Continued study of cultural and linguistic issues in the translation of Portuguese and English language texts. Systematic development of advanced skills in localization and computer-aided translation and in using TMX/TBX (international standards for translation memory and terminology exchange) tools. Translation practice, individually and in translation teams, with increasingly longer and more specialized texts. Prepares localization and translation specialists for real-world careers in the language services industry. May not be repeated for credit. Prerequisite: PORT 3310 with a grade of B or better.

PORT 3345. INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION. 3 Hours.
Introduction to computer-assisted translation (CAT), machine translation (MT), translation memory (TM) and terminology management tools in modern translation and localization workflows. Prepares students for real-world careers in the language services industry. Exclusively for students pursuing a minor in Localization and Translation-Arabic. ARAB 3310 is strongly recommended before ARAB 3345.

PORT 3391. CONFERENCE COURSE. 3 Hours.
Independent study; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: consent of the department.

PORT 4334. CONTEMPORARY BRAZILIAN CULTURE. 3 Hours.
Examination of contemporary Brazilian culture, with a focus on current events relevant to the Portuguese-speaking world. Topics may include: language and culture, literature, film, business culture, and traditions. Students may take the course in English or in Portuguese.
PORT 4393. PORTUGUESE INTERNSHIP. 3 Hours.
This course is a combination of field-related experience in the business or service sector with an academic component. Coursework may include journal writing in Portuguese, outside readings, and formal presentations. May be repeated once for credit if student undertakes a different internship. Prerequisite: Two PORT 3000 level courses and/or permission of the instructor.

COURSES

RUSS 1441. BEGINNING RUSSIAN I. 4 Hours. (TCCN = RUSS 1411)
Multimedia immersion in the culture and language of Russian-speaking countries. Designed to enable students to understand and communicate effectively in Russian at the beginning level. No prerequisites.

RUSS 1442. BEGINNING RUSSIAN II. 4 Hours. (TCCN = RUSS 1412)
Continuation of beginning Russian. Prerequisite: RUSS 1441 with a grade of C or better.

RUSS 1491. CONFERENCE COURSE. 4 Hours.
Independent study; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of the instructor.

RUSS 2301. TOPICS IN RUSSIAN LITERATURE IN TRANSLATION. 3 Hours.
Study of the works of major authors and intellectual trends of a given period or periods. May be repeated for credit as topics or periods vary. RUSS 2301 may be taken to fulfill the foreign language literature requirement. Prerequisite: ENGL 1301 and ENGL 1302.

RUSS 2310. RUSSIAN CULTURE IN THE WORLD. 3 Hours.
An overview of the cultures of the Russian-speaking world in a global context, examining cultural products such as food, art, music, popular culture, literature, and/or film. Taught in English.

RUSS 2313. INTERMEDIATE RUSSIAN I. 3 Hours. (TCCN = RUSS 2311)
Continued immersion in the culture and language of Russian-speaking countries. Application of strategies and technology in mastering listening, speaking, reading, and writing at the intermediate level. Prerequisite: RUSS 1442 with a grade of C or better.

RUSS 2314. INTERMEDIATE RUSSIAN II. 3 Hours. (TCCN = RUSS 2312)
Continuation of intermediate Russian. Prerequisite: RUSS 2313 with a grade of C or better.

RUSS 2315. INTRODUCTION TO RUSSIAN LANGUAGE AND CULTURE. 3 Hours.
A fully online course devoted to immersion in Russian culture through print and digital media as well as conversation and collaboration with native speakers of Russian. Students will gain broad exposure to social and historical contexts of Russian culture as well as reading ability of the Russian Cyrillic alphabet, and practice in basic reading, writing and speaking skills in Russian. No prerequisites. Prior knowledge of Russian is useful but not required. Credit will not be granted to native or heritage speakers of Russian.

RUSS 2391. CONFERENCE COURSE. 3 Hours.
Independent study; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of the instructor.

RUSS 3301. TOPICS IN RUSSIAN LITERATURE IN TRANSLATION. 3 Hours.
Covers the works of major Russian authors during the period from the beginning of Russian literature until the 1917 Revolution, focusing on the interrelationship of various literary movements and philosophies. Students receiving credit in Russian will complete a research project using the Russian language. May be repeated for credit as topics and periods vary. Offered as ENGL 3301 and RUSS 3301; credit will be granted in only one department. Prerequisites: English majors must have earned a C or better in ENGL 3333 and ENGL 3350. Non-majors must have earned a C or better in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

RUSS 3304. TOPICS IN RUSSIAN LANGUAGE STUDY. 3 Hours.
Study of Modern Russian with a focus on pronunciation, word formation, and syntax. Students develop advanced listening, reading, speaking, and writing skills through cultural analysis. Cultural topics come from linguistics, literature, music, film, visual and performing arts, sports, and science. Repeatable for credit when the topic changes.

RUSS 3305. TOPICS IN RUSSIAN POETRY. 3 Hours.
Literary analysis of selected works of Russian poetry in the original Russian. Topics will come from different periods of Russian literary and cultural history. Students develop reading, writing, and language skills at an advanced level. Repeatable for credit when the topic changes.

RUSS 3306. TOPICS IN SOVIET AND POST-SOVIET LITERATURE IN TRANSLATION. 3 Hours.
Covers the works of major Soviet and post-Soviet authors from 1917 to the present against the background of unfolding social and political development in the USSR and post-USSR. Students receiving credit in Russian will complete a research project using the Russian language. May be repeated for credit as topics and periods vary. Offered as ENGL 3306 and RUSS 3306; credit will be granted in only one department. Prerequisites: English majors must have earned a C or better in ENGL 3333 and ENGL 3350. Non-majors must have earned a C or better in 3 hours of sophomore literature (ENGL 2303, ENGL 2309, ENGL 2319, ENGL 2329).

RUSS 3310. LOCALIZATION AND TRANSLATION I. 3 Hours.
Introduction to cultural and linguistic issues in the translation of Russian language texts. Students will explore current technologies used in various real-world translation contexts and how to adapt texts, products, and services to the locale for which they are intended. May be repeated once. Prerequisite: RUSS 2314 with a grade of B or better.
RUSS 3311. LOCALIZATION AND TRANSLATION II. 3 Hours.
Continued study of cultural and linguistic issues in the translation of Russian and English language texts. Systematic development of advanced skills in localization and computer-aided translation and in using TMX/TBX (international standards for translation memory and terminology exchange) tools. Translation practice, individually and in translation teams, with increasingly longer and more specialized texts. Prepares localization and translation specialists for real-world careers in the language-services industry. May not be repeated for credit. Prerequisite: RUSS 3310 with a grade of B or better.

RUSS 3314. POLITICAL SYSTEMS OF EASTERN AND CENTRAL EUROPE. 3 Hours.
POLS 3314 or RUSS 3314. Examination of the political institutions and processes of the former communist systems of Eastern Europe and the Baltics, as well as selected Central European states. Credit will be given in only one department. Students receiving credit in Russian will complete projects using the Russian language.

RUSS 3333. CONVERSATION AND TOPICS IN RUSSIAN CULTURE. 3 Hours.
Intermediate practice in spoken Russian using print and media resources on a range of cultural topics. Students actively master the discourse of the source media through dialogue, debate, and short presentations in Russian. May be repeated as topic varies. Prerequisite: RUSS 1442 with a grade of C or better.

RUSS 3343. RUSSIAN PHONETICS. 3 Hours.
Introduction to the articulatory phonetics of Russian. Of special interest to students who wish to improve their pronunciation, comprehension, and oral expression. Prerequisite: RUSS 1442 with a grade of C or better.

RUSS 3345. INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION. 3 Hours.
Introduction to computer-aided translation (CAT), machine translation (MT), translation memory (TM) and terminology management tools in modern translation and localization workflows. Prepares students for real-world careers in the language services industry. Exclusively for students pursuing a minor in Localization and Translation-Russian. RUSS 4334 or RUSS 3310 is strongly recommended before RUSS 3345.

RUSS 3391. CONFERENCE COURSE. 3 Hours.
Independent study; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: Permission.

RUSS 3393. RUSSIAN INTERNSHIP. 3 Hours.
A combination of field-related experience in the business or service sector with an academic component. Coursework may include journal writing, outside readings, reflection papers, and formal presentations. Prerequisite: Permission of the instructor.

RUSS 4301. SELECTED AUTHORS AND TOPICS. 3 Hours.
Detailed reading and analysis of selected Russian writers such as Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Leo Tolstoy, Ivan Turgenev and Anton Chekhov. Their works are compared in the light of urgent social, political, literary and philosophical questions of their day. May be repeated as topic varies. No prerequisites. Students majoring in Russian read some texts in the original. Taught in English. Satisfies the core curriculum requirement for literature.

RUSS 4302. RUSSIAN AND SOVIET CINEMA. 3 Hours.
A survey of Russian and Soviet cinema from their beginnings to the present. Special attention is paid to film theory and formal analysis, the ideological uses of film art, and cinema as a medium of cultural dissent and witness to social change. No prerequisites. May also be offered as ENGL 3300; credit will be granted in only one department. Taught in English.

RUSS 4303. PROPAGANDA AND IDEOLOGY IN SOVIET ART AND LITERATURE. 3 Hours.
An examination of the purpose, value and influence of the arts in revolutionary Russia with the aid of diverse source documents and artistic media. Focus is on the symbols, stories, rituals and ideologies that defined the Russian experience of 'building socialism' in the early decades of the Soviet Union. No prerequisites. Students majoring in Russian read some texts in the original. Taught in English. Satisfies the core curriculum requirement for literature.

RUSS 4304. BANNED AND CENSORED WORKS OF RUSSIAN LITERATURE. 3 Hours.
An examination of selected works of Russian literature that were censored, banned or otherwise prohibited, from tsarist Russia through the Soviet period. The role of censorship in Russian cultural life, and the great works of literature that flourished in spite of it. No prerequisites. Students majoring in Russian read some texts in the original. Taught in English. Satisfies the core curriculum requirement for literature.

RUSS 4334. THE CULTURE OF BUSINESS. 3 Hours.
The relationship of culture, language, and meaning to issues affecting business and e-commerce in the Russian-speaking world, with emphasis on intercultural communication in an international business environment. Web-based media segments about international business in Russia, Europe, and North America are used as an aid in the acquisition of pertinent cultural knowledge, as well as vocabulary and other linguistic knowledge. Prerequisite: RUSS 2314 with a grade of C or better.

RUSS 4335. BUSINESS RUSSIAN. 3 Hours.
Students learn to function in business environments, with emphasis on the skills needed for conducting e-commerce. Web-based media segments from Russia, Europe, and North America are used to reinforce vocabulary and other linguistic knowledge. Prerequisite: RUSS 4334 with a grade of C or better.
RUSS 4338. TOPICS IN INTERCULTURAL COMMUNICATION AND COLLABORATION. 3 Hours.
This course is devoted to intercultural communication and collaboration. Through telecollaboration with native speakers of Russian, students will gain active practice in listening comprehension and written Russian. Active learning tasks employing multimedia in collaboration with language partners will contribute to a broadening of knowledge in the social and historical contexts of Russian culture and media, increased ability to express ideas in everyday contexts in spoken and written Russian, and advancement of strategies for autonomous learning. May be repeated for credit as topics change. Prerequisite: RUSS 1442 with a grade of C or better.

RUSS 4342. TOPICS IN SIMULTANEOUS INTERPRETING: THEORY AND PRACTICE. 3 Hours.
This fully online course focuses on the theory and practice of simultaneous interpreting through active translation and interpreting tasks. Through telecollaboration with native speakers of Russian, students will gain active practice in listening comprehension and spoken and written Russian. A major focus is on translation and simultaneous interpreting in a variety of professional contexts including health and legal settings, politics and media, and business negotiations. Active learning projects will involve role-play, simultaneous interpreting tasks, and creating audio/visual presentations. Prerequisite: RUSS 2314 or equivalent.

RUSS 4361. THE POLITICAL ENVIRONMENT OF RUSSIA AND THE SUCCESSOR STATES. 3 Hours.
The domestic political systems of Russia and the other former Soviet republics. The communist state in retrospect. Development of political actors, institutions, and parties. Offered as POLS 4361 and RUSS 4361; credit will be given in only one department. Taught in English; for Russian language credit, research will be done in Russian.

RUSS 4362. RUSSIA AND THE SUCCESSOR STATES TODAY. 3 Hours.
The metamorphosis of the Communist Party and the current political philosophies of the post-Soviet states. Examination of attitudes and self-perceptions of citizens of these states in the post-period. Emphasis is on area studies and culture. The course will be taught in English, but for Russian language credit; research will be done in the Russian language. May be repeated for credit as topics change. Offered as POLS 4362 & RUSS 4362. Credit will be granted in only one department.

RUSS 4365. FOREIGN POLICIES OF RUSSIA AND THE SUCCESSOR STATES. 3 Hours.
The foreign policies of Russia and other former Soviet republics. Development of their policymaking structures and the major issues confronting them. Emphasis on Russia and the superpower relationship, European security and cooperation, relations with developing states, and the interactions of the former Soviet republics. Also listed as RUSS 4365; credit will be given in only one department.

RUSS 4391. CONFERENCE COURSE. 3 Hours.
Independent study in the preparation of a paper or a translation on a research topic; consultation with instructor on a regular basis. May be repeated for credit.

RUSS 4393. RUSSIAN INTERNSHIP. 3 Hours.
This course is a combination of field-related experience in the business or service sector with an academic component. Coursework may include journal writing in Russian, outside readings, and formal presentations. Prerequisite: Two RUSS 3000 level courses and permission of the instructor.

RUSS 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or a project under the direction of a faculty member in the major department. May not be repeated for credit.

COURSES

SPAN 1441. BEGINNING SPANISH I. 4 Hours. (TCCN = SPAN 1411)
Beginning study of Spanish language with emphasis on speaking, listening, reading, and writing. No prerequisites. Native or heritage speakers of Spanish may not take this course.

SPAN 1442. BEGINNING SPANISH II. 4 Hours. (TCCN = SPAN 1412)
Continuation of beginning Spanish. Prerequisite: SPAN 1441 with a grade of C or better. Native or heritage speakers of Spanish may not take this course.

SPAN 1491. CONFERENCE COURSE. 4 Hours.
Independent study; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of the instructor.

SPAN 2300. SPANISH IN THE UNITED STATES. 3 Hours.
An overview of the historical, social, and cultural issues related to the use of Spanish in the United States alongside other languages, mainly English. Explores topics such as bilingualism, code-switching, Spanglish, and language maintenance vs. loss. Taught in English.

SPAN 2301. TOPICS IN SPANISH LITERATURE IN TRANSLATION. 3 Hours.
Study of the works of major authors and intellectual trends of a given period or periods. May be repeated for credit as topics or periods vary. SPAN 2301 may be taken to fulfill the foreign language literature requirement. Prerequisite: ENGL 1301 and ENGL 1302.

SPAN 2310. HISPANIC CULTURE IN THE WORLD. 3 Hours.
An overview of the cultures of the Spanish-speaking world in a global context, examining cultural products such as food, art, music, popular culture, literature, and/or film. Taught in English.

SPAN 2313. INTERMEDIATE SPANISH I. 3 Hours. (TCCN = SPAN 2311)
Intermediate study of Spanish language with emphasis on speaking, listening, reading, and writing. Prerequisite: SPAN 1442 with a grade of C or better. Native or heritage speakers of Spanish may not take this course.
SPAN 2314. INTERMEDIATE SPANISH II. 3 Hours. (TCCN = SPAN 2312)
Continuation of intermediate Spanish. Prerequisite: SPAN 2313 with a grade of C or better. Native or heritage speakers of Spanish may not take this course.

SPAN 2315. INTERM SPAN HERITAGE SPEAKERS. 3 Hours. (TCCN = SPAN 2315)
This course focuses on the development of reading, writing, speaking and listening skills in Spanish, as well as an understanding of Hispanic cultures and issues of identity of heritage speakers in the United States. This course is intended for heritage speakers of Spanish and is the equivalent of SPAN 2314. This course satisfies the University of Texas at Arlington core curriculum requirement in language, philosophy and culture. Prerequisite: SPAN 2313 with a Grade of C or better or the equivalent, or consent of the department.

SPAN 2391. CONFERENCE COURSE. 3 Hours.
Independent study; consultation with instructor on a regular basis. Prerequisite: Permission of the instructor.

SPAN 3302. HISPANIC LITERATURE IN TRANSLATION. 3 Hours.
The works of major authors and intellectual trends of a given period. May be repeated for credit as topics or periods vary. SPAN 3302 cannot be applied toward the B.A. in Spanish or toward a Spanish minor, but may be taken to fulfill the foreign language literature requirement. Prerequisite: 2314 of a Modern or Classical language and six hours of English.

SPAN 3303. ADVANCED SPANISH CONVERSATION. 3 Hours.
Practice in oral expression with an emphasis on vocabulary building and grammar review. Of special interest to students who wish to improve their skills in pronunciation, comprehension, and oral expression. Credit will not be granted to native or heritage speakers of Spanish. Prerequisite: SPAN 2314 with a grade of C or better.

SPAN 3304. LANGUAGE IN MEXICO. 3 Hours.
An analysis of language in Mexico. Topics may include language variation, language and society, languages in contact, indigenous languages, or the history of Spanish in Mexico. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better.

SPAN 3305. ADVANCED SPANISH FOR HERITAGE SPEAKERS. 3 Hours.
A detailed study of Spanish grammar for heritage speakers. Capitalizes upon students’ existing language skills, expands their knowledge base, and develops their ability to read, write, and communicate more effectively. Special attention is given to regional and dialectal differences. Prerequisite: SPAN 2315, or the equivalent, with a grade of C or better.

SPAN 3308. SPANISH FOR HEALTH AND HUMAN SERVICES. 3 Hours.
Practice in Spanish-language skills needed in the fields of healthcare, social work, and other human services. Emphasis on specialized vocabulary building, grammar, role play, and an understanding of Hispanic/Latino culture. For students interested in working with Spanish-speaking clients in nursing/medicine, translation/interpreting, social work, or mental health settings. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better or consent of instructor.

SPAN 3309. SPANISH FOR THE PROFESSIONS. 3 Hours.
Practice in Spanish-language skills needed in the professional fields in order to communicate with Spanish-speaking individuals. Emphasis on specialized vocabulary building, role play, and an understanding of Hispanic culture. Topics may include Spanish for law enforcement, social services, education, medicine, business, and communications. Prerequisite: SPAN 2314 or SPAN 2315, or the equivalent, with a grade of C or better.

SPAN 3310. SPANISH LOCALIZATION AND TRANSLATION I. 3 Hours.
Introduction to linguistic and cultural issues in the translation of Spanish language texts. Students will explore current technologies used in various real-world localization and translation contexts and how to adapt texts, products, and services to the locale for which they are intended. Exclusively for students pursuing a minor in Localization and Translation-Spanish. Prerequisite: SPAN 2314 or SPAN 2315 or the equivalent with a grade of B or better.

SPAN 3311. SPANISH CULTURE AND CIVILIZATION. 3 Hours.
Spanish history with emphasis on cultural, intellectual, and artistic trends and existing social institutions. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better.

SPAN 3312. LATIN AMERICAN CULTURE AND CIVILIZATION. 3 Hours.
An interdisciplinary introduction to Latin American society, history and culture. Offered as MAS 3312 and SPAN 3312; credit will be granted for either MAS or SPAN. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better.

SPAN 3313. TOPICS IN HISPANIC LANGUAGE, LITERATURE & CULTURE. 3 Hours.
Topics may include Peninsular or Latin American film, music, radio, politics, human rights movements, literature, language or Hispanic linguistics. May be repeated as the topic changes. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better.

SPAN 3314. ADVANCED SPANISH GRAMMAR. 3 Hours.
A detailed study of Spanish grammar for non-native speakers. Credit will not be granted to native or heritage speakers of Spanish. Prerequisite: SPAN 2314 with a grade of C or better.

SPAN 3315. SPANISH COMPOSITION. 3 Hours.
Practice in writing and original composition in Spanish, including the study of a variety of texts. Of special interest to students who wish to improve their reading comprehension and their writing skills. Prerequisite: SPAN 3305 or SPAN 3314, with grade C or better.
SPAN 3316. EXPLORING THE SPANISH LANGUAGE. 3 Hours.
An overview of the history and diversity of the Spanish language, as well as a study of its structure. Topics include sounds and spelling, word and sentence formation, varieties of Spanish, and bilingualism. Application of course content to the use of Spanish in professional settings is explored. Prerequisite: SPAN 3305 or SPAN 3314, with a grade of C or better.

SPAN 3317. MEXICAN CULTURE AND CIVILIZATION. 3 Hours.
An examination of Mexican society, history, and culture with emphasis on intellectual and artistic trends. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better.

SPAN 3318. MEXICAN POPULAR CULTURE. 3 Hours.
An interdisciplinary examination of Mexican popular culture. Topics include: Mexican popular literature, film, comics, television, music, mass media, and the internet. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better.

SPAN 3320. INTRODUCTION TO HISPANIC LITERATURE AND CULTURE. 3 Hours.
An introduction to the tools of literary and cultural criticism as well as Spanish and Latin American literary history. Study of representative literary texts with the object of developing students' understanding of historical change and cultural crosscurrents. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 3321. SPANISH LOCALIZATION AND TRANSLATION II. 3 Hours.
Continued study of linguistic and cultural issues in the translation of Spanish and English language texts. Systematic development of advanced skills in localization and computer-aided translation tools. Students will build and train machine translation engines and explore text analytics in modern research and the enterprise. Prepares localization and translation specialists for real-world careers in the language-services industry of the 21st Century. Exclusively for students pursuing a minor in Localization and Translation-Spanish. Prerequisite: SPAN 3310 with a grade of B or better.

SPAN 3322. THE SOUNDS OF SPANISH. 3 Hours.
An examination of the sound system of Spanish. Topics include the articulatory system, characteristics and description of speech sounds, pronunciation, dialectal variation, and differences between speech sounds in English and Spanish. Students receive hands-on training in acoustic analysis in order to describe both the patterns observed in their own speech as well as speech patterns of Spanish speakers from different regions. Prerequisite: SPAN 3305 or SPAN 3314 with a grade of C or better.

SPAN 3323. MULTIMEDIA TRANSLATION, TRANSCREATION AND SOFTWARE LOCALIZATION. 3 Hours.
An overview of the theoretical, methodological, and practical aspects of English to Spanish and Spanish to English multimedia translation. Topics include dubbing, subtitling, transcreation, media accessibility, and videogame and software localization. Students will learn strategies to address linguistic and cultural translation problems, as well as techniques to address the specific problems in this field of translation. Students will also explore subtitling software, and software to increase translators' productivity. Prerequisite: SPAN 2314 or SPAN 2315 with a grade of C or better.

SPAN 3324. INTRODUCTION TO CREATIVE WRITING. 3 Hours.
An introductory course to the craft of creative writing through short-story, nouvelle, novel, poetry, flash fiction, memoir, and screenwriting. Prerequisite: SPAN 3305 or SPAN 3314, with grade C or better.

SPAN 3334. INTRODUCTION TO TRANSLATION. 3 Hours.
This course is an introduction to the theory, methods and practice of English to Spanish translation and Spanish to English translation. The student will learn how to address translation problems related to culture and language as well as the fundamentals of translating general material from different fields such as journalism, advertisement, tourism, gastronomy, health, business, etc. The student will also acquire basic knowledge of translation theory. To take as an elective, non-Spanish majors should contact the instructor. Prerequisite: SPAN 3315 with grade of B or better.

SPAN 3341. INTRODUCTION TO INTERPRETING. 3 Hours.
Introduction to the theory, methods and practice of interpreting. The student will become familiar with community interpreting (interpreting in school, medical and legal settings) and interpreting theory. The student will begin to interpret in the simultaneous and consecutive (bilateral) modes. The student will also learn about sight translation. Non-native/heritage speakers are also encouraged to take SPAN 3303 prior to enrolling in SPAN 3341. To take as an elective, non-Spanish majors should contact the instructor. Prerequisite: SPAN 3305 or SPAN 3314 with a grade of B or better.

SPAN 3345. INTRODUCTION TO COMPUTER-ASSISTED TRANSLATION. 3 Hours.
Introduction to computer-assisted translation (CAT), machine translation (MT), translation memory (TM) and terminology management tools in modern translation and localization workflows. Prepares students for real-world careers in the language services industry. For students enrolled in Localization and Translation/Interpreting programs only. Exclusively for students pursuing a minor in Localization and Translation-Spanish. SPAN 3310 is strongly recommended before SPAN 3345.

SPAN 3391. CONFERENCE COURSE. 3 Hours.
Independent study; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of Instructor.

SPAN 3393. SPANISH INTERNSHIP. 3 Hours.
A combination of field-related experience in the business or service sector with an academic component. Coursework may include journal writing, outside readings, reflection papers, and formal presentations. Prerequisite: Permission of Instructor.

SPAN 4191. CONFERENCE COURSE. 1 Hour.
Independent study; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: Permission of the instructor.
SPAN 4310. TOPICS IN PENINSULAR SPANISH LITERATURE AND CULTURE TO THE EIGHTEENTH CENTURY. 3 Hours.
Topics may include: Medieval Spanish literature and culture, Golden Age Spanish literature and culture, or any particular movement, genre, work or author prior to the eighteenth century. May be repeated for credit when content changes. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4311. TOPICS IN PENINSULAR SPANISH LITERATURE AND CULTURE, EIGHTEENTH CENTURY TO THE PRESENT. 3 Hours.
Topics may include: Neoclassical peninsular Spanish literature and culture, peninsular Spanish literature and culture of the Romantic period, Realist or Naturalist Spanish literature and culture, peninsular Spanish literature and culture since 1900, as well as any particular movement, genre, work or author from the eighteenth century to the present. May be repeated for credit when content changes. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4312. INTERCULTURAL COMPETENCE FOR GLOBAL COMMUNICATION. 3 Hours.
A study of the cultural differences between the U.S. and the Hispanic world with a focus on the development of intercultural competence: verbal and non-verbal communication, interpersonal skills, effective management strategies, and professional etiquette in multicultural settings. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4313. TOPICS IN HISPANIC CULTURE. 3 Hours.
Among the topics are Spanish or Latin American music, television, radio, film, and literature as culture. May be repeated for credit as topic changes. Prerequisite: SPAN 3315 with a grade of C or better. Offered as MAS 4313 and SPAN 4313; credit will be given for MAS 4313 or SPAN 4313 but not both in a given semester.

SPAN 4314. TOPICS IN LATIN-AMERICAN LITERATURE AND CULTURE TO MODERNISM. 3 Hours.
Topics may include: Colonial Latin-American literature and culture, pre-modern Latin-American literature and culture, Latin-American literature and culture of the Enlightenment, or any particular movement, genre, work or author prior to Modernism. May be repeated for credit when content changes. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4315. TOPICS IN CONTEMPORARY LATIN-AMERICAN LITERATURE AND CULTURE, MODERNISM TO THE PRESENT. 3 Hours.
Topics may include: Latin-American literature and culture of Modernism, modern Latin-American literature and culture, or any particular movement, genre, work or author from Modernism to the present. May be repeated for credit when content changes. Offered as MAS 4315 and SPAN 4315; credit will be given for MAS 4315 or SPAN 4315 but not both in a given semester. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4316. ADVANCED SPANISH LANGUAGE STUDY. 3 Hours.
Study of the structure of the Spanish language including phonology, morphology, and syntax, as well as historical, regional, and social variation. Prerequisite: SPAN 3314 or SPAN 3305 with a grade of C or better.

SPAN 4317. U.S.-MEXICO LITERATURE & CULTURE. 3 Hours.
U.S.-Mexico cultural manifestations with particular attention to music, television, radio, film, performance art, and literature as culture. Cross-listed with MAS 4317. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4318. MEXICAN LITERATURE. 3 Hours.
Studies in Mexican fiction, poetry, drama, and literary essay. Offered as MAS 4318 and SPAN 4318; credit will be given for MAS 4318 or SPAN 4318 but not both in a given semester. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4320. TOPICS IN SPANISH LANGUAGE, WRITING AND THEORY. 3 Hours.
Review of advanced research methods and topics in Spanish, Latino and Latin American literature, culture and linguistics. Topics may include: literary and cultural theory in relation to Hispanic literature and culture, research trends, and methods in Spanish linguistics. Students conduct original research or writing projects in relation to the course topic. May be repeated for credit as topic changes. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4321. TOPICS IN PROFESSIONAL WRITING. 3 Hours.
An integrated language approach to Professional Writing across disciplines and professions. Topics may include writing, editing, and publishing in various workplace environments and sectors such as the mass media, the internet, business, education, health, government, and the arts, among others. May be repeated for credit as topics vary. Prerequisite: SPAN 3315 with grade of B or better.

SPAN 4322. TOPICS IN CREATIVE WRITING. 3 Hours.
A creative writing course on topics that may include short story, poetry, novel, nouvelle, flash fiction, memoir, and non-fiction. May be repeated for credit as topics vary. Prerequisite: SPAN 3315 with grade of B or better.

SPAN 4327. WOMEN IN HISPANIC LITERATURE. 3 Hours.
Considers women as characters in and writers of Hispanic literature. Includes the analysis of themes, language, and how the writings of women often give voice to lesser known aspects of culture. Offered as SPAN 4327, MAS 4327, and GWSS 4327; credit will be granted only once. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4330. TOPICS IN SPANISH LINGUISTICS. 3 Hours.
Topics may include: Spanish phonetics and phonology, morphology, syntax, semantics, lexicography, history of the Spanish language, Old Spanish, Spanish sociolinguistics, as well as the application of any theoretical approach to the study of the Spanish language, excluding the study of either peninsular or American Spanish dialectology. May be repeated for credit when content changes. Prerequisite: SPAN 3305 or SPAN 3314 with a grade of C or better.
SPAN 4332. TOPICS IN SPANISH DIALECTOLOGY. 3 Hours.
Topics may include: Modern peninsular Spanish dialectology, modern Spanish-American dialectology, Old Spanish dialectology, early American Spanish dialectology, as well as a detailed study of any one dialect or regional dialect of Spanish from either a synchronic or a diachronic perspective. Emphasis may be given to phonetics, phonology, morphology, syntax, semantics, or lexicon, as applied to the study of peninsular or American Spanish dialectology. May be repeated for credit when content changes. Prerequisite: SPAN 3305 or SPAN 3314 with a grade of C or better.

SPAN 4334. CONTEMPORARY HISPANIC CULTURE. 3 Hours.
An introduction to contemporary Spanish and/or Latin American culture, with special emphasis on globalization and current events affecting the Spanish-speaking world. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4335. BUSINESS SPANISH. 3 Hours.
The study of business terminology and skills needed for writing business letters, conducting telephone conversations, engaging in commercial transactions, and understanding international procedures. Operational and strategic issues involved in interaction with Hispanic firms and markets; international trade; competitive, vendor-customer, and collaborative relations. Prerequisite: SPAN 3315 with a grade of C or better. Exclusively for International Business Spanish students, or students pursuing a Certificate in Spanish for the Professions.

SPAN 4336. TOPICS IN SPANISH FOR THE PROFESSIONS. 3 Hours.
Development of Spanish-language skills needed to work in a specific profession. Emphasis on reading and formal communication, including technical papers, letters, reports, proposals, and presentations. Topics may include Spanish for legal, medical, educational, or communications fields. May be repeated for credit when content changes. Prerequisite: SPAN 3315 with a grade of C or better.

SPAN 4339. THE ACQUISITION OF SPANISH. 3 Hours.
Topics, methods, and techniques specific to the teaching of the Spanish language. Prerequisite: SPAN 3305 or SPAN 3314 with a grade of C or better.

SPAN 4341. BUSINESS AND LEGAL TRANSLATION. 3 Hours.
An advanced course in translation with a focus on business and legal texts. Students deepen their knowledge of translation theory and are trained to build and consolidate their skills in specialized translation. May be taken concurrently with SPAN 4342. SPAN 4341 cannot be applied toward the B.A. in Spanish for Global Competence. To take as an elective, non-Spanish majors should contact the instructor. Prerequisite: SPAN 3340 with a grade of C or better.

SPAN 4342. TRANSLATION IN HEALTHCARE SETTINGS. 3 Hours.
An advanced course in translation with a focus on healthcare translation. Particular attention will be paid to healthcare terminology in English and Spanish, text types, and cultural elements. Students deepen their knowledge of translation theory and are trained to build and consolidate their skills in specialized translation. May be taken concurrently with SPAN 4341. SPAN 4342 cannot be applied toward the B.A. in Spanish for Global Competence. To take as an elective, non-Spanish majors should contact the instructor. Prerequisite: SPAN 3340 with a grade of C or better.

SPAN 4343. INTERPRETING IN HEALTHCARE SETTINGS. 3 Hours.
A study of different types of interpretation. Healthcare terminology in English and Spanish will be addressed with a special emphasis on the diverse roles of healthcare interpreters as well as various locations where they are needed, such as hospital clinics, doctors' offices, and hearings that deal with medical issues. Ethical standards of practice in healthcare interpreting will be examined. SPAN 4343 cannot be applied toward the B.A. in Spanish for Global Competence. To take as an elective, non-Spanish majors should contact the instructor. Prerequisite: SPAN 3341 with a grade of B or better.

SPAN 4344. INTERPRETING IN LEGAL SETTINGS. 3 Hours.
A study of different types of interpretation. Legal terminology in English and Spanish will be addressed with special emphasis on the diverse roles of legal interpreters as well as various locations where they are needed, such as courtrooms, lawyer's offices, and state, federal, or local law-enforcement facilities. Ethical standards of practice in legal interpreting will be examined. SPAN 4344 cannot be applied toward the B.A. in Spanish for Global Competence. To take as an elective, non-Spanish majors should contact the instructor. Prerequisite: SPAN 3341 with a grade of B or better.

SPAN 4391. CONFERENCE COURSE. 3 Hours.
Independent study in the preparation of a paper on a research topic; consultation with instructor on a regular basis. May be repeated for credit. Prerequisite: two 3000 level courses and permission of the instructor.

SPAN 4392. SPANISH TRANSLATION AND INTERPRETING INTERNSHIP. 3 Hours.
A combination of field-related experience in the business or service sector with an academic component. Coursework may include journal writing in Spanish, outside readings, and formal presentations. Prerequisite: Two Spanish 3000 level courses and permission of the instructor.

SPAN 4393. SPANISH INTERNSHIP. 3 Hours.
A combination of field-related experience in the business or service sector with an academic component. Coursework may include journal writing in Spanish, outside readings, and formal presentations. Prerequisite: Two SPAN 3000 level courses and permission of the instructor.

SPAN 4394. HONORS THESIS / SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or a project under the direction of a faculty member in the major department. May not be repeated for credit. Prerequisite: two 3000 level courses and permission of the instructor.

SPAN 5101. TEACHING PRACTICUM I. 1 Hour.
Required of all teaching assistants in Spanish in their first semester. May not be counted toward a master's degree. Graded P/F/R.

SPAN 5102. TEACHING PRACTICUM II. 1 Hour.
Required of all teaching assistants in Spanish in their second semester. May not be counted toward a master's degree. Graded P/F/R.
SPAN 5190. CONFERENCE COURSE IN SPANISH LANGUAGE AND LITERATURE. 1 Hour.
Graded P/F/R.

SPAN 5300. HISTORY OF THE SPANISH LANGUAGE. 3 Hours.
Study in topics related to the development of the Spanish language, from its earliest forms to the present.

SPAN 5302. SPANISH DIALECTOLOGY. 3 Hours.
Phonological, grammatical, and lexical features of Spanish dialects worldwide.

SPAN 5303. APPLIED SPANISH LINGUISTICS. 3 Hours.
Pedagogy, pronunciation and orthography, morphology, syntax, semantics, and culture.

SPAN 5310. TOPICS IN PENINSULAR SPANISH LITERATURE AND CULTURE TO THE EIGHTEENTH CENTURY. 3 Hours.
Topics may include: Medieval Spanish literature and culture, Golden Age Spanish literature and culture, or any particular movement, genre, work or author prior to the eighteenth century. May be repeated for credit when content changes.

SPAN 5311. TOPICS IN PENINSULAR SPANISH LITERATURE AND CULTURE, EIGHTEENTH CENTURY TO THE PRESENT. 3 Hours.
Topics may include: Neoclassic peninsular Spanish literature and culture, peninsular Spanish literature and culture of the Romantic period, Realist or Naturalist Spanish literature and culture, peninsular Spanish literature and culture since 1900, as well as any particular movement, genre, work or author from the eighteenth century to the present. May be repeated for credit when content changes.

SPAN 5313. TOPICS IN HISPANIC LITERATURE AND CULTURE. 3 Hours.
Special studies in areas not ordinarily covered by regular course offerings. Different topics may be repeated for credit.

SPAN 5314. TOPICS IN SPANISH-AMERICAN LITERATURE AND CULTURE TO MODERNISM. 3 Hours.
Topics may include: Colonial Spanish-American literature and culture, pre-modern Spanish-American literature and culture, Spanish-American literature and culture of the Enlightenment, or any particular movement, genre, work or author prior to Modernism. May be repeated for credit when content changes.

SPAN 5315. TOPICS IN CONTEMPORARY SPANISH-AMERICAN LITERATURE AND CULTURE, MODERNISM TO THE PRESENT. 3 Hours.
Topics may include: Spanish-American literature and culture of Modernism, modern Spanish-American literature and culture, or any particular movement, genre, work or author from Modernism to the present. May be repeated for credit when content changes.

SPAN 5317. U.S. LATINO LITERATURE AND CULTURE. 3 Hours.

SPAN 5318. MEXICAN LITERATURE AND CULTURE. 3 Hours.
Readings in all Mexican literary genres from various critical perspectives. Particular attention given to the novel, poetry, and essay of the 20th Century and to interrelationships between text and culture.

SPAN 5320. TOPICS IN SPANISH LINGUISTICS. 3 Hours.
Special studies in linguistics not ordinarily covered by regular course offerings. May be repeated for credit when content changes.

SPAN 5327. WOMEN IN HISPANIC LITERATURE. 3 Hours.
Readings of literary texts by women writers from medieval Spain to contemporary Spanish America. Attention to recurrent motifs as well as to the literary expression of historical and cultural transformation.

SPAN 5330. ADVANCED STUDIES IN SPANISH LINGUISTICS I. 3 Hours.
Topics may include: sociolinguistics, bilingualism, modern Spanish dialectology, as well as a detailed study on any one dialect or regional dialect of contemporary Spanish. May be repeated for credit when content changes.

SPAN 5332. ADVANCED STUDIES IN SPANISH LINGUISTICS II. 3 Hours.
Topics may include: Old Spanish, Spanish philology, Spanish text linguistics, and Old Spanish dialectology, as well as a detailed study of any one dialect or regional dialect of Spanish. May be repeated for credit when content changes.

SPAN 5366. SPANISH FOR SCHOOL ADMINISTRATORS AND TEACHERS. 3 Hours.
Development of Spanish proficiency for teachers and administrators through an immersion approach. Emphasis on concepts and terminology related to education, program administration, community involvement and communication with Spanish-speaking parents. This course can be repeated.

SPAN 5391. CONFERENCE COURSE IN SPANISH LINGUISTICS AND LITERATURE. 3 Hours.
Graded R.

SPAN 5393. GRADUATE SPANISH INTERNSHIP. 3 Hours.
Graduate internship with the student performing duties within the field of Spanish. A combination of field-related experience at the graduate level with an academic component. Students are required to submit an approved academic project related to the work performed. May be repeated with approval of Graduate Advisor.

SPAN 5398. THESIS. 3 Hours.
SPAN 5698. THESIS. 6 Hours.
SPAN 5998. THESIS. 9 Hours.
Modern Languages - Graduate Program

Objectives

Graduate programs in modern languages are designed to enhance students' competence in the language and literature of their major language field. Specific objectives are to prepare students for a career in teaching or in any area in private or public life in which knowledge of a modern language is essential and to help them develop the techniques of independent research necessary for work beyond the master's level.

Fellowships

Fellowships, when available, will be awarded on a competitive basis. Nominees for the Graduate School Master's Fellowship in Modern Languages will be selected based on the following criteria:

- Candidates must be new students entering in the fall semester, with a minimum of 6 hours of enrollment in both long semesters to retain their fellowships.
- The minimum undergraduate GPA requirement is 3.0, as calculated by the Graduate School, plus 1.0 for any graduate credit hours.
- Transcript of a completed bachelor's degree in French or Spanish (or appropriate related field) from an accredited institution.
- Three letters of recommendation.
- A written statement explaining the applicant's reasons for graduate study in Spanish.

Teaching Assistantships

Teaching assistantships are available for graduate students in the Department of Modern Languages. Graduate students who obtain teaching assistantships are urged to take MODL 5305.

Admission Standards

In compliance with HB 1641, the UT Arlington Department of Modern Languages does not use unwritten criteria, it does not assign a specific weight to any one factor being considered, and it does not use standardized tests (i.e., the GRE) in the admissions or competitive fellowship or scholarship process as the sole criterion for consideration or as the primary criterion to end consideration of an applicant to the M.A. program. However, the GRE is required and it is used as a criterion, without specific weight, in the Department's evaluation of candidates for admission to programs at each of three levels: Unconditional, Provisional, and Probationary Admission.

The Department wishes to be as thorough and fair as possible in evaluating applicants for admission. It recognizes that some applicants may appear to be stronger according to some criteria than according to other criteria. When an applicant does not completely meet the minimum expectations for Unconditional Admission, the Department considers the applicant for possible Provisional or Probationary Admission. When the applicant is not granted any of the three levels of admission, the decision may be deferred or the application is denied. We do not wish to exclude a qualified and potentially successful candidate who perhaps has approached but not met all the criteria completely. However, we do not wish to admit candidates who, based on the criteria, are deemed to have a poor chance of successfully completing the graduate program.

Unconditional Admission

The criteria for admission below are used, without specific weights, as positive indicators of potential success in the program. All four criteria for unconditional admission must be met in order to receive unconditional admission.

- degree in the language to be studied of 18 upper level hours in the language or equivalent
- 3.0 undergraduate GPA (last 60 hours)
- submission of GRE scores
- 3 letters of recommendation (from faculty if possible) sent to the Department of Modern Languages Graduate Advisor.

1 A student with a bachelor's degree in a field other than French or Spanish may become an unconditionally admitted graduate student after fulfilling the upper level requirements in the language:
- 18 hours of upper level Spanish, or French or
- a combination of coursework and testing.

(A person with a bachelor's degree in a major other than French or Spanish must have the equivalent of 18 hours of upper level French or Spanish in order to become a master's student. The equivalency may take one of the following forms: A student may obtain 18 hours at the 3000 and 4000 level, or s/he may attempt to test out of nine hours of grammar, composition, and conversation. If a student tests out of grammar, composition, and conversation, s/he must take nine hours of literature, in order to demonstrate ability to do literary studies).

2 Under specific circumstances the GRE may be waived for those who received their B.A. from UT Arlington or have already earned an advanced graduate degree. See GRE Waiver or Advanced Admission. International students must also take the TOEFL test and score 550 on the paper-and-pencil test or 213 on the computerized test, in order to qualify for unconditional admission.
**Provisional Admission**

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

**Deferred Admission**

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

**Fast Track Program in Modern Languages**

The Fast Track Program allows outstanding undergraduate students in French or Spanish at UT Arlington to take up to three graduate seminars in Spanish or French that will earn credit toward both the Bachelor's degree and the Master's degree in Modern Languages. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the M.A.. Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's degree. To qualify, students must have completed at least 30 hours at UTA with a GPA of 3.0 in all courses and 3.25 in the last 30 hours. Before entering the Fast Track, students must also have completed the required core courses in the French or Spanish major with a GPA of at least 3.50. Additionally, they must have already completed at least two additional 3000/4000-level courses in either French or Spanish, excluding International Business, interpreting, and/ or translation courses, with a GPA of 3.5 or higher.

Students who successfully complete the Fast Track Program will be admitted automatically to the Graduate School to continue their graduate work in the Modern Languages M.A. Program once the Bachelor's degree is awarded. They will not be required to take the GRE, complete an additional application for admission to the Graduate School, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Modern Languages M.A. Program with only nine additional courses and a comprehensive written examination remaining to complete the requirements for the M.A. in Modern Languages, non-thesis option.

To remain in the Fast Track Program, students must receive no grade lower than B in any graduate seminars taken as an undergraduate, selected with the advice and approval of the Modern Languages Graduate Advisor. Undergraduate students who do not maintain grades of B or better in the graduate courses taken will be unable to continue in the Fast Track Program but, if the courses are completed with a passing grade, will still receive credit toward their undergraduate degree requirements. Students originally denied entry into the Fast Track Program, discontinued after provisional admission, subsequently dropped or opting out are still welcome to apply to the Modern Languages M.A. Program in the usual way and will be considered without prejudice.

For an application form or to obtain more details about this program, contact the Modern Languages Graduate Advisor.

**Master's Degree Requirements**

Master's Degree Requirements:

In addition to the Graduate School requirements for Master's degree programs, the following exit requirements apply in the Department of Modern Languages:

**Comprehensive Examination**: Students specializing in French or Spanish are examined on their coursework and their respective M.A. reading lists. An additional oral defense may be required at the discretion of the student's supervising committee. At least 30 hours must be in coursework.

**Portfolio**: Students specializing in Spanish may instead elect to develop a portfolio of original research and other special projects under the supervision of a committee of graduate faculty. At least 30 hours must be in coursework.

**Thesis**: Subject to the approval of the graduate faculty, students specializing in French or Spanish may elect to research and write a substantial and original work of scholarly significance. At least 30 hours must be in coursework.

**Modern Languages (French; Spanish)**

Those wishing to major in a modern language or literature must upon admission have a baccalaureate degree with a major in that modern language or have a minimum of 18 advanced hours, or the equivalent in language proficiency and course content.

Students pursuing the M.A. in Modern Languages with concentration in French are required to take a minimum of 9 hours in the core MODL courses, along with 27 hours in their concentration or, alternatively, a maximum of 12 hours in the core MODL courses and 24 hours in their concentration. All French students are required to take MODL 5304 CURRENTS IN EUROPEAN AND LATIN AMERICAN LITERATURES AND THOUGHT.

Students pursuing the M.A. in Modern Languages with concentration in Spanish will take a maximum of 6 hours in the core MODL courses, along with 30 hours in their concentration. All Spanish students are required to take two of the following three courses: SPAN 5300: HISTORY OF THE SPANISH LANGUAGE, SPAN 5302: SPANISH DIALECTOLOGY, SPAN 5303: APPLIED SPANISH LINGUISTICS.

A knowledge of a second foreign language will be required, including listening, speaking, reading and writing skills as demonstrated by the successful completion of two semesters of coursework at the second-year level, MODL 5301, or by an appropriate examination.
Modern Languages - Undergraduate Programs

The Department of Modern Languages (MODL) offers courses in American Sign Language (https://www.uta.edu/modl/asl/), Arabic (http://www.uta.edu/modl/arabic/), Chinese (http://www.uta.edu/modl/chinese/), French (http://www.uta.edu/modl/french/), German (http://www.uta.edu/modl/german/), Korean (https://www.uta.edu/academics/schools-colleges/liberal-arts/departments/modern-languages/academics/undergraduate/korean/), Russian (http://www.uta.edu/modl/russian/), and Spanish (http://www.uta.edu/modl/spanish/).

MODL offers a Bachelor of Arts in French (http://www.uta.edu/modl/french/) Global Studies (http://catalog.uta.edu/liberalarts/languages/undergraduate/ #bachelorstext/#bachelorstext), Spanish for Global Competence (http://www.uta.edu/modl/spanish/), Spanish Translation and Interpreting (http://www.uta.edu/modl/spanish/), Modern Languages, and a Bachelor of Arts with major in Critical Languages and International Studies (http://www.uta.edu/modl/clis/) (Chinese, German, Korean, and Russian), as well as minors in certificate programs in Translation (French (http://catalog.uta.edu/liberalarts/languages/undergraduate/#bachelorstext/#certificatestext)), Translation (Spanish) (http://www.uta.edu/modl/spanish/), Interpreting (Spanish) (http://www.uta.edu/modl/spanish/), Spanish for the Professions (https://www.uta.edu/modl/spanish/), Spanish for Global Health and Human Services (http://catalog.uta.edu/liberalarts/languages/undergraduate/#bachelorstext/#certificatestext), Spanish Linguistics (http://catalog.uta.edu/liberalarts/languages/undergraduate/#bachelorstext/#certificatestext), and Localization and Translation (http://www.uta.edu/modl/spanish/) (Arabic, Chinese, French, German, Korean, Russian, and Spanish). At the graduate level, MODL offers a Master of Arts in Modern Languages with concentrations in French (http://www.uta.edu/modl/french/) or Spanish (http://www.uta.edu/modl/spanish/). The department also offers minors in Arabic, Chinese, French, German, Korean, Russian, Spanish for Global Competence, Spanish Translation, Spanish Interpreting, Spanish Linguistics, and Localization and Translation, as well as area studies and other options.

Learning other languages has always formed a critical part of a well-rounded education. In today's global economy, the ability to communicate in languages other than one's own has become an increasingly valuable asset sought after by employers across the public and private sectors. Our substantive programs prepare students for success in an increasingly interconnected world, in fields such as the language services industry —interpreting, localization, and translation; education; research; writing, publishing, and the media; health, legal, and social services; business; government; international relations; the cultural heritage sector—museums, libraries, and archives.

The goal of language study is to develop deep translingual and transcultural competence. In view of these aims, MODL provides a full range of language offerings from beginning to advanced courses in a variety of world languages. In addition to development in the four basic language skills -- speaking, listening, reading, and writing -- a major aim is to gain understanding of the diversity of human culture as represented in several of the world's languages, literatures, and other cultural media.

Ultimately, these aims contribute to the development of well-rounded and well-informed 21st-century global citizens who are not only able to communicate and interact with others locally, nationally, and internationally, but who are also able to reflect on the world and themselves through the lens of other languages and cultures.

Criteria for Admission to a Major in the Department of Modern Languages

In addition to satisfying the entrance requirements for the College of Liberal Arts, prospective majors in the Department of Modern Languages must meet the following criteria:

- A 3.0 GPA is required in the 1441-2314 Modern Language sequence, or an equivalent score on the Modern Language testing instrument, or approval of the departmental advisor.
- After admission to the Modern Language major, students must maintain a 2.00 GPA in major classes.

Accelerated Language Program

Students with no previous experience or courses in a modern language may choose to begin by enrolling in one of our Accelerated Programs, i.e. completing Levels I and II (8 credit hours) of a language in one semester, or Levels III and IV (6 credit hours) in one semester.

These classes may not be offered every semester. Check with the Department of Modern Languages for available courses.

Students are cautioned to take these courses prior to their senior year because of the possibility of enrollment limitations.

Language Acquisition Center

The Department of Modern Languages maintains a fully equipped computer lab on the third floor of Trimble Hall, the Language Acquisition Center (LAC). The LAC has an extensive collection of analog and digital media for student use, as well as course-related software and self-study software.

PROFICIENCY TESTING, PLACEMENT TESTING, AND Credit by Examination

PROFICIENCY TESTING

The Avant STAMP Exam will be used to test proficiency in Arabic, Chinese, French, German, Korean, Russian, and Spanish. Students with previous exposure to these languages may be eligible to take the Avant STAMP Exam at the discretion of the department. Testing fees may apply.
**PLACEMENT TESTING**

All students with previous experience in American Sign Language, Arabic, Chinese, French, German, Korean, Russian, or Spanish who intend to enroll in respective language courses at UTA must take an Avant Placement Test, unless earned course credits are displayed on their transcripts. Advanced registration for the placement test is required. For more information, contact the Department of Modern Languages. Testing fees apply.

**CREDIT BY EXAMINATION**

The Avant STAMP Exam will be used to grant credit by examination in Arabic, Chinese, French, German, Korean, Russian, and Spanish up to the intermediate level II (2314). Advanced registration for the Avant STAMP is required. For more information, contact the Department of Modern Languages. Testing fees may apply. Students who took the Avant STAMP Exam in high school may be eligible to obtain credits for language courses offered at UTA.

**Credit by Examination Deadlines:**

**Modern Language majors, minors, and certificates – Credit by Exam, Letter Grade Required**

Students admitted to UTA before the fall/spring semesters begin must take the Avant exam before the first day of classes. For late registration, students must take the Avant exam no later than the second day of classes to allow sufficient time for scores to post and to enroll in the appropriate course in the sequence according to major, minor, or certificate program requirements. There are no retakes for the Avant exam.

The credits received through the Avant STAMP Exam will only be applied to UTA transcripts if the following conditions are met: 1) the examinee enrolls in the next appropriate language course in the sequence at UTA and remains enrolled in the course past Census Day, and 2) the administration fee is paid before the last semester prior to graduation. For the Avant Placement Test, students may receive retroactive credits by successfully completing the course they enroll in with a grade of B or better; the credits received will only be applied to UTA transcripts if the administration fee is paid before the last semester prior to graduation.

**Students outside Modern Languages**

Students outside of the department taking the Avant STAMP Exam to fulfill a language requirement must take the exam before the end of their Junior year to allow enough time to take any future courses that may be needed to satisfy a language requirement and/or to have their credits posted in time for graduation application reviews. The Avant STAMP Exam will not be administered to Seniors in their last semester at UTA.

**Credit by Exam (No Letter Grade)**

The credits received through the Avant STAMP Exam will only be applied to UTA transcripts if the administration fee is paid before the last semester prior to graduation.

**Credit by Exam and Letter Grade**

The credits received through the Avant STAMP Exam with a letter grade will only be applied to UTA transcripts if the following conditions are met: 1) the examinee enrolls in the next appropriate language course in the sequence at UTA and remains enrolled in the course past Census Day, and 2) the administration fee is paid before the last semester prior to graduation.

**Other Exams**

Other exams accepted by UTA for credit by examination include the Advanced Placement Examination (AP) of the College Board, the College-Level Examination Program (CLEP) of the College Board, and the International Baccalaureate (IB) Examination. For more information, contact Testing Services (https://www.uta.edu/student-success/resources/testing-services/credit-by-examination/).

**Study Abroad**

Students should give serious consideration to the unique learning experience of studying abroad. Students wishing to study for a summer, a semester, or a year may obtain UT Arlington credit, continue with their financial aid, and receive scholarship aid to attend any UT Arlington-approved program for Arabic, Chinese, French, German, Korean, Russian, or Spanish.

Summer Study: The department offers several opportunities for gaining credit while studying abroad. Regular programs are offered which provide opportunities for summer study in various countries, including China, France, Germany, Mexico, and Russia. All arrangements must be made through the department.

**Competence in Computer Use**

Students majoring in French, Spanish for Global Competence, Spanish Translation and Interpreting, or Critical Languages and International Studies may demonstrate competency in computer use by:

- passing CSE 1301 (or equivalent); or
- passing any 1441, 1442, 2313 or 2314 CHIN, FREN, GERM, KORE, RUSS or SPAN course(s) in residence at UT Arlington; or
- passing the University computer competency examination; or
- passing any other course approved by the Undergraduate Assembly for this purpose.
Competence in Oral Presentations

Students majoring in French, Spanish for Global Competence, Spanish Translation and Interpreting, or Critical Languages and International Studies may demonstrate competence in oral presentations by one of the following:

Critical Cultures Summer Institute

The Critical Cultures Summer Institute (CCSI) highlights a different, less commonly taught cultural area of the globe each summer, providing up to 9 credits of upper-division coursework, along with GLOBAL 2301, the anchor course of UTA’s Critical Languages and International Studies (CLIS) major.

GLOBAL 2301 will provide an introduction to global studies and couple with GLOBAL 3301 and GLOBAL 3302 in such areas as language and civilization, film, media, or other subjects of global study. An introductory class in Localization and Translation will also be offered under the aegis of the Summer Institute as GLOBAL 3310. GLOBAL 3301, 3302, and 3310 will fulfill three of the four international studies courses required for the BA in Critical Languages and International Studies. GLOBAL 2301 is also a requirement for the degree. GLOBAL 2301 and GLOBAL 3301 will be offered during Summer Session I, and GLOBAL 3302 and 3310 will be offered during Summer Session II. Students at any level of language study may take these courses.

Requirements for a Bachelor of Arts Degree in French Global Studies, Spanish for Global Competence, Spanish Translation and Interpreting, Critical Languages & International Studies, and Modern Languages

General Core Requirements (P. 47)

Student Success Requirement: UNIV 1101 or UNIV 1131

Major

GLOBAL 2301

1441, 1442, 2313, 2314, or equivalent; plus 27 hours at 3000/4000 level in the major language field, at least nine of which must be at the 4000 level. Of these 27 hours, specific course requirements by language are listed below.

Electives

Sufficient number of hours to complete the total hours required for a degree.

Total

120 hours, at least 36 of which must be 3000/4000 level.

Bachelor of Arts in French Global Studies

or

SPAN 2315  INTERM SPAN HERITAGE SPEAKERS

or equivalent; plus 27 hours at 3000/4000 level in Spanish, at least nine of which must be at the 4000 level. Of these 27 hours, specific course requirements by language are listed below:

All Spanish majors must take SPAN 3315 and SPAN 3316

• For Non-heritage speakers: SPAN 3314
• For Native or Heritage speakers: SPAN 3305. Native or heritage speakers of a language may not enroll in courses below 3000, with the exception of SPAN 2315.

BACHELOR OF ARTS IN CRITICAL LANGUAGES AND INTERNATIONAL STUDIES

GLOBAL 2301 as well as 15 advanced hours in the chosen language and 12 hours in international studies from the 3 categories: International Issues (Business, Ethics, and Sustainability), Humanities (Culture, History, and Literature), Socio-Cultural Perspectives (Social, Political, and Cultural Studies). See advisor for a complete listing of relevant courses.

All students who wish to earn a Bachelor of Arts degree in Critical Languages and International Studies must complete the following coursework in language and allied fields:

Select one of the following languages:

**Chinese**

CHIN 1441  BEGINNING CHINESE I
CHIN 1442  BEGINNING CHINESE II
CHIN 2313  INTERMEDIATE CHINESE I
CHIN 2314  INTERMEDIATE CHINESE II

**German**

GERM 1441  BEGINNING GERMAN I
GERM 1442  BEGINNING GERMAN II
GERM 2313  INTERMEDIATE GERMAN I
GERM 2314  INTERMEDIATE GERMAN II

**Korean**

KORE 1441  BEGINNING KOREAN I
KORE 1442  BEGINNING KOREAN II
KORE 2313  INTERMEDIATE KOREAN I
KORE 2314  INTERMEDIATE KOREAN II

**Russian**

RUSS 1441  BEGINNING RUSSIAN I
RUSS 1442  BEGINNING RUSSIAN II
RUSS 2313  INTERMEDIATE RUSSIAN I
RUSS 2314  INTERMEDIATE RUSSIAN II

Students in **German** can choose between two different tracks:
Track A (Global):

Course Requirements:

- Five 3000 or 4000 level courses in German including GERM 3313 and GERM 3316
- Four 3000 or 4000 level courses in International Studies (see above)

Track B (Professional Track):

Course Requirements:

- Five 3000 or 4000 level courses in German: GERM 3312, GERM 3313, GERM 3316, GERM 3318, GERM 4322
- Four 3000 or 4000 level courses in International Studies in the Humanities category: GERM 3317, GERM 4313, GERM 4314, GERM 4321

Bachelor of Arts in Spanish Translation and Interpreting

All Spanish Translation and Interpreting majors must take:

<table>
<thead>
<tr>
<th>Course</th>

Two upper-level MODL courses at the 4000 level and one upper-level SPAN course at the 4000 level.

**Options**

The following options may be selected, but courses listed under options do not substitute for courses specified by number in the basic degree plan above.

**Fast Track Program in Modern Languages**

The Fast Track Program allows outstanding undergraduate students in French or Spanish at UT Arlington to take up to three graduate seminars in Spanish or French that will earn credit toward both the Bachelor's degree and the Master's degree in Modern Languages. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA. Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's degree. To qualify, students must have completed at least 30 hours at UTA with a GPA of 3.0 in all courses and 3.25 in the last 30 hours. Before entering the Fast Track, students must also have completed the four required core courses in the French or Spanish major with a GPA of at least 3.50. Additionally, they must have already completed at least two additional 3000-4000 level courses in either French or Spanish, excluding International Business and/or translation courses, with a GPA of 3.5 or higher.

Students who successfully complete the Fast Track Program will be admitted automatically to the Graduate School to continue their graduate work in the Modern Languages MA Program once the Bachelor's degree is awarded. They will not be required to take the GRE, complete an additional application for admission to the Graduate School, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Modern Languages MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option.

To remain in the Fast Track Program, students must receive no grade lower than a B in any graduate seminars taken as an undergraduate, selected with the advice and approval of the Modern Languages Graduate Advisor. Undergraduate students who do not maintain grades of B or A in the graduate courses taken will be unable to continue in the Fast Track Program but, if the courses are completed passing, will still receive credit toward their undergraduate degree requirements. Students originally denied entry into the Fast Track Program, discontinued after provisional admission, subsequently dropped or opting out are still welcome to apply to the Modern Languages MA Program in the usual way and will be considered without prejudice.

For an application form or to obtain more details about this program, contact the Modern Languages Graduate Advisor.
BBA in International Business/Modern Language

In cooperation with the Department of Modern Languages, the School of Business Administration offers a Bachelor of Business Administration with dual concentrations in international business and a modern language. The BBA in International Business offers concentrations in Chinese, French, German, Korean, Russian, or Spanish. In addition to 26 hours in a modern language with an additional six hours of modern language electives highly recommended, students in this program get a solid foundation in business courses, including accounting, economics, finance, management, marketing, and information systems. Students are encouraged to include six hours of degree specific language electives.

Requirements for a Minor in Arabic, Chinese, German, Korean, and Russian

A minor consists of 19 semester hours (excluding 1441 Language Level I), at least nine of which must be 3000/4000 level including six credit hours taught in the target language.

Requirements for a Minor in French Global Studies, Spanish for Global Competence, Spanish Translation, and Spanish Interpreting

A minor consists of 19 semester hours (excluding 1441 Language Level I), at least nine of which must be 3000/4000 level.

- For a minor in Spanish Translation students need to take the 3 following courses:
  
  SPAN 3340, SPAN 4341, and SPAN 4342

- For a minor in Spanish Interpreting students need to take the 3 following courses:
  
  SPAN 3341, SPAN 4343, and SPAN 4344

- The following courses do not count towards the Minor in French Global Studies:
  
  FREN 3320, FREN 3321, and FREN 3345

Minor in Spanish for Global Health and Human Services

Students interested in receiving theoretical and practical training in Spanish for Global Health and Human Services are eligible to apply to the Department of Modern Languages for this 18-hour minor, which will prepare them to work with Spanish-speaking clients and in Spanish-language contexts. This minor will train future health care providers to demonstrate linguistic and intercultural competence to be respectful and responsive to the needs, practices, and health beliefs of the diverse Latinx population. Students in this certificate, will understand the need for medical Spanish to improve patient outcomes and reduce health disparities and risks, the importance of medical Spanish in providing safe and appropriate health care, and the critical need to increase the number of Spanish-speaking health care professionals. This program prepares students to understand the differences between the U.S. and Hispanic healthcare systems and beliefs, and comprehend and produce written and oral texts in Spanish in the fields of healthcare and human services.

Required courses:

1. Spanish language and culture courses (9 credits)
   a. Choose one:
      
      SPAN 2300
      SPAN 2310
      SPAN 3312
      SPAN 3316
   
   b. Choose one:
      
      SPAN 2314
      SPAN 2315
   
   c. Choose one:
      
      SPAN 3305
      SPAN 3314

2. Specialized courses in Spanish (6 credits)
   a. Required:
      
      SPAN 3308
   
   b. Choose one:
      
      SPAN 3313*
      SPAN 4313*
Modern Languages - Undergraduate Programs

SPAN 4336
SPAN 4342
SPAN 4343

*These courses fulfill the requirements for the program only when offered with health and/or human services topics.

3. Interdisciplinary course (3 credits)
Students must complete one (1) three-hour interdisciplinary course in the fields of Anthropology, Communication, Disability Studies, Kinesiology, Medical Humanities, Nursing, Philosophy, Political Science, Psychology, or Social Work, etc. See advisor for a complete listing of relevant courses.

Minor in Spanish Linguistics
Requirements for a Minor in Spanish Linguistics:

The Minor in Spanish Linguistics includes foundational courses that provide students with a solid background in the core areas of Spanish linguistics, as well as elective options at the 4000 level that allow students to tailor their program of study to meet their interests and academic and professional goals. Students will learn about modern linguistic theory and the application of those theories to teaching, research, translation and interpreting, as well as other professions in the healthcare, business, and government sectors. The minor consists of 18 semester hours.

For a minor in Spanish Linguistics students need to take the following courses:

Prerequisite courses: SPAN 2313, and SPAN 2314 or SPAN 2315. Upper-division courses: SPAN 3305 or SPAN 3314, SPAN 3316, and any two of the following: SPAN 4316, SPAN 4330, SPAN 4332 or SPAN 4339.

Minor in Mexican Culture

The Minor in Mexican Culture includes foundational courses that provide students with a solid background in the core areas of Mexican culture, as well as elective options at the 4000 level that allow students to tailor their program of study to meet their interests and academic and professional goals. Students will learn about some of the most important characteristics of Mexican culture (literature, comics, film, food, art, music, popular culture, literary journalism, feminism, Colonial documents and texts, the study and conservation of endangered Mexican indigenous languages, etc.), and the relations between cultural production and the society, and the application of that knowledge to teaching, research, translation and interpreting, as well as other professions in the healthcare, business, and government sectors. The minor consists of 18 semester hours.

For a Minor in Mexican Culture students need to take the following courses:

The Mexican Culture Certificate program will consist of the following courses for a total of 18 semester credit hours: Required courses: SPAN 2313, and SPAN 2314 or SPAN 2315. Prescribed Elective Courses: Any 2 of the following courses: SPAN 3304, SPAN 3317, SPAN 3318, SPAN 4317, and SPAN 4318. Elective Courses: Any 2 of the following courses: SPAN 3312, SPAN 3313, SPAN 4313, SPAN 4315, SPAN 4332, and SPAN 4334.

Minor in Localization and Translation with options in Arabic, Chinese, French German, Korean, Russian, Spanish and Dual-Language

Students pursuing the minor in localization and translation study the processes of localization and develop specialized skills in translation for future employment in the language services industry. Localization adapts language, texts, products, software and websites to the locale for which they are intended. By using specialized computer-assisted translation workflow software and simulating a collaborative work environment, students become conversant with the tools and procedures required for twenty-first century localization and translation work. Extensive practice in translating a variety of oral and written documents in the target language provides the skills to work in business, non-profit, and academic contexts. Three required translation and localization courses and two upper-level elective courses comprise the minor. It is strongly recommended that students take ARAB 3310, CHIN 3310, FREN 3320, GERM 3310, KORE 3310, RUSS 3310, or SPAN 3310 prior to taking ARAB 3345, CHIN 3345, FREN 3345, GERM 3345, KORE 3345, RUSS 3345, or SPAN 3345.

The minor consists of the following courses, including ARAB, CHIN, FREN, GERM, KORE, RUSS 2314, SPAN 2314 (or SPAN 2315 for heritage speakers) which must be completed with the grade of B or better.

Arabic Option (18 hours)

- ARAB 2314
- ARAB 3310
- ARAB 3311
- ARAB 3345
- ARAB 3XXX or 4XXX Upper-level Elective
- ARAB 3XXX or 4XXX Upper-level Elective
Chinese Option (18 hours)
- CHIN 2314
- CHIN 3310
- CHIN 3311
- CHIN 3345
- CHIN 3XXX or 4XXX  Upper-level Elective
- CHIN 3XXX or 4XXX  Upper-level Elective

French Option (18 hours)
- FREN 2314
- FREN 3320*
- FREN 3321*
- FREN 3345*
- FREN 3XXX or 4XXX  Upper-level Elective
- FREN 3XXX or 4XXX  Upper-level Elective
*These courses cannot be applied toward the minor in French

German Option (18 hours)
- GERM 2314
- GERM 3310 or GERM 4334
- GERM 3311 or GERM 4335
- GERM 3345
- GERM 3XXX or 4XXX  Upper-level Elective
- GERM 3XXX or 4XXX  Upper-level Elective

Korean Option (18 hours)
- KORE 2314
- KORE 3310
- KORE 3311
- KORE 3345
- KORE 3XXX or 4XXX  Upper-level Elective
- KORE 3XXX or 4XXX  Upper-level Elective

Russian Option (18 hours)
- RUSS 2314
- RUSS 3310 or RUSS 4334
- RUSS 3311 or RUSS 4335
- RUSS 3345
- RUSS 3XXX or 4XXX  Upper-level Elective
- RUSS 3XXX or 4XXX  Upper-level Elective

Spanish Option (18 hours)
- SPAN 2314 or SPAN 2315
- SPAN 3310
- SPAN 3321
- SPAN 3345
- SPAN 3XXX or 4XXX  Upper-level Elective
- SPAN 3XXX or 4XXX  Upper-level Elective

Minor in Localization and Translation with a Dual Language Option (24 hours)
The minor with the dual language option consists of two localization/translation courses and two upper-level language courses in each language, as follows:
One Localization and Translation I Course in Language 1: (3 hours)
- ARAB 3310
- CHIN 3310
- FREN 3320
- GERM 3310 or GERM 4334
- KORE 3310
- RUSS 3310 or RUSS 4334
- SPAN 3310

One Localization and Translation II Course in Language 1: (3 hours)
- ARAB 3311
- CHIN 3311
- FREN 3321
- GERM 3311 or GERM 4335
- KORE 3311
- RUSS 3311 or RUSS 4335
- SPAN 3321

One Introduction to Computer-Assisted Translation Course in Language 2: (3 hours)
- ARAB 3345
- CHIN 3345
- FREN 3345
- GERM 3345
- KORE 3345
- RUSS 3345
- SPAN 3345

One Localization and Translation II Course in Language 2: (3 hours)
- ARAB 3311
- CHIN 3311
- FREN 3321
- GERM 3311 or GERM 4335
- KORE 3311
- RUSS 3311 or RUSS 4335
- SPAN 3321

Four Additional Upper-Level Courses (Two in Each Language) Are Also Required. (12 hours)
- **STUDENTS MAY SELECT FROM:**
  - Arabic (two 3000 or 4000 level courses)
  - Chinese (two 3000 or 4000 level courses)
  - French (two 3000 or 4000 level courses)
  - German (two 3000 or 4000 level courses)
  - Korean (two 3000 or 4000 level courses)
  - Russian (two 3000 or 4000 level courses)
  - Spanish (two 3000 or 4000 level courses)

**Minor in Modern Language Teaching**

The Minor in Modern Language Teaching provides foundational academic and professional preparation for students interested in teaching modern languages, as well as a framework for students wishing to pursue alternative certification after graduation. The program includes language and culture courses at the intermediate and advanced levels, as well as foreign language pedagogy courses. These are complemented by an internship component that provides hands-on training to pre-service teacher candidates.

**Required courses:**
1. Prerequisite Course (3 credits)

Choose one of the following:

ARAB 2314
CHIN 2314
FREN 2314
GERM 2314
KORE 2314
RUSS 2314
SPAN 2314 or SPAN 2315

2. Upper-division language and culture courses (6 credits):

Choose two of the following (in the same language prefix):

ARAB 3303 or ARAB 3304; ARAB 3305; ARAB 3312
CHIN 3303; CHIN 3304; CHIN 3305
FREN 3303; FREN 3304; FREN 3305; FREN 3312
GERM 3312; GERM 3313; GERM 3316; GERM 3318
KORE 3303; KORE 3304; KORE 3305
RUSS 3304; RUSS 3333
SPAN 3303; SPAN 3305 or SPAN 3314; SPAN 3311 or SPAN 3312; SPAN 3315

3. Pedagogy, Methods, or Second Language Acquisition (3 credits):

Choose one of the following:

MODL 4305
MODL 4340
MODL 4339, FREN 4339, GERM 4339, or SPAN 4339

4. EDUC 2302 (3 credits)

5. Internship (3 credits):

Choose one of the following:

ARAB 4393
CHIN 4393
FREN 4393
GERM 4393
KORE 4393
MODL 4393
RUSS 4393
SPAN 4393

Certificate in Spanish Translation

Students interested in receiving theoretical and practical training in Spanish-English and English-Spanish translation are eligible to apply to the Department of Modern Languages for this 12-hour certificate program in translation and translation theory. Topics to be covered by coursework in the Certificate Program include medical, business, technical, scientific, legal, and literary translation. This Certificate Program, which can be paired with a bachelor’s degree in any discipline, provides students multiple career prospects in the language-services industry or in other professional areas requiring advanced use and translation of Spanish such as health, business, education, advertising, criminal justice, media communication, and social services. During enrollment in the program, students have the opportunity to gain professional experience at non-profit organizations through service learning. To be admitted to the program, students must demonstrate writing proficiency in both Spanish and English. Students should also have completed SPAN 3305 or SPAN 3314, or have consent of the department. Once in the program, students begin by taking SPAN 3340 (Introduction to Translation).
After completing this class with a grade of B or better, students must take SPAN 4341 (Business and Legal Translation) and SPAN 4342 (Translation in Healthcare Settings). SPAN 4341 and 4342 cannot be applied toward the B.A. in Spanish for Global Competence. To receive the certificate, students are also required to pass an Exit Examination in translation. In order to be eligible to take the Exit Examination, students must pass SPAN 4341 and 4342 with a grade of C or better. The Exit Examination in translation may only be taken once.

Certificate in Spanish Interpreting

Students interested in receiving theoretical and practical training in Spanish-English and English-Spanish interpreting are eligible to apply to the Department of Modern Languages for this 12-hour certificate program in interpreting. Topics to be covered by coursework in the Certificate Program include interpreting in school, legal and medical settings. This Certificate Program, which can be paired with a bachelor’s degree in any discipline, trains students to maximize their bilingual speaking and listening abilities, and develop their linguistic flexibility to manipulate various language registers to become professional interpreters or effective communicators in multiple career fields such as health, business, education, criminal justice, media communication, social services, immigration, government, and non-profit. During enrollment in the program, students have the opportunity to gain professional experience at non-profit organizations through service learning. To enter the program, students must demonstrate oral proficiency in both Spanish and English. Students should also have completed SPAN 3305 or SPAN 3314. Once in the program, students begin by taking SPAN 3341 (Introduction to Interpreting). After completing this class with a grade of B or better, students must take SPAN 4343 (Interpreting in Medical Settings) and SPAN 4344 (Interpreting in Legal Settings). SPAN 4343 and 4344 cannot be applied toward the B.A. in Spanish to Global Competence. To receive the certificate, students are also required to pass an Exit Examination in interpreting. In order to be eligible to take the Exit Examination, students must pass SPAN 4343 and 4344 with a grade of C or better. The Exit Examination in interpreting may only be taken once.

Certificate in Spanish for the Professions

Students interested in receiving theoretical and practical training in Spanish for the Professions are eligible to apply to the Department of Modern Languages for this 12-hour certificate program, which will prepare them to work with Spanish-speaking individuals and in Spanish-language contexts. Topics to be covered by coursework in the Certificate Program include Spanish for law enforcement, social services, education, medical professions, business, communications; Hispanic culture; and intercultural competence.

Required courses:

- SPAN 3309 Spanish for the Professions
- SPAN 3314 Advanced Spanish Grammar or SPAN 3305 Advanced Spanish for Heritage Speakers
- SPAN 3315 Spanish Composition
- One (1) 4000-level courses from the following:
  - SPAN 4312 Intercultural Competence for Global Communication
  - SPAN 4334 Contemporary Hispanic Culture
  - SPAN 4335 Business Spanish
  - SPAN 4336 Topics in Spanish for the Professions

Certificate in Spanish for Global Health and Human Services

Students interested in receiving theoretical and practical training in Spanish for Global Health and Human Services are eligible to apply to the Department of Modern Languages for this 12-hour certificate program, which will prepare them to work with Spanish-speaking clients and in Spanish-language contexts. This innovative certificate will train future health care providers to demonstrate linguistic and intercultural competence to be respectful and responsive to the needs, practices, and health beliefs of the diverse Latinx population. Students in this certificate, will understand the need for medical Spanish to improve patient outcomes and reduce health disparities and risks, the importance of medical Spanish in providing safe and appropriate health care, and the critical need to increase the number of Spanish-speaking health care professionals. This program prepares students to understand the differences between the U.S. and Hispanic healthcare systems and beliefs, and comprehend and produce written and oral texts in Spanish in the fields of healthcare and human services.

Required courses:

1. Spanish language courses (6 credits)
   a. Choose one:
      - SPAN 2314
      - SPAN 2315
   b. Choose one:
      - SPAN 3305
      - SPAN 3314
2. Specialized courses in Spanish (6 credits)

a. Required:
SPAN 3308

b. Choose one:
SPAN 3309
SPAN 4312
SPAN 4336
SPAN 4342
SPAN 4343
SPAN 3313*
SPAN 4313*

*These courses fulfill the requirements for the program only when offered with health and/or human services topics.

Certificate in Spanish Linguistics

Requirements for a Certificate in Spanish Linguistics

The Spanish Linguistics Certificate program will consist of the following courses for a total of 12 semester credit hours: Prerequisite course: SPAN 2314 or SPAN 2315. Upper-division courses: SPAN 3305 or SPAN 3314, SPAN 3316 and any one of the following Spanish Linguistics courses at the 4000 level: SPAN 4316, SPAN 4330, SPAN 4332 or SPAN 4339.

Certificate in Mexican Culture

The Certificate in Mexican Culture includes foundational courses that provide students with a solid background in the core areas of Mexican culture, as well as elective options at the 4000 level that allow students to tailor their program of study to meet their interests and academic and professional goals. Students will learn about some of the most important characteristics of Mexican culture (literature, comics, film, food, art, music, popular culture, literary journalism, feminism, Colonial documents and texts, the study and conservation of endangered Mexican indigenous languages, etc.), and the relations between cultural production and the society, and the application of that knowledge to teaching, research, translation and interpreting, as well as other professions in the healthcare, business, and government sectors. The certificate consists of 12 semester hours.

Requirements for a Certificate in Mexican Culture

The Mexican Culture Certificate program will consist of the following courses for a total of 12 semester credit hours: Required courses: SPAN 2313, and SPAN 2314 or SPAN 2315. Prescribed Elective Courses: Any two of the following courses: SPAN 3304, SPAN 3317, SPAN 3318, SPAN 4317, and SPAN 4318. Student may also take any of the following courses when offered with a topic related to Mexican culture: SPAN 3313, SPAN 4313, SPAN 4315, SPAN 4332, and SPAN 4334.

Certificate in French Translation

The 15-credit hour Certificate in French Translation meets the increasing demands of local, national, and international organizations for professionals who can address the challenges of modern multicultural societies. The program is designed for students that have an interest in pursuing careers in translation, localization, business, marketing, human resources, health care, law, and linguistics. The certificate gives students conceptual tools and hands-on practice for written translation. The 15-credit hour undergraduate Certificate in French Translation will include: FREN 3320, FREN 4314, FREN 4335, FREN 4341, and FREN 4342. Relevant special topics courses can be substituted with the approval of the advisor in consultation with the Section Head of French. A Certificate in French Translation would be awarded upon successful completion of the program and demonstration of excellence by successfully presenting a Portfolio.

Certificate in Localization and Translation with options in Arabic, Chinese, French, German, Korean, Russian, Spanish, and Dual-Language

In this five-course certificate program students study the processes of localization and develop specialized skills in translation for future employment in the language services industry. Localization adapts language, texts, products, software and websites to the locale for which they are intended. By using specialized computer-assisted translation workflow software and simulating a collaborative work environment, students become conversant with the tools and procedures required for twenty-first century localization and translation work. Extensive practice in translating a variety of oral and written documents in the target language provides the skills to work in business, non-profit, and academic situations.
In order to enter the program, students must receive a grade of B in ARAB 2314, CHIN 2314, FREN 2314, GERM 2314, KORE 2314, RUSS 2314, or SPAN 2314/SPAN 2315. Students wishing to pursue the dual language option must receive a grade of B in level 2314/2315 for both the selected languages.

Three required translation and localization courses (ARAB/CHIN/GERM/KORE/RUSS 3310, 3311, FREN 3320, 3321, SPAN 3310, 3321 and ARAB/CHIN/GERM/KORE/RUSS/SPAN 3345) and two culture courses comprise the certificate. ARAB 3310, CHIN 3310, FREN 3320, GERM 3310, KORE 3310, RUSS 3310, and SPAN 3310 are strongly recommended before taking ARAB 3345, CHIN 3345, FREN 3345, GERM 3345, KORE 3345, RUSS 3345, or SPAN 3345.

- Students in Arabic
  - ARAB 3310, ARAB 3311, and ARAB 3345
  - Two ARAB 3000 or 4000-level courses

- Students in Chinese
  - CHIN 3310, CHIN 3311, and CHIN 3345
  - Two CHIN 3000 or 4000-level courses

- Students in French
  - FREN 3320, FREN 3321, and FREN 3345
  - Two FREN 3000 or 4000-level courses

- Students in German
  - GERM 3310 or GERM 4334, GERM 3311 or GERM 4335, and GERM 3345
  - Two GERM 3000 or 4000-level courses

- Students in Korean
  - KORE 3310 or KORE 4334, KORE 3311 or KORE 4335, and KORE 3345
  - Two KORE 3000 or 4000-level courses

- Students in Russian
  - RUSS 3310 or RUSS 4334, RUSS 3311 or RUSS 4335, and RUSS 3345
  - Two RUSS 3000 or 4000-level courses

- Students in Spanish
  - SPAN 3310, SPAN 3321 and SPAN 3345
  - Two SPAN 3000 or 4000-level courses

Certificate in Localization and Translation Dual Language Option

Students seeking the certificate in localization and translation with a dual language option must take nine courses according to the following plan:

- One beginning course in **language one**:
  - ARAB 3310
  - CHIN 3310
  - FREN 3320
  - GERM 3310 or GERM 4334
  - KORE 3310 or GERM 4334
  - RUSS 3310 or RUSS 4334
  - SPAN 3310

- One advanced course in **each language**:
  - ARAB 3311
  - CHIN 3311
  - FREN 3321
  - GERM 3311 or GERM 4335
  - KORE 3311 or KORE 4335
  - RUSS 3311 or RUSS 4335
  - SPAN 3321
• One Introduction to Computer-Assisted Translation Course in language two:
  • ARAB 3345
  • CHIN 3345
  • FREN 3345
  • GERM 3345
  • KORE 3345
  • RUSS 3345
  • SPAN 3345
• Four additional courses (two in each language) are also required. Students may select from:
  • Arabic (two ARAB 3000 or 4000- level courses)
  • Chinese (two CHIN 3000 or 4000- level courses)
  • French (two FREN 3000 or 4000- level courses)
  • German (two GERM 3000 or 4000- level courses)
  • Korean (two KORE 3000 or 4000- level courses)
  • Russian (two RUSS 3000 or 4000- level courses)
  • Spanish (two SPAN 3000 or 4000- level courses)
• A minimum of two years (four semesters) of beginning and intermediate level language study for each selected language is required for the dual-language certificate program.
• For more information on this option, please see the Modern Language Undergraduate Advisor.
Music

Undergraduate Degrees

- Bachelor of Music (Performance, Theory, or Composition) (http://catalog.uta.edu/liberalarts/music/undergraduate/#bachelorstext/#baperformance)
- Bachelor of Music (Music/Business, Music/Theatre, or Audio Production) (http://catalog.uta.edu/liberalarts/music/undergraduate/#bachelorstext/#babusiness)

Certificate

- Performance Certificate (p. 945)

COURSES

MUSI 0010. STUDIO CLASS. 0 Hours.
Departmental performance classes, master classes, guest artist performances and lectures related to performance specializations. Students enroll concurrently with private lesson in specialization.

MUSI 0101. MARCHING BAND. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0102. WIND SYMPHONY. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0103. SYMPHONIC WINDS. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0104. A CAPPELLA CHOIR. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0105. WOMEN'S CHORUS. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0106. CHAMBER SINGERS. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0108. UNIVERSITY SINGERS. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0109. KEYBOARD ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0110. WOODWIND ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.
MUSI 0111. BRASS CHOIR. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0112. JAZZ ORCHESTRA. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0113. ELECTRIC GUITAR ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0114. PERCUSSION ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0115. MUSICAL THEATRE / OPERA LAB. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director. By audition only.

MUSI 0116. JAZZ ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0117. TROMBONE CHOIR. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0118. MARCHING PERCUSSION. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0119. TRUMPET ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0120. FRENCH HORN ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0121. COLOR GUARD. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0122. JAZZ COMBO. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0123. VOCAL JAZZ. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0124. FLUTE CHOIR. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0125. SAX CHOIR. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0126. CHAMBER MUSIC. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0127. TUBA ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0128. ORCHESTRA. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.
MUSI 0129. EARLY MUSIC PERFORMANCE PRACTICE. 1 Hour.
Study of early music for individual instruments. Topics will vary by semester. May be repeated for credit. Prerequisite: Permission of instructor.

MUSI 0130. SYMPHONIC BAND. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 0131. COMMERCIAL MUSIC ENSEMBLE. 1 Hour.
This course is open to Music Industry Studies students. This ensemble provides practical and artistic experience in ensembles rooted in commercial and popular music styles. Prerequisite: Approval of the ensemble director.

MUSI 0171. ELECTIVE PERFORMANCE. 1 Hour.
For students who desire elective private instruction in strings, woodwinds, brass, keyboard, voice, or percussion. May be repeated eight times for credit.

MUSI 0174. SECONDARY KEYBOARD. 1 Hour.
For music majors whose degree option requires secondary piano, organ, or harpsichord. A jury is required to receive credit. May be repeated for credit. Prerequisite: C or better in MUSI 2181 or faculty approval.

MUSI 0175. SECONDARY VOICE. 1 Hour.
For music majors whose degree option requires secondary voice. A jury is required to receive credit. May be repeated for credit.

MUSI 0271. ELECTIVE PERFORMANCE. 2 Hours.
For students who desire elective private instruction in strings, woodwinds, brass, keyboard, voice, or percussion. May be repeated for credit up to eight times.

MUSI 1101. JAZZ LISTENING. 1 Hour.
Jazz listening from a historical perspective. Students will develop intelligent listening habits with regard to genres and their innovators. Open to all students; required of jazz studies majors. May be repeated for credit as topic changes.

MUSI 1103. HIGH BRASS CLASS. 1 Hour. (TCCN = MUSI 1168)
Open to music majors only. Emphasis on pedagogical techniques for teaching the trumpet and French horn. Lectures and playing opportunities will provide information concerning the teaching of embouchure, tonguing, tonal and technical development to beginning students.

MUSI 1104. WOODWIND CLASS I. 1 Hour. (TCCN = MUSI 1166)
Open to music majors only. Emphasis on pedagogical techniques for teaching the clarinet and flute. Lectures and playing opportunities will provide information concerning the teaching of embouchure, tonguing, tonal and technical development to beginning students.

MUSI 1105. VOICE CLASS. 1 Hour. (TCCN = MUSI 1183)
Open to music majors only. A practical study of the physiology of the voice with emphasis on vocal technique, sound production, the changing voice, and limited repertoire.

MUSI 1106. LOW BRASS CLASS. 1 Hour.
Open to music majors only. Emphasis on pedagogical techniques for teaching the trombone and euphonium/tuba. Lectures and playing opportunities will provide information concerning the teaching of embouchure, tonguing, tonal and technical development to beginning students.

MUSI 1107. WOODWIND CLASS II. 1 Hour.
Open to music majors only. Emphasis on pedagogical techniques for teaching the saxophone, oboe and bassoon. Lectures and playing opportunities will provide information concerning the teaching of embouchure, tonguing, tonal and technical development to beginning students.

MUSI 1140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 1140 and THEA 1140; credit will be granted only in one department. Prerequisite: Open to Musical Theatre majors only or by permission of the Department Chair.

MUSI 1141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 1141 and THEA 1141; credit will be granted only in one department. Prerequisite: C or better in MUSI 1140 or THEA 1140. Open to Musical Theatre majors only or by permission of the Department Chair.

MUSI 1142. PRIVATE LESSONS IN PIANO. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano.

MUSI 1143. PRIVATE LESSONS IN PIANO. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 1142.

MUSI 1144. PRIVATE LESSONS IN DOUBLE BASS. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is bass.

MUSI 1145. PRIVATE LESSONS IN DOUBLE BASS. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is bass. Prerequisite: C or better in MUSI 1144.
MUSI 1146. PRIVATE LESSONS IN JAZZ BASS. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is bass.

MUSI 1147. PRIVATE LESSONS IN JAZZ BASS. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is bass. Prerequisite: C or better in MUSI 1146.

MUSI 1154. PRIVATE LESSONS IN JAZZ PIANO. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano.

MUSI 1155. PRIVATE LESSONS IN JAZZ PIANO. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 1154.

MUSI 1180. FUNCTIONAL PIANO I. 1 Hour. (TCCN = MUSI 1181)
Required of and limited to music majors who are not piano majors or concentrates. The aim is to develop keyboard skills necessary to use the piano as a tool in teaching, composing, improvising, and performing.

MUSI 1181. FUNCTIONAL PIANO II. 1 Hour. (TCCN = MUSI 1182)
Required of and limited to music majors who are not piano majors or concentrates. The aim is to develop keyboard skills necessary to use the piano as a tool in teaching, composing, improvising, and performing. Prerequisite: C or better in MUSI 1180.

MUSI 1185. SIGHTSING AND EAR TRAINING I. 1 Hour. (TCCN = MUSI 1116)
This sequence of courses is required of music majors. Develops skills in aural skills and melodic sight-singing.

MUSI 1186. SIGHTSING AND EAR TRAINING II. 1 Hour. (TCCN = MUSI 1117)
This sequence of courses is required of music majors. Develops skills in aural skills and melodic sight-singing. Prerequisite: C or better in MUSI 1185 and MUSI 1325.

MUSI 1236. PRIVATE LESSONS IN JAZZ GUITAR. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz guitar.

MUSI 1237. PRIVATE LESSONS IN JAZZ GUITAR. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz guitar. Prerequisite: C or better in MUSI 1236.

MUSI 1238. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset.

MUSI 1239. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset. Prerequisite: C or better in MUSI 1238.

MUSI 1240. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice.

MUSI 1241. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice.

MUSI 1242. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano.

MUSI 1243. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Prerequisite: C or better in MUSI 1242.

MUSI 1244. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings.

MUSI 1245. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 1244.

MUSI 1246. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds.

MUSI 1247. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds.

MUSI 1248. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass.

MUSI 1249. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 1248.

MUSI 1250. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion.

MUSI 1251. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 1250.
MUSI 1252. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass.

MUSI 1253. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Prerequisite: C or better in MUSI 1252.

MUSI 1254. PRIVATE LESSONS FOR B.A. STUDENTS. 2 Hours.
Students complete four semesters of these lessons within one of the following 3 tracks: Commercial, Jazz, or Classical. These courses are open to non-music majors only with written permission of the Music Department Chair. Prerequisite: C or better in MUSI 1301.

MUSI 1255. PRIVATE LESSONS FOR B.A. STUDENTS. 2 Hours.
Students complete four semesters of these lessons within one of the following 3 tracks: Commercial, Jazz, or Classical. These courses are open to non-music majors only with written permission of the Music Department Chair. Prerequisite: C or better in MUSI 1254.

MUSI 1257. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ.

MUSI 1258. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 1257.

MUSI 1267. PRIVATE LESSONS FOR B.A. STUDENTS. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord.

MUSI 1268. PRIVATE LESSONS FOR HARPSICHORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 1267.

MUSI 1300. MUSIC APPRECIATION. 3 Hours. (TCCN = MUSI 1306)
Course designed to develop intelligent listening and enjoyment of music. Provides an opportunity to increase the student's cultural experience and vocabulary. This course satisfies the University of Texas at Arlington's core curriculum requirement in Creative Arts.

MUSI 1301. ELEMENTS OF MUSIC. 3 Hours. (TCCN = MUSI 1303)
Basic musical notation, harmony, and theory for students who are pursuing the BFA in Musical Theatre and the non-music major.

MUSI 1302. JAZZ APPRECIATION. 3 Hours.
The development of American jazz from its African and European roots to the present. This course satisfies the University of Texas at Arlington Core Curriculum requirement in Creative Arts.

MUSI 1303. HISTORY AND APPRECIATION OF HIP HOP AND R&B MUSIC. 3 Hours.
Explores the history and evolution of Hip Hop and modern urban music, emphasizing musical style and social context, from rhythm and blues through the present. Offered as AAST 2303 and MUSI 1303; credit will be granted in only one department.

MUSI 1304. HISTORY OF ROCK MUSIC. 3 Hours.
Open to all students as fine arts elective. Explores the history and evolution of rock music emphasizing musical style and social context, from rhythm and blues through the present. This course satisfies the University of Texas at Arlington core curriculum requirement in creative arts.

MUSI 1324. EXPLORATIONS IN MUSIC THEORY. 3 Hours.
A study of music skills necessary for the Music Industry Studies and Music Theatre majors involving written and analytical perspectives. Prerequisite: C or better in MUSI 1301.

MUSI 1325. THEORY AND HARMONY I. 3 Hours. (TCCN = MUSI 1311)
Scales, intervals, triads, and part writing with primary triads. Prerequisite: For B.A. Music Industry students, C or better in MUSI 1301; For all other degrees, open to music majors or faculty approval.

MUSI 1326. THEORY AND HARMONY II. 3 Hours. (TCCN = MUSI 1312)
Part writing including all diatonic triads, seventh chords, and traditional non-chord tones. Prerequisite: C or better in MUSI 1325.

MUSI 2101. BRASS SURVEY. 1 Hour.
Open to music majors in the All-level Instrumental Option (orchestra emphasis) and All-level Choral Option only. Emphasis on pedagogical techniques for teaching brass instruments. Lectures and playing opportunities will provide information concerning the teaching of embouchure, tonguing, tonal and technical development to beginning students.

MUSI 2102. WOODWIND SURVEY. 1 Hour.
Open to music majors in the All-level Instrumental Option (orchestra emphasis) and All-level Choral Option only. Emphasis on pedagogical techniques for teaching woodwind instruments. Lectures and playing opportunities will provide information concerning the teaching of embouchure, tonguing, tonal and technical development to beginning students.

MUSI 2103. STRING CLASS. 1 Hour. (TCCN = MUSI 1190)
Open to music majors only. A practical study of the string instruments of the orchestra with emphasis on bowing techniques, articulation, performance of scales, and limited repertoire.

MUSI 2104. PERCUSSION CLASS. 1 Hour. (TCCN = MUSI 1188)
(MUSI 1188). Open to music majors only. A practical study of the percussion instruments of the band and orchestra with emphasis on rudimental techniques and performance of limited repertoire.
MUSI 2112. INTRODUCTION TO MUSIC EDUCATION. 1 Hour.
Comprehensive survey of instrumental, choral and elementary music through lecture and research pertaining to professional responsibilities and career opportunities.

MUSI 2140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 2140 and THEA 2140; credit will be granted only in one department. Prerequisite: C or better in MUSI 1141 or THEA 1141. Open to Musical Theatre majors only or by permission of the Department Chair.

MUSI 2141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 2141 and THEA 2141; credit will be granted only in one department. Prerequisite: C or better in MUSI 2140 or THEA 2140. Open to Musical Theatre majors only or by permission of the Department Chair.

MUSI 2142. PRIVATE LESSONS IN PIANO. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 1143.

MUSI 2143. PRIVATE LESSONS IN PIANO. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 2142.

MUSI 2144. PRIVATE LESSONS IN DOUBLE BASS. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is bass. Prerequisite: C or better in MUSI 1145.

MUSI 2145. PRIVATE LESSONS IN DOUBLE BASS. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is bass. Prerequisite: C or better in MUSI 2144.

MUSI 2146. PRIVATE LESSONS IN JAZZ BASS. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is bass. Prerequisite: C or better in MUSI 1147.

MUSI 2147. PRIVATE LESSONS IN JAZZ BASS. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is bass. Prerequisite: C or better in MUSI 2146.

MUSI 2154. PRIVATE LESSONS IN JAZZ PIANO. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 1155.

MUSI 2155. PRIVATE LESSONS IN JAZZ PIANO. 1 Hour.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 2154.

MUSI 2180. FUNCTIONAL PIANO III. 1 Hour. (TCCN = MUSI 2181)
Required of and limited to music majors who are not piano majors or concentrates. The aim is to develop keyboard skills necessary to use the piano as a tool in teaching, composing, improvising, and performing. Prerequisite: C or better in MUSI 1181.

MUSI 2181. FUNCTIONAL PIANO IV. 1 Hour. (TCCN = MUSI 2182)
Required of and limited to music majors who are not piano majors or concentrates. The aim is to develop keyboard skills necessary to use the piano as a tool in teaching, composing, improvising, and performing. Prerequisite: C or better in MUSI 2180.

MUSI 2185. SIGHTSING AND EAR TRAINING III. 1 Hour. (TCCN = MUSI 2116)
This sequence of courses is required of music majors. Develops skills in aural skills and melodic sight-singing. Prerequisite: C or better in MUSI 1186 and MUSI 1326.

MUSI 2186. SIGHTSING AND EAR TRAINING IV. 1 Hour. (TCCN = MUSI 2117)
This sequence of courses is required of music majors. Develops skills in aural skills and melodic sight-singing. Prerequisite: C or better in MUSI 2185 and MUSI 2325.

MUSI 2190. BODY AND BREATHING FOR FITNESS. 1 Hour.
Course designed to improve a singer's total body engagement in producing a healthy vocal tone. Prerequisite: Requires concurrent enrollment in voice lessons or permission of instructor.

MUSI 2222. DEVELOPMENTAL PRIVATE LESSONS. 2 Hours.
Continued work in technique and repertoire to meet the requirements of the sophomore barrier.

MUSI 2223. PREPARATORY PRIVATE LESSONS. 2 Hours.
Private instruction on technique and repertoire in preparation for the sophomore proficiency exam. May be repeated up to four times for credit.
MUSI 2227. COMPOSITION TECHNIQUES. 2 Hours.
An introduction to contemporary music designed to acquaint students with composition styles and techniques through written assignments. Required for music majors with emphasis in Composition, Theory, and Music/Media. Prerequisite: C or better in MUSI 2325.

MUSI 2236. PRIVATE LESSONS IN JAZZ GUITAR. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz guitar. Prerequisite: C or better in MUSI 1237.

MUSI 2237. PRIVATE LESSONS IN JAZZ GUITAR. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz guitar. Prerequisite: C or better in MUSI 2236.

MUSI 2238. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset. Prerequisite: C or better in MUSI 1239.

MUSI 2239. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset. Prerequisite: C or better in MUSI 2238.

MUSI 2240. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice. Prerequisite: C or better in MUSI 1241.

MUSI 2241. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice. Prerequisite: C or better in MUSI 2240.

MUSI 2242. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Prerequisite: C or better in MUSI 1243.

MUSI 2243. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Prerequisite: C or better in MUSI 2242.

MUSI 2244. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 1245.

MUSI 2245. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 2244.

MUSI 2246. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Prerequisite: C or better in MUSI 1247.

MUSI 2247. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Prerequisite: C or better in MUSI 2246.

MUSI 2248. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 1249.

MUSI 2249. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 2248.

MUSI 2250. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 1251.

MUSI 2251. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 2250.

MUSI 2252. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Prerequisite: C or better in MUSI 1253.

MUSI 2253. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Prerequisite: C or better in MUSI 2252.

MUSI 2254. PRIVATE LESSONS FOR B.A. STUDENTS. 2 Hours.
Students complete four semesters of these lessons within one of the following 3 tracks: Commercial, Jazz, or Classical. These courses are open to non-music majors only with written permission of the Music Department Chair. Prerequisite: C or better in MUSI 1255.

MUSI 2255. PRIVATE LESSONS FOR B.A. STUDENTS. 2 Hours.
Students complete four semesters of these lessons within one of the following 3 tracks: Commercial, Jazz, or Classical. These courses are open to non-music majors only with written permission of the Music Department Chair. Prerequisite: C or better in MUSI 2254.

MUSI 2257. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 1258.

MUSI 2258. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 2257.

MUSI 2267. PRIVATE LESSONS IN HARPSCICHORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 1268.

MUSI 2268. PRIVATE LESSONS IN HARPSCICHORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 2267.
MUSI 2300. INTRODUCTION TO WORLD MUSIC. 3 Hours.
The music of Asia, Africa, and Oceania and the native traditions of the Americas; the role of music in the world’s societies and non-Western music systems. This course satisfies the University of Texas at Arlington Core Curriculum Requirement in Creative Arts.

MUSI 2301. APPRECIATION OF MUSIC IN FILM. 3 Hours.
A study of the history, compositional styles and impact of music in films during the 20th century. This course satisfies the University of Texas at Arlington Core Curriculum requirement in Creative Arts.

MUSI 2302. MUSIC LITERATURE. 3 Hours. (TCCN = MUSI 1307)
An introduction to music literature of various style periods with an emphasis on reading orchestral scores.

MUSI 2325. THEORY AND HARMONY III. 3 Hours. (TCCN = MUSI 2311)
Modulation, chromatic part writing, and harmonic analysis. Prerequisite: C or better in MUSI 1326.

MUSI 2326. THEORY AND HARMONY IV. 3 Hours. (TCCN = MUSI 2312)
Harmonic, linear, and formal analysis of 19th- and 20th-century compositional techniques. Prerequisite: C or better in MUSI 2325.

MUSI 3101. ITALIAN AND FRENCH DICTION. 1 Hour.
A guide to correct pronunciation of Italian and French in vocal music.

MUSI 3103. VOCAL PEDAGOGY. 1 Hour.
A basic survey of the science of voice culture and the skills and knowledge needed to teach healthy, effective vocal production in school and/or private studio. Prerequisite: C or better in MUSI 2241.

MUSI 3104. VOCAL COACHING. 1 Hour.
Advanced instruction in diction, interpretation, and style for singers and collaborative instrumentalists. This course is designed as a supplement to applied lessons for advanced students. Permission of instructor required.

MUSI 3125. JAZZ THEORY & KEYBOARD FUNDAMENTALS I. 1 Hour.
Basic-to-intermediate jazz concepts including modes, harmony, chord progressions, and their keyboard applications. Prerequisite: C or better in MUSI 1325 (B.M. Music majors), MUSI 1324 (B.A. Music majors), or faculty approval, and C or better in MUSI 1180 or passing grade on basic piano proficiency exam.

MUSI 3126. JAZZ THEORY & KEYBOARD FUNDAMENTALS II. 1 Hour.
Intermediate-to-advanced jazz concepts including modes, harmony, chord progressions, and their keyboard applications. Prerequisite: C or better in MUSI 3125 or faculty approval.

MUSI 3127. COMPUTER COMPOSITION I. 1 Hour.
Course designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: C or better in MUSI 1326 and MUSI 3394.

MUSI 3128. COMPUTER COMPOSITION II. 1 Hour.
Course designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: C or better in MUSI 3127.

MUSI 3140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 3140 and THEA 3140; credit will be granted only in one department. Prerequisite: C or better in MUSI 2141 or THEA 2141. Open to Musical Theatre majors only or by permission of the Department Chair.

MUSI 3141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 3141 and THEA 3141; credit will be granted only in one department. Prerequisite: C or better in MUSI 3140 or THEA 3140. Open to Musical Theatre majors only or by permission of the Department Chair.

MUSI 3191. SECONDARY LESSONS IN STRINGS. 1 Hour.
Open only to music majors in the All-Level Instrumental (Orchestra Emphasis) Program. Applied instruction in the fundamentals and techniques specific to string instruments. Taken twice; may not repeat study in any one instrument.

MUSI 3200. MARCHING BAND TECHNIQUES. 2 Hours.
Open to music majors only. A detailed study of the theory and history of marching band presentations.

MUSI 3211. EARLY CHILDHOOD MUSIC. 2 Hours.
Musical characteristics of children, folksong and composed literature, performance activities, song analysis, and techniques for reading and writing music. Open to music majors only. Prerequisite: C or better in MUSI 2186, MUSI 2326, and MUSI 3316.

MUSI 3212. JAZZ TECHNIQUES. 2 Hours.
A study of jazz techniques as they apply to solo and ensemble performance.

MUSI 3213. INSTRUMENTAL MATERIALS AND TECHNIQUES I. 2 Hours.
A study of literature, music selection, rehearsal planning, sound production, and performance practices for beginning and intermediate instrumental ensembles. Prerequisite: C or better in MUSI 4211.
Music

MUSI 3214. CHORAL MATERIALS AND TECHNIQUES I. 2 Hours.
A study of literature, music selection, rehearsal planning, vocal production, and performance practices for beginning and intermediate choral ensembles. Prerequisite: C or better in MUSI 4211 and MUSI 4309.

MUSI 3225. JAZZ IMPROVISATION I. 2 Hours.
The melodic and harmonic foundations of contemporary jazz solo performance. May be repeated for credit as topics change. Prerequisite: C or better in MUSI 3125 or approval of instructor.

MUSI 3226. JAZZ IMPROVISATION II. 2 Hours.
A continuation of Jazz Improvisation I. This course explores advanced techniques of contemporary jazz solo performance. Prerequisite: C or better in MUSI 3225 and MUSI 3126 or faculty approval.

MUSI 3236. PRIVATE LESSONS IN JAZZ GUITAR. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz guitar. Prerequisite: C or better in MUSI 2237 and passing grade on the Sophomore Proficiency exam.

MUSI 3237. PRIVATE LESSONS IN JAZZ GUITAR. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz guitar. Prerequisite: C or better in MUSI 3236.

MUSI 3238. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset. Prerequisite: C or better in MUSI 2239 and passing grade on Sophomore Proficiency exam.

MUSI 3239. APPLIED INSTRUCTION ON A SECONDARY INSTRUMENT. 2 Hours.
Open to music majors only. Applied instruction that covers the fundamentals and techniques specific to a secondary instrument.

MUSI 3240. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice. Prerequisite: C or better in MUSI 2241 and Passing Grade on Sophomore Proficiency Exam.

MUSI 3241. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice. Prerequisite: C or better in MUSI 3240.

MUSI 3242. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Prerequisite: C or better in MUSI 2243 and Passing Grade on Sophomore Proficiency Exam.

MUSI 3243. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Prerequisite: C or better in MUSI 3242.

MUSI 3244. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 2245 and Passing Grade on Sophomore Proficiency Exam.

MUSI 3245. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 3244.

MUSI 3246. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Prerequisite: C or better in MUSI 2247 and Passing Grade on Sophomore Proficiency Exam.

MUSI 3247. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Prerequisite: C or better in MUSI 3246.

MUSI 3248. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 2249 and Passing Grade on Sophomore Proficiency Exam.

MUSI 3249. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 3248.

MUSI 3250. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 2251 and passing grade on Sophomore Proficiency Exam.

MUSI 3251. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 3250.

MUSI 3252. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Prerequisite: C or better in MUSI 2253 or MUSI 2145 and MUSI 2147, and passing grade on Sophomore Proficiency Exam.

MUSI 3253. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Prerequisite: C or better in MUSI 3252.
MUSI 3254. PRIVATE LESSONS IN JAZZ PIANO. 2 Hours.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 2143 and MUSI 2155 and passing grade on Sophomore Proficiency Exam.

MUSI 3255. PRIVATE LESSONS IN JAZZ PIANO. 2 Hours.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 3254.

MUSI 3257. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 2258 and passing grade on Sophomore Proficiency Exam.

MUSI 3258. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 3258.

MUSI 3259. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset. Prerequisite: C or better in MUSI 3258.

MUSI 3267. PRIVATE LESSONS IN HARPSICHORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 2268 and passing grade on Sophomore Proficiency Exam.

MUSI 3268. PRIVATE LESSONS IN HARPSICHORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 3267.

MUSI 3294. APPLIED PEDAGOGY. 2 Hours.
A study of teaching techniques as they apply to studio or class instruction in applied music. Specific areas of study will change from semester to semester. May be repeated for credit. Prerequisite: Faculty approval.

MUSI 3295. PIANO PEDAGOGY. 2 Hours.
Open to music majors only. Teaching methods of beginning level private and class instruction. Prerequisite: Faculty approval.

MUSI 3300. MUSIC HISTORY I. 3 Hours.
The music of western civilization from ancient times to 1750. Prerequisite: C or better in MUSI 2326 or faculty approval.

MUSI 3301. MUSIC HISTORY II. 3 Hours.
The music of western civilization from 1750 to the present. Prerequisite: C or better in MUSI 2326 or faculty approval.

MUSI 3302. FORM AND ANALYSIS. 3 Hours.
Structure and analysis of the major forms of music literature. Prerequisite: C or better in MUSI 2326 and a passing grade on the Music Theory Proficiency Exam.

MUSI 3303. COUNTERPOINT. 3 Hours.
Overview of modal counterpoint; detailed study of harmonic counterpoint including canon, invention, and fugue. Prerequisite: C or better in MUSI 2326 and a passing grade on the Music Theory Proficiency Exam.

MUSI 3305. MUSIC FOR CHILDREN. 3 Hours.
A study of musical activities and the role of music in childhood. Includes music fundamentals, folk song literature, and musical characteristics of children. Cannot be counted toward a Bachelor of Music Degree.

MUSI 3308. INSTRUMENTAL CONDUCTING I. 3 Hours.
A practical study of basic instrumental conducting and score reading techniques. Open to music majors only. Prerequisites: C or better in MUSI 2186, MUSI 2326 and successful completion of the second semester lessons or above.

MUSI 3309. CHORAL CONDUCTING I. 3 Hours.
A practical study of the technical and expressive skills required of choral conductors, as well as the development of score study techniques and error detection skills necessary to successfully conduct choral ensembles. Open to music majors only. Prerequisites: C or better in MUSI 2186, MUSI 2326 and successful completion of the Sophomore Proficiency Exam.

MUSI 3316. STRATEGIES AND ASSESSMENT IN MUSIC EDUCATION. 3 Hours.
Open to music education majors only. Current trends in music education will be examined. Topics include effective differentiated instruction, positive classroom management, strategies for working with diverse learners, and examination of major learning theories and principles of cognitive, social, emotional, physical and aesthetic development. This course will also examine a variety of assessment techniques that are used in a music classroom. Assessment tools such as rubrics, rating scales, National Standards, TEKS, STAAR, and TEES will be examined and implemented into lesson planning. Prerequisite: C or better in MUSI 2112.

MUSI 3317. SINGING FOR THE ACTOR. 3 Hours.
An applied study of the vocal apparatus, vocal placement, the voice/body relationship, character, working with text, phrasing, and auditioning as they relate to singing in musical theatre for the Broadway or West End theatre. Emphasis is placed on integrating singing and acting skills. Prerequisites: THEA 1307, THEA 2352 and permission of faculty. Same as offering THEA 3317; may not be repeated and credit will only be granted in one department.
MUSI 3320. MUSIC AND TECHNOLOGY IN GAME AUDIO. 3 Hours.
Explores basics of music and audio for computer games, including composition, workflow, working with animation, and dialog/non-music sound. May be repeated for credit as topics change. Prerequisite: C or better in MUSI 3394 or permission of instructor.

