracy, and report writing; basic principles of experimental design and analysis; regression analysis; data analysis using the SAS package. Prerequisite: consent of the instructor.
MATH 5307. MATHEMATICAL ANALYSIS I. 3 Hours.
Elements of topology and the real number system, sequences in metric spaces, limits and continuity of functions, differentiation, the Riemann integral, infinite series, and sequences and series of functions. Prerequisite: MATH 4335 or consent of Graduate Advisor.

MATH 5308. MATHEMATICAL ANALYSIS II. 3 Hours.
Analysis in R^n, limits, continuity, Jacobian, extremum problems, multiple integrals, sequences and series of functions, Lebesgue integral. Prerequisite: MATH 5307 or consent of Graduate Advisor.

MATH 5310. MATHEMATICAL GAME THEORY. 3 Hours.

MATH 5311. APPLIED PROBABILITY AND STOCHASTIC PROCESSES. 3 Hours.
Topics include conditional expectations, law of large numbers and central limit theorem, stochastic processes, including Poisson, renewal, birth-death, and Brownian motion. Prerequisite: MATH 3313 or equivalent.

MATH 5312. MATHEMATICAL STATISTICS I. 3 Hours.
Random variables and their expectations, some special distributions, moment generating functions, transformations of bivariate random variables, sampling distribution of statistics, Central Limit Theorem, confidence intervals, maximum likelihood estimation, introduction to hypothesis testing, maximum likelihood tests. Prerequisite: MATH 3335 or consent of instructor.

MATH 5313. MATHEMATICAL STATISTICS II. 3 Hours.
Multivariate distributions, consistency and limiting distributions, Rao-Cramer lower bound and efficiency, sufficiency and completeness, most powerful tests, uniformly most powerful tests, likelihood ratio test, the sequential probability ratio test, minimax and classification procedures. Prerequisite: MATH 5312/STATS 5312.

MATH 5314. EXPERIMENTAL DESIGN. 3 Hours.
This course covers the classical theory and methods of experimental design, including randomization, blocking, one-way and factorial treatment structures, confounding, statistical models, analysis of variance tables and multiple comparisons procedures. Prerequisite: MATH 5305/STATS 5305 or MATH 5355/STATS 5355 or permission of instructor.

MATH 5315. GRAPH THEORY. 3 Hours.

MATH 5316. COMBINATORIAL OPTIMIZATION. 3 Hours.

MATH 5317. REAL ANALYSIS. 3 Hours.
Sigma-fields, measures, measurable functions, convergence in measure and almost everywhere, integration, Fatou's Lemma, Lebesgue-dominated convergence, signed measures, Radon-Nikodym Theorem, product measures, Fubini's Theorem. Prerequisite: Math 5307 or consent of the Graduate Advisor.

MATH 5318. FUNDAMENTALS OF STOCHASTIC ANALYSIS. 3 Hours.
General properties of stochastic processes, processes with independent increments, martingales, limit theorems including invariance principle, Markov processes, stochastic integral, stochastic differential. Prerequisite: Math 5317 or consent of the instructor.

MATH 5319. PROBABILITY THEORY. 3 Hours.
Probability spaces, random variables, filtrations, conditional expectations, martingales, strong law of large numbers, ergodic theorem, central limit theorem, Brownian motion and its properties. Prerequisite: Math 5317.

MATH 5320. ORDINARY DIFFERENTIAL EQUATIONS. 3 Hours.

MATH 5321. APPLIED PARTIAL DIFFERENTIAL EQUATIONS. 3 Hours.
General first order equations. Basic linear theory for elliptic, hyperbolic, and parabolic second order equations, including existence and uniqueness for initial and boundary value problems. Prerequisites: MATH 5307 and MATH 5333.

MATH 5322. COMPLEX VARIABLES I. 3 Hours.
Fundamental theory of analytic functions, residues, conformal mapping and applications. Prerequisite: MATH 5307.

MATH 5325. ALGEBRAIC NUMBER THEORY. 3 Hours.
Field extensions, number fields and number rings, ramification theory, class groups, elliptic curves and their group structure, applications to Fermat's last theorem. Prerequisite: MATH 3321.

MATH 5326. ALGEBRAIC TOPOLOGY. 3 Hours.
Basics of topology, Fundamental groups, covering spaces, VanKampen's Theorem, categories and functors, singular homology, relative homology, Mayer-Vietoris sequence, cohomology, cup products, the cohomology ring of a space, CW complexes. Prerequisites: MATH 3321, MATH 3335.
MATH 5327. FUNCTIONAL ANALYSIS I. 3 Hours.
Introduction to Hilbert and Banach spaces: Hahn-Banach, Banach-Steinhaus, and closed graph theorems. Riesz representation theorem and bounded linear operators in Hilbert space. Prerequisite: MATH 5317 or consent of the instructor.

MATH 5328. FUNCTIONAL ANALYSIS II. 3 Hours.
The theory of distributions and Sobolev spaces, with applications to differential equations. Compact operators and Fredholm theory. Spectral theory for unbounded operators. Prerequisite: MATH 5327.

MATH 5329. HOMOLOGICAL ALGEBRA. 3 Hours.
Projective and injective modules, projective and injective resolutions, Hom and tensor, the language of category theory, derived functors, Ext and Tor, complexes.

MATH 5330. ALGEBRAIC GEOMETRY. 3 Hours.
Theory of ideals in polynomial rings, Nullstellensatz, Hilbert's basis theorem, computation in polynomial rings, affine and projective varieties, singular and smooth points on varieties. Prerequisite: MATH 4321.

MATH 5331. ABSTRACT ALGEBRA I. 3 Hours.
Fundamental topics on groups, rings and modules that may include: abelian groups; dihedral groups; groups of permutations; normal subgroups; quotient groups; group actions; Lagrange's Theorem; Cayley's Theorem; Sylow's Theorems; factorization in commutative rings; localization in commutative rings; quotient rings; quotient modules; isomorphism theorems. Prerequisite: permission from instructor.

MATH 5332. ABSTRACT ALGEBRA II. 3 Hours.
Fundamental topics that may include: modules; chain conditions, noetherian rings and modules, artinian rings; Wedderburn's Theorem; localization with Ore conditions; Maschke's Theorem; special classes of rings such as regular algebras, Cohen-Macaulay rings, Gorenstein rings, universal enveloping algebras. Prerequisite: MATH 5331 or consent of instructor.

MATH 5333. LINEAR ALGEBRA AND MATRICES. 3 Hours.
Vector spaces, their sums, linear (in)dependence, bases, linear maps and their matrices, change of basis, inner-products, adjoints, diagonalization, eigenvectors and generalized eigenvectors, eigenvalues, Jordan form, characteristic and minimal polynomials, dual vector spaces, bilinear and quadratic forms. Prerequisite: MATH 3330 or consent of instructor.

MATH 5334. DIFFERENTIAL GEOMETRY. 3 Hours.
Introduction to the theory of curves and surfaces in three dimensional Euclidean space. Prerequisite: MATH 4334 or MATH 4335.

MATH 5336. CONCEPTS AND TECHNIQUES IN NUMBER THEORY. 3 Hours.
Topics include mathematical induction, fundamental theorem or arithmetic, inequalities, special sequences and sums, divisibility properties, greatest common divisor, division and Euclidean algorithm, properties of congruence and Diophantine equations.

MATH 5337. CONCEPTS AND TECHNIQUES IN CALCULUS. 3 Hours.
Topics studied include limits, continuity, differentiation, integration, numerical approximations, applications and Taylor series.

MATH 5338. NUMERICAL ANALYSIS I. 3 Hours.
Solution of equations including linear and nonlinear systems, interpolation and approximation, spline, numerical differentiation and quadrature. Prerequisite: MATH 2425 or consent of the instructor.

MATH 5339. NUMERICAL ANALYSIS II. 3 Hours.
Rigorous treatment of numerical aspects of linear algebra and numerical solution of ordinary differential equations, boundary value problems, introduction to numerical solution of partial differential equations. Prerequisite: MATH 5338 or consent of the instructor.

MATH 5340. DISCRETE MATHEMATICS FOR PROBLEM SOLVING. 3 Hours.
Topics may include functions, mathematical induction, principles of counting, combinatorics, sequences and recurrence relations, finite graph theory, and elementary game theory.

MATH 5341. MODERN GEOMETRY. 3 Hours.
Topics include Euclidean and non-Euclidean geometries with an emphasis on comparing intrinsic and extrinsic characteristics of geodesics and the resulting geometrical implications.

MATH 5342. CONCEPTS AND TECHNIQUES IN ALGEBRA. 3 Hours.
A study of algebra as described in the K-12 research literature and connections to algebraic structures. Topics include algebra as the study of functions and function relationships, algebra as the study of multiple representations with an emphasis on graphs, tables, and formulae, algebra as generalized arithmetic and quantitative reasoning, and algebra as a language.

MATH 5343. CONCEPTS AND TECHNIQUES IN PROBABILITY AND STATISTICS. 3 Hours.
Consideration of (1) exploring data: descriptive statistics of situations involving one and two variables; (2) anticipating patterns: probability and simulation; (3) design of experiments and planning a study; (4) statistical inference: confirming models. Use of a graphing calculator and other appropriate technology.

MATH 5344. MATHEMATICS-SPECIFIC TECHNOLOGIES. 3 Hours.
Focus on use of current mathematics-specific technologies for enhancing mathematical understanding and mathematics teaching. May include use of Geometer's Sketchpad, Fathom, graphing calculators and computer algebra systems.
MATH 5345. HISTORICAL APPROACH TO REAL ANALYSIS. 3 Hours.
A historical treatment of real analysis that explores motivations for the early definitions and theorems in analysis. Topics may include Fourier's introduction of trigonometric series and the issues it created for mathematicians of the early 19th century, Cauchy's efforts toward establishing a firm foundation for calculus, and Dirichlet's proof of the validity of the Fourier series expansion. Prerequisite: MATH 5337 or consent of the instructor.

MATH 5346. CONCEPTS AND TECHNIQUES IN PROBLEM SOLVING. 3 Hours.
A study of the application of various heuristics and general problem strategies in mathematics, with application to the teaching and learning of secondary school and college-level mathematics. Topics include analyzing, classifying, and modifying tasks, assessment of problem solving, and implementing problem solving in the classroom. Assignments require interaction in secondary school or college field settings.

MATH 5347. CONCEPTS AND TECHNIQUES IN MATHEMATICAL MODELING WITH APPLICATIONS. 3 Hours.
Topics studied include algebraic, graphical, geometrical and numerical techniques to model and solve applied problems.

MATH 5348. ADVANCED ALGEBRA IN SECONDARY SCHOOL MATHEMATICS. 3 Hours.
Major concepts of second-year algebra applied to the teaching and learning of secondary school mathematics. Topics include relations, algebraic, tabular, verbal and geometric representations of functions, transformations, including applications involving systems of equations and inequalities.

MATH 5350. APPLIED MATHEMATICS I. 3 Hours.
Development of models arising in the natural sciences and in engineering. Emphasis will be on the mathematical techniques and theory needed to analyze such models; these include aspects of the theory of differential and integral equations, boundary value problems, theory of distributions and transforms. Prerequisites: MATH 5307 and MATH 5333.

MATH 5351. APPLIED MATHEMATICS II. 3 Hours.
Continuation of MATH 5350; models arising in the physical sciences whose analysis includes such topics as the theory of operators in a Hilbert space, variational principles, branching theory, perturbation and stability analysis. Prerequisite: MATH 5350.

MATH 5352. CONCEPTS AND TECHNIQUES IN PRECALCULUS. 3 Hours.
Topics include functions (transcendental, inverse, parametric, polar, transformations), asymptotic behavior, conics, sequences, complex numbers.

MATH 5353. APPLIED LINEAR MODELS. 3 Hours.
The course covers, at an operational level, three topics: 1) the univariate linear model, including a self-contained review of the relevant distribution theory, basic inference methods, several parameterizations for experimental design and covariate-adjustment models and applications, and power calculation; 2) the multivariate linear model, including basic inference (e.g. the four forms of test criteria and simultaneous methods), applications to repeated measures experiments and power calculation; and 3) the univariate mixed model, including a discussion of the likelihood function and its maximization, approximate likelihood inference, and applications to complex experimental designs, missing data, unbalanced data, time series observations, variance component estimation, random effects estimation, power calculation and a comparison of the mixed model's capabilities relative to those of the classical multivariate model. Knowledge of the SAS package is required. Prerequisite: MATH 5358/STATS 5358 (Regression Analysis) or equivalent.

MATH 5354. CATEGORICAL DATA ANALYSIS. 3 Hours.
This course covers classical methods for analyzing categorical data from a variety of response/factor structures (univariate or multivariate responses, with or without multivariate factors), based on several different statistical rationales (weighted least squares, maximum likelihood and randomization-based). Included are logistic regression, multiple logit analysis, mean scores analysis, observer agreement analysis, association measures, methods for complex experimental designs with categorical responses and Poisson regression. The classical log-linear model for the association structure of multivariate responses is briefly reviewed. Randomization-based inference (e.g. Mantel-Haenzel) is discussed as well. The necessary distribution theory (multinomial, asymptotics of weighted least squares and maximum likelihood) are discussed at an operational level. Knowledge of the SAS package is required. Prerequisite: MATH 5358/STATS 5358 (Regression Analysis) or equivalent.

MATH 5355. STATISTICAL THEORY FOR RESEARCH WORKERS. 3 Hours.
Designed for graduate students not majoring in mathematics. Topics include basic probability theory, distributions of random variables, point estimation, interval estimation, testing hypotheses, regression, and an introduction to analysis of variance. Graduate credit not given to math majors. Prerequisite: calculus MATH 1426/MATH 2425/MATH 2326 or permission of instructor.

MATH 5356. APPLIED MULTIVARIATE STATISTICAL ANALYSIS. 3 Hours.
Statistical analysis for data collected in several variables, topics including sampling from multivariate normal distribution, Hotelling's T^2, multivariate analysis of variance, discriminant analysis, principal components, and factor analysis. Prerequisite: MATH 5312/STATS 5312 or consent of instructor.

MATH 5357. SAMPLE SURVEYS. 3 Hours.
A comprehensive account of sampling theory and methods, illustrations to show methodology and practice, simple random sampling, stratified random sample, ratio estimates, regression estimates, systematic sampling, cluster sampling, and nonsampling errors. Prerequisite: MATH 5312/STATS 5312 or consent of instructor.

MATH 5358. REGRESSION ANALYSIS. 3 Hours.
A comprehensive course including multiple linear regression, non-linear regression and logistic regression. Emphasis is on modeling, inference, diagnostics and application to real data sets. The course begins by developing a toolbox of methods via a sequence of guided homework assignments. It culminates with projects based on consulting-level data analysis problems involving stratification, covariate adjustment and messy data sets. Some knowledge of the SAS package is required. Prerequisites: Math 5312/STATS 5312 or Math 5305/STATS 5305 with a B or better or permission of the instructor.
MATH 5359. SURVIVAL ANALYSIS. 3 Hours.
This course covers analysis of lifetime data with applications in engineering and biomedical research. Topics may include survival function, hazard function, cumulative hazard function, parametric distributions to model lifetime data, censoring, Kaplan-Meier estimator, testing for survival times for two or more groups, Cox proportional hazards model (both fixed and time dependent covariate), parametric regression models, regression diagnostics, accelerated failure time models, sample size determination, extensive use of R statistical software. Prerequisites: MATH 5305/STATS 5305 or MATH 5312/STATS 5312 or permission of instructor.

MATH 5361. APPLIED CALCULUS OF VARIATION. 3 Hours.
Functionals, variation, extremization, Euler's equation, direct and indirect approximation methods; applications to mechanics and control theory. Prerequisite: MATH 5302.

MATH 5362. MATHEMATICS OF LINEAR PROGRAMMING. 3 Hours.

MATH 5363. OSCILLATIONS AND WAVES. 3 Hours.
Development of methods and results related to phenomena in nature that exhibit oscillatory motion; mathematical techniques include Fourier series, ordinary and partial differential equations, and the theory of almost periodic functions. Prerequisite: MATH 3318.

MATH 5364. INTRODUCTION TO MATHEMATICAL CONTROL THEORY. 3 Hours.
Systems in science, engineering, and economics and their mathematical description by means of functional equations (ordinary, partial, integral, delay-type). Basic properties of various classes of systems: observability, controllability, stability, and oscillating systems; optimal control problems and applications. Prerequisite: MATH 3318 or MATH 4320.

MATH 5365. BIOMATHEMATICS. 3 Hours.
Mathematical techniques used in modeling such as perturbation theory, dimensional analysis, Fourier analysis, and differential equations. Applications to morphogenetics, population dynamics, compartmental systems, and chemical kinetics.

MATH 5366. INTRODUCTION TO NEURAL AND COGNITIVE MODELING. 3 Hours.
Principles of neural network modeling; application of these principles to the simulation of cognitive processes in both brains and machines; models of associative learning, pattern recognition, and classification. Prerequisite: consent of instructor.

MATH 5370. PROBLEM SOLVING IN K-8 MATHEMATICS. 3 Hours.
A study of the nature and aspects of problem solving in mathematics, with application to the teaching and learning of K-8 mathematics. Topics include deconstructing and modifying tasks, assessment of problem solving, and the roles of representation, conjecture & proof, and technology in problem solving. Assignments require interaction in K-8 field settings. Prerequisite: graduate standing.

MATH 5371. APPLIED NUMERICAL LINEAR ALGEBRA. 3 Hours.
Numerical solutions of linear algebraic systems, least squares problems, and eigenvalue problems; LU and QR decompositions, Schur and Singular Value decompositions, Gaussian elimination, QR algorithm, and Krylov subspace iterations for large and sparse linear algebra problems. Prerequisites: MATH 3330 or consent of the instructor.

MATH 5372. OPTIMIZATION METHODS & NUMERICAL SOLUTIONS OF NONLINEAR EQUATIONS. 3 Hours.
Unconstrained and constrained optimization, solutions of nonlinear system of equations; Newton and quasi-Newton methods, secant methods and variations, nonlinear least squares problems. Prerequisite: consent of the instructor.

MATH 5373. NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS. 3 Hours.
Numerical methods for approximating solutions of initial value problems, boundary value problems, including linear multistep methods, Runge-Kutta methods, shooting methods. Prerequisite: MATH 5300, MATH 3319 or consent of instructor.

MATH 5374. NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS. 3 Hours.
Numerical methods for elliptic, parabolic, hyperbolic, mixed, and systems of partial differential equations; finite difference methods, finite element methods, spectral methods. Prerequisite: MATH 5373 or consent of instructor.

MATH 5375. CONSTRUCTING WHOLE NUMBER AND OPERATIONS IN K-8 MATHEMATICS. 3 Hours.
A study of the interaction between the structure of place-value numeration systems and the nature of the four arithmetic operations. The development of traditional and alternative computational arithmetic algorithms from conceptual and concrete models for operations, viewed through the lens of alternative numeration systems and research on children's mathematical thinking. Assignments require interaction in K-8 field settings. Prerequisite: graduate standing.

MATH 5376. CONSTRUCTING RATIONAL NUMBER AND OPERATIONS IN K-8 MATH. 3 Hours.
The meanings and representations of rational numbers, and the development of computations on rational numbers from algorithms for whole numbers, including concrete models for operations on fractions and decimals. Discussion of research on the learning and teaching of operations on rational numbers. Also, divisibility tests and factoring. Assignments require interaction in K-8 field settings. Prerequisite: MATH 5375.

MATH 5377. ALGEBRAIC THINKING IN K-8 MATHEMATICS. 3 Hours.
A study of the practice of making and justifying generalizations in K-8 mathematics, including field properties of operations, modular arithmetic (with applications to odd/even), relations and equivalence relations, the introduction and use of variables and unknowns, and the influence of representations on the form of mathematical arguments. Assignments require interaction in K-8 field settings. Prerequisite: MATH 5375.
MATH 5378. GEOMETRY CONCEPTS IN K-8 MATHEMATICS. 3 Hours.
Major concepts of geometry applied to the teaching and learning of K-8 mathematics. Topics include dimension, development of definitions, meanings of angle, geometric comparison relations, notions of center, and non-Euclidean geometries. Assignments require interaction in K-8 field settings. Prerequisite: graduate standing.

MATH 5379. MEASUREMENT CONCEPTS IN K-8 MATHEMATICS. 3 Hours.
The development of measurement concepts as applied to the teaching and learning of K-8 mathematics. Topics include the development and properties of standard and nonstandard units, notions of size, decomposing space, relationships between boundaries and interiors, the algebra of units, measuring time, and notions of heaviness. Assignments require interaction in K-8 field settings. Prerequisite: graduate standing.

MATH 5380. SEMINAR. 3 Hours.
Current topics in mathematics, may be repeated for credit twice. Prerequisite: consent of instructor.

MATH 5391. SPECIAL TOPICS IN MATHEMATICS. 3 Hours.
Topics in mathematics assigned individual students or small groups. Faculty members closely supervise the students in their research and study. In areas where there are only three hours offered, the special topics may be used by students to continue their study in the same area. Graded P/F/R. Prerequisite: permission of instructor.

MATH 5392. SELECTED TOPICS IN MATHEMATICS. 3 Hours.
May vary from semester to semester depending upon need and interest of the students. May be repeated for credit. Prerequisite: permission of Graduate Advisor.

MATH 5395. SPECIAL PROJECT. 3 Hours.
Graded P/F/R. Prerequisite: permission of Graduate Advisor.

MATH 5398. THESIS. 3 Hours.
MATH 5398 Graded R/F only; MATH 5698 graded P/F/R. Prerequisite: permission of Graduate Advisor.

MATH 5399. RESEARCH IN MATHEMATICS. 3 Hours.
Faculty directed individual study and research. May be repeated for credit. Graded P/F/R/W only. Prerequisite: permission of instructor.

MATH 5698. THESIS. 6 Hours.
Graded P/F/R. Prerequisite: permission of Graduate Advisor.

MATH 5699. RESEARCH IN MATHEMATICS. 6 Hours.
Faculty directed individual study and research. May be repeated for credit. Graded P/F/R/W only. Prerequisite: permission of instructor.

MATH 6180. SEMINAR FOR PROFESSIONAL DEVELOPMENT OF PhD STUDENTS IN SPECIAL PROJECTS. 1 Hour.
This seminar class is for Ph.D. students enrolled in special University projects. Topics include a survey of new Math, Science, Technology and Engineering advancements, Ph.D. students professional development and mentoring. Prerequisite: Prior approval of Project Director.

MATH 6310. FOUNDATION OF DATA SCIENCES. 3 Hours.
Basic knowledge and computational methods in data sciences, select topics in norms, semidefinite matrix, nonnegative matrix, Cholesky decomposition, QR decompositions, linear system, least squares problem, eigenvalue and singular value decompositions, low rank approximation, nonnegative matrix factorization, introduction to simplex method, KKT conditions for optimizations, Krylov subspace methods, and applications. Prerequisite: MATH 3330 or consent of the instructor.

MATH 6311. OPTIMIZATION ON BIG DATA. 3 Hours.
Introduction to big data analysis; real world applications of data science; linear system solutions; linear programming; duality theory; convex sets; convex functions; optimality conditions; unconstrained optimization; constraint optimization; conjugate direction methods; alternating direction method of multipliers; classification/regression models and algorithms; dimensionality reduction for visualization; projects on real data. Prerequisite: MATH 3330 or consent of the instructor.

MATH 6312. DATA MINING. 3 Hours.
The course focuses on topics including but not limited to: linear methods in regression, linear methods in classification, model assessment and selection, regularized models, splines, generalized additive models, model averaging, ensemble learning, support vector machines, neural networks, probabilistic graphical models, cluster analysis, dimension reduction techniques, and multidimensional scaling. Prerequisite: MATH 5305/STATS 5305 or MATH 5312/STATS 5312 or permission of instructor. Basic programming skills are preferred.

MATH 6313. TOPICS IN PROBABILITY AND STATISTICS. 3 Hours.
May be repeated for credit when the content changes.

MATH 6353. GENERALIZED LINEAR MODELS. 3 Hours.
This course covers modern methods for analyzing Bernoulli, multinomial and count data. It begins with a development of generalized linear model theory, including the exponential family, link function and maximum likelihood. Second is a discussion of the case of models for independent observations. Next is a discussion of models for repeated measures, based on quasi-likelihood methods. These include models (such as Markov chains) for categorical time series. Next is a treatment of models with random effects. Finally is a discussion of methods for handling missing data. Knowledge of the SAS package is required. Prerequisites: MATH 5358/STATS 5358 (Regression Analysis) and preferably MATH 5313/STATS 5313. (Students without 5313 can still succeed but must deal with the slightly higher mathematical level of this course.).
MATH 6356. TIME SERIES ANALYSIS. 3 Hours.
This course covers classical methods of time series analysis, for both the time and frequency domains. For covariance stationary series, these include ARIMA modeling and spectral analysis. For nonstationary series, they include methods for detrending and filtering. Also included is a treatment of multivariate series, as well as a discussion of the Kalman filter state-space model. Knowledge of the SAS package is required. Prerequisites: MATH 5358/STATS 5358 (Regression Analysis) and MATH 5313/STATS 5313.

MATH 6357. NONPARAMETRIC STATISTICS. 3 Hours.
This is a survey of classical nonparametric methods for inference in standard observational settings (one-sample, two-sample, k-samples and the univariate linear model), and includes a development of U-statistics, rank statistics and their asymptotic distribution theory. The mathematical level is fairly high. Prerequisite: MATH 5313/STATS 5313.

MATH 6391. SPECIAL TOPICS IN MATHEMATICS. 3 Hours.
Faculty directed individual study and research. May be repeated for credit when the content changes.

MATH 6399. DISSERTATION. 3 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree in mathematics.

MATH 6699. DISSERTATION. 6 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree in mathematics.

MATH 6999. DISSERTATION. 9 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree in mathematics.

MATH 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final year of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

COURSES

MSCI 6399. DISSERTATION. 3 Hours.

MSCI 6699. DISSERTATION. 6 Hours.

MSCI 6999. DISSERTATION. 9 Hours.

MSCI 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final year of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

COURSES

STATS 1308. ELEMENTARY STATISTICAL ANALYSIS. 3 Hours.
Topics may include collection, analysis, presentation, and interpretation of data. Analysis includes descriptive statistics, probability, relationships between variables and graphs, elementary statistical models, hypothesis testing, inference, estimation, correlation, regression and confidence intervals. The use of mathematical software and calculators is required. See course syllabus for details.

STATS 3302. MULTIVARIATE STATISTICAL METHODS. 3 Hours.
Topics in multivariate data analysis with applications in various areas of interest, including multiple regression, analysis of experimental designs, covariate adjustment, non-linear regression and the use of standard multivariate statistical packages. Offered as MATH 3302 and STATS 3302; credit will be granted in only one department. Prerequisite: C or better in MATH 3313 or STATS 3313 or MATH 3316 or STATS 3316 or MATH 3351 or BIOL 3351 or consent of the instructor.
STATS 3313. INTRODUCTION TO PROBABILITY. 3 Hours.
Basic concepts in probability, random variables, probability distributions, functions of random variables, moment generating functions, central limit theorem and its role in statistics, joint probability functions and joint probability density functions, joint cumulative distribution functions, conditional and marginal probability distributions, covariance and correlation coefficients, transformation and order statistics. Offered as MATH 3313 and STATS 3313; credit will be granted in only one department. Prerequisite: C or better in MATH 2326, or student group.

STATS 3316. STATISTICAL INFERENCE. 3 Hours.
A comprehensive study of basic data analysis, focused on reasoning process of statistical investigations from asking question and collecting data to analyzing data and drawing inferences. Topics include exploratory data analysis, sampling, sampling distribution, estimation, hypothesis tests, regression, and ANOVA, with an emphasis on applications of these techniques using statistical software. Offered as MATH 3316 and STATS 3316; credit will be granted in only one department. Prerequisite: C or better in 6 hours from the following: MATH 1302, MATH 1308, MATH 1322, MATH 1323, MATH 1330, MATH 1331, MATH 1332, MATH 1421, MATH 1426, MATH 2425, MATH 2326, MATH 3300, MATH 3307, MATH 3314, MATH 3319, or MATH 3330; HONR-SC 1426, HONR-SC 2425, or student group.

STATS 4311. STOCHASTIC MODELS AND SIMULATION. 3 Hours.
A study of processes, whose outcomes are governed by chance, through a combination of lectures and computer lab sessions. Experiments include random number generation, coin tossing and other games of chance, random walks, Markov Chains, Poisson processes, birth-death processes, branching processes, and Brownian Motion. A foundation for modeling random phenomena in sciences, engineering and business. Prerequisite: C or better in MATH 2326 and knowledge of basic probability (MATH 3313/STATS 3313 or MATH 3351/Biol 3351 or equivalent), or consent of instructor, or student group.

STATS 4313. MATHEMATICAL STATISTICS. 3 Hours.
A continuation of MATH 3313. Random sampling and sampling distributions, estimation of unknown parameters and main properties of estimators, confidence intervals for unknown parameters, testing of hypotheses. Prerequisite: C or better in MATH 3313 or STATS 3313.

STATS 5305. STATISTICAL METHODS. 3 Hours.
Topics include descriptive statistics, numeracy, and report writing; basic principles of experimental design and analysis; regression analysis; data analysis using the SAS package. Prerequisite: consent of the instructor.

STATS 5312. MATHEMATICAL STATISTICS I. 3 Hours.
Random variables and their expectations, some special distributions, moment generating functions, transformations of bivariate random variables, sampling distribution of statistics, Central Limit Theorem, confidence intervals, maximum likelihood estimation, introduction to hypothesis testing, maximum likelihood tests. Prerequisite: MATH 3335 or consent of instructor.

STATS 5313. MATHEMATICAL STATISTICS II. 3 Hours.
Multivariate distributions, consistency and limiting distributions, Rao-Cramer lower bound and efficiency, sufficiency and completeness, most powerful tests, uniformly most powerful tests, likelihood ratio test, the sequential probability ratio test, minimax and classification procedures. Prerequisite: MATH 5312/STATS 5312.

STATS 5314. EXPERIMENTAL DESIGN. 3 Hours.
This course covers the classical theory and methods of experimental design, including randomization, blocking, one-way and factorial treatment structures, confounding, statistical models, analysis of variance tables and multiple comparisons procedures. Prerequisite: MATH 5305/STATS 5305 or MATH 5355/STATS 5355 or permission of instructor.

STATS 5353. APPLIED LINEAR MODELS. 3 Hours.
The course covers, at an operational level, three topics: 1) the univariate linear model, including a self-contained review of the relevant distribution theory, basic inference methods, several parameterizations for experimental design and covariate-adjustment models and applications, and power calculation; 2) the multivariate linear model, including basic inference (e.g. the four forms of test criteria and simultaneous methods), applications to repeated measures experiments and power calculation; and 3) the univariate mixed model, including a discussion of the likelihood function and its maximization, approximate likelihood inference, and applications to complex experimental designs, missing data, unbalanced data, time series observations, variance component estimation, random effects estimation, power calculation and a comparison of the mixed model's capabilities relative to those of the classical multivariate model. Knowledge of the SAS package is required. Prerequisite: MATH 5358/STATS 5358 (Regression Analysis) or equivalent.

STATS 5354. CATEGORICAL DATA ANALYSIS. 3 Hours.
This course covers classical methods for analyzing categorical data from a variety of response/factor structures (univariate or multivariate responses, with or without multivariate factors), based on several different statistical rationales (weighted least squares, maximum likelihood and randomization-based). Included are logistic regression, multiple logit analysis, mean scores analysis, observer agreement analysis, association measures, methods for complex experimental designs with categorical responses and Poisson regression. The classical log-linear model for the association structure of multivariate responses is briefly reviewed. Randomization-based inference (e.g. Mantel-Haenzel) is discussed as well. The necessary distribution theory (multinomial, asymptotics of weighted least squares and maximum likelihood) are discussed at an operational level. Knowledge of the SAS package is required. Prerequisite: MATH 5358/STATS 5358 (Regression Analysis).

STATS 5355. STATISTICAL THEORY FOR RESEARCH WORKERS. 3 Hours.
Designed for graduate students not majoring in mathematics. Topics include basic probability theory, distributions of random variables, point estimation, interval estimation, testing hypotheses, regression, and an introduction to analysis of variance. Graduate credit not given to math majors. Prerequisite: calculus MATH 1426/MATH 2425/MATH 2326 or permission of instructor.
STATS 5356. APPLIED MULTIVARIATE STATISTICAL ANALYSIS. 3 Hours.
Statistical analysis for data collected in several variables, topics including sampling from multivariate normal distribution, Hotelling's $T^2$, multivariate analysis of variance, discriminant analysis, principal components, and factor analysis. Prerequisite: MATH 5312/STATS 5312 or consent of instructor.

STATS 5357. SAMPLE SURVEYS. 3 Hours.
A comprehensive account of sampling theory and methods, illustrations to show methodology and practice, simple random sampling, stratified random sample, ratio estimates, regression estimates, systematic sampling, cluster sampling, and nonsampling errors. Prerequisite: MATH 5312/STATS 5312 or consent of instructor.

STATS 5358. REGRESSION ANALYSIS. 3 Hours.
A comprehensive course including multiple linear regression, non-linear regression and logistic regression. Emphasis is on modeling, inference, diagnostics and application to real data sets. The course begins by developing a toolbox of methods via a sequence of guided homework assignments. It culminates with projects based on consulting-level data analysis problems involving stratification, covariate adjustment and messy data sets. Some knowledge of the SAS package is required. Prerequisites: Math 5312/STATS 5312 or Math 5305/STATS 5305 with a B or better or permission of the instructor.

STATS 5359. SURVIVAL ANALYSIS. 3 Hours.
This course covers analysis of lifetime data with applications in engineering and biomedical research. Topics may include survival function, hazard function, cumulative hazard function, parametric distributions to model lifetime data, censoring, Kaplan-Meier estimator, testing for survival times for two or more groups, Cox proportional hazards model (both fixed and time dependent covariate), parametric regression models, regression diagnostics, accelerated failure time models, sample size determination, extensive use of R statistical software. Prerequisites: MATH 5305/STATS 5305 or MATH 5312/STATS 5312 or permission of instructor.

STATS 6353. GENERALIZED LINEAR MODELS. 3 Hours.
This course covers modern methods for analyzing Bernoulli, multinomial and count data. It begins with a development of generalized linear model theory, including the exponential family, link function and maximum likelihood. Second is a discussion of the case of models for independent observations. Next is a discussion of models for repeated measures, based on quasi-likelihood methods. These include models (such as Markov chains) for categorical time series. Next is a treatment of models with random effects. Finally is a discussion of methods for handling missing data. Knowledge of the SAS package is required. Prerequisites: MATH 5358/STATS 5358 (Regression Analysis) and preferably MATH 5313/STATS 5313. (Students without 5313 can still succeed but must deal with the slightly higher mathematical level of this course.).

STATS 6356. TIME SERIES ANALYSIS. 3 Hours.
This course covers classical methods of time series analysis, for both the time and frequency domains. For covariance stationary series, these include ARIMA modeling and spectral analysis. For nonstationary series, they include methods for detrending and filtering. Also included is a treatment of multivariate series, as well as a discussion of the Kalman filter state-space model. Knowledge of the SAS package is required. Prerequisites: MATH 5358/STATS 5358 (Regression Analysis) and MATH 5313/STATS 5313.

STATS 6357. NONPARAMETRIC STATISTICS. 3 Hours.
This is a survey of classical nonparametric methods for inference in standard observational settings (one-sample, two-sample, k-samples and the univariate linear model), and includes a development of U-statistics, rank statistics and their asymptotic distribution theory. The mathematical level is fairly high. Prerequisite: MATH 5313/STATS 5313.
Mathematics - Graduate Programs

Objective

The objectives of the UT Arlington Mathematics Department’s graduate program are:

- Develop the students’ ability to do independent research and prepare them for more advanced studies in mathematics.
- Provide advanced training and preparation for professional careers as mathematicians, mathematics teachers, and those employed in engineering, scientific and business fields.

Graduate work will be offered in algebra, complex and real variables, differential equations, functional analysis, geometry, mathematics education, numerical analysis, probability, statistics and topology.

Admissions Requirements

MASTER OF SCIENCE PROGRAM

For unconditional admission, a student must meet the following requirements:

1. A B.A. or B.S. degree in mathematics or closely related field.
2. An overall GPA in the final 60 hours of coursework of a 3.0 or better, as calculated by the Graduate School, on a 4.0 scale.
3. Minimum of 350 on the verbal and 650 on the quantitative portions of the Graduate Record Examination (GRE) if taken prior to August 2011. Minimum of 143 on the verbal and 151 on the quantitative portions of the GRE if taken after August 2011.
4. For applicants whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (or a minimum score of 213 on a computer-based test, or a minimum score of 79 on an internet-based test) or a minimum score of 40 on the Test of Spoken English.
5. Three favorable letters of recommendation from people familiar with the applicant’s academic work.

Applicants who do not satisfy requirements 2 or 3 above may be considered for unconditional admission if further review of their undergraduate transcript, recommendation letters, correspondence or direct interactions with mathematics faculty, and statement of professional or research interests indicates that they are qualified to enter the Master’s Program without deficiency.

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in the first 12 hours of graduate coursework at UT Arlington.

Students who are unconditionally admitted or admitted on probation will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the fall semester, must have a GPA of 3.0 in the last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain the fellowship.

Applicants may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

MASTER OF ARTS PROGRAM

For unconditional admission a student must meet items 1-3 or 3-5.

1. A B.S. or B.A. degree with at least 24 hours of mathematics coursework with a GPA of at least 3.0, as calculated by the Graduate School on a 4.0 scale.
2. Minimum of 400 on the verbal and 600 on the quantitative portions of the Graduate Record Examination (GRE) if taken prior to August 2011. Minimum of 146 on the verbal and 148 on the quantitative portions of the GRE if taken after August 2011.
3. Three favorable letters of recommendation from people familiar with the applicant’s academic work and/or professional work.
4. A B.S. or B.A. degree with a GPA of at least 3.0, as calculated by the Graduate School on a 4.0 scale.
5. Certified to teach mathematics at the Secondary Level (Secondary Mathematics Certification).

Applicants who do not satisfy requirements 1 or 2 above may be considered for unconditional admission if further review of their undergraduate transcript, recommendation letters, correspondence or direct interactions with mathematics faculty, and statement of professional or research interests indicates that they are qualified to enter the Master’s Program without deficiency.

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in the first 12 hours of graduate coursework at UT Arlington.
Applicants may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

**Master of Science Degree Requirements**

The Department of Mathematics offers master's degree programs in mathematics with additional emphasis in applied mathematics, computational mathematics, mathematics education, pure mathematics, and statistics. All students are to use the thesis plan, thesis-substitute plan, or non-thesis plan.

All students in Master of Science program must complete one of the following:

1. General Mathematics core requirements:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5307</td>
<td>MATHEMATICAL ANALYSIS I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5333</td>
<td>LINEAR ALGEBRA AND MATRICES</td>
<td>3</td>
</tr>
</tbody>
</table>

   Select one of the following tracks:

   **Applied Mathematics:**
   
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5300</td>
<td>INTRODUCTION TO SCIENTIFIC COMPUTING</td>
<td>3</td>
</tr>
</tbody>
</table>
   
   Select four of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5350</td>
<td>APPLIED MATHEMATICS I</td>
<td></td>
</tr>
<tr>
<td>MATH 5351</td>
<td>APPLIED MATHEMATICS II</td>
<td></td>
</tr>
<tr>
<td>MATH 5320</td>
<td>ORDINARY DIFFERENTIAL EQUATIONS</td>
<td></td>
</tr>
<tr>
<td>MATH 5321</td>
<td>APPLIED PARTIAL DIFFERENTIAL EQUATIONS</td>
<td></td>
</tr>
</tbody>
</table>

   An area-related graduate course chosen in consultation with the student's advisor.

   **Computational Mathematics:**
   
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5300</td>
<td>INTRODUCTION TO SCIENTIFIC COMPUTING</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5338</td>
<td>NUMERICAL ANALYSIS I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5339</td>
<td>NUMERICAL ANALYSIS II</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5371</td>
<td>APPLIED NUMERICAL LINEAR ALGEBRA</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 5373</td>
<td>NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS</td>
<td></td>
</tr>
</tbody>
</table>

   An area-related graduate course chosen in consultation with the student's advisor.

   **Data Science:**
   
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5300</td>
<td>INTRODUCTION TO SCIENTIFIC COMPUTING</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5305</td>
<td>STATISTICAL METHODS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5371</td>
<td>APPLIED NUMERICAL LINEAR ALGEBRA</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 6310</td>
<td>FOUNDATION OF DATA SCIENCES</td>
<td>3</td>
</tr>
</tbody>
</table>

   Select 2 of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5312</td>
<td>MATHEMATICAL STATISTICS I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5338</td>
<td>NUMERICAL ANALYSIS I (OR AN AREA-RELATED COURSE CHOSEN IN CONSULTATION WITH THE STUDENT'S ADVISOR)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 6311</td>
<td>OPTIMIZATION ON BIG DATA</td>
<td>3</td>
</tr>
<tr>
<td>MATH 6312</td>
<td>DATA MINING</td>
<td>3</td>
</tr>
</tbody>
</table>

   **Mathematics Education:**
   
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5300</td>
<td>INTRODUCTION TO SCIENTIFIC COMPUTING</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5305</td>
<td>STATISTICAL METHODS</td>
<td>3</td>
</tr>
</tbody>
</table>

   Select three of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>

<tr>
<td>MATH 5358</td>
<td>REGRESSION ANALYSIS</td>
</tr>
</tbody>
</table>

Total Hours: 21

In addition:

i. Those students enrolled in the non-thesis plan must take at least 15 other hours of electives approved by the graduate advisor\(^2\).

ii. Those students enrolled in the thesis substitute plan must take MATH 5395 SPECIAL PROJECT, and must take at least nine other hours of electives\(^2\).

iii. Those students enrolled in the thesis plan must take at least six hours of MATH 5398 / MATH 5698, and must take at least three other hours of electives\(^2\).

\(^1\) Core requirements can also be fulfilled by completing core requirements in the BS-Ph.D. track in the Doctoral program.

\(^2\) Electives may not be chosen from MATH 5336, MATH 5337, MATH 5340, MATH 5341, MATH 5342, MATH 5343, MATH 5344, MATH 5345, MATH 5346, MATH 5347, MATH 5348, MATH 5352, MATH 5370, MATH 5375, MATH 5376, MATH 5377, MATH 5378, MATH 5379. However, students in the Mathematics Education thesis or thesis-substitute track may choose three hours from Math 5336, 5337, 5340-5348, 5352, 5370, 5375-5379. Students in the Mathematics Education non-thesis track may choose six hours from Math 5336, 5337, 5340-5348, 5352, 5370, 5375-5379. Students in the Computational Mathematics track may choose three approved hours of electives in science and/or engineering. Elective courses for pure-mathematics track must be chosen from MATH 5300, MATH 5304, MATH 5317, MATH 5321, MATH 5326, MATH 5327, MATH 5329, MATH 5330, MATH 5332, MATH 5334, MATH 5338, or MATH 5392 courses offered in the pure-mathematics track.

Students in thesis degree plan or thesis-substitute plan must pass a final Master's exam.

**Master of Arts Degree Requirements**

The Master of Arts in Mathematics program in the Department of Mathematics is designed to extend undergraduate mathematics experiences in the area of specialized mathematics content for secondary school and early college mathematics teaching. The program focuses on enhancing mathematics teaching through innovative preparation in topics grounded in secondary school and early college mathematics from an advanced standpoint. The program embraces a philosophy of teaching and learning mathematics that is consistent with the landmark Standards documents produced by the National Council of Teachers of Mathematics.
The requirements for the Master of Arts degree thesis-substitute option are 30 hours of graduate courses from the Department of Mathematics and a 3-hour project. Students in the thesis-substitute plan must pass a final Master's exam. The requirements for a Master of Arts degree non-thesis option are 36 hours of graduate courses from the Department of Mathematics.

All students in the Master of Arts program must complete one of the following:

**Required Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5341</td>
<td>MODERN GEOMETRY</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5342</td>
<td>CONCEPTS AND TECHNIQUES IN ALGEBRA</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5343</td>
<td>CONCEPTS AND TECHNIQUES IN PROBABILITY AND STATISTICS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5344</td>
<td>MATHEMATICS-SPECIFIC TECHNOLOGIES</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5345</td>
<td>HISTORICAL APPROACH TO REAL ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5346</td>
<td>CONCEPTS AND TECHNIQUES IN PROBLEM SOLVING</td>
<td>3</td>
</tr>
</tbody>
</table>

**Thesis-Substitute Option:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5395</td>
<td>SPECIAL PROJECT (Individual, Director-Approved Research)</td>
<td>15</td>
</tr>
</tbody>
</table>

| Students must successfully complete 12 additional hours of electives. Electives may not be chosen from MATH 5375-MATH 5379. |

**Non-Thesis Option:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5395</td>
<td>SPECIAL PROJECT (Individual, Director-Approved Research)</td>
<td>18</td>
</tr>
</tbody>
</table>

| Students must successfully complete 18 additional hours of electives. Electives may not be chosen from MATH 5375-MATH 5379. |

**Admission Requirements**

For unconditional admission a student must meet the following requirements:

1. A master's degree or at least 30 hours of graduate coursework in mathematics or closely related fields.
2. A minimum GPA of 3.0, as calculated by the Graduate School, on a 4.0 scale in graduate coursework.
3. Minimum of 350 on the verbal and 700 on the quantitative portions of the Graduate Record Examination (GRE) if taken prior to August 2011.
   Minimum of 143 on the verbal and 155 on the quantitative portions of the GRE if taken after August 2011.
4. For applicants whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (or a minimum score of 213 on a computer-based test, or a minimum score of 79 on an internet-based test) or a minimum score of 40 on the Test of Spoken English.
5. Three favorable letters of recommendation from people familiar with the applicant's academic work and/or professional work.

Applicants who do not satisfy requirements 2 or 3 above may be considered for unconditional admission if a further review of their undergraduate transcript, recommendation letters, correspondence or direct interactions with mathematics faculty, and statement of professional or research interests indicates that they are qualified to enter the Doctoral Program without deficiency.

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in the first 12 hours of graduate coursework at UT Arlington.

Applicants may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

**DOCTORAL PROGRAM (B.S.-PH.D. TRACK)**

For unconditional admission a student must meet the following requirements:

1. A bachelor's degree in mathematics or in a closely related field.
2. A minimum GPA of 3.00 on the 4.00 scale in undergraduate course work, as calculated by the UT Arlington Graduate School.
3. A minimum of 350 on the verbal part and 700 on the quantitative part of the Graduate Record Examination (GRE) if taken prior to August 2011.
   Minimum of 143 on the verbal and 155 on the quantitative portions of the GRE if taken after August 2011.
4. For an applicant whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (or a minimum score of 213 on a computer-based test, or a minimum score of 79 on an internet-based test) or a minimum score of 40 on the Test of Spoken English.
5. At least three letters of recommendation from people familiar with the applicant's academic work and/or professional work.