MUSI 3321. KEYBOARD SYNTHESIZER PROGRAMMING AND TECHNIQUES. 3 Hours.
Explores the framework, process, and implementation of electronic music synthesis in composition and performance idioms. Topics covered are electronic sound design, hardware and soft synths.

MUSI 3322. INTRODUCTION TO SONGWRITING. 3 Hours.
Open to music majors only. Addresses strategies, techniques, and the craft of composing popular song. Prerequisite: MUSI 3126 or MUSI 1326.

MUSI 3323. BUSINESS OF MUSIC. 3 Hours.
A study of the structure of the music business and relationships among occupations in the industry. Topics include publishing, copyright licensing, artist management, the record industry, music in film and broadcasting, and career development and planning.

MUSI 3326. POST-TONAL ANALYSIS. 3 Hours.
Study of pitch, harmony, rhythm, & form in music from Debussy to the present. Prerequisite: C or better in MUSI 2186 and MUSI 2326 and passing grade on the Music Theory Proficiency Exam.

MUSI 3350. PRIVATE LESSONS IN VOICE. 3 Hours.
Courses meet the requirements of performance majors in voice. Performance of a junior (half) recital must be completed prior to the end of the 3351 semester. Prerequisite: C or better in MUSI 2241 and passing grade on Sophomore Proficiency exam.

MUSI 3351. PRIVATE LESSONS IN VOICE. 3 Hours.
Courses meet the requirements of performance majors in voice. Performance of a junior (half) recital must be completed prior to the end of the 3351 semester. Prerequisite: C or better in MUSI 3350.

MUSI 3352. PRIVATE LESSONS IN PIANO. 3 Hours.
Courses meet the requirements of performance majors in piano. Performance of a junior (half) recital must be completed prior to the end of the 3353 semester. Prerequisite: C or better in MUSI 2243 and passing grade on Sophomore Proficiency exam.

MUSI 3353. PRIVATE LESSONS IN PIANO. 3 Hours.
Courses meet the requirements of performance majors in piano. Performance of a junior (half) recital must be completed prior to the end of the 3353 semester. Prerequisite: C or better in MUSI 3352.

MUSI 3354. PRIVATE LESSONS IN STRINGS. 3 Hours.
These courses meet the requirements of performance majors in strings. Performance of a junior (half) recital must be completed prior to the end of the 3355 semester. Prerequisite: C or better in MUSI 2245 and passing grade on Sophomore Proficiency exam.

MUSI 3355. PRIVATE LESSONS IN STRINGS. 3 Hours.
These courses meet the requirements of performance majors in strings. Performance of a junior (half) recital is required prior to the end of the 3355 semester. Prerequisite: C or better in MUSI 3354.

MUSI 3356. PRIVATE LESSONS IN WOODWINDS. 3 Hours.
Courses meet the requirements of performance majors in woodwinds. Performance of a junior (half) recital must be completed prior to the end of the 3357 semester. Prerequisite: C or better in MUSI 2247 and passing grade on Sophomore Proficiency Exam.

MUSI 3357. PRIVATE LESSONS IN WOODWINDS. 3 Hours.
Courses meet the requirements of performance majors in woodwinds. Performance of a junior (half) recital must be completed prior to the end of the 3357 semester. Prerequisite: C or better in MUSI 3356.

MUSI 3358. PRIVATE LESSONS IN BRASS. 3 Hours.
Courses meet the requirements of performance majors in brass. Performance of a junior (half) recital must be completed prior to the end of the 3359 semester. Prerequisite: C or better in MUSI 2249 and passing grade on Sophomore Proficiency exam.

MUSI 3359. PRIVATE LESSONS IN BRASS. 3 Hours.
Courses meet the requirements of performance majors in brass. Performance of a junior (half) recital must be completed prior to the end of the 3359 semester. Prerequisite: C or better in MUSI 3358.

MUSI 3360. PRIVATE LESSONS IN PERCUSSION. 3 Hours.
Courses meet the requirements of performance majors in percussion. Performance of a junior (half) recital must be completed prior to the end of the 3361 semester. Prerequisite: C or better in MUSI 2251 and passing grade on Sophomore Proficiency exam.

MUSI 3361. PRIVATE LESSONS IN PERCUSSION. 3 Hours.
Courses meet the requirements of performance majors in percussion. Performance of a junior (half) recital must be completed prior to the end of the 3361 semester. Prerequisite: C or better in MUSI 3360.

MUSI 3367. PRIVATE LESSONS IN ORGAN. 3 Hours.
Courses meet the requirements of performance majors in organ. Performance of a junior (half) recital must be completed prior to the end of the 3368 semester. Prerequisite: C or better in MUSI 2258 and passing grade on Sophomore Proficiency Exam.
MUSI 3368. PRIVATE LESSONS IN ORGAN. 3 Hours.
Courses meet the requirements of performance majors in organ. Performance of a junior (half) recital must be completed prior to the end of the 3368 semester. Prerequisite: C or better in MUSI 3367.

MUSI 3377. PRIVATE LESSONS IN HARPSICHORD. 3 Hours.
Courses meet the requirements of performance majors in harpsichord. Performance of a junior (half) recital must be completed prior to the end of the 3378 semester. Prerequisite: C or better in MUSI 2268.

MUSI 3378. PRIVATE LESSONS IN HARPSICHORD. 3 Hours.
Courses meet the requirements of performance majors in harpsichord. Performance of a junior (half) recital must be completed prior to the end of the 3378 semester. Prerequisite: C or better in MUSI 3377.

MUSI 3390. LINEAR ANALYSIS. 3 Hours.
An introduction to the methods of linear analysis and harmonic reduction. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory. Prerequisite: C or better in MUSI 2186, MUSI 2326, and a passing grade on the Music Theory Proficiency Exam.

MUSI 3391. ADVANCED SONATA THEORY. 3 Hours.
An in-depth examination of sonata form drawing on the concepts of Caplin's formal functions and Hepokoski and Darcy's sonata theory, including intensive writing and analysis assignments. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory. Prerequisite: C or better in MUSI 2186 and MUSI 2326 and passing grade on the Music Theory Proficiency Exam.

MUSI 3392. COMPOSITION I. 3 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: B or better in MUSI 2227, MUSI 2325, MUSI 2326, and MUSI 2186 and a passing grade on the Music Theory Proficiency Exam.

MUSI 3393. COMPOSITION II. 3 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: C or better in MUSI 3392.

MUSI 3394. DIGITAL MUSIC TECHNOLOGY. 3 Hours.
An introduction to the computer and to its use in the field of music. Topics include basic computer operation, information-management software, computer-assisted instruction in music, and music notation and sequencing software, MIDI (Musical Instrument Digital Interface).

MUSI 3395. JAZZ COMPOSITION. 3 Hours.
An introduction to jazz composition, focusing on no more than four distinct melodic voices plus rhythm section. Functional and non-functional harmonic and melodic techniques are explored. Prerequisite: C or better in MUSI 3226 or permission of instructor and successful completion of the Jazz Proficiency Exam.

MUSI 3396. TOPICS IN RECORD LABEL AND STUDIO MANAGEMENT. 3 Hours.
Practical experience in the business of running a recording studio and recording label. Topics may include, but are not limited to, website management, marketing, physical and digital distribution models, streaming services, equipment maintenance and inventory, facility supervision, and basic arts accounting practices. Prerequisite: Permission of instructor required.

MUSI 4101. GERMAN AND ENGLISH DICTION. 1 Hour.
A guide to correct pronunciation of German and English in vocal music.

MUSI 4102. VOCAL LITERATURE. 1 Hour.
Survey of major solo vocal works from the Classical Era to the present. Prerequisite: C or better in MUSI 2241 or permission of instructor.

MUSI 4111. ORCHESTRAL EXCERPTS. 1 Hour.
Study of orchestral excerpts for individual instruments. Topics will vary by semester. May be repeated for credit. Permission of instructor required.

MUSI 4117. MUSIC EDUCATION FIELD-BASED EXPERIENCE. 1 Hour.
Supervised and directed professional practice in local schools. Weekly seminars are required. Field-based experience must be taken the semester immediately preceding student teaching residency.

MUSI 4128. ADVANCED AUDIO RECORDING. 1 Hour.
Further study and practical studio work for students who have successfully completed the required recording techniques sequence utilizing Studio 301 in an independent study format. Prerequisite: C or better in MUSI 4326.

MUSI 4129. RECORDING ENSEMBLE. 1 Hour.
This course is open to Music Industry Studies students. This ensemble provides practical and artistic experience in a frequently encountered recording studio setting. Prerequisite: C or better in MUSI 4390 or Approval of the ensemble director.

MUSI 4140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This course may be offered as MUSI 4140 or THEA 4140. These courses are not designed to be substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 4140 and THEA 4140; credit will be granted only in one department. Prerequisite: C or better in MUSI 3141 or THEA 3141. Open to Musical Theatre majors only or by permission of the Department Chair.
MUSI 4141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 4141 and THEA 4141; credit will be granted only in one department. Prerequisite: C or better in MUSI 4140 or THEA 4140. Open to Musical Theatre majors only or by permission of the Department Chair.

MUSI 4188. ADVANCED CONDUCTING. 1 Hour.
Open to music majors only. An intensive study of conducting that will include score-study techniques, left and right hand independence, video analysis, rehearsal observation, and other topics related to the art of conducting. Can fulfill one of the 3 elective hours for Performance majors. Prerequisite: MUSI 3308 or MUSI 3309, and permission of instructor.

MUSI 4191. CONFERENCE COURSE. 1 Hour.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: Consent of the instructor or chair of the department.

MUSI 4205. ADVANCED FUNCTIONAL PIANO. 2 Hours.
Concentrated study of keyboard skills which include: sight reading, transposition, harmonization, and open score reading. Prerequisite: C or better in MUSI 2181 or faculty approval.

MUSI 4211. ELEMENTARY MUSIC. 2 Hours.
Focus on perception as it relates to children's development and participation in music through singing and playing instruments. Prerequisite: C or better in MUSI 3211.

MUSI 4213. INSTRUMENTAL MATERIALS AND TECHNIQUES II. 2 Hours.
A study of literature, music selection, rehearsal planning, sound production, and performance practices for intermediate and advanced instrumental ensembles. Prerequisite: C or better in MUSI 3213.

MUSI 4214. CHORAL MATERIALS AND TECHNIQUES II. 2 Hours.
A study of literature, music selection, rehearsal planning, vocal production, and performance practices for intermediate and advanced choral ensembles. Prerequisite: C or better in MUSI 3214.

MUSI 4225. JAZZ IMPROVISATION III - ADVANCED. 2 Hours.
A continuation of Jazz Improvisation II. This course explores advanced techniques of contemporary jazz solo performance. Prerequisite: C or better in MUSI 3226 and successful completion of the Jazz Proficiency Exam.

MUSI 4236. PRIVATE LESSONS IN JAZZ GUITAR. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz guitar. Prerequisite: C or better in MUSI 3237.

MUSI 4238. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is jazz drumset. Prerequisite: C or better in MUSI 3259.

MUSI 4240. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3241.

MUSI 4241. PRIVATE LESSONS IN VOICE. 2 Hours.
This sequence of courses is required of music majors whose concentration is voice. Prerequisite: C or better in MUSI 4240.

MUSI 4242. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3243.

MUSI 4243. PRIVATE LESSONS IN PIANO. 2 Hours.
This sequence of courses is required of music majors whose concentration is piano. Prerequisite: C or better in MUSI 4242.

MUSI 4244. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3245.

MUSI 4245. PRIVATE LESSONS IN STRINGS. 2 Hours.
This sequence of courses meets the requirements of music majors whose concentration is strings. Prerequisite: C or better in MUSI 4244.

MUSI 4246. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3247.

MUSI 4247. PRIVATE LESSONS IN WOODWINDS. 2 Hours.
This sequence of courses is required of music majors whose concentration is woodwinds. Prerequisite: C or better in MUSI 4246.

MUSI 4248. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3249.
MUSI 4249. PRIVATE LESSONS IN BRASS. 2 Hours.
This sequence of courses is required of music majors whose concentration is brass. Prerequisite: C or better in MUSI 4248.

MUSI 4250. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3251.

MUSI 4251. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This sequence of courses is required of music majors whose concentration is percussion. Prerequisite: C or better in MUSI 4250.

MUSI 4252. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3253.

MUSI 4253. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This sequence of courses meets the requirements of jazz studies majors whose concentration is jazz bass. Prerequisite: C or better in MUSI 4252.

MUSI 4254. PRIVATE LESSONS IN JAZZ PIANO. 2 Hours.
This sequence of courses is required of and limited to music majors with jazz option for whom the principal instrument is piano. Prerequisite: C or better in MUSI 3255.

MUSI 4255. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3258.

MUSI 4256. PRIVATE LESSONS IN ORGAN. 2 Hours.
This sequence of courses is required of music majors whose concentration is organ. Prerequisite: C or better in MUSI 4257.

MUSI 4257. PRIVATE LESSONS IN HARPSCORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Performance of a senior (half) recital is required for completion of this course for all students in the concentration Bachelor of Music in Preparation for Teacher Certification. Prerequisite: C or better in MUSI 3268.

MUSI 4258. PRIVATE LESSONS IN HARPSCORD. 2 Hours.
This sequence is required of music majors whose concentration is harpsichord. Prerequisite: C or better in MUSI 4257.

MUSI 4259. PRIVATE LESSONS IN HARPSCORD. 2 Hours.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music Degree. Prerequisite: THEA 3141 and Permission of advisor.

MUSI 4260. SPECIAL TOPICS IN MUSIC. 2 Hours.
Special studies in music. Topics will vary from semester to semester. May be repeated for credit when topics vary.

MUSI 4261. CONFERENCE COURSE. 2 Hours.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: Consent of the instructor or chair of the department.

MUSI 4262. JAZZ PERSPECTIVES. 3 Hours.
An in-depth study of the history, literature, and styles of the jazz idiom. Open to music majors only. Prerequisite: Successful completion of the Jazz Proficiency Exam.

MUSI 4263. ORCHESTRATION. 3 Hours.
Scoring for strings, woodwinds, brass, percussion, and voice as related to orchestra, band, and choir. Prerequisite: C or better in MUSI 2186, MUSI 2326 and a passing grade on the Music Theory Proficiency Exam.

MUSI 4264. JAZZ ARRANGING. 3 Hours.
Arranging in the jazz and commercial idioms with emphasis on the large jazz ensemble. Prerequisite: C or better in MUSI 3125, MUSI 3225, and MUSI 3395, or consent of the instructor, and successful completion of the Jazz Proficiency Exam.

MUSI 4265. ADVANCED STRING CLASS. 3 Hours.
Open to music majors only. An advanced study of orchestral string instruments with emphasis on advanced technique and pedagogy. Prerequisite: C or better in MUSI 3191.

MUSI 4266. HISTORY OF MUSIC THEORY. 3 Hours.
Theorists and theoretical tracts from the ancient Greeks to the present day. Prerequisite: C or better in MUSI 2186, MUSI 2326, and a passing grade on the Music Theory Proficiency exam.
MUSI 4308. INSTRUMENTAL CONDUCTING II. 3 Hours.
Open to music majors only. A study of advanced conducting techniques, including score reading, rehearsal techniques, ensemble concepts, articulations and musical style. Prerequisite: C or better in MUSI 3308.

MUSI 4309. CHORAL CONDUCTING II. 3 Hours.
Open to music majors only. Application of the technical and expressive aspects of choral conducting, score study techniques, error detection skills, and rehearsal planning and implementation techniques in a laboratory-conducting situation. Offered every spring odd year. Prerequisite: C or better in MUSI 3309.

MUSI 4322. ARTS MANAGEMENT AND ENTREPRENEURSHIP. 3 Hours.
This course is designed as an introduction in arts entrepreneurship and explore creating an artist-based business. Students will examine the breadth of professional opportunities and explore strategies for pursuing them. Prerequisite: MUSI 3323.

MUSI 4324. HISTORY OF MUSICAL THEATRE. 3 Hours.
A historical survey of American theatre music from the colonial period to the present. Open to all students as a fine arts elective.

MUSI 4325. RECORDING TECHNIQUES II. 3 Hours.
Students will continue to learn recording engineering through audio analysis, recording practice, and audio theory. Signal processing, analog tape techniques, mastering, and studio business will be discussed. Students will work independently on jazz and pop/rock recording projects in Studio 301. Prerequisite: C or better in MUSI 4390.

MUSI 4326. RECORDING TECHNIQUES III. 3 Hours.
This course builds upon the previous two courses by introducing students to more advanced aspects of audio engineering, such as combining MIDI and audio, syncing audio to video, advanced aural skills, and mixing automation. Students will be able to utilize Studio 301 and Irons Hall in order to pursue their recording work in a more independent fashion. Prerequisite: C or better in MUSI 4325.

MUSI 4327. TECHNIQUES AND TECHNOLOGY IN FILM COMPOSITION. 3 Hours.
Study in the technical and artistic requirements of film composition and the realization of film scores. Prerequisite: C or better in MUSI 3394.

MUSI 4328. ELECTRONIC MUSIC COMPOSITION AND PERFORMANCE. 3 Hours.
An exploration of strategies for composing electronic music that apply to a broad range of contemporary styles and genres. Through a series of guided exercises and projects, the class provides an opportunity for students to explore compositional approaches using electronic instruments and digital audio technologies. Prerequisite: C or better in MUSI 4325.

MUSI 4329. SOUND FOR NEW MEDIA. 3 Hours.
Explores the techniques and application of audio integration within media-centered environments, focusing on live broadcast audio applications over internet and other mediums for broadcast. Prerequisite: C or better in MUSI 4325.

MUSI 4349. FORMAL-FUNCTION THEORY. 3 Hours.
Introduction to William Caplin's Formal-Function Theory, including mastery of formal functions, harmonic progressions, the principal theme types, and full-movement forms. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory. Prerequisites: C or better in MUSI 2186, MUSI 2326, and a passing grade on the Music Theory Proficiency exam.

MUSI 4350. 20TH CENTURY FORM & TECHNIQUE. 3 Hours.
Introduction to twentieth-century form and techniques, as well as relevant analytical methods and compositional strategies. Seminar designed to meet the needs of students desiring to become theorists or teacher of theory. This course formerly MUSI 4490. Prerequisite: C or better in MUSI 2186 and MUSI 2326 and passing grade on the Music Theory Proficiency Exam.

MUSI 4351. MUSIC THEORY CAPSTONE/SEMINAR. 3 Hours.
Seminar designed to meet the needs of students desiring to become theorists or teachers of theory; includes preparation and presentation of a senior research project in music theory in a conference setting. This course formerly MUSI 4491. Prerequisite: Grade of C or better in MUSI 4390 (formerly MUSI 4490).

MUSI 4387. ANALYSIS OF POPULAR MUSIC. 3 Hours.
This course will explore form, melody, harmony, and voice-leading in a variety of popular styles since the early 20th century. Prerequisite: C or better in MUSI 2326 and a passing grade on the Theory Proficiency exam.

MUSI 4390. RECORDING TECHNIQUES I. 3 Hours.
Live performance and studio recording techniques. Topics include microphone selection and placement, equalization techniques, overdubbing, console-mixing, sound synchronization, and related recording techniques. Prerequisite: C or better in MUSI 3394.

MUSI 4391. CONFERENCE COURSE. 3 Hours.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: Consent of the instructor or chair of the department.

MUSI 4392. JAZZ STUDIES SENIOR RECITAL/PROJECT. 3 Hours.
Senior recital or project for jazz studies majors. Designed in consultation with the Director of Jazz Studies. Prerequisites: completion of performance lesson requirements; consent of instructor or music department chair.

MUSI 4393. CAPSTONE IN MUSIC THEORY. 3 Hours.
Senior project in music theory, culminating in a professional presentation on a selected topic in music theory. Prerequisite: MUSI 4490.
MUSI 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or a project under the direction of a faculty member in the major department.

MUSI 4395. INTERNSHIP. 3 Hours.
The Internship course is designed to give students practical experience in a variety of music media and music business settings. The student must work with a local business for at least ten hours per week (140 hours total).

MUSI 4450. PRIVATE LESSONS IN VOICE. 4 Hours.
These courses meet the requirements of performance majors in voice. Performance of a senior (full) recital must be completed prior to the end of the 4451 semester. Prerequisite: C or better in MUSI 3351.

MUSI 4451. PRIVATE LESSONS IN VOICE. 4 Hours.
These courses meet the requirements of performance majors in voice. Performance of a senior (full) recital must be completed prior to the end of the 4451 semester. Prerequisite: C or better in MUSI 4450.

MUSI 4452. PRIVATE LESSONS IN PIANO. 4 Hours.
These courses meet the requirements of performance majors in piano. Performance of a senior (full) recital must be completed prior to the end of the 4453 semester. Prerequisite: C or better in MUSI 4452.

MUSI 4453. PRIVATE LESSONS IN PIANO. 4 Hours.
These courses meet the requirements of performance majors in piano. Performance of a senior (full) recital must be completed prior to the end of the 4453 semester. Prerequisite: C or better in MUSI 4452.

MUSI 4454. PRIVATE LESSONS IN STRINGS. 4 Hours.
These courses meet the requirements of performance majors in strings. Performance of a senior (full) recital must be completed prior to the end of the 4455 semester. Prerequisite: C or better in MUSI 4454.

MUSI 4455. PRIVATE LESSONS IN STRINGS. 4 Hours.
These courses meet the requirements of performance majors in strings. Performance of a senior (full) recital must be completed prior to the end of the 4455 semester. Prerequisite: C or better in MUSI 4454.

MUSI 4456. PRIVATE LESSONS IN WOODWINDS. 4 Hours.
These courses meet the requirements of performance majors in woodwinds. Performance of a senior (full) recital must be completed prior to the end of the 4457 semester. Prerequisite: C or better in MUSI 4456.

MUSI 4457. PRIVATE LESSONS IN WOODWINDS. 4 Hours.
These courses meet the requirements of performance majors in woodwinds. Performance of a senior (full) recital must be completed prior to the end of the 4457 semester. Prerequisite: C or better in MUSI 4456.

MUSI 4458. PRIVATE LESSONS IN BRASS. 4 Hours.
These courses meet the requirements of performance majors in brass. Performance of a senior (full) recital must be completed prior to the end of the 4459 semester. Prerequisite: C or better in MUSI 4458.

MUSI 4459. PRIVATE LESSONS IN BRASS. 4 Hours.
These courses meet the requirements of performance majors in brass. Performance of a senior (full) recital must be completed prior to the end of the 4459 semester. Prerequisite: C or better in MUSI 4458.

MUSI 4460. PRIVATE LESSONS IN PERCUSSION. 4 Hours.
These courses meet the requirements of performance majors in percussion. Performance of a senior (full) recital must be completed prior to the end of the 4461 semester. Prerequisite: C or better in MUSI 4460.

MUSI 4461. PRIVATE LESSONS IN PERCUSSION. 4 Hours.
These courses meet the requirements of performance majors in percussion. Performance of a senior (full) recital must be completed prior to the end of the 4461 semester. Prerequisite: C or better in MUSI 4460.

MUSI 4467. PRIVATE LESSONS IN ORGAN. 4 Hours.
These courses meet the requirements of performance majors in organ. Performance of a senior (full) recital must be completed prior to the end of the 4468 semester. Prerequisite: C or better in MUSI 4467.

MUSI 4468. PRIVATE LESSONS IN ORGAN. 4 Hours.
These courses meet the requirements of performance majors in organ. Performance of a senior (full) recital must be completed prior to the end of the 4468 semester. Prerequisite: C or better in MUSI 4467.

MUSI 4477. PRIVATE LESSONS IN HARPSCICORD. 4 Hours.
This course meets the requirements of performance majors in harpsichord. Performance of a senior (full) recital must be completed prior to the end of the 4478 semester. Prerequisite: C or better in MUSI 3378.

MUSI 4478. PRIVATE LESSONS IN HARPSCICORD. 4 Hours.
These courses meet the requirements of performance majors in harpsichord. Performance of a senior (full) recital must be completed prior to the end of the 4478 semester. Prerequisite: C or better in MUSI 4477.
MUSI 4492. COMPOSITION III. 4 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: C or better in MUSI 3393.

MUSI 4493. COMPOSITION IV. 4 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition. Prerequisite: C or better in MUSI 4492.

MUSI 5000. WIND SYMPHONY. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5001. SYMPHONIC WINDS. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5002. A CAPPELLA CHOIR. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5003. UNIVERSITY SINGERS. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5005. MUSICAL THEATRE/OPERA LAB. 0 Hours.
Exploration of opera roles, staging techniques, and repertoire. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5007. JAZZ ORCHESTRA. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5008. JAZZ ENSEMBLE. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5010. STUDIO CLASS. 0 Hours.
Departmental performance classes, master classes, guest artist performances and lectures related to performance specializations. Students enroll concurrently with private lesson in specialization.

MUSI 5011. ORCHESTRA. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5012. CHAMBER MUSIC. 0 Hours.
This course is an in-depth study of the repertoire of standard chamber ensembles such as string quartets and piano trios, woodwind quintets and brass quintets. Weekly coaching with professors culminates in a public performance where students demonstrate skills in music performance. Prerequisite: Approval of Ensemble Director and Graduate Advisor.

MUSI 5013. ORCHESTRAL EXCERPTS. 0 Hours.
Study of orchestral excerpts for individual instruments. Topics will vary by semester. May be repeated for credit. Permission of instructor required.

MUSI 5022. JAZZ COMBO. 0 Hours.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director and the graduate advisor.

MUSI 5100. WIND SYMPHONY. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5101. SYMPHONIC WINDS. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5102. A CAPPELLA CHOIR. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5103. CHAMBER SINGERS. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5104. UNIVERSITY SINGERS. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5106. KEYBOARD ENSEMBLE. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5107. JAZZ ORCHESTRA. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.
MUSI 5108. JAZZ ENSEMBLE. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5109. VOCAL JAZZ. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5110. JAZZ COMBO. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5111. ORCHESTRA. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5112. CHAMBER MUSIC. 1 Hour.
This course is an in-depth study of the repertoire of standard chamber ensembles such as string quartets and piano trios, woodwind quintets and brass quintets. Weekly coaching with professors culminates in a public performance where students demonstrate skills in music performance. Prerequisite: Approval of Ensemble Director.

MUSI 5113. ORCHESTRAL EXCERPTS. 1 Hour.
Study of orchestral excerpts for individual instruments. Topics will vary by semester. May be repeated for credit. Permission of instructor required.

MUSI 5114. SAX CHOIR. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Permission of Instructor.

MUSI 5115. VOCAL COACHING. 1 Hour.
Advanced instruction in diction, interpretation, and style for singers and collaborative instrumentalists. By permission of instructor.

MUSI 5116. ELECTRIC GUITAR ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5117. MUSIC EDUCATION FIELD-BASED EXPERIENCE. 1 Hour.
Supervised and directed professional practice in local schools. The student will be assigned to a public school site for five hours per week. Weekly seminars are required. This course must be taken the semester immediately preceding clinical student teaching.

MUSI 5118. PERCUSSION ENSEMBLE. 1 Hour.
The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Permission of Instructor.

MUSI 5120. PRIVATE LESSONS IN VOICE. 1 Hour.
This course provides private instruction in voice. This course may be repeated for credit as often as course content changes.

MUSI 5121. PRIVATE LESSONS IN PIANO. 1 Hour.
This course provides private instruction in piano. This course may be repeated for credit as often as course content changes.

MUSI 5122. PRIVATE LESSONS IN ORGAN. 1 Hour.
This course provides private instruction in organ. This course may be repeated for credit as often as course content changes.

MUSI 5123. PRIVATE LESSONS IN HARPSCICHORD. 1 Hour.
This course provides private instruction in harpsichord. This course may be repeated for credit as often as course content changes.

MUSI 5124. PRIVATE LESSONS IN JAZZ PIANO. 1 Hour.
This course provides private instruction in jazz piano. This course may be repeated for credit as often as course content changes.

MUSI 5125. PRIVATE LESSONS IN VIOLIN. 1 Hour.
This course provides private instruction in violin. This course may be repeated for credit as often as course content changes.

MUSI 5126. PRIVATE LESSONS IN VIOLA. 1 Hour.
This course provides private instruction in viola. This course may be repeated for credit as often as course content changes.

MUSI 5127. PRIVATE LESSONS IN CELLO. 1 Hour.
This course provides private instruction in cello. This course may be repeated for credit as often as course content changes.

MUSI 5128. PRIVATE LESSONS IN BASS. 1 Hour.
This course provides private instruction in bass. This course may be repeated for credit as often as course content changes.

MUSI 5129. PRIVATE LESSONS IN JAZZ BASS. 1 Hour.
This course provides private instruction in jazz bass. This course may be repeated for credit as often as course content changes.

MUSI 5130. PRIVATE LESSONS IN GUITAR. 1 Hour.
This course provides private instruction in guitar. This course may be repeated for credit as often as course content changes.

MUSI 5131. PRIVATE LESSONS IN CLARINET. 1 Hour.
This course provides private instruction in clarinet. This course may be repeated for credit as often as course content changes.

MUSI 5132. PRIVATE LESSONS IN OBOE. 1 Hour.
This course provides private instruction in oboe. This course may be repeated for credit as often as course content changes.
MUSI 5133. PRIVATE LESSONS IN FLUTE. 1 Hour.
This course provides private instruction in flute. This course may be repeated for credit as often as course content changes.

MUSI 5134. PRIVATE LESSONS IN SAXOPHONE. 1 Hour.
This course provides private instruction in saxophone. This course may be repeated for credit as often as course content changes.

MUSI 5135. PRIVATE LESSONS IN BASSOON. 1 Hour.
This course provides private instruction in bassoon. This course may be repeated for credit as often as course content changes.

MUSI 5136. PRIVATE LESSONS IN TRUMPET. 1 Hour.
This course provides private instruction in trumpet. This course may be repeated for credit as often as course content changes.

MUSI 5137. PRIVATE LESSONS IN FRENCH HORN. 1 Hour.
This course provides private instruction in trumpet. This course may be repeated for credit as often as course content changes.

MUSI 5138. PRIVATE LESSONS IN TROMBONE. 1 Hour.
This course provides private instruction in trombone. This course may be repeated for credit as often as course content changes.

MUSI 5139. PRIVATE LESSONS IN TUBA. 1 Hour.
This course provides private instruction in tuba. This course may be repeated for credit as often as course content changes.

MUSI 5140. PRIVATE LESSONS IN EUPHONIUM. 1 Hour.
This course provides private instruction in euphonium. This course may be repeated for credit as often as course content changes.

MUSI 5145. PRIVATE LESSONS IN JAZZ DRUMSET. 1 Hour.
This course provides private instruction in jazz drumset. This course may be repeated for credit as often as course content changes.

MUSI 5150. PEDAGOGY IN MUSIC THEORY. 1 Hour.
Survey of materials and methods for teaching music theory at the undergraduate level. Observation of teaching methods and supervision of undergraduate teaching.

MUSI 5160. FLUTE CHOIR. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5161. WOODWIND ENSEMBLE. 1 Hour.
The music major must receive credit for the ensembles required in his/her option. The schedule of classes indicates which ensembles are offered each semester. Prerequisite: Approval of the ensemble director.

MUSI 5171. ELECTIVE PERFORMANCE. 1 Hour.
For students who desire elective private instruction in string, woodwinds, brass, keyboard, voice, or percussion.

MUSI 5188. ADVANCED CONDUCTING. 1 Hour.
Open to music majors only. An intensive study of conducting that will include score-study techniques, left and right hand independence, video analysis, rehearsal observation, and other topics related to the art of conducting. Permission of instructor required. Prerequisite: Permission of instructor.

MUSI 5190. KEYBOARD ACCOMPANIMENT. 1 Hour.
This course entails the student accompanying performances as specified and supervised by the instructor.

MUSI 5191. CONFERENCE COURSE IN MUSIC. 1 Hour.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: permission of instructor and Graduate Advisor.

MUSI 5205. MUSIC THEATRE/OPERA LAB. 2 Hours.
Exploration of opera roles, staging techniques, and repertoire. Prerequisite: Approval of the ensemble director.

MUSI 5211. EARLY CHILDHOOD MUSIC. 2 Hours.
Musical characteristics of children, folksong and composed literature, performance activities, song analysis, and techniques for reading and writing music.

MUSI 5212. ELEMENTARY MUSIC. 2 Hours.
Focus on perception as it relates to children's development and participation in music through singing and playing instruments.

MUSI 5213. CHORAL MATERIALS AND TECHNIQUES I. 2 Hours.
A study of literature, music selection, rehearsal planning, vocal production, and performance practices for beginning and intermediate choral ensembles.

MUSI 5214. CHORAL MATERIALS AND TECHNIQUES II. 2 Hours.
A study of literature, music selection, rehearsal planning, vocal production, and performance practices for intermediate and advanced choral ensembles.

MUSI 5215. INSTRUMENTAL MATERIALS AND TECHNIQUES I. 2 Hours.
A study of literature, music selection, rehearsal planning, sound production, and performance practices for beginning and intermediate instrumental ensembles.
MUSI 5216. INSTRUMENTAL MATERIALS AND TECHNIQUES II. 2 Hours.
A study of literature, music selection, rehearsal planning, sound production, and performance practices for intermediate and advanced instrumental ensembles.

MUSI 5220. PRIVATE LESSONS IN VOICE. 2 Hours.
This course provides private instruction in voice. This course may be repeated for credit as often as course content changes.

MUSI 5221. PRIVATE LESSONS IN PIANO. 2 Hours.
This course provides private instruction in piano. This course may be repeated for credit as often as course content changes.

MUSI 5222. PRIVATE LESSONS IN ORGAN. 2 Hours.
This course provides private instruction in organ. This course may be repeated for credit as often as course content changes.

MUSI 5223. PRIVATE LESSONS IN HARPSCICHORD. 2 Hours.
This course provides private instruction in harpsichord. This course may be repeated for credit as often as course content changes.

MUSI 5224. PRIVATE LESSONS IN JAZZ PIANO. 2 Hours.
This course provides private instruction in jazz piano. This course may be repeated for credit as often as course content changes.

MUSI 5225. PRIVATE LESSONS IN VIOLIN. 2 Hours.
This course provides private instruction in violin. This course may be repeated for credit as often as course content changes.

MUSI 5226. PRIVATE LESSONS IN VIOLA. 2 Hours.
This course provides private instruction in viola. This course may be repeated for credit as often as course content changes.

MUSI 5227. PRIVATE LESSONS IN CELLO. 2 Hours.
This course provides private instruction in cello. This course may be repeated for credit as often as course content changes.

MUSI 5228. PRIVATE LESSONS IN BASS. 2 Hours.
This course provides private instruction in bass. This course may be repeated for credit as often as course content changes.

MUSI 5229. PRIVATE LESSONS IN JAZZ BASS. 2 Hours.
This course provides private instruction in jazz bass. This course may be repeated for credit as often as course content changes.

MUSI 5230. PRIVATE LESSONS IN GUITAR. 2 Hours.
This course provides private instruction in guitar. This course may be repeated for credit as often as course content changes.

MUSI 5231. PRIVATE LESSONS IN CLARINET. 2 Hours.
This course provides private instruction in clarinet. This course may be repeated for credit as often as course content changes.

MUSI 5232. PRIVATE LESSONS IN OBOE. 2 Hours.
This course provides private instruction in oboe. This course may be repeated for credit as often as course content changes.

MUSI 5233. PRIVATE LESSONS IN FLUTE. 2 Hours.
This course provides private instruction in flute. This course may be repeated for credit as often as course content changes.

MUSI 5234. PRIVATE LESSONS IN SAXOPHONE. 2 Hours.
This course provides private instruction in saxophone. This course may be repeated for credit as often as course content changes.

MUSI 5235. PRIVATE LESSONS IN BASSOON. 2 Hours.
This course provides private instruction in bassoon. This course may be repeated for credit as often as course content changes.

MUSI 5236. PRIVATE LESSONS IN TRUMPET. 2 Hours.
This course provides private instruction in trumpet. This course may be repeated for credit as often as course content changes.

MUSI 5237. PRIVATE LESSONS IN FRENCH HORN. 2 Hours.
This course provides private instruction in French Horn. This course may be repeated for credit as often as course content change.

MUSI 5238. PRIVATE LESSONS IN TROMBONE. 2 Hours.
This course provides private instruction in trombone. This course may be repeated for credit as often as course content changes.

MUSI 5239. PRIVATE LESSONS IN TUBA. 2 Hours.
This course provides private instruction in tuba. This course may be repeated for credit as often as course content changes.

MUSI 5240. PRIVATE LESSONS IN EUPHONIUM. 2 Hours.
This course provides private instruction in euphonium. This course may be repeated for credit as often as course content changes.

MUSI 5241. PRIVATE LESSONS IN PERCUSSION. 2 Hours.
This course provides private instruction in percussion. This course may be repeated for credit as often as course content changes.

MUSI 5242. PRIVATE LESSONS IN IMPROVISATION. 2 Hours.
This course provides private instruction in improvisation. This course may be repeated for credit as often as course content changes.

MUSI 5245. PRIVATE LESSONS IN JAZZ DRUMSET. 2 Hours.
This course provides private instruction in jazz drumset. This course may be repeated for credit as often as course content changes.
MUSI 5271. ELECTIVE LESSONS. 2 Hours.
For students who desire elective private instruction in strings, woodwinds, brass, keyboard, voice, or percussion. May be repeated eight times for credit.

MUSI 5291. CONFERENCE COURSE IN MUSIC. 2 Hours.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: permission of instructor and Graduate Advisor.

MUSI 5301. FORM AND STYLE ANALYSIS. 3 Hours.
A survey of the forms and styles of Western art music employing relevant analytical techniques.

MUSI 5302. THEORY & COMPOSITION SPECIAL TOPICS. 3 Hours.
This course covers topics which vary from semester to semester, and includes in-depth study of selected topics in music theory. This course may be repeated for credit as often as the content changes. (Formerly MUSI 5330.).

MUSI 5303. ADVANCED COUNTERPOINT. 3 Hours.
Advanced work in specialized areas of counterpoint.

MUSI 5305. HISTORY OF MUSIC THEORY. 3 Hours.
Theorists and theoretical tracts from the ancient Greeks to the present day.

MUSI 5308. MUSIC HISTORY SELECTED TOPICS. 3 Hours.
This course will consist of an in-depth study of a particular genre, composer, or period. It may be repeated as the course content changes.

MUSI 5316. STRATEGIES AND ASSESSMENT IN MUSIC EDUCATION. 3 Hours.
Open to music education majors only. Current trends in music education will be examined. Topics include effective differentiated instruction, positive classroom management, strategies for working with diverse learners, and examination of major learning theories and principles of cognitive, social, emotional, physical and aesthetic development. This course will also examine a variety of assessment techniques that are used in a music classroom. Assessment tools such as rubrics, rating scales, National Standards, TEKS, STAAR, and TExES will be examined and implemented into lesson planning.

MUSI 5320. PRIVATE LESSONS IN VOICE. 3 Hours.
This course provides private instruction in voice. This course may be repeated for credit as often as course content changes.

MUSI 5321. PRIVATE LESSONS IN PIANO. 3 Hours.
This course provides private instruction in piano. This course may be repeated for credit as often as course content changes.

MUSI 5322. PRIVATE LESSONS IN ORGAN. 3 Hours.
This course provides private instruction in organ. This course may be repeated for credit as often as course content changes.

MUSI 5323. PRIVATE LESSONS IN HARPSCICHORD. 3 Hours.
This course provides private instruction in harpsichord. This course may be repeated for credit as often as course content changes.

MUSI 5324. PRIVATE LESSONS IN JAZZ PIANO. 3 Hours.
This course provides private instruction in jazz piano. This course may be repeated for credit as often as course content changes.

MUSI 5325. PRIVATE LESSONS IN VIOLIN. 3 Hours.
This course provides private instruction in violin. This course may be repeated for credit as often as course content changes.

MUSI 5326. PRIVATE LESSONS IN VIOLA. 3 Hours.
This course provides private instruction in viola. This course may be repeated for credit as often as course content changes.

MUSI 5327. PRIVATE LESSONS IN CELLO. 3 Hours.
This course provides private instruction in cello. This course may be repeated for credit as often as course content changes.

MUSI 5328. PRIVATE LESSONS IN BASS. 3 Hours.
This course provides private instruction in bass. This course may be repeated for credit as often as course content changes.

MUSI 5329. PRIVATE LESSONS IN JAZZ BASS. 3 Hours.
This course provides private instruction in jazz bass. This course may be repeated for credit as often as course content changes.

MUSI 5332. PRIVATE LESSONS IN OBOE. 3 Hours.
This course provides private instruction in oboe. This course may be repeated for credit as often as course content changes.

MUSI 5333. PRIVATE LESSONS IN FLUTE. 3 Hours.
This course provides private instruction in flute. This course may be repeated for credit as often as course content changes.

MUSI 5334. PRIVATE LESSONS IN SAXOPHONE. 3 Hours.
This course provides private instruction in saxophone. This course may be repeated for credit as often as course content changes.

MUSI 5335. PRIVATE LESSONS IN BASSOON. 3 Hours.
This course provides private instruction in bassoon. This course may be repeated for credit as often as course content changes.

MUSI 5336. PRIVATE LESSONS IN TRUMPET. 3 Hours.
This course provides private instruction in trumpet. This course may be repeated for credit as often as course content changes.
MUSI 5337. PRIVATE LESSONS IN FRENCH HORN. 3 Hours.
This course provides private instruction in French Horn. This course may be repeated for credit as often as course content changes.

MUSI 5338. PRIVATE LESSONS IN TROMBONE. 3 Hours.
This course provides private instruction in trombone. This course may be repeated for credit as often as course content changes.

MUSI 5339. PRIVATE LESSONS IN TUBA. 3 Hours.
This course provides private instruction in tuba. This course may be repeated for credit as often as course content changes.

MUSI 5340. PRIVATE LESSONS IN EUPHONIUM. 3 Hours.
This course provides private instruction in euphonium. This course may be repeated for credit as often as course content changes.

MUSI 5341. PRIVATE LESSONS IN PERCUSSION. 3 Hours.
This course provides private instruction in percussion. This course may be repeated for credit as often as course content changes.

MUSI 5342. PRIVATE LESSONS IN IMPROVISATION. 3 Hours.
This course provides private instruction in improvisation. This course may be repeated for credit as often as course content changes.

MUSI 5343. PRIVATE LESSONS IN GUITAR. 3 Hours.
This course provides private instruction in guitar. This course may be repeated for credit as often as course content changes.

MUSI 5344. PRIVATE LESSONS IN CLARINET. 3 Hours.
This course provides private instruction in clarinet. This course may be repeated for credit as often as course content changes.

MUSI 5345. PRIVATE LESSONS IN JAZZ DRUMSET. 3 Hours.
This course provides private instruction in jazz drumset. This course may be repeated for credit as often as course content changes.

MUSI 5347. PRIVATE LESSONS IN COMPOSITION. 3 Hours.
Individual instruction designed to meet the needs of students desiring to become composers or teachers of composition.

MUSI 5348. PRIVATE LESSONS IN JAZZ COMPOSITION. 3 Hours.
This course provides private instruction in jazz composition and/or arranging. This course may be repeated for credit as often as course content changes.

MUSI 5349. FORMAL-FUNCTION THEORY. 3 Hours.
Introduction to William Caplin’s Formal-Function Theory, including mastery of formal functions, harmonic progressions, the principal theme types, and full-movement forms.

MUSI 5350. SELECTED TOPICS IN MUSIC PEDAGOGY. 3 Hours.
This course covers topics which vary from semester to semester and includes studies of teaching techniques applied to pre-K, elementary grades, the junior high school, the high school, the junior college, and the college or university. This course may be repeated for credit as often as the content changes.

MUSI 5351. PHILOSOPHY, HISTORY, AND CURRICULUM TRENDS IN MUSIC EDUCATION. 3 Hours.
A study of philosophy and history of music education and how curricular trends provide the context for contemporary music education.

MUSI 5352. PSYCHOLOGICAL FOUNDATIONS OF MUSIC EDUCATION. 3 Hours.
A study of the psychological foundations of music education. An investigation of topics such as perception of and responses to music, the nature of musical attributes, music learning, and the measurement of musical behavior.

MUSI 5353. PROJECT IN MUSIC EDUCATION. 3 Hours.
For students enrolled in the non-thesis option. Offers the opportunity to complete a professional project in music education relevant to the student's background, interest, and/or needs. The project should include, but not necessarily be limited to, appropriate written documentation. May be repeated for credit, but not more than 3 hours will apply to the Master of Music degree. Enrollment is required each term in which the project is in progress.

MUSI 5354. SELECTED TOPICS IN MUSIC LITERATURE. 3 Hours.
This course covers topics which vary from semester to semester and includes studies in musical literature for the following: 1) Wind Band Literature; 2) Orchestral Literature; 3) Choral Literature; 4) World Music Literature; 5) Jazz Literature. This course may be repeated for credit as often as the content changes.

MUSI 5355. REHEARSAL TECHNIQUES. 3 Hours.
A study of rehearsal techniques, including tone development, phrasing, rehearsal score study, and rehearsal organization. Topics, which may vary by semester, are 1) Choral; 2) Instrumental; 3) Jazz. May be repeated for credit when topics vary. Topics may be taken concurrently.

MUSI 5356. ORCHESTRAL EXCERPTS. 3 Hours.
Study of orchestral excerpts for individual instruments. Topics will vary by semester. May be repeated for credit. Permission of instructor required.

MUSI 5357. CURRENT TRENDS IN MUSIC EDUCATION. 3 Hours.
Current trends, social foundations and issues in music education.

MUSI 5358. TEACHING MUSIC IN HIGHER EDUCATION. 3 Hours.
Components of successful teaching in higher education will be explored. Topics will include developing a syllabus, creating a vitae, and preparing a lecture.
MUSI 5359. ADVANCED DICTION FOR SINGERS. 3 Hours.
A study of performance diction for singers and the pronunciation of the language as it applies to public performance. Topics include English, French, Italian, and German. May be repeated for credit when topics vary.

MUSI 5360. ADVANCED TECHNOLOGY FOR MUSICIANS. 3 Hours.
Intensive and extensive student-centered study topics to be selected from MIDI sequencing, multimedia development, advanced music notation and digital sampling and synthesis.

MUSI 5361. EARLY CHILDHOOD MUSIC. 3 Hours.
Practical application in authentic early childhood experiences.

MUSI 5362. INTRODUCTION TO RESEARCH IN MUSIC. 3 Hours.
An introduction to the methods and materials of research in music, including instruction on appropriate style formats for papers and theses.

MUSI 5363. RESEARCH IN MUSIC EDUCATION. 3 Hours.
An introduction to historical, philosophical, descriptive, and experimental research in music education and present research practices in music education.

MUSI 5364. ASSESSMENT IN MUSIC EDUCATION. 3 Hours.
Assessment techniques that are appropriate to music study will be reviewed and examined. The focus will include interpreting standardized test results and the development of appropriate and effective measurement tools to use in music classrooms.

MUSI 5365. MEANING & REPRESENTATION IN MUSIC. 3 Hours.
This course will explore the basic questions of meaning in music, including the question of whether or not music can truly have meaning at all. Students will explore various philosophical, scientific, and musical (i.e. from composers and performers) viewpoints through readings, discussion, and writing.

MUSI 5366. JAZZ STYLE AND ANALYSIS. 3 Hours.
An in depth examination of the improvisational techniques used by prominent jazz musicians. Topics will include transcription and theoretical analysis over different periods and styles in jazz.

MUSI 5371. PEDAGOGY OF MUSIC HISTORY. 3 Hours.
Survey and practice materials and methods for teaching music history at the K-12 level.

MUSI 5387. ANALYSIS OF POPULAR MUSIC. 3 Hours.
This course will explore form, melody, harmony, and voice-leading in a variety of popular styles since the early 20th century.

MUSI 5388. 20TH CENTURY FORM & TECHNIQUE. 3 Hours.
Introduction to twentieth-century form and techniques, as well as relevant analytical methods and compositional strategies.

MUSI 5389. POST-TONAL ANALYSIS. 3 Hours.
Study of pitch, harmony, rhythm, & form in music from Debussy to the present.

MUSI 5390. LINEAR ANALYSIS. 3 Hours.
An introduction to the methods of linear analysis and harmonic reduction. Seminar designed to meet the needs of students desiring to become theorists or teachers of theory.

MUSI 5391. CONFERENCE COURSE IN MUSIC. 3 Hours.
Special problems in music. Topic may change from semester to semester. May be repeated for credit. Prerequisite: Permission of instructor and Graduate Advisor.

MUSI 5392. ADVANCED SONATA THEORY. 3 Hours.
An in-depth examination of sonata form drawing on the concepts of Caplin's formal functions and Hepokoski and Darcy's sonata theory, including intensive writing and analysis assignments.

MUSI 5393. CONDUCTING. 3 Hours.
Applied lessons in conducting. This course is an in-depth study of conducting technique as applied to choral or instrumental ensembles. It may be repeated for credit as the content changes.

MUSI 5398. THESIS. 3 Hours.
The graduate student must be registered for MUSI 5398 when in consultation over the thesis with the advisor or supervisory committee. Prerequisite: MUSI 5363.

MUSI 5698. THESIS. 6 Hours.
The graduate student must be registered for MUSI 5698 in the semester or term in which the Master of Music degree will be conferred. Prerequisite: MUSI 5363.
Music - Graduate Programs

Graduate Programs in Music

The University of Texas at Arlington Department of Music features intensive programs in Music Education, Music Performance, Conducting, Jazz Studies, Jazz Composition, and Music Theory as well as a Performance Certificate in all instruments, conducting, and voice types. Located in the heart of a culturally vibrant metropolitan area, UT Arlington is perfectly situated to help students realize their educational and career goals. Large enough to offer a broad range of opportunities, but small enough to value you as an individual, we're sure you'll find UT Arlington the right place to study your craft.

Fellowships

Fellowships, when available, will be awarded on a competitive basis. The Graduate Advisor should be notified of your interest in these fellowships at the time of your application. Nominees for the Graduate School Master’s Fellowship in Music will be selected based on the following criteria:

- Candidates must be new students entering in the fall semester, with a minimum of 9 hours of enrollment in both long semesters to retain their fellowships.
- The minimum undergraduate GPA requirement is 3.00, as calculated by the Graduate School, plus a GPA of 3.0 for any graduate credit hours.
- Transcript of a completed bachelor’s degree in music from an accredited institution (or its demonstrated equivalent).
- Three letters of recommendation

Master of Music in Music Education

ADMISSION REQUIREMENTS

The Department of Music has the following requirements for entry into the Master of Music in Music Education degree program.

Unconditional Admission

Requirements for unconditional admission into the program are:

a. Three letters of recommendation speaking to the student’s potential for success from references familiar with the student’s academic background.
b. Philosophy of Music Education (no more than 2 pages-typed).
c. A minimum 3.0 GPA in the last 60 hours of undergraduate work as calculated by Graduate Admissions.
d. Bachelor’s degree in music or its demonstrated equivalent.
e. Submitted application to the Department of Music (see the departmental website (https://www.uta.edu/music/) for more information).

Probationary Status

A student showing a deficiency in any of the above criteria and showing promise for successful graduate study may still be admitted on a probationary basis upon the recommendation of the Graduate Studies Committee. The conditions of the probation will be outlined in the letter of admission. (The Music Department does not have the authority to lower University TOEFL score requirements for any student.)

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but who other wise appears to meet admission requirements may be granted provisional admission.

Denied Admission

An applicant can be denied admission based on the recommendation of the Graduate Studies Committee. Applicants may reapply for admission if the deficiencies in credentials that led to denial are remedied.

Deferred Admission

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

TOEFL Requirement

Applicants whose native language is not English must demonstrate proficiency in English by earning a total score of at least 79 on the internet-based Test of English as a Foreign Language examination (TOEFL iBT).

Those who do not meet the English proficiency requirement must satisfactorily complete courses in the ESOL area, as approved by the program and the Graduate Admissions.
DEGREE REQUIREMENTS

The program is designed for the student who has a Bachelor’s degree in music. A minimum of 30 semester hours is required if the student chooses to write a thesis. If the student chooses not to write a thesis, a minimum of 36 semester hours is required. Advisory examinations in music history and written theory may be administered to all students prior to enrollment or during their first semester as a degree-seeking student.

Non-Thesis Option

Coursework for the program includes:

**Required Courses**

- MUSI 5361: EARLY CHILDHOOD MUSIC
- MUSI 5364: ASSESSMENT IN MUSIC EDUCATION
- MUSI 5365: MEANING & REPRESENTATION IN MUSIC
- MUSI 5357: CURRENT TRENDS IN MUSIC EDUCATION

**Total Hours**

36
Six (6) hours of free choice electives may be selected from ensembles, private instruction, music history, music theory, jazz studies and repeated special topics courses. Up to six (6) hours of graduate credit from other disciplines may be considered if relevant to the degree, subject to approval by the Graduate Studies Committee. No more than two (2) semester hours of music ensembles may be counted toward the degree.

Total Hours 30

*Students who write a thesis will work closely with one or more members of the graduate faculty from the Department of Music on a research project in a specialized area of interest within the music education field. The student must register for MUSI 5398 when in consultation over the thesis with the advisor or supervisory committee. Students will receive a grade of R (Research in Progress), F (Fail), or W (Withdrawn). These hours do not count towards the degree hours.

Master of Music

ADMISSION REQUIREMENTS

The Department of Music has the following requirements for entry into the Master of Music degree program.

Unconditional Admission

a. Bachelor’s degree in music or its demonstrated equivalent (such as a music conservatory degree).
b. Three letters of recommendation are required, speaking to the student’s potential for success from references familiar with the student’s academic background.
c. A minimum 3.0 GPA in the last 60 hours of undergraduate work as calculated by the Graduate Admissions.
d. Submitted application to the Department of Music (see the departmental website for more information).

All admission criteria will be considered equally. Students meeting all the criteria, plus any track-specific requirements, will be granted unconditional admission.

Probationary Status

A student showing a deficiency in any of the above criteria and showing promise for successful graduate study may still be admitted on a probationary basis upon the recommendation of the Graduate Studies Committee. The conditions of the probation will be outlined in the letter of admission. (The Music Department does not have the authority to lower University TOEFL score requirements for any student.)

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Denied Admission

An applicant can be denied admission based on the recommendation of the Graduate Studies Committee. Applicants may reapply for admission if the deficiencies in credentials that led to denial are remedied.

Deferred Admission

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

Tracks are offered in Music Performance, Jazz Studies, Jazz Composition, Music Theory, and Conducting. The program is designed for the student who has a Bachelor's degree in music.

TOEFL Requirement

Applicants whose native language is not English must demonstrate proficiency in English by earning a total score of at least 79 on the Test of English as a Foreign Language internet-based examination (TOEFL iBT).

Those who do not meet the English proficiency requirement must satisfactorily complete courses in the ESOL area, as approved by the program and Graduate Admissions.

Advisory examinations in music history and written theory may be administered to all students prior to enrollment or during their first semester as a degree-seeking student.

MUSIC PERFORMANCE TRACK (INSTRUMENTAL AND VOCAL)

In addition to the general admission requirements, applicants for the Music Performance Track must perform the following:

a. Applicants must audition (in person or by submitting a tape or video link) with repertoire of at least college senior recital level. A repertoire list must be submitted for evaluation at the time of the audition. For further information, contact the Graduate Advisor.

JAZZ COMPOSITION TRACK

In addition, to the general admission requirements, applicants for the Jazz Composition Track must submit the following:

a. A portfolio of works, to include at least two (2) but not more than four (4) scores and recordings representing the applicant’s best work. At least two of these should be in the jazz genre. Live recordings are preferred; MIDI recordings are discouraged but will be accepted as a last resort. At least one of the works should be scored for a large jazz ensemble (ten or more performers). Links to both scores and audio files housed online for the included pieces (via SoundCloud, DropBox, etc.) should be sent in an email to the graduate advisor. Please do not attach the files in the email.

b. A performance audition is also required on your primary jazz instrument. Applicants should prepare two jazz pieces in contrasting styles and tempos, with at least one jazz standard included. A pianist will be available to accompany you, or you may arrange for your own accompaniment (such as a play-along recording). Stereo equipment may be provided but only upon advance notice by the applicant.

Coursework for the program includes:

**Required Courses**

- MUSI 5308 MUSIC HISTORY SELECTED TOPICS 3
- MUSI 5366 JAZZ STYLE AND ANALYSIS 3
- MUSI 5362 INTRODUCTION TO RESEARCH IN MUSIC 3
- MUSI 5355 REHEARSAL TECHNIQUES 3

4 semesters of Applied Study (MUSI 5348) with the last semester including a full length public performance/recital, which may serve as a thesis. 12

**Electives**

Select 6 credit hours from the following:

- MUSI 3394 DIGITAL MUSIC TECHNOLOGY
- MUSI 4327 TECHNIQUES AND TECHNOLOGY IN FILM COMPOSITION
- MUSI 5112 CHAMBER MUSIC (maximum of 3 repeats)
- MUSI 5308 MUSIC HISTORY SELECTED TOPICS (may be counted once as an elective if core requirement is met and the course is taken with a different emphasis)
- MUSI 5350 SELECTED TOPICS IN MUSIC PEDAGOGY
- MUSI 5360 ADVANCED TECHNOLOGY FOR MUSICIANS (MUSI 53XX (Applied lessons on a Jazz Instrument))
- MUSI 5365 MEANING & REPRESENTATION IN MUSIC
- MUSI 5388 20TH CENTURY FORM & TECHNIQUE
- MUSI 53XX (Applied lessons on a Jazz Instrument)

Choose 3 credit hours from the following (may be repeated):

- MUSI 5107 JAZZ ORCHESTRA
- MUSI 5108 JAZZ ENSEMBLE
- MUSI 5110 JAZZ COMBO

MUSIC THEORY TRACK

In addition, to the general admission requirements, applicants for the Music Theory Track must submit the following:

a. Samples of writing (minimum 2; at least 1 should have substantial analytical content).

b. Statement of purpose (max. 250 words).
c. Applicants must take Theory and History Proficiency exams upon admission. Students needing remedial work will be required to enroll in MUSI 5301 FORM AND STYLE ANALYSIS and/or MUSI 5354 SELECTED TOPICS IN MUSIC LITERATURE, as appropriate.*

* Piano Proficiency exam will be administered before, and as a condition of, graduation from the Masters program. Students are encouraged to enroll in Keyboard lessons as appropriate to prepare for these.

Final Master’s Examination

A final program examination is required of all Master of Music degree candidates. A final Master’s examination may result in:

a. An unconditional pass with a recommendation to the Graduate Dean that the candidate be certified to receive the degree.

b. A conditional pass with the requirement that additional conditions be met, which may include further work on the thesis or thesis substitute, additional coursework with a minimum specified grade point average or both (in all cases the final master’s examination must be repeated within a specified period).

c. Failure, with permission to be re-examined within a specified period; or

d. Failure, with recommendation to the Dean of Graduate Studies that the candidate be dismissed from the program. The Music Department limits to 2 the number of times the examination can be taken.

Admission Requirements

Certificate Admission Requirements

Students wishing to enroll only in the certificate program but not a graduate degree program may apply for admission to UT Arlington as a special student (non-degree seeking). Admission requires an undergraduate degree in music or its demonstrated equivalent and would be contingent upon an audition for a minimum of two faculty members. Students in this certificate program who later seek graduate degrees at UT Arlington may apply 12 hours of certificate coursework within six years of completion and award of the certificate, if they meet the admission requirements for the graduate degree and receive approval from the appropriate Graduate Studies Committee and the Dean of Graduate Studies. Admission as a special student in no way guarantees subsequent unconditional admission into a graduate program or into the Graduate School.
**TOEFL Requirement**

Applicants whose native language is not English must demonstrate proficiency in English by earning a total score of at least 79 on the Test of English as a Foreign Language internet-based test (TOEFL iBT).

**Certificate in Performance**

The Certificate in Performance requires 15 hours of coursework, including 4 semesters of lessons with the last semester including a full-length recital, and three semesters of a Major Ensemble or a combination of a Major Ensemble or Keyboard Accompaniment (for Keyboard Players only). It is currently available for all instruments and voice types:

<table>
<thead>
<tr>

<tr>
<td>3 semesters of a Major Ensemble (MUSI 51XX) (For Keyboard Players only-3 semesters of either a Major Ensemble 51XX OR Keyboard Accompaniment MUSI 5190)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Hours** 15
Music - Undergraduate Programs

Overview

The University of Texas at Arlington is a member of the National Association of Schools of Music.

The Department of Music offers the Bachelor of Music degree (1) in preparation for E.C.-12 teacher certification; (2) in Performance (woodwind, brass, percussion, keyboard, strings, or voice); (3) in Theory; (4) in Composition; (5) in Jazz Studies; (6) in Music/Business; and (7) in Audio Production and a Bachelor of Arts degree in Music Industry Studies. Music students must meet all the requirements of one of these specializations to receive the Bachelor of Music degree. All degree plans leading to a Bachelor of Music degree include offerings which provide a solid foundation in music theory, history, and literature and require a concentration in a specific instrument/voice. The music department also offers a Bachelor of Arts in Music Industry Studies that requires the student to meet all of the requirements for that specialization.

The mission of the UT Arlington Department of Music is to create an environment in which individuals are inspired to become innovative and creative musical leaders by offering integrated curricular content, skill development, and exceptional programming relevant to a culturally diverse urban community.

The Music Department’s goals and objectives for academic and artistic enrichment of the university and the extended community include: (1) offering curricula leading to a baccalaureate degree and graduate programs that provide students with the opportunity to realize their inherent musical potential, (2) offering degree options that recognize and nurture students’ abilities and talents to make contributions of excellence in the fields of music, and (3) preparing students for further graduate study and/or professional careers in music by meeting curricula criteria, performance standards, and academic expectations.

All prospective music majors must audition for proper placement in their respective performance areas and take a music theory placement test. Information concerning auditions and placement tests is available in the Music Office. Students returning after two long semesters away from University must re-audition and be re-admitted to the department. Exceptions are if student has previously completed all required private lessons and recitals.

All Bachelor of Music majors are required to pass the sophomore proficiency exam on their major instrument. For transfer students who transfer in at least four semesters of lessons and meet the proficiency requirements, the audition may serve as the proficiency exam. For transfer students who do not meet the necessary proficiency requirements, they will be enrolled in MUSI 2223 for applied lessons. Transfer students may take MUSI 2223 for as many semesters as they have transfer credits from another institution.

For example, if a student transfers in four semesters of lessons, they may take MUSI 2223 up to four times, but they may attempt the proficiency exam at the end of any semester if they are ready. If a transfer student transfers in three semesters of lessons, they may be placed in the fourth semester of the lesson sequence or in MUSI 2223. The lesson sequence is defined as the required list of applied lessons required under an individual student’s degree plan. That student could take MUSI 2223 a total of three times or, with instructor approval, could move to the fourth semester of lessons after one or two semester(s) of MUSI 2223. Once a transfer student enters the lesson sequence, they are no longer eligible for placement in MUSI 2223.

Students can only attempt the proficiency exam two times. If they fail the sophomore proficiency exam the first time (either in MUSI 2223 or MUSI 22XX), they will receive a grade of Incomplete (I) for the semester, and they will be required to enroll in MUSI 2222 the following semester. At the end of MUSI 2222, students will be required to attempt the proficiency exam for a last time. If students do not successfully pass the proficiency exam, they will not be allowed to remain a Bachelor of Music major. If they pass the second attempt at the sophomore proficiency, their grade for fourth-semester lessons (MUSI 22XX) or preparatory lessons (MUSI 2223) will be changed to the grade earned in their first attempt at 22XX/2223. If the student fails their second attempt at the sophomore proficiency, their grade for fourth-semester lessons (MUSI 22XX) or preparatory lessons (MUSI 2223) will automatically be changed to “F.”

All students wishing to pursue the Bachelor of Music Degree with the Jazz Studies Option must pass the jazz performance proficiency exam upon completion of MUSI 3226. Students can attempt the proficiency exam two times. Students failing to pass the jazz proficiency exam on the second attempt will not be permitted to continue in the Jazz Studies Option. Successful completion of the jazz proficiency exam is a prerequisite for enrollment in:

<table>

</tr>
</tbody>
</table>
An audition or permission of the instructor is required for all large ensembles. All University students, regardless of major, are permitted to audition for and participate in all music department ensembles: concert bands, marching band, jazz ensembles, choirs, and orchestra.

All Bachelor of Music students are required to pass the Theory Proficiency exam.

All Bachelor of Music students are required to enroll in a large ensemble each semester in residence. Any student not enrolled in a large ensemble by the end of Late Registration will be given a warning and advised to do so, and students that are still not registered in a large ensemble after Census date may be removed from the music program and required to re-audition in a subsequent semester in order to be re-admitted. Ensembles that meet this requirement, as well as any minimum requirements for number(s) of semester in specific ensembles, are determined by each degree plan. Residence is defined as any semester that a student is enrolled in any private lesson section or enrolled in 6 or more semester hours at the university, except during student teaching or music industry studies internship.

All students are strongly urged to refer to the sections on Academic Regulations and Degree Programs in the current UT Arlington Undergraduate Catalog. Students seeking teacher certification should read the College of Education section of this catalog concerning admission to teacher education programs and state requirements for certification.

In addition to fulfilling University and the College of Liberal Arts requirements for admission to a degree program, students planning to be music majors must also fulfill the listed Music Department requirements.

Students must receive a C or better in all music courses in order to graduate. If a student does not earn a C or better, it may not count as a prerequisite for any other course.

If a student fails the same music degree-required course three times (making a D or F), the student must receive a C or better in their fourth attempt of the class or be dismissed from the Music program. They will not be permitted to take the course for credit at UT Arlington in subsequent semesters.

Students should expect, in addition to attending weekly private lessons, a minimum preparation (individual practice) of five hours per week in courses granting two hours credit, 10 hours per week in courses granting three hours credit, and 12 hours per week in courses granting four hours credit.

Bachelor of Music Students must complete their lesson sequence before they can take elective lessons (MUSI 0171 or MUSI 0271) on their primary instrument.

All private instruction, except MUSI 0171 or MUSI 0271, requires a jury.

Music majors must complete a minimum of 36 hours at the 3000/4000 level, at least 24 of which must be in music.

Those music courses available to non-music majors are indicated in the course description. Individual instruction courses are open in limited numbers to all University students.

Total Hours  121

Minimum 3 hours must be 3000 level or higher

Oral Communication and Computer Use Competence Requirements

Students majoring in music are required to demonstrate computer use and oral communication competencies.

Computer use proficiency can be demonstrated by:

a. successful completion of MUSI 3394; or
b. successful completion of CSE 1301 or INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING; or
c. passing the University computer use competency exam.

Oral communication proficiency can be demonstrated by:

a. successful completion of MUSI 3308 or MUSI 3309; or
b. successful completion of one of the following:
   COMS 1301  FUNDAMENTALS OF PUBLIC SPEAKING  3
   COMS 2305  BUSINESS AND PROFESSIONAL COMMUNICATION  3
   COMS 3315  COMMUNICATION FOR EDUCATORS  3

Students should discuss these options with their undergraduate advisor who may also provide a list of other courses approved by the University of meet these requirements.

Requirements for a Minor in Music

Eighteen hours of music, six hours of which must be 3000/4000 level.
COURSES

PHIL 1301. FUNDAMENTALS OF REASONING. 3 Hours.
This course is an introduction to critical thinking, which is a process of identifying, analyzing, evaluating, and constructing reasoning as found in texts, media, politics, and everyday personal interactions. Students will be introduced to what constitutes good reasoning through a range of topics including: formal logic; fallacious reasoning; cognitive biases; reasoning with probability, statistics, and numbers; and guarding against disinformation.

PHIL 1304. CONTEMPORARY MORAL PROBLEMS. 3 Hours. (TCCN = PHIL 2306)
Examination of ethical problems and theories which have a bearing on contemporary life. Texts may include both classical and contemporary ethical writings and deal with problems such as the conditions under which life may be taken (abortion, capital punishment, medical ethics), business ethics, social justice, and individual rights.

PHIL 2300. INTRODUCTION TO PHILOSOPHY. 3 Hours. (TCCN = PHIL 1301)
An examination of one or more basic problems of lasting interest to philosophers. Typical problems may include human nature and limits of knowledge. Formerly listed as PHIL 1300. Credit cannot be received for both PHIL 1300 and PHIL 2300.

PHIL 2311. LOGIC. 3 Hours. (TCCN = PHIL 2303)
The development of formal and symbolic systems (categorical, propositional, and predicate) for the analysis of arguments.

PHIL 2312. ETHICS. 3 Hours.
Ethics is the philosophical study of morality. This course is an introduction to the main normative ethical theories, such as theological voluntarism, utilitarianism, and Kantianism. A normative ethical theory provides an answer to the question, "What is it that makes right acts right?.

PHIL 2313. PHILOSOPHY OF THE ARTS. 3 Hours.
Problems in the philosophy of art and art criticism; the history of aesthetic theory.

PHIL 2314. PERSPECTIVES ON SCIENCE AND MATHEMATICS. 3 Hours.
Topics and episodes in the history of science and mathematics from a philosophical point of view. Students are brought to understand that science has a fascinating history, is underpinned by deep philosophical presuppositions, and depends upon special social and cultural factors for its continued growth and revision.

PHIL 2315. TOPICS IN PHILOSOPHY. 3 Hours.
In-depth treatment of philosophical topics or movements, such as Existentialism, Philosophy of Science Fiction, Brain and Mind, Asian Philosophy. May be repeated for credit as content changes.

PHIL 2316. COMPUTATION, MIND, AND PARADOX. 3 Hours.
A philosophical and historical introduction to the foundations of logic and mathematics, the psychology of reasoning, and the computational theory of mind. Topics may include: logic, set theory, axiom systems; number and infinity; fallacies of deductive and probabilistic reasoning; Bayesian epistemology; algorithms; artificial intelligence, computational theories of mind and brain.

PHIL 3301. HISTORY OF PHILOSOPHY: ANCIENT PHILOSOPHY. 3 Hours.
The beginning and the early developments of the western philosophic tradition. Ancient Greek philosophy, basically the Pre-Socratics, Socrates, Plato and Aristotle.

PHIL 3302. HISTORY OF PHILOSOPHY: ROMAN AND MEDIEVAL PHILOSOPHY. 3 Hours.
Post-Aristotelians (e.g., the later Stoics, the Epicureans, Neo-Platonists); philosophy of the early Church Fathers through Aquinas and later Scholastics.

PHIL 3303. HISTORY OF PHILOSOPHY: RENAISSANCE AND EARLY MODERN EUROPEAN PHILOSOPHY. 3 Hours.
The philosophical views of Galileo, Newton, Bacon, and Hobbes, the Continental Rationalists and British Empiricists, and a brief introduction to the philosophy of Immanuel Kant.

PHIL 3304. HISTORY OF PHILOSOPHY: NINETEENTH AND EARLY TWENTIETH CENTURY PHILOSOPHY. 3 Hours.
Major philosophers from Kant to the early 20th century.
PHIL 3307. SEMINAR IN RESEARCH METHODS AND PHILOSOPHICAL WRITING. 3 Hours.
Examination of philosophical methodology; philosophical analysis, philosophical writing, discipline-specific bibliographic tools, etc. Students write a series of short papers on topics of interest. Prerequisite: PHIL 2311 and one other PHIL course.

PHIL 3315. EXISTENTIALISM. 3 Hours.
Readings in existentialist philosophy and literature with a special emphasis on such themes as alienation, anxiety, the self, absurdity, value, freedom, and responsibility. Texts may include writings from Kierkegaard, Nietzsche, Heidegger, Sartre, Camus, de Beauvoir, Jaspers, and others.

PHIL 3316. PHILOSOPHY OF RELIGION. 3 Hours.
Problems that engage philosophy of religion (e.g., the existence of God, theodicy, religious language) and the way these problems have been treated by some outstanding Western thinkers.

PHIL 3317. PHILOSOPHICAL LOGIC. 3 Hours.
The method and goals of scientific scholars and inquiry. The distinction between formal and empirical sciences, laws and theories, measurement, the role of observation and experiment, and probability. Formerly listed as PHIL 4315. Credit cannot be received for both PHIL 4315 and PHIL 3318.

PHIL 3318. THE PHILOSOPHY OF SCIENCE AND TECHNOLOGY. 3 Hours.
Investigation of the basis (if any) of political obligation. Analysis of social and political concepts, such as equality, liberty, rights, and justice. Discussion of social and political theories, such as anarchism, contractualism, Marxism, and conservatism.

PHIL 3324. BUSINESS ETHICS. 3 Hours.
Investigation of a single moral issue or a cluster of issues that arise in the context of a particular profession. Examples of the former are abortion, punishment, freedom of speech, the environment, and the moral status of animals. Examples of the latter are business ethics, legal ethics, engineering ethics, nursing ethics, and computer ethics. May be repeated for credit as content changes.

PHIL 3330. SOCIAL AND POLITICAL PHILOSOPHY. 3 Hours.
Analysis of social and political concepts, such as equality, liberty, rights, and justice. Discussion of social and political theories, such as anarchism, contractualism, Marxism, and conservatism.

PHIL 3341. TOPICS IN BIOETHICS. 3 Hours.
Investigation of a single moral issue or a cluster of issues that arise in the context of the medical profession. Examples of possible topics are resource allocation, surrogate decision-making, the philosophy of mental illness, research ethics, reproductive ethics, and end of life care. May be repeated for credit as content changes. Prior completion of PHIL 3319 (Biomedical Ethics) is strongly recommended, but not required.

PHIL 3350. TOPICS IN ANCIENT GREEK PHILOSOPHY. 3 Hours.
An in-depth examination of a particular figure or topic in the field of ancient Greek philosophy. Works studied may include those of the Pre-Socratics, Plato, Aristotle, Hellenistic, and Neoplatonic philosophers.
PHIL 4292. CONFERENCE COURSE IN BIOETHICS. 2 Hours.
This course is an independent study offering students an opportunity for in-depth study of a specific topic in bioethics. Requires permission of the department chair and the instructor.

PHIL 4318. PHILOSOPHY AND LITERATURE. 3 Hours.
The role of ideas in literature and an analysis of the actual contacts between philosophy and the dominant world views of the great writers of literature.

PHIL 4380. PHENOMENOLOGY. 3 Hours.
Phenomenology is a major philosophical movement based on the methodically controlled description of conscious experience, as uncovered at first introspectively. This course focuses on (1) the origin of the movement in common epistemological problems arising in philosophy, psychology, mathematics, and the natural sciences, (2) the development of the movement's method, and (3) a close study of some influential phenomenologists, including Husserl, Sartre, and Merleau-Ponty. Contemporary connections to the neuroscientific study of consciousness are also explored.

PHIL 4383. PHILOSOPHY OF MIND. 3 Hours.
This course is a non-exhaustive survey of topics central to contemporary analytic philosophy of mind: the mind/body problem, functionalism, consciousness, intentionality, mental causation, and perception. Readings include work by figures such as Smart, Armstrong, Putnam, Block, Kripke, Chalmers, and Siegel. Evaluation will likely involve some subset of: a midterm examination, short papers, a more substantial research project, and a final examination, on each of which students will be assessed for conceptual clarity, communicative economy, and critical reasoning.

PHIL 4385. THEORY OF KNOWLEDGE. 3 Hours.
Problems which arise from attempts to give an account of human knowledge. Skepticism, perception, induction, or the nature of truth. Note: Although there are no prerequisites for this course, students who have had no previous philosophy courses may find the material difficult.

PHIL 4386. METAPHYSICS. 3 Hours.
Problems which arise from attempts to give an account of reality and its manifestations. Possibility and necessity, causality, the nature of events, mind-body, and universals. Note: Although there are no prerequisites for this course, students who have had no previous philosophy courses may find the material difficult.

PHIL 4387. TOPICS IN VALUE THEORY. 3 Hours.
In-depth treatment of an issue or topic within value theory, which is broadly construed to include moral philosophy (and its subfields, such as moral epistemology and moral psychology), social philosophy, political philosophy, philosophy of law, aesthetics, philosophy of religion, and feminist philosophy. May be repeated for credit with permission of the department.

PHIL 4388. TOPICS IN THE HISTORY OF PHILOSOPHY. 3 Hours.
In-depth treatment of a single important philosophical writer, a related group of writers, or an extended tradition. May be repeated for credit with permission of the department.

PHIL 4389. TOPICS IN PHILOSOPHY AND THE SOCIAL SCIENCES. 3 Hours.
In-depth treatment of one or more of the social sciences from a philosophical perspective: may include the philosophy of history, social philosophy, political philosophy, philosophy of the social sciences, or any specific subject therein. Credit may not be granted for PHIL 4311 or PHIL 4317 (no longer offered) and PHIL 4389. May be repeated for credit with permission of the department.

PHIL 4391. UNDERGRADUATE CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering research of individual students or study in designated areas. May be repeated for credit.

PHIL 4392. CONFERENCE COURSE IN BIOETHICS. 3 Hours.
This course is an independent study offering students an opportunity for in-depth study of a specific topic in bioethics. Requires permission of the department chair and the instructor.

PHIL 4394. SENIOR THESIS. 3 Hours.
During the senior year, the student completes a thesis under the direction of a faculty member in the major department. Required of all pre-professional track philosophy majors and of all philosophy majors who are members of the University Honors College.

PHIL 5391. CONFERENCE COURSE IN PHILOSOPHY. 3 Hours.
May be taken only with the permission of the instructor and Graduate Advisor.

PHIL 5392. TOPICS IN THE HISTORY OF PHILOSOPHY. 3 Hours.
Consideration in depth of the work of a single philosopher or a related philosophical school against the background of the development of philosophy. May be repeated for credit as the topic changes.

PHIL 5393. PHILOSOPHICAL PERSPECTIVES ON THE HUMANITIES. 3 Hours.
A philosophical inquiry into problems and issues of relevance in humanistic disciplines. May be repeated for credit as the topic changes.

PHIL 6389. SEMINAR IN PHILOSOPHICAL ANALYSIS. 3 Hours.
Seminar-style treatment of some major problem in contemporary philosophy. May be repeated for credit as the topic changes.

PHIL 6394. TOPICS IN SYSTEMATIC PHILOSOPHY. 3 Hours.
In-depth treatment of an issue or issues in metaphysics, epistemology, ethics, aesthetics or related subdisciplinary areas. May be repeated for credit as the topic changes.
Philosophy, Classics, and Humanities - Undergraduate and Certificate Programs

Overview
A major in philosophy is built on the central texts in the history of Western thought. Philosophy focuses on the perennial problems raised by the encounter of human beings with their history, culture, and the world. It emphasizes methods of analysis and clarity of argumentation. Students who major in philosophy have the broadest possible preparation in the liberal arts.

Students who complete a major in philosophy are prepared to enter either graduate programs or the world of work. In addition to providing vocational skills and a solid foundation for graduate work in the discipline, a major in philosophy constitutes appropriate and strong preparation for graduate work in other academic disciplines as well as in professional programs in a broad variety of fields. The Department of Philosophy and Humanities is prepared to work with students who are interested in postgraduate professional education to assure that their preparation meets disciplinary and/or professional criteria and expectations in areas including law, business administration, and theology. The faculty of the Department of Philosophy and Humanities also work with advisors in the Health Professions Advising Office of the College of Science to ensure that philosophy majors pursuing a pre-medical curriculum are kept abreast of required and recommended courses outside the major.

Requirements for Admission to a Major in Philosophy
Students should have completed 30 hours of core with 30 hours at UT Arlington, or 40 hours of core with 12 hours at UT Arlington with an overall GPA greater than 2.0. Before being accepted into the major in philosophy, students must also have passed a course in symbolic logic (PHIL 2311 LOGIC or the equivalent). Students may be accepted as pre-philosophy majors if the above standards are not met.

Requirements for a Minor in Philosophy
A minor in philosophy requires 18 semester hours, at least six of which must be 3000/4000 level.

Requirements for a Minor in Classical Studies
A minor in classical studies requires at least 18 semester hours, at least six of which must be 3000/4000 level, in approved classical studies courses. There are three options for the classical studies minor: Greek Language, Latin Language, Classical Civilization, and Ancient Studies.

Requirements for a Minor in Medical Humanities and Bioethics
A minor in medical humanities and bioethics requires 18 hours. There are three required courses: HUMA 3300, PHIL 3319, and the student's choice from a list of Disability Studies courses.

Requirements for the Certificate in Ethics
The certificate in ethics requires at least 15 semester hours in approved ethics courses.

Requirements for the Certificate in Medical Humanities
The certificate in medical humanities requires at least 12 semester hours in approved courses.

Undergraduate Advising
All philosophy majors are directed in their program by a designated undergraduate advisor. In addition, the following special advisors are available:

Graduate Work in Philosophy: Majors who are interested in graduate work in philosophy should consult the departmental graduate advisor during their junior year.

Pre-Law: Majors who intend to apply to law school will find courses in logic, philosophy of law, political philosophy, and ethics particularly useful. Interested students should consult the Philosophy/Pre-law faculty advisor for assistance in course selection and application procedures.

Philosophy/Business Administration Minor: It is possible to combine the philosophy major with a business administration minor in preparation for admission to the UT Arlington MBA program. (See Liberal Arts Major/Business Administration Minor section in the introduction of the College of Liberal Arts.) The Philosophy/Business Administration faculty advisor will assist students in coordinating their program and meeting admissions requirements either at UT Arlington or other schools.

Pre-Theological: Majors who plan to enter a school of theology should consider a minor in classics and foreign language preparation in Greek and/or Latin. Electives in ethics and philosophy of religion are particularly recommended. Interested students should consult the Philosophy/Pre-ministerial faculty advisor for additional assistance.
Pre-Medical: A departmental faculty advisor is available to assist majors who intend to apply to medical school. The major program will be coordinated with the Health Professions Advising Office of the College of Science.

**Oral Communication Competency**

Students majoring in philosophy may demonstrate competency in oral communication by

a. successful completion of a specific course approved by the Department of Philosophy and Humanities for this purpose, or
b. successful completion of any course from among those approved by the Undergraduate Assembly.

**Computer Use Competency**

Students majoring in philosophy may demonstrate competency in computer use by

a. successful completion of PHIL 3307 SEMINAR IN RESEARCH METHODS AND PHILOSOPHICAL WRITING, or
b. successful completion of any course from among those approved by the Undergraduate Assembly for this purpose, or
c. passing the University proficiency examination in computer use.

### REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE IN PHILOSOPHY (GENERAL TRACK)

**Pre-Professional Courses**

General Core Requirements (p. 47) 42

<td>3</td>
</tr>
<tr>
<td>ENGL 1302 RHETORIC AND COMPOSITION II</td>
<td>3</td>
</tr>
</tbody>
</table>

**Program Requirements**

Modern and Classical Languages: 1441 and 1442 8

Electives sufficient to complete the 120 credit hours required for the degree.

**Professional Courses**

Major

| PHIL 2300 INTRODUCTION TO PHILOSOPHY | 3 |
| PHIL 2311 LOGIC | 3 |
| PHIL 3307 SEMINAR IN RESEARCH METHODS AND PHILOSOPHICAL WRITING | 3 |

Additional hours (12 advanced hours, with at least six hours at the 4000 level) 18

**Total Hours** 84

1 In consultation with the undergraduate philosophy advisor and in light of individual aims and interests, students in the general track are to select electives concentrated primarily in one or two areas of secondary emphasis—for example, business, classical studies, cognitive science, computer science engineering, history, humanities/liberal arts, mathematics, or political science.

### Requirements for a Bachelor of Arts Degree in Philosophy (Pre-Professional Track)

**Pre-Professional Courses**

Electives sufficient to complete the 120 credit hours required for the degree.

**Professional Courses**

| PHIL 2300 INTRODUCTION TO PHILOSOPHY | 3 |
| PHIL 2311 LOGIC | 3 |
Requirements for a Bachelor of Arts Degree in Philosophy (Pre-Law Option)

Students interested in the Pre-Law Option must complete the requirements for the Pre-Professional Track degree in philosophy, while selecting their elective course work in consultation with the Philosophy/Pre-Law faculty advisor. Recommended philosophy courses for the Pre-Law Option include

PHIL 1301 FUNDAMENTALS OF REASONING 3
PHIL 1304 CONTEMPORARY MORAL PROBLEMS 3
PHIL 2312 ETHICS 3
PHIL 3317 PHILOSOPHICAL LOGIC 3
PHIL 3318 THE PHILOSOPHY OF SCIENCE AND TECHNOLOGY 3
PHIL 3319 BIOMEDICAL ETHICS 3
PHIL 3320 PHILOSOPHY OF LAW 3
PHIL 3321 PHILOSOPHY OF LANGUAGE 3
PHIL 3324 BUSINESS ETHICS 3
PHIL 3330 SOCIAL AND POLITICAL PHILOSOPHY 3
PHIL 3340 TOPICS IN APPLIED ETHICS 3
PHIL 4385 THEORY OF KNOWLEDGE 3
PHIL 4387 TOPICS IN VALUE THEORY 3

Requirements for a Bachelor of Arts Degree in Philosophy (Mind, Language, and Cognition Option)

Students interested in the Mind, Language, and Cognition (MLC) Option must complete the requirements for the General Track degree in philosophy, with a minor in linguistics, and psychology as their area of secondary emphasis for elective course work. Although specific major, minor, and elective courses should be selected in consultation with the MLC advisor in philosophy, typical courses include

PHIL 1301 FUNDAMENTALS OF REASONING 3
PHIL 1304 CONTEMPORARY MORAL PROBLEMS 3
PHIL 2312 ETHICS 3
PHIL 3317 PHILOSOPHICAL LOGIC 3
PHIL 3318 THE PHILOSOPHY OF SCIENCE AND TECHNOLOGY 3
PHIL 3319 BIOMEDICAL ETHICS 3
PHIL 3320 PHILOSOPHY OF LAW 3
PHIL 3321 PHILOSOPHY OF LANGUAGE 3
PHIL 3324 BUSINESS ETHICS 3
PHIL 3330 SOCIAL AND POLITICAL PHILOSOPHY 3
PHIL 3340 TOPICS IN APPLIED ETHICS 3
PHIL 4385 THEORY OF KNOWLEDGE 3
PHIL 4387 TOPICS IN VALUE THEORY 3
LING 2301  INTRODUCTION TO THE STUDY OF HUMAN LANGUAGE  3
LING 3311  PRINCIPLES OF LINGUISTIC ANALYSIS  3
LING 3330  PHONETICS AND PHONOLOGY  3
LING 3340  SYNTAX I  3
LING 3345  CRITICAL REASONING IN LINGUISTICS  3
LING 4303  SYNTAX II  3
LING 4317  SOCIOLINGUISTICS  3
LING 4335  LANGUAGE UNIVERSALS & LINGUISTIC TYPOLOGY  3
LING 4345  FORMAL SEMANTICS  3
LING 4347  PRAGMATICS  3
LING 4370  HISTORY OF LINGUISTICS  3
PHIL 2300  INTRODUCTION TO PHILOSOPHY  3
PHIL 2311  LOGIC  3
PHIL 3317  PHILOSOPHICAL LOGIC  3
PHIL 3318  THE PHILOSOPHY OF SCIENCE AND TECHNOLOGY  3
PHIL 3321  PHILOSOPHY OF LANGUAGE  3
PHIL 4383  PHILOSOPHY OF MIND  3
PHIL 4385  THEORY OF KNOWLEDGE  3
PHIL 4389  TOPICS IN PHILOSOPHY AND THE SOCIAL SCIENCES (Mind)  3
PSYC 1315  INTRODUCTION TO PSYCHOLOGY  3
PSYC 4332  THEORIES OF HUMAN LEARNING AND MEMORY  3
PSYC 4338  COGNITIVE NEUROSCIENCE  3

(Students who intend to apply to graduate school may elect to complete the requirements for the Pre-Professional Track degree in philosophy, with the minor in linguistics and elective course work in psychology.)

Requirements for a Bachelor of Arts Degree in Philosophy (Philosophy and Classics Option)

Students interested in the Philosophy and Classics Option typically complete the requirements for the General Track degree in Philosophy, with a minor in Classical Studies, and are required to fulfill their language requirement with Latin; with advisors’ approval, students may choose to substitute Greek, French or German. Specific major, minor and elective courses should be selected in consultation with the philosophy undergraduate advisor and the director of Classical Studies. (Students who intend to apply to graduate school may elect to complete the requirements for the Pre-Professional Track degree in Philosophy, with the minor in Classical Studies, and the language hours in Latin.)

Minor in Philosophy

18 hours, at least six of which must be 3000/4000 level.

Minor in Classical Studies

The Minor in Classical Studies (p. 749) requires 18 hours, at least six of which must be 3000/4000 level. There are four options for the classical studies minor: Greek Language, Latin Language, Classical Civilization, and Ancient Studies. Interested students must consult with the advisor to determine which courses are required for each option.

Minor in Medical Humanities and Bioethics

The Minor in Medical Humanities and Bioethics (p. 870) requires 18 hours. There are three required courses: HUMA 3300, PHIL 3319, and the student’s choice from the listed Disability Studies courses.

Certificate in Ethics

To receive the certificate, a student must complete five courses from the following list:

PHIL 1304  CONTEMPORARY MORAL PROBLEMS  3
or PHIL 2312  ETHICS
or PHIL 3319  BIOMEDICAL ETHICS
or PHIL 3320  PHILOSOPHY OF LAW
or PHIL 3324  BUSINESS ETHICS
or PHIL 3330  SOCIAL AND POLITICAL PHILOSOPHY
or PHIL 3340  TOPICS IN APPLIED ETHICS
or PHIL 4387  TOPICS IN VALUE THEORY

With the permission of the departmental adviser, one of the five required courses may be replaced by a course from the following list:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BDEC 3311</td>
<td>BUSINESS DECISION MAKING - PLANNING, ETHICS, SUSTAINABILITY, &amp; AGILITY</td>
</tr>
<tr>
<td>or COMM 3310</td>
<td>COMMUNICATION LAW &amp; ETHICS</td>
</tr>
<tr>
<td>or EDUC 4346</td>
<td>SECONDARY SCHOOL CULTURE AND THE TEACHING PROFESSION</td>
</tr>
<tr>
<td>or JOUR 2346</td>
<td>REPORTING</td>
</tr>
<tr>
<td>or LSHP 4312</td>
<td>LEADER ETHICS</td>
</tr>
<tr>
<td>or MANA 4340</td>
<td>BUSINESS AND SOCIETY</td>
</tr>
<tr>
<td>or MILS 2251</td>
<td>INDIVIDUAL/TEAM DEVELOPMENT</td>
</tr>
<tr>
<td>or PSYC 3304</td>
<td>ANALYSIS &amp; MANAGEMENT OF BEHAVIOR</td>
</tr>
</tbody>
</table>

**Certificate in Medical Humanities**

To receive the certificate, a student must complete HUMA 3300 and three courses from an approved list (p. 871). Students can count toward the certificate no more than two courses from a single department. At least two courses must be from the College of Liberal Arts.
Political Science

Undergraduate Degrees

- Bachelor of Arts in Political Science (p. 981)
- Minor in Political Science (p. 984)
- Fast Track Program

Graduate Degree

- Political Science, M.A. (p. 977)

COURSES

POLS 2311. GOVERNMENT OF THE UNITED STATES. 3 Hours. (TCCN = GOVT 2305)
( GOVT 2305). The constitution and government of the United States. The organization, procedures, and duties of the branches of the government, together with their accomplishments and defects.

POLS 2312. STATE AND LOCAL GOVERNMENT. 3 Hours. (TCCN = GOVT 2306)
( GOVT 2306). The principles and organization of American state, county, and municipal government, together with current problems and the constitution and government of Texas.

POLS 3301. INTRODUCTION TO GLOBAL ISSUES. 3 Hours.
Comparative perspectives on a broad range of cultural, linguistic, economic, political, and social issues confronting a globalized world today. Designed to draw attention to the multifaceted connections among nation-states, nongovernmental organizations, diverse ethnic, cultural, and religious groups, and populations around the world. Course taught as POLS 3301 and GLOBAL 2301. Credit will be granted in only one department.

POLS 3302. INTRODUCTION TO INTERNATIONAL RELATIONS. 3 Hours.
Introduction to the interplay between states, international organizations, multinational corporations, and popular or militant movements within the international system and to their continued search for wealth, power, and security.

POLS 3303. INTRODUCTION TO PUBLIC ADMINISTRATION. 3 Hours.
The scope and development of public administrative organizations; both the traditional and behavioral approaches to the treatment of administrative principles, decision making, and organizational environment.

POLS 3304. INTRODUCTION TO COMPARATIVE POLITICS. 3 Hours.
Cross-national and cross-cultural comparisons of political systems. Institutional structure, political process, dynamics of change, and ideology.

POLS 3305. GOVERNMENT IN URBAN AMERICA. 3 Hours.
Problems associated with the growth, diversity, and complexity of urban areas and governmental solutions. Urban regimes, neighborhood governments, electoral politics, and intergovernmental relations. Useful for students interested in urban management.

POLS 3306. LEGISLATIVE ORGANIZATION AND PROCEDURE. 3 Hours.
Internal and external influences on the U.S. Congress: rules, norms, committees, seniority, political parties, presidents, media, constituents and interest groups.

POLS 3307. COMPARATIVE STATE AND LOCAL POLITICS. 3 Hours.
Comparison of state and local political institutions and policy choices in the United States. Useful for students interested in state and local government policy innovations.

POLS 3308. POLITICS OF A TEXAS CITY: ARLINGTON CITY POLITICS. 3 Hours.
Describes the political processes over a period of fifty years from the immediate post-World War II years to the present. The outlines of Arlington city government, its structure, the changes, and personalities that have shaped it and held power. This course does not satisfy area distribution requirements.

POLS 3309. HEALTH POLITICS, POLICY, AND ADVOCACY. 3 Hours.
Explores health politics, policy, and advocacy in modern American politics in areas such as health care costs, the opioid epidemic, natural disasters, smoking and vaping, vaccines, and scooters. Considers how stakeholders such as patients, advocacy groups, hospitals, medical professionals, and insurance companies influence policy-making, and how health care policies shape patient care.

POLS 3310. RESEARCH METHODS AND POLITICAL ANALYSIS. 3 Hours.
How to study politics scientifically, through proper research design, quantitative and qualitative methods. Students are familiarized with a statistical package to analyze political data, which will fulfill the computer competency requirement. Prerequisites: POLS 2311, POLS 2312, Math 1301 or Math 1302, and Math 1308. Exceptions as approved by the Department.

POLS 3311. PUBLIC OPINION. 3 Hours.
Measurement of attitudes, public opinion and ideology, the learning and influencing of public opinion, and expression of public opinion in elections and mass political movements. The logic and practice of survey research.
POLS 3312. INTRODUCTION TO PUBLIC POLICY ANALYSIS. 3 Hours.
The American policymaking process from issue creation to program administration and evaluation. Policy models and methods of policy analysis. Oriented toward providing students with skills as a professional policy analyst.

POLS 3313. MODERN CRITICS OF SOCIETY AND POLITICS. 3 Hours.
Designed for both political science and other majors. Focus on writers like Banfield, Galbraith, Marcuse, Reich, Revel, Skinner, and Toffler.

POLS 3315. VIOLENCE & REPRESSION IN THE AMERICAS. 3 Hours.
Examination of extra-legal behavior in the Americas (particularly Latin America). Topics include human rights violations, repression, insurrection, terrorism, and revolution. Analysis of different causes and outcomes of such political participation. Prerequisite: POLS 2311 and POLS 2312.

POLS 3317. MEXICAN POLITICS AND U.S.-MEXICO RELATIONS. 3 Hours.
Current economic and political systems of Mexico and relevant issues in U.S.-Mexico relations. Trade, immigration, economic dependency, energy, contraband, and other topics. Offered as MAS 3317 and POLS 3317; credit will be given in only one department.

POLS 3319. CAUSES OF WAR. 3 Hours.
Introduces students to the causes of war including rationalist explanations, genetic and evolutionary impulses, psychological motivations, and group and structural incentives.

POLS 3327. AMERICAN POLITICAL PARTIES. 3 Hours.
The development and characteristics of the American political party system, including systematic goals, formal organizations, membership recruitment, ideological and issue orientations, electoral and participatory functions, and linkages in the political system.

POLS 3328. INTRODUCTION TO MIDDLE EAST POLITICS. 3 Hours.
The historical developments that have led to the current political, social, economic, and security order of the Middle East, as well as the contemporary challenges facing the region and its inhabitants. Prerequisites: POLS 2311 and POLS 2312.

POLS 3330. JUDICIAL BEHAVIOR AND THE JUDICIAL PROCESS. 3 Hours.
Decision making, role perception, recruitment and socialization of judges, and the relationship between attitudes and values of justices and their decisions. The judicial process and how courts relate to the larger political system and society. Especially recommended for pre-law majors.

POLS 3331. CONTEMPORARY ISSUES IN CIVIL LIBERTIES. 3 Hours.
The status and function of civil liberties in modern America emphasizing problem areas of Equal Employment Opportunity, invasion of privacy by government, obscenity and pornography, and corporate and industrial assaults on civil liberties.

POLS 3332. JURISPRUDENCE. 3 Hours.
An empirical and normative examination of the nature of law, legal reasoning, and modern legal systems, particularly in the U.S. Other topics: the origins of American legal concepts as they have evolved from earlier legal systems in the Western world and a comparative treatment of legal systems in the world today. Especially recommended for pre-law majors.

POLS 3336. STATE COURTS. 3 Hours.
An examination of state judicial institutions emphasizing the role of processes in determining judicial behavior and the composition of state courts. Examines the role of law and courts, judicial system structures, and judicial policy-making in state government. Prerequisite: POLS 2311 and POLS 2312.

POLS 3378. LATINO POLITICS. 3 Hours.
An overview of Latino/Hispanic political behavior, identity, and power that analyzes the social, economic, and political issues impacting the Latino/Hispanic community in the United States. To be offered as POLS 3378 and MAS 3378. Credit will be granted only once.

POLS 3379. LATINO POLITICAL THOUGHT. 3 Hours.
An overview of the development of Latino/Hispanic political thought from Iberian and Latin American political culture and philosophy to contemporary North American Latino/Hispanic political ideology and political thought. To be offered as POLS 3379 and MAS 3379. Credit will be granted only once.

POLS 3390. HONORS COLLOQUIUM. 3 Hours.
An interdisciplinary course designed to meet the needs of advanced undergraduates in the honors program.

POLS 4101. MOOT COURT. 1 Hour.
An understanding of legal debate from the perspective of student competitions, discussions of legal doctrines, and legal research methods. Statewide competitions required. This course does not satisfy area distribution requirements. May be repeated for total of 3 hours credit.

POLS 4102. POLITICAL SCIENCE SERVICE LEARNING. 1 Hour.
Students will engage in service learning placements to supplement political science course work with the goal of civic education and community involvement. Placements will be coordinated with the Center for Community Service Learning and students will be required to fulfill not only placement hours, but also additional reflection in writing in consultation with the faculty advisor. This course does not satisfy area distribution requirements.

POLS 4300. POLITICS IN POPULAR CULTURE. 3 Hours.
Use of film and video film, video television, novels, music, or other social media in the presentation of political ideas, opinions, and facts. Techniques, subject matter, and alternative forms of presentation. This course does not satisfy area distribution requirements.

POLS 4303. PUBLIC ADMINISTRATION AND THE POLITICAL PROCESS. 3 Hours.
The relationships of public administration at all levels with democratic institutions, including its interactions in the formulation and execution of public policies with the chief executive, the legislative and judicial branches, political parties, clientele groups, and the public at large.
POLS 4310. RESEARCH IN POLITICAL SCIENCE. 3 Hours.
Provides a hands-on research experience in political science suitable for students who are pursuing research-related careers or who aspire to attend graduate school. Students will gain exposure to best practices in data collection and political analysis. Prerequisite: previous or concurrent enrollment in POLS 3310 and permission of instructor.

POLS 4311. INTERNATIONAL RELATIONS AND POLITICAL PSYCHOLOGY. 3 Hours.
Examines psychological approaches to international politics. Topics may include personality and leadership traits, cognitive and emotional approaches, genetic characteristics and evolution, group decision-making, elite attitudes, public opinion, and social identity.

POLS 4312. INTERNATIONAL ORGANIZATIONS. 3 Hours.
This course introduces students to the institutions, decision-making, and activities of the world's leading multilateral organizations. Examples include the United Nations, NATO, the African Union, and the European Union. Students will focus on how organizations respond to contemporary global challenges such as civil wars, terrorism, human rights abuses, and economic crises. The course also teaches students how to apply theories of international relations to real-world policy problems.

POLS 4316. WOMEN IN THE POLITICAL PROCESS. 3 Hours.
This course introduces students to the unique experiences of women in the political process, the impact of these experiences on the political system, and theories of gender and politics. Offered as POLS 4316 and GWSS 4316; credit will be granted only once.

POLS 4317. ETHNIC GROUP POLITICS IN THE UNITED STATES. 3 Hours.
The influence of selected major ethnic groups with special attention given to organizational development, participation in political parties, leadership, ideology, immigration policy, current issues, and relations with the dominant culture and other ethnic groups. Offered as AAST 4317 and POLS 4317; credit will be granted in only one department.

POLS 4318. POLITICS OF AFRICAN AMERICANS. 3 Hours.
The influence of African-American politics on United States government and policies with special attention given to organizational development, participation in political parties, leadership, ideology, the Civil Rights movement, current issues, and relations with other ethnic groups. Offered as AAST 4318 and POLS 4318; credit will be granted in only one department.

POLS 4319. POLITICS OF MEXICAN AMERICANS. 3 Hours.
The influence of Mexican-American politics on United States government and policies with special attention given to organizational development, participation in political parties, leadership, ideology, the Chicano Movement, current issues, and relations with other ethnic groups. Offered as MAS 4319 and POLS 4319; credit will be granted in only one department.

POLS 4320. CIVIC ENGAGEMENT, CIVIL SOCIETY, AND COMMUNITY. 3 Hours.
The study of civic engagement, leadership, and political participation. The relationship of community to public policy, political elites and disenfranchised groups. May employ service learning.

POLS 4321. INTEREST GROUPS AND POLITICAL ADVOCACY. 3 Hours.
Examines the role and importance of organized interests in American politics and evaluates group influence and lobbying.

POLS 4322. ISSUES IN POLITICAL THEORY. 3 Hours.
Each time this course is offered it will focus on one particular issue central to the study of political theory for example, authority, justice, citizenship, methodology of the social sciences. May be repeated for credit when content varies.

POLS 4323. FEMINIST POLITICAL THOUGHT. 3 Hours.
Issues raised by the feminist critique of political theory; the exclusion of women from the political sphere until the 20th century; Marxist, liberal, and radical feminist political thought; alternative feminist conceptions of the political. Offered as POLS 4323 and GWSS 4323; credit will be granted only once.

POLS 4324. ELECTORAL BEHAVIOR. 3 Hours.
Major theories of candidate strategy and voter choice, including rational behavior and empirical democratic theory. Introduction to voting behavior analysis in contemporary elections.

POLS 4325. ELECTION STRATEGY AND CAMPAIGN MANAGEMENT. 3 Hours.
Strategies relating to elections and various aspects of managing campaigns, including the techniques of demographic survey, voting behavior analysis, opinion survey, issue research, and candidate research.

POLS 4326. POLITICAL IDEAS OF THE ANCIENT WORLD. 3 Hours.
Principal theorists and schools of political thought prior to 1500, with emphasis upon those making significant contributions to the political heritage of Western Europe.

POLS 4327. MODERN POLITICAL IDEAS. 3 Hours.
The development of political thought from Machiavelli to Marx. Emphasis on the Renaissance, Classical Liberalism, French Radicalism and Marxism.

POLS 4328. CONTEMPORARY CONTROVERSIES IN POLITICAL THEORY. 3 Hours.
Examination of twentieth-century approaches to political thought and central controversies in the field. Topics may include: liberal, conservative, and socialist theories; critical theory; communitarianism; postmodernism; feminism; and identity politics.

POLS 4330. THE U.S. PRESIDENCY. 3 Hours.
The U.S. Presidency, including sources of power, changes in the office over time, and the relationship between the individual and the institution.
POL 4331. U.S. CONSTITUTIONAL LAW: GOVERNMENT POWER. 3 Hours.
U.S. Supreme Court decisions regarding the structure of government in the United States. Focus on Congress, the President, Federalism, and the relation of the judicial process to these topics. Recommended for pre-law majors.

POL 4332. U.S. CONSTITUTIONAL LAW: FUNDAMENTAL RIGHTS. 3 Hours.
U.S. Supreme Court decision making involving the Bill of Rights and other fundamental rights. Especially recommended for pre-law majors.

POL 4333. PRESIDENTIAL LEADERSHIP IN DOMESTIC POLICY MAKING. 3 Hours.
Explores the policy process from the perspective of the U.S. president, examining the president's influence through the policy stages. Prerequisite: POLS 2311 and POLS 2312.

POL 4336. CONTEMPORARY UNITED STATES FOREIGN POLICY. 3 Hours.
Theories and analytical structure for understanding United States foreign policy. Policy examined from theoretical, structural, regional, and topical perspectives.

POL 4340. FEDERAL SOCIAL POLICY. 3 Hours.
This course examines public policies, including Social Security, Medicare, Medicaid, and various public assistance programs that emerged from the federal government's attempts to create a "safety net" for American citizens beginning in the 1930s, and from attempts to confront poverty during the 1960s. This course also considers the importance of federal "tax expenditures" in prompting private actors to provide services, such as employer-sponsored health insurance. The course also examines attempts to alter, roll back, or expand the federal role in social policy over recent decades.

POL 4350. HEALTH POLITICS AND POLICY. 3 Hours.
Debates over the role of government in providing access to health care have been a prominent feature of American politics for the past century. This course examines the politics of health care debates in America as well as major features of federal health policy. Prerequisite: POLS 2311 and POLS 2312.

POL 4359. CITIZENSHIP IN THE AMERICAS. 3 Hours.
Evaluates contemporary citizenship through political and social action movements in the Americas with particular attention to Latin America.

POL 4360. THEORIES OF INTERNATIONAL RELATIONS. 3 Hours.
Evaluates major theories, methodologies, and approaches to international relations in order to understand contemporary world affairs.

POL 4361. THE POLITICAL ENVIRONMENT OF RUSSIA AND THE SUCCESOR STATES. 3 Hours.
The domestic political systems of Russia and the other former Soviet republics. The communist state in retrospect. Development of political actors, institutions, and parties. Offered as POLS 4361 and RUSS 4361; credit will be given in only one department. Taught in English; for Russian language credit, research will be done in Russian.

POL 4362. RUSSIA AND THE SUCCESOR STATES TODAY. 3 Hours.
The metamorphosis of the Communist Party and the current political philosophies of the post-Soviet states. Examination of attitudes and self-perceptions of citizens of these states in the post-period. Emphasis is on area studies and culture. The course will be taught in English, but for Russian language credit; research will be done in the Russian language. May be repeated for credit as topics change. Offered as POLS 4362 & RUSS 4362. Credit will be granted in only one department.

POL 4365. FOREIGN POLICIES OF RUSSIA AND THE SUCCESOR STATES. 3 Hours.
The foreign policies of Russia and other former Soviet republics. Development of their policymaking structures and the major issues confronting them. Emphasis on Russia and the superpower relationship. European security and cooperation, relations with developing states, and the interactions of the former Soviet republics. Also listed as RUSS 4365; credit will be given in only one department.

POL 4369. THE ARAB-ISRAELI CONFLICT. 3 Hours.
Explores the origins, development, and continuation of the Arab-Israeli and Israeli-Palestinian conflicts through personal stories, national narratives, public images, and popular discourses.

POL 4370. INTERNATIONAL RELATIONS OF THE MIDDLE EAST. 3 Hours.
This course will focus on the international interactions among actors in the Middle East. Topics to be covered include: theoretical and conceptual approaches to understanding regional politics; main conflicts in the region; contemporary challenges and issues; and a survey examination of the foreign policies of select countries.

POL 4371. THE POLITICS AND FOREIGN POLICY OF ISRAEL. 3 Hours.
This course will examine the domestic politics and foreign policies of Israel. The course will be divided into two sections. The first section will focus on the domestic institutions and politics of Israel, while the second section will focus on Israel's foreign policies and the impact of domestic politics on them. Topics to be covered include: the rise of Zionism; the pre-state period in Palestine; efforts at state-building and institutional development; domestic politics (including institutions, parties, electoral system); divisions in Israeli society; and determinants and examples of foreign policy. Prerequisite: POLS 2311 and POLS 2312.

POL 4372. HUMAN SECURITY, VIOLENCE, AND SCARCITY. 3 Hours.
This course explores patterns of violence, scarcity, and norms in world politics, particularly as they pertain to the emerging paradigm of human security. This approach calls into question conventional notions of national and international security by focusing on the security of people rather than states. It explores challenges to basic human needs and desires which undermine the ability to be safe, free, and secure -- such as infectious disease, genocide, environmental degradation, migration, and transnational crime. It also examines international responses to such problems.
POLS 4373. POLITICS OF INTERNATIONAL LAW. 3 Hours.
Examines the role of law in the international system including international treaties and agreements, states' compliance with international law, non-governmental actors, international courts. Topics include force, human rights, crimes against humanity, protection of the environment, and terrorism.

POLS 4375. SCIENCE FICTION AND INTERNATIONAL RELATIONS. 3 Hours.
Examines science fiction novels and films to explore themes in international relations such as political authority, nationalism, xenophobia, political violence, and gendered security.

POLS 4389. THE POLITICS OF NATIONAL MEMORY. 3 Hours.
An examination of power in Washington, focusing on what lies outside the Executive and Legislative branches. Students visit and study significant institutions and monuments in the city as windows into complex political and social issues. Enrollment is restricted to designated Archer Fellows.

POLS 4390. POLICYMAKING IN WASHINGTON. 3 Hours.
An analysis of the central role of Congress in shaping public policy. Emphasis on real-world policymaking. Students play the role of legislative assistants to members of Congress and produce analyses of the public policy issues. Enrollment is restricted to designated Archer Fellows. Prerequisite: POLS 2311 and POLS 2312.

POLS 4392. SPECIAL TOPICS IN POLITICAL SCIENCE. 3 Hours.
May be repeated for credit as topics change.

POLS 4393. PREPARING FOR CAREERS IN POLITICAL SCIENCE. 3 Hours.
Supervised employment in a government or government-related organization with the student performing duties related to the academic curricula of political science. Students are required to submit a term paper, case study, or an approved academic project related to the work performed. Work is generally graded pass/fail. A maximum of six semester hours of credit in Political Science Internship may be used to satisfy a political science elective requirement for graduation. Students must be classified as juniors or seniors, be political science majors or minors, and have a minimum 3.0 GPA in their major and overall. Majors must have completed 21 hours of political science; minors must have completed 12 hours of political science. Contact the Department for a complete description of requirements. Departmental consent required before enrollment.

POLS 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or a project under the direction of a faculty member in the major department.