Applicants who do not satisfy requirement 2 or/and 3 above may be considered for an unconditional admission if a further review of their undergraduate transcript(s), recommendation letters, correspondence or direct interactions with mathematics faculty, and statement of professional or research interests indicates that they are qualified to enter the B.S.-Ph.D. track program without deficiency.
If an applicant does not meet a majority of standards for an unconditional admission outlined above, he/she may be considered for a probationary admission after a careful examination of his/her application materials. A probationary admission requires that the applicant receive grades of B or better in the first 12 hours of graduate course work at UT Arlington.

An applicant may be denied admission if he/she has less than satisfactory performance on a majority of the admission criteria described above.

A deferred decision may be granted when the applicant's file is incomplete or when a denial on his/her admission is not appropriate. An applicant who is unable to supply all required documentation prior to the admission deadline but who otherwise appears to have met admission requirements may be granted provisional admission.

Students who are unconditionally admitted or admitted on probation will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the fall semester, must have a GPA of 3.0 in the last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain the fellowship.

**Ph.D. Degree Requirements**

A dynamic program leading to the Doctor of Philosophy degree in the mathematics will aim at both real and demonstrated competency on the part of the student over material from various branches of mathematics. The Doctor of Philosophy degree in Mathematics provides a program of study that may be tailored to meet the needs of those interested in applied or academic careers. This program allows students to pursue topics ranging from traditional mathematics studies to applied mathematical problems in engineering and sciences. The nature of the dissertation will range from research in mathematics to the discovery and testing of mathematical models for analyzing given problems in engineering and sciences and in locating and developing mathematical and computational techniques for deducing the properties of these models as to solve these problems effectively and efficiently. Such dissertations will be concerned with research problems from pure mathematics, applied mathematics, mathematics education and statistics.

The Department of Mathematics offers doctoral degree programs in Mathematics (algebra, applied mathematics, data science, geometry, mathematics education, numerical analysis and statistics).

All doctoral students must complete one of the following:

1. **General MATHEMATICS core requirements:**

   - **MATH 5317** REAL ANALYSIS 3
   - **MATH 5322** COMPLEX VARIABLES I 3
   - **MATH 5327** FUNCTIONAL ANALYSIS I 3
   - **MATH 5331** ABSTRACT ALGEBRA I 3
   - **MATH 5338** NUMERICAL ANALYSIS I 3

   In addition to the mathematics core requirements, the student is required to take four area-related courses, in consultation with their advisor 12

   **Total Hours** 27

2. **General STATISTICS core requirements:**

   - **MATH 5312** MATHEMATICAL STATISTICS I 3
   - **MATH 5313** MATHEMATICAL STATISTICS II 3
   - **MATH 5317** REAL ANALYSIS 3
   - **MATH 5319** PROBABILITY THEORY 3
   - **MATH 5358** REGRESSION ANALYSIS 3
   - or **MATH 5359** SURVIVAL ANALYSIS 3

   In addition to the statistics core requirements, students are also required to take four area-related courses, chosen in consultation with their advisor 12

   **Total Hours** 27

3. **General MATHEMATICS-DATA SCIENCE (jointly with Computer Science and Engineering department) core requirements:**

   - **MATH 5317** REAL ANALYSIS 3
   - **MATH 5322** COMPLEX VARIABLES I 3
   - **MATH 5327** FUNCTIONAL ANALYSIS I 3
   - **MATH 5338** NUMERICAL ANALYSIS I 3
   - **CSE 5301** DATA ANALYSIS & MODELING TECHNIQUES 3
Students in every degree plan must pass the preliminary examinations, a diagnostic evaluation, and a comprehensive examination. A minimum of 9 dissertation hours must be taken to satisfy the graduation requirement for doctoral degree in the Mathematics Department. Doctoral students must enroll in the appropriate 6699, 6999 or 7399 Dissertation Completion course the semester in which the dissertation is defended. Students typically enroll in these courses defend and apply for graduation in the same term. The Dissertation Completion course (7399) may only be taken once and cannot be repeated.

### Ph.D. Degree Requirements for the B.S.-Ph.D. track

The student must complete either the mathematics or statistics core requirements.

#### 1. General MATHEMATICS core requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5307</td>
<td>MATHEMATICAL ANALYSIS I</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>CSE 5311</td>
<td>DESIGN AND ANALYSIS OF ALGORITHMS</td>
<td>3</td>
</tr>
<tr>
<td>CSE 5334</td>
<td>DATA MINING</td>
<td>3</td>
</tr>
</tbody>
</table>
In addition to the MATH/CSE core requirements, the student is required to take two area-related courses in MATH or CSE, chosen in consultation with their advisor.

Total Hours

The requirements for the preliminary examinations, diagnostic evaluation, and comprehensive examination are the same as the other tracks in the Ph.D. program. A minimum of 9 dissertation hours must be taken to satisfy the graduation requirement for doctoral degree in the Mathematics Department. Doctoral students must enroll in the appropriate 6699, 6999 or 7399 Dissertation Completion course the semester in which the dissertation is defended. Students typically enroll in these courses defend and apply for graduation in the same term. The Dissertation Completion course (7399) may only be taken once and cannot be repeated.

For additional information on the mathematics program, see the program entry in the Interdepartmental and Intercampus Programs section of this catalog.

Certificate of Applied Statistics Program

The admission standard is the same as that of Master of Science Program (http://catalog.uta.edu/science/math/graduate/#masterstext).

Certificate of Applied Statistics Requirements

The Certificate in Applied Statistics offers individuals with an undergraduate degree an opportunity to receive graduate instruction in applied statistics as a means of maintaining and enhancing their professional development. The certificate program will provide coursework in statistics to an individual whose undergraduate major was outside the area of statistics. Since the requirements for the certificate are substantially less than those for the Master's Degree in Mathematics with a concentration in Statistics, the certificate can be earned in a much shorter time span. When applicable, the courses taken in the certificate program can also be used to satisfy a Master of Science in Mathematics degree requirement at UTA and other institutions. Consult with the graduate advisor for advice on graduate course transfer.

The Certificate in Applied Statistics requires that the students take and successfully complete the following courses.

**Required Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>STATS 5312</td>
<td>MATHEMATICAL STATISTICS I</td>
<td>3</td>
</tr>
<tr>

<td>SELECTED TOPICS IN MATHEMATICS (Statistical Methods in Clinical Research)</td>
</tr>
</tbody>
</table>

Total Hours 15

Upon completion of the 15 hours of graduate courses from lists 1 and 2 with a minimum GPA of 3.0, the student is awarded the Certificate in Applied Statistics. The expected time to completion is 1 to 2 years. The time limit for completion of the certificate program is 6 years.

**Academic Advising:** 406 Pickard Hall · 817-272-0939

## Bachelor's Degrees in Mathematics

The Department of Mathematics offers programs leading to the Bachelor of Science Degree in Mathematics and the Bachelor of Arts Degree in Mathematics. The Bachelor of Science degree may also be acquired with the explicit addition of one of these options: actuarial science, applied mathematics, pure mathematics, statistics, data science, or secondary teaching certification.

The Bachelor of Science pure math option is primarily intended for students wishing to pursue graduate work in mathematics. The applied mathematics option is aimed at students seeking careers as mathematicians in the emerging high-tech industries. The actuarial science option is intended for students with an interest in a career involving various applications of mathematics to the world of business. The data science option provides a mathematics major with the interdisciplinary skills to derive science and business insights from big data. The option with secondary teaching certification is intended for students desiring to teach mathematics at the secondary school level, and is offered in coordination with UT Arlington’s UTeach program.

The Bachelor of Arts degree is intended for those students seeking a traditional liberal arts education with an emphasis on mathematics.

All students seeking a bachelor's degree in mathematics must take at least two mathematics sequences. A sequence is defined as a 3300-level course followed by a 4300-level course in the same general area of mathematics. Each of the two sequences must build from distinct 3300-level courses. The approved sequences are as follows:

<table>
<thead>
<tr>
<th>Sequence</th>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>MATH 3313 INTRODUCTION TO PROBABILITY &amp; MATH 4311 INTRODUCTION TO PROBABILITY</td>

<td>6</td>
</tr>
<tr>
<td></td>
<td>and INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS</td>
<td></td>
</tr>
<tr>
<td>11</td>
<td>MATH 3330 INTRODUCTION TO LINEAR ALGEBRA AND VECTOR SPACES &amp; MATH 4330 INTRODUCTION TO LINEAR ALGEBRA AND VECTOR SPACES</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>and ADVANCED LINEAR ALGEBRA</td>
<td></td>
</tr>
</tbody>
</table>

It is strongly recommended that mathematics majors take MATH 3330 and MATH 3300 as early as possible, since these courses are prerequisites for many other 3000/4000-level courses. It is suggested to take MATH 3330 simultaneously with Calculus III. Mathematics majors must pass MATH 3300 before attempting the required courses MATH 3321 and MATH 3335. It is strongly recommended that mathematics majors with little or no computer programming experience satisfy the computer programming requirement as early as possible with CSE 1310 INTRODUCTION TO COMPUTERS & PROGRAMMING, CSE 1311, CSE 1320, CSE 1325 OBJECT-ORIENTED PROGRAMMING, or MAE 2360 NUMERICAL ANALYSIS & PROGRAMMING.
Teacher Certification

Students interested in earning a Bachelor of Science degree with a major in mathematics with secondary teacher certification should refer to the “Bachelor of Science in Mathematics with Secondary Teaching Certification” degree plan for teacher certification requirements. Students should also see an advisor in the UTeach Arlington department.

Second Major

A student who satisfies the requirements for any other baccalaureate degree qualifies for having mathematics named as a second major upon completion of nine mathematics courses at 3000/4000 level (except for capstone mathematics courses specifically for prospective middle or secondary grades mathematics teachers). The following courses are required:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 3300</td>
<td>INTRODUCTION TO PROOFS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3330</td>
<td>INTRODUCTION TO LINEAR ALGEBRA AND VECTOR SPACES</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3321</td>
<td>ABSTRACT ALGEBRA I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3335</td>
<td>ANALYSIS I</td>
<td>3</td>
</tr>
<tr>
<td>Select one of the following:</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>MATH 4321</td>
<td>ABSTRACT ALGEBRA II</td>
<td></td>
</tr>
<tr>
<td>MATH 4335</td>
<td>ANALYSIS II</td>
<td></td>
</tr>
<tr>
<td>MATH 4334</td>
<td>ADVANCED MULTIVARIABLE CALCULUS</td>
<td></td>
</tr>
</tbody>
</table>

Besides the sequence MATH 3321-MATH 4321 or the sequence MATH 3335 and (MATH 4335 or MATH 4334), a second sequence must be part of the second major. The GPA requirements on the mathematics courses for a second major are identical to those listed below under the heading Graduation Requirements.

First-time Admission Requirements

Students who wish to apply for major status in mathematics must first complete the University and College of Science requirements and the specific requirements of the Department of Mathematics listed below.

- Overall GPA of 2.25;
- Minimum GPA of 2.25 in at least nine hours of mathematics courses in residence at the level of MATH 1426 or above, excluding capstone mathematics courses specifically for prospective middle or secondary grades mathematics teachers;
- At least six hours from the science or computer science courses listed in the mathematics degree plans; and
- Twelve hours of courses of the University core curriculum in disciplines other than science and mathematics.

Students currently enrolled at the University may qualify to change their major to mathematics by meeting the requirements listed above.

Satisfactory Academic Standard Requirement

Majors whose overall GPA or GPA in major courses falls below 2.25 will be required to change their major.

To re-enter as a mathematics major, the student must meet the requirements listed in the First-time Admissions Requirements section.

Non-Credit Courses

The following courses will not be counted for credit (as mathematics or electives) toward a bachelor's degree in mathematics:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1301</td>
<td>CONTEMPORARY MATHEMATICS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1302</td>
<td>COLLEGE ALGEBRA</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1308</td>
<td>ELEMENTARY STATISTICAL ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1315</td>
<td>COLLEGE ALGEBRA FOR ECONOMICS &amp; BUSINESS ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1316</td>
<td>MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1330</td>
<td>ARITHMETICAL PROBLEM SOLVING</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1331</td>
<td>GEOMETRICAL INFERENCE AND REASONING</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1332</td>
<td>FUNCTIONS, DATA, AND APPLICATIONS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1402</td>
<td>COLLEGE ALGEBRA</td>
<td>4</td>
</tr>
<tr>
<td>MATH 4350</td>
<td>PRECALCULUS FOR MID-LEVEL MATHEMATICS TEACHERS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 4351</td>
<td>CALCULUS FOR MID-LEVEL MATHEMATICS TEACHERS</td>
<td>3</td>
</tr>
</tbody>
</table>
Capstone mathematics courses specifically for prospective secondary grades mathematics teachers can be counted for credit only by those pursuing a B.S. with Secondary Teaching Certification.

**Math Course Registration and Requirements**

Students may not be "pre-enrolled" in mathematics courses while prerequisite courses at another institution are pending grades. Only UT Arlington credits may be used for pre-enrollment purposes.

Canvas grades (or other learning-management system grades) may not be used as proof of completion for a prerequisite course. Students must submit either an official transcript to the registrar's office, or submit a transcript with a letter grade for the prerequisite course to the undergraduate mathematics advisor in order to be enrolled in a mathematics course. If a student is submitting the transcript via email, the email must be sent from their UTA email address.

Additional advanced hours in mathematics \(^2\) \hspace{1cm} 15

Minor \hspace{1cm} 18

The minor may be from any college \(^3\)

Sufficient number of hours to complete the total hours required for a degree

1. See general core requirements (p. 50).
2. Fifteen additional advanced hours (MATH 3301 or above, except for capstone mathematics courses specifically for prospective middle grades or secondary grades mathematics teachers), including a second sequence (see paragraph three in the opening section).
3. The student should consult the appropriate section in this catalog for the exact requirements for a minor in a given department or contact that department’s undergraduate advisor.

Capstone mathematics courses specifically for prospective middle grade mathematics teachers do not count toward a degree in mathematics. Capstone mathematics courses for secondary mathematics teachers will count only for those working on the BS in Mathematics with Teaching Certification.

And other 3000+ level courses in MATH, STATS, or Business to complete 120 hours

---

1. See general core requirements (p. 50).
2. ECON 2305 and ECON 2306, passed with a B or better, together satisfy the Society of Actuaries requirement for VEE certification in Economics.
3. MATH 3302 and MATH 4313, passed with a B or better, together satisfy the Society of Actuaries requirement for VEE certification in Applied Statistical Methods. (Pending approval from the Society of Actuaries.)
4. MATH 3313 and MATH 4312 should prepare a student to pass Exam P of the Society of Actuaries Associateship Course Catalog.
5. FINA 3313, passed with a B or better, satisfies the Society of Actuaries requirement for VEE certification in Corporate Finance. This course has prerequisites: ACCT 2302 PRINCIPLES OF ACCOUNTING II and ECON 2306.
6. FINA 3313, FINA 3315, and FINA 3317 should prepare a student to pass Exam FM of the Society of Actuaries Associateship Course Catalog.
Capstone mathematics courses specifically for prospective middle grade mathematics teachers do not count toward a degree in mathematics. Capstone mathematics courses for secondary mathematics teachers will count only for those working on the BS in Mathematics with Teaching Certification.

See [www.soa.org](http://www.soa.org) for more details about VEE Certification and the Associateship Course Catalog.

</tbody>
</table>

Select one of the following to complete one sequence:

- MATH 4321 ABSTRACT ALGEBRA II 3
- MATH 4334 ADVANCED MULTIVARIABLE CALCULUS 3
- MATH 4335 ANALYSIS II 3

Additional advanced hours in mathematics 6
BE 3317 LINEAR SYSTEMS IN BIOENGINEERING 3
BE 3320 MEASUREMENT LABORATORY 3

Complete requirement for Master of Science in Biomedical Engineering (please see Biomedical Engineering in the Engineering section of graduate catalog)

Up to three graduate courses in Biomedical Engineering chosen from the following list will be allowed for undergraduate credit in Fast Track Program:

- BE 5309 HUMAN PHYSIOLOGY IN BIOENGINEERING
- BE 5325 FLUORESCENCE MICROSCOPY
- BE 5326 TISSUE ULTRASOUND OPTICAL IMAGING
- BE 5337 TRANSPORT PHENOMENA IN BIOMEDICAL ENGINEERING
- BE 5343 IMAGE PROCESSING WITH MATLAB: APPLICATIONS IN MEDICINE AND BIOLOGY
- BE 5344 BIOINSTRUMENTATION I
- BE 5346 MEDICAL IMAGING
- BE 5352 DIGITAL PROCESSING OF BIOLOGICAL SIGNALS
- BE 5364 TISSUE ENGINEERING LECTURE
- BE 5365 TISSUE ENGINEERING LAB
- BE 5366 PROCESS CONTROL IN BIOTECHNOLOGY
- BE 5372 DRUG DELIVERY
- BE 5373 FORMULATION AND CHARACTERIZATION OF DRUG DELIVERY SYSTEMS
- BE 5382 LABORATORY PRINCIPLES
- BE 5388 BIOMEDICAL PRODUCT DESIGN AND DEVELOPMENT

1. See general core requirements (p. 50).
2. Six additional advanced hours (MATH 3301 or above, except for capstone mathematics courses specifically for prospective middle grades or secondary grades mathematics teachers). The need for a second sequence is fulfilled by Math 3313/4313.

Capstone mathematics courses specifically for prospective middle grade mathematics teachers do not count toward a degree in mathematics. Capstone mathematics courses for secondary mathematics teachers will count only for those working on the BS in Mathematics with Teaching Certification.

**Total Hours: 145**

**Minor**

Students in non-engineering majors may minor in mathematics by taking 18 hours of mathematics courses with an average GPA in mathematics courses of 2.0, and with at least nine hours of 3000/4000 level courses. The courses that may be counted toward a math minor are MATH 1426 and above, except for capstone mathematics courses specifically for prospective middle or secondary grades mathematics teachers. Nine hours of the minor must be taken in residence. Engineering majors seeking a math minor should refer to the College of Engineering section of this catalog for the requirements for the engineering math minor.

College of Engineering students may minor in mathematics by taking 18 hours of mathematics courses with an average GPA in mathematics courses of 2.0, and with at least nine hours of 3000/4000 level courses. Nine hours of the minor must be taken in residence. The courses that may be counted toward a math minor are MATH 1426 and above, with exceptions listed below for certain majors:

- MATH 3313 is prohibited for BSCPE and BSIE majors
- MATH 3318 and MATH 3319 is prohibited for BSME and BSAE majors
- Only one of MATH 3319 or 3330 may be counted toward the minor
- Only one of MATH 3318 or 3319 may be counted toward the minor
Physics

Undergraduate Degrees

• Bachelor of Science in Physics (p. 1263)
• Bachelor of Science in Physics with Engineering Emphasis (p. 1263)
• Bachelor of Science in Physics with Medical School Preparation (p. 1263)
• Bachelor of Arts in Physics (p. 1263)
• Bachelor of Science in Physics with Physical Science Teacher Certification (UTeach) (p. 1263)
• Bachelor of Science in Physics with Physics/Mathematics Teacher Certification (UTeach) (p. 1263)
• Bachelor of Science in Physics with Master's in Materials Science and Engineering (Fast Track Program) (p. 1263)

Minors

• Minor in Physics (p. 1277)
• Minor in Astronomy for Non-Physics Majors (p. 1277)
• Minor in Astrophysics for Non-Physics Majors (p. 1277)

Graduate Degrees

• Physics, M.S. (p. 1261)
• Physics and Applied Physics, Ph.D. (p. 1261)

COURSES

PHYS 1181. PROBLEMS IN MECHANICS. 1 Hour.
Primarily an independent study course involving problem-solving in general technical mechanics. The objective is to prepare the student whose background in physics is of a non-technical nature to do advanced study in curricula requiring technical physics. This course in combination with PHYS 1441 shall serve as an equivalent to PHYS 1443. Prerequisite: MATH 1426 and a grade of B or better in PHYS 1441. Department consent may be granted to take this course with Physics B AP score of 4 or 5.

PHYS 1182. PROBLEMS IN ELECTRICITY AND MAGNETISM. 1 Hour.
Primarily an independent study course involving problem-solving in general technical electricity and magnetism. The objective is to prepare the student whose background in physics is of a non-technical nature to do advanced study in curricula requiring technical physics. This course in combination with PHYS 1442 shall serve as an equivalent to PHYS 1444. Prerequisite: MATH 2425 and a grade of B or better in PHYS 1442. Department consent may be granted to take this course with Physics B AP score of 4 or 5.

PHYS 1188. SPECIAL PROBLEMS IN GENERAL PHYSICS. 1 Hour.
Primarily laboratory work and/or problem-solving in general technical physics. Prerequisite: PHYS 1441 or PHYS 1443 lecture credit equivalent or PHYS 1442 or PHYS 1444 lecture credit equivalent.

PHYS 1288. SPECIAL PROBLEMS IN GENERAL PHYSICS. 2 Hours.
Primarily laboratory work and/or problem-solving in general technical physics. Prerequisite: PHYS 1441 and PHYS 1442 lecture credit equivalent or PHYS 1443 and PHYS 1444 lecture credit equivalent.

PHYS 1300. INTRODUCTION TO MUSICAL ACOUSTICS. 3 Hours.
An introduction, for the music major, to the nature of periodic motion and its relation to music, characteristics of sound waves, sources of sound used in music, musical scales and temperament, mechanics of hearing, recording and reproduction of sound. May not be used to satisfy any of the requirements for a degree in physics.

PHYS 1301. PHYSICS FOR NON SPECIALISTS I. 3 Hours.
PHYS 1301 and 1302 constitute a one-year introductory course for liberal arts and business majors. How physics plays a role in everyday life; explanations of how things work. Helps develop analytical thinking. The first semester explains motion and forces and heat.

PHYS 1302. PHYSICS FOR NON SPECIALISTS II. 3 Hours.
Follows PHYS 1301 and explains sound, light, electricity and magnetism. Prerequisite: PHYS 1301 or permission from instructor.

PHYS 1351. ENERGY AND ENVIRONMENT. 3 Hours.
This course explores the fundamental laws of nature and natural processes related to energy production, transport, storage, and uses. The objective of this course is to provide students with an in-depth understanding of the Physics of Energy and its relation to the Earth Environment. The course is designed for non-science major students with two one-hour lectures (or one two-hour lecture) and one 2-hour laboratory per week.

PHYS 1441. GENERAL COLLEGE PHYSICS I. 4 Hours. (TCCN = PHYS 1401)
The first half of a one-year, non-calculus introductory physics course taken by pre-medical, pre-dental, biology and architectural majors and others. The study of mechanics, elasticity, fluids, heat and waves is supplemented by laboratory experiments. Familiarity with high school algebra and trigonometry is required.
PHYS 1442. GENERAL COLLEGE PHYSICS II. 4 Hours. (TCCN = PHYS 1402)
The second half of a one-year, non-calculus introductory physics course. Subject matter includes electricity and magnetism, light and optics, and modern physics. Prerequisite: PHYS 1441 or equivalent, or permission of instructor.

PHYS 1443. GENERAL TECHNICAL PHYSICS I. 4 Hours. (TCCN = PHYS 2425)
The first half of a one-year technical course. Required for many science and engineering majors, exceeds premedical requirement. The study of physical phenomena in the fields of mechanics, heat, and waves. Concurrent enrollment in MATH 1426 (per prerequisite) is not recommended if no prior background in calculus. Prerequisite: MATH 1426 or consent of instructor.

PHYS 1444. GENERAL TECHNICAL PHYSICS II. 4 Hours. (TCCN = PHYS 2426)
The second half of a one-year technical course. The study of physical phenomena including electricity, magnetism, circuit theory, light, and optics. Prerequisites: PHYS 1443 or equivalent and MATH 2425 or concurrent enrollment.

PHYS 2311. MATHEMATICAL METHODS OF PHYSICS. 3 Hours.
Harmonic oscillators, waves, vector description of particles and fields, coordinate transformations, eigenvalue problems, and systems of linear equations. Prerequisites: PHYS 1444 or equivalent and MATH 2425.

PHYS 2315. INTRODUCTORY ASTROPHYSICS. 3 Hours.
This course introduces science and engineering majors to astrophysics. Subject matter includes the solar system, stellar properties and evolution, the Milky Way galaxy, normal and active galaxies, and cosmology. Prerequisite: PHYS 1444 or permission of the instructor.

PHYS 2321. COMPUTATIONAL PHYSICS. 3 Hours.
Development of computational techniques, including simulation, through applications to physical problems. A survey of topics including the multi-body problem, celestial mechanics, scattering, chaos, percolation, fractals, random processes, Fourier techniques in wave phenomena, Monte Carlo methods, and image reconstruction techniques. Prerequisite: PHYS 1444 or equivalent.

PHYS 3183. MODERN PHYSICS LABORATORY. 1 Hour.
Supplements the topics covered in PHYS 3313. Prerequisite: PHYS 3313 or concurrent enrollment.

PHYS 3313. INTRODUCTION TO MODERN PHYSICS. 3 Hours.
A brief introduction to the theories of quantum mechanics and statistical mechanics followed by a survey of atomic physics, conductors, semiconductors and modern electronic devices, nuclear and sub-nuclear physics. Prerequisites: PHYS 1444 or equivalent and MATH 2425.

PHYS 3315. ASTROPHYSICS AND COSMOLOGY. 3 Hours.
Diverse concepts in theoretical physics are applied to a wide range of astrophysical problems. Topics include stellar properties, spectra, evolution, radiation transport, nuclear reactions, degenerate matter, orbital mechanics, galactic dynamics, introductory general relativity and cosmology. Prerequisite: PHYS 3313 and MATH 3318 or MATH 3319.

PHYS 3316. ASTROBIOLOGY I. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include properties of life, origin and evolution of life on Earth, terrestrial geology and habitability, environmental forcings, extremophiles, mass extinctions, meteorites, searches for life in the solar system. Offered as BIOL 3316, GEOL 3316 and PHYS 3316; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent.

PHYS 3321. INTERMEDIATE ELECTRICITY AND MAGNETISM. 3 Hours.
Vector algebra and vector calculus applied to electrostatics, magnetostatics, the study of dielectric materials, and boundary value problems. Prerequisite: PHYS 2311 and MATH 3318 or MATH 3319.

PHYS 3341. INTRODUCTION TO BIOLOGICAL PHYSICS. 3 Hours.
This course will cover four parts: Part I - History of Biological Physics and the general introduction of Cell biology; Part II - Physics of Biomaterials including polymer Physics; DNA & RNA; Protein Structures, Functions and Physics; Part III - Physics of life genetics including molecular motors, ATP functions, Photosynthesis and Physics of genetic regulations; and Part IV - Physics of biological detection including Physics of Radiation diagnosis; Optical Imaging; Magnetic Resonance Imaging and Ultrasound imaging. Prerequisite: PHYS 1442 or PHYS 1444 or equivalent.

PHYS 3342. INTRODUCTION TO NANO-BIO PHYSICS. 3 Hours.
The objective of this course is to provide students with an in-depth understanding of the physics of nanotechnology and its biological applications. The course is composed of two parts: nanoparticle physics and nano-bio physics. In the first part, the physics of nanotechnology will be introduced. The second part is the biological applications of nanotechnology, for which the focus will be on how to understand the physics of these applications. The understanding of the physical objectives for these applications will be helpful for the exploration of nano-biotechnology. Key advances from the recent literature will be reviewed and introduced to students as supplemental topics. Prerequisite: PHYS 1442 or PHYS 1444 or equivalent.

PHYS 3358. ASTROBIOLOGY II. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include basic properties of life, habitability of Earth, studies of possible life regarding Mars, Europa & Titan, space missions, exoplanets and exomoons, stellar habitable zones, multistellar systems, exoEarths, biomarkers, SETI, Fermi paradox, Drake equation, cosmology. Offered as BIOL 3358, GEOL 3358, and PHYS 3358; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent. Note that Astrobiology I is strongly recommended to students to be taken prior to Astrobiology II, but is not a prerequisite.
PHYS 3360. PHYSICS OF THE HUMAN BODY. 3 Hours.
This course will explore the fundamental laws and natural processes related to the mechanics, fluid dynamics, optics, and biophysics of the human body. It is designed for kinesiology pre-health, biology and nursing students seeking to understand the foundations and biophysical principles of human life. Note that Kinesiology students seeking to apply to science based graduate programs are advised to take PHYS 1441 and PHYS 1442 so the prerequisite requirement of these courses will not preclude the students for whom PHYS 3360 is intended from taking the course. Prerequisite: PHYS 1441.

PHYS 3366. SPECIAL TOPICS IN PRE-COLLEGE PHYSICAL SCIENCE INSTRUCTION. 3 Hours.
A laboratory oriented curriculum for teaching physical science and/or physics is developed and experienced. The developed curriculum is particularly appropriate for pre-college instruction. May be repeated for credit as the subject matter changes, but not more than six hours credit may be accumulated. Prerequisite: junior standing, six hours of science, three hours of education, and consent of the instructor.

PHYS 3445. OPTICS. 4 Hours.
Fundamental principles of physical and geometric optics, absorption and scattering, Planck's quantum theory of radiation, diffraction, interference, light sources, and spectra. Prerequisites: PHYS 1444 or equivalent and MATH 2425.

PHYS 3446. NUCLEAR AND PARTICLE PHYSICS. 4 Hours.
The study of atomic nuclei and the fundamental constituents of matter. Topics include nuclear structure, radioactivity, nuclear reactions, fission, fusion, particles and their interactions, the standard model of particle physics, experimental methods, accelerators, and examples from current research topics. Prerequisite: PHYS 3313.

PHYS 3455. ELECTRONICS. 4 Hours.
A study of electronic components and quantum devices and their application to circuits and instrumentation. Prerequisites: PHYS 3313 and MATH 2425.

PHYS 4081. UNDERGRADUATE RESEARCH IN PHYSICS. 0 Hours.
Independent research conducted on a selected topic under the supervision of a member of the Physics faculty. This course may be repeated. This is a non-credit course so cannot be used to meet degree requirements. Prerequisite: Permission of instructor.

PHYS 4117. INDIVIDUAL LEARNING BY SEMINAR. 1 Hour.
Individual instruction on using the seminar as a model of learning current topics in physics. An individual report is required. Prerequisite: 18 hours of physics and senior standing.

PHYS 4171. ADVANCED OPTICS LABORATORY. 1 Hour.
Special laboratory projects in advanced optics. Prerequisite: PHYS 3445 or permission of the instructor.

PHYS 4181. SPECIAL PROBLEMS. 1 Hour.
Selected projects in research or teaching laboratories, which may be repeated in any order for a total credit not to exceed four hours, unless authorized by the undergraduate advisor. Prerequisite: Permission from instructor and Physics undergraduate advisor.

PHYS 4185. ADVANCED ELECTRICITY AND MAGNETISM LABORATORY. 1 Hour.
Supplements the topics covered in PHYS 3321 and PHYS 4324. Prerequisite: PHYS 4324 or concurrent enrollment.

PHYS 4191. SPECIAL TOPICS IN PHYSICS. 1 Hour.
Selected topics arranged on an individual basis, which may be repeated with permission from instructor and Physics undergraduate advisor. Prerequisite: as determined for topic or permission from instructor.

PHYS 4271. ADVANCED OPTICS LAB. 2 Hours.
Special laboratory projects in advanced optics. Prerequisite: PHYS 3445 or permission of the instructor.

PHYS 4281. SPECIAL PROBLEMS. 2 Hours.
Selected projects in research or teaching laboratories, which may be repeated in any order for a total credit not to exceed four hours, unless authorized by the undergraduate advisor. Prerequisite: permission from the instructor and the Physics undergraduate advisor.

PHYS 4291. SPECIAL TOPICS. 2 Hours.
Selected topics arranged on an individual basis, which may be repeated with permission from instructor and Physics undergraduate advisor. Prerequisite: as determined for topic or permission from instructor.

PHYS 4315. THERMODYNAMICS AND STATISTICAL MECHANICS. 3 Hours.
Topics in classical thermodynamics include the laws of thermodynamics, Gibbs' and Helmholtz’s free energies, the Maxwell relations, heat capacities, entropy change calculations, phase and chemical changes. Statistical mechanics centers on the partition function and its applications, such as the entropy of an ideal gas, the Maxwell velocity distribution, the heat capacity of a solid, photon statistics, and blackbody radiation. Fermi-Dirac and Bose-Einstein statistics. Prerequisite: PHYS 3313 and MATH 2326 or permission of the instructor.

PHYS 4319. ADVANCED MECHANICS. 3 Hours.
Coupled oscillators, central forces, Lagrange's equations, Hamilton's canonical equations, the moment of inertia tensor, and the application of Euler's angles to rotational motion. Prerequisite: PHYS 2311, PHYS 3321, and MATH 3318 or MATH 3319, or permission of the instructor.

PHYS 4324. ADVANCED ELECTRICITY AND MAGNETISM. 3 Hours.
 Electromagnetic phenomena based on Maxwell's equations and particle-field interactions. Prerequisite: PHYS 3321 or permission of the instructor.
PHYS 4325. SOLID STATE PHYSICS. 3 Hours.
Classification of crystalline solids and elastic and thermal properties, electric and magnetic properties, and electronic properties of solids. An introduction to current research problems. Prerequisite: PHYS 4315 or permission of the instructor.

PHYS 4326. INTRODUCTION TO QUANTUM MECHANICS. 3 Hours.
Schroedinger's equation and implications, the free particle, the one-electron atom, the potential barrier, and perturbation theory. Prerequisite: PHYS 3313, MATH 3318 or MATH 3319, or permission of the instructor.

PHYS 4327. INTRODUCTION TO QUANTUM MECHANICS II. 3 Hours.
This is a continuation of Introduction to Quantum Mechanics (PHYS 4326). The topics that will be covered will include: time-independent perturbation theory for non-degenerate states, degenerate perturbation theory, atoms with one or two electrons and molecules, Fermi and Bose gases, time-dependent perturbation theory, scattering theory, and introduction to relativistic quantum mechanics. Prerequisite: PHYS 4326 or permission from instructor.

PHYS 4343. RESEARCH METHODS - UTEACH. 3 Hours.
The purpose of this course is to present UTeach students with the tools scientists use to solve scientific problems. These tools enable scientists to develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in more conventional science classes. These tools include: design of experiments to answer scientific questions; use of statistics to interpret experimental results and deal with sampling errors; mathematical modeling of scientific phenomena; finding and reading articles in the current scientific literature; applying scientific arguments in matters of social importance; writing scientific papers; reviewing scientific papers; oral presentation of scientific work; use of probes and computers to gather and analyze data; ethical treatment of human subjects; laboratory safety. Research Methods is primarily a laboratory course, and most of these topics are developed in connection with 4 independent inquiries UTeach students design and carry out. Written inquiries will be evaluated as examples of scientific writing. Prerequisite: C or better in SCIE 1201 or SCIE 1334 or concurrent enrollment; junior or senior standing.

PHYS 4391. SPECIAL TOPICS. 3 Hours.
Selected topics arranged on an individual basis, which may be repeated with permission from instructor and Physics undergraduate advisor. Prerequisite: as determined for topic or permission from instructor.

PHYS 4393. HONORS THESIS IN PHYSICS. 3 Hours.
Required of all students in the University Honors College. During the senior year the honors physics major will perform a research project under the direction of a Physics Department faculty member.

PHYS 5193. READINGS IN PHYSICS. 1 Hour.
Conference course. May be repeated for credit.

PHYS 5194. RESEARCH IN PHYSICS. 1 Hour.
Conference course with laboratory. May be repeated for credit.

PHYS 5294. RESEARCH IN PHYSICS. 2 Hours.
Conference course with laboratory. May be repeated for credit.

PHYS 5305. CHAOS AND NONLINEAR DYNAMICS. 3 Hours.
Introduction to basic principles and concepts of chaos theory and their applications in diverse fields of research. Topics include chaotic and non-chaotic systems, stability analysis and attractors, bifurcation theory, routes to chaos and universality in chaos, iterated maps, Lyapunov exponents, fractal dimensions, multifractals, hamiltonian chaos, quantum chaos, controlling chaos, self-organized systems, and theory of complexity.

PHYS 5306. CLASSICAL MECHANICS. 3 Hours.
General principles of analytical mechanics, the kinematics of rigid bodies, canonical transformation, Hamilton-Jacobi theory.

PHYS 5307. QUANTUM MECHANICS I. 3 Hours.
Matrix formulation, theory of radiation, angular momentum, perturbation methods.

PHYS 5308. QUANTUM MECHANICS II. 3 Hours.
Approximate methods, symmetry and unitary groups, scattering theory. Prerequisite: PHYS 5307.

PHYS 5309. ELECTROMAGNETIC THEORY I. 3 Hours.
Boundary value problems in electrostatics and magnetostatics, Maxwell's equations.

PHYS 5310. STATISTICAL MECHANICS. 3 Hours.
Fundamental principles of statistical mechanics, Liouville theorem, entropy, Fermi-Dirac distribution, Bose-Einstein distribution, Einstein condensation, density matrix, quantum statistical mechanics, kinetic methods, and transport theory.

PHYS 5311. MATHEMATICAL METHODS IN PHYSICS I. 3 Hours.
algebraic and analytical methods used in modern physics. Algebra: matrices, groups, and tensors, with application to quantum mechanics, the solid state, and special relativity. Analysis: vector calculus, ordinary and partial differential equations, with applications to electromagnetic and seismic wave propagation.

PHYS 5312. MATHEMATICAL METHODS IN PHYSICS II. 3 Hours.
Continuation of PHYS 5311 with a selection from the following topics. Algebra: matrix representations of the symmetric and point groups of solid state physics, matrix representations of the continuous groups O(3), SU(2), SU(3), SL(2,C), general covariance. Analysis: further study of analytic functions, Cauchy's theorem, Green's function techniques, orthogonal functions, integral equations. Prerequisite: PHYS 5311.
PHYS 5313. ELECTROMAGNETIC THEORY II. 3 Hours.
Modern tensorial treatment of classical electrodynamics, force on and field of a moving charge, derivation and application of 4-vector potential, Maxwell's equations in tensor form, field momentum and radiation. Prerequisite: PHYS 5309.

PHYS 5314. ADVANCED OPTICS. 3 Hours.
Electromagnetic wave equations, theory of diffraction, radiation scattering and dispersion, coherence and laser optics. Additional advanced topics of current interest.

PHYS 5315. SOLID STATE I. 3 Hours.
Crystal structure, lattice vibration, thermal properties, and band theory of solids.

PHYS 5316. SOLID STATE II. 3 Hours.
Electrical and magnetic properties of crystalline solids, magnetic resonance, and optical phenomena. Prerequisite: PHYS 5315.

PHYS 5317. STATISTICAL MECHANICS II. 3 Hours.
Methods in applied statistical mechanics. Topics may include fluctuations and critical phenomena, the Ising model, the master equation, transport in solids, and chaos. Prerequisite: PHYS 5310.

PHYS 5319. MATHEMATICAL METHODS IN PHYSICS III. 3 Hours.
Numerical methods for applied physics; computer techniques, numerical differentiation, integration, interpolation, extrapolation; differential equations, integral equations, statistical analysis; scientific computer library; artificial intelligence programming.

PHYS 5320. QUANTUM MECHANICS III. 3 Hours.
Quantum theory of radiation; relativistic equations; elements of quantum field theory; symmetries and gauge theories. Applications in elementary particle physics and solid-state physics. Prerequisite: PHYS 5308 and PHYS 5312.

PHYS 5325. INTRODUCTION TO ELEMENTARY PARTICLES I. 3 Hours.

PHYS 5326. INTRODUCTION TO ELEMENTARY PARTICLE PHYSICS II. 3 Hours.
Systematics of the quark model; the fundamental interactions of elementary particles; spin and relativistic kinematics; Dirac Equation; the standard electroweak model. Prerequisite: PHYS 5325.

PHYS 5328. SURFACE PHYSICS. 3 Hours.

PHYS 5330. PHYSICS OF SEMICONDUCTOR PROCESSING AND CHARACTERIZATION. 3 Hours.
Selection from the following topics: physics of crystal growth, lattice defects, impurity diffusion, ion-implantation, thin film growth and plasma etching. Physics of characterization techniques utilizing resistivity, carrier mobility and lifetimes, electrons, x-rays, ions, Rutherford backscattering, neutron activation analysis, positron annihilation spectroscopy, deep-level transient spectroscopy.

PHYS 5381. MECHANICS & HEAT FOR TEACHERS. 3 Hours.
This course is intended for students who wish to achieve a higher level of knowledge and effectiveness in fundamental physics (not available for M.S. or Ph.D. credit in Physics). Topics include: 1) Newton's laws of motion, gravitation, and planetary motion; 2) the basic laws of thermal and statistical physics; 3) oscillatory motion including waves and sound. Replaceable experiments will be demonstrated throughout the course.

PHYS 5382. ELECTROMAGNETISM FOR TEACHERS. 3 Hours.
This course is intended for students who wish to achieve a higher level of knowledge and effectiveness in fundamental physics (not available for M.S. or Ph.D. credit in Physics). Topics include: 1) Static charges, current flow, electric and magnetic fields; 2) simple DC/AC electrical circuits including examples from household circuit and practical electronic devices; 3) light and optics including examples such as cameras, microscopes and telescopes. Replaceable experiments will be demonstrated throughout the course.

PHYS 5383. MODERN PHYSICS FOR TEACHERS. 3 Hours.
This course is intended for students who wish to achieve a higher level of knowledge and effectiveness in fundamental physics (not available for M.S. or Ph.D. credit in Physics). Topics include: 1) Introduction to special relativity and quantum theory; 2) light and radiation; 3) applications to modern electrical devices; 4) nuclear and particle physics.

PHYS 5385. PHYSICS LAB TECHNIQUES FOR TEACHERS. 3 Hours.
This course is intended for students who wish to achieve a higher level of knowledge and effectiveness in fundamental physics (not available for M.S. or Ph.D. credit in Physics). Experiments demonstrating various topics are covered. Experiments include gravitational acceleration heat flow, harmonic motion, sound, electric magnetic fields, electric circuits, optic, x-rays and nuclear radiation.

PHYS 5391. SPECIAL TOPICS IN PHYSICS. 3 Hours.
Topics in physics, particularly from areas in which active research is being conducted, are assigned to individuals or small groups for intensive investigations. May be repeated for credit.

PHYS 5393. READINGS IN PHYSICS. 3 Hours.
Conference course. May be repeated for credit.
PHYS 5394. RESEARCH IN PHYSICS. 3 Hours.
Conference course with laboratory. May be repeated for credit.

PHYS 5398. THESIS. 3 Hours.

PHYS 5694. RESEARCH IN PHYSICS. 6 Hours.
Conference course with laboratory. May be repeated for credit.

PHYS 5698. THESIS. 6 Hours.

PHYS 6301. METHODS OF APPLIED PHYSICS I--ELECTRONICS. 3 Hours.
The analysis and design of electronic circuits for use in the laboratory. Transistors and integrated circuits in analog instrumentation. Digital logic. Information theory and signal processing.

PHYS 6302. METHODS OF APPLIED PHYSICS II--COMPUTERS IN PHYSICS. 3 Hours.
Applications of computers in physics. Acquisition and analysis of experimental data. Vector and parallel processing, image processing, simulation.

PHYS 6303. METHODS OF APPLIED PHYSICS III--SPECTROSCOPY. 3 Hours.
The principles (interactions, cross-sections, elastic and inelastic scattering, diffraction, coherence), the methodologies (sources, detectors, visualization), and applications (structure, dynamics, composition, excitations) of neutral and charged particle spectroscopies to condensed matter physics and materials science.

PHYS 6304. APPLIED PHYSICS INTERNSHIP. 3 Hours.
Applied physics and engineering research and training in industry or other science or engineering departments of U.T. Arlington or other institutions requiring applied physicists. Faculty supervision and submission of technical progress reports required.

PHYS 6391. SELECTED TOPICS IN APPLIED PHYSICS. 3 Hours.
Topics chosen from research areas in the Department of Physics or at one of the institutions or corporations participating in the traineeship program in applied physics; emphasis on industrial and engineering applications. May be repeated for credit.

PHYS 6399. DISSERTATION. 3 Hours.

PHYS 6604. APPLIED PHYSICS INTERNSHIP. 6 Hours.
Applied physics and engineering research and training in industry or other science or engineering departments of U.T. Arlington or other institutions requiring applied physicists. Faculty supervision and submission of technical progress reports required.

PHYS 6699. DISSERTATION. 6 Hours.

PHYS 6904. APPLIED PHYSICS INTERNSHIP. 9 Hours.
Applied physics and engineering research and training in industry or other science or engineering departments of U.T. Arlington or other institutions requiring applied physicists. Faculty supervision and submission of technical progress reports required.

PHYS 6999. DISSERTATION. 9 Hours.

PHYS 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Physics - Graduate Programs

Objective

The objective of graduate work in physics is to prepare the student for continued professional and scholarly development as a physicist. The Physics MS Degree Programs are designed to give the student advanced training in all fundamental areas of physics through formal courses and the options of some degree of specialization or participation in original research in one of a variety of projects directed by the faculty.

The Doctor of Philosophy in Physics and Applied Physics Program combines the traditional elements of a science doctoral program with courses in specifically applied topics and internship in a technological environment. It is designed to produce highly trained professionals with a broad perspective of the subject which may prepare them equally well for careers in academia or government or industry. Current research in the department is predominantly in the areas of condensed matter physics, materials science, astro physics, space physics and high-energy physics.

Admission Criteria

For unconditional admission to the Master of Science program in physics, the candidate must satisfy the general admission requirements of the University, including a minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by Graduate Admissions and favorable letters of recommendation from individuals able to assess the applicant’s potential for success in a Masters program. In addition, the candidate should have satisfactorily completed at least 24 undergraduate hours of advanced physics and supporting courses and should have minimal GRE scores of 143 in Verbal and 151 in Quantitative.

Applicants not meeting the minimum requirements of the department or the University for either program may still be considered for unconditional acceptance if other information in their application indicates a reasonable probability of success in graduate studies in physics.

PROBATIONARY ADMISSION

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first 12 hours of graduate coursework at UT Arlington.

DEFERRED AND PROVISIONAL ADMISSION

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

DENIAL OF ADMISSION

A candidate may be denied admission if he or she have less than satisfactory performance on the admission criteria described above.

SCHOLARSHIPS AND FELLOWSHIPS

Students who are admitted will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by Graduate Admissions, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

Degree Requirements: Master of Science

For the Thesis Option, a minimum of 30 hours is required for the Master of Science degree, of which 24 hours, including a six hour thesis (minimum registration), will be in physics, and six hours may be selected from physics, mathematics, chemistry, earth & environmental sciences, biology, or engineering as approved by the Graduate Advisor.

For the Non-thesis Option, a minimum of 36 hours is required for the Master of Science degree. They will be in physics. But up to nine hours may be selected from mathematics, chemistry, earth & environmental sciences, biology, or engineering as approved by the Graduate Advisor. The student is required to pass an oral comprehensive exam in the last semester.