POLS 4395. CONFERENCE COURSE READINGS IN POLITICAL SCIENCE. 3 Hours.
Designed for the advanced undergraduate student who is capable of independent study. An in-depth examination of one area of political science not necessarily covered in regular course work. May be repeated for credit when the subject matter varies, but only with permission of the department. Only two such courses will be counted on a student's degree plan. Prerequisites: permission of the undergraduate advisor; appropriate previous coursework; written consent of the instructor. Students must be Political Science majors or minors, have a minimum of 60 credit hours/junior status, have a 3.0 grade point average, and have completed at least 9 hours of Political Science.

POLS 4691. ARCHER PROGRAM INTERNSHIP. 6 Hours.
One-semester work experience in Washington, DC carried out during the student's tenure of an Archer Fellowship. The internship is custom-designed with the assistance of the director of the Archer Program based on the student's academic and professional goals. Enrollment is restricted to designated Archer Fellows. Prerequisite: POLS 2311 and POLS 2312.

POLS 5197. MASTER'S COMPREHENSIVE EXAMINATION. 1 Hour.
Required of all non-thesis Master of Arts students in the semester of their graduation. Graded P/F/R.

POLS 5300. AMERICAN GOVERNMENT AND POLITICS. 3 Hours.
A survey of the major theories and subfields in the study of American politics. Readings comprise a representation of scholarship illustrating a variety of substantive and methodological approaches.

POLS 5301. JUDICIAL POLITICS AND THE U.S. SUPREME COURT. 3 Hours.
This course focuses on judicial decision-making and behavior. While the entire American court system will be considered, primary attention will be given to the U.S. Supreme Court and constitutional issues.

POLS 5302. BUREAUCRATIC LEADERSHIP: TRENDS IN PUBLIC ADMINISTRATION AND POLICY MANAGEMENT. 3 Hours.
Recent literature in organizational theory, government restructuring, and policy management problems.

POLS 5303. COMPARATIVE POLITICAL SYSTEMS. 3 Hours.
Theories, concepts, and methods that dominate modern comparative political analysis. The state of the discipline and controversies in the comparative method are evaluated.

POLS 5305. TOPICS IN POLITICAL THEORY. 3 Hours.
This course will cover both historical and contemporary topics central to the discipline of political theory. It will consider the major figures in the field as well as themes such as citizenship, democracy, freedom, and authority. May be repeated for credit as the topic changes.

POLS 5310. ANALYZING POLITICS: RESEARCH DESIGN AND METHODS. 3 Hours.
This course introduces students to the practice of analyzing politics. It begins with a foundation in research design, covering topics such as how to develop testable hypotheses, measure concepts, and identify causal relationships. The course then takes a hands-on review of a range of tools used by political scientists—from basic data analysis and statistics, to experiments, elite interviews, content analysis, surveys, and the study of networks.
POLS 5311. CAMPAIGNS AND ELECTIONS. 3 Hours.
Describes important trends in modern campaigns and elections practices, focusing on contemporary American elections, including campaign finance, voter turnout, campaign advertising, and voter choices. Class presentations, a short research paper, and journal article readings.

POLS 5312. AGENDAS, INFORMATION, AND DECISION-MAKING IN PUBLIC POLICY. 3 Hours.
This course examines the role of organized interests in American politics and policymaking. It explores topics such as group formation and organization, strategies of political advocacy, access to decision-makers, and influence in the policy process.

POLS 5315. PUBLIC OPINION. 3 Hours.
Describes the development of survey research and commonly-encountered problems in surveys. Focuses most heavily on the contemporary practice of public opinion research, particularly in the American setting. Class presentations, a short research paper, and journal article readings.

POLS 5316. PUBLIC LEADERSHIP: RACE, ETHNICITY, & GENDER. 3 Hours.
Study of leadership theories, skills and traits, with focus on the intersections of race, ethnicity, and gender on public leadership in the public arena.

POLS 5317. RACE AND ETHNICITY IN AMERICAN POLITICS. 3 Hours.
Explores the political behavior of racial and ethnic groups in the U.S. as well as the contemporary influence of race and ethnicity on American political institutions and public policy debates.

POLS 5318. WOMEN IN THE POLITICAL PROCESS. 3 Hours.
This course examines women and gender in the political process, exploring various theoretical and methodological approaches helpful in studying gender and politics.

POLS 5319. CONGRESSIONAL BEHAVIOR. 3 Hours.
This course addresses several major questions regarding the nature of Congress as an institution, the behaviors of its members, and the role Congress plays in shaping public policy and the general nature of a representative democracy. Students are expected to have the ability to comprehend readings that are heavily quantitative. Course requirements will include weekly writings, a research paper and exams.

POLS 5320. THE AMERICAN PRESIDENCY. 3 Hours.
An overview course on the U.S. Presidency, exploring the institution as well as its relationship to other branches and political actors.

POLS 5321. THE PRESIDENCY AND DOMESTIC POLICY. 3 Hours.
This course examines presidential and domestic policy making, exploring how the president makes policy, focusing on theories of presidential leadership, White House organization and presidential-congressional interactions.

POLS 5322. SEPARATION OF POWERS IN AMERICAN POLITICAL DEVELOPMENT. 3 Hours.
Theories behind institutional design and the historical development of the executive, legislative, and judicial branches in the United States. Emphasis is placed on interactions of these institutions of government and current separation of powers controversies.

POLS 5323. STATE COURT SYSTEMS. 3 Hours.
Examination of the major theories of judicial politics and public law applied to the state court level. Topics include attention to the institutional, strategic, and attitudinal perspectives of judicial behavior.

POLS 5324. PUBLIC POLICY: ISSUES AND ANALYSIS. 3 Hours.
This course examines the important role of analysis in the policy process. It provides an understanding of the major actors and institutions involved in policymaking, explores major theories of policy change, and equips students with the skills necessary to conduct effective public policy analysis.

POLS 5325. STATE POLITICS. 3 Hours.
This course surveys the substantial literature and research programs in the study of state politics and policy.

POLS 5326. STATE/LOCAL GOVERNMENT POLICYMAKING. 3 Hours.
Focus on policy problems. Emphasis is on trends in state policy, interstate policy innovation and diffusion, and the effects of federal programs on state policy choices.

POLS 5327. URBAN POLICYMAKING AND ADMINISTRATION. 3 Hours.
Focus on the influence of economic, political, institutional, and organizational factors on urban policymaking and administration. A variety of regime and power structure models facilitate the analysis of urban policymaking.

POLS 5328. PUBLIC POLICY AND MEXICAN AMERICAN COMMUNITIES. 3 Hours.
Focus on the public policy process and the limited role Mexican Americans have had in national and state (TX) policymaking. Select topic areas are utilized to focus on state actors, issues, allocation of resources, and the power structure for analytical purposes.

POLS 5329. PUBLIC BUDGETING. 3 Hours.
The concepts, processes, and policy impacts of taxation and public budgeting. Introduction to current research techniques, budgetary issues, and the relevant political economy literature.

POLS 5330. ENERGY AND THE ENVIRONMENT. 3 Hours.
Analysis of the politics, economics, and administration of energy and environmental policies in the United States.

POLS 5331. POLITICAL SYSTEMS OF EAST ASIA. 3 Hours.
Comparative analysis of the political institutions and processes of China and Japan, with emphasis on the aspects of political development.
POLS 5332. PARADIGMS AND PROBLEMS IN INTERNATIONAL RELATIONS. 3 Hours.
This course surveys the major theoretical approaches in the field of International Relations. Students will learn to apply these paradigms to contemporary global issues such as conflict, trade, nuclear proliferation, terrorism, and protection of human rights.

POLS 5333. IDENTITY AND POLITICS IN THE MIDDLE EAST. 3 Hours.
Deeper examination of processes of state building and political development; state-society relations; Arabism; authoritarianism and democratization; oil and economic issues; Islamist politics; the role of transnational ideas.

POLS 5334. VIOLENCE AND DEPRIVATION IN WORLD POLITICS. 3 Hours.
Focuses on theoretical frameworks, empirical analysis, and policy relevance of myriad threats to individuals and communal groups. Examples include: human rights, failed states, violence, health issues, slavery and migration, environmental security.

POLS 5335. LATIN AMERICAN POLITICS. 3 Hours.
Designed to give students knowledge of the political development of Latin America by first examining general topics and then analyzing events in specific countries. Utilizes themes and concepts that are universal to all Latin American nations, but also stresses the different paths to political development that have been taken in each of these countries.

POLS 5336. REPRESSION AND REVOLUTION IN LATIN AMERICAN. 3 Hours.
Examines issues of political repression and revolutionary participation in Latin America. Topics range from human rights violations to coups and revolutions.

POLS 5337. THE POLITICAL SYSTEM OF THE RUSSIAN FEDERATION. 3 Hours.
This course emphasizes the analytical means by which researchers approach the Russian Federation in the post-Soviet period. Russia is considered from institutional, cultural, rationalist, and economic perspectives to develop a comprehensive orientation about the nature and scope of Russian politics.

POLS 5338. AMERICAN FOREIGN POLICY. 3 Hours.
Evaluation of some of the primary theories and models used in explaining American Foreign Policy. The course attempts to bridge the gaps that exist between theory and reality through approaches such as realism, neo-realism, deterrence, and others.

POLS 5339. ISRAELI IDENTITY AND THE ARAB-ISRAELI CONFLICT. 3 Hours.
This course will explore the deeper threads of Israeli identity, and how these impact Israeli policy toward the Arab-Israeli conflict. Topics to be covered include: diverse and clashing identities (e.g., Jewish, democratic, Middle Eastern, Israeli); how identity clashes have played out in politics; outlines of Israeli foreign policy; specific policies toward the Palestinians.

POLS 5341. COGNITION, EMOTION, AND EVOLUTION IN INTERNATIONAL RELATIONS. 3 Hours.
This course focuses on psychological approaches to international relations and examines how these perspectives advance the study of world politics. Approaches to be studied include: behavioral traits, trust, risk, values, personality, leadership, group decision-making, emotions, and evolutionary dynamics. These will be applied to different policy areas, including U.S. foreign policy, the use of force, and international cooperation.

POLS 5342. INTERNATIONAL ORGANIZATIONS. 3 Hours.
This course describes the institutions, decision-making and activities of the world's leading international organizations to establish an understanding of the role of international organizations in managing contemporary global problems.

POLS 5346. Health Politics and Policy. 3 Hours.
Course will survey the political history of the health care debate in the United States as well as major features of federal health policy.

POLS 5349. SOCIAL POLICY. 3 Hours.
This course examines the role of the federal government relating to social policy as a central theme of contemporary American politics. Issues surrounding the federal government's attempt to create a social safety net and issues such as poverty will be confronted, as well as the central role of tax expenditures and attempts to roll back social policies.

POLS 5380. TOPICS IN U.S. POLITICS. 3 Hours.
This course will focus on the specific aspects of U.S. governing institutions, processes, and behavior. A single aspect of U.S. politics will be examined in a given semester. (May be repeated for credit when topics vary.).

POLS 5381. TOPICS IN COMPARATIVE POLITICS. 3 Hours.
This course will focus on the specific aspects of comparative politics. (May be repeated for credit when topics vary.).

POLS 5382. TOPICS IN PUBLIC LAW AND JURISPRUDENCE. 3 Hours.
The role of U.S. national and state courts in policy making, constitutional law, and the examination of the evolution and nature of law in the United States. (May be repeated for credit when topics vary.).

POLS 5383. TOPICS IN PUBLIC ADMINISTRATION AND POLICY MAKING. 3 Hours.
U.S. national policy making and program management, state and urban policy making and administration. (May be repeated for credit when topics vary.).

POLS 5384. TOPICS IN INTERNATIONAL RELATIONS. 3 Hours.
This course will focus on a specific issue-area of international relations and world politics. (May be repeated for credit when topics vary.).

POLS 5391. CONFERENCE COURSE IN POLITICAL SCIENCE. 3 Hours.
Research and reading in a specialized field under the direction of a member of the graduate faculty. Graded P/F/W.
POLS 5392. INSIDE WASHINGTON: POLICYMAKING FROM THE GROUND UP. 3 Hours.
This course provides students with an overview of the U.S. federal policymaking process and the various public/private stakeholders and institutions that participate in this process. Specifically, the course focuses on three key elements of federal policymaking: separation of powers and original constitutional intent, influencing federal policy, and creating effective advocacy strategies. Students will examine a sampling of the extensive literature on political theory/philosophy, political institutions, political behavior, public policy and public administration. Students will also meet regularly with practitioners, such as officials from Congress, the White House, executive branch agencies, think tanks, organized interest groups, media/communications, and lobbying firms.

POLS 5393. ARCHER CENTER WASHINGTON INTERNSHIP. 3 Hours.
This course consists of an internship in a governmental or non-governmental organization in Washington, D.C. The student is expected to work full-time (40 hours a week) at the internship, which may be paid or unpaid. Students are responsible for seeking and selecting their internships. The Archer Center does not guarantee any internship placements, but Archer Center faculty and staff will provide students with information about internship opportunities and advice about placements. The Archer Center faculty meet regularly with students to debrief and to integrate this practical training with other lessons in professional development.

POLS 5394. ARCHER CENTER INDEPENDENT STUDY AND RESEARCH. 3 Hours.
This course is tailored to each student's graduate program of study. An Archer Center faculty member will work independently with each student to develop a research project that is designed to advance the student's academic and research goals. The project will align with the requirements of the student's graduate degree.

POLS 5398. THESIS. 3 Hours.
Original research designed to augment existing studies of problems or topics related to one of the major fields of study.

POLS 5698. THESIS. 6 Hours.
Original research designed to augment existing studies of problems or topics related to one of the major fields of study. POLS 5398 graded R/F only; POLS 5698 graded P/F/R.
Political Science - Graduate Programs

Overview

The program leading to a Master of Arts degree in Political Science emphasizes a variety of skills in preparation for many different types of employment. Students develop the ability to conduct research and critically analyze complex information, understand decision-making processes, present their findings and conclusions in a succinct and easily-understood manner, think creatively to resolve problems and concerns, and communicate information clearly. These skills are considered valuable in a wide range of jobs and careers, including in: the private sector, non-profit and non-governmental organizations, education, government, research and policy analysis, media, and international affairs. In addition, the Political Science MA is often used as a stepping stone for enrollment in business and law degrees. Finally, the Department of Political Science also endeavors to equip students with the research techniques and substantive background for coursework undertaken beyond the master’s level.

Admissions

The program is committed to a holistic admissions approach. As a result, decisions on whether to admit or deny an application include: grade point averages, letters of recommendation, personal statements, advanced degrees, graduate courses taken as a degreed student or in another program, and professional work experience. The major purpose of the admissions criteria is to promote access to our program, but maintain standards that will enable the department to determine if the applicant demonstrates the requisite skill level to master the requirements of the program.

Admission to the MA program in political science is based upon the completion of the general admission requirements of the Graduate School. Applicants are required to submit all official transcripts, a personal statement, and three (3) letters of recommendation. The department will review the application package in its entirety. The package is evaluated to determine if a student has achieved a 3.00 grade point average (GPA) in the last 60 hours of their undergraduate work as calculated by the Graduate School, and meets other admission requirements. If a student has already earned an advanced degree, the department will evaluate the student’s academic performance in obtaining that degree equally with the undergraduate performance. International students must meet or exceed the minimum university standard on the TOEFL (550 for paper examination, 213 for computer examination), TOEFL iBT (total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section), TSE (40), or the IELTS (6.5).

Several factors matter for a decision to accept or deny an applicant. To this end the department has three categories of acceptance: unconditional admission, probationary admission, and provisional admission.

Application Requirements

All applications must include the following four components. All four will be considered, without specific weights, in the decision to accept or deny.

1. A bachelor’s degree from an accredited general or specific program. A bachelor’s degree in political science, however, is not required.
2. A copy of all university and college transcripts.
3. A written personal statement (200 words) explaining the applicant’s interest and motivation in studying for a graduate degree in political science.
4. Three letters of recommendation (including at least two from university/college faculty) that favorably assess the applicant’s potential success in a graduate program and in the field of political science. Letters must be mailed directly from the recommenders to the Graduate Adviser of political science.

Unconditional Admission

An applicant may be accepted for unconditional admission if all of the above components of the application package are properly submitted, and all three of the following criteria are met and all three give strong indication of likely success in the program.

1. An undergraduate GPA of 3.00 or greater (as calculated by the Graduate School) in the last 60 credit hours of completing an undergraduate B.A. or B.S. degree from an accredited institution (verified by the Graduate School from official transcripts from each college or university previously attended).
2. Adequate preparation and satisfactory performance in political science courses or courses in related disciplines.
3. Three letters of recommendation (including at least two from university/college faculty) that indicate satisfaction with the applicant’s work and demonstrate a strong likelihood for success in the program and in the field of political science.

Probationary Admission

Students who do not qualify for unconditional admission may be considered for probationary admission if they satisfy any two of the three requirements for unconditional admission listed above as well as demonstrate potential for success in line with the necessary application materials. Students with a reported grade point average below 2.70, however, will not be eligible for probationary admission. Being admitted on probationary status means that the student will be able to take graduate level classes, but the student must earn a B or better in the first 12 hours of graduate coursework at UT Arlington. This regulation will be strictly enforced.
Provisional Admission
An applicant unable to supply all required documentation prior to the admission deadline, but otherwise appears to meet admission requirements, may be granted provisional admission. Provisionally admitted students must adequately satisfy any incomplete documentation by the end of the semester in which they are admitted. If the applicant fails to do so, the department may then reclassify the applicant’s admission status as probationary or ask the student to leave the program.

Deferral
A deferred decision may be granted when a file is incomplete or when a denial decision is not appropriate.

Denial
An application will be denied if it does not meet the criteria listed above, does not demonstrate potential for success, or the applicant’s grade point average is below 2.70.

Fast Track Program
The Fast Track program allows outstanding senior undergraduate Political Science (POLS) students to take two or three graduate courses (5000-level courses) to replace six or nine credit hours of advanced POLS undergraduate courses (3000- or 4000-level courses). The credit hours earned in these graduate courses can then be applied to both the Bachelor of Arts (BA) and to the Master of Arts (MA) in Political Science. Those who successfully complete the program will be automatically admitted to the Graduate School. They will not be required to take any qualifying test, complete an application for admission to the Graduate School, arrange for letters of reference, or pay an application fee. This enables students to complete their MA degree in a shorter time period.

Applying to the POLS Fast Track Program
Undergraduate students apply to the Department of Political Science by completing a Fast Track application form available from the POLS academic adviser. Students will be notified by the Department of their acceptance into the Fast Track program.

Unconditional Admission
1. The student must be within 30 hours of completing a BA in Political Science at UTA.
2. The student must have completed 30 hours of coursework at UTA.
3. The student must have an overall GPA of at least 3.3 in all coursework at all schools and an overall GPA of at least 3.3 in all coursework completed at UTA.
4. The student must have an overall GPA of at least 3.5 in all POLS courses completed at UTA.
5. The student must have completed 12 credit hours of the following specific undergraduate POLS courses, with a GPA of at least 3.5 in these courses. (Courses from other universities or colleges that cover the same or similar material cannot replace any of these specific UTA courses.)
   • POLS 2312 State and Local Government or its equivalent from another institution
   • POLS 3310 Analyzing Politics
   • POLS 3302 Introduction to International Relations, POLS 3303 Introduction to Public Administration, POLS 3304 Introduction to Comparative Politics, POLS 3305 Government in Urban America, POLS 3307 Comparative State and Local Politics, POLS 3311 Public Opinion, POLS 3312 Introduction to Public Policy Analysis, OR POLS 3333 Jurisprudence
   • One substantive 4000-level POLS course from any of the area concentrations (excluding internships and conference or directed readings courses).

Provisional Admission
A student may gain provisional admission if, by the semester in which application is made, he or she has already completed 3 out of the 4 required POLS courses (listed above) with a GPA of at least 3.5 in them, with the 4th course to be completed in the semester of application. All other requirements above must be met. Provisional admission will be changed to unconditional admission upon satisfactory completion of remaining requirements. Students failing to meet all requirements at the end of their semester of application will be removed from the Fast Track program. Any credits earned prior to removal from the program will be applied to the undergraduate degree only. None of the other benefits of the Fast Track program will apply. Provisionally admitted students who have been removed from the program may subsequently apply to graduate programs via the normal application process, paying all fees and meeting all relevant admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the Department of Political Science and of the Office of Graduate Studies.
Denial

Students who do not meet the requirements set out shall be denied admission to the Fast Track program. They may still apply to the graduate program through the regular application process. Admission will not be automatic as it will be subject to the normal admission practices of the Department of Political Science and of the Office of Graduate Studies.

Good Standing

In order to remain in the Fast Track program, students must meet the following requirements:

1. Students must maintain an overall GPA of at least 3.0 and must earn grades of B or better in all Fast Track-approved graduate courses that will be used to satisfy undergraduate and graduate degree requirements of the Fast Track program.

2. Students must enroll in at least 2 graduate courses prior to receiving their bachelor's degree, and receive at least a B in each course.

Students who, at any time, do not meet these requirements will be obliged to leave the Fast Track program. Any graduate credits earned will be applied only to the undergraduate degree, and none of the other benefits of participation in the Fast Track program will apply. They may apply to the MA program as a regular student after receiving their BA.

Fellowships

Fellowships, when available, will be awarded on a competitive basis. Fellowships are selected on the basis of the following criteria. Please see the Graduate Adviser for more information.

- Candidates must be enrolled full time in the department of political science (at least 9 hours of courses per semester).
- A minimum undergraduate GPA of 3.00 in the last 60 undergraduate hours, as calculated by the Graduate School, and unconditional admission status, or a minimum GPA of 3.25 in political science graduate hours completed.
- Transcript of a completed bachelor’s degree in political science (or appropriate related field) from an accredited institution.
- Three letters of recommendation. These letters may be the same submitted for admission.
- A written statement explaining the applicant’s reasons for graduate study in political science.

Master’s Degree Requirements

The non-thesis degree plan requires 36 hours of coursework, including three hours of POLS 5310 ANALYZING POLITICS: RESEARCH DESIGN AND METHODS, and a minimum of two courses in each of the first two area concentrations: American Politics and Policymaking, and International Studies.

The thesis degree plan requires 24 hours of coursework, including three hours of POLS 5310 ANALYZING POLITICS: RESEARCH DESIGN AND METHODS. Of the remaining 21 hours, a minimum of one course must be taken in each of the first two area concentrations: American Politics and Policymaking, and International Studies.

</table>
Students should consult the Political Science Graduate Student Handbook for regulations on transfer courses, undergraduate courses, conferences, internships, and special courses. It is recommended that students complete at least one general field seminar (POLS 5300, POLS 5301, POLS 5302, POLS 5303, POLS 5332) prior to taking the topics courses. See the Graduate Advisor for more detail.

All candidates for the degree of Master of Arts with a major in political science must pass a final examination, written, oral, or both written and oral. See the Department of Political Science Graduate Student Handbook or the Graduate Adviser for more details. In the event of failure of the final examination, the student may petition the Committee on Graduate Studies to retake the examination on a date no sooner than 60 days after the first examination. Students will not be permitted more than one reexamination after failure of the initial examination.

**International Studies Option**

The International Studies option of the Master of Arts program in political science emphasizes the study of comparative politics and international relations within the framework of political science. This option requires 12 hours of coursework in International Studies. Upon satisfying the requirements for this option, students will receive a letter of completion. Completion will not be reflected on student transcripts.

**U.S. Political Institutions and Processes Option**

The U.S. Political Institutions and Processes option of the Master of Arts program in political science emphasizes political behavior and processes and public law and jurisprudence within the framework of political science. This option requires 12 hours of coursework focused on American politics and/or public law and jurisprudence. Upon satisfying the requirements for this option, students will receive a letter of completion. Completion will not be reflected on student transcripts.

**Dual Degree Program**

Students in political science may participate in a dual degree program whereby they can earn a Master of Arts in political science and a Master of Arts in another program, such as criminal justice or sociology. By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from nine to 18 hours, subject to the approval of Graduate Advisers from both programs. To participate in the dual degree program, students must make separate application to each program and must submit a separate program of work for each degree. Those interested in a dual degree program should consult the appropriate Graduate Adviser(s) for further information on course requirements. See also the statement on “Dual Degree Programs” in the general information section of this catalog.
Political Science - Undergraduate Programs

Overview
The goal of the political science undergraduate curriculum is to maximize students' capacities to analyze and interpret political events and governmental processes. In addition to acquiring general knowledge about government and political behavior, students also learn the analytical skills relevant to particular political systems (their own and others'), and to problems of most immediate consequence and concern to them.

The four major objectives of the department's curriculum are to:

- Identify and describe political structures, rules, behaviors and environments which shape political action.
- Explain and employ statistical and methodological techniques to analyze information.
- Identify, comprehend, and apply comparative, theoretical, or conceptual approaches to actors and their policies.
- Develop the ability to analyze, synthesize, and evaluate political phenomena.

The major courses are designed to present a coherent portrait of the discipline. Students begin with a general introduction to national, state, and local politics followed by required courses in political methodology. Finally, students are exposed to at least four major areas of the discipline. The department also offers options for students who desire a concentration in pre-law, public policy/administration, or international studies. Students may choose any 18 hours (6 advanced) for a minor. Those who want a specialization may concentrate courses in areas of public law; policy and administration; comparative and international politics; American national government; political parties, group politics, and elections. To graduate a student must earn a 2.0 GPA.

The political science student is exposed to a multifaceted and highly regarded faculty, many of whom have received regional and national honors for teaching, service, and research. Upon graduation, UT Arlington political science majors are prepared to compete for a wide variety of jobs in both the private and public sectors.

Admission to Department of Political Science Degree Programs
Students should have completed 30 hours of core with 30 hours at UT Arlington, or 40 hours of core with 12 hours at UT Arlington with an overall GPA greater than 2.0. Students may be accepted as pre-political science majors if the above standards are not met.

Teacher Certification
Students interested in Texas Teacher Certification should consult the College of Education section of this catalog for the most recent changes in requirements regarding admission to Teacher Education, completion of University programs in preparation for certification, and eligibility for certification after graduation.

Oral Communication and Computer Use Competencies
Students majoring in political science are required to demonstrate computer use and oral communication competencies. Computer use proficiency can be demonstrated by one of the following:

a. successful completion of POLS 3310 RESEARCH METHODS AND POLITICAL ANALYSIS; or
b. successful completion of CSE 1301 COMPUTER LITERACY or INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING; or
c. successful completion of other courses approved by the Undergraduate Assembly; or
d. passing the University computer use competency exam.

Oral communication proficiency can be demonstrated by one of the following:

<table>

a. successful completion of specific political science courses approved by the department; or
b. successful completion of one of the following:
c. successful completion of other courses approved by the Undergraduate Assembly.

Students should discuss these options with their undergraduate advisor who may also provide a list of other courses approved by the University to meet these requirements.

Requirements for a Bachelor of Arts Degree in Political Science
All students who wish to earn a Bachelor of Arts degree in Political Science must complete the following coursework. In completing this coursework, they will satisfy the University's core curriculum requirements.
### Pre-Professional Courses

#### General Core Requirements (p. 47)

<table>

### Additional Information

Students have the option of completing a departmental specialization (between Pre-law, Policy/Public Admin, International studies, and Political behavior and processes).

#### Pre-Law

- Requiring a minimum of 9 hours in the Public Law area of Political Science, plus 9 hours of courses to be chosen from the following:
  - COMS 3310 GROUP COMMUNICATION THEORY
  - CRCJ 4301 THE AMERICAN JUDICIAL SYSTEM
  - ENGL 4371 ADVANCED ARGUMENTATION
  - HIST 3330 U.S. LEGAL AND CONSTITUTIONAL HISTORY, COLONIAL TO 1877
  - HIST 3331 U.S. LEGAL AND CONSTITUTIONAL HISTORY, 1877 TO PRESENT
  - HIST 4330 GREAT ANGLO-AMERICAN TRIALS
  - HIST 4331 U.S. CIVIL LIBERTIES
  - HIST 4359 BRITISH CONSTITUTIONAL HISTORY
  - PHIL 1301 FUNDAMENTALS OF REASONING
  - PHIL 2311 LOGIC
  - PHIL 3320 PHILOSOPHY OF LAW
  - SOCI 3313 CRIMINOLOGY
  - SOCI 3357 LAW AND SOCIETY
  - BLAW 3311 LAW I
  - BLAW 3312 LAW II

#### Policy/Public Administration

- Requiring a minimum of 12 hours in the Policy/Public Administration area of Political Science

#### International Studies

- Requiring a minimum of 12 hours in any combination of the Comparative Politics and International Politics areas of Political Science

#### Political Behavior and Processes

- Requiring a minimum of 12 hours in the Political Behavior and Processes area of Political Science

### Total Hours

- 120

---

1 Students are required to complete 12 hrs of 3000/4000 level POLS coursework to bring their total number of POLS coursework hours to 36. The 36 hours to include POLS 2311 and POLS 2312.
Students majoring in Political Science will pursue this general course of study in the discipline AND they may declare a specific area of concentration by filing a statement of intent with the Political Science Department. The area of concentration will require that the student complete the requirements for the general degree plan while also fulfilling certain requirements for the concentration. All students will receive the B.A. in Political Science. Those completing the selected specialization will also receive recognition of completion.

The purpose of the specializations is to provide the student with a focused, systematic, and in-depth educational experience in the context of a broad liberal arts education.

Political Science classes may be used toward the major requirements or minor requirements (at the discretion of the department offering the minor), but not both.

**Oral Communication and Computer Use Competencies**

Students majoring in political science are required to demonstrate computer use and oral communication competencies. Computer use proficiency can be demonstrated by one of the following:

a. successful completion of POLS 3310 RESEARCH METHODS AND POLITICAL ANALYSIS; or  
b. successful completion of CSE 1301 COMPUTER LITERACY or INSY 2303 INTRODUCTION TO M.I.S. AND DATA PROCESSING; or  
c. successful completion of other courses approved by the Undergraduate Assembly; or  
d. passing the University computer use competency exam.

Oral communication proficiency can be demonstrated by one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 1301</td>
<td>FUNDAMENTALS OF PUBLIC SPEAKING</td>
<td>3</td>
</tr>
<tr>
<td>COMS 2305</td>
<td>BUSINESS AND PROFESSIONAL COMMUNICATION</td>
<td>3</td>
</tr>
<tr>
<td>COMS 3315</td>
<td>COMMUNICATION FOR EDUCATORS</td>
<td>3</td>
</tr>
</tbody>
</table>

a. successful completion of specific political science courses approved by the department; or  
b. successful completion of one of the following:  
c. successful completion of other courses approved by the Undergraduate Assembly.

Students should discuss these options with their undergraduate advisor who may also provide a list of other courses approved by the University to meet these requirements.

**Requirement for a Minor in Political Science**

A minor in political science requires 18 semester hours, at least twelve of which must be 3000/4000 level.

Political Science classes may be used toward the major requirements or minor requirements (at the discretion of the department offering the minor), but not both.

**Fast Track Program in Political Science**  The Fast Track program allows outstanding senior undergraduate Political Science (POLS) students to take up to three graduate courses (5000-level courses) to replace up to nine credit hours of advanced POLS undergraduate courses (3000- or 4000-level courses); the credit hours earned in these graduate courses can then be applied to both the Bachelor of Arts (BA) and to the Master of Arts (MA) in Political Science. Those who successfully complete the program will be automatically admitted to the Graduate School. They will not be required to take any qualifying test, complete an application for admission to the Graduate School, arrange for letters of reference, or pay an application fee. This enables students to complete their MA degree in a shorter time period.

**Applying to the POLS Fast Track Program**  Undergraduate students apply to the Department of Political Science by completing a Fast Track application form available from the POLS academic advisor. Students will be notified by the Department of their acceptance into the Fast Track program.

**Unconditional Admission**

1. The student must be within 30 hours of completing a BA in Political Science at UTA.
2. The student must have completed 30 hours of coursework at UTA.
3. The student must have an overall GPA of at least 3.3 in all coursework at all schools and an overall GPA of at least 3.3 in all coursework completed at UTA.
4. The student must have an overall GPA of at least 3.5 in all POLS courses completed at UTA.
5. The student must have completed 12 credit hours of the following specific undergraduate POLS courses, with a GPA of at least 3.5 in these courses. (Courses from other universities or colleges that cover the same or similar material cannot replace any of these specific UTA courses.)
• POLS 2312 State and Local Government or its equivalent from another institution

• POLS 3310 Analyzing Politics

• POLS 3302 Introduction to International Relations, POLS 3303 Introduction to Public Administration, POLS 3304 Introduction to Comparative Politics, POLS 3305 Government in Urban America, POLS 3307 Comparative State and Local Politics, POLS 3311 Public Opinion, POLS 3312 Introduction to Public Policy Analysis, OR POLS 3333 Jurisprudence

• One substantive 4000-level POLS course from any of the area concentrations (excluding internships and conference or directed readings courses).

Provisional Admission

A student may gain provisional admission if, by the semester in which application is made, he or she has already completed 3 out of the 4 required POLS courses (listed above) with a GPA of at least 3.5 in them, with the 4th course to be completed in the semester of application. All other requirements above must be met. Provisional admission will be changed to unconditional admission upon satisfactory completion of remaining requirements. Students failing to meet all requirements at the end of their semester of application will be removed from the Fast Track program. Any credits earned prior to removal from the program will be applied to the undergraduate degree only. None of the other benefits of the Fast Track program will apply. Provisionally admitted students who have been removed from the program may subsequently apply to graduate programs via the normal application process, paying all fees and meeting all relevant admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the Department of Political Science and of the Office of Graduate Studies.

Denial

Students who do not meet the requirements set out shall be denied admission to the Fast Track program. They may still apply to the graduate program through the regular application process. Admission will not be automatic as it will be subject to the normal admission practices of the Department of Political Science and of the Office of Graduate Studies.

Good Standing

In order to remain in the Fast Track program, students must meet the following requirements:

1. Students must maintain an overall GPA of at least 3.0 and must earn grades of B or better in all Fast Track-approved graduate courses that will be used to satisfy undergraduate and graduate degree requirements of the Fast Track program.

2. Students must enroll in at least 2 graduate courses prior to receiving their bachelor's degree, and receive at least a B in each course.

Students who, at any time, do not meet these requirements will be obliged to leave the Fast Track program. Any graduate credits earned will be applied only to the undergraduate degree, and none of the other benefits of participation in the Fast Track program will apply. They may apply to the MA program as a regular student after receiving their BA.

For more information about the POLS Fast Track Program, please contact the undergraduate advisor in the Department of Political Science.
Sociology and Anthropology

Undergraduate Degrees

- Bachelor of Arts in Sociology (p. 1001)
- Bachelor of Science in Applied Sociology (p. 1001)
- Bachelor of Arts in Anthropology (p. 1012)
- Minor in Sociology (p. 1004)
- Minor in Anthropology (p. 1013)
- Minor in Popular Culture (p. 1004)

Graduate Degrees

- Sociology, M.A. ([http://catalog.uta.edu/liberalarts/sociology/graduate/#masterstext/#masociology](http://catalog.uta.edu/liberalarts/sociology/graduate/#masterstext/#masociology))

COURSES

ANTH 1200. PERSONAL AND PROFESSIONAL SUCCESS IN THE SOCIAL SCIENCES. 2 Hours.
A first year experience course for new students and new transfer students interested in a career in the social sciences. Provides the necessary foundation for success in a college environment while balancing personal and/or work obligations. Orient students to life on campus, demonstrates how to leverage campus resources to achieve career and academic goals, and emphasizes engagement outside the classroom through collaborative and co-curricular opportunities. Fulfills the University requirement for either UNIV 1101 or UNIV 1131. Offered as SOCI 1200 and ANTH 1200; credit will be granted only once.

ANTH 1306. INTRODUCTION TO ANTHROPOLOGY. 3 Hours. (TCCN = ANTH 2346)
This course, primarily intended for non-majors and as a first course for students considering majoring in anthropology, provides an overview of the subdisciplines of anthropology: ethnology (cultural anthropology), archaeology, physical (biological) anthropology, and linguistic anthropology.

ANTH 1310. GREAT DISCOVERIES IN ARCHAEOLOGY. 3 Hours.
A survey of some of the most spectacular and otherwise significant archaeological discoveries worldwide over the past three centuries. Consideration of particular archaeological sites as case studies to illustrate cultural development from the Stone Age to Medieval times.

ANTH 2307. BIOLOGICAL ANTHROPOLOGY. 3 Hours. (TCCN = ANTH 2301)
Human variation and human evolution. Genetics, living and fossil nonhuman primates, the human skeleton, the fossil record of human evolution, modern human variation and biological adaptation.

ANTH 2322. GLOBAL CULTURES. 3 Hours. (TCCN = ANTH 2351)
Methods and theories of sociocultural anthropology. Examines systems of social organization and cultural meaning in contemporary human societies. Topics include fieldwork, cross-cultural analysis, applied anthropology, and global perspectives on political, economic, and social institutions.

ANTH 2339. INTRODUCTION TO ARCHAEOLOGY. 3 Hours. (TCCN = ANTH 2302)
Archaeology is the study of the human past through physical evidence and material remains. This evidence ranges from entire landscapes to small objects. Students learn how archaeological sites are discovered, investigated, and interpreted, and how this knowledge contributes to our understanding of human society.

ANTH 2349. HONORS PRINCIPLES OF ARCHAEOLOGY. 3 Hours.
Methods and theories of prehistoric archaeology. Techniques and approaches employed in recovering, dating and interpreting prehistoric cultural materials. Writing-intensive course including group and individual projects and oral presentations. Prerequisite: Membership in the Honors College or permission of instructor.

ANTH 2357. ANTHROPOLOGY IN ACTION. 3 Hours.
Anthropological examination of a particular culture, region or cultural industry. Topics include identity, heritage, commoditization, historical and cultural representation, and authenticity. May be offered on campus or as a field course or study abroad course.

ANTH 2358. ARCHAEOLOGICAL CULTURES. 3 Hours.
Survey of a particular archaeological culture, region, or period. Can be offered on campus or as a field course or study abroad course.

ANTH 2359. MYTHS AND MYSTERIES IN ARCHAEOLOGY. 3 Hours.
This course will critically examine pseudoscience, cult archaeology and creationism from a scientific perspective. Through the close examination of case studies we will dispel archaeological myths and mysteries which are often depicted as fantastic or cult archaeology. This course will demonstrate that a strong adherence to scientific investigation can uncover facts about prehistory that are as interesting as the myths.

ANTH 3300. DEBATES IN CULTURAL ANTHROPOLOGY. 3 Hours.
Explores core concepts, critiques of past applications, and current challenges of theory and practice in cultural anthropology.
ANTH 3301. ARCHAEOLOGICAL METHOD AND THEORY. 3 Hours.
Explores core concepts, critiques of past applications, and current challenges of theory and practice in archaeology. Topics include history of archaeological thought, processual and actualistic approaches, ethnoarchaeology, evolutionary archaeology, stewardship of the archaeological past, and post-processual critiques. Prerequisite: ANTH 2339 or permission of instructor.

ANTH 3307. EVOLUTIONARY MEDICINE. 3 Hours.
The application of evolutionary theory to the practice of medicine from an anthropological perspective. Topics include diet/paleodiets, sleep habits, infectious diseases, the developmental origins of health and disease, mental health, women's health and reproduction, and aging/senesence, among others. Offered as BIOL 3307 and ANTH 3307; credit will only be granted in one department.

ANTH 3308. FORENSIC ANTHROPOLOGY. 3 Hours.
Explores the role of skeletal biology and physical anthropology in criminal investigation. Topics include determination of victim identity and context of death. Case studies will be used to demonstrate application of the methods studied.

ANTH 3310. LATINOS IN THE U.S.. 3 Hours.
Examines the Latino experience in the U.S. from an interdisciplinary perspective. Discusses the commonalities and cultural differences among various Latino groups, and focuses on important contemporary Latino issues such as education, employment, family and gender, identity, immigration, and politics. May receive credit for either MAS 3310 or ANTH 3310.

ANTH 3311. HUMAN ADAPTATION AND THE CONCEPT OF RACE. 3 Hours.
The study of modern human biological variation in the context of the history of the concept of race. Detailed historical review explores changing perspectives on variation within our species. Course examines physiological adaptations to environmental stress among a variety of human populations and implications of recent genetic research. Offered as BIOL 3311 and ANTH 3311; credit will only be granted in one department.

ANTH 3313. PRIMATE EVOLUTION AND BEHAVIOR. 3 Hours.
An overview of the Primate Order covering primate origins, evolution, ecology, adaptation, and behavior. Examination of the environmental context within which primates live, how the form of their bodies reflects their activities, and how they relate behaviorally to their environments and to one another. Offered as BIOL 3314 and ANTH 3313; credit will only be granted in one department.

ANTH 3316. LATINO HEALTH ISSUES. 3 Hours.
A cross-cultural examination of issues in Latino health and relevant health practices in the United States through the lenses of social sciences. Themes include the Latino Threat Narrative, acculturation histories and health care status of major Latino ethnic enclaves in the U.S. Listed as SOCI 3316, MAS 3316, and ANTH 3316; may receive credit for either SOCI 3316, MAS 3316, or ANTH 3316.

ANTH 3318. BORDERS, CULTURES, AND CARTELS. 3 Hours.
Critically examines life on the Mexico-U.S. border through ethnography, taking into account the impact of the U.S. war on drugs and the influence of cartels on the lives of those living in the southern border region. Topics may include impacts and influences of drugs and narco life on religion, crime, music, and daily life at the nexus of US-Mexico relations. Listed as ANTH 3318 and MAS 3318; may receive credit for either ANTH 3318 or MAS 3318.

ANTH 3325. ETHNOGRAPHY OF SOUTH AMERICA. 3 Hours.
The indigenous groups of South America, with emphasis on the Aymara and Quechua of the Andes. Topics include culture change, environmental destruction, and preservation of cultural heritage.

ANTH 3328. CIVILIZATIONS OF SOUTH AMERICA. 3 Hours.
Complex agrarian civilizations in South America, concentrating on political, social, and cultural developments of the Chavin, Nazca, Moche, Tiahuanaco, Wari-Tiahuanaco, Inca, and Conquest periods. Formerly listed as ANTH 4328. Credit cannot be given for both ANTH 3328 and ANTH 4328.

ANTH 3330. CULTURAL DIVERSITY AND IDENTITY. 3 Hours.
The ways identity is constructed in contemporary societies in an increasingly complex and multicultural world. Ethnic, racial, gender, and class identities. How and when identity is asserted and assigned, and how it can both draw boundaries and forge ties between peoples. Formerly listed as ANTH 2350. Credit cannot be given for both ANTH 2350 and ANTH 3330. Also listed as MAS 3330; credit cannot be granted for both ANTH 3330 and MAS 3330. Offered as AAST 3330 and ANTH 3330; credit will be granted in only one department.

ANTH 3331. CULTURE AND PERSONALITY. 3 Hours.
The interplay of culture and personality in various Western and non-Western societies. The relationship of specific practices to the development of personality and the psychological effects of colonization, modernization, and economic development of traditional societies.

ANTH 3332. FOOD AND CULTURE. 3 Hours.
Considers food systems from biological, ecological, and political-economic perspectives. May include food history, cuisines, food preferences, and other areas of anthropological scholarship on food and culture. May cover food and economic development, hunger and overnutrition, food and religion, and the globalization of foods and food systems.

ANTH 3333. NORTH AMERICAN INDIANS. 3 Hours.
North American Indian cultures and their development both before and after European contact.
ANTH 3334. ANTHROPOLOGY OF SOUTH ASIA. 3 Hours.
With a focus on the Indian subcontinent, this course introduces students to the culture, history and politics of South Asia. Drawing upon anthropological studies and a range of materials, including Bollywood films, music, tourist brochures, advertisements, Gandhi's writings, and South Asian literature, students will gain an increased understanding of the region's past and present.

ANTH 3335. GANDHI: CULTURE AND POLITICS IN A GLOBAL WORLD. 3 Hours.
Introduction to the life and times of Mahatma Gandhi in order to explore the cultural politics of religion, food, animal welfare, sexuality, social movements, and globalization processes. Students gain understanding of Gandhi's enduring significance in the contemporary world.

ANTH 3336. ANTHROPOLOGY OF RELIGION. 3 Hours.
A cross-cultural study of magic and religion. Theories of the origin and function of magic and religion in pre-industrial societies.

ANTH 3338. COMPARATIVE KINSHIP AND FAMILY SYSTEMS. 3 Hours.
Variation in kinship and family systems from cross-cultural and evolutionary perspectives. Structure, function, and dynamics of kinship and family systems as adaptations to diverse ecological, social, and historical circumstances. Implications of this approach for understanding kinship and family in American society also addressed. Formerly listed as ANTH 4338. Credit cannot be given for both ANTH 3338 and ANTH 4338. Also offered as GWSS 3338; credit will be granted only once. Offered as AAST 3332 and ANTH 3338; credit will be granted in only one department.

ANTH 3339. URBAN ANTHROPOLOGY. 3 Hours.
Examines main issues, theoretical approaches and ethnographic methods used by anthropologists working in cities. Also discusses relevant contemporary topics such as growth of global cities, gentrification, poverty and inequality, and the economic, social and cultural integration of international immigrants in U.S. cities.

ANTH 3340. RESEARCH METHODS IN CULTURAL ANTHROPOLOGY. 3 Hours.
Observational techniques, participant-observation, hypothesis testing, research design, use of the computer in research, analysis, and report writing, and oral presentations of research reports. Satisfies oral communication and computer use competence requirements. Prerequisite: ANTH 1306 or ANTH 2322 or permission of instructor.

ANTH 3341. APPLIED ANTHROPOLOGY. 3 Hours.
Explores the use of anthropological knowledge and skills to address practical problems in today's global society, and examines how these are used in government, non-profit, and private sector industries. Addresses issues of health, education, environment, human rights, economic development, and others.

ANTH 3342. VISUALIZING CULTURE: MEDIA, IDENTITY AND POLITICS IN THE GLOBAL WORLD. 3 Hours.
Introduces students to key concepts in Visual Anthropology. This course highlights the contribution of anthropological methods in theorizing the visual in everyday life for the construction of nationalist, gender, ethnic, and class identities. Readings are drawn from diverse geographical regions. Visual material discussed in class may include ethnographic films, art, graphic novels, comics, illustrated magazines, virtual exhibitions and soap operas. Assignments include a writing and research component, and team-based exercises. Offered as ANTH 3345 and COMM 3345; credit will be granted only in one department.

ANTH 3346. ANTHROPOLOGY OF TOURISM. 3 Hours.
Examines the cultural practices of travel and the impact of tourism on both host and guest communities. Various forms of tourism are addressed including, but not limited to, ethnic, historical, regional, health and medical, and ecotourism. Themes of the "tourist gaze" authenticity, identity, consumption, ritual, borders, and pilgrimage will be explored.

ANTH 3348. ANTHROPOLOGY OF MIGRATION. 3 Hours.
This course focuses on the expanding field of migration studies in social and cultural anthropology. It traces the history of migration studies in anthropology, discusses the major theoretical contributions of anthropologists to the interdisciplinary field of migration, and addresses key contemporary topics in migration studies including globalization, transnational communities, gender, identity, and citizenship. The course heavily relies on ethnographic case studies of different immigrant populations in the U.S. written by anthropologists in the recent past.

ANTH 3349. ANTHROPOLOGY OF GLOBALIZATION. 3 Hours.
The forces of economic globalization now reach every corner of the world to the point that few societies have been untouched by their impact. This course examines the forces that drive globalization and their repercussions upon local communities around the world. It examines how economic globalization affects the lives of real people in developing and industrialized countries as well as in small-scale societies traditionally studied by anthropologists.

ANTH 3350. NORTH AMERICAN ARCHAEOLOGY. 3 Hours.
Prehistoric cultural adaptations in North America from human arrival to European contact. Topics treated include the question of when and where the first Native Americans arrived; the beginnings of village and farming life; and the development of Puebloan and "Mound-building" cultures.

ANTH 3351. ARCHAEOLOGY OF THE AMERICAN SOUTHWEST. 3 Hours.
This course investigates the peoples and places of the prehistoric North American Southwest. The focus is on the period of increasing settlement, diversity, movement, and change from 500 to 1500 C.E. Focuses on the archaeological record, ethnographies and comparative research to understand the past and present peoples of the Southwest.

ANTH 3352. ARCHAEOLOGY OF AFRICA. 3 Hours.
Course follows the African archaeological record from earliest evidence for human behavior through beginnings of state society. Topics may include stone tool technologies, forager strategies, agricultural systems, early iron technology, and trade and social networks. This is a lecture course, with an emphasis on student research. No prerequisites required, but ANTH 2339 is recommended preparation.
ANTH 3353. STONE AGE HUNTERS AND FARMERS. 3 Hours.
Human adaptations and cultural evolution in the Old World from the earliest African sites over two million years ago to the domestication of plants and animals about ten thousand years ago. Formerly ANTH 2353; credit cannot be granted for both ANTH 2353 and ANTH 3353.

ANTH 3354. ANTHROPOLOGY OF HUNTING. 3 Hours.
Covers a broad range of topics exploring hunting through time, from the prehistoric to the present. Topics include cross-cultural issues of meat and diet, hunter-gatherer subsistence behavior, overkill and animal extinction, and sport hunting. Course is relevant to environmental studies and sustainability studies.

ANTH 3355. THE RISE OF CIVILIZATION. 3 Hours.
The development of complex cultures from village farming societies in various regions of the Old and New Worlds. The civilizations of Mesopotamia, Egypt, and Mesoamerica, among others, will be treated, along with general questions concerning the rise, development, and collapse of early civilizations. Formerly ANTH 2355; credit will not be granted for both ANTH 2355 and ANTH 3355.

ANTH 3356. MESOAMERICAN ARCHAEOLOGY. 3 Hours.
Covers cultural developments in Mesoamerica through the rise of complex societies and the Spanish conquest. Topics include the emergence of Olmecs, Zapotecs, Maya, Toltecs, and the Aztecs, and explore the factors that contributed to their appearance and decline. New discoveries within the field of Mesoamerican archaeology will be examined.

ANTH 3357. COLLAPSE AND SUSTAINABILITY OF SOCIETIES. 3 Hours.
This course investigates the collapse of past societies. Understanding why and how archaeologically-known societies collapsed may provide insights to help us understand contemporary social and environmental sustainability problems.

ANTH 3358. UNDERWATER ARCHAEOLOGY. 3 Hours.
Explores the field of underwater archaeology and research methods. Topics include shipwrecks, submerged terrestrial sites, the use of scuba diving, robots, and sonar in excavation and survey, and the history and development of the discipline.

ANTH 3359. STONE TOOLS. 3 Hours.
Covers the evolution of stone tools from the first modified stone objects to the use of stone tools in complex societies such as the ancient Maya and Egyptians. Introduces students to lithic analysis and manufacture, emphasizing hands-on learning.

ANTH 3360. ARCHAEOLOGY IN PRACTICE. 3 Hours.
Covers the practical aspects of archaeology with a focus on hands-on activities and experiential learning. Students learn archaeological skills and understand the life and research of archaeologists. Topics may include research design, survey, and the laws protecting archaeological sites.

ANTH 3366. SEX, GENDER, AND CULTURE. 3 Hours.
The ways gender and sexuality are culturally constructed. Readings include ethnographies, life histories, and fiction. Debates within anthropology and within specific cultures over maleness and femaleness. Offered as ANTH 3366 and GWSS 3366; credit will be granted only once.

ANTH 3369. MEDICAL ANTHROPOLOGY. 3 Hours.
Medical systems studied cross-culturally to understand how environmental, biological, social, and cultural factors affect disease and health. The cultural dynamics of traditional practitioners and rituals within the health care system. Methods of articulating modern medicine with traditional medicine are discussed.

ANTH 3370. ARCHAEOLOGY OF THE PREHISTORIC AEGEAN. 3 Hours.
Origin, evolution and decline of the first high civilizations in Europe, namely the Minoans on the island of Crete and the Mycenaeans in Greece. Stone Age background and Early Bronze Age seafaring in the Cycladic Islands; Late Bronze Age society, economy, and religion; art and architecture of the Minoan and Mycenaean palaces; Linear A and B tablets; Mycenaean collapse and the beginning of the Iron Age; Homer's Iliad, archaeology and the Trojan War.

ANTH 3371. ARCHAEOLOGY OF GREECE. 3 Hours.
Material evidence relevant to our understanding of classical Greek culture and society from the collapse of the Mycenaean Empire through the Hellenistic Period (ca. 1200-31 B.C.). Examination of the magnificent (temples, sculpture, athletic monuments, ships) and the mundane (domestic architecture, pottery, crafts, coinage, inscriptions, architecture and artifacts of civic life, burials). Archaeological evidence will be considered in light of contemporary historical sources.

ANTH 3372. ARCHAEOLOGY OF THE ANCIENT NEAR EAST. 3 Hours.
Survey of the cultures of Mesopotamia, Syria, Palestine, and Anatolia from the earliest agricultural settlements to the late first millennium B.C. based on the surviving archaeological remains. Among the topics covered: Nature of early urbanism; development of religious and economic hierarchies; origins and impact of writing; interrelationships among early states.

ANTH 3373. ARCHAEOLOGY OF EGYPT. 3 Hours.
The culture of ancient Egypt from its earliest occupation until the Arab invasion (7th century A.C.), with emphasis on the first 20 pharaonic dynasties (third and second millennia B.C.). Egyptian social, religious, economic and political development traced through the surviving material culture (architecture, art, industries, artifacts of daily life, funerary remains, etc.) supplemented by historical and literary evidence as pertinent. Egypt's relations with neighboring regions (Crete, Anatolia, Palestine, Nubia and Libya) considered. Offered as AAST 3373 and ANTH 3373; credit will be granted in only one department.
ANTH 3374. ARCHEOLOGY OF EUROPE. 3 Hours.
Ancient Europe is a mosaic of archaeological regionalism whose complexity is arguably unparalleled elsewhere in the world. This course surveys the material remains of several prominent ancient cultures from Iberia to the Danube, from Scandinavia to Greece, dating from stone age to medieval times. Emphasis will be on understanding the various regional traditions and their interactions, and on explicating trends in technology, economy and religion in European society during this long period. Among the topics to be examined: Paleolithic hunters and artists; agricultural origins; megalithic monuments; bronze metallurgy and its ramifications; the first high civilizations in the Mediterranean; the rise of the Celts; the coming of iron; impact of Romanization; the nature of Viking exploration and expansion.

ANTH 3375. NEANDERTHALS AND THE ICE AGE WORLD. 3 Hours.
Explores the archaeological record of Neanderthals, early modern humans, and their contemporaries. Topics include new genetic and isotopic analyses, ancient environments, early art and symbolism, and how the Paleolithic is imagined in modern society.

ANTH 3390. SPECIAL TOPICS IN ANTHROPOLOGY. 3 Hours.
Selected, specialized topics in anthropology. These may be cultural, archaeological, or biological in focus, and vary each semester. Contact the department or click on the course link to find current course title and description. May be repeated for credit with departmental permission as topics vary.

ANTH 3409. PALEOANTHROPOLOGY. 4 Hours.
Paleoanthropology: an exploration of fossil evidence for human origins and human evolution. Course focuses on the evolution of humans and our close relatives, from our origins as a distinct lineage to “anatomically modern” Homo sapiens, including the relationship between biological and cultural/behavioral evolution. Offered as BIOL 3409 and ANTH 3409; credit will be granted only once.

ANTH 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in the designated area. Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of the instructor.

ANTH 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of the instructor.

ANTH 4315. GROWTH, DEVELOPMENT, AND EVOLUTION. 3 Hours.
A survey of topics at the nexus of modern human biological research in growth and development and the evolutionary record of hominid subadults. Offered as BIOL 4316 and ANTH 4315; credit will be granted only in one department. Prerequisite is only required for students registering for ANTH 4315. Prerequisite: ANTH 2307 or permission of the instructor.

ANTH 4322. PROBLEMS IN ANTHROPOLOGY. 3 Hours.
Intensive examination of an important problem in anthropological research selected by the instructor. May be repeated for credit whenever the topic varies.

ANTH 4342. TOPICS IN CULTURAL ANTHROPOLOGY. 3 Hours.
Selected topics, to include anthropological theory, population and cultural ecology, semiotics, and humanistic anthropology. May be repeated for credit with departmental permission. Also offered as ANTH 4342. Credit will be granted in only one department.

ANTH 4348. POLITICAL ANTHROPOLOGY. 3 Hours.
Relationships among power, identity, and culture in cross-cultural perspective. Traditional political systems, political symbols and rituals, gender and power, and the relationship between domination and resistance. How culture influences the ways in which men and women get power, use power, and resist power.

ANTH 4358. TOPICS IN ARCHAEOLOGY. 3 Hours.
Selected topics, to include examination of specific archaeological cultures of the Old World, archaeological theory, and archaeology and pseudoscience. May be taken up to four times for a total of 12 hours credit.

ANTH 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of the instructor.

ANTH 4392. PRACTICUM IN ANTHROPOLOGY. 3 Hours.
Supervised practicum with anthropology faculty in which students apply practical, career-oriented anthropological skills in archaeology, biological anthropology, or cultural anthropology. Prerequisite: ANTH 2307, ANTH 2322, OR ANTH 2339; permission of the instructor; and junior standing.

ANTH 4393. INTERNSHIP IN ANTHROPOLOGY. 3 Hours.
Supervised internship program, in which students intern at various companies, non-profit and governmental agencies, and museums in the Metroplex. Applied use of anthropology in a non-academic setting. Students will learn skills of career development in anthropology. Requirements include several short assignments and a final report to the instructor. Prerequisite: ANTH 2307, ANTH 2322, OR ANTH 2339; permission of the instructor; and junior standing.

ANTH 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or project of equivalent difficulty under the direction of a faculty member in the major department.
ANTH 4398. SUMMER FIELD SCHOOL IN ANTHROPOLOGY. 3 Hours.
(3 or 6 hours credit). Offered only during the summer session. Experience in methods of field research in ethnography or archaeology. May be repeated for credit if research topic changes.

ANTH 4406. HUMAN OSTEOLOGY. 4 Hours.
Detailed examination of human skeletal morphology. Topics include form and function of all skeletal elements in the human body, differentiation of each bone, left and right side identification, identification or fragmented remains, and muscle attachments and articulations. Content useful in forensic anthropology, archaeology, and hominid paleontology. Offered as BIOL 4406 and ANTH 4406; credit will be granted only in one department.

ANTH 4459. BIOARCHAEOLOGY. 4 Hours.
The study of human remains in archaeological contexts in order to reconstruct individual identity, life history, and past population characteristics. No formal prerequisites, but familiarity with the human skeleton is helpful. Lab component is required. Offered as BIOL 4459 and ANTH 4459; credit will be granted only in one department.

ANTH 4460. ZOOARCHAEOLOGY. 4 Hours.
The study of faunal remains from archaeological contexts to understand past human economic strategies and ecological circumstances. Topics include skeletal and taxonomic identification, taphonomic processes, mortality profiles, biometric analyses, and human behavioral ecology. Lab component is required. Offered as BIOL 4460 and ANTH 4460; credit will be granted only once.

ANTH 4698. SUMMER FIELD SCHOOL IN ANTHROPOLOGY. 6 Hours.
(3 or 6 hours credit). Offered only during the summer session. Experience in methods of field research in ethnography or archaeology. May be repeated for credit if research topic changes.

ANTH 5191. CONFERENCE COURSE. 1 Hour.

ANTH 5307. FORENSIC ANTHROPOLOGY. 3 Hours.
Estimating age, sex, race, stature, pathology, cause of death, and time since death from human remains. The role of skeletal biology and physical anthropology in criminal investigation. Case studies will be used to demonstrate application of the methods studied. Requires enrollment in the undergraduate lab section.

ANTH 5310. HISTORY OF ANTHROPOLOGICAL THEORY. 3 Hours.
This course is a critical examination of major theoretical trends in ethnological theory, from mid-19th century to the present.

ANTH 5315. ARCHAEOLOGICAL METHODS. 3 Hours.
An examination of research methods and underlying theory in archaeology and their evolution since the era of European antiquarianism. Origins and development of archaeology as a scholarly discipline. Emphasis on the period 1960-present; consideration of recent trends in analysis and reportage.

ANTH 5317. ARCHAEOLOGY OF EXPLORATION. 3 Hours.
Archaeological evidence for travel in antiquity. Technology of travel (horse/camel, wheeled vehicles, boats) and related topics (navigation; development of trade and trade routes; nature of discovery, settlement and colonization in antiquity). Case studies drawn from ancient cultures of the Old World from the Stone Age through Medieval times.

ANTH 5320. METHODS IN BIOLOGICAL ANTHROPOLOGY. 3 Hours.
This course covers several topical areas relevant to biological anthropologists specializing in human biology, including osteology and skeletal biology, skeletal maturation (both postcranial and craniofacial), growth and development from birth to biological maturity, and selected topics in forensics, anthropometry, physiology, nutrition, genetics, epidemiology, and demography.

ANTH 5325. QUALITATIVE METHODS. 3 Hours.
Students do fieldwork in anthropology. Students practice participant observation, conduct an interview, collect a kinship chart, map blocks, collect life histories and participate in rituals. Course emphasizes methods of data collection, analysis/interpretation of data, and critical writing.

ANTH 5341. POSTCOLONIAL SOUTH ASIA. 3 Hours.
It approaches the competing and complementary claims on postcolonial theory by mapping the intersections in historical anthropology, literary theory, and cultural analysis. More broadly it brings to focus the shifts from Marxist to Poststructuralist directions. Though the regional focus is on India, the endeavor is also to assess dialogues among varying strands of cultural perspectives and its impact in other postcolonial contexts, both within and beyond the South Asian subcontinent.

ANTH 5342. ADVANCED ETHNOLOGY. 3 Hours.
Seminar based on student reports and critiques of assigned readings. Major emphasis on the areas of ethnology and social anthropology.

ANTH 5344. CULTURES OF LATIN AMERICA. 3 Hours.
An ethnological comparison of societies and cultures in Central and South America. Emphasis on gender, ethnicity, and political economy.

ANTH 5345. RELIGION AND CULTURE. 3 Hours.
An ethnological comparison of native religions to understand non-western belief systems. Emphasis on rituals, myths, totemic systems, taboos, and cosmology.

ANTH 5346. MESOAMERICAN ARCHAEOLOGY. 3 Hours.
An examination of the diversities of several prehistoric Mesoamerican cultures including the Olmec, Maya, Teotihuacan, Zapotec, and the Aztec. Current issues including the beginnings of agriculture, early village life, the rise of complexity and the institution of kingship, warfare, and Mesoamerican ideology and cosmology will be addressed.
ANTH 5349. TOPICS IN ANTHROPOLOGY. 3 Hours.
May be repeated for credit as the topic changes.

ANTH 5351. EMERGENCE OF HUMANKIND. 3 Hours.
An intensive review of the evidence for, and main outlines of, human biological and cultural evolution up to agricultural origins.

ANTH 5353. MEDICAL ANTHROPOLOGY. 3 Hours.
An examination of anthropological concepts for understanding curing practices and attitudes toward health programs in various cultures.

ANTH 5355. HUNTERS AND GATHERERS. 3 Hours.
Cross-cultural approach to the ecological, social, and historical contexts of hunters, gatherers, and foragers.

ANTH 5363. ETHNOGRAPHY AND PERSONAL NARRATIVE. 3 Hours.
Focus is on anthropology and autobiography, autoethnography, life history, and narrative constructions of selfhood in different cultural contexts. Development of the life history approach in ethnographic research. Methods in the collections and analysis of life stories.

ANTH 5365. GLOBALIZATION AND INTERNATIONAL MIGRATION. 3 Hours.
Examines how the expansion of global capitalist economy has contributed to the growth of international migration around the world. Focuses on how transnational migration affects the economic, social, political, and cultural practices of immigrants in both their countries of origin and destination.

ANTH 5369. FOLKLORE AND MYTHOLOGY. 3 Hours.
Function, forms, and interpretation of folklore and myth in traditional societies; examination of oral literature as an expression of continuity and change; emphasis on a structural analysis of myth.

ANTH 5370. APPLIED ANTHROPOLOGY. 3 Hours.
Examines the application of anthropological knowledge to solve practical problems in today's global world. We learn how anthropological concepts, methods, and insights are applied to understand and solve important problems related to economic development, health, environmental issues, immigration, international business, and others.

ANTH 5371. RESEARCH PRACTICUM / INTERNSHIP. 3 Hours.

ANTH 5373. ARCHAEOLOGY FIELD SCHOOL. 3 Hours.
This course, conducted during the summer sessions, consists of on-site and classroom instruction in techniques of archaeological survey, excavation, laboratory, processing, and analysis. Students can receive either three or six hours of credit. Enrollment by permission of instructor only. Prior coursework in anthropology desirable but not necessary.

ANTH 5389. TEACHING ANTHROPOLOGY. 3 Hours.
To learn strategies of coping with practical problems of teaching undergraduate anthropology, students confer with one or more professors to discuss preparing syllabi and lectures, constructing and evaluating examinations, etc. Not to be counted toward the degree requirement.

ANTH 5392. CONFERENCE COURSE IN ANTHROPOLOGY. 3 Hours.

ANTH 5398. THESIS. 3 Hours.

ANTH 5406. HUMAN OSTEOLOGY. 4 Hours.
Detailed examination of human skeletal morphology. Topics include form and function of all skeletal elements in the human body, differentiation of each bone, left and right side identification, identification of fragmented remains, and muscle attachments and articulations. Content useful in forensic anthropology, archaeology, and hominid paleontology. If taken for undergraduate credit either as ANTH 4306 or ANTH 4406, cannot be repeated for graduate credit.

ANTH 5673. ARCHAEOLOGY FIELD SCHOOL. 6 Hours.
This course, conducted during the summer sessions, consists of on-site and classroom instruction in techniques of archaeological survey, excavation, laboratory, processing, and analysis. Students can receive either three or six hours of credit. Enrollment by permission of instructor only. Prior coursework in anthropology desirable but not necessary.

ANTH 5698. THESIS. 6 Hours.

COURSES

SOCI 1200. PERSONAL AND PROFESSIONAL SUCCESS IN THE SOCIAL SCIENCES. 2 Hours.
A first year experience course for new students and new transfer students interested in a career in the social sciences. Provides the necessary foundation for success in a college environment while balancing personal and/or work obligations. Orient students to life on campus, demonstrates how to leverage campus resources to achieve career and academic goals, and emphasizes engagement outside the classroom through collaborative and co-curricular opportunities. Fulfills the University requirement for either UNIV 1101 or UNIV 1131. Offered as SOCI 1200 and ANTH 1200; credit will be granted only once.

SOCI 1310. INTRODUCTION TO POPULAR CULTURE. 3 Hours.
This course will introduce students to the role of popular culture in American society. It examines culture as a process through which people make symbolic meaning out of the world. Since everyone has access to popular culture, it constructs the way that people think about the world around them. The course will explore the creation, production, dissemination, reception and consumption of popular culture.
SOCI 1311. INTRODUCTION TO SOCIOLOGY. 3 Hours. (TCCN = SOCI 1301)
(SOCI 1301). A scientific approach to the analysis and explanation of culture, personality, and social organization. The social processes and mechanisms of interaction involved in the natural process of cultural development, dissemination, assimilation, and the institutions of the group. This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences.

SOCI 2312. SOCIAL PROBLEMS. 3 Hours. (TCCN = SOCI 1306)
A survey of contemporary social problems in the United States. Emphasis is on applying different theoretical perspectives and systematic procedures to understand social problems as public issues rather than personal problems. This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences.

SOCI 3312. JUVENILE DELINQUENCY. 3 Hours.
The delinquent as a person and delinquency as a social problem, theories of delinquency, and methods of correctional treatment and preventive programs.

SOCI 3313. CRIMINOLOGY. 3 Hours.
Crime-related social issues. Defining and measuring crime, surveying major theoretical explanations of criminal behavior, and society's formal responses to crime and criminals.

SOCI 3314. THE LATINA EXPERIENCE. 3 Hours.
Examines the social, cultural and economic experiences of Latin American women in the United States, with particular emphasis on Mexican-origin women. The course surveys the historical and contemporary experiences of Latinas in the United States with respect to family dynamics, religion, education, politics, health and illness, the labor market, mass media, and the arts. Offered as MAS 3314, SOCI 3314, SOCW 3314, GWSS 3314, and AAST 3321. Credit will be granted in only one department.

SOCI 3315. SOCIAL PSYCHOLOGY OF CRIME. 3 Hours.
Selected concepts in social psychology applied to issues in crime and justice, such as the actions of victims, criminals, and criminal justice professionals. Topics include aggression, social perception, cognitions, conformity, obedience, and deviance.

SOCI 3316. LATINO HEALTH ISSUES. 3 Hours.
A cross-cultural examination of issues in Latino health and relevant health practices in the United States through the lenses of social sciences. Themes include the Latino Threat Narrative, acculturation histories and health care status of major Latino ethnic enclaves in the U.S. Listed as SOCI 3316, MAS 3316, and ANTH 3316; may receive credit for either SOCI 3316, MAS 3316, or ANTH 3316.

SOCI 3317. INDIVIDUAL AND SOCIETY. 3 Hours.
How society influences individual thought, feeling, and behavior. Includes interpersonal perception, attitudes, norms, roles, conformity, and such social issues as aggression, helping behavior, prejudice, and interpersonal attraction.

SOCI 3318. SELF AND SOCIAL IDENTITY. 3 Hours.
The social self. Topics include factors in the development, organization, evaluation and presentation of self in everyday life and processes by which social categories and roles influence self concept.

SOCI 3319. SMALL GROUPS. 3 Hours.
The process and structures of small-scale interaction systems, including an analysis of the process of leadership, the exercise of influence, the effect of groups on individuals and of individuals on groups, the relation and function of the small group as a part of a larger whole, and the process of group formation, development, and disintegration.

SOCI 3320. DEVIANCE: SOCIAL AND PERSONAL. 3 Hours.
Theoretical perspectives on societal definitions of behavior as deviant or disorganized. Selected studies, representative of current problems, examined critically in terms of the structural-cultural conditions of contemporary society.

SOCI 3321. SOCIALIZATION AND SOCIAL CONTROL. 3 Hours.
The relationship between social structure and the individual. The influence of social factors on cognitive development, personality formation, and the behavior of individuals throughout the lifecycle. The effect of socialization on conformity and deviance. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3322. RACE, LATINOS, AND THE AMERICAN NARRATIVE. 3 Hours.
Adopts race and ethnicity as a central platform to examine how sociocultural and structural processes intersect to shape an American narrative of Latinos in the United States. Assesses topics like ethnic capital, socioeconomic mobility, and the digital age to broaden a sociological understanding of Latino group progress in relation to widening inequality gaps. Offered as SOCI 3322 and MAS 3322; credit will be granted in only one department.

SOCI 3323. COLLECTIVE BEHAVIOR. 3 Hours.
Provides an overview of the elementary forms of collective behavior including riots, panics, fads, fashion, cults and crazes. Explanatory theories and specific instances of the different forms of collective behavior are examined. Prerequisite: SOCI 1311.

SOCI 3324. SOCIAL MOVEMENTS. 3 Hours.
Focuses on twentieth and twenty-first century social movements, including the U.S. civil rights movement, the student and anti-war movements of the 1960s, the women's movement, the environmental movement, and anti-globalization movements. Status politics movements, such as pro-choice/pro-life and gay rights movements, are also explored. Compares these movements with their counterparts in other countries and identifies the reasons for their successes and failures.
SOCI 3327. INTERCULTURAL INTERACTION. 3 Hours.
Patterns and variations in interactions involving people from different cultures and subcultures. Intercultural interaction, both within multicultural societies and between persons from different societies.

SOCI 3328. MARITAL AND SEXUAL LIFESTYLES. 3 Hours.
Contemporary American lifestyles selected from: singles, traditional marriage, homosexuals, single-parent families, open marriage, non-marital sexuality, cohabitation, dual-career marriage, childless couples, egalitarian marriage, families in later life. Offered as DIVR 3328, SOCI 3328 and GWSS 3328; credit will be granted only once.

SOCI 3331. SOCIOLOGY OF THE FAMILY. 3 Hours.
The family's role in American society and in other cultures past, present, and future. Family research methods, comparative family systems, child development/parenting, culture and personality, minority families, social class variation in families, work and family. Offered as SOCI 3331 and GWSS 3331; credit will be granted only once. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3332. SOCIOLOGY OF REPRODUCTION. 3 Hours.
Investigates historical and contemporary cultural customs, social institutions, and personal experiences related to reproduction. Topics may include assisted reproduction, pregnancy loss, living "child-free," sperm/egg donation, and surrogacy. Examines how changing economic conditions, technologies, and social norms shape the meaning of children, childbirth education, infertility, and the experience of birth for both men and women.

SOCI 3333. SOCIOLOGY OF GENDER. 3 Hours.
Examination of theoretical and empirical approaches to understanding the formation of gender. Assesses individual and structural dimensions of gender in various social institutions including work, education, and families. Offered as SOCI 3334 and GWSS 3334; credit will be granted only once.

SOCI 3336. SOCIAL INEQUALITY. 3 Hours.
Examines the processes, characteristics, and consequences of social inequality in society. Topics include the social class structure, status groups, and elite power structure as they influence people's life chances. Offered as AAST 3336 and SOCI 3336; credit will be granted in only one department.

SOCI 3337. RACIAL & ETHNIC GROUPS IN US. 3 Hours.
Compares the immigration, acculturation, and adjustment processes of various racial/ethnic groups in the U.S. Examines historical and contemporary discrimination in relation to the social conditions of racial/ethnic minority groups in the U.S. Topics include classical and contemporary theory; individualistic, cultural, and structural arguments about social arrangements; and conflict among majority and minority groups. Offered as AAST 3337, MAS 3337, and SOCI 3337; credit will be granted in only one department. Credit will not be granted for both SOCI 3337 and SOCI 4310 or for MAS 3337 and MAS 4310.

SOCI 3338. CONTEMPORARY BLACK EXPERIENCE. 3 Hours.
An overview of recent research concerning the African American experience in the post-civil rights era. Topics include explanations for racial differences across spheres of society such as income, education, and occupation; the debate over race versus social class; the persistence of racial discrimination; and emerging disputes within the black community regarding "what it means to be black." Offered as AAST 3338 and SOCI 3338; credit will be granted in only one department.

SOCI 3339. RACE, SPORT AND MEDIA. 3 Hours.
The media, including television, film, print, audio, and online outlets, influence how we view the world. This course analyzes overt, subtle and subliminal messages about culture, race, ethnicity, and sport as presented to us through various forms of the media. Through examinations of media portrayals of race, both past and present, students will analyze media artifacts, identify recurring themes, and examine research focused on the societal effects of stereotypical media portrayals. Offered as AAST 3339 and SOCI 3339; credit will be granted in only one department.

SOCI 3340. SOCIOLOGY OF EDUCATION. 3 Hours.
Social relations between the school and society, teachers and parents, teachers and school management, and other relevant relationships. Studying cooperation and conflict, values, complex organizational structure, and social change. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3341. SOCIOLOGY OF SPORT. 3 Hours.
Sociological examination of the institution of sport in U.S. society. By examining selected topics such as sport and socialization, sport and politics, sport and education, the Olympics, race and sport, violence in sport, women in sport, and the business of sport, this course will address the social significance of sport and its function as a major social institution.

SOCI 3342. SOCIOLOGY OF THE HUMAN BODY. 3 Hours.
Drawing from the social sciences, cultural and gender studies, and exercise physiology, this course in body sociology addresses several contemporary issues relating to diet, nutrition and exercise. Specific topics include eating disorders, factory farming, and “body industries” involving weight-loss diets, gyms, fashion, and cosmetic and bariatric surgery. The medical model of bodies is also examined. Also listed as KINE 3342; credit will not be granted for both.

SOCI 3343. SOCIOLOGY OF RELIGION. 3 Hours.
This course provides an overview of the scientific study of religion from a sociological perspective. The focus is on theories, research and trends relevant to religion in the contemporary United States. Topics include, but are not limited to, religious traditions, practices, and beliefs; declining religious participation; and religion and social change. The relationship between religion, politics, race relations, sex and gender will also be examined. Offered as SOCI 3343 and AAST 3342; credit will be granted in only one department.
SOCI 3345. SOCIOLOGY OF THE 1960S. 3 Hours.
This course presents a sociological analysis of the sixties, stressing the connection between grassroots mobilization and large structures of power, war, race and gender. The legacy of the sixties is examined through stories told by and about activists of the period. Parallels between the sixties and the present are identified. Movements covered may include civil rights, black power, anti-war and women's rights. Offered as AAST 3344 and SOCI 3345; credit will be granted in only one department.

SOCI 3346. U.S. INTO THE TWENTY-FIRST CENTURY. 3 Hours.
Selected problems, prospects, and dilemmas examined in the context of contemporary perspectives in sociology as the United States enters the new millennium as a global actor.

SOCI 3347. ENVIRONMENT AND SOCIETY. 3 Hours.
Explores the causes, consequences, and potential resolutions of environmental issues as they relate to human society. Topics include the social roots of environmental problems, inequalities in the distribution of environmental risks and harms, and new directions in sustainable development.

SOCI 3348. SOCIAL ASPECTS OF RISK. 3 Hours.
An examination of the social aspects of risk in everyday life. The course covers the relationship between risk and thrill-seeking behavior, risk assessment and the management of risk by technical experts, risk perceptions among the general public, and how technology and culture change the nature and meaning of risk over time.

SOCI 3351. WORK, OCCUPATIONS, AND CAREER DEVELOPMENT. 3 Hours.
Combines applied information on career development with a sociological perspective on work and occupations. Career development topics may include academic majors and career options, networking, career mentorship and sponsorship, job searches, resume writing, and interviewing. Other topics may include the historical development of work, occupational structures (professional, managerial, service, and blue-collar occupations), inequalities, work satisfaction, work-life balance, and the future of work.

SOCI 3352. SOCIAL STATISTICS. 3 Hours.
Descriptive statistics including measures of central tendency, measures of dispersion, and measures of association. Emphasis is on probability theory and testing hypotheses. Specific models include T-Test, chi-square, gamma, lambda, theta, analysis of variance and covariance, regression and correlation analysis. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3353. SOCIAL CLIMATE OF CITIES. 3 Hours.
A comparative study of urban communities and metropolitan areas in terms of their distinctive social life and culture. Topics touching on power and urban politics, race and ethnic relations, poverty, and leisure and lifestyles will be examined in terms of their contribution to the unique social climate of cities. Offered as AAST 3353 and SOCI 3353; credit will be granted in only one department.

SOCI 3355. APPS AND TOOLS FOR SOCIAL RESEARCH. 3 Hours.
A hands-on course in which students learn to use the apps and tools commonly used in qualitative and quantitative social research to collect, manage, analyze, and present different types of information, such as numeric data, pictures, audio, video, and text. Satisfies the university requirements for computer literacy and oral communication.

SOCI 3356. WOMEN, WORK AND SOCIAL CHANGE. 3 Hours.
Women's work experiences, how these experiences are changing, and relationship between paid employment and non-wage household labor. Paid and unpaid work experiences are empirically examined in terms of a variety of theoretical perspectives. Offered as DIVR 3356, SOCI 3356 and GWSS 3356; credit will be granted only once.

SOCI 3357. LAW AND SOCIETY. 3 Hours.
Law as a social institution. The processes of defining criminal conduct and the social functions of law and of legal processes and systems. Prerequisite: sophomore standing or permission of the instructor.

SOCI 3360. TOPICS IN SOCIOLOGY. 3 Hours.
Selected topics in social issues, policy, processes and/or structure. May be repeated for credit with departmental permission.

SOCI 3362. SOCIAL RESEARCH. 3 Hours.
Students examine quantitative and qualitative research designs, such as experiments, survey research, and intensive interviewing. Additional topics including research ethics, literature reviews, measurement, sampling, and causation. Required of all sociology majors.

SOCI 3365. PROGRAM EVALUATION & NEEDS ASSESSMENT. 3 Hours.
Introduces basic concepts in evaluation research addressing the need for and implementation, effectiveness, and efficiency of social intervention efforts. Students will advance their skills in quantitative and qualitative research in partnership with community organizations. The course provides an opportunity to learn about and apply techniques for needs assessment, formative and summative program evaluation, developing and testing social impact models, examining costs and benefits, and communicating findings. Prerequisite: SOCI 3462.

SOCI 3366. POPULATION TRENDS AND PROCESSES. 3 Hours.
Examines the fact that all people are born, usually move from one place to another, and inevitably die. Societal patterns in human fertility, migration and mortality contribute to widely varied life-chances for people over time and across the planet. This course explores theories and research on demographic dimensions of human behavior as they affect social and economic issues. The course provides an understanding of how vital population trends and processes are for assessing social problems and offering solutions. Credit will not be granted for both SOCI 4325 and SOCI 3366.
SOCI 3372. SOCIOLOGICAL THEORY. 3 Hours.
This course introduces students to major theories and figures who have provided sociology with interpretations of the social world. Students will consider how sociologists use theoretical concepts to understand social interactions, social problems, and social change. Students will apply sociological theories to social phenomena. Prerequisite: junior standing or permission of the instructor.

SOCI 3373. SOCIAL THEORY THROUGH POPULAR CULTURE. 3 Hours.
This course examines major theories and figures who have provided sociology with interpretations of the social world. Students will read major social, cultural, and political theories through popular culture texts (including movies, television, music, video games, and comic books) in order to interpret sociological theory. The course is designed to demonstrate the relevance of social theory in students' everyday lives.

SOCI 3380. SCIENCE AND TECHNOLOGY IN SOCIETY. 3 Hours.
Explores the complex relationship between society, science, and technology. Themes include historical perspectives on the production and deployment of scientific knowledge, critical approaches to the social, cultural, and ethical impacts of scientific and technological developments, and the role of democracy in the advancement of science and technology.

SOCI 3381. GIG WORKERS. 3 Hours.
This course examines the way employers increasingly rely on temporary flexible labor, and what it feels like to be employed precariously. Themes may include creative labor, cultural production, automation, algorithmic hiring, labor contracts, and exploitation.

SOCI 3390. HONORS COLLOQUIUM. 3 Hours.
An interdisciplinary course designed to meet the needs of advanced undergraduates in the Honors College. Prerequisite: participation in the Honors College and/or permission of the instructor.

SOCI 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in the designated areas. Prerequisite: permission of the instructor.

SOCI 4193. INTERNSHIP IN SOCIOLOGY. 1 Hour.
Supervised internship program in which a student interns at a company, non-profit organization, or governmental agency. Involves the application of sociology in a non-academic setting. Students may complete a maximum of 6 hours in any combination of SOCI 4193, SOCI 4293, and SOCI 4393. Prerequisite: SOCI 1311 or SOCI 2313; permission of the instructor; and junior standing.

SOCI 4195. SERVICE LEARNING INDEPENDENT STUDY. 1 Hour.
This course involves the investigation and application of sociological knowledge through community based service. Involves structured academic analysis of service experiences. The student and supervising faculty will identify the partner agency and social issue to be addressed. Prerequisite: permission of the instructor.

SOCI 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in the designated areas. Prerequisite: permission of the instructor.

SOCI 4293. INTERNSHIP IN SOCIOLOGY. 2 Hours.
Supervised internship program in which a student interns at a company, non-profit organization, or governmental agency. Involves the application of sociology in a non-academic setting. Students may complete a maximum of 6 hours in any combination of SOCI 4193, SOCI 4293, and SOCI 4393. Prerequisite: SOCI 1311 or SOCI 2312; permission of the instructor; and junior standing.

SOCI 4295. SERVICE LEARNING INDEPENDENT STUDY. 2 Hours.
This course involves the investigation of sociological knowledge through community based service. Involves structured academic analysis of service experiences. The student and supervising faculty will identify the partner agency and social issue to be addressed. Prerequisite: permission of the instructor.

SOCI 4303. WOMEN IN SOCIETY. 3 Hours.
Women's status in contemporary American society, including the family, workplace, and politics. Women's status will also be examined in historical and crosscultural perspectives. Offered as SOCI 4303 and GWSS 4303; credit will be granted only once.

SOCI 4306. QUALITATIVE RESEARCH METHODS. 3 Hours.
Conceptual frameworks and techniques for planning, conducting, analyzing, reporting and evaluating qualitative research. Topics include interviewing, participant observation, coding, case studies and focus groups. Prerequisite: sophomore standing or permission of the instructor.

SOCI 4309. WRITING FOR THE SOCIAL SCIENCES. 3 Hours.
This course blends the theory and practice of social science writing in order to teach students how to move from the first draft to the final draft of term papers, theses, dissertations, and articles. The primary skill taught is self-editing --appraising one's work from the outside. The goal is to learn how to write for publication, drawing from postmodern perspectives on writing. Prerequisite: SOCI 1311 or permission of instructor.

SOCI 4315. VIOLENCE IN SOCIETY. 3 Hours.
Violence as a group process directed toward social change. Historical perspectives, current events, preventive and control techniques, public reaction, and individual behavior. Prerequisite: sophomore standing or permission of the instructor.

SOCI 4320. MEDICAL SOCIOLOGY. 3 Hours.
The relationships between different societies and social groups and their incidence of disease and mortality. Also examines culture-related causes of disease and treatment approaches, medicine as an occupation, healer-patient relationships, and the modern hospital as a bureaucratic organization.
SOCI 4331. RACE, ETHNICITY & FAMILY FORMATION. 3 Hours.
Investigates the ways in which cultural understandings of race and ethnicity have shaped historical and contemporary variations in family structure, familial experiences, and the legal possibilities for family formation. Junior standing (60 hours) or permission of the instructor required to enroll in this course. Offered as AAST 4331 and SOCI 4331; credit will be granted in only one department.

SOCI 4341. INEQUALITIES IN PUBLIC EDUCATION. 3 Hours.
This course examines the manner in which race, ethnicity, and class affect the quality of education in the public schools. Topics include the resegregation of schools, class and race based achievement and funding gaps, and the role the schools play in reproducing inequality. This course has a service learning component and requires volunteering in programs designed to reduce inequality in the schools. Offered as AAST 4341 and SOCI 4341; credit will be granted in only one department.

SOCI 4365. TOPICS IN SOCIOLOGY. 3 Hours.
Selected topics in social issues, policy, processes and/or structure. Prerequisite: junior standing or permission of the instructor. May be repeated for credit with departmental permission.

SOCI 4370. SENIOR RESEARCH SEMINAR. 3 Hours.
Provides sociology majors with an opportunity to gain practical experience in social research through in-depth participation in a cooperative research project. Integrates substantive knowledge with methodological and statistical skills. Oral, written, and computer application components are included. Prerequisite: SOCI 3352 and SOCI 3462 or permission of the instructor.

SOCI 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering personal research or study in the designated areas. Prerequisite: permission of the instructor.

SOCI 4393. INTERNSHIP IN SOCIOLOGY. 3 Hours.
Supervised internship program in which a student interns at a company, non-profit organization, or governmental agency. Involves the application of sociology in a non-academic setting. Students may complete a maximum of 6 hours in any combination of SOCI 4193, SOCI 4293, and SOCI 4393. Prerequisite: SOCI 1311 or SOCI 2312; permission of instructor; and junior standing.

SOCI 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or project of equivalent difficulty under the direction of a faculty member in the major department.

SOCI 4395. SERVICE LEARNING INDEPENDENT STUDY. 3 Hours.
This course involves the investigation and application of sociological knowledge through community based service. Involves structured academic analysis of service experiences. The student and supervising faculty will identify the partner agency and social issue to be addressed. Prerequisite: Permission of the Instructor.

SOCI 4396. INTERNSHIP IN POPULAR CULTURE. 3 Hours.
Supervised internship program in which a student interns at a company, non-profit organization, or governmental agency. Involves the application of popular culture knowledge in a non-academic setting. Prerequisite: SOCI 1310; permission of instructor; and junior standing.

SOCI 5191. CONFERENCE COURSE. 1 Hour.

SOCI 5301. SOCIOLOGICAL THEORY. 3 Hours.
A comprehensive review, analysis, and evaluation of the dominant conceptual perspectives, and their proponents, in sociological theory.

SOCI 5303. RESEARCH DESIGN. 3 Hours.
This seminar course overviews the process of designing, conducting, and presenting research. Topics include writing literature reviews, formulating research questions and hypotheses, designing measures for concepts, crafting research instruments, collecting data, analyzing data, and reporting the results. The course examines both quantitative methods, such as surveys and experiments, as well as qualitative methods, such as interviews and ethnographic observation.

SOCI 5304. SOCIAL STATISTICS I. 3 Hours.
This course reviews univariate and bivariate descriptive and inferential statistics, focuses on ordinary least squares multivariate regression (including statistical control, path analysis, dummy variables, interaction effects, nonlinear relationships, and regression assumptions), and introduces the generalized linear model (binary logistic regression). Emphasis is on the application of these methods to social science data.

SOCI 5305. RACIAL AND ETHNIC GROUPS IN THE UNITED STATES. 3 Hours.
This seminar course compares and contrasts the immigration, acculturation, and adjustment processes of various racial and ethnic groups in the United States. We will examine conventional and controversial arguments, as well as classical and contemporary theories concerning the dynamics of inter-group relations in America. Some of the more controversial topics in sociology-such as debates over assimilation, Americanization, and enduring conflicts between groups-are the foremost intellectual topics to be addressed. The reading list includes a diverse group of scholars who advance relevant research on race and ethnic relations.
SOCI 5306. SEMINAR IN RACE AND ETHNICITY. 3 Hours.
An advanced seminar on Race and Ethnicity in the United States. Past and present discrimination will be examined in relation to the current social conditions of minority groups living in the United States. A sociological approach to the topic begins with the assumption that race and ethnicity are socially and politically constructed phenomena. Race/ethnic categories within the United States have varied significantly across time and place. Sociology connects the concepts of race and ethnicity to social structures of inequality, power, and stratification. Scholarship on race and ethnicity is central to American sociology. We will empirically and theoretically explore: 1) the social, political and historical conditions under which segregation, racial hierarchies and racial conflict emerge, and 2) the institutions through which racial boundaries and hierarchies are produced and reproduced in the United States.

SOCI 5307. INEQUALITY, POVERTY, AND MOBILITY. 3 Hours.
This seminar course provides a graduate-level introduction to inequality, poverty, and mobility. We will focus on the United States, exploring the contemporary structure as well as long term trends in the distribution of material and nonmaterial resources and the economic, social, and cultural forces that generate and perpetuate the unequal distribution of resources. Our focus will be on inequalities in the areas and intersections of social class, gender, and race.

SOCI 5308. COMPARATIVE ETHNIC AND RACIAL CONFLICT. 3 Hours.
This seminar course provides a graduate-level introduction to ethnic and racial conflict from a comparative perspective. The course will focus on topics, such as the creation and maintenance of ethnic, racial, and national identities; the sources of conflict; the consequences of conflict; conflict prevention and resolution; and attaining justice. We will use a variety of cases to examine conflict, such as former Yugoslavia and Rwanda.

SOCI 5309. CONTEMPORARY BLACK EXPERIENCE. 3 Hours.
This seminar course is an overview of the contemporary sociological literature on the black experience in America. Some of the topics to be addressed include (but are not limited to) the debate over the "significance of race," tensions over the cultural/attitudinal adaptation to inequality, and emerging disputes within the black community regarding what it "means to be black" in the post-Civil Rights Era. By the end of this course, students should be more aware of the important role that class position plays in shaping African-American identities and ideologies.

SOCI 5310. SEMINARS IN SOCIAL PSYCHOLOGY. 3 Hours.
Introduction and discussion of theoretical and methodological perspectives in social psychology. Focusing on particular domains of social life, these seminars examine fundamental processes of social interaction and the influence of social situations and social experience on the thought, feeling, and behavior of individuals. (May be repeated for credit when topics vary.).

SOCI 5311. SOCIOLOGY OF FAMILIES. 3 Hours.
This seminar course explores major areas of inquiry in the sociological study of families in the contemporary U.S. We will examine the evolution of American families and the historical processes that have shaped them. Throughout the course, the interconnections between families and social structures will be emphasized. Particular attention will be given to the ways in which gender, class, race and ethnicity influence families.

SOCI 5312. SOCIOLOGY OF REPRODUCTION. 3 Hours.
This seminar course investigates the history and sociology of reproduction in the United States. We examine the history of reproductive politics, the changing meaning of children, childbirth education, the experience of birth for both men and women, pre-natal diagnostic testing, pregnancy loss, adoption, infertility, living "child-free," new reproductive technologies, sperm/egg donation, surrogacy, and the burgeoning "baby business." The course explores the cultural norms, social institutions, and experiences of women and men as they navigate contemporary reproduction, mindful of variations by race, class, and gender.

SOCI 5313. RACE AND FAMILY. 3 Hours.
Who can become a family? This seminar course investigates this question from a socio-historical perspective, focusing on the ways in which dominant cultural understandings of race and ethnicity have shaped the legal possibilities for family formation, family structure, and the experiences of families in the U.S. The course inspects historical and contemporary families, looking at the intersection of race and family formation.

SOCI 5314. GENDER AND FAMILY. 3 Hours.
This seminar course focuses on current issues in the sociology of families, focusing on the intersection of gender and family. The course is organized to provide an overview of the issues of particular interest to contemporary scholars, with theoretical, conceptual and empirical research/work included in the readings. We focus particularly on how gender affects how family is experienced.

SOCI 5315. WOMEN AND WORK. 3 Hours.
This seminar course focuses on current issues in the sociology of women and work. We address contemporary and historical patterns of women's paid and unpaid work focusing on theoretical, conceptual and empirical research.

SOCI 5316. THE SOCIAL MIND AND INTERPERSONAL PROCESSES. 3 Hours.
This seminar course is a study of the influence of the social context on human thoughts, feelings and actions, and on the processes that constitute social interaction. Relevant theories in social psychology and microsociology and original-source readings will be covered.

SOCI 5317. CULTURAL SOCIOLOGY. 3 Hours.
This seminar course examines the relationship between culture and society. Students will study contemporary debates around culture. Students will pay special attention to the use and experience of popular symbols for the ways that their use involves the creation of meanings.

SOCI 5318. MEDIA, CULTURE, AND SOCIETY. 3 Hours.
Media saturate our everyday lives. As such, they have a tremendous impact on the way we understand and interact with society. This seminar course will take a critical approach to the study of culture in order to examine the fundamental role of media in society. We will pay particular attention to the influence of the Culture Industry.
SOCI 5319. SEMINARS IN SOCIAL INSTITUTIONS AND CHANGE. 3 Hours.
Seminars in this area are concerned with the structure and change of the basic elements of society that represent ordered and regulated aspects of social life. Also examined are collective behavior and social movements which result from instability in institutional arrangements and represent efforts to enact social change. (May be repeated for credit when topics vary.).

SOCI 5320. SOCIOLOGY OF EDUCATION. 3 Hours.
This seminar course will examine the relationships between U.S. education institutions and society by reviewing a variety of sociological theories and empirical studies. A primary area of focus will be on the relationship between formal education and class, race/ethnicity, and gender-based inequality. Topics will include, but are not limited to, the following: the history and development of U.S. educational institutions, social mobility and stratification, social reproduction, the dynamics of race, class and gender in education, student-teacher relationships, teaching as a profession, higher education, and an exploration of educational reforms.

SOCI 5321. ENVIRONMENTAL SOCIOLOGY. 3 Hours.
This seminar course covers advanced topics in environmental sociology. We will investigate how human social organization affects environmental problems and responses. Specifically, we will explore topics such as environmental inequality, the social construction of nature, risk assessment, consumption and materialism, environmental values and identities, and environmental social movements. We will also look at social problems tied to environmental issues, such as those stemming from disasters, climate change, and food production. We will conclude with new directions in sustainable development.

SOCI 5322. SOCIOLOGY OF SPORT. 3 Hours.
An advanced seminar on the Sociology of Sport. This course is a sociological examination of the institution of sport in American society. By examining selected topics (such as sport and socialization, sport and politics, sport and education, race and sport, violence in sport, women in sport, and the business of sport) this course will address the social significance of sport and its function as a major social institution. We will examine the manner in which society has been shaped by the institution of sport and how sport has been shaped by society.

SOCI 5323. SOCIOLOGY OF RELIGION. 3 Hours.
This seminar course provides an overview of the scientific study of religion from a sociological perspective. The focus in the course will be on theories, research, and trends concerning religion in the contemporary United States. Some of the topics to be addressed include (but are not limited to) understanding the rich variety of religious traditions and affiliations, religious practices and beliefs, as well as the role that religion plays in facilitating and limiting social change as well as conflict in society. We will also examine differences across various religious traditions such as “mainline” and “fundamentalist” believers, secularization, and the often-controversial ways that religion intersects with other spheres of society such as morality, politics, race and ethnic relations, sex and gender.

SOCI 5324. QUALITATIVE RESEARCH METHODS. 3 Hours.
This seminar course introduces students to the qualitative tradition in sociology. We will study the assumptions underlying qualitative methods and important ethical and theoretical issues in field work. Students will become familiar with ethnographic research techniques (participant-observation and in-depth interviewing) and implement those methods in an individual small-scale research project.

SOCI 5325. READING THE QUALITATIVE CLASSICS. 3 Hours.
What makes a classic a classic? In this seminar course we will sample-read, examine, and analyze-the wealth of “classic” ethnographies within the field of Sociology. We will study the classics with an eye to exploring the qualities that make these exemplary texts which often connect people to and excite them about the field of Sociology.

SOCI 5326. SOCIAL MOVEMENTS. 3 Hours.
Examines core concepts and theoretical perspectives in social movements. Topics include recruitment and participation, tactics in activism, countermobilization, repression, and the effectiveness of movements in changing both policy and cultural norms.

SOCI 5330. SEMINARS IN SOCIAL DIFFERENTIATION. 3 Hours.
In all human societies, perceptions of differences in individuals, social positions and groups arise and form a basis for social evaluation. Seminars in this area examine the processes involved in social differentiation, social evaluation, and resulting forms of social inequality. (May be repeated for credit when topics vary).

SOCI 5341. SEMINARS IN THEORY AND RESEARCH METHODS. 3 Hours.
Research methods seminars address a variety of issues related to quantitative and qualitative approaches to data collection and analysis. Theory courses offer extended treatment of topics in theory and theory construction, reflecting systematic efforts to understand the nature and operation of human society and social behavior. (May be repeated for credit when topics vary.).

SOCI 5385. NON-THESIS PROJECT. 3 Hours.
A written essay synthesizing the students' coursework in response to one of two supplied prompts. The topic and scope of the written project must be approved by the non-thesis committee chair. A final presentation of the project to the non-thesis committee, composed of the non-thesis committee chair and two additional members of the graduate faculty, is required.

SOCI 5388. RESEARCH PRACTICUM / INTERNSHIP. 3 Hours.
SOCI 5389. TEACHING SOCIOLOGY. 3 Hours.
To learn strategies of coping with practical problems of teaching undergraduate sociology, students assist one or more professors in lecture preparation, grading, and examination construction. Not to be counted toward the degree requirement.

SOCI 5392. CONFERENCE COURSE IN SOCIOLOGY. 3 Hours.
There is not currently a description listed for this course since the content varies.
SOCI 5393. THESIS SUBSTITUTE. 3 Hours.
An academic literature review, research design, or an internship report on a selected sociological topic of individual interest. The topic and scope of the written project must be approved by the final thesis committee, which is composed of three graduate faculty members. A proposal defense and a final oral defense of the project is required.

SOCI 5398. THESIS. 3 Hours.

SOCI 5698. THESIS. 6 Hours.
Substantial original empirical or theoretical research project on a sociological topic of individual interest. The topic and scope of the written project must be approved by the final thesis committee, which is composed of three graduate faculty members. A proposal defense and a final oral defense of the project is required.
Sociology - Undergraduate Programs

Overview

The principal common educational objective in the Department of Sociology and Anthropology is to develop a systematic understanding of social behavior, human culture, and social institutions. Knowledge of human social and cultural relationships is vital to a meaningful perspective on and understanding of the society in which we live. Contemporary societies are characterized by diversity, rapid change, complex organization, and extensive specialization. Programs of study in the Department of Sociology and Anthropology pursue the challenge of:

a. creating and disseminating general knowledge that will render this world more understandable and
b. providing an educational base for more effective and humane planning and social intervention in society.

Each of the programs of study relates to this general objective in a somewhat different manner. Students are encouraged to visit with the faculty and learn more about the programs offered in the department.

Sociology

A program of study in sociology has three principle objectives: to foster the ability to analyze human relationships from a sociological perspective, to develop the theoretical, methodological, and statistical skills necessary for asking and answering sociological questions, and to enhance individuals’ awareness of the relationship between events in their own lives and the structure of the society in which they live. The program is designed to prepare students both to pursue graduate work in sociology and to seek a career in a variety of private and public settings where knowledge of human relationships and/or social research skills is particularly useful. Students seeking certification to teach in the public schools can use sociology as a teaching area.

Popular Culture Minor

The Popular Culture Minor allows students from across campus to develop important skills no matter their major. Students in the Popular Culture Minor prepare themselves to 1) work in the entertainment industry; and/or 2) understand the role and power of popular culture in their everyday lives. Whether students seek employment in the creative industries (video games, music, film, social media, etc.) or other employment areas, they will be able to look at complex problems and develop innovative solutions. Students will have the opportunity to analyze popular culture, its production, consumption, and reception. The minor mixes a classic approach to a liberal arts education with opportunities to prepare for real-world employment.

Fast Track Program

The Fast Track Program in Sociology allows outstanding seniors in sociology to take up to three graduate seminars for credit toward both the Bachelor's degree and the Master's degree in Sociology. Interested undergraduate students should apply for the Fast Track Program when they are within 30 hours of completing the Bachelor's Degree. Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies. They will not be required to take the Graduate Record Examination, complete an application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA program with only five additional courses and a thesis remaining to complete the requirements for thesis option. For more details about the program contact the Undergraduate Advisor for the Department of Sociology and Anthropology and consult the on-line catalog.

Optional Concentrations in Sociology

Students majoring in Sociology may pursue a general course of study in the discipline or concentrate in a specific area or areas. The purpose of specialization is to provide the student with a focused, systematic, and in-depth educational experience in the context of a broad liberal arts education. These specializations are also related to different career paths. Please see the Sociology academic advisor for more information on completing an area concentration.

General Requirements:

Completing four courses in any area fulfills requirements for the concentration. See the Sociology academic advisor for more information.

The areas of specialization are:

Human Capital and Work

SOCI 3317 INDIVIDUAL AND SOCIETY
SOCI 3319 SMALL GROUPS
SOCI 3331 SOCIOLOGY OF THE FAMILY
SOCI 3336 SOCIAL INEQUALITY
SOCI 3351 WORK, OCCUPATIONS, AND CAREER DEVELOPMENT
SOCI 3356 WOMEN, WORK AND SOCIAL CHANGE
SOCI 3381 GIG WORKERS

Social Services and Diverse Populations

SOCI 3317 INDIVIDUAL AND SOCIETY
SOCI 3319 SMALL GROUPS
SOCI 3320 DEVIANCE: SOCIAL AND PERSONAL
SOCI 3322 RACE, LATINOS, AND THE AMERICAN NARRATIVE
SOCI 3331 SOCIOLOGY OF THE FAMILY
SOCI 3332 SOCIOLOGY OF REPRODUCTION
SOCI 3337 RACIAL & ETHNIC GROUPS IN US
SOCI 3338 CONTEMPORARY BLACK EXPERIENCE
SOCI 3339 RACE, SPORT AND MEDIA
SOCI 3343 SOCIOLOGY OF RELIGION
SOCI 4306 QUALITATIVE RESEARCH METHODS
SOCI 4331 RACE, ETHNICITY & FAMILY FORMATION

**Non-Profit and Community Organizations**
SOCI 3319 SMALL GROUPS
SOCI 3324 SOCIAL MOVEMENTS
SOCI 3331 SOCIOLOGY OF THE FAMILY
SOCI 3332 SOCIOLOGY OF REPRODUCTION
SOCI 3343 SOCIOLOGY OF RELIGION
SOCI 3347 ENVIRONMENT AND SOCIETY
SOCI 4331 RACE, ETHNICITY & FAMILY FORMATION

**Health, Science and Technology**
SOCI 3316 LATINO HEALTH ISSUES
SOCI 3317 INDIVIDUAL AND SOCIETY
SOCI 3332 SOCIOLOGY OF REPRODUCTION
SOCI 3341 SOCIOLOGY OF SPORT
SOCI 3347 ENVIRONMENT AND SOCIETY
SOCI 3348 SOCIAL ASPECTS OF RISK
SOCI 3380 SCIENCE AND TECHNOLOGY IN SOCIETY
SOCI 4320 MEDICAL SOCIOLOGY

The following courses may be used to complete any of the area concentrations if the content is related to the concentration (approval is required):
SOCI 3360 TOPICS IN SOCIOLOGY
SOCI 4365 TOPICS IN SOCIOLOGY
SOCI 4391 CONFERENCE COURSE
SOCI 4393 INTERNSHIP IN SOCIOLOGY
SOCI 4395 SERVICE LEARNING INDEPENDENT STUDY
Requirements for a Minor in Sociology

A minor in sociology requires 18 hours in sociology, at least six of which must be at the 3000/4000 level.

Requirements for a Minor in Popular Culture

A minor in popular culture requires 18 semester hours, including 6 required hours and 3 experiential learning hours.

- **Required (6 credit hours)**
  - SOCI 1310. INTRODUCTION TO POPULAR CULTURE
  - SOCI 3373. SOCIAL THEORY THROUGH POPULAR CULTURE

- **Experiential Learning – 3 Credit hours from the following**
  - Internship, Independent Study or Conference Course related to Popular Culture – with prior approval of the advisor of the Popular Culture Minor
    - SOCI 4396. INTERNSHIP IN POPULAR CULTURE
    - MUSI 4395. INTERNSHIP

Fast Track Program in Sociology

ABOUT

The Fast Track Program allows outstanding undergraduate students in sociology at UT Arlington to take up to three graduate seminars in sociology that will earn credit toward both the Bachelor’s degree and the Master’s degree in Sociology. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA.

Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies to continue their graduate work in the Sociology MA Program once the Bachelor’s degree is awarded. They will not be required to take the GRE, complete an additional application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option (requirements for other degree tracks will vary).
APPLYING TO THE FAST TRACK PROGRAM

Undergraduate students can apply to the Department of Sociology and Anthropology by completing a Fast Track application form available from the Sociology academic advisor. Students will be notified by the Department of their acceptance into the Fast Track program.

UNCONDITIONAL ADMISSION

1. The student must be within 30 hours of completing a BA in Sociology or a BS in Applied Sociology at UTA.

2. The student must have completed 30 hours of coursework at UTA.

3. The student must have an overall GPA of at least 3.3 in all coursework at all schools and an overall GPA of at least 3.3 in all coursework completed at UTA.

4. Before entering the Fast Track, students must have already taken at least two additional 3000-4000 level sociology courses with a GPA of 3.5 or higher.

5. Before entering the Fast Track, students must also have completed four required core courses in the Sociology major with a GPA of at least 3.5.

For the B.A. in Sociology the required courses for Fast Track admission are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCI 1311</td>

</tbody>
</table>

PROVISIONAL ADMISSION

A student may gain provisional admission if, by the semester in which application is made, they have already completed three required Sociology courses (listed above) with a GPA of at least 3.66 in those courses, and with a fourth required course to be completed in the semester of application. All other requirements above must be met.

Provisional admission will be changed to unconditional admission upon satisfactory completion of remaining requirements. Students failing to meet all requirements at the end of their semester of application will be removed from the Fast Track program. Any credits earned prior to removal from the program will be applied to the undergraduate degree only. Provisionally admitted students who have been removed from the program may subsequently apply to graduate programs via the normal application process, paying all fees and meeting all relevant admission criteria.

DENIAL

Students who do not meet the requirements set out shall be denied admission to the Fast Track program. They may still apply to the graduate program through the regular application process.

GOOD STANDING

In the Fast Track Program, students will choose to enroll in up to three sociology graduate electives, selected with the advice and approval of the Sociology Graduate Advisor. To remain in the Fast Track Program, students must maintain an overall GPA of at least 3.0 and must earn grades of B or better in all Fast Track-approved courses that will be used to satisfy undergraduate and graduate degree requirements. Students must enroll in at least two sociology graduate courses and earn a B or better in all graduate courses taken prior to receiving their bachelor’s degree. If a student does not complete the two graduate courses or fails to make adequate grades, she or he will be unable to continue in the Fast Track Program but, if the courses are completed with a passing grade, will still receive credit toward their undergraduate degree requirements.
Students who, at any time, do not meet these requirements will be obliged to leave the Fast Track program. If a student opts out or does not meet the requirements of the Fast Track Program, any graduate credits earned will be applied only to the undergraduate degree, and none of the other benefits of participation in the Fast Track program will apply. Additionally, graduate courses already taken for undergraduate credit may not be repeated for graduate credit. Students may still apply to the Sociology MA Program via the normal application process, paying all fees and meeting all relevant admission criteria.

A Fast Track student in good standing may skip one Fall or Spring semester (and contiguous summer) after being awarded the BA degree before continuing in the MA program. Further delay will result in losing Fast Track status, after which the regular application process for admission must be followed and no graduate credits will be retained.

ADDITIONAL INFORMATION
For an application form or to obtain more details about this program, please contact the Sociology Undergraduate Advisor.
Sociology - Graduate Programs

Objectives: M.A. in Sociology

The Master of Arts program in sociology is designed to provide students with a firm substantive background in sociological theory and in the techniques of contemporary research methodology and statistical analyses. In addition to these core concerns, the program offers a variety of seminars, as well as practicum opportunities, to help prepare students for a wide range of professional careers in both the private and public sectors or continued graduate education at the Ph.D. level.

Graduate Assistantships and Fellowships in Sociology

Graduate teaching and research assistantships and other forms of financial support will be awarded on a competitive basis. In addition to performance in any graduate courses the student may have taken, the same criteria used to determine admission status will be used in evaluating applications for such awards. No single factor, including standardized test scores, will be used to end consideration of any graduate assistantships.

Admissions Requirements: Sociology

All successful applicants must satisfy the basic graduate admission requirements of UT Arlington as outlined in the University Catalog in the Admissions section. The Sociology graduate program makes admission decisions based on several factors, including grade point averages, preparation in the field of Sociology or related disciplines, letters of recommendation, and statements of interest. There are four categories for acceptance: Facilitated Admission, Unconditional Admission, Probationary Admission, and Provisional Admission.

Facilitated Admission

Available to UTA graduates who have completed their BA from UTA within one year prior to admission. Applicants admitted through Facilitated Admission meet the following three criteria:

1) Overall UTA GPA of 3.5, as calculated by Graduate Studies.
2) Minimum GPA of 3.5 in last 60 hours, as calculated by Graduate Studies.
3) A grade B or better in the following courses:
   1) SOCI 3372 SOCIOLOGICAL THEORY or SOCI 3373 SOCIAL THEORY THROUGH POPULAR CULTURE
   2) SOCI 3352 SOCIAL STATISTICS or SOCI 4306 QUALITATIVE RESEARCH METHODS
   3) SOCI 3362 SOCIAL RESEARCH

To apply for Facilitated Admission, contact the Director of Graduate Studies for Sociology.