Admission Criteria

For unconditional admission to the Doctor of Philosophy program, an applicant must have a master's degree or 30 semester hours of graduate credit in physics or a related field and satisfy the general admission requirements of the University, including a minimum graduate coursework GPA of 3.0 on a 4.0 scale, as calculated by Graduate Admissions and favorable letters of recommendation from individuals able to assess the applicant’s potential for success in a Ph.D. program. In addition, the applicant should have minimal GRE scores of 143 in Verbal and 151 in Quantitative.

Applicants not meeting the minimum requirements of the department or the University for either program may still be considered for unconditional acceptance if other information in their application indicates a reasonable probability of success in graduate studies in physics.
PROBATIONARY ADMISSION

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first 12 hours of graduate coursework at UT Arlington.

DEFERRED AND PROVISIONAL ADMISSION

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

DENIAL OF ADMISSION

A candidate may be denied admission if he or she have less than satisfactory performance on the admission criteria described above.

SCHOLARSHIPS AND FELLOWSHIPS

Students who are admitted will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

Degree Requirements: Doctor of Philosophy

Each candidate must complete the following program requirements:

1. Demonstration of competence in a minimum of 39 credit hours of core courses chosen under the guidance of the supervising committee from the following (or from courses approved in advance by the Graduate Studies Committee):

<table>

Physics - Undergraduate Programs

Academic Advising: 107 Life Science Building • 817.272.9685

Degree Programs

The Department of Physics offers five Bachelor of Science degree programs, a Bachelor of Arts degree program, and a Bachelor of Science in Physics/Master’s in Materials Science and Engineering Fast Track Program.

The Bachelor of Science degree programs include one which prepares students for careers in science and technology, another for medical school preparation, and a third for students wanting to minor in an Engineering discipline. When combined with the required UTeach education courses, the Bachelor of Science program is also appropriate for students who are interested in becoming schoolteachers.* The Bachelor of Arts degree in Physics is intended for students who seek a broader education while retaining a firm foundation in Physics. The Bachelor of Science degree in Physics/Master’s degree in Materials Science and Engineering Fast Track Program enables outstanding senior undergraduate students in Physics to satisfy degree requirements leading to a Bachelor's degree in Physics while simultaneously pursuing a Master's degree in Materials Science and Engineering.

Students considering a Physics major should schedule an appointment with the undergraduate advisor in Physics to discuss their degree and career options. Physics majors are encouraged to participate in research projects under faculty guidance for course credit or financial reward. In this way, undergraduate students have the choice of gaining hands-on experience from a variety of research disciplines, including astrophysics, biophysics, computational physics, high energy physics, medical physics, optics, space physics, and theoretical and experimental condensed matter physics.

The faculty of the Physics Department encourages qualified students to participate in the university’s Honors College. Scholarships may be offered every year to new students majoring in Physics.

* Students desiring certification for teaching at the secondary level must fulfill specific requirements for the appropriate Physics B.S. Teacher Certification degree.

Second Major in Physics

Students who satisfy the requirements for any other baccalaureate degree qualify to have Physics named as a second major upon completion of the following courses:

- PHYS 1443 GENERAL TECHNICAL PHYSICS I 4
- PHYS 1444 GENERAL TECHNICAL PHYSICS II 4
- PHYS 2311 MATHEMATICAL METHODS OF PHYSICS 3
- PHYS 3313 INTRODUCTION TO MODERN PHYSICS 3
- PHYS 3321 INTERMEDIATE ELECTRICITY AND MAGNETISM 3
- PHYS 4326 INTRODUCTION TO QUANTUM MECHANICS 3
- Physics electives approved by Physics undergraduate advisor and/or Chair of the Department of Physics 17

Total Hours 37

Teacher Certification

Students who are interested in earning a Bachelor of Science degree in Physics with Secondary Teacher Certification should refer to the Bachelor of Science in Physics with Physical Science Teacher Certification and the Bachelor of Science in Physics with Physics/Mathematics Teacher Certification degree plans for requirements. Teacher certification is offered through the UTeach program.

Requirements for a Bachelor of Science in Physics

This program provides students with a rigorous training in Physics, which is designed to prepare for a career in science, technology, and/or engineering research.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

PROGRAM REQUIREMENTS
Communication Competence - satisfied by PHYS 4117
Computer Use Competence - satisfied by Computer Science requirement for major

PROFESSIONAL COURSES
Select one of the following for Computer Science requirement:
DATA 3401  PYTHON FOR DATA SCIENCE 1  4
or higher-numbered CSE course
PHYS 2321  COMPUTATIONAL PHYSICS
MATH 3345  NUMERICAL ANALYSIS AND COMPUTER APPLICATIONS
or other suitable course approved by Physics undergraduate advisor and/or Chair of the Department of Physics
CHEM 1441  GENERAL CHEMISTRY I  4
CHEM 1442  GENERAL CHEMISTRY II  4
courses for majors offered in the departments of Biology and/or Earth and Environmental Sciences  6
MATH 2326  CALCULUS III  3
MATH 3319  DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA  3
or MATH 3318  DIFFERENTIAL EQUATIONS
MATH 4000-level elective  3
Students may obtain a Mathematics minor by consulting with the undergraduate advisor for the Department of Mathematics to discuss additional requirements.

MAJOR
PHYS 2311  MATHEMATICAL METHODS OF PHYSICS  3
PHYS 3313  INTRODUCTION TO MODERN PHYSICS  3
PHYS 3183  MODERN PHYSICS LABORATORY  1
PHYS 3321  INTERMEDIATE ELECTRICITY AND MAGNETISM  3
PHYS 4117  INDIVIDUAL LEARNING BY SEMINAR  1
PHYS 4315  THERMODYNAMICS AND STATISTICAL MECHANICS  3
PHYS 4319  ADVANCED MECHANICS  3
PHYS 4324  ADVANCED ELECTRICITY AND MAGNETISM  3
PHYS 4326  INTRODUCTION TO QUANTUM MECHANICS  3
PHYS electives approved by Physics undergraduate advisor and/or Chair of the Department of Physics  14

General Electives  10

36 hours of coursework must be advanced (3000/4000-level) to earn degree.

Total Hours  123

*  See General Core Requirements (p. 50) for approved courses.

TYPICAL COURSE SEQUENCE
Details of a personal course sequence should be made with the guidance of the Physics undergraduate advisor, particularly since many courses in Physics are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426 CALCULUS I, in the first semester.

**Requirements for a Bachelor of Science in Physics with Engineering Emphasis**

This program allows students to augment a rigorous training in Physics with the choice of a minor in a suitable engineering discipline, thus combining a theoretical understanding of the basic physical theories with a practical, more detailed understanding given in the College of Engineering. Such a combination would be a bonus for employment in the engineering-type professions often chosen by Physics majors.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

Requirements for a Bachelor of Science in Physics with Medical School Preparation

This program offers the broad background in fundamental science and strong problem-solving ability of a Physics degree as well as specific Biology and Chemistry medical school requirements. The combination of skills developed in this program is designed to provide the intellectual foundation necessary for excellence in research and the practice of medicine.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

36 hours of coursework must be advanced (3000/4000-level) to earn degree.

Total Hours 124

* See General Core Requirements (p. 50) for approved courses.

**TYPICAL COURSE SEQUENCE**

Details of a personal course sequence should be made with the guidance of the Physics undergraduate advisor, particularly since many courses in Physics are not offered every semester. Consultation with the Health Professions advisor is also encouraged. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426 CALCULUS I, in the first semester.

Requirements for a Bachelor of Arts in Physics

This program is intended for students who seek a broader education while retaining a firm foundation in Physics.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

PRE-PROFESSIONAL COURSES

RECOMMENDED CORE REQUIREMENTS

ENGL 1301 RHETORIC AND COMPOSITION I 3

ENGL 1302 RHETORIC AND COMPOSITION II 3

Creative Arts *

POLS 2311 GOVERNMENT OF THE UNITED STATES 3

POLS 2312 STATE AND LOCAL GOVERNMENT 3

Language, Philosophy and Culture *

PHYS 1443 GENERAL TECHNICAL PHYSICS I 4

PHYS 1444 GENERAL TECHNICAL PHYSICS II 4

MATH 1426 CALCULUS I 4

MATH 2425 CALCULUS II 4

Social/Behavioral Science *

HIST 1301 HISTORY OF THE UNITED STATES TO 1865 3

HIST 1302 HISTORY OF THE UNITED STATES, 1865 TO PRESENT 3

Foundational Component Area *

PROGRAM REQUIREMENTS

Communication Competence - satisfied by PHYS 4117

Computer Use Competence - satisfied by Computer Science requirement for major

PROFESSIONAL COURSES

Select one of the following for Computer Science requirement:

CSE 1310 INTRODUCTION TO COMPUTERS & PROGRAMMING 3

or higher-numbered CSE course

PHYS 2321 COMPUTATIONAL PHYSICS

MATH 3345 NUMERICAL ANALYSIS AND COMPUTER APPLICATIONS

or other suitable course approved by Physics undergraduate advisor and/or Chair of the Department of Physics

courses for majors in the departments of Biology, Chemistry and Biochemistry, and/or Earth and Environmental Sciences 8

MATH 2326 CALCULUS III 3

MATH 3319 DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA 3

or MATH 3318 DIFFERENTIAL EQUATIONS

Modern and Classical Languages 4

MINOR: 18 or more hours as required by the appropriate department 18

MAJOR

PHYS 2311 MATHEMATICAL METHODS OF PHYSICS 3

PHYS 3313 INTRODUCTION TO MODERN PHYSICS 3

PHYS 3183 MODERN PHYSICS LABORATORY 1

PHYS 3321 INTERMEDIATE ELECTRICITY AND MAGNETISM 3
**PHYS 4117**  
**INDIVIDUAL LEARNING BY SEMINAR**  
1

**PHYS 4315**  
**THERMODYNAMICS AND STATISTICAL MECHANICS**  
3

**PHYS 4326**  
**INTRODUCTION TO QUANTUM MECHANICS**  
3

**PHYS electives approved by Physics undergraduate advisor and/or Chair of the Department of Physics**  
11

**General Electives**  
7

36 hours of coursework must be advanced (3000/4000-level) to earn degree.

**Total Hours**  
123

* See General Core Requirements (p. 50) for approved courses.

### TYPICAL COURSE SEQUENCE

Details of a personal course sequence should be made with the guidance of the Physics undergraduate advisor, particularly since many courses in Physics are not offered every semester, as well as the undergraduate advisor in the appropriate department for the minor. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426 CALCULUS I, in the first semester.

### Requirements for a Bachelor of Science in Physics with a Master's in Materials Science and Engineering (Fast Track Program)

The Fast Track Program enables outstanding senior undergraduate students in Physics to satisfy degree requirements leading to a Bachelor's degree in Physics while simultaneously pursuing a Master's degree (M. Engr.) in Materials Science and Engineering. The essential elements of the Fast Track Program involve the use of up to 9 hours of graduate coursework to apply towards an undergraduate degree in Physics.
Students who complete PHYS 1443 and PHYS 1444 with a GPA of 3.0 and express an interest in the Fast Track Program will be designated as "Fast Track Bound" and encouraged to maintain a GPA of 3.0 or better to retain their eligibility. Students who have been identified as "Fast Track Bound" as well as other outstanding undergraduates in Physics can apply for the Fast Track Program when they are within 30 hours of completing their Bachelor's degree. They must have completed at least 30 hours at UTA, have a GPA of at least 3.0 in those courses, and have an overall GPA of 3.0 or better in all college courses. Additionally, they must have completed 9 hours of specified undergraduate Foundation Courses that are listed below with a GPA of 3.3 in these courses.

**FOUNDATION COURSES – Required for Admission into the Fast Track Program**

Once admitted, students will be allowed to take a combination of advanced undergraduate and graduate courses. Students can use 9 hours of MSE graduate-level (or 3000/4000-level) coursework towards their Physics degree.

For more details about the program, please contact the Physics undergraduate advisor and/or the graduate advisor in Materials Science and Engineering.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 50).

PHYS electives approved by Physics undergraduate advisor and/or Chair of the Department of Physics  12

**General Electives**  8

36 hours of coursework must be advanced (3000/4000-level) to earn degree; up to 9 hours can be graduate-level (only for approved MSE coursework).

Total Hours  120

Students should refer to the M.Engr. degree in Materials Science and Engineering (p. 616) section of the catalog for detailed requirements for that degree.

* See General Core Requirements (p. 50) for approved courses.

**TYPICAL COURSE SEQUENCE**

Details of a personal course sequence should be made with the guidance of the Physics undergraduate advisor and, upon admission to the Fast Track Program, the graduate advisor in Materials Science and Engineering. Many courses in Physics are not offered every semester, and MSE coursework and sequences are determined by the Materials Science and Engineering Department. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426 CALCULUS I, in the first semester.

COURSES

PSYC 1315. INTRODUCTION TO PSYCHOLOGY. 3 Hours. (TCCN = PSYC 2301)
The fundamental methods and content of scientific psychology. Concentration on the understanding of basic principles.

PSYC 2300. STATISTICS IN PSYCHOLOGY. 3 Hours.
This course covers descriptive and inferential statistics used in psychological research and assessment. It includes measurement, characteristics of distributions; measures of central tendency and variability; transformed scores; correlation and regression; probability theory; and hypotheses testing and inference. PSYC 2300 and PSYC 3300 can be taken concurrently. Prerequisite: PSYC 1315, MATH 1302 (or equivalent).

PSYC 2317. BASIC CONCEPTS IN HUMAN SEXUALITY. 3 Hours. (TCCN = PSYC 2306)
The physiological, psychological, and sociological aspects of human sexuality. Offered as BIOL 2317, HEED 2317, PSYC 2317, and WOMS 2317. Credit will be granted for one of these courses only. Students seeking certification in Health Education must enroll in HEED 2317. Students seeking credit toward their science requirement must enroll in BIOL 2317. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, medical technology, psychology, or sociology.

PSYC 3131. PSYCHOLOGY SERVICE LEARNING. 1 Hour.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

PSYC 3200. EXPERIENCING RESEARCH IN PSYCHOLOGY. 2 Hours.
This is a practical, project-based course that focuses on laboratory and field experience in designing, conducting, and reporting psychology research. It includes all stages of the research process including the formulation of research hypotheses, review and evaluation of published literature, choice of research design and measurement variables, data collection and analysis, and presentation of results in oral and written reports. Prerequisite: PSYC 2300 and PSYC 3300.

PSYC 3231. PSYCHOLOGY COMMUNITY SERVICE LEARNING. 2 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

PSYC 3300. RESEARCH METHODS IN PSYCHOLOGY. 3 Hours.
This course covers experimental designs and research methodologies commonly used in the field of psychology. It includes strategies for identifying meaningful hypothesis, conducting literature reviews, implementing research practices, and interpreting and evaluating statistical conclusions and empirical research findings. Challenges related to sociocultural factors will also be analyzed. PSYC 2300 and PSYC 3300 can be taken concurrently.

PSYC 3301. PSYCHOLOGY OF HUMAN RELATIONS. 3 Hours.
Workplace applications of topics including person perception, social influence, group processes and dynamics, interpersonal relations, teamwork, leadership, workplace discrimination, diversity, stress, and burnout.
PSYC 3302. BUSINESS PSYCHOLOGY. 3 Hours.
A survey of the fields of industrial and organizational psychology, focusing on the application of psychological theory to understanding and solving problems in the workplace. Topics include recruitment, employee selection and training, the effects of attitudes, motivation, group dynamics and leadership, job satisfaction, productivity and morale.

PSYC 3303. DRUGS AND BEHAVIOR. 3 Hours.
A survey of the psychoactive agents, their therapeutic uses, and social abuses. Alcohol, nicotine, caffeine, narcotics, hallucinogens, stimulants, and tranquilizers. Offered as BIOL 3303, HEED 3303, and PSYC 3303; credit will be granted only once. May not be used for biology grade point calculation or biology credit toward a B.S. degree in biology, microbiology, or medical technology. Students seeking certification in health education must enroll in HEED 3303.

PSYC 3304. ANALYSIS & MANAGEMENT OF BEHAVIOR. 3 Hours.
Behavioral control techniques for remediation and prevention of problem behaviors and for optimization of normal behaviors in real life settings. Contrasting therapeutic approaches, the ethics of behavior control, and the impact of behaviorism on society. Prerequisite: PSYC 1315 or permission of the instructor.

PSYC 3305. PSYCHOLOGY OF EMPLOYEE TRAINING. 3 Hours.
An introduction to theories, research, and techniques related to training needs analysis, program design and delivery, and training evaluation in organizational settings.

PSYC 3306. PSYCHOLOGY OF CREATIVITY AND CREATIVE THINKING. 3 Hours.
Research and theory relevant to the traits, attitudes, and abilities which are related to creative functioning with emphasis on the conceptual-cognitive components of creative formation and problem solving. Methods of stimulating creative behavior in individuals and in groups. Relevant research findings provide the substance of the course. Prerequisite: PSYC 1315.

PSYC 3307. UNDERSTANDING PSYCHOLOGY THROUGH FILM. 3 Hours.
An exploration of psychological issues represented in film. Using an interdisciplinary approach, the medium of film will be used to discuss psychological mechanisms as well as psychotherapeutic processes. Human behaviors such as those involved in character and plot development, as well as the perspectives of filmmakers and movie-goers will be explored. Prerequisite: Six hours of behavioral science (i.e., psychology, sociology, anthropology, and others).

PSYC 3308. FORENSIC PSYCHOLOGY. 3 Hours.
Examines the legal system's basic assumptions and procedures in light of social scientific evidence pertaining to human behavior relevant to the rights of defendants, victims, children, and mental patients, including areas of clinical psychology in which psychologists act as expert witnesses and consultants.

PSYC 3310. DEVELOPMENTAL PSYCHOLOGY. 3 Hours.
Human development and growth from conception through old age, concerned with the physical, behavioral, and social aspects. Prerequisite: PSYC 1315.

PSYC 3311. ADULTHOOD AND AGING. 3 Hours.
Developmental changes in major psychological processes and abilities are related to health, sex, ethnicity, socioeconomic status, and lifestyle. Emphasis is on models of psychobiological changes with age and current empirical knowledge having implications for the preservation of intellectual function, mental health, and physical condition. Prerequisite: PSYC 1315.

PSYC 3312. SOCIAL & PERSONALITY DEVELOPMENT. 3 Hours.
A review of psychological theory and research on age trends and individual differences in personality and social development. Topics include emotional development, aggression, identity and achievement, attachment, gender role development, and familial and extrafamilial influences on development. Prerequisite: PSYC 1315.

PSYC 3313. CULTURAL PSYCHOLOGY. 3 Hours.
Theory and research regarding psychological issues related to gender and cultural diversity. These issues will be approached from different perspectives within psychology, including clinical, developmental, social, health, and cognitive psychology. Prerequisite: PSYC 1315. Offered as PSYC 3313 and WOMS 3313; credit will be granted only once.

PSYC 3314. PSYCHOLOGY OF PERSONALITY. 3 Hours.
A broad survey of major theories, assessment methods, and representative research in the field of personality. The theoretical approaches considered include the psychoanalytic, neo-Freudian, trait, biological, humanistic, behavioral social/learning, and cognitive approaches. Prerequisite: PSYC 1315.

PSYC 3315. SOCIAL PSYCHOLOGY. 3 Hours.
The theories and research dealing with individual behavior in the social environment. Social influence processes, interpersonal attraction, group behavior, aggression, conformity, and attitude formation and change. Prerequisite: PSYC 1315.

PSYC 3317. INTRODUCTION TO CLINICAL AND COUNSELING PSYCHOLOGY. 3 Hours.
The student is introduced to psychodiagnostic procedures and the basic approaches of counseling and psychotherapy. Prerequisite: PSYC 1315.

PSYC 3318. ABNORMAL PSYCHOLOGY. 3 Hours.
Major forms of psychopathology. Classification, etiology, and treatment of major disorders. Prerequisite: PSYC 1315.

PSYC 3319. PSYCHOLOGY OF ADOLESCENCE. 3 Hours.
A topical study of adolescent behavioral and psychological development with emphasis on theory, methods of inquiry, and practical implications. Prerequisite: PSYC 1315.
PSYC 3320. BEHAVIOR AND MOTIVATION. 3 Hours.
Theory and research involving relation of motivation and emotion to learning theory, social behavior, personality, and development. Prerequisite: PSYC 1315.

PSYC 3322. BRAIN AND BEHAVIOR. 3 Hours.
An introduction to the anatomical structures and physiological processes that determine behavior. Topics include the acquisition and processing of sensory information, the neural control of movement, and the biological bases of complex behaviors (such as learning, memory, sex, language, and addiction), as well as the basic functioning of the nervous system. Offered as BIOL 3322 and PSYC 3322. Credit will be granted only once. BIOL 3322 prerequisite: BIOL 1441, BIOL 1442. PSYC 3322 prerequisite: BIOL 1441 or PSYC 1315.

PSYC 3326. ANIMAL BEHAVIOR. 3 Hours.
A survey of research and theory comparing behavior at various phyletic levels. Offered as BIOL 3326 and PSYC 3326. Credit will be granted only once. One of these courses. Prerequisite: BIOL 1441, BIOL 1442.

PSYC 3331. PSYCHOLOGY COMMUNITY SERVICE LEARNING. 3 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

PSYC 3334. COGNITIVE PROCESSES. 3 Hours.
Current theory and research in cognitive processes such as memory, information processing, concept formation, and problem solving. Prerequisite: PSYC 1315.

PSYC 3351. PRACTICUM IN APPLIED BEHAVIOR ANALYSIS. 3 Hours.
Students receive supervised experience in the application of behavior modification procedures to everyday behavior problems. Practicum students work off-campus in a community setting. The course provides an opportunity to develop skills in setting behavior objectives, analyzing contingencies of reinforcement, and designing, writing, and implementing practical behavior change programs. Prerequisite: PSYC 3304, PSYC 4310 and Permission of the Instructor.

PSYC 3356. EVOLUTIONARY PSYCHOLOGY. 3 Hours.
A consideration of how evolution has influenced social, cognitive and developmental processes in humans. Comparisons between humans and other species, and between different human cultures will be included. Topics such as mate selection, marriage and family practices, child rearing, social relations, language, thinking, neuropsychology, learning and related topics will be considered. Methods of gathering data and theory about evolutionary processes will be stressed. Prerequisite: PSYC 3315.

PSYC 3343. RESEARCH DESIGN & STATISTICS II. 4 Hours.
Theoretical and practical approaches to research methodology, statistical analyses and techniques of report research. Prerequisite: PSYC 2443.

PSYC 4081. VOLUNTEER RESEARCH IN PSYCHOLOGY. 0 Hours.
Volunteer research hours (0 credit hours) Participation in a group research project on a selected topic as designated by the directing professor. Maybe repeated. Intended for advanced undergraduate majors. Prerequisite: Instructor permission; other prerequisites may be implemented at the discretion of each individual laboratory research mentor.

PSYC 4161. READINGS IN PSYCHOLOGY. 1 Hour.
Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper as arranged. Prerequisite: permission of the instructor.

PSYC 4181. RESEARCH IN PSYCHOLOGY. 1 Hour.
Research problems arranged on an individual basis, to be conducted by the student, and written in publishable journal format. Prerequisite: permission of the instructor.

PSYC 4191. UNDERGRADUATE TEACHING EXPERIENCE. 1 Hour.
Teaching effectively requires mastering the content of your discipline, but also numerous other skills. This course will prepare undergraduate students to be challenging, inspiring, engaging teachers and/or communicators of psychological topics by providing hands-on experience as teaching assistants. Prerequisite: Students must complete Introduction to Psychology (PSYC 1315) and PSYC 4391 (Undergraduate Teaching Experience) before enrolling in this course. Students must have a minimum GPA of 3.5 and be a psychology major (other majors may be approved with instructor permission). Students must have earned a B or better in the class for which they will serve as a TA and instructor approval is required.

PSYC 4261. READINGS IN PSYCHOLOGY. 2 Hours.
Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper as arranged. Prerequisite: permission of the instructor.

PSYC 4281. RESEARCH IN PSYCHOLOGY. 2 Hours.
Research problems arranged on an individual basis, to be conducted by the student, and written in publishable journal format. Prerequisite: permission of the instructor.
PSYC 4291. UNDERGRADUATE TEACHING EXPERIENCE. 2 Hours.
Teaching effectively requires mastering the content of your discipline, but also numerous other skills. This course will prepare undergraduate students to be challenging, inspiring, engaging teachers and/or communicators of psychological topics by providing hands-on experience as teaching assistants. Prerequisite: Students must complete Introduction to Psychology (PSYC 1315) and PSYC 4391 (Undergraduate Teaching Experience) before enrolling in this course. Students must have a minimum GPA of 3.5 and be a psychology major (other majors may be approved with instructor permission). Students must have earned a B or better in the class for which they will serve as a TA and instructor approval is required.

PSYC 4301. PRINCIPLES OF NEUROSCIENCE. 3 Hours.
An in depth understanding of the mechanisms underlying the function of the nervous system. Topics include cellular mechanisms of neural communication, neuroanatomy and neurophysiology of sensory, motor, and autonomic systems, cellular mechanisms of learning and memory, and neuropathological conditions that contribute to neurological disorders. Course offered as BIOL 4301 and PSYC 4301. Credit will be granted only once. Prerequisite: PSYC 3322 (BIOL 3322) or permission of instructor.

PSYC 4309. NEUROPHARMACOLOGY. 3 Hours.
A survey of how drugs affect the nervous system. General topics will include cellular and molecular foundations of neuropharmacology, receptors and modulation of neural signaling. The specific role of neurotransmitter systems (i.e. acetylcholine, dopamine, norepinephrine, serotonin, and opiate) will be explored. Offered as BIOL 4309 and PSYC 4309; credit will be granted only once. Prerequisite: one or more of the following courses or permission of instructor: BIOL 1441 or PSYC 3322/BIOL 3322 or BIOL 3301.

PSYC 4310. BEHAVIOR THERAPY. 3 Hours.
Current theory and practice in the analysis and treatment of psychological disorders using problem solving techniques derived from the experimental analysis of behavior. Behavioral treatment strategies are reviewed for chronic disorders such as fears and phobias, obsessive-compulsive disorder, depression, and anxiety as well as childhood disorders such as language delay, autism, attention deficits, and hyperactivity. Prerequisite: PSYC 1315.

PSYC 4325. DEVELOPMENTAL PSYCHOBIOLOGY. 3 Hours.
The biological basis of behavioral development. A survey of the influences of maternal factors, genes, hormones, teratogens, early nutrition, and environmental change upon the maturation of the central nervous system. Basic concepts such as critical periods, the organization of behavioral systems, neural plasticity, and the ontogeny of consciousness. Also offered as BIOL 4325; credit will be granted only once. Students seeking credit toward the science requirement must enroll in BIOL 4325. Prerequisite: PSYC 3310 or PSYC 3322 or BIOL 3322 or BIOL 3346.

PSYC 4327. BEHAVIORAL GENETICS. 3 Hours.
Genetic influences on behavioral phenotypes. Research strategies, quantitative methods, and pharmacogenetic approaches to the brain; sociality and altruism; the personality, emotionality and intelligence; psychopathology; chromosomal abnormalities; forensic implications of genetic counseling. Offered as BIOL 4327 and PSYC 4327; credit will be granted only once. Students seeking credit toward the science requirement must enroll in BIOL 4327. Prerequisite: PSYC 3315 or BIOL 1441.

PSYC 4329. ANIMAL LEARNING AND COGNITION. 3 Hours.
A comprehensive survey of psychological, biological, and ethological perspectives on learning, memory, and cognition in animals. Prerequisite: C or better in PSYC 3300 or permission of instructor.

PSYC 4332. THEORIES OF HUMAN LEARNING AND MEMORY. 3 Hours.
A comprehensive survey of theories and research concerning basic learning and memory processes and their application to a variety of areas, e.g., eyewitness memory, false memory syndrome, autobiographical memory, memory decline in aging. Theoretical and background perspectives include associative mechanism, information processing approaches, and neurophysiological bases for encoding, storage, and retrieval. Prerequisite: PSYC 1315, and Junior Standing.

PSYC 4335. COGNITIVE DEVELOPMENT. 3 Hours.
Theories and phenomena concerning development of all aspects of human cognition across the life span. Prerequisite: C or better in PSYC 3300.

PSYC 4338. COGNITIVE NEUROSCIENCE. 3 Hours.
Theory and research on the relationship between the brain and human cognition. Normal functioning and comparisons between normal and disordered states (e.g., Alzheimer’s disease, amnesia, localized brain injury, age changes). Prerequisite: PSYC 4332 or PSYC 3334.

PSYC 4339. PSYCHOLOGY OF JUDGMENT AND CHOICE. 3 Hours.
Research and theory on the errors of intuitive judgment and how formal decision methods improve choices. Prerequisite: C or better in PSYC 2300.

PSYC 4350. SPORT PSYCHOLOGY. 3 Hours.
The course will provide an overview of the growing field of Sport Psychology, which involves applying psychological science to sports. Topics such as maximizing sports performance, elite performance and personality, motivation techniques in sports, leadership skills in sports, etc., will be covered.

PSYC 4355. THE HISTORY OF PSYCHOLOGY. 3 Hours.
The evolution of psychology as a science, up to and including contemporary developments. Prerequisite: nine hours of psychology.

PSYC 4357. HEALTH PSYCHOLOGY. 3 Hours.
This course provides a broad introduction to health psychology and its interface with the medical world. The course provides a balanced presentation of the important issues in the field, as well as specific content topics that are especially relevant today to better understand health and illness. Offered as BIOL 4357, HEED 4357, and PSYC 4357. Students seeking science requirement credit must enroll in BIOL 4357; students seeking Certification in Health must enroll in HEED 4357. Prerequisite: PSYC 1315 or BIOL 1333 or BIOL 1441 or BIOL 2457; junior standing recommended.
PSYC 4359. SELECTED TOPICS IN PSYCHOLOGY. 3 Hours.
Topics pertinent to the field of psychology. Topic, format, and prerequisites to be determined by the instructor. May be repeated for credit as different topics are offered. Prerequisite: to be determined by the instructor.

PSYC 4361. READINGS IN PSYCHOLOGY. 3 Hours.
Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper as arranged. Prerequisite: permission of the instructor.

PSYC 4381. RESEARCH IN PSYCHOLOGY. 3 Hours.
Research problems arranged on an individual basis, to be conducted by the student, and written in publishable journal format. Prerequisite: permission of the instructor.

PSYC 4391. FOUNDATIONS OF UNDERGRADUATE TEACHING EXPERIENCE. 3 Hours.
Teaching effectively requires mastering the content of your discipline, but also numerous other skills. This course will prepare undergraduate students to be challenging, inspiring, engaging teachers and/or communicators of psychological topics by covering important professional issues, including: planning a syllabus, structuring a lecture, navigating class discussions, communicating effectively with different types of classes, responding to student input, dealing with classroom incivilities, responding to student assignments, using technology, and responding to student work. This course will also assist students through the process of teaching as learning through addressing cognitive theories underlying the learning process. Prerequisite: Students must complete Introduction to Psychology (PSYC 1315) before enrolling in this course. Students must have a minimum GPA of 3.5 and be a psychology major (other majors may be approved with instructor permission). Students must have earned a B or better in the class for which they will serve as a TA and instructor approval is required.

PSYC 4398. HONORS THESIS. 3 Hours.
Students may take this course only at the invitation of the department. Consists of a research project of a type and level which would be publishable in one of the psychological journals. Particular emphasis is placed on independent work by the student. Prerequisite: departmental invitation.

PSYC 4410. ADVANCED TOPICS IN DEVELOPMENTAL PSYCHOLOGY. 4 Hours.
This course will cover current topics in Developmental Psychology using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Developmental Psychology. Completion of the course is essential for students who are interested in pursuing a career in Developmental Psychology research. Prerequisites: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3310. Junior standing recommended.

PSYC 4411. ADVANCED TOPICS IN PERSONALITY. 4 Hours.
This course will cover current topics in Personality using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Personality. Completion of the course is essential for students who are interested in pursuing a career in Personality research. Prerequisites: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3314. Junior standing recommended.

PSYC 4412. ADVANCED TOPICS IN SOCIAL PSYCHOLOGY. 4 Hours.
This course will cover current topics in Social Psychology using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Social Psychology. Completion of the course is essential for students who are interested in pursuing a career in Social Psychology research. Prerequisites: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3315. Junior standing recommended.

PSYC 4415. INTERNSHIP IN PSYCHOLOGY. 4 Hours.
Provides the student with an opportunity to apply academic experience to practical situations by serving for a specified number of hours as participant-observer in an off-campus activity. The activity will be reflected in the title on the transcript. Internships must be arranged with an internship supervisor and/or faculty member in the semester prior to enrolling for this course. Prerequisite: C or better in PSYC 2300 and PSYC 3300.

PSYC 4420. EXPERIMENTAL ANALYSIS OF BEHAVIOR. 4 Hours.
A laboratory course examining basic principles of behavior control and analysis with single animals and automated testing apparatus. Emphasis is placed on individualized, self-paced instruction and creative experimentation. Prerequisite: C or better in either PSYC 3304 or PSYC 4310. C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3304.

PSYC 4421. ADVANCED TOPICS IN NEUROSCIENCE. 4 Hours.
This course will cover current topics in Neuroscience using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Neuroscience. Completion of the course is essential for students who are interested in pursuing a career in Neuroscience research. Prerequisites: C or better in BIOL 3322 or PSYC 3322 required.

PSYC 4430. ADVANCED TOPICS IN CLINICAL COUNSELING. 4 Hours.
This course will cover current topics in Clinical and Counseling using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Clinical and Counseling. Completion of the course is essential for students who are interested in pursuing a career in Clinical and Counseling research. Prerequisite: PSYC 3317; PSYC 3318; C or better in PSYC 2300, PSYC 3200, and PSYC 3300; junior standing recommended.
PSYC 4431. ADVANCED TOPICS IN COGNITIVE SCIENCE. 4 Hours.
This course will cover current topics in Cognitive Psychology using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Cognitive Psychology. Completion of the course is essential for students who are interested in pursuing a career in Cognitive Psychology research. May be repeated for credit as specific topics vary. Prerequisite: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3334. Junior standing recommended.

PSYC 4432. ADVANCED TOPICS IN HEALTH. 4 Hours.
This course will cover current topics in Health Psychology using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Health Psychology. Completion of the course is essential for students who are interested in pursuing a career in Health Psychology research. May be repeated for credit as specific topics vary. Prerequisite: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 4357. Junior standing recommended.

PSYC 5110. PROFESSIONAL DEVELOPMENT. 1 Hour.
The philosophy and methods of conducting a university class for undergraduates are examined. Specific tips and suggestions for managing course materials, lectures, audiovisual aids, grading, etc. will be presented. The role of the university instructor as a researcher as well as a teacher will be elaborated. Specific topics will include the ethics and regulation of research, service as a journal referee, corresponding with peers, participating in a research team, manuscript preparation, presentation at professional conferences, and submitting material for publication. Prerequisite: admission to the graduate program in psychology or permission of the instructor. Graded F, P. Prerequisite: Admission to the graduate program in psychology or permission of the instructor.

PSYC 5127. INDUSTRIAL AND ORGANIZATIONAL INTERNSHIP. 1 Hour.
This course is preparation for and supervision of internship activities in an organization or organizations in an area related to area of interest or training. No credit will be given for previous experience or activities. Course may be repeated for credit. Prerequisite: Consent of instructor.

PSYC 5151. READINGS IN PSYCHOLOGY. 1 Hour.
Independent readings under the supervision of an individual faculty member. Students wishing to conduct research should sign up for PSYC 5191, PSYC 5291, or PSYC 5391. May be repeated for credit with consent of the Graduate Advisor. Graded A/B/C/D/F/I/P/W. Prerequisite: consent of the instructor.

PSYC 5191. RESEARCH IN PSYCHOLOGY. 1 Hour.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 5227. INDUSTRIAL AND ORGANIZATIONAL INTERNSHIP. 2 Hours.
This course is preparation for and supervision of internship activities in an organization or organizations in an area related to area of interest or training. No credit will be given for previous experience or activities. Course may be repeated for credit. Prerequisite: Consent of instructor.

PSYC 5251. READINGS IN PSYCHOLOGY. 2 Hours.
Independent readings under the supervision of an individual faculty member. Students wishing to conduct research should sign up for PSYC 5191, PSYC 5291, or PSYC 5391. May be repeated for credit with consent of the Graduate Advisor. Graded A/B/C/D/F/I/P/W. Prerequisite: consent of the instructor.

PSYC 5291. RESEARCH IN PSYCHOLOGY. 2 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 5301. BRAIN & BEHAVIOR. 3 Hours.
A comprehensive survey of physiological processes and structures underlying human and animal behavior.

PSYC 5307. RESEARCH METHODS. 3 Hours.
This course considers basic and advanced aspects of methodology used in psychological research, including experimental design, methodologies that combine disciplinary approaches (e.g., biomedical, behavioral, and field and laboratory approaches).

PSYC 5309. HEALTH PSYCHOLOGY. 3 Hours.
A survey of current theory and research in health psychology, including basic research in health and behavior, biobehavioral contributions to illness and disability, and fundamental relationships among the brain, bodily function, and behavior that may affect health and well-being. It will also include clinical and translational topics including patient interventions in medically-ill populations, pain management, and disease prevention.

PSYC 5310. MATHEMATICAL MODELS IN PSYCHOLOGY. 3 Hours.
Elementary probability theory, matrix algebra, and theory of linear difference equations applied to theoretical problems in learning, signal detection, decision processes, and social interactions.

PSYC 5313. COGNITIVE PSYCHOLOGY. 3 Hours.
Surveys current experimental and clinical research and theory relating the brain and cognition. Emphasizes selected areas i.e., perception, attention, memory, language, and thinking.

PSYC 5314. COGNITIVE DEVELOPMENT. 3 Hours.
A survey of current theories of cognitive development. Recent research within topic areas, such as physical reasoning, spatial cognition, memory, and symbol use, will be used to evaluate the theories presented.
PSYC 5315. BEHAVIOR ANALYSIS. 3 Hours.
Overview of operant theory with an emphasis upon contemporary problems. Basic concepts that are covered include: reinforcement and stimulus control, punishment, compound schedules, response topography, and chaining. Other topics include complex human operants, verbal behavior, behavior modification, and contingency management.

PSYC 5321. PERSONALITY PSYCHOLOGY. 3 Hours.
A survey of contemporary topics in personality psychology, including personality assessment, strategies for studying personality, temporal stability and cross-situational consistency in behavior, and personality influence on social behavior.

PSYC 5322. SOCIAL PSYCHOLOGY. 3 Hours.
A survey of contemporary topics in social psychology, including interpersonal attraction, altruism and aggression, attribution and social cognition, social influence, group dynamics, and social motivation.

PSYC 5323. GROUP PROCESSES. 3 Hours.
Survey of the major topics in group dynamics. Among the issues covered will be performance, motivation, goal setting, decision-making, creativity, social influence, memory, leadership, teamwork, and collective behavior.

PSYC 5324. APPLIED RESEARCH DESIGN. 3 Hours.
Basic aspects of organizational research methods will be covered including: research ethics, the scientific method, inductive and deductive reasoning, research questions, hypotheses, study designs, manipulation of variables, and various measures and methods used in organizational research. The history of Industrial and Organizational research will also be covered.

PSYC 5325. ORGANIZATIONAL BEHAVIOR. 3 Hours.
Survey of theory and research related to human behavior in organizations. Topics include job performance, motivation, job satisfaction, organizational commitment, work stress, organizational justice, leadership, groups and teams, and organizational theory.

PSYC 5326. EMPLOYEE SELECTION. 3 Hours.
Principles and techniques of employee selection, placement, and classification will be examined. Job analysis and competency modeling will be covered with a focus on the legal aspects of selection and promotion. The use of various methods and measures of job relevant individual differences will be examined within the context of predicting performance criteria.

PSYC 5327. INDUSTRIAL AND ORGANIZATIONAL INTERNSHIP. 3 Hours.
This course is preparation for and supervision of internship activities in an organization or organizations in an area related to area of interest or training. No credit will be given for previous experience or activities. Course may be repeated for credit. Prerequisite: consent of instructor.

PSYC 5328. EMPLOYEE ATTITUDES AND BEHAVIORS. 3 Hours.
Theory and research concerning the determinants, consequences, and measurement of job satisfaction and related constructs such as involvement, commitment and work motivation will be covered. Attitudes, opinions, and beliefs will be examined in relation to the behavioral intentions of individuals at work. Organizational interventions designed to improve and enhance employee motivation, attitudes and behaviors will be evaluated.

PSYC 5329. PERFORMANCE MANAGEMENT SYSTEMS. 3 Hours.
Principles and techniques of the performance appraisal and feedback process will be covered. Different sources of performance information will be evaluated. Mentoring and procedures for communicating performance evaluation information and improving job performance via development and training will be examined. Theories and techniques used to design, conduct, and evaluate training programs will be evaluated.

PSYC 5330. ADVANCE EMPLOYEE TRAINING AND DEVELOPMENT. 3 Hours.
Theoretical advancements, empirical research findings, and practical applications of psychological concepts related to employee training and development. This course focuses on the entirety of the employee training process, including topics and issues related to training needs analysis, program design and implementation, and the evaluation of training effectiveness.

PSYC 5331. PERCEPTION AND ATTENTION. 3 Hours.
Survey of methods and findings dealing with perception; emphasis will be upon behavioral rather than physiological considerations; particular topics include signal detection theory, form and pattern recognition, and attentional mechanisms.

PSYC 5333. BEHAVIORAL NEUROSCIENCE. 3 Hours.
A survey of biological and physical processes underlying behavior. Emphasis on neural, hormonal, and genetic determinants of behavior. Topics include regulatory behaviors, reward and nociceptive systems, differentiation and sociosexual behaviors, limbic and cortical functions.

PSYC 5334. HUMAN PHYSIOLOGY. 3 Hours.
This course will provide a comprehensive review of the human physiology that is categorized in 15 sections and 84 chapters. Some of them will be covered by different courses, such as Neuroscience, Immunology, and Endocrinology. Students are expected to learn how the human body works and what the underlying mechanisms that control the physiological responses are. In case of damage to these systems, what will happen to the body as a whole and what will be the impact on behaviors?

PSYC 5337. ANIMAL COGNITION AND BEHAVIOR. 3 Hours.
A survey of theory and data on how animals learn and represent the world and the evolutionary processes that influence their individual and social behavior.

PSYC 5341. DECISION MAKING. 3 Hours.
Factors that influence categorical and numerical judgments, choices, and preference decisions. Comparison of human decision behavior with various quantitative theories.
PSYC 5342. LEADERSHIP IN ORGANIZATIONS. 3 Hours.
This course focuses on leadership theory and the applicability to modern organizations. Various approach to studying and understanding leadership, as well as the evolution of leadership theory over time will be discussion. Discussed approaches will include trait, situational, skill, contextual, style, cultural, and emerging theories of leadership. Additionally, this course will focus on designing effective leadership development programs.

PSYC 5343. ELECTRONIC HUMAN RESOURCE MANAGEMENT. 3 Hours.
A survey of theory and research related to the use of technology in organizational employment practices, including topics such as web-based recruitment, technology-based interviewing, online testing, cybervetting, e-training, e-performance monitoring, virtual teams, cyberdeviance, and telework.

PSYC 5345. HUMAN LEARNING AND MEMORY. 3 Hours.
Survey of current approaches to the study of human learning and memory.

PSYC 5348. EXPOSURE TO CONTEMPORARY PC MICROCOMPUTERS. 3 Hours.
Operating systems, ASCII editors, word processors, spreadsheets, graphics, data bases, programming languages, programming psychological experiments, statistical programming, using networks, the Internet, e-mail, Gopher, FTP, and Telnet.

PSYC 5351. READINGS IN PSYCHOLOGY. 3 Hours.
Independent readings under the supervision of an individual faculty member. Students wishing to conduct research should sign up for PSYC 5191, PSYC 5291, or PSYC 5391. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: consent of the instructor.

PSYC 5389. CONTEMPORARY PROBLEMS IN PSYCHOLOGY. 3 Hours.
Topics vary. May be repeated for credit with consent of Graduate Advisor.

PSYC 5391. RESEARCH IN PSYCHOLOGY. 3 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 5405. ADVANCED STATISTICS I. 4 Hours.
Basic descriptive and inferential statistics used in psychological research.

PSYC 5407. EXPERIMENTAL DESIGN. 4 Hours.
Statistical aspects of complex experimental designs used in psychological research. Prerequisite: PSYC 5405.

PSYC 5600. ADVANCED RESEARCH. 6 Hours.
Supervised research. May be repeated for credit. Graded P/F/R. Prerequisite: permission of instructor.

PSYC 5698. THESIS. 6 Hours.
Graded P/F/R. Can only be taken up to 4 times. Prerequisite: 12 hours of advanced psychology and an approved thesis proposal.

PSYC 6191. RESEARCH IN PSYCHOLOGY. 1 Hour.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 6291. RESEARCH IN PSYCHOLOGY. 2 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 6300. SEMINAR IN PSYCHOLOGY. 3 Hours.
Offered each semester. Topics vary. May be repeated for credit. Prerequisite: consent of instructor.

PSYC 6312. ANIMAL LEARNING. 3 Hours.
Survey of contemporary topics in animal learning.

PSYC 6316. HISTORY AND SYSTEMS. 3 Hours.
Consideration of the origins of psychology in the development of Western thought. Early conceptualization of problems and their modification with changes in evidence is emphasized.

PSYC 6318. SOCIAL AND PERSONALITY DEVELOPMENT. 3 Hours.
Theory and research on social and emotional development with an emphasis on the interaction between individual needs and abilities and societal expectations and demands.

PSYC 6320. NEUROPHARMACOLOGY. 3 Hours.
Survey of the basis of behavioral pharmacology including mechanisms and theories of drug actions, techniques and strategies of research, common psychoactive drugs, and the uses of drugs in clinical practice.

PSYC 6335. ANIMAL BEHAVIOR. 3 Hours.
Phylogenetic approach to some basic problems in behavior, with special emphasis on unlearned behavior.

PSYC 6336. COMPARATIVE PSYCHOLOGY. 3 Hours.
Theory and data about all aspects of behavior stressing similarities and differences across species.
PSYC 6338. NEURAL AND COGNITIVE MODELING. 3 Hours.
Principles of neural network and dynamical systems modeling; application of these principles to the simulation of cognitive processes in both brains and machines; models of associative learning, pattern recognition and classification, and individual and group behavior. Prerequisite: consent of instructor.

PSYC 6346. EVOLUTIONARY PSYCHOLOGY. 3 Hours.
Evolutionary processes influence behavior and thinking of humans and nonhuman species. Sociosexual behavior, aggression, cognition, and information processing from an evolutionary perspective will be among the topics covered.

PSYC 6347. ENVIRONMENTAL PSYCHOLOGY. 3 Hours.
Survey of the current literature on the impact of various features of the physical environment on human behavior. Topics covered include crowding, privacy, territoriality, personal space, noise, the natural environment, residential, educational and work environments, urban and community design, and pollution and resource management. Designed to be of interest to graduate students in architecture, urban affairs, environmental science and engineering, geology, sociology, as well as those in psychology.