Applicants who do not qualify for Facilitated Admission must apply on-line at www.applytexas.org

Letters of Recommendation must be mailed directly from recommenders to the Director of Graduate Studies for Sociology. Statements of Interest must be mailed directly from the applicant to the Director of Graduate Studies for Sociology.

Unconditional Admission

Unconditional Admission is available to applicants who have completed a BA or BS in Sociology or a related discipline from an accredited institution.

Applicants with undergraduate degrees from UTA admitted on Unconditional Admission meet the following three criteria:

1) Minimum GPA of 3.0, as calculated by Graduate Studies.
2) Two letters of recommendation that favorably assess the applicant's potential for success in a graduate program in Sociology.
3) A satisfactory 2-3 page statement of interest describing the applicant's academic background, research or study interests, and professional goals as they relate to the field of Sociology.

Applicants with an undergraduate degree from an institution other than UTA meet the three conditions above for Unconditional Admission plus the following condition:

1) GRE scores of at least 150 on the verbal sub-test (500 on the prior scale) and 144 on the quantitative sub-test (500 on the prior scale).
Probationary Admission

Probationary Admission is available to applicants who have completed a BA or BS in Sociology or a related discipline from an accredited institution but who do not qualify for Unconditional Admission due to a GPA below 3.0, as calculated by Graduate Studies. Applicants admitted on probationary admission meet the following three criteria:

1) GRE scores of at least 150 on the verbal sub-test (500 on the prior scale) and 144 on the quantitative sub-test (500 on the prior scale).

2) Two letters of recommendation that favorably assess the applicant's potential for success in a graduate program in Sociology.

3) A satisfactory 2-3 page statement of interest describing the applicant's academic background, research or study interests, and professional goals as they relate to the field of Sociology.

Provisional Admission

Provisional Admission is available to applicants unable to supply all required documentation prior to the admission deadline, but who otherwise appear to meet admission requirements. Provisionally admitted students must satisfy any incomplete documentation by the end of the semester in which they are admitted.

Deferral

An applicant may be deferred when a file is incomplete or when a denial decision is not appropriate.

International Students

To qualify for admission, international students must score 550 or above on the TOEFL.

Degree Requirements: Sociology

Students may select from three options: the non-thesis, thesis substitute, or thesis degree plan.

The Non-Thesis degree plan is designed for students who wish to complete a written essay synthesizing their coursework in response to one of two supplied prompts. The non-thesis degree plan requires satisfactory completion of a minimum of 36 hours of coursework, including core courses in theory, methods, and statistics, and the three hour non-thesis course SOCI 5385. Non-thesis students must form a non-thesis faculty committee, consisting of a non-thesis chair and two additional members of the graduate faculty. Non-thesis degree seeking students are required to give a presentation on their written essay to their non-thesis faculty committee. The scope, content, and form of the non-thesis document must be approved by the student's non-thesis committee chair.

SOCI 5385.

The Thesis-substitute degree plan is designed for students who wish to complete an academic literature review, research design, or an internship report on a selected sociological topic of personal interest. The thesis-substitute degree plan requires satisfactory completion of a minimum of 33 hours of coursework, including core courses in theory, methods, and statistics, and the three hour thesis substitute course SOCI 5393. Thesis-substitute degree students are required to write and orally defend a proposal for their thesis-substitute project in addition to writing and orally defending their thesis-substitute document. Thesis-substitute degree students must form a thesis-substitute faculty committee, consisting of a thesis-substitute chair and two additional members of the graduate faculty. The scope, content, and form of the thesis-substitute document shall be determined by the student’s thesis committee.

SOCI 5393.

The Thesis degree plan is designed for students who wish to research and write a substantial, original empirical or theoretical work on a sociological topic of personal interest. The thesis degree plan requires satisfactory completion of a minimum of 30 hours of coursework, including core courses in theory, methods, and statistics, and the six hour thesis course SOCI 5698. Thesis degree students are required to write and orally defend a proposal for their research project in addition to completing original research and writing and orally defending their thesis. Thesis students must form a thesis faculty committee, consisting of a thesis chair and two additional members of the graduate faculty. The scope, content, and form of the thesis shall be determined by the student's thesis committee.

SOCI 5698.

Dual Degree Program

Students in sociology may participate in a dual degree program where by they can earn a Master of Arts in Sociology and another field, such as Master of Public Administration or Master of Science in Social Work. By participating in a dual degree program, students can apply a number of semester hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. Six or more hours may be jointly applied depending on the total number of hours required for both degrees, and subject to the approval of graduate advisors from both programs.

To participate in the dual degree option, students must make separate application to each program and must submit a separate Program of Work for each program. Admission to and enrollment in the two programs must be concurrent (admitted to the second program before completing more than 24 hours in the first). Those interested should consult each of the appropriate graduate advisors for coursework requirements and refer to Graduate Studies catalog entry on Dual Degree Program in the Advanced Degrees and Requirements section for further details.
Fast Track Program in Sociology

ABOUT

The Fast Track Program allows outstanding undergraduate students in sociology at UT Arlington to take up to three graduate seminars in sociology that will earn credit toward both the Bachelor’s degree and the Master’s degree in Sociology. It is designed to encourage high standards of performance, to facilitate the transition from undergraduate to graduate study, and to reduce time needed to complete the MA.

Students who successfully complete the Fast Track Program will be admitted automatically to Graduate Studies to continue their graduate work in the Sociology MA Program once the Bachelor’s degree is awarded. They will not be required to take the GRE, complete an additional application for admission to Graduate Studies, supply letters of recommendation, or pay an application fee. An undergraduate student completing the maximum of nine graduate hours would be admitted to the Sociology MA Program with only five additional courses and a thesis remaining to complete the requirements for the thesis option (requirements for other degree tracks will vary).

APPLYING TO THE FAST TRACK PROGRAM

Undergraduate students can apply to the Department of Sociology and Anthropology by completing a Fast Track application form available from the Sociology academic advisor. Students will be notified by the Department of their acceptance into the Fast Track program.

UNCONDITIONAL ADMISSION

1. The student must be within 30 hours of completing a BA in Sociology or a BS in Applied Sociology at UTA.
2. The student must have completed 30 hours of coursework at UTA.
3. The student must have an overall GPA of at least 3.3 in all coursework at all schools and an overall GPA of at least 3.3 in all coursework completed at UTA.
4. Before entering the Fast Track, students must have already taken at least two additional 3000-4000 level sociology courses with a GPA of 3.5 or higher.
5. Before entering the Fast Track, students must also have completed four required core courses in the Sociology major with a GPA of at least 3.5.

For the B.A. in Sociology the required courses for Fast Track admission are:

PROVISIONAL ADMISSION

A student may gain provisional admission if, by the semester in which application is made, they have already completed three required Sociology courses (listed above) with a GPA of at least 3.66 in those courses, and with a fourth required course to be completed in the semester of application. All other requirements above must be met.

Provisional admission will be changed to unconditional admission upon satisfactory completion of remaining requirements. Students failing to meet all requirements at the end of their semester of application will be removed from the Fast Track program. Any credits earned prior to removal from the program will be applied to the undergraduate degree only. Provisionally admitted students who have been removed from the program may subsequently apply to graduate programs via the normal application process, paying all fees and meeting all relevant admission criteria.
DENIAL
Students who do not meet the requirements set out shall be denied admission to the Fast Track program. They may still apply to the graduate program through the regular application process.

GOOD STANDING
In the Fast Track Program, students will choose to enroll in up to three sociology graduate electives, selected with the advice and approval of the Sociology Graduate Advisor. To remain in the Fast Track Program, students must maintain an overall GPA of at least 3.0 and must earn grades of B or better in all Fast Track-approved courses that will be used to satisfy undergraduate and graduate degree requirements. Students must enroll in at least two sociology graduate courses and earn a B or better in all graduate courses taken prior to receiving their bachelor’s degree. If a student does not complete the two graduate courses or fails to make adequate grades, she or he will be unable to continue in the Fast Track Program but, if the courses are completed with a passing grade, will still receive credit toward their undergraduate degree requirements.

Students who, at any time, do not meet these requirements will be obliged to leave the Fast Track program. If a student opts out or does not meet the requirements of the Fast Track Program, any graduate credits earned will be applied only to the undergraduate degree, and none of the other benefits of participation in the Fast Track program will apply. Additionally, graduate courses already taken for undergraduate credit may not be repeated for graduate credit. Students may still apply to the Sociology MA Program via the normal application process, paying all fees and meeting all relevant admission criteria.

A Fast Track student in good standing may skip one Fall or Spring semester (and contiguous summer) after being awarded the BA degree before continuing in the MA program. Further delay will result in losing Fast Track status, after which the regular application process for admission must be followed and no graduate credits will be retained.

ADDITIONAL INFORMATION
For an application form or to obtain more details about this program, please contact the Sociology Undergraduate Advisor.
## Anthropology Undergraduate Programs

### Overview

The principal common educational objective in the Department of Sociology and Anthropology is to develop a systematic understanding of social behavior, human culture, and social institutions. Knowledge of human social and cultural relationships is vital to a meaningful perspective on and understanding of the society in which we live. Contemporary societies are characterized by diversity, rapid change, complex organization, and extensive specialization. Programs of study in the Department of Sociology and Anthropology pursue the challenge of:

- creating and disseminating general knowledge that will render this world more understandable and
- providing an educational base for more effective and humane planning and social intervention in society.

Each of the programs of study relates to this general objective in a somewhat different manner. Students are encouraged to visit with the faculty and learn more about the programs offered in the department.

### Anthropology

A program of study in anthropology has the objective of grounding students in three main subfields of anthropology: cultural anthropology (the comparative analysis of human lifeways around the world), archaeology (the systematic analysis of the material remains of past cultures), and physical anthropology (the study of humans as a biological species). The program prepares students both for graduate work in anthropology and for many careers in which anthropological perspectives and training are useful.

### Requirements for a Bachelor of Arts Degree in Anthropology

#### UNIVERSITY CORE REQUIREMENTS (P. 47)

#### College of Liberal Arts Requirements

8 hours in the same modern or classical language (first-year college-level: 1441, 1442)

#### Anthropology Program Requirements

- BIOLOGICAL ANTHROPOLOGY (ANTH 2307)
- GLOBAL CULTURES (ANTH 2322)
- INTRODUCTION TO ARCHAEOLOGY (ANTH 2339)

One approved ANTH method course

One approved ANTH theory course

One advanced (3000/4000 level) elective in Sociology (SOCI)

6 hours of modern or classical languages

24 additional hours of approved ANTH electives

Summary: 40 hours, including ANTH 2307, 2322, and 2339; one approved ANTH course in Methods; one approved ANTH course in Theory; one advanced (3000/4000 level) SOCI elective; 6 hours of modern or classical languages, and 24 additional hours of approved ANTH electives. Contact the department advisor for the list of approved courses for method, theory, and electives.

#### Additional University Requirements

UNIV 1131 STUDENT SUCCESS or UNIV 1101 STUDENT SUCCESS (for transfer students) which may also be met by completing ANTH 1200 PERSONAL AND PROFESSIONAL SUCCESS IN THE SOCIAL SCIENCES.

Additional elective hours sufficient to reach 120 total credit hours, with 36 advanced (3000/4000) hours; may include an optional minor.
Requirement for a Minor in Anthropology

The Anthropology minor (6 courses/18 hours total) can be fulfilled by successfully completing:

Select two of the following:

ANTH 2307 BIOLOGICAL ANTHROPOLOGY
ANTH 2322 GLOBAL CULTURES
ANTH 2339 INTRODUCTION TO ARCHAEOLOGY

Any other four ANTH courses, at least two of which must be at the advanced level (3000 or above)

Questions about the Anthropology minor may be directed to the department advisor.
Theatre Arts and Dance

Undergraduate Degrees

Bachelor of Arts in Theatre Arts (p. 1021)
Bachelor of Fine Arts in Theatre Arts (p. 1021)
• DESIGN AND TECHNOLOGY CONCENTRATION
• MUSICAL THEATRE CONCENTRATION
• ACTING CONCENTRATION

Minors

Minor in Theatre Arts (p. 1031)
Minor in Dance (p. 1031)

COURSES

THEA 0181. THEATRE PRACTICUM. 1 Hour. (TCCN = DRAM 1120)
Open to all students interested in participating in dramatic productions on-stage, backstage, or front of house. Considers aspects of play production which may include scenery construction, publicity, costumes, and lighting. Practicum students participate in auditions and are assigned to production crews. May be repeated for credit. All Theatre Arts majors register for THEA 0181 each semester. Prerequisite: Permission of advisor.

THEA 0182. THEATRE ARTS TEACHING LAB. 1 Hour.
The Theatre Arts Teaching Lab (TATL) is open to students interested in participating in theatre education and educational theatrical production. TATL is an experiential laboratory and training ground for future theatre teachers. Through immersion and training in creative and collaborative educational theatre-making processes, TATL students will be encouraged to experiment, collaborate, and adventure as they lead the production of several laboratory performances each semester; all the while honing skills that will foster their ability to become successful theatre teachers, directors, administrators, and leaders, as well as UIL directors, managers, and adjudicators in the classroom.

THEA 1101. THEATRE ARTS SYMPOSIUM. 1 Hour.
An orientation to academic and professional theatre skills and resources. Prerequisite: Permission of advisor.

THEA 1140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 1140 and THEA 1140; credit will be granted only in one department. Prerequisite: Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 1141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 1141 and THEA 1141; credit will be granted only in one department. Prerequisite: C or better in MUSI 1140 or THEA 1140. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 1303. FUNDAMENTALS OF PRESENTATION. 3 Hours.
The fundamentals of vocal performance as it relates to effective oral communication. Students develop ideas for the purpose of communication and learn effective techniques for clarity of expression, ideas, and message while considering the effect on an audience. Theatrical communication techniques are one of several skill sets taught. Oral, aural, written, and visual literacy are all explored, with intense focus on oral presentation. This course satisfies the University of Texas at Arlington core curriculum requirement in Communication.

THEA 1304. STAGECRAFT I. 3 Hours. (TCCN = DRAM 1330)
An introduction to all areas of theatre craft, technology, and production. The development and application of technical skills, production organization, and an orientation to production facilities, equipment, and materials. Prerequisite: Permission of Advisor.

THEA 1305. INTRODUCTION TO THEATRICAL DESIGN. 3 Hours.
Fundamentals of design elements, theory and practice as applied to costume, scenic, properties, lighting, and sound design. Prerequisite: Permission of advisor.

THEA 1307. ACTING: FUNDAMENTALS. 3 Hours. (TCCN = DRAM 1351)
Study and exercise in fundamentals of the actor's craft utilizing the Stanislavsky Method. Emphasis on the development of basic acting techniques including characterization, objectives, beats, action, and script analysis. Performance requirements include improvisation and monologues. Attendance at productions outside of the classroom may be required. Prerequisite: Permission of advisor.

THEA 1310. MUSICAL THEATRE MUSICIANSHIP I. 3 Hours.
An introduction to music theory, sight-singing, and keyboard skills. This course is tailored to the BFA in Musical Theatre concentration and uses material from the American musical theater canon. Prerequisite: Only Musical Theatre majors may enroll, and permission of advisor.
THEA 1315. THEATRICAL MAKEUP. 3 Hours.
Types, styles, and techniques of make-up application for the stage. Prerequisite: Permission of advisor.

THEA 1342. THEATRE AND FILM APPRECIATION. 3 Hours.
Develops awareness of and appreciation for dramatic art as reflected in theatre and film. Designed to increase the student's enjoyment and knowledge of drama and its historical, social and cultural contexts. Students may be required to attend plays. Theatre Arts BFA and BA majors and minors may not use this course in place of THEA 1343. This course satisfies the University of Texas at Arlington core curriculum requirement in Creative Arts.

THEA 1343. INTRODUCTION TO THEATRE. 3 Hours. (TCCN = DRAM 1310)
Acquaints the student with major phases of theatrical activity and production research. Considers the duties and contributions of director, actor, scene designer, costumer, and others involved in play production. Students may be required to attend and review productions. This course satisfies the University of Texas at Arlington core curriculum requirement in Creative Arts.

THEA 2140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 2140 and THEA 2140; credit will be granted only in one department.
Prerequisite: C or better in MUSI 1141 or THEA 1141. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 2141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 2141 and THEA 2141; credit will be granted only in one department.
Prerequisite: C or better in MUSI 2140 or THEA 2140. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 2302. VOCAL PRODUCTION. 3 Hours.
Intermediate exploration of vocal production for the stage, including interaction in the studio setting to meet the needs of performance. Emphasis on relaxation, breathing techniques, the creation of vocal sound, and the interconnection of voice and body in performance. Prerequisite: THEA 1303 and permission of advisor.

THEA 2306. COSTUME TECHNOLOGY. 3 Hours. (TCCN = DRAM 1342)
Introduction to the process and application of the fundamental skills of costuming and costume design preparation methods. Prerequisite: Permission of advisor.

THEA 2309. SCRIPT ANALYSIS. 3 Hours.
An investigation of dramatic structure from the points of view of the director, actor, and designer. Elements of dramatic theory are included. Prerequisite: Permission of advisor.

THEA 2310. DRAWING AND RENDERING FOR THE THEATRE. 3 Hours.
The practical application of conventional and digital drawing and rendering principles, techniques, and materials as applied to theatrical design. Students will study and practice drawing techniques, including highlight and shadow, proportion, and perspective. Additionally, the course will explore the use of common rendering media used in theatre, such as watercolor, markers, and digital technology.

THEA 2311. MUSICAL THEATRE MUSICIANSHIP II. 3 Hours.
A continuation of music theory, sight-singing, and keyboard skills that builds on THEA 1310 Musical Theatre Musicianship I. This course is tailored to the BFA in Musical Theatre concentration and uses material from the American musical theater canon. Prerequisite: THEA 1310, and Permission of Advisor.

THEA 2337. IMPROVISATION: SHORT FORM. 3 Hours.
The study of modern improvisational skills and techniques for the performer, director, playwright, and instructor. This course focuses on short form improv, defined as unrelated games, scenes, and exercises that encourage spontaneity and group cohesion.

THEA 2340. MOVEMENT PERFORMANCE: FUNDAMENTALS. 3 Hours.
Development of movement techniques and movement performances. Freeing the body through exercises and experiences in relaxation, physical awareness, and movement through space. Focus on body awareness and the release of habitual patterns that restrict the body. Prerequisite: permission of advisor.

THEA 2352. SCENE STUDY. 3 Hours. (TCCN = DRAM 1352)
Acting technique exercise to enhance and develop acting skills through scene study. Methods of characterization, research, and role preparation. Prerequisite: THEA 1307 and permission of advisor.

THEA 3140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 3140 and THEA 3140; credit will be granted only in one department.
Prerequisite: C or better in MUSI 2141 or THEA 2141. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 3141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 3141 and THEA 3141; credit will be granted only in one department.
Prerequisite: C or better in MUSI 3140 or THEA 3140. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 3300. DIRECTING I. 3 Hours.
The techniques of staging plays. Play interpretation, casting, rehearsal procedure, staging, and the role of the director in character analysis and creation. Prerequisite: THEA 1305, THEA 1307, THEA 1343, and THEA 2309 or permission of advisor.
THEA 3301. SCENE DESIGN I. 3 Hours.
History, theory, and basic concepts of design methods with application for stage, television, and film. Aesthetic skills of color, line, texture, and form, and the interactions of these elements. Mechanics and techniques of illustration and rendering of design ideas. Prerequisites: THEA 1304, THEA 1305, THEA 1343, THEA 3309, THEA 3318, and permission of advisor.

THEA 3302. FILM STUDIES. 3 Hours.
Principles of film study, including history, genre, aesthetics, theory, and criticism of U.S. and international films. Lecture and discussion, including the viewing of selected films.

THEA 3303. SOUND DESIGN. 3 Hours.
The study of the fundamentals of sound design as related to the theatrical production environment. The study of basic sound design tools and the practical application of these tools through project work. Prerequisites: THEA 1305, THEA 3316, or permission of advisor.

THEA 3304. SCENIC TECHNOLOGY. 3 Hours.
An overview of and hands-on training in advanced production techniques, including metalworking and welding, theatrical rigging, automation principles, advanced wood joinery, and fabrication utilizing new materials, as well as an in-depth study of theatrical safety practices. Prerequisites: THEA 1304 or permission of advisor.

THEA 3305. LIGHTING DESIGN I. 3 Hours.
The study of basic design principles and techniques and their application in theatrical lighting design. The practical application of computer-aided design tools and the use of theatrical lighting equipment in realized design projects. Prerequisites: THEA 1305, THEA 3316, and THEA 3318 or permission of advisor.

THEA 3306. SCENE PAINTING FOR THE STAGE. 3 Hours.
Instructional and demonstrative approaches to scenic painting for the stage. Prerequisite: THEA 1304 or permission of advisor.

THEA 3307. COSTUME HISTORY. 3 Hours.
Historical styles and trends of fashion to the present as applied to stage, television, and film. Prerequisite: Permission of advisor.

THEA 3308. ACTING FOR THE CAMERA AND DIGITAL MEDIA. 3 Hours.
An intermediate acting course for the camera covering basic technique, terminology, and industry standards, as well as other digital media. Prerequisite: THEA 2352, and permission of advisor.

THEA 3310. CREATIVE DRAMA. 3 Hours.
The theory and practice of creative dramatics exercises and activities. The application of the artistic elements in creative drama and interdisciplinary applications of creative drama activities.

THEA 3311. DIALECTS IN PERFORMANCE. 3 Hours.
The study and application of selected dialects for performance. Prerequisite: THEA 1303 and Permission of advisor.

THEA 3312. THEATRE FOR YOUNG AUDIENCES. 3 Hours.
The theory and practice of creating and producing plays for young audiences. Students shall be required to act in selected works. Prerequisite: Permission of advisor.

THEA 3313. PERIOD STYLES. 3 Hours.
Survey of architectural elements, fashion, and decorations throughout history and their relationship to theatrical design. Provides a foundation in visual history and an historical framework in which to develop inspiration for visual ideas and needs for stage design.

THEA 3314. VOICE AND MOVEMENT. 3 Hours.
An intermediate course in vocal production and its integration with movement. Primarily focuses on articulation, breath support, and voice/movement interaction. Only Theatre Arts majors or minors may enroll. Prerequisite: Must be a Theatre Arts major or minor; THEA 1303, THEA 2340, and permission of advisor.

THEA 3316. LIGHTING AND SOUND TECHNOLOGY. 3 Hours.
An introduction to the equipment, technologies, terminology, and careers in the theatrical areas of lighting and sound. Examines the theories and application of optical control and distribution, the physics of audio, distribution of acoustical energy, and lighting color theory. Prerequisite: Permission of advisor.

THEA 3317. SINGING FOR THE ACTOR I. 3 Hours.
An applied study of the vocal apparatus, vocal placement, the voice/body relationship, character, working with text, phrasing, and auditioning as they relate to singing in musical theatre for the Broadway or West End theatre. Emphasis is placed on integrating singing and acting skills. Same as offering MUSI 3317; may not be repeated and credit will only be granted in one department. Prerequisites: THEA 1307 or permission of advisor.

THEA 3318. DRAFTING FOR THE ARTS. 3 Hours.
The principles and application of computer-aided drafting techniques for the entertainment industry. Prerequisite: Permission of advisor.

THEA 3320. PLAYWRITING I. 3 Hours.
The art and craft of constructing a play. Students write playlets, scenes, and one-act plays for in-house performance and/or instructor evaluation.

THEA 3337. IMPROVISATION: LONG FORM. 3 Hours.
Revisits concepts learned from Improvisation: Short Form and applies them to an advanced structure of interrelated scenes, monologues, and stories based on a theme or idea. The students will explore this long-form structure as it applies to playwriting, acting, and directing.
THEA 3342. COSPLAY COSTUME FABRICATION. 3 Hours.
Exploration and practice of theatrical construction and fabrication techniques used in the cosplay industry.

THEA 3343. MAKEUP FOR THE CAMERA. 3 Hours.
Exploration and practice of styles, techniques, and types of make-up and make-up application for film, photography and fashion.

THEA 3346. STAGE COMBAT. 3 Hours.
An introduction to stage combat. Students will safely explore the choreographed illusion of stage violence through the skills of unarmed and armed combat. Prerequisite: Permission of advisor.

THEA 3350. FABRIC MODIFICATION AND COSTUME CRAFTS. 3 Hours.
Exploration and practice of the process and application of techniques in fabric modification and costume crafts. Prerequisite: Permission of advisor.

THEA 3351. ROBOTS, DIGITAL HUMANITIES, AND THEATRE. 3 Hours.
Lecture and applied practices of the emerging emotional interaction between robots and humans utilizing theatrical methodologies. Course will emphasize human and robot interactions from interdisciplinary approaches including cultural, historical, sociological, health-care, disability studies, and performing arts frameworks.

THEA 3352. STAGE MANAGEMENT & THEATRE ADMINISTRATION. 3 Hours.
Managerial activities and responsibilities as applicable to community or professional theatre. Prerequisite: THEA 1343 or permission of advisor.

THEA 3355. UNIVERSAL DESIGN & ACCESSIBILITY IN THE PERFORMING ARTS. 3 Hours.
Explores the principles of Universal Design using the performing arts as a case study; creating environments, events, buildings, and products to accommodate the broadest spectrum of human ability, size, age, and other characteristics. Investigates how to put into practice the accessibility guidelines of the Americans with Disabilities Act of 1990. Performing is not required. Offered as THEA 3355 and DS 3355; credit will only be granted in one department.

THEA 3360. GENDER AND THE PERFORMING ARTS. 3 Hours.
Examines the role of gender in the performing arts, including theory and practice focused on gender. Additional topics may include female pioneers in the performing arts, the image of gender in different media, the way gender affects actors and artists, and the effect of cultural definitions of gender on audience reception. Offered as THEA 3360 and GWSS 3360. Credit will be granted only once.

THEA 3361. WOMEN IN THEATRE. 3 Hours.
Examines the history, theory, and practice of women in theatre. Pioneering female writers, directors, producers, actors, designers, and activists will be explored as will their influence upon drama in its historical, social, and cultural contexts. Students will also be introduced to theory that examines female characters in plays and their impact on the artist and audience. Offered as THEA 3361 and GWSS 3361. Credit will be granted only once.

THEA 3387. ART DIRECTION I. 3 Hours.
The history, theory, and basic concepts of art direction methods and basic construction techniques for television and film. Prerequisite: Permission of advisor.

THEA 4110. THEATRE PEDAGOGY FIELD-BASED EXPERIENCE. 1 Hour.
Supervised and directed professional practice in local schools. The student will be assigned to a public-school site for five hours per week. Weekly seminars are required. Field-based experience must be taken the semester immediately preceding student teaching residency. Prerequisite: Permission of advisor.

THEA 4140. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 4140 and THEA 4140; credit will be granted only in one department. Prerequisite: C or better in MUSI 3141 or THEA 3141. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 4141. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 1 Hour.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music degree. Offered as MUSI 4141 and THEA 4141; credit will be granted only in one department. Prerequisite: C or better in MUSI 4140 or THEA 4140. Open to Musical Theatre majors only or by permission of the Department Chair.

THEA 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering individual research or study in a designated area. May be repeated as the topic changes. Prerequisite: Permission of advisor.

THEA 4201. BUSINESS OF ACTING. 2 Hours.
An examination of the business of acting for the purpose of becoming a working professional in the entertainment industry. This course will cover headshots, resumes, networking, agents, unions, auditions and interviews, budgeting, marketing, and other aspects in preparing the student for work-readiness as they move into the profession. Prerequisite: permission of advisor.

THEA 4270. PRIVATE LESSONS IN VOICE-MUSICAL THEATRE. 2 Hours.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music Degree. Prerequisite: THEA 3141 and permission of Advisor.

THEA 4271. PRIVATE LESSONS IN VOICE - MUSICAL THEATRE. 2 Hours.
This sequence of courses is required of students who are pursuing the BFA in Musical Theatre. These courses may not be used as substitute voice lessons for those students pursuing a Bachelor of Music Degree. Prerequisite: C or better in THEA 4270 and permission of advisor.
THEA 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering individual research or study in a designated area. May be repeated as the topic changes. Prerequisite: Permission of advisor.

THEA 4300. DIRECTING II. 3 Hours.
Continuation of THEA 3300. Students will direct scenes and/or one-act plays. Prerequisite: THEA 3300 and permission of advisor.

THEA 4301. ADVANCED ACTING: ENSEMBLE. 3 Hours.
Students will perform solo and/or group performances devised from their own and/or other artists' research and development in a collaborative, ensemble environment. May not be repeated for credit. Prerequisite: THEA 2352, THEA 2340, and permission of advisor.

THEA 4303. CLASSICAL THEATRE HISTORY. 3 Hours.
The development of world theatre from its beginnings through the Renaissance. Analysis of representative plays of each period with particular emphasis on drama in its historical context. History of acting, costuming, and directing. Prerequisite: THEA 1343 and permission of advisor.

THEA 4304. MODERN THEATRE HISTORY. 3 Hours.
The development of Western theatre from the Renaissance to the present. Analysis of representative plays from Europe, England, and America. Development of the modern stage, acting methods, and production techniques. Prerequisite: THEA 1343 and permission of advisor.

THEA 4305. SCENE DESIGN II. 3 Hours.
Continuation of THEA 3301. Distinctions among stage, television, and film design, interaction of one with another, advanced methods, and application of scene design concepts. Prerequisite: THEA 3301 and permission of advisor.

THEA 4306. LIGHTING DESIGN II. 3 Hours.
Specialized topics and advanced design technique and application principles. Participation on light crews in departmental productions required. Prerequisite: THEA 3305 and permission of advisor.

THEA 4310. MUSICAL THEATRE HISTORY. 3 Hours.
The history, development, and contemporary manifestations of the musical theatre art form in America and London's West End, and its relation to the continually changing social milieu. The course follows the development of musical theatre from its inception to the present. Prerequisite: THEA 1303, THEA 2352 and permission of advisor.

THEA 4311. SHAKESPEARE AND VERSE IN PERFORMANCE. 3 Hours.
The study and performance of iambic pentameter and verse as found in Shakespearean and verse plays. Prerequisite: THEA 1303, THEA 2352 and permission of advisor.

THEA 4314. ADVANCED PRODUCTION TECHNIQUES. 3 Hours.
An advanced examination of theatre craft, technology, and production. Prerequisite: THEA 3304.

THEA 4315. SPECIAL EFFECTS MAKEUP DESIGN. 3 Hours.
The examination of styles and techniques of specialty makeup applications for the stage and how these relate to television and film.

THEA 4317. SINGING FOR THE ACTOR II. 3 Hours.
The advanced study of musical theatre performance as it relates to the integration of acting, singing and dance skills into an effective performance. The script, score, character, vocal demands, and movement requirements of both solo and ensemble works will be studied, and the works will be performed in a culminating, musical revue-styled performance. This course may be repeated once for credit. Prerequisite: THEA 1307 and THEA 3317, or permission of instructor.

THEA 4320. STAGE WELDING, RIGGING, AND FABRICATION. 3 Hours.
Styles and techniques of welding, rigging, and specialized materials fabrication for the stage and in video and film production. Prerequisite: THEA 1304 and permission of advisor.

THEA 4322. PLAYWRITING II. 3 Hours.
The art and craft of constructing a full-length, two-act play. Course content will include references to the work of major playwrights and playwriting theory. Students will receive course content through a combination of class lectures and one-on-one writing conferences with the instructor. Prerequisites: THEA 3320 or permission of faculty.

THEA 4330. U.S. THEATRE HISTORY. 3 Hours.
The evolution of theatre in the United States from its beginning in colonial times to the present day. Representative plays from various periods are studied.

THEA 4333. MUSICAL THEATRE PORTFOLIO AND SHOWCASE. 3 Hours.
Advanced principles of character development for musical theatre are explored with emphasis on the development of a role through script, music, and character analysis. The semester is structured toward the development of an actor's final portfolio culminating in an audition context presentation or showcase. Prerequisite: THEA 2352, THEA 4317, DNCE 3335 and permission of instructor.

THEA 4334. ACTING: AUDITIONING AND SHOWCASE. 3 Hours.
Advanced principles of audition technique with an emphasis on preparing the student for a professional career in the performing arts. The development and presentation of an actor's final portfolio culminating in an audition context presentation or showcase. Prerequisite: THEA 1303, THEA 2309, THEA 2352, THEA 2340 and permission of advisor.

THEA 4340. PHYSICAL THEATRE. 3 Hours.
The study and performance of physical theatre techniques. Prerequisites: THEA 2340, THEA 2352, and permission of advisor.
THEA 4341. ADVANCED SCENE STUDY. 3 Hours.
Advanced acting technique exercises to enhance and develop acting skills through scene study in preparation for work-readiness at the professional level. This includes advanced methods of characterization, research, and role preparation. Prerequisite: THEA 1303, THEA 1343, THEA 2352, THEA 2309, and THEA 2340, and permission of advisor.

THEA 4343. COSTUME DESIGN. 3 Hours.
Theory and practice of costume design and application of those principles to theatrical production. Prerequisites: THEA 1343, THEA 1305, THEA 2309 or permission of instructor.

THEA 4344. PORTFOLIO & THE BUSINESS OF DESIGN. 3 Hours.
Exploration of the business of theatre and development of professional materials essential to theatrical design and technology. The course will include the development of websites, digital, and paper portfolios and focus on fundamentals needed to manage a career as a theatrical designer, manager, and/or technician. Prerequisite: Permission of advisor.

THEA 4345. SUMMER THEATRE ACTIVITIES. 3 Hours.
The study and application of specialized production and performance activities in a summer repertory theatre setting.

THEA 4346. THEATRICAL WEAPONRY. 3 Hours.
This course fosters a practical and theoretical understanding for the process of creating the illusion of safe and credible violence for the stage. Emphasis is placed on textual characterization and working with the weapons most frequently used in stage violence. Depending upon the semester, the student may be trained in broadsword, single rapier, rapier and dagger, small sword, or quarterstaff.

THEA 4355. STRATEGIES, ASSESSMENT, AND CHILD DEVELOPMENT IN THEATRE PEDAGOGY. 3 Hours.
Open to theatre majors only. Current trends in theatre education will be examined. Topics include effective differentiated instruction, classroom management, strategies for working with diverse learners, and examination of major learning theories and principles of cognitive, social, emotional, physical and aesthetic development. This course will also examine a variety of assessment techniques that are used in a theatre classroom. Assessment tools such as rubrics, rating scales, National Standards, TEKS, STAAR, and TExES will be examined and implemented into lesson planning. Prerequisite: For Theatre Arts majors only. Admission into the College of Education.

THEA 4387. ART DIRECTION II. 3 Hours.
An applied course in art direction methods, construction practices and techniques in video and film production. Prerequisite: Permission of faculty.

THEA 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering individual research or study in a designated area. May be repeated as the topic changes. Prerequisite: Permission of advisor.

THEA 4393. SPECIAL TOPICS. 3 Hours.
Special studies in drama and theatre. Topic varies from semester to semester. May be repeated as topic changes or until a maximum of six credit hours is attained. Prerequisite: Permission of advisor.

THEA 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or project of equivalent difficulty under the direction of a faculty member in the major department. Prerequisite: Permission of advisor.

THEA 4395. THEATRE INTERNSHIP LEVEL I. 3 Hours.
Individual research through working with a professional theatre or performing arts organization. Individual conference to be arranged. Graded on a pass/fail basis. Prerequisite: Theatre Arts major with permission of advisor and department chair.

THEA 4695. THEATRE INTERNSHIP LEVEL 2. 6 Hours.
Individual research through working with a professional theatre or performing arts organization. Individual conference between sponsor and departmental advisor required. Graded on a pass/fail basis. Prerequisite: Theatre Arts major with permission of advisor and department chair.

THEA 4995. THEATRE INTERNSHIP LEVEL 3. 9 Hours.
Individual research through working with a professional theatre or performing arts organization. Individual conference between sponsor and departmental advisor required. Graded on a pass/fail basis. Prerequisite: Theatre Arts major with permission of advisor and department chair.

THEA 5391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering individual research or study in a designated area. May be repeated as the topic changes. Prerequisite: Permission of instructor.

THEA 5393. TOPICS IN THEATRE ARTS. 3 Hours.
Special topics in theatre; offered periodically with subject matter determined by instructor and student interest. Previous topics have included: Design Portfolio Workshop; Alternative Actor Training Workshop; Playwriting; Improvisation; and Styles in Acting. Prerequisite: Permission of advisor.
Theatre Arts and Dance - Graduate Programs

Objective

A few graduate course offerings in theatre arts are provided to support other graduate degree programs and to meet the express needs of students. These 5000-level courses may be found in the undergraduate course list. No program leading to a graduate degree in theatre arts exists at this time.
Theatre Arts and Dance - Undergraduate Programs

Mission and Objective

The mission of the Department of Theatre Arts and Dance in the College of Liberal Arts at The University of Texas at Arlington is to provide a comprehensive undergraduate education through theory, research, and practice in the theatre arts and dance.

The objective of the department is to provide an extensive and wide-ranging education in the theatrical and dance professions through applied and practical experiences acquired through performance and production opportunities. Undergraduate students in the Department of Theatre Arts and Dance explore the components which comprise the performance and production event. The research of new theories and their applications to the art, craft, and management of Theatre Arts and Dance is highly encouraged through one-on-one mentoring and supervision by specialized, professional faculty. A primary aspect of the Department of Theatre Arts and Dance is to provide a challenging educational environment for each student characterized by shared values, unity of purpose, diversity of opinion, mutual respect, and a commitment to lifelong learning. The following degrees are offered:

- Bachelor of Arts (B.A.) in Theatre Arts
- Bachelor of Fine Arts (B.F.A.) in Theatre Arts with concentrations in:
  - Design and Technology
  - Musical Theatre
  - Acting

In addition, the Department offers the following minors:

- Minor in Dance
- Minor in Theatre Arts

Dance courses are listed as Dance (DNCE). Several approved university core courses are also offered by the department that satisfies core degree requirements in other disciplines.

Production and Performance

Maverick Theatre Company

The Maverick Theatre Company is the production company of the Department of Theatre Arts and Dance at the University of Texas at Arlington, providing a showcase for the creative research of the academic program. A resident company of professional artists and students present a wide variety of plays and musicals from past and current theatrical literature with a special focus on new play development. Every student, upon admission to a theatre degree program in the department, becomes a Maverick Theatre Company member. These activities directly support the academic objectives of the department.

Maverick Dance Company

The Maverick Dance Company is the resident dance company of the Department of Theatre Arts and Dance, producing performances featuring the University of Texas at Arlington dance students, faculty, and guest artists. Directors, choreographers, and performers of Maverick Dance Company emphasize creative research to develop original, progressive dance works for the concert stage. Every student enrolled in a Dance Performance course becomes a Maverick Dance Company member. Each performance activity expands upon a variety of theories and practices studied within the dance curriculum.

The Bachelor of Arts (B.A.) in Theatre Arts

Liberal Arts Requirements

The Bachelor of Arts degree provides a general background in Theatre Arts and Liberal Arts. The B.A. allows students the opportunity, through elective coursework in Theatre Arts, to tailor their degree program in areas of interest that the student may wish to explore.

Admission

In addition to the general requirements for admission to the University, the aspiring undergraduate must meet the following requirement for admission to the Bachelor of Arts degree program:

- Participation in advisement and a personal interview.
To be fully accepted in the Bachelor of Arts (B.A.) in Theatre Arts degree program, all students must complete at least one semester as a "Theatre Arts Intended" student and earn a 2.25 cumulative grade point average in all courses including theatre courses taken at UT Arlington. Once these standards are met, the student may be declared as a Bachelor of Arts in Theatre Arts major.

**B.A. in Theatre Arts - Academic Requirements**

All Theatre Arts majors shall enroll in THEA 0181 for one hour per semester in residence in order to graduate. Eight (8) hours of THEA 0181 are required. Students should see their advisor regarding practicum obligations.

All B.A. students are encouraged to audition for each major production each semester they are enrolled, though they may choose to decline being considered for a role at the time of the audition. Production activities and Theatre Arts disciplinary rules are governed by a student handbook that is available to the student through the Department of Theatre Arts and Dance.

A minimum 2.25 overall grade point average is required for all courses, including theatre courses, taken at UT Arlington in order to remain in the B.A. degree program. Students currently enrolled at UT Arlington who wish to declare Theatre Arts as a major must have a minimum grade point average of 2.25 in overall coursework taken at UT Arlington in order to be admitted.

A student will be placed on departmental academic probation in the Department of Theatre Arts and Dance if her/his grade point average drops below the minimum requirements for the degree plan in which they are enrolled. If after a regular semester the student's grade point average returns to at least the minimum required grade point average for their degree plan, then the probation is removed. However, if after a regular semester the student's grade point average does not meet the minimum required grade point average, the student may, at the discretion of the department chair, be removed from the degree program and will be advised as to other degree plan alternatives, should they exist.

**Department Scholarships**

The Department of Theatre Arts and Dance offers limited scholarships to deserving students based upon talent, academic excellence, and merit. Work-study positions may be available. Contact the Department of Theatre Arts and Dance for information.

---

**The Bachelor of Fine Arts (B.F.A.)**

**Liberal Arts Requirements**

The Bachelor of Fine Arts degree is a specialized, pre-professional degree that provides a background in the liberal arts with specialized concentrations in: Design and Technology, Musical Theatre, or Acting.

- **The Design and Technology Concentration** is for students seeking a professional career as a scenic, lighting, sound or costume designer, technical director, and/or theatre technician.
- **The Musical Theatre Concentration** is designed for students seeking a professional career in musical theatre performance.
- **The Acting Concentration** is designed for students seeking a professional career as an actor.

Students seeking the B.F.A. elect additional courses chosen from the University and Liberal Arts core curricula outside the Department of Theatre Arts and Dance.

**Admission - B.F.A.**

The aspiring undergraduate must meet the following requirements for admission to the Bachelor of Fine Arts (B.F.A.) degree program:

- Participation in advisement.
- A personal interview with a designated faculty member (all students).
- A design/technical production portfolio review for the Design and Technology B.F.A. Concentration or an audition and interview for the Musical Theatre and the Acting B.F.A. Concentrations are required for admittance into one of these three B.F.A. Concentrations.
- Upon acceptance by the University and the Department of Theatre Arts and Dance, an indication of an area of concentration (Design and Technology, Musical Theatre, or Acting) is required.

**B.F.A. - Academic Requirements**

All Theatre Arts majors shall enroll in THEA 0181 for one hour per the requirements of their B.F.A. concentration in order to graduate. Students should see their advisor regarding practicum obligations. Transfer students must discuss THEA 0181 requirements with the Theatre Arts academic advisor.

- **B.F.A. Design and Technology Concentration** students are required to present an updated portfolio and resume of production and course work at a formal portfolio review session at the end of each semester enrolled. Students are required to perform an assigned BFA assignment each semester enrolled. These assignments can be work on a departmental production or projects geared to enhancing specific skill sets and portfolio
materials. The BFA assignment is in addition to the requirements of the THEA 0181 Theatre Practicum course and any other course work. BFA assignments will be assigned by the Area Head of the Design and Technology Concentration with consultation from the design and technology faculty. Upon completion of the final semester of the B.F.A. Design and Technology Concentration, students will present their work at an exit portfolio presentation showcasing the student’s accumulated design and production work completed while enrolled in at UTA

- **B.F.A. Musical Theatre Concentration** students are required to audition for each major production each semester they are enrolled, unless special permission has been obtained in advance of the audition from the Musical Theatre Concentration Chair or the Chair of the Department.

- **B.F.A. Acting Concentration** students are required to audition for each major production each semester they are enrolled, unless special permission has been obtained in advance of the audition from the Acting Concentration Chair or the Chair of the Department.

A minimum grade point average of 2.25 is required in overall coursework taken at UT Arlington in order to remain in the B.F.A. degree program. A minimum grade point average of 2.50 is required for all Theatre courses taken at UT Arlington in order to remain in the B.F.A. degree program. Students currently enrolled at UT Arlington who wish to declare Theatre Arts as an intended B.F.A. major must have a minimum grade point average of 2.25 in overall coursework taken at UT Arlington, in addition to the admission requirements stated above, in order to be admitted.

Concurrent enrollment in more than one B.F.A. concentration is not allowed. A student must complete a B.F.A. concentration and graduate with that concentration before being allowed to enroll in a second B.F.A. concentration.

Students wishing to change their B.F.A. concentration from one plan to another must reapply for and be accepted by the faculty to the new concentration according to the application procedures applicable for that concentration. Students should be aware that changing B.F.A. concentrations may result in additional semesters of study. Students should contact their academic advisor to obtain a new graduation date when changing concentrations.

A student will be placed on *departmental academic probation* in the Department of Theatre Arts and Dance if their grade point average drops below the minimum requirements for the degree plan in which they are enrolled. A theatre arts student who is on academic probation must continue to audition for each major production but will not be allowed to accept a role or serve as a designer, stage manager or other significant production position for any of the productions during the next regular semester they are enrolled. If after a regular semester the student's grade point average returns to at least the minimum required grade point average for their degree plan, then the probation is removed. However, if after a regular semester the student's grade point average does not meet the minimum required grade point average, the student may be removed from the degree program as determined by the Department Chair and will be advised as to other degree plan alternatives, should they exist.

Production activities and Theatre Arts disciplinary rules shall be governed by a student handbook that is available to the student upon request through the Department of Theatre Arts and Dance or at <https://www.uta.edu/theatre>.

**Department Scholarships**

The Department of Theatre Arts and Dance offers limited scholarships to deserving students based upon talent, academic excellence, and merit. Work-study positions may be available. Contact the Department of Theatre Arts and Dance for information.

**Requirements for a Bachelor of Arts (B.A.) in Theatre Arts**

**Pre-Professional Courses**

- General Core Requirements (p. 47) 42

- See UT Arlington approved Core Curriculum for Core requirements.

- Core courses also in the THEA B.A. degree plan:

  - ENGL 1301, ENGL 1302, THEA 1303, THEA 1343

**Program Requirements:**

- Modern and Classical Languages: 1441, 1442. 8

- Electives:

  - Sufficient to give the total number of hours required for degree, six hours of which must be at the 3000/4000 level

**Professional Courses**

COMPUTER USE COMPETENCY

Students majoring in Theatre Arts may demonstrate competency in computer use by taking any course approved by the Undergraduate Assembly for this purpose. Alternatively, they may demonstrate this competency by passing the University proficiency examination in computer use.

Requirements for a Minor in Theatre Arts

Students who are not majoring in Theatre Arts may elect to minor in it.

REQUIREMENTS

Eighteen (18) hours of Theatre Arts courses are required. This includes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>THEA 1304</td>
<td>STAGECRAFT I</td>

<td>SCRIPT ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>Electives:</td>
<td>3 hr any level, 3 hr advanced level.</td>
<td>6</td>
</tr>
</tbody>
</table>

Total Hours 18

Students interested in theatre arts as a minor should consult a Theatre Arts Department advisor to determine the most advantageous selection of courses in light of their interests and experience. With such consultation, departmental prerequisites may be waived for the purposes of a Theatre Arts minor.

Requirements for a Minor in Dance (DNCE)

Any undergraduate student may elect to minor in Dance (DNCE). The Dance Minor offers a variety of dance technique and theory courses to develop a well-rounded artist/scholar. Students have some flexibility in designing their coursework with the ability to choose from a variety of DNCE elective courses towards the Dance Minor.

REQUIREMENTS

- At least four (4) credit hours in level 2 dance technique courses DNCE 3232, DNCE 3235, or DNCE 3236 must be completed at UT Arlington.
- A placement exam may be required prior to enrolling in level 2 technique courses.
- A maximum of two (2) credits of DNCE 1139 Dance Performance may be applied towards the Dance Minor.
- Eighteen (18) hours of specified Dance courses are required:

<table>

<tr>
<td>Electives:</td>
<td>A minimum of six (6) DNCE elective hours must be at the 3000 or 4000 level.</td>
<td>9</td>
</tr>
</tbody>
</table>

Total Hours 18

Students interested in a minor in Dance should consult with a Theatre Arts Department academic advisor to enroll in the appropriate courses.
Gender, Women & Sexuality Studies - Undergraduate Program

Overview

The Gender, Women & Sexuality Studies Program provides students with the opportunity to engage in critical analysis of issues related to women, gender, and sexuality. Courses typically emphasize how women, gender, and sexuality have shaped and been shaped by history, culture, and society, with particular attention to the role of race, ethnicity, class, nation, age, and religion in forming gender and sexual identities. This interdisciplinary program is taught by faculty from diverse fields and offers a unique opportunity for students to complement their work in traditional disciplines with courses that can be tailored to meet specific interests and needs.

Students may receive a minor in Gender, Women & Sexuality Studies by taking 18 credit hours from a selection of courses offered across several disciplines. Many of our courses are cross-listed with courses offered in other departments. Students should consult the Gender, Women & Sexuality Studies website for a list of the courses being offered in any specific semester.

Gender, Women & Sexuality Studies minors are encouraged to take two foundation courses: GWSS 2310: Introduction to Women’s & Gender Studies and GWSS 2315: Introduction to LGBTQ+ Studies. Both of these courses satisfy the general core requirements in Language, Philosophy, and Culture.

Gender, Women & Sexuality Studies Minors may also consider taking the Internship course, which involves working off campus at a local organization that addresses women’s or gender issues.

Students seeking the Gender, Women & Sexuality Studies minor should first consult with the advisors in their major departments or programs for approval, then with the Gender, Women & Sexuality Studies Program advisor.

A Graduate Certificate in Gender, Women & Sexuality Studies is an interdisciplinary program that advances knowledge and research in the fields of gender, women, and sexuality studies. A Graduate Certificate demonstrates a student’s understanding of the issues related to women, gender, and sexuality that have shaped social structures, institutions, and identities across human history and continue to impact our cultural, political, and social world. Students gain a specialization within the fields of gender, women, and sexuality studies that enhances their graduate education and equips them with skills to succeed in their chosen careers.

Applicants seeking the Gender, Women & Sexuality Studies Graduate Certificate will be restricted to students currently enrolled in a Master's or Ph.D. program at UT Arlington, having met those admission standards. In these cases, the Gender, Women & Sexuality Studies Program will defer to the admissions standards of each individual graduate program. As long as the student remains in good standing within their primary degree-granting department, they may be admitted to the Gender, Women & Sexuality Studies Graduate Certificate Program. Students should consult with the Graduate Studies Advisor of their Master's or Ph.D. program before applying to the Graduate Certificate in Gender, Women & Sexuality Studies.

Students may receive a Graduate Certificate in Gender, Women & Sexuality Studies by taking 12 hours of graduate-level GWSS courses or graduate-level courses designated by the Gender, Women & Sexuality Studies Program as having a central focus on gender, women, sexuality, or related topics. These courses may be taken within the graduate student’s primary degree-granting department, or within other participating graduate programs. Courses may be counted twice, for both the student’s primary graduate degree and their Graduate Certificate in Gender, Women & Sexuality Studies. A list of approved classes will be posted on the Gender, Women & Sexuality Studies website.
College of Nursing and Health Innovation

CONHI Website

Mission and Vision

The College of Nursing and Health Innovation is an integral component of The University of Texas at Arlington and subscribes to the mission of the University.

The mission of the College of Nursing and Health Innovation is to advance global health and the human condition through transdisciplinary collaboration by engaging in high quality teaching, research, scholarship, practice and service to prepare a diverse population of health professionals and to reduce health disparities. The vision of the College of Nursing and Health Innovation is to provide innovative, exceptional education through research and practice to advance health and the human condition globally.

The academic programs in Undergraduate Nursing, Graduate Nursing, and Kinesiology prepare individuals for professional roles in health care, health sciences, and health-related professions. In addition, these programs prepare individuals for collaboration with other professionals and consumers in the delivery of holistic health care, health-related research, exercise science and advocacy for the improvement of health outcomes.

History and Overview

The UT Arlington College of Nursing was established in 1971 as the U.T. System College of Nursing in Fort Worth and was housed in John Peter Smith Hospital. The first baccalaureate class enrolled in fall of 1972; the graduate program (MSN) began in 1975. In 1976, the school became an academic unit of UT Arlington, moving to the campus in 1977. Degree program offerings continued to expand to include a PhD in Nursing in fall 2003. In fall of 2014, the Department of Kinesiology was combined with the College of Nursing to create the College of Nursing and Health Innovation. Before joining with the College of Nursing, the department of Kinesiology was a department in the College of Education and Health Sciences at UTA.

The Undergraduate Nursing Department consists of the BSN and the RN to BSN programs. In addition to the Arlington campus, these programs are offered online through the UT Arlington Academic Partnership program.

The Graduate Nursing Department offers a Master of Science in Nursing (MSN) with preparation as a nurse practitioner in the population areas of Adult-Gerontology Acute Care, Adult Gerontology Primary Care (previously Adult and Gerontology), Family, Neonatal, Acute Care Pediatric, Primary Care Pediatric and Psychiatric-Mental Health. Post-master’s certificates are available in all the above nurse practitioner specialties. In addition, the UT Arlington MSN Program offers preparation in Nursing Administration, Nursing Education, Family Nurse Practitioner, Adult Gerontology Primary and Acute Care Nurse Practitioner, and Pediatric Primary and Acute Care Nurse Practitioner options in an online accelerated format. An RN to MSN option is also available in an accelerated online format in Nursing Education, Nursing Administration and Family Nurse Practitioner. Post baccalaureate certificates are offered in Nursing Administration, Nursing Education, and Health Informatics. Post Master's Certificates options are available in all Nurse Practitioner tracks and in Nursing Administration. Many of the Post Master's Certificates are also available in the accelerated online format. The PhD in Nursing was approved in April 2003 with classes beginning in Fall 2003. A BSN-to-PhD entry option was approved in 2005, with classes beginning in Fall 2006. The Doctor of Nursing Practice (DNP) began in Fall 2009.

The undergraduate programs within the Department of Kinesiology are organized into four areas: exercise science, physical education teacher education, sports leadership & management and public health. The graduate programs include a Graduate Certificate in Public Health, a Master of Science in Exercise Science, a Master of Science in Athletic Training and a PhD in Kinesiology. Each of these academic programs provide students with a strong foundation in the sciences of their respective fields and provides a comprehensive discipline-specific program of study designed to prepare students for a specific career path. Some of the degree options work towards meeting the prerequisite requirements for admission to physical therapy, occupational therapy and physician's assistant graduate programs, as well as medical and dental schools (e.g., BS in Exercise Science - Clinical Health Professions). Other degree plans prepare students for state and national certification/licensure (e.g., Physical Education Teacher Education and Athletic Training) programs. The Public Health programs prepare students for careers in public health, as well as preparation for advanced degrees in public health. The PhD in Kinesiology prepares students for careers in research, academic and related industry settings.

Accreditation

The baccalaureate degree program in nursing, master's degree program in nursing, Doctor of Nursing Practice program, and post-graduate APRN certificate program at The University of Texas at Arlington is accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791.

The Kinesiology Athletic Training Program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). CAATE ensures that accredited institutions and education programs that offer athletic training meet the rigorous standards for professional athletic training education and encourages continuous enhancement in the quality of preparing athletic trainers.
Research Interests of Faculty

The research programs of the College of Nursing and Health Innovation faculty are diverse. A sampling of their areas of study includes oncology, health disparities, leadership in nursing education, technology in the care of older adults, simulation and technology in health professional education, exercise interventions to mitigate heart disease, inter-professional collaborations education, statistical models, gerontology, bone and muscle disease and heart disease. Other faculty research interests include adapted sports, sports pedagogy, applied biomechanics, motor development, cardiovascular physiology, autonomic function, environmental physiology, cardiac function, pulmonary responses to exercise, postural control in the elderly, dynamic regulation of blood pressure, assessment and management of sports-related concussions, the effects of therapeutic modalities on the treatment of athletic injuries, and the effects of hyperbaric oxygen on the treatment of diseases.

Special

Smart Hospital™
Assistant Dean: Jennifer Roye

The Smart Hospital™ is a simulated hospital environment complete with state-of-the-science equipment and furnishings. In this facility, students interact with and provide care to a full array of simulated patients who occupy the Emergency Department, ICU, Labor and Delivery suite, pediatric unit, Neonatal ICU, adult medical/surgical beds and the resuscitation room for large team training. Students learn utilizing simulation technology including full body interactive patient simulators, computerized scenario-based programs and individual trainers for specific skills.

The "patients" who populate our Smart Hospital are life-sized computerized manikins that actually interact with the learners. Patients include infants, children, adults, and even a mother in labor who goes through the labor process and delivers a newborn. Some manikins are static but others are interactive and responsive—they can speak and breathe, have heart sounds and lung sounds, and can progress through the various stages of numerous clinical states from birth through death. In addition, we have specially trained actors who can serve as patients or family members in clinical teaching scenes. In each clinical scenario, the students are exposed to situations and changes in patient conditions, both subtle and obvious, that they will experience in actual practice. With repeated exposure to these situations, students develop a deeper understanding of clinical conditions and become more adept at critical and clinical thinking. With this foundation, our students move more quickly from novice to expert and in so doing enhance the quality of patient care they provide.

Center for Research and Scholarship
Associate Dean: Dr. Paul J. Fadel

Scholarship is an essential component of the professional role in the College of Nursing. The Center provides support services to faculty and students: identifying funding sources; developing competitive proposals; writing grant applications; retrieving literature; collecting, entering and analyzing data; and disseminating research results and other scholarly products. Collaborative relationships for research with Metroplex health care agencies are in place.

Center for Hispanic Studies in Nursing and Health
The Center is dedicated to fostering an understanding between health care professionals and people of Hispanic origin for the purpose of increasing understanding of health and healing through research of individual experience, cultural meanings, and the structure of institutions as important variables influencing health outcomes. The Center is also committed to the provision of educational programs and services which will assist health care providers to gain the necessary knowledge and skills to deliver increasingly culturally sensitive and competent care. The Center promotes interdisciplinary and interuniversity collaboration as a strategy for development of resources to solve or deal with bi-cultural issues facing health care professionals.

Rural Health Outreach Program
The purpose of the Center is to provide appropriate, affordable, accessible continuing education to the nursing staffs of acute care and psychiatric hospitals, long term care facilities, home health agencies, and other health care facilities in the rural communities of North Central Texas.

Center for Healthy Living and Longevity
Associate Dean: Dr. David Keller

The Department of Kinesiology's Center for Healthy Living and Longevity provides a multidisciplinary approach to improving health throughout the lifespan. Research and education initiatives focus on keeping older adults active, decreasing the incidence of sedentary-related diseases (diabetes, cardiovascular disease, osteoporosis, obesity, etc.), and the assessment and management of concussions. Contact: Dr. David Keller, kellerd@uta.edu.

Jeanean Boyd, DNP, RN
Chair, Undergraduate Nursing & Assistant Clinical Professor
For a comprehensive list of faculty and staff in the College of Nursing in Health Innovation, visit the College of Nursing and Health Innovation Directory (https://www.uta.edu/conhi/people/).

**COURSES**

**NURS-EL 3300. COOPERATIVE NURSING WORK EXPERIENCE. 3 Hours.**
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. Must earn a C or better to earn credit. Prerequisite: Admission into nursing degree program.

**NURS-EL 3347. SPECIALIZED TOPICS IN NURSING. 3 Hours.**
Areas of special interest. May be repeated with varied topics. Must earn a C or better to earn credit.

**NURS-EL 3352. THE LEGACY OF THE FAMILY. 3 Hours.**
Explore and enhance understanding and application of the principles of family science knowledge in therapeutic relationships with families across the lifespan.

**COURSES**

**NURS-HI 3358. FUNDAMENTAL TELEHEALTH SKILLS. 3 Hours.**
This course is designed to provide students with foundational knowledge of skills required for effective telehealth application and delivery. Prerequisite: undergraduate status or special student status.

**NURS-HI 3359. INTRODUCTION TO HEALTH INFORMATICS. 3 Hours.**
This course provides the foundation for the study of health informatics and covers topics such as health information management, clinical information systems (inpatient, outpatient, nursing, laboratory, pharmacy, radiology, etc.), decision support systems, clinical research and health-assessment systems, technology assessment, population health, ethics, security and confidentiality, social determinants of health and emerging trends. Prerequisite: undergraduate status or special student status.

**NURS-HI 3360. INTERPROFESSIONAL COLLABORATIVE PRACTICE. 3 Hours.**
This course is designed to provide students with foundational knowledge of interprofessional collaborative practice. Students will explore values and ethics for interprofessional practice, roles and responsibilities for collaborative practice, interprofessional communication strategies, and the interprofessional teamwork and team-based practice. This course will provide a framework for deliberate interprofessional collaborative practice with other health professionals to maintain a climate of mutual respect and shared values in today's complex health care environment, with the common goal of improving patient outcomes. Prerequisite: undergraduate status or special student status.

**NURS-HI 5383. PRINCIPLES OF HEALTHCARE INFORMATICS. 3 Hours.**
Health information management, clinical information systems, decision support systems, clinical research and health assessment systems, technology assessment, and healthcare accounting. Focus is on US healthcare and the role of informatics within the U.S. healthcare system. Prerequisite: Graduate standing.

**NURS-HI 5384. HEALTHCARE DATA MANAGEMENT AND ANALYTICS. 3 Hours.**
Development, integration, and management of healthcare information systems, patient care systems, and healthcare delivery applications. Utilizes case studies and real-life application scenarios. Prerequisite: Graduate Standing.

**NURS-HI 5385. HEALTH INFORMATION SYSTEMS MANAGEMENT. 3 Hours.**
Introduction to project management principles and tools used for managing the development of healthcare analytics projects and information systems. Application of systems theory, hardware requirements, personnel requirements, vendor, negotiations, software, database, telecommunications, and use of the internet. Prerequisite: NURS-HI 5383 or instructor approval.

**NURS-HI 5386. SOCIAL DETERMINANTS OF HEALTH AND HEALTHCARE INFORMATICS. 3 Hours.**
Introduce the concepts of SDOH and explore the relationships between SDOH and Healthinformatics. Include how healthcare informatics can be employed to bridge the gaps experienced by vulnerable populations. Prerequisite: Graduate Standing.

**NURS-HI 5687. INFORMATICS PRACTICUM. 6 Hours.**
Synthesize principles and concepts of healthcare informatics as it applies to the nurse informatics role. Prerequisite: GPA 3.0; NURS 5327, NURS 5388, NURS 5367, NURS 5366, NURS 5342, NURS 5334, NURS-HI 5383, NURS-HI 5384, NURS-HI 5385, NURS-HI 5386.

**COURSES**

**NURS-IS 3137. INDEPENDENT STUDY. 1 Hour.**
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

**NURS-IS 3237. INDEPENDENT STUDY. 2 Hours.**
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

**NURS-IS 3337. INDEPENDENT STUDY. 3 Hours.**
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn a grade of C or better for credit. Prerequisite: Consent of Instructor.
NURS-IS 5370. INDEPENDENT STUDY IN NURSING. 3 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F,R,P,W. Permission of instructor. Graduate standing.

COURSES

NURS-SS 2232. LEARNING PROFESSIONAL NURSING AND LIFE SKILLS. 2 Hours.
This course focuses on the development and successful use of time management, test-taking skills, study methods, and additional student success strategies that can support students pursuing the BSN Prelicensure Program. Required for students who fail an upper-division nursing course. Prerequisite: Admission to the BSN Prelicensure program.

COURSES

NURS-UL 3333. PROMOTING HEALTHY LIFESTYLES. 3 Hours.
Focus on health promotion and disease prevention strategies that promote healthy lifestyles and empower individuals, families, and populations to achieve optimal health and wellness. The role of the nurse in health promotion is emphasized. Students will examine the impact of nurses’ overall wellness on patient safety. Prerequisite: Acceptance into the upper division nursing program.

NURS-UL 3352. THE LEGACY OF THE FAMILY. 3 Hours.
Explore and enhance understanding and application of the principles of family science knowledge in therapeutic relationships with families across the lifespan.

NURS-UL 3365. PHARMACOLOGY IN NURSING PRACTICE. 3 Hours.
Introduction to current concepts of pharmacology and their relationship to nursing practice. Included are basic principles of drug actions, side effects for major drug classifications, and the role of the nurse in drug therapeutics. Must be taken no more than three years prior to acceptance into the nursing program. Prerequisite: BIOL 2457, BIOL 2458, CHEM 1451.

NURS-UL 3366. PATHOPHYSIOLOGIC PROCESSES: IMPLICATIONS FOR NURSING. 3 Hours.
Pathophysiologic alterations, their interactions, and effects on persons across the life span as a basis for therapeutic nursing interventions. Must be taken no more than three years prior to acceptance into the nursing program. Prerequisite: BIOL 2457, BIOL 2458, CHEM 1451.

NURS-UL 3632. CLINICAL NURSING FOUNDATIONS. 6 Hours.
Basic therapeutic nursing interventions with individuals and families in diverse settings using nursing process framework. Prerequisite: or Corequisite: NURS 3320.

COURSES

NURSC 5120. ADULT-GERONTOLOGY ASSESSMENT LAB. 1 Hour.
Conduct comprehensive health assessment in the adult-gerontology population. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURSC 5130. PEDIATRIC ASSESSMENT LAB. 1 Hour.
Conduct comprehensive health assessment in the pediatric population. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURSC 5150. ADVANCED CARE OF A CLIENT POPULATION. 1 Hour.
Conduct comprehensive advanced health assessments of a client population and provide a teaching intervention of a priority health need. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURSC 5220. ADVANCED HEALTH ASSESSMENT AND DIAGNOSTIC REASONING. 2 Hours.
Apply theoretical foundations of comprehensive health assessment across the lifespan. Prerequisite: Graduate or Certificate Program Standing. NURS 5315 or Special Permission.

NURSC 5302. CURRICULUM DEVELOPMENT IN NURSING EDUCATION. 3 Hours.
Explore the nature of nursing education. Focus on the curriculum process and its application to nursing education programs. Prerequisite: Graduate standing.

NURSC 5308. NURSING INFORMATICS. 3 Hours.
Focus on application of computer technology that supports the dissemination of health care data, information and knowledge. Selected software packages/applications are presented and used. Prerequisite: NURS 5367.

NURSC 5310. TEACHING AND LEARNING THEORIES AND STRATEGIES IN NURSING EDUCATION. 3 Hours.
Teaching/Learning theories, strategies, and evaluation for educators. Prerequisite: Graduate standing.

NURSC 5311. NURSING MANAGEMENT IN THE HEALTH CARE ENVIRONMENT. 3 Hours.
Considers development of management and organizational theories as applied to health care organizations and their environment. Prerequisite: NURS 5367.

NURSC 5312. ASSESSMENT AND EVALUATION STRATEGIES IN NURSING EDUCATION. 3 Hours.
Integration of concepts of assessment and evaluation into a nursing evaluation framework. Prerequisite: Graduate standing.
NURSC 5315. ADVANCED PATHOPHYSIOLOGY. 3 Hours.
Builds on a previous understanding of anatomy and physiology and focuses on developing advanced knowledge of physiologic and pathophysiologic concepts across the life span. Prerequisite: Graduate Standing.

NURSC 5324. PSYCHIATRIC MENTAL CLINICAL PRACTICE I. 3 Hours.
This course provides application of theoretical knowledge and clinical skills to patients with commonly occurring psychiatric and mental health disorders across the life span in the context of advanced nursing practice. Prerequisite: NURS 5222 and NURS 5223 or Certificate Program Standing. Good academic standing (GPA 3.0).

NURSC 5325. PSYCHIATRIC MENTAL HEALTH CLINICAL PRACTICE II. 3 Hours.
This course provides application of theoretical knowledge and clinical skills to patients with various commonly occurring and complex psychiatric and mental health disorders across the life span in the context of advanced nursing practice. Prerequisite: NURS 5324 or concurrent enrollment, or Certificate Program Standing. Good academic standing (GPA 3.0).

NURSC 5329. ROLE OF THE NURSE EDUCATOR. 3 Hours.
Investigation of the roles and functions of the nurse educator. Prerequisite: Graduate program standing.

NURSC 5334. ADVANCED PHARMACOLOGY FOR NURSE PRACTITIONERS. 3 Hours.
Study of clinical pharmacological therapeutics for advanced nursing practice. Prerequisites: NURS 5315 or Certificate Program Standing.

NURSC 5337. FAMILY CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the family nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5432, NURS 5433, NURS 5434 and Good academic standing (GPA 3.0) or certificate program standing.

NURSC 5338. FAMILY CLINICAL PRACTICE 2. 3 Hours.
Continued clinical preceptorship with opportunities for increased clinical knowledge in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the family nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5432, NURS 5433, NURS 5434, NURS 5437 or concurrent enrollment; Good academic standing (GPA 3.0) or Certificate Program standing.

NURSC 5339. ROLES AND FUNCTIONS OF THE NURSE ADMINISTRATOR. 3 Hours.
Examine and implement administrative and managerial roles in health care organizations. Prerequisite: NURS 5311.

NURSC 5340. MANAGEMENT SEMINAR AND PRACTICE. 3 Hours.
Synthesize management, organizational, and leadership concepts and theories in selected health care settings. Prerequisite: NURS 5308; NURS 5311; NURS 5339; NURS 5341: NURS 5343; NURS 5342; NURS 5382. Good Academic Standing (3.0 GPA).

NURSC 5341. FINANCIAL MANAGEMENT IN NURSING. 3 Hours.
Analyze and apply financial management concepts to financial planning, budgeting, and reimbursement systems in health care. Prerequisite: NURS 5311 or admission into Masters of Science in Health Informatics (MSN-HI) program.

NURSC 5342. MANAGEMENT OF NURSING OPERATIONS. 3 Hours.
Examine strategic planning for health care systems. Prerequisite: NURS 5311 or admission into Masters of Science in Health Informatics (MSN-HI) program.

NURSC 5343. NURSING LEADERSHIP AND COMPLEX HEALTH CARE SYSTEMS. 3 Hours.
Analyze leadership strategies in current and predicted health care systems including dimensions of workforce and workplace issues, leadership, and evidenced-based decision-making. Prerequisite: NURS 5367.

NURSC 5350. ROLE OF THE NURSE IN ADVANCED PRACTICE. 3 Hours.
Theory and application of the multiple roles of the advanced practice nurse within the health care system. Prerequisite: Graduate Standing.

NURSC 5352. ADULT GERIATRIC PRIMARY CARE CLINICAL PRACTICE 1. 3 Hours.
Clinical experience in primary and long term health care settings with focus on managing adolescents, adults, and elders with common episodic acute and chronic health care needs. Prerequisite: NURS 5462 or concurrent enrollment; Good academic standing (GPA 3.0) or certificate program standing.

NURSC 5353. ADULT GERIATRIC PRIMARY CARE CLINICAL PRACTICE 2. 3 Hours.
Continued clinical experience in primary and long term health care settings with focus on managing adolescents, adults, and elders with common episodic acute and chronic health care needs. Prerequisite: NURS 5462 and NURS 5352 or concurrent enrollment and Good academic standing (GPA 3.0) or certificate program standing.

NURSC 5354. ADULT GERIATRIC ACUTE CARE CLINICAL PRACTICE 1. 3 Hours.
Clinical experience in specialty practice and high acuity health care settings with focus on managing adolescents, adults, and elders with common secondary and tertiary health care needs. Prerequisite: NURS 5463 or concurrent enrollment and Good academic standing (GPA 3.0) or certificate program standing.

NURSC 5355. ADULT GERIATRIC ACUTE CARE CLINICAL PRACTICE 2. 3 Hours.
Continued clinical experience in specialty practice and high acuity health care settings with focus on managing adolescents, adults, and elders with common secondary and tertiary health care needs. Prerequisite: NURS 5354 or concurrent enrollment; Good academic standing (GPA 3.0) or certificate program standing.
NURSC 5362. TEACHING PRACTICUM. 3 Hours.
Nursing education preceptorship in selected health care sites with opportunities to apply clinical and educational knowledge, skills, and concepts in a guided, progressive context of nursing education. Graded F,R,P,W. Prerequisite: Completion of all courses in the Nursing Education Program and Good academic standing (GPA 3.0).

NURSC 5371. PEDIATRIC PRIMARY CARE CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5465. Good academic standing (GPA 3.0) or Certificate program standing.

NURSC 5372. PEDIATRIC PRIMARY CARE CLINICAL PRACTICE 2. 3 Hours.
Continue clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5371 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURSC 5373. PEDIATRIC ACUTE CARE CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected acute and chronic care health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric acute care nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5467 or concurrent enrollment. NURS 5466 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURSC 5374. PEDIATRIC ACUTE CARE CLINICAL PRACTICE 2. 3 Hours.
Continue clinical preceptorship in selected acute and chronic care health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5466; NURS 5373 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURSC 5382. NURSING AND HEALTH CARE POLICY: ISSUES AND ANALYSIS. 3 Hours.
Analyze historical, current, and predicted national, state, and local health care policy processes. Prerequisite: NURS 5367.

NURSC 5388. STATISTICS FOR HEALTH CARE. 3 Hours.
This course provides students with the basic knowledge and skills to effectively use biostatistics in different research design and data analysis, and to understand articles in related professional journals. Topics include choosing correct statistical methods and study designs in nursing research and practice; descriptive statistics; probability and probability distributions; estimation and hypothesis testing, simple linear regression, introduction to analysis of variance and an introduction to the use of statistical software packages. Prerequisite: Undergraduate Statistics.

NURSC 5432. FAMILY I. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on pediatric wellness, women's health, men's health, and geriatrics concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURSC 5433. FAMILY II. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of commonly occurring conditions seen in primary care patients across the lifespan. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURSC 5434. FAMILY III. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on adult wellness, psychiatric, and cardiometabolic concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURSC 5450. NEONATAL NP CLINICAL PRACTICE. 4 Hours.
Integration of clinical management of the high-risk neonate through clinical preceptorships in selected health practice sites with application of knowledge, skills and concepts in a guided, progressive context of advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisites: NURS 5334 and NURS 5316 or NURS 5220 and NURS 5110 and NURS 5204 and NURS 5537 or concurrent enrollment and Good academic standing (GPA 3.0) or Certificate Program Standing.

NURSC 5461. ADULT GERONTOLOGY MANAGEMENT ACROSS THE CONTINUUM OF CARE. 4 Hours.
Foundations of advanced knowledge of common acute and chronic health problems in adolescents, adults, and elders across health care settings. Prerequisite: NURS 5220; NURS 5120 and NURS 5334, and NURS 5367 or concurrent enrollment, or Certificate Program Standing.

NURSC 5462. ADULT GERONTOLOGY PRIMARY CARE. 4 Hours.
Focus on an inter-professional approach and the development of advanced knowledge in the primary care management of adults from adolescence through old age, their families, and communities in a variety of health care settings. Prerequisite: NURS 5461 or Certificate Program Standing.

NURSC 5463. ADULT GERONTOLOGY ACUTE CARE. 4 Hours.
Focuses on a collaborative, inter-professional approach in the evaluation, diagnosis, and management of adolescents, adults, and gerontological patients who are experiencing acute, critical, and complex chronic illnesses across the continuum of care. Prerequisite: NURS 5461 or Certificate Program Standing.
NURSC 5465. PRIMARY PEDIATRIC CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioners management of designated minor acute, chronic and chronic health problems of pediatric patients and their families in primary care healthcare settings. Prerequisite: NURS 5334; NURS 5220; NURS 5130; NURS 5367 or concurrent enrollment.

NURSC 5466. PEDIATRIC ACUTE CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner management of designated critical, acute, chronic and complex health problems of pediatric patients and their families in an acute care facility. Prerequisite: NURS 5465.

NURSC 5467. PEDIATRIC COMPLEX CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner management of designated acute, chronic and complex health problems of pediatric patients and their families in multiple healthcare settings. Prerequisite: NURS 5465 or concurrent enrollment or Certificate program standing.

NURSC 5610. NEONATAL NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of neonatal advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: NURS 5447 and NURS 5450. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSC 5640. ADULT GERONTOLOGY ACUTE CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of adult gerontology acute care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5640: NURS 5354 and NURS 5355. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5640: NURS 5354 and NURS 5355. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSC 5645. ADULT GERONTOLOGY PRIMARY CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of adult gerontology primary care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5645: NURS 5352 and NURS 5353. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5645: NURS 5352 and NURS 5353. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSC 5650. PSYCHIATRIC MENTAL HEALTH NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of family psychiatric mental health care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: NURS 5324 and NURS 5325. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSC 5660. FAMILY NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of Family Primary Care Advanced Nursing Practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5660: NURS 5337 and NURS 5338. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5660: NURS 5337 and NURS 5338. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSC 5680. PEDIATRIC ACUTE CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of pediatric acute care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5680: NURS 5373 and NURS 5374. Good Academic Standing (GPA 3.0) or Certificate Program standing. For NURSC 5680: NURS 5373 and NURS 5374. Good Academic Standing (GPA 3.0) or Certificate Program standing.

NURSC 5685. PEDIATRIC PRIMARY CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of pediatric primary care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5685: NURS 5371 and NURS 5372. Good Academic Standing (GPA 3.0) or Certificate Program standing. For NURSC 5685: NURS 5371 and NURS 5372. Good Academic Standing (GPA 3.0) or Certificate Program standing.

COURSES

NURSG 5150. ADVANCED CARE OF A CLIENT POPULATION. 1 Hour.
Conduct comprehensive advanced health assessments of a client population and provide a teaching intervention of a priority health need. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURSG 5220. ADVANCED HEALTH ASSESSMENT AND DIAGNOSTIC REASONING. 2 Hours.
Apply theoretical foundations of comprehensive health assessment across the lifespan. Prerequisite: Graduate or Certificate Program Standing. NURS 5315 or Special Permission.

NURSG 5302. CURRICULUM DEVELOPMENT IN NURSING EDUCATION. 3 Hours.
Explore the nature of nursing education. Focus on the curriculum process and its application to nursing education programs. Prerequisite: Graduate standing.
NURSG 5308. NURSING INFORMATICS. 3 Hours.
Focus on application of computer technology that supports the dissemination of health care data, information and knowledge. Selected software packages/applications are presented and used. Prerequisite: NURS 5367.

NURSG 5310. TEACHING AND LEARNING THEORIES AND STRATEGIES IN NURSING EDUCATION. 3 Hours.
Teaching/Learning theories, strategies, and evaluation for educators. Prerequisite: Graduate standing.

NURSG 5311. NURSING MANAGEMENT IN THE HEALTH CARE ENVIRONMENT. 3 Hours.
Considers development of management and organizational theories as applied to health care organizations and their environment. Prerequisite: NURS 5367.

NURSG 5312. ASSESSMENT AND EVALUATION STRATEGIES IN NURSING EDUCATION. 3 Hours.
Integration of concepts of assessment and evaluation into a nursing evaluation framework. Prerequisite: Graduate standing.

NURSG 5315. ADVANCED PATHOPHYSIOLOGY. 3 Hours.
Builds on a previous understanding of anatomy and physiology and focuses on developing advanced knowledge of physiologic and pathophysiologic concepts across the life span. Prerequisite: Graduate Standing.

NURSG 5318. ADVANCED PATHOPHYSIOLOGY FOR NURSE EDUCATORS. 3 Hours.
This course develops advanced knowledge of pathophysiology. Principles of advanced physiology and pathophysiology are applied to disease processes, plans of care, and teaching plans. This course prepares Nurse Educators to educate clients, students, colleagues to facilitate patients and/or their support systems understanding of the disease process plan of care. Prerequisite: NURS 5367 and NURS 5310 and NURS 5329 and NURS 5302 and NURS 5312.

NURSG 5319. ADVANCED PHARMACOLOGY FOR NURSE EDUCATORS. 3 Hours.
This course develops advanced knowledge of clinical pharmacological therapeutics through the evaluation of classes of drugs and pharmacologic plans of care. This course prepares Nurse Educators to educate clients, students, and colleagues to facilitate patients and/or their support systems understanding of the pharmacologic plan of care. Prerequisite: NURS 5318.

NURSG 5324. PSYCHIATRIC MENTAL CLINICAL PRACTICE I. 3 Hours.
This course provides application of theoretical knowledge and clinical skills to patients with commonly occurring psychiatric and mental health disorders across the life span in the context of advanced nursing practice. Prerequisite: NURS 5222 and NURS 5223 or Certificate Program Standing. Good academic standing (GPA 3.0).

NURSG 5325. PSYCHIATRIC MENTAL HEALTH CLINICAL PRACTICE II. 3 Hours.
This course provides application of theoretical knowledge and clinical skills to patients with various commonly occurring and complex psychiatric and mental health disorders across the life span in the context of advanced nursing practice. Prerequisite: NURS 5324 or concurrent enrollment, or Certificate Program Standing. Good academic standing (GPA 3.0).

NURSG 5327. EXPLORATION OF SCIENCE AND THEORIES FOR NURSING. 3 Hours.
This course provides a critical examination of the philosophical and theoretical bases for nursing science. Prerequisite: Graduate standing.

NURSG 5329. ROLE OF THE NURSE EDUCATOR. 3 Hours.
Investigation of the roles and functions of the nurse educator. Prerequisite: Graduate program standing.

NURSG 5334. ADVANCED PHARMACOLOGY FOR NURSE PRACTITIONERS. 3 Hours.
Study of clinical pharmacological therapeutics for advanced nursing practice. Prerequisites: NURS 5315 or Certificate Program Standing.

NURSG 5339. ROLES AND FUNCTIONS OF THE NURSE ADMINISTRATOR. 3 Hours.
Examine and implement administrative and managerial roles in health care organizations. Prerequisite: NURS 5311.

NURSG 5340. MANAGEMENT SEMINAR AND PRACTICE. 3 Hours.
Synthesize management, organizational, and leadership concepts and theories in selected health care settings. Prerequisite: NURS 5308; NURS 5311; NURS 5339; NURS 5341: NURS 5343; NURS 5342; NURS 5382. Good Academic Standing (3.0 GPA).

NURSG 5341. FINANCIAL MANAGEMENT IN NURSING. 3 Hours.
Analyze and apply financial management concepts to financial planning, budgeting, and reimbursement systems in health care. Prerequisite: NURS 5311 or admission into Masters of Science in Health Informatics (MSH-HI) program.

NURSG 5342. MANAGEMENT OF NURSING OPERATIONS. 3 Hours.
Examine strategic planning for health care systems. Prerequisite: NURS 5311 or admission into Masters of Science in Health Informatics (MSN-HI) program.

NURSG 5343. NURSING LEADERSHIP AND COMPLEX HEALTH CARE SYSTEMS. 3 Hours.
Analyze leadership strategies in current and predicted health care systems including dimensions of workforce and workplace issues, leadership, and evidenced-based decision-making. Prerequisite: NURS 5367.

NURSG 5350. ROLE OF THE NURSE IN ADVANCED PRACTICE. 3 Hours.
Theory and application of the multiple roles of the advanced practice nurse within the health care system. Prerequisite: Graduate Standing.

NURSG 5352. ADULT GERIATRONOMY PRIMARY CARE CLINICAL PRACTICE 1. 3 Hours.
Clinical experience in primary and long term health care settings with focus on managing adolescents, adults, and elders with common episodic acute and chronic health care needs. Prerequisite: NURS 5462 or concurrent enrollment; Good academic standing (GPA 3.0) or certificate program standing.
NURSG 5353. ADULT GERONTOLOGY PRIMARY CARE CLINICAL PRACTICE 2. 3 Hours.
Continued clinical experience in primary and long term health care settings with focus on managing adolescents, adults, and elders with common episodic acute and chronic health care needs. Prerequisite: NURS 5462 and NURS 5352 or concurrent enrollment and Good academic standing (GPA 3.0) or certificate program standing.

NURSG 5354. ADULT GERONTOLOGY ACUTE CARE CLINICAL PRACTICE 1. 3 Hours.
Clinical experience in specialty practice and high acuity health care settings with focus on managing adolescents, adults, and elders with common secondary and tertiary health care needs. Prerequisite: NURS 5463 or concurrent enrollment and Good academic standing (GPA 3.0) or certificate program standing.

NURSG 5355. ADULT GERONTOLOGY ACUTE CARE CLINICAL PRACTICE 2. 3 Hours.
Continued clinical experience in specialty practice and high acuity health care settings with focus on managing adolescents, adults, and elders with common secondary and tertiary health care needs. Prerequisite: NURS 5354 or concurrent enrollment; Good academic standing (GPA 3.0) or certificate program standing.

NURSG 5360. SIMULATION APPLICATION IN NURSING. 3 Hours.
Application of and active learning strategies in nursing education. Prerequisite: NURS 5367, NURS 5220.

NURSG 5362. TEACHING PRACTICUM. 3 Hours.
Nursing education preceptorship in selected health care sites with opportunities to apply clinical and educational knowledge, skills, and concepts in a guided, progressive context of nursing education. Graded F,R,P,W. Prerequisite: Completion of all courses in the Nursing Education Program and Good academic standing (GPA 3.0).

NURSG 5366. PRINCIPLES OF RESEARCH IN NURSING. 3 Hours.
This course focuses on integration of theoretical and empirical principles of nursing research to generate evidence for nursing practice. Prerequisite: Graduate Standing.

NURSG 5367. EVIDENCE BASED PRACTICE. 3 Hours.
Preparation to lead evidence-based practice teams, to interpret best evidence, to plan for change, to evaluate outcomes, and to disseminate the project. Prerequisite: Graduate standing; NURS 5366 and NURS 5327.

NURSG 5371. PEDIATRIC PRIMARY CARE CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5465. Good academic standing (GPA 3.0) or Certificate program standing.

NURSG 5372. PEDIATRIC PRIMARY CARE CLINICAL PRACTICE 2. 3 Hours.
Continue clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5371 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate Program Standing.

NURSG 5373. PEDIATRIC ACUTE CARE CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected acute and chronic care health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric acute care nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5467 or concurrent enrollment. NURS 5466 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURSG 5374. PEDIATRIC ACUTE CARE CLINICAL PRACTICE 2. 3 Hours.
Continue clinical preceptorship in selected acute and chronic care health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5466; NURS 5373 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURSG 5382. NURSING AND HEALTH CARE POLICY: ISSUES AND ANALYSIS. 3 Hours.
Analyze historical, current, and predicted national, state, and local health care policy processes. Prerequisite: NURS 5367.

NURSG 5388. STATISTICS FOR HEALTH CARE. 3 Hours.
This course provides students with the basic knowledge and skills to effectively use biostatistics in different research design and data analysis, and to understand articles in related professional journals. Topics include choosing correct statistical methods and study designs in nursing research and practice; descriptive statistics; probability and probability distributions; estimation and hypothesis testing, simple linear regression, introduction to analysis of variance and an introduction to the use of statistical software packages. Prerequisite: Undergraduate Statistics.

NURSG 5432. FAMILY I. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on pediatric wellness, women's health, men's health, and geriatrics concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURSG 5433. FAMILY II. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of commonly occurring conditions seen in primary care patients across the lifespan. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.
NURSG 5434. FAMILY III. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on adult wellness, psychiatric, and cardiometabolic concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURSG 5450. NEONATAL NP CLINICAL PRACTICE. 4 Hours.
Integration of clinical management of the high-risk neonate through clinical preceptorships in selected health practice sites with application of knowledge, skills and concepts in a guided, progressive context of advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisites: NURS 5334 and NURS 5316 or NURS 5220 and NURS 5110 and NURS 5204 and NURS 5537 or concurrent enrollment and Good academic standing (GPA 3.0) or Certificate Program Standing.

NURSG 5510. NEONATAL NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of neonatal advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: NURS 5447 and NURS 5450. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSG 5540. ADULT GERONTOLOGY ACUTE CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of adult gerontology acute care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5640: NURS 5354 and NURS 5355. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5640: NURSC 5354 and NURSC 5355. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSG 5545. ADULT GERONTOLOGY PRIMARY CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of adult gerontology primary care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5645: NURS 5352 and NURS 5353. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5645: NURSC 5352 and NURSC 5353. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSG 5550. PSYCHIATRIC MENTAL HEALTH NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of family psychiatric mental health care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: NURS 5324 and NURS 5325. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURSG 5560. PEDIATRIC ACUTE CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of pediatric acute care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5560: NURS 5373 and NURS 5374. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5560: NURSC 5373 and NURSC 5374. Good Academic Standing (GPA 3.0) or Certificate Program standing.

NURSG 5585. PEDIATRIC PRIMARY CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of pediatric primary care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5585: NURS 5371 and NURS 5372. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5585: NURSC 5371 and NURSC 5372. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

COURSES

NURSU 3300. COOPERATIVE NURSING WORK EXPERIENCE. 3 Hours.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. Must earn a C or better to earn credit. Prerequisite: Admission into nursing degree program.

NURSU 3309. MEDICAL TERMINOLOGY FOR HEALTHCARE PROVIDERS. 3 Hours.
This course will enable the student to speak, use, and understand commonly used terms in the healthcare field. This course can be used as the upper division elective. Formerly taught as BIOL 3309. Credit will not be given for both.

NURSU 3315. RN-BSN HOLISTIC HEALTH ASSESSMENT ACROSS THE LIFESPAN. 3 Hours.
Theory and practice of holistic health assessment of individuals and families across the life span designed for the registered nurse. RN-BSN students only. Prerequisite: NURS 3345.

NURSU 3325. RN-BSN HOLISTIC CARE OF THE OLDER ADULT. 3 Hours.
Introduction to gerontologic nursing principles and standards. Selected concepts and issues related to aging and its impact on society and health care. RN-BSN students only. Previously listed as NURS 3322. Prerequisite: NURS 3345.

NURSU 3335. RN-BSN PROMOTING HEALTHY LIFESTYLES. 3 Hours.
Focus on health promotion and disease prevention strategies that promote healthy lifestyles and empower individuals, families, and populations to achieve optimal health and wellness. The role of the nurse in health promotion is emphasized. Students will examine the impact of nurses' overall wellness on patient safety. RN-BSN students only. Previously NURS 3435. Prerequisite: NURS 3345.
NURSU 3345. ROLE TRANSITION TO PROFESSIONAL NURSING. 3 Hours.
Course addresses the role transition to Professional Nursing, nursing theory, ethics, decision making, critical thinking/clinical judgment, introduction to evidence-based practice, and informatics/technology in practice. Identifies strategies for personal and professional empowerment. Prerequisite: Admission into nursing degree program.

NURSU 3352. THE LEGACY OF THE FAMILY. 3 Hours.
Explore and enhance understanding and application of the principles of family science knowledge in therapeutic relationships with families across the lifespan.

NURSU 3375. RN-BSN HEALTH POLICY, LEGAL ASPECTS AND INFORMATICS IN NURSING. 3 Hours.
This course provides an introduction to legal and ethical concepts, values, and behaviors necessary for transitioning to a professional nursing role. Topics include health care policy development, legal overview and peer-review process, health care informatics, economic and political issues, laws, rules, challenges, boundaries, malpractice and societal issues and trends influencing health care. Prerequisite: NURS 3345.

NURSU 4300. COOPERATIVE NURSING WORK EXPERIENCE. 3 Hours.
Designed for nursing cooperative education student to integrate classroom study with career-related practical experience in the workplace. Prerequisite: NURS-EL 3300 or NURS 3300.

NURSU 4325. RN-BSN NURSING RESEARCH. 3 Hours.
Basic concepts, processes and applications of nursing research. Research role of the nurse in decision making and clinical practice. RN-BSN students only. Prerequisite: ENGL 2338 or equivalent, Math 1308 or equivalent, and NURS 3345 or NURS 3645.

NURSU 4455. RN-BSN NURSING LEADERSHIP & MANAGEMENT. 4 Hours.
Exploration of organizational strategies, leadership theories and societal trends with implications for decision making in health care. Introduction to management skills needed by professional nurses with clinical application in diverse settings. RN-BSN students only. Prerequisite: NURS 3345.

NURSU 4465. RN-BSN POPULATION AND COMMUNITY HEALTH NURSING. 4 Hours.
Integrates knowledge from nursing theory and public health science in assessing health care needs of aggregates, communities, and society for the Registered Nurse. RN-BSN students only. Prerequisite: NURS 3345.

NURSU 4465. RN-BSN CAPSTONE. 6 Hours.
Synthesis of knowledge acquired in the RN-BSN curriculum and development of the Nurse Role with evolving professional issues, health care environment, lifelong learning, and promotion of the Nursing profession designed for Registered Nurses RN-BSN student only. Prerequisite: NURS 4325, NURS 4455 Corequisite: NURS 4465.

COURSES

NURS 2200. CONCEPTS IN PROFESSIONAL NURSING. 2 Hours.
Designed to introduce the student to specific professional concepts in nursing. Selected concepts and processes for professional nursing will include an introduction to nursing's theoretical, philosophical, ethical, and legal dimensions with an emphasis on professional formation. Course activities will focus on development of teamwork, communication skills, effective decision-making and reflective practice.

NURS 2232. LEARNING PROFESSIONAL NURSING AND LIFE SKILLS. 2 Hours.
This course focuses on the development and successful use of time management, test-taking skills, study methods, and additional student success strategies that can support students pursuing the BSN Prelicensure Program. Required for students who fail an upper-division nursing course. Prerequisite: Admission to the BSN Prelicensure program.

NURS 2300. INTRODUCTION TO PROFESSIONAL AND CLINICAL CONCEPTS IN NURSING. 3 Hours.
Designed to introduce the student to specific professional concepts in nursing as well as academic success strategies. Selected concepts and processes for professional nursing will include an introduction to nursing's theoretical, philosophical, ethical, and legal dimensions with an emphasis on professional formation. Course activities will focus on development of teamwork, communication skills, effective decision making and reflective practice.

NURS 3100. COOPERATIVE NURSING WORK EXPERIENCE. 1 Hour.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. This course is graded as pass/fail. Prerequisite: Consent of instructor.

NURS 3137. INDEPENDENT STUDY. 1 Hour.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3147. SPECIALIZED TOPICS IN NURSING. 1 Hour.
Areas of special interest. May be repeated with varied topics. Must complete with C or better for credit. Prerequisite: Junior standing and consent of instructor.

NURS 3200. COOPERATIVE NURSING WORK EXPERIENCE. 2 Hours.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. This course is graded as pass/fail. Prerequisite: Consent of instructor.

NURS 3237. INDEPENDENT STUDY. 2 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.
NURS 3247. SPECIALIZED TOPICS IN NURSING. 2 Hours.
Areas of special interest. May be repeated with varied topics. Must earn C or better for credit. Prerequisite: Junior standing and consent of instructor.

NURS 3261. NURSING OF OLDER ADULTS. 2 Hours.
Selected concepts and issues related to aging and its impact on society and health care. Introduction to gerontologic nursing principles. Clinical application in diverse settings across the continuum of care. Prerequisite: NURS 3632, NURS 3320.

NURS 3200. COOPERATIVE NURSING WORK EXPERIENCE. 3 Hours.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. Must earn a C or better to earn credit. Prerequisite: Admission into nursing degree program.

NURS 3209. MEDICAL TERMINOLOGY FOR HEALTHCARE PROVIDERS. 3 Hours.
This course will enable the student to speak, use, and understand commonly used terms in the healthcare field. This course can be used as the upper division elective. Formerly taught as BIOL 3309. Credit will not be given for both.

NURS 3315. RN-BSN HOLISTIC HEALTH ASSESSMENT ACROSS THE LIFESPAN. 3 Hours.
Theory and practice of holistic health assessment of individuals and families across the life span designed for the registered nurse. RN-BSN students only. Prerequisite: NURS 3345.

NURS 3320. HOLISTIC HEALTH ASSESSMENT ACROSS THE LIFESPAN. 3 Hours.
Theory and practice of holistic health assessment of individuals and families across the life span with emphasis on normal findings. Prerequisite: or Corequisite: NURS 3632.

NURS 3321. NURSING RESEARCH. 3 Hours.
Basic concepts, processes and applications of nursing research. Research role of the nurse in decision making and clinical practice. Prerequisite: NURS 3632.

NURS 3322. HUMAN FACTORS IN HEALTHCARE. 3 Hours.
This course provides an overview of human factors concepts and principles essential for healthcare professionals. Topics include the basics of patient safety and human factors principles in patient safety improvement at individual, team and organizational levels, such as psychological safety, visual design, and human performance limitations.

NURS 3325. RN-BSN HOLISTIC CARE OF THE OLDER ADULT. 3 Hours.
Introduction to gerontologic nursing principles and standards. Selected concepts and issues related to aging and its impact on society and health care. RN-BSN students only. Previously listed as NURS 3322. Prerequisite: NURS 3345.

NURS 3333. PROMOTING HEALTHY LIFESTYLES. 3 Hours.
Focus on health promotion and disease prevention strategies that promote healthy lifestyles and empower individuals, families, and populations to achieve optimal health and wellness. The role of the nurse in health promotion is emphasized. Students will examine the impact of nurses' overall wellness on patient safety. Prerequisite: Acceptance into the upper division nursing program.

NURS 3335. RN-BSN PROMOTING HEALTHY LIFESTYLES. 3 Hours.
Focus on health promotion and disease prevention strategies that promote healthy lifestyles and empower individuals, families, and populations to achieve optimal health and wellness. The role of the nurse in health promotion is emphasized. Students will examine the impact of nurses' overall wellness on patient safety. RN-BSN students only. Previously NURS 3435. Prerequisite: NURS 3345.

NURS 3377. INDEPENDENT STUDY. 3 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn a grade of C or better for credit. Prerequisite: Consent of Instructor.

NURS 3344. ENHANCING NURSING PRACTICE AND SAFETY WITH HISPANIC PATIENTS THROUGH BETTER COMMUNICATION. 3 Hours.
Explores and augments the understanding of factors which facilitate or inhibit effective communication with Spanish-speaking clients. Focus on vocabulary specific to assessment and intervention with persons whose primary language is Spanish.

NURS 3345. ROLE TRANSITION TO PROFESSIONAL NURSING. 3 Hours.
Course addresses the role transition to Professional Nursing, nursing theory, ethics, decision making, critical thinking/clinical judgment, introduction to evidence-based practice, and informatics/technology in practice. Identifies strategies for personal and professional empowerment. Prerequisite: Admission into nursing degree program.

NURS 3347. SPECIALIZED TOPICS IN NURSING. 3 Hours.
Areas of special interest. May be repeated with varied topics. Must earn a C or better to earn credit.

NURS 3352. THE LEGACY OF THE FAMILY. 3 Hours.
Explore and enhance understanding and application of the principles of family science knowledge in therapeutic relationships with families across the lifespan.

NURS 3365. PHARMACOLOGY IN NURSING PRACTICE. 3 Hours.
Introduction to current concepts of pharmacology and their relationship to nursing practice. Included are basic principles of drug actions, side effects for major drug classifications, and the role of the nurse in drug therapeutics. Must be taken no more than three years prior to acceptance into the nursing program. Prerequisite: BIOL 2457, BIOL 2458, CHEM 1451.
NURS 3366. PATHOPHYSIOLOGIC PROCESSES: IMPLICATIONS FOR NURSING. 3 Hours.
Pathophysiologic alterations, their interactions, and effects on persons across the life span as a basis for therapeutic nursing interventions. Must be taken no more than three years prior to acceptance into the nursing program. Prerequisite: BIOL 2457, BIOL 2458, CHEM 1451.

NURS 3375. RN-BSN HEALTH POLICY, LEGAL ASPECTS AND INFORMATICS IN NURSING. 3 Hours.
This course provides an introduction to legal and ethical concepts, values, and behaviors necessary for transitioning to a professional nursing role. Topics include health care policy development, legal overview and peer-review process, health care informatics, economic and political issues, laws, rules, challenges, boundaries, malpractice and societal issues and trends influencing health care. Prerequisite: NURS 3345.

NURS 3381. PSYCHIATRIC MENTAL HEALTH NURSING OF INDIVIDUALS, FAMILIES, AND GROUPS. 3 Hours.
Application of the nursing process with emphasis on critical thinking, therapeutic nursing interventions, and effective communication and interpersonal skills as they relate to persons with psychiatric mental health conditions. Prerequisite: NURS 3632, NURS 3320 and NURS 3333.

NURS 3437. INDEPENDENT STUDY. 4 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3447. SPECIALIZED TOPICS IN NURSING. 4 Hours.
Areas of special interest. May be repeated with varied topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3537. INDEPENDENT STUDY. 5 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3547. SPECIALIZED TOPICS IN NURSING. 5 Hours.
Areas of special interest. May be repeated with varied topics. Must earn C or better for credit. Prerequisite: Junior standing and consent of instructor.

NURS 3632. CLINICAL NURSING FOUNDATIONS. 6 Hours.
Basic therapeutic nursing interventions with individuals and families in diverse settings using nursing process framework. Prerequisite: or Corequisite: NURS 3320.

NURS 3637. INDEPENDENT STUDY. 6 Hours.
Topic and mode of study are agreed upon by the student and instructor. May be offered with any combination of lecture/lab hours. May be repeated with various topics. Must earn C or better for credit. Prerequisite: Consent of instructor.

NURS 3647. SPECIALIZED TOPICS IN NURSING. 6 Hours.
Areas of special interest. May be repeated with varied topics. Must earn C or better for credit. Prerequisite: junior standing and consent of instructor.

NURS 3661. NURSING OF ADULTS. 6 Hours.
Application of the nursing process with emphasis on critical thinking, therapeutic nursing interventions, and effective communication for persons experiencing medical-surgical problems. Theory and clinical application in diverse settings. Prerequisite: NURS 3632, NURS 3320 and NURS 3333.

NURS 4100. COOPERATIVE NURSING WORK EXPERIENCE. 1 Hour.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. Prerequisite: Consent of instructor.

NURS 4199. ROLE DEVELOPMENT IN PROFESSIONAL NURSING SEMINAR. 1 Hour.
The course addresses professional nursing role development integrating concepts of professional comportment. Prerequisite: NURS 3661, NURS 3381.

NURS 4200. COOPERATIVE NURSING WORK EXPERIENCE. 2 Hours.
Designed for nursing cooperative education students to integrate classroom study with career-related practical experience in the workplace. Prerequisite: Consent of instructor.

NURS 4300. COOPERATIVE NURSING WORK EXPERIENCE. 3 Hours.
Designed for nursing cooperative education student to integrate classroom study with career-related practical experience in the workplace. Prerequisite: NURS-EL 3300 or NURS 3300.

NURS 4323. HEALTH POLICY, LEGAL ASPECTS AND INFORMATICS IN NURSING. 3 Hours.
This course provides an introduction to legal and ethical concepts, values, and behaviors necessary for transitioning to a professional nursing role. Topics include health care policy development, legal overview and peer-review process, health care informatics, economic and political issues, laws, rules, challenges, boundaries, malpractice and societal issues and trends influencing health care. Prerequisite: NURS 4331 and NURS 4341 or NURS 4331 and NURS 4581 or NURS 4341 and NURS 4581.

NURS 4325. RN-BSN NURSING RESEARCH. 3 Hours.
Basic concepts, processes and applications of nursing research. Research role of the nurse in decision making and clinical practice. RN-BSN students only. Prerequisite: ENGL 2338 or equivalent, Math 1308 or equivalent, and NURS 3345 or NURS 3645.

NURS 4331. NURSING OF CHILDREN AND ADOLESCENTS. 3 Hours.
Nursing care for infants, children, adolescents, and their families. Theory and clinical application in diverse settings. Prerequisite: NURS 3661, NURS 3381, NURS 3321.
NURS 4341. NURSING OF THE CHILDBEARING FAMILY. 3 Hours.
Application of the nursing process with emphasis on critical thinking, communication and therapeutic nursing interventions as related to care of individuals and families during the childbearing experience. Prerequisite: NURS 3381, NURS 3661, NURS 3321.

NURS 4350. CAPSTONE: TRANSITION TO PROFESSIONAL NURSING. 3 Hours.
Focus on the synthesis of knowledge acquired throughout the curriculum and the enactment of the professional nurse role in a concentrated practicum. Prerequisite: or Corequisite: NURS 4351, NURS 4462, NURS 4323.

NURS 4351. BSN NURSING LEADERSHIP AND MANAGEMENT. 3 Hours.
Exploration of organizational strategies, leadership theories and societal trends with implications for decision making in health care. Introduction to management skills needed by professional nurses in diverse settings. Prerequisites: NURS 4331, NURS 4341, NURS 4581.

NURS 4393. NURSING CERTIFICATION. 3 Hours.

NURS 4455. RN-BSN NURSING LEADERSHIP & MANAGEMENT. 4 Hours.
Exploration of organizational strategies, leadership theories and societal trends with implications for decision making in health care. Introduction to management skills needed by professional nurses with clinical application in diverse settings. RN-BSN students only. Prerequisite: NURS 3345.

NURS 4462. POPULATION AND COMMUNITY HEALTH NURSING. 4 Hours.
Integrate knowledge from nursing theory and public health science in assessing health care needs of aggregates, communities, and society. Prerequisite: NURS 4331, NURS 4341, NURS 4581.

NURS 4465. RN-BSN POPULATION AND COMMUNITY HEALTH NURSING. 4 Hours.
Integrates knowledge from nursing theory and public health science in assessing health care needs of aggregates, communities, and society for the Registered Nurse. RN-BSN students only. Prerequisite: NURS 3345.

NURS 4581. NURSING OF ADULTS WITH COMPLEX NEEDS. 5 Hours.
Use of critical thinking, therapeutic nursing interventions and communication skills in promoting quality of life for persons with complex health needs. Application of nursing roles in diverse settings. Prerequisite: NURS 3661, NURS 3381, NURS 3321, NURS 3261.

NURS 4685. RN-BSN CAPSTONE. 6 Hours.
Synthesis of knowledge acquired in the RN-BSN curriculum and development of the Nurse Role with evolving professional issues, health care environment, lifelong learning, and promotion of the Nursing profession designed for Registered Nurses RN-BSN student only. Prerequisite: NURS 4325, NURS 4455 Corequisite: NURS 4465.

NURS 5110. NEONATAL ASSESSMENT LAB. 1 Hour.
Conduct comprehensive health assessment in the neonatal population. Prerequisite: NURS 5220 or concurrent enrollment or permission of instructor or Certificate Program Standing.

NURS 5112. THERAPY CONCEPTS FOR PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONERS. 1 Hour.
This course provides evidenced based practice principles of non-pharmacological individual, family and group therapies for psychiatric disorders and mental health problems across the lifespan. Prerequisite: NURS 5315, NURS 5410 or concurrent enrollment, NURS 5140 or concurrent enrollment, or Certificate Program Standing.

NURS 5120. ADULT-GERONTOLOGY ASSESSMENT LAB. 1 Hour.
Conduct comprehensive health assessment in the adult-gerontology population. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURS 5130. PEDIATRIC ASSESSMENT LAB. 1 Hour.
Conduct comprehensive health assessment in the pediatric population. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURS 5140. PSYCHIATRIC ASSESSMENT LAB FOR THE PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER. 1 Hour.
Introduces the PMHNP student to the psychiatric mental health assessment applied to the pediatric, adult, and geriatric patient with a mental health disorder through knowledge acquisition and skill development. Prerequisite: NURS 5220, NURS 5120, and NURS 5130, NURS 5410 or concurrent enrollment, NURS 5112 or concurrent enrollment, or Certificate Program Standing.

NURS 5150. ADVANCED CARE OF A CLIENT POPULATION. 1 Hour.
Conduct comprehensive advanced health assessments of a client population and provide a teaching intervention of a priority health need. Prerequisite: NURS 5220 or concurrent enrollment or Certificate Program Standing.

NURS 5170. INDEPENDENT STUDY IN NURSING. 1 Hour.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, P, R. Prerequisite: Graduate standing.

NURS 5190. TOPICS IN NURSING. 1 Hour.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 5325. PSYCHIATRIC MENTAL HEALTH CLINICAL PRACTICE II. 3 Hours.
This course provides application of theoretical knowledge and clinical skills to patients with various commonly occurring and complex psychiatric and mental health disorders across the life span in the context of advanced nursing practice. Prerequisite: NURS 5324 or concurrent enrollment, or Certificate Program Standing. Good academic standing (GPA 3.0).

NURS 5327. EXPLORATION OF SCIENCE AND THEORIES FOR NURSING. 3 Hours.
This course provides a critical examination of the philosophical and theoretical bases for nursing science. Prerequisite: Graduate standing.

NURS 5329. ROLE OF THE NURSE EDUCATOR. 3 Hours.
Investigation of the roles and functions of the nurse educator. Prerequisite: Graduate program standing.

NURS 5334. ADVANCED PHARMACOLOGY FOR NURSE PRACTITIONERS. 3 Hours.
Study of clinical pharmacological therapeutics for advanced nursing practice. Prerequisites: NURS 5315 or Certificate Program Standing.

NURS 5337. FAMILY CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the family nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5432, NURS 5433, NURS 5434 and Good academic standing (GPA 3.0) or certificate program standing.

NURS 5338. FAMILY CLINICAL PRACTICE 2. 3 Hours.
Continued clinical preceptorship with opportunities for increased clinical knowledge in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the family nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5432, NURS 5433, NURS 5434, NURS 5337 or concurrent enrollment; Good academic standing (GPA 3.0) or Certificate Program standing.

NURS 5339. ROLES AND FUNCTIONS OF THE NURSE ADMINISTRATOR. 3 Hours.
Examine and implement administrative and managerial roles in health care organizations. Prerequisite: NURS 5311.

NURS 5340. MANAGEMENT SEMINAR AND PRACTICE. 3 Hours.
Synthesize management, organizational, and leadership concepts and theories in selected health care settings. Prerequisite: NURS 5308; NURS 5311; NURS 5339; NURS 5341; NURS 5343; NURS 5342; NURS 5382. Good Academic Standing (3.0 GPA).

NURS 5341. FINANCIAL MANAGEMENT IN NURSING. 3 Hours.
Analyze and apply financial management concepts to financial planning, budgeting, and reimbursement systems in health care. Prerequisite: NURS 5311 or admission into Masters of Science in Health Informatics (MSH-HI) program.

NURS 5342. MANAGEMENT OF NURSING OPERATIONS. 3 Hours.
Examine strategic planning for health care systems. Prerequisite: NURS 5311 or admission into Masters of Science in Health Informatics (MSN-HI) program.

NURS 5343. NURSING LEADERSHIP AND COMPLEX HEALTH CARE SYSTEMS. 3 Hours.
Analyze leadership strategies in current and predicted health care systems including dimensions of workforce and workplace issues, leadership, and evidenced-based decision-making. Prerequisite: NURS 5367.

NURS 5348. NURSING CARE AT THE END OF LIFE. 3 Hours.
Addresses concepts of palliative care of patients with life limiting disease and their families. Explores the physiology of end stage disease processes, clinical approaches to pain and symptom management, societal issues and trends in end of life care, models of care delivery and the impact of personal values and beliefs about death. Prerequisite: Graduate Standing.

NURS 5350. ROLE OF THE NURSE IN ADVANCED PRACTICE. 3 Hours.
Theory and application of the multiple roles of the advanced practice nurse within the health care system. Prerequisite: Graduate standing.

NURS 5352. ADULT GERONTOLOGY PRIMARY CARE CLINICAL PRACTICE 1. 3 Hours.
Clinical experience in primary and long term health care settings with focus on managing adolescents, adults, and elders with common episodic acute and chronic health care needs. Prerequisite: NURS 5462 or concurrent enrollment; Good academic standing (GPA 3.0) or certificate program standing.

NURS 5353. ADULT GERONTOLOGY PRIMARY CARE CLINICAL PRACTICE 2. 3 Hours.
Continued clinical experience in primary and long term health care settings with focus on managing adolescents, adults, and elders with common episodic acute and chronic health care needs. Prerequisite: NURS 5462 and NURS 5352 or concurrent enrollment and Good academic standing (GPA 3.0) or certificate program standing.

NURS 5354. ADULT GERONTOLOGY ACUTE CARE CLINICAL PRACTICE 1. 3 Hours.
Clinical experience in specialty practice and high acuity health care settings with focus on managing adolescents, adults, and elders with common secondary and tertiary health care needs. Prerequisite: NURS 5463 or concurrent enrollment and Good academic standing (GPA 3.0) or certificate program standing.

NURS 5355. ADULT GERONTOLOGY ACUTE CARE CLINICAL PRACTICE 2. 3 Hours.
Continued clinical experience in specialty practice and high acuity health care settings with focus on managing adolescents, adults, and elders with common secondary and tertiary health care needs. Prerequisite: NURS 5354 or concurrent enrollment; Good academic standing (GPA 3.0) or certificate program standing.
NURS 5356. GLOBAL HEALTH POLICY, HEALTH LITERACY, AND MODELS OF CARE FOR OLDER ADULTS. 3 Hours.
This course will focus on healthcare policy issues and models of healthcare delivery for older adults at the state, national and global levels. Prerequisite: Graduate Standing.

NURS 5357. ADVANCED CLINICAL MANAGEMENT OF OLDER ADULTS WITH COMPLEX MULTIMORBIDITY. 3 Hours.
This course will focus upon an inter-professional approach to develop advanced knowledge in the chronic health care management of older adults, their families, and communities in a variety of health care settings. Prerequisite: Graduate Standing or permission of instructor.

NURS 5358. ADVANCED CLIN MGMT OF OLDER ADULTS W/COMPLEX MULTIMORBIDITY DURING ACUTE ILLNESS CRISIS. 3 Hours.
This course will focus upon an inter-professional approach to develop advanced knowledge in aging issues and paradigms of care for the older adult; in addition, this course will accentuate the management of older adults with acute health problems, their families, and communities in a variety of health care settings. Prerequisite: Graduate Standing or permission of instructor.

NURS 5360. SIMULATION APPLICATION IN NURSING. 3 Hours.
Application of and active learning strategies in nursing education. Prerequisite: NURS 5367, NURS 5220.

NURS 5362. TEACHING PRACTICUM. 3 Hours.
Nursing education preceptorship in selected health care sites with opportunities to apply clinical and educational knowledge, skills, and concepts in a guided, progressive context of nursing education. Graded F,R,P,W. Prerequisite: Completion of all courses in the Nursing Education Program and Good academic standing (GPA 3.0).

NURS 5366. PRINCIPLES OF RESEARCH IN NURSING. 3 Hours.
This course focuses on integration of theoretical and empirical principles of nursing research to generate evidence for nursing practice. Prerequisite: Graduate Standing.

NURS 5367. EVIDENCE BASED PRACTICE. 3 Hours.
Preparation to lead evidence-based practice teams, to interpret best evidence, to plan for change, to evaluate outcomes, and to disseminate the project. Prerequisite: Graduate standing; NURS 5366 and NURS 5327.

NURS 5370. INDEPENDENT STUDY IN NURSING. 3 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F,R,P,W. Permission of instructor. Graduate standing.

NURS 5371. PEDIATRIC PRIMARY CARE CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5465. Good academic standing (GPA 3.0) or Certificate program standing.

NURS 5372. PEDIATRIC PRIMARY CARE CLINICAL PRACTICE 2. 3 Hours.
Continue clinical preceptorship in selected primary health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5371 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program Standing.

NURS 5373. PEDIATRIC ACUTE CARE CLINICAL PRACTICE 1. 3 Hours.
Initial clinical preceptorship in selected acute and chronic care health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric acute care nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5466 or concurrent enrollment. NURS 5466 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURS 5374. PEDIATRIC ACUTE CARE CLINICAL PRACTICE 2. 3 Hours.
Continue clinical preceptorship in selected acute and chronic care health practice sites with opportunities to apply knowledge and concepts of advanced nursing practice implementing the pediatric nurse practitioner role in evidenced based patient care. Prerequisite: NURS 5466; NURS 5373 or concurrent enrollment. Good academic standing (GPA 3.0) or Certificate program standing.

NURS 5380. INDEPENDENT STUDY IN RESEARCH. 3 Hours.
Detailed study and participation in a faculty sponsored research project. Topic and mode of study are agreed upon by the student and instructor prior to registration. Permission of instructor. Graded F,R,P,W.

NURS 5382. NURSING AND HEALTH CARE POLICY: ISSUES AND ANALYSIS. 3 Hours.
Analyze historical, current, and predicted national, state, and local health care policy processes. Prerequisite: NURS 5367.

NURS 5388. STATISTICS FOR HEALTH CARE. 3 Hours.
This course provides students with the basic knowledge and skills to effectively use biostatistics in different research design and data analysis, and to understand articles in related professional journals. Topics include choosing correct statistical methods and study designs in nursing research and practice; descriptive statistics; probability and probability distributions; estimation and hypothesis testing, simple linear regression, introduction to analysis of variance and an introduction to the use of statistical software packages. Prerequisite: Undergraduate Statistics.

NURS 5390. TOPICS IN NURSING. 3 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.
NURS 5392. GENOMICS AND NANOTECHNOLOGY IN HEALTH CARE PRACTICE. 3 Hours.
Genomics and nanotechnology are emerging as principal drivers to improve human diagnosis and treatment modalities. This course is designed to introduce tools used in these fields. Health care outcomes, in relation to innovations produced from these fields, will be described. Prerequisite: Graduate standing.

NURS 5393. ADVANCED CLINICAL NURSING PRACTICE I. 3 Hours.
Development of advanced knowledge base of specialized clinical concepts and the application of this knowledge in selected clinical areas. Prerequisite: Graduate standing.

NURS 5395. HEART FAILURE PATHOPHYSIOLOGY AND EXERCISE REHABILITATION. 3 Hours.
The goal of this course is to provide students with fundamental knowledge related to heart failure (HF) pathophysiology, and the role of evidence based exercise rehabilitation to improve overall health related physical fitness and quality of life. Prerequisite: Graduate Standing or Approval of Instructor.

NURS 5396. CURRENT BIOTECHNOLOGY IN HEALTH CARE. 3 Hours.
The goal of this course is to provide students with fundamental knowledge and current advances of biotechnology in medicine and healthcare, and train them how to apply these new technologies in their pertinent fields. Prerequisite: Graduate Standing. Approval of instructor.

NURS 5397. ETHICAL RESEARCH AND THE PROPOSED IRB/IACUC PROTOCOL. 3 Hours.
Ethical research practices that the learner will be able to demonstrate through a written research protocol using good clinical practice (GCP) to ensure protection of subjects/animals. Related topics include social-behavioral and biomedical research certifications, and issues related to scientific misconduct. Prerequisite: Graduate standing or permission of instructor.

NURS 5398. THESIS. 3 Hours.
Graded F,R.

NURS 5410. INTRODUCTION TO PSYCHIATRIC MENTAL HEALTH FOR THE PMHNP. 4 Hours.
This course provides the neuroscientific foundations for various psychiatric disorders and mental health problems across the lifespan. An analysis of the relationships between the neurobiology, neurophysiology, genetic, and epigenetic aspects of various psychiatric disorders and mental health problems will be explored. Prerequisite: NURS 5315, NURS 5220, NURS 5120, NURS 5130, or Certificate Program Standing.

NURS 5432. FAMILY I. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on pediatric wellness, women's health, men's health, and geriatrics concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURS 5433. FAMILY II. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of commonly occurring conditions seen in primary care patients across the lifespan. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURS 5434. FAMILY III. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner primary care management of designated acute, chronic and complex health problems of individuals and families across the lifespan. Particular emphasis will be on adult wellness, psychiatric, and cardiometabolic concepts and conditions. Prerequisite: NURS 5418 or NURS 5220 and NURS 5120 and NURS 5130; NURS 5334 or Certificate Program standing.

NURS 5447. NEONATAL NURSING III. 4 Hours.
This course focuses on advanced concepts of pharmacological and technological therapies and evidence based knowledge for the management of designated complex acute and chronic health problems affecting infants (birth to 2 years of age) and their families including ethical issues. Prerequisite: NURS 5537 or Certificate Program Standing.

NURS 5450. NEONATAL NP CLINICAL PRACTICE. 4 Hours.
Integration of clinical management of the high-risk neonate through clinical preceptorships in selected health practice sites with application of knowledge, skills and concepts in a guided, progressive context of advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisites: NURS 5334 and NURS 5316 or NURS 5220 and NURS 5110 and NURS 5204 and NURS 5537 or concurrent enrollment and Good academic standing (GPA 3.0) or Certificate Program Standing.

NURS 5451. ADULT GERONTOLOGY MANAGEMENT ACROSS THE CONTINUUM OF CARE. 4 Hours.
Foundations of advanced knowledge of common acute and chronic health problems in adolescents, adults, and elders across health care settings. Prerequisite: NURS 5220; NURS 5120 and NURS 5334, and NURS 5367 or concurrent enrollment, or Certificate Program Standing.

NURS 5452. ADULT GERONTOLOGY PRIMARY CARE. 4 Hours.
Focus on an inter-professional approach and the development of advanced knowledge in the primary care management of adults from adolescence through old age, their families, and communities in a variety of health care settings. Prerequisite: NURS 5461 or Certificate Program Standing.

NURS 5463. ADULT GERONTOLOGY ACUTE CARE. 4 Hours.
Focuses on a collaborative, inter-professional approach in the evaluation, diagnosis, and management of adolescents, adults, and gerontological patients who are experiencing acute, critical, and complex chronic illnesses across the continuum of care. Prerequisite: NURS 5461 or Certificate Program Standing.
NURS 5465. PRIMARY PEDIATRIC CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioners management of designated minor acute, chronic and chronic health problems of pediatric patients and their families in primary care healthcare settings. Prerequisite: NURS 5334; NURS 5220; NURS 5130; NURS 5367 or concurrent enrollment.

NURS 5466. PEDIATRIC ACUTE CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner management of designated critical, acute, chronic and complex health problems of pediatric patients and their families in an acute care facility. Prerequisite: NURS 5465.

NURS 5467. PEDIATRIC COMPLEX CARE. 4 Hours.
This course focuses on advanced concepts and knowledge for nurse practitioner management of designated acute, chronic and complex health problems of pediatric patients and their families in multiple healthcare settings. Prerequisite: NURS 5465 or concurrent enrollment or Certificate program standing.

NURS 5470. INDEPENDENT STUDY IN NURSING. 4 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Prerequisite: Permission of instructor. Graded F,R,P,W.

NURS 5537. NEONATAL NURSING II. 5 Hours.
This course focuses on advanced concepts of pharmacological and technological therapies and evidence based knowledge for the management of designated complex, acute health problems affecting infants (birth to 2 years of age). Graded (A,B,C,D,F,I,W). Prerequisite: NURS 5204 and NURS 5334 and NURS 5316 or NURS 5220 and NURS 5110; NURS 5367 or concurrent enrollment or Certificate Program Standing.

NURS 5610. NEONATAL NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of neonatal advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: NURS 5447 and NURS 5450. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5640. ADULT GERONTOLOGY ACUTE CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of adult gerontology acute care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5640: NURS 5354 and NURS 5355. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5640: NURSC 5354 and NURSC 5355. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5645. ADULT GERONTOLOGY PRIMARY CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of adult gerontology primary care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5645: NURS 5352 and NURS 5353. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5645: NURSC 5352 and NURSC 5353. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5650. PSYCHIATRIC MENTAL HEALTH NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of family psychiatric mental health care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: NURS 5324 and NURS 5325. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5660. FAMILY NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of Family Primary Care Advanced Nursing Practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5660: NURS 5337 and NURS 5338. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSC 5660: NURSC 5337 and NURSC 5338. Good Academic Standing (GPA 3.0) or Certificate Program Standing. For NURSG: NURSG 5337 and NURSG 5338. Good Academic Standing (GPA 3.0) or Certificate Program Standing.

NURS 5670. INDEPENDENT STUDY IN NURSING. 6 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Prereq: Permission of instructor. Graded F,R,P,W.

NURS 5680. PEDIATRIC ACUTE CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of pediatric acute care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5680: NURS 5373 and NURS 5374. Good Academic Standing (GPA 3.0) or Certificate Program standing. For NURSC 5680: NURSC 5373 and NURSC 5374. Good Academic Standing (GPA 3.0) or Certificate Program standing.

NURS 5685. PEDIATRIC PRIMARY CARE NP ADVANCED PRACTICUM. 6 Hours.
Clinical preceptorships in selected health practice sites with opportunities to apply knowledge, skills and concepts in a guided, progressive context of pediatric primary care advanced nursing practice. The ratio of credit to clinical hours is 1:4. Prerequisite: For NURS 5685: NURS 5371 and NURS 5372. Good Academic Standing (GPA 3.0) or Certificate Program standing. For NURSC 5685: NURSC 5371 and NURSC 5372. Good Academic Standing (GPA 3.0) or Certificate Program standing.

NURS 5698. THESIS. 6 Hours.
Graded F, R, P.
NURS 6170. INDEPENDENT STUDY IN NURSING. 1 Hour.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, R, P.

NURS 6190. SPECIAL TOPICS IN NURSING. 1 Hour.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 6270. INDEPENDENT STUDY IN NURSING. 2 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, R, P.

NURS 6290. TOPICS IN NURSING. 2 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 6301. THEORETICAL EVOLUTION IN SCIENCE. 3 Hours.
Philosophies of science and epistemologies, their influence on knowledge development for nursing practice, and strategies for theory development and analysis. Prerequisite: Graduate standing.

NURS 6302. ISSUES IN STUDYING THE HEALTH OF CULTURALLY DIVERSE AND VULNERABLE POPULATIONS. 3 Hours.
Social and cultural factors affecting health among sub-populations defined by age, education, gender, ethnicity, culture, religion, occupation, vulnerability, income and geography. Prerequisite: Graduate Standing. DNP or PhD program.

NURS 6303. CULTURE OF SCIENCE. 3 Hours.
Professional, ethical, legal, financial, and socio-political issues associated with the conduct and dissemination of research. Prerequisite: Graduate standing.

NURS 6304. MEASUREMENT IN CULTURALLY DIVERSE AND VULNERABLE POPULATIONS. 3 Hours.
This course presents the process involved in identifying different sources of data and variables and the use of conceptual models to influence choice and measurement of variables. The course presents the processes for identifying different sources of variables, designing, testing and/or selecting instruments, methods and procedures for measuring variables in clinical, educational and research settings. Prerequisite: NURS 6301, Theoretical Evolution in Science, or permission of instructor. Course is predicated on prior learning related to concept analysis, basic statistics including correlation.

NURS 6305. QUALITATIVE RESEARCH. 3 Hours.
Philosophical foundation for and methodological issues in using qualitative approaches for scientific and knowledge development. Prerequisite: Graduate standing.

NURS 6306. RESEARCH DESIGN. 3 Hours.
Application of advanced nursing research methods to design studies that improve health outcomes in culturally diverse populations. Prerequisites: NURS 6304 or permission of instructor.

NURS 6307. POPULATION HEALTH. 3 Hours.
This course focuses on analyzing determinants of health, then designing health strategies to improve outcomes of populations. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B). 6327 if in DNP Program.

NURS 6308. STATE OF THE SCIENCE: BACKGROUND IN RESEARCH. 3 Hours.
Application of criteria for appraising strengths and weaknesses of published studies; Synthesis of research literature on a selected topic. Prerequisite: Graduate standing.

NURS 6311. MANUSCRIPT DEVELOPMENT FOR PUBLICATION. 3 Hours.
This course provides a frame for which students focus their prose in order to disseminate their work to a broad audience of clinical, education, or research oriented practitioners. This course allows participants to critique peers’ work to enhance their own skills as a peer reviewer, to enhance their career, and support other authors’ writing efforts. The participants will write and explore the differences between peer reviewing and editing by critiquing sample review comments. Prerequisite: Approval of instructor. Doctoral Graduate standing.

NURS 6318. PARAMETRIC STATISTICS FOR HEALTHCARE RESEARCH. 3 Hours.
This course provides basic knowledge and skills to select the appropriate biostatistical analysis for different research designs, analyze data, interpret statistical results, and understand research articles in professional journals. Emphasis will be placed on common research designs in health care research; analysis of variance (ANOVA), factorial ANOVA, ANCOVA, MANCOVA, simple linear regression, multiple linear regression, and power analysis. Proficiency in the use of a statistical software package as well as a power analysis software package will be achieved. Prerequisite: Graduate-level introductory statistics course.

NURS 6319. PSYCHOMETRIC AND NONPARAMETRIC STATISTICS FOR HEALTHCARE RESEARCH. 3 Hours.
This course provides basic knowledge and skills to select the appropriate biostatistical analysis for different research designs, analyze data, interpret statistical results, and understand research articles in professional journals. Emphasis will be placed on reliability and validity of instruments commonly used in healthcare; assumptions testing including non-normality; nonparametric statistics for dependent samples and independent samples; logistic regression; and survival analysis. Proficiency in the use of a statistical software package will be achieved. Prerequisite: Graduate-level introductory statistics course.

NURS 6320. LEADERSHIP IN HEALTH CARE SYSTEMS. 3 Hours.
This course focuses on the DNP nurse influencing health systems change at any level. Prerequisite: Doctoral Standing. Prerequisite or co-requisite with NURS 6327 if full time.
NURS 6322. TRANSLATIONAL RESEARCH. 3 Hours.
This course provides a review of core research concepts as a foundation for evidence appraisal and translation. New practice-based clinical inquiry methods and strategies are explored to promote translation science for application in the DNP role. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B). NURS 6327, NURS 6320.

NURS 6323. EVIDENCE APPRAISAL. 3 Hours.
In this course, students will use analytical methods to critically appraise existing research and literature to select and implement the best evidence for practice. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B). NURS 6327, NURS 6320, and NURS 6322.

NURS 6324. CLINICAL INFORMATION SYSTEMS. 3 Hours.
This course focuses on the selection, assessment, and use of information systems, technology, and data to evaluate and monitor outcomes of care, care systems, and quality improvement. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B) NURS 6327, NURS 6320.

NURS 6326. PROJECT PROPOSAL DEVELOPMENT. 3 Hours.
This course provides the student an opportunity to design an evidence-based process and intervention to improve practice and the practice environment. Prerequisite: Doctoral Standing. NURS 6327, NURS 6307, NURS 6382, NURS 6320, NURS 6322, NURS 6323, and NURS 6324.

NURS 6327. CLINICAL SCHOLARSHIP TO IMPROVE HEALTHCARE OUTCOMES. 3 Hours.
This course will develop clinical scholarship and analytical methods to improve healthcare outcomes. Prerequisite: Graduate Standing; Graduate Level Statistics (with minimum of a B).

NURS 6330. DATA SCIENCE AND POPULATION DATABASES. 3 Hours.
This course is designed to prepare students to analyze population-based health data including the theoretical framework behind the design and administration of such studies. The focus is on datasets containing health and behavioral variables. At the conclusion of this course, students will be prepared to produce descriptive and inferential statistics about a defined population using data collected using complex survey design. With the collaboration of the instructor, this course culminates in the development, analysis, and reporting of a research project conducted using a population health database. Prerequisite: NURS 6318, NURS 6319.

NURS 6331. DNP PRACTICUM I PRACTICE. 3 Hours.
During this course, students implement evidence-based solutions that influence health outcomes. Prerequisite: NURS 6307, NURS 6320, NURS 6321, NURS 6322, NURS 6323, NURS 6324, NURS 6326, NURS 6382. DNP status and good academic standing (GPA 3.0).

NURS 6333. DNP PRACTICUM II PRACTICE. 3 Hours.
This course is applicable for students who have passed 6326 Project Proposal Development without approval from the Graduate Nursing Review Committee regarding implementation of a DNP Project. In this course students have faculty supervision in creating a successful DNP Project Proposal. Upon completion, 180 Practicum hours will be applied to NURS 6620/6621 Practicums. Prerequisite: NURS 6326.

NURS 6370. INDEPENDENT STUDY IN NURSING. 3 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, R, P.

NURS 6381. RESEARCH PRACTICUM. 3 Hours.
With the active guidance and under the supervision of an active researcher, the student will complete at least 75 hours of research activities, such as designing studies, seeking IRB and organizational approvals, obtaining informed consent, collecting and analyzing data, conducting laboratory experiments, or disseminating findings. This is practical research experience in preparation for the student's dissertation in the PhD Program in Nursing. Prerequisite: Doctoral standing. By permission of Research Advisor.

NURS 6382. HEALTH CARE POLICY. 3 Hours.
Critique policies and processes to provide leadership in developing and implementing policies and/or regulations that influence institutional, local, state, federal, and/or international healthcare outcomes. Prerequisite: Doctoral Standing. Graduate Level Statistics (with minimum of a B). NURS 6327 if in DNP program.

NURS 6390. TOPICS IN NURSING. 3 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 6399. DISSERTATION. 3 Hours.
Graded F, R. Prerequisite: Admission to candidacy for the Doctor in Nursing degree.

NURS 6470. INDEPENDENT STUDY IN NURSING. 4 Hours.
Detailed in-depth study in a specific topic area. Topic and mode of study are agreed upon by student(s) and instructor prior to registration. May be repeated for credit when topics vary. Graded F, R, P.

NURS 6490. TOPICS IN NURSING. 4 Hours.
Selected topics in advanced nursing. May be repeated for credit as topics change.

NURS 6620. DNP PRACTICUM I. 6 Hours.
During this course, students implement evidence-based solutions that influence health outcomes. Prerequisite: NURS 6307, NURS 6320, NURS 6322, NURS 6323, NURS 6324, NURS 6326, NURS 6327, and NURS 6382. Good academic standing (GPA 3.0).

NURS 6621. DNP PRACTICUM II. 6 Hours.
During this course, students evaluate evidence-based solutions that influence health outcomes. Prerequisite: NURS 6620 and DNP status, Good academic standing (3.0).
NURS 6699. DISSERTATION. 6 Hours.
Graded F, R, P. Prerequisite: Admission to candidacy for the Doctor in Nursing degree.

NURS 6999. DISSERTATION. 9 Hours.
Graded F, R, P. Prerequisite: Admission to candidacy for the Doctor in Nursing degree.

NURS 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student’s degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Department of Graduate Nursing

MSN Programs (Nurse Practitioner, Nurse Educator, Nurse Administrator, Post Master's Certificate)

Our master's specialty degree prepares students for advanced practice, education and management and research endeavors to address a change in health care landscape. Both full-time and part-time study options are available as well as online and classroom-based programs.

ADMISSION REQUIREMENTS

The applicant for the Master of Science in Nursing (MSN) degree must meet the general requirements of Graduate Admissions.

The College of Nursing and Health Innovation admission criteria are detailed in the MSN Graduate Admission table below. The admission status options are described below.

Unconditional Admission

Applicants must meet all criteria for unconditional admission.

Probationary Admission

Criteria for probationary admission status and minimum GRE scores are listed in the MSN Graduate Admission table below. When admitted on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program. Probationary students are admitted for part-time study only.

Provisional Admission

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Deferred Status

Deferred decision is granted when a file is incomplete or when a denial decision is not appropriate.

Denial of Admission

An applicant will be denied admission if they have less than satisfactory performance on a majority of admission criteria listed in the MSN Admission Table.

MSN Graduate Admission Table (Nurse Practitioner, Nurse Educator, Nurse Administrator, Post Master's Certificate)

<table>
<thead>
<tr>
<th>Admission Criteria</th>
<th>Unconditional</th>
<th>Probationary</th>

<tr>
<td>Clinical Experience</td>
<td>1. Two years clinical experience as a Registered Nurse (RN) is required for the MSN in Psychiatric Mental Health NP specialty, Nursing Education, Nursing Administration and Nursing Health Informatics.</td>
<td>2. For all high-acuity MSN NP Programs, (Acute Care Pediatrics and Adult Gerontology Acute Care), two years clinical experience as an RN in an acute care setting within the previous five (5) years is required. (Evaluated by the Associate Dean and/or designee.)</td>
</tr>
</tbody>
</table>
3. For the Neonatal NP Program, two (2) years full time clinical experience as an RN in a Level III or IV NICU within the previous five (5) years and current employment (minimum of one shift per week) in a Level III or IV NICU. (Evaluated by the Associate Dean and/or designee).

4. For the MSN in Adult Gerontology Primary Care, Family and Primary Care Pediatrics, no experience is required.

5. International students are required to have two years RN clinical experience in a healthcare system in the United States (or equivalent).

6. Two years clinical experience as an RN in an acute care setting within the previous five (5) years is required for admission to the dual Adult Gerontology Acute and Primary Care Nurse Practitioner track.

7. Two years of clinical experience as a RN in an acute care setting within the previous five (5) years is required for admission to the dual Pediatric Acute and Primary Care Nurse Practitioner track.

Current and unencumbered RN License from Texas, a compact state, or other state board of nursing*

Neonatal Resuscitation Program (NRP) Required only for the Neonatal Nurse Practitioner Program.

Pediatric Advanced Life Support (PALS) Required only for the Acute Care Pediatric Nurse Practitioner Program; Neonatal NP applicants may complete the NRP (Neonatal Resuscitation Program).

BSN from ACEN or CCNE Accredited Program Evaluated by Associate Dean or designee

MSN from an Accredited Program For post-master's certificate students only. Evaluated by the Associate Dean or designee

Undergraduate Level Statistics Minimum grade of "C"

Cardiopulmonary Resuscitation Required for all programs.

---

1 Minimum undergraduate GPA requirement for unconditional admission is a 3.0 on a 4.0 scale as calculated by Graduate Admissions.

2 If a person does not meet probationary admission requirements, he or she may request review by a Committee of the Graduate Nursing Faculty. The Committee may request completion of coursework and/or additional information to support the individual's petition for admission.

3 If admitted on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program. Probationary students are admitted for part-time study only.

4 Verbal, Quantitative, and Analytical Writing GRE scores will be reviewed and the two highest scores will be considered for the admission process.

5 All graduate nursing students must have an unencumbered Registered Nursing License as designated by the Board of Nursing (BON) for clinical courses. It is imperative that any student whose license becomes encumbered by the BON must immediately notify their department chair. The complete policy regarding encumbered RN license is available on the Department of Graduate Nursing website (https://www.uta.edu/academics/schools-colleges/conhi/academics/grad-nursing/) under Clinical Requirements.

6 For applicants with an undergraduate GPA of 2.8-2.99 on the last 60 hours, but have completed a graduate level degree following the BSN, the GRE is not required.

7 If a student has master's level coursework, we will consider the information in the review of the applicant.

References or Letters of Recommendation are not required for admission into the MSN Program.

Admission Policy for Individuals Ineligible to Continue Graduate Study

Applicants who are on academic probation or who are ineligible to continue graduate study at another university are ineligible for admission. However, applicants may submit a petition to be reviewed by a Committee of the Graduate Nursing Faculty.

The committee will make a decision regarding admission based on the following:
a. GPA on the last 60 hours of BSN, graduate GPA, GRE scores (if applicable), and English language score (if applicable);  
b. Official transcripts from BSN and all universities attended following completion of BSN;  
c. A narrative statement from the potential student providing a rationale for their ineligibility in the previous program;  
d. A letter of reference from a graduate faculty in the previous program; and  
e. A plan for successful study at UT Arlington.

The admission committee reserves the right to ask for additional materials as needed. The committee will make its recommendation regarding admission to the Associate Dean or their designee of the Graduate Nursing Programs.

Post BACCALAUREATE Certificates

Applicants must meet the admission criteria for the MSN degree program in which they are applying and have a bachelor’s degree in nursing from a program accredited by the Accreditation Commission for Education in Nursing (ACEN) or the Commission on Collegiate Nursing Education (CCNE) or proof of equivalent education at a foreign institution.

POST MASTER’S CERTIFICATES

Applicants must meet the admission criteria for the MSN degree program in which they are applying and have a master’s degree in nursing from a program accredited by the Accreditation Commission for Education in Nursing (ACEN) or the Commission on Collegiate Nursing Education (CCNE) or proof of equivalent education at a foreign institution. Applicants applying for the Post Master’s Certificate in Administration may have coursework from an MBA program considered.

RN to MSN Program

The RN to MSN program will enable outstanding undergraduate students who are registered nurses to satisfy degree requirements leading to a master’s degree (MSN) in Nursing Administration, Nursing Education, or Family Nursing Practice while completing their undergraduate studies through the RN to BSN online program. The RN to MSN online program is designed to encourage outstanding registered nurses to complete a master’s degree at UT Arlington. It is also intended to decrease the cost of the combined degree and save time for students seeking the BSN and MSN degrees.

ADMISSION REQUIREMENTS

Registered nurses holding an associate’s degree in nursing may apply for the RN to MSN program. All applicants must meet the admission criteria prior to being accepted into the graduate program, including completion of all non-nursing courses required for the BSN with the exception of the 6 hours of electives.

The criteria for unconditional admission to the RN to MSN require that applicants meet the standards for graduate admissions as follows:

- Current licensure as a registered nurse (RN)
- Two-years of experience as an RN for the Nursing Administration and Nursing Education program. No RN experience is required for the Family Nurse Practitioner program
- Undergraduate prerequisite courses completed
- Admission GPA of 3.0 or higher

Students who are not admissible under the conditions specified above shall be denied admission to the Fast Track program. However, they may apply to the RN to BSN program via the regular application process, paying all required fees and meeting all admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the program to which application is made. Upon completion of the RN to BSN program, the graduate can apply for the master’s program in nursing through the regular application process and must meet all admission criteria.

DNP Program

The Doctor of Nursing Practice Program builds on a foundation of previous advanced practice education in nursing and prepares advanced practice nurse providers who demonstrate leadership, clinical expertise and innovation in problem recognition and resolution. The required courses identified for the DNP curriculum meet the American Association of Colleges of Nursing Essentials for Doctoral Education for Advanced Nursing Practice (AACN, August 2006). Our innovative DNP Program prepares clinical and research leaders to advance nursing and improve health care in our local community and around the world. This program is offered with two formats: accelerated online asynchronous and traditional semester online with synchronous online classes.

ADMISSION REQUIREMENTS

The applicant for the Doctor of Nursing Practice (DNP) degree must meet the general requirements of Graduate Admissions. Applicants with an MSN which prepares them for a role in advanced nursing practice as defined in The Doctor of Nursing Practice: Current Issues and Clarifying Recommendations paper, Published by AACN in 2015, are eligible for admission.

The UTA Doctor of Nursing Practice (DNP) Program is open to individuals who have completed their program at an institution accredited by the Commission on Collegiate Nursing Education (CCNE), Accreditation Commission for Education in Nursing (ACEN), National League for Nursing
Commission for Nursing Education accreditation (NLN-CNEA), or an equivalent accrediting body, including Board certified Advanced Practice Registered Nurses (APRN's), Nurse Practitioners (NP); Nurse Midwives (CNM); Certified Registered Nurse Anesthetist (CRNA); Clinical Nurse Specialists (CNS); and Nurse Administrators who completed a Master’s of Science in Nursing with a Nursing Administration specialty (MSN-ADM).

Master Nursing Education Degree is not eligible for the DNP program.

The DNP Program does not accept course transfers from other DNP programs. All required courses must be completed at UTA.

The College of Nursing and Health Innovation admission criteria are detailed in the DNP Graduate Admission Table below. The admission status options are described below.

Unconditional Admission
Applicants must meet all criteria for unconditional admission.

Probationary Admission
3.0 to 3.49 on a 4.0 scale

Provisional Admission
An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission.

Deferred Status
Deferred decision is granted when a file is incomplete or when a denial decision is not appropriate.

Denial of Admission
An applicant will be denied admission if they have less than satisfactory performance on a majority of admission criteria listed in the DNP Graduate Admission Table.

1. All DNP Program NP students must have an unencumbered APRN and RN license as designated by the Board of Nursing (BON) for clinical courses. It is imperative that any student whose license becomes encumbered by the BON must immediately notify the Associate Dean for the Graduate Nursing Programs. The complete policy regarding encumbered RN license is available online in the DNP student handbook ([https://cdn.web.uta.edu/-/media/project/website/corhi/documents/gnurs/dnp_student_handbook.ashx?revision=d9f21e70-71de-47d0-a24f-1c2220c8b766](https://cdn.web.uta.edu/-/media/project/website/corhi/documents/gnurs/dnp_student_handbook.ashx?revision=d9f21e70-71de-47d0-a24f-1c2220c8b766)).

2. GPA of 3.5 or higher in an earned master's degree in nursing (Master of Science, Master of Arts, Master of Science in Nursing) or a postmaster's Nurse Practitioner (NP) or Nursing Administration (Admin) Certificate from a program or school accredited by the National League for Nursing Accrediting Commission (NLNAC), the Commission on Collegiate Nursing Education (CCNE), or equivalent accrediting body.

**Admission Policy for Individuals Ineligible to Continue Graduate Study at Another University:**

If potential students are ineligible to continue graduate study at another university and apply to The University of Texas at Arlington DNP Program, they may request to be reviewed by an admission committee. The admissions committee will be composed of (at a minimum):

- Two representative faculty, and
- DNP Graduate Advisor

The Admissions Committee will make their recommendation for admission or denial based on the following:

- Admission materials (GPA on the Master in Nursing or Post-Master's certificate, grade of B or higher in graduate statistics, current vita, and English language score if applicable);

- A narrative statement from the potential student providing a rationale for their ineligibility at another university; and

- A plan for successful study at UT Arlington.

The committee reserves the right to ask for additional materials as needed. The admissions committee will make its recommendation of admission or denial to the Graduate Office for the University.

**PhD Program**

The Doctor of Philosophy in Nursing Program is built on a foundation of prior nursing education and prepares the student for original research and theory development. The PhD in Nursing Program is designed to prepare nurse scientists to meet the health needs of a rapidly changing and culturally diverse society. The central focus of the PhD in Nursing Program is to prepare researchers and teachers who understand how communities evolve, interact, and change and how they prescribe, understand, and sanction health, illness, and health seeking behaviors.

The PhD in Nursing Program offers two routes of entry: BSN-PhD or MSN-PhD. Potential students should refer to admission criteria below.
ADMISSION REQUIREMENTS

The applicant for the Doctor of Philosophy in Nursing (PhD) degree must meet the general requirements of Graduate Admissions and have a Bachelor’s degree in Nursing (BSN-PhD entry) or a Master of Science in Nursing degree (MSN-PhD entry) from a program accredited by the Accreditation Commission for Education in Nursing (ACEN) or the Commission on Collegiate Nursing Education (CCNE) or proof of equivalent education at a foreign institution. Applicants must submit to the Office of Graduate Admissions official transcripts from each college or university attended.

PhD Admission Status Options

The College of Nursing admission criteria are detailed in the PhD Program Requirements table below. The admission status options are described below.

Unconditional Admission

Applicants must meet all criteria for unconditional admission.

Probationary Admission

Criteria for probationary admission status are designated in the PhD Program Requirements table below. When on probation, a student must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.

Provisional Admission

Applicants who are unable to supply all required documentation prior to the admission deadline but who otherwise appear to meet admission requirements may be admitted provisionally.

Deferred Status

Deferred decision is granted when a file is incomplete or when a denied decision is not appropriate.

Denial of Admission

An applicant will be denied admission if he/she has less than satisfactory performance on a majority of admission criteria listed in the table below. The PhD Admissions Committee will make a recommendation for denial.

Evidence of current professional nursing licensure/registration in at least one political jurisdiction. Licensure/registration must be maintained throughout the program. If a PhD student is going to perform direct patient care activities or supervise students in clinical agencies, he or she will be required to obtain an RN license in Texas or a compact state. Evaluated by Associate Dean or designee

Two years of clinical experience recommended (BSN-PhD entry) Evaluated by Admissions Committee

Immunizations required by the College of Nursing. Evaluated by Associate Dean or designee

Criminal background check prior to clinical and research activities in health care agencies, which satisfies the Dallas/Fort Worth Hospital Council and the Texas Board of Nurse Examiners. Evaluated by Associate Dean or designee

Drug screen prior to clinical and research activities in health care agencies, which satisfies the Dallas/Fort Worth Hospital Council and the Texas Board of Nurse Examiners. Evaluated by Associate Dean or designee

1 A student on probation must maintain a 3.0 GPA in the first two semesters of enrollment in the graduate program.

2 A new goal statement and a new interview are required with every application.

Health Insurance Coverage

All UT Arlington nursing students enrolled in clinical course(s) will be required to provide verification of medical insurance coverage that includes Emergency Department evaluation and follow-up treatment for needle-stick and blood borne disease exposure. This mandatory clinical requirement has been authorized by The University of Texas System Board of Regents.

As such, UT Arlington will not cover initial and follow up treatment for needle-stick injuries and/or exposure to blood borne diseases which may occur while students are enrolled in clinical courses.

While the UT Arlington College of Nursing and Health Innovation recognizes the financial impact this clinical requirement presents for students, we also support the need for students to have health coverage for sudden illness, accidents, emergencies and exposure treatments that may occur in the clinical setting in a variety of clinical agencies.

Fees

Course fee information is available at www.uta.edu/fees. Additional costs beyond tuition, fees and books that may be incurred by a nursing student will include those items listed on the CONHI website. In addition, some clinical agencies charge a nominal fee for parking passes.

E-mail Accounts

Each student will be provided a UT Arlington e-mail address. Official communications from the College of Nursing will be distributed to this e-mail address and learning management system accounts required by many courses. Students will be held responsible for information distributed in this manner.

MSN Degree Requirements

A degree plan is developed for the student upon admission to the MSN Program. Students are required to have any changes in degree plan approved by a Graduate Academic Advisor prior to registration. A minimum of 36 semester hours, thesis or non-thesis option, is required for the degree. Elective coursework that supports the selected nursing study area must be approved by a Graduate Academic Advisor prior to registration. Students electing the thesis option do not have elective course requirements.

MSN students must complete hours in required courses, nursing specialty area, functional role, and elective(s) depending on specific plan.

**RN to MSN (p. 1073)**

Students who have successfully met the criteria for the RN-MSN undergraduate portion of the program, will be allowed to take two designated graduate courses that can be used to replace 6 hours of upper-division electives in the BSN program. The 6 hours of graduate courses will be counted toward both degrees.

Continuing in the RN to MSN program requires a 3.3 GPA on the three indicator courses. Students who make a 3.3 GPA in the indicator courses and maintain 3.0 each semester are eligible to take the graduate courses when the student is within 12 hours of completing BSN courses. The student completes a short form to indicate the desire to continue in the RN to MSN program and take the graduate courses. There is no need to apply for graduate admission; the graduate application fee and essay are not required. The hours required for them to complete their BSN degree will be adjusted to include the two MSN courses that are replacing upper division electives.

When students complete their undergraduate degree requirements, they may apply for conferral of the BSN degree, while continuing in the RN to MSN program. They will subject to the usual fees for graduation and diplomas. When the student has applied for conferral of his/her undergraduate degree, the responsibility for advising the student will be transferred to a graduate advisor within the College.

**Dual Degree Programs**

**Nurse Practitioner Dual Adult Gerontology Acute and Primary Care Program**

The Adult Gerontology Dual Nurse Practitioner Program prepares students to the acute and primary care nurse practitioner roles. This program provides one with an expanded scope of practice and upon graduation students are eligible for national certification and licensure in both roles.

Applicants must meet the admission criteria for the Master of Science in Nursing, including a minimum of 2 years of RN experience, within the last 5 years, in an acute care setting. Students may not transfer into this program without having the required RN experience.

**Total Hours**: 45

**Electives/Independent Study**

Elective courses may be taken in Nursing or other departments of the University. Electives can also be transferred from other universities with the approval of a Graduate Advisor. Independent study offers the student the opportunity to explore topics of special interest.

**DNP Degree Requirements**

A degree plan is developed for the student upon admission to the DNP Program. Students are required to have any changes in planned program approved by the DNP Graduate Advisor prior to registration. The DNP Program includes 36 semester hours of required courses. Students will complete a Scholarly Project and Clinical Practica.

**DNP Required courses**

**Total Hours**: 36

**DNP Project Proposal:**

This applies to students who have passed NURS 6326. To ensure timely completion of the degree program, a student unable to implement their planned project will be enrolled in DNP Practicum 6331 to have faculty supervision for developing a new project proposal. Students will be able to start earning practicum hours up to a maximum of 180 hours and will complete a project proposal to be implemented in NURS 6620. It is the student’s responsibility to notify the DNP program director and Academic Adviser if they have lost their job or otherwise are unable to complete the project at their work site.

**PhD Degree Requirements**

Students are required to have each semester’s planned program approved by the Graduate Advisor prior to registration. A minimum of 45 semester hours is required for the degree.

BSN-to-PhD Students will complete all PhD requirements.

**ACADEMIC STANDING**

To graduate from the PhD program, the student must have a 3.0 GPA.

a. Student who does not earn at least a B in a course or independent study is required to submit to graduate advisor an evaluation of his or her engagement in the course, reason for less than satisfactory performance, and plan to acquire knowledge and skills to continue.

b. Student who earns a second course or independent study grade that is C or lower will be dismissed from the program

**PROGRAM MILESTONES**

**Diagnostic Evaluation**

Before the completion of the first 18 hours beyond appropriate master’s level coursework to assess progress and potential for completion

**Comprehensive Examination**

Examination scheduled no earlier than during the last nine hours of coursework. It may also be scheduled after all coursework and research tools are completed. Guidelines for the comprehensive examination are available in the PhD Student Handbook.

**Proposal Defense**

Dissertation Committee reviews the study proposal and meets with the student privately to approve or not approve the proposal.

**Dissertation Defense**

Open meeting during which student presents study findings and responds to questions posed by the dissertation committee and other attendees. Successful defense of the dissertation is the final step toward completion of the doctoral degree.
BSN-to-PhD Master’s Level Courses

Students accepted into the BSN-to-PhD entry option will work with an advisor to develop individualized degree plans based on their career goals and research interests. Students will complete 12 hours of core master’s courses and an additional 10-18 hours of master’s coursework based on their area of focus.

10-18 additional hours of Master’s coursework in focus area

Total Hours 12

Post-Master’s Certificate Requirements

Post-Master’s Certificate applicants must meet the admission criteria for the MSN degree program in which they are applying and must complete the required courses for the nursing specialty area and functional role.

POST-MASTER’S NURSING ADMINISTRATION CERTIFICATE

Post-Master’s Certificate applicants must complete the required courses included in the Master of Nursing Administration graduate degree program. The Post Master’s Nursing Administration Certificate enables individuals with a master’s degree in Nursing to advance in professional roles of nursing administration as well as provide a pathway toward doctoral programs in nursing practice.

The MSN Administration core courses may be taken in the Accelerated Online format only, or an equivalency course with credit hours transferred to UTA. Required courses will be determined by a Gap Analysis completed by the program director.

POST-MASTER’S NURSE PRACTITIONER CERTIFICATE

The nurse practitioner certificate enables individuals with a Master’s Degree in Nursing to take a national certification exam in their area of specialization and to be recognized by the Board of Nursing as an Advanced Practice Registered Nurse. Required courses will be determined by a Gap Analysis completed by the program director.

Department of Undergraduate Nursing

Bachelor of Science in Nursing (BSN)

The undergraduate nursing degree consists of two programs: Prelicensure BSN and post-licensure RN to BSN or RN to MSN. We offer two delivery options: traditional **Campus-based (CB) Program and Accelerated Online (AO) Program**. The Accelerated Online Program (AO BSN and AO RN-BSN) is an online format developed by UT Arlington's College of Nursing and Health Innovation to serve nurses in Texas and beyond by offering high quality, affordable, and convenient nursing programs. AO outside of Texas is for the RN to BSN or RN to MSN students only. As there are some differences in policies between the programs, there may also be differences between the **CB program** and the **AO Program**; those will be noted throughout the catalog.

The faculty of the College of Nursing and Health Innovation takes academic honesty and ethical behavior very seriously. Nurses are entrusted with the health, safety, and well-being of the public. Students found guilty of academic dishonesty will be punished to the full extent permitted by the rules and regulations of UT Arlington.

**BSN PRELICENSURE PROGRAM**

This is a program consisting of nursing courses, university core courses and other required prerequisite courses. Upon successful completion of the program, the student is awarded the Bachelor of Science in Nursing degree and is eligible to take the National Council Licensure Examination (NCLEX) for licensure as a Registered Nurse. The BSN Prelicensure program is a competitive admission, limited-access program offered as a campus-based or accelerated online option.

**RN TO BSN PROGRAM**

This program is designed for Registered Nurses who have completed an accredited Associate Degree or Diploma nursing program. Full-time students may complete the Upper-Division nursing courses in one academic year. Upon successful completion of the program, the student is awarded the Bachelor of Science in Nursing degree. This program is not limited-access and is offered as a campus-based or accelerated online option.

**RN TO MSN PROGRAM (NURSING ADMINISTRATION, NURSING EDUCATION OR NURSE PRACTITIONER)**

The RN to MSN program is an option for RNs who want to move seamlessly between the RN to BSN program and the MSN program. The university calls this a Fast-Track program. The Fast-Track RN to MSN program will enable outstanding undergraduate students who are registered nurses to satisfy degree requirements leading to a Bachelor of Science in Nursing (BSN) and master's degree (MSN) in Nursing Administration, Nursing Education or Nurse Practitioner.

**UNDERGRADUATE OUTCOMES - FOR THE BSN DEGREE**

The University of Texas at Arlington Undergraduate Nursing Program leading to the Bachelor of Science in Nursing prepares graduates to provide professional nursing care to persons/clients (individuals, families, groups, and communities) in diverse settings through the roles of provider of care, coordinator of care, and member of the profession.

On completion of the BSN degree, the graduate will be able to:

- Apply the art and science of nursing using current evidence in the delivery of competent, culturally sensitive, developmentally appropriate holistic care.
- Utilize analytical, systematic, and critical reasoning for clinical judgment and nursing decision-making.
- Demonstrate accountability and responsibility for: optimal nursing care, legal and ethical standards, lifelong learning, professional development, promoting the nursing profession, and participating as a citizen in society.
- Collaborate and communicate respectfully and effectively with persons/clients and interdisciplinary teams using oral, nonverbal, written and electronic communication to promote and maintain optimal health outcomes to persons/clients.
- Demonstrate ethical behaviors and conflict management skills that inspire others and create effective working relationships to shape and implement change.
- Coordinate human and material resources in providing comprehensive, efficient, and cost-effective care to persons/clients.
- Articulate the importance of active and intentional life-long learning that includes self-reflection and awareness.
- Utilize standards of practice to provide safe nursing care in all patient care settings with an awareness of one's role in preventing errors and promoting quality improvement.
- Access and utilize information and computer sciences to perform nursing functions.
BSN Prelicensure Program

CORE PERFORMANCE STANDARDS FOR ADMISSION AND PROGRESSION IN BSN PRELICENSURE PROGRAM

It is the philosophy of the University of Texas at Arlington College of Nursing and Health Innovation that the Undergraduate Nursing Program is designed to prepare a competent, self-directed, general practitioner of nursing who can assume increasing responsibility and leadership in the delivery of nursing care. In consideration of the preparation of a general practitioner, all individuals who apply for admission and are enrolled in the BSN Prelicensure Program must be able to perform the essential functions of a student of nursing.

The College of Nursing and Health Innovation has identified essential nursing skills: communication, cognitive, motor, and sensory, observation, tactile, hearing, smell, psychomotor and ethical and professional integrity. The student enrolled in the program must demonstrate mastery of these components. Because providing direct patient care is physically demanding, students need to meet the physical requirements of a staff nurse in the same setting in which they are completing a clinical rotation. Upon BSN program acceptance, students must attest to their ability to meet these standards with or without an accommodation. If at that time a student requests an accommodation, the Student Access & Resource Center (SARC) and the CONHI must determine if the accommodation is reasonable PRIOR to the student beginning Upper-Division coursework.

If a student requires an accommodation to meet these standards, the student must initiate the review process with SARC within five (5) business days of being accepted to prevent a delay in the start of the program.

Qualified applicants are admitted without discrimination with regard to race, color, national origin or ancestry, gender, age, religion, sexual orientation, veteran status, or disability (reasonable accommodations will be made within the Americans with Disabilities Act guidelines).

More detailed information related to the core performance standards is available in the Undergraduate Nursing Program Policy Library (https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/bsn_student_handbook.ashx?revision=5a3d6773-b0aa-4557-bc77-1e795e79fbd).

ADMISSION REQUIREMENTS

Students may be admitted to UT Arlington upon meeting the admission requirements established by the University. Official transcripts must be submitted to the UT Arlington Office of Admissions.

The BSN Prelicensure program is a competitive admission program; students interested in admission to the BSN Prelicensure program will be placed in the Nursing and Health program—an exploratory health professions program designed to prepare students for application to the Undergraduate Nursing Program (BSN Nursing) or admission the Public Health Program (BS Public Health). Nursing and Health students will be advised by the CONHI Office of Enrollment and Student Services.

NOTE: All freshmen are advised by the University Advising Center. A designated CONHI advisor will advise students in the Freshman Nursing Scholars Program.

Students applying for admission to the BSN Prelicensure Program leading to the degree of Bachelor of Science in Nursing must:

- Submit a BSN Prelicensure application and official transcripts by January 15 for following fall semester or June 1 for following spring semester.
- Complete with a C or better all specified nursing preparatory courses in the Nursing and Health curriculum (NURS 2300 (https://catalog.uta.edu/search/?P=NURS%202300) Introduction to Professional and Clinical Concepts in Nursing or NURS 2200 (https://catalog.uta.edu/search/?P=NURS%202200) Concepts in Professional Nursing; NURS 3366 (https://catalog.uta.edu/search/?P=NURS%203366) Pathophysiology: Implications for Nursing, and NURS 3365 (https://catalog.uta.edu/search/?P=NURS%203365) Pharmacology in Nursing Practice) prior to starting Junior I nursing courses. (See Nursing and Health curriculum for details.) Both NURS 3365 (https://catalog.uta.edu/search/?P=NURS%203365) and NURS 3366 (https://catalog.uta.edu/search/?P=NURS%203366) must be taken within 3 years of starting the nursing program.
- Complete all 4 Natural Sciences.
- Have two GPAs calculated: science and overall prerequisite.
- Have minimum science and prerequisite GPAs of 2.75.
- Completion of designated sections of the Test of Essential Academic Skills (TEAS) with a score in the proficient range (58.7 - 77.3) for each of the following sections:
  - Reading
  - Math
  - Science
  - English and Language Usages

Admission to the BSN Prelicensure program is by ranking order based on space availability. A student who accepts their spot but decides not to start will get 2 (two) times to do this before they must wait 1 year (two application cycles) to reapply.

Additional consideration will be given to applicants who complete the following by the application deadline:
• Thirty (30) or more required prerequisite lower division credit hours earned at UT Arlington
• Twelve (12) or more required prerequisite lower-division natural science credit hours earned at UT Arlington.
• Nine (9) hours of UT Arlington ROTC courses (Must be active in ROTC) (Campus-based only)
• Previous baccalaureate, masters or doctorate degree earned in the United States or international degree approved by UTA Office of Admissions.
• Veteran, including Reservist and National Guard
• First-time full-time freshman if all four Natural Sciences and all three (3) identified Nursing preparatory courses in the Nursing and Health curriculum are completed at UTA. UNIV-NU 1131 (https://catalog.uta.edu/search/?P=UNIV-NU%201131) Student Success, NURS 2300 (https://catalog.uta.edu/search/?P=NURS%202300) Intro to Professional Nursing/NURS 2200 (https://catalog.uta.edu/search/?P=NURS%202200) Concepts in Professional Nursing, and NURS 3366 (https://catalog.uta.edu/search/?P=NURS%203366) Pathophysiologic Processes: Implication for Nursing must be completed by application deadline. NURS 3365 (https://catalog.uta.edu/search/?P=NURS%203365) Pharmacology in Nursing Practice must be completed in the semester following the application.
• Students who have completed both non-expired Pathophysiology (NURS 3366) and Pharmacology (NURS 3365) courses on their first attempt with earned grades of B or higher by the application deadline will receive two additional considerations.
• Students who have successfully completed either non-expired Pathophysiology (NURS 3366) or Pharmacology (NURS 3365) on the first attempt with an earned grade of B or higher by the application deadline will receive an additional consideration.

NOTE: Students entering the AO BSN program must complete the full Nursing and Health curriculum including the upper-division elective prior to beginning the program. Priority will be given to AO applicants employed by partner hospital systems offering clinical sites during that semester of admission. Partner hospital clinical sites vary each semester. To receive AO priority, an applicant must be employed at the time of application through the first day of class. For consideration, applicants must submit documentation of employment at time of application. Employment at a partner hospital is not a guarantee of admission into the BSN Program.

LOWER-DIVISION COURSES IN NURSING AND HEALTH PROGRAM

Students must successfully complete the full Nursing and Health curriculum as noted in the plan of study. Specific courses are subject to the Two Attempt and Grade Improvement policies. Under the Two-Attempt Policy each course taken at UT Arlington and/or any other approved institution may be attempted a maximum of two times to earn a passing grade. By the second attempt a grade of "C" or better must be earned.

• Withdrawals (W) are exempt from this policy.
• Any non-passing grade is valid for a three-year period. At the conclusion of three years, a non-passing grade is no longer considered an attempt.

The Grade Improvement Policy is unique to the BSN Prelicensure program and is used for the selection process only. This policy differs from the BSN Prelicensure program's Two Attempt Policy and from the University’s Grade Replacement, Exclusion, and Forgiveness policies. Grades of C or above may be replaced to improve GPAs for the selection process with the following limitations:

• A limit of four courses may be retaken. The identified Nursing preparatory courses are not eligible for the Grade Improvement Policy.
• All earned grades of C or higher are valid indefinitely.
• The first four courses retaken are the grades used in the selection process. Any courses retaken thereafter are not used in the selection process.
• The higher of the two grades is used in the selection process.
• Withdrawals (W) are exempt from this policy.
• Repeated courses are subject to financial aid restrictions.

UPPER-DIVISION COURSES IN NURSING AND HEALTH PROGRAM

Upper-division Nursing preparatory courses include NURS 3366 (https://catalog.uta.edu/search/?P=NURS%203366) Pathophysiologic Processes: Implication for Nursing, and NURS 3365 (https://catalog.uta.edu/search/?P=NURS%203365) Pharmacology in Nursing Practice and are subject to the Failure of Nursing Preparatory Course Policy.

One failed grade = probationary status with the BSN Prelicensure program indefinitely

Conditions of Probationary Status

• A student who earned a failed grade (D or F) in the term prior to BSN application deadline must re-take the course, pass with a C or better, and have not violated the UT Arlington or College policies to be considered a viable applicant.
• A student who earned a failed grade (D or F) in the term directly following the BSN application deadline may not start the program, even if the course is retaken and passed during the subsequent term. A student is eligible to re-apply for the following application period; however, the failed grade will be used in the selection process.

Two failed grades = inability to continue with BSN Prelicensure program for a period of three years. Upon return, a student is eligible to apply under the conditions of the BSN Prelicensure program Re-entry policy.

• Re-entry policy refers to a student who is ineligible to continue a BSN Prelicensure program due to academic failure. This includes a student who was accepted into a prelicensure program and has not completed an Associate Degree in Nursing (ADN) or Bachelor of Science in Nursing
(BSN) program. During this three-year timeframe, a student may not enroll in the University as a BSN Prelicensure student or apply to the BSN Prelicensure program from another major for three years.

**Conditions of Re-entry**

- A student must provide a letter from previous nursing school stating program dismissal was for academic reasons.
- Must meet the eligibility requirements of the application requirements and submit a new application by the desired start date application deadline.
- Pathophysiologic Processes: Implication for Nursing, and Pharmacology in Nursing Practice must be re-taken.

**Criteria For Readmission of Undergraduate Nursing Students**

Students who withdraw from the UT Arlington BSN Prelicensure program for more than one semester in good standing who wish to return to complete the program must submit a written request for readmission to the Office of Enrollment and Student Services by the following deadlines:

- Returning spring – September 1st
- Returning summer - March 1st
- Returning fall - June 1st

- Readmission is dependent upon space availability.
- A student is eligible for readmission to the program only once.
- If a clinical course is to be repeated, the student must repeat both the theory and clinical components of the course.
- Student must repeat the drug screening process.

**Time out of the Program:**

**One semester:**

- All of requirements listed above plus:
- Completion of a clinical skills assessment. This assessment will be completed no later than three weeks prior to the start of the semester in which the student is planning to return. The assessment will focus on the skills associated with the last clinical course completed. Input related to skills to be assessed may be sought from faculty in the previous course(s) completed. Should clinical deficiencies be identified, faculty will remediate clinical skill areas that are questionable or inadequate and provide the results to the lead teacher of the course the student is scheduled to enter. Failing to demonstrate adequate clinical skills after three attempts will result in the student being required to retake the last clinical course taken to re-establish clinical competency.
- If the student is in the AO BSN program, he/she will be required to come to the UT Arlington campus to complete the special skills assessment.

**Two Long Semesters CB or Two Semesters AO (based on course availability):**

- All of requirements listed above plus:
- Repeat criminal background check.

**More than two long semesters CB or Two Semesters AO:**

- Not eligible for readmission. Student must apply for admission as a beginning student.

**TRANSFER FROM ANOTHER NURSING PROGRAM**

Transfer students who have successfully completed prerequisite courses with a C or above and Junior I courses for the BSN Program: Holistic Health Assessment and Clinical Nursing Foundations at another college or university may be eligible to apply to the BSN Prelicensure program. Students who have not completed the required courses will be ranked with the incoming junior class. Admission as a transfer student to the Undergraduate Nursing Program is contingent upon available space. Transfer students must attend orientation. Transfer students ready to start as a Junior 2 can be admitted in either the CB or AO programs.

- Transfer students must transfer all nursing courses and the grade received from those courses.
- No Ds or Fs in nursing courses.

Students must:

- Meet minimum requirements as stated in the published admission requirements.
- Submit a course syllabus and a content outline of the course(s) to the Office of Enrollment and Student Services. If the course is a clinical course, a list of nursing skills learned in the course(s) must also be submitted.
The lead teacher in the course, using the Field of Study Criteria Guidelines and other criteria related to the course, will review courses provided by the student for substitution of UT Arlington courses. Faculty may request additional information to clarify their decision. The course is then accepted as a substitution for a core nursing course, as an elective, or denied.

- Submit a letter from previous school stating that the student is in good standing.
- Meet minimum 2.75 GPA in the prerequisite natural science and prerequisite lower-division courses.
- Meet application deadlines of:
  - March 1 - Fall Semester
  - September 1 - Spring Semester

Processing of the transfer admission review will not be initiated until the student has also applied to the BSN Prelicensure program in the College of Nursing and Health Innovation.

**ORIENTATIONS**

All students are required to complete the general online orientation in the Learning Management System and attend the mandatory in-person orientation held prior to the fall and spring semesters.

Clinical orientation is mandatory for all Undergraduate Nursing students, as established by the Dallas/Fort Worth Hospital Council. Undergraduate Nursing students are required to complete the Standard Hospital Student Orientation annually. Clinical requirements must be valid through the entire semester. If the annual orientation will expire during the current semester, it must be updated.

**SPECIAL PARAPHERNALIA/EQUIPMENT REQUIREMENTS**

All students enrolled in the CONHI must have internet access and a laptop computer meeting minimum computing recommendations. A list of computer specifications is outlined on the CONHI website, [https://www.uta.edu/conhi/](https://www.uta.edu/conhi/). Students may be asked to purchase and download software to meet course and/or program requirements.

Smart Phone or similar device highly recommended.

**IMMUNIZATIONS**

The UT Arlington CONHI standards require that all students in the BSN Prelicensure program complete immunizations by the time of acceptance.

Students are encouraged to start the immunization process one year before applying to the BSN Prelicensure program.

Program eligibility is dependent upon valid documentation submitted and approved at the time of program acceptance.

View the website ([https://www.uta.edu/academics/schools-colleges/conhi/academics/undergrad-programs/imm-prelic/](https://www.uta.edu/academics/schools-colleges/conhi/academics/undergrad-programs/imm-prelic/)) for more information on the vaccines, titers and valid documentation options.

If you know you will be applying to our BSN Prelicensure program within the next year, you will need to start these now because some will take up to 6 months to complete.

To be eligible to start the program, you will need to submit valid documentation that you have completed the following by Friday of the 2nd full week in March for Fall starts or Friday of the 2nd full week in September for Spring starts.

**CERTIFICATION-CARDIOPULMONARY RESUSCITATION**

Undergraduate nursing students are required to obtain American Heart Association Basic Life Support (BLSC) CPR for Healthcare Providers.

Evidence of current CPR certification is required during clinical course enrollment from admission to graduation. Certification must be valid throughout an entire semester with a clinical. If the current card will expire during the semester, the student must retake the course and have a card that will not expire during the semester.

**HEALTH INSURANCE COVERAGE**

All UT Arlington nursing students enrolled in clinical course(s) will be required to provide verification of medical insurance coverage that includes Emergency Department evaluation and follow-up treatment for needle-stick and blood borne disease exposure. This mandatory clinical requirement has been authorized by The University of Texas System Board of Regents.
As such, UT Arlington will not cover initial and/or follow up treatment for needle-stick injuries and/or exposure to blood borne diseases which may occur while students are enrolled in clinical courses.

While the UT Arlington CONHI recognizes the financial impact this clinical requirement presents for students, we also support the need for students to have health coverage for sudden illness, accidents, emergencies, and exposure treatments that may occur in the clinical setting in a variety of clinical agencies.

**DRUG SCREEN POLICY**

All students accepted to the BSN Prelicensure AO or CB programs will complete a drug screen.

At any time if there is a confirmation of a positive drug screening, the student will be removed from clinical courses for a period of one calendar year. Upon returning to the program, random drug screenings will be conducted throughout the program. A second positive test will result in immediate dismissal from the nursing program.

Random and/or for cause drug screens are at the student’s expense and must be completed as required. Failure/refusal to undergo a drug screen on the designated day will result in immediate dismissal from the nursing program. Full Policy ([https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/consubstanceabusepolicyandprocedure.ashx?revision=ac30e000-f708-407a-a6ff-99e006d04491](https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/consubstanceabusepolicyandprocedure.ashx?revision=ac30e000-f708-407a-a6ff-99e006d04491))

**CRIMINAL BACKGROUND SCREEN**

Accepted students complete two criminal background checks (CBC): Texas Board of Nursing (BON) and a 3rd party provider as designated by CONHI.

Students accepted into the BSN Prelicensure program must complete the Texas BON CBC prior to program application. Students who have completed NURS 2300, Introduction to Professional Nursing/NURS 2200 Concepts in Professional Nursing or are currently enrolled in NURS 2300/NURS 2200, should submit their BON CBC during that course. Students, who have not taken NURS 2300/NURS 2200 by the application deadline, should contact CONHladmin@uta.edu, provide the necessary information, give permission to send the information to the BON, and schedule the fingerprinting appointment within one month of the application deadline. Full Policy ([https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/cbcdeclaratoryorderpolicyguidelines.ashx?revision=078fd965-bd24-486e-a567-5a3ff9af61d3](https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/cbcdeclaratoryorderpolicyguidelines.ashx?revision=078fd965-bd24-486e-a567-5a3ff9af61d3))

The second CBC is completed after program acceptance.

A student with a positive criminal background screen will not be admitted into the BSN Prelicensure program without a Declaratory Order from the Texas Board of Nursing stating that the individual has been granted permission to sit for the National Council Licensure Examination for Registered Nurses (NCLEX-RN Examination) upon completion of the requirements for graduation and payment of any required fees. Eligibility to take the NCLEX-RN Examination may be affected by any inaccuracies in the petition, and any subsequent violations of the Nursing Practice Act that may affect eligibility to sit for the examination or the later revocation of a license obtained through misrepresentation.

**ELIGIBILITY TO WRITE THE NATIONAL COUNCIL LICENSURE EXAMINATION FOR REGISTERED NURSES (NCLEX RN) - DECLARATORY ORDERS**

The Texas Board of Nursing (BON) has set out guidelines and criteria on the eligibility of persons with criminal convictions to obtain a license as a registered nurse. The BON may refuse to admit persons to its licensure examinations, may refuse to issue a license or certificate of registration, or may refuse to issue a temporary permit to any individual who has any criminal offense. Detailed information related to determining eligibility and required processes to determine eligibility for your specific circumstances is available from the Texas Board of Nursing and on their Web site ([www.bon.state.tx.us](http://www.bon.state.tx.us/)). Students who are unable to obtain clearance from the BON will not be allowed to begin the nursing program.

Once admitted to the BSN Prelicensure program, any student that commits an offense that would require a Declaratory Order will be removed from current and future clinical courses until the Declaratory Order is obtained from the Texas BON and submitted to the College of Nursing and Health Innovation Director of Student Support.

**Professional Liability Insurance**

Students in the BSN Prelicensure program are required to have evidence of professional liability insurance coverage for a minimum of $1,000,000 limit each claim and $3,000,000 limit aggregate. The charge for coverage will be assessed as a mandatory fee at the time of registration.

**FEES**

Course fee information is available at [www.uta.edu/fees](http://www.uta.edu/fees/). Additional costs beyond tuition, fees and books that may be incurred by a nursing student will include those items listed on the CONHI website. In addition, some clinical agencies charge a nominal fee for parking passes and utilizing their scrubs.
ORAL COMMUNICATION PROFICIENCY REQUIREMENT

Oral proficiency is recognized to be a critical component of providing safe nursing care. In addition to content-specific presentations in various nursing courses, all students in the Undergraduate Nursing program are required to communicate effectively with clients, members of the health care team, and faculty. Contact the Associate Chair of Undergraduate Programs for more information.

E-MAIL ACCOUNTS

Each student will be provided a UT Arlington e-mail address. Official communications from the CONHI will be distributed to this e-mail address and Learning Management System accounts required by many courses. Students will be held responsible for information distributed in this manner.

NURSING COURSE WITHDRAWAL POLICY

Students within the BSN Prelicensure program, enrolled in nursing courses are permitted to drop the course one time. Enrolling (on or after the census date) in a course for a second time is considered an attempt. The grade earned on the second attempt is retained. All drops including academic and non-academic drops are also considered an attempt. Compassionate withdrawals and withdrawal exceptions will be reviewed on an individual basis by Undergraduate Nursing Appeals Committee.

Students may drop no more than three upper-division NURS courses during their undergraduate career. Students may drop no more than three upper-division NURS courses during their undergraduate career. All drops for academic and non-academic reasons are considered. Drops due to corequisite and prerequisite violations are also counted in this policy.

Students are required to meet with their academic advisor before dropping/withdrawing. All drops are finalized by the BSN Academic Advisors. Exceptions to this policy may be entertained because of extraordinary non-academic circumstances by Undergraduate Nursing leadership.

Elective and nursing preparatory courses are exempt from this policy.

MOVEMENT BETWEEN PROGRAMS

Movement between the AO and CB BSN Prelicensure programs is at the discretion of program administration. Students will be required to sign a Program Transfer Agreement.

PRELICENSURE BSN STUDENTS WHO DROP OR FAIL A COURSE

Prelicensure BSN students who withdraw or fail a course can repeat the course the next available time the course is offered.

AO Students:

- Students who seek readmission after failing or withdrawing for any reason must meet with an academic advisor to discuss clinical and course options.
- If no seats are available, the student will be delayed until a seat is available at a future admission date. See the student handbook (https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/bsn_student_handbook.ashx?revision=5a3d6773-b0aa-4557-bc77-1e795e79ffbd) for full policy.

*If there are more students than seats available, the students will be placed in the order in which they request the move (first come, first placed).

CLINICAL COURSES

To pass a clinical course, the student must pass both the didactic and the clinical components of that course. Clinical attendance expectations, Clinical Performance Requirements and Evidence of Clinical Competence information can be found in the Undergraduate Student Handbook (https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/bsn_student_handbook.ashx?revision=5a3d6773-b0aa-4557-bc77-1e795e79ffbd).

CLINICAL ATTENDANCE DURING SCHEDULED UNIVERSITY CLOSINGS

Some programs in the CONHI, such as the AO BSN Program, may require students to attend clinical on evenings, nights, weekends, or holidays. Students are expected to attend their assigned clinical rotation as scheduled, even when the University is otherwise scheduled for closure, i.e., Spring Break.

PROGRESSION IN THE UNDERGRADUATE NURSING PROGRAM

Students in the Prelicensure BSN Program will not be permitted to continue in the program nor to enroll for additional courses if they:

- receive a grade of D or F in more than one required Nursing or Nursing preparatory course, or
- receive any combination of grades of D or F on two attempts of the same course
- score less than 70% on weighted exam or assignment average
- do not meet requirements of the Comprehensive Assessment and Preparation Program (https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/capp_procedure.ashx?revision=e4109778-d947-4aa9-8960-9cd81d306706)
- do not achieve minimum score requirements on Medication Administration Competency Assessment (p. )
• receive a Clinical Failure (more information in the BSN Handbook (https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/bsn_student_handbook.ashx?revision=5a3d6773-b0aa-4557-bc77-1e795e79fbd))

If a student fails a course, they must take NURS2232 if they have not already taken it.

HONORS DEGREE IN NURSING

Nursing students who wish to graduate with an Honors Degree in Nursing must be members of the Honors College in good standing. Students must complete the Nursing degree requirements and the requirements of the Honors College. Contact the College of Nursing and Health Innovation Honors Coordinator for further information. Due to the accelerated nature of the AO program the Honors Degree is limited to students in the Campus-based program.

RN to BSN Program

CORE PERFORMANCE STANDARDS FOR ADMISSION AND PROGRESSION IN THE RN TO BSN PROGRAM

It is the philosophy of the University of Texas at Arlington College of Nursing and Health Innovation (CONHI) that the baccalaureate program is designed to prepare a competent, self-directed, general practitioner of nursing who can assume increasing responsibility and leadership in the delivery of nursing care. In consideration of the preparation of a general practitioner, all individuals who apply for admission and are enrolled in the undergraduate program must be able to perform the essential functions of a student of nursing.

The CONHI has identified essential nursing skills: communication, cognitive, motor, and sensory, observation, tactile, hearing, smell, psychomotor and ethical and professional integrity. The student enrolled in the Undergraduate Nursing program must demonstrate mastery of these components. Because providing direct patient care is physically demanding, students need to meet the physical requirements of a staff nurse in the same setting in which they are completing a clinical rotation. Upon BSN program acceptance, students must attest to their ability to meet these standards with or without an accommodation. If at that time a student requests an accommodation, the Student Access & Resource Center (SARC) and the CONHI must determine if the accommodation is reasonable PRIOR to the student beginning Upper-Division coursework.

If a student requires an accommodation to meet these standards, the student must initiate the review process with SARC within five (5) business days of being accepted to prevent a delay in the start of the program.

Qualified applicants are admitted without discrimination with regard to race, color, national origin or ancestry, gender, age, religion, sexual orientation, veteran status, or disability (reasonable accommodations will be made within the Americans with Disabilities Act guidelines).

More detailed information is available in the UG Nursing Policy Library (https://cdn.web.uta.edu/-/media/project/website/conhi/documents/unurs/bsn_student_handbook.ashx?revision=5a3d6773-b0aa-4557-bc77-1e795e79fbd).

ADMISSION REQUIREMENTS

Students may be admitted to UT Arlington upon meeting the admission requirements established by the university which are described in the university catalog and website. Official transcripts must be submitted to the university Office of Admissions.

Registered nurses desiring admission to the RN to BSN program must:

• Apply for admission to the University of Texas at Arlington
• Meet the University of Texas at Arlington transfer student admission requirements.
• Have a current, unencumbered license as an RN in the U.S.A.
• Be complete in Texas Success Initiative (TSI) requirements.
• Meet the University of Texas at Arlington English proficiency requirement, TOEFL, if applicable

CREDIT BY RN LICENSURE

Transcripts of RN students are evaluated with consideration of the Coordinating Board Field of Study Curriculum guidelines. Credit is given for all courses listed in the Field of Study Curriculum as transferable as well as any additional courses that may be applicable for transfer for a total of 29 hours.

Certain other conditions apply:

• If the student earned one D or F in a nursing course at another college or school of nursing, they will be admitted unconditionally. If the student earns a subsequent D or F at UT Arlington, he/she will be placed on probation. The student must earn a C or above in all subsequent courses to remain in the program.
• If the student has earned more than one D or F, but no more than two, in nursing courses at another college or school of nursing, the student will enter UT Arlington on a probationary basis. The student must earn a C or above in all subsequent courses at UT Arlington to remain in the program.
ORIENTATION

Prior to entering their junior semester, all students are required to attend the general orientation.

PROGRESSION IN THE RN TO BSN NURSING PROGRAM

The University grade replacement/exclusion policy is limited by the College of Nursing and Health Innovation and is not applicable to nursing courses.

• A student in the RN to BSN program who earns a second D or F will be placed on probation. The student must earn a C or above in all subsequent courses to remain in the program.

ORAL COMMUNICATION PROFICIENCY REQUIREMENT

Oral proficiency is recognized to be a critical component of providing safe nursing care. In addition to content-specific presentations in various nursing courses, all Undergraduate Nursing students are required to communicate effectively with clients, members of the health care team, and faculty. Contact RN-BSN Program Director for more information.

E-MAIL ACCOUNTS

Each student will be provided a UT Arlington e-mail address. Official communications from the College of Nursing and Health Innovation will be distributed to this e-mail address and Learning Management System accounts required by many courses. Students will be held responsible for information distributed in this manner.

MOVEMENT BETWEEN PROGRAMS

Movement between AO and CB RN-BSN program is at the discretion of program administration.

Telehealth Certificate

ADMISSIONS REQUIREMENTS

Students may be admitted to UT Arlington upon meeting the admission requirements established by the University. Students will be advised by the CONHI Office of Enrollment and Student Services. Official transcripts must be submitted to the UT Arlington Office of Admissions.

BSN Prelicensure Program

PRIOR TO ENROLLMENT

The following semester hours must be completed prior to enrollment in upper-division nursing courses except as noted:

Statistics 3-6  
Upper division elective 5-9

1 If part of a two-semester sequence, both courses are required.
2 Must contain a laboratory component.
3 Degree Plan Core Curriculum courses.
4 Degree Plan Program Specific courses.
5 May be completed after enrollment in nursing program.
6 Course must be completed with a grade of C or above prior to enrolling in the nursing program.
7 Technical Writing is preferred. Equivalents include Literature, Speech, or Philosophy, as long as the courses are sophomore-level or higher, have a writing component, and are approved by an advisor.
8 House Bill 935, passed by Sixtieth Legislature, provides that no person may receive an undergraduate degree unless she/he has taken and passed six semester hours in American political science and six semester hours in United States history.
9 The upper division elective course is in addition to the 3 credit hour upper division nursing elective requirement included in the 35 credit RN to BSN Nursing Course listing. This general 3 credit requirement can be met by taking any upper division elective course (including a second nursing elective), or by providing documentation of being certified through a nationally recognized nursing certification examination, or by completing a work-based project in the Nursing Cooperative Education (Co-Op) Program.

Total Hours: 35

1 Elective credit may be awarded for national certifications. Electives may be taken as a junior or as a senior.
2 Will accept up to 29 credit hours transferred from a diploma or Associate Degree in nursing.

### TELEHEALTH AND HEALTH INFORMATICS CERTIFICATE

Certificate Advisor: telehealthadvising@uta.edu

Associate Dean for Academic Affairs, Nursing: Kathy Daniel, PhD

This 9-semester credit hour certificate will prepare upper division undergraduate students from any related discipline to have fundamental skills needed for telehealth and health informatics. Telehealth is the distribution of health-related services via electronic and telecommunication technology. Health Informatics is the storage and use of health care information to foster better collaboration among various health-related providers.

The courses for this certificate are offered all online, but are campus based. They are not available in the accelerated online format. Students may enroll in the certificate alone or include the certificate as part of an undergraduate degree plan from any related major. There are 3 required courses in the certificate.

**Required:**

- NURS-HI 3359  INTRODUCTION TO HEALTH INFORMATICS 3
- NURS-HI 3360  INTERPROFESSIONAL COLLABORATIVE PRACTICE 3

Department of Kinesiology

Undergraduate Degrees

- Bachelor of Arts in Physical Education Teacher Education (PETE) (p. 1121)
- Bachelor of Arts in Kinesiology - Sports Leadership and Management (SLAM) (p. 1121)
- Bachelor of Science in Exercise Science - Clinical & Applied Physiology (CAP) (p. 1121)
- Bachelor of Science in Exercise Science - Health, Fitness, & Wellness (HFW) (p. 1121)
- Bachelor of Science in Exercise Science - Motor & Rehabilitation Services (MRS) (p. 1121)
- Bachelor of Science in Public Health (BSPH) (p. 1121)

Graduate Degrees

- Master of Science in Athletic Training (p. 1107)
- Master of Science in Exercise Science (p. 1107)
- Doctor of Philosophy in Kinesiology (http://catalog.uta.edu/nursing/kinesiology/graduate/#doctoraltext)
- Graduate Certificate in Public Health (http://catalog.uta.edu/nursing/kinesiology/graduate/#certificatetext)
- Master of Public Health (https://catalog.uta.edu/nursing/kinesiology/graduate/)

COURSES

HEED 1230. FIRST AID / CPR / AED TRAINING. 2 Hours.
This course is designed to cover the components of Standard First Aid, Cardio-Pulmonary Resuscitation (CPR) for the Professional Rescuer, and Automated External Defibrillator (AED) training. Certification is possible upon successful course completion. Offered as HEED 1230 and KINE 1230. Students seeking credit in HEED should enroll in HEED 1230 and students seeking credit in KINE should enroll in KINE 1230. Credit will not be granted for both courses.

HEED 1301. NUTRITION. 3 Hours.
Nutrients essential to an adequate diet and good health and the nutritive values of common foods are reviewed. Offered as BIOL 1301 and HEED 1301: credit will be granted for only one of these courses. Students seeking certification in Health Education must enroll in HEED 1301. Students seeking credit toward their science requirement must enroll in BIOL 1301. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, or medical technology.

HEED 1316. FOUNDATIONS OF HEALTH. 3 Hours.
Emphasis on interrelationship of physical, emotional, mental, social, and spiritual dimensions of health. Involves the analysis of personal health status and development of strategies for improving quality of life.

HEED 1340. HEALTHY LIFESTYLES. 3 Hours.
This course will present theoretical content related to a healthy lifestyle. Students will apply these concepts in laboratory sessions where they evaluate current health habits and develop a nutrition, exercise, and stress management plan to promote a healthy lifestyle. The laboratory section will also provide instruction with regards to proper technique and form for resistance training, flexibility and aerobic conditioning. Lifestyle related diseases and addictions such as cardiovascular disease, cancer, diabetes, substance abuse, sexually transmitted diseases and achievement and maintenance of optimal body composition will also be addressed. These problems will be discussed relative to social, cultural and ethnic concerns.

HEED 2300. STUDENT HEALTH PEER TRAINING. 3 Hours.
Train students to be peer counselors who will work as group leaders both on campus and in the community in the Fall and Spring Semesters. Students learn about alcohol and other drugs and their relationship to health and sex issues which prepare them for group presentations and in making referrals when necessary. Topics of training include alcohol and other drug use/abuse, sexually transmitted diseases (STDs), HIV/AIDS, acquaintance rape, smoking/tobacco cessation, eating disorders, suicide, and self-esteem. Prerequisite: permission of instructor.

HEED 2317. BASIC CONCEPTS IN HUMAN SEXUALITY. 3 Hours.
The physiological, psychological, and sociological aspects of human sexuality. Offered as BIOL 2317, HEED 2317, PSYC 2317, and GWSS 2317. Credit will be granted for one of these courses only. Students seeking certification in Health Education must enroll in HEED 2317. Students seeking credit toward their science requirement must enroll in BIOL 2317. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, medical technology, psychology, or sociology.

HEED 2330. CARE AND PREVENTION OF ATHLETIC INJURIES. 3 Hours.
An introduction to the profession of Athletic Training. Common sports-related injuries and illnesses will be discussed with an emphasis on the proper methods for prevention, recognition, and immediate care. Offered as HEED 2330 and KINE 2330. Kinesiology majors must take KINE 2330.

HEED 3301. SPORTS NUTRITION. 3 Hours.
Overview of nutrients necessary for healthful living and nutritional impact on reducing risk factors of lifestyle diseases. Application of nutrient recommendations for sports and exercise activities, including fluid replacement, sports supplements, and ergogenic aids.
HEED 3303. DRUGS AND BEHAVIOR. 3 Hours.
A survey of the psychoactive agents, their therapeutic uses, and social abuses. Alcohol, nicotine, caffeine, narcotics, hallucinogens, stimulants, and tranquilizers. Offered as BIOL 3303, HEED 3303, and PSYC 3303; credit will be granted only once. May not be used for biology grade point calculation or biology credit toward a B.S. degree in biology, microbiology, or medical technology. Students seeking certification in health education must enroll in HEED 3303.

HEED 3305. WOMEN’S HEALTH ISSUES. 3 Hours.
Will address specific issues of importance to women and their health, including growth and development, nutrition, reproductive health, pregnancy, chronic diseases, and relationship/family issues. Offered as DIVR 3305, HEED 3305 and GWSS 3305. Credit will be granted only once.

HEED 3330. CONSUMER HEALTH AND PUBLIC HEALTH SYSTEMS. 3 Hours.
Analysis of personal, social, cultural, economic, and political aspects of health. Topics covered include managed health care, health insurance, health services/products, doctor-patient communication, traditional vs. non-traditional medicine, diagnosis and treatment of chronic diseases, and health legislation. Prerequisite: KINE 2350 and KINE 3350.

HEED 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in the designated area.

HEED 4192. SPECIAL TOPICS IN HEALTH. 1 Hour.
Designed to present topics in health not currently offered in existing curriculum. May be repeated for credit when the topic changes.

HEED 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of department chairperson.

HEED 4292. SPECIAL TOPICS IN HEALTH. 2 Hours.
Designed to present topics in health not currently offered in existing curriculum. May be repeated for credit when the topic changes.

HEED 4310. STRESS MANAGEMENT. 3 Hours.
Analysis of the psychophysiology of stress and the role of stress in the development of acute and chronic diseases. Examine personal and medical uses of stress management techniques.

HEED 4311. THE ENVIRONMENT AND PUBLIC HEALTH SYSTEMS. 3 Hours.
This course is a study of the basic principles of ecology as they relate to the general health of society. Topics including conditions of soil, water, and air - nationally and globally - will be discussed. The successful student will acquire a level of proficiency in appropriate health care techniques specific to environmental health concerns. Prerequisite: KINE 2350, KINE 3350, KINE 3353, CHEM 1441 or CHEM 1451 and BIOL 1345 or BIOL 1441.

HEED 4312. HEALTH & HUMAN DISEASE. 3 Hours.
Basic principles of human diseases including cardiovascular disease, cancer, AIDS, influenza, and Alzheimer's. The role of infectious and communicable diseases in human history will also be discussed.

HEED 4320. STUDIES IN HEALTHY AGING. 3 Hours.
Emphasis on complex issues associated with aging and death. Topics include changes/losses related to specific stages of life; care-giving to the dying; pertinent legal issues; medical gerontology; other salient issues and problems concerning aging and death. This course is especially helpful to those students who plan careers in the medical profession.

HEED 4330. COMPREHENSIVE SEXUALITY EDUCATION. 3 Hours.
Explores contemporary issues in human sexuality (i.e., physiological, psychological, and sociological) and prepares those interested in teaching health education to teach sexuality education with diverse populations in a variety of settings (i.e., school or community agency). Students will increase their knowledge of sexuality and enhance their ability to educate about and promote sexual health. Students seeking certification in health must enroll in HEED 4330.

HEED 4340. PRINCIPLES OF HEALTH APPLICATIONS. 3 Hours.
Designed to integrate the information base of health studies into action plans for developing health education and promotion programs for organizations, agencies, and schools. Designed to integrate the information base of health studies into action plans for developing health education and promotion programs for organizations, agencies and communities. Includes planning and evaluation components recommended for students who plan to sit for ACSM/NPASPA certificate exam. Prerequisite: Junior standing and completion of KINE 2350.

HEED 4357. HEALTH PSYCHOLOGY. 3 Hours.
This course provides a broad introduction to health psychology and its interface with the medical world. The course provides a balanced presentation of the important issues in the field, as well as specific content topics that are especially relevant today to better understand health and illness. Offered as BIOL 4357, HEED 4357, and PSYC 4357. Students seeking science requirement credit must enroll in BIOL 4357; students seeking Certification in Health must enroll in HEED 4357. Prerequisite: PSYC 1315 or BIOL 1333 or BIOL 1441 or BIOL 2457; junior standing recommended.

HEED 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of department chairperson.

HEED 4392. SPECIAL TOPICS IN HEALTH. 3 Hours.
Designed to present topics in health not currently offered in existing curriculum. May be repeated for credit when the topic changes.
COURSES

KINE 1100. LAB SKILLS IN KINESIOLOGY AND EXERCISE SCIENCE. 1 Hour.
The course is designed to provide basic lab measurement and testing experiences for Kinesiology and Exercise Science students. Prerequisite: or Co-requisite: KINE 1300.

KINE 1230. FIRST AID / CPR / AED TRAINING. 2 Hours.
This course is designed to cover the components of Standard First Aid, Cardio-Pulmonary Resuscitation (CPR) for the Professional Rescuer, and Automated External Defibrillator (AED) training. Certification is possible upon successful course completion. Offered as HEED 1230 and KINE 1230. Students seeking credit in HEED should enroll in HEED 1230 and students seeking credit in KINE should enroll in KINE 1230. Credit will not be granted for both courses.

KINE 1300. INTRODUCTION TO KINESIOLOGY AND EXERCISE SCIENCE. 3 Hours.
Introduction to key concepts concerning the anatomical, motor, biomechanical, and physiological basis of exercise science. The student is introduced to cardiovascular responses to training, analysis of human and motor behavior, and basic principles of exercise prescription.

KINE 1315. INTRODUCTION TO PHYSICAL EDUCATION AND SPORT. 3 Hours.
This course is an introduction to, and observation of, practices in pedagogical kinesiology and sports leadership.

KINE 1400. INTRODUCTION TO EXERCISE SCIENCE. 4 Hours.
Introduction to key concepts concerning the anatomical, biomechanical, and physiological basis of exercise science. Through lecture and laboratory experiences, the student is introduced to cardiovascular responses to training, analysis of human movement, and basic principles of exercise prescription. Credit cannot be given for both KINE 1400 and the combination of courses it replaces: KINE 1124 and KINE 1314.

KINE 2130. ATHLETIC TRAINING CLINICAL PRACTICUM I. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Clinical Proficiencies with an instructional emphasis on preventive and protective taping and wrapping procedures. This course requires the completion of 120 clinical hours under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI).

KINE 2230. INTRODUCTION TO MUSCULOSKELETAL INJURIES. 2 Hours.
This course is designed to introduce students to the mechanisms of musculoskeletal injury and their associated signs, symptoms, and tissue responses. Students will also be introduced to the basic principles of musculoskeletal assessment. This course is a prerequisite for admission to the Athletic Training Education Program. Prerequisite: KINE 2120, KINE 2320; must be concurrently enrolled in KINE 2130.

KINE 2301. TEACHING GAMES FOR UNDERSTANDING. 3 Hours.
The course will provide students with theoretical concepts with which they can design and analyze various short- and long-term plans related to the Teaching Games for Understanding theoretical model. Students will learn various tactical strategies and modification principles for applying learned concepts in instructional settings. The instructor will use expertise from given sports to help students transfer the common themes across the spectrum of the model's category of games. KINE 1315 is a co-requisite for this course. Prerequisite: Co-requisite KINE 1315.

KINE 2302. DANCE AND MOVEMENT ACTIVITIES. 3 Hours.
This course is designed to enhance the students performance knowledge of skills and strategies in dance and movement activities to acquaint them with effective teaching behaviors appropriate for these activities. Co-requisite KINE 1315. Prerequisite: Co-requisite KINE 1315.

KINE 2307. SPORTS AND SOCIETY. 3 Hours.
This course will examine the bidirectional impact of sport and societal institutions. The class will explore the co-dependent nature of sport and society and attempt to separate fact from fiction to aid in the understanding of the true role of sport as it fits into society. Topics to be addressed include the potentially controversial areas of race, gender, disability, institutional rule violations, and ethics in the contemporary sports arena. This is a lower level elective. Credit cannot be received for this course and KINE 3307.

KINE 2330. CARE AND PREVENTION OF ATHLETIC INJURIES. 3 Hours.
An introduction to the profession of Athletic Training. Common sports-related injuries and illnesses will be discussed with an emphasis on the proper methods for prevention, recognition, and immediate care. Offered as HEED 2330 and KINE 2330. Kinesiology majors must take KINE 2330.

KINE 2350. PUBLIC HEALTH: PRINCIPLES AND POPULATIONS. 3 Hours.
This course will provide students with an overview of Public Health: what it is, how it works, and why it is important. Topics include current health issues, global health, health disparities and how Public Health impacts community settings. Class requirement includes participation in community-based, experiential-learning activities. Examination of public health concepts, values and functions. Exploration of the underlying science of human health and disease as that is impacted by socioeconomic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities. This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences.

KINE 2351. HEALTH ISSUES IN DIVERSE & VULNERABLE POPULATIONS. 3 Hours.
Cultural competence is attracting increased attention across the spectrum of public health. However, many vulnerable populations continue to be "invisible," resulting in a lack of awareness and knowledge in public health and healthcare workers. This course provides students with information related to the multi-faceted disparities that exist beyond ethnic differences to investigate the many other facets of cultural diversity and health issues.
KINE 2420. INTRODUCTION TO ATHLETIC TRAINING. 4 Hours.
Classroom and laboratory experiences that provide an introduction to the profession of Athletic Training with an emphasis on prevention and immediate care of sports related injuries. Specific topics will include injury prevention techniques; emergency first aid and acute care; superficial application of therapeutic modalities; proper use and fitting of protective equipment; and environmental considerations. Credit cannot be given for KINE 2420 and the combination of courses it replaces: KINE 2320 and KINE 2120.

KINE 3130. ATHLETIC TRAINING CLINICAL PRACTICUM II. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. This course requires the completion of 250 hours of clinical experience performed under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI). Prerequisites: BIOL 2457, Athletic Training Majors only or permission of instructor. Corequisite: KINE 3320.

KINE 3131. ATHLETIC TRAINING CLINICAL PRACTICUM III. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. This course requires the completion of 250 hours of clinical education experience performed under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI). Prerequisite: BIOL 2457, Athletic Training Majors only or permission of instructor. Corequisite: KINE 3324.

KINE 3300. FUNCTIONAL ANATOMY. 3 Hours.
A study of the musculoskeletal anatomy to include bony landmarks, muscle origin, insertion and action, as well as nerve innervation. Knowledge of the functional anatomy is crucial to the understanding of sports performance, the design of strength training programs, and injury prevention. Prerequisite: KINE 1300, KINE 1100 and BIOL 2457.

KINE 3302. SPORT AND EXERCISE PSYCHOLOGY. 3 Hours.
Analysis of exercise and sport activities in terms of psychological skills and strategies. Topics include motivation, arousal regulation, focus, concentration, group cohesion & imagery.

KINE 3303. ORGANIZATIONAL PRINCIPLES OF EXERCISE AND SPORT ACTIVITIES. 3 Hours.
An organizational analysis of exercise and sport in terms of participation rules, regulations, and responsibilities. Emphasis on knowledge and understanding of the principles governing the organization and conduct of exercise and sport activities.

KINE 3304. ADAPTED PHYSICAL EDUCATION & SPORT. 3 Hours.
Analysis of conditions that impact individuals with disabilities in society, schools and disability sport. Emphasis is placed on adapted physical education and sport strategies that facilitate the learning of this population. Prerequisite: Instructor Permission.

KINE 3305. MOTOR INTEGRATION. 3 Hours.
Principles of motor skill acquisition, performance, and control. Topics include practice strategies, memory, neuromotor functioning, attention, and learning (assessment, transfer & stages). Prerequisite: KINE 1315, and KINE 1400, or permission of instructor.

KINE 3307. SPORT AND SOCIETY: ISSUES AND DEBATES. 3 Hours.
This course will examine the bidirectional impact of sport and societal institutions. The class will explore the co-dependent nature of sport and society and attempt to separate fact from fiction to aid in the understanding of the true role of sport as it fits into society. Topics to be addressed include the potentially controversial areas of race, gender, disability, institutional rule violations, and ethics in the contemporary sports arena. This is an upper level elective. Credit cannot be received for this course and KINE 2307.

KINE 3309. FOUNDATIONS OF RECREATION. 3 Hours.
Leisure time in our social structure and the agencies which have developed to provide leisure time activities. Program development and leadership skills in the recreation profession.

KINE 3311. RECREATION AND LEISURE SERVICE. 3 Hours.
Application of management and organizational principles, objectives, and procedures involved in implementing recreational and leisure service programs.

KINE 3312. COACHING INVASION GAME PRINCIPLES. 3 Hours.
The course will provide students with theoretical concepts with which they can design and analyze various short and long-term plans related to invasion games. Students will learn various tactical strategies and modification principles for applying learned concepts in instructional settings. The instructor will use expertise from given sports to help students transfer the common themes across the spectrum of invasion games.

KINE 3313. COACHING OF NET/WALL GAME PRINCIPLES. 3 Hours.
The course will provide students with theoretical concepts with which they can design and analyze various short and long-term plans related to net/wall games. Students will learn various tactical strategies and modification principles for applying learned concepts in instructional settings. The instructor will use expertise from given sports to help students transfer the common themes across the spectrum of net/wall games.

KINE 3320. LOWER EXTREMITY EVALUATION. 3 Hours.
A study of the common orthopedic and musculoskeletal injuries involving the lower extremities and lumbar spine, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Prerequisite: BIOL 2457, Athletic Training Majors only or permission of instructor. Corequisite: KINE 3130.
KINE 3324. UPPER EXTREMITY EVALUATION. 3 Hours.
A study of the common orthopedic and musculoskeletal injuries involving the upper extremities, spine, head, face, abdomen, and thorax, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Prerequisite: BIOL 2457, Athletic Training Majors only or permission of instructor. Corequisite: KINE 3131.

KINE 3325. UNDERGRADUATE RESEARCH METHODS. 3 Hours.
Current practices in the conduct of quantitative research, measurement, and evaluation processes applied to programs related to exercise science, pedagogical kinesiology, athletic training and related fields will be examined. Enrolled students will develop and conduct a research project based on their declared discipline. Prerequisite: KINE 1300, KINE 1100, MATH 1302, MATH 1308.

KINE 3330. PATHOLOGY AND PHARMACOLOGY. 3 Hours.
Study of acute and chronic illness and their response to, and impact on, physical activity. Discussion of pharmacological agents used in the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: BIOL 2458, acceptance into the Athletic Training Education Program or permission of instructor.

KINE 3333. THERAPEUTIC INTERVENTION II. 3 Hours.
This course is designed to provide the student with an understanding of upper extremity and low back rehabilitation protocols and the use of electric therapeutic modalities like ultrasound, diathermy, laser, and electric stimulation. Emphasis will be placed on understanding the disablement model and learning how to plan, implement, document, and evaluate programs for the rehabilitation and reconditioning of injuries and illnesses of athletes and others involved with physical activity. Operation of electrical therapeutic modalities and how they can be incorporated into a rehabilitation program will be investigated. The underlying principles and application techniques for each modality, therapeutic exercise progressions, patient clinical goals, legal and safe practice guidelines, and evidence based therapeutic modality science will allow for critical thinking and problem solving in relation to common upper extremity and low back injuries. Both surgical and non-surgical rehabilitation models for the upper extremity and low back will be discussed with a special emphasis on the use of functional progressions. Prerequisites: BIOL 2457 and BIOL 2458. Concurrent enrollment in KINE 4131 is required for all Athletic Training Education Program students.

KINE 3342. SOCIOLOGY OF THE HUMAN BODY. 3 Hours.
Drawing from the social sciences, cultural and gender studies, and exercise physiology, this course in body sociology addresses several contemporary issues relating to diet, nutrition and exercise. Specific topics include eating disorders, factory farming, and “body industries” involving weight-loss diets, gyms, fashion, and cosmetic and bariatric surgery. The medical model of bodies is also examined. Also listed as SOCI 3342; credit will not be granted for both KINE 3342 and SOCI 3342.

KINE 3350. URBANIZATION AND VULNERABLE POPULATIONS. 3 Hours.
Investigation of diversity of individuals and populations in a community, including how diversity may influence policies, programs, services, and the health of a community, and the importance for a diverse public health workforce.

KINE 3351. PUBLIC HEALTH INFORMATICS. 3 Hours.
Explain and apply ethical principles that apply to the use of information technology as those pertain to accessing, collecting, analyzing, using, maintaining, and disseminating data and information. Prerequisite: KINE 2350 and KINE 3350.

KINE 3352. INTRODUCTION TO PUBLIC HEALTH EPIDEMIOLOGY. 3 Hours.
Analysis of factors that affect the health of a community, including how disease spreads, legal aspects of epidemics, and how data is used to drive public health decision making. Overview of how public health practice and science come together to protect the health of the public, or of a specific population. Prerequisite: MATH 1301 or MATH 1302 or MATH 1303 or MATH 1426 and MATH 1308 and KINE 2350 required.

KINE 3353. HEALTH AND THE HUMAN CONDITION IN THE GLOBAL COMMUNITY. 3 Hours.
Study of the history, philosophy and contemporary issues of public health as those apply to public health in both urban and global societies.

KINE 3354. EMERGENCY PREPAREDNESS & MANAGEMENT. 3 Hours.
Inquiry into the structures, functions, and authorizations of governmental public health programs. Identification of tools, processes, and activities related to both practice and policy used to support community responses to public health emergencies and other disasters. Prerequisite: KINE 2350.

KINE 3355. ADDICTIVE BEHAVIORS. 3 Hours.
Students will examine substance abuse including alcohol, drugs (illegal and prescription), smoking, vaping, and gaming from a population-based approach. There will also be a focus on compulsive behaviors including topics such as food over- and undereating, gambling, shopping and internet/technology addictions. While the course emphasis is on addictive behaviors, material and learning activities will also address how diverse and vulnerable populations are impacted by addictive behaviors as those relate to injury and illness prevention.

KINE 3356. PUBLIC HEALTH IN ACADEMIC SETTINGS. 3 Hours.
Public Health in Academic Settings This course addresses common health issues found throughout educational settings. Topics include chronic stress, health and well-being, school violence and the roles of hunger and obesity as concerns in the school environment. A focus on school climate, the role of school-based healthcare and preventing dropout from public health perspectives will be included.

KINE 3357. PHYSICAL ACTIVITY IN PUBLIC HEALTH. 3 Hours.
Designed for public health and health/fitness/wellness professionals who are interested in the promotion of physical activity in a variety of areas of public health. Emphasis on advocating for the importance of integration of physical activity in community health. This course prepares students to sit for the American College of Sports Medicine/National Physical Activity Society Physical Activity in Public Health Specialist certification examination.
KINE 3388. THEORY AND APPLICATION IN MOTOR DEVELOPMENT. 3 Hours.
A study of motor skill development from infancy to adolescence with emphasis upon motor development theory and aspects that effect motor competence, underlie movement control, and influence change in the acquisition of motor skills. Prerequisite: KINE 1100 and KINE 1300.

KINE 3401. BIOMECHANICS OF HUMAN MOVEMENT. 4 Hours.
Quantitative and qualitative analyses of human movement. Emphasis is on the application of the principles of human movement, with consideration of functional anatomy, kinesiology and mechanical concepts to exercise, sport, and activities of daily living. Course credit may not be granted for both KINE 3301 and KINE 3401. Prerequisite: KINE 1300, KINE 1100, BIOL 2457 and MATH 1302.

KINE 3415. PHYSIOLOGY OF EXERCISE. 4 Hours.
Provides the physiology background necessary for an understanding of the acute and chronic effects of exercise on the body. Physiological concepts and their relationship to exercise, sport, and health programs are examined. Laboratory experiences are designed for evaluating physiological responses to exercise. Course credit may not be granted for both KINE 3315 and KINE 3415. Prerequisite: Restricted to Kinesiology, Athletic Training and Exercise Science Majors. KINE 1300, KINE 1100, BIOL 2457, BIOL 2458, and MATH 1302 required.

KINE 4130. ATHLETIC TRAINING CLINICAL PRACTICUM IV. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. The instructional emphasis is the development of functional rehabilitation programs for musculoskeletal injuries and common orthopedic surgeries. This course requires the completion of 250 hours of clinical experience performed under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI). Prerequisite: BIOL 2457 and BIOL 2458; Athletic Training Majors only or permission of instructor. Corequisite: KINE 4336.

KINE 4131. ATHLETIC TRAINING CLINICAL PRACTICUM V. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. Instructional emphasis is on the selection and clinical application of therapeutic modalities. This course requires the completion of 250 hours of clinical experience performed under the supervision of an Approved Clinical Instructor (ACI) or Clinical Instructor (CI). Prerequisite: BIOL 2457 and BIOL 2458; Athletic Training Majors only or permission of instructor. Corequisite: KINE 4333.

KINE 4132. ATHLETIC TRAINING CLINICAL PRACTICUM VI. 1 Hour.
Laboratory and clinical experiences designed to provide students with formal instruction and evaluation in the Entry Level Athletic Training Competencies and Clinical Proficiencies. This course requires the completion of 200 hours of clinical experience performed under the supervision of an Approved Clinical Instructor. Prerequisite: KINE 3130, KINE 3131, KINE 3320, KINE 3324, KINE 3330, KINE 3333, KINE 4130, KINE 4131, KINE 4336, and acceptance into the Athletic Training Education Program or approval of instructor. Must be concurrently enrolled in KINE 4233.

KINE 4188. CLINICAL HEALTH PROFESSIONS INTERNSHIP. 1 Hour.
Individualized academic training in an internal or external clinical health professions setting (e.g. university, hospital, physical therapy clinic, or physician's office) under the direct supervision of a health care professional (MD, PT, OT, PA). Prerequisite: Corequisite: KINE 4315 or successful completion of KINE 4315 and proof of sufficient professional liability insurance.

KINE 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of department chairperson.

KINE 4193. PHYSICAL EDUCATION TEACHER CERTIFICATION PRACTICUM. 1 Hour.
In this course students will be prepared for the TExES PE-EC-12 and PPR-EC-12 exams and prepared for the professional dispositions associated with being a Physical Educator with an emphasis on ethics, interviewing, and role modeling. The students will take and review the PE Content and Pedagogy and Professional Responsibilities practice teaching licensure exams. Through this process teacher candidates will be cleared for official TExES registration. This course is to be taken the semester immediately prior to the student teaching semester.

KINE 4201. ADVANCED TECHNIQUES AND TACTICS OF BASEBALL. 2 Hours.
Development and analysis of skills, offensive and defensive strategies used in the sport of baseball.

KINE 4202. ADVANCED TECHNIQUES AND TACTICS OF BASKETBALL. 2 Hours.
Development and analysis of skills, offensive/defensive strategies used in the sport of basketball.

KINE 4203. ADVANCED TECHNIQUES AND TACTICS OF FOOTBALL. 2 Hours.
Development and analysis of skills, offensive and defensive strategies used in the sport of football.

KINE 4204. ADVANCED TECHNIQUES AND TACTICS OF TRACK AND FIELD. 2 Hours.
Development and analysis of track and field event techniques and strategies.

KINE 4205. ADVANCED TECHNIQUES AND TACTICS OF VOLLEYBALL. 2 Hours.
Development and analysis of skills, offensive and defensive strategies used in the sport of volleyball.

KINE 4233. ATHLETIC TRAINING ORGANIZATION & ADMINISTRATION. 2 Hours.
A study of the administrative issues and management theories that may be encountered in athletic training. Special emphasis is placed on the practical application of concepts related to legal liability, facility design and maintenance, documentation, financial management, health insurance, and general day-to-day operations. Prerequisite: KINE 3130, KINE 3131, KINE 3320, KINE 3324, KINE 3330, KINE 3333, KINE 4130, KINE 4131, KINE 4336, and acceptance into the Athletic Training Education Program or approval of instructor.

KINE 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of department chairperson.
KINE 4293. SEMINAR IN ATHLETIC TRAINING. 2 Hours.  
Synthesis of theories and concepts in athletic training. Review of the competencies and proficiencies in athletic training with special emphasis on professional development and the refinement of clinical decision-making. Prerequisite: KINE 3320, KINE 3324, KINE 3330, KINE 3333, KINE 4233, KINE 4336; Athletic Training Majors only.

KINE 4296. SPECIAL TOPICS IN EXERCISE AND SPORT. 2 Hours.  
Designed to meet the current needs of students. May be repeated for credit when the topic changes.

KINE 4316. FITNESS PROGRAMMING. 3 Hours.  
This course will provide students with practical and theoretical applications of fitness programming. The successful student will acquire a level of proficiency in the development of fitness programs and plans based upon client specific fitness assessment characteristics. Fitness programs shall include, but not be limited to: musculoskeletal symmetry, strength, and flexibility; body composition; cardiovascular endurance, and nutritional recommendations. Additionally, successful students will become proficient in the application of client related historical, nutritional, medical, psychological, and psychosocial factors that impact the development of a properly designed exercise program. Prerequisite: Current CPR certification, MATH 1302, KINE 3300, KINE 3315, and KINE 4315, or permission of instructor.

KINE 4317. EXERCISE PRESCRIPTION FOR SPECIAL POPULATIONS. 3 Hours.  
This course will discuss the pathophysiology of prevalent cardiovascular, metabolic and pulmonary diseases. Methods of exercise prescription and issues of concern will also be presented for these populations, as well as, low back pain, pregnancy, osteoporosis, cancer, children, older adults, fibromyalgia, multiple sclerosis and cardiac disease. Prerequisite: MATH 1302, MATH 1308, BIOL 2457, BIOL 2458, KINE 3300, KINE 3415 and KINE 3325.

KINE 4319. FITNESS, HEALTH AND OUTDOOR ADVENTURE ACTIVITIES EDUCATION. 3 Hours.  
The course will provide students with theoretical health-related concepts with which they can design and apply fitness learning into various physical education settings. In addition, this course is designed to introduce students to outdoor and adventure education activities and adventure-based learning. Time will be spent on low element group initiatives and high element adventure activities. Prerequisite: KINE 2301 and KINE 2302.

KINE 4320. TEACHING SECONDARY PHYSICAL EDUCATION. 3 Hours.  
Designed to enhance teacher candidates’ understanding of curriculum development as it applies to theory of motor learning and the sciences of kinesiology. These progressions are synthesized into a collaborative service-learning project with secondary public school partner(s). Candidates take responsibility for creating, coordinating, and facilitating learning experiences that are developmentally appropriate, motivating, and based on research. Prerequisite: KINE 3304, KINE 3388.

KINE 4321. TEACHING ELEM PHYSICAL EDUCATION. 3 Hours.  
This course is designed to synthesize the sciences of anatomy and physiology, biomechanics, motor integration and motor control with sound pedagogical knowledge into an applied elementary physical education setting. Criminal background check required. Prerequisite: KINE 3304 and KINE 3388.

KINE 4323. MOTOR CONTROL AND LEARNING. 3 Hours.  
This course will expose students to the theoretical perspectives and current principles associated with the control and learning of movement skills. Specifically, the neural and mechanical mechanisms underlying motor behavior and the variables influencing motor learning will be addressed. Throughout the course, application of theoretical concepts to instructional and clinical settings will be emphasized. Prerequisite: KINE 1300, KINE 1100, MATH 1308, and KINE 3325.

KINE 4329. STRENGTH & CONDITIONING IN SPORT AND PERFORMANCE. 3 Hours.  
This course covers the physiology and biomechanics of strength training and conditioning. Additional topics include: testing and evaluation of athletes, resistance training techniques, training program design, and organization administration of a strength training facility. This course is designed to prepare students to take the CSCS, Certified Strength and Conditioning Specialist, certification examination. Prerequisite: MATH 1302, MATH 1308, BIOL 2457, BIOL 2458, KINE 3300, KINE 3415, and KINE 3325.

KINE 4330. PROGRAM DESIGN & ADMINISTRATION. 3 Hours.  
The development and operation of health/wellness programs and facilities will be presented, including: program design and administration, facility design, organizational development, management theory, marketing, financial management, legal issues, strategic planning, and evaluation models. The student will participate in all phases of program and facility development, such as budget development, recruiting and retaining employees and clients, market niche, and conflict resolution. Prerequisite: KINE 3415 and KINE 3325.

KINE 4331. OBESITY & WEIGHT MANAGEMENT. 3 Hours.  
This course is a review of the scientific literature on the causes and consequences of obesity. Topics include: techniques for assessing body composition, metabolic factors promoting obesity, the role of obesity in metabolic and cardiovascular disease, traditional and non-traditional weight loss programs, economic consequences and contributors of obesity, and psychosocial consequences and contributors of obesity. Prerequisite: KINE 3415 and KINE 3325.

KINE 4335. GRADED EXERCISE TESTING & PRESCRIPTION. 3 Hours.  
The knowledge and skills necessary for assessment of health history and appraisal, blood pressure, electrocardiogram, cardiovascular fitness and function will be acquired in lecture and laboratory sessions. Various test modalities and protocols will be discussed for health and diseased populations. Prerequisite: BIOL 2457, BIOL 2458, and KINE 3315, KINE 4315, or permission of instructor.
KINE 4336. THERAPEUTIC INTERVENTION I. 3 Hours.
This course is designed to provide the student with an understanding of the scientific theory and the basic principles of musculoskeletal rehabilitation and therapeutic modalities. Emphasis will be placed on understanding the disablement model and learning how to plan, implement, document, and evaluate programs for the rehabilitation and reconditioning of injuries and illnesses of athletes and others involved with physical activity. Operation of superficial heating and cooling therapeutic modalities and how manual treatments (e.g., traction, muscle energy and massage) can be incorporated into a rehabilitation program will be investigated. The underlying principles and application techniques for each modality, therapeutic exercise progressions, patient clinical goals, legal and safe practice guidelines, and evidence based therapeutic modality science will allow for critical thinking and problem solving in relation to common lower extremity injuries. Both surgical and non-surgical rehabilitation models for the lower extremity will be discussed with a special emphasis on the use of functional progressions. Prerequisites: BIOL 2457 and BIOL 2458. Concurrent enrollment in KINE 4130 is required for all Athletic Training Education Program students.

KINE 4337. STRENGTH AND CONDITIONING IN GENERAL POPULATIONS: HEALTH AND DISEASE. 3 Hours.
This course covers the physiology and biomechanics of strength training and conditioning as it applies to the general populations across the spectrum of health and disease. This includes: testing, evaluation, resistance training techniques and training program design for individuals with orthopedic injuries and rehabilitation concerns, metabolic conditions (e.g., diabetes), youth, elderly, and pregnant or post-prenatal women. This course is designed to prepare students to take the NSCA-CPT, and apply the skills needed to be a leader within the personal training and physical therapy career paths. Prerequisite: KINE 3415 and KINE 3325.