PSYC 6349. PSYCHOMETRIC THEORY. 3 Hours.
Introduction to test construction. Topics include reliability theory, test validation, and item analysis. Prerequisite: C or better in PSYC 5405 and PSYC 5407.

PSYC 6355. MULTIVARIATE ANALYSIS. 3 Hours.
Application of general linear model to special cases such as factor analysis, multiple regression, and discriminant analysis. PSYC 5344 recommended.

PSYC 6391. RESEARCH IN PSYCHOLOGY. 3 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 6399. DISSERTATION. 3 Hours.
Graded R/F. Prerequisite: approved dissertation proposal.

PSYC 6699. DISSERTATION. 6 Hours.
Graded R/F/P/W. Prerequisite: approved dissertation proposal.

PSYC 6999. DISSERTATION. 9 Hours.
Graded P/F/R. Prerequisite: approved dissertation proposal.

PSYC 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Psychology - Graduate Programs

Objective

The objective of graduate work in psychology is to educate the student in the methods and basic content of the discipline and to provide an apprenticeship in the execution of creative research.

Graduate work in the master's program and doctoral program will be offered in psychology. Students' individual programs of work may be arranged to give emphasis to a particular aspect of the general program.

Within this framework, options include, but are not limited to: Animal Behavior and Animal Learning, Cognition and Perception, Developmental, Health Psychology and Neuroscience, Industrial/Organizational, Behavioral Neuroscience, and Social-Personality Psychology. Students specializing in Cognition and Perception may include advanced topical seminars in their area of specialty. In addition to core courses for those interested in Behavioral Neuroscience, seminars offered in the recent past include Aggression and Nociception. For those seeking expertise in the Social-Personality area, seminars have included topics such as Social Influence and Empathetic Accuracy and Intersubjectivity.

Research Involvement-Since the Department of Psychology believes that graduate training should involve the student continuously in the research process, students are encouraged to make personal contacts by letter or e-mail with faculty members of their choice. A description of the faculty and their areas of research may be obtained by consulting the department Web page at www.uta.edu/psychology (http://www.uta.edu/psychology/) or by writing to or calling the department at 817.272.2281. Every effort will be made to assign the incoming student to a faculty member of choice, but priority is given to those who have discussed their place in advance.

Deadline for Financial Aid Applications-Students who wish to be considered for assistantships should have their applications and departmental forms sent to The University of Texas at Arlington by February 1 for the fall Semester.

Admissions Criteria

There are no fixed criteria for admission to the M.S. or Ph.D. programs in Psychology; many aspects of the student's application inform our admission decisions, but a complete application package before February 1st is highly recommended to ensure a timely review of the student file. There are, though, some standard requirements. A student is expected to have successfully completed the appropriate work prior to admission, including an undergraduate B.A. or B.S. degree. The Office of Graduate Studies requires a minimum grade point average of 3.0 in undergraduate work for unconditional admission to the program. Graduate coursework will also be reviewed for those who are applying to a degree bound or direct Ph.D. program, if any. For those applying to the direct Ph.D. program already having earned or will earn a masters, a minimum of 28-30 graduate hours with a GPA of 3.0 or better as calculated by the Graduate School is typically required. The Department of Psychology strongly encourages undergraduate courses in statistics and experimental methods prior to admission.

A. Admissions Focus

Graduate admissions committees are subcommittees of the Graduate Studies Committee. Each specialization (i.e., Psychological Sciences, Health/Neuroscience, I/O) will convene an admissions committee to make recommendations to the Graduate Studies Committee regarding advisors of applicants. Each is composed of faculty representatives from the specialization, the graduate advisor and the Department Chairperson. Admissions decisions are based on interpretation of indications of potential success in the program. The following points are generally considered:

1. **Grade point average.** Most candidates for admissions present averages greater than 3.2. We do, however, examine the applicant's coursework as evidence of research interest. Positive indicators of success in our program include greater than average work in biological and physical sciences, mathematics and psychology. In similar fashion, evidence of research experience is viewed as a predictor of future research potential. For students interested in specialization in Industrial/Organizational (I/O) Psychology at the Master's level, appropriate coursework is taken into consideration.

2. **Submission of Verbal and Mathematics GRE scores is required.** High GRE scores are viewed positively, but lower GRE scores need not exclude a candidate who shows positive indicators in other areas. We do not require the GRE Subject Test in Psychology.

3. **If applicable, submission of language based tests for applicants who do not have a US-based degree:** An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies. This requirement will be waived for non-native speakers of English who possess a Bachelor’s degree from an accredited US institution. Applicants are expected to submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL IBT total score of 79. Further, When the TOEFL IBT is taken, sectional scores of at least 22 on the writing section, 21 on the speaking section, 20 on the reading section, and 16 on the listening section are preferred. However, admission to any graduate program is limited and competitive. Meeting the minimum admission requirements does not guarantee acceptance and programs may give preference to students with higher scores. Only scores submitted directly by ETS or IELTS to UT Arlington are accepted. **English Proficiency for Graduate Teaching Assistants:** Students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL IBT exam or a minimum score of 7 on the Speaking portion of the IELTS exam. The English proficiency requirement will be waived for non-native speakers of English who possess a Bachelor’s degree from an accredited US institution.
4. **Letters of reference.** These are important insofar as they offer evidence of commitment to research, the ability to think independently, critically and creatively, and to integrate knowledge. Letters also provide additional information about a candidate's experience and interests. Evidence of success in employment relevant to I/O psychology will be considered for the Master's degree in that area.

5. **The personal statement ("essay on educational goals") is required. Please note that this is a separate and more detailed essay than the graduate application essay. It is not acceptable to copy and paste your graduate application essay and use it as your personal statement.** The personal statement is meant to be more specific concerning your career goals/interests regarding our program. This should describe the applicant's laboratory, field, or applied interests, career plans, and a discussion of how the UT Arlington program can serve to further these interests and plans. The statement is required and will be examined for evidence of the appropriateness of the candidate to the UT Arlington program. The personal statement should contain information about the student's intended specialization and preferred faculty mentor(s). Students are encouraged to contact specific faculty members during the application process.

6. **Finally, successful completion of a Master's degree in another department may be viewed positively even when the degree was received in an area outside of psychology.** In this latter case, some conditions in terms of make-up (or deficiency) coursework may be specified.

**B. Admission Status and Eligibility for Assistantship/Fellowship**

As noted in the Graduate Catalog, there are several categories of admission in addition to unconditional admission to the Graduate Program in Psychology.

1. **Probationary Admission:** If an applicant does not evidence a majority of the positive indicators for the unconditional admission described above, they may, after careful examination of their application materials be given probationary admission. Probationary admission requires that the new student receive a 3.0 (B average) GPA or better in the first 9-12 hours of graduate course work at UT Arlington.

2. **Deferred Admission:** A deferred decision may be granted when a file is incomplete or when denial of admission is not currently appropriate.

3. **Provisional Admission:** An applicant unable to supply all documentation (including certified transcripts, GRE scores, letters of reference, and personal statements) prior to the admission deadline, but otherwise appears to meet admission requirements, may be granted provisional admission.

4. **Denial of Admission:** Applicants whose records in the aggregate do not show sufficient positive indications of potential success will be denied admission. Please note that not all "qualified" applicants are admitted. Successful admission depends upon the competitiveness of the applicant pool, the number of positions available, and the applicant's fit with the current research interests of the faculty.

5. **Eligibility for Assistantship/Fellowship available for PhD Applicants Only:** PhD students who wish to be considered for assistantships should have their application and Department forms sent to The University of Texas at Arlington by **February 1st** for the Fall Semester. Students unconditionally admitted to the program are eligible for scholarship and fellowship support. Students who are provisionally admitted (pending receipt of their transcript or because they are international students who have not yet met the English language requirement) can receive 1-semester waiver from the Graduate School to hold the assistantship until these missing items have been received. International graduate teaching assistants who make scores that fall below the required test score on the TSE, SEA, or Speaking Section of the TOEFL iBT test must contact the English Language Institute Office at 817-272-2730 or at http://eli.uta.edu. No funding available for master programs.

The criteria applied will be the same as those applied to admission decisions. To be eligible, candidates typically must: be a new student, have a GPA of 3.0 or higher in their last 60 undergraduate credit hours, plus any graduate credit hours as calculated by the Office of Graduate Studies; and be enrolled in a minimum of 9 hours of course work in both long semesters (6 hours in the Summer) to retain their fellowships (see section entitled "Department Enrollment Policy" below). Assistantship assignments are made by the Department Chairperson in consultation with the Associate Chair and the Graduate Advisors. Students may be eligible for other forms of support including fellowships. Please refer to the Office of Graduate Studies for further information under Financial Aid Resources(http://grad.pci.uta.edu/students/finances/).

**C. UT Arlington Graduates**

**GRE requirements:** Submission of Verbal, Quantitative and Analytical Writing GRE score is **required of all applicants unless otherwise indicated,** including UT Arlington alumni, with the exception of "Facilitated Admission" (see below).

**Facilitated Admission of Outstanding UT Arlington Undergraduates:** Students with extraordinarily strong undergraduate records at UT Arlington may receive advanced admission to the program without having to pass through the normal application process. Qualified students will be able to gain admission without completing a formal application or paying application fees. The following conditions must be met in order to qualify for advanced admission of outstanding undergraduates:

1. The student must have graduated from a commensurate bachelor's degree program at UT Arlington no more than one academic year prior to the semester for which admission to a graduate program is sought. A commensurate bachelor's degree program is on that is a normal feeder program for the master's degree or doctoral degree bound program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, facilitated admission is a conditional upon a successful completion of the bachelor's degree.

2. The student's GPA must equal or exceed 3.5 in each of the following calculations:
   a. The grade-point average in the last 60 hours of study as calculated in the Office of Graduate Studies for admission purposes.
   b. All work completed at UTA to date.

3. The student's record will be assessed for strengths relevant to success in the program. All prospective facilitated admission applicants must also submit a personal statement and two (2) letters of recommendation with the understanding that submitting the facilitated admission form does not
guarantee admission into the program; all facilitated admission applicant's will be reviewed by committee the same as applicants applying via regular application.

Students who are accepted via facilitated admission will be admitted directly to graduate school without completing the application for admission, submitting an application evaluation charge, or taking the GRE. Students who believe they qualify for this program should contact the appropriate Graduate Advisor in the Department of Psychology.

Master's Degree Requirements (Earning a Master's in Passing)

MASTER OF SCIENCE IN PSYCHOLOGY

As soon as is feasible, a student should decide on an area for specialization and research. After discussion with, and consent of the involved faculty members, the student selects a supervising professor and a thesis committee. No student may enroll in PSYC 5698 (Thesis - 6 hours) until the thesis committee has approved a proposal for the thesis project and cannot be retaken more than 4 times.

The MS program in Psychology requires completion of a Master's thesis (with the exception of the I/O program) and may be considered as preparation for doctoral work. Progress toward the Ph.D. degree requires completion of a Master's degree in a specialization in psychology or a "Master's equivalency paper". The MS thesis proposal must be approved by a thesis committee consisting of at least three members of the Psychology graduate faculty (additional members are optional) before the candidate for the MS degree may enroll in PSYC 5698 (Thesis - 6 hours). The completed thesis must receive final approval by the committee in an oral defense, which is open to any interested member of the Department, including students.

Students are to post signs and make e-mail announcements informing the local academic community about their upcoming defense no later than two weeks prior to the defense date. A Final Master's Examination Report must be completed, signed and filed no later than two weeks before the date on which the candidate expects the degree to be conferred. For students who elect the thesis substitute, the final examinations(s) will be determined and administered by all of the members of the student's supervising committee. As above, a Final Examination Report must be filed by the dates listed in the Graduate Calendar.

Specialization in Psychological Sciences or Health/Neuroscience Psychology (Masters in Passing)

Thirty (30) credit hours, including six hours of thesis (PSYC 5698), are required to earn a masters in passing while remaining in your Ph.D. program. The masters in passing is designed to form the basis for the doctoral program. Required courses are the following: PSYC 5110, 5405, 5407, 5307 (or 5324), 5333 (or 5334), 5313, 5322, and a 3 hour research course (a combination of 5191 and 5291, or 5391, or 5600). Thesis research and thesis document, approved by a thesis committee, are also required for the Psychological Sciences and Health/Neuroscience specializations. More details about each course can be found at http://catalog.uta.edu/science/psychology/#courseinventory

Master of Science in Industrial/Organizational Psychology

Forty-one (41) hours in psychology are required for this degree. The program and curriculum are designed for students who intend to pursue an applied, professional career as practitioners in the field. The program offers both a thesis and a non-thesis option; however, all students enter the program under the non-thesis option. The decision to change to a thesis option will be made on a case-by-case basis and will be based on the student's aptitude and career focus, as well as on the fit between the student and the faculty mentor. Whether thesis or non-thesis option is chosen, all students earn a Master of Science in I/O Psychology and will therefore be required to conduct research related to I/O Psychology. Required psychology courses include PYSC 5405, 5407, 5322, 5325, 5326, 5327 (5127 and 5227), 5330, 5342, 5343 and 6349. Students are also required to complete 400-hours of an outside internship. Students typically complete their thesis or non-thesis option (Individual Research) at the end of their second year.

A typical program of study looks like this (pending final University approval):

- INSY 5375 MANAGEMENT OF INFORMATION TECHNOLOGIES 3
- INSY 5377 WEB AND SOCIAL ANALYTICS 3

Other courses upon approval

### Master of Science in Learning Analytics

Thirty-six (36) credit hours are required for the Master of Science in Learning Analytics. Required courses are the following:

- Core Courses (18 hours): LAPS 5310, 5320, 5330, 5340, 5350, 5360
- Four Electives (12 hours) from: LAPS 5370, 5375, 5376, 5377, 5378, 5380, 5388, 5390, 5391, 5392, 5393, 5394, 5395
- Capstone (6 hours): LAPS 5610

Details about each course can be found at [https://catalog.uta.edu/coursedescriptions/laps/](https://catalog.uta.edu/coursedescriptions/laps/).

If a prospective student does not have sufficient statistical experience in prior coursework, they may be required to take LAPS 5370 – Introduction to Statistical Analysis as a leveling course at the end of their core coursework. This course would count as one of four required electives.

After completing 30 hours of coursework (18 hours core, 12 hours elective) and receiving approval from the program coordinator, students may enroll in the LAPS 5610 Capstone course. Students will work in diverse groups of 5 to 6 students along with a faculty mentor, and the small groups will be designed to combine students with diverse skill sets and emphasize community and collaboration. Students will apply program knowledge and skills learned in prior coursework to complete a small-scale, integrative project involving the analysis of a real world, educational data set. Students will have the opportunity to apply for competitive internships that will provide small scholarships. Once the student enrolls in this course, they must continuously enroll in it until they successfully complete their capstone, but no more than 4 times.

**NOTE: At this time, students in the Learning Analytics program may not earn a Master’s in Passing in order to complete a Ph.D.**

Here is a sample program of study:

- **Year 1 (Fall)**
  - LAPS 5310 Learning Analytics Fundamentals
  - LAPS 5360 Introduction to Data Analysis and R
- **Year 1 (Spring)**
  - LAPS 5320 Experimental Design and Methodology
  - LAPS 5330 Psychology of Learning and Learning Sciences
- **Year 1 (Summer)**
  - LAPS 5340 Big Data Methods
  - LAPS 5350 Privacy & Ethics in Learning Analytics
- **Year 2 (Fall)**
  - Two (2) electives
- **Year 2 (Spring)**
  - Two (2) electives
Current electives include:

- LAPS 5370 Introduction to Statistical Analysis (leveling course)
- LAPS 5375 Probability and Statistical Inference
- LAPS 5376 Applied Regression Analysis
- LAPS 5377 Linear Models and Experimental Design
- LAPS 5378 Multidimensional Scaling and Clustering
- LAPS 5380 Causal Inference for Program Evaluation
- LAPS 5388 Advanced Methods in Educational Data Management and Learning Analytics
- LAPS 5390 Learning Design Analytics
- LAPS 5391 Independent Study
- LAPS 5392 Cognition, Computers, and Metacognition
- LAPS 5393 Natural Language Processing for Educational Research
- LAPS 5394 Social Network Analysis
- LAPS 5395 Human and Artificial Cognition

**Doctoral Degree Requirements**

**DOCTOR OF PHILOSOPHY**

The degree of Doctor of Philosophy in psychology requires distinguished accomplishments in both scholarship and original research, and a deep understanding of the strategic role of thoughtful research in the development of an empirical science. Although the student must meet the minimum requirements of a planned course of study, the ultimate basis for conferring the degree must be the demonstrated ability to do independent and creative work, and the exhibition of a profound grasp of the subject matter of the field.

**Specializations in Psychological Sciences (Graduate Advisor: Dr. Jared Kenworthy) and Health/Neuroscience (Graduate Advisor: Dr. Yuan Bo Peng)**

The specialization in Psychological Sciences allows students to work in a general experimental context while specializing in one of several areas (e.g., cognitive, social, developmental, personality, industrial/organizational, etc.) The specialization in Health/Neuroscience Psychology is designed to train researchers in health/neuroscience and behavior, working at the cutting-edge of interdisciplinary, biomedical and bio behavioral investigation in areas such as pain, addiction, stress, psycho-immunology, memory, cancer and aging. Most research activity is based on the neurophysiological, biobehavioral, or biopsychosocial model of health and illness.

**Core Course requirements:** Graduate students entering the Psychological Sciences specialization will be required to take the following core courses during their first four semesters of enrollment (24 hours). Exceptions may be made only with written permission of the Graduate Studies Committee. It should also be mentioned that students are expected to maintain their GPA at or above a 3.0 average each term to ensure the successful completion of the program. Therefore, a grade of D is not considered to be acceptable at the doctoral level and if earned, the student risks being dropped from the program. Grades of C have been found to slow down adequate academic progress and should not be taken lightly. All students are expected to consult their faculty mentors if such grades are earned to see how the GPA can be improved.

</table>

Having fulfilled the above, the following are also required:

Four courses (12 hours) from among electives and seminars (PSYC 6300), including Human Physiology (PSYC 5334) or Behavioral Neuroscience (PSYC 5333), Personality Psychology (5321), Human Learning & Memory (PSYC 5345), Neuropharm (PSYC 6320), Group Processes (PSYC 5323), Social & Personality Development (PSYC 6318), Health Psychology (PSYC 5309). The other required elective course must be approved by the
appropriate Graduate Advisor and/or Committee on Graduate Studies and can include a graduate level course in statistics, genetics, immunology, endocrinology, or other specialized biomedical topic available at UT Southwestern or another UT Arlington department.

1. Two six-hour research courses. These may be taken from Thesis PSYC 5698 or Advanced Research PSYC 5600. Students who plan to obtain the MS should elect PSYC 5698 as one of the research courses and students who do not plan to obtain the MS should select two sections of PSYC 5600. If the student does not elect to obtain the MS, one of the research courses must result in a formal thesis-equivalent paper, which will be evaluated by a committee and defended in an oral examination. The two research courses are a minimum requirement. Students are strongly encouraged to take Research in Psychology PSYC 5391 before taking PSYC 5600 and PSYC 5698. Please note that Psyc 5698 should not be taken more than 4 times. Students should only enroll in Psyc 5698 once they have successfully proposed their thesis.

2. Additional hours of coursework to be determined by the Graduate Advisor and dissertation committee. The student should plan to take approximately 67 hours including PSYC 6999. Please note that a total of 9 dissertation hours are required for graduation (a combination of 6399, 6699, 6999, and 7399). At least 31-34 of these hours must be in organized courses, lectures or seminars. No student may enroll in a dissertation course until the dissertation committee has approved a proposal for the dissertation project.

Students with prior graduate work may be waive up to 9 hours from any of the above requirements by a written request to the Graduate Studies Committee. The request should include a syllabus or other documentation showing that a prior course and one of our required courses are equivalent. Students should discuss course equivalency with the professor(s) who teach the course(s) in question before submitting the request.

A student has completed the course requirements when he or she has maintained at least a B average in all courses.

Total Hours: 81

Note: This is based on a 5-year program of study. Students may adjust the speed at which milestones are achieved by adding 4th year courses earlier. A doctoral student must pay non-resident tuition beginning the first long semester (Fall or Spring) in which a) the student has been enrolled previously as a graduate student for 14 or more long semesters, AND b) the student has accumulated more than 99 semester credit hours of graduate study at any Texas state university. Students exceeding either limit will not be eligible for assistant ships supported by state funds.

Research Requirements

Research requirements include general expectations of student involvement in research throughout their graduate career and specific milestones that must be accomplished in order, including the Research Progress Symposium, the Master's Thesis or equivalent paper, the Major Area Paper (MAP;
Diagnostic/Qualifying Exam), the Dissertation Proposal (Comprehensive Exam), and the Dissertation Defense. University requirements mandate the completion of six hours of Master's research and another nine total hours of Dissertation research in the semester that degree requirements will be completed. *Please see the section entitled “Dissertation Hours” for an explanation of the different dissertation registration options.

Prerequisite Conditions for the Major Area Paper

In order to begin working on the Major Area Paper (MAP; diagnostic examination), students must complete:

1. The Departmental Core Curriculum requirements as set forth elsewhere in the catalog. Generally, these course requirements will be met within the first two years of graduate enrollment.
2. Students must also satisfactorily participate in the Research Progress Symposium (RPS), a twelve-minute presentation of original research, taking place in the fourth long semester (Spring of the 2nd year)
3. Finally, a Master's Thesis (or equivalent) must be completed. Students entering the program with a master's degree must complete the Departmental Core Curriculum requirements and participate in the RPS before being invited to begin work on the MAP.

Major Area Paper (MAP)/Diagnostic/ Qualifying Examination:

Upon completion of these prerequisite conditions, students will be invited to begin consulting with their major Major Area Paper (MAP) committee regarding the project, and are expected to finish within one year. Students should enroll in Psyc 6391 in the first long semester following the MAP invite and continue to the course as long as they are working on their MAP.

MAP and MAP Oral Defense

The MAP consists of a comprehensive review paper, which is a summary, integration, and critical review of the literature relevant to a general theme or topic. It is expected that the student will offer a novel and forward-thinking perspective on the topic area. The MAP does not directly propose research hypotheses and designs, nor does it involve the collection of primary-level data. It may be either a quantitative review (i.e., a meta-analysis) or a more qualitative review. It should contain a concluding section in which novel theoretical ideas are proposed and elaborated upon, and which will form a basis for the MAP Oral Defense. The topic area, scope, and timeline of the MAP will be developed with the student's primary faculty mentor and one or two other Department of Psychology Faculty members.

MAP candidates shall convene a prospectus meeting with their MAP Committee before beginning the work on their MAP, in which they present and discuss a 1-2 page abstract or prospectus, outlining the aims, scope, feasibility and structure of the MAP. This abstract should be accompanied by an annotated reference list of key works, indicating an understanding of the literature to which the MAP will continue. Before beginning the MAP, documentation of this meeting shall be submitted to the department for the student’s file.

The topic and content of the MAP should not have substantial overlap with either the student's Thesis or with their eventual Dissertation proposal or project. In accordance with the University policy, MAP Committees must be comprised of three (3) members of the Graduate Faculty. Students should consult their Committee members for general comments and direction before beginning work on the MAP, but Committee member involvement in the writing of the MAP (including that of the student's Faculty mentor) is expected to be minimal. Any feedback from others should not be substantive, but should instead resemble the feedback given by article or grant reviewers.

Upon submission of the MAP document to the Committee, the Committee will evaluate the MAP in terms of its potential contribution to the student's chosen field, and in terms of the degree to which it represents Ph.D.-level thinking, communication, independence, and scholarship. Ordinarily, the Committee will take no longer than 2-3 weeks to evaluate the MAP and communicate their decision regarding the document to the student. If the Committee determines that the MAP document is unacceptable, the student will be given one opportunity to revise it for a second evaluation by the Committee. If the revised version of the MAP is also judged to be unacceptable, the student will not be invited to pursue the Ph.D. degree in the UT Arlington Graduate Program in Psychology. Such a student's Master's degree will thus be his/her terminal degree.

If and when the MAP document is deemed acceptable by the Committee, the Committee will invite the student to schedule a MAP Oral Defense, which will take place no sooner than two weeks following communication from the Committee to the student that the student's MAP is acceptable. The MAP Oral Defense consists only of the student and Committee members, and is not open to other students, faculty, staff, or the general public. In this meeting, which will normally last between 90 and 120 minutes, Committee members will assess the student's knowledge of the topic area, the theoretical background, the methodologies likely to be employed in related research, limitations to the ideas, and conceptual and practical connections to related issues. The Committee will determine whether or not the student has clearly passed the examination, clearly failed, or passed with conditions which must be met before Ph.D. Candidacy is recommended. Upon passing both the MAP and the MAP Oral Defense, a Diagnostic Evaluation Report form must be completed, signed, and filed. In order to be deemed making satisfactory academic progress, students are expected to complete the MAP within one calendar year once invited.

DISSERTATION

Dissertation Proposal:

Students who pass their MAP/diagnostic examinations may continue in the Ph.D. program after having a dissertation proposal approved by their dissertation supervising committee. The committee is formed by a student in consultation with his or her major advisor and the Graduate Advisor, and consists of at least five members, at least three of whom are from the psychology Graduate Faculty (additional members are optional).
The meeting with members of the dissertation committee is a closed one so that the proposed project can be discussed in a confidential manner. The oral presentation of the dissertation proposal satisfies the University requirement that a graduate student must take and pass a "comprehensive examination" prior to advancement to candidacy for the PhD degree. During the presentation, the student responds to any questions the committee members may have about the project. The committee may approve the project, suggest modifications that would make the project acceptable, or reject the proposal and require a new one. In addition to satisfying the comprehensive examination requirement, approval of the dissertation proposal implies that the project is acceptable as a research topic that the project's conceptualization, design, and proposal methods are acceptable and that particular results ("positive results") are not required. As noted above, approval of the dissertation proposal also is the final step for the student to be admitted to candidacy for the PhD degree. The dissertation course (PSYC 6399, 6699, 6999 or 7399) can be taken (see dissertation hours section below). During this period, meetings with the committee are on an "as needed" basis. The dissertation project is then carried out as approved, or as modified with prior approval of the committee members, and the dissertation is written. When a student has completed a draft of the dissertation that the primary mentor deems appropriate for his or her committee, a date for the oral defense is scheduled, and written drafts must be provided to committee members at least two weeks before this date.

**Dissertation Hours:**

Doctoral students must take a minimum of 9 hours of dissertation. This can be accomplished by taking 6999 or a combination of other dissertation course options. A doctoral student working on a dissertation should be enrolled in an approximate 6X99 or 7399 dissertation course. A student receiving advice and assistance from a faculty member in the preparation of a dissertation must register in the course even if the student is not on campus. Doctoral students must enroll in the appropriate 6699, 6999, or 7399 Dissertation Completion course the semester in which the dissertation is defended. Students that typically enroll in these courses defend and apply for graduation in the same term. There are 4 options for dissertation registration:

- **6399** is the most basic dissertation course and is repeatable, however, this course only has graded options of R and F. P grades cannot be assigned in this course and therefore dissertation defenses must not be conducted when a student is enrolled exclusively in a 6399 course. It is a requirement for graduation that a student be awarded a P grade for a successful defense and this is not a grading option for this course.
- **6699** is repeatable with grade options of P, F, or R and should be taken when a student expects to work approximately 6 hours per week on their dissertation.
- **6999** is repeatable with grade options of P, F, or R. It should be taken when a student expects to work approximately 9 hours per week on their dissertation.
- **7399** should be taken only in the term in which a student expects to complete all requirements and graduate. Grade options are P, F, and R. This course is not repeatable under any circumstances. If a student receives an R grade in 7399, they must enroll in 6999 in the next and any future terms. Enrolling in 7399 meets the university full-time enrollment requirements (note that financial aid, loan agencies, and other organizations may not accept 3 hours as full-time enrollment. It is the student's responsibility to find out).

**Dissertation Defense:**

The PhD final oral examination (that is, the "dissertation defense") is conducted by the dissertation committee in a meeting that is open to any member of the University community and to guests. Graduate students are urged to attend all dissertation defenses, especially those in their own area(s) of specialization. Defending students will post fliers approved for posting and stamped by the Student Governance Office and make e-mail announcements informing the local academic community about the defense at least two weeks prior to the defense date. The PhD oral examination is conducted by the dissertation committee. The first part of the examination is an oral presentation of the research and its findings. This portion of the meeting is open to any member of the University community and guests. The second part is a closed examination and consists of specific detailed questions about the dissertation. Both oral defense and the written dissertation must be passed. A Dissertation Defense Report form must be filed in conjunction with the oral dissertation proposal presentation.

**Specialization in Industrial/Organizational Psychology**

The doctorate of psychology with an emphasis in I/O is designed for students who intend to conduct research in I/O psychology and begin their professional career as either an academician or a research-oriented practitioner in the field. Students working toward the I/O doctoral degree are expected to develop, implement, and complete research as part of the degree requirements. Additionally, students have the opportunity to be involved with a student-staffed consulting organization, The Industrial and Organizational Psychology Center. The I/O specialization is currently a part of the Experimental program and requires completion of psychology, methods, and I-O specific courses.

Due to the applied nature of I/O MS programs, if an MS degree has been conferred or is conferred en route to the Ph.D., then it is not necessary to conduct a thesis or a formal thesis-equivalent paper. Students may take 6 hours of Advanced Research (PSYC 5600), under the supervision of their major professor, to work toward obtaining additional publications and strengthening research-oriented skills.

**Current I/O MS students**

Students currently enrolled in the I/O MS program who wish to be considered for admission into a PhD program must submit the Change of Program form for either Psychological Sciences or Health/Neuroscience and must follow the formal admission procedures as stated previously. Students must meet the criteria for admission to the PhD program which will be determined, in part, by the scholarly achievements accomplished as well as the fit between the student and faculty mentor.
SOME UNIVERSITY AND DEPARTMENT POLICIES

Deadlines:

A variety of University and Office of Graduate Studies deadlines are published each year by the Office of Graduate Studies. Students are responsible for meeting any deadlines that may apply to them. For your convenience, the link to the Office of Graduate Studies Calendar is provided here: http://www.uta.edu/uta/acadcal.php

Department Enrollment Policy

All full-time doctoral students are recommended to enroll in at least six hours of course work each regular semester. State law requires that students on support enroll in at least nine hours of course work during the Fall and Spring Semesters (six hours during Summer Semesters) until a student is post-comprehensive examination, at which time the student can drop to 6 and/or 3 hours in their last two semesters and still maintain an assistantship. Please see the Department’s Administrative Assistant for additional information regarding this policy. The nine-hour requirement may be reduced to six hours during the Fall and Spring Semesters (three hours during Summer Semesters) when enrolled in course work in other UT Arlington departments (see Credit for Courses Taken in Other Departments on the UT Arlington Campus in our graduate student handbook on our website).

Enrollment in Readings (PSYC 5151, 5251, 5351) will not be allowed without prior approval of both an appropriate Faculty member and the Graduate Advisor. (See also the enrollment requirements for teaching assistants under section IV.B Teaching Skills Requirement.) International students are required to enroll in nine hours each semester that they are in attendance.

Academic Honesty

Every student is expected to be intellectually honest and professionally ethical in all aspects of graduate work. Academic dishonesty, such as cheating on examinations, falsification of data or student records, or plagiarism, will result in a review by the Graduate Studies Committee and a potential dismissal from the Graduate Program. All students are expected to be familiar with American Psychological Association and American Psychological Society publications on ethical principles in the conduct of research using online databases, as well as human and/or animal subjects.

Grade Grievances

The student must first discuss the appeal of a course grade with the instructor who issued the grade. This step must be taken promptly. The student must file the grievance within one (1) year from the date that grades are posted, and preferably within 45 days. If the instructor is unavailable, the student may proceed in the appeal process and discuss the matter with the Department Chairperson responsible for the course for which the grade is being appealed.

In the event the student and the instructor are unable to reach agreement, or the instructor is unavailable, the student must follow the departmental protocol for grade appeals:

1. The student is responsible for contacting the Department Chairperson
2. The Department Chairperson will convene a subcommittee
3. The subcommittee will review the appeal and relevant documents, and will provide a recommendation to the Department Chairperson.
4. The Department Chairperson will review the subcommittee’s recommendation and make a decision.
5. If the student wishes to pursue a grade appeal beyond the Department Chairperson, the student must complete the Student Grade Appeal Form and deliver it to the Dean’s Office, College of Science, with any supporting documentation the student wishes to provide.
6. The Dean’s decision is final.

Withdrawing from the University:

Students requiring a medical withdrawal should speak to their faculty mentor and department staff as soon as possible to determine the appropriate course of action and paperwork required. Please refer to the University catalog to review all appropriate procedures and regulation regarding medical withdrawals. In contrast, those needing to withdraw for non-medical reasons (ex. dismissal from the program) are responsible for dropping their own classes prior to the start of the semester. If the classes are not dropped prior to the first day of class, the student accepts financial responsibility for any issues regarding a refund or lack thereof. It is also the student’s responsibility to contact the graduate coordinator to determine how to drop their classes.
Psychology - Undergraduate Programs

Academic Advising: 320/321 Life Science Bldg. · 817-272-0858

Overview

The Department of Psychology offers two programs of study leading to the bachelor's degree. It also offers courses of interest to the general public.

The Bachelor of Arts degree in psychology is for those who wish to obtain a broad liberal arts education with a concentration in psychology. It is also a preparation for graduate studies in psychology and many other fields.

The Bachelor of Science degree in psychology is intended for those students preparing for work and study in fields requiring more mathematics and sciences. It is also suitable for pre-medical and pre-dental students. Students preparing for study in the health professions including medicine, dentistry, pharmacology, optometry, occupational therapy, and veterinary medicine should also be advised by the Health Professions Advisor in, Room 107 A, Life Science Building in order to meet the requirements of the corresponding professional schools.

Courses of general interest to the academic community include the following, which have no prerequisites:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

UNIV 1101 Career Preparation and Student Success

All transfer students are required to enroll in a 1-credit hour career preparation course, UNIV 1101 or UNIV-SC 1101. Transfer students need to take this course before the end of the first year at UTA unless they meet any of the following criteria:

- Non-degree seeking status
- Post-baccalaureate status
- Have an equivalent Transfer course

UNIV 1131 Issues in College Adjustment

All entering freshman are required to enroll in a 1-credit hour college adjustment course, UNIV 1131.

Acceptance Requirements for a Major in Psychology

Students who wish to apply for major status in psychology must first meet the University and College of Science requirements for admission to major status and the specific requirements of the Department of Psychology listed below.

Overall and Psychology GPA of at least 2.25. To be changed to full major you must first complete PSYC 2300, PSYC 3200 and PSYC 3300 with a C or better in each course.

Academic Probation (College of Science): Majors whose overall GPA or GPA in major courses falls below 2.25 will be placed on probation and must consult with the Department Advisor prior to enrolling in additional courses.

Admission to Upper-Level Laboratory Courses:

To enroll in the Advanced Topic courses\(^1\) the student must make a C or better in both PSYC 2300, PSYC 3200 and PSYC 3300 or equivalent courses and must have completed the associated upper-division lecture course.

| Course Code | Course Title                           |
|-------------|---------------------------------------|---------|
| PSYC 4410   | PSYC 4411, PSYC 4412, PSYC 4415, PSYC 4420, PSYC 4421, PSYC 4430, PSYC 4431. |

Distinguished Scholars in Psychology

The Department of Psychology offers a Distinguished Scholars program in psychology. This program is intended to provide students with the opportunity for intellectual and professional development that will take them beyond the requirements of the basic B.A. or B.S. degrees. Thus, the program serves to promote and acknowledge the special achievements of participating students.

To qualify, the student must have completed 30 hours with a grade point average of 3.0 or better in residence at UT Arlington, including 10 hours in psychology, with a minimum grade point average of 3.5 or better. The student does background reading and designs a study with a faculty sponsor in...
PSYC 4361, then performs the research project and writes an honors thesis in PSYC 4398. In most cases, the six hours of Distinguished Scholar credit will not increase the total hours necessary to complete the B.A. or B.S. degree.

Qualified students or students who believe they may qualify should contact the undergraduate advisor as soon as possible after completing PSYC 3300.

Requirements for a Bachelor of Science Degree in Psychology

The requirements to receive a Bachelor of Science Degree in Psychology can be achieved through a degree plan under any one of the two options (i.e., Option 1-BS in Psychology with a minor from a different discipline, Option 2- BS in Psychology with an Emphasis in Psychology). Before choosing a degree program under one of these options, please consult with the psychology undergraduate advisor. Click here for a sample degree plan: BS_DEGREE_PLAN.xlsx (http://catalog.uta.edu/science/psychology/undergraduate/BS_DEGREE_PLAN.xlsx)

</tr>
</tbody>
</table>

### Minor or Emphasis

Either a minor of 18 hours in a discipline other than Psychology or an Emphasis in Psychology (General, Clinical Health, Neuroscience or Organizational Science), which consists of 18 hours of Psychology course work, is required. (See Minor page on the Psychology website for details)
## Electives

Sufficient hours to complete the total required for the degree.

**Total**

120 hours, of which at least 36 hours must be 3000/4000-level.

1. See General Core Requirements (p. 50) for approved courses.
2. Prerequisites may add hours to the total required for the degree.
3. Computer Skills Placement Test Website link below: https://www.uta.edu/studentsuccess/testing-services/proficiency-and-other-exams/csp.php

**Minor or Emphasis**

Either a minor of 18 hours in a discipline other than Psychology or an emphasis in Psychology (General, Clinical Health, Neuroscience or Organizational Science), which consists of 18 hours of Psychology course work, is required. (See minor page on Psychology website for details) 18

**Electives**

Sufficient hours to complete the total required for the degree. 5

**Total**

120 hours, of which at least 36 hours must be 3000/4000-level.

1. See General Core Requirements (p. 50) for approved courses.
2. Prerequisites may add hours to the total required for the degree.
3. Computer Skills Placement Test Website Link Below:

Total Hours: 123-125

¹ These are suggestions only. See your academic advisor for an actual degree worksheet.

See catalog or handbook for course options.

General Psychology Minor

A minor consists of 18 credit hours or more in Psychology (PSYC) courses. 9 of the 18 hours must be completed at UT Arlington. Six of the 9 hours must be 3000-4000 level. A 2.0 grade point average(calculated only by the PSYC courses you take in residency) must be maintained in the minor. To request a minor be added to your degree plan, please complete the minor request form (https://www.uta.edu/psychology/undergraduate/Psychology%20Minor%20Form_06.05.17_2019.pdf) and seek approval from your academic advisor.

Clinical Health Psychology Minor

The Clinical Health Psychology minor consists of 18 credit hours or more in Psychology (PSYC) courses. A 2.0-grade point average(calculated only by the PSYC courses you take in residency) must be maintained in the minor. To request a minor be added to your degree plan, please complete the minor request form (http://catalog.uta.edu/science/psychology/undergraduate/Psychology_MINOR_FORM_FOR_CLINICAL_HEALTH_and_ORGANIZATIONAL.xlsx) and seek approval from your academic advisor.

Courses you can take towards the minor are:

Prerequisite of PSYC 1315 (Intro to Psychology) with a C or better before starting any of the following courses.
PSYC 3304 Analysis and Management of Behavior
PSYC 3310 Developmental Psychology
PSYC 3311 Adulthood and Aging
PSYC 3312 Social and Personality Development
PSYC 3314 Psychology of Personality
PSYC 3317 Introduction to Clinical and Counseling Psychology
PSYC 3318 Abnormal Psychology
PSYC 3319 Psychology of Adolescence
PSYC 3320 Behavior and Motivation
PSYC 3322 Brain and Behavior
PSYC 4301 Principles of Neuroscience
PSYC 4309 Neuropharmacology
PSYC 4310 Behavior Therapy
PSYC 4325 Developmental Psychobiology
PSYC 4327 Behavioral Genetics
PSYC 4357 Health Psychology
PSYC 4410 Advanced Topics in Developmental Psychology
PSYC 4411 Advanced Topics in Personality
PSYC 4421 Advanced Topics in Neuroscience
PSYC 4430 Advanced Topics in Clinical and Counseling
PSYC 4432 Advanced Topics in Health Psychology
PSYC 4398 Honors Thesis**
PSYC 4161, 4261, 4361 Readings in Psychology**
PSYC 4181, 4281, 4381 Research in Psychology**
** A maximum of 6 hours of honors thesis, research, or readings credits may be applied to the minor

Courses may be added to the list as they are offered.

**Neuroscience Minor**

A Neuroscience minor consists of 18 credit hours or more in Psychology (PSYC) courses. A 2.0 grade point average (calculated only by the PSYC courses you take in residency) must be maintained in the minor. To request a minor be added to your degree plan, please complete the minor request form (http://catalog.uta.edu/science/psychology/undergraduate/NEUROSCIENCE_MINOR.docx) and seek approval from your academic advisor.

Courses you can take towards the minor are:

Prerequisite of PSYC 1315 (Intro to Psychology) with a C or better before starting any of the following courses.

PSYC 3304 Analysis Management of Behavior
PSYC 3320 Behavior and Motivation
BIOL/PSYC 3322 Brain and Behavior
BIOL/PSYC 3326 Animal Behavior
PSYC 3334 Cognitive Processes
PSYC 3356 Evolutionary Psychology
BIOL/PSYC 4301 Principles of Neuroscience**
BIOL/PSYC 4309 Neuropharmacology **
BIOL/PSYC 4327 Behavioral Genetics
PSYC 4329 Animal Learning and Cognition
PSYC 4420 Experimental Analysis of Behavior
BIOL/PSYC 4421 Advanced Topics in Neuroscience **
PSYC 4431 Advanced Topics in Cognitive Science
**Additional prerequisite of BIOL/PSYC 3322 required.

Courses may be added to the list as they are offered.

Organizational Science Minor

The Organizational Science minor consists of 18 credit hours or more in Psychology (PSYC) courses. A 2.0-grade point average must be maintained in the minor. To request a minor be added to your degree plan, please complete the minor request form (http://catalog.uta.edu/science/psychology/undergraduate/Psychology_MINOR_FORM_FOR_CLINICAL_HEALTH_and_ORGANIZATIONAL.xlsx) and seek approval from your academic advisor.

Courses you can take towards the minor are:

Prerequisite of PSYC 1315 (Intro to Psychology) with a C or better before starting any of the following courses.

PSYC 3301 Psychology of Human Relations
PSYC 3302 Business Psychology
PSYC 3305 Psychology of Employee Training
PSYC 3306 Psychology of Creativity and Creative Thinking
PSYC 3313 Gender and Culture Diversity
PSYC 3314 Psychology of Personality
PSYC 3315 Social Psychology
PSYC 3320 Behavior and Motivation
PSYC 3334 Cognitive Processes
PSYC 4332 Theories of Human Learning and Memory
PSYC 4339 Psychology of Judgment and Choice
PSYC 4398 Honors Thesis**
PSYC 4161, 4261, 4361 Readings in Psychology**
PSYC 4181, 4281, 4381 Research in Psychology**

Courses may be added to the list as they are offered.
School of Social Work

Overview

The School of Social Work (SSW) has a long, well established history at UTA. Initially, beginning in 1967, only the MSW degree was offered. In 1979, The Bachelors of Social Work (BSW) degree was founded but under the auspices of the Department of Sociology, Anthropology, and Social Work. The Doctor of Philosophy (Ph.D.) in Social Work degree program was initiated in 1983. On September 1, 1991, the graduate and undergraduate programs were brought together into a unified administrative and academic unit, the School of Social Work.

The School now has a diverse student body of over 1,800 students enrolled in four degree programs: the Bachelor of Social Work (BSW) (https://www.uta.edu/academics/schools-colleges/social-work/programs/bsw/), Bachelor of Science in Substance Use & Treatment (BSSUT) (https://www.uta.edu/academics/schools-colleges/social-work/programs/bssut/), Master of Social Work (MSW), (https://www.uta.edu/academics/schools-colleges/social-work/programs/msw/) and the Ph.D. in social work (https://www.uta.edu/academics/schools-colleges/social-work/programs/phd/). The BSW and MSW programs are fully accredited by the Council on Social Work Education.

With a commitment to social justice, the School is also home to the Diversity Studies programs (https://www.uta.edu/academics/schools-colleges/social-work/programs/minors/diversity-studies/), where undergraduate students can enroll in a cluster of courses to earn a certificate or minor in diversity. Additionally, undergraduate students may choose to minor in Social Justice and Social Welfare or Substance Use Treatment.

The MSW program is offered in a variety of settings including the main UTA campus, the UTA Fort Worth campus (https://fortworth.uta.edu/academics/), fully online, and through joint programs at Lubbock Christian University and Angelo State University. In the BSW program, students may take courses at the UTA main campus, the UTA Fort Worth Campus, and online.

In the BSW program, we prepare students for a wide range of entry level, generalist practice and social service positions. The BSSUT program prepares students for careers in the field of substance use disorder assessment and treatment. In the MSW program students prepare for advanced level positions with specializations in either direct clinical practice with families and children, mental health and substance abuse, aging, or health, or in community and administrative practice. In the Ph.D. program students are prepared for positions in academia where they can teach and continue research in areas of importance to the social work profession. All four programs offer challenging courses, internships, and practicums designed to teach practice knowledge and skills while instilling the value orientations of the profession.

Mission and Philosophy

The School of Social Work (SSW) strives to educate leaders to create community partnerships for promoting a just society. The School promotes the highest standards of integrity and excellence in research, teaching and service, and creates collaborative scholarly and educational opportunities for students and the community, with the goal of achieving a just society.

The SSW has identified several broad program objectives: engaging in evidence-informed research, teaching and practice, preparing students to assume leadership roles and activities in the local community and beyond, and to conduct community-based research to address complex and pressing social issues at the local, national and global levels.

Office of Advising and Student Success

To help students in the SSW reach their graduation goals we established the Office of Advising and Student Success. Through this office students receive timely and accurate professional and academic advising, connection to the larger campus, and referrals to additional services to facilitate academic achievement. For more information contact the Office of Student Success at (817) 272-3647.

Scholastic Activity and Research Interests of the Faculty

In the SSW there are four research centers: the Birmingham Center for Child Welfare, the Center for Addictions & Recovery Studies (CARS) and the Center for Clinical Social Work, (CCSW). The centers offer training, research, and service opportunities to faculty and students.

Our faculty are outstanding scholars and teachers in the domains of child welfare, family violence, health, mental health, aging and disability and are active in developing new knowledge in their respective fields, producing significant numbers of peer-reviewed journal articles, books, and book chapters each year.

Research produced by faculty has generated not only new knowledge, but also intervention outcomes that have garnered national attention and recognition, with a number of faculty members serving either as editors-in-chief of peer-reviewed journals, or as members of editorial review boards.
COURSES

SOCW 1231. SOCIAL WORK PROFESSIONALISM. 2 Hours.
Equips students with skills and resources to prepare for academic and professional success. Empowers diverse students to identify their individual needs, reflect on opportunities for growth, determine what resources and self-care strategies are appropriate, recognize the faculty role in their development, and formulate a plan for an actively engaged and enriched experience from campus to career. Each class section has a Peer Academic Leader (PAL), who are students who have already taken the course and assist as a discussion leader for the class under the supervision of the instructor. This course is reserved exclusively for students planning to major in Social Work (e.g., BSW-Intended status) who are freshmen; this will be taken concurrently with UNIV 1131. This course or SOCW 3300 is required for admission to the BSW major.

SOCW 1350. SPECIAL ISSUES IN SOCIAL WORK. 3 Hours.
Relevant social work topics generated and explored in depth according to student and professional needs. The topic will be determined prior to registration. We sometimes transfer in 1000 level courses and need a generic 1000 level for allocation.

SOCW 2302. LIFE SPAN DEVELOPMENT AND HUMAN BEHAVIOR. 3 Hours.
This course explores, within the context of a strengths and empowerment based perspective, the bio-psycho-social development of persons from birth to death. It is strongly recommended that this course be taken before SOCW 3301. This course is required for Social Work Field Instruction and Seminar I (SOCW 4951). This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences. For students seeking the BSW major who are Field of Study complete in Social Work, this course is not required.

SOCW 2325. INTRODUCTION TO STATISTICS FOR SOCIAL WORK AND THE SOCIAL SCIENCES. 3 Hours.
This course is designed to enhance students’ skills as research consumers and in performing research and statistical analyses in social work and the social sciences. Included in the course are descriptive statistical procedures including measures of central tendency, variability, shape and distribution along with associations between two variables. In addition, inferential statistics are covered including estimation and hypothesis testing.

SOCW 2350. SPECIAL ISSUES IN SOCIAL WORK. 3 Hours.
Relevant social work topics generated and explored in depth according to student and professional needs. The topic will be determined prior to registration.

SOCW 2361. INTRODUCTION TO SOCIAL WORK. 3 Hours.
An overview of the social work profession, its fields of practice, methods of social intervention, its historical context, and its relationship to the social welfare system. This course is open to all students and satisfies the requirement for Social and Behavioral Sciences in the core curriculum. This course is required for the Bachelor of Social Work (BSW) program.

SOCW 3300. SOCIAL WORK PROFESSIONALISM AND STUDENT SUCCESS. 3 Hours.
Equips students with skills and resources to prepare for academic and professional success. Empowers diverse students to identify their individual needs, reflect on opportunities for growth, determine what resources and self-care strategies are appropriate, recognize the faculty role in their development, and formulate a plan for an actively engaged and enriched experience from campus to career. Each class section has a Peer Academic Leader (PAL), who are students who have already taken the course and assist as a discussion leader for the class under the supervision of the instructor. This course is reserved exclusively for students planning to major in Social Work (e.g., BSW-Intended status) who have transferred from another institution; this fulfills the university requirement for UNIV 1101. This course or SOCW 1231 is required for admission to the BSW major. Co-requisite: SOCW 2361.

SOCW 3301. THEORIES OF HUMAN BEHAVIOR. 3 Hours.
This course explores, within the context of a strengths and empowerment perspective, theories of human behavior. For social work majors, it is strongly recommended that SOCW 2302 be taken before this course. Offered as AAST 3301 and SOCW 3301; credit will be granted in only one department. This course is required for Social Work Field Instruction and Seminar I (SOCW 4951).

SOCW 3303. SOCIAL WELFARE POLICY AND SERVICES. 3 Hours.
Examines how social goals are met by social welfare institutions. Conceptual schemes are developed for analyzing the structure of social welfare institutions and evaluating social welfare sub-systems. The social work profession is also examined in the context of the evolution and function of the contemporary American social welfare system. This course is required for Social Work Field Instruction and Seminar II (SOCW 4952).

SOCW 3305. SOCIAL WORK PRACTICE I. 3 Hours.
Critical evaluation of the value base of the social work profession and basic practice concepts including interviewing, communication and problem solving skills at the individual, family, and group levels in diverse settings. This course is required for admission to the Bachelor of Social Work (BSW) program.

SOCW 3306. SOCIAL WORK PRACTICE III: MACRO PRACTICE. 3 Hours.
Examines generalist community and administrative practice roles and includes the perspectives of historical inequities and social injustice and the impact on communities and diverse groups, strengths, empowerment, evidence-based practice, and global practice along with the values of social justice, diversity, and participation. Specific attention is given to assessing community assets and needs. Prerequisite: SOCW 1231, SOCW 3300, SOCW 2361, SOCW 3305, SOCW 3307, and MATH 1308 or other equivalent statistics course approved by the BSW Director.

SOCW 3307. DIVERSE POPULATIONS. 3 Hours.
Introduction to theoretical, practical, and policy issues related to diverse populations. Historical, political, and socioeconomic forces are examined that maintain discriminatory and oppressive values, attitudes, and behaviors in society and in all levels of organizational behavior. This course is required for admission to the Bachelor of Social Work (BSW) program. Offered as AAST 3317, SOCW 3307 and MAS 3319; credit will be granted in only one department.
SOCW 3308. SOCIAL WORK RESEARCH METHODS. 3 Hours.
This course is designed to provide students with the fundamental skills to understand, use, and conduct research to advance the knowledge base of the social work profession and assess the effectiveness of social work interventions in generalist social work practice. The course addresses elements of the research process, quantitative and qualitative methods, research ethics, and approaches to data analysis. Particular attention will be given to the role of research with populations at risk, social and economic justice, and cultural diversity. Prerequisite: SOCW 1231, SOCW 3300, SOCW 2361, SOCW 3305, SOCW 3307, and MATH 1308 or other equivalent statistics course approved by the BSW Director.

SOCW 3309. SOCIAL WORK PRACTICE II. 3 Hours.
Theories and methodologies of social work assessment, case management, and other generalist intervention at the individual, family, and group levels in diverse settings through the lens of intersectionality of race, gender, sexuality, age educational level and other aspects of identity. Prerequisite: SOCW 1231, SOCW 3300, SOCW 2361, SOCW 3305, SOCW 3307, and MATH 1308 or other equivalent statistics course approved by the Director of Undergraduate Programs.

SOCW 3310. ENVIRONMENTAL JUSTICE & GREEN SOCIAL WORK. 3 Hours.
This course examines how a variety of vulnerable or marginalized populations are impacted by environmental injustices, and explores ways that social service professionals can solve environmental justice issues on the micro, mezzo and macro level. Students will explore how issues such as climate change, extreme weather events and environmental toxins intersect with health, mental health, children & youth, older adults, indigenous populations, food deserts, climate-forced migration, international conflict, environmental racism, and more and examine solutions including ecotherapy, climate policy, and community organizing. This course is also offered at the Master's level as SOCW 5310. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 3312. DISABILITY & SOCIAL WORK. 3 Hours.
Examines major themes in disability and social work. Topics include basic understandings of disability, lived experiences of people with disabilities, legal and policy perspectives, working with adults and children with a variety of disabilities, history of disability policy and disability rights, disability advocacy, and resources in the community, among others. Offered as DS 3312 and SOCW 3312; credit will only be granted in one department.

SOCW 3314. THE LATINAM EXPERIENCE. 3 Hours.
A course on the social, cultural, and economic experiences of Latina and Latin American origin women in the United States. Offered as MAS 3314, SOCI 3314, SOCW 3314, WOMS 3314, and AAST 3321. Credit will be granted in only one department.

SOCW 3315. INTRODUCTION TO SUBSTANCE USE DISORDERS. 3 Hours.
This is an entry-level course that provides foundation-level social work students with the fundamental concepts of Substance Use Disorders (SUD) and the addictive process. Students will examine the prevalence and characteristics of substance use disorders and the impact of such disorders on the individual, family, and the community. Theories of addiction and application of these theories will be examined. Students will develop conceptual knowledge and self-awareness concerning the etiology of addiction, assessment strategies, and wellness strategies for facilitating optimal development and preventing SUD. The course will cover the prevalence of SUD varies among ethnic and cultural groups, between men and women, across the life span, and through different socio-economic levels. This course is taught as SOCW 3315 and SUT 3315. Credit will be granted only once.

SOCW 3318. SCREENING, ASSESSMENT, & ENGAGEMENT. 3 Hours.
Introduces screening and diagnostic instruments and techniques appropriate for determining whether a substance use disorder might exist. Explores the therapeutic alliance and practice engagement techniques taking into account intersections of race, gender, sexuality, age, educational level, and other aspects of identity. Students learn to assess suicide risk and a client's readiness for change. Students learn to diagnose substance use disorders and recognize intoxication, withdrawal, substance, and medication induced disorders. Offered as SUT 3318 and SOCW 3318. Credit will be granted only once. Prerequisite: Prerequisite OR Corequisite: SUT 3315 or SOCW 3315.

SOCW 3319. TREATMENT PLANNING, COLLABORATION & REFERRAL. 3 Hours.
This course addresses the clinical application of the biopsychosocial assessment in the development of a treatment plan. Potential treatment issues will be identified and a client-specific problem list will be developed. Individualized treatment goals will be established in collaboration with diverse clients. Client objectives and clinical interventions will also be developed. This course explores dynamics of the therapeutic alliance, and clinician-client collaboration within the context of a strengths and empowerment-based perspective. The student will gain insight into and an appreciation of collaboration, consultation, and referral throughout the continuum of care. Offered as SUT 3319 and SOCW 3319. Credit will be granted only once. Prerequisite: SOCW 3318 or SUT 3319.

SOCW 3320. U.S. IMMIGRATION POLICY AND THE AMERICAN DREAM. 3 Hours.
Focus on American identity through the examination of immigration to the United States, past and present, and the evolution of U.S. immigration policy. Topics include U.S. attitudes and policy responses to European, Asian, and Latin American immigration and to the incorporation of the descendants of African slaves and Native Americans. Emphasis on the decline of the melting pot idea and the incorporation of recent immigrants. Offered as MAS 3320, AAST 3319, and SOCW 3320. Credit will be granted only once.

SOCW 3321. SUBSTANCE USE TREATMENT. 3 Hours.
This course is the culmination of the fundamentals of substance use disorders, treatment planning, collaboration and referral, and substance use treatment. Students will learn and acquire the special skills necessary to assist individuals, families, and groups through the sequela of substance use and addiction. Focus on cognitive-behavioral therapy, motivational interviewing, 12-step programs, nutrition and exercise, meditation, and other alternative treatment options. Students will study treatment modalities that consider the social, cultural, and economic influences that shape the client's world view and substance use experience. Offered as SUT 3321 and SOCW 3321. Credit will be granted only once. Prerequisite: Prerequisite or corequisite: SUT 3319 or SOCW 3319.
SOCW 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in designated areas. Prerequisite: Permission of the Director.

SOCW 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in designated areas. Prerequisite: Permission of the Director.

SOCW 4310. SOCIAL WORK WITH CHILDREN AND FAMILIES. 3 Hours.
A critical examination of social policies, research, and practices impacting at-risk children and families in child welfare, child mental health, and school settings. Emphasis is placed on the role of the social work practitioner in enhancing the well-being of children and families in contemporary society. Prerequisite: SOCW 3301, and SOCW 3309. BSW majors only.

SOCW 4314. INTIMATE PARTNER VIOLENCE. 3 Hours.
This course covers interdisciplinary theoretical frameworks for understanding and addressing intimate partner violence in diverse relationships, including critical feminism, psychological, and sociological models, as well as prevention and intervention practices that reflect a stance of cultural and critical humility. This course is also offered at the Master's level as SOCW 5314. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 4335. AGING IN AMERICAN SOCIETY. 3 Hours.
This course presents the major theories of aging, in the United States and across cultures, and explores the diverse factors of aging through the lens of intersectionality taking into account intersections of race, gender, sexually, educational level and other aspects of identity. It includes various perspectives including psychological, biological, sociological, and spiritual. Theories are integrated into practice thus providing students a sound foundation for social work practice with diverse older adults. Students develop skills for completing multi-dimensional assessments, and effective social work interventions with and on behalf of older adults. This is offered at the MSW level as SOCW 5335. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: SOCW 2302, SOCW 3301, and SOCW 3307.

SOCW 4344. HEALTH INSURANCE AND ACCESS TO CARE. 3 Hours.
Explores the history and underlying philosophy of managed care in health and social services, reviews interdisciplinary approaches and principles for understanding and critiquing health care systems, and covers current trends and practice issues. Assesses the potential for conflict between social work values and managed care systems. Builds skills for advancing health equity through administrative roles in managed care settings. This is offered at the MSW level as SOCW 5344. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 4350. SPECIAL ISSUES IN SOCIAL WORK. 3 Hours.
Relevant social work topics generated and explored in depth according to student and professional needs. The topic will be determined prior to registration. Prerequisite: Permission of the Director.

SOCW 4364. PERSONAL RELATIONSHIPS. 3 Hours.
Explores theoretical and empirical data on diverse personal relationships at the follow stages of relationship: initiation, maintenance, and termination. Identifies areas for intervention. Also offered as SOCW 5364 in the MSW program. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: SOCW 3301, SOCW 2302, and SOCW 3307. Co-requisite: Social Work Practice II (SOCW 3309 [formerly 3304]).

SOCW 4366. SEMINAR IN WOMEN'S ISSUES. 3 Hours.
Explores women's issues in human behavior theory, practice theory, and policy. Using an intersectional lens, the historical, political, and socioeconomic forces that maintain sexism among diverse groups are discussed. Environmental influences are examined in relation to social justice, social work values, knowledge, and skills. This course is also offered as SOCW 3366 in the MSW program. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: SOCW 3301, and SOCW 3307. Co-requisite: Social Work Practice II (SOCW 3309).

SOCW 4370. SOCIAL WORK IN THE SCHOOLS. 3 Hours.
The purpose of this course is to provide an overview of the various social work-related theoretical perspectives, models, and programs for intervention with diverse children and their families in the school setting. This includes skills in assessment, prevention, and intervention in providing services to students that are marginalized for numerous reasons including race, gender, skin color, religion, immigrant status, disability, sexual orientation, and socioeconomic status among other factors. Students will learn to use intervention skills that address each level of the ecosystem's perspective in schools. This is offered at the Master's level as SOCW 5370. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: SOCW 3309.

SOCW 4371. INEQUITIES AND INCARCERATION. 3 Hours.
This course surveys mass incarceration in the U.S. criminal justice system as a racialized and classist system of control. First, this course will contextualize the US criminal justice system, both historically and through global comparisons. Then students will be introduced to four broad content areas: entering the criminal justice system (school-to-prison pipeline and policing), who is detained (demographics and common mental health and substance use issues) and what they experience in detention (including covid-19 in jails and prisons), experiences and problems encountered when returning citizens reenter society, and trends in criminal justice reform advocacy (including problem-solving courts and advocacy efforts such as Black Lives Matter). Finally, the course considers the social work grand challenge of smart decarceration as a path towards reform specific to social workers. Also offered as SOCW 5371 in the MSW program. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering personal research or study in designated areas. Prerequisite: Permission of the Director.
SOCW 4951. SOCIAL WORK FIELD INSTRUCTION AND SEMINAR I. 9 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Additionally, students will spend two hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. Additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 4952. SOCIAL WORK FIELD INSTRUCTION AND SEMINAR II. 9 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Additionally, students will spend two hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. For additional information and requirements, see the Field website. Prerequisite: SOCW 4951 and 3 social work electives. BSW Majors Only.

SOCW 4955. SOCIAL WORK FIELD INSTRUCTION AND SEMINAR BLOCK PART 1. 9 Hours.
Students will complete a minimum of 480 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Additionally, students will spend two hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. Must be taken concurrently with SOCW 4956. For additional information and requirements, see the Field website. Prerequisite: Core curriculum and all social work required courses except Field Internship (SOCW 4955 and 4956), and a minimum of 102 total credit hours.

SOCW 4956. SOCIAL WORK FIELD INSTRUCTION AND SEMINAR BLOCK PART 2. 9 Hours.
Students will complete a minimum of 480 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Additionally, students will spend two hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. For additional information and requirements, see the Field website. Must be taken concurrently with SOCW 4955. Prerequisite: Core curriculum and all social work required courses except Field Internship (SOCW 4955 and 4956), and a minimum of 102 total credit hours.

SOCW 5281. FOUNDATION FIELD SPLIT II. 2 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Prerequisite: SOCW 5681 and SOCW 5307.

SOCW 5285. FOUNDATION FIELD BLOCK II. 2 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Prerequisite: SOCW 5307. Co-requisite: SOCW 5685. Please note if co-requisite is dropped, this course will be dropped as well.

SOCW 5301. HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I. 3 Hours.
Exploration of behavioral and social science knowledge of human behavior and development of diverse persons through the life course. Examines major systems in society: individual, group, family, and community; and the diversity of ethnicity, race, class, sexual orientation, and culture.

SOCW 5303. FOUNDATIONS OF SOCIAL POLICY AND SERVICES. 3 Hours.
Examines how social goals of diverse populations are met by social welfare institutions. Conceptual schemes are developed for analyzing the structure of social welfare institutions and evaluating social welfare sub-systems. The social work profession also is examined in the context of the evolution and function of the contemporary American social welfare system.

SOCW 5304. GENERALIST MICRO PRACTICE. 3 Hours.
This foundation level course introduces graduate students to both theory and methods for social work practice with diverse individuals, families, and small groups. It emphasizes a generalist perspective, beginning interviewing and relationship skills, problem assessment, goal setting, and contracting. Special attention is given to the common roles assumed by social workers (e.g., facilitator, broker, advocate) as well as development of self-reflection skills in relationship to the dynamics of intersectionality of those served.

SOCW 5306. GENERALIST MACRO PRACTICE. 3 Hours.
Examines generalist community and administrative practice roles and includes the perspectives of historical inequities and social injustice and the impact on communities and diverse groups, strengths, empowerment, evidence-based practice, and global practice along with the values of social justice, diversity, and participation. Specific attention is given to assessing community assets and needs.

SOCW 5307. DIVERSE POPULATIONS. 3 Hours.
Introduction to theory, practice, and policy issues related to diverse populations. Historical, political, and socioeconomic forces are examined that maintain discriminatory and oppressive values, attitudes, and behaviors in society and in all levels of organizational behavior.
SOCW 5308. RESEARCH AND EVALUATION METHODS IN SOCIAL WORK I. 3 Hours.
This course is designed to provide students with an understanding of and ability to use the evidence-informed practice process to identify, analyze and apply evidence-informed interventions. Students will be able to comprehend both quantitative and qualitative research and to synthesize strengths and weaknesses of the social work literature. Students will be able to synthesize and evaluate research in terms of its content, quality, and applicability to clients. Students will understand scientific and ethical approaches to building knowledge to apply to and evaluate the impact of interventions on clients or clients’ presenting problems.

SOCW 5310. ENVIRONMENTAL JUSTICE & GREEN SOCIAL WORK. 3 Hours.
This course examines how a variety of vulnerable or marginalized populations are impacted by environmental injustices, and explores ways that social service professionals can solve environmental justice issues on the micro, mezzo and macro level. Students will explore how issues such as climate change, extreme weather events and environmental toxins intersect with health, mental health, children & youth, older adults, indigenous populations, food deserts, climate-forced migration, international conflict, environmental racism, and more and examine solutions including ecotherapy, climate policy, and community organizing. This course is also offered at the undergraduate level as SOCW 3310. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 5311. ADVANCED MICRO PRACTICE. 3 Hours.
Builds on the generalist perspective and the basic familiarity with social work processes (such as problem identification, assessment, contracting, plan implementation, and outcome evaluation) in the context of (1) existing psychosocial intervention modalities; (2) the particular client values, personal goals, treatment preferences, and characteristics such as racial, ethnic, gender, sexual orientation, age, and ability identities; and (3) selection of change modalities appropriate in relation to clients’ characteristics, social justice, and the client’s presenting issues. Required of all Direct Practice students. Prerequisite: Advanced Standing OR SOCW 5304 AND SOCW 5681 OR SOCW 5881.

SOCW 5312. COMMUNITY AND ADMINISTRATIVE PRACTICE. 3 Hours.
This course surveys theory and builds skills in roles associated specifically with understanding the complex history and multilayered intersections, e.g. discrimination, oppression, disparities or other lived experiences that influence diverse community practice (e.g. community/locality history and development, social planning, social action) and culturally inclusive and sensitive administrative practice (e.g. supervision, administration, diverse management and management systems). Students complete an advanced culturally informed assignment in community and/or organizational assessment and program design. Required of all CAP (Community and Administrative Practice) students. Prerequisite: Advanced Standing Student OR SOCW 5306 AND SOCW 5681 OR SOCW 5881.

SOCW 5313. RESEARCH AND EVALUATION METHODS IN SOCIAL WORK II. 3 Hours.
This course is designed to provide students with an understanding of and ability to analyze, monitor, and evaluate evidence informed interventions and human service programs. In this course quantitative and qualitative research methods and approaches are applied to the scientific and ethical evaluation of evidence informed interventions and human service programs. Research skills and knowledge are presented from the perspective of promoting diversity and social and economic justice in anti-oppressive research and evaluation of social work. Prerequisite: Advanced Standing OR SOCW 5308.

SOCW 5314. INTIMATE PARTNER VIOLENCE. 3 Hours.
This course covers interdisciplinary theoretical frameworks for understanding and addressing intimate partner violence in diverse relationships, including critical feminism, psychological, and sociological models, as well as prevention and intervention practices that reflect a stance of cultural and critical humility. This course is also offered at the Bachelor's level as SOCW 4314. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Co-requisite: SOCW 5311. If the co-requisite is dropped, this course will be as well.

SOCW 5315. BRAIN AND BEHAVIOR. 3 Hours.
The focus of this course is on current advances in knowledge of the neurobiological underpinnings of human behavior and development, the interaction between those underpinnings and the social context and environment, the relevance to social work practice with individuals, families, groups, programs/organizations, and communities, and related assessment and intervention practice behaviors across several practice domains. The domains include human development, genetics, mental health and substance abuse, cognition, stress and trauma, and violence and aggression. The implications of neurobiological and environmental influences (including public health issues and health disparities) will be examined in terms of social justice, social work values, knowledge, and skills, as well as in terms of those populations who have historically been harmed by structural and systematic arrangement and delivery of social welfare services at the micro, mezzo, and macro levels. Co-requisite: SOCW 5311. Please note that if the co-requisite is dropped, this one will be also.

SOCW 5316. STRESS, CRISIS, AND COPING. 3 Hours.
The impact of specific crises on individuals and families will be examined including the unique stresses, crises and coping responses of diverse cultural and social identities as these relate to the stresses of oppression and social injustice and inequality. Variations in cultural wellness and health relative to stress and recovery will also be explored. Typical crises will include life-threatening illness, trauma, physical and mental disability, and death. Assessment and evaluation of an individual's coping ability and appropriate strategies for social work interventions will be studied. Differential therapeutics relative to ethnicity, cultural norms, inclusiveness and access to wellness resources, will be infused into course assignments and discussion. Co-requisite: SOCW 5311. Please note that if the co-requisite is dropped, this will be also.
SOCW 5318. DEATH & DYING. 3 Hours.
This course will give students an overview of the principles of thanatology from anthropological, sociological, psychological, medical, historical, spiritual, cultural, and political perspectives and the role(s) that social work can play in helping individuals, families, and communities from diverse backgrounds. Using life course and life span approaches, course content will include personal death awareness, the integration of theoretical perspectives and evidence-based practice interventions in working with dying, death, and breavement with emphasis on cultural and religious/spiritual perspectives, bioethical principles, and end-of-life decision making, social justice, and advocacy for the dying. Particular attention is given to the intersections of older adults with gender, race, sexuality, age, education level, and other aspects of identity. Therefore, the class content promotes individual self-reflection and discussion through the lens of diversity and intersectionality across the developmental life span and life course about the meaning of life and death and implications for social work practice. This dialog is a precursor to engagement with clients, caregivers, grieving persons, and health care personnel about sensitive and culturally diverse issues around the experience of dying and death. Co-requisite: 5311. Please note that if the co-requisite is dropped, this course will be dropped as well.

SOCW 5320. ADVANCED ADMINISTRATIVE PRACTICE. 3 Hours.
Focuses on selected topics, issues, and skills for effective social work administration. Content includes inclusive and anti-oppressive approaches to leadership, worker motivation, resource development, stakeholder engagement, interagency relations, and managing conflict and diversity in a climate of scarce resources. Prerequisite: SOCW 5312 or concurrent enrollment. Please note that if SOCW 5312 is dropped, this course will be dropped as well.

SOCW 5321. ADVANCED COMMUNITY PRACTICE. 3 Hours.
This course explores research, theory and evidence-based approaches to community practice. Content is focused on the development of skills for partnering with neighborhoods, communities, and groups to address community problems rooted in structural inequalities. Major topics include the politics of empowerment, mobilizing coalitions, locating resources, and mediating conflict. Prerequisite: SOCW 5312 or concurrent enrollment.

SOCW 5322. PROGRAM EVALUATION. 3 Hours.
This course explores research, theory and evidence-based approaches to community practice. Content is focused on the development of skills for partnering with neighborhoods, communities, and groups to address community problems rooted in structural inequalities. Major topics include the politics of empowerment, mobilizing coalitions, locating resources, and mediating conflict. Prerequisite: SOCW 5308.

SOCW 5324. SOCIAL WORK SUPERVISION. 3 Hours.
This course introduces the culturally diverse roles, functions, and contexts of social work supervision between the supervisor and supervisee. Covers culturally sensitive administrative and clinical perspectives on the social work supervisor as a manager, educator, mentor, mediator, and leader in diverse human service organizations. Co-requisite: SOCW 5311 or SOCW 5312. Please note if co-requisite is dropped, this course will be dropped as well.

SOCW 5325. BUDGETING AND FINANCIAL MANAGEMENT. 3 Hours.
This course provides a basic overview of financial management applied specifically to human service agencies. Grounded in a historical lens that examines power relationships in human service financial management, this course emphasizes basic concepts and skill building in budgeting and fund raising; accounting principles; financial statements, and computerized financial information systems. Special emphasis is given to the role of participatory approaches in resource allocation and distribution for human services. Co-requisite: SOCW 5312. Please note that if the co-requisite is dropped, these course will be dropped also.

SOCW 5326. GRANT PROPOSAL DEVELOPMENT SEMINAR. 3 Hours.
Grant proposal development is a fundamental method of accessing funds and developing new programs in the social service arena. In this class, students will identify key funding opportunities in their fields of interest and will write a proposal using an actual federal application and a foundation funding announcement. The majority of the course will be devoted to the development of the skills and knowledge necessary to produce a competitive proposal. These include, but are not limited to: a) needs and capacities assessment, b) program development, c) strategic planning, d) budgeting, e) evaluation, and f) community collaboration. Co-requisite: SOCW 5312. If the co-requisite is dropped, this one will be as well.

SOCW 5327. HUMAN BEHAVIOR IN MACRO ENVIRONMENTS. 3 Hours.
Offers advanced students the opportunity to study diverse people's behavior within large and complex social settings including: natural helping networks and ontological communities, organizations, and bureaucracies, and social and political movements. Prerequisite: Advanced Standing OR SOCW 5301 and SOCW 5307.

SOCW 5328. ADVOCACY AND SOCIAL POLICY. 3 Hours.
Politics are key to developing equitable social policy. Students learn theory and skills to impact social and distributive justice at local, state, and national levels. Examines the role of the social work profession in politics. Prerequisite: SOCW 5303.

SOCW 5329. POVERTY, INEQUALITY AND SOCIAL POLICY. 3 Hours.
This course examines the nature and extent of poverty and inequality in the United States, their causes and consequences, and the debate concerning the role of government in providing anti-poverty programs. Many points of view concerning social and distributive justice are presented, from the radical left to radical right. Prerequisite: SOCW 5303.

SOCW 5332. DIRECT PRACTICE WITH AGING. 3 Hours.
Course presents an overview of current issues, trends, and practice in the care, treatment, and delivery of social services to diverse older adults and their families. Students learn practice procedures designed to equip them with the skills needed for effective social work practice, review major theories on aging, as well as evaluate needs and gaps in services to diverse older adults and their families. Particular attention is given to the intersections of older adults with gender, race, sexuality, age, education level, and other aspects of identity. Co-requisite: 5311. Please note that if the co-requisite is dropped, this course will be dropped as well.
SOCW 5333. AGING AND SOCIAL POLICY. 3 Hours.
Social welfare policies and programs are examined in terms of the overall impact on older adults and society. Needs and gaps in services to older adults and their families are evaluated. Current issues in aging policy are examined. Particular attention is given to the intersections of policy with gender, race, sexuality, age, education level, and other aspects of identity. Prerequisite: SOCW 5303.

SOCW 5334. FAMILY CAREGIVING & AGING. 3 Hours.
This course will give students an overview of the individual and social impact of family caregiving and aging within a bio-psycho-social-spiritual context and the role(s) of social workers in helping individuals, families, and communities face the contemporary challenges of caregiving. Course content will be underscored by a strengths-focused framework and will include the effects of culture on family caregiving, families' process of providing care to persons with chronic and/or complex illness across levels of care (e.g. hospital/rehabilitation/hospice), working with family caregivers within long-term care settings (e.g. nursing homes), dementia caregiving, end of life care as well as evidence-based assessment and intervention with family caregivers. Social services and policy related to effective practice with older adults and family caregivers are also discussed, including innovative and emerging approaches (e.g. technology). Particular attention is given to the intersections of family caregiving with gender, race, sexuality, age, education level, and other aspects of identity. Co-requisite: SOCW 5311. Please note if the co-requisite is not met, the course will be dropped.

SOCW 5335. AGING IN AMERICAN SOCIETY. 3 Hours.
This course presents the major theories of aging, in the United States and across cultures, and explores the diverse factors of aging through the lens of intersectionality taking into account intersections of race, gender, sexuality, educational level and other aspects of identity. It includes various perspectives including psychological, biological, sociological, and spiritual. Theories are integrated into practice thus providing students a sound foundation for social work practice with diverse older adults. Students develop skills for completing multi-dimensional assessments, and effective social work interventions with and on behalf of older adults. Prerequisite: SOCW 5301 and SOCW 5307.

SOCW 5342. DIRECT PRACTICE IN HEALTH CARE. 3 Hours.
Using a bio-psycho-social risk and resilience perspective this direct practice course focuses on assessment, intervention and appropriate evidence based practices with those evidencing acute and chronic mental health problems, and disabilities in diverse populations. Applying a critical lens, students will explore the delivery of services, review historical and current service delivery systems (community mental health, transinstitutionalization, managed behavioral health care), and a wide range of community mental health problems. Additional topics include the function and critique of the Diagnostic Statistical Manual with a social justice perspective, mental health recovery principles. ethics, case management, treatment planning, person in environment, and substance abuse. Co-requisite: SOCW 5311. Please note if the co-requisite is dropped, this course will be dropped as well.

SOCW 5343. HEALTH POLICY AND SOCIAL JUSTICE. 3 Hours.
Provides a critical historical overview of health policy in the United States, current and projected national and local health policies and roles of providers and consumers of health care and public health is examined; service demands, economic, access, and regulatory issues analyzed; relationships between governmental, voluntary, and commercial sectors studied; analytic frameworks for developing and understanding the impact of policy on diverse populations explored. Prerequisite: SOCW 5303.

SOCW 5344. HEALTH INSURANCE AND ACCESS TO CARE. 3 Hours.
Explores the history and underlying philosophy of managed care in health and social services, reviews interdisciplinary approaches and principles for understanding and critiquing health care systems, and covers current trends and practice issues. Assesses the potential for conflict between social work values and managed care systems. Builds skills for advancing health equity through administrative roles in managed care settings. Co-requisite: SOCW 5311 OR SOCW 5312. Please note that if the co-requisite is dropped, this course will be dropped as well. This course is offered at the undergraduate level as SOCW 4344. Students who take this at the undergraduate level may not repeat it at the graduate level.

SOCW 5345. SPECIAL TOPICS IN HEALTH EQUITY. 3 Hours.
Building on a social determinants of health theoretical perspective and research methods in health care, this course undertakes a critical examination of both historical and present day policies, research and practices that contribute to health inequities across communities disproportionately impacted by health inequities. Topics vary each semester depending on the needs and interests of students and faculty. Potential topics may include, but are not limited to: community health, homelessness, HIV/AIDS, maternal and child health, immigrant health, and veteran health. Emphasis is placed on the role of the social work practitioner in promoting health equity and reducing health inequities. Co-requisites: SOCW 5311 OR SOCW 5312. Please note if the co-requisite is dropped, this course will be dropped as well.

SOCW 5352. DIRECT PRACTICE IN MENTAL HEALTH. 3 Hours.
Using a bio-psycho-social risk and resilience perspective this direct practice course focuses on assessment, intervention and appropriate evidence based practices with those evidencing acute and chronic mental health problems, and disabilities in diverse populations. Applying a critical lens, students will explore the delivery of services, review historical and current service delivery systems (community mental health, transinstitutionalization, managed behavioral health care), and a wide range of community mental health problems. Additional topics include the function and critique of the Diagnostic Statistical Manual with a social justice perspective, mental health recovery principles. ethics, case management, treatment planning, person in environment, and substance abuse. Co-requisite: SOCW 5311. Please note that if the co-requisite is dropped, this course will be dropped as well.

SOCW 5353. SOCIAL POLICY AND MENTAL HEALTH. 3 Hours.
This course explores programs, policies and systems in the field of mental health, and their impact on mental health consumers. Disparities occurring within mental healthcare systems will be explored using a health equity framework focusing on the differential impact policies may have on women, children and youth, individuals from diverse racial/ethnic backgrounds, LGBTQ+ individuals, veterans and immigrants/refugees. Approaches to policy analysis and implementation will be presented. Prerequisite: SOCW 5303.
SOCW 5354. PRINCIPLES OF SUBSTANCE USE TREATMENT. 3 Hours.
This course provides a solid grounding in theory and treatment of substance use disorders (SUDs). In keeping with the social work values of respecting the worth and dignity of all persons, the use of affirming and destigmatizing language is paramount. The application of assessment and screening tools, and implementation of evidence-based interventions, skills and techniques will be examined to include culturally informed diagnosis and treatment across a variety of behavioral health treatment settings. We will consider the importance of integrating identity into treatment through the consideration of gender, race, ethnicity, culture, age, and SOGIE (sexual orientation, gender identity and expression). This course will be taught from a strength-based social justice and trauma-informed perspective, with a focus on harm reduction, relapse prevention and sustained recovery. Prerequisite: SOCW 5311.

SOCW 5355. MILITARY SOCIAL WORK. 3 Hours.
The focus of this course is to examine military culture using a diversity framework that involves considering ethical implications for practice, comprehending prevalent social and health issues, and the effects of policies and health disparities across diverse social identities within varied military environments. Students enrolled in this course will analyze current advances in knowledge on the neurobiological underpinnings of human behavior and development pertinent to social and health issues as well as resilience to stress and adversity among diverse members of the military population. Students will identify and evaluate the relevant implications for social work practice with individuals, families, groups, programs/organizations, and communities using a multicultural multidimensional perspective in connection with social justice, social work values, knowledge, and skills. Students will also examine the structural and systematic arrangement and delivery of social welfare services at the micro, mezzo, and macro levels of social work practice. Co-requisite: SOCW 5311. Please note if the co-requisite is dropped, this course will be dropped as well.

SOCW 5356. SEMINAR IN COGNITIVE-BEHAVIORAL INTERVENTION STRATEGIES. 3 Hours.
Explores the three historical phases CBT's development: (1) Behavioral, (2) Cognitive, and now (3) Mindfulness, Acceptance, and Commitment. Addresses interventions across life-span development, culture, etc., to address such clinical issues as depression, anxiety, trauma, substance abuse, cognitive disorders, bereavement, etc., using a multicultural multidimensional perspective. Teaches assessment and interventions drawn from evidence-based practice knowledge and informed practice wisdom and includes a variety of interventions, such as DBT, behavioral activation, cognitive restructuring, mindfulness, etc. Prerequisite: SOCW 5311.

SOCW 5357. GROUP DYNAMICS AND SOCIAL WORK PRACTICE. 3 Hours.
Examines contemporary social-psychological concepts and small group research using a multicultural framework, with a view to testing their applicability to practice propositions and operational principles, in work with both task and treatment groups that include diverse populations. Group work will be examined in terms of social justice, social work values, knowledge, and skills, as well as in terms of those populations who have historically been harmed by structural and systematic arrangement and delivery of social welfare services at the micro, mezzo, and macro levels. Co-requisite: SOCW 5311. Please note if the co-requisite is dropped, this course will be as well.

SOCW 5358. TREATMENT OF CHILDREN AND ADOLESCENTS. 3 Hours.
Overview of the literature which describes physical, psychological, and the multitudes of diverse cultural characteristics unique to childhood and adolescence. Attention then turned to treatment principles, and the specification of procedures for the amelioration of problems common to children and adolescents of diverse populations. Co-requisite: SOCW 5311. Please note if the co-requisite is dropped, this course will be as well.

SOCW 5362. DIRECT PRACTICE WITH CHILDREN AND FAMILIES. 3 Hours.
This course focuses on the preparing students for social work practice who will work with children, youth, and families in various employment settings. Throughout this course students will examine evidence-based interventions (and their theoretical roots) that build on strengths and resources of families with the intention of promoting social justice and cultural competence in social work practice with children, youth, and families. The course will address key areas of diversity among children, youth, and families, such as family structure, age, ability, religion, spirituality, sexual orientation, gender (including gender identity and expression), racial and ethnic identity, class, and culture. Specific techniques considered include child therapy, play therapy, behavioral contracting, cognitive-behavioral interventions, and crisis intervention. Co-requisite: SOCW 5311. Please note if the co-requisite is dropped, this course will be as well.

SOCW 5363. SOCIAL POLICY FOR CHILDREN & YOUTH. 3 Hours.
Examination of current policies, programs and practices impacting children and youth. Disproportionality and disparities occurring within child and youth serving systems (such as child welfare, the education system, the healthcare system and the juvenile justice system) will be explored, focusing on the differential impact of these policies on youth from diverse racial/ethnic backgrounds, LGBTQ+ youth and immigrant/refugee youth. Through analysis, research, and advocacy, students will increase their knowledge of trauma informed, equitable policies and practice with children and youth. Prerequisite: SOCW 5303.

SOCW 5364. PERSONAL RELATIONSHIPS. 3 Hours.
Explores theoretical and empirical data on diverse personal relationships at the follow stages of relationship: initiation, maintenance, and termination. Identifies areas for intervention. This course is also offered as SOCW 4320 in the BSW Program. Prerequisite: SOCW 5301 and SOCW 5307.

SOCW 5365. CLINICAL ASSESSMENT OF CHILD MALTREATMENT. 3 Hours.
Examines knowledge/technique in child physical/emotional/sexual abuse, physical/emotional neglect, among diverse populations. Includes interviewing, identification, legal issues, assessment/evaluation, and follow-up with an intersectional lens to examine the role of each of these in diverse communities. Prerequisite: SOCW 5311; Co-requisite: SOCW 5362 OR SOCW 5352 OR SOCW 5342. Please note that if the co-requisite course is dropped, this will be as well.

SOCW 5366. SEMINAR IN WOMEN'S ISSUES. 3 Hours.
Explores women's issues in human behavior theory, practice theory, and policy. Using an intersectional lens, the historical, political, and socioeconomic forces that maintain sexism among diverse groups are discussed. Environmental influences are examined in relation to social justice, social work values, knowledge, and skills. This course is also offered as SOCW 4366 in the BSW Program. Prerequisite: SOCW 5301, SOCW 5307.
SOCW 5367. TREATING PARENT-CHILD RELATIONSHIPS. 3 Hours.
Evidence-based treatment strategies and evaluation methods relevant to treating parent-child relationships in diverse families; intervention strategies and evaluation methods will be explored taking into account the developmental, social, and cultural factors that may influence the diversified parent-child dynamics, such as gender, power, socialization practices, race, ethnicity, and among others. Co-requisite: SOCW 5311. Please note if the co-requisite course is dropped, this will be dropped as well.

SOCW 5368. SEMINAR IN DIRECT METHODS IN COUPLES COUNSELING. 3 Hours.
Examination of various psychological, social, and cognitive-behavioral treatment approaches to problems in intimate couples across a variety of client populations. Emphasis is placed on the social environment, and its impact on the sources and patterns of intimate partner dissatisfaction and conflict. An additional focus will be on identifying components of mutually satisfying intimate partner relationships. Ways to appropriately adapt intervention approaches to be inclusive of couples of diverse sexual orientations/gender identities and from a wide range of religious, ethnic and cultural backgrounds will be explored. Prerequisite: SOCW 5311 or concurrent enrollment. Please note if the co-requisite course is dropped, this will be dropped as well.

SOCW 5369. SEMINAR IN FAMILY THERAPY. 3 Hours.
SOCW 5369 aims to compare various approaches to working with the family as a total system; enhance cognitive understanding of similarities and differences in theory and goals of family treatment in many fields of practice; and integrate strategies and techniques of each method into an individual style of therapy. Additionally, in recognition of power structures that have silenced indigenous and minority voices in assessing and treating families, this course will assign readings from diverse authors, as well as encourage student discussion and assignments in an activist-oriented classroom environment that seeks to understand how social work benefits from and perpetuates colonialism. Prerequisite: SOCW 5311.

SOCW 5370. SOCIAL WORK IN SCHOOLS. 3 Hours.
The purpose of this course is to provide an overview of the various social work-related theoretical perspectives, models, and programs for intervention with diverse children and their families in the school setting. This includes skills in assessment, prevention, and intervention in providing services to students that are marginalized for numerous reasons including race, gender, skin color, religion, immigrant status, disability, sexual orientation, and socioeconomic status among other factors. Students will learn to use intervention skills that address each level of the ecosystem’s perspective in schools. Co-requisite: SOCW 5311. Please note if the co-requisite is dropped, this course will be dropped also.

SOCW 5371. INEQUITIES AND INCARCERATION. 3 Hours.
This course surveys mass incarceration in the U.S. criminal justice system as a racialized and classist system of control. First, this course will contextualize the US criminal justice system, both historically and through global comparisons. Then students will be introduced to four broad content areas: entering the criminal justice system (school-to-prison pipeline and policing), who is detained (demographics and common mental health and substance use issues) and what they experience in detention (including COVID-19 in jails and prisons), experiences and problems encountered when returning citizens reenter society, and trends in criminal justice reform advocacy (including problem-solving courts and advocacy efforts such as Black Lives Matter). Finally, the course considers the social work grand challenge of smart decarceration as a path towards reform specific to social workers. Also offered as SOCW 4371 in the BSW program. Students who take this course at the undergraduate level may not repeat it at the graduate level.

SOCW 5390. INDEPENDENT STUDY. 3 Hours.
Arrangements may be made for a directed and supervised independent study in a select area of special interest to the student.

SOCW 5392. SELECTED TOPICS IN SOCIAL WELFARE. 3 Hours.
Topics vary from semester to semester depending on the needs and interest of the students.

SOCW 5395. INTEGRATIVE SEMINAR. 3 Hours.
This course focuses on the cycle of practice from assessment and engagement to termination and evaluation. This course serves as the capstone for non-thesis MSW students and integrates an anti-oppressive lens toward promoting social justice across all aspects of practice. Prerequisite: SOCW 5482 or SOCW 5882.

SOCW 5396. THESIS RESEARCH. 3 Hours.
Initial research in the student's area of concentration, leading to thesis.

SOCW 5398. THESIS. 3 Hours.
Requires an individual research project in the individual's area of concentration, with a minimum of six semester hours total needed for the project. Satisfactory completion requires approval of the instructor in charge, a supervising committee appointed by the Dean of Graduate Studies. Defense in a final oral examination is required.

SOCW 5482. ADVANCED FIELD SPLIT I. 4 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate advanced (Aging, Children & Families, Community and Administrative Practice, Health, or Mental Health) social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Prerequisite: SOCW 5312 OR SOCW 5311 AND SOCW 5332 OR SOCW 5342 OR SOCW 5352 OR SOCW 5362.

SOCW 5483. ADVANCED FIELD SPLIT II. 4 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate advanced (Aging, Children & Families, Community and Administrative Practice, Health, or Mental Health) social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Prerequisite: SOCW 5312 OR SOCW 5311 AND SOCW 5332 OR SOCW 5342 OR SOCW 5352 OR SOCW 5362.
SOCW 5485. ADVANCED FIELD BLOCK I. 4 Hours.
Students will complete a minimum of 480 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Prerequisite: SOCW 5312 OR SOCW 5311 AND SOCW 5332 OR SOCW 5342 OR SOCW 5352 OR SOCW 5362; Co-requisite: SOCW 5486.

SOCW 5486. ADVANCED FIELD BLOCK II. 4 Hours.
Students will complete a minimum of 480 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate advanced (Aging, Children & Families, Community and Administrative Practice, Health, or Mental Health) social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Prerequisite: SOCW 5312 OR SOCW 5311 AND SOCW 5332 OR SOCW 5342 OR SOCW 5352 OR SOCW 5362; Co-requisite: SOCW 5485.

SOCW 5681. FOUNDATION FIELD SPLIT I. 6 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Additionally, students will spend two hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. Prerequisite: SOCW 5301, SOCW 5304, SOCW 5306, SOCW 5307.

SOCW 5685. FOUNDATION FIELD BLOCK I. 6 Hours.
Students will complete a minimum of 480 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements. Additionally, students will spend two hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. Prerequisite: SOCW 5301. Co-requisite: SOCW 5285. Please note that if the co-requisite is dropped, this course will also be dropped.

SOCW 5698. THESIS. 6 Hours.
Requires an individual research project in the individual's area of concentration, with a minimum of six semester hours total needed for the project. Satisfactory completion requires approval of the instructor in charge, a supervising committee appointed by the Dean of Graduate Studies. Defense in a final oral examination is required.

SOCW 6190. TUTORIAL. 1 Hour.
Arrangements may be made for a directed and supervised tutorial in a select area of special interest to the student.

SOCW 6328. SOCIAL POLICY RESEARCH AND ANALYSIS. 3 Hours.
Seminar examining methods for analyzing social policies and for assessing effects of policy. Students evaluate and apply different models for social policy analysis, including comparative models. Students work with social indicators and other data sources used in policy research. Prerequisite: acceptance into the Ph.D. program.

SOCW 6340. ADVANCED RESEARCH METHODS IN HUMAN SERVICES. 3 Hours.
Acquaints students at an advanced level with research methodology as it applies to the human services. Includes techniques and tools of research, problem conceptualization, measurement, research and instrument design and data collection methods. Prerequisite: acceptance into the Ph.D. program.

SOCW 6341. ADVANCED STATISTICAL METHODS IN HUMAN SERVICES. 3 Hours.
Advanced statistical applications in the human services. Emphasis on multivariate statistical approaches including multiple regression analysis, logistic regression, and advanced general linear modeling approaches to analyzing data from social work research. Prerequisite: SOCW 6347.

SOCW 6346. TEACHING PRACTICUM. 3 Hours.
Introduces students to the academic role through teaching practice at graduate and/or undergraduate level supervised by a full-time faculty member. Prerequisite: SOCW 6328, SOCW 6340, SOCW 6348, SOCW 6373.