KINE 4339. SPORTS LEADERSHIP AND MANAGEMENT INTERNSHIP. 3 Hours.
Individualized training and experience in a youth, college, professional or other sport-based organization. Students will work with a mentor and university supervisor in a community-based setting to better understand, explore, and apply principles of coaching and operations. Prerequisite: KINE majors and Senior standing.

KINE 4350. SPORTS PSYCHOLOGY. 3 Hours.
The course will provide an overview of the growing field of Sports Psychology, which involves applying psychological science to sports. Topics such as maximizing sports performance, elite performance and personality, motivation techniques in sports, leadership skills in sports, etc., will be covered.

KINE 4351. PUBLIC HEALTH ETHICS. 3 Hours.
Study of ethical standards and how those are incorporated into practice and decision-making that relate to interactions with individuals, organizations, and communities. Exploration of strategies for public health, health care, and other allied healthcare organizations to work together or individually to impact the health of a community. Prerequisite: Junior status, KINE 2350 and KINE 3350.

KINE 4352. PUBLIC HEALTH SCIENCES AND METHODS. 3 Hours.
Identify scientific concepts and research methods of population health, along with the basic processes, approaches, and interventions that identify and address the major health-related needs and concerns of populations. Analysis of project implementation such as planning, assessment and evaluation. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, and KINE 4353. Minimum GPA of 2.5 required to enroll in the course.

KINE 4353. EMERGENCY PREPAREDNESS & MANAGEMENT. 3 Hours.
Inquiry into the structures, functions, and authorizations of governmental public health programs. Identification of tools, processes, and activities related to both practice and policy used to support community responses to public health emergencies and other disasters. Credit may not be given for both KINE 3354 and KINE 4353. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, and KINE 4353. Minimum GPA of 2.5 required to enroll in the course.

KINE 4354. PUBLIC HEALTH ADVOCACY AND LEADERSHIP. 3 Hours.
Appraisal of leadership philosophies and actions that reflect and model effective strategies for protecting and promoting the public's health. Prerequisite:KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, KINE 3354, MANA 4326, KINE 4352, KINE 4355, KINE 4357, HEED 4311. Concurrent enrollment in KINE 4359 recommended. 2.5 GPA required for course enrollment.

KINE 4355. COMMUNICATION FOR HEALTH PROFESSIONALS. 3 Hours.
Information and experiences that identify the health literacy of populations, including addressment of barriers and unique situations for vulnerable populations. Communication of information through appropriate, culturally competent methodologies. Integration of basic concepts of public health-specific communication into technical and professional writing. The use of mass media and electronic technology. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353 and KINE 4353.

KINE 4356. PUBLIC HEALTH PROJECT DESIGN & ADMINISTRATION. 3 Hours.
This course includes content designed to develop the knowledge, skills and competencies necessary for public health project management. The course includes experiential learning activities and case studies that integrate practice-based learning on topics such as project design, team dynamics, project evaluation and quality improvement measures. Prerequisite: KINE 2350 and junior status.

KINE 4357. PREPARATION FOR THE PUBLIC HEALTH WORKFORCE. 3 Hours.
The development and operational systems and processes in public health programs and facilities will be presented, including: concepts and experiences necessary for success in the workplace, community dynamics, independent work and development of a personal work ethic, networking and professional communication, and teamwork. The student will participate in multiple career readiness learning experiences through a co-curricular collaboration with UTA Career Services. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, KINE 4353 and MANA 4326.

KINE 4358. APPLIED APPROACHES TO DIVERSITY AND CULTURAL AWARENESS IN PUBLIC HEALTH ORGANIZATIONS. 3 Hours.
Applied Approaches to Diversity and Cultural Awareness in Public Health Organizations. This course examines the changing demographics of the public health workforce and organizations, presenting students with varied perspectives, approaches and competencies required for understanding and appreciation of greater diversity across the public health and healthcare systems.
KINE 4359. PUBLIC HEALTH CUMULATIVE EXPERIENCE. 3 Hours.
Individualized learning opportunity to integrate, synthesize and apply knowledge through cumulative and experiential activities. All students complete a cumulative, integrative and scholarly or applied experience or inquiry project that serves as an optimum point to the education experience. These experiences may include, but are not limited to, internships, service-learning projects, senior seminars, portfolio projects, research papers or honors theses. Students are encouraged to gain exposure to local-level public health professionals and/or agencies that engage in public health practice. To be taken during the final semester prior to graduation. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, KINE 4352, KINE 4353, KINE 4355, KINE 4357 and MANA 4326 required. Corequisite: KINE 4354. Minimum GPA of 2.5 required for enrollment.

KINE 4387. EXERCISE SCIENCE PRACTICUM. 3 Hours.
Academic training within the internal setting of U.T. Arlington's exercise science laboratories. Each student will receive 135 hours of professional practicum experience in a variety of exercise science settings including wellness, physical fitness activity classes, physical fitness theory classes, the physical fitness center, and/or other exercise science settings. Prerequisite: Current CPR certification, KINE 4315, KINE 4316, and permission of instructor.

KINE 4388. EXERCISE SCIENCE INTERNSHIP. 3 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, cardiac rehabilitation, fitness center) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 135 hours in the field is required for completion of the course. Prerequisite: KINE 4415 (or Corequisite).

KINE 4389. FITNESS MANAGEMENT INTERNSHIP. 3 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, cardiac rehabilitation, fitness center) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 135 hours in the field is required for completion of the course. Prerequisite: KINE 4415 (or Corequisite).

KINE 4390. PRACTICUM IN SPORT PERFORMANCE. 3 Hours.
Designed on an individual basis as a field experience in the observation of sport performance, and the application of performance principles to sport participation. Students must make application for enrollment prior to October 1 for Spring Semester and prior to April 1 for Fall Semester.

KINE 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering personal research or study in the designated area. Prerequisite: permission of department chairperson.

KINE 4394. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or a project under the direction of a faculty member in the major department.

KINE 4395. INDIVIDUAL STUDY IN EXERCISE AND SPORT. 3 Hours.
The completion of an existing course on an individual basis as contracted with an approved faculty member. This procedure is limited to emergency situations, and must be identified through the departmental advising process.

KINE 4396. SPECIAL TOPICS IN EXERCISE AND SPORT. 3 Hours.
Designed to meet the current needs of students. May be repeated for credit when the topic changes.

KINE 4400. APPLIED EXERCISE PHYSIOLOGY. 4 Hours.
Application of physiological principles of training of physical fitness and sport; examination of factors influencing anaerobic and aerobic training methods and their effect on fitness. Physiological responses studied include cardiovascular, bioenergetics, and extreme environments. Site visits, laboratory experiences and a research project enhance the student's understanding of physiological changes and career paths in exercise science. Prerequisite: KINE 3315, KINE 3325, KINE 4315, MATH 1302 and MATH 1308.

KINE 4415. FITNESS ASSESSMENT/PROGRAMMING. 4 Hours.
Classroom and laboratory experiences provide the student with an opportunity to become familiar with the assessment of physical fitness including graded exercise testing, metabolic studies, basic ECG interpretation, and body composition. The student will also learn risk factor identification and exercise prescription. Course credit may not be granted for both KINE 4315 and KINE 4415. Prerequisite: KINE 3415 and KINE 3325.

KINE 4420. APPLIED MOTOR BEHAVIOR. 4 Hours.
Application of motor behavior and biomechanical principles as well as factors influencing learning, re-learning and enhancing motor skills will be examined. Students will craft a research project to enhance their understanding of principles of motor behavior and will be involved in several case studies that can help understand how to apply motor behavior in their career paths. Prerequisite: KINE 3325; KINE 3388; KINE 4323.

KINE 4490. EXERCISE SCIENCE INTERNSHIP. 4 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, cardiac rehabilitation, fitness center) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 180 hours in the field is required for completion of the course. Prerequisite: KINE 4415 (or Corequisite).

KINE 4491. MRS INTERNSHIP. 4 Hours.
Individualized academic training in an external professional movement or rehabilitation setting (e.g., hospital, OT clinic, SLP clinic, school, recreation center, therapy setting, etc) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 180 hours in the field is required for completion of the course. Prerequisite: KINE 3388; KINE 3415.
KINE 4589. EXERCISE SCIENCE INTERNSHIP. 5 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, cardiac rehabilitation, fitness center) under the direct supervision of an exercise science professional or licensed therapist. Proof of sufficient professional liability insurance is required for enrollment. A minimum of 225 hours in the field is required for completion of the course. Prerequisite: KINE 4415 (or Corequisite).

KINE 4639. SPORTS LEADERSHIP AND MANAGEMENT INTERNSHIP II. 6 Hours.
Individualized training and experience in a youth, college, professional or other sport-based organization. Students will work with a mentor and university supervisor in a community-based setting to better understand, explore, and apply principles of coaching and operations. Prerequisite: KINE majors and Senior standing.

KINE 4647. CLINICAL TEACHING PHYSICAL EDUCATION EC-12. 6 Hours.
This supervised course is designed as a culminating field experience of pre-service professional preparation giving an opportunity to practically apply theoretical and pedagogical knowledge in real school settings. Applied experience will be attained in both Elementary and Secondary settings. Criminal background check required. Prerequisite: KINE 1315, KINE 2301, KINE 3304, KINE 3306, KINE 3325, KINE 3388, KINE 4193, KINE 4319, KINE 4320, KINE 4321, LIST 4343, and EDUC 4340.

KINE 4659. PUBLIC HEALTH EXTENDED CUMULATIVE EXPERIENCE. 6 Hours.
Individualized practice-based public health experience in a professional public health-related setting (e.g., public health agency, nonprofit organization, legislative representative office, hospital) under the direct supervision of a public health professional. To be taken during the final semester prior to graduation. Prerequisite: KINE 2350, KINE 3350, KINE 3351, KINE 3352, KINE 3353, KINE 3354, KINE 4352, KINE 4355, KINE 4357 and MANA 4326 required. Corequisite: KINE 4354.

KINE 4689. FITNESS MANAGEMENT INTERNSHIP. 6 Hours.
Designed on an individual basis to allow the student to apply academic training in a professional fitness center under the direct supervision of a fitness specialist. Prerequisite: Current CPR certification, KINE 4315, KINE 4316, KINE 4387 (or concurrent enrollment), proof of sufficient professionally liability insurance, and permission of instructor.

KINE 4988. EXERCISE SCIENCE INTERNSHIP. 9 Hours.
Individualized academic training in an external professional exercise science setting (e.g., hospital, physical therapy, university laboratory) under the direct supervision of an exercise science professional. Prerequisite: KINE 4315, KINE 4316, KINE 4387 (or concurrent enrollment), current CPR certification, proof of sufficient professional liability insurance, and permission of instructor.

KINE 4989. FITNESS MANAGEMENT INTERNSHIP. 9 Hours.
Designed on an individual basis to allow the student to apply academic training in a professional fitness center under the direct supervision of a fitness specialist. Prerequisite: Current CPR certification, KINE 4315, KINE 4316, KINE 4387 (or concurrent enrollment), proof of sufficient professionally liability insurance, and permission of instructor.

KINE 5120. ATHLETIC TRAINING CLINICAL I. 1 Hour.
An introduction to clinical experiences in athletic training. Students will be introduced to ethical and confidentiality standards, basic clinical skills, communication and interprofessional practice skills, and cultural competency and humility. Prerequisite: Admission to the MSAT Program. Prerequisite: Admission to the MSAT Program.

KINE 5121. FUNCTIONAL ANATOMY AND BIOMECHANICS FOR THE ATHLETIC TRAINER II. 1 Hour.
This course builds on prerequisite knowledge of human musculoskeletal anatomy to describe human movement. Principles of biomechanics and kinesiology will guide an advanced, applied understanding of arthrokinematics, kinetic chain principles, functional movement, and the anatomy of common musculoskeletal injuries. Prerequisite: KINE 5229.

KINE 5122. DOCUMENTATION AND HEALTH INFORMATICS FOR THE ATHLETIC TRAINER. 1 Hour.
This course is designed to introduce and develop effective medical documentation skills. Health informatic concepts and disablement classification models will be introduced to support quality of care and to measure functional outcomes/treatment goals. Prerequisite: KINE 5120, KINE 5229, KINE 5230, KINE 5236.

KINE 5123. PHARMACOLOGY IN ATHLETIC TRAINING. 1 Hour.
This course will provide background information on pharmacological agents for the management of general medical and orthopedic conditions. Emphasis will be placed on the development of patient education in the areas of indication, contraindication, dosing, interaction, route of administration, and adverse reaction related to various medications and therapeutic agents. Prerequisite: KINE 5222, KINE 5237, KINE 5324, KINE 5325.

KINE 5125. IMMUNOLOGY. 1 Hour.
This course will include a brief review of the immune system and factors that affect immune function with emphasis on the effect of exercise and stress on muscle and overall immune function. The effect of nutrition and over-training on the immune system and associated syndromes/diseases will also be presented.

KINE 5128. CLINICAL DIAGNOSTIC PROCEDURES. 1 Hour.
This course provides fundamental clinical knowledge of commonly utilized diagnostic procedures and tests in medical practice. Emphasis will be placed on understanding of indications, contraindications, and clinical implications of diagnostic tests and understanding of normal and diseased states. Correlation and integration of test results into clinical examination findings and clinical plan of care will be addressed. Prerequisite: Admission to MSAT Program.
KINE 5130. Clinical Athletic Training II. 1 Hour.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of 250 hours of clinical experience under the supervision of a program approved clinical preceptor. Prerequisites: KINE 5420, KINE 5220, KINE 5120.

KINE 5140. Clinical Athletic Training III. 1 Hour.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of 250 hours of clinical experience under the supervision of a program approved clinical preceptor. Prerequisite: KINE 5130.

KINE 5150. Clinical Athletic Training IV. 1 Hour.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of 250 hours of clinical experience under the supervision of a program approved clinical preceptor. Prerequisite: KINE 5140.

KINE 5160. Clinical Athletic Training V. 1 Hour.
Clinical experiences in selected health care settings that provide students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of 250 hours of clinical experience under the supervision of a program approved clinical preceptor. Prerequisite: KINE 5150.

KINE 5170. JOURNAL CLUB IN PHYSIOLOGY. 1 Hour.
This course is designed to provide the students an opportunity to learn the art of critically reading and interpreting research articles. There will be emphasis on identifying strengths and weakness of research studies. There will also be an opportunity for the students to present their research study ideas and / or their preliminary findings of their research to the class. This will provide an opportunity for students to interact and receive / provide feedback regarding methodological approaches and interpretation of findings. Lastly, the student will learn how to prepare and deliver presentations to an audience.

KINE 5171. JOURNAL CLUB IN MOVEMENT & REHABILITATION SCIENCES. 1 Hour.
There is a growing emphasis on research and in particular student involvement in research at UTA. A fundamental skill that will be critical in the successful growth of student involvement in research is their ability to read and critically analyze / interpret journal articles. In addition to this important skill the students will also gain valuable experience by presenting their research study ideas and / or their preliminary findings of their research to the class. This will provide an opportunity for students to interact and receive / provide feedback regarding methodological approaches and interpretation of findings.

KINE 5190. SPECIAL TOPICS IN KINESIOLOGY. 1 Hour.
In-depth study of selected topics in physical education and exercise science. May be repeated when topics vary. Prerequisite: consent of instructor.

KINE 5191. INTERNSHIP IN CARDIOPULMONARY REHABILITATION. 1 Hour.
The student will complete 400 internship hours in an approved Cardiopulmonary rehabilitation setting. The student may take two semesters of KINE 5191 at 200 hours each. The student will be involved in patient/client assessment, training, rehabilitation, risk factor identification and lifestyle management services provided for individuals with or at risk for cardiovascular, pulmonary, and metabolic diseases. In addition the student will observe common cardiac surgeries and diagnostic procedures to better understand the pathophysiology and treatment of cardiovascular, pulmonary and metabolic disease.

KINE 5192. INTERNSHIP IN GRADED EXERCISE TESTING FOR HIGH RISK POPULATIONS. 1 Hour.
The student will complete 200 hours of graded exercise testing in an approved hospital or outpatient clinical setting which conducts exercise tests for high risk populations, including clients with suspected cardiopulmonary and metabolic diseases. The student will be exposed to noninvasive (echocardiography and graded exercise testing) and invasive methods used to diagnose cardiopulmonary and metabolic disease, including procedures conducted in cath and nuclear testing laboratories.

KINE 5193. PHYSIOLOGY OF EXERCISE INTERNSHIP. 1 Hour.
Individualized academic training in an external professional exercise physiology setting (e.g., physical medicine, athletic training, external laboratory, health/fitness facility, professional teams or sports management) under the direct supervision of an exercise science professional.

KINE 5194. RESEARCH IN KINESIOLOGY. 1 Hour.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 5195. INTERNSHIP IN GRADED EXERCISE TESTING FOR HIGH RISK POPULATIONS. 1 Hour.
The student will complete 200 hours of graded exercise testing in an approved hospital or outpatient clinical setting which conducts exercise tests for high risk populations, including clients with suspected cardiopulmonary and metabolic diseases. The student will be exposed to noninvasive (echocardiography and graded exercise testing) and invasive methods used to diagnose cardiopulmonary and metabolic disease, including procedures conducted in cath and nuclear testing laboratories.

KINE 5196. LABORATORY TECHNIQUES IN EXERCISE SCIENCE. 1 Hour.
A primary objective of this course is to further your understanding of exercise physiology. A second but equally important objective is to enhance your ability for critical thinking on exercise physiology through the scientific process. This includes formation of a research question, hypothesis, designing an experiment, and inferring conclusions from data. Secondary objectives include improving technology skills to assist collecting and analyzing data, and writing and oral communication skills for demonstrating understanding of the physiological principles.
KINE 5198. THESIS. 1 Hour.

KINE 5220. PREVENTATIVE AND ACUTE CARE TECHNIQUES IN ATHLETIC TRAINING. 2 Hours.
Classroom and laboratory experiences designed to provide students with formal instruction and evaluation in the prevention and acute care of activity related injuries and illnesses.

KINE 5221. CLINICAL ATHLETIC TRAINING II. 2 Hours.
This course will include clinical experiences and simulation, providing students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of clinical experience under the supervision of a program approved preceptor. The course will also provide opportunities for simulation and mastery of clinical skills. Prerequisite: KINE 5120, KINE 5229, KINE 5230, KINE 5236.

KINE 5222. CLINICAL ATHLETIC TRAINING III. 2 Hours.
This course will include clinical experiences and simulation, providing students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of clinical experience under the supervision of a program approved preceptor. Prerequisite: KINE 5121, KINE 5221, KINE 5231, KINE 5332.

KINE 5224. CLINICAL ATHLETIC TRAINING V. 2 Hours.
This course will include clinical experiences and simulation providing students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills as well as exam review and test-taking strategies. This course requires the completion of clinical experience under the supervision of a program approved preceptor. Prerequisite: KINE 5123, KINE 5306, KINE 5339, KINE 5343.

KINE 5226. PATHOPHYSIOLOGY AND PHARMACOLOGY II. 2 Hours.
Further study of acute and chronic illnesses and their response to, and impact on, physical activity. Discussion of pharmacological agents used in the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: KINE 5348.

KINE 5227. LITERATURE AND RESEARCH FOR THE ATHLETIC TRAINER. 2 Hours.
This course is an overview of concepts and procedures necessary for designing, conducting, and critically appraising research in Athletic Training from multiple research paradigms. The course will focus on the steps involved in the administration of a research project, including literature review, design, data collection and analysis. Prerequisite: KINE 5223, KINE 5234, KINE 5341, KINE 5356.

KINE 5228. SEMINAR IN ATHLETIC TRAINING. 2 Hours.
A capstone course designed to provide students the opportunity to synthesize and integrate the athletic training theories and concepts taught in the previous courses. Class discussions and projects will emphasize health care administration, professional development, cultural competence, transition to practice, inter-professional education and skills required of the entry-level athletic trainer. Prerequisite: KINE 5333, KINE 5227, KINE 5224.

KINE 5229. FUNCTIONAL ANATOMY AND BIOMECHANICS FOR THE ATHLETIC TRAINER. 2 Hours.
This course builds on prerequisite knowledge of human musculoskeletal anatomy to describe human movement. Principles of biomechanics and kinesiology will guide the understanding of mechanical and physiologic interactions between muscles and joints to form the basis of understanding normal and pathological movement. This course will specifically focus on identifying musculoskeletal landmarks through lecture, virtual cadaver learning, and hands-on palpation. Prerequisite: Admission to MSAT Program.

KINE 5230. FOUNDATIONS OF ORTHOPEDIC ASSESSMENT AND THERAPEUTIC INTERVENTIONS. 2 Hours.
This course is designed to develop foundational skills in orthopedic injury assessment and an understanding of the theory and the basic principles of diagnostic testing and therapeutic interventions for the rehabilitation and reconditioning of injuries and illnesses of those involved with physical activity. The focus of the course is on patient-centered care and will include principles related to the injury evaluation process, healing and pain physiology, and therapeutic interventions commonly utilized during the initial phases of acute and chronic injuries and conditions. The use of patient rated outcome scales along with quality improvement through planning, implementing, documenting, and evaluating clinical techniques used in orthopedic injury assessment and intervention programs will be discussed. Prerequisite: Admission to MSAT Program.

KINE 5231. FUNDAMENTALS OF ATHLETIC TRAINING I. 2 Hours.
This course is designed to provide the entry level athletic training student with classroom and laboratory experiences to provide an introduction to the profession and the role of athletic trainers in the overall health care environment. Emphasis will be placed on the epidemiology of orthopedic injuries, orthopedic trauma, emergency planning and care, cold and hot therapeutic modalities, and prevention of sudden death. Prerequisite: Admission to MSAT Program.

KINE 5232. FUNDAMENTALS OF ATHLETIC TRAINING II. 2 Hours.
This course is designed to provide the entry level athletic training student with classroom and laboratory experiences to further their development as an athletic trainer in a dynamic health care system. Emphasis will be placed on interprofessional practice, prevention of sudden death, nutrition for the physically active, ergonomics, body composition assessment, and fitness assessment/programming. Prerequisite: Admission to MSAT Program.

KINE 5233. THERAPEUTIC MODALITIES. 2 Hours.
This course is designed to provide the entry level athletic training student with classroom and laboratory experiences to provide an understanding of the theory and application of common therapeutic modalities for the treatment of musculoskeletal injuries. Emphasis will be placed on using the disablment model to plan, implement, and document the use of therapeutic modalities for the treatment and rehabilitation of injuries and illnesses of those involved with physical activity. Critical appraisal of research studies regarding the effectiveness and efficacy of therapeutic modalities will also be emphasized. Prerequisite: Admission to MSAT Program.
KINE 5234. CLINICAL REASONING AND DECISION MAKING. 2 Hours.
This course is designed to provide an understanding and application of theories and frameworks to clinical decision making. Students will work toward becoming an effective practitioner, able to make clinical decisions by studying clinical situations and how health care professionals make clinical decisions. Emphasis will be placed on problem solving strategies, decision making and evidence based rationale. Clinical reasoning will be developed while integrating knowledge and skills in management of complex clinical conditions using scientific and contemporary evidence-based clinical knowledge. Prerequisite: Admission into MSAT Program.

KINE 5235. ADVANCED FUNCTIONAL ASSESSMENT AND CORRECTIVE EXERCISE. 2 Hours.
This course will introduce functional movement assessments and corrective exercises as a preventative and therapeutic approach to musculoskeletal conditions. Specific topics will include advanced techniques designed to restore body symmetry and theories of functional movement. Evidence-based application of functional assessment, evaluation and assignment of corrective exercises will be emphasized. Prerequisite: KINE 5123, KINE 5306, KINE 5339, KINE 5343.

KINE 5236. PREVENTION, HEALTH PROMOTION, AND WELLNESS. 2 Hours.
This course will highlight the athletic trainer's role in promoting and maintaining the health and well-being of individuals and populations before and after injuries and illnesses. Emphasis will be placed on the epidemiology and prevention of musculoskeletal injuries, medial conditions, and chronic disease, emergency planning and care, environmental monitoring, nutrition and dietary interventions, biometrics, and other determinants including social, economic, and individual factors that affect health outcomes. Prerequisite: Admission to the MSAT Program.

KINE 5237. BEHAVIORAL AND POPULATION HEALTH. 2 Hours.
This course will highlight the athletic trainer's role in promoting and maintaining the health and well-being of individuals and populations. The athletic trainer's role in behavioral health will be emphasized, as well as development, implementation, and assessment of preventative measures to reduce injury risk and long-term health conditions across the lifespan. Emphasis will also be placed on population-level problems, including health risks and determinants as well as individual and behavioral factors that affect health outcomes. Prerequisite: KINE 5121, KINE 5221, KINE 5321, KINE 5332.

KINE 5238. ADVANCED MANUAL THERAPY AND INTEGRATED MODALITIES. 2 Hours.
This course is designed to introduce students to advanced manual therapy and integrated therapeutic modalities that are currently used in musculoskeletal rehabilitation. Both the theoretical and scientific basis of novel therapeutic interventions will be examined using an evidence-based approach. Emphasis will be placed on the foundational concepts and techniques associated with selection and application and how to make effective clinical decisions. Prerequisite: KINE 5123, KINE 5306, KINE 5339, KINE 5343.

KINE 5239. HEALTH CARE ADMINISTRATION. 2 Hours.
A study of the administrative issues and management theories that may be encountered in overseeing an athletic training/sports medicine program. Special emphasis is placed on the practical application of concepts related to legal liability, facility design and maintenance, financial and budget management, common health insurance models, insurance contract negotiation, strategic planning as a means to assess and promote organizational improvement, the impact of organizational structure on the daily operations of a healthcare facility, components of developing and implementing a basic business plan, medical record and documentation systems, federal and state infection control regulations and guidelines, risk management plan development, emergency action planning, and general day to day operations. Prerequisite: KINE 5123, KINE 5306, KINE 5339, KINE 5343.

KINE 5240. ADVANCED IMMEDIATE AND EMERGENCY CARE. 2 Hours.
This course is designed to provide knowledge and skills related to the immediate and emergent care of injuries/conditions in work settings of athletic trainers. Prerequisite: KINE 5123, KINE 5306, KINE 5339, KINE 5343.

KINE 5241. PERFORMANCE ENHANCEMENT FOR THE ATHLETIC TRAINER. 2 Hours.
Concepts, theories, and foundational background information will be presented to optimize human movement and performance. An emphasis on sports science, technology and data analysis will be discussed to enhance program design and patient goals. Prerequisite: KINE 5123, KINE 5306, KINE 5339, KINE 5343.

KINE 5242. SPECIAL TOPICS IN KINESIOLOGY. 2 Hours.
In-depth study of selected topics in physical education and exercise science. May be repeated when topics vary. Prerequisite: consent of instructor.

KINE 5243. INTERNSHIP IN CARDIOPULMONARY REHABILITATION. 2 Hours.
The student will complete 400 internship hours in an approved Cardiopulmonary rehabilitation setting. The student may take two semesters of KINE 5191 at 200 hours each. The student will be involved in patient/client assessment, training, rehabilitation, risk factor identification and lifestyle management services provided for individuals with or at risk for cardiovascular, pulmonary, and metabolic diseases. In addition the student will observe common cardiac surgeries and diagnostic procedures to better understand the pathophysiology and treatment of cardiovascular, pulmonary and metabolic disease.

KINE 5244. RESEARCH IN KINESIOLOGY. 2 Hours.
Individually approved research projects selected from the various areas of Kinesiology.
KINE 5298. THESIS. 2 Hours.

KINE 5300. RESEARCH METHODS IN KINESIOLOGY. 3 Hours.
This course is an overview of concepts and procedures necessary for designing, conducting, and analyzing research in Kinesiology from multiple research paradigms. The course will focus on the steps involved in the administration of a research project, including literature review, design, data collection and analysis.

KINE 5305. APPLIED STATISTICAL PRINCIPLES IN KINESIOLOGY. 3 Hours.
The course covers descriptive statistics, elementary probability, one- and two-population mean and variance comparisons, ANOVA, simple linear regression, and correlations. In addition, more advanced principles in parametric and non-parametric statistics will be emphasized.

KINE 5306. CLINICAL ATHLETIC TRAINING IV. 3 Hours.
This course will include clinical experiences, providing students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of clinical experience under the supervision of a program approved preceptor. Prerequisite: KINE 5222, KINE 5237, KINE 5324, KINE 5325.

KINE 5320. ADVANCED PHYSIOLOGY OF EXERCISE. 3 Hours.
Lecture and laboratory sessions are designed to investigate concepts of energy metabolism, lactate production and accumulation, energy expenditure, excess post exercise oxygen consumption, cardiovascular and temperature regulation, neuromuscular control, aerobic and anaerobic adaptations and ergonomics.

KINE 5321. THERAPEUTIC INTERVENTIONS I. 3 Hours.
This course will present the theoretical and scientific basis for traditional therapeutic interventions including taping, wrapping, padding, durable medical equipment, cryotherapy, thermotherapy, joint mobilizations, exercise, and manual therapy techniques commonly used in the treatment of orthopedic injuries and conditions. Discussions will include the study of physical rehabilitation theory including basic physics, physiological effects, indications, and contraindications for traditional therapeutic interventions. Emphasis will be placed on the critical analysis of clinical practice and existing research to establish quality patient care. This course includes the execution of clinical and home care plans, the use of patient rated outcome scales, and the integration of pharmacological interventions. Prerequisite: KINE 5120, KINE 5229, KINE 5230, KINE 5236.

KINE 5322. METABOLISM & EXERCISE BIOCHEMISTRY. 3 Hours.
This course will address the regulation of exercise metabolism as well as the distinct biochemical pathways through which energy transduction occurs. This will allow the student to appreciate not only the end result of metabolism, ultimately the production and maintenance of cellular ATP levels, but also the pathways that biological machines use to achieve ATP homeostasis. Calorimetry, respiratory exchange ratio, and substrate utilization during exercise will be assessed as part of the laboratory section of this course.

KINE 5323. MOTOR CONTROL AND LEARNING. 3 Hours.
This course advances on fundamental concepts of motor behavior and performance combining theoretical principles to a variety of realistic contexts to provide the basis of skilled behavior. Contemporary research in human motor behavior models is used to identify effective solutions to practical problems and to spark ideas for optimizing development, learning, and control of motor skills.

KINE 5324. ASSESSMENT AND MANAGEMENT II. 3 Hours.
This course will focus on examination and initial management of chronic musculoskeletal pathologies. Emphasis will be placed on diagnostic testing and development of a care plan. Prerequisite: KINE 5121, KINE 5221, KINE 5321, KINE 5332.

KINE 5325. THERAPEUTIC INTERVENTIONS II. 3 Hours.
This course will present the theoretical and scientific basis for traditional therapeutic interventions including taping, wrapping, padding, durable medical equipment, thermotherapy, electrotherapy, acoustic therapy, exercise, and manual therapy techniques commonly used in the treatment of orthopedic injuries and conditions. Discussions will include the study of physical rehabilitation theory including basic physics, physiological effects, indications, and contraindications for traditional therapeutic interventions. Emphasis will be placed on the critical analysis of clinical practice and existing research to establish quality patient care. This course includes the execution of clinical and home care plans, the use of patient rated outcome scales, and the integration of pharmacological interventions. Prerequisite: KINE 5121, KINE 5221, KINE 5321, KINE 5332.

KINE 5326. CARDIOCIRCULATORY PHYSIOLOGY OF EXERCISE. 3 Hours.
The structure and function of the cardiovascular and circulatory system will be studied, as well as, cardiac control, the cardiac cycle, cardiac output, hemodynamics, vascular resistance, arterial-venous oxygen difference and oxygen delivery and consumption. Heat production and thermal control during exercise will also be addressed in lecture and laboratory sessions.

KINE 5327. PULMONARY PHYSIOLOGY OF EXERCISE. 3 Hours.
Examines the structure and function of the pulmonary system including mechanics of breathing, lung capacity tests, pulmonary circulation, lung diseases, gas exchange, ventilation, diffusing capacity, acid/base balance, neural and chemical regulation of breathing, and blood flow with respect to rest and exercise values in healthy and diseased populations. Prerequisite: KINE 5320.

KINE 5328. NEUROMUSCULAR PHYSIOLOGY OF EXERCISE. 3 Hours.
The structure and function of muscle, including the motor unit, control and integration, central and peripheral modifiers of neuromuscular control and biochemical characteristics of fibers will be studied. These concepts will also be applied to concepts in strength and power development.
KINE 5329. STRENGTH & CONDITIONING IN SPORT AND PERFORMANCE. 3 Hours.
The course covers the physiology and biomechanics of strength training and conditioning. Additional topics include: testing and evaluation of athletes, resistance training techniques, training program design, and organization administration of a strength training facility. This course is designed to prepare students to take the CSCS certification examination. Prerequisite: current CPR certification, KINE 3300, KINE 3301, KINE 3315, or permission of the instructor.

KINE 5330. ENVIRONMENTAL PHYSIOLOGY OF EXERCISE. 3 Hours.
This course will address the impact of environmental stress (e.g., thermal, gravitational, microgravity, etc.) on the cardiovascular system. Related focus will be given to cardiac function, blood pressure regulation and thermoregulation. Topics will be addressed in lecture and laboratory sessions. *Doctoral students will be required to complete an additional research-related assignment.

KINE 5331. OBESITY & WEIGHT MANAGEMENT. 3 Hours.
This course is a review of the scientific literature on the causes and consequences of obesity. Topics include techniques for assessing body composition, factors promoting fat metabolism and deposition, traditional and non-traditional weight-loss programs, and adherence to weight-loss programs. Offered as KINE 4331 and KINE 5331. Credit will be granted only once. Prerequisite: KINE 5320 or permission of department.

KINE 5332. ASSESSMENT AND MANAGEMENT I. 3 Hours.
This course builds on the foundation from functional anatomy and biomechanics. Examination skills and immediate management interventions that apply to acute orthopedic and medical conditions are reviewed. Prerequisite: KINE 5240.

KINE 5333. SEMINAR IN ATHLETIC TRAINING. 3 Hours.
Graduate seminar discussing current issues in athletic training. Class discussions and projects will prepare students for entry-level practice.

KINE 5335. GRADED EXERCISE TESTING AND PRESCRIPTION. 3 Hours.
The knowledge and skills necessary for assessment of health history and appraisal, blood pressure, electrocardiogram, cardiovascular fitness and function will be acquired in lecture and laboratory sessions. Various test modalities and protocols will be discussed for health and diseased populations.

KINE 5336. ECG INTERPRETATION. 3 Hours.
Principles of electrocardiography will be explored, with emphasis on interpretation of resting and stress ECGs. Interpretation of dynamic rhythm strips will prepare students to work in cardiac rehabilitation and other allied health professions.

KINE 5337. STRENGTH AND CONDITIONING IN GENERAL POPULATIONS: HEALTH AND DISEASE. 3 Hours.
This course covers the physiology and biomechanics of strength training and conditioning as it applies to the general populations across the spectrum of health and disease. This includes: testing, evaluation, resistance training techniques and training program design for individuals with orthopedic injuries and rehabilitation concerns, metabolic conditions (e.g., diabetes), youth, elderly, and pregnant or post-prenatal women. This course is designed to prepare students to take the NSCA-CPT, and apply the skills needed to be a leader within the personal training and physical therapy career paths. Prerequisite: KINE 3300, KINE 3315, and KINE 3325.

KINE 5338. EXERCISE PRESCRIPTION FOR SPECIAL POPULATIONS. 3 Hours.
This course will address the pathophysiology of prevalent cardiovascular, metabolic and pulmonary diseases. Methods of exercise prescription and issues of concern will also be presented for these populations, as well as, low back pain, pregnancy, osteoporosis, cancer, children, older adults, fibromyalgia, multiple sclerosis and cardiac disease.

KINE 5339. ASSESSMENT AND MANAGEMENT III. 3 Hours.
This course introduces the study of acute and chronic illnesses and their response to, and impact on, physical activity. An emphasis will be placed on clinical examination skills and tools to screen patients for the presence of signs and symptoms related to acute and chronic illness. Prerequisite: KINE 5222, KINE 5237, KINE 5324, KINE 5325.

KINE 5340. ENVIRONMENTAL PHYSIOLOGY. 3 Hours.
This course will address the impact of environmental stress (e.g., thermal, gravitational, microgravity, etc.) on the cardiovascular system. Related focus will be given to cardiac function, blood pressure regulation and thermoregulation. Topics will be addressed in lecture and laboratory sessions.

KINE 5342. IMMEDIATE AND EMERGENCY CARE 2. 3 Hours.
This course is designed to build off of Immediate and Emergency Care 1 and include didactic and clinical experiences surrounding best practices in general emergency care and acute management of injuries and illness. Students will also be required to complete a scholarship project concerning general emergency care and acute management of injuries and illnesses. Clinical hours will be required in an emergency medicine environment.

KINE 5343. LITERATURE AND RESEARCH FOR THE ATHLETIC TRAINER. 3 Hours.
This course is an overview of concepts and procedures necessary for designing, conducting, and critically appraising research in Athletic Training from multiple research paradigms. The course will focus on the steps involved in the administration of a research project, including literature review, design, data collection and analysis. Prerequisite: KINE 5222, KINE 5237, KINE 5324, KINE 5325.

KINE 5344. SCHOLARSHIP IN ATHLETIC TRAINING PRACTICE. 3 Hours.
This course is designed to build off of the foundations of Literature and Research for the Athletic Trainer with further study of data collection and analysis as well as evidence-based practice principles. Students will be expected to complete a scholarship project related to athletic training practice. Prerequisite: KINE 5227.
KINE 5345. SPORT NUTRITION. 3 Hours.
Overview of nutrients necessary for healthful living and nutritional impact on reducing risk factors of lifestyle diseases. Application of nutrient recommendations for sports and exercise activities, including fluid replacement, sports supplements, and ergogenic aids. In addition, students will construct plans for dietary intake of athletes during training and competition for both endurance and resistance training. Offered as KINE 5345 and KINE 3301. Credit will be granted only once.

KINE 5346. ADVANCED FUNCTIONAL ASSESSMENT AND CORRECTIVE EXERCISE. 3 Hours.
Classroom and laboratory experiences that provide an introduction to functional assessment and corrective exercises. Specific topics will include an analysis of common biomechanics of movement and the evidence-based application of functional assessment and assignment of corrective exercises. Prerequisite: KINE 5420, KINE 5430, KINE 5431, KINE 5433, KINE 5434.

KINE 5347. HEAD AND SPINE ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the head and spine, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for head and spine injuries. Prerequisite: KINE 5335, KINE 5334.

KINE 5348. PATHOPHYSIOLOGY AND PHARMACOLOGY I. 3 Hours.
This course provides an introduction to the study of acute and chronic illnesses and their response to, and impact on, physical activity. Discussion of pharmacological principles will be incorporated as it relates to the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: KINE 5120, KINE 5231.

KINE 5349. HEAD AND SPINE ASSESSMENT AND REHABILITATION. 3 Hours.
Classroom and laboratory experiences that provide an introduction to functional assessment and corrective exercises. Specific topics will include an analysis of common biomechanics of movement and the evidence-based application of functional assessment and assignment of corrective exercises. Prerequisite: KINE 5420, KINE 5430, KINE 5431, KINE 5433, KINE 5434.

KINE 5350. APPLIED BIOMECHANICS. 3 Hours.
Application of Newtonian mechanics to human movement analysis. Biomechanical models using three-dimensional video and force plate data will be used to analyze human movement.

KINE 5351. LOWER EXTREMITY ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the lower extremities, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for lower extremity injuries. Prerequisite: Admission to MSAT Program.

KINE 5352. UPPER EXTREMITY ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the upper extremities, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for upper extremity injuries. Prerequisite: Admission to MSAT Program.

KINE 5353. LOWER EXTREMITY ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the lower extremities, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for lower extremity injuries. Prerequisite: Admission to MSAT Program.

KINE 5354. UPPER EXTREMITY ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the upper extremities, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for upper extremity injuries. Prerequisite: Admission to MSAT Program.

KINE 5355. PATHOPHYSIOLOGY & PHARMACOLOGY II. 3 Hours.
This course provides further study of acute and chronic illnesses and their response to, and impact on, physical activity. Discussion of pharmacological principles will be incorporated as it relates to the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: KINE 5348.

KINE 5356. HEAD AND SPINE ASSESSMENT AND REHABILITATION. 3 Hours.
This course will focus on common orthopedic injuries involving the head and spine, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Additionally, students will learn to implement rehabilitation programs and therapeutic techniques for head and spine injuries. Prerequisite: KINE 5353, KINE 5354.

KINE 5357. PREVENTATIVE MEDICINE AND POPULATION HEALTH. 3 Hours.
This course will highlight the athletic trainer’s role in promoting and maintaining the health and well-being of individuals and populations. Development, implementation, and assessment of preventative measures to reduce injury risk and long-term health conditions across the lifespan will be addressed. Emphasis will also be placed on population-level problems, including health risks and determinants as well as individual and behavioral factors that affect health outcomes. Prerequisite: Admission to MSAT Program.

KINE 5358. FUNDAMENTAL PRINCIPLES OF INTEGRATIVE PHYSIOLOGY. 3 Hours.
This course is designed to provide a fundamental understanding of human physiology. Physiological function is a complex process that involves a complex interaction among the various physiological systems. As such there will be an emphasis on the integration of cellular, cardiovascular, renal, autonomic, respiratory, and endocrine physiology.

KINE 5362. PRINCIPLES OF MOVEMENT NEUROSCIENCE. 3 Hours.
This course focuses on principles of movement that have emerged from the computational study of motor control. The principles and application to processes such as motor planning, control, estimation, prediction and learning are explored.

KINE 5363. CONDITIONS OF THE MOTOR SYSTEM IN CHILDHOOD. 3 Hours.
This course explores a prevalent dysfunction of the motor system in childhood, known as Developmental Coordination Disorder (DCD). This class explores potential causes of DCD, common mechanisms and impairments, intervention methods and their effectiveness, and associated co-morbidities. In addition, students will understand the current state of research in the field and understand future avenues for research.

KINE 5364. CURRENT PERSPECTIVES IN MOTOR LEARNING AND CONTROL. 3 Hours.
This course explores five aspects of the new directions in research in the Motor Learning and Control field: Perception-Action mechanisms, Dynamical systems, Motor disorders, Learning and intervention for motor behavior, and neural mechanisms.
KINE 5365. ADVANCED MOTOR DEVELOPMENT. 3 Hours.
This course explores the current field of research in Motor Development applied to typical and special populations. More specifically, it discusses issues related to motor skill learning in childhood, the development of motor control, the relationship between motor competence and general health, and how lack of appropriate motor skills affect several domains of development (Developmental Coordination Disorder). To that, we use current research articles that discuss each one of these topics from different perspectives.

KINE 5370. GLOBAL HEALTH. 3 Hours.
Today’s public health practice requires an awareness of health threats beyond U.S. borders. “Global health” implies health concerns and solutions that are shared worldwide. In this course, students will study global health priorities among different populations, cultures, and health systems. Students will examine health challenges and disease threats faced in resource-constrained countries, and the roles of health determinants, socioeconomic and health equity in improving health outcomes. In addition, students will learn about the foundational elements of global health, including globalization and health, water, sanitation, the burden of infectious and chronic diseases, human rights and global health partnerships.

KINE 5371. PUBLIC HEALTH PROGRAM PLANNING AND EVALUATION. 3 Hours.
Before we can effectively receive funding and implement programs that benefit our communities, we have to answer many questions. Who is the target audience? What are the program’s goals? What are the intended outcomes of the program? How can we measure program effectiveness? Program evaluation is the methodology to developing scientifically sound answers to these questions. This course will teach you how evaluators work with stakeholders and project teams to tailor an intervention to a target audience, and document program activities, outcomes and impact on a community health issue. This course will allow you to have hands-on experience designing and conducting program evaluation.

KINE 5372. INTRODUCTION TO EPIDEMIOLOGY. 3 Hours.
By participating in this course students will learn the critical role that epidemiology plays in preventing and controlling disease. This course provides students with a foundation of the methods and concepts used in epidemiology. Students will learn the measures used in epidemiology and apply principles of causality, study design, disease surveillance, and outbreak investigations. In addition, students will be introduced to sources of data used in epidemiologic studies. The major course project will provide students with hands-on experience using skills sought by employers in public health agencies.

KINE 5373. INTRODUCTION TO ENVIRONMENTAL AND OCCUPATIONAL HEALTH. 3 Hours.
This course provides an overview of the critical environmental health problems in industrialized and developing countries, discusses their causes and solutions, and emphasizes the role of science in environmental policy decisions. Topics include climate change, water and air contaminants, injury risk and prevention in the workplace, food and water-borne disease, toxic metals, and how the body reacts to environmental pollutants.

KINE 5374. RACE, ETHNICITY AND HEALTH. 3 Hours.
Despite advances in medicine and health policies, racial and ethnic health disparities persist. Americans of color have higher mortality rates and an unequal burden of many health concerns compared to their white counterparts. Such health inequities compromise the cultural and economic fabric of our country. This course will discuss the complex relationship between socioeconomic status, race/ethnicity, and health. In addition, this course will examine the economic and societal threats that health disparities pose to our communities and nation, as well as policies and approaches to addressing such disparities.

KINE 5375. COMMUNITY HEALTH. 3 Hours.
This course explores population health, providing students with learning experiences that facilitate an understanding of what public health is and why it is important. Course activities guide students in exploring their role in population health dynamics of their communities. The course will provide students an investigation of theoretical and evidence-based strategies designed to improve community health from population-based approaches. Students will then narrow those areas of focus to contemplate real-world, practice-based learning experiences.

KINE 5376. INTRODUCTION TO BIOSTATISTICS. 3 Hours.
The course will introduce students to analysis skills applied in the public health sciences. Students will learn how to apply descriptive statistics, t-tests, ANOVA, correlation, multiple regression, and non-parametric statistics to public health problems.

KINE 5377. INTRODUCTION TO HEALTH SYSTEMS AND POLICY. 3 Hours.
What is “population health” and why does it matter? Why are U.S. health care costs so high? How is the U.S. health system financed? What are the basic principles of health insurance? Who are the uninsured? It is critical that public health professionals be able to answer these questions and understand the basic functions that comprise the U.S. health care system. This course will help students answer these questions through an introduction to health systems and policy, including the delivery, quality and costs of health care for individuals and populations. The course will also examine the structure, processes and outcomes of health services, financing, organization, outcomes and accessibility of care.

KINE 5378. FOUNDATIONS OF PUBLIC HEALTH. 3 Hours.
This course teaches students what public health is and how it works. The mission of public health is to assure conditions in which people can be healthy. This course will present the history, frameworks, values, and goals of public health which support this mission. Students will study the principles and core responsibilities of public health from a multidisciplinary perspective, with emphasis on the public health core functions of assessment, policy development, and assurance. This course will provide the foundation for further studies in public health practice through developing public health problem solving and decision-making skills through case studies and applied coursework.
KINE 5379. FUNDAMENTALS OF POPULATION HEALTH. 3 Hours.
Public health is charged with advancing health while reducing health care costs. This requires us to move away from a reactionary model of health care delivery and towards models of disease prevention and health promotion. Students will consider how collaborations among organizations within and outside the health care system, and the integration of public health into clinical care, impacts population health. The course will use case studies and applied learning to discuss the role of incentives, financing, data, measurement, structure of health care delivery, and policy in advancing population health.

KINE 5380. URBAN COMMUNITY HEALTH ASSESSMENT. 3 Hours.
We must learn the health needs in a community before we can address those needs to improve the health of the community. Assessment skills allow us to learn what health needs exist in a community by using sounds scientific methods to collect evidence about gaps in health. In this course, students will apply quantitative and qualitative methods, data analysis, community mobilization, and capacity building to assess community health needs and strategies for health improvement.

KINE 5381. SOCIAL AND BEHAVIORAL EPIDEMIOLOGY. 3 Hours.
Social epidemiology considers how social determinants impact population health. Behavioral epidemiology studies how lifestyle and behaviors affect health conditions. The class will explore how social, political, cultural and economic forces influence our health and health behaviors. The course will focus on social and health inequalities, and resulting health behaviors. Theory from social science is integrated with epidemiological methods to learn how social circumstances influence behavior and health, and determine how we can target interventions to reduce health inequities in our community, nation and world. Prerequisite: KINE 5372 Introduction to Epidemiology.

KINE 5382. CHRONIC DISEASE EPIDEMIOLOGY. 3 Hours.
Chronic diseases are the leading causes of death in the United States and globally. Chronic diseases, such as cardiovascular disease, cancer, diabetes, HIV/AIDS, respiratory conditions, and neurologic disorders have devastating consequences for population health. This class will explore and apply epidemiologic methods which help identify strategies to prevent and treat chronic diseases, emphasizing modifiable risk factors. Coursework will aim to increase student understanding of how epidemiologic methods are used to identify determinants of chronic diseases, and how to identify and target interventions to reduce the burden of chronic disease locally, nationally, and across the globe. Prerequisite: KINE 5372.

KINE 5383. COMMUNITY-BASED INTERNSHIP. 3 Hours.
This course is a required 200-hour service learning experience for Master of Public Health (MPH) students which combines specific learning objectives with reflection. The student will apply skills learned in the MPH program in a "real-life" environment. The student will complete a defined project, mutually agreed upon between the MPH Graduate Advisor and the partner organization, which benefit both the student and the partner organization. Students will keep a log of hours, work performed, and competencies addressed throughout the internship experience, and comply with specified reporting periods. Prerequisite: KINE 5372, KINE 5373, KINE 5376, KINE 5305, KINE 5377, KINE 5375, KINE 5371, and KINE 5378.

KINE 5384. PUBLIC HEALTH CAPSTONE EXPERIENCE. 3 Hours.
This course is the culmination of all previous coursework for Master of Public Health (MPH) students, requiring the student to complete a final paper, poster and oral presentation about the project completed as part of the Community-Based Internship. In addition, the student will complete a professional portfolio comprised of work illustrating the competencies learned during the MPH program and applied during the Internship. Prerequisite: KINE 5372, KINE 5373, KINE 5376, KINE 5305, KINE 5377, KINE 5375, KINE 5371, KINE 5378, and KINE 5383, and completion of all MPH coursework required for graduation, or concurrent enrollment in final courses needed for graduation.

KINE 5385. COMMUNICATION AND HEALTH. 3 Hours.
Students will learn how interpersonal, organizational and mass media communications influence health behaviors and health outcomes. Students will study theories and applied techniques of interpersonal communication in health care and health education settings, as well as the theory and practice of media in achieving desired effects from public health messages.

KINE 5386. BIG DATA FOR EPIDEMIOLOGY. 3 Hours.
Big Data have revolutionized science, including the future of public health. This course prepares future public health practitioners to integrate knowledge of epidemiology methods with the data analytics savvy. Students will gain competence in conducting analysis using large, commonly used health-related databases. Learn how to use large datasets to advance your practice of epidemiology by enrolling in this course. Prior completion or concurrent enrollment in KINE 5372.

KINE 5387. INFECTIOUS DISEASE EPIDEMIOLOGY. 3 Hours.
From Ebola to COVID-19, tuberculosis to hepatitis A--every outbreak has a team of behind-the-scenes disease detectives tracking its source and pathways. Students will learn the methods of infectious disease epidemiology, studying outbreak investigations, disease surveillance, study designs, laboratory diagnosis, and dynamics of transmission. Students must have completed KINE 5372 Introduction to Epidemiology to enroll in this course. Prerequisite: Prior or concurrent enrollment in KINE 5372.

KINE 5388. GLOBAL HEALTH ON-SITE EXPERIENCE ABROAD. 3 Hours.
Students will study the factors impacting health for populations in a selected country outside of the U.S. Then, students will travel to that country at the end of the course for a real life experience learning from people who are impacted by, and/or who help address the health factors in that region. Prerequisite: MPH student or Instructor Permission.

KINE 5389. RESEARCH MANUSCRIPT SUBMISSION. 3 Hours.
The student will collect scientific data in the Physiology of Exercise laboratories or in a work-related environment under the supervision of a faculty member. The student will analyze the data, write a manuscript, and submit a manuscript for publication in a peer-reviewed journal. This course must be taken in the final semester of graduate work and requires approval of the Graduate Advisor.
KINE 5390. SPECIAL TOPICS IN KINESIOLOGY. 3 Hours.
In-depth study of selected topics in physical education and exercise science. May be repeated when topics vary. Prerequisite: consent of instructor.

KINE 5392. SPECIAL TOPICS IN KINESIOLOGY. 3 Hours.

KINE 5393. PHYSIOLOGY OF EXERCISE INTERNSHIP. 3 Hours.
Individualized academic training in an external professional exercise physiology setting (e.g., physical medicine, athletic training, external laboratory, health/fitness facility, professional teams or sports management) under the direct supervision of an exercise science professional.

KINE 5394. RESEARCH IN KINESIOLOGY. 3 Hours.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 5396. RESEARCH IN ATHLETIC TRAINING. 3 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Prerequisite: consent of the instructor.

KINE 5397. INTERNSHIP ATHLETIC TRAINING. 3 Hours.
Individualized clinical experience in an external athletic training or other medical setting (e.g., physician’s office, rehabilitation clinic, professional sports teams) under the direct supervision of a health care professional.

KINE 5398. THESIS. 3 Hours.
This is a thesis course for student to take to satisfy their MS in Exercise Science degree requirements.

KINE 5420. CONCEPTS IN ATHLETIC TRAINING. 4 Hours.
Classroom and laboratory experiences that provide an introduction to the profession of Athletic Training with an emphasis on prevention and acute care of activity related injuries and illnesses. Specific topics will include injury prevention strategies; emergency first aid and acute care; superficial application of therapeutic modalities; nutritional considerations; and environmental considerations.

KINE 5430. ORTHOPEDIC ASSESSMENT I. 4 Hours.
A study of the common orthopedic injuries involving the lower extremities, with a special emphasis on recognition, evaluation, diagnosis, and initial management. Prerequisites: KINE 5120, KINE 5220, and KINE 5420.

KINE 5431. Orthopedic Assessment II. 4 Hours.
A study of the common orthopedic injuries involving the upper extremities, spine, head, and face with a special emphasis on recognition, evaluation, diagnosis, and initial management. Prerequisite: KINE 5430.

KINE 5432. PATHOPHYSIOLOGY AND PHARMACOLOGY. 4 Hours.
A study of acute and chronic illnesses and their response to, and impact on, physical activity. Discussion of pharmacological agents used in the care of general illnesses and musculoskeletal disorders in the physically active. Prerequisite: KINE 5430, KINE 5433, KINE 5130.

KINE 5498. THESIS. 4 Hours.

KINE 5520. CLINICAL ATHLETIC TRAINING VI. 5 Hours.
This course will include clinical experiences providing students the opportunity to integrate their knowledge and skills into actual patient care. Emphasis will be placed on the development of clinical decision-making skills. This course requires the completion of clinical experience under the supervision of a program approved preceptor. Prerequisite: KINE 5123, KINE 5306, KINE 5339, KINE 5343.

KINE 5598. THESIS. 5 Hours.

KINE 5647. CLINICAL TEACHING PHYSICAL EDUCATION EC-12. 6 Hours.
This supervised course is designed as a culminating field experience of pre-service professional preparation giving an opportunity to practically apply theoretical and pedagogical knowledge in school settings with a mentor teacher. Applied experience will be attained in both Elementary and Secondary settings. Additionally, a field-research project will be required to be arranged with course supervisor. Criminal background check required. Prerequisite: KINE 1315, KINE 2301, KINE 2302, KINE 3304, KINE 3388, KINE 4319, KINE 4320, KINE 4321, EDUC 5310, EDUC 5314, and LIST 5345.

KINE 5693. PHYSIOLOGY OF EXERCISE INTERNSHIP. 6 Hours.
Individualized academic training in an external professional exercise physiology setting (e.g., physical medicine, athletic training, external laboratory, health/fitness facility, professional teams or sports management) under the direct supervision of an exercise science professional.

KINE 5694. RESEARCH IN KINESIOLOGY. 6 Hours.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 5698. THESIS. 6 Hours.

KINE 5994. RESEARCH IN KINESIOLOGY. 9 Hours.
Individually approved research projects selected from the various areas of Kinesiology.

KINE 6100. SEMINAR IN KINESIOLOGY. 1 Hour.
Implements the research process with faculty guidance. Students will attend regularly scheduled lectures from internal and external faculty members. Learning activities based on student and faculty interest.
KINE 6105. LABORATORY TECHNIQUE ROTATIONS IN KINESIOLOGY I. 1 Hour.
A primary objective of this course is to further your understanding of lab work in Kinesiology. A second objective is to enhance your ability for critical thinking in Kinesiology through the scientific process. This includes formation of a research question, hypothesis, designing an experiment, and inferring conclusions from data. Secondary objectives include improving technology skills to assist collecting and analyzing data, and writing and oral communication skills for demonstrating understanding of the kinesiology principles. Prerequisite: Consent of faculty.

KINE 6106. LABORATORY TECHNIQUE ROTATIONS IN KINESIOLOGY II. 1 Hour.
A primary objective of this course is to further your understanding of lab work in Kinesiology. A second objective is to enhance your ability for critical thinking in Kinesiology through the scientific process. This includes formation of a research question, hypothesis, designing an experiment, and inferring conclusions from data. Secondary objectives include improving technology skills to assist collecting and analyzing data, and writing and oral communication skills for demonstrating understanding of the kinesiology principles. This section must occur in a different laboratory than KINE 6105. Prerequisite: KINE 6105 and consent of faculty.

KINE 6126. JOURNAL CLUB IN EX PHYSIO. 1 Hour.
This course is designed to provide doctoral students an opportunity to learn the art of critically reading and interpreting research articles. There will be emphasis on identifying strengths and weakness of research studies. There will also be an opportunity for the students to present their research study ideas and/or their preliminary findings of their research to the class. This will provide an opportunity for students to interact and receive/provide feedback regarding methodological approaches and interpretation of findings. Lastly, the student will learn how to prepare and deliver presentations to an audience. Prerequisite: Instructor Approval.

KINE 6170. JOURNAL CLUB IN PHYSIOLOGY. 1 Hour.
There is a growing emphasis on research and in particular student involvement in research at UTA. A fundamental skill that will be critical in the successful growth of student involvement in research is their ability to read and critically analyze/interpret journal articles. In addition to this important skill set the students will also gain invaluable experience by presenting their research study ideas and/or their preliminary findings of their research to the class. This will provide an opportunity for students to interact and receive/provide feedback regarding methodological approaches and interpretation of findings. *Doctoral students will be required to complete an additional research related topic.

KINE 6171. JOURNAL CLUB IN MOVEMENT & REHABILITATION SCIENCES. 1 Hour.
There is a growing emphasis on research and in particular student involvement in research at UTA. A fundamental skill that will be critical in the successful growth of student involvement in research is their ability to read and critically analyze/interpret journal articles. In addition to this important skill set the students will also gain invaluable experience by presenting their research study ideas and/or their preliminary findings of their research to the class. This will provide an opportunity for students to interact and receive/provide feedback regarding methodological approaches and interpretation of findings. *Doctoral students will be required to complete an additional research related topic.

KINE 6194. RESEARCH IN KINESIOLOGY. 1 Hour.
Individually approved research projects selected from the various areas of Kinesiology. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: Consent of Instructor.

KINE 6293. GRANT WRITING. 2 Hours.
Students will learn strategies associated with grant applications. Students will prepare an individual proposal associated with a research grant application. Although submission for funding (e.g., pre-doctoral fellowship) is not required for the course, students will develop and complete a grant application.

KINE 6294. RESEARCH IN KINESIOLOGY. 2 Hours.
Individually approved research projects selected from the various areas of Kinesiology. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: Consent of the instructor.

KINE 6303. PROFESSIONAL DEVELOPMENT. 3 Hours.
The philosophy and methods of conducting a university class for undergraduates are examined. Specific tips and suggestions for managing course materials, lectures, audiovisual aids, grading, etc. will be presented. The role of the university instructor as a researcher as well as a teacher will be elaborated. Specific topics will include the ethics and regulation of research, service as a journal referee, corresponding with peers, participating in a research team, manuscript preparation, presentation at professional conferences, and submitting material for publication.

KINE 6320. ADVANCED PHYSIOLOGY OF EXERCISE. 3 Hours.
Lecture and laboratory sessions are designed to investigate concepts of energy metabolism, lactate production and accumulation, energy expenditure, excess post exercise oxygen consumption, cardiovascular and temperature regulation, neuromuscular control, aerobic and anaerobic adaptations and ergonomics. *Doctoral students will be required to complete an additional research related topic. Prerequisite: Instructor Approval.

KINE 6322. METABOLISM & EXERCISE BIOCHEMISTRY. 3 Hours.
This course will address the regulation of exercise metabolism as well as the distinct biochemical pathways through which energy transduction occurs. This will allow the student to appreciate not only the end result of metabolism, ultimately the production and maintenance of cellular ATP levels, but also the pathways that biological machines use to achieve ATP homeostasis. Calorimetry, respiratory exchange ratio, and substrate utilization during exercise will be assessed as part of the laboratory section of this course. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.
KINE 6323. MOTOR CONTROL AND LEARNING. 3 Hours.
This course advances on fundamental concepts of motor behavior and performance combining theoretical principles to a variety of realistic contexts to provide the basis of skilled behavior. Contemporary research in human motor behavior models is used to identify effective solutions to practical problems and to spark ideas for optimizing development, learning, and control of motor skills. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6326. CARDIOCIRCULATORY PHYSIOLOGY OF EXERCISE. 3 Hours.
The structure and function of the cardiovascular and circulatory system will be studied, as well as, cardiac control, the cardiac cycle, cardiac output, hemodynamics, vascular resistance, arterial-venous oxygen difference and oxygen delivery and consumption. Heat production and thermal control during exercise will also be addressed in lecture and laboratory sessions. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6327. PULMONARY PHYSIOLOGY OF EXERCISE. 3 Hours.
Examines the structure and function of the pulmonary system including mechanics of breathing, lung capacity tests, pulmonary circulation, lung diseases, gas exchange, ventilation, diffusing capacity, acid/base balance, neural and chemical regulation of breathing, and blood flow with respect to rest and exercise values in healthy and diseased populations. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6328. NEUROMUSCULAR PHYSIOLOGY OF EXERCISE. 3 Hours.
The structure and function of muscle, including the motor unit, control and integration, central and peripheral modifiers of neuromuscular control and biochemical characteristics of fibers will be studied. These concepts will also be applied to concepts in strength and power development. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6330. ENVIRONMENTAL PHYSIOLOGY OF EXERCISE. 3 Hours.
This course will address the impact of environmental stress (e.g., thermal, gravitational, microgravity, etc.) on the cardiovascular system. Related focus will be given to cardiac function, blood pressure regulation and thermoregulation. Topics will be addressed in lecture and laboratory sessions. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6338. EXERCISE PRESCRIPTION FOR SPECIAL POPULATIONS. 3 Hours.
This course will discuss the pathophysiology of cardiovascular, metabolic and pulmonary diseases. Methods of exercise prescription and issues of concern will also be presented for these populations, as well as, low back pain, pregnancy, osteoporosis, cancer, children, older adults, fibromyalgia, multiple sclerosis, and cardiac disease. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5338 and KINE 6338. Prerequisite: Instructor Approval.

KINE 6350. APPLIED BIOMECHANICS. 3 Hours.
Application of Newtonian mechanics to human movement analysis. Biomechanical models using three-dimensional video and force plate data will be used to analyze human movement. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6360. FUNDAMENTAL PRINCIPLES OF INTEGRATIVE PHYSIOLOGY. 3 Hours.
This course is designed to provide a fundamental understanding of human physiology. Physiological function is a complex process that involves a complex interaction among the various physiological systems. As such there will be an emphasis on the integration of cellular, cardiovascular, renal, autonomic, respiratory, and endocrine physiology. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6362. PRINCIPLES OF MOVEMENT NEUROSCIENCE. 3 Hours.
This course focuses on principles of movement that have emerged from the computational study of motor control. The principles and application to processes such as motor planning, control, estimation, prediction and learning are explored. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5362 and KINE 6362.

KINE 6363. CONDITIONS OF THE MOTOR SYSTEM IN CHILDHOOD. 3 Hours.
This course explores a prevalent dysfunction of the motor system in childhood, known as Developmental Coordination Disorder (DCD). This class explores potential causes of DCD, common mechanisms and impairments, intervention methods and their effectiveness, and associated co-morbidities. In addition, students will understand the current state of research in the field and understand future avenues for research. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5363 and KINE 6363.

KINE 6364. CURRENT PERSPECTIVES IN MOTOR LEARNING AND CONTROL. 3 Hours.
This course explores four aspects of the new directions in research in the Motor Learning and Control field: Perception-Action mechanisms, Dynamical systems, Motor disorders, Learning and intervention for motor behavior, and neural mechanisms. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5364 and KINE 6364.

KINE 6365. ADVANCED MOTOR DEVELOPMENT. 3 Hours.
This course explores the current field of research in Motor Development applied to typical and special populations. More specifically, it discusses issues related to motor skill learning in childhood, the development of motor control, the relationship between motor competence and general health, and how lack of appropriate motor skills affect several domains of development (Developmental Coordination Disorder). To that, we use current research articles that discuss each one of these topics from different perspectives. *Doctoral students will be required to complete an additional research-related assignment. A student may not receive course credit for both KINE 5365 and KINE 6365.
KINE 6389. RESEARCH MANUSCRIPT SUBMISSION. 3 Hours.
The student will collect scientific data in the Physiology of Exercise laboratories or in a work-related environment under the supervision of a faculty member. The student will analyze the data, write a manuscript, and submit a manuscript for publication in a peer-reviewed journal. This course must be taken in the final semester of graduate work and requires approval of the Graduate Advisor. *Doctoral students will be required to complete an additional research-related assignment. Prerequisite: Instructor Approval.

KINE 6394. RESEARCH IN KINESIOLOGY. 3 Hours.
Individually approved research projects selected from the various areas of Kinesiology. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: Consent of the instructor.

KINE 6399. DISSERTATION. 3 Hours.
Preparation and submission of a doctoral dissertation in an area of kinesiology. Graded R/F only. Prerequisite: Admission to candidacy for the Ph.D. in Kinesiology.

KINE 6694. RESEARCH IN KINESIOLOGY. 6 Hours.
Individually approved research projects selected from the various areas of Kinesiology. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: Consent of the instructor.

KINE 6699. DISSERTATION. 6 Hours.
Preparation and submission of a doctoral dissertation in an area of kinesiology. Graded R/F only. Prerequisite: Admission to candidacy for the Ph.D. in Kinesiology.

KINE 6999. DISSERTATION. 9 Hours.
Preparation and submission of a doctoral dissertation in an area of kinesiology. Graded R/F only. Prerequisite: Admission to candidacy for the Ph.D. in Kinesiology.

KINE 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student’s degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Kinesiology - Graduate Programs

Master of Science in Athletic Training - Mission and Goals

PROGRAM MISSION

The Master of Science in Athletic Training Program at the University of Texas at Arlington is committed to providing educational advancement and excellence to students pursuing a career in athletic training. The program emphasizes critical inquiry, scientific theory, skill acquisition and application, and professional behaviors that advance health and the human condition across diverse populations of patients. Faculty and preceptor mentoring produce graduates that are competent, creative, and caring clinicians who enhance best-practice patient-centered healthcare, exercise sound judgment, and value lifelong learning.

The Master of Science in Athletic Training (MSAT) is guided by program goals and student outcomes:

Program Goal #1

Provide didactic and clinical educational experiences that provide students with the knowledge, skills, and abilities needed to practice in a variety of practice settings and with a diverse population of patients.

1.1: Provide quality didactic education that incorporates the knowledge, skills, and abilities needed to practice as an athletic trainer.

1.2: Provide quality clinical education that supports students’ development of the knowledge, skills, and abilities needed to practice as an athletic trainer.

1.3: Provide clinical learning environments that support student development.

1.4: Students will gain experiences in a variety of practice settings.

1.5: Students will engage in patient encounters with a diverse population of patients, including: throughout the lifespan, of different sexes, with different socioeconomic statuses, of varying levels of activity & athletic ability, who participate in nonsport activities.

Program Goal #2

Recruit, admit, retain, and graduate individuals who meet or exceed the MSAT admissions standards and are committed to a career in athletic training.

2.1: Entering students’ GPA will meet or exceed the requirement each year.

2.2: Students will progress through the MSAT according to the curricular plan.

2.3: Graduates will pursue careers in athletic training.

Program Goal #3

Faculty will continually develop contemporary expertise in routine areas of athletic training and will engage in scholarship.

3.1: Faculty will develop and maintain contemporary expertise in areas of athletic training practice.

3.2: Faculty will engage in scholarship as defined by Boyer’s model of scholarship.

Student Outcome #1

Students will demonstrate the knowledge, skills, clinical abilities and professional behaviors needed to practice with diverse populations of patients.

1.1: Students will demonstrate increased ability to engage in critical inquiry throughout the program.

1.2: Students will demonstrate competence in scientific theory and other knowledge required of entry-level athletic trainers.

1.3: Students will demonstrate competence in the acquisition and application of clinical skills.

1.4: Students will demonstrate appropriate professional behaviors according to the NATA Code of Ethics and BOC Standards of Professional Practice.

1.5: Students will demonstrate the ability to serve patients with quality care regardless of socioeconomic background, gender, age, ethnicity, race, religion, sexual orientation, or gender identity.

Student Outcome #2

Students and graduates will become competent clinicians who enhance best-practice healthcare, exercise sound judgment, and value lifelong learning.
2.1: Graduates will demonstrate competence and the ability to engage in best practices and exercise sound clinical judgment.

2.2: Students will progressively demonstrate competence and the ability to engage in best practices and exercise sound clinical judgment throughout the program.

2.3: Alumni will demonstrate a value for lifelong learning.

**Student Outcome #3**

Students and graduates will become creative, caring clinicians who engage in patient-centered healthcare.

3.1: Students will demonstrate creativity in clinical practice.

3.2: Students will display a caring demeanor in their clinical practice.

3.3: Graduates will display a caring demeanor in their clinical practice.

3.4: Students will demonstrate patient-centeredness in their clinical practice.

3.5: Graduates will demonstrate patient-centeredness in their clinical practice.

For specific information regarding the Master of Science in Athletic Training in the Department of Kinesiology, please contact us at 817.272.6735 or by email at msat@uta.edu.

**Master of Science in Exercise Science - Objective**

The Kinesiology Department’s Master’s of Science Program provides students with advanced level training in Exercise Science. Students will interact with world-renowned faculty at the forefront of research and discovery, to accomplish three distinct objectives:

a. Provide students with the academic and research skills needed for doctoral study in integrative and applied physiology, movement and rehabilitation sciences, or physical education.

b. Prepare students for employment in clinically oriented environments, associated with physical activity and rehabilitation such as cardiac rehabilitation, strength and conditioning, or sports medicine.

c. Enhance the theoretical background and skills of students seeking employment in Physical and Health Education.

Students can choose to (1) work directly with a faculty member to complete a manuscript project or a thesis OR (2) complete an internship during the final semester in a clinical environment.

For specific information regarding the Master of Science in Exercise Science in the Department of Kinesiology, please contact us at 817.272.3288 or by email at PhDKine@uta.edu.

**Master of Public Health**

**Program Mission**

Educate future public health professionals so they may improve the health of urban and underserved communities locally, nationally, and globally by addressing health determinants and applying core public health functions.

**Values of the UTA Public Health**

- Health Equity
- Opportunity for Health is a Human Right
- Diversity and Inclusion
- Engagement
- Student Success
- Community Voice

**Objective of the Master of Public Health Degree**

The Master of Public Health (MPH) degree is a 42-credit hour, professional master degree program designed to prepare graduates to work in public health career fields. Public health training in the core public health disciplines offer foundational public health knowledge necessary to assess, implement interventions, and evaluate the health of a population with an organization or community. Additional core courses build on the foundation to cultivate practice-based skill sets readily applied to the public health setting. The MPH degree may complement students’ current job skills, or provide students with new public health knowledge and career opportunities. Coursework will emphasize prevention, interdisciplinary approaches, applied skills, and social justice.
The MPH curriculum has been designed to meet current needs in the field of public health, Council on Education for Public Health (CEPH) accreditation criteria, and the College’s mission, goals and objectives.

**The MPH degree offers the following concentrations:**

**Urban Health**

The Urban Health concentration trains students to meet the demand of multi-faceted public health issues facing urban communities, and address health inequities arising from racial, ethnic and socioeconomic health disparities. Concentration coursework represents a variety of disciplines and technical skillsets integral in promoting health in urban settings, including courses focused on advocacy, policy and social justice. Graduates will be equipped to advocate for policies to address health needs in urban communities, as well as apply skills to conduct health needs assessments, program implementation, and program evaluation.

The Urban Health concentration prepares graduates to work in a wide range of settings, including:

- Health care systems
- Public health agencies on local, state, national and international levels
- Nonprofit health organizations
- Research organizations
- Advocacy organizations

**Epidemiology**

The Epidemiology concentration prepares students with the skills and knowledge required to work as epidemiologists or in related jobs. Graduates will be prepared to monitor the trends of chronic and infectious disease in populations, as well as investigate infectious disease outbreaks, while considering how to prevent disease or stop its spread. Concentration coursework includes training in chronic disease epidemiology, infectious disease epidemiology, social epidemiology, and large data set analysis for epidemiology.

The Epidemiology concentration prepares graduates to work in many public health settings such as:

- Local and state health departments
- Federal agencies like Centers for Disease Control and Prevention
- Hospitals
- Research centers
- Infection control
- Laboratories
- Food safety
- Health data analysis
- Non-governmental and non-profit organizations
- Global health

For specific information regarding Public Health studies in the Department of Kinesiology, please contact us at 817.272.1890 or by e-mail at publichealth@uta.edu.

**Doctor of Philosophy in Kinesiology**

The Doctor of Philosophy in Kinesiology prepares students to be scholarly researchers who generate new knowledge in the field of Kinesiology, with the skills to apply existing scholarship to questions concerning the prevention, assessment, and treatment of motor difficulties, chronic diseases, and musculoskeletal injuries.

The program’s interprofessional and multidisciplinary curriculum, as well as research focus, incorporates basic and clinical science approaches to identify disease markers and mechanisms, as well as evidence-based interventions designed to prevent and treat specific health conditions such as chronic illnesses and injuries in vulnerable and at-risk populations comprised of obese, older, and/or minority persons. This program builds and extends the Department of Kinesiology’s existing research, education, and community outreach initiatives in health and the human condition across the lifespan. Students will work with their advisor to design an individualized program of study to meet their research interests and career goals.

For specific information regarding the Doctor of Philosophy in Kinesiology in the Department of Kinesiology, please contact us at 817.272.3288 or by email at PhDKine@uta.edu.

**Admission Requirements for M.S. in Athletic Training**

Application instructions and materials can be found on the UT Arlington MSAT website.
UNCONDITIONAL ADMISSION

- Earned Bachelor’s degree, with an undergraduate cumulative GPA of 3.0, or a 3.0 GPA during the last 60 hours of undergraduate course work.
- 50 hours of observation with an athletic trainer (LAT and/or ATC credential)
- Meet program technical standards for admission
- Measles, Mumps and Rubella (MMR) vaccination
- Hepatitis B vaccination (three doses)
- Proof of current certification by the American Heart Association in Basic Life Support (Only AHA BLS certification will be accepted)
- International students are required to receive tuberculosis screening and this must be performed at the UTA Student Health Center or another U.S. facility
- International applicants must meet the University’s English language test score requirements for graduate admission.
- Required prerequisite courses *Prerequisite courses must have been completed with a grade of “C” or better and within the last 10 years.
  - Anatomy and Physiology I
  - Anatomy and Physiology II
  - Functional Anatomy (must be upper division and may also be titled Applied Kinesiology, Kinesiology, or Biomechanics)
  - Physiology of Exercise
  - Nutrition
  - Psychology
  - Statistics or Research Design
  - Biology (lecture and lab)
  - Physics (lecture and lab; will accept PHYS 3360 from UTA students)
  - Chemistry (lecture and lab)
    - Preferred Prerequisite Courses
  - Medical Terminology
  - Care and Prevention of Athletic Injuries

PROBATIONARY ADMISSION

Applicants failing to meet the unconditional admission criteria may be considered for probationary admission with documented previous relevant experience and recommendations describing potential for exceptional personal and professional growth. Students who are admitted on a probationary status will be limited in their clinical experience time, will be required to meet with the MSAT faculty to develop a success plan, and must complete their first term with a 3.0 GPA.

START DATE

Each new cohort begins the MSAT program summer (typically the first Monday in June).

RETENTION CRITERIA

MSAT students’ academic and clinical progress will be closely monitored each semester by the MSAT Program Director and Coordinator of Clinical Education. To remain in the MSAT program, students must:

- Complete each course with a grade of “C” or better.
- Maintain a 3.0 cumulative GPA
- Adhere to documents which outline professional behaviors, including but not limited to the MSAT Student Handbook, the BOC Standards of Professional Practice, the NATA Code of Ethics, and course syllabi.
**TRANSFER POLICY**
No transfer credit will be awarded for MSAT courses.

**CRIMINAL BACKGROUND CHECK**
All students accepted for admission into the MSAT will be required to complete a criminal background check. Students who have a criminal record are encouraged to meet with the MSAT Program Director to discuss how this may affect their ability to become credentialed as an athletic trainer.

**Degree Requirements for M.S. in Athletic Training**
All students accepted into the Master of Science in Athletic Training Program will complete 57 hours of coursework.

**REQUIRED COURSEWORK**
The following courses will be required for completion of the MSAT degree program.

Total Hours 57

**Admission Requirements for M.S. in Exercise Science**
Admissions Standards for Master’s Degree in Exercise Science (Note – Meeting these minimum standards does not guarantee acceptance into the program).

a. Undergraduate degree from a U.S. accredited institution or an equivalent foreign institution.
b. GPA of 3.0 or above during the last 60 hours of undergraduate work or in any previous graduate program.
c. GRE Quantitative score of 144 (500 on old scale) and Verbal score of 153 (500 on old scale). Additionally, satisfactory Writing scores are required. If scores are below these standards the application will still be considered as the Department takes all components of the application into consideration.

d. A minimum score of 550 on the paper-based TOEFL, a minimum score of 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section.
e. All Master’s students are originally accepted as “Non-thesis track”.
f. Contact information for references is not required but may be asked for if additional information is needed.

**Probationary Admission**

Applicants failing to meet the above admission criteria may be considered for *probationary admission* in which case the following additional criteria will also be considered by the Graduate Studies Committee:

- Professionally relevant experience
- Additional writing samples and/or information may be requested
- Applicants admitted on probation will be required to maintain a B or better average during their first 12 hours of graduate study.

A graduate advisor within the Department of Kinesiology will review transcripts of prospective students to determine what prerequisites are needed prior to enrollment in courses within the proposed program. If deficiencies are identified, a pre-program of study designed to prepare the student for graduate course prerequisites will be written and signed by the prospective student and the graduate advisor.

**Waiver of the Graduate Record Examination**

Upon recommendation of the Graduate Advisor, outstanding UT Arlington graduates with a degree in Kinesiology or related fields (such as Biology, Chemistry, Mathematics, Computer Science, or Engineering) may qualify for a waiver of the requirements for the Graduate Record Examination (GRE). To qualify, the applicant must meet the following minimum requirements:

a. The student must have graduated from a commensurate bachelor’s degree program at UT Arlington no more than three academic years prior to admission to the graduate program (as measured from the start of the semester for which admission is sought). A commensurate bachelor’s degree program is one that is a normal feeder program for the master’s degree program to which the student seeks admission. Undergraduate students in their final year of study are also eligible; in such cases, admission with the GRE waiver is contingent upon successful completion of the bachelor’s degree.

b. The student’s UT Arlington grade-point average must equal or exceed 3.0 in the following calculations:
   - as calculated for admission by the Office of Graduate Studies;
   - overall;
   - in the major field; and
   - in all upper-division work.

Applicants qualifying for waiver of GRE who do not qualify for advanced admission, must comply with all other requirements for admission, i.e., submitting the application for admission, paying fees, providing official transcripts from other institutions, and meeting any requirements established by the admitting graduate program. The GRE waiver must be recommended by the Graduate Advisor at the time of admission.

**Graduate Assistantships for M.S Students in Exercise Science**

The Department of Kinesiology and faculty offers financial assistance to M.S. students. Assistantships are contingent upon prior acceptance to the Graduate School and are limited and thus offered on a competitive basis. Graduate Assistant applicant evaluation begins on January 1 and continues until all positions are filled. Please direct all inquiries to the graduate program director Dr. R. Matthew Brothers at matthew.brothers@uta.edu.

**Degree Requirements for M.S. in Exercise Science**

All students are required to complete 36 hours for the master's degree. All students accepted into the Master of Science in Exercise Science will take a core of 15-semester hours of required KINE courses. In addition, all students are required to complete one of the following in their last semester; KINE 5389: Research Manuscript Submission, KINE 5689: Thesis, or KINE 5389 Physiology of Exercise Internship. The remaining required hours will be completed through various course electives.

All M.S. students are initially accepted on the non-thesis track. The student’s academic advisor within the Department of Kinesiology will review transcripts of prospective students to determine what prerequisites are needed prior to enrollment in courses within the proposed program. If deficiencies are identified, a pre-program of study designed to prepare the student for graduate course prerequisites will be written and signed by the prospective student and the student’s graduate advisor.

Total Hours: 39-45

Coursework that is more than six years old at the time of graduation or teacher/administrator certification program completion cannot be used toward meeting the requirements for a master’s degree or graduate-level certification. Master's degree and graduate-level certification programs must be completed within six years (time in military service excluded) from initial registration in the Graduate School. Appropriate state exams and application to the State Board for Educator Certification for a standard certificate must be made within six months of completion of residency/practicum/program. If a candidate allows the six-month period to go by without passing all state exams and applying for certification, additional coursework and/or exams will be required.

Admission Requirements for Master of Public Health

Admission to the Master of Public Health degree is based on completion of general admission requirements of the Graduate School as specified under the Graduate School Admissions Requirements and Procedures in the Graduate Catalog.

Admission criteria include:

- Official transcripts showing an earned bachelor’s degree from an accredited school, with a 3.0 or higher grade point average for the last 60 undergraduate or the last 18 graduate/post-baccalaureate credit hours completed.
- Official Graduate Record Examination (GRE) scores taken within the last five years are required of all applicants. Preference will be given to applicants with verbal, quantitative and analytic writing scores above the 50th percentile.

Applicants may request a waiver of the GRE requirement if they meet any of the following criteria:

- Hold a graduate or terminal degree from an accredited U.S. university.
- Completed a UTA Graduate Certificate in Public Health Practice and/or a UTA Bachelor of Science in Public Health degree with a minimum cumulative GPA of 3.0 and no less than a grade of “B” in any required public health course.
- At least 5 years of full-time professional experience in a public health field.

An approved GRE waiver does not guarantee admission into the degree program. To apply for a GRE waiver, applicants should submit the following items via email to the Public Health Graduate Advisor:

- Completed GRE Waiver Application
- Scanned copies of all college or university transcripts (official or unofficial transcripts)
- Current resume or CV
- A one-page personal statement written in English describing the applicant’s interest in earning an MPH degree and potential for contributing to public health, as well as the applicant’s career objectives, self-assessment of abilities and preparation for succeeding in a public health graduate program. The quality of written expression in the applicant’s personal statement will be considered.
- An applicant whose native language is other than English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog.
- Three letters of recommendation from academic or professional references.
• The applicant’s resume or CV, highlighting professional experience such as accomplishments, linguistic abilities, computer expertise, and analytics expertise.

PROBATIONARY ADMISSION
For an applicant who does not meet all admission criteria but shows promise for completing a graduate program based on some admission criteria, in rare cases probationary admission may be granted. Students on probationary admission conditions specified by the Public Health Graduate Advisor.

PROVISIONAL, DEFERRED AND DENIED ADMISSION
Provisional, deferred and denied admission decisions meet the criteria as defined under Admission Requirements and Procedures in the Graduate Catalog.

Degree Requirements for the Master of Public Health

Degree Requirements
The Master of Public Health is a degree program consisting of 42 credit hours to include required core courses in the following areas:

Biostatistics
- KINE 5376 Introduction to Biostatistics
  OR
- KINE 5305 Applied Statistical Principles in Kinesiology

Epidemiology
- KINE 5372 Introduction to Epidemiology

Health Policy and Health Management
- KINE 5377 Introduction to Health Systems and Policy

Social and Behavioral Health
- KINE 5375 Community and Behavioral Health

Health Communications
- KINE 5385 Communication and Health
  OR
- COMM 5385 Seminar in Health Communication

Core Functions of Public Health
- KINE 5378 Foundations of Public Health

Culminating Practice Experience
- KINE 5383 Community Based Internship
- KINE 5384 Capstone Experience

Students have five years to complete the program.

Foundation Requirements - No previous specific coursework is required.

Transfer Credit - Students may transfer three courses (9 SCH) into the MPH program from an accredited school, if approved by the Public Health Graduate Advisor. The course must have been completed at the graduate level at an accredited university, with a grade of “B” or above, and be determined to be equivalent to the course offered at UTA. The course should not have been used for another degree or certificate program. Determination of course equivalency will be made by the course instructor on a case-by-case basis.

In addition to the courses required for all concentrations, students enrolling in the Urban Health concentration will take the following concentration courses:
KINE 5380 Urban Community Health Assessment
KINE 5374 Race, Ethnicity, and Health in the U.S.
KINE 5371 Introduction to Program Planning and Evaluation
SOCW 5343 Health Policy and Social Justice

In addition, MPH students will select two electives from the following courses:

KINE 5379 Fundamentals of Population Health
KINE 5373 Introduction to Environmental and Occupational Health
KINE 5370 Global Health
KINE 5385 Chronic Disease Epidemiology
KINE 5386 Big Data for Epidemiology
KINE 5381 Social Epidemiology
KINE 5387 Infectious Disease Epidemiology
SOCW 5345 Critical Issues in Health Equity
SOCW 5353 Mental Health Policy and Social Justice
NURS 5366 Principles of Research in Nursing
PAPP 5345 Evaluation Research
PAPP 5329 Financial Management in the Public and Non-Profit Sectors
PAPP 5309 Local Politics in the Intergovernmental Setting
PAPP 5311 Public Policy Formation and Analysis
PAPP 5324 Urban Public Finance
PAPP 5367 Strategic Public and Non-Profit Human Resource Management
COMM 5306 Qualitative Research Methods
PAPP 5352 Conflict Resolution
MANA 5330 Negotiations and Conflict Management
HCAD 5350 Health Care Information Systems
HCAD 5333 Economics of Health

Admission Standards for Doctor of Philosophy in Kinesiology

Faculty Sponsorship
Please note that all PhD students (regardless of Bachelors – Ph.D. or Masters to Ph.D.) must be accepted by a faculty member based on faculty research/mentoring alignment in order to be accepted into the program: https://www.uta.edu/conhi/academics/kinesiology/phd-kinesiology/faculty.php

Admissions Standards
Please make sure to follow the admissions standards that applies to your degree option.

Masters to Ph.D. option:
1. Master’s degree from a US accredited institution or an equivalent foreign institution.

2. GPA of 3.25 on all graduate work.
3. GRE Quantitative score of 150 and Verbal score of 150. Additionally, satisfactory Writing scores are required. If scores are below these standards the application will still be considered as the Department takes all components of the application into consideration.

4. A minimum score of 550 on the paper-based TOEFL, a minimum score of 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section.

5. A resume or CV of the applicant (maximum of 2 pages). This should highlight the educational background of the applicant, work / volunteer history, awards, research experience etc.

6. A Statement of Purpose (maximum of 2 pages). This should highlight the previous achievements and experiences of the applicant that have led to the decision to consider a Doctoral graduate degree in Kinesiology as well as the previous achievements that would qualify the applicant for admission into the Kinesiology Doctoral Program. The statement should also include future career goals following obtaining a Doctoral degree in Kinesiology.

7. Three (3) letters of reference. The Department accepts letters through email and/or postal mail.

§ Recommendation Form (PDF)
§ Email: Reviewers can email recommendations directly to Dr. Matthew Brothers (matthew.brothers@uta.edu).
§ Postal Mail: Reviewers should directly mail physical forms to the address specified at the bottom of this page. We suggest that prospective students provide their reviewers with the form and a stamped envelope with the correct address as a convenience to their reviewers.

Bachelors to Ph.D. Option:

1. Undergraduate degree from a US accredited institution or an equivalent foreign institution.

2. GPA of 3.5 and/or 3.5 GPA during the last 60 hours of undergraduate work.

3. 3.5 GPA on all Kinesiology-related work.

4. GRE Quantitative score of 150 and Verbal score of 150. Additionally, satisfactory Writing scores are required. If scores are below these standards the application will still be considered as the Department takes all components of the application into consideration.

5. A minimum score of 550 on the paper-based TOEFL, a minimum score of 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section.

6. A resume or CV of the applicant (maximum of 2 pages). This should highlight the educational background of the applicant, work / volunteer history, awards, research experience etc.

7. A Statement of Purpose (maximum of 2 pages). This should highlight the previous achievements and experiences of the applicant that have led to the decision to consider a Doctoral graduate degree in Kinesiology as well as the previous achievements that would qualify the applicant for admission into the Kinesiology Doctoral Program. The statement should also include future career goals following obtaining a Doctoral degree in Kinesiology.

8. Three (3) letters of reference. The Department accepts letters through email and/or postal mail.

   • Recommendation Form (PDF)
   • Email: Reviewers can email recommendations directly to Dr. Matthew Brothers (matthew.brothers@uta.edu).
   • Postal Mail: Reviewers should directly mail physical forms to the address specified at the bottom of this page. We suggest that prospective students provide their reviewers with the form and a stamped envelope with the correct address as a convenience to their reviewers.

Address for Letters of Reference

All letters of reference should be mailed to the following address:

Dr. R. Matthew Brothers
Associate Chair for Graduate Programs in Exercise Science and Kinesiology
Department of Kinesiology
P.O. Box 19259
University of Texas at Arlington
500 W. Nedderman Drive
Arlington, TX 76019-0259

Addresses for Transcripts and GRE Scores

Transcripts and GRE scores should be sent directly to the Office of Graduate Admissions using the appropriate address below.
Degree Requirements for Doctor of Philosophy Degree in Kinesiology

The degree requirements differ slightly depending on if a student enters the B.S. to Ph.D. program or the M.S. to Ph.D. program.

- **B.S. – Ph.D. program**: Requires 18 required course credit hours, 42 credit hours (minimum) of track electives, and 9 – 12 credit hours of dissertation (69 total credit hours minimum).
- **M.S. – Ph.D. program**: Requires 11 required course credit hours, 22 credit hours (minimum) of track electives, and 9 – 12 credit hours of dissertation (69 total credit hours minimum).

**Required Courses (B.S. – Ph.D.)**

KINE 6300 Research Methods

KINE 5305 Applied Statistics in Kinesiology, or KINE 5376 Introduction to Biostatistics

3 hours of advanced statistics OR Advanced Research Methods (course can be taken outside of the department).

KINE 6293 Grant Writing

KINE 6105 Laboratory Techniques in Kinesiology I

KINE 6106 Laboratory Techniques in Kinesiology II

KINE 6103 Professional Development

4 hours of KINE 6100 Seminar in Kinesiology (this is a 1 hour credit course that must be taken in a minimum of 4 different semesters).

**Required Courses (M.S. – Ph.D.)** KINE 5300 Research Methods

3 hours of advanced statistics OR Advanced Research Methods (course can be taken outside of the department).

KINE 6293 Grant Writing

KINE 6105 Laboratory Techniques in Kinesiology I

KINE 6103 Professional Development

4 hours of KINE 6100 Seminar in Kinesiology (this is a 1 hour credit course that must be taken in a minimum of 4 different semesters).

**Electives for Either Track**

KINE 6322 Metabolism & Exercise Biochemistry

KINE 6326 Cardiocirculatory Physiology of Exercise

KINE 6327 Pulmonary Physiology of Exercise

KINE 6340 Environmental Physiology of Exercise

KINE 6328 Neuromuscular Physiology of Exercise

KINE 5329 Strength & Conditioning

KINE 5331 Obesity and Weight Management

KINE 6338 Exercise Prescription for Special Populations
KINE 6350 Applied Biomechanics  
KINE 6360 Fundamental Principles of Integrative Physiology  
KINE 6393 Physiology of Exercise Internship  
KINE 6394 Research in Kinesiology  

Students in the B.S – Ph.D and the M.S. – Ph.D. tracks MUST complete 9 – 12 credit hours of dissertation

Individual graduate advisors / research mentors may require additional courses.

Doctor of Philosophy in Kinesiology – Dissertation Committees and Candidacy

The Dissertation requirement for the Ph.D. in Kinesiology includes two components:

1. A written Dissertation to include at least 2 manuscripts of quality and format that are submitted to a peer-reviewed scientific journal and

The Dissertation Committee is responsible for the evaluation of both the written dissertation and oral defense. The Committee must be comprised of a minimum of four members, including the Committee Chair who will be the student's primary faculty mentor. This Committee Chair must be a member of the Department of Kinesiology Graduate Studies Committee or have status on the Department of Kinesiology Graduate Studies Committee. The remaining Committee members must include at least one additional faculty member from the Department of Kinesiology. If the Committee Chair is not a full time member of the Department of Kinesiology Graduate Studies Committee the remaining Committee members must include at least two members from the Department of Kinesiology. In addition the Committee must include at least one member who is external to the Department of Kinesiology. The external member may include individuals not working within UT Arlington if applicable. All Committee members must hold a terminal degree in their field and/or demonstrate the required expertise and appropriate faculty status for serving on dissertation committees.

Comprehensive Examination

B.S. to Ph.D. students will become eligible for the comprehensive examination when they have completed 36 hours of their graduate work.

M.S. to Ph.D. students will become eligible for the comprehensive examination when they have completed 18 hours of their graduate work (at UT Arlington).

These completed course hours represent the minimum requirement; however, eligibility for the comprehensive examination will be dependent on approval from the Chair of the Dissertation Committee.

Successful completion of the comprehensive examination makes students eligible for PhD candidacy. Students must be enrolled in the semester they take the comprehensive examination.

The purpose of the comprehensive examination is to evaluate the extent to which students have acquired the basic principles / knowledge in pertinent coursework. The expectation will be that students will be able to apply, integrate, and synthesize their knowledge.

When students are eligible for the comprehensive examination, the student's graduate mentor/advisor will recommend the student for the examination to the Department of Kinesiology Graduate Studies Committee for approval.

Upon completion, the comprehensive examination committee will meet to discuss the merits of the student's examination. Comprehensive examinations will only be held in regular, long semesters.

The composition of the comprehensive examination committee will be decided by the Department of Kinesiology Graduate Academic Committee. This comprehensive examination committee will be comprised of at least one member of the Graduate Academic Committee and a minimum of 2 additional members with relevant content expertise.

Following completion of the examination the Committee may recommend any of the following outcomes:

1. Unconditional pass. With an unconditional pass, students become eligible for PhD candidacy and prepare for the defense of their dissertation proposal.

2. Pass with conditions. A pass with conditions requires that students perform each of the conditions satisfactorily in order to become eligible for PhD candidacy.

3. Unsatisfactory with opportunity to retake the examination. With this recommendation, the committee will specify when the retake will occur.

4. Unsatisfactory, do not continue in program.
If the outcome of the comprehensive examination is an unconditional pass, students immediately become eligible for PhD candidacy. If the outcome is a pass with conditions, students may only become eligible for candidacy when the examining committee determines that the student has successfully met the conditions stipulated by the committee.

**Dissertation Proposal**

Following successful completion of the oral examination the student will then need to draft a grant application to be written in the format of a National Institute of Health Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship (F31) grant (https://grants.nih.gov/grants/guide/pa-files/PA-16-309.html). This grant application will describe the student’s dissertation projects and will also serve as the student’s dissertation proposal. The student will give an oral presentation of the research proposal outlined in the grant application to his/her dissertation committee. This proposal defense must occur within two long semesters following successful completion of the oral comprehensive examination.

**GRADUATE CERTIFICATE IN PUBLIC HEALTH PRACTICE: MISSION AND OBJECTIVES**

**PROGRAM MISSION**

The mission of the University of Texas at Arlington’s graduate Public Health programs is to prepare students to become leading public health practitioners and advocates who serve communities and organizations, promote collaboration between public health and health care practitioners, and protect and advance community health through applying the core public health functions of assessment, policy development and assurance.

**PROGRAM OBJECTIVES**

Through completing the Graduate Certificate in Public Health Practice (GCPHP), students will:

a. Gain graduate-level introductory knowledge and accompanying foundational skill sets in the five core public health disciplines: Biostatistics, epidemiology, health systems and policy, environmental health, and social and behavioral health.

b. Be prepared to apply fundamental skills from each of the five core public health disciplines to complement current job skills, or gain new public health knowledge and career opportunities.

c. Be equipped to execute skills to assess, implement interventions, and evaluate the health of a population within their organizations or communities.

**Admission Requirements for the Graduate Certificate in Public Health Practice**

**ADMISSION CRITERIA**

- Official transcripts showing an earned bachelor’s degree from an accredited school, with a 3.0 or higher grade point average for the last 60 undergraduate or the last 18 graduate/post-baccalaureate credit hours completed.

- Only GPA will be considered for admission to the program. The Graduate Record Exam (GRE) or other standardized graduate school exam is not required for admission to the certificate program.

- A one-page personal statement written in English describing the applicant’s interest in and potential for contributing to public health, career objectives, and self-assessment of abilities and preparation for succeeding in a public health graduate program. The quality of written expression in the applicant’s personal statement will be considered.

- An applicant whose native language is other than English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies as defined under Admissions Requirements and Procedures in the Graduate Catalog.

- The applicant’s resume or CV, highlighting professional experience such as accomplishments, linguistic abilities, computer expertise, and analytics expertise.

**PROBATIONARY ADMISSION**

Applicants who fail to meet the admission criteria may be considered for probationary admission. Applicants admitted on a probationary basis must maintain a 3.0 GPA in the first two semesters of program enrollment.

**PROVISIONAL, DEFERRED AND DENIED ADMISSION**

Provisional, deferred and denied admission decisions meet the criteria as defined under Admission Requirements and Procedures in the UTA Graduate Catalog.

**TRANSFER CREDIT**

Students may transfer one course (3 SCH) into the GCPHP program. The course must have been completed at the graduate level at an accredited university, with a grade of “B” or above, and be determined to be equivalent to the course offered at UTA. The course should not have been used for another degree or certificate program. Determination of course equivalency will be made by the course instructor on a case-by-case basis.
Degree Requirements for the Graduate Certificate in Public Health Practice

The Graduate Certificate in Public Health Practice is a certificate program consisting of 15 credit hours to include one required 3-hour course in each of the five public health disciplines:

REQUIRED COURSEWORK

The following courses will be required for completion of the Graduate Certificate in Public Health Program. Students have three years to complete the program.

Biostatistics
KINE 5376 Introduction to Biostatistics
or
KINE 5305 Applied Statistical Principles in Kinesiology

Epidemiology
KINE 5372 Introduction to Epidemiology

Health Policy and Health Management
KINE 5377 Introduction to Health Systems and Policy

Environmental Health
KINE 5373 Introduction to Environmental and Occupational Health

Social and Behavioral Health
KINE 5375 Community and Behavioral Health

FOUNDATION REQUIREMENTS

No previous specific coursework is required.
Kinesiology - Undergraduate Programs

Overview

The Department of Kinesiology is committed to providing quality educational programs that emphasize scientific theory, hands-on learning in the laboratory setting and real-world application through clinical internships and other field-based experiences. The faculty's vast teaching experience and research expertise provide rich learning experiences across all of the department's academic programs.

The undergraduate studies within the Department of Kinesiology are organized into three areas: Bachelor of Arts in Kinesiology (Physical Education Teacher Education, Sports Leadership & Management), Bachelor of Science in Exercise Science (Clinical & Applied Physiology; Health, Fitness, & Wellness; and Motor & Rehabilitation Sciences), and Bachelor of Science in Public Health. Each of these academic programs share a common core of kinesiology courses that provide students with a strong foundation in the sciences of human anatomy, biomechanics, motor behavior, and exercise physiology, as well as an introduction to research methodology. In addition to the kinesiology core, each undergraduate degree plan provides a comprehensive discipline-specific program of study designed to prepare students for a specific career path.

The Department of Kinesiology offers multiple degree plan options that work towards meeting the prerequisite requirements for admission to physical therapy, occupational therapy, speech pathology, and physician’s assistant graduate programs, as well as medical and dental schools.

The undergraduate program areas are listed below. Complete degree plans, descriptions, and course requirements are provided on subsequent pages.

Bachelor of Arts in Kinesiology

PHYSICAL EDUCATION TEACHER EDUCATION (PETE)
Bachelor of Arts in Physical Education Teacher Education (PETE) for individuals who wish to teach in the PK-12 setting.

SPORTS LEADERSHIP AND MANAGEMENT (SLAM)
The Bachelor of Arts in Kinesiology - Sports Leadership and Management (SLAM) programs prepare individuals for sport and physical activity program leadership in both the public and private settings such as coaching, youth sports, sport marketing, sport management, sport psychology, or sport sociology. There are two concentrations offered under the SLAM program. Coaching and Youth Sports; and Sports Leadership and Management.

BA MINOR IN COACHING AND YOUTH SPORTS
The minor consists of 18 hours, six of which must be upper level. A 2.5 grade point average must be maintained for a student to remain in the minor.

Bachelor of Science in Exercise Science

CLINICAL & APPLIED PHYSIOLOGY (CAP)
The Bachelor of Science in Exercise Science - Clinical & Applied Physiology (CAP) is designed for individuals who plan to pursue a graduate degree in the fields of physical therapy, physician assistant, and medical/dental schools, or athletic training, as well as careers and research in physiological sciences applied to exercise.

HEALTH, FITNESS, & WELLNESS (HFW)
The Bachelor of Science in Exercise Science - Health, Fitness, & Wellness is designed for individuals who wish to pursue a career in personal fitness training, strength and conditioning, cardiac rehabilitation, or other health and wellness related career paths.

MOTOR & REHABILITATION SCIENCES (MRS)
The Bachelor of Science in Exercise Science - Motor & Rehabilitation Sciences is designed for individuals who plan to pursue careers and research in pediatrics and special populations, biomechanics, motor behavior, and rehabilitation sciences, as well as graduate school programs in occupational therapy or speech & language pathology.

Bachelor of Science in Public Health

BACHELOR OF SCIENCE IN PUBLIC HEALTH (BSPH)
The Bachelor of Science in Public Health is designed to prepare individuals for career opportunities in areas such as community health education, project management, compliance in public sector capacities, environmental science and protection, non-profit organizations, and healthcare services and administration. The Bachelor of Science in Public Health (BSPH) degree consists of two program delivery options: A Traditional Campus Based Program and an Accelerated Online Program (AO). The Accelerated Online Program is an online format developed by UT Arlington's Department of Kinesiology and College of Nursing and Health Innovation to serve students in Texas and beyond by offering a high quality, affordable, and convenient undergraduate public health degree program. The BSPH AO program is available to those students who have earned a minimum of 24 transfer-credit hours prior to enrollment.
PUBLIC HEALTH MINOR
The Department of Kinesiology offers a minor in public health. The minor consists of 18 credit hours. Students must complete at least nine hours toward the minor at UT Arlington. A 2.5 grade point average must be maintained for a student to remain in the minor.

Oral Communication Competencies
All students declared as majors in the Department of Kinesiology (with the exception of BSPH majors) are required to complete KINE 3325 UNDERGRADUATE RESEARCH METHODS. Embedded in this class is the task of orally presenting research findings as both a formal oral research presentation and also in support of posters presented during the Kinesiology Research Presentation Day. BS Public Health students are required to complete KINE 4352 SCIENCES & METHODS IN PUBLIC HEALTH.

Computer Use Competencies
All students declared as majors in the Department of Kinesiology (with the exception of BSPH majors) are required to pass the University computer competency exam or complete KINE 1100 early in their specialization. Embedded in this class are tasks requiring familiarity with the word processor, spreadsheet and Internet browsing programs common on personal computers. BS Public Health students are required to complete KINE 3351 PUBLIC HEALTH INFORMATICS to meet this requirement. Additionally, the department's core curriculum requires the demonstration of computer use competencies for completion of the majority of assignments.

The Bachelor of Arts in Kinesiology
The Bachelor of Arts in Kinesiology is designed to prepare individuals for teaching and coaching positions in public and private schools and for sport and physical activity program leadership in both the public and private settings. Majors can choose from one of two degree plan options: Physical Education Teacher Education (PETE) and Sport Leadership & Management (SLAM).

Physical Education Teacher Education (PETE)
The Bachelor of Arts in Kinesiology, Physical Education with All-Level Teacher Certification prepares individuals for teaching and coaching positions in public and private schools. This degree is specifically designed to prepare graduates for certification in teaching PK-12 physical education. The program is designed to provide a scientific and pedagogical foundation with multiple public school experiences that enable students to observe, assist teachers and coaches, experiment with curriculum, create programs, and gain structured experiences in teaching. Because of the emphasis on field experiences, our graduates are well prepared when they enter the workforce. In addition, our graduates work in diverse settings and are able to plan and teach individuals with disabilities successfully. Candidates are also encouraged to earn a second teaching area concentration (such as English, History, Biology/Life Science, Math, Modern Language, Health Education, etc.).

Admission Requirements:
To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from an advisor in the Division of Student Success during their first year. After the first year, students should seek advisement from the PETE Advisor in the Department of Kinesiology. Transfer students must seek academic advising from the PETE Advisor in the Department of Kinesiology immediately.

In order to qualify for admission to the Physical Education Teacher Education (PETE) program, students must:

- Satisfy the University’s credit hour requirements for admission to a degree plan
- Provide transcripts from each college or university the student has attended (reflecting all current/completed semesters)
- Petition for admission into the College of Education prior to taking education coursework
- Have a cumulative GPA of at least 2.75 for all classes taken at UT Arlington including classes transferred into the program, and sustain a 3.00 GPA across the education sequence as specified in the degree listing below.
- All classes involving field-based experiences require students to pass a criminal background check. This is also a requirement for all certified teachers in the State of Texas.
- Students who have been suspended or expelled from The University of Texas at Arlington or any other university or program for reasons other than academic reasons may be denied admission or readmission to an educator preparation program in the College of Education.

Maintaining Major Status:
If a student falls below a 2.75 GPA at any time prior to petitioning for admission into the College of Education, the student will be on departmental probation for one semester. If the student is unable to make up the deficiency in the semester immediately following the probation, the student will lose status as a Bachelor of Arts in Kinesiology with All-Level Certification major and be moved to the Bachelor of Arts in Kinesiology - Sports Leadership and Management major. Courses to make up a GPA deficiency must be taken at UT Arlington. If the student is able to make up the GPA deficiency...
in the semester immediately following loss of major status, she or he will be eligible to apply for reinstatement as a major by making application to the Departmental Advisor when grades are released. No courses on the degree plan may be taken as pass/fail.

Each candidate in the PETE program will be evaluated on the College of Education Professional Dispositions by faculty and staff. These dispositions have been identified as essential for a highly-qualified professional. Instructors and program directors will work with candidates rated as “unacceptable” in one or more stated criteria. The candidate will have an opportunity to develop a plan to remediate any digressions.

Application for Student Teaching: Students must apply to the Director of Field Experience in the College of Education by the appropriate deadline to begin. Students must also submit any applicable background checks at registration. The student teaching will be performed in both elementary and secondary (high school or middle school) levels.

Many of the courses in the Kinesiology curriculum require prerequisite courses which are identified in the course descriptions.

**Sports Leadership and Management (SLAM)**

The Bachelor of Arts in Kinesiology - Sports Leadership and Management (SLAM) program prepares individuals for sport and physical activity program leadership in both the public and private settings. The curriculum examines sport in the contexts of historical and contemporary culture. It looks at sport’s cultural relationship with education, the economy, families, the media, and politics, and considers race, class, and gender differences in the sport experience. Two specializations are offered under the SLAM program: Coaching and Youth Sports; and Sports Leadership and Management.

**Admission Requirements:**

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from a Division of Student Success academic advisor during their first year. After the first year, students should seek advisement from the BA Kinesiology Advisor in the Department of Kinesiology. Transfer students must seek academic advising from the BA Kinesiology Advisor in the Department of Kinesiology immediately.

- All classes involving field-based experiences require students to pass a criminal background check. This is also a requirement for all certified teachers and professionals that work with school aged children in the State of Texas.

**Maintaining Major Status:**

Students must maintain an overall GPA of 2.5 and a KINE GPA of 2.5.

**Coaching and Youth Sports**

This concentration is designed to provide a scientific and pedagogical foundation with multiple experiences that enable students to observe, assist, coach, and create programs that encourage physical activity across the age spectrum: Youth, high school, collegiate, elite-level, or private coaching. In addition to the identified core and specialization courses there are 9 hours available as electives.

Sports Leadership and Management

This concentration provides students with managerial, psychosocial, socio-cultural, and developmental knowledge about sport participation to allow them to understand and to provide leadership related to key issues in sport while analyzing and engaging in the business and culture of sport. In addition to the identified core and specialization courses there are 9 hours available as electives.

Total Hours 120

Many of the courses in the Kinesiology curriculum require prerequisite courses which are identified in the course descriptions.

BA Minor in Coaching and Youth Sports

The minor consists of 18 hours, six of which must be upper level.

A 2.5 grade point average must be maintained for a student to remain in the minor.

Courses that may be taken toward the minor are:

Required:
KINE 1315 Introduction to Physical Education and Sport
KINE 2301 Teaching Games for Understanding
KINE 2302 Dance and Movement Activities

Electives
Nine hours from the following.
KINE 3302 Sport and Exercise Psychology
KINE 3304 Adapted Exercise and Sport Activities
KINE 3307 Sport and Society: Issues and Debates
KINE 3312 Coaching Invasion Games
KINE 3313 Coaching Net/Wall Game Principles
KINE 4319 Fitness and Outdoor Adventure

Bachelor of Science in Exercise Science

The Bachelor of Science in Exercise Science is designed to provide a foundation of the movement and exercise science to students interested in pursuing careers associated with therapy and rehabilitation, fitness and training, and research with typical and atypical populations. The three tracks are
designed to provide a thorough foundation in three areas of Exercise Science: Clinical & Applied Physiology, Health, Fitness, & Wellness, and Motor & Rehabilitation Sciences. All KINE listed courses are designed for majors only.

The Clinical & Applied Physiology (CAP) Track incorporates prerequisites and prepares students for graduate school applications in physical therapy, physician assistant, and medical/dental schools.

The Health, Fitness, & Wellness (HFW) Track prepares students for careers in strength conditioning, personal training, cardiac rehabilitation, and corporate wellness & fitness. It also prepares students for certifications programs such as ACSM, HFS, NSCA, CSCS. In addition, it incorporates prerequisites and prepares students for graduate school applications in athletic training.

The Motor & Rehabilitation Sciences (MRS) Track Incorporates prerequisites and prepares students for graduate school applications in occupational therapy and speech & language pathology, as well as careers and research in pediatrics and special populations, biomechanics, motor behavior and rehabilitation sciences.