SOCW 6347. INTERMEDIATE STATISTICS. 3 Hours.
Statistical applications for doctoral social work students. Emphasizes both parametric and non-parametric techniques, including t-tests, ANOVA, correlation and regression, chi-square, and other non-parametrics. Designed to provide a foundation for advanced multivariate statistical techniques. Prerequisite: acceptance into the Ph.D. program.

SOCW 6348. SEMINAR IN QUALITATIVE RESEARCH METHODS. 3 Hours.
Explores a variety of qualitative approaches to knowledge building and research. Designed to prepare students to carry out research projects within their areas of interest. Content includes discussions of knowledge development, study designs, data collection, analysis, and report writing. Prerequisite: acceptance into the Ph.D. program.

SOCW 6356. SEMINAR IN PROGRAM AND PRACTICE EVALUATION. 3 Hours.
This course provides hands on opportunities to develop program and clinical evaluation plans for social work/welfare agencies. Educational principles and theoretical foundations are discussed as the actual plans are developed. Students work with agency decision makers and the instructor to generate a plan acceptable to the agency for implementation. Prerequisite: SOCW 6347.
SOCW 6367. SEMINAR IN ADVANCED STATISTICAL APPLICATIONS. 3 Hours.
This seminar covers statistical analysis of complex data and statistical modeling including latent variables. Emphasis is on structural equation model analysis using AMOS, LISREL, or EQS. The course focuses on applications of statistics using various data sets. Prerequisite: Knowledge of SPSS; SOCW 6341 and SOCW 6347.

SOCW 6373. THEORY AND MODELING BUILDING IN SOCIAL WORK RESEARCH. 3 Hours.
This course gives special emphasis on ways in which theory informs social work research. This course prepares students to perform application and critical analysis of social science and social work theory and theory-driven research. The course involves students in integrating theory, research, and social work practice with the goal of producing models of interventions, programs, and policies. Prerequisite: acceptance into the Ph.D. program.

SOCW 6390. TUTORIAL. 3 Hours.
Arrangements may be made for a directed and supervised tutorial in a select area of special interest to the student.

SOCW 6392. SELECTED TOPICS IN SOCIAL WELFARE. 3 Hours.
Topics vary from semester to semester based on the needs and interests of students.

SOCW 6393. GRANT WRITING. 3 Hours.
This course introduces the student to the process of writing grants. This includes knowledge of sponsors and opportunities as well as practical "know-how" in writing competitive grants for supporting research in social service and health service provision. The emphasis of the course will be on federal grants, but state and foundation grants will also be cited as case illustrations. Prerequisite: Doctoral standing or permission of the instructor.

SOCW 6394. APPLIED RESEARCH PRACTICUM. 3 Hours.
Students engage in an active program of applied research under direct supervision of a faculty member.

SOCW 6395. PSYCHOMETRICS AND MEASUREMENT IN HUMAN SERVICES. 3 Hours.
This course focuses on psychometrics and measurement within social work research. Highlighting the importance of measurement in research, the course emphasizes the defining key theoretical constructs and the methodology needed to measure them. This course prepares students to develop and validate instruments. Prerequisite: Doctoral standing or permission of the instructor.

SOCW 6396. SOCIAL WORK EDUCATION: PRINCIPLES AND SKILLS. 3 Hours.
Considers a range of ideas in educational thought relevant to the formulation of an analytical appraisal of social work education and training. Educational methods and skills relevant to social work are addressed and practice opportunities offered. Prerequisite: acceptance into the Ph.D. program.

SOCW 6397. WRITING FOR PUBLICATION. 3 Hours.
This course will explore the world of academic publishing. Students will provide peer reviews of manuscripts, prepare and critique their ideas and draft sections of a manuscript, and present a final manuscript and publication plan. The intent is to help the students increase their chance of publishing manuscripts as a Ph.D. student and as a new faculty member. Although nothing can substitute for having information and research relevant for the field, the art of writing for publication should not be underestimated. Journal publishing, like any other human service endeavor, is easier as you become proficient. Most academics become proficient at communicating their ideas and research through trial and error. However, one's chances of becoming published can be increased by learning from experts in the field. Prerequisite: acceptance into the Ph.D. program.

SOCW 6399. DISSERTATION. 3 Hours.
Preparation and submission of a doctoral dissertation in an area in social work.

SOCW 6694. APPLIED RESEARCH PRACTICUM. 6 Hours.
Students engage in an active program of applied research under direct supervision of a faculty member.

SOCW 6699. DISSERTATION. 6 Hours.
Preparation and submission of a doctoral dissertation in an area in social work.

SOCW 6999. DISSERTATION. 9 Hours.
Preparation and submission of a doctoral dissertation in an area in social work.

SOCW 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Social Work - Graduate Programs

MSW Program Goals

Goal 1: The MSW Program prepares students to practice effectively and ethically with the full range of social systems, emphasizing evidence-informed practice, a strengths approach, diversity, social justice, empowerment, and a critical thinking perspective.

Goal 2: The MSW program prepares students who understand the global and organizational contexts of social work practice and who are prepared to assume the responsibility for leadership positions, as well as engaging in life long-learning.

Goal 3: The MSW Program prepares students, by valuing social work history and the integration of social work knowledge, to understand professional social work and to be prepared for advanced level concentration in either:

Concentration 1: Direct Practice with a specialization in one of four areas, including:

MSW Program Objectives

Upon graduation from the MSW Program, students will demonstrate advanced knowledge and skills in their chosen concentration and specialty across each of the nine Competencies developed by the Council on Social Work Education, as indicated below.

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgement and behavior. Social workers understand the profession’s history, its mission, and the roles and responsibilities of the profession. Social workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

• make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
• use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
• demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
• use technology ethically and appropriately to facilitate practice outcomes; and
• use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person’s life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture’s structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Social workers:

• apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
• present themselves as learners and engage clients and constituencies as experts of their own experience; and
• apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.
**Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice**

Social workers understand that every person regardless of position in society has fundamental human rights such as freedom, safety, privacy, an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers:

- apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
- engage in practices that advance social, economic, and environmental justice.

**Competency 4: Engage In Practice-informed Research and Research-informed Practice**

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice. Social workers:

- use practice experience and theory to inform scientific inquiry and research;
- apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
- use and translate research evidence to inform and improve practice, policy, and service delivery.

**Competency 5: Engage in Policy Practice**

Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structures of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:

- identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services;
- assess how social welfare and economic policies impact the delivery of and access to social services;
- apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

**Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities**

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate. Social workers:

- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
- use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.
Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision-making. Social workers:

- collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
- develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
- select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration. Social workers:

- critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
- use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
- negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies; and
- facilitate effective transitions and endings that advance mutually agreed-on goals.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitate methods for evaluating outcomes and practice effectiveness. Social workers:

- select and use appropriate methods for evaluation of outcomes;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
- critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
- apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

1. Apply critical thinking skills within the context of professional social work practice.
2. Understand the value base of the profession and its ethical standards and principles, and practice accordingly.
3. Practice without discrimination and with respect, knowledge, and skills related to clients’ age, class, color, culture, disability, ethnicity, family structure, gender, marital status, national origin, race, religion, sex, and sexual orientation.
4. Understand the forms and mechanisms of oppression and discrimination and apply strategies of advocacy and social change that advance social and economic justice.
5. Understand and interpret the history of the social work profession and its contemporary structures and issues.
6. Apply the knowledge and skills of generalist social work practice with systems of all sizes.
7. Use theoretical frameworks supported by empirical evidence to understand individual development and behavior across the life span and the interactions among individuals and between individuals and families, groups, organizations, and communities.
8. Analyze, formulate, and influence social policies.
9. Evaluate research studies, apply research findings to practice, and evaluate their own practice interventions.
10. Use communication skills differentially across client populations, colleagues, and communities.
11. Use supervision and consultation appropriate to social work practice.
12. Function within the structure of organizations and service delivery systems and seek necessary organizational change.

**Doctor of Philosophy in Social Work Program Goals**

The mission of the PhD program is to prepare competent scholars to advance knowledge and scholarship, pursue excellence, and provide leadership and service and to promote social and economic justice and cultural competence with diverse populations.

The program builds on the premise that social welfare must be scientifically and theoretically based and continually responsive to changing local and global societal needs.

The primary goal of the program is to prepare scholars to advance knowledge development and dissemination for the profession of social work. The program seeks to provide students with an opportunity to contribute to the advancement of knowledge in the field and the profession in order to provide more effective and efficient services in social welfare and qualify for leadership positions in teaching, research, and administration. Graduates of the program are expected to make a significant contribution to the profession of social work through continued research, scholarship, teaching and service.

**Ph.D. Program Objectives**

Upon completion of the Ph.D. Program students will display competency in:

1. Theory and theory development.
2. Knowledge and skills in research methods and data analysis.
3. Theory, research, and policy as applied to a specialty practice area.
4. Understanding and commitment to the underlying values, ethics, and social and economic justice perspectives in the scientific inquiry in social work.
5. Theory and research as applied to social work practice, policy and social work education.

**Admission Requirements**

Please contact the MSW Admissions Office (sswadmissions@uta.edu) to obtain the complete application checklist and information concerning specific application deadlines. Applicants may also visit the MSW Admissions webpage for more information (http://www.uta.edu/ssw/academics/msw/admissions). Students are admitted to the MSW program for Fall or Spring semester with the exception of students that qualify for advanced standing with their undergraduate social work degree. Advanced Standing students can be admitted for a fall, spring or summer semester. The admissions process is the same for all MSW programs, including the Distance Education Cohorts.

*Please note that the School of Social Work’s deadline for application is different from the published deadlines of the Graduate School.

**Admission to the Master of Social Work Program**

There are two methods for application to the MSW Program: the Quick Admissions Process, and the Traditional Admissions Process.

**QUICK ADMISSIONS**

This process awards the bachelor-level applicant who has earned a 3.0 or better GPA in the last 60 hours of her/his undergraduate degree program a head start by requiring only a two-step process. In step 1, the applicant submits the online Apply Texas Application (applytexas.org). In step 2, the applicant must submit all official transcripts to the Office of Admissions, Records, and Registration. Once all transcripts have been received and evaluated, students whose GPA is 3.0 or better are generally admitted to the Master of Social Work Program.

Advanced Standing students applying for Quick Admission should follow the same process described above and identify themselves as having earned (or will earn by enrollment) the BSW. The BSW degree is verified by the Office of Admissions, Records, and Registration, and included with other application materials. Advanced Standing status is only granted to individuals who have graduated within the past 6 years from a BSW degree program accredited by CSWE with a 3.0 or better GPA in their last 60 hours. The same evaluation criteria are used for applicants seeking admission to the Advanced Standing MSW program.
TRADITIONAL ADMISSIONS

In the second admission method, applicants deemed ineligible for Quick Admission to the MSW program (based on the 3.0 GPA requirement) will be considered via the Traditional Admission Process for the traditional program only. Traditional Admission includes, but is not limited to the satisfactory presence of the following six qualifications:

1. Possession of a bachelor’s degree from a regionally accredited U.S. college or university or its equivalent, with a satisfactory GPA of 2.7 or higher.
2. Submission of three letters of reference indicating professional or academic promise.
3. Submission of narrative essay of three double-spaced pages or less that responds to the following prompt: Social work practice is often classified as either micro or macro. Explain what is meant by micro practice and macro practice, and why addressing both micro and macro issues is essential to effective social work practice. Use three outside sources to support your statement and include complete citations for each.
4. Submission of GRE test scores.
5. For applicants whose native language is not English: Submission of satisfactory scores on the International English Language Testing System (IELTS) or the TOEFL examination.*

*Applicants must submit a score of at least 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed the following:

- 22 for the writing section
- 21 for the speaking section
- 20 for the reading section
- 16 for the listening section

TRANSFER OF CREDIT

Transfer credits for graduate level social work courses may, at the discretion of the Director of Graduate Programs, be accepted by the School of Social Work from comparable coursework taken and passed with a grade of ‘B’ or better at another Council on Social Work Education (CSWE) accredited program within the last six years. Transfer credits for graduate level course work in related fields may, at the discretion of the Director of Graduate Programs, be accepted by the School of Social Work if comparable to required coursework for the MSW; such courses must have been taken and passed with a grade of ‘B’ or better within the last six years. Students will be expected to provide syllabi for review.

FINANCIAL AID

Scholarships are awarded annually and administered by the School of Social Work. For information about scholarships available through the School of Social Work, please visit https://www.uta.edu/ssw/student-resources/scholarships (https://www.uta.edu/ssw/student-resources/scholarships.php).

A limited number of traineeships are available through the Center for Child Welfare’s Title IV-E Program (https://www.uta.edu/ssw/research/centers/ccw/Title-IV-E-Project/).

GRADUATE FELLOWSHIPS

Candidates for fellowship awards must have a GPA of 3.0 in their last 60 undergraduate credit hours and in any graduate credit hours, and must be enrolled in a minimum of 6 hours in both long semesters to retain their fellowships.

Degree Requirements

The MSW curriculum provides students with a generalist perspective in the foundation curriculum and allows students to specialize in one of five practice areas through the advanced curriculum. Students must complete required foundation courses prior to taking most advanced courses. Students in the advanced curriculum select a concentration area: Direct Practice or Community and Administrative Practice. Direct Practice students also select a specialty within their concentration: Children and Families, Health, Aging, or Mental Health and Substance Abuse.

The program leading to the degree of Master of Social Work degree requires the completion of 61 semester hours of graduate work including class and field instruction, as well as thesis or integrative seminar (non-thesis option).

In addition to the general graduate admission requirements of the University, each graduate student in the social work program must:

1. maintain at least a B (3.0) overall GPA in all coursework;
2. demonstrate suitability for professional social work practice; and,  
3. demonstrate knowledge of and adherence to the Code of Ethics of the National Association of Social Workers and the Code of Conduct published by the Texas State Board of Social Work Examiners.

The Professional Standards Committee will monitor and examine potential violations of ethical violations or lack of professional behavior.
ADVANCED STANDING

An applicant meeting all regular admissions requirements who has graduated from an accredited undergraduate program in social work within the previous six years will be considered for advanced standing status in the graduate program provided the student graduated with a GPA of 3.0 or better in their last 60 hours of coursework. Foundation coursework will be waived for students who are granted advanced standing status.

CREDIT HOUR WAIVERS

An applicant meeting all regular admissions requirements who has completed graduate coursework at an accredited master’s program in social work within the previous six years may be able to receive credit hour waivers for comparable courses, provided that the grades in those courses are B or better. Students may receive course waivers for more than 23 credit hours, but only 23 hours may be applied to the 61-hour MSW degree. Waivers will be granted on a case-by-case basis contingent upon evaluation of transcripts, syllabi, and any other required supporting information.

Certificates in Leadership

Students pursuing an MSW in the Direct Practice concentration may elect to add a Certificate in Leadership. There are four Leadership Certificates available: Administrative, Community, Organizational, and Policy Leadership. These 9-hour certificates prepares students with knowledge in the respective area of social work macro practice that will enhance their ability to assume leadership positions in social service agencies.

Dual Degree Programs (https://www.uta.edu/academics/schools-colleges/social-work/programs/msw/program-options/dual-degree/)

Students in social work may participate in dual degree programs whereby they can earn a Master of Social Work and another Master’s in an area of their choosing including:

1. City and Regional Planning,
2. Public Administration,
3. Urban Affairs,
4. Criminology and Criminal Justice,
5. Sociology,
6. Business Administration,
7. Public Health, or

By participating in a dual degree program, students can apply some semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from 6 to 18 hours, subject to the approval of the Academic Advisors or Graduate Advisors from both programs.

To participate in the dual degree program, students must apply separately to each program and must submit a separate Program of Work for each degree. Those interested in a dual degree program should consult the appropriate Graduate Advisor(s) for further information on course requirements though dual degree overview documents are available on the School of Social Work’s Dual Degrees webpage. (https://www.uta.edu/academics/schools-colleges/social-work/programs/msw/program-options/dual-degree/)

MSW Programs - Distance Education Programs

UT ARLINGTON FORT WORTH CENTER MSW COHORT PROGRAM

The UT Arlington School of Social Work offers an MSW Degree with a Concentration in Direct Practice that includes a specialization in Children and Families with a Certificate in Administration through our Fort Worth Center location. This program prepares students to work directly with families and children while also acquiring knowledge in administration that will enhance their ability to assume leadership and administrative positions in social service agencies.

Classes will be offered twice each week in the evening (scheduling may be subject to change during the summer semester as well as the intersessions). The program of work for the degree is scheduled to be completed in 2 years. A new cohort of students will be admitted to the MSW program at the UTA Fort Worth Center every fall.

Students applying to this program must meet all regular admissions requirements. The application process is the same as for students applying to the traditional MSW program.

MSW PROGRAM OPTIONS

The MSW program offers many different degree plans to meet the diverse needs of graduate students. Students may elect to enter a cohort degree program, in which they will take courses with the same group of peers each semester. Cohort degree programs are offered fully online, fully face to face, and in a hybrid format. The MSW Online Program offers full-time and part-time online cohorts that start in the Fall and Spring semesters. All classes in the MSW Online Program are online, though students are required to complete field practicums, which is the only face to face requirement.
For students who need more flexibility from semester to semester, a non-cohort degree plan is available, which allows students to select their courses each semester in accordance with their needs and interests, and with the guidance of an MSW Academic Advisor.

UT ARLINGTON / LUBBOCK CHRISTIAN UNIVERSITY COOPERATIVE MSW PROGRAM

The UT Arlington School of Social Work in conjunction with LCU offers an Advanced Standing MSW Degree with a Concentration in Direct Practice that includes a specialization in Children and Families.

This program is designed the needs of students in the Lubbock area. Students applying to this program can expect to complete the required courses both on the LCU campus and online through UT Arlington.

Students applying to this program must meet all regular admissions requirements. An applicant meeting all regular admissions requirements who has graduated from an accredited undergraduate program in social work and meets the Advanced Standing criteria will be eligible for this program.

Admission Requirements

To be considered for admission to the Ph.D. program, an applicant must have:

• A Master's Degree:
  • Master's Degree in Social Work
  • Applicants who do not have a Master's Degree in Social Work are expected to have work or volunteer experience in human services and complete an introductory social work course and diversity course prior to beginning the program.

• Transcripts of all undergraduate and graduate work documenting:
  • Undergraduate GPA of 3.0 minimum, on the last 60 hours as calculated by the Office of Admissions, Records, and Registration
  • Masters GPA of 3.4 minimum as calculated by the Office of Admissions, Records, and Registration.

• A Graduate Record Examination (GRE) score that evidences an ability to do satisfactory graduate work.

• Curriculum Vitae which outlines (1) work and volunteer experiences in human services; (2) participation in professional organizations and conferences; and (3) publications, if applicable.

• Statement of academic goals consistent with the goals of the Social Work PhD Program goals.

• Professional writing sample that provides evidence of the applicant's writing skills and critical thinking skills.

• Three letters of recommendation, preferably from persons holding Ph.D. degrees, addressing applicant's skills in the areas of analytical thinking and writing skills.

• If English is not the applicant's first language, a minimum TOEFL iBT total score of 90 with a writing sectional score of at least 23 must be submitted.

• An interview will be conducted with applicants meeting the basic admission criteria above.

An application for admission, transcripts of previous academic work and Graduate Record Examination scores must be submitted to Graduate Admissions. An additional separate application and supporting materials must be sent to the Graduate Advisor, Ph.D. in Social Work Program.

PhD Degree Requirements

The program leading to the degree Doctor of Philosophy in Social Work covers nine semesters (three years) of full-time study and requires the completion of 48 semester hours of graduate work including coursework, a qualifying examination, a comprehensive specialty examination and a dissertation. Students and their faculty supervisory committee together develop a plan of study geared to the students' interests. Included in this plan are a set of required and elective courses in which students pursue their specialized interests.

1. 18 hours of Core coursework.
2. The core coursework qualifying examination must be satisfactorily completed before progressing in the program.
4. Six hours electives selected from relevant graduate courses offered outside the School of Social Work.
5. Upon completion of 36 hours of required or elective coursework, the specialty comprehensive examination is taken prior to application for candidacy and registration for dissertation.
6. Three hours of dissertation tutorial taken upon successful completion of comprehensive specialty examination.
7. Nine total hours of dissertation must be taken for a student to graduate.

Successful completion of both the core qualifying examination and the comprehensive specialty examination in the area of study to advance the student to candidacy at which time he or she devotes time to the completion of the dissertation. The last step before the degree is awarded is the successful final defense of the dissertation.

Doctoral students must demonstrate knowledge of and adherence to the Code of Ethics of the National Association of Social Workers and the Code of Ethics as currently published by the Texas State Board of Social Worker Examiners.
PhD Part-Time Program

A PhD Social Work part-time program is forthcoming.

Bachelor of Social Work

Overview

Undergraduate social work education at UTA is based on a set of premises. Responsible citizenship and professional social work practice recognize and respond to the realities of a complex and diverse society that is in continual need of constructive social change predicated on social justice. To this end, social work students are expected to demonstrate the capacity to critically evaluate their cultural environment and, in so doing, demonstrate analytical skills and understanding both orally and in writing. Students are required to adhere to the Code of Ethics as currently published by the National Association of Social Workers (https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/), the Texas State Board of Social Worker Examiners Code of Conduct (https://www.dshs.state.tx.us/socialwork/sw_conduct.shtm), and the UTA School of Social Work Professional Standards (in the BSW Program Manual) (https://www.uta.edu/academics/schools-colleges/social-work/programs/bsw/bsw-manual/) in their professional practice and in their course work. The faculty of the School of Social Work (https://www.uta.edu/ssw/faculty-staff/faculty-directory.php) enhance this process through their commitment to teaching excellence, scholarly activities, research, and community and professional service.

The Bachelor of Social Work degree program of the School of Social Work is fully accredited by the Council on Social Work Education. Its primary educational objective is to prepare students for generalist social work practice. The sequence of courses, designed to include academic social work and field experience requirements in a liberal arts context, enables the student, upon graduation, to work in a variety of social service agencies and settings. Students may take courses at the UTA main campus, the UTA Fort Worth Campus, fully online, or a combination of both.

Transition from BSW-Intended to BSW Major

Transition to the BSW Major requires earning a C or better in the following five courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCW 3300</td>
<td>3 or a combination of SOCW 1231 and UNIV 1131</td>
<td>3</td>
</tr>
<tr>
<td>SOCW 2361</td>
<td>INTRODUCTION TO SOCIAL WORK (formerly SOCW 2311)</td>
<td>3</td>
</tr>
<tr>
<td>SOCW 3305</td>
<td>SOCIAL WORK PRACTICE I (formerly SOCW 2313)</td>
<td>3</td>
</tr>
<tr>
<td>SOCW 3307</td>
<td>DIVERSE POPULATIONS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1308 or other approved statistics course</td>
<td>3</td>
<td></td>

<td></td>
<td><strong>15</strong></td>
</tr>
</tbody>
</table>

- Attend BSW Orientation
- Cumulative GPA and major GPA of 2.5 or better
- Completion of the BSW Major Declaration Form (https://www.questionpro.com/a/TakeSurvey/?tt=IOwxHa2K4Pw%3D) followed by the BSW Major Acceptance Agreement form

The Major Declaration Form includes a commitment to adhere to the Code of Ethics as currently published by the National Association of Social Workers (https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/), the Texas State Board of Social Worker Examiners Code of Conduct (https://www.dshs.state.tx.us/socialwork/sw_conduct.shtm), and the UTA School of Social Work Professional Standards (in the BSW Program Manual) (https://www.uta.edu/academics/schools-colleges/social-work/programs/bsw/bsw-manual/). It is submitted online in consultation with a BSW Academic Advisor after final grades post from the five courses listed above. Forms are reviewed by the Director of Undergraduate Programs. Once transitioned from BSW Intended to BSW Major, students will be required to submit a criminal background statement through a link provided via email.

Transfer of Credit

Transfer credits for undergraduate level social work courses may, at the discretion of the Director of Undergraduate Programs, be accepted by the School of Social Work from comparable coursework taken and passed with a grade of ‘C’ or better at another CSWE accredited program within the last six years. BSW student transcripts are evaluated by the UTA Office of Admissions, and the Director of Undergraduate Programs may approve additional transfer courses for credit in collaboration with the academic advisor. Students will be expected to provide syllabi for review. The total transfer credits awarded should not exceed 50% of the total program credits needed for the degree, and at least 66 credits must be earned at UTA.

No credit is given for life or work experience. Courses that meet the liberal arts requirements of the BSW degree are applied to the degree plan. Other courses are designated as electives. The student receives credit for Introduction to Social Work (regardless of institution) and social work courses from CSWE accredited social work programs. The exceptions are the practicum courses (which must be completed at UTA):

<td>SOCIAL WORK FIELD INSTRUCTION AND SEMINAR II (Or SOCW 4956 SOCIAL WORK FIELD INSTRUCTION AND SEMINAR BLOCK PART 2)</td>
<td>9</td>
</tr>
</tbody>
</table>
Continuation in the BSW Program

Continuation in the BSW Program and eligibility for entry into Field requires:

- 2.5 average in all social work courses and no grade lower than a C
- 2.5 overall grade point average

Students must complete all SOCW courses within a maximum 6-year period. In order to ensure our graduates are receiving the most updated and relevant information on social issues, programs and best practices, social work courses completed more than 6 years prior to graduation may need to be retaken.

¹ No more than four hours of activity (EXSA/DNCA) can be used toward a degree for either hours or GPA.

Field Work Requirements

The BSW Program requires two consecutive semesters (split placement) or one full semester (block placement) field experience in a single human-service agency. Once necessary pre-requisites are complete and students have a 2.5 or better GPA, students enroll in the field courses (SOCW 4951 Field Instruction and Seminar I, first semester; SOCW 4952 Field Instruction and Seminar II, second semester; or SOCW 4955 AND 4956 to complete
Field Work in one semester (AKA Block) and complete 240 clock hours per semester in their assigned agency. Field placements are arranged early in the preceding semester by applying through the field office. Students should consult with a BSW advisor to ensure completion of pre-requisites for field.
Bachelor of Science Substance Use & Treatment

Overview

The Bachelor of Science in Substance Use & Treatment (BSSUT) (https://www.uta.edu/academics/schools-colleges/social-work/programs/bssut/) uses a multidisciplinary approach to understand the biological, psychological, and social aspects of substance use disorders and related behaviors. Assessment and treatment methods are based on evidence-informed practices to enable students and future professionals to understand and treat individuals, families, groups, and communities.

The BSSUT degree plan is designed to prepare you for a career in substance use treatment or to lay the foundation for you to pursue a graduate degree in a related field. We have several options for you in completing your degree, including both face to face and online options.

Total Hours 120

1 No more than four hours of activity (EXSA/DNCA) can be used toward a degree for either hours or GPA.

Field Work Requirements

The BSSUT Program requires two consecutive semesters (split placement) or one full semester (block placement) of field experience in a single agency focused on substance use disorder treatment. Once necessary pre-requisites are complete and students have a 2.25 or better GPA, students enroll in the field courses (SUT 4951 Field Instruction and Seminar I, first semester; SUT 4952 Field Instruction and Seminar II, second semester; or SUT 4955 AND 4956 to complete Field Work in one semester [AKA Block]) and complete 240 clock hours per semester in their assigned agency. Field placements are arranged early in the preceding semester by applying through the field office. Students should consult with a BSSUT academic advisor to ensure completion of pre-requisites for field.
Substance Use Treatment Minor

Overview

What: The Minor in Substance Use Treatment (SUT) (https://www.uta.edu/academics/schools-colleges/social-work/programs/minors/substance-use-treatment/) employs a multidisciplinary approach to understanding the biological, psychological, and social, aspects of substance misuse, gambling, and related behaviors. Assessment and treatment methods are based on evidence-informed practices to enable students and future professionals to understand and treat individuals, families, groups, and communities.

Why: The courses prepare graduates for careers in substance use treatment and related fields.

How: To select this minor, students must have a minimum cumulative GPA of 2.5 and complete the SUT Declaration Form. (https://www.questionpro.com/a/TakeSurvey/?tt=VDR7%2BjnDTeE%3D) Students will also be required to complete a pre- and post-assessment of learning outcomes.

PROGRAM OBJECTIVES

The educational objectives of the minor are to prepare students with a Minor in Substance Use Treatment that will enable them to:

- Identify, describe, compare, and evaluate theories and models of substance use, misuse, and addiction (SUT/SOCW 3315).
- Explain development across the lifespan so as to better understand substance use at different stages of development (SOCW 2302).
- Use empathy and other interpersonal skills toward developing a mutually agreed-on focus of work (SOCW 3309).
- Collect, organize, and interpret client data as part of the screening, assessment, and engagement processes toward developing a treatment plan for the client (SUT/SOCW 3318).
- Develop and implement a treatment plan (SUT/SOCW 3319 and SUT/SOCW 3321).

COURSE PLAN FOR THE 18-HOUR MINOR: 1, 2

SUT/SOCW 3315 Introduction to Substance Use Disorders

SOCW 2302 Lifespan Development

SOCW 3309 Interviewing Skills

SUT/SOCW 3318 Screening, Assessment, and Engagement

SUT/SOCW 3319 Treatment Planning, Collaboration, and Referral

SUT/SOCW 3321 Substance Use Treatment

Students are required to earn a C or better in all minor courses to earn the minor.

1 Students may receive credit for the below courses through completion of any combination of SUT 1350, SUT 2350, or SUT 4350 as approved by the Director of Undergraduate Programs in the School of Social Work.

2 If a student minoring in SUT that is not a SOCW major wants to pursue Licensed Chemical Dependency Counselor (LCDCi) eligibility, they must add SUT 4951 Field (Crosslisted with SOCW 4951) as a general elective.
Social Justice and Social Welfare Minor

Overview

What: The Social Justice and Social Welfare minor (https://www.uta.edu/academics/schools-colleges/social-work/programs/minors/social-justice-and-social-welfare/) provides students with a broad overview of social justice perspectives on issues relevant to the social welfare system, its relationship to the market economy, and the historical, political, and cultural factors that shape it. Through coursework, students learn the analytic and practical skills needed to develop, evaluate, and transform social welfare and justice policies. Students gain competency in the core issues of human needs and social development, relevant to many careers.

The minor also enhances students’ preparation for graduate study in social work, law, education, health care, public policy analysis, nonprofit management, social service administration, student affairs, conflict resolution, and others.

Why: Students often want to pursue careers toward improving the quality of life of others. Understanding of the social welfare system and social justice issues is essential as a foundation for such careers.

Who: Students in a variety of majors are learning skills toward such a successful career (e.g., business, education, healthcare) but are in need of knowledge of the systems that impact their careers as well as the well-being of those they are training to serve. Please note that social work major students are not eligible to earn the SJSW minor.

How: To select this minor, students must have a minimum cumulative GPA of 2.5 and complete the SJSW Declaration Form. (https://www.questionpro.com/a/TakeSurvey/?tt=4zb0kokgAXU%3D)

Students will also be required to complete a pre- and post-assessment of learning outcomes.

COURSE PLAN FOR THE 18-HOUR MINOR:

Required Introductory course:
SOCW 3303 Social Welfare Policy and Services

Required Core courses:
SOCW 3301 Theories of Human Behavior
SOCW 3307 Diverse Populations

3 courses from the following list:
SOCW 3312 Disability & Social Work
SOCW 3314 The Latina Experience
SOCW 3320 U.S. Immigration and the American Dream
SOCW 4314 Intimate Partner Violence
SOCW 4366 Seminar in Gender Issues
SOCW 4335 Aging in American Society
SOCW 4371 Inequities and Incarceration

Students are required to earn a C or better in all SJSW minor courses to earn the minor.

Additionally, students will have a final assessment at the end of their coursework to assess their learning outcomes (this allows for data gathering for Unit Effectiveness Process [UEP] requirements).

1 The Social Justice and Social Welfare Minor does not provide the specific skills needed for actual social work practice or for social work licensing. Additionally, students who complete the minor and decide to pursue a Master’s degree in social work at UTA will not be allowed to count courses taken in the minor toward the Master’s.
Diversity Studies

Overview

The School of Social Work offers two options for students interested in studying diversity: the Diversity Studies Minor and the Diversity Studies Certificate (https://www.uta.edu/academics/schools-colleges/social-work/programs/minors/diversity-studies/). The Diversity Studies Minor is designed to strengthen students' understanding of the interactions of race, ethnicity, gender, sexuality, social and economic inequality, disability, aging and religion in defining identity and social relationships. This interdisciplinary program of study focuses on key concepts related to power, identity, difference, and the historical and structural forces that shape power and difference in social relationships. The goal of the minor is to arm students with knowledge, skills, and perspectives essential to civic participation, career development and promoting a just society. The Diversity Studies minor is relevant to careers involving diverse populations such as business, industry, education, social welfare, mental health, and health.

Students selecting this minor must:

- Complete the Diversity Studies Declaration Form (https://www.questionpro.com/a/TakeSurvey/?tt=D8flvYWJJv4%3D) and the pre-coursework assessment;
- Have a cumulative 2.5 GPA;
- Complete 18 hours of coursework as follows with a C or better in each course:
  - A 3-hour designated introductory course¹, and
  - 15 hours of designated coursework chosen from 5 of 7 diversity content areas (1 course per content area):
    - Racial and Ethnic Relations,
    - Gender,
    - Sexuality,
    - Social and Economic Inequality,
    - Disability,
    - Aging, and
    - Religion.
- Students are required to complete a pre- and post- assessment at the start and end of their minor studies to measure their learning outcomes.

The Diversity Studies Certificate Program (DCP) is an interdisciplinary certificate that provides undergraduate students the opportunity to gain specialized knowledge, values, and skills in racial and ethnic relations, gender and sexuality, and social and economic inequality, to advance themselves as successful employees and leaders in our global world. The certificate enhances a student’s general education, academic major and/or career preparation.

Students selecting the Diversity Certificate must:

- Complete the Diversity Studies Declaration Form (https://www.questionpro.com/a/TakeSurvey/?tt=D8flvYWJJv4%3D) and the pre-coursework assessment;
- Have a cumulative 2.5 GPA;
- Complete 12 hours of coursework as follows with a C or better in each course (1 course per area):
  - A 3-hour designated introductory course, and
  - 9 hours of designated coursework in 3 areas
    - Racial and Ethnic relations,
    - Social and Economic Inequality, and
    - Gender and Sexuality.
- In addition, students complete a co-curricular component by attending campus events that highlight diverse identities and cultures.
- Students are required to complete a pre- and post- assessment at the start and end of their certificate studies to measure their learning outcomes.

¹The three hour introductory course may be substituted with DIVR 2350 if approved by the Director of Undergraduate Studies in the School of Social Work.
Honors College

Honors Vision Statement

The Honors College is committed to extending opportunities for achievement in undergraduate education to the best students across the University. The College works toward this goal by promoting a supportive and academically and culturally diverse environment in which students can pursue excellence in research, creative work, community service, and personal and professional development. By creating a center for academic excellence, the Honors College not only fosters the development of the next generation of academic and community leaders, but also advances the University’s broader mission of improving the level of education for all students. In keeping with the broader educational mission, the Honors College houses Interdisciplinary Studies, which is dedicated to promoting experiential, problem-based research and pedagogy for all students in the University.

Honors Affiliations

The UT Arlington Honors College is a member of the National Collegiate Honors Council and the regional Great Plains Honors Council.

Standards for Admission

The Honors College is dedicated to creating a student body with broad interests, varied talents, and diverse cultural backgrounds. Admission is competitive.

Entering freshman Honors applicants (those with fewer than 30 college hours) must have either a score of 1270 on the SAT (combined Math and Evidence-Based Reading and Writing) or a score of 27 of the ACT, or have graduated in the top ten percent of their high school class, or have graduated with an unweighted high school GPA of 3.5 on a scale of 4. If none of the above criteria are met, applicants may submit an essay for consideration. All applicants are required to submit a resume. For additional information and application materials, see the Honors College website: https://www.uta.edu/honors/prospective/apply/

Continuing UT Arlington and transfer Honors applicants (those with more than 30 college hours) must have an overall undergraduate GPA of 3.35. If none of the above criteria are met, applicants may submit an essay for consideration. All applicants are required to submit a resume. For additional information and application materials, see the Honors College website: https://www.uta.edu/honors/prospective/apply/

Requirements for Completing an Honors Degree

Honors degrees are granted in the disciplines of the University’s eight undergraduate schools and colleges – Business; Education; Engineering; Liberal Arts; Nursing and Health Innovation; Science; Social Work – as well as programs in CAPPA and Interdisciplinary Studies. To graduate with an Honors degree, a student must be a member of the Honors College in good standing, have an overall GPA of 3.2 or higher, and complete the degree requirements in an academic major.

Honors students will be required to earn 18 Honors Points, plus a Capstone Project to receive an Honors Degree. Points will be earned through a combination of Course Points and Experience Points that are to be determined by each college.

Course Points

Students will enroll in Honors-designated courses or contract existing courses. A point value will be assigned to Courses based on credit hours. Each college will set their own course requirements.

Honors courses satisfy Honors, departmental, college, and University requirements. The Honors College provides departmental advisors with equivalency/substitution information.

Honors students may earn Honors credit for non-Honors courses taught by full-time faculty, subject to the terms of the Honors College Contract. To receive Honors credit, the student must complete regular course requirements with a grade of A or B, as well as an independent Honors assignment as agreed upon by the instructor and the student.

Experience Points

Students may participate in co-curricular Experiences to earn Honors Points. A point value will be assigned to each experience based on duration or rigor of the experience (most will be assigned 1 point). Each college will approve their own list of allowable experiences. Each unique experience may be used only one time.

Honors Capstone Project

In addition to earning the required number of Honors Points, students will complete a Capstone Project to receive an Honors Degree. Each college/department/major will determine which of the following “tracks” their students can select. Although not all students will be required to write a thesis, all students will be required to produce a deliverable. Students will present their Capstone Project at an Honors Symposium in either an oral or poster presentation.
Research

- Traditional Honors thesis; research conducted with a faculty mentor

International

- Project developed through study abroad or service learning abroad

Professional

- Project developed through completing and internship, co-op, or practicum

Creative

- Creation of original creative work/activity; especially for students in the fine arts

College Specific Capstone Project

- Determined by each college

The flexibility of the Honors requirements makes it essential that students maintain close contact with both their departmental mentor and advisor and the Honors advising staff. Students must meet with an Honors advisor during each of their first three years, but are strongly encouraged to meet with the advising staff on a regular basis.

Probation Policy

Honors students whose cumulative GPA falls below 3.2 will be placed on probation. They must meet as soon as possible with an Honors advisor and are required to restore their GPA back to 3.2 or higher in the following semester.

Privileges for Honors Students

Honors College participation provides a number of tangible and intangible benefits to its students:

- Honors Degree designation on diploma and transcript
- Priority course registration
- Small class size
- Courses taught by award-winning faculty
- Honors scholarship opportunities
- Honors study abroad programs and scholarships
- Honors learning community
- Paid undergraduate research fellowship opportunities
- Special privileges with the University libraries
- Access to Honors listserv, Honors College blog, and the electronic Honors newsletter, Veneratio
- Special Honors academic and social events
- Honors Bridge to Graduate School Fellowship opportunities
- Membership in the Honors College Council
- Use of the Carolyn A. Barros Reading room (library and computer laboratory) and free printing

Honors College Programs and Services

Honors Study Abroad

The Honors College Study Abroad Program offers short-term opportunities for students to acquire new knowledge and understanding of the people, events, movements, ideas, and products of cultures other than their own; to link historical events and developments with those of the twenty-first century; and to understand the contributions of other peoples and regions to American institutions and culture. Rigorous instruction and intensive on-site learning in countries as diverse as Ireland, Scotland, Italy, France, the Czech Republic, Greece, England and Costa Rica are hallmarks of the Honors study abroad experience. Scholarships are available from both the Honors College and the Office of International Studies (Note: the Honors College Study Abroad Program typically involves short-term travel and as such cannot be used for the study abroad option for the Honors Capstone Project, although credit from the program may be used to meet the coursework requirement for the Honors degree.)

AP Summer Institute (APSI)
The Honors College at UT Arlington, in conjunction with the College Board, annually presents the UT Arlington AP Summer Institute. Each year more than 1000 new and experienced middle and high school teachers receive invaluable training from College Board-certified instructors to prepare them to teach AP courses. Courses are offered in Art, English, Science, Language, Mathematics and Social Studies.

COURSES

HONR-BU 2303. HONORS SPECIAL TOPICS. 3 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-BU 3304. SPECIAL TOPICS. 3 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-BU 4303. ADVANCED SPECIAL TOPICS. 3 Hours.
Advanced special topics in Honors. May be repeated for credit as topics change.

HONR-BU 4311. LEADER AS COMMUNICATOR. 3 Hours.
Helps students excel in written and oral communication skills. Assignments include writing short papers, making oral presentations, and learning to critique one another. This course provides a perspective on leadership in formal organizations with emphasis on communication, exercising influence, decision-making, and conflict management. Prerequisite: Admission to the Goolsby Leadership Academy.

HONR-BU 4312. LEADER ETHICS. 3 Hours.
Addresses rule-based, consequential, and virtue ethics by examining intentions, actions, and consequences of individual behavior. The course emphasizes the development of character and personal integrity. Prerequisite: Admission to the Goolsby Leadership Academy or permission of the Goolsby Leadership Academy Director.

HONR-BU 4313. SENIOR EXECUTIVE LEADERSHIP. 3 Hours.
Course consists of a series of lectures by executives who provide insight into their own unique leadership skills and development. Prerequisite: Admission to the Goolsby Leadership Academy.

HONR-BU 4314. GLOBAL MARKET PLACE. 3 Hours.
Designed to assist Goolsby Fellows to be competent in an intercultural world. The heart of the course is aimed at appreciating human diversity and variance. Prerequisite: Admission to the Goolsby Leadership Academy or permission of the Goolsby Leadership Academy Director.

HONR-BU 4315. EXECUTIVE INTERNSHIP. 3 Hours.
This internship experience places Goolsby Fellows in field settings with executives from the college's Advisory Council and other executive leaders in specialized areas for students. Prerequisite: Admission to the Goolsby Leadership Academy or permission of the Goolsby Leadership Academy Director.

HONR-BU 4394. HONORS SENIOR RESEARCH THESIS/CREATIVE PROJECT. 3 Hours.
A research thesis or creative project and oral presentation are required for the Honors degree. In consultation with the faculty thesis supervisor and the Honors Dean, a program of research and writing will be arranged. Planning for the Honors Thesis/Creative Project should begin early in the student's junior year. For more extensive projects additional credit may be earned. Full details for completing the Honors Research Thesis/Creative Project are provided on the Honors website, http://www.honors.uta.edu/thesis/. This course is reserved for departments and programs that do not list dedicated thesis courses in their inventories.

COURSES

HONR-LA 1301. HONORS COMPOSITION I. 3 Hours.
Introduction to academic writing, with an emphasis research, synthesis of sources, and argumentation.

HONR-LA 1302. HONORS COMPOSITION II. 3 Hours.
A course in academic argumentation in which students learn how to conduct and organize research. The course typically focuses on a particular topic, which will vary by section and be interdisciplinary in nature. Successful completion satisfies the second-semester writing requirement. Prerequisite: membership in the Honors College.

HONR-LA 2300. SEMINAR. 3 Hours.
Team-taught interdisciplinary course that introduces knowledge and perspectives from the arts, sciences, and humanities. Designed around a theme of current or historical significance. Writing-intensive. Depending on topic, may meet the literature, fine arts/humanities or social/cultural studies requirement of the core curriculum (consult departmental advisor for details).

HONR-LA 2303. HONORS SPECIAL TOPICS. 3 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-LA 2407. HONORS SPECIAL TOPICS WITH LAB. 4 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change. Completion of lab required. Prerequisite: Membership in the Honors College; other requirements as determined by faculty teaching the course.

HONR-LA 3300. LIBERAL ARTS HONORS SEMINAR. 3 Hours.
Intensive small class lecture or seminar course addressing basic issues in various liberal arts disciplines. Topics will vary.

HONR-LA 3303. INDEPENDENT STUDY. 3 Hours.
Independent study topics are arranged on an individual basis. Performance may be assessed by oral or written examination, research or review paper as arranged.
HONR-LA 3304. SPECIAL TOPICS. 3 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-LA 3310. POLITICAL & COMMUNITY LEADERSHIP. 3 Hours.
This course examines theories and concepts of leadership in political and community contexts, and processes by which power and authority are exercised to foster political change in one's community. Emphasis is placed on application to actual leadership situations.

HONR-LA 3404. HONORS SPECIAL TOPICS. 4 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-LA 3407. HONORS SPECIAL TOPICS WITH LAB. 4 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change. Completion of lab required. Prerequisite: Membership in the Honors College; other requirements as determined by faculty teaching the course.

HONR-LA 4303. ADVANCED SPECIAL TOPICS. 3 Hours.
Advanced special topics in Honors. May be repeated for credit as topics change.

HONR-LA 4407. HONORS SPECIAL TOPICS WITH LAB. 4 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change. Completion of lab required. Prerequisite: Membership in the Honors College; other requirements as determined by faculty teaching the course.

COURSES

HONR-NU 2203. HONORS SPECIAL TOPICS. 2 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-NU 3504. HONORS SPECIAL TOPICS. 5 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-NU 4203. ADVANCED SPECIAL TOPICS. 2 Hours.
Advanced special topics in Honors. May be repeated for credit as topics change.

HONR-NU 4303. ADVANCED SPECIAL TOPICS. 3 Hours.
Advanced special topics in Honors. May be repeated for credit as topics change.

HONR-NU 4403. HONORS SPECIAL TOPICS. 4 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-NU 4503. HONORS SPECIAL TOPICS. 5 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

COURSES

HONR-VP 2103. SPECIAL TOPICS. 1 Hour.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-VP 2300. SEMINAR. 3 Hours.
Team-taught interdisciplinary course that introduces knowledge and perspectives from the arts, sciences, and humanities. Designed around a theme of current or historical significance. Writing-intensive. Depending on topic, may meet the literature, fine arts/humanities or social/cultural studies requirement of the core curriculum (consult departmental advisor for details).

HONR-VP 2303. HONORS SPECIAL TOPICS. 3 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-VP 3304. SPECIAL TOPICS. 3 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR-VP 4303. ADVANCED SPECIAL TOPICS. 3 Hours.
Advanced special topics in Honors. May be repeated for credit as topics change.

COURSES

HONR 1100. ENRICHMENT SERIES. 1 Hour.
Provides an introduction and orientation to the Honors College. Designed to assist students in acquiring skills for academic survival, individual success, and pursuit of their Honors degree and career possibilities. Format varies; instruction by both faculty and Honors College student peer counselors.

HONR 1304. HONORS INDEPENDENT STUDY. 3 Hours.
Independent study courses are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 2104. HONORS INDEPENDENT STUDY. 1 Hour.
Independent study topics are arranged on an individual basis. Performance may be assessed by oral or written examination, research or review paper as arranged.
HONR 2106. HONORS SEMINAR. 1 Hour.
The Honors Seminar will cover topics of general interdisciplinary interest to students from a wide variety of academic disciplines. Active learning will be stressed with all students expected to both moderate and participate in classroom discussions of seminar topics. Instructors and topics offered will vary. The course may be repeated for credit as topics change.

HONR 2111. HONORS COMMUNITY SERVICE LEARNING. 1 Hour.
Intensive course in the history and practice of community service learning (CSL). Readings will include general accounts of active learning, the institutional history of CSL in higher education, and a comparative study of CSL programs across the country. Students will design and implement a CSL project based on their major, and in conjunction with an area non-profit organization. Evaluation will be based on written work on both the readings and the CSL project.

HONR 2203. HONORS SPECIAL TOPICS. 2 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR 2204. HONORS INDEPENDENT STUDY. 2 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 2300. SEMINAR. 3 Hours.
Team-taught interdisciplinary course that introduces knowledge and perspectives from the arts, sciences, and humanities. Designed around a theme of current or historical significance. Writing-intensive. Depending on topic, may meet the literature, fine arts/humanities or social/cultural studies requirement of the core curriculum (consult departmental advisor for details).

HONR 2304. HONORS INDEPENDENT STUDY. 3 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 2403. SPECIAL TOPICS. 4 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR 2404. HONORS INDEPENDENT STUDY. 4 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 2435. HONORS SPECIAL TOPICS. 4 Hours.
Topics, format and prerequisites to be determined by faculty offering the course. May be repeated for credit as topics change.

HONR 3103. INDEPENDENT STUDY. 1 Hour.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR 3104. SPECIAL TOPICS. 1 Hour.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR 3203. HONORS INDEPENDENT STUDY. 2 Hours.
Independent study topics are arranged on an individual basis. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 3204. SPECIAL TOPICS. 2 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR 3303. INDEPENDENT STUDY. 3 Hours.
Independent study topics are arranged on an individual basis. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 3403. HONORS INDEPENDENT STUDY. 4 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 3404. HONORS SPECIAL TOPICS. 4 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR 3435. HONORS SPECIAL TOPICS. 4 Hours.
Topics, format and prerequisites to be determined by faculty offering the course. May be repeated for credit as topics change.

HONR 3504. HONORS SPECIAL TOPICS. 5 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR 3535. HONORS SPECIAL TOPICS. 4 Hours.
Topics, format and prerequisites to be determined by faculty offering the course. may be repeated for credit as topics change.

HONR 4000. HONORS INDEPENDENT RESEARCH. 0 Hours.
Individualized research conducted under the supervision of a faculty member. This is a zero-credit course. May be repeated. Prerequisite: membership in the Honors College, permission of the supervising faculty member, and approval by the Dean of Honors.
HONR 4103. ADVANCED SPECIAL TOPICS. 1 Hour.
Advanced special topics in Honors. May be repeated for credit as topics change.

HONR 4104. HONORS INDEPENDENT STUDY. 1 Hour.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 4106. HONORS ADVANCED SEMINAR. 1 Hour.
The Honors Advanced Seminar will cover topics of general interdisciplinary interest to students from a wide variety of academic disciplines. Active learning will be stressed with all students expected to research and prepare seminar presentations and moderate class discussions on assigned seminar topics. Instructors and topics offered will vary. The course may be repeated for credit as topics change. Prerequisite: Junior or Senior status or permission of the instructor.

HONR 4144. HONORS SERVICE LEARNING OPPORTUNITIES. 1 Hour.
Credit will be given for supervised service to a community agency. The service must be related to formal coursework and approved by a faculty mentor and a degree plan advisor. Graded Pass/Fail.

HONR 4203. ADVANCED SPECIAL TOPICS. 2 Hours.
Advanced special topics in Honors. May be repeated for credit as topics change.

HONR 4204. HONORS INDEPENDENT STUDY. 2 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 4244. HONORS SERVICE LEARNING OPPORTUNITIES. 2 Hours.
Credit will be given for supervised service to a community agency. The service must be related to formal coursework and approved by a faculty mentor and a degree plan advisor. Graded Pass/Fail.

HONR 4300. ADVANCED SEMINAR. 3 Hours.
Integrates substantive knowledge in the arts, sciences, and humanities around a theme of current or historical significance. May meet the Social/Cultural Studies requirement of the core curriculum.

HONR 4303. ADVANCED SPECIAL TOPICS. 3 Hours.
Advanced special topics in Honors. May be repeated for credit as topics change.

HONR 4304. HONORS INDEPENDENT STUDY. 3 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 4310. HONORS STUDY ABROAD. 3 Hours.
Interdisciplinary course in an out-of-country location around a theme or topic appropriate to the location. Journal, term papers, and/or examinations may be required. Meets the Social/Cultural Studies requirement of the core curriculum.

HONR 4320. HONORS INTERNSHIP. 3 Hours.
Supervised employment in student’s area(s) of interest. Journal and term paper required. Reserved for students whose major department does not offer an Internship course.

HONR 4344. HONORS SERVICE LEARNING OPPORTUNITIES. 3 Hours.
Credit will be given for supervised service to a community agency. The service must be related to formal coursework and approved by a faculty mentor and a degree plan advisor. Graded Pass/Fail.

HONR 4394. HONORS SENIOR RESEARCH THESIS/CREATIVE PROJECT. 3 Hours.
A research thesis or creative project and oral presentation are required for the Honors degree. In consultation with the faculty thesis supervisor and the Honors Dean, a program of research and writing will be arranged. Planning for the Honors Thesis/Creative Project should begin early in the student's junior year. For more extensive projects additional credit may be earned. Full details for completing the Honors Research Thesis/Creative Project are provided on the Honors website, http://www.honors.uta.edu/thesis/. This course is reserved for departments and programs that do not list dedicated thesis courses in their inventories.

HONR 4403. HONORS SPECIAL TOPICS. 4 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.

HONR 4404. HONORS INDEPENDENT STUDY. 4 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 4435. HONORS SPECIAL TOPICS. 4 Hours.
Topics, format and prerequisites to be determined by faculty offering the course. May be repeated for credit as topics change.

HONR 4503. HONORS SPECIAL TOPICS. 5 Hours.
Topics, format, and prerequisites to be determined by faculty offering the courses. May be repeated for credit as topics change.
HONR 4504. HONORS INDEPENDENT STUDY. 5 Hours.
Independent study topics are arranged on an individual basis with permission of an instructor. Performance may be assessed by oral or written examination, research or review paper as arranged.

HONR 4535. HONORS SPECIAL TOPICS. 5 Hours.
Topics, format and prerequisites to be determined by faculty offering the course. May be repeated for credit as topics change.

COURSES

SVLN 2311. SEMINAR IN SERVICE LEARNING. 3 Hours.
Introduction to the history and practice of community service learning (CSL). Readings will include general accounts of active learning, the institutional history of CSL in higher education, and a comparative study of CSL programs across the country. Students will design and implement a CSL project based on their major, and in conjunction with an area nonprofit organization. Evaluation will be based on written work on both the readings and the CSL project.
Interdisciplinary Studies - Undergraduate Program

Overview

The Interdisciplinary Studies Program (INTS) provides students the opportunity to create a truly customized degree plan while maintaining high academic standards. The Interdisciplinary Studies Program is intended to meet the needs of creative, intellectually curious, and academically motivated students.

Interdisciplinary Studies is organized in six distinct tracks, each designed to encourage broad intellectual inquiry and the synthesis of diverse areas of study. The first five correspond to the five major themes of the UT Arlington Strategic Plan: Bold Solutions, Global Impact. The last is intentionally open to student choice.

1) Health and the Human Condition
2) Sustainable Urban Communities
3) Data-Driven Discovery
4) Global Environmental Impact
5) Cultural Understanding and Social Transformation
6) Open to student choice

Students in the program are expected to work closely with their adviser to develop an innovative program of study that draws on the rich academic resources of the University, including existing minors and certificates. As members of the Honors College, INTS students are also encouraged to pursue opportunities in experiential learning, including undergraduate research, internships, service learning, and study abroad.

Application Procedure

Students interested in an Interdisciplinary Studies major must meet the eligibility requirements set by the Honors College. Prospective students are strongly encouraged to apply to the Honors College as soon as possible, and they should meet early on with an academic adviser in the Interdisciplinary Studies program to begin developing a tentative degree plan. In order to be formally admitted to the program, a student must earn a B or better in INTS 2301 and have a cumulative GPA of at least 3.35. All students admitted to INTS will automatically become members of the Honors College, and as such will enjoy all benefits and be expected to meet all requirements of the College.

Requirements for the Bachelor of Arts and Bachelor of Science Degrees in Interdisciplinary Studies

TOTAL HOURS REQUIRED FOR GRADUATION FOR BA AND BS DEGREES: 120 HOURS

Of these, at least 36 hours must be at the 3000/4000 level, 24 hours of which must be from UT Arlington.

BACHELOR OF ARTS DEGREE IN INTERDISCIPLINARY STUDIES, GENERAL REQUIREMENTS

DEGREE REQUIREMENTS

General Core Requirements 42

Program Requirements 18
Modern and Classical Languages 8

TRACK ONE: Another Department's Minor, or UTA Certificate Program, or Pre-defined INTS Track, or Custom INTS Track 18

TRACK TWO: Another Department's Minor, or UTA Certificate Program, or Pre-defined INTS Track, or Custom INTS Track 18

ELECTIVES 19

Total Hours 120

TRACKS

Each Interdisciplinary Studies degree plan has two areas of concentration that, along with the core INTS courses, make up the course of study for the INTS degree. Each area of concentration may be constituted of one of the following options: a Minor, a Certificate program, a pre-defined INTS Track, or a Custom Track. Each Track requires a minimum of 18 hours and must include 9 hours of 3000/4000 level course work. Students must take at least one Methods Class (from approved list) within one of their tracks for at least 3 credit hours.

SENIOR PROJECT OPTIONS

Each major has up to four options for an Honors Senior Project:

- Thesis or creative project
- Semester or more of study abroad
- Community service learning project
- Internship

The Honors College works closely with undergraduate programs across campus to determine which senior projects are best for their majors, and not all options will be permitted by all academic units. Students interested in Honors are therefore encouraged to contact an Honors advisor about rules for the Senior Project in their particular field of study.

All four options require an approved proposal, a substantial written product, and an oral presentation at the Honors Research Symposium every fall and spring semester.

The flexibility of the Honors requirements makes it essential that students maintain close contact with both their departmental mentor and advisor and the Honors advising staff. Students must meet with an Honors advisor during each of their first three years, but are strongly encouraged to meet with the advising staff on a regular basis, preferably once per semester.

BACHELOR OF SCIENCE DEGREE IN INTERDISCIPLINARY STUDIES, GENERAL REQUIREMENTS

DEGREE REQUIREMENTS

General Core Requirements 42

Program Requirements 18

TRACK ONE: Another Department's Minor, or UTA Certificate Program, or Pre-defined INTS Track, or Custom INTS Track 18

TRACK TWO: Another Department's Minor, or UTA Certificate Program, or Pre-defined INTS Track, or Custom INTS Track 18

Electives 27

Total Hours 120

For the Bachelor of Science degree, at least 18 hours in the two Tracks must be "science-for-science majors" course work; at least 12 of these must be at the 3000/4000 level.

COURSES
INTS 1310. INTRODUCTION TO POPULAR CULTURE. 3 Hours.
This course will introduce students to the role of popular culture in American society. It examines culture as a process through which people make symbolic meaning out of the world. Since everyone has access to popular culture, it constructs the way that people think about the world around them.
The course will explore the creation, production, dissemination, reception and consumption of popular culture.

INTS 2301. ENVISIONING INTERDISCIPLINARITY. 3 Hours.
This foundational course is designed to introduce students to a variety of academic discourses and modes of knowledge-making, and to present some of the key concepts and aims of interdisciplinary studies. Students must complete the course with a "B" or better to enter or continue in the Interdisciplinary Studies Program.

INTS 2388. SPECIAL TOPICS INTERDISCIPLINARY STUDIES. 3 Hours.
Special topics or problems that lend themselves to an interdisciplinary approach. May be repeated for credit when the topic changes.

INTS 3320. INTERDISCIPLINARY THEORY. 3 Hours.
This course examines the important theories that form the foundation for interdisciplinary studies. These theories are put into a historical context that not only covers the origins of the disciplines, but the theories and ideas that have come to dominate the 21st century outlook on knowledge and the world.
Prerequisite: Junior Standing or Permission of the instructor.

INTS 4388. SPECIAL TOPICS INTERDISCIPLINARY STUDIES. 3 Hours.
Special topics or problems that lend themselves to an interdisciplinary approach. May be repeated for credit when the topic changes. Prerequisite: Completion of INTS 2301 with a grade of B or better, or Honors College approval.

INTS 4391. INTERDISCIPLINARY STUDIES SENIOR SEMINAR. 3 Hours.
The purpose of this course is to allow students to engage with each other across disciplines and areas of interest at the end of their academic career. The seminar includes both readings on a topic of general academic interest and guest speakers from across campus to engage topics from an interdisciplinary perspective. This will provide students the opportunity to reflect on their own interdisciplinary degrees at the same time that they see how their peers envisioned interdisciplinarity. Students are encouraged to use the seminar as a foundation for the Honors College Senior Project.
Prerequisite: Completion of INTS 2301 with a grade of B or better, or Honors College permission.

INTS 4392. INTERDISCIPLINARY STUDIES SERVICE LEARNING. 3 Hours.
Students work with a UTA faculty mentor to produce a detailed, substantive written project that focuses on a disciplinary problem and documents how the community service learning project helped them in addressing and/or understanding the problem. Students are encouraged to use the service learning project as a foundation for the Honors College Senior Project/INTS Thesis/Project. May be repeated with permission. Prerequisite: Completion of INTS 2301 with a grade of B or better, or Honors College permission.

INTS 4394. INTERDISCIPLINARY STUDIES SENIOR THESIS/PROJECT. 3 Hours.
Students complete sustained original research or creative activity under the guidance of a UTA faculty mentor in their area(s) of concentration. Prerequisite: Completion of INTS 2301 with a grade of B or better.
INTS 4395. INTERDISCIPLINARY STUDIES INTERNSHIP. 3 Hours.
Students work with a UTA faculty mentor to produce a detailed, substantive written project that focuses on a disciplinary problem and documents how
the internship helped them in addressing and/or understanding the problem. Students are encouraged to use the internship project as a foundation for
the Honors College Senior Project/INTS Thesis/Project. Prerequisites: Completion of INTS 2301 with a grade of B or better, or approval of the Honors
College.

INTS 4396. INTERDISCIPLINARY STUDIES STUDY ABROAD. 3 Hours.
Students work with a UTA faculty mentor to produce a detailed, substantive written project that focuses on a disciplinary problem and documents how a
study abroad experience helped them in addressing and/or understanding the problem. Students are encouraged to use the study abroad experience as
a foundation for the Honors College Senior Project/INTS Thesis/Project. Prerequisite: Completion of INTS 2301 with a grade of B or better, or approval
of the Honors College.
Division of Student Success

At UT Arlington, we are committed to helping students succeed academically so that they can earn their bachelor's degrees. If you are committed to your education, we are here to help with a vast array of support resources and programs designed to aid students of all classifications. The Division of Student Success serves as the starting point to help you create the best experience possible at UT Arlington.

From your freshman year, the Division of Student Success will be an active partner in your academic success with advising, tutoring, supplemental instruction, and more. As you progress through your degree program, you will be able to return to Division of Student Success for help with difficult subjects, for advice on tackling new obstacles, and for guidance on careers that align with your academic goals.

While many freshmen students come in with a major identified, all first-time freshmen will begin their academic journey at UT Arlington in the Division of Student Success. There, they will receive supportive and proactive advising as well as access to the academic support resources they will need as they transition into the college experience. These resources and services will remain available to all students even after they move into their academic major department for advising.

We also understand that, given life’s complexities, twists, and turns, not all students will fit into the molds that the traditional disciplinary majors offer. Our Bachelor of Science in University Studies degree provides an option with a flexible approach that will open doors and help you achieve your career goals.

Think of the Division of Student Success as your one-stop center dedicated to student success. Together, we will help you set your sights high and lay the foundation for your future.

Mission Statement

The Division of Student Success promotes student learning and development by providing coordinated and centralized academic resources and support services that help students define their educational goals and pursue a path toward graduation. In addition, the Division of Student Success serves as a focal point for campus programming that helps first-year students successfully transition to college life and meet the academic challenges set by faculty.

Division of Student Success Programs and Services

While the Division of Student Success focuses on assisting freshman students as they transition to college, our programs and services serve all students who seek academic support during their career at UT Arlington.

GENERAL SERVICES

- The Student Success Help Desk (https://www.uta.edu/student-success/path-to-graduation/helpdesk/) is here to help ensure every student's success. Contributing to our campus-wide culture of completion, our goal is to help our students overcome obstacles to timely graduation.
- Academic Success Coaching (https://www.uta.edu/student-success/course-assistance/success-coaching/) provides students with key information and strategies to identify, manage, and reach their goals leading to academic, professional, and personal success. Academic success coaches help students with academic skills and college-life management skills and will work individually with students to do an assessment of learning to identify each student's unique needs and create an academic plan.

ACADEMIC SUCCESS CENTER

- UT Arlington provides a variety of resources and programs designed to help students develop academic skills, deal with personal situations, and better understand concepts and information related to their courses.
- Resources include: tutoring by appointment (https://nam05.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.uta.edu%2Fstudentsuccess%2Flearning-center%2Ftuts%2Ftutoring%2Findex.php&data=02%7C01%7Cunitec%40uta.edu %7C6b9a88f1f454d89530508d6da305e67%7C5cd5b43d7be4ca8173729e3b0a62d9%7C0%7C0%7C636936298605061562&sdata=KqSDvKJfVo8ieLtwv13h20vZHfCIyK9jBzQf9V6m94U%3D&reserved=0), drop-in tutoring (https://nam05.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.uta.edu%2Fdeas%2Fservices%2Findex.php&data=02%7C01%7Cunitec%40uta.edu %7C6b9a88f1f454d89530508d6da305e67%7C5cd5b43d7be4ca8173729e3b0a62d9%7C0%7C0%7C636936298605071574&sdata=Q7HrdUqYKfHy9VL%2FoaLUpPuD7nNWEa%2F3F3F395FJO槇%3D&reserved=0), e-tutoring (https://www.uta.edu/student-success/course-assistance/tutoring/e-tutoring/), supplemental instruction (https://nam05.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.uta.edu%2Fstudentssuccess%2Flearning-center%2Fsupplemental-instruction%2Findex.php&data=02%7C01%7Cunitec%40uta.edu %7C6b9a88f1f454d89530508d6da305e67%7C5cd5b43d7be4ca8173729e3b0a62d9%7C0%7C0%7C636936298605081583&sdata=gPeb8nF770AV77LW%3D&reserved=0), peer-led team learning (https://www.uta.edu/student-success/course-assistance/peer-led-team-learning/), mentoring (https://nam05.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.uta.edu%2Fdeas%2Fservices%2Fmentoring%2Findex.php&data=02%7C01%7Cunitec%40uta.edu %7C6b9a88f1f454d89530508d6da305e67%7C5cd5b43d7be4ca8173729e3b0a62d9%7C0%7C0%7C636936298605081583&sdata=q43ZHBhf%2BHQ7PGYsBCoqJKIdWVEO0Is3xZX7%3D&reserved=0) (time management, study skills, etc.), TRIO Student Support Services (https://www.uta.edu/ideas/services/mentoring/index.php&data=02%7C01%7Cunitec%40uta.edu %7C6b9a88f1f454d89530508d6da305e67%7C5cd5b43d7be4ca8173729e3b0a62d9%7C0%7C0%7C636936298605081583&sdata=g43ZHBhf%2BHQ7PGYsBCoqJKIdWVEO0Is3xZX7%3D&reserved=0), Peer-Led Team Learning (https://www.uta.edu/student-success/course-assistance/peer-led-team-learning/), and more.
Division of Student Success

DEGREE PROGRAM

- University Studies (p. 1358) is designed for students who have investigated different majors and now want to utilize the courses already taken to complete a bachelor’s degree in a timely manner.

FRESHMAN-FOCUSED PROGRAMS

- University Advising Center (https://www.uta.edu/student-success/advising/uac/) advises all incoming freshman students (up to 30 credit hours) as well as undeclared and conditionally admitted transfer students. Academic advisors also guide students in the majors exploration (http://www.uta.edu/universitycollege/current/academic-planning/uac/Major-Exploration.php) process.
- Learning Communities (http://www.uta.edu/universitycollege/prospective/maverick-scholars/figs/) match students with others who share their academic interests and majors in a freshman seminar and common coursework under the mentorship of faculty and peer academic leaders (PALs). Students who live on campus may choose to join a residential Learning Community, which offers programming in the residence hall.
- Transfer Students (https://www.uta.edu/studentsuccess/success-programs/programs/enroll-in-univ-1101). Under the mentorship of faculty and peer academic leaders (PALs), this course matches students with others who share their academic interests and majors. This transfer seminar focuses on enhancing academic skills and engaging students in experiential learning opportunities that will lead to professional skill building.
- Success U (https://www.uta.edu/universitycollege/success-programs/programs/success-u/) provides all freshman students a preview of what college is really like and an opportunity to get prepared for the challenges that lay ahead.
Center for African American Studies

CAAS Mission

To facilitate the discourse on race and contextualize it in the historical, cultural, and community influences that shape the diverse experiences of Blacks in America.

Established August 2012, the only one of its kind in North Texas (and one of three in the state), the Center for African American Studies (CAAS) builds on the University of Texas at Arlington's reputation as one of the most diverse institutions in the nation.

We hope to enlighten, inspire, and empower student, faculty, and community stakeholders to create progressive, collaborative solutions that drive social change within the Black community specifically and the broader society generally.

Our Programs

Through teaching, civic engagement, and community-based research focused on diverse contextual conditions of Black Americans, CAAS serves as a vital intellectual and social resource for the community, on and off campus.

Curriculum and Instruction

- Minor in African American Studies
  - Curriculum represented across three areas
    - History & Culture
    - Languages, Literature, & the Arts
    - Behavioral and Social Inquiry
- Introduction to African American Studies
- Independent Study Courses
- Internships & Service Learning Courses
- Courses cross-listed in other units

Student Development Initiatives

- Emerging Scholars Program
- Emerging Leaders Initiative
- Interns and Volunteers

Research and Policy Analysis

- Social Justice
- Education
- Health and Human Conditions
- Race, Class, and Crime
- Sustainable Communities

Community Outreach and Engagement

- Civic Programming and Events
- Community Lectures and Forums
- Research Conference

How to Add the African American Studies Minor

If you are interested in obtaining a minor in African American Studies:

1. Complete the Minor Approval Form and have it signed by your major department advisor.
2. Once the Minor Approval Form is completed, schedule an appointment with a CAAS advisor and bring the following:
   - completed degree plan (signed by your major department advisor)
   - minor approval form (signed by your major department advisor) and
   - Maverick Academic Progress (MAP)
To make an advising appointment, please call 817-272-9642 or email caas@uta.edu.

**AAST Minor**

The African American Studies Minor is a comprehensive, interdisciplinary program that prepares students for critical thinking and discourse on race and contextual factors, social consciousness and awareness, and civic engagement. In order to receive a minor in African American Studies, students need to take 18 credit hours from a selection of courses offered across different disciplines. The majority of our courses are cross-listed with courses offered in other departments. Students in African American Studies need to take the following courses:

<table>
<thead>
<tr>
<th>Required Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>AAST 2300 INTRODUCTION TO AFRICAN AMERICAN STUDIES</td>
</tr>
</tbody>
</table>

Students must take one of the following courses (after completing one course, other courses can count as electives):

| AAST 3338 CONTEMPORARY BLACK EXPERIENCE |
| AAST 3337 RACIAL & ETHNIC GROUPS IN US |
| AAST 3323 AFRICAN AMERICAN HISTORY SINCE EMANCIPATION |
| AAST 3322 AFRICAN AMERICAN HISTORY TO 1863 |
| AAST 3317 DIVERSE POPULATIONS |

Electives (students need to take four of the following electives):

| AAST 3350 BLACK POLITICAL AND SOCIAL THOUGHT |
| AAST 2303 HISTORY AND APPRECIATION OF HIP HOP AND R&B MUSIC |
| AAST 2337 ECONOMICS OF SOCIAL ISSUES |
| AAST 2371 LANGUAGE IN A MULTICULTURAL USA |
| AAST 3300 TOPICS IN WOMEN'S AND GENDER STUDIES |
| AAST 3301 THEORIES OF HUMAN BEHAVIOR |
| AAST 3310 BLACK FAMILIES |
| AAST 3313 THE COMING OF THE CIVIL WAR, 1820-1860 |
| AAST 3314 CIVIL WAR AND RECONSTRUCTION, 1860-1876 |
| AAST 3317 DIVERSE POPULATIONS |
| AAST 3319 U.S. IMMIGRATION POLICY AND THE AMERICAN DREAM |
| AAST 3320 BLACK WOMEN IN SOCIETY |
| AAST 3321 THE LATINA EXPERIENCE |
| AAST 3322 AFRICAN AMERICAN HISTORY TO 1863 |
| AAST 3323 AFRICAN AMERICAN HISTORY SINCE EMANCIPATION |
| AAST 3329 CONTEMPORARY AFRICAN CULTURES |
| AAST 3330 CULTURAL DIVERSITY AND IDENTITY |
| AAST 3332 COMPARATIVE KINSHIP AND FAMILY SYSTEMS |
| AAST 3336 SOCIAL INEQUALITY |
| AAST 3337 RACIAL & ETHNIC GROUPS IN US |
| AAST 3338 CONTEMPORARY BLACK EXPERIENCE |
| AAST 3339 RACE, SPORT AND MEDIA |
| AAST 3343 THE NEW SOUTH, 1863-PRESENT |
| AAST 3344 SOCIOLOGY OF THE 1960S |
| AAST 3345 AFRICAN-AMERICAN LITERATURE |
| AAST 3347 TOPICS IN MULTICULTURAL AMERICAN LITERATURES |
| AAST 3353 SOCIAL CLIMATE OF CITIES |
| AAST 3373 ARCHAEOLOGY OF EGYPT |
| AAST 3378 HISTORY OF THE CARIBBEAN |
| AAST 3380 RACE, CRIME, AND JUSTICE |
| AAST 3385 AFRICAN HISTORY I |
| AAST 3386 AFRICAN HISTORY II |
| AAST 4317 ETHNIC GROUP POLITICS IN THE UNITED STATES |
| AAST 4318 POLITICS OF AFRICAN AMERICANS |
| AAST 4326 DIVERSITY IN ORGANIZATIONS |
| AAST 4331 RACE, ETHNICITY & FAMILY FORMATION |
After consulting with their major departments or programs, students will file a degree plan for the AAST minor at the Center for African American Studies. Courses not listed above may qualify as electives with the approval of the director of the Center for African American Studies.

### COURSES

**AAST 2300. INTRODUCTION TO AFRICAN AMERICAN STUDIES. 3 Hours.**
This course introduces students to the African American experience in the United States, including an interdisciplinary analysis of the African American experience in politics, the arts, folklore, religion, economics, sociology, psychology, and community development; and an examination of local history, contemporary issues, and recent events in the African American community. This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences.

**AAST 2303. HISTORY AND APPRECIATION OF HIP HOP AND R&B MUSIC. 3 Hours.**
Explores the history and evolution of Hip Hop and modern urban music, emphasizing musical style and social context, from rhythm and blues through the present. Offered as AAST 2303 and MUSI 1303; credit will be granted in only one department.

**AAST 2337. ECONOMICS OF SOCIAL ISSUES. 3 Hours.**
Economic analysis and application of basic economic principles to a variety of social issues and topics. Students will become familiar with the U.S. economy, its structure, and how economics applies to an assortment of public policy topics such as crime, energy, immigration, drug use, prostitution, minimum wage, our aging population, healthcare, gender driven wages, recycling, and the macro economy, to name a few. In addition, current economic issues and events may be incorporated into the course via lecture and/or class discussions. This is a non-technical course which satisfies the core requirement for social and behavioral studies. Will not serve to meet degree requirements for College of Business Administration majors. Offered as ECON 2337 and AAST 2337; credit will be granted in only one department.

**AAST 2371. LANGUAGE IN A MULTICULTURAL USA. 3 Hours.**
The relationship between language in the U.S. and social power. This course explores how negative attitudes toward some language varieties and languages spoken in the U.S. arise from social factors, rather than features of the languages themselves. In addition to studying language varieties, the course shows how American institutions such as the educational system and the media reinforce these negative attitudes and contribute to discrimination. Offered as AAST 2371 and LING 2371; credit will be granted in only one department.

**AAST 3300. TOPICS IN WOMEN'S AND GENDER STUDIES. 3 Hours.**
Special topics of interest in the disciplines of Women's and Gender Studies. May be repeated for credit when the topic changes. Offered as WOMS 3300 and AAST 3300; credit will be granted in only one department.

**AAST 3301. THEORIES OF HUMAN BEHAVIOR. 3 Hours.**
This course explores, within the context of a strengths and empowerment perspective, theories of human behavior. For social work majors, it is strongly recommended that SOCW 2302 be taken before this course. Offered as AAST 3301 and SOCW 3301; credit will be granted in only one department. This course is required for Social Work Field Instruction and Seminar I (SOCW 4951).

**AAST 3310. BLACK FAMILIES. 3 Hours.**
Course will focus on the historical and cultural development of black families. Topics include slavery, segregation, family structure, and socioeconomic issues. Special attention will be given to people, places, and events that are important for understanding African American family life in the Dallas/Ft Worth area.

**AAST 3313. THE COMING OF THE CIVIL WAR, 1820-1860. 3 Hours.**
Sectional conflict in the United States from the Missouri Compromise of 1820 to the election of Abraham Lincoln in 1860. Southern separatism, slavery as a political issue, the antislavery movement, the breakup of the national political system, and the failure of sectional compromise. Offered as AAST 3313 and HIST 3313; credit will be granted in only one department.

**AAST 3314. CIVIL WAR AND RECONSTRUCTION, 1860-1876. 3 Hours.**
The background and causes of secession and the Civil War, the organization of the Confederate States of America, the progress of the war, and the attempts to solve the racial, social, political, and economic problems of the post-war period. Offered as AAST 3314 and HIST 3314; credit will be granted in only one department.
AAST 3317. DIVERSE POPULATIONS. 3 Hours.
Introduction to theoretical, practical, and policy issues related to diverse populations. Historical, political, and socioeconomic forces are examined that maintain discriminatory and oppressive values, attitudes, and behaviors in society and in all levels of organizational behavior. This course is required for admission to the Bachelor of Social Work (BSW) program. Offered as AAST 3317, SOCW 3307 and MAS 3319; credit will be granted in only one department.

AAST 3319. U.S. IMMIGRATION POLICY AND THE AMERICAN DREAM. 3 Hours.
Focus on American identity through the examination of immigration to the United States, past and present, and the evolution of U.S. immigration policy. Topics include U.S. attitudes and policy responses to European, Asian, and Latin American immigration and to the incorporation of the descendants of African slaves and Native Americans. Emphasis on the decline of the melting pot idea and the incorporation of recent immigrants. Offered as MAS 3320, AAST 3319, and SOCW 3320. Credit will be granted only once.

AAST 3320. BLACK WOMEN IN SOCIETY. 3 Hours.
Course provides an overview of historical and current issues facing African American women. Topics include racism, sexism, political involvement, education, religion, family, and comparisons with the experiences of black men.

AAST 3321. THE LATIN A EXPERIENCE. 3 Hours.
A course on the social, cultural, and economic experiences of Latina and Latin American origin women in the United States. Offered as MAS 3314, SOCI 3314, SOCW 3314, WOMS 3314, and AAST 3321. Credit will be granted in only one department.

AAST 3322. AFRICAN AMERICAN HISTORY TO 1863. 3 Hours.
History of blacks in America from their African origins to 1863. Emphasis on early African society, American slavery, and the development of black institutions and culture in the U.S. Offered as AAST 3322 and HIST 3322; credit will be granted in only one department.

AAST 3323. AFRICAN AMERICAN HISTORY SINCE EMANCIPATION. 3 Hours.
Emphasis on the transition from slavery to freedom and the political, social, and economic status of blacks in the late 19th century, 20th century black institutions and culture, and the evolution of the civil rights movements. Offered as AAST 3323 and HIST 3323; credit will be granted in only one department.

AAST 3329. CONTEMPORARY AFRICAN CULTURES. 3 Hours.
A comparative study of African communities with an emphasis on sub-Saharan Africa. Covers regional cultural geography and history as well as ethnography of specific communities. Explores both the challenges facing contemporary African nations as well as emerging solutions. Includes exposure to African art, literature, music, cinema, and food. Offered as AAST 3329 and ANTH 3329; credit will be granted in only one department.

AAST 3330. CULTURAL DIVERSITY AND IDENTITY. 3 Hours.
The ways identity is constructed in contemporary societies in an increasingly complex and multicultural world. Ethnic, racial, gender, and class identities. How and when identity is asserted and assigned, and how it can both draw boundaries and forge ties between peoples. Formerly listed as ANTH 2350. Credit cannot be given for both ANTH 2350 and ANTH 3330. Also listed as MAS 3330; credit cannot be granted for both ANTH 3330 and MAS 3330. Offered as AAST 3330 and ANTH 3330; credit will be granted in only one department.

AAST 3332. COMPARATIVE KINSHIP AND FAMILY SYSTEMS. 3 Hours.
Variation in kinship and family systems from crosscultural and evolutionary perspectives. Structure, function, and dynamics of kinship and family systems as adaptations to diverse ecological, social, and historical circumstances. Implications of this approach for understanding kinship and family in American society also addressed. Formerly listed as ANTH 4338. Credit cannot be given for both ANTH 3338 and ANTH 4338. Also offered as WOMS 3338; credit will be granted only once. Offered as AAST 3332 and ANTH 3338; credit will be granted in only one department.

AAST 3336. SOCIAL INEQUALITY. 3 Hours.
Examines the processes, characteristics, and consequences of social inequality in society. Topics include the social class structure, status groups, and elite power structure as they influence people's life chances. Offered as AAST 3336 and SOCI 3336; credit will be granted in only one department.

AAST 3337. RACIAL & ETHNIC GROUPS IN US. 3 Hours.
Compares the immigration, acculturation, and adjustment processes of various racial/ethnic groups in the U.S. Examines historical and contemporary discrimination in relation to the social conditions of racial/ethnic minority groups in the U.S. Topics include classical and contemporary theory; individualistic, cultural, and structural arguments about social arrangements; and conflict among majority and minority groups. Offered as AAST 3337, MAS 3337, and SOCI 3337; credit will be granted in only one department. Credit will not be granted for both SOCI 3337 and SOCI 4310 or for MAS 3337 and MAS 4310.

AAST 3338. CONTEMPORARY BLACK EXPERIENCE. 3 Hours.
An overview of recent research concerning the African American experience in the post-civil rights era. Topics include explanations for racial differences across spheres of society such as income, education, and occupation; the debate over race versus social class; the persistence of racial discrimination; and emerging disputes within the black community regarding "what it means to be black." Offered as AAST 3338 and SOCI 3338; credit will be granted in only one department.

AAST 3339. RACE, SPORT AND MEDIA. 3 Hours.
The media, including television, film, print, audio, and online outlets, influence how we view the world. This course analyzes overt, subtle and subliminal messages about culture, race, ethnicity, and sport as presented to us through various forms of the media. Through examinations of media portrayals of race, both past and present, students will analyze media artifacts, identify recurring themes, and examine research focused on the societal effects of stereotypical media portrayals. Offered as AAST 3339 and SOCI 3339; credit will be granted in only one department.
AAST 3341. THE OLD SOUTH, 1607-1863. 3 Hours.
Colonial origins of plantation agriculture, slavery, economics, King Cotton, politics and secession. Other topics include slave cultures, religion, slave insurrections, plantation lifestyle, honor, dueling and southern belles. Offered as AAST 3341 and HIST 3342; credit will be granted in only one department.

AAST 3342. SOCIOLOGY OF RELIGION. 3 Hours.
This course provides an overview of the scientific study of religion from a sociological perspective. The focus is on theories, research and trends relevant to religion in the contemporary United States. Topics include, but are not limited to, religious traditions, practices, and beliefs; declining religious participation; and religion and social change. The relationship between religion, politics, race relations, sex and gender will also be examined. Offered as SOCI 3343 and AAST 3342; credit will be granted in only one department.

AAST 3343. THE NEW SOUTH, 1863-PRESENT. 3 Hours.
From military defeat to Sun Belt growth. Topics include Reconstruction, segregation, migration of Southerners to the North and West, depressions, reforms, Civil Rights, Moral Majority, cultural expressions in literature and music. Offered as AAST 3343 and HIST 3343; credit will be granted in only one department.

AAST 3344. SOCIOLOGY OF THE 1960S. 3 Hours.
This course presents a sociological analysis of the sixties, stressing the connection between grassroots mobilization and large structures of power, war, race and gender. The legacy of the sixties is examined through stories told by and about activists of the period. Parallels between the sixties and the present are identified. Movements covered may include civil rights, black power, anti-war and women's rights. Offered as AAST 3344 and SOCI 3345; credit will be granted in only one department.

AAST 3345. AFRICAN-AMERICAN LITERATURE. 3 Hours.
Examines African-American literature in its various traditions, forms, and cultural and historical contexts. Offered as AAST 3345 and ENGL 3345; credit will be granted in only one department. Prerequisite: English majors must have earned a C or better in ENGL 3350 or must be concurrently enrolled in ENGL 3350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

AAST 3347. TOPICS IN MULTICULTURAL AMERICAN LITERATURES. 3 Hours.
Focuses on literary production within one or more ethnic communities in the U.S. in order to trace a theme or to explore issues such as intersectionality, hybridity/mestizaje, diaspora, or immigrant experiences. Topics may include Afro-Latino poetry, third-world feminist writing, multicultural literature of the Southwest, cultural memory and the Jewish literary tradition, or Asian-American fiction. Offered as ENGL 3347, AAST 3347, and MAS 3347; credit will be granted in only one department, and credit for MAS 3347 will be granted only once. Prerequisite: English majors must have earned a C or better in ENGL 3350 or must be concurrently enrolled in ENGL 3350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

AAST 3350. BLACK POLITICAL AND SOCIAL THOUGHT. 3 Hours.
Course examines goals, viewpoints, and strategies of African American political and social movements. Topics include Black Nationalism, Inter-racial Integration, tensions between major historic leaders, reparations, the emergence of "race-neutral" politicians, and changing commitments to liberal and conservative causes.

AAST 3353. SOCIAL CLIMATE OF CITIES. 3 Hours.
A comparative study of urban communities and metropolitan areas in terms of their distinctive social life and culture. Topics touching on power and urban politics, race and ethnic relations, poverty, and leisure and lifestyles will be examined in terms of their contribution to the unique social climate of cities. Offered as AAST 3353 and SOCI 3353; credit will be granted in only one department.

AAST 3373. ARCHAEOLOGY OF EGYPT. 3 Hours.
The culture of ancient Egypt from its earliest occupation until the Arab invasion (7th century A.C.), with emphasis on the first 20 pharaonic dynasties (third and second millennia B.C.). Egyptian social, religious, economic and political development traced through the surviving material culture (architecture, art, industries, artifacts of daily life, funerary remains, etc.) supplemented by historical and literary evidence as pertinent. Egypt's relations with neighboring regions (Crete, Anatolia, Palestine, Nubia and Libya) considered. Offered as AAST 3373 and ANTH 3373; credit will be granted in only one department.

AAST 3378. HISTORY OF THE CARIBBEAN. 3 Hours.
A comparative history of the different societies in the Caribbean (including Cuba, Jamaica, and Haiti) with emphasis on the coming of slavery and the consequences of emancipation. Traces the development of emerging new societies from intermingling of Amerindian, African and European elements. Offered as AAST 3378 and HIST 3378; credit will be granted in only one department.

AAST 3380. RACE, CRIME, AND JUSTICE. 3 Hours.
An examination of race in the context of the criminal justice system. Emphasis is on social construction of crime; and the treatment of racial minorities as victims and offenders by law enforcement, courts, and corrections. Offered as CRCJ 3380 and MAS 3380; credit will be granted only once. Offered as AAST 3380 and CRCJ 3380; credit will be granted in only one department.

AAST 3385. AFRICAN HISTORY I. 3 Hours.
Examines African prehistory, ancient civilizations, religion, gender issues, slavery, and commerce in precolonial Africa. Offered as AAST 3385 and HIST 3385; credit will be granted in only one department.
AAST 3386. AFRICAN HISTORY II. 3 Hours.
Africa from the “Scramble for Africa” through to the establishment of the various colonial systems, through the beginnings of African nationalism, to the contemporary period. The African Revolution and the development of the independent African states. Offered as AAST 3386 and HIST 3386; credit will be granted in only one department.

AAST 4317. ETHNIC GROUP POLITICS IN THE UNITED STATES. 3 Hours.
The influence of selected major ethnic groups with special attention given to organizational development, participation in political parties, leadership, ideology, immigration policy, current issues, and relations with the dominant culture and other ethnic groups. Offered as AAST 4317 and POLS 4317; credit will be granted in only one department.

AAST 4318. POLITICS OF AFRICAN AMERICANS. 3 Hours.
The influence of African-American politics on United States government and policies with special attention given to organizational development, participation in political parties, leadership, ideology, the Civil Rights movement, current issues, and relations with other ethnic groups. Offered as AAST 4318 and POLS 4318; credit will be granted in only one department.

AAST 4325. HISTORY OF HIP HOP. 3 Hours.
Focused study of the origins and development of Hip Hop as an artistic genre and political and cultural movement. Topics include deejaying, emceeing, sampling and other musical techniques as well as issues of ethnic and other identities, commercialism, capitalism, cultural appropriation, and authenticity. Offered as HIST 4325 and AAST 4325; credit will be granted only once.

AAST 4326. DIVERSITY IN ORGANIZATIONS. 3 Hours.
This course examines the implications of employee diversity in organizations, an issue of increasing importance. It includes study of the changing demographics of workers, including multiple demographic groups and areas of difference important to organizational treatment and outcomes. This course examines research on treatment, access, and customer discrimination. Legislation related to diversity is also reviewed. This course also provides suggestions for individuals and organizations to increase opportunities and outcomes for workers of all backgrounds. Offered as MANA 4326, AAST 4326 and WOMS 4326; credit will be granted in only one department. Prerequisite: Junior standing.

AAST 4331. RACE, ETHNICITY & FAMILY FORMATION. 3 Hours.
Investigates the ways in which cultural understandings of race and ethnicity have shaped historical and contemporary variations in family structure, familial experiences, and the legal possibilities for family formation. Junior standing (60 hours) or permission of the instructor required to enroll in this course. Offered as AAST 4331 and SOCI 4331; credit will be granted in only one department.

AAST 4333. COMPARATIVE CIVIL RIGHTS HISTORY. 3 Hours.
Explores the U.S. civil rights movement from a comparative perspective, exploring the African American civil rights movement, Chicano movement, women’s liberation movement, gay liberation, and disability rights movement. Offered as AAST 4333 and HIST 4333; credit will be granted in only one department.

AAST 4339. TOPICS IN AFRICAN-AMERICAN LITERATURE. 3 Hours.
Concentrates on a topic or theme within the canon of African-American literature, such as a particular genre or era, significant authors, or a philosophical movement. Examples include the Harlem Renaissance, the Civil-Rights/Black-Power era, African-American autobiography, short fiction, and Afrofuturism. Offered as AAST 4339 and ENGL 4339; credit will be granted in only one department. May be repeated for credit as course content changes. Prerequisite: English majors must have earned a C or better in ENGL 3350 or must be concurrently enrolled in ENGL 3350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

AAST 4341. INEQUALITIES IN PUBLIC EDUCATION. 3 Hours.
This course examines the manner in which race, ethnicity, and class affect the quality of education in the public schools. Topics include the resegregation of schools, class and race based achievement and funding gaps, and the role the schools play in reproducing inequality. This course has a service learning component and requires volunteering in programs designed to reduce inequality in the schools. Offered as AAST 4341 and SOCI 4341; credit will be granted in only one department.

AAST 4342. TOPICS IN CULTURAL ANTHROPOLOGY. 3 Hours.
Selected topics, to include anthropological theory, population and cultural ecology, semiotics, and humanistic anthropology. May be repeated for credit with departmental permission. Also offered as ANTH 4342. Credit will be granted in only one department.

AAST 4350. SPECIAL TOPICS IN AFRICAN AMERICAN STUDIES. 3 Hours.
Special topics related to African American studies. May be repeated for credit when the topic changes.

AAST 4376. AFRICAN DIASPORA I. 3 Hours.
The major developments which have shaped the history of Africans and their descendants in the Atlantic, Mediterranean, and Indian Ocean areas from the earliest times to 1800. Emphasis on the comparative history of Black Diasporic communities; linkages between Africans and their descendants in the Diaspora. Offered as AAST 4376 and HIST 4376; credit will be granted in only one department.

AAST 4377. AFRICAN DIASPORA II. 3 Hours.
The major developments which have shaped the history of Africans and their descendants in Latin America, the Caribbean, and North America since 1800. Emphasis on the comparative history of Black Diasporic communities; linkages between Africans and their descendants in the Atlantic Diaspora. Offered as AAST 4377 and HIST 4377; credit will be granted in only one department.
AAST 4378. WEST AFRICA AND THE ATLANTIC DIASPORA. 3 Hours.
This course examines the history of West Africa and how this region was integrated into the Atlantic world through the Atlantic slave trade. The course adopts an interdisciplinary approach that integrates traditional classroom instruction with field-based learning in West Africa. This learning method, combined with cultural immersion, challenges students to develop their academic and cross-cultural knowledge and skills. Offered as AAST 4378 and HIST 4378; credit will be granted in only one department.

AAST 4391. CONFERENCE COURSE. 3 Hours.
Directed independent study for the advanced undergraduate. A close examination of a chosen topic through research and/or reading; format designed by instructor and student. May be repeated for a maximum six credit hours when the subject matter varies. Prerequisite: Departmental permission.

AAST 4399. CAPSTONE AFRICAN AMERICAN STUDIES. 3 Hours.
In consultation with the course instructor, students will design a research project or an internship that will integrate their previous course work into a capstone experience in either the applied or the cultural studies stream of the African American Studies minor. Prerequisite: AAST 2300 and departmental permission.

AAST 6391. CONFERENCE COURSE. 3 Hours.
Directed independent study for a masters-level or doctoral student. A close examination of a chosen topic through research and/or reading; format designed by instructor and student. May be repeated for maximum six credit hours when the subject matter varies. Prerequisite: Permission from CAAS Director.
Mexican American Studies

The Center for Mexican American Studies offers a minor that is available to all students. A Mexican American & Latina/o Studies (MALS) minor consists of 18 total credit hours: one required introductory course, two required courses taught by Mexican American & Latina/o Studies faculty, and three electives selected from the lists below. Either of the two required courses not taken to fulfill the required course segment of the minor may be taken as an elective towards the minor. After consulting with their major departments or programs, students will file a degree plan for the MALS minor at the Center for Mexican American Studies. Courses not listed below may qualify as electives with the approval of the director of the Center for Mexican American Studies.