Admission Requirements:

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from an advisor in the Division of Student Success during their first year. After the first year, students should seek advisement from the Exercise Science Advisor in the Department of Kinesiology prior to each semester and summer sessions. Transfer students must seek academic advising from the Exercise Science Advisor in the Department of Kinesiology immediately. All incoming freshmen and transfer students wishing to major in Exercise Science are initially classified as Exercise Science pre-majors.

To be classified as an Exercise Science major, students must satisfy the following requirements:

Clinical & Applied Physiology Track

• Completion of 12 hours at UT Arlington
• Overall GPA of 3.00 and KINE GPA of 3.00 by completion of KINE 3415 and a grade of “B” or better at KINE 3415.

Health, Fitness, & Wellness Track

• Completion of 12 hours at UT Arlington
• Overall GPA of 2.5 and KINE GPA of 2.5 by completion of KINE 3415.

Motor & Rehabilitation Sciences Track

• Completion of 12 hours at UT Arlington
• Overall GPA of 2.5 and KINE GPA of 2.5 by completion of KINE 3415.

Maintaining Major Status:

Students accepted as Bachelor of Science in Exercise Science majors in the Department of Kinesiology must maintain the minimum GPAs as indicated above or they will be on departmental probation. Students who are on departmental probation must meet with their academic advisor for future enrollment options. If the student is unable to make up the deficiency in the semester immediately following the probation, the student will lose status as a Bachelor of Science in Exercise Science major. Courses to make up the GPA deficiency must be taken at UT Arlington. No courses on the degree plan may be taken as pass/fail.

Clinical & Applied Physiology - (CAP)

The Exercise Science Clinical & Applied Physiology track incorporates prerequisites and prepares students for graduate school applications in physical therapy, physician assistant, and medical/dental schools, as well as careers and research in physiological sciences applied to exercise.

Many of the courses in the Kinesiology curriculum require prerequisite courses which are identified in the course descriptions.

Bachelor of Science in Public Health (BSPH)

The Bachelor of Science in Public Health (BSPH) degree consists of two program delivery options: A traditional Campus Based Program and an Accelerated Online Program (AO). The Accelerated Online Program is an online format developed by UT Arlington’s Department of Kinesiology and College of Nursing and Health Innovation to serve students in Texas by offering a high quality, affordable, and convenient undergraduate public health degree program. The BSPH AO program is available to those students who have earned a minimum of 24 transfer-credit hours prior to enrollment.

The BSPH degree program aligns well with current science-based degree programs offered in the Department of Kinesiology. In addition, with a unique positioning of public health aligned with nursing and kinesiology programs along a continuum of health-related coursework and practice-based experiences, students may access an intersection point at which individual health and wellness meets population health and prevention of disease. Potential career opportunities exist in job categories such as government, non-profit organizations, medical/healthcare facilities and community agencies.

The Bachelor of Science in Public Health program features a competency-based curriculum built upon a collaborative, interdisciplinary matrix. Relevant coursework, accompanied by experiential and service learning activities anchored throughout the program support a robust program framework, which includes The Council on Education for Public Health (CEPH) accreditation criteria, Association of Schools and Programs of Public Health (ASPPH) undergraduate competencies and The Council on Linkages Between Academia and Public Health Practice Tier I Public Health Workforce competencies. These program elements will enable students to gain a broad knowledge base, along with the skills and abilities necessary to be a competent and effective member of the public health workforce.

The Bachelor of Science in Public Health provides students with a rigorous background in public health education, while also providing multi-disciplinary support for each student to pursue his or her own individual interests and passions through minor degrees (e.g., Disability Studies, Diversity Studies, Psychology, Spanish). The degree program provides coursework and experiential learning activities that intersect individual health, wellness and prevention with population-based health perspectives. Students have the flexibility to choose 20-21 hours of electives, providing academic flexibility so that students may individualize components of their academic pathway to meet their unique personal, professional, and academic goals.

Admission Requirements:

To ensure that all students develop a solid academic foundation, all first time, first-year freshman students (regardless of intended major) must obtain academic advising and clearance for registration from an advisor in the Division of Student Success during their first year. After the first year, students should seek adviseement from the Public Health Advisor in the Department of Kinesiology prior to each semester and summer sessions. Transfer students must seek academic advising from the Public Health Advisor in the Department of Kinesiology immediately. All incoming freshmen and transfer students wishing to major in Public Health are initially classified as Public Health pre-majors (PH.Int).

To be classified as a Public Health major, students must satisfy the following requirements:

BS Public Health
• Completion of 12 hours at UT Arlington
• Completion of KINE 2350 INTRODUCTION TO PUBLIC HEALTH: PRINCIPLES & POPULATIONS EXERCISE SCIENCE with a grade of C or better
• Overall GPA of 2.50.

Maintaining Major Status:

Students accepted as Bachelor of Science in Public Health majors in the Department of Kinesiology must maintain the minimum GPAs as indicated above or they will be placed on departmental probation. In order to take additional Public Health courses, approval must be granted by the Department Chair. If the student is unable to make up the deficiency in the semester immediately following the probation, the student will lose status as a Bachelor of Science in Public Health major. Courses to make up the GPA deficiency must be taken at UT Arlington. If the student is able to make up the GPA deficiency in the semester immediately following loss of major status, he or she can be reinstated as a major by making application to the Departmental Advisor when grades are released. No courses on the degree plan may be taken as pass/fail.

Additional Requirements

BSPH majors must meet the overall GPA minimum of 2.5 in order to enroll in the following courses:

• KINE 4352 Public Health Sciences and Methods
• KINE 4354 Public Health Advocacy and Leadership
• KINE 4359 Public Health Cumulative Experience

Total Hours 120

Many of the courses in the Kinesiology curriculum require prerequisite courses which are identified in the course descriptions.

**BS in Public Health - Minor**

The Department of Kinesiology offers a minor in public health. The minor consists of 18 credit hours. Students must complete at least nine hours toward the minor at UT Arlington. A 2.5 grade point average must be maintained for a student to remain in the minor.

Courses that may be taken toward the minor are:

**Required**

- KINE 2350 PUBLIC HEALTH: PRINCIPLES AND POPULATIONS

**Electives**

Fifteen hours from the following:

- KINE 3307 SPORTS AND SOCIETY
- KINE 3350 URBANIZATION AND VULNERABLE POPULATIONS
- KINE 3351 PUBLIC HEALTH INFORMATICS
- KINE 3352 INTRODUCTION TO PUBLIC HEALTH EPIDEMIOLOGY
- KINE 3353 HEALTH AND THE HUMAN CONDITION IN THE GLOBAL COMMUNITY
- KINE 4330 PROGRAM DESIGN & ADMINISTRATION
- KINE 4331 OBESITY & WEIGHT MANAGEMENT
- KINE 4351 ETHICAL PRACTICES IN HEALTH PROFESSIONS
- HEED 3305 WOMEN'S HEALTH ISSUES
- HEED 3330 CONSUMER HEALTH AND PUBLIC HEALTH SYSTEMS
- HEED 4320 STUDIES IN HEALTHY AGING
College of Science

UNDERGRADUATE:

Mission and Philosophy

The College of Science graduate programs are committed to excellence in graduate education and research and contribute, along with other institutions in this country and throughout the world, to the expansion of scientific knowledge. Graduates of our programs are highly trained and educated scientists who will be able to contribute to the economic and social well-being of our state and nation.

OVERVIEW

With outstanding departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics and Psychology, the College of Science offers comprehensive graduate studies with our world class faculty and research programs. In addition to providing our students with strong core training in the physical and life sciences, we offer specialized Masters degrees for educators to expand their core science training. Interdisciplinary programs and Research Centers provide students with opportunities to span disciplines, and student research activities are complemented by excellent research facilities and state-of-the-art instrumentation. The College and Departments host a series of seminars to further expose our students to cutting edge science developments.

Master's degrees are offered in all of our departments, and we award Ph.D. degrees in Quantitative Biology, Applied Chemistry, Environmental and Earth Sciences, Mathematics, Applied Physics, and Experimental Psychology. For application and entrance requirements, or more on our graduate programs, please call us or visit our Web site at www.uta.edu/cos (http://www.uta.edu/cos/).

Overview

Pursuit of knowledge through scientific study has been the cornerstone of human accomplishment throughout history. The College of Science continues this tradition by providing undergraduate students with curricula that allow exploration and mastery of both the basic concepts and most recent advances of modern science and preparation for professional scientific careers. The College of Science consists of the departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics, and Psychology. Bachelor of Science (B.S.) and Bachelor of Arts (B.A.) degrees offered by these departments prepare students to pursue a wide variety of rewarding, professional scientific careers or graduate study. Bachelor of Arts and Bachelor of Science degrees are offered in all departments. Bachelor of Arts degrees allow students to develop a broad liberal education with a concentration in science and are particularly appropriate for careers in science teaching. Bachelor of Science degrees provide students with a more intensive background in science, preparing them for advanced graduate study or entry into exciting technological careers in industry, medicine, government, business, or commerce. A wide range of degree options within departmental B.S. programs provide students with career-oriented course work required to pursue professional career paths in specific scientific fields. All departments within the college provide highly accessible student academic and career advising that support customization of degree plans to meet a student's specific career goals.

The College of Science fosters interaction between students and faculty. Faculty actively participate as advisors to student scientific societies and are readily available to assist or advise students both within and outside the classroom. Faculty members in all departments actively participate in research supported by world-class research facilities and modern scientific equipment. Undergraduate science majors are encouraged to engage in research under the supervision of a faculty member of their choice, many of whom have international reputations for their scholarly contributions. Students can receive course credit for supervised research.

Beyond the undergraduate degree, the College of Science offers programs leading to graduate degrees. All departments offer Master of Science degrees (M.S.) that allow students to pursue technologically intensive careers in public or private arenas. The departments of Biology, Chemistry and Biochemistry, Earth and Environmental Sciences, Mathematics, Physics and Psychology offer the Doctor of Philosophy degrees (Ph.D.) that allow students to carry out independent dissertation research within a chosen scientific specialty, leading to careers in research and/or university teaching. The M.S. and Ph.D. degrees offered by the Graduate Program in Environmental Science and Engineering prepare students for careers as environmental professionals. The Graduate Catalog provides details of the college's master's and doctoral degree programs.

Also available to undergraduate students in the College of Science are unique and innovative combined degree programs leading to both a B.S. degree and a graduate or professional degree within an accelerated time frame. These combined degree programs include the five-year Bachelor of Science (B.S.) in Biology/Master of Business Administration (M.B.A.) degree programs in Health Care and Biomedical Sciences Management and a five-year B.S. in Biology/Master of Biomedical Engineering (M.B.E.) degree program (see the Department of Biology section of this catalog for detailed descriptions of these programs).

The College of Science takes pride in offering students outstanding degree programs in all of its departments. These programs are marked by excellent teaching, broad undergraduate research opportunities and superior academic and career advising. Graduates of these degree programs are highly competitive in the job market or when applying to nationally recognized graduate or health professions schools. Please visit the College of Science website to make an appointment with one of our advisors. www.uta.edu/cos (https://www.uta.edu/science/)
Opportunities in Science

The future marvels of the 21st century will spring from science just as did those of the 20th century. The human genome project, miracle drugs, efficient fuels, arrays of new synthetic materials, the transistor, the laser, nuclear power, solar energy, computers, the Worldwide Web, global information systems, the electron microscope, nanotechnology, bioinformatics and sophisticated techniques for locating mineral deposits are merely a few examples of the crowning scientific achievements of the past century. Discoveries of similar or greater magnitude lie ahead in this new century as scientists bring their talents to bear on modern society’s pressing problems such as alternative energy sources, environmental protection, and improved health care. Students graduating from College of Science degree programs have the unique opportunity to participate in this century of new and unparalleled scientific discovery.

Requirements for Admission to the College of Science

The University of Texas at Arlington does not admit students to specific degree programs. Instead students wishing to pursue a major in one of the College of Science undergraduate degree programs must apply to the appropriate academic unit for acceptance into that program. Students should familiarize themselves with the general requirements for acceptance to the degree program of their choice as well as the specific requirements for granting of the degree.

ACADEMIC POLICIES FOR COLLEGE OF SCIENCE MAJORS

In the College of Science, students are required to maintain a minimum overall GPA of 2.25 in all their course work as well as a minimum GPA of 2.25 in their major course work in order to remain in good standing within their degree program. Students whose overall or major GPA falls below 2.25 will be dropped as a major in the College of Science and must select an alternative major.

The general College of Science policy on academic probation may be superseded by more rigorous policies within specific science degree programs.

ACADEMIC POLICIES FOR SCIENCE MINORS

A science minor consists of 18 credit hours or more in any one of the departments within the college. At least 6 of the 18 hours must be in advanced 3000 or 4000 level courses. All classes that are to be used toward a minor must also be applicable toward a major in the same discipline. Non majors courses may not be applied toward a minor.

A 2.0 grade average must be maintained in the minor In order to be approved by the minor department. All classes for a science minor must be approved by an academic advisor in the minor department. Transfer students must complete at least nine hours toward the minor at UT Arlington, and six of the nine must be 3000 or 4000 level.

Transfer Students

Field of Study

Students who complete an approved field of study curriculum in whole or in part will receive academic credit for the equivalent courses within their selected field of study at UT Arlington. To view the field of study curriculums approved by the Texas Higher Education Coordinating Board, visit THECB website (https://www.highered.texas.gov/our-work/supporting-our-institutions/institutional-resources/workforce-transfer-resources/programs-of-study/).

Core Complete

Students who transfer from a Texas community college or university and are certified as core complete shall have satisfied the core requirements of UT Arlington. Academic departments may, in some instances, require specific courses outside the major as prerequisites for major course work.

Academic Standards

Students who wish to be admitted to a department within the College of Science must have a grade point average of 2.25 or higher in all college course work completed prior to application for admission to the UT Arlington College of Science.

COMPETENCE IN COMPUTER USE

Graduating students are expected to be proficient in the use of computers. Proficiency is considered to be the ability to utilize word-processing, database/spreadsheet, statistical, graphical and other representative software applications in a student’s major discipline. Each student should be able to tap the communications, analytical, and information-retrieval potential of computers to solve scientific problems and evaluate research results. Students should consult with their individual department, school or college undergraduate advisors to determine the mechanisms by which they can demonstrate computer competency. A student may be required to pass a proficiency examination or complete a department- or college-designated computer proficiency course to meet this requirement.

COMPETENCE IN ORAL PRESENTATIONS

Graduating students are expected to have proficiency in oral communication skills including interaction in classroom settings to meet the needs of their course work and utilization of acceptable grammar and pronunciation in formal presentations. Students should consult their individual department, school or college undergraduate advisors to determine the mechanisms by which they can demonstrate oral communication skills competency. A student may be required to pass a proficiency examination or complete a department- or college-designated oral communication skills course to meet this requirement.
Pre-Health Programs

Students interested in graduate health professional fields such as medicine, dentistry, physician assistant, pharmacy, optometry and veterinary medicine may complete required courses with most majors. The Health Professions Office offers pre-health advising on graduate health school requirements and expectations, access to resources, mock interviews, opportunity for a committee letter of recommendation, and feedback/assistance in applying to professional health schools.

In general, health professional admission committees do not state a preference regarding an applicant’s undergraduate major, leaving students to choose a degree program best suited to their special abilities and interests. Therefore, a student may choose any major, as long as the minimum requirements for admission to the specific program(s) are met. Science courses for non-science majors do not satisfy the requirements for most graduate health professional schools. The B.S. in Biology meets the requirements for most programs. Additional information can be found on the Health Professions Website: [https://www.uta.edu/pre-health](https://www.uta.edu/pre-health).

Post Baccalaureate Non-Degree Seeking Program

The post baccalaureate program is intended for students who have previously completed a bachelor’s degree and wish to pursue admission to a graduate health professional school, usually medical, dental, or PA school. Since student backgrounds vary, courses for the post baccalaureate program are custom designed for the individual student. This informal program does not have special admission requirements. Students in this program may complete prerequisite requirements in one to two years depending upon their undergraduate major and GPA, intended course load, time of entry to the program, and additional criteria that should be discussed with the Health Professions Advisor. Additional information can be found on the Post Bacc Program Page [https://www.uta.edu/science/programs/health-professions/non-traditional-and-post-bacc-applicants.php](https://www.uta.edu/science/programs/health-professions/non-traditional-and-post-bacc-applicants.php) on the Health Professions Website: [https://www.uta.edu/pre-health](https://www.uta.edu/pre-health).

Teacher Certification in the Sciences

Programs leading to teacher certification at secondary levels are available in departments of the College of Science in coordination with UTeach Arlington and the College of Education. Included among these are secondary certification in Composite Science or Life Science offered in the Departments of Biology and Earth & Environmental Sciences; in Physical Science offered in the Departments of Physics and Chemistry & Biochemistry; in Chemistry offered in the Department of Chemistry and Biochemistry; in Physics/Mathematics offered in the Department of Physics; and in Mathematics offered in the Department of Mathematics. Descriptions of these programs are provided in each department’s section of this catalog.

Transfer Students

Students transferring from other institutions are invited to explore opportunities in the College of Science. Inquiries about the equivalency of their transferred courses and other questions related to transferring are welcome to make an appointment with the Transfer Advisor, 107B Life Science Building.

Science Constituency Council

The Science Constituency Council is the official representative student organization for the College of Science with Student Government. Meeting twice monthly, the SCC serves both the College and its students. The SCC strives to involve a greater number of students in all aspects of the College of Science. SCC members are majors in the departments of the College. For more information, visit [https://mavorgs.campuslabs.com/engage/organization/scienceconstituencycouncil](https://mavorgs.campuslabs.com/engage/organization/scienceconstituencycouncil).

Science Learning Center

501 S. Nedderman Dr. · 106 Life Science Bldg.

The Science Learning Center is an on-site resource facility designed to support student learning and course work in science and mathematics through self-study modules and a variety of study aids. In cooperation with College of Science faculty, the center offers a full spectrum of multimedia resource materials and study aids for students in biology, chemistry, geology, mathematics, physics and psychology classes. The center also provides students with study areas and a study lounge.

Materials currently available include:

- Study guides and sample exams
- Lab notes and solutions manuals
- Hands-on models (Anatomical and Molecular)
- MCAT Prep Resources
- Networked computers
## Chemistry Clinic

The Chemistry Clinic is available to answer questions related to your chemistry courses. This service is free for all UT Arlington students enrolled in the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1400</td>
<td>INTRODUCTORY CHEMICAL PRINCIPLES</td>
<td>4</td>
</tr>
<tr>
<td>CHEM 1341</td>
<td>GENERAL CHEMISTRY I</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 1342</td>
<td>GENERAL CHEMISTRY II</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 1441</td>
<td>GENERAL CHEMISTRY I</td>
<td>4</td>
</tr>
<tr>
<td>CHEM 1442</td>
<td>GENERAL CHEMISTRY II</td>

<td>CALCULUS II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 3319</td>
<td>DIFFERENTIAL EQUATIONS &amp; LINEAR ALGEBRA</td>
<td>3</td>
</tr>
</tbody>
</table>

It is located in Room 325, Pickard Hall, and is open seven days a week during the Fall and Spring semesters and with limited hours during the Summer semesters. The tutors are outstanding undergraduate students with demonstrated abilities for helping students.

## Physics Clinic

The Physics Clinic is a tutoring service provided on a walk-in basis for students enrolled in:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 1441</td>
<td>GENERAL COLLEGE PHYSICS I</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 1442</td>
<td>GENERAL COLLEGE PHYSICS II</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 1443</td>
<td>GENERAL TECHNICAL PHYSICS I</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 1444</td>
<td>GENERAL TECHNICAL PHYSICS II</td>
<td>4</td>
</tr>
</tbody>
</table>

The tutors include graduate students, faculty and outstanding undergraduates. The location and times are posted in the Physics Department Office, 108 Science Hall.

## Science and Mathematics for the Non-Science Major

The College of Science provides a wide variety of science courses for non-science majors. These courses, including those listed below, have been specifically designed to be applicable to science and mathematics requirements for non-science majors. Non-major students should examine the requirements for their degrees before selecting science courses to meet those requirements. The listed courses are also intended to stimulate interest in science and mathematics beyond the specific degree requirements for non-science majors. The figures in parenthesis indicate the number of hours
of instruction per week in the Fall and Spring Semesters. The first figure indicates the amount of time devoted to theory, and the second indicates the amount of time devoted to laboratory work.

Scholastic Activity and Research Interests of the Faculty

BIOLOGY

The Department of Biology has a wide array of research programs ranging from molecular through ecosystem levels of integration. The program boasts strengths in ecology and systematics, evolution, microbiology, genomics, and molecular biology, and has active funding from a variety of private and public agencies. The department also hosts centers for genomics, biological macrofouling, electron microscopy and a collection of vertebrates. The research program emphasizes quantitative aspects of biology and provides students with strong training in statistics and experimental design.

CHEMISTRY AND BIOCHEMISTRY

Research programs include synthetic work on natural products, medically active agents, novel ligands, new catalysts, luminescent materials, photocatalysts, supramolecular and metallosupramolecular compounds, molecular magnetism, molecular recognition, stabilization of reactive intermediates, solar energy conversion and electrically conducting polymers. Biochemical research includes studies of enzymology and molecular biology of bacterial metabolism, and studies on problems involved in anticancer therapy. Physical, analytical and electrochemical research includes studies of colloids and surfaces, electrode modification through thin film surface deposition, MALDI mass spectrometry and characterization of the electrical properties of polymers and other materials. Theoretical studies involve both a major computational program applying molecular orbital theory to a variety of problems.

EARTH AND ENVIRONMENTAL SCIENCES

Department research has a strong orientation toward the application of geochemistry, oceanography, geophysics and paleobiology to earth resources and the environment. Current research interests include analysis and modeling of geologic deformational structures, biostratigraphy of accreted terranes of the Pacific Northwest and the middle Permian of West Texas, sedimentology, paleoclimatology, hydrology, fluvial geomorphology, environmental health, and plate tectonics.

MATHEMATICS

The Department of Mathematics at the University of Texas at Arlington is fast evolving into one of the premier centers in the Dallas/Fort Worth metroplex for mathematics research and education. Our active research faculty have strengths that lie in pure, applied mathematics, statistics, and mathematics education. Many of their research projects are supported by external grants. Recent faculty scholarly accomplishments attest to the high quality of research. The research interests of the faculty in the Mathematics Department include the following areas:

Algebra: homological theory of commutative Noetherian rings; non-commutative algebra using geometric methods; symbolic computations; representations of Lie Algebras and superalgebras.

Differential Equations, Integral Equations and Dynamical Systems: geometric study of integrable Hamiltonian systems; stability and instability of solitary waves; nonlinear dispersive waves; free boundary problems related to phase transition and multi-fluid flow; stochastic differential equations; control theory; inverse problems; computerized tomography.

Geometry: birational algebraic geometry and Mori theory; differential geometry and inverse spectral geometry; finite geometry related to non-associative division algebras.

Mathematical Biology: mathematical modeling of microbial populations, biofilms and competition dynamics; population biology and epidemiology; neuronal dynamics.

Mathematical Education: mathematics program development, impact of reform mathematics learning strategies on mathematics teaching, mathematics problem solving for teaching.

Numerical Analysis: numerical solutions to ordinary and partial differential equations; moving grid, multi-grid and multilevel adaptive methods; fluid dynamics (mechanics); numerical simulation and scientific computation; numerical combustion; software development.

PHYSICS

Current research in the department is primarily in the areas of condensed matter physics, materials science and high energy physics. The theoretical condensed matter group is engaged in cluster, electron transport, electronic structure, molecular dynamics and path integral computations having relevance to the chemical, electrical and magnetic properties of surfaces, metals and semiconductors. The experimental condensed matter group is engaged in studies of diamond coatings, magnetic multi-layers, metals, semiconductors and surfaces using electron, positron, optical and magnetic resonance spectroscopies. The experimental high energy group is involved in collider experiments at Fermi-lab, Brookhaven Laboratory and CERN to
study QCD and to search for super-symmetry and other physics beyond the standard model. Other active research areas include high energy theory, optics, parallel computing and statistical physics.

**PSYCHOLOGY**

Expertise and research activity include animal behavior, animal and human learning, cognitive processes, social psychology, psycho-biology and developmental psychology. Current research interests include group brainstorming, verbal memory and neuro-psychology, applied psychological measurement, pain systems, decision processes, naturalistic social cognition, stress, genetic and hormonal determinants of aggressive and defensive behaviors and parent-offspring interactions, sea turtle behavior, and infant mental representation of objects.

**SCIENCE EDUCATION**

The Master of Arts in Interdisciplinary Science (MAIS), a 36 credit hour degree program without a thesis requirement, was designed and developed by science teachers for science teachers. The program will help science educators strengthen and update their knowledge of content in two or more of the following cognate areas: biology, chemistry, earth & environmental sciences, mathematics, and physics. In addition to enhancing content knowledge, the courses will help educators develop teaching strategies that lead to improved student learning, implement high quality instructional materials, and develop skills in using various strategies for assessing student learning. The MAIS degree will serve the needs of classroom teachers, content-area and staff development specialists, curriculum developers, program directors, school administrators, college/university faculty, and educators from informal science institutions who have responsibility for designing, delivering, evaluating, and/or continuously improving standards-based science, mathematics, and technology instruction for students, prekindergarten through the undergraduate degree.

While engaging in the coursework, educators will become learners themselves to deepen their own mastery of scientific and/or mathematical content. The laboratory-based learning activities in the program will help science educators see teaching as less a matter of knowledge transfer and more as an activity of facilitation in which knowledge is generated, content is investigated in depth, and meaning is developed from experience. Graduates of the program will take their place as master science educators who are recognized as proven practitioners in delivering rigorous and relevant instruction and are valued as effective coaches, mentors, and teacher trainers.

**Programs**

**MASTER OF SCIENCE DEGREES**

- Biology
- Chemistry
- Earth & Environmental Sciences (Both Thesis and Non-thesis)
- Mathematics
- Physics
- Psychology

**MASTER OF ARTS DEGREE**

- Interdisciplinary Science (Non-thesis)

**DOCTORAL DEGREES**

- Chemistry
- Experimental Psychology
- Physics and Applied Physics
- Quantitative Biology
- Mathematics
- Earth and Environmental Sciences
Biology

Undergraduate Degrees

- Bachelor of Arts in Biology (http://catalog.uta.edu/science/biology/undergraduate/#bachelortext/#ba)
- Bachelor of Science in Biology - Life Science Teacher Pathway (http://catalog.uta.edu/science/biology/undergraduate/#bachelortext/#bsteacher)
- Bachelor of Arts in Biology - Composite Science Teacher Pathway (http://catalog.uta.edu/science/biology/undergraduate/#bachelortext/#bacomposite)
- Bachelor of Science in Biology (http://catalog.uta.edu/science/biology/undergraduate/#bachelortext/#bsbiology)
- Bachelor of Science in Microbiology (http://catalog.uta.edu/science/biology/undergraduate/#bachelortext/#bsmicrobiology)
- Bachelor of Science in Medical Technology (http://catalog.uta.edu/science/biology/undergraduate/#bachelortext/#bsmedicaltechnology)

- Quantitative Biology, B.S. to Ph.D. (p. 1153)
- Quantitative Biology, Ph.D. (p. 1153)

COURSES

BIOL 1301. NUTRITION. 3 Hours. (TCCN = BIOL 1322)
Nutrients essential to an adequate diet and good health and the nutritive values of common foods are reviewed. Offered as BIOL 1301 and HEED 1301: credit will be granted for only one of these courses. Students seeking certification in Health Education must enroll in HEED 1301. Students seeking credit toward their science requirement must enroll in BIOL 1301. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, or medical technology.

BIOL 1333. BIOLOGY FOR NON-SCIENCE MAJORS: CELLS AND DISEASE. 3 Hours. (TCCN = BIOL 1306)
Scientific literacy is crucial for navigating health-related issues in today's society. In this lecture and lab course, non-science majors will learn about the molecules of life, the cell, energy and metabolism, cell division, genetics and inheritance and diseases, such as cancer and diabetes. This course will satisfy the laboratory science requirements for students in the Colleges of Liberal Arts and Business Administration, and in the School of Social Work. Formerly listed as BIOL 1433, credit will not be given for both.

BIOL 1334. BIOLOGY FOR NON-SCIENCE MAJORS: LIFE ON EARTH. 3 Hours. (TCCN = BIOL 1307)
Scientific literacy is crucial for understanding the natural world and our relationship to it. In this lecture and lab course, non-science majors will learn about biologically-based problems facing today's society. Course themes include evolution, antibiotic resistance, genetic diversity, animal and bacterial and plant diversity, ecosystems, ecology and global change. This course will satisfy the laboratory science requirements for students in the Colleges of Liberal Arts and Business Administration, and in the School of Social Work. Formerly listed as BIOL 1434, credit will not be given for both.

BIOL 1345. BIOLOGY I FOR NURSING STUDENTS. 3 Hours.
This course focuses on the chemical and molecular basis of life, including metabolism, cell structure and function, and genetics to provide knowledge of these subjects for those pursuing a degree in nursing or public health. Note: This course cannot be applied for credit toward a degree in Biology.

BIOL 1441. BIOLOGY I FOR SCIENCE MAJORS: CELL AND MOLECULAR BIOLOGY. 4 Hours. (TCCN = BIOL 1406)
(BIOL 1406) This course focuses on the chemical and molecular basis of life, including metabolism, cell structure and function, and genetics. Laboratory experiments are designed to complement theory presented in lecture. Formerly listed as BIOL 1449; credit will not be given for both.

BIOL 1442. BIOLOGY II FOR SCIENCE MAJORS: ECOLOGY AND EVOLUTION. 4 Hours. (TCCN = BIOL 1407)
Reviews significant aspects of organismal biology and presents current hypotheses concerning the origin and diversification of life on earth. The ecological and behavioral interactions between organisms and their biotic/abiotic environments are considered from an evolutionary perspective. The laboratory will examine evolution, ecology and the diversity of life using hands-on observational and experimental approaches. Prerequisite: BIOL 1441.

BIOL 2300. BIOSTATISTICS. 3 Hours.
Introduction to the collection, description, and analysis of data with statistical methods appropriate for biological sciences. Specific topics covered include but are not limited to: descriptive statistics, frequency distributions, random sampling, probabilities, binomial distribution, normal distribution theory and calculations, confidence intervals, t-tests (independent sample and paired designs), Chi-square tests (one-way and two-way analysis), analysis of variance, correlation and linear regression. Prerequisite: BIOL 1441 and BIOL 1442, or permission of the instructor.

BIOL 2317. BASIC CONCEPTS IN HUMAN SEXUALITY. 3 Hours.
The physiological, psychological, and sociological aspects of human sexuality. Offered as BIOL 2317, HEED 2317, PSYC 2317, and GWSS 2317. Credit will be granted for one of these courses only. Students seeking certification in Health Education must enroll in HEED 2317. Students seeking credit toward their science requirement must enroll in BIOL 2317. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, medical technology, psychology, or sociology.
BIOL 2444. GENERAL MICROBIOLOGY. 4 Hours.
Fundamental principles of microbiology including the structure and function of microbial cells and their activities in nature. Bacteria will be used in the laboratory to provide training and experimental methodology. Formerly listed as BIOL 3444; credit will not be granted for both. Prerequisite: BIOL 1441, CHEM 1441 or CHEM 1341.

BIOL 2457. HUMAN ANATOMY AND PHYSIOLOGY I. 4 Hours. (TCCN = BIOL 2401)
Functional morphology of humans, cellular function, principles of support and movement, and neural control systems. Laboratory exercises involve both anatomical and physiological aspects of principles introduced in the lecture. This class is designed for students in sport activities (EXSA), nursing, and health. Prerequisite: BIOL 1345 or BIOL 1441 or equivalent, or approval of the department. May not be used for biology grade point calculation or biology credit toward a degree in biology or microbiology.

BIOL 2458. HUMAN ANATOMY AND PHYSIOLOGY II. 4 Hours. (TCCN = BIOL 2402)
Functional morphology of humans, maintenance of the human body, and continuity of life. Topics will include the endocrine, cardiovascular, respiratory, digestive, urinary, immune, and reproductive systems. Laboratory exercises explore both anatomical and physiological aspects of principles introduced in the lecture. This class is designed for students in sport activities (EXSA), nursing, and health. Prerequisite: BIOL 2457 or equivalent. May not be used for biology grade point calculation or biology credit toward a degree in biology or microbiology.

BIOL 2460. NURSING MICROBIOLOGY. 4 Hours.
The intention of this course is to present basic information, relevant to nursing practice, with the principles of microbiology and the nature of microbial disease. This course will give the student a fundamental background of knowledge that will be applicable to the care of infectious patients, to the control of microbial diseases, and an understanding of microorganisms. The laboratory will provide practice in aseptic techniques, the use of disinfectants and antimicrobial agents, and microscopic study of bacteria. This course cannot be applied for credit toward a degree in Biology. Prerequisite: BIOL 1345, or BIOL 1441 or equivalent.

BIOL 3101. CURRENT TOPICS IN BIOLOGY. 1 Hour.
Seminar on significant topics and issues in modern biology. Students will attend seminars on selected topics. Topics will vary each semester. May be repeated once for biology credit.

BIOL 3131. SERVICE LEARNING. 1 Hour.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisite: Permission of the Instructor.

BIOL 3149. COOPERATIVE PROGRAM IN BIOLOGY. 1 Hour.
The purpose of this course is to allow students to earn college credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment.

BIOL 3231. SERVICE LEARNING. 2 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisite: Permission of the Instructor.

BIOL 3249. COOPERATIVE PROGRAM IN BIOLOGY. 2 Hours.
The purpose of this course is to allow students to earn college credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment.

BIOL 3301. CELL PHYSIOLOGY. 3 Hours.
An introduction to the basic physical, chemical, and biological principles which govern function in eukaryotic cells, and the relationships between cells and their environments. Prerequisite: BIOL 1441. CHEM 2181 and CHEM 2321 are recommended.

BIOL 3302. UNDERGRADUATE RESEARCH EXPERIENCE. 3 Hours.
In this laboratory course, students will learn core concepts in Biology through an intense research experience. Students will master skills including quantitative data analysis, oral and written communication, and critical thinking. Permission is required to enroll in this course.

BIOL 3303. DRUGS AND BEHAVIOR. 3 Hours.
A survey of the psychoactive agents, their therapeutic uses, and social abuses. Alcohol, nicotine, caffeine, narcotics, hallucinogens, stimulants, and tranquilizers. Offered as BIOL 3303, HEED 3303, and PSYC 3303; credit will be granted only once. May not be used for biology grade point calculation or biology credit toward a B.S. degree in biology, microbiology, or medical technology. Students seeking certification in health education must enroll in HEED 3303.
BIOL 3304. MICROBIAL GENETICS. 3 Hours.
Consideration of the physical, chemical, and functional nature of genetic processes in micro-organisms. Prerequisite: BIOL 2444, or permission of instructor.

BIOL 3306. BACTERIAL PHYSIOLOGY AND ANTIBIOTICS. 3 Hours.
This course will cover the fundamentals of how bacterial cells work, and how antibiotics interfere with essential functions to stop bacterial cells from working. This class is taught largely through reading and discussion of the primary literature, and with active learning and writing assignments. Prerequisite: BIOL 2444.

BIOL 3307. EVOLUTIONARY MEDICINE. 3 Hours.
The application of evolutionary theory to the practice of medicine from an anthropological perspective. Topics include diet/paleodiets, sleep habits, infectious diseases, the developmental origins of health and disease, mental health, women's health and reproduction, and aging/senescence, among others. Offered as BIOL 3307 and ANTH 3307; credit will only be granted in one department.

BIOL 3308. MICROBIAL ECOLOGY AND EVOLUTION. 3 Hours.
The diversity, ecology and evolution of microorganisms in natural systems. Topics will include the role of bacteria and fungi in the functioning of terrestrial ecosystems; microbial biogeography; taxonomic and metabolic diversity; evolutionary diversification; and interactions among microbes and with plant and animal hosts. Prerequisite: BIOL 2444.

BIOL 3310. SELECTED TOPICS IN BIOLOGY. 3 Hours.
Topics in biology not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May be repeated for biology elective credit as different topics are offered. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 3311. SELECTED TOPICS IN MICROBIOLOGY. 3 Hours.
Topics in microbiology not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May be repeated for microbiology elective credit as different topics are offered. Prerequisite: BIOL 1441, BIOL 2444.

BIOL 3312. IMMUNOLOGY. 3 Hours.
An introduction to the components, properties, and manifestations of the adaptive immune response that occurs in vertebrates. Prerequisite: BIOL 1441, BIOL 2444. CHEM 2181, CHEM 2321 are recommended.

BIOL 3313. HUMAN ADAPTATION AND THE CONCEPT OF RACE. 3 Hours.
The study of modern human biological variation in the context of the history of the concept of race. Detailed historical review explores changing perspectives on variation within our species. Course examines physiological adaptations to environmental stress among a variety of human populations and implications of recent genetic research. Offered as BIOL 3313 and ANTH 3311; credit will only be granted in one department.

BIOL 3314. PRIMATE EVOLUTION AND BEHAVIOR. 3 Hours.
An overview of the Primate Order covering primate origins, evolution, ecology, adaptation, and behavior. Examination of the environmental context within which primates live, how the form of their bodies reflects their activities, and how they relate behaviorally to their environments and to one another. Offered as BIOL 3314 and ANTH 3313; credit will only be granted in one department.

BIOL 3315. GENETICS. 3 Hours.
Principles of molecular and classical genetics. The function and transmission of hereditary material in microorganisms, plants, and animals, including humans. Prerequisite: BIOL 1441.

BIOL 3316. ASTROBIOLOGY I. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include properties of life, origin and evolution of life on Earth, terrestrial geology and habitability, environmental forcings, extremophiles, mass extinctions, meteorites, searches for life in the solar system. Offered as BIOL 3316, GEOL 3316 and PHYS 3316; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent.

BIOL 3317. GENOMICS. 3 Hours.
This course presents an integrative approach to genome science, combining elements of genetics, state of the art technologies in genomic analysis. A basic knowledge of genetics and probability concepts is required. Use of the World Wide Web will be an essential part of the course. Prerequisite: BIOL 3315 or permission of instructor.

BIOL 3318. LIMNOLOGY. 3 Hours.
The living and nonliving components of inland waters. An introduction to the geological, physical, and chemical background, and to the major organisms and ecological processes. Prerequisite: BIOL 1441.

BIOL 3319. HUMAN GENETICS. 3 Hours.
This course will enable students to comprehend the basic principles of genetics applied to human inheritance and disease, to interpret the research strategies aimed to identify and study the genes responsible for diverse functions and traits, as well as to assess the consequences of the genetic technologies in our society. Prerequisites: BIOL 1441 and BIOL 3315.

BIOL 3320. BIOLOGY OF TEXAS. 3 Hours.
This course is an introduction to habitat diversity and the number of species found in the state of Texas. Students will learn about the physical, climatological, and human geography of Texas and how that affects animal and plant life within the state. Descriptions of state and federal endangered species listing processes will also be covered. Prerequisite: BIOL 1441 and BIOL 1442.
BIOL 3321. INFECTIOUS DISEASE. 3 Hours.
This course will cover key concepts that relate to the history and background of infectious diseases, as well as the emergence, spread, and control of infectious disease epidemics. Vaccination, antibiotic resistance, and eradication of diseases will also be discussed. Prerequisite: BIOL 3444.

BIOL 3322. BRAIN AND BEHAVIOR. 3 Hours.
An introduction to the anatomical structures and physiological processes that determine behavior. Topics include the acquisition and processing of sensory information, the neural control of movement, and the biological bases of complex behaviors (such as learning, memory, sex, language, and addiction), as well as the basic functioning of the nervous system. Offered as BIOL 3322 and PSYC 3322. Credit will be granted only once. BIOL 3322 prerequisite: BIOL 1441, BIOL 1442. PSYC 3322 prerequisite: BIOL 1441 or PSYC 1315.

BIOL 3324. HUMAN ECOLOGY OF FOOD. 3 Hours.
Modern food production and consumption is a complex, interdisciplinary topic directly relevant to global environmental and public health issues. This course will examine our place in the food web from ecological, biogeographical, historical, cultural, and sociopolitical perspectives. Course participants will examine the implications of our everyday decisions as consumers who play a key role in an intricate ecological system. Prerequisite: BIOL 1441 and BIOL 1442.

BIOL 3326. ANIMAL BEHAVIOR. 3 Hours.
A survey of research and theory comparing behavior at various phyletic levels. Offered as BIOL 3326 and PSYC 3326. Credit will be granted for only one of these courses. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 3327. MICROBIAL DIVERSITY. 3 Hours.
This course is an introduction to the great diversity of microbial life. The topic material explores this diversity by considering the great age of bacteria, their evolution, biochemistry, habitat and form. The course of study focuses attention on organisms not commonly encountered in General Microbiology laboratories. Prerequisite: BIOL 3444 Microbiology.

BIOL 3328. ENVIRONMENTAL MICROBIOLOGY. 3 Hours.
An introduction to the principles, methodology, and practical applications and implications of environmental microbiology. Lecture topics include habitat and community approaches to environmental microbiology, measures of microbial populations and activities, interactions among microbial communities, the role of microorganisms in the origin of mineral resources, microorganisms and pollution, and current developments on energy flow through microbial communities. Prerequisite: BIOL 3444.

BIOL 3331. SERVICE LEARNING. 3 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisite: Permission of the Instructor.

BIOL 3333. GLOBAL CHANGE BIOLOGY. 3 Hours.
This course covers global-scale environmental changes and their consequences for species and ecological communities. We will focus on climate change, habitat loss, and species invasion, with special emphasis on combining physiology, ecology, and evolution to understand past responses and predict future outcomes. Prerequisite: BIOL 1442.

BIOL 3339. INTRODUCTION TO EVOLUTION. 3 Hours.
The goals of this course are: to introduce students to the process of evolution, the patterns that result, and the way that evolutionary history has shaped the diversity of organisms on Earth; to explore how evolutionary biologists formulate and test hypotheses; to investigate applications of evolutionary biology to mainstream medical research; and to investigate current controversies in evolutionary biology. Prerequisites: BIOL 1441 and BIOL 3315 (or equivalent), or permission of instructor.

BIOL 3340. BIOINFORMATICS. 3 Hours.
This course is an applied introduction to bioinformatics and computational genomics. The course is geared toward the student with a biology background and limited programming experience. The course provides an entrance to commonly used programming/scripting languages and an introduction to numerous aspects of modern genomic data analyses (e.g. identification of coding and regulatory features in novel sequences, expression analysis, and comparative/phylogenetic analyses). Prerequisite: BIOL 1442 and BIOL 3315, or permission of instructor.

BIOL 3342. DEVELOPMENTAL BIOLOGY IN HEALTH AND DISEASE. 3 Hours.
An introduction to fundamental developmental events that form complex organisms with an emphasis on human health and disease. Prerequisites: BIOL 1441 and 1442. BIOL 3301 is recommended.

BIOL 3348. PRE-MEDICAL PRECEPTORSHIP. 3 Hours.
The purpose of this course is to allow students to earn college credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment. This course offers an introduction to the general principles and the environment of the practice of medicine in various specialties. Students are afforded the opportunity to observe a physician in a real-world setting, often including inpatient and operating theater scenarios. Students will also be exposed to the primary literature and practice oral presentation skills over biomedical topics.
BIOL 3349. COOPERATIVE PROGRAM IN BIOLOGY. 3 Hours.
The purpose of this course is to allow students to earn college credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment.

BIOL 3352. INTRODUCTION TO FORENSIC LAB SCIENCE. 3 Hours.
An introduction to the various disciplines of Forensic Science including DNA analysis, drug analysis, and firearms basics. Laboratory consists of hands-on investigation of mock crime scenes, fingerprint enhancement methods, and biological analysis of fluids. Prerequisite: BIOL 1441, BIOL 1442, CHEM 1441.

BIOL 3353. FUNDAMENTAL MEDICAL MYCOLOGY. 3 Hours.
Medical mycology deals with those infections in humans, and animals resulting from pathogenic fungi. As a separate discipline, the concepts, methods, diagnosis, and treatment of fungal diseases of humans are specific. Fundamental Medical Mycology balances clinical and laboratory knowledge to provide students with in-depth coverage of the most common fungal diseases and its etiologic agents from both the laboratory and clinical perspective. Prerequisite: BIOL 2444.

BIOL 3355. TOXICOLOGY. 3 Hours.
An introduction to the general principles of toxicology with an emphasis on certain classes of toxic agents, their sources and toxic effects, as well as their environmental fates. Pollution of various media (air, water and soil) and the differences between them will be discussed. Prerequisite: BIOL 1441, BIOL 1442, CHEM 1441 and CHEM 1442.

BIOL 3356. ENVIRONMENTAL SYSTEMS, BIOLOGICAL ASPECTS. 3 Hours.
Biological components of environmental systems. Population dynamics, species interactions, community structure, biodiversity, bioenergetics, nutrient cycling and human impacts are reviewed. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 3358. ASTROBIOLOGY II. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include basic properties of life, habitability of Earth, studies of possible life regarding Mars, Europa & Titan, space missions, exoplanets and exomoons, stellar habitable zones, multistellar systems, exoEarths, biomarkers, SETI, Fermi paradox, Drake equation, cosmology. Offered as BIOL 3358, GEOL 3358, and PHYS 3358; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent. Note that Astrobiology I is strongly recommended to students to be taken prior to Astrobiology II, but is not a prerequisite.

BIOL 3359. MEDICAL MOLECULAR BIOLOGY. 3 Hours.
This course is an introduction to modern molecular biology and human diseases. This course will use medical diseases, class projects, and problem sets to explore and learn modern molecular biology. The molecular mechanisms and underpinnings for several human diseases will be covered. Topics may include, gene regulation, the dynamic genome and how to rewrite it, modern cloning schemes, synthetic biology, and drug design. BIOL 3315 or BIOL 2444 are recommended, but not required. Prerequisite: BIOL 1441.

BIOL 3409. PALEOANTHROPOLOGY. 4 Hours.
Paleoanthropology: an exploration of fossil evidence for human origins and human evolution. Course focuses on the evolution of humans and our close relatives, from our origins as a distinct lineage to “anatomically modern” Homo sapiens, including the relationship between biological and cultural/behavioral evolution. Offered as BIOL 3409 and ANTH 3409; credit will be granted only once.

BIOL 3410. SELECTED TOPICS IN BIOLOGY. 4 Hours.
Topics in biology not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May include lab, service learning or any other experiential learning module. May be repeated for biology elective credit as different topics are offered. Prerequisite: BIOL 1441 or BIOL 1442.

BIOL 3420. GENETICS METHODS LAB. 4 Hours.
Computational and experimental approach to genomics research. The course theme will be transposable elements. Prerequisite: BIOL 3315.

BIOL 3427. PLANT SCIENCE. 4 Hours.
A survey of plant science including the importance of plants to people and the human side of botany; the structure, reproduction, physiology, and classification of plants. The laboratory includes the study of structure, function, reproduction, and classification of plants. Replaces BIOL 3327 and BIOL 3183. Credit cannot be given for BIOL 3427 and BIOL 3327 and 3183. Prerequisite: BIOL 1441, BIOL 1442 or equivalent.

BIOL 3442. HUMAN PHYSIOLOGY. 4 Hours.
A comparative study of vertebrate function. The general principles of physiological mechanisms on the cellular, tissue, organ, and organismal levels will be examined. Laboratory studies will complement lecture material and will stress experimental design, data analysis, and the understanding of critical research in physiology. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 3445. METHODS IN MOLECULAR MICROBIOLOGY. 4 Hours.
An overview of different techniques used during manipulation of microorganisms. It will allow students to gain an historical perspective of techniques used in microbiology as well as learn state of the art molecular characterization of microorganisms and their genetic manipulation. Introduces biochemical, physiological, and molecular biology methods to assess community diversity and microbial activity in a variety of ecosystems. Bacterial growth and survival, population biology, and microbial interactions will also be discussed. Prerequisite: BIOL 1441 and BIOL 3444.
BIOL 3446. HUMAN ANATOMY. 4 Hours.
Study of the gross functional anatomy of the human body. Students will participate in laboratory exercises designed to familiarize them with human anatomical structures and their functions. Use of euphony for anatomical terms will be minimized. Prerequisite: BIOL 1441, BIOL 1442 or 8 hours of Bioltran.

BIOL 3454. GENERAL ZOOLOGY. 4 Hours.
An overview of animal life including the diversity and evolution of major animal phyla, reproduction, development and aspects of physiological function. The laboratory examines form, function and phylectic relationships in a wide variety of animal types. Prerequisite: BIOL 1441, BIOL 1442, or equivalent, or permission of instructor.

BIOL 3457. GENERAL ECOLOGY. 4 Hours.
An examination of the theoretical and experimental aspects of the relationship between the biological and physical environments (organisms, food, space, and time) at the individual, population, community, and ecosystem levels. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 4089. RESEARCH IN BIOLOGY. 0 Hours.
Research problems on an individual basis, conducted under the direction of a member of the biology faculty. Prerequisite: written permission of the supervising instructor prior to registration. This is a non-credit course. Prerequisite: Written permission of the supervising instructor prior to registration.

BIOL 4179. RESEARCH AND DIRECTED STUDY. 1 Hour.
Research or independent study by individual students in biology under the supervision of a biology faculty member. Topics must be approved by the supervising faculty member. Prerequisite: BIOL 1441, BIOL 1442, and permission of instructor.

BIOL 4189. RESEARCH IN BIOLOGY. 1 Hour.
Research problems on an individual basis, conducted under the direction of a member of the biology faculty. A limit of two hours per semester is imposed and only a total of three hours may be counted toward degree requirements. These courses are offered only on a pass/fail basis. Prerequisite: written permission of the supervising instructor prior to registration.

BIOL 4279. RESEARCH AND DIRECTED STUDY. 2 Hours.
Research or independent study by individual students in biology under the supervision of a biology faculty member. Topics must be approved by the supervising faculty member. Prerequisite: BIOL 1441, BIOL 1442, and permission of instructor.

BIOL 4289. RESEARCH IN BIOLOGY. 2 Hours.
Research problems on an individual basis, conducted under the direction of a member of the biology faculty. A limit of two hours per semester is imposed and only a total of three hours may be counted toward degree requirements. These courses are offered only on a pass/fail basis. Prerequisite: written permission of the supervising instructor prior to registration.

BIOL 4303. MICROBIOMES: HEALTH AND THE ENVIRONMENT. 3 Hours.
The development, interactions, and change of polymicrobial communities in both humans and the environment with implications in health, nutrition, disease, research, ecology and agriculture. Prerequisite: BIOL 2444.

BIOL 4307. MOLECULAR EVOLUTION. 3 Hours.
This course focuses on understanding how genes and genomes evolve at the molecular level. Molecular biology provides the data while population genetics provides the theoretical framework. Prerequisite: BIOL 3315, BIOL 3339.

BIOL 4309. NEUROPHARMACOLOGY. 3 Hours.
A survey of how drugs affect the nervous system. General topics will include cellular and molecular foundations of neuropharmacology, receptors and modulation of neural signaling. The specific role of neurotransmitter systems (i.e. acetylcholine, dopamine, norepinephrine, serotonin, and opiate) will be explored. Offered as BIOL 4309 and PSYC 4309; credit will be granted only once. Prerequisite: one or more of the following courses or permission of instructor: BIOL 1441 or PSYC 3322/BIOI 3322 or BIOL 3301.

BIOL 4311. HISTOLOGY. 3 Hours.
Histology is a branch of biological science concerned with structure and function of the organism on a cellular level. The objective in this class is to provide students with the skills and knowledge needed to identify and describe tissues and organs in the microscopic images based on the characteristic morphologies of cells and arrangement of tissues. Students will learn about basic histological techniques used in slide preparation, four basic tissue types and types of tissue, followed by the survey of microscopic images of all organ systems. This course bridges the "whole body" disciplines of anatomy and physiology and cell-level sciences such as cell physiology and genomics. It will help students understand how the differential expression of the genome leads to different cell morphology that in turn leads to different functions. Prerequisite: BIOL 1441, BIOL 1442.

BIOL 4312. INTRODUCTION TO VIROLOGY. 3 Hours.
The nature, reproduction, and host cell interactions of viruses and virus-like agents of bacteria, animals, and plants. Prerequisite: BIOL 2444.

BIOL 4315. HORMONES AND BEHAVIOR. 3 Hours.
A study of the interaction between hormones and behavior. Specific topics covered include; examination of the hormonal influences on sex determination, reproductive behaviors, parental behavior, dominance and aggression, responses to stressful stimuli, homeostasis, and learning and memory. This course uses a comparative approach and draws examples of neuroendocrine function from throughout the animal kingdom including fish, birds, reptiles, and mammals (including humans). Offered as PSYC 4315 and BIOL 4315. Credit will be granted only once. Prerequisite: PSYC 3322/BIOI 3322 or BIOL 1441 or BIOL 3301.
BIOL 4316. GROWTH, DEVELOPMENT, AND EVOLUTION. 3 Hours.
A survey of topics at the nexus of modern human biological research in growth and development and the evolutionary record of hominin subadults. Offered as BIOL 4316 and ANTH 4315; credit will be granted only in one department. Prerequisite is only required for students registering for ANTH 4315. Prerequisite: ANTH 2307 or permission of the instructor.

BIOL 4317. BACTERIAL PATHOGENESIS. 3 Hours.
Host-pathogen relationships in microbial diseases. Topics include bacterium-host interactions; pathogens and pathogenic factors; techniques in pathogenesis research; molecular mechanisms of pathogenesis by major bacterial pathogens; antimicrobial compounds and resistance to antibiotics; and discussion of human genomics and susceptibility to infections. Prerequisites: BIOL 3312, BIOL 2444.

BIOL 4321. ADVANCED PROBLEM SOLVING IN BIOLOGY. 3 Hours.
This course will focus on crucial techniques needed to solve application-based questions in biology. Students will develop and practice reading comprehension, problem solving, critical thinking, and reasoning skills while deepening their understanding of core biological concepts, including cell and molecular biology; biochemistry; anatomy and physiology; and behavior. The goal of this course is to improve students' critical reasoning skills to prepare them for problem-based exams. BIOL 3442 is recommended. Prerequisite: BIOL 1442, BIOL 3301, BIOL 3315.

BIOL 4327. BEHAVIORAL GENETICS. 3 Hours.
Genetic influences on behavioral phenotypes. Research strategies, quantitative methods, and pharmacogenetic approaches to the brain; sociality and altruism; the personality, emotionality and intelligence; psychopathology; chromosomal abnormalities; forensic implications of genetic counseling. Offered as BIOL 4327 and PSYC 4327; credit will be granted only once. Students seeking credit toward the science requirement must enroll in BIOL 4327. Prerequisite: PSYC 1315 or BIOL 1441.

BIOL 4329. NEURAL ENGINEERING. 3 Hours.
This course consists of both lecture/discussion and laboratory. Lecture topics include central and peripheral nervous system injury and regeneration, brain/machine interfacing, primary culture of neural cells, neuroinflammatory and neurodegenerative disease. Laboratories include embryonic and neonatal rat derived neuronal culturing, immunostaining and quantitative analysis. Prerequisites: BIOL 3301, CSE 1310, CHEM 2322, and MATH 3319.

BIOL 4332. POLYMERS IN BIOMEDICAL ENGINEERING. 3 Hours.
This is a foundation course in polymeric biomaterial design, synthesis, characterization, and processing. The topics include design, surface-engineering, functionalization, characterization, as well as micro- and nano-fabrication of polymeric biomaterials. The biomedical applications of the polymeric biomaterials and their interaction with cell/tissue is discussed. Prerequisite: BIOL 3301, CSE 1310, CHEM 2322 and MATH 3319.

BIOL 4333. NANOBiomATERIALS. 3 Hours.
Synthesis, fabrication, characterization, and biomedical applications of nanobiomaterials. Topics include synthetic nanobiomaterials, biological nanobiomaterials (DNA nanomaterials, protein and peptide nanomaterials, etc.), biofunctionalization of nanobiomaterials, use of nanobiomaterials in tissue engineering, drug delivery, gene delivery. Prerequisites: BIOL 3301, CSE 1310, CHEM 2322 and MATH 3319.

BIOL 4343. RESEARCH METHODS - UTEACH. 3 Hours.
The purpose of this course is to present UTeach students with the tools scientists use to solve scientific problems. These tools enable scientists to develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in more conventional science classes. These tools include: design of experiments to answer scientific questions; use of statistics to interpret experimental results and deal with sampling errors; mathematical modeling of scientific phenomena; finding and reading articles in the current scientific literature; applying scientific arguments in matters of social importance; writing scientific papers; reviewing scientific papers; oral presentation of scientific work; use of probes and computers to gather and analyze data; ethical treatment of human subjects; laboratory safety. Research Methods is primarily a laboratory course, and most of these topics are developed in connection with 4 independent inquiries UTeach students design and carry out. Written inquiries will be evaluated as examples of scientific writing. Prerequisite: SCIE 1201 or SCIE 1334 or concurrent enrollment; junior or senior standing.

BIOL 4345. MICROBIAL PHYSIOLOGY. 3 Hours.
This course considers the anatomy and physiology of the bacterial cell in detail. Lecture topics consider the molecular architecture of cell walls, membranes and organelles, synthesis of wall material and membranes, insertion of proteins into membranes and regulation of biosynthetic systems at the whole cell level. Prerequisite: BIOL 1441 and BIOL 3444. CHEM 4311 recommended.

BIOL 4350. CONSERVATION BIOLOGY. 3 Hours.
Introduction to theory and practice of conservation biology, with emphasis on applications of modern quantitative and genetic techniques to preservation of organisms and habitats. Topics include identification and prioritization of units for protection; conservation genetics; preserve design; public policy issues; and case studies. Prerequisite: BIOL 3315 or equivalent (Genetics), or permission of the instructor.

BIOL 4352. FORENSIC BIOLOGY. 3 Hours.
A comprehensive review of biological principles, applied to forensic science, including sample recovery and handling, analytical techniques, profile matching/exclusion, reporting, and testimony. Prerequisite: BIOL 3315; statistics course recommended; or permission of instructor.

BIOL 4355. METHODS IN FORENSIC BIOLOGY. 3 Hours.
Analysis of typical biological evidentiary samples including extraction of DNA, quantitation, amplification and electrophoresis of examples. Instrumentation utilized includes thermal cyclers and ABI 377 genetic analyzer. Prerequisite: BIOL 4352 or concurrent enrollment.
BIOL 4357. HEALTH PSYCHOLOGY. 3 Hours.
This course provides a broad introduction to health psychology and its interface with the medical world. The course provides a balanced presentation of the important issues in the field, as well as specific content topics that are especially relevant today to better understand health and illness. Offered as BIOL 4357, HEED 4357, and PSYC 4357. Students seeking science requirement credit must enroll in BIOL 4357; students seeking Certification in Health must enroll in HEED 4357. Prerequisite: PSYC 1315 or BIOL 1333 or BIOL 1441 or BIOL 2457; junior standing recommended.

BIOL 4365. TISSUE ENGINEERING LAB. 3 Hours.
Each student will be given the opportunity to perform the techniques commonly used in tissue engineering and biomaterial research. These techniques are culture media preparation, cell culture/subculture, degradable scaffold preparation, scaffold modification, histological sections and staining, and cell imaging analyses. Prerequisites: BIOL 3301, CSE 1310, CHEM 2322, and MATH 3319.

BIOL 4379. RESEARCH AND DIRECTED STUDY. 3 Hours.
Research or independent study by individual students in biology under the supervision of a biology faculty member. Topics must be approved by the supervising faculty member. Prerequisite: BIOL 1441, BIOL 1442, and permission of instructor.

BIOL 4388. INSTRUCTIONAL TECHNIQUES IN BIOLOGY. 3 Hours.
Students will participate in laboratory instruction and student recitation sessions under the supervision of a faculty member. A maximum of 3 hours can be applied to the major for biology or microbiology credit. Enrollment by departmental permission only. A maximum of 6 hours credit from this class will be used to calculate a student's grade point average. Students on probation or who have not qualified for major status may not enroll in this course.

BIOL 4389. RESEARCH IN BIOLOGY. 3 Hours.
Research problems on an individual basis, conducted under the direction of a member of the biology faculty. A limit of two hours per semester is imposed and only a total of three hours may be counted toward degree requirements. These courses are offered only on a pass/fail basis. Prerequisite: written permission of the supervising instructor prior to registration.

BIOL 4390. INSTRUCTIONAL TECHNIQUES IN MICROBIOLOGY. 3 Hours.
Students will participate in laboratory instruction and laboratory preparation under the supervision of the lab coordinator. A maximum of 3 hours can be applied to the major for biology or microbiology credit. Enrollment by departmental permission only. A maximum of 6 hours credit from this class will be used to calculate a student's grade point average. Students on probation or who have not qualified for major status may not enroll in this course.

BIOL 4392. INSTRUCTIONAL TECHNIQUES IN MICROBIOLOGY LEADER. 3 Hours.
Students will take on a leadership role in laboratory instruction and preparation under the supervision of the lab coordinator. Students will strengthen their skill set and gain experience in a supervisory role. A maximum of 3 hours can be applied to the major for biology or microbiology credit. Enrollment by departmental permission only. A maximum of 6 hours credit from this class will be used to calculate a student’s grade point average. Students on probation or who have not qualified for major status may not enroll in this course.

BIOL 4393. HONORS SENIOR PROJECT IN BIOLOGY. 3 Hours.
A topic will be selected after consultation with a supervising professor and will involve both original research and writing a formal report. The work will be evaluated by a faculty honors committee. Completion of this course will satisfy the thesis requirement for the Honors College described elsewhere in this catalog.

BIOL 4395. FORENSICS-EL PA. 3 Hours.

BIOL 4406. HUMAN OSTEOMETRY. 4 Hours.
Detailed examination of human skeletal morphology. Topics include form and function of all skeletal elements in the human body, differentiation of each bone, left and right side identification, identification or fragmented remains, and muscle attachments and articulations. Content useful in forensic anthropology, archaeology, and hominid paleontology. Offered as BIOL 4406 and ANTH 4406; credit will be granted only in one department.

BIOL 4421. ADVANCED TOPICS IN NEUROSCIENCE. 4 Hours.
This course will cover current topics in Neuroscience using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Neuroscience research. Completion of this course is essential for students who are interested in pursuing a career in Neuroscience research. Offered as BIOL 4421 or PSYC 4421. Credit will be granted only once. Junior standing recommended. Prerequisite: C or better in BIOL 3322 or PSYC 3322.

BIOL 4440. LABORATORY METHODS IN BACTERIAL PATHOGENESIS. 4 Hours.
This course is intended to expose students to research techniques for studying bacterial pathogens. Students will use molecular and classical techniques to isolate, identify, and characterize bacteria and their response to stimuli. Techniques will range from polymerase chain reaction (PCR), gene sequencing, sodium dodecyl sulfate polyacrylamide gel electrophoresis (SDS-PAGE) and Immunofluorescence Microscopy. Prerequisites: BIOL 3312, BIOL 3444, BIOL 4317, or permission of instructor.

BIOL 4441. ADVANCED MICROBIOLOGY LAB. 4 Hours.
An overview of advanced microbiology techniques used in microbial genetics and physiology. It will allow students not only to gain an advanced and applicable perspective of techniques used in microbiology, but also to learn current state-of-the-art molecular techniques for genetic manipulation and physiological characterization of microorganisms. Included are molecular, physiological, and biochemical methods as well as metagenomics approaches and basic analysis of sequencing data for studying microbiomes. Enrollment requirements: BIOL 1441, General Microbiology (BIOL 2444), and Microbial Genetics (BIOL 3304). Prerequisite: BIOL 1441, BIOL 2444, BIOL 3304.
BIOL 4459. BIOARCHAEOLOGY. 4 Hours.
The study of human remains in archaeological contexts in order to reconstruct individual identity, life history, and past population characteristics. No formal prerequisites, but familiarity with the human skeleton is helpful. Lab component is required. Offered as BIOL 4459 and ANTH 4459; credit will be granted only in one department.

BIOL 4460. ZOOARCHAEOLOGY. 4 Hours.
The study of faunal remains from archaeological contexts to understand past human economic strategies and ecological circumstances. Topics include skeletal and taxonomic identification, taphonomic processes, mortality profiles, biometric analyses, and human behavioral ecology. Lab component is required. Offered as BIOL 4460 and ANTH 4460; credit will be granted only once.

BIOL 5101. SPECIAL TOPICS IN BIOLOGY. 1 Hour.
Seminar on significant biological research. May be repeated for credit. Prerequisite: consent of the instructor.

BIOL 5102. PROFESSIONAL DEVELOPMENT. 1 Hour.
This course will provide senior graduate students with important information regarding various aspects of their professional development including job searching, interviewing, stress and time management, and professional ethics.

BIOL 5193. RESEARCH IN BIOLOGY. 1 Hour.
Conference course in which the student undertakes intensive investigation of topics under the supervision of a staff member. Prerequisite: consent of the instructor. Graded P/F/R.

BIOL 5291. INDIVIDUAL PROBLEMS IN BIOLOGY. 2 Hours.
Individual research projects supervised by a faculty member. Prerequisite: consent of the instructor.

BIOL 5293. RESEARCH. 2 Hours.

BIOL 5301. LABORATORY ROTATION. 3 Hours.
This course is an elective designed to enable students to choose a major advisor and laboratory. Rotations among two or three faculty laboratories will familiarize students with faculty research interests, sharpen individual research skills, and expose students to different study systems, instruments, and research methods. May only be taken once for credit by MS students; may be repeated for credit once by Ph.D. students.

BIOL 5302. MICROBIAL GENETICS. 3 Hours.
Consideration of the nature, expression and regulation of the genetic processes in micro-organisms.

BIOL 5303. MICROBIOMES: HEALTH AND THE ENVIRONMENT. 3 Hours.
The development, interactions, and change of polymicrobial communities in both humans and the environment with implications in health, nutrition, disease, research, ecology and agriculture.

BIOL 5304. VIROLOGY. 3 Hours.
The nature, reproduction and host-cell interactions of viruses and animals. Emphasizes molecular aspects of viral replication and the molecular basis of pathogenesis. Prerequisite: consent of the instructor.

BIOL 5307. NEUROBIOLOGY. 3 Hours.
General principles of the function, structure, and organization of the nervous system. Topics include the gross and microscopic anatomy of nervous tissues; physical and chemical basis for action potentials and synaptic transmission; sensory and motor pathways of transduction; molecular, cellular, and systems study of learning and memory; development; and a study of neural diseases and disorders.

BIOL 5309. IMMUNOLOGY. 3 Hours.
This course is designed to acquaint students with the cellular processes involved in the generation of an immune response. It will provide students with detailed knowledge of the cells and organs of the immune system, their organization and diversity and their specialized functions at different anatomical locations. The importance of immune cell receptors and cytokines in cellular interactions and co-ordination of immunological mechanisms is also emphasized.

BIOL 5310. SELECTED TOPICS IN BIOLOGY. 3 Hours.
Topics may vary depending on the needs and interests of the students. May be repeated for credit. Prerequisite: consent of the student's thesis committee and the current course instructor.

BIOL 5311. EVOLUTION. 3 Hours.
Study of the origin of living systems and the mechanism of their evolution.

BIOL 5312. ADVANCED GENETICS. 3 Hours.
Mechanisms of transmission and function of genetic material. Covers fundamental concepts in transmission genetics including: genotype/phenotype relationships; inheritance; linkage; genome organization; and gene expression. Experimental and quantitative approaches to genetic analyses are emphasized. Prerequisite: consent of the instructor.

BIOL 5314. BIOMETRY. 3 Hours.
An examination of statistical methods and procedures in relation to the design of biological experiments and the analysis of their results. Prerequisite: consent of the instructor.

BIOL 5315. COMMUNITY ECOLOGY. 3 Hours.
An investigation of the effects of interspecific interactions on the distribution and abundance of organisms. Prerequisite: consent of the instructor.
BIOL 5317. BACTERIAL PATHOGENESIS. 3 Hours.
Host-pathogen relationships in microbial diseases. Topics include bacterium-host interactions, pathogens and pathogenic factors; techniques in pathogenesis research: molecular mechanisms of pathogenesis by major bacterial pathogens; antimicrobial compounds and resistance to antibiotics; and discussion of human genomics and susceptibility to infections.

BIOL 5319. HUMAN GENETICS. 3 Hours.
This course will enable students to comprehend the basic principles of genetics applied to human inheritance and disease, to interpret the research strategies aimed to identify and study the genes responsible for diverse functions and traits, as well as to assess the consequences of the genetic technologies in our society.

BIOL 5321. ADVANCED PROBLEM SOLVING IN BIOLOGY. 3 Hours.
This course will focus on crucial techniques needed to solve application-based questions in biology. Students will develop and practice reading comprehension, problem solving, critical thinking, and reasoning skills while deepening their understanding of core biological concepts, including cell and molecular biology; biochemistry; anatomy and physiology; and behavior. The goal of this course is to improve students' critical reasoning skills to prepare them for problem-based exams. BIOL 3442 is recommended. Prerequisite: BIOL 1442, BIOL 3301, BIOL 3315.

BIOL 5325. PLANT ECOLOGY. 3 Hours.
An introduction to plant ecology including physiological, population, community and ecosystem ecology.

BIOL 5335. ESSENTIALS OF GENOMICS. 3 Hours.
An integrative approach to genome science, combining elements of genetics, statistics and bioinformatics. Current technologies used in genomics analysis will be presented.

BIOL 5336. MOLECULAR EVOLUTION. 3 Hours.
An exploration of how genes and genomes evolve at the molecular level. The presentation uses the theoretical framework provided by population genetics to analyze molecular biology data.

BIOL 5340. BIOINFORMATICS. 3 Hours.
This course is an applied introduction to bioinformatics and computational genomics. The course is geared toward the student with a biology background and limited programming experience. The course provides an entrance to commonly used programming/scripting languages and an introduction to numerous aspects of modern genomic data analyses (e.g. identification of coding and regulatory features in novel sequences, expression analysis, and comparative/phylogenetic analyses).

BIOL 5342. DEVELOPMENTAL BIOLOGY IN HEALTH AND DISEASE. 3 Hours.
An introduction to fundamental developmental events that form complex organisms with an emphasis on human health and disease.

BIOL 5349. COOPERATIVE PROGRAM IN BIOLOGY. 3 Hours.
The purpose of this course is to allow students to earn credit for relevant field work in the areas of biology and microbiology. Students must apply for the program and be cleared for registration during the semester prior to enrollment.

BIOL 5350. CONSERVATION BIOLOGY. 3 Hours.
Theory and practice of conservation biology, with emphasis on applications of modern quantitative and molecular genetic techniques to preservation of organisms and habitats. Includes: identification and prioritization of units for protection; conservation genetics; preserve design; public policy; and current case studies. Prerequisites: BIOL 3315 or equivalent or consent of the instructor.

BIOL 5351. ENVIRONMENTAL MICROBIOLOGY. 3 Hours.
Principles, methodology, and practical applications of environmental microbiology. Topics include: habitat and community approaches to environmental microbiology; measures of microbial populations and activities; interactions among microbial communities; role of microorganisms in the origin of mineral resources and pollution and energy flow through microbial communities. Prerequisite: BIOL 3444 or equivalent or consent of the instructor.

BIOL 5353. FUNDAMENTAL MEDICAL MYCOLOGY. 3 Hours.
Medical mycology deals with those infections in humans, and animals resulting from pathogenic fungi. As a separate discipline, the concepts, methods, diagnosis, and treatment of fungal diseases of humans are specific. Fundamental Medical Mycology balances clinical and laboratory knowledge to provide students with in-depth coverage of the most common fungal diseases and its etiologic agents from both the laboratory and clinical perspective.

BIOL 5354. LIMNOLOGY. 3 Hours.
The study of biotic and abiotic components of inland waters. Prerequisite: consent of the instructor.

BIOL 5355. MEDICAL MOLECULAR BIOLOGY. 3 Hours.
This course is an introduction to modern molecular biology and human diseases. This course will use medical diseases, class projects, and problem sets to explore and learn modern molecular biology. The molecular mechanisms and underpinnings for several human diseases will be covered. Topics may include, gene regulation, the dynamic genome and how to rewrite it, modern cloning schemes, synthetic biology, and drug design.

BIOL 5366. ADVANCED ORGANISMAL PHYSIOLOGY. 3 Hours.
In this course, the fundamentals of the structure (anatomy) and function (physiology) of "higher" plants and animals are discussed. Cellular, tissue, organ, and organismal levels will be the focus. General topics will include energy acquisition, distribution of nutrients, fluid transport, gas exchange, defense, sensing and responding to the environment, and reproduction. An understanding of basic biological concepts is expected.
BIOL 5391. INDIVIDUAL PROBLEMS IN BIOLOGY. 3 Hours.
Individual research projects supervised by a faculty member. Prerequisite: consent of the instructor.

BIOL 5393. RESEARCH IN BIOLOGY. 3 Hours.
Conference course in which the student undertakes intensive investigation of topics under the supervision of a staff member. Prerequisite: consent of the instructor. Graded P/F/R.

BIOL 5398. THESIS. 3 Hours.
Graded R/F only. Prerequisite: consent of faculty.

BIOL 5420. GENETICS METHODS LAB. 4 Hours.
Computational and experimental approach to genomics research. The course theme will be transposable elements.

BIOL 5421. METHODS IN MOLECULAR MICROBIOLOGY. 4 Hours.
This course will provide an overview of different techniques used during manipulation of microorganisms. It will allow students to gain a historical perspective of techniques used in microbiology (Winogradsky column, Koch solid agar plating) as well as learn state of the art molecular characterization of microorganisms and their genetic manipulation. This course introduces current biochemical, physiological and molecular biology methods to assess community diversity and microbial activity in a variety of ecosystems. Other topics discussed include bacterial growth and survival, population biology, and microbial interactions.

BIOL 5440. LABORATORY METHODS IN BACTERIAL PATHOGENESIS. 4 Hours.
This course is intended to expose students to research techniques for studying bacterial pathogens. Students will use molecular and classical techniques to isolate, identify and characterize bacteria and their response to stimuli. Techniques will range from PCR, Gene Sequencing, SDS_PAGE and Immunofluorescence Microscopy. Prerequisite: BIOL 3312, BIOL 3444, BIOL 4317.

BIOL 5493. RESEARCH. 4 Hours.

BIOL 5593. RESEARCH. 5 Hours.

BIOL 5693. RESEARCH IN BIOLOGY. 6 Hours.
Conference course in which the student undertakes intensive investigation of topics under the supervision of a staff member. Prerequisite: consent of the instructor. Graded P/F/R.

BIOL 5698. THESIS. 6 Hours.
Graded P/F/R. Prerequisite: consent of faculty.

BIOL 5998. THESIS. 6 Hours.
Graded P/F/R. Prerequisite: consent of faculty.

BIOL 6191. ADVANCED RESEARCH. 1 Hour.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6291. ADVANCED RESEARCH. 2 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6301. ESSENTIAL TOPICS IN GENOMICS. 3 Hours.
This course will explore diverse aspects of genome biology, including the evolutionary principles that influence how genomes change through time, genome structure, and genome function. Emphasis will be given on how genome technology influences the way we do modern biology and how genomics influences the world around us.

BIOL 6302. MICROBIOLOGY, MOLECULAR AND CELLULAR BIOLOGY. 3 Hours.
Using model microorganisms, this course will investigate their (1) Physiology, biochemistry, and genetics, (2) The hosts innate and adaptive immune responses, (3) The molecular basis for virulence and pathogenesis and (4) The ecological and economic impact of microbial pathogens including epidemics and pandemics.

BIOL 6303. ADVANCED EVOLUTION AND ECOLOGY. 3 Hours.
Biodiversity, encompassing 8.7 million species, is the most distinctive feature of Earth. In this class, students will learn about the evolutionary and ecological forces shaping biodiversity, the measures of biodiversity from local to global scales, biogeographical patterns of biodiversity, the benefits of biodiversity to humans and ecosystems, and the major threats to biodiversity due to human activities.

BIOL 6310. SELECTED TOPICS IN BIOLOGY FOR PhD STUDENTS. 3 Hours.
Topics may vary depending on the needs and interests of the students. May be repeated for credit. This course is specific to students in the PhD program.

BIOL 6391. ADVANCED RESEARCH. 3 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6399. DISSERTATION. 3 Hours.
BIOL 6399 and BIOL 6699 graded R/F only; BIOL 6999 graded P/F/R. Prerequisite: admission to candidacy for the degree Doctor of Philosophy in Quantitative Biology.

BIOL 6491. ADVANCED RESEARCH. 4 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.
BIOL 6591. ADVANCED RESEARCH. 5 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6691. ADVANCED RESEARCH. 6 Hours.
Faculty supervised individual research. May be repeated for credit. Graded P/F/R.

BIOL 6699. DISSERTATION. 6 Hours.
BIOL 6399 and BIOL 6699 graded R/F only; BIOL 6999 graded P/F/R. Prerequisite: admission to candidacy for the degree Doctor of Philosophy in Quantitative Biology.

BIOL 6999. DISSERTATION. 9 Hours.
BIOL 6399 and BIOL 6699 graded R/F only; BIOL 6999 graded P/F/R. Prerequisite: admission to candidacy for the degree Doctor of Philosophy in Quantitative Biology.

BIOL 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Biology - Graduate Programs

Objective
The program leading to the degree of Master of Science in biology is designed to provide graduate education that will prepare students for vocations in industry, government, and teaching, and to pursue further graduate education leading to the doctorate. The doctoral program is designed to train students to apply sophisticated quantitative techniques to solving basic and applied problems in biology. Students in this program will attain substantially greater quantitative skills than in traditional doctoral programs in the biological sciences, providing them with a competitive advantage in business, industry, government, and academia.

Admission Requirements
The following are minimal requirements for entrance into the graduate program in Biology. However, satisfying or exceeding these requirements does not guarantee admission to the program. Admission to the program is determined solely by the Biology Graduate Studies Committee and the Graduate School and is based on an evaluation of all pertinent aspects of an applicant's record.

Admission status in the Master of Science program is determined as follows:

Unconditional Admission
Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.

a. A Bachelor's degree in Biology or a Bachelor's degree in some other discipline with at least 12 hours of advanced level coursework (junior or senior level courses) in Biology.
b. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. Applicants overall GPA in the Sciences and within Biology are also considered.
c. A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1000 (old GRE scale), or 296 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.
d. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in graduate school.
e. Evidence of previous research experience may also be considered.
f. International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam or a minimum score of 7 on the Speaking portion of the IELTS exam.

Denial of Admission
A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

Probationary Admission
If an applicant does not meet a majority of standards for unconditional admission outlined above, he or she may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in his/her first two long semesters of graduate coursework at UT Arlington.

Deferred and Provisional Admission
A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Master of Science Options

Master of Science Thesis Option (MST)
The Master of Science with a major in Biology Thesis option is a 30-hour research degree that requires 24 hours of formal course work, including BIOL 5314 Biometry, BIOL 5340 Bioinformatics, and BIOL 5101 Current Topics in Biology, plus a 6-hour thesis (BIOL 5698) and additional hours to complete the degree requirements. Students have the option to conduct research leading to a thesis in a variety of specializations, including aquatic biology, ecology, genetics, evolutionary biology, genomics, microbiology, and cell biology. The thesis option is intended to prepare students for Ph.D. programs and careers in research and industry by obtaining skills such as the collection and analysis of data, evaluation of primary literature, and essential laboratory techniques.

Master of Science Non-Thesis Option (MSNT)
Students can elect to complete the Biology MSNT degree on-campus, fully online and asynchronously, or as a combination of the two modalities.
The Master of Science with a major in Biology non-thesis option is a 30-hour program of formal coursework requiring a capstone course, which can be satisfied by either BIOL 5349 Cooperative Program in Biology or BIOL 5391 Individual Problems in Biology, and sufficient additional hours to complete the degree requirements. The non-thesis option is intended to meet the needs of students looking to advance in their careers, for biology teachers wishing to expand their knowledge or pursuing qualification to teach dual credit, or those seeking additional preparation for professional or health science programs. Please refer to the Department of Biology website and course schedule for current course offerings and modalities. Graduates of this program can currently be found working in consulting, resource management, state and local agencies, and K-12 education.

Subject to written approval by the Graduate Advisor and within the limitations stated in the General Graduate School Regulations, a student may take up to nine hours of coursework from courses listed under Biology at the 3000 or 4000 levels. Coursework may be taken in other areas in support of the student's program subject to approval by the graduate advisor.

### Admission Requirements

#### DOCTOR OF PHILOSOPHY

Students interested in pursuing the Ph.D. in the Biology Department may apply for the B.S. - Ph.D. Track or the doctoral program directly depending on their background. The B.S. - Ph.D. Track is the point of entry into doctoral studies for students with a Bachelor's degree in Biology, but without 30 hours of graduate level coursework in Biology or a master's degree in Biology. Students who have already accomplished these goals may apply directly for the doctoral program as Ph.D. students. Degree requirements are the same for both groups (see below).

#### B.S. - PH.D. TRACK STUDENTS

Admission status in the B.S. - Ph.D. Track program is determined as follows:

##### Unconditional Admission

Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.

- A Bachelor's degree in Biology or a Bachelor's degree in some other discipline with at least 12 hours of advanced level coursework (junior or senior level courses) in Biology.
- A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. Applicants overall GPA in the Sciences and within Biology are also considered.
- A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1100 (old GRE scale), 301 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.
- Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in graduate school.
- Evidence of previous research experience may also be considered.
- International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam or a minimum score of 7 on the Speaking portion of the IELTS exam.

##### Denial of Admission

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

##### Probationary Admission

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first two long semesters of graduate coursework at UT Arlington.

##### Deferred and Provisional Admission

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

#### Fellowships and Scholarships

Students that are unconditionally admitted will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

#### PH.D. STUDENTS

Admission status in the doctoral program is determined as follows:
UNCONDITIONAL ADMISSION

Decisions are based on consideration of all the information listed below and are not based on any single criterion alone.

a. A master's degree in Biology or at least 30 hours of graduate level coursework in Biology.

b. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. If an Applicant has a Master's degree, the GPA from their Bachelor's degree, as calculated by the Graduate School, will also be considered. If they have 30 hours of graduate coursework but no degree, the GPA from that 30 hours, as calculated by the Graduate School, will also be considered.

c. A satisfactory score on the Verbal and Quantitative sections of the Graduate Record Exam. Successful students tend to have a minimum combined total score of 1100 (old GRE scale), or 301 (new GRE scale) on the Verbal and Quantitative sections, with strong performance on the Quantitative section of the GRE exam.

d. Favorable letters of recommendation from at least three individuals able to assess the applicant's potential for success in a doctoral program in quantitative biology.

e. Evidence of previous research experience including publications resulting from previous graduate work may also be considered.

f. International students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL iBT exam, or a minimum score of 7 on the Speaking portion of the IELTS exam.

Denial of Admission

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria listed above.

Probationary Admission

The Department of Biology does not as a matter of course admit doctoral students on a probationary basis. Under exceptional circumstances, an applicant that does not meet the standards for unconditional admission outlined above, may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first two long semesters of graduate coursework at UT Arlington.

Deferred and Provisional Admission

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

Fellowships and Scholarships

Students that have no provisional admission conditions to meet will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

Doctor of Philosophy Degree Requirements

The degree of Doctor of Philosophy in Quantitative Biology requires distinguished attainment both in scholarship and in research. In addition to meeting the minimum requirements of a planned course of study, the ultimate basis for conferring the degree must be the demonstrated ability to do independent and creative work and the exhibition of a profound grasp of the subject matter within the field.

Mathematics: Students will be expected to have (or complete during their first year of residence) a strong quantitative background including a formal course in differential and integral calculus (i.e., Calculus I).

General Course Requirements: All students are required to complete 15 hours of coursework. All students are required to take BIOL 5314 (Biometry), BIOL 5340 (Bioinformatics), two seminar courses (2 x BIOL 5101), and one elective (see course listings below) as part of their required courses. All students must also complete two of the following three courses (BIOL 6301, BIOL 6302, BIOL 6303).

Other requirements: Each student will make three research presentations that are open to the entire department. These may include the proposal defense, a research progress report, and the dissertation defense.

Students can choose among the following courses to fulfill additional course requirements:

Please Note:

The grade of R (research in progress) is a permanent grade; completing course requirements in a later semester cannot change it. To receive credit for an R-graded course, the student must continue to enroll in the course until a passing grade is received. This is the case for dissertation hours.

An incomplete grade (the grade of I) cannot be given in a course that is graded R, nor can the grade of R be given in a course that is graded I. To receive credit for a course in which the student earned an I, the student must complete the course requirements. Enrolling again in the course in which an I was earned cannot change a grade of I. At the discretion of the instructor, a final grade can be assigned through a change of grade form.

Three-hour thesis courses and three- and six-hour dissertation courses are graded R/F/W only (except social work thesis courses.) The grade of P (required for degree completion for students enrolled in thesis or dissertation programs) can be earned only in three-, five-, six-, or nine-hour dissertation courses and nine-hour thesis courses and when the student has taken 9 or more hours of dissertation hours BIOL XX99. In the course listings below, R-graded courses are designated either "Graded P/F/R" or "Graded R." Occasionally, the valid grades for a course change. Students should consult the appropriate graduate advisor or instructor for valid grade information for particular courses. (See also the sections titled "R" Grade, Credit for Research, Internship, Thesis or Dissertation Courses and Incomplete Grade in this catalog.)

1 these courses can be repeated for credit.
Biology - Undergraduate Programs

Academic Advising: 345, 346, 347 and 349 Life Science Bldg. · 817-272-2408

Overview

The Department of Biology curriculum familiarizes students with basic concepts inherent to biological science and allows them to master new, cutting edge areas of biological research. Its degree programs prepare students to enter exciting and challenging careers in the many diverse and rapidly expanding areas of biological employment, including environmental biology, conservation, microbiology, the health sciences, science teaching, pharmacology, biotechnology, molecular biology, neurobiology, and forensics as well as in basic biological research. Superior teaching and faculty involvement with students is a high priority in the department. Many of its faculty have received university-wide awards for teaching excellence. Biology faculty have internationally recognized research programs in which students are actively encouraged to participate through credit for supervised research. Thus, students can prepare for careers in specific areas of biology by being actively engaged in research related to that career area under faculty supervision.

The Department of Biology offers four programs of study leading to an undergraduate degree. These are the Bachelor of Arts (B.A.) degree in Biology and the Bachelor of Science (B.S.) degrees in Biology, Microbiology or Medical Technology. The Microbiology B.S. degree prepares students to enter careers in the highly diverse field of microbiology, ranging from control of infectious diseases, through public health and environmental microbiology to genetic engineering and molecular biology or to pursue graduate study. The B.S. in Medical Technology combines course work with 16 months of clinical laboratory training in an accredited hospital school of medical technology. This degree prepares students for careers as technicians in medical laboratories, clinics, hospitals and industry. The Biology B.S. program provides students with a strong background in the fundamental tenets of the biological sciences while allowing them to customize their degree plans to meet specific career goals. The Biology B.A. program is suitable for career preparation in a number of biological fields and for teaching certification in Composite Science.

The Biology B.S. degree allows students to choose elective courses beyond the biology core that prepare them to enter a specific professional field, such as medical, dental, veterinary, or graduate school for further study and research. Students pursuing health professions careers should contact the Health Professions Advisor for assistance in selecting course electives pertinent to their specific career path. Students interested in genomics, environmental biology, forensics, or other areas of specialization should contact their Biology advisor for assistance with recommended courses.

All Biology degrees and degree plan options are supported by providing students with ready access to both academic and career advice provided by full-time undergraduate advisors and faculty members knowledgeable with a student's particular areas of academic and/or career interests. Students are strongly encouraged to interact with departmental and faculty advisors throughout their academic careers, particularly through independent research under faculty supervision, to develop the skills and course work background that will allow them to achieve their future academic/career goals. Detailed information on Biology and degree plan options is provided later in this section.

Beyond the undergraduate B.A. and B.S. degrees, the Department of Biology offers programs leading to graduate degrees, including the Master of Science in Biology (M.S.) which allows students to pursue biological careers requiring a greater knowledge base than provided by an undergraduate B.A. or B.S. degree and a Doctor of Philosophy Degree in Quantitative Biology (Ph.D.) which allows students to carry out independent dissertation research within a chosen area of biological research leading to a career in research and/or university teaching. The Ph.D. degree in Biology provides students with a strong background in modern mathematical approaches to biological research, including biostatistics, experimental design and mathematical modeling of biological systems. The Graduate Catalog provides details of the Biology M.S. and Ph.D. degree programs.

The Department of Biology takes pride in offering students outstanding degree programs supported by excellent teaching, undergraduate research opportunities and superior academic advising. These programs make graduates highly competitive in the job market or when applying to graduate or professional degree programs. Please visit the Biology Department and speak with one of our advisors. Phone 817-272-2408 to make an appointment.

Applying for Major Status in Biology

Freshmen who have no previous college work must complete the following courses before applying to the Biology Department to become a major:

19 hours from the University core (consisting of courses in English, history, political science, et al. See list of general core curriculum requirements set by the University elsewhere in this catalog) and a minimum of 20 hours from the courses below:

BIOLOGY

BIOL 4441 ADVANCED MICROBIOLOGY LAB 4

CHEMISTRY
CHEM 1441 GENERAL CHEMISTRY I 4
CHEM 1442 GENERAL CHEMISTRY II 4

The applicant for status as a biology major MUST have a GPA of 2.25 or better in all courses taken, and 2.25 or better in biology courses. An application form is available from the undergraduate advisor (Room 345 or 346 LS).

A suggested course sequence for entering freshmen students for the first two years is:

First Year
First Semester | Hours | Second Semester | Hours
---|---|---|---
ENGL 1301 | 3 | ENGL 1302 | 3
MATH 1421 | 4 | MATH 1426 | 4
CHEM 1441 | 4 | CHEM 1442 | 4
BIOL 1441 | 4 | BIOL 1442 | 4

Second Year
First Semester | Hours | Second Semester | Hours
---|---|---|---
CHEM 2321 & CHEM 2181 | 4 | CHEM 2222 & CHEM 2182 | 4
Lang/Phil/Cult | 3 | BIOL 3315 | 3
POLS 2311 | 3 | BIOL 3427 or 3454 | 4
BIOL 2300 | 3 | POLS 2312 | 3
BIOL 2444 | 4 |

**Total Hours: 61**

1 Micro majors will substitute BIOL 2444 in the second semester of their freshman year, and another micro class in the first semester of their sophomore year. Med Tech majors will substitute BIOL 2444 during the first semester of their sophomore year.

Transfer students interested in one of the degree programs in biology will, after admission to UT Arlington, be placed into pre-major status: BIOL intended, MEDT intended, or MICR intended major. To apply for status as a major in biology, microbiology, or medical technology, these students must have a minimum of 39 hours which include:

• At least 28 hours in the University core curriculum including eight hours of freshman chemistry, with lab (credit by transfer or earned at UT Arlington).
• At least 11 hours in biology courses taken at UT Arlington that apply to one of the three programs awarded by the department.

At the time of application for major status in biology, the student must have a GPA of 2.25 or better in courses taken at UT Arlington (both overall and in biology courses). An application form for requesting major status is available from the Department Advisor (Room 346 LS). Transfer students will be evaluated for major status only after completing 11 hours in biology in residence at UT Arlington.

### Maintaining Major Status

• Students who are accepted as majors in biology, microbiology, or medical technology must thereafter maintain a GPA of 2.25 or better in all courses and in biology courses. Any student whose GPA falls below 2.25 in either of these categories will be returned to undeclared status at the end of the semester in which the deficiency occurs.

• Students who fall into academic difficulty will be required to meet with their Advisor and/or Academic Dean in order to discuss academic consequences and their future status in the College of Science. Please refer to the College of Science section of the catalog, "Academic Policies for College of Science Majors".
• Students who have lost status as a major must have departmental permission to enroll in any junior or senior course in biology at UT Arlington.

• Students in the medical technology program should have a 2.8 GPA or higher after completing three years of course work to be competitive when applying for the final year of training in medical technology.

General Information

• In order to receive a B.A. degree in Biology or a B.S. degree in Biology or Microbiology from UT Arlington, transfer students must complete a minimum of 18 hours of junior or senior level courses (12 of the 18 hours in Biology) at UT Arlington. Transfer students who are approved for admission to the medical technology program must complete at least 13 hours of junior or senior level courses in biology at UT Arlington to qualify for a B.S. Degree in Medical Technology from UT Arlington.

• No student working toward a B.A. degree in Biology or a B.S. degree in Biology, Medical Technology or Microbiology may take any biology course on a Pass/Fail basis.

• Students are not allowed to receive credit for biology courses at the sophomore level or above by special examination.

• Exceptions to the core course prerequisites for advanced courses will be made only for specialized degree programs such as Medical Technology, Nursing, and Physical Education, and for selected non-majors with special needs.

UNIV 1101 Career Preparation and Student Success

All transfer students are required to enroll in a 1 hour career preparation course, UNIV 1101.

UNIV 1131 Issues in College Adjustment

All entering freshmen are required to enroll in a 1 hour college adjustment course, UNIV 1131.

Computer and Oral Communication Competency Requirement

Students majoring in Biology, Microbiology, or Medical Technology are required to demonstrate computer use and oral communication competencies.

The University requirement of competency in computer proficiency is satisfied by completion of the BIOL 1441 or 1442 labs.

Oral communication competency can be demonstrated by completion of COMS 1301, COMS 2302, or an approved substitute.

Teacher Certification

A student interested in earning a degree with a major in biology with secondary teacher certification, should refer to the “Bachelor of Science Degree in Biology – Life Science Pathway” and the “Bachelor of Arts Degree in Biology – Composite Science Pathway” degree plans for teacher certification requirements and for biology courses recommended for each teaching field option.

Requirements for a Bachelor of Arts Degree in Biology

The Bachelor of Arts Degree in Biology is suitable for career preparation in a number of biological career fields and for students who desire teaching certification with a teaching field in biology or composite science. Students choosing this program are required to consult with the Department of Biology’s undergraduate advisor to develop an acceptable degree plan. Students seeking teaching certification with a teaching field in biology or composite science are required to consult with the Department of Biology certification advisor in order to develop an acceptable teaching certification degree program.

Requirements for a Bachelor of Arts Degree in Biology - Composite Science Teacher pathway

This program is suitable preparation for students who desire secondary teacher certification in composite science. Interested students should meet with the UTeach advisor.

Requirements for a Bachelor of Science Degree in Biology

The B.S. in Biology is intended for students studying basic aspects of the biological sciences. This degree will prepare students for careers in a variety of the Biological Sciences (including Health Professions, Genomics, Forensics, Ecology/Environmental Studies, etc.) or for graduate study in Biology at the Master's or Ph.D. levels.

### BACHELOR OF SCIENCE DEGREE IN MEDICAL TECHNOLOGY

A student who completes the special degree plan given below plus 16 months of clinical laboratory training in an accredited hospital school of medical technology may receive the degree of Bachelor of Science in Medical Technology, which will be conferred by The University of Texas at Arlington. Graduates may become certified in medical technology by passing the examination of the Board of Registry of the American Society of Clinical Pathologists (ASCP).

Fast Track Degree Plan: Bachelor of Science in Biology and Master of Science in Biology

The Fast Track program will enable outstanding senior undergraduate Biology students to satisfy degree requirements leading to a master's degree in Biology while completing their undergraduate studies.

**DESCRIPTION**

Undergraduate Biology students will apply when they are within 30 hours of completing their bachelor's degrees. They must have completed at least 30 hours at UTA, achieving a GPA of at least 3.3 in those courses, have an overall GPA of 3.3 or better in all department courses, and have a GPA of at least 3.3 in all biology courses taken at UTA. Additionally, they must have completed 13 hours of specified undergraduate Fast Track foundation courses at UTA that are listed below with a minimum GPA of 3.5 in these courses. If one of these courses is transferred from another school it will not be included, and an equivalent course determined by the undergraduate advisor will be used as a Fast Track foundation course.

Foundation Courses Required for Admission into the Fast Track program:

1. **BIOL 2300** Biostatistics (3-0)
2. **BIOL 3315** Genetics (3-0)
3. **BIOL 3301** Cell Physiology (3-0)
4. **BIOL 2444** General Microbiology (4-0)

BIOL students pursuing the Fast Track master's degree will be allowed to take **BIOL 5309, 5314** and **5304** in place of advanced undergraduate biology electives.

Requirements for a Minor in Biology

A minor in biology will consist of a minimum of 18 credit hours of approved biology classes that would be applicable toward a major in Biology. Non-majors' courses will not apply toward a minor in biology, such as:

- BIOL 1301 NUTRITION 3
- BIOL 1333 BIOLOGY FOR NON-SCIENCE MAJORS: CELLS AND DISEASE 3
- BIOL 1334 BIOLOGY FOR NON-SCIENCE MAJORS: LIFE ON EARTH 3
- BIOL 1345 BIOLOGY I FOR NURSING STUDENTS 3
- BIOL 2317 BASIC CONCEPTS IN HUMAN SEXUALITY 3
- BIOL 2457 HUMAN ANATOMY AND PHYSIOLOGY I 4
- BIOL 2458 HUMAN ANATOMY AND PHYSIOLOGY II 4
- BIOL 2460 NURSING MICROBIOLOGY 4
Non-lecture courses such as research, directed study, co-op, or lab TA credit may not be used toward a minor in Biology. A minimum of six of the 18 credit hours required for the minor must be at the 3000 or 4000 level. BIOL 1441 and BIOL 1442, or equivalent, are required for the minor. The remaining 10 hours must be chosen with and approved by a Biology Advisor.

A 2.0 Biology Grade Point Average must be maintained to earn the minor. Transfer students must complete at least nine hours toward the minor at UT Arlington, and six of the nine hours must be 3000 or 4000 level.
Chemistry and Biochemistry

Undergraduate Degrees

- Bachelor of Arts in Chemistry (p. 1188)
- Bachelor of Arts in Chemistry with Chemistry Teacher Pathway (UTeach Program) (p. 1188)
- Bachelor of Arts in Chemistry with Physical Science Teacher Pathway (UTeach Program) (p. 1188)
- Bachelor of Science in Chemistry - American Chemical Society certified (p. 1188)
- Bachelor of Science in Biochemistry - American Chemical Society certified (p. 1188)
- Bachelor of Science in Biological Chemistry (p. 1188)
- Bachelor of Science-Master of Science in Chemistry (p. 1188)
- Bachelor of Science in Biochemistry and Master of Science in Biomedical Engineering (p. 1188)
- Minors in Chemistry (p. 1204)

Graduate Degrees

- Chemistry, M.S. (http://catalog.uta.edu/science/chemistry/graduate/#masterstext/#ms)
- Chemistry, M.S. Thesis Substitute (http://catalog.uta.edu/science/chemistry/graduate/#masterstext/#msthesissub)
- Chemistry, M.S. Non-Thesis (http://catalog.uta.edu/science/chemistry/graduate/#masterstext/#msnonthesis)
- Chemistry, B.S. to Ph.D. (p. 1182)
- Chemistry, Ph.D. (p. 1184)

COURSES

CHEM 1181. GENERAL CHEMISTRY I LABORATORY FOR ADVANCED CHEMICAL TECHNOLOGIES. 1 Hour.
General, analytical, and synthetic chemistry concepts will be reinforced through problem- and inquiry-based laboratory activities. The Advanced Chemical Technologies track for majors will introduce research and scientific methods in the context of instructor and student-selected research problems. Hand-on experience in the laboratory will be supplemented with mini-lectures, modules, and web resources to increase student readiness for scientific discovery. Students will also learn about contemporary challenges and advances in chemistry and biochemistry. If a student withdraws from CHEM 1181, the student must also withdraw from CHEM 1341. Prerequisite: Concurrent enrollment in CHEM 1341.

CHEM 1182. GENERAL CHEMISTRY II LABORATORY FOR ADVANCED CHEMICAL TECHNOLOGIES. 1 Hour.
General, analytical, and synthetic chemistry concepts will be reinforced through problem- and inquiry-based laboratory activities. Research and scientific methods will be reinforced through the investigation of student-selected research problems and modules on scientific communication. Increased exposure to state-of-the-art analytical techniques and instruments, as well as synthetic methods will culminate in the preparation of a proposal related to the synthesis of new materials and the analysis of their structure and function. If a student withdraws from CHEM 1182, the student must also withdraw from CHEM 1342. Prerequisite: (CHEM 1341 with a grade of C or better) and (CHEM 1181 with a grade of C or better) and (concurrent enrollment in CHEM 1342).

CHEM 1185. CHEMISTRY FOR ENGINEERS LABORATORY. 1 Hour.
This course is intended to provide laboratory credit in chemistry for engineering-majors who transfer into UT-Arlington with credit in Chemistry for Engineers lecture only. Students may register for this course only with specific approval of a Chemistry advisor. Prerequisite: 3 hours of Chemistry for Engineers lecture. Credit cannot be earned for both CHEM 1465 and CHEM 1185.

CHEM 1188. GENERAL CHEMISTRY I LABORATORY. 1 Hour.
This course is intended to provide laboratory credit in freshman chemistry for students who transfer into UT-Arlington with credit in General Chemistry I lecture only. Experiments include: measurement and scientific equipment use, physical properties, separations, synthesis, qualitative analysis, spectroscopy. Students may register for this course only with specific approval of a Chemistry advisor. Prerequisite: 3 hours of General Chemistry I lecture. Credit cannot be earned for both CHEM 1441 and CHEM 1188.

CHEM 1189. GENERAL CHEMISTRY II LABORATORY. 1 Hour.
This course is intended to provide laboratory credit in freshman chemistry for students who transfer into UT-Arlington with credit for General Chemistry lecture only. Experiments include: thermodynamics, electrochemistry, synthesis, quantitative analysis, spectroscopy, stoichiometry, and acid-base chemistry. Students may register for this course only with specific approval of a Chemistry advisor. Prerequisite: CHEM 1188 and 6 hours of General Chemistry II lecture. Credit cannot be earned for both CHEM 1442 and CHEM 1189.

CHEM 1341. GENERAL CHEMISTRY I. 3 Hours.
This course covers the fundamentals of atomic structure, chemical bonding, the periodic table, nomenclature, kinetic theory, gas laws, chemical equations, and solutions. Only chemistry majors in the Advanced Chemical Technologies program may take this course. When combined with CHEM 1181, this course will satisfy completion of CHEM 1441 for Chemistry, Biochemistry, and Biological Chemistry majors. Prerequisite: (MATH 1302 or MATH 1303 or MATH 1322 or MATH 1323 or MATH 1402 or MATH 1421 or MATH 1426 or MPT Algebra score =/> 17) and (concurrent enrollment in CHEM 1181). ACT program only.
CHEM 1342. GENERAL CHEMISTRY II. 3 Hours.
This course covers study of advanced atomic structure and bonding concepts, acid-base theory, kinetics and equilibria, thermodynamics, electrochemistry, and the chemistry of some elements. Only chemistry majors in the Advanced Chemical Technologies program may take this course. When combined with CHEM 1182, this course will satisfy completion of CHEM 1442 for Chemistry, Biochemistry, and Biological Chemistry majors. Prerequisite: (CHEM 1341 or CHEM 1441 with a grade of C or better) and (CHEM 1181 with a grade of C or better) and (concurrent enrollment in CHEM 1182). ACT program only.

CHEM 1345. CHEMISTRY IN THE WORLD AROUND US. 3 Hours.
This course looks at current issues in society and uses chemical principles to understand them. Topics include sustainability, air pollution, the ozone layer, global climate change, fuels, and water. CHEM 1345/1346 cannot be used to fulfill the CHEM 1441/1442/1451/1465 requirement in any degree program.

CHEM 1346. CHEMISTRY IN THE WORLD AROUND US II. 3 Hours.
This course is a continuation of the study of current issues in society using chemical principles to understand them. Topics include polymers, drug design, nutrition, and genetic engineering. CHEM 1345/1346 cannot be used to fulfill the CHEM 1441/1442/1451/1465 requirement in any degree program. Prerequisite: CHEM 1345 or equivalent with a grade of C or better.

CHEM 1400. INTRODUCTORY CHEMICAL PRINCIPLES. 4 Hours.
Provides a background in fundamental chemical mathematics, in writing and understanding chemical formulas and equations, and in the application of scientific laws to the behavior of matter. Students will learn problem solving skills necessary in general chemistry I by hands-on and interactive approach. This course is designed for the student with little or no previous chemical training who intends to take the CHEM 1441/CHEM 1442 sequence or CHEM 1465 at a later date. CHEM 1400 cannot replace CHEM 1441/CHEM 1442/CHEM 1451/CHEM 1465. Prerequisite: MATH 1302 or equivalent or MPT Algebra score => 17.

CHEM 1441. GENERAL CHEMISTRY I. 4 Hours. (TCCN = CHEM 1411)
The lecture covers the fundamentals of atomic structure, chemical bonding, the periodic table, nomenclature, kinetic theory, gas laws, chemical equations, and solutions. The laboratory introduces the scientific method, experiment design, data collection and analysis, as well as illustrates fundamental principles presented in the lecture. Students who have not had high school chemistry are advised to take an introductory chemistry course first. Prerequisite: MATH 1302 or MATH 1303 or MATH 1322 or MATH 1323 or MATH 1402 or MATH 1421 or MATH 1426 or MPT Algebra score => 17 or ALEKS => 61 or Student Group CHEM 1441.

CHEM 1442. GENERAL CHEMISTRY II. 4 Hours. (TCCN = CHEM 1412)
Study of advanced atomic structure and bonding concepts, acid-base theory, kinetics and equilibria, thermodynamics, electrochemistry, the chemistry of some elements. The laboratory focuses on experimental design, data collection and analyses as well as chemical syntheses to illustrate fundamental principles presented in the lecture. Prerequisite: CHEM 1441 or equivalent with a grade of C or better or (CHEM 1341 with a grade C or better) or Student Group CHEM 1442.

CHEM 1445. CHEMISTRY FOR NON-SCIENCE MAJORS. 4 Hours. (TCCN = CHEM 1405)
Chemistry of things of everyday life: energy, radioactivity, petroleum products, pollution, the nature of matter, and the applications of chemistry to things we use. CHEM 1445, 1446 cannot be used to fulfill the 1441/1442 requirement in any degree program.

CHEM 1446. CHEMISTRY II FOR NON-SCIENCE MAJORS. 4 Hours. (TCCN = CHEM 1407)
Continuation of the chemistry of things of everyday life. Vitamins, minerals, chemical additives, plastics, cosmetics, proteins, carbohydrates, poisons, fats, and oils. Prerequisite: CHEM 1445 or equivalent with a grade of C or better. CHEM 1445, CHEM 1446 cannot be used to fulfill the CHEM 1441/ CHEM 1442 requirement in any degree program.

CHEM 1451. CHEMISTRY FOR HEALTH SCIENCES. 4 Hours.
Survey of general, organic, and biochemistry with emphasis on applications to the human body. Measurement, atomic theory and structure, bonding, quantitative relationships in chemical reactions, gases, solutions, electrolytes, organic functional groups and nomenclature, organic reactions, carbohydrates, lipids, proteins, enzymes, metabolism, and nucleic acids. CHEM 1451 cannot count for major credit toward a degree in chemistry. Prerequisite: MATH 1301 or MATH 1302 or MATH 1303 or MATH 1315 or MATH 1316 or MATH 1322 or MATH 1323 or MATH 1324 or MATH 1421 or MATH 1426 or equivalent.

CHEM 1465. CHEMISTRY FOR ENGINEERS. 4 Hours.
An introduction to important concepts and principles of chemistry with emphasis on areas considered most relevant in an engineering context. Topics include chemical stoichiometry, bonding, chemical thermodynamics, equilibria, electrochemistry, and kinetics. Engineering students may substitute the eight hour sequence CHEM 1441 and CHEM 1442 for this class, but not either CHEM 1441 or CHEM 1442 alone. Students who complete CHEM 1465 and subsequently change majors to curricula that require both CHEM 1441 and CHEM 1442 may substitute CHEM 1465 for CHEM 1441. Prerequisite: C or better in MATH 1322 or C or better in MATH 1323 or C or better in MATH 1324 or C or better in MATH 1421 (or concurrent enrollment) or MATH 1426 (or concurrent enrollment) or HONR-SC 1426 (or concurrent enrollment) or MATH 2425 (or concurrent enrollment) or HONR-SC 2425 (or concurrent enrollment) or Student Group CHEM 1465.

CHEM 2101. CHEMICAL INFORMATICS I. 1 Hour.
Developing quantitative understanding in chemistry relies heavily on models, from very crude and simple ideas to complex theoretical frameworks. This class aims to introduce students into models and modeling chemical phenomena that develop understanding of chemical processes. Working with observations and data, we develop the art of developing qualitative relations and explore their limitations. The class is delivered as a practical tour with hands-on practice. Good number skills, basic knowledge of coding and handling of computers is required. Prerequisite: (CHEM 1442 with a grade of C or better) and (MATH 1426 with a grade of C or better or Concurrent enrollment in MATH 1426 or Instructor's permission).
CHEM 2180. RESEARCH IN CHEMISTRY. 1 Hour.
Research for undergraduate students supervised by faculty of the department. May be repeated. Graded pass/fail only. Prerequisite: written permission of the instructor. Students may take a maximum of 12 hours credit on a pass/fail basis.

CHEM 2181. ORGANIC CHEMISTRY I LABORATORY. 1 Hour. (TCCN = CHEM 2123)
Experiments which illustrate laboratory techniques, theoretical concepts, and synthesis. Prerequisite: CHEM 1442 with a grade of C or better or ((CHEM 1342 with a grade C or better) and (CHEM 1343 with a grade C or better)) or Student Group CHEM 2181. Corequisite: CHEM 2321. If student withdraws from CHEM 2321 prior to midsemester date, student must also withdraw from CHEM 2181.

CHEM 2182. ORGANIC CHEMISTRY II LABORATORY. 1 Hour. (TCCN = CHEM 2125)
Experiments which will include syntheses, characterization of unknown substances, and use of the chemical literature. Prerequisite: (CHEM 2181 with a grade of C or better) and (CHEM 2321 with a grade of C or better). Corequisite: CHEM 2322. If student withdraws from CHEM 2322 prior to the midsemester date, student must also withdraw from CHEM 2182.

CHEM 2283. SYNTHESIS AND ANALYSIS LABORATORY I. 2 Hours.
Students will perform experiments that build mastery in standard laboratory techniques and illustrate theoretical concepts related to organic synthesis and quantitative analysis methods. Students will continue to develop their mastery of analysis through an introduction to the acquisition and statistical analysis of quantitative and qualitative data, acquired in the context of a series of guided inquiry design and synthesis projects. Syntheses may involve small molecules, polymers, and materials designed to perform specific functions. Students will continue to develop their communication and group work skills by sharing independent data and critical feedback with peers. Additionally, laboratory exercises will involve basic titrimetric, spectrophotometric, and chromatographic methods. Prerequisite: CHEM 1442/CHEM 1342 and CHEM 1182 or equivalent with a grade of C or better. Corequisites: Concurrent enrollment or previous credit in CHEM 2321 and CHEM 2335. Students must remain enrolled in at least one of CHEM 2321 and CHEM 2335 beyond the mid-semester date to remain enrolled in CHEM 2283.