Minor in Mexican American & Latina/o Studies

In order to receive a minor in Mexican American & Latina/o Studies, students need to take 18 credit hours from a selection of courses offered across different disciplines. The majority of our courses are cross-listed with courses offered in other departments. Students in Mexican American & Latina/o Studies need to take the following courses:

<table>
<thead>
<tr>
<th>Required Course:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>MAS 2300 INTRODUCTION TO MEXICAN AMERICAN STUDIES</td>
<td></td>
</tr>
</tbody>
</table>

Student must take at least two of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAS 3310</td>
<td>LATINOS IN THE U.S.</td>
</tr>
<tr>
<td>MAS 3314</td>

* Permitted when the topic pertains to Hispanic women.

Either of the two required courses not taken to fulfill the required course segment of the minor may be taken as an elective towards the minor. After consulting with their major departments or programs, students will file a degree plan for the MAS minor at the Center for Mexican American Studies. Courses not listed below may qualify as electives with the approval of the director of the Center for Mexican American Studies.

COURSES

MAS 2300. INTRODUCTION TO MEXICAN AMERICAN STUDIES. 3 Hours.
A multidisciplinary introduction to the Mexican American/Latino experience. Emphasis on history, culture, and contemporary socioeconomic and policy issues. Required for completion of the Mexican American Studies minor. This course satisfies the University of Texas at Arlington core curriculum requirement in Language, Philosophy, and Culture.

MAS 3301. INTRODUCTION TO LATINA/HISPANIC FEMINISM. 3 Hours.
This interdisciplinary course explores Latina/Hispanic feminism through the intersection of race, class, gender, and sexuality. This course is organized around the following issues: colonization, immigration, globalization, sexism, health, and violence. Through an analysis of cultural production, politics, socio-economics, literary texts, and feminist methodology, the goal of this course is to develop a robust understanding of how Latina/Hispanic feminist methodologies can be used as tools for social change and social justice. Offered as WOMS 3301, MAS 3301, and DIVR 3301. Credit will only be granted in one department.

MAS 3310. LATINOS IN THE U.S.. 3 Hours.
Examines the Latino experience in the U.S. from an interdisciplinary perspective. Discusses the commonalities and cultural differences among various Latino groups, and focuses on important contemporary Latino issues such as education, employment, family and gender, identity, immigration, and politics. May receive credit for either MAS 3310 or ANTH 3310.

MAS 3312. LATIN AMERICAN CULTURE AND CIVILIZATION. 3 Hours.
An interdisciplinary introduction to Latin American society, history and culture. Offered as MAS 3312 and SPAN 3312; credit will be granted for either MAS or SPAN. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better.

MAS 3314. THE LATINA EXPERIENCE. 3 Hours.
A course on the social, cultural, and economic experiences of Latina and Latin American origin women in the United States. Offered as MAS 3314, SOCI 3314, SOCW 3314, WOMS 3314, and AAST 3321. Credit will be granted in only one department.

MAS 3316. LATINO HEALTH ISSUES. 3 Hours.
A cross-cultural examination of issues in Latino health and relevant health practices in the United States through the lenses of social sciences. Themes include the Latino Threat Narrative, acculturation histories and health care status of major Latino ethnic enclaves in the U.S. Listed as SOCI 3316, MAS 3316, and ANTH 3316; may receive credit for either SOCI 3316, MAS 3316, or ANTH 3316.

MAS 3317. MEXICAN POLITICS AND U.S.-MEXICO RELATIONS. 3 Hours.
Current economic and political systems of Mexico and relevant issues in U.S.-Mexico relations. Trade, immigration, economic dependency, energy, contraband, and other topics. Offered as MAS 3317 and POLS 3317; credit will be given in only one department.

MAS 3318. BORDERS, CULTURES, AND CARTELS. 3 Hours.
Critically examines life on the Mexico-U.S. border through ethnography, taking into account the impact of the U.S. war on drugs and the influence of cartels on the lives of those living in the southern border region. Topics may include impacts and influences of drugs and narco life on religion, crime, music, and daily life at the nexus of US-Mexico relations. Listed as ANTH 3318 and MAS 3318; may receive credit for either ANTH 3318 or MAS 3318.

MAS 3319. DIVERSE POPULATIONS. 3 Hours.
Introduction to theoretical, practical, and policy issues related to diverse populations. Historical, political, and socioeconomic forces are examined that maintain discriminatory and oppressive values, attitudes, and behaviors in society and in all levels of organizational behavior. This course is required for admission to the Bachelor of Social Work (BSW) program. Offered as AAST 3317, SOCW 3307 and MAS 3319; credit will be granted in only one department.

MAS 3320. U.S. IMMIGRATION POLICY AND THE AMERICAN DREAM. 3 Hours.
Focus on American identity through the examination of immigration to the United States, past and present, and the evolution of U.S. immigration policy. Topics include U.S. attitudes and policy responses to European, Asian, and Latin American immigration and to the incorporation of the descendants of African slaves and Native Americans. Emphasis on the decline of the melting pot idea and the incorporation of recent immigrants. Offered as MAS 3320, AAST 3319, and SOCW 3320. Credit will be granted only once.

MAS 3321. MEXICAN-AMERICAN HISTORY. 3 Hours.
The role of the Mexican American in the cultural and historical development of the United States with special emphasis on the Southwest. Offered as HIST 3321 & MAS 3321; credit will be granted only once.

MAS 3330. CULTURAL DIVERSITY AND IDENTITY. 3 Hours.
The ways identity is constructed in contemporary societies in an increasingly complex and multicultural world. Ethnic, racial, gender, and class identities. How and when identity is asserted and assigned, and how it can both draw boundaries and forge ties between peoples. Formerly listed as ANTH 2350. Credit cannot be given for both ANTH 2350 and ANTH 3330. Also listed as MAS 3330; credit cannot be granted for both ANTH 3330 and MAS 3330. Offered as AAST 3330 and ANTH 3330; credit will be granted in only one department.
MAS 3337. RACIAL & ETHNIC GROUPS IN US. 3 Hours.
Compared with the immigration, acculturation, and adjustment processes of various racial/ethnic groups in the U.S. Examines historical and contemporary discrimination in relation to the social conditions of racial/ethnic minority groups in the U.S. Topics include classical and contemporary theories; individualistic, cultural, and structural arguments about social arrangements; and conflict among majority and minority groups. Offered as AAST 3337, MA 3337, and SOCI 3337; credit will be granted in only one department. Credit will not be granted for both SOCI 3337 and SOCI 4310 or for MA 3337 and MA 4310.

MAS 3343. LATINO/A LITERATURE. 3 Hours.
Explores Latino/a literature of the United States from the nineteenth century through the present as conditioned by the intersections of race, class, gender, sexuality, and regional variation. Texts may include novels, poetry, drama, short fiction, and non-fiction by and about peoples in the U.S. with heritage from South America, Central America, the Caribbean, and Mexico. Offered as ENGL 3343 and MA 3343; credit will be granted in only one department. Prerequisite: English majors must have earned a C or better in ENGL 2350 or must be concurrently enrolled in ENGL 2350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

MAS 3346. MEXICAN AMERICAN AND CHICANO/A LITERATURE. 3 Hours.
Surveys Mexican American literature from 1848 to the present, including literature of the Chicano movement, focusing on important genres, themes, and historical developments. Offered as ENGL 3346 and MA 3346; credit will be granted in only one department.

MAS 3347. TOPICS IN MULTICULTURAL AMERICAN LITERATURES. 3 Hours.
Focuses on literature produced within one or more ethnic communities in the U.S. in order to trace a theme or to explore issues such as intersectionality, hybridity/mestizaje, diaspora, or immigrant experiences. Topics may include Afro-Latino poetry, third-world feminist writing, multicultural literature of the Southwest, cultural memory and the Jewish literary tradition, or Asian-American fiction. Offered as ENGL 3347. AAST 3347, and MA 3347; credit will be granted in only one department, and credit for MA 3347 will be granted only once. Prerequisite: English majors must have earned a C or better in ENGL 2350 or must be concurrently enrolled in ENGL 2350. Non-majors must have earned a C or better in 6 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329) or an A in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

MAS 3348. LATINO IMMIGRATION TO THE U.S.. 3 Hours.
Examines Latino immigration from the perspective of sociocultural anthropology. Focuses on how anthropologists have studied Mexican and other Latino immigrants, and discusses contemporary issues such as transnational communities, gender and immigration, citizenship, and immigrants’ politics. The course seeks to familiarize students with the largest immigrant community in the U.S. through ethnographic case studies.

MAS 3353. TEXAS TO 1850. 3 Hours.
Multicultural heritage of Texas from pre-Colombian period to early statehood. Cultural contact; social, economic, and political change. Completion of either HIST 3345 or HIST 3346 is recommended for those planning to teach in Texas schools. Offered as HIST 3345 and MA 3363; credit will be granted in only one department.

MAS 3354. TEXAS SINCE 1845. 3 Hours.
Texas in the Mexican-American and Civil Wars. Political events and ethnic relations since annexation. Rise of cotton, cattle, and oil industries. Literature and music in the 20th century. Completion of either HIST 3345 or HIST 3346 is recommended for those planning to teach history in Texas secondary schools. Offered as HIST 3346 and MA 3364; credit will be granted in only one department.

MAS 3375. LATIN AMERICAN HISTORY: ORIGINS THROUGH INDEPENDENCE. 3 Hours.
Latin America during the colonial period of Spanish and Portuguese rule. Pre-European civilizations; Iberian backgrounds; conquest of indigenous peoples; development of colonial institutions, economic patterns, social structures, and race relations; independence from Europe. Offered as MA 3375 and HIST 3375; credit will be granted in only one department.

MAS 3376. LATIN AMERICAN HISTORY: POST-INDEPENDENCE TO THE PRESENT. 3 Hours.
The evolution of six Latin American nations during the 19th and 20th centuries. The social, economic, and political development of three social groups in three regions: the Europeanized southern cone area of Argentina, Chile, and Uruguay; the indigenous culture of the Andean mountains in Peru; the African background of Brazil and Cuba. Offered as MA 3376 and HIST 3376; credit will be granted in only one department.

MAS 3377. HISTORY OF MEXICO. 3 Hours.
Mexican history from its pre-Colonial indigenous foundation to the current situation. A social and economic analysis of the major events in Mexican history with emphasis on the 19th and 20th centuries. The major theme in this class is the growth of Mexican nationalism and its relation to region, religion, and ethnicity. Offered as HIST 3377 and MA 3377; credit will only be granted in one department.

MAS 3380. RACE, CRIME, AND JUSTICE. 3 Hours.
An examination of race in the context of the criminal justice system. Emphasis is on social construction of crime; and the treatment of racial minorities as victims and offenders by law enforcement, courts, and corrections. Offered as CRCJ 3380 and MA 3380; credit will be granted only once. Offered as AAST 3380 and CRCJ 3380; credit will be granted in only one department.

MAS 4313. TOPICS IN HISPANIC CULTURE. 3 Hours.
Among the topics are Spanish or Latin American music, television, radio, film, and literature as culture. May be repeated for credit as topic changes. Prerequisite: SPAN 3315 with a grade of C or better. Offered as MA 4313 and SPAN 4313; credit will be given for MA 4313 or SPAN 4313 but not both in a given semester.
MAS 4315. TOPICS IN CONTEMPORARY LATIN-AMERICAN LITERATURE AND CULTURE, MODERNISM TO THE PRESENT. 3 Hours.
Topics may include: Latin-American literature and culture of Modernism, modern Latin-American literature and culture, or any particular movement, genre, work or author from Modernism to the present. May be repeated for credit when content changes. Offered as MAS 4315 and SPAN 4315; credit will be given for MAS 4315 or SPAN 4315 but not both in a given semester. Prerequisite: SPAN 3315 with a grade of C or better.

MAS 4317. CHICANO LITERATURE. 3 Hours.
Mexican-American literature, with special attention to its social, cultural, and linguistic background. Offered as MAS 4317 and SPAN 4317; credit will be given for MAS 4317 or SPAN 4317 but not both in a given semester. Prerequisite: SPAN 3315 with a grade of C or better.

MAS 4318. MEXICAN LITERATURE. 3 Hours.
Studies in Mexican fiction, poetry, drama, and literary essay. Offered as MAS 4318 and SPAN 4318; credit will be given for MAS 4318 or SPAN 4318 but not both in a given semester. Prerequisite: SPAN 3315 with a grade of C or better.

MAS 4319. POLITICS OF MEXICAN AMERICANS. 3 Hours.
The influence of Mexican-American politics on United States government and policies with special attention given to organizational development, participation in political parties, leadership, ideology, the Chicano Movement, current issues, and relations with other ethnic groups. Offered as MAS 4319 and POLS 4319; credit will be given in only one department.

MAS 4327. WOMEN IN HISPANIC LITERATURE. 3 Hours.
Considers women as characters in and writers of Hispanic literature. Includes the analysis of themes, language, and how the writings of women often give voice to lesser-known aspects of culture. Also listed as SPAN 4327. Credit cannot be given for both.

MAS 4350. TOPICS IN MEXICAN AMERICAN STUDIES. 3 Hours.
Subjects of interest in Mexican American and Latino studies. May be repeated for credit when topic changes.

MAS 4360. CONFERENCE COURSE. 3 Hours.
Permission of the director of the Center for Mexican American Studies required. Topics for research or study in designated areas assigned in consultation with course instructor.

MAS 4370. CAPSTONE MEXICAN AMERICAN STUDIES. 3 Hours.
In consultation with the course instructor, students will design a research project or an internship that will integrate their previous course work into a capstone experience in either the applied or the cultural studies stream of the Mexican American Studies minor.

MAS 4391. CONFERENCE COURSE. 3 Hours.
Permission of the director of the Center for Mexican American Studies required. Topics for research or study in designated areas assigned in consultation with course instructor.

MAS 4393. MEXICAN AMERICAN STUDIES INTERNSHIP. 3 Hours.
A combination of field-related experience in the service, community, and/or business sectors with an academic component. Prerequisite: At least two MAS courses and permission of the instructor.
University Studies - Undergraduate Program

UNIVERSITY STUDIES - UNDERGRADUATE PROGRAM

The University Studies degree is designed for students who have investigated different majors and now want to utilize the courses taken to complete a bachelor’s degree. For students seeking options beyond the traditional university majors, the program features a breadth of study in a range of academic disciplines that prepares you for a variety of career paths. When you earn a University Studies degree, you will graduate with a broad-based education in a primary and secondary content area with courses taken from various departments.

What can University Studies do for you?

• Utilize coursework already taken to help you graduate faster.
• Provide a foundation to begin your career.
• Re-focus your academic goals.
• Provide options for applying your existing hours toward a degree.
• Hone your skills in important areas such as communication, critical thinking, project management, and problem solving.
• Make you a more appealing candidate to potential employers.

Who should be a University Studies student?

• Former students who want to return to UT Arlington and complete their degrees.
• Transfer students who have more than 60 hours and are unsure about what major to pursue or who want to accelerate their graduation but have numerous hours that don’t easily apply to a major.
• UT Arlington students unable meet the academic requirements to enter or graduate from another major.

• Please Note: The Bachelor of Science in University Studies is not open to students who have already earned an undergraduate bachelor’s degree or who wish to pursue a double or dual major. In addition, students completing a University Studies degree are not able to declare minors. Students seeking a second bachelor’s degree should select another major area for the continuation of their studies.

What are the program requirements?

• You must have 60 or more credit hours to be admitted to the program.
• No minimum GPA is required for admittance to the program; however, you must have a 2.0 GPA to graduate.
• To complete the degree, you must satisfy 24 hours from a primary content area and 21 hours from a secondary content area for a total of 45 hours. Hours earned before entering the program can be used to satisfy degree requirements after consulting with a University Studies advisor.
• At least 18 hours of the content areas must be 3000/4000 level courses; 12 hours from the primary content area and 6 hours from the secondary content area.
• Of the total 45 hours, no more than 15 hours may have the same course prefix.
• Courses completed as part of the core curriculum may not be used to satisfy the content area requirements.

You may choose your primary and secondary areas from the following:

• AREA I: Art, Media, Humanities
• AREA II: Business, Community Studies, Social Science
• AREA III: Engineering, Health & Wellness, Physical Science

BACHELOR OF SCIENCE IN UNIVERSITY STUDIES

To earn a Bachelor of Science in University Studies, you must complete 120 credit hours and have a 2.0 cumulative grade-point average upon completing the course requirements. Of the 120 total hours, you must complete at least 36 advanced credit hours (3000- and 4000-level courses). You must also meet the residency requirements (http://wweb.uta.edu/catalog/content/general/degree_program_requirements.aspx) for completing a degree at UT Arlington.
The three curriculum areas for each University Studies Degree are **Major Content, Core Curriculum, and Electives.**

**MAJOR CONTENT**

- Comprised of 2 content areas - 24 hours for the primary content area and 21 hours for the secondary content area. The primary and secondary content areas will be selected by the student with a University Studies advisor for a total of 45 hours.
  - **Primary Content Area** - at least 12 of the 24 hours required for must be advanced (3000-4000 level) courses.
  - **Secondary Content Area** - at least 6 of the 21 hours required for must be advanced (3000-4000 level) courses.

- For each content area selected, students may only take courses from the approved department prefixes listed below. Some departments have prerequisites and/or restrictions on the courses that can be taken. **Please note:** No more than 15 hours can come from the same department prefix within the 45 hours of the Major Content.

**Content Area Choices**

**AREA I: Art, Media, Humanities**

ARCH, ART, BCMN, CHIN, CLAS, COMM, COMS, CTEC, DNCE, ENGL, FREN, GERM, GREK, HIST, HUMA, INTD, JOUR, LATN, LING, MODL, MUSI, PHIL, PORT, PREL, RUSS, SPAN, THEA

**AREA II: Business, Community Studies, Social Science**

ACCT, ANTH, BCOM, BEEP, BLAW, BSTAT ECON, CRCJ, CRCJ, ECED, EDML, EDUC, FINA, GEOG, INSU INSY, LIST, MANA, MARK, OPMA, POLS, PSYC, REAE, SOCI, SOCW, SOCW, URPA, URPA

**AREA III: Engineering, Health & Wellness, Physical Science**

BE, BIOL, CE, CHEM, CSE, EE, ENGR, GEOL, HEED, IE, KINE, MAE, MATH, MSE, NE, NURS, PHYS, SCIE

**CORE CURRICULUM**

The UT Arlington Core Curriculum is comprised of the following component areas:

- Communication
- Mathematics
- Life and Physical Sciences
- Language, Philosophy and Culture
- Creative Arts
- American History
- Government/Political Science
- Social and Behavioral Sciences
- Foundation Area Option

Click here (http://catalog.uta.edu/degreerequirements/generalcorerequirements/) for the requirements and approved courses

**Core Objectives**

- **Critical Thinking Skills** - to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information
- **Communication Skills** - to include effective development, interpretation and expression of ideas through written, oral and visual communication
- **Empirical and Quantitative Skills** - to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions
- **Teamwork** - to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal
- **Personal Responsibility** - to include the ability to connect choices, actions and consequences to ethical decision-making
- **Social Responsibility**: to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities
ELECTIVES

Students must complete a sufficient number of electives to fulfill the 120 hours required for the degree as well as 36 hours of advanced (3000-4000 level) coursework required. No more than 4 hours of EXSA or DNCA courses can be counted toward the electives. In addition, no more than 15 hours of coursework transferred in as WECM may be used toward electives in the University Studies degree.

BACHELOR OF SCIENCE IN UNIVERSITY STUDIES - TECHNICAL PATHWAYS PROGRAM

This degree enables working professionals to complete the BS in University Studies. Admission is limited to students transferring credit from approved programs at select community college and technical institute partners. A list of approved programs may be found here [here](https://www.uta.edu/student-success/university-studies/unis-pathways/).

Degree requirements are identical to the general BS in University Studies degree, but approved technical credits may be used to satisfy requirements. Approved core curriculum courses may also be applied. Please consult the list of approved technical pathways for more information.

COURSES

UNIV 1000. FIRST YEAR EXPERIENCE. 0 Hours.

A course that orients students to life on UTA's campus and emphasizes engagement beyond the classroom. Students in this course will experience the UTA community by attending campus events and making connections beyond their studies, including interaction with career services, the library and financial literacy services. Students will also be able to identify campus resources to support their wellness from multiple aspects of their lives, both the social and the physical. Each UNIV 1000 class section has a Peer Academic Leader (PAL), who are students who have already taken the course and assist as a discussion leader for the class under the supervision of the instructor. PALs will work with students on finding their place on campus, learning academic success skills, and developing a degree map.

UNIV 1101. CAREER PREPARATION AND STUDENT SUCCESS. 1 Hour.

A course for new transfer students that will help students transition into UTA and achieve academic and personal success through recognition of campus resources and community building. Students in this course will experience the UTA community by attending campus events and making connections beyond their studies, including interaction with career services, the library and financial literacy services. Students will also be able to identify campus resources to support their wellness from multiple aspects of their lives, both the social and the physical. Each UNIV 1101 class section has a Peer Academic Leader (PAL), who are students who have already taken the course and assist as a discussion leader for the class under the supervision of the instructor. PALs will work with students on finding their place on campus, learning academic success skills, and developing a degree map.

UNIV 1131. STUDENT SUCCESS. 1 Hour.

A learning community course that will teach new students academic success skills to aid their transition into college. The goal of the course is to help students identify their individual needs, determine what resources are appropriate, recognize the faculty role in their development, and formulate a plan for an actively engaged and enriched experience from campus to career. Each UNIV 1131 class section has a Peer Academic Leader (PAL), who are students who have already taken the course and assist as a discussion leader for the class under the supervision of the instructor. PALs provide peer mentorship and work with students to take a deep dive into how critical thinking and study skills can be applied to major academic content, raise awareness and understanding of students' majors and possible career pathways, and connect students to resources on campus and school-specific activities.

UNIV 1302. COLLEGE LEARNING. 3 Hours.

An introduction to the learning strategies and behaviors necessary for academic success in academic programs and in personal and career development. Focus is on self-assessment, self-regulation, and employing cognitive and psychological theories and strategies for self-change. Students complete a self-change project based on theories and models of behavior modification. Gateway Advantage students are required to enroll in this course during their first semester.

UNIV 3335. PEER ACADEMIC LEADER TRAINING. 3 Hours.

Students are trained on the expectations and responsibilities of becoming a Peer Academic Leader (PAL). These students will work as group leaders for UNIV 1131 after successful completion of the course. Students will learn group instruction procedures and requisite guidance material to explain academic regulations and student services, analyze study skills, initiate appropriate study habits, and make appropriate referrals when necessary. Focus on classroom management, learning theory, and lesson plan development. Elective credit; does not count as part of the professional education certification requirements. Prerequisite: Permission of the instructor.
Special Programs & Centers

Center for Distance Education

Distance education students at The University of Texas at Arlington include those who cannot attend a class because of work or family schedules. An estimated 3.5 million Texans did not finish college as a young adult and many find it impossible to make time in their busy lives to complete their educations in traditional classroom settings. Online courses and programs are great for the at-home mom or dad, executives and professionals wanting to advance their careers, soldiers overseas, nurses, teachers, a high school seniors seeking dual credit. During the spring 2011 semester, nearly 6,000 UT Arlington students maintained an Internet-only schedule. Many other students are pursuing their degrees by completing a combination of classroom and online courses. The convenience and availability of on-line courses makes taking at least one online course per semester an attractive option for more 22,000 of our enrolled students.

Over 700 different Web-based courses, from core courses to degree and certificate programs, are available and are taught by more than 300 of UT Arlington’s finest teaching faculty. For complete information about the Center for Distance Education, visit: www.uta.edu/distance.

Oak Ridge Associated Universities and the Oak Ridge Institute for Science and Education

Oak Ridge Associated Universities (ORAU) is a consortium of colleges and universities, a contractor for the U.S. Department of Energy (DOE), and a strategic partner with Oak Ridge National Laboratories. Located in Oak Ridge, Tennessee, ORAU works with member institutions to help students and faculty gain access to federal research facilities throughout the country; to keep its members informed about fellowship, scholarship, and research opportunities; and to organize research alliances among member institutions.

Undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research through the Oak Ridge Institute for Science and Education (ORISE) – a program managed by ORAU for the DOE. Students may participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of under-represented minority students pursuing degrees in science- and engineering-related disciplines. For more information about ORAU and its programs, visit: www.orau.org.

University of Texas at Arlington Fort Worth

Located in the historic Santa Fe Freight Building, University of Texas at Arlington Fort Worth provides Fort Worth and Tarrant County residents with affordable, state-of-the-art higher education opportunities in a convenient, modern educational facility located in the heart of Fort Worth. UTA Fort Worth is committed to:

- Meeting the life-long continuing needs of working professionals.
- Offering graduate degree programs.
- Providing both for credit and continuing education opportunities.
- The flexibility and vision to capitalize on global opportunities that address economic development needs.

UTA Fort Worth offers programs specifically designed for demanding schedules by offering intersession and accelerated courses and innovative content delivery formats. Many UTA Fort Worth students maintain a full-time jobs or manage homes and families while pursuing their education.

Degree programs offered at UTA Fort Worth include:

- Social Work (Undergraduate and Graduate)
- RN-BSN (Undergraduate)
- Executive MBA
- Cohort MBA
- Systems Engineering (Graduate)
- Criminology & Criminal Justice (Graduate)
- Healthcare Administration (Graduate)

As part of The University of Texas at Arlington and the University of Texas System, students of UTA Fort Worth enjoy all the benefits of a state school including affordable tuition rates. For more information, visit: www.uta.edu/fortworth.

The University of Texas at Arlington Research Institute

The UT Arlington Research Institute (UTARI) is a research and development unit of The University of Texas at Arlington specializing in applying cutting-edge technologies to real-world engineering problems. The mission of UTARI is to bridge the gap between academic research and product development.
in the areas of advanced manufacturing, biomedical technologies, and robotics. UTARI's Advanced Manufacturing Division research efforts are focused on the areas of automated 3D micro-assembly and packaging technologies; the Robotics Division focuses on a number of robotic applications, including assistive, social and personal, educational, military, and agricultural robotic applications; and the Biomedical Technologies Division focuses on developing clinically relevant devices and systems that can be utilized by health care providers as well as patients to enhance diagnostics, treatment, rehabilitation, and assisted living.

Between internships, competition teams and volunteer opportunities, students have a multitude of ways to get involved at UTARI. Students are able to work with experienced research scientists, using state-of-the-art technology to develop the products of tomorrow. UTARI also assists in building teams to participate in several national and international competitions in the areas of water, ground and aerial vehicles.

UTARI is committed to providing high school and college students with a wide range of opportunities for in-depth exposure to the latest academic research and product development in the areas of Advanced Manufacturing, Biomedical Technologies, and Robotics.

Interns and volunteers work in cooperation with researchers and faculty on projects from inception to completion. Students in the UTARI Internship/Volunteer Program are challenged not only to learn about cutting-edge technologies, but are encouraged to be part of the technology development process itself.

UTARI takes up the challenge to uncover technologies that can change the world, through collaborative efforts conducted between UTA faculty and students, and by building new partners from government, industry and other universities. To learn more about UTARI's commitment to lead the next wave of discovery, visit: www.uta.edu/utari (http://www.uta.edu/utari/).

Universities Center of Dallas

The Universities Center at Dallas (UCD) in Downtown offers degrees for residents and working professionals in one convenient location from several of the best universities in DFW, including UT Arlington. Students may complete a bachelor, master's, or doctorate degree during evening and weekend hours. The UCD was the first Multi-Institution Teaching Center (MITC) for higher education in Texas and was established by the Texas Higher Education Coordinating Board to provide access to public higher education at the upper division and graduate levels to citizens who live, work and find it convenient to take their education in downtown Dallas. Currently, UT Arlington offers the master's of Health Care Administration program at the UCD. For more information, visit: www.ucddowntown.org (http://www.ucddowntown.org/).
Other Offices

These pages list various centers, offices, and services of direct relevance to study at The University of Texas at Arlington. The listings are not all-inclusive. A comprehensive list of UT Arlington offices is available on the University's A to Z Index (https://www.uta.edu/contact-us/) page.

Athletics (p. 1364)
Division of Student Affairs (p. 1365)
University Libraries (p. 1370)
Veterans Upward Bound (p. 1371)
Athletics

Intercollegiate Athletics

C.R. Gilstrap Athletic Center · Box 19079 · 817-272-2261 · www.uta.edu/athletics

All men's and women's intercollegiate teams representing UT Arlington are members of the Southland Conference. Other conference members are University of Central Arkansas, Lamar University, McNeese State University, Nicholls State University, University of Louisiana-Monroe, Northwestern State University, Sam Houston State University, Southeastern Louisiana University, Stephen F. Austin State University, Texas A&M University-Corpus Christi, The University of Texas at San Antonio and Texas State University. All UT Arlington athletic teams compete in the highest division (Division I) of the National Collegiate Athletic Association.

• Men's Athletics: Men's intercollegiate teams are fielded in baseball, basketball, cross country, golf, tennis, and indoor and outdoor track and field. Individuals interested in participating in the UT Arlington athletic programs should contact the Athletic Office in the Gilstrap Center, 1309 W. Mitchell St., 817-272-2261.

• Women's Athletics: Women's intercollegiate teams are fielded in basketball, cross country, softball, tennis, indoor and outdoor track and field, and volleyball. Individuals wanting to participate should contact the Athletic Office in the Gilstrap Center, 1309 W. Mitchell St., 817-272-2261.

UT Arlington students with valid ID cards are admitted without charge to all regular season home athletic contests. All home men's and women's track and field meets are held at Maverick Stadium. Men's and women's home basketball games and women's home volleyball games are played in Texas Hall. Baseball games are played at Clay Gould Ballpark and softball games are played at Allan Saxe Field. Men's and women's tennis matches are played at the Tennis Center.
Division of Student Affairs

Apartment and Residence Life

Arlington Hall Breezeway · Box 19370 · 817-272-2926 · www.uta.edu/housing

Living on campus is a great way to get connected, meet friends, and be involved. To that end, University Housing offers single and double occupancy options available in residence halls or apartments. In addition, Learning Communities and Freshman Interest Groups are available to enhance the connection between student’s academic and social pursuits. All our communities are designed to meet the needs of today’s students and provide an environment that supports academic growth and community respect by offering opportunities for leadership, involvement, and connections for residents that live on campus.

The University is entitled to conduct criminal background checks on students applying for on-campus housing. Students will be notified if they are denied housing due to information gathered from a criminal background check per Texas Government Code, Section 411.094.

Apply for University Housing at www.uta.edu/housing.

Campus Recreation

500 W. Nedderman Drive · 817-272-3277 · www.uta.edu/campusrec

The Department of Campus Recreation provides a diverse span of recreational and leisure opportunities for students, faculty and staff through several components including Informal Recreation, Intramural Sports, Adaptive Recreation, Fitness & Wellness, Sport Clubs, Aquatics and Spirit Groups. The Campus Recreation facilities include the MAC, Fields Complex, and The Green at College Park.

The MAC–Maverick Activities Center is a state-of-the-art, $34.5 million recreation facility where students, faculty, staff, and alumni can meet, relax, workout, and continue to be engaged in UT Arlington’s campus life. Some of the amenities include a 20,000 square foot weight and fitness room (90+ pieces of cardio equipment, 4 circuit training units & a free weight area), 5 indoor basketball courts, 8 volleyball courts, a climbing wall, game room, computer lab, Market at the MAC, indoor soccer field and more.

SPIRIT GROUPS

500 W. Nedderman Drive · 817-272-3277 · www.uta.edu/spirit

UTA Spirit Groups consist of the cheerleading squad, dance team, mascot, and the Maverick Wranglers. Together, the groups provide support for UTA athletic teams and lead the University community in spirit. These athletes represent UT Arlington at the collegiate national championships and host camps and clinics throughout the summer.

The Lockheed Career Development Center

216 University Administration Building, 701 S. Nedderman Drive · Box 19695 · 817-272-2932 · www.uta.edu/careers

The Career Development Center empowers students and alumni for professional success by helping them discover and plan for possible career paths, connecting them with employers and professional opportunities, preparing them to present themselves well to compete for the opportunities they seek, and helping them develop the skills that will allow them to succeed in their professional goals now and in the future.

The Career Development Center maintains the online job database, HIREAMAV, powered by Handshake, which is for those seeking full-time, part-time, and internship opportunities, and over 150 employers attend the bi-annual Job Fair hosted by the Career Development Center each fall and spring.

The Center for Students in Recovery

B170 Lower Level, University Center · Box 19355 · 817-272-2354 · www.uta.edu/csr

The Career Development Center provides a safe, healthy, and welcoming environment for students to cultivate life skills and celebrate recovery successes. Members enjoy access to scholarships, educational and volunteer opportunities, and a strong network of supportive peers. The recovery coaching and peer-based recovery mentorship help students manage challenging situations with agility and grace. To join CSR, a student must be admitted to The University of Texas at Arlington and committed to living clean and sober.

Counseling and Psychological Services

Counseling and Psychological Services: 303 Ransom Hall · Box 19156 · 817-272-3671 · www.uta.edu/caps

Counseling and Psychiatric Services: 605 S. West Street · Box 19329 · 817-272-2771 or 817-272-0429 · www.uta.edu/caps

Counseling and Psychological Services (CAPS) is a department of Health Services. Services are available to help students increase their understanding of personal issues, address mental and behavioral health problems and make positive changes in their lives. Individual, couples and group counseling and psychotherapy are provided by an interdisciplinary team of licensed mental health providers including psychologists, counselors, social workers, and
psychological associates. Psychological assessments are conducted for ADHD and learning disorders. Psychiatrists and psychiatric nurse practitioners provide diagnostic assessment and ongoing treatment of psychiatric conditions including medication management and brief psychotherapy. An integral part of the CAPS mission is to provide outreach to the campus community in the form of workshops and training sessions. CAPS staff is also available to provide consultation to concerned students, faculty and staff.

Services are available to campus based students. CAPS has resources online that are available to all students including those enrolled in distance education/online programs. Online resources include an online mental health screening, links to external suicide prevention websites and links to external self-help information.

**Fraternity and Sorority Life**

B160 Lower Level, University Center · Box 19348 · 817-272-9234 · [www.uta.edu/fsl](http://www.uta.edu/fsl)

Fraternity and Sorority Life at UT Arlington prepares young men and women to be contributing members of society. Fraternity and sorority members have a variety of opportunities on and off campus geared toward the enhancement of their educational experience and contributions toward their personal growth. Most importantly, fraternities and sororities focus on the development of four pillars; Brotherhood/Sisterhood, Philanthropy/Community Service, Scholarship and Leadership. The fraternity and sorority community is comprised of four governing bodies representing over 30 fraternities and sororities and two affiliated honorary organizations, Order of Omega and Gamma Sigma Alpha.

**Health Services**

605 South West Street · Box 19329 · 817-272-2771 · [www.uta.edu/healthservices](http://www.uta.edu/healthservices/)

Health Services is an ambulatory health care facility fully accredited by the Accreditation Association for Ambulatory Health Care. Health Services’ mission is to support academic success by providing excellent health care and promoting wellness. It provides currently enrolled UTA students with quality, accessible, comprehensive, and cost-effective primary health care.

In addition to a general medicine clinic, Health Services provides a pharmacy, laboratory, radiology department, counseling and psychological services, women’s health clinic, immunization clinic, and a health promotion and substance abuse prevention office.

**Medical Emergencies**

For true medical emergencies on campus, or when the seriousness of an individual’s condition is uncertain, call the University Police at 817-272-3003. The police will dispatch officers to the site, and call an ambulance, if needed. Officers are trained in CPR and first aid, and can stabilize the individual until an ambulance arrives. This procedure should be followed even when Health Services is open. If individuals experiencing a medical emergency are off-campus, call 911.

**The Follett Leadership Center**

B160 Lower Level, University Center · Box 19340 · 817-272-9220 · [www.uta.edu/leadership](http://www.uta.edu/leadership)

The Leadership Center strives to develop innovative and collaborative leaders who actively apply their leadership knowledge and skills to improve their local and global communities. The Leadership Center is home to the Alternative Breaks Program, UTA Volunteers, the Leadership Honors Program, FLOC (Freshmen Leaders on Campus) and the Maverick Mentors, Peer Mentoring program. Some other programs and events include the fall leadership retreat, Certified Leader Institutes, academic courses and Leadership Studies Minor.

**LGBTQA (Lesbian, Gay, Bisexual, Transgender, Queer, Ally) Program**

B150 Lower Level, University Center · Box 19353 · 817-272-2099 · [www.uta.edu/lgbtqa](http://www.uta.edu/lgbtqa/)

The LGBTQA program is an initiative hosted by the Division of Student Affairs which is a part of the Multicultural Affairs [office](http://www.uta.edu/multicultural/). The program provides quality events and support services dedicated to cultivating a positive campus environment for LGBTQA students, allies, and others with gender identity questions and concerns.

**The Movin’ Mavs and Lady Mavs Wheelchair Basketball Teams**

801 W. Greek Row · 817-272-3410 · [www.uta.edu/movinmavs](http://www.uta.edu/movinmavs/)

UTA’s Movin’ Mavs wheelchair basketball team has won eight national championships. The team has a rich history of leading the nation in intercollegiate wheelchair basketball, exemplified by offering full athletic scholarships to team players, by players consistently being named to the First-Team All-America squads, and by participation in the Paralympics. Visit the website to keep up with the Movin’ Mavs. The Lady Movin’ Mavs began in 2013 with five players and has become one of the most dominant teams in the NWBA Intercollegiate Division with a first place finish in the 2016 and 2018 national championship. Several of the Lady Movin’ Mavs have been selected for USA National Team Tryouts, College Division Post-Season honors and All Academic Selections.
Multicultural Affairs

B150 Lower Level, University Center · Box 19353 · 817-272-2099 · www.uta.edu/multicultural

Multicultural Affairs offers a variety of programs that celebrate the rich diversity found at UT Arlington. Programs also help to educate the campus about current social justice issues. The staff provides activities that recognize diversity on multiple levels, including — but not limited to — race and ethnicity, gender, sexual orientation, disability, and religion/spirituality. Students can get involved with the Multicultural Mavericks (Hispanic Heritage, Asian Heritage, and Black History Months), the Women in Leadership Program and Women’s History Month, the Leaders Educating About Diversity and the Maversity social justice workshop series, the Ubuntu Social Justice Conference, the Men & Masculinities Series, Diversity Week, and/or the LGBTQA program.

New Maverick Orientation

B160 Lower Level, University Center · Box 19348 · 817-272-9234 · www.uta.edu/orientation

The University of Texas at Arlington is dedicated to the retention and overall success of our students, by promoting academic excellence and fostering lifelong learning. New Maverick Orientation offers a variety of programs, both on campus and online, for new freshmen, transfer students, veterans, international students, and graduate students. At orientation, new students gain valuable information about the services, resources, activities, and organizations that will enhance their success at UTA. Additionally, the connections students make at orientation can develop into meaningful relationships and networks.

Off-Campus Mavericks

500 W. Nedderman Drive, Suite 100AA · Box 19360 · 817-272-3213 · www.uta.edu/offcampus

Off-Campus Mavericks provides services and programming to support commuter students at UTA. Commuter students are invited to visit the Off-Campus Maverick Center in the Maverick Activities Center (MAC) every Monday for a free cup of coffee, or to participate in our Commuter Appreciation Days and the Commuter Engagement Incentive Program. The goal of Off-Campus Mavericks is to help commuter students enjoy an enriching college experience, which features active participation in campus life in addition to academic success.

The Office for Students with Disabilities

102 University Hall · Box 19510 · 817-272-3364 · www.uta.edu/disability

The Office for Students with Disabilities (OSD) assists students with disabilities to participate in the full spectrum of college life. OSD serves students using exemplary practices in assistive technology, disability counseling, and academic accommodations such as testing accommodations, sign language interpreters, volunteer note-takers, e-text, and auxiliary aids.

The Parent & Family Center

B150 Lower Level, University Center · Box 19363 · 817-272-2128 · www.uta.edu/parents

Parents play a very valuable role in keeping the lines of communication open between students and various key offices on campus. The center helps families and students understand institutional processes so they can concentrate on academic, social, and overall success. The Parent & Family Center is available Monday through Friday during business hours to answer any questions parents or family members may have.

Relationship Violence and Sexual Assault Prevention Program

B170 Lower Level, University Center · Box 19355 · 817-272-2354 · www.uta.edu/rvsp

The Relationship Violence and Sexual Assault Prevention (RVSP) program promotes education and awareness of intimate partner violence, sexual assault, harassment, and stalking on campus. An advocate is available to provide advocacy, support, and referral services to students impacted by sexual and/or relationship violence. Anonymous forms to report an incident are available online. Additionally, the RVSP program hosts a number of training opportunities for faculty, staff, and students on response and advocacy. Educational outreach programs highlighting the impact of violence include but are not limited to the: Clothesline Project, Silent Witness Project, and the Red Flag Campaign. These programs are available to any student group or organization, as are various programs on: healthy relationships, how to intervene and support your peers, and information on community resources. Volunteer positions and internships are available for students wanting to take a stand to end violence. A victim of sexual and/or relationship violence that has occurred on campus should notify the UTA Police Department immediately at 817-272-3003. The RVSP Coordinator may assist in: discussing available options, resource connection, safety planning, reporting the incident to the Police Department, and can be contacted Monday-Friday, 8 a.m.-5 p.m., at 817-272-3506.

Student Organizations

Lower Level, University Center · Box 19348 · 817-272-2963 · www.uta.edu/studentorganizations

Student Organizations serves as a focal point of out-of-classroom involvement and engagement at UTA. Participation in co-curricular activities helps students gain valuable skills and experiences that complement academic work, enhances leadership, and enriches the collegiate experience.
There are over 300 registered student organizations operating on campus. Groups are formed and governed by their members around a variety of common causes including academic/professional, sport/recreational, honorary, cultural, spiritual, and a variety of special interests. Don’t see exactly what you’re looking for? Make your way down to our offices and learn how you can form your own. Visit mavorgs.uta.edu for more information on campus organizations. Student Organizations is also where student organizations obtain approval to reserve space on campus, post flyers and publicity on campus and register their events. Organizations can receive consultation and advice on campus policy and operational matters.

**Student Conduct**

B170 Lower Level, University Center · Box 19355 · 817-272-2354 · [www.uta.edu/conduct](http://www.uta.edu/conduct)

The Office of Student Conduct is responsible for the implementation of the Student Conduct & Discipline Handbook of Operating Procedures and the Regents’ Rules and Regulations at the University of Texas at Arlington. The University of Texas at Arlington Handbook of Operating Procedures (HOP) contains official policies and procedures for the governance of UT Arlington. The Honor Code upholds UT Arlington’s tradition of academic integrity, a tradition that values hard work and honest effort in the pursuit of academic excellence. Please see the University Requirements & Policies tab within the University Catalog for information on Student Conduct and Academic Integrity.

We strive to uphold and support standards of personal honesty and integrity for all students consistent with the goals of a community of scholars and students seeking knowledge and responsibility. Consistent with this goal, the office is engaged in the task of educating the community regarding standards for student behavior and procedures used in the resolution of student disciplinary allegations. Students at the University of Texas at Arlington are encouraged to engage their campus in a positive way. By staying educated on policy and procedure, students can ensure a healthy and productive education at the University of Texas at Arlington. The Office of Student Conduct sponsors several large scale programs across campus, smaller residence life focused programming efforts and training for students, staff and faculty throughout the year.

**Student Governance**

B150, Lower Level, E. H. Hereford University Center · Box 19350 · 817-272-0556 · [www.uta.edu/studentgovernance](http://www.uta.edu/studentgovernance)

Student Governance is dedicated to providing a medium for students to voice their concerns and opinions and hosts of UTA. By serving as the voice of the student body, Student Government and the Graduate Student Senate provide student representation on various university committees and have the opportunity to represent the student perspective on a variety of campus issues.

The UTA Ambassadors serve as the official student hosts of UT Arlington, under the direction of Mr. and Ms. UTA. The group maintains and promotes new and old campus traditions; increases awareness of UT Arlington’s services, programs, and activities to students and the surrounding community; and establishes and strengthens pride and passion for UT Arlington on and off-campus. The UTA Ambassadors are involved in the planning of the Maverick Speakers Series, the Maverick of the Month recognition program, the UTA Spirit Horse initiative, and Spirit Week.

Student Government is UTA’s elected representative body for undergraduate and graduate students. Members work to implement change on campus, solicit concerns, and propose resolutions to solve problems. The group serves as the major link between students and the administration. In addition, the organization sponsors voter registration drives, supports the on-campus early voting polling site, and hosts various programs to solicit student feedback on a variety of campus issues.

The Graduate Student Senate (GSS) understands the needs and concerns of graduate students here at UTA. The Graduate Student Senate passes resolutions to improve graduate student life on campus, hosts guest speakers to discuss current issues, creates ad-hoc committees to research potential changes in University policy that may impact graduate students, and assists with Graduate Forums, the ACES research symposium, and the Graduate School Showcase.

**Student Publications**

Lower Level, E.H. Hereford University Center · Box 19038 · 817-272-3661 · [www.uta.edu/studentpubs](http://www.uta.edu/studentpubs) and [www.theshorthorn.com](http://www.theshorthorn.com)

The Student Publications department employs more than 100 student journalists, advertising sales representatives, marketing assistants, web developers, and office assistants in jobs that help them prepare for their careers. The department publishes The Shorthorn, the Maverick Connection phone directory and the Maverick Housing Guide. It also houses a full-service creative services agency. The department’s mission is to provide a spectrum of hands-on communication training to students while providing a valuable news service to the UT Arlington community and an open forum for free expression.

*The Shorthorn* is UTA’s oldest and most honored source of news and information. Students created the award-winning student newspaper in 1919. Today, *The Shorthorn* delivers news as it happens through its website and social media channels. It also provides a daily summary of pertinent headlines emailed to you with links that will work on any mobile device or computer. The print edition is published every Wednesday. *The Shorthorn* website also contains interactive features, videos, and photo galleries of student events and activities, and lets you submit your own photos to the newspaper. *Shorthorn* discussions also allow you to express your opinions on campus issues in an open forum.
Student Activities

B160 Lower Level, University Center · Box 19348 · 817-272-2963 · www.uta.edu/universityevents

University Events collaborates with departments and organizations to produce large-scale campus events that engage students, staff, and faculty, while strengthening students’ ties to the university and community. University Events is involved in the planning of Maverick Stampede (Welcome Week), the MavsMeet AfterParty, Homecoming, the Spring Concert, and BlockParty. University Events is also home to the UTA Ambassadors and The Big Event.

The university’s student programming board, EXCEL Campus Activities, plans and implements social, recreational, cultural and educational events. From large to small, throughout the year there are a variety of events and traditions that make the university an enriching place to make the most of your time. These diverse programs become an essential part of the culture on campus because they are student led and university supported. These events and activities are open to all students; you can even get involved by becoming a member of EXCEL.