CHEM 2284. SYNTHESIS AND ANALYSIS LABORATORY II. 2 Hours.
Experiments will include syntheses and analysis, characterization of unknown substances, and use of the chemical literature. A focus will be placed on advancing the use of modern chemical technologies for both synthetic and analytical work in a guided inquiry format. Prerequisite: CHEM 2283 and CHEM 2321 with a grade of C or better. Corequisite: CHEM 2322.

CHEM 2285. QUANTITATIVE CHEMISTRY LABORATORY. 2 Hours.
An introduction to computers for the acquisition and statistical analysis of data. Laboratory exercises involving basic titrimetric, spectrophotometric and chromatographic methods. Prerequisite: CHEM 1442 or a grade of C or better, and concurrent enrollment/previous credit in CHEM 2335.

CHEM 2321. ORGANIC CHEMISTRY I. 3 Hours. (TCCN = CHEM 2323)
The fundamentals of molecular structure, stereochemistry, and the reactions of aliphatic hydrocarbons. Electronic theory, synthetic methods, and mechanisms. Prerequisite: CHEM 1442 with a grade of C or better or ((CHEM 1342 with a grade C or better) and (CHEM 1182 with a grade C or better)) or Student Group CHEM 2321.

CHEM 2322. ORGANIC CHEMISTRY II. 3 Hours. (TCCN = CHEM 2325)
Organic spectroscopic analysis. The chemistry of aromatic hydrocarbons, alcohols and ethers, aldehydes, ketones, carboxylic acids and derivatives, amines, amino acid, carbohydrates, and other functional groups. Mechanisms and synthesis. Prerequisite: CHEM 2321 with a grade of C or better.

CHEM 2335. QUANTITATIVE CHEMISTRY. 3 Hours.
Basic methods of error analysis, simple and advanced methods for the solution of complex equilibria, fundamentals of titrimetric, spectrophotometric and chromatographic instrumental analysis. Prerequisite: (CHEM 1442 or CHEM 1342 or equivalent) and (MATH 1324 or MATH 1325 or MATH 1421 or MATH 1426 or equivalent or higher) and (CHEM 2285 or CHEM 2283 concurrent enrollment or previous credit).

CHEM 2380. UNDERGRADUATE RESEARCH. 3 Hours.
Research in chemistry supervised by a faculty member of the department. May be repeated. Graded pass/fail only. Prerequisite: written permission of the instructor. Students may take a maximum of 12 hours credit on a pass/fail basis.

CHEM 3101. CHEMICAL INFORMATICS II. 1 Hour.
This course provides a succinct overview of the emerging discipline of Chemical Informatics at the intersection of chemistry, computational science, and information science. Efficient and reliable analysis of chemical analytical data is a great challenge due to the increase in data size, variety and velocity. Attention in this class is drawn to specific opportunities afforded by this new field in accelerating discovery and understanding of cause and effect. The class is delivered as a practical tour with hands-on practice. Good number skills, basic knowledge of coding and handling of computers is required. Prerequisite: (CHEM 2101 with a grade C or better) or (Instructor's permission).

CHEM 3131. CHEMISTRY COMMUNITY SERVICE LEARNING. 1 Hour.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

CHEM 3175. BIOPHYSICAL CHEMISTRY LABORATORY. 1 Hour.
Introduction to the physical experimental techniques used in quantitative biochemical practice. Prerequisite: CHEM 3315 or concurrent enrollment.
CHEM 3181. PHYSICAL CHEMISTRY I LABORATORY. 1 Hour.
The physical and thermodynamic properties of substances, experimentally determined. Prerequisite: Grade of C or better in CHEM 2285 or CHEM 2343, CHEM 2335, and CHEM 3321 or concurrent enrollment.

CHEM 3182. PHYSICAL CHEMISTRY II LABORATORY. 1 Hour.
Experiments in kinetics, equilibria, spectroscopy, and electrochemistry. Modern instrumental techniques. Prerequisite: Grade C or better in CHEM 2285 or CHEM 2343, CHEM 2335, and CHEM 3322 or concurrent enrollment.

CHEM 3231. CHEMISTRY/BIOCHEMISTRY COMMUNITY SERVICE LEARNING. 2 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

CHEM 3307. INTRODUCTION TO POLYMER CHEMISTRY. 3 Hours.
The chemistry and technology of polymeric systems. The chemistry of natural systems such as proteins as well as the synthesis of fibers, films, plastics, and elastomers. Discussion of the characterization of polymers by modern techniques using instrumental analysis is followed by a summary of end-use and processing techniques. Prerequisite: CHEM 2322 with a grade of C or better or permission of instructor.

CHEM 3315. INTRODUCTION TO BIOPHYSICAL CHEMISTRY. 3 Hours.
A basic course introducing the physical principles that govern biological systems and processes, and the methods used for their investigation. Topics include solution thermodynamics, biomolecular interactions, enzyme kinetics, transport processes (diffusion, sedimentation, electrophoresis, viscous flow), and the applications of spectroscopic methods (absorption, emission and scattering of radiation, and the utilization of polarized light). Prerequisite: A grade of C or better in each of the following: CHEM 2335, MATH 2425, and 8 hours of college level physics.

CHEM 3317. INORGANIC CHEMISTRY. 3 Hours.
An overview of descriptive main group chemistry, solid state structures and the energetics of ionic, metallic, and covalent solids, acid-base chemistry and the coordination chemistry of the transition metals. The course is intended to explore and describe the role of inorganic chemistry in other natural sciences with an emphasis on the biological and geological sciences. Important compounds and reactions in industrial chemistry are also covered. Intended for both chemistry and non-chemistry majors. Prerequisite: Grade of C or better in CHEM 2322 or concurrent enrollment.

CHEM 3321. PHYSICAL CHEMISTRY I. 3 Hours.
Thermodynamics, gases, First and Second Law, pure substances, mixtures and solutions, equilibrium; Statistical Thermodynamics; Kinetics, rates, mechanisms, transitions state theory. In this class you will learn to understand the basic principles of Chemistry as the Science of Transformation and Change. We emphasize conceptual understanding and will become skilled in a quantitative description of the phenomena we study. The goal is that at the end of the course every student can outline the basic principles of Thermodynamics, has a sound understanding of ideal and approximate systems, and can apply the tools to engage in self-driven investigations. Prerequisites: CHEM 2335, MATH 2326, both with a grade of C or better and PHYS 1443 and PHYS 1444. MATH 3318 concurrent enrollment recommended.

CHEM 3322. PHYSICAL CHEMISTRY II. 3 Hours.
Quantum theory, introduction, principles. Schrödinger Equation, wavefunction; particle in a box, uncertainty; postulates of quantum mechanics; hydrogen atom, orbitals, structure of multi-electron atoms, atomic spectra and selection rules; molecular structure of diatomic molecules; introduction to molecular spectroscopy; materials and structure: lattices, diffraction methods, properties of solids. In this class you will learn to understand the principles of Quantum Chemistry and how it applies to atoms, molecules, and solids. We emphasize conceptual understanding and will become skilled in quantitative descriptions. The goal is that at the end of the course every student can outline the basic principles of Quantum Chemistry, both qualitatively and quantitatively. Students will obtain a sound understanding of probability, wavefunctions, orbitals, and spectroscopy, and can apply the learned concepts and tools to engage in self-driven investigations. This course is designated as the capstone course. Prerequisite: CHEM 2335, MATH 2326, both with a grade of C or better and PHYS 1443 and PHYS 1444. MATH 3318 concurrent enrollment recommended.

CHEM 3331. CHEMISTRY/BIOCHEMISTRY COMMUNITY SERVICE LEARNING. 3 Hours.
Service learning is a credit-bearing learning experience; therefore, credit is awarded for academic learning and not for service hours. Students engage in classroom activities, assignments, and discussions and in addition, integrate course content and learning outcomes with genuine community needs or issues. Collaborations with the community result in relationship-building and partnerships through intentional, structured service experiences. Students are required to analyze and evaluate these experiences by engaging in reflective activities, such as discussion and journaling. This process of structured service and learning in the community promote a sense of civic responsibility and commitment to others. Students commit to serve weekly time resulting in at least fifteen hours during one semester. This time is agreed upon by student, faculty, and community agency. Prerequisites: Permission of the Instructor.

CHEM 4080. UNDERGRADUATE RESEARCH. 0 Hours.
Research problems on an individual basis, conducted on a selected topic under the direction of a member of the chemistry and biochemistry faculty. May be repeated. This is a non-credit course and cannot be used to meet degree requirements. Prerequisite: Permission of the Instructor.
CHEM 4101. SEMINAR IN CHEMISTRY. 1 Hour.
Oral and written communication of chemical information. Seminars will be presented by students on topics from the current chemical literature. A term paper is required. The use of the library for researching the chemical literature will be emphasized. May be repeated for a total of two semester hours of credit. Students must be within 12 credits hours from the degree completion. Departmental permission required.

CHEM 4180. UNDERGRADUATE RESEARCH. 1 Hour.
Research under the direction of a member of the department. No more than six hours of CHEM 4180, CHEM 4280, CHEM 4380 and CHEM 4381 may be taken for a letter grade. Prerequisite: Written permission of the instructor and a minimum grade point average of 2.5.

CHEM 4181. COMPUTATIONAL CHEMISTRY LABORATORY. 1 Hour.
Molecular modeling. Application of various computational techniques to chemical problems, including determination of molecular geometry, conformational analysis, and molecular energetics. Prerequisite: CHEM 3321 or CHEM 3322 with a grade C or better.

CHEM 4191. READINGS IN CHEMISTRY. 1 Hour.
May be repeated for a maximum of six hours credit. Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper. Prerequisite: permission of department chair. Graded pass/fail only.

CHEM 4203. COMPUTATIONAL CHEMISTRY. 2 Hours.
A course emphasizing molecular quantum mechanics. Topics include the basic postulates of quantum mechanics, many electron wave functions, the variation method, and molecular orbital theory at various levels of approximation (Hueckel, Extended Hueckel, semi-empirical, ab initio, etc.). Related methods, such as force-field approaches and molecular dynamics, will be discussed. Prerequisite: CHEM 3322, with a grade of "C" or better.

CHEM 4242. LABORATORY TECHNIQUES IN BIOCHEMISTRY. 2 Hours.
Designed to introduce the student to biochemical laboratory methods; a practical approach to the properties of carbohydrates, proteins, enzymes, and nucleotides. Prerequisite: CHEM 4311, with a grade of "C" or better.

CHEM 4280. UNDERGRADUATE RESEARCH. 2 Hours.
Research under the direction of a member of the department. No more than six hours of CHEM 4180, CHEM 4280, CHEM 4380 and CHEM 4381 may be taken for a letter grade. Prerequisite: Written permission of the instructor and a minimum grade point average of 2.5.

CHEM 4291. READINGS IN CHEMISTRY. 2 Hours.
May be repeated for a maximum of six hours credit. Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper. Prerequisite: permission of department chair. Graded pass/fail only.

CHEM 4311. BIOCHEMISTRY I. 3 Hours.
The chemistry of the sugars, amino acids, proteins, and nucleic acids, followed by an introduction to enzyme chemistry. The major metabolic pathways of the cell, glycolysis, TCA cycle, and pentose phosphate pathway. Auditing of this class is NOT permitted. Prerequisite: CHEM 2322, with a grade of "C" or better.

CHEM 4312. BIOCHEMISTRY II. 3 Hours.
A continuation of CHEM 4311. The breakdown and biosynthesis of fats and the synthesis of carbohydrates, including photosynthesis. Metabolic utilization of proteins and amino acids together with an introduction to protein synthesis. Prerequisite: CHEM 4311, with a grade of "C" or better, or equivalent.

CHEM 4313. METABOLISM AND REGULATION. 3 Hours.
Selected topics in advanced metabolism including biosynthesis of phospholipids, steroids, porphyrins and related molecules, and prostaglandins. Membranes and transport phenomena, regulation of glycogen and glucose metabolism in muscle and lipid metabolism in adipose tissue. Prerequisite: CHEM 4312 with a grade of C or better.

CHEM 4314. ENZYMEOLOGY. 3 Hours.
A comprehensive study of enzymes including structures, reaction mechanisms, regulation, and kinetics. Prerequisite: CHEM 4311 with a grade of C or better.

CHEM 4316. BIOCHEMICAL GENETICS. 3 Hours.
Aspects of the biochemistry of gene expression in prokaryotic and eukaryotic organisms and its regulation, together with genetic manipulations and the methodology of recombinant DNA technology. Prerequisite: CHEM 4312 with a grade of C or better.

CHEM 4318. INORGANIC CHEMISTRY. 3 Hours.
An overview of the chemistry of the transition metals. Topics include symmetry and applications, bonding models, magnetism, synthesis of metal complexes, modern characterization techniques including IR, NMR, and electronic spectroscopy, organometallic compounds, reaction mechanisms, catalysis, and bioinorganic chemistry. Prerequisite: CHEM 2322 with a grade of C or better.
CHEM 4343. RESEARCH METHODS - UTEACH. 3 Hours.
The purpose of this course is to present UTeach students with the tools scientists use to solve scientific problems. These tools enable scientists to develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in more conventional science classes. These tools include: design of experiments to answer scientific questions; use of statistics to interpret experimental results and deal with sampling errors; mathematical modeling of scientific phenomena; finding and reading articles in the current scientific literature; applying scientific arguments in matters of social importance; writing scientific papers; reviewing scientific papers; oral presentation of scientific work; use of probes and computers to gather and analyze data; ethical treatment of human subjects; laboratory safety. Research Methods is primarily a laboratory course, and most of these topics are developed in connection with four independent inquiries UTeach students design and carry out. Written inquiries will be evaluated as examples of scientific writing. Prerequisite: SCIE 1201 or SCIE 1334 or concurrent enrollment; junior or senior standing.

CHEM 4346. ADVANCED SYNTHETIC METHODS. 3 Hours.
Methods and techniques for the synthesis and characterization of organic, inorganic, and organometallic compounds. Prerequisite: Grade of C or better in CHEM 2182, CHEM 2322, and CHEM 3317 or CHEM 4318.

CHEM 4380. UNDERGRADUATE RESEARCH. 3 Hours.
Research under the direction of a member of the department. No more than six hours of CHEM 4180, CHEM 4280, CHEM 4380 and CHEM 4381 may be taken for a letter grade. Prerequisite: Written permission of the instructor and a minimum grade point average of 2.5.

CHEM 4381. HONORS RESEARCH. 3 Hours.
Research in chemistry under the direction of a member of the department, resulting in a written honors thesis. No more than 6 hours of CHEM 4180, CHEM 4280, CHEM 4380 and CHEM 4381 may be taken for a letter grade. Prerequisite: CHEM 2322, CHEM 2182, and admission to the University Honors College.

CHEM 4385. INSTRUCTIONAL TECHNIQUES IN CHEMISTRY. 3 Hours.
Students participate in undergraduate laboratory instruction or recitation sessions under the supervision of a faculty member. No more than 6 hours of CHEM 4385 may be taken for a letter grade. Enrollment by departmental permission only.

CHEM 4387. UNIVERSITY-INDUSTRY CHEMISTRY COOPERATIVE. 3 Hours.
By special arrangement only. Cooperative study assignment doing chemical research in a local industrial chemical laboratory. Enrollment by departmental permission only. Graded pass/fail only.

CHEM 4391. READINGS IN CHEMISTRY. 3 Hours.
May be repeated for a maximum of six hours credit. Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper. Prerequisite: permission of department chair. Graded pass/fail only.

CHEM 4392. ADVANCED TOPICS IN CHEMISTRY. 3 Hours.
Topics arranged on an individual basis. May be repeated for credit as the topic varies. Prerequisite: permission of instructor.

CHEM 4461. INSTRUMENTAL ANALYSIS. 4 Hours.
The principles involved in the operation of modern analytical instruments and the laboratory use of such instruments. Students must be within 30 hours of completing their bachelor degrees. Prerequisite: Grades of C or better in CHEM 2285 or CHEM 2343 and CHEM 2335.

CHEM 5011. SEMINAR IN CHEMISTRY. 0 Hours.
Students will present a talk, prepare a poster, and engage in scientific writing and communication. Includes learning how to prepare, present, and defend an oral presentation. May not be counted for credit toward the degree requirements.

CHEM 5168. QUANTUM CHEMISTRY LABORATORY. 1 Hour.
Molecular modeling. Application of various computational techniques to chemical problems, including determination of molecular geometry, conformational analysis, and molecular energetics. Prerequisite: concurrent enrollment in CHEM 5262.

CHEM 5191. READINGS IN CHEMISTRY. 2 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: concurrent enrollment in CHEM 5262.

CHEM 5192. RESEARCH IN CHEMISTRY. 2 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5262. COMPUTATIONAL CHEMISTRY. 2 Hours.
Molecular quantum mechanics. Fundamental principles of quantum mechanics, with a special emphasis on molecular electronic structure theory. Topics covered include molecular mechanics, semi-empirical and ab initio molecular orbital theory, density functional theory, calculation of thermodynamic properties and molecular dynamics. Prerequisite: CHEM 5301 or permission of instructor. concurrent enrollment in CHEM 5168 required.

CHEM 5291. READINGS IN CHEMISTRY. 2 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5292. RESEARCH IN CHEMISTRY. 2 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.
CHEM 5300. SELECTED TOPICS IN ADVANCED CHEMISTRY. 3 Hours.
The area may vary (typically analytical, applied, biological, colloid, environmental, inorganic, organic, physical, polymer, materials, theoretical, etc.) and will be announced in advance. More than one area may be covered simultaneously, in parallel courses offered under different section numbers. May be repeated for credit when area or topics vary. Prerequisite: permission of instructor.

CHEM 5324. ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY. 3 Hours.
This course covers modern aspects of atomic and molecular mass spectrometry, as well as spectrochemical analysis. Upon completion of this course, the student will be able to: describe the basic setup and operation of mass spectrometric and spectroscopic instrumentation; interpret spectra from various instruments as a means for qualitative and quantitative analysis; apply basic knowledge of mass spectrometry and spectroscopy for practical problem solving; relate the use of mass spectrometry and spectroscopy to his or her own research interests; and compile, present, and explain modern techniques for analytical research. Written and oral presentations, as well as traditional classroom examinations, homework, and quizzes will be used to assess student performance. Prerequisite: CHEM 4461 or equivalent; or permission of instructor.

CHEM 5325. SEPARATION SCIENCE. 3 Hours.
A comprehensive examination of most areas involving the separation of molecules and ions. Theoretical, practical and historical aspects of: distillation, sublimation, liquid-liquid extraction, solid phase extraction, chromatography, electrophoresis, field flow fractionation, membrane/barrier processes, and crystallization will be considered. Students taking this course must have a good basic background in organic chemistry and physical chemistry.

CHEM 5326. ANALYTICAL CHEMISTRY - CONCEPTS AND IMPLEMENTATION. 3 Hours.
This course familiarizes students with basic electronic design in analytical instrumentation. Familiarization with active and passive components, operational amplifiers, timers, logic gates, and designing analytical instrumentation based on such components, especially in Wet Chemistry. The course covers ionic equilibria and acid-base equilibria and solving complex problems by iterative numerical methods and nonlinear curve fitting using programming in BASIC and MS Excel SolverTM. The course covers present day applications of wet chemical analysis, specific methods and instrumentation, practical aspects of automated liquid phase analytical methods including component availability and cost. A design problem, chosen by lottery, will be given to each student early in the semester. The newly acquired knowledge of chemistry and electronics will be used to design a new instrument and present it. Prerequisite: CHEM 4461 or equivalent undergraduate instrumental analysis course.

CHEM 5327. ANALYTICAL ELECTROCHEMISTRY. 3 Hours.
This course covers modern aspects of electroanalytical chemistry. Upon completion of this course, the student will be able to: understand the concepts of redox potentials and their role in electron transfer, the thermodynamic aspects of electrochemical cells, mass transport in electrochemical systems, and the principles underlying various electroanalytical techniques such as potentiometry, amperometry, coulometry and voltammetry. The instrumental aspects of these techniques will also be addressed, including specialized approaches such as spectroelectrochemistry. The student will be able to relate the use of these analytical techniques to his or her own research needs and interests. Written and oral examinations, as well as traditional classroom examinations, will be used to assess student performance. Prerequisite: CHEM 4461 or equivalent; or permission of instructor.

CHEM 5328. ANALYTICAL SPECTROSCOPY. 3 Hours.
This course covers many of the methods of spectrochemical analysis used in the analytical laboratory. At the end of this course, students should be able to: explain the fundamental theory of many spectroscopy methods, including atomic spectroscopy, molecular spectroscopy, UV/Vis spectroscopy, molecular luminescence, and infrared spectroscopy, among others; describe basic instrumental components; apply basic statistics (e.g., measurement errors, and calibration methods) for data analysis; and understand the fundamental use and applications of spectroscopy methods for basic research and laboratory measurements. Student performance will be evaluated based on homework assignments, exams, quizzes, and presentations. Prerequisite: CHEM 4461 or equivalent, or permission of instructor.

CHEM 5331. ADVANCED BIOCHEMISTRY I. 3 Hours.
1) Learn the vocabulary and conceptually understand at an advanced level the biochemical processes by which cells break down organic molecules and trap some of the released energy in the form of reactive nucleotides; use these reactive nucleotides to drive the synthesis of organic building blocks such as sugars, lipids, amino acids and nucleic acids from simpler molecules that serve as precursors. 2) To learn to critically review primary research articles in biochemistry by reading the assigned material related to proteins, expression and purification, kinetics, and metabolism as they are presented in class. 3) Research Project: To learn to critically review primary research articles in biochemistry by preparing a presenting and NIH R15 proposal/paper on a topic relevant to the topics covered in class. This project will teach students how to design and interpret experiments, thereby contributing to the creation of new knowledge in the fields of biochemistry and biophysics. The project will allow students to become knowledgeable in a specific subfield of biochemistry. 4) Develop an awareness of ethical responsibilities when conducting and reporting research and reviewing the research of others. 5) Understanding of the structures and functions of biological molecules. 6) Understanding of intermediary metabolism and its control. 7) Understanding of molecular genetics. 8) Ability to present concepts in oral, written and visual forms.

CHEM 5332. CELL SIGNALING & HUMAN BIOCHEMISTRY. 3 Hours.
Explores different aspects of signal transduction and different types of signaling pathways including enzyme linked receptors, G-protein signaling, G-protein coupled receptors, cytokine signaling, cyclic AMP based signaling, Calcium signaling, lipid signaling, NO-signaling, hormone signaling, peptide hormones, amino acid based hormones, steroid hormones; immune response and inflammation; cancer cell signaling, hypoxia and angiogenesis, aging; metabolic interrelation, vitamins and mineral, dietary supplements; recent topics in signaling, clinical correlation and health impacts.

CHEM 5333. BIOPHYSICAL METHODS AND SPECTROSCOPY IN BIOCHEMISTRY. 3 Hours.
A) Examination of various biophysical methods that determine enzyme functions: the methods includes purification of enzymes, determination of various kinetic parameters, and choice of methodology. B) Discussion of various spectroscopic approaches that determine the enzyme structures and functions: the approaches includes the modern spectroscopic techniques including fluorescence fluctuation spectroscopy as well as UV spec, fragonomics, surface plasmon resonance, FTIR-spectroscopy, and advanced NMR techniques such as HSQC and NOE.
CHEM 5334. MECHANISMS OF ENZYME ACTIONS. 3 Hours.
A) Exploration of enzyme properties that include enzyme kinetics, allostery, structure and their functions. B) Evaluation of enzyme functions associated with cofactors and regulators and their significance with respect to human health and diseases; evaluation of emerging scientific advances and challenges associated with enzyme actions will also be discussed throughout lectures, student paper presentation and student written proposal. Prerequisite: A passing grade in the ACS-test in Biochemistry.

CHEM 5335. GENES, GENOMES, AND NUCLEIC ACIDS. 3 Hours.
Concepts of genes and genomes in prokaryotes and eukaryotes. Nucleic acids structures and functions. Detailed mechanisms of prokaryotic and eukaryotic DNA replication and transcription; mRNA processing; Gene regulation, epigenetics and non-coding RNA. Fundamental theory of each topic will be covered with emphasis on current research literature and clinical correlations. Prerequisite: Passing grade in ACS-test in Biochemistry.

CHEM 5336. STRUCTURE & FUNCTION OF PROTEINS, MEMBRANES & CARBOHYDRATES AND FAST KINETICS. 3 Hours.
This is a one-semester course that extends fundamental concepts in chemistry, such as kinetic phenomena and thermodynamics into an exploration of biology. The content includes structure and function of proteins and membranes, and catalysis of biological reactions through: 1) applying equilibrium processes to study biochemical reactions 2) analyzing the kinetic parameters of enzymes that cause disease states as well as exploration of how drugs are used to inhibit enzymes.

CHEM 5337. MEDICINAL CHEMISTRY AND DRUG Discovery. 3 Hours.
This course will provide students with an understanding of the history of the modern drug discovery process, drugs and drug ionization states, biological targets, lead molecule discovery and optimization, cell signaling and metabolism, the investigation of structure activity relationships, translation with preclinical models, intellectual property and commercialization, and the regulatory process from target/lead discovery to clinical use. History and introduction to Discovery; Foundations: predicting structural ionization states using concepts from pH/pKa/acidic bases and bases/buffers; Biological Targets: Enzymes, Receptors, Oligonucleotides; Drug-Target Structures and Interactions, Lead identification and optimization, Structure Activity Relationships: Computational Approaches (ligand based; structure based); Cell signaling and Metabolism, cardiovascular diseases, diabetes, obesity, neurological disorders, and cancer; and current therapies; Translation and intellectual property; FDA regulations and clinical trials. To enroll students must have completed or be concurrently enrolled in CHEM 4311 or receive special permission of the instructor. Prerequisite: CHEM 4311 or permission of the instructor.

CHEM 5341. INORGANIC CHEMISTRY. 3 Hours.
Structures, bonding, and properties of main group and transition element compounds including: symmetry, coordination chemistry, reaction mechanisms, organometallic chemistry, and modern characterization techniques. Prerequisite: CHEM 4318 or permission of instructor.

CHEM 5342. SOLID STATE CHEMISTRY. 3 Hours.
Chemical synthesis and characterization methods of extended structures. Principles of solid-state synthesis, classical equilibrium approaches, diffusion and chemical transport, non-equilibrium and deposition methods; high temperature and high pressure synthesis; basic characterization techniques using X-rays, electrons, and neutrons; basic structure types and symmetry; optical, electrical and magnetic properties; examples will relate to materials used for energy harvesting, sensors, and catalysis.

CHEM 5344. X-RAY DIFFRACTION, SCATTERING AND ABSORPTION. 3 Hours.
The class will focus on modern applications of X-ray diffraction and absorption techniques in crystal and molecular structure determination. A practical component will address aspects of state of the art methods, including how to solve structures using data collected on powder and single-crystal diffractometers, X-ray photoelectron spectroscopy (XPS), etc.

CHEM 5351. ORGANIC CHEMISTRY I. 3 Hours.
Bonding, structure, stereochemistry, substituent effects, isotope effects, solvent effects, kinetics, and linear free-energy relationships in determining reaction mechanisms. Acids and bases, orbital symmetry, pericyclic reactions, photochemistry, and nucleophilic substitution reactions. Prerequisites: CHEM 2322 and CHEM 3322 or equivalent.

CHEM 5354. ORGANIC CHEMISTRY II. 3 Hours.
A survey of organic reaction mechanisms including addition and elimination reactions, nucleophilic carbon species, carbonyl reactions, electrophilic substitution reactions, rearrangement reactions, electron deficient species, and free radical reactions. Prerequisite: CHEM 5309 or permission.

CHEM 5355. ADVANCED ORGANIC SYNTHESIS. 3 Hours.
Synthetically important reactions, strategy in organic synthesis using retrosynthetic analysis and mechanistic understanding of reactions, synthons, asymmetric synthesis. Prerequisite: CHEM 5310 or permission of instructor.

CHEM 5356. ADVANCED POLYMER CHEMISTRY. 3 Hours.
Polymer synthesis and reactions including condensation, free-radical, ionic, and coordination polymerizations; principles of polymerization including thermodynamics and kinetic considerations; physical characterizations including determinations of absolute molecular weights, relative molecular weights, morphology, glass transitions, and polymer crystallinity; relationships between macromolecular structure, properties, and uses of polymeric materials. Also offered as MSE 5346. Prerequisite: CHEM 2321 and CHEM 2322 or permission of instructor.

CHEM 5358. DETERMINATION OF MOLECULAR STRUCTURE BY PHYSICAL METHODS. 3 Hours.
The use of modern instrumental techniques to determine structure: infrared, ultraviolet, and magnetic resonance spectroscopy, mass spectrometry, optical rotatory dispersion. Emphasis on interpretation of spectra.

CHEM 5361. INTRODUCTION TO GRADUATE PHYSICAL CHEMISTRY. 3 Hours.
CHEM 5364. ADVANCED GRADUATE PHYSICAL CHEMISTRY. 3 Hours.
Statistical thermodynamics and its application to kinetics and spectroscopy. Quantum theory, ab initio methods and density functional theory. Advanced spectroscopic methods to investigate bonding in molecules and solids. Prerequisite: CHEM 5301 or permission of the instructor.

CHEM 5365. THERMODYNAMICS OF MATERIALS. 3 Hours.
Applications of thermodynamics to the study of materials, thermodynamic properties of liquid and solid solutions and their relationship to surface and crystalline defects.

CHEM 5366. CHEMICAL KINETICS. 3 Hours.
Experimental and theoretical aspects of chemical reaction kinetics. Classical and modern techniques for mechanistic characterization, methods for approximation, analysis and interpretation. Simple and complex reaction matrices are considered (gas, liquid, solid state). Specific topics include microscopic reversibility, transition state theory, homo/heterogenous catalysis, and quantum/statistical mechanical estimation of rate constants and chemical activation. Relevant examples relating to atmospheric and environmental, biological, organic, and inorganic reactions will be discussed. Prerequisite: CHEM 5301 or by permission from the instructor.

CHEM 5381. ADVANCED LABORATORY TECHNIQUES IN CHEMISTRY I. 3 Hours.
The course will introduce to advanced laboratory techniques used in research laboratories in the Chemistry department. Handling of chemicals, synthesis procedures, characterization methods, data analysis, and safety regulations. Student will engage in reading primary literature and detailed process descriptions. Goal is to prepare students for successful work on their initial research project.

CHEM 5382. ADVANCED LABORATORY TECHNIQUES IN CHEMISTRY II. 3 Hours.
The course will continue to provide up-to-date laboratory techniques used in research laboratories in the Chemistry department. Synthesis procedures, analytical instrumentation, characterization methods, and data analysis. Free literature studies and assignments by instructor will prepare student for research and development. Goal is to support the research progress of students towards their comprehensive exam. Prerequisite: CHEM 5381.

CHEM 5383. ADVANCED LABORATORY TECHNIQUES IN CHEMISTRY III. 3 Hours.
The course will complete exposure to advanced laboratory techniques used in research laboratories in the Chemistry department and will make students ready for developing their own project proposal. Synthesis procedures, analytical instrumentation, characterization methods, and data analysis. Literature studies and explicit writing of scientific notes will prepare students for their comprehensive exam. Prerequisite: CHEM 5381, CHEM 5382.

CHEM 5391. READINGS IN CHEMISTRY. 3 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5392. RESEARCH IN CHEMISTRY. 3 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5398. THESIS. 3 Hours.
Graded R/F only. Prerequisite: permission of instructor.

CHEM 5421. ANALYTICAL INSTRUMENTATION. 4 Hours.
Theory of instrumentation and chemical signal source. Practical experiments utilizing atomic and molecular absorption and emission spectroscopy, chromatographic analysis, and electrochemical techniques.

CHEM 5491. READINGS IN CHEMISTRY. 4 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5492. RESEARCH IN CHEMISTRY. 4 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5591. READINGS IN CHEMISTRY. 5 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5592. RESEARCH IN CHEMISTRY. 5 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5691. READINGS IN CHEMISTRY. 6 Hours.
Conference course which may be repeated for credit, with credit granted according to work performed. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5692. RESEARCH IN CHEMISTRY. 6 Hours.
Conference course with laboratory with credit granted according to work performed. May be repeated for credit. Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 5698. THESIS. 6 Hours.
Graded P/F/R only. Prerequisite: permission of instructor.
CHEM 5998. THESIS. 9 Hours.
Graded P/F/R only. Prerequisite: permission of instructor.

CHEM 6011. TOPICS IN GRADUATE RESEARCH. 0 Hours.
Lectures by departmental and university faculty on current chemical research at U.T. Arlington. All graduate students are required to take this course once. May not be counted toward degree requirements. Graded P/F only.

CHEM 6012. ISSUES IN MODERN CHEMICAL RESEARCH. 0 Hours.
Topics to be discussed include the use of the library, maintenance of a research notebook, ethics in research, aspects of technical writing and presentations, and how research is funded. May not be counted toward degree requirements.

CHEM 6104. CHEMISTRY CAREER DEVELOPMENT. 1 Hour.
Every PhD-bound student is required to spend time for professional development outside his UTA laboratory. Possible opportunities include traditional internships in an industrial setting, working at a national laboratory, international exchange programs, extended collaborative visits, teaching engagements and other educational projects outside UTA. The career advancement may consist of one or multiple portions, in total time no less than three and not more than six months. Prerequisite: Permission of research supervisor and graduate advisor.

CHEM 6202. PRINCIPLES OF INDUSTRIAL CHEMISTRY. 2 Hours.
Survey of industrial inorganic and organic chemical processes. Prerequisite: permission of instructor.

CHEM 6203. REGULATORY ASPECTS OF THE CHEMICAL INDUSTRY. 2 Hours.
Survey of chemical toxicology, regulatory aspects involved in the chemical industry, industrial safety, patents and patent law.

CHEM 6304. CHEMISTRY CAREER DEVELOPMENT. 3 Hours.
Every PhD-bound student is required to spend time for professional development outside his UTA laboratory. Possible opportunities include traditional internships in an industrial setting, working at a national laboratory, international exchange programs, extended collaborative visits, teaching engagements and other educational projects outside UTA. The career advancement may consist of one or multiple portions, in total time no less than three and not more than six months. Prerequisite: Permission of the research supervisor and Graduate Advisor.

CHEM 6399. DISSERTATION. 3 Hours.
Graded R/F only. Prerequisite: admission to candidacy for the degree of Ph.D. in Applied Chemistry.

CHEM 6699. DISSERTATION. 6 Hours.
Graded R/F/P/W. Prerequisite: admission to candidacy for the degree of Ph.D. in Applied Chemistry.

CHEM 6904. CHEMISTRY CAREER DEVELOPMENT. 9 Hours.
Every PhD-bound student is required to spend time for professional development outside his UTA laboratory. Possible opportunities include traditional internships in an industrial setting, working at a national laboratory, international exchange programs, extended collaborative visits, teaching engagements and other educational projects outside UTA. The career advancement may consist of one or multiple portions, in total time no less than three and not more than six months. Prerequisite: Permission of Graduate Advisor and research supervisor.

CHEM 6999. DISSERTATION. 9 Hours.
Graded P/F/R only. Prerequisite: admission to candidacy for the degree of Ph.D. in Applied Chemistry.

CHEM 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
OBJECTIVE: MASTER OF SCIENCE

The objectives of the Chemistry and Biochemistry Department’s program leading to the Master of Science degree include:

a. developing the individual’s ability to do independent research,
b. preparing students for more advanced study in chemistry and
c. providing advanced training to professional chemists and those employed in technical and business areas in which chemistry at this level is necessary for efficient performance.

Research areas include analytical chemistry, biochemistry, bioinorganic chemistry, colloid and surface chemistry, electrochemistry, inorganic chemistry, medicinal chemistry, organic chemistry, physical chemistry, polymer chemistry, and theoretical chemistry.

OBJECTIVE: PH.D. IN CHEMISTRY

The program leading to the Doctor of Philosophy degree in Chemistry is designed primarily to prepare doctoral-level chemists for industrial research careers. The student must:

a. demonstrate the ability to carry out independent research and
b. acquire the practical knowledge of the type of research conducted in industry and of the constraints (both practical and philosophical) under which such research is conducted.

The areas of research include analytical chemistry, biochemistry, bioinorganic chemistry, colloid and surface chemistry, electrochemistry, inorganic chemistry, medicinal chemistry, organic chemistry, organometallic chemistry, physical chemistry, polymer chemistry, and theoretical chemistry.

ADMISSION CRITERIA

In evaluating candidates for admission to its graduate degree programs, the Department of Chemistry and Biochemistry emphasizes the preparedness of the student as evidenced by quality and quantity of coursework and the student’s previous research experience. Recommendations from our own faculty, based on firsthand knowledge of the applicant or a faculty member at the applicant’s institution, are also very important.

UNCONDITIONAL ADMISSION

Unconditional admission may be granted under any one of the following options. The minimum undergraduate GPA requirement for all options is 3.0, as calculated by Graduate Admissions.

OPTION 1
A satisfactory completion of a Bachelor’s degree or equivalent, official transcripts, and GRE scores, and three letters of recommendation.

OPTION 2
A satisfactory completion of a Bachelor’s degree or equivalent, official transcripts, and a letter of recommendation from a faculty member at the applicant’s undergraduate institution, plus a recommendation from a UT Arlington Chemistry and Biochemistry faculty member.

OPTION 3
A satisfactory completion of a bachelor’s degree or equivalent, official transcripts, and a letter of recommendation from a faculty member at the undergraduate institution, plus a recommendation from a UT Arlington Chemistry and Biochemistry faculty member based on a face-to-face interview.

LANGUAGE REQUIREMENTS

An applicant whose native language is not English must submit a TOEFL score of at least 550 or a score of at least 213 on the computer-based test. A TSE-A score of 45 or higher can be substituted for the TOEFL. Those who have completed their undergraduate education in English may be eligible for a TOEFL waiver based on the recommendation letters.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.
PROBATIONARY ADMISSION

In rare cases, probationary admission may be granted as the result of a substandard performance on one or more of the admission criteria. In this case, the Graduate Advisor will set additional conditions for admission including, but not limited to, additional undergraduate coursework and/or achieving a B or better in the first 9 hours of graduate coursework.

DENIAL OF ADMISSION

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

ELIGIBILITY FOR SCHOLARSHIPS/FELLOWSHIPS

Students that have no provisional admission conditions to meet will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by Graduate Admissions, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships. (Students with graduate teaching or research assistantships, however, must be enrolled in a minimum of 9 hours of coursework in both long semesters and 6 hours of coursework in the summer sessions.)

Master’s Degree Requirements

A candidate for graduate study must satisfy the general admission requirements of the program.

MASTER’S DEGREE WITH THESIS

This degree requires a minimum of 24 credit hours in coursework plus a 6 credit hour thesis class. A minimum of 18 hours in chemistry from courses listed in the Graduate Catalog will be required. Twelve of these hours will be taken from at least four (4) of the chemistry disciplines (Analytical, Biochemistry, Inorganic, Organic, Physical); suggested classes include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 5331</td>
<td>ADVANCED BIOCHEMISTRY I</td>
<td>3</td>
</tr>
<tr>
<td>or CHEM 5336</td>
<td>STRUCTURE &amp; FUNCTION OF PROTEINS, MEMBRANES &amp; CARBOHYDRATES AND FAST KINETICS</td>
<td></td>
</tr>
<tr>
<td>CHEM 5341</td>
<td>INORGANIC CHEMISTRY</td>

<td>ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 5325</td>
<td>SEPARATION SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives (6 hours) shall be graduate division courses in a science or engineering subject selected by the candidate; any elective requires the approval of the graduate advisor.

The 6 credit hour thesis class (CHEM 5698) is a completion course and must be taken in the final semester.

MASTER’S DEGREE WITH THESIS SUBSTITUTE

This degree is available for students with at least five years of professional experience in an industrial, government, or other chemistry laboratory at the time the degree is awarded. Admission to the program requires specific approval of the Graduate Studies Committee.

The degree plan requires a minimum of 30 credit hours, of which at least 24 must be in coursework and at least 3 in a suitable research project (CHEM 5392). A minimum of 18 hours in chemistry from courses listed in the Graduate Catalog will be required. Twelve of these hours will be taken from at least four (4) of the chemistry disciplines (Analytical, Biochemistry, Inorganic, Organic, Physical); suggested classes include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<td>ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 5325</td>
<td>SEPARATION SCIENCE</td>
<td>3</td>
</tr>
</tbody>
</table>

Additional electives (6 hours) shall be graduate division courses in a science or engineering subject selected by the candidate; any elective requires the approval of the graduate advisor.
MASTER’S DEGREE NON-THESIS

This option requires a minimum of 30 hours of coursework of which at least 24 hours must be in chemistry. Courses in chemistry will be taken from at least four (4) of the chemistry disciplines (Analytical, Biochemistry, Inorganic, Organic, Physical). Suggested classes include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 5331</td>
<td>ADVANCED BIOCHEMISTRY I</td>

</tr>
<tr>
<td>or CHEM 5325</td>
<td>SEPARATION SCIENCE</td>
<td></td>
</tr>
</tbody>
</table>

Elective courses (6 hours) shall be graduate division courses selected by the candidate. All courses taken for this degree plan including electives must be approved by the graduate advisor.

ADMISSION CRITERIA

In evaluating candidates for admission to its graduate degree programs, the Department of Chemistry and Biochemistry emphasizes the preparedness of the student as evidenced by quality and quantity of coursework and the student’s previous research experience. Recommendations from our own faculty, based on firsthand knowledge of the applicant or a faculty member at the applicant’s institution, are also very important.

UNCONDITIONAL ADMISSION

Unconditional admission may be granted under any one of the following options. The minimum undergraduate GPA requirement for all options is 3.0, as calculated by Graduate Admissions.

OPTION 1
A satisfactory completion of a Bachelor's degree or equivalent, official transcripts, and GRE scores, and three letters of recommendation.

OPTION 2
A satisfactory completion of a Bachelor’s degree or equivalent, official transcripts, and a letter of recommendation from a faculty member at the applicant's undergraduate institution, plus a recommendation from a UT Arlington Chemistry and Biochemistry faculty member.

OPTION 3
A satisfactory completion of a bachelor’s degree or equivalent, official transcripts, and a letter of recommendation from a faculty member at the undergraduate institution, plus a recommendation from a UT Arlington Chemistry and Biochemistry faculty member based on a face-to-face interview.

LANGUAGE REQUIREMENTS

An applicant whose native language is not English must submit a TOEFL score of at least 550 or a score of at least 213 on the computer-based test. A TSE-A score of 45 or higher can be substituted for the TOEFL. Those who have completed their undergraduate education in English may be eligible for a TOEFL waiver based on the recommendation letters.

PROVISIONAL ADMISSION

An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate.

PROBATIONARY ADMISSION

In rare cases, probationary admission may be granted as the result of a substandard performance on one or more of the admission criteria. In this case, the Graduate Advisor will set additional conditions for admission including, but not limited to, additional undergraduate coursework and/or achieving a B or better in the first 9 hours of graduate coursework.

DENIAL OF ADMISSION

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

ELIGIBILITY FOR SCHOLARSHIPS/FELLOWSHIPS

Students that have no provisional admission conditions to meet will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by
Graduate Admissions, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships. (Students with graduate teaching or research assistantships, however, must be enrolled in a minimum of 9 hours of coursework in both long semesters and 6 hours of coursework in the summer sessions.)

**Ph.D. Degree Requirements**

To be admitted to the Ph.D. program, an applicant must satisfy the general admission requirements of the program and his or her academic record must show preparation for advanced work in chemistry.

Each candidate must complete the following program requirements:

1. **Courses for students emphasizing analytical chemistry**
   
   Select three of the following:
   
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 5324</td>
<td>ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY</td>

<td>3</td>
</tr>
<tr>
<td>CHEM 5354</td>
<td>ORGANIC CHEMISTRY II</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 5355</td>
<td>ADVANCED ORGANIC SYNTHESIS</td>
<td>3</td>
</tr>
</tbody>
</table>
   
   Plus two (2) courses from two divisions outside of analytical chemistry (biochemistry, inorganic, organic, or physical). Suggestions include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 5324</td>
<td>ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY</td>
<td>3</td>
</tr>
</tbody>
</table>
CHEM 5331  ADVANCED BIOCHEMISTRY I  3
CHEM 5341  INORGANIC CHEMISTRY  3
CHEM 5262  COMPUTATIONAL CHEMISTRY  3
& CHEM 5168  and QUANTUM CHEMISTRY LABORATORY  3

Plus courses as indicated in items 7-11.

5. Courses for students emphasizing physical chemistry:
   CHEM 5361  INTRODUCTION TO GRADUATE PHYSICAL CHEMISTRY  3
   CHEM 5364  ADVANCED GRADUATE PHYSICAL CHEMISTRY  3
   CHEM 5300  SELECTED TOPICS IN ADVANCED CHEMISTRY  3

Plus two (2) courses from two divisions outside of analytical chemistry (biochemistry, inorganic, organic, or physical). Suggestions include:  

   CHEM 5324  ANALYTICAL MASS SPECTROMETRY AND SPECTROSCOPY  3
   or CHEM 5326  ANALYTICAL CHEMISTRY - CONCEPTS AND IMPLEMENTATION  3
   CHEM 5331  ADVANCED BIOCHEMISTRY I  3
   CHEM 5341  INORGANIC CHEMISTRY  3
   CHEM 5351  ORGANIC CHEMISTRY I  3

Plus courses as indicated in items 7-11.

6. Courses for students emphasizing polymer chemistry:
   All required courses for any of the other emphasis areas 1-5 plus:
   CHEM 5356  ADVANCED POLYMER CHEMISTRY  3

Plus courses as indicated in items 7-11.

7. All PhD-bound students must complete a Career Development Course - Select one of the following:  
   CHEM 6104  CHEMISTRY CAREER DEVELOPMENT  
   CHEM 6304  CHEMISTRY CAREER DEVELOPMENT  
   CHEM 6904  CHEMISTRY CAREER DEVELOPMENT  

8. All PhD-bound students must take the following courses
   CHEM 5011  SEMINAR IN CHEMISTRY  0
   CHEM 6011  TOPICS IN GRADUATE RESEARCH  0
   CHEM 6012  ISSUES IN MODERN CHEMICAL RESEARCH  0

9. All PhD-bound students will enroll in the lecture courses Advanced Laboratory Techniques in their respective 2nd (CHEM 5381), 3rd (CHEM 5382) and 4th (CHEM 5383) long semesters.

10. For successful completion of the doctoral degree program, every student must have taken at least 9 SCH dissertation courses.

11. Additional research and elective courses chosen according to the student’s dissertation topic and area of specialization under the guidance of the supervising committee

1 CHEM 5358 cannot be used to fulfill this requirement. Students who do not have a good instrumentation background should consider taking CHEM 5421.

2 For guidance and options of “Career Development” (possible “Internship”), students will consult with their research supervisor and with the Graduate Advisor.

A course grade may be used to satisfy degree requirements for no more than seven years after the course has been completed.

After admission to the doctoral program, the student must successfully complete the appropriate examination(s) required by the faculty of the student’s discipline.

A supplementary set of guidelines, published by the Department of Chemistry and Biochemistry, should be consulted.
Chemistry and Biochemistry - Undergraduate Programs

Academic Advising: 817-272-9687

Overview

The Department of Chemistry and Biochemistry offers four programs of study leading to a bachelor's degree and two leading to both a bachelor's and master's degree. They are the Bachelor of Arts in Chemistry, the Bachelor of Science in Chemistry - American Chemical Society certified, the Bachelor of Science in Biochemistry - American Chemical Society certified, the Bachelor of Science in Biological Chemistry a combined Bachelor of Science-Master of Science in Chemistry, and a Bachelor of Science in Biochemistry with a Master of Science in Biomedical Engineering.

- **Professional Chemist:** Students who wish to become professional chemists or whose goals include graduate education in chemistry should pursue the Bachelor of Science in Chemistry - American Chemical Society certified. Alternatively, students may choose the Bachelor of Science-Master of Science combined program. Prospective students should contact the departmental undergraduate advisor.

- **Professional Biochemist:** Students who wish to become professional biochemists or whose goals include graduate education in biochemistry, should pursue the Bachelor of Science in Biochemistry - American Chemical Society certified. Prospective students should contact the departmental undergraduate advisor.

- **Premedical and Predental Programs:** Students who wish to prepare for entry into medical or dental school may choose to major in chemistry or biochemistry. While any of the four bachelor's programs will meet the minimum requirements, the department recommends either the Bachelor of Arts in Chemistry or the Bachelor of Science in Biological Chemistry. Prospective students should contact both the departmental undergraduate advisor and the premedical advisor in the College of Science.

- **Preallied Health Programs:** Students who wish to prepare for entry into pharmacy or veterinary school, physical therapy, or occupational therapy may choose to major in chemistry. Prospective students should contact the departmental undergraduate advisor.

- **Chemistry as a Teaching Field:** Although students who intend to teach chemistry at the secondary school level may pursue any of the degrees, the Bachelor of Arts Degree offers the greatest flexibility.

Declaring a Major in Chemistry or Biochemistry

Beginning freshmen who intend to declare chemistry or biochemistry as a major must complete the following courses with a minimum GPA of 2.25 in chemistry and an overall GPA of 2.25.

- CHEM 1441 and CHEM 1442.
- Six hours of mathematics approved by the department.
- Three hours of biology or geology.
- 12 hours from courses in the University core curriculum other than science or mathematics (English, history, political science, social and cultural studies, and fine arts).

Transfer students who transfer part or all of the above requirements must complete a minimum of 11 hours of approved science and mathematics courses in residence with a minimum GPA of 2.25 to be eligible to major in chemistry or biochemistry.

All new students who intend to major in chemistry or biochemistry should schedule an appointment for advising with the departmental undergraduate advisor.

Declaring a Second Major in Chemistry

A person who satisfies the requirements for any other baccalaureate degree qualifies for having chemistry named as a second major upon completion of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1441</td>

</tr>
</tbody>
</table>

Chemistry Electives Chosen with the Chemistry Advisor: 6

Total Hours: 33
Please note that a second major in Chemistry is not the same as a double major in which students complete the requirements for a second degree.

Please see the undergraduate chemistry advisor for additional information.

**Teacher Certification**

Students interested in earning a Bachelor of Arts or Bachelor of Science degree with a major in chemistry leading to secondary teacher certification should refer to the “Bachelor of Arts Degree in Chemistry with Physical Science Pathway (UTeach Program)” degree plan or the “Bachelor of Arts Degree in Chemistry with Chemistry Pathway (UTeach Program)” degree plan for teacher certification requirements.

**Calculation of Chemistry Grade Point Average**

Only chemistry courses required in the degree program will be used in calculating the chemistry grade point average for chemistry degree candidates.

**Honors Program**

Students who qualify are encouraged to participate in the University Honors College. Students should enroll in honors sections of chemistry courses when available and should include CHEM 4381 as approved by the departmental undergraduate advisor.

**Chemistry Course Registration & Requirements**

Students may not be “pre-enrolled” in chemistry courses while pre-requisite courses at another institution are pending grades. Only UT Arlington credits may be used for pre-enrollment purposes.

Canvas grades (or other learning-management system grades) may not be used as proof of completion for a pre-requisite course. Students must submit either an official transcript to the registrar’s office, or submit a transcript with a letter grade for the pre-requisite course to the undergraduate chemistry advisor in order to be enrolled in a chemistry course. If a student is submitting the transcript via email, the email must be sent from their UTA email address.

The ACS-certified degree programs (Bachelor of Science in Chemistry and Bachelor of Science in Biochemistry) require the capstone course CHEM 3322. The capstone course is meant to test students in their knowledge of Math, Physics, and Chemistry in order to assess their cumulative knowledge of the sciences needed for success in their profession. This course requirement may not be satisfied with transfer credit without the approval of the undergraduate curriculum committee of the Department of Chemistry and Biochemistry.

**Department of Chemistry and Biochemistry Academic Regulations**

All students pursuing a degree in one of the academic programs from the Department of Chemistry and Biochemistry must abide by the academic regulations of the University and the following additional rules established by the Department of Chemistry and Biochemistry.

**Three-Attempt Rule**: A student may not attempt a course (at UT Arlington and/or at any other institution) more than three times and apply that course toward a chemistry/biochemistry degree. Enrollment in a course for a period of time sufficient for assignment of a grade, including a grade of W, is considered an attempt.

**Undergraduate Degrees**

- Bachelor of Arts in Chemistry (p. 1188)
- Bachelor of Arts in Chemistry with Chemistry Teacher Pathway (UTeach Program) (p. 1190)
- Bachelor of Arts in Chemistry with Physical Science Teacher Pathway (UTeach Program) (p. 1192)
- Bachelor of Science in Chemistry - American Chemical Society certified (p. 1194)
- Bachelor of Science in Biochemistry - American Chemical Society certified (p. 1195)
- Bachelor of Science in Biological Chemistry (p. 1197)
- Fast-Track Program: Bachelor of Science-Master of Science in Chemistry (p. 1199)
- Fast-Track Program: Bachelor of Science in Biochemistry and Master of Science in Biomedical Engineering (p. )

**Requirements for a Bachelor of Arts Degree in Chemistry**

This program is suitable preparation for admission to medical and dental schools, and other health-related professions.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 47).

**Pre-Professional Courses**

**Recommended Core Requirements**

**Total Hours: 120**

1A See approved list of courses (p. 1133) for the College of Science’s liberal arts area clusters.

1B Student may take GEOL 1301 and 1302 to meet degree requirement. This will affect the number of electives needed to reach 120 hours.

1C Completion of CHEM 2335 with the grade of “C” or above will satisfy the computer proficiency requirement.

### Requirements for a Bachelor of Arts Degree in Chemistry with Chemistry Teacher PATHWAY (UTeach Program)

This program is suitable preparation for students who desire certification with a teaching field in chemistry and/or physical science.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 47).

**Pre-Professional Courses**

<p>| Recommended Core Requirements |  |
|------------------------------|  |
| UNIV 1131 or UNIV 1101       | 1 |
| ENGL 1301                    | 3 |
| ENGL 1302                    | 3 |
| POLS 2311                    | 3 |
| POLS 2312                    | 3 |

#### Total Hours: 120

2A Student may take GEOL 1301 and 1302 to meet requirement. This will affect the number of electives needed to reach 120 hours.

2B Completion of CHEM 2335 with the grade of "C" or above will satisfy the computer proficiency requirement.

### Requirements for a Bachelor of Science Degree in Biochemistry - American Chemical Society Certified

This program is recommended to students who plan to enter into graduate study in biochemistry and for those who anticipate professional careers as biochemists. This program is also suitable for premedical and predental students and for training in allied health sciences.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 47).

Total Hours: 120

4A Completion of CHEM 2335 with the grade of "C" or above will satisfy the computer proficiency requirement.

4B When you choose BIOL 3442, you need the three credit hours of an advanced elective.

**Requirements for Fast-Track Program: Bachelor of Science and Master of Science in Chemistry**

This program is recommended for students who wish to earn graduate level course credit and who wish to obtain graduate level research experience. This program is suitable for those students who plan to pursue doctoral graduate studies in chemistry and for those who anticipate professional careers as chemists. **B.S. in Chemistry degree of this Fast-Track program is an American Chemical Society Certified degree.**

**FOUNDATION COURSES**

Students must take the following 4 specific undergraduate CHEM courses in order to be admitted into the Fast Track program. The cumulative GPA required for the foundation courses is a 3.25. Students must also maintain a 3.3 GPA or higher in all CHEM courses completed at UTA, and have a cumulative GPA of a 3.3 or higher.

Advanced electives at the 3000 or 4000 level sufficient to meet the 36 advanced hours requirement.

Electives sufficient to complete the total hours requirement for the undergraduate degree.

Student's have the option of taking 9-10 hours worth of graduate courses for undergraduate credit that can also be used towards their master's in chemistry. Please see the Chemistry Advisor for possible graduate level coursework that can be used in place of undergraduate coursework.

Refer to the Graduate Catalog and the graduate advisor for MS in Chemistry degree requirements (Master's Degree with Thesis).

**Total Hours: 120**

5A  Student may take GEOL 1301 and 1302 to meet degree requirement. This will affect the number of electives needed to reach 120 hours.

5B  Completion of CHEM 2335 with the grade of "C" or above will satisfy the computer proficiency requirement.

5C  Once admitted to this Fast-Track program, students will be allowed to take up to 9 credit hours of CHEM graduate courses (if CHEM 5461 is taken, 10 credit hours are allowed) that may be used to satisfy both bachelor’s and master’s degree requirements.

---

**Requirements for Fast Track Program: Bachelor of Science in Biochemistry and Master of Science in Biomedical Engineering**

This program is recommended for students who wish to earn graduate level course credit and who wish to obtain graduate level research experience. This program is suitable for those students who plan to pursue doctoral graduate studies in chemistry and for those who anticipate professional careers as chemists. B.S. in Biochemistry degree of this Fast-Track program is an American Chemical Society Certified degree.

**FOUNDATION COURSES**

Students must take the following 3 specific undergraduate courses in order to be admitted into the Fast Track program. The cumulative GPA required for the foundation courses is a 3.3. Students must also maintain a 3.3 GPA or higher in all CHEM courses completed at UTA, and have a cumulative GPA of a 3.3 or higher.

Total Hours: 120

6A Undergraduate courses being satisfied by these graduate courses are CHEM 4313 (or CHEM 4314), CHEM 4316, and one hour advanced elective. One credit hour difference will be satisfied by other undergraduate courses.
Oral Communication and Computer Competency Requirements

For all chemistry degree programs except the UTeach certification degree programs, the university computer competency requirement will be met by: completion of CHEM 2335 QUANTITATIVE CHEMISTRY with the grade of "C" or above or taking CSE 1301 or by passing the University computer proficiency examination. For the UTeach certification degree programs, completion of EDUC 4331 KNOWING AND LEARNING IN MATH AND SCIENCE fulfills the requirement.

The University oral communication competency requirement may be satisfied by taking CHEM 4101 (required for the Bachelor of Science degree in Chemistry, the Bachelor of Arts degree in Chemistry, and the combined BS-MS degree in Chemistry) or by taking CHEM 4313 or CHEM 4314 (required for the Bachelor of Science degree in Biochemistry and the Bachelor of Science degree in Biological Chemistry). For the UTeach certification degree programs, completion of SCIE 1201 or SCIE 1334 (required for the UTeach programs) fulfills the requirement.

Students should refer to the specific degree plans and the chemistry undergraduate advisor for details regarding these requirements.

Declaring a Minor in Chemistry

Students who wish to obtain a minor in Chemistry must take at least 18 semester hours of chemistry, of which at least 6 semester hours must be at the 3000/4000 level. Only lecture courses, which satisfy a degree requirement for one of the degrees offered by the Department of Chemistry and Biochemistry may be used. Research courses, Chemistry Readings, and Internship credits may not be used towards the chemistry minor.

Declaring a Minor in Biochemistry

Students who wish to obtain a minor in Biochemistry must take at least 18 semester hours of chemistry which must include CHEM 4311 and CHEM 4312. Only courses which satisfy a degree requirement for one of the degrees offered by the Department of Chemistry and Biochemistry may be used.
Data Science - Undergraduate Programs

Academic Advising: 406 Pickard Hall · 817-272-0939

Bachelor's Degrees in Data Science

The Bachelors of Science in Data Science requires students to select a Domain Concentration, where the Domain is one of the supported majors in the College of Science (Biology, Chemistry, Environmental Science, Geoscience, Mathematics, Physics, and Psychology). Beyond the UTA Core Curriculum requirements, the degree requires a sequences of courses in Mathematics, Data Science, and the chosen Domain Concentration. In addition, students must complete a year long Capstone project in collaboration with a supervisor within the College of Science or an Industry Partner.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 47).

Core Data Science Course Requirements

Regardless of the chosen concentration, all students seeking a Bachelors of Science in Data Science will be required to complete the following courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>DATA 3401</td>
<td>PYTHON FOR DATA SCIENCE 1</td>
<td>4</td>

<td>3</td>
</tr>
</tbody>
</table>

Math Requirements

All concentrations are required to take MATH 1426. The Math and Physics concentrations require either MATH 3330 or MATH 3319 and their prerequisites, while all other concentrations require DATA 3311.

All degrees are Bachelors of Science in Data Science with Domain Concentration. Possible domains are Biology, Chemistry, Earth and Environmental Science, Geoscience, Mathematics, Physics, and Psychology.

**Total Hours**: 120

* See General Core Requirements (p. 47) for approved courses.

### TYPICAL COURSE SEQUENCE

Details of a personal course sequence should be made with the guidance of the Data Science undergraduate advisor, particularly since many courses are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1421, Preparation for Calculus, in the first semester.

Requirements for a Bachelor of Science in Data Science with Environmental Science Concentration

Recommended Pre-Professional Courses

**Freshman/Transfer Requirement**

- **UNIV 1131** or **UNIV-SC 1101**: STUDENT SUCCESS

**Communication**

- ENGL 1301: RHETORIC AND COMPOSITION I

- Select one additional communication area course * 3

**Life and Physical Science**

- CHEM 1441: GENERAL CHEMISTRY I

- CHEM 1442: GENERAL CHEMISTRY II

- Select one course from this area * 3

**Creative Arts**

- Select one course from this area * 3

**U.S. History**

- Select two of the following courses: 6
  
  - HIST 1301: HISTORY OF THE UNITED STATES TO 1865
  
  - HIST 1302: HISTORY OF THE UNITED STATES, 1865 TO PRESENT
  
  - HIST 1331: TECHNOLOGY AND SCIENCE IN AMERICAN SOCIETY, I
  
  - HIST 1332: TECHNOLOGY AND SCIENCE IN AMERICAN SOCIETY, II

**Government/Political Science**

- POLS 2311: GOVERNMENT OF THE UNITED STATES

- POLS 2312: STATE AND LOCAL GOVERNMENT

**Social and Behavioral Sciences**

- Select one course from this area * 3

**Component Area**

- Select one course from this area * (Suggested DATA 1301) 3

**Mathematics**

- MATH 1426: CALCULUS I

- MATH 2425: CALCULUS II

**Data Science Courses**

- DATA 3401: PYTHON FOR DATA SCIENCE 1

- DATA 3402: PYTHON FOR DATA SCIENCE 2

- DATA 3311: MATHEMATICS FOR DATA SCIENCE

- DATA 3421: DATA MINING, MANAGEMENT, AND CURATION

- DATA 3441: STATISTICAL METHODS FOR DATA SCIENCE 1

</tr>
</tbody>
</table>
### TYPICAL COURSE SEQUENCE

Details of a personal course sequence should be made with the guidance of the Data Science undergraduate advisor, particularly since many courses are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426, Calculus I, in the first semester.

<table>

Total Hours: 120

Minor in Data Science

The College of Science also offers a Minor in Data Science to pair with an existing major. Course schedule may vary based on transferable credits or credits earned.

Students must gain advising and approval from both the department that offers the minor and from their major department. Failure to gain Major Department approval can result in no minor applied at graduation and final transcripts.

Students who wish to obtain a minor in Data Science must take at least 19-20 semester hours of DATA or related courses and maintain a minimum GPA of 2.0. Any substitutions to courses listed below must be approved by the department offering the minor.

Select 1 of the following courses:  4
DATA 1301  INTRODUCTION TO DATA SCIENCE  3
BIOL 3340  BIOINFORMATICS  3
ENVR/GEOL 3454  STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS  4
GEOL 4330  UNDERSTANDING GEOGRAPHIC INFORMATION SYSTEMS  3
MATH 3313  INTRODUCTION TO PROBABILITY  3
MATH 3316  STATISTICAL INFERENCE  3
PHYS 2321  COMPUTATIONAL PHYSICS  3
DATA 33xx  Choose from foundational courses list  4

COURSES
DATA 1301. INTRODUCTION TO DATA SCIENCE. 3 Hours.
This course provides an introduction to the field of data science with a high level overview of basic concepts, data types, and techniques while introducing data-informed decision making.

DATA 3311. MATHEMATICS FOR DATA SCIENCE. 3 Hours.
This course covers techniques from linear algebra and probability with an emphasis on how they are used in data science. Working with real data sets will be emphasized, along with basics of Matlab or R programming. Prerequisite: MATH 1426.

DATA 3401. PYTHON FOR DATA SCIENCE 1. 4 Hours.
This is the first of a two course sequence offering the foundations of Python programming in the context of data science. It introduces the full syntax of the Python language as it overviews structured, functional, and object oriented programming methodologies. It also provides a basic conceptual understanding of computing and introduces Unix command-line tools, software employed in data science such as git and Jupyter, and Python libraries such as numpy, matplotlib, and Pandas. Prerequisite: MATH 1426 or concurrent enrollment in MATH 1426.

DATA 3402. PYTHON FOR DATA SCIENCE 2. 4 Hours.
This is the second of a two course sequence offering the foundations of Python programming in the context of data science. It reinforces concepts presented in DATA 3401 with greater depth with a focus on application to various problems in data science, while exploring the python library ecosystem. Prerequisite: DATA 3401, or consent of instructor.

DATA 3421. DATA MINING, MANAGEMENT, AND CURATION. 4 Hours.
This lecture and lab course will provide training in working with databases, including data mining techniques and principles and best practices in data management, storage, and curation. Prerequisite: DATA 3401 or consent of instructor.

DATA 3441. STATISTICAL METHODS FOR DATA SCIENCE 1. 4 Hours.
This lecture and lab course will provide an introduction to the fundamental building blocks of advanced data analysis, with emphasis on advanced linear algebra, optimization, statistical inference, and Monte Carlo methods. Working with real data sets will be emphasized, along with basics of R programming. Prerequisite: DATA 3401 or consent of instructor.

DATA 3442. STATISTICAL METHODS FOR DATA SCIENCE 2. 4 Hours.
This lecture and lab course will provide an introduction to the principles and general methods for the analysis of categorical data. This type of data occurs extensively in both observational and experimental studies, as well as industrial applications. While some theoretical statistical detail is given, the primary focus will be on methods of data analysis. Topics include generalized regression models, logistic regression models, Poisson regression models, and multinomial regression models. Problems will be motivated from a scientific perspective. Prerequisite: DATA 3441.

DATA 3461. MACHINE LEARNING. 4 Hours.
This course introduces and surveys Machine Learning techniques and their application to various problems in data science. Prerequisite: DATA 3401, DATA 3402 or consent of instructor.

DATA 4090. UNDERGRADUATE RESEARCH. 0 Hours.
Undergraduate research experiences under supervision of faculty. Students are expected to disseminate research findings by poster or oral presentations in meetings or conferences. Students are also expected to participate in other activities as directed by the grant-funded Research Program Director.

DATA 4380. DATA PROBLEMS. 3 Hours.
This course is intended for Junior-level Data Science students, and will enable them to identify, define, and explore a number of potential problems and projects, for follow-up in the capstone course sequence. Prerequisite: Permission of instructor.
DATA 4381. DATA CAPSTONE PROJECT 1. 3 Hours.
This is the first of a two-semester sequence that will involve deep engagement in a team or individual project in Data Science. Presentation of written and oral reports will be required. Prerequisite: DATA 4380.

DATA 4382. DATA CAPSTONE PROJECT 2. 3 Hours.
This is the second of a two-semester sequence that will involve deep engagement in a team or individual project in Data Science. Presentation of written and oral reports will be required. Prerequisite: DATA 4381.

DATA 4390. DATA SCIENCE RESEARCH. 3 Hours.
Formulation and definition of research problems, the formulation and execution of strategies of solution, and the presentation of results. Prerequisite: consent of instructor. Recommendation by other faculty encouraged.

DATA 4391. SPECIAL TOPICS IN DATA SCIENCE. 3 Hours.
Special topics in Data Science are assigned to individuals or small groups. Faculty members closely supervise the projects and assign library reference material. Small groups will hold seminars at suitable intervals. May be repeated for credit. Prerequisite: senior standing and written permission of the instructor & department chair.

DATA 4392. ADVANCED TOPICS IN DATA SCIENCE. 3 Hours.
Varies from semester to semester. New developments in Data Science, in-depth study of a topic not covered in other courses, or a special faculty expertise made available to undergraduates. May be repeated for credit as topic varies. Prerequisite: permission of instructor.

DATA 4393. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year the student must complete a thesis or a project under the direction of a faculty member in Data Science. Prerequisite: Enrollment in the University Honors College and written permission of the instructor and chair.

DATA 4394. UNDERGRADUATE RESEARCH EXPERIENCES. 3 Hours.
Research under faculty supervision and mentorship involving collaboration within a small group. The topic varies from semester to semester, is determined by the faculty teaching the course, and is announced in advance. The course promotes active learning based on inquiry, development of higher-order thinking skills, and meaningful scientific research. Prerequisite: consent of instructor.
Earth and Environmental Sciences

Undergraduate Degrees

- Bachelor of Science in Geology - Professional Option (p. 1242)
- Bachelor Science in Geology - Environmental Science Option (p. 1242)
- Bachelor of Science in Geology - Engineering Geology Option (p. 1242)
- Bachelor of Science in Environmental Science (p. 1242)
- Bachelor of Arts in Geology - General Option (p. 1242)
- Bachelor of Arts in Geology - Composite Science Teacher Certification Option (UTeach) (p. 1242)

Minors

- Minor in Geology (p. 1259)
- Minor in Data Science (for Majors in Earth and Environmental Sciences) (p. 1259)
- Minor in Biology (for Majors in Earth and Environmental Sciences) (p. 1259)

Undergraduate Certificates

- Certificate in Geographic Information Systems (p. 1260)

Graduate Degrees

- Earth and Environmental Science M.S. (p. 1237)
- Earth and Environmental Science, Ph.D. (p. 1240)

COURSES

ENVR 1301. INTRODUCTION TO ENVIRONMENTAL SCIENCE. 3 Hours.
This course provides an introduction to the basic principles of environmental science. Environmental science, as a discipline, along with key chemical, physical, geological, and biological aspects and relevant societal issues will be examined.

ENVR 1330. GLOBAL WARMING. 3 Hours.
Global environmental challenges confronting humanity such as pollution, depletion of natural resources, ecosystem deterioration, food production, and population growth. Offered as ENVR 1330 and GEOL 1330. Credit will not be given for both.

ENVR 2314. THE GLOBAL ENVIRONMENT AND HUMAN HEALTH. 3 Hours.
This course will assess the impact on human health of: 1) population growth and available resources; 2) exposure to man-made harmful substances; and 3) environmental degradation.

ENVR 2316. CONSERVATION OF NATURAL RESOURCES. 3 Hours.
During this course the students will explore natural resources, with special emphasis on new solutions to problems of resource scarcity and conservation. During this course the students will learn about energy, water, air, and food resources conservation. Students will work on developing proposals for addressing water conservation issues. Prerequisite: ENVR 1301, or consult instructor.

ENVR 3317. ENVIRONMENTAL HYDROLOGY. 3 Hours.
An introduction to environmental hydrology topics including basic principles of the processes and measurements of precipitation, interception, infiltration, evaporation, evapotranspiration, interflow, overland flow, stream flow, and groundwater flow. Introduction to quantification of watershed metrics such as water budgets, hydrographs, discharge-concentration relationships, and flood routing. Examples and case studies will cover a broad spectrum of modern environmental scenarios (in a changing climate) across urban, agricultural, mining, and natural landscapes and biomes. Prerequisite: MATH 1426, or consent of instructor.

ENVR 3387. ENVIRONMENTAL SCIENCE FIELD METHODS. 3 Hours.
Measurement and analysis of environmental data collected in the field. Special fee covers cost of transportation and equipment. Prerequisite: CHEM 1442.

ENVR 3454. STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of statistics and helps students apply statistics to analyze data and interpret results from the perspective of Earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in Earth and environmental sciences. Offered as ENVR 3454 and GEOL 3454, credit will not be given for both. Prerequisite: GEOL 3454: MATH 1426.

ENVR 3457. ENVIRONMENTAL ANALYTICAL CHEMISTRY. 4 Hours.
This course offers an introduction to chemical and biochemical phenomena that occur in water, air, terrestrial and living environments, and the effects of human activity on them. Environmental chemistry can broaden as much as atmospheric chemistry, aquatic chemistry, chemistry of soil/geosphere, toxicological chemistry and industrial ecology. In this course, mainly chemical substances in diverse environmental compartments and interactions and exposure impact to human and wildlife receptors will be focus based on analytical chemistry principles and perspective. Prerequisite: CHEM 1442.
ENVR 4189. RESEARCH IN ENVIRONMENTAL SCIENCE. 1 Hour.
Supervised undergraduate research in some aspect of environmental science. Prerequisite: Permission from Instructor.

ENVR 4190. ENVIRONMENTAL SCIENCE INTERNSHIP. 1 Hour.
Work in environmental sciences for a commercial concern at least 20 hours per week for three months. Requirements include: writing a resume, learning how to interview and function on the job, and a report describing the work.

ENVR 4199. TECHNICAL SESSIONS. 1 Hour.
Forum for presentation of results of undergraduate and graduate students and faculty research. Offered as ENVR 4199 and GEOL 4199. Credit will not be given for both. Prerequisite: For ENVR: ENVR 1301 or equivalent. For GEOL: GEOL 1301 or equivalent.

ENVR 4289. RESEARCH IN ENVIRONMENTAL SCIENCES. 2 Hours.
Supervised undergraduate research in any one of the various fields of environmental sciences. May be repeated but will not meet Environmental Science degree requirements. Prerequisite: permission from instructor.

ENVR 4303. TOPICS IN SUSTAINABILITY. 3 Hours.
Governmental and regulatory issues as they relate to sustainability. Course offered as SUST 5303 and EVSE 5303. Credit will be granted only once.

ENVR 4305. SELECTED TOPICS IN ENVIRONMENTAL SCIENCES. 3 Hours.
Environmental science topics not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May be repeated for Environmental Science elective credit as different topics are offered. Prerequisite: Determined by instructor.

ENVR 4308. ENVIRONMENTAL GEOCHEMISTRY. 3 Hours.
The geochemistry of natural waters with emphasis on processes that control solute concentrations including complexation reactions, oxidation and reduction reactions, biogeochemistry, and chemical weathering reactions. Offered as ENVR 4308 and GEOL 4308. Credit will not be given for both. Prerequisite: CHEM 1442 or GEOL 2445.

ENVR 4312. ENVIRONMENTAL RISK BASED ACTION. 3 Hours.
This course offers an introduction to environmental risk-based actions including environmental laws and regulations, hazard identification, toxicology, common contaminants, chemical intake models, chemical fate and transport models, and vapor intrusions. Prerequisite: ENVR 1301 or GEOL 1301 or equivalent.

ENVR 4313. ENVIRONMENTAL REGULATION OF CHEMICAL HAZARDS. 3 Hours.
This course offers an introductory knowledge about regulations and management of environmental and life quality in relation to chemical pollution, waste disposal, energy/resources sustainability, public health threats, and food/consumer product safety. Prerequisite: CHEM 1441 or equivalent.

ENVR 4314. TOXICOLOGY FOR ENVIRONMENTAL SCIENTISTS. 3 Hours.
This course offers an introduction to environmental toxicology and methods of measuring and using data on the adverse effects of chemical substances in line with understanding chemical and biochemical phenomena that occur in water, air, terrestrial and living environments, and the impact to human population. Prerequisite: CHEM 1441 or equivalent.

ENVR 4315. INTRODUCTION TO ENVIRONMENTAL STUDIES. 3 Hours.
This course serves as an introduction to and covers broad aspects of environmental studies. It is designed to foster an increased understanding of physical, chemical and biological systems of terrestrial and aquatic environments, their complex connections and patterns, and human interactions. In this course emphasis is placed on a holistic approach to environmental studies using case studies, learning activities, and discussions to reinforce scientific principles. Students will examine the relationship between humankind and nature in order to gain a broad understanding of issues, causes, and possible solutions to the array of environmental challenges faced in today's world. Prerequisite: Junior standing, core complete.

ENVR 4323. ISSUES IN ENVIRONMENTAL HEALTH. 3 Hours.
An introduction to health issues of current concern resulting from environmental exposures. Topics include: environmental asthma, endocrine disruptors, climate change and health, emerging contaminants, nanotechnology and health, airborne particles and pediatric health. Offered as ENVR 4323 and GEOL 4323. Credit will not be given for both.

ENVR 4325. TRACER HYDROLOGY. 3 Hours.
This course is primarily focused on the applications of chemical tracers to study the interaction between precipitation, surface water, and groundwater. The first part covers the basics of water fluxes and naturally occurring and artificial tracers such as stable and radioactive isotopes, noble gases, fluorescent nanoparticles, ions, and DNA. The second part is oriented towards the assimilation of chemical tracer information to enhance hydrological metrics, conceptual model development, and numerical modeling. Prerequisite: ENVR 1301, or GEOL 1301, or cons. inst.

ENVR 4330. UNDERSTANDING GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
A practical introduction to GIS and methods of creating, maintaining and displaying spatial data using the ArcGIS software. Prerequisite: Junior Standing.

ENVR 4389. RESEARCH IN ENVIRONMENTAL SCIENCES. 3 Hours.
Supervised undergraduate research in any one of the various fields of environmental sciences. May be repeated but will not meet Environmental Science degree requirements.

ENVR 4455. MATHEMATICAL MODELING OF ENVIRONMENTAL QUALITY SYSTEMS. 4 Hours.
This course is designed to introduce the process principles that govern contaminant transport and transformations in multimedia environments. This course will cover application of fate and transport models to evaluate pollutant interactions with the biosphere, particularly in the context of human exposure modeling and health risk assessment. Offered as ENVR 4455 and GEOL 4455. Credit will not be given for both.
ENVR 4456. ENVIRONMENTAL RISK ASSESSMENT. 4 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment-hazard identification, dose-response assessment, exposure assessment, and risk characterization. Offered as ENVR 4456 and GEOL 4456. Credit will not be given for both.

ENVR 4458. MACHINE LEARNING FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of machine learning and helps students apply machine learning to analyze data, predict outcomes and interpret results from the perspective of earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in earth and environmental sciences. Offered as GEOL 4458 and ENVR 4458. Credit will be not given for both. Prerequisite: GEOL 3454 or ENVR 3454 or equivalent.

COURSES

EVSE 5100. SELECTED TOPICS IN ENVIRONMENTAL SCIENCE AND ENGINEERING. 1 Hour.
May be repeated for credit when topic changes.

EVSE 5115. PROFESSIONAL EXPERIENCE. 1 Hour.
Work in environmental science for a commercial concern at least 20 hrs/wk for 3 months. Requirements include writing a resume, learning how to interview and function on the job, and a report describing the work. Prerequisite: Cons. inst.

EVSE 5120. ENVIRONMENTAL PROFESSIONAL MENTORING & BUSINESS ETHICS. 1 Hour.
Provides credit to students participating in an approved mentoring program with an experience environmental professional. May be repeated once for credit.

EVSE 5199. SEMINAR IN ENVIRONMENTAL & EARTH SCIENCES. 1 Hour.
Topics presented by faculty, students, and invited lecturers.

EVSE 5200. SELECTED TOPICS IN ENVIRONMENTAL & EARTH SCIENCES. 2 Hours.
May be repeated for credit when topic changes.

EVSE 5294. INDIVIDUAL PROBLEMS IN ENVIRONMENTAL & EARTH SCIENCES. 2 Hours.
Individual research projects supervised by a faculty member.

EVSE 5300. SELECTED TOPICS IN ENVIRONMENTAL & EARTH SCIENCE. 3 Hours.
May be repeated for credit when topic changes.

EVSE 5303. SUSTAINABILITY ISSUES SEMINAR III. 3 Hours.
Governmental and regulatory issues as they relate to sustainability.

EVSE 5309. ENVIRONMENTAL SYSTEMS-BIOLOGICAL ASPECTS. 3 Hours.
An introduction to the biological components of environmental systems. Population dynamics, species interactions, community structure, biodiversity, bioenergetics, nutrient cycling and human impacts are reviewed. Focus will be on natural processes and their engineering applications.

EVSE 5310. ENVIRONMENTAL SYSTEMS-CHEMICAL ASPECTS. 3 Hours.
An introduction to the chemistries of air at different altitudes, of water systems and of soils. Chemical and physico-chemical processes at phase boundaries, modeling for kinetics and mass transport, analytical techniques and disposal and recycling are included as well as their impact on engineering decisions.

EVSE 5311. ENVIRONMENTAL SYSTEMS-GEOLOGICAL ASPECTS. 3 Hours.
Introduction to the tectonic, volcanic, atmospheric, climatic, hydrologic and geochemical processes and natural hazards of the earth, and their interaction with political, economic and engineering decisions.

EVSE 5312. ENVIRONMENTAL RISK BASED ACTION. 3 Hours.
This course offers an introduction to environmental risk-based actions including environmental laws and regulations, hazard identification, toxicology, common contaminants, chemical intake models, chemical fate and transport models, and vapor intrusions.

EVSE 5313. ENVIRONMENTAL REGULATION OF CHEMICAL HAZARDS. 3 Hours.
This course offers an introductory knowledge about regulations and management of environmental and life quality in relation to chemical pollution, waste disposal, energy/resources sustainability, public health threats, and food/consumer product safety. Prerequisite: CHEM 1441 or equivalent.

EVSE 5314. TOXICOLOGY FOR ENVIRONMENTAL SCIENTISTS. 3 Hours.
This course offers an introduction to environmental toxicology and methods of measuring and using data on the adverse effects of chemical substances in line with understanding chemical and biochemical phenomena that occur in water, air, terrestrial and living environments, and the impact to human population. Prerequisite: CHEM 1441 or equivalent.

EVSE 5316. CONSERVATION OF NATURAL RESOURCES. 3 Hours.
During this course the students will explore natural resources, with special emphasis on new solutions to problems of resource scarcity and conservation. During this course the students will learn about energy, water, air, and food resources conservation. Students will work on developing proposals for addressing water conservation issues. Prerequisite: ENVR 1301, or equivalent, or consult instructor.
EVSE 5317. ENVIRONMENTAL HYDROLOGY. 3 Hours.
An introduction to environmental hydrology topics including basic principles of the processes and measurements of precipitation, interception, infiltration, evaporation, evapotranspiration, interflow, overland flow, stream flow, and groundwater flow. Introduction to quantification of watershed metrics such as water budgets, hydrographs, discharge-concentration relationships, and flood routing. Examples and case studies will cover a broad spectrum of modern environmental scenarios (in a changing climate) across urban, agricultural, mining, and natural landscapes and biomes. Prerequisite: MATH 1426, or consent of instructor.

EVSE 5318. CLIMATE CHANGE RISK AND RESILIENCE. 3 Hours.
Climate risk is emerging as a key risk driver for systems as diverse as critical infrastructure (e.g., water, energy, transport, communications, buildings, transportation) and the natural environment. These climate risks arising from the physical manifestation of climate change. This course will highlight the roles, responsibilities, and ethical considerations for scientists and engineers and other risk professionals in the identification, evaluation, and management of climate risk, and provide students with a suite of theories, methods, and tools to support risk assessments. Emerging concepts of system resilience will be discussed.

EVSE 5320. TOXICOLOGY. 3 Hours.
An introduction to the general principles of toxicology with an emphasis on certain classes of toxic agents, their sources and toxic effects, as well as their environmental fate. Prerequisite: CHEM 2322.

EVSE 5323. ISSUES IN ENVIRONMENTAL HEALTH. 3 Hours.
An introduction to health issues of current concern resulting from environmental exposures. Topics include: environmental asthma, endocrine disruptors, climate change and health, emerging contaminants, nanotechnology and health, airborne particles and pediatric health.

EVSE 5325. TRACER HYDROLOGY. 3 Hours.
This course is primarily focused on the applications of chemical tracers to study the interaction between precipitation, surface water, and groundwater. The first part covers the basics of water fluxes and naturally occurring and artificial tracers such as stable and radioactive isotopes, noble gases, fluorescent nanoparticles, ions, and DNA. The second part is oriented towards the assimilation of chemical tracer information to enhance hydrological metrics, conceptual model development, and numerical modeling. Prerequisite: ENVR 1301, or GEOL 1301, or cons. inst.

EVSE 5350. CONTAMINANT HYDROGEOLOGY. 3 Hours.
Sources and types of various organic and inorganic contaminants; the physical, chemical, and biological factors and processes that affect the transport and fate of contaminants in the subsurface; non-aqueous phase liquids and multiphase flow; and various remedial techniques of contaminated sites. Prerequisite: GEOL 4320 or GEOL 5328 (or concurrent enrollment).

EVSE 5351. GEOMORPHOLOGY AND QUATERNARY STRATIGRAPHY OF SEDIMENTARY SYSTEMS. 3 Hours.
This course examines those physical processes that sculpt the surface of the Earth and result in deposition of sediments. Surface systems covered include weathering, mass wasting, rivers, shorelines, eolian processes, and glaciers. The course also examines the stratigraphic techniques used to decode the recent (2 million to present) stratigraphic record of these systems. Course is designed for geologists, biologists, and other fields concerned with interpreting and/or managing modern environments.

EVSE 5357. MEDICAL GEOLOGY. 3 Hours.
Introduction to geoscience and health. Students will learn how the geologic and geochemical environment can impact health. The historic background to geoscience and health will be presented followed by discussions on the natural abundance of elements in the earth, and the nature of essential and toxic elements (dose-response). Students will then learn about health responses following exposures in specific geologic/geochemical situations.

EVSE 5394. INDIVIDUAL PROBLEMS IN ENVIRONMENTAL & EARTH SCIENCES. 3 Hours.
Individual research projects supervised by a faculty member. Prerequisite: consent of instructor.

EVSE 5395. MASTER'S PROJECT. 3 Hours.
May be used as elective for students in non-thesis program. Graded F, P.

EVSE 5398. THESIS. 3 Hours.
Graded F, R.

EVSE 5405. METEOROLOGY AND CLIMATOLOGY. 4 Hours.
A quantitative approach to the study of the structure, energy, and motions of the atmosphere.

EVSE 5454. STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of statistics and helps students apply statistics to analyze data and interpret results from the perspective of Earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in Earth and environmental sciences. Offered as EVSE 5454 and GEOL 5454. Credit will not be given for both.

EVSE 5455. MATHEMATICAL MODELING OF ENVIRONMENTAL QUALITY SYSTEMS. 4 Hours.
This course is designed to introduce the process principles that govern contaminant transport and transformations in multimedia environments. This course will cover application of fate and transport models to evaluate pollutant interactions with the biosphere, particularly in the context of human exposure modeling and health risk assessment. Offered as EVSE 5455 and GEOL 5455. Credit will not be given for both.
EVSE 5456. ENVIRONMENTAL RISK ASSESSMENT. 4 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment: hazard identification, dose-response assessment, exposure assessment, and risk characterization. Offered as EVSE 5456 and GEOL 5456, credit will not be given for both.

EVSE 5457. ENVIRONMENTAL ANALYTICAL CHEMISTRY. 4 Hours.
This course offers an introduction to chemical and biochemical phenomena that occur in water, air, terrestrial and living environments, and the effects of human activity on them. Environmental chemistry can broaden as much as atmospheric chemistry, aquatic chemistry, chemistry of soil/geosphere, toxicological chemistry and industrial ecology. In this course, mainly chemical substances in diverse environmental compartments and interactions and exposure impact to human and wildlife receptors will be focus based on analytical chemistry principles and perspective. Prerequisite: CHEM 1442 or equivalent courses.

EVSE 5458. MACHINE LEARNING FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of machine learning and helps students apply machine learning to analyze data, predict outcomes and interpret results from the perspective of earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in earth and environmental sciences. Offered as GEOL 5458 and EVSE 5458. Credit will not be given for both. Prerequisite: ENVR 3454 or GEOL 3454 or EVSE 5454 or GEOL 5454 or equivalent.

EVSE 5465. PHYSICAL OCEANOGRAPHY AND LIMNOLOGY. 4 Hours.
An introduction to physical processes in lakes and oceans. Changes in lakes and oceans influence heat, and momentum fluxes at the aquatic/oceanic and atmospheric interface. Topics include ocean/lake structure and circulation, and the impact of global climate change on lakes and oceans. Field excursions to nearby lakes combine theoretical knowledge and field measurements. Prerequisite: PHYS 1441 or PHYS 1443; and MATH 1426.

EVSE 5698. THESIS. 6 Hours.
Graded F, P, R.

EVSE 5998. THESIS. 9 Hours.
Graded F, P, R.

EVSE 6197. RESEARCH IN ENVIRONMENTAL & EARTH SCIENCES. 1 Hour.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6297. RESEARCH IN ENVIRONMENTAL & EARTH SCIENCES. 2 Hours.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6397. RESEARCH IN ENVIRONMENTAL AND EARTH SCIENCES. 3 Hours.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6399. DISSERTATION. 3 Hours.
Graded F, R.

EVSE 6697. RESEARCH IN ENVIRONMENTAL & EARTH SCIENCE. 6 Hours.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6699. DISSERTATION. 6 Hours.
Graded F, R, P, W.

EVSE 6997. RESEARCH IN ENVIRONMENTAL & EARTH SCIENCE. 9 Hours.
Individually approved research projects. May be repeated for credit. Graded F, P, R.

EVSE 6999. DISSERTATION. 9 Hours.
Graded F, P, R.

EVSE 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

COURSES

GEOL 1301. EARTH SYSTEMS. 3 Hours.
An integrated study of the earth, emphasizing interactions between plate tectonics, the atmosphere, the oceans, the biosphere, and human activity. Formerly listed as GEOL 1425, credit will not be given for both.
GEOL 1302. EARTH HISTORY. 3 Hours.
History of the earth and evolution of life emphasizing the co-evolution of the atmosphere, oceans, and biosphere. Formerly listed as GEOL 1426, credit will not be given for both.

GEOL 1330. GLOBAL Warming. 3 Hours.
Global environmental challenges confronting humanity such as pollution, depletion of natural resources, ecosystem deterioration, food production, and population growth. Offered as ENVR 1330 and GEOL 1330. Credit will not be given for both.

GEOL 1340. Weather And Climate. 3 Hours.
Nature and variability of weather and climate, including wind, temperature, clouds and precipitation, droughts and flooding. Storm systems, fronts, thunderstorms, tornados, hurricanes. Atmospheric chemistry and air pollution. Mean climate, seasonal variations and climatic change. Formerly listed as GEOL 2401, credit will not be given for both.

GEOL 1350. Introduction To Oceanography. 3 Hours.
The study of ocean basins and their origin, ocean currents, waves and tides, properties of sea water, and marine ecosystems, emphasizing the role of the ocean in the Earth system. Discussion of weekly ocean news, and incorporation of web-delivered current oceanographic data into the course material. Formerly offered as GEOL 3301 and GEOL 3184 and GEOL 2412; credit will be granted only once. Formerly listed as GEOL 1450, credit will not be given for both.

GEOL 1360. Geologic Hazards. 3 Hours.
Processes producing earthquakes, floods, eruptions and landslides, and their effect on people. Formerly listed as GEOL 2404, credit will not be given for both.

GEOL 2406. Natural Resources & Sustainability. 4 Hours.
Energy, construction, agricultural, and hydrological resources are evaluated in terms of their production and use, including storage and disposal of waste. Emphasis is placed on the importance of preserving clean water, air and soils. The course will concentrate on what humans take from the Earth, the impacts it has on their environment, and what it takes to make the planet sustainable for human habitation.

GEOL 2445. Mineralogy. 4 Hours. (TCCN = GEOL 2409)
Lectures discuss the physical and chemical principles governing the properties and formation of minerals. There are three major divisions of the subject matter: (a) geometric and optical crystallography; (b) crystal chemistry and properties of minerals, and (c) occurrence, origins, and pressure-temperature stabilities of the major rock-forming minerals. Laboratories are devoted to exercises in crystallography, X-ray diffraction, optical mineralogy and hand-specimen mineral identification. Prerequisite: GEOL 1301 or GEOL 3340, and CHEM 1442, or permission from instructor.

GEOL 3100. Geoscience Professional Orientation. 1 Hour.
Review of various careers in the Geosciences, and how to prepare a resume, network, and interview. Principles to follow for on-the-job success. Class will involve field trips and guest lectures.

GEOL 3316. Astrobiology I. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include properties of life, origin and evolution of life on Earth, terrestrial geology and habitability, environmental forcings, extremophiles, mass extinctions, meteorites, searches for life in the solar system. Offered as BIOL 3316, GEOL 3316 and PHYS 3316; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent.

GEOL 3340. Geology For Engineers. 3 Hours.
Introduction to geological materials and processes important to engineering. Includes processes forming minerals and rocks; mechanics and deformation of rocks, weathering, erosion and soils; soil hazards, land subsidence and mass movements; groundwater hydrology, geochemistry and contamination; and rivers. Labs will include introduction to geologic materials and use of GIS software to store, analyze and display geologic and engineering data. Prerequisites: PHYS 1443 and CHEM 1465 or CHEM 1442.

GEOL 3358. Astrobiology II. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include basic properties of life, habitability of Earth, studies of possible life regarding Mars, Europa & Titan, space missions, exoplanets and exomoons, stellar habitable zones, multistellar systems, exoEarths, biomarkers, SETI, Fermi paradox, Drake equation, cosmology. Offered as BIOL 3358, GEOL 3358, and PHYS 3358; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent. Note that Astrobiology I is strongly recommended to students to be taken prior to Astrobiology II, but is not a prerequisite.

GEOL 3387. Field Geology I. 3 Hours.
Stratigraphic and structural mapping and analysis of data collected in the field. Taught for three weeks only in the summer session. Special fee covers cost of transportation, room, and board while in the field. Prerequisite: GEOL 2445, GEOL 3442, GEOL 3443, and GEOL 3446.

GEOL 3388. Field Geology II. 3 Hours.
Mapping and analysis of igneous and metamorphic rock data as well as hydrologic, geochemical and mass wasting data collected in the field. Taught for three weeks after GEOL 3387 only in the summer session. Special fee covers cost of transportation, room, and board while in the field. Prerequisite: GEOL 2445, GEOL 3442, GEOL 3443, and GEOL 3387.

GEOL 3441. Biostratigraphy And Life Through Time. 4 Hours.
Basic principles of bio- and chronostratigraphy including the classification of fossil groups, how index fossils are used to construct the geologic timescale and correlate strata. Prerequisite: GEOL 1302.
GEOL 3442. SEDIMENTOLOGY AND STRATIGRAPHY. 4 Hours.
An introduction to the description, origin, and historical interpretation of stratified rocks. Prerequisite: GEOL 2445.

GEOL 3443. STRUCTURAL GEOLOGY. 4 Hours.
The genesis, classification, and description of structural features resulting from deformation of the earth's crust. Prerequisite: GEOL 2445 and PHYS 1441 or PHYS 1443, or permission of instructor.

GEOL 3446. PETROLOGY AND GEOCHEMISTRY. 4 Hours.
Distribution, description, classification, plate-tectonic setting and origins of igneous and metamorphic rocks in the light of theoretical-experimental multicomponent phase equilibria studies; use of trace elements and radiogenic and stable isotopes as tracers in rock genesis; hand specimen and microscopic examinations of the major igneous-metamorphic rock types in the laboratory. Prerequisite: GEOL 2445.

GEOL 3454. STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of statistics and helps students apply statistics to analyze data and interpret results from the perspective of Earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in Earth and environmental sciences. Offered as ENVR 3454 and GEOL 3454, credit will not be given for both. Prerequisite: GEOL 3454: MATH 1426.

GEOL 4081. RESEARCH IN EARTH & ENVIRONMENTAL SCIENCES. 0 Hours.
Research problems on an individual or group basis, conducted on a selected topic under the direction of a member of the Earth & Environmental Sciences faculty. May be repeated. This is a non-credit course so cannot be used to meet degree requirements. Prerequisite: Permission of the instructor.

GEOL 4181. TOPICS IN ENERGY AND EARTH RESOURCES. 1 Hour.
Lectures will discuss the historical evolution and current status of major research thrusts in the environment, energy, and resources studies, including Superfund and groundwater remediation, carbon sequestration, tight sands and coalbed methane, petroleum production in shale gas and oil reservoirs, geological repository of high-level nuclear waste, geothermal energy exploitation, mining of critical minerals, and gas (methane) hydrate. Prerequisite: GEOL 1301 or GEOL 3340 or equivalent.

GEOL 4189. RESEARCH IN GEOLOGY. 1 Hour.
Supervised undergraduate research in any one of the various fields of geology. May be repeated but will not meet Geology degree requirements. Prerequisite: permission from instructor.

GEOL 4190. GEOSCIENCE INTERNSHIP. 1 Hour.
Work in geoscience for a commercial concern at least 20 hours per week for three months. Requirements include: writing a resume, learning how to interview and function on the job, and a report describing the work. Prerequisite: 16 hours of Geology coursework.

GEOL 4199. TECHNICAL SESSIONS. 1 Hour.
Forum for presentation of results of undergraduate and graduate students and faculty research. Offered as ENVR 4199 and GEOL 4199. Credit will not be given for both. Prerequisite: For ENVR: ENVR 1301 or equivalent. For GEOL: GEOL 1301 or equivalent.

GEOL 4289. RESEARCH IN GEOLOGY. 2 Hours.
Supervised undergraduate research in any one of the various fields of geology. May be repeated but will not meet Geology degree requirements. Prerequisite: permission from instructor.

GEOL 4302. GEODYNAMICS. 3 Hours.
A comprehensive and quantitative study of fundamental aspects of plate tectonics. Introduction to heat flow, elasticity and flexure, fluid mechanics, faulting, gravity, and flow in porous media, with a wide range of geological applications. Includes collaborative problem solving. Prerequisite: GEOL 3443 and MATH 2425.

GEOL 4304. SOLID EARTH GEOMECHANICS. 3 Hours.
Application of continuum mechanics to understanding deformation in the earth, including mechanical analysis of natural geologic structures such as faults, folds, lava flows, and dikes, as well as practical problems related to reservoir geomechanics and mining applications. Prerequisites: GEOL 3443, MATH 2425, and PHYS 1444.

GEOL 4305. SELECTED TOPICS IN GEOLOGY. 3 Hours.
Geological topics not treated in the regular curriculum. Topic, format, and prerequisites to be determined by the instructor. May be repeated for Geology elective credit as different topics are offered.

GEOL 4307. SEQUENCE STRATIGRAPHY. 3 Hours.
This course introduces sequence stratigraphy within context of all stratigraphy and history of sequence stratigraphy. Includes overview of sequence stratigraphy principles. Review of basic fundamental concepts of surface- and facies-based physical stratigraphy. Review of architectural element analysis, sequence stratigraphic in seismic, borehole expression of sequences and overview of subsurface stratigraphic techniques. Prerequisite: GEOL 3442.

GEOL 4308. ENVIRONMENTAL GEOCHEMISTRY. 3 Hours.
The geochemistry of natural waters with emphasis on processes that control solute concentrations including complexation reactions, oxidation and reduction reactions, biogeochemistry, and chemical weathering reactions. Offered as ENVR 4308 and GEOL 4308. Credit will not be given for both. Prerequisite: CHEM 1442 or GEOL 2445.
GEOL 4323. ISSUES IN ENVIRONMENTAL HEALTH. 3 Hours.
An introduction to health issues of current concern resulting from environmental exposures. Topics include: environmental asthma, endocrine disruptors, climate change and health, emerging contaminants, nanotechnology and health, airborne particles and pediatric health. Offered as ENVR 4323 and GEOL 4323. Credit will not be given for both.

GEOL 4330. UNDERSTANDING GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
A practical introduction to GIS and methods of creating, maintaining and displaying spatial data using the ArcGIS software. This course replaces GEOL 4352; credit will not be granted for both. This course is offered as GEOL 4330 and GEOG 4330. Prerequisite: Junior standing.

GEOL 4331. ANALYSIS OF SPATIAL DATA. 3 Hours.
Analyzing spatial data using ArcGIS, Spatial Analyst, and 3-D Analyst, topological surface analysis and modeling; 3-D visualization and viewscapes; spatial statistics and data quality management. Course taught as GEOL 4331 and GEOG 4331. Credit will be granted in only one department. Prerequisite: GEOL 4330 or GEOG 4330.

GEOL 4332. GLOBAL POSITIONING SYSTEM. 3 Hours.
Review of the NAVSTAR Global Positioning System and its segments: space, operational control, and GPS receivers. Mechanics of the satellite constellation; GPS signal structure; datums and coordinate systems; precision and accuracy; error factors; absolute (point) versus relative (differential) positioning. Various positioning techniques using several types of GPS receivers; field data collection and input into GIS programs for data analysis and presentation. Course taught as GEOL 4332 and GEOG 4332. Credit will be granted in only one department. Prerequisite: GEOL 4330 or GEOG 4330.

GEOL 4333. REMOTE SENSING FUNDAMENTALS. 3 Hours.
The electromagnetic spectrum and the interaction of EM waves with matter; various types of sensing devices; spectral and spatial resolution parameters; airborne and satellite sensor platforms; aerial photographs and false-color images. The sequence of data acquisition, computer processing, and interpretation; sources of data; the integration of remote sensing data with other data types in GIS. Course taught as GEOL 4333 and GEOG 4333. Credit will be granted in only one department. Prerequisite: GEOL 4330 or GEOG 4330.

GEOL 4334. GEOGRAPHIC DATA ANALYSIS. 3 Hours.
Acquisition, processing and analysis of a set of spatial data selected by the student with approval of the instructor. A written report of the results is required. Course taught as GEOL 4334 and GEOG 4334. Credit will be granted in only one department. Prerequisite: GEOL 4330 or GEOG 4330; and GEOL 4332, or GEOG 4333; or cons. inst.

GEOL 4335. TECTONICS AND ISOTOPES. 3 Hours.
Fundamentals of global tectonics, and the application of isotope geochemistry in sedimentary rocks to understanding tectonic questions. Emphasis will be given to the mechanisms of mountain formation, isotope paleoaltimetry, detrital geochronology, and thermochronology. Prerequisite: GEOL 3442, GEOL 3446.

GEOL 4342. MICROFOSSILS AND CARBONATE ROCKS. 3 Hours.
Half of this course consists of an introduction to microfossil groups occurring in sedimentary rocks: foraminifers, conodonts, coccolithophorids and others, and their usefulness in regional and global correlation of Phanerozoic strata. The biostratigraphy of these groups will be discussed along with the principles used in the correlation of sedimentary rocks. The other half of the course consists of the analysis of the lithofacies and biofacies of carbonate rocks, their genesis, depositional environments, and diagenesis. Prerequisite: GEOL 1302, or cons. inst.

GEOL 4343. RESEARCH METHODS - UTEACH. 3 Hours.
The purpose of this course is to present UTeach students with the tools scientists use to solve scientific problems. These tools enable scientists to develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in more conventional science classes. These tools include: design of experiments to answer scientific questions; use of statistics to interpret experimental results and deal with sampling errors; mathematical modeling of scientific phenomena; finding and reading articles in the current scientific literature; applying scientific arguments in matters of social importance; writing scientific papers; reviewing scientific papers; oral presentation of scientific work; use of probes and computers to gather and analyze data; ethical treatment of human subjects; laboratory safety. Research Methods is primarily a laboratory course, and most of these topics are developed in connection with four independent inquiries UTeach students design and carry out. Written inquiries will be evaluated as examples of scientific writing. Prerequisite: C or better in SCIE 1201 or SCIE 1334, or concurrent enrollment; and junior or senior standing.

GEOL 4346. BASIN ANALYSIS. 3 Hours.
The classification and characteristics of sedimentary basins and the mechanisms forming them; and the tectonic, climatic, and eustatic controls on basin subsidence and the basin fill. Applications include the influence of basin evolution on petroleum generation, migration, and accumulation. Prerequisite: GEOL 3442 and MATH 1426.

GEOL 4350. STABLE ISOTOPE GEOCHEMISTRY. 3 Hours.
Principles governing the fractionation and distribution of stable isotopes (C, H, N, O, S) in nature, and application of stable isotope geochemistry to environmental problems and global climate change. Prerequisite: GEOL 2445 and CHEM 1442, or permission from instructor.

GEOL 4351. ENERGY RESOURCES FOR GEOSCIENTISTS. 3 Hours.
The course will review critical knowledges of minerals, rocks, stratigraphy, surface processes, geophysics, geochemistry, structures and tectonics, and connect these aspects of Earth system with Earth’s six energy components: hydrocarbon, critical minerals, geothermal energy, CO2 sequestration, waste management, and green energies. Prerequisite: GEOL 301, or GEOL 3340, or cons. inst.

GEOL 4352. ANALYTICAL METHODS IN GEOCHEMISTRY. 3 Hours.
Principles of geochemical analysis of waters, rocks and soils, and gases. Methods to be covered include x-ray fluorescence and diffraction, mass spectrometry, coulometry, inductively-coupled plasma, and gas/ion chromatography with various detection methods. Prerequisite: CHEM 1442.
GEOL 4356. ENVIRONMENTAL RISK ASSESSMENT. 3 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment-hazard identification, dose-response assessment, exposure assessment, and risk characterization.

GEOL 4357. MEDICAL GEOLOGY. 3 Hours.
Introduction to geoscience and health. Students will learn how the geologic and geochemical environment can impact health. The historic background to geoscience and health will be presented followed by discussions on the natural abundance of elements in the earth, and the nature of essential and toxic elements (dose-response). Students will then learn about health responses following exposures in specific geologic/geochemical situations. Prerequisite: GEOL 1301 or ENVR 1301, or equivalent.

GEOL 4360. GEOLOGICAL PROCESSES OF OCEANS. 3 Hours.
Sedimentation in the oceans, chemistry of seawater, geochemical cycles in the oceans, and physical and biological processes that relate to sediment production, origin of seafloor topography, and seafloor spreading. Prerequisite: GEOL 3442.

GEOL 4367. PALEO EARTH SYSTEMS. 3 Hours.
This course discusses the evolution of Earth's complex dynamic system that is controlled by feedback processes that are both non-linear and stochastic in nature. Prerequisite: GEOL 1301.

GEOL 4368. GEOLOGY OF THE PERMIAN BASIN. 3 Hours.
Overview of the geologic evolution of the Permian Basin of W Texas and SE New Mexico and its petroleum resources. Emphasis on student presentations and term paper. Prerequisite: GEOL 1301 or equivalent.

GEOL 4389. RESEARCH IN GEOLOGY. 3 Hours.
Supervised undergraduate research in any one of the various fields of geology. May be repeated but will not meet Geology degree requirements. Prerequisite: permission from instructor.

GEOL 4393. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year, the student must complete a thesis or project under the direction of a faculty member in the Earth and Environmental Sciences Department.

GEOL 4402. COMPUTER MODELING IN EARTH SCIENCE. 4 Hours.
An introduction to basic programming and computation in the earth sciences using Matlab®, with emphasis on development of univariate and bivariate statistical models, spatial and image analysis, time series analysis, and the development of basic deterministic physics-based models of geological processes. Prerequisite: MATH 2425.

GEOL 4405. METEOROLOGY AND CLIMATOLOGY. 4 Hours.
A quantitative approach to the study of the structure, energy, and motions of the atmosphere. Prerequisite: MATH 1426 and PHYS 1441, or permission of instructor.

GEOL 4420. HYDROGEOLOGY. 4 Hours.
Hydrologic cycle, Darcy's law, hydraulic properties, aquifer types and materials, groundwater flow to wells, fracture flow, vadose zone flow, groundwater chemistry, and groundwater modeling. Prerequisite: PHYS 1441 or PHYS 1443.

GEOL 4421. GEOCHRONOLOGY. 4 Hours.
Introduction to dating techniques, applied to understand past climate and tectonics. Prerequisite: GEOL 1301 or equivalent.

GEOL 4422. CONTAMINANT HYDROGEOLOGY. 4 Hours.
Sources and types of organic and inorganic contaminants; the physical, chemical, and biological factors and processes that affect the transport and fate of contaminants in the subsurface; non-aqueous phase liquids and multiphase flow; and various remedial techniques of contaminated sites. Prerequisite: GEOL 1301, ENVR 1301, or equivalent.

GEOL 4425. PALEOClimATE & CLIMAToLOGY. 4 Hours.
Climate change throughout geologic time, especially the last 100 million years: models of the climate system, reconstruction and modeling of past climates, abrupt climate change, warm climates, paleoclimatology, climate change and mass extinctions. Prerequisite: GEOL 1301 or ENVR 1301 or GEOL 1330, or permission from instructor.

GEOL 4443. SEDIMENTARY SYSTEMS. 4 Hours.
Focuses on the processes transporting and archiving siliciclastic sediment, and the approaches using siliciclastic sedimentary rocks to reconstruct earth surface processes. This course includes a heavy component of student-led presentation and discussion. Prerequisite: GEOL 3442.

GEOL 4455. MATHEMATICAL MODELING OF ENVIRONMENTAL QUALITY SYSTEMS. 4 Hours.
This course is designed to introduce the process principles that govern contaminant transport and transformations in multimedia environments. This course will cover application of fate and transport models to evaluate pollutant interactions with the biosphere, particularly in the context of human exposure modeling and health risk assessment. Offered as ENVR 4455 and GEOL 4455. Credit will not be given for both.
GEOL 4456. ENVIRONMENTAL RISK ASSESSMENT. 4 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment—hazard identification, dose-response assessment, exposure assessment, and risk characterization. Offered as ENVR 4456 and GEOL 4456. Credit will not be given for both.

GEOL 4458. MACHINE LEARNING FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of machine learning and helps students apply machine learning to analyze data, predict outcomes and interpret results from the perspective of earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in earth and environmental sciences. Offered as GEOL 4458 and ENVR 4458. Credit will be not given for both. Prerequisite: GEOL 3454 or ENVR 3454 or equivalent.

GEOL 4463. PHYSICAL OCEANOGRAPHY AND LIMNOLOGY. 4 Hours.
An introduction to physical processes in lakes and oceans. Changes in lakes and oceans influence heat, and momentum fluxes at the aquatic/oceanic and atmospheric interface. Topics include ocean/lake structure and circulation, and the impact of global climate change on lakes and oceans. Field excursions to nearby lakes combine theoretical knowledge and field measurements. Prerequisite: MATH 1426 and PHYS 1441 or PHYS 1443.

GEOL 5151. TOPICS IN ENERGY AND EARTH RESOURCES. 1 Hour.
This course will discuss the historical evolution and current status of major research thrusts in the environment, energy, and resources studies, including Superfund and groundwater remediation, carbon sequestration, tight sands and coalbed methane, petroleum production in shale gas and oil reservoirs, geological repository of high-level nuclear waste, geothermal energy exploitation, mining of critical minerals, and gas (methane) hydrate. Prerequisite: GEOL 1301 or GEOL 3340 or EVSE 5311 or equivalent.

GEOL 5180. PROFESSIONAL ORIENTATION AND BUSINESS ETHICS. 1 Hour.
A mentoring program using working professionals selected by the Earth and Environmental Sciences Department. Each participant meets at least once a month with a mentor who provides information on practices and skills necessary to succeed in the workplace. Course participants review business ethics statements provided by the mentor's company or other companies and write a critique based on materials from professional business ethics organizations such as the International Business Ethics Institute. Prerequisite: Prerequisite or concurrent enrollment GEOL 5345.

GEOL 5181. RESEARCH IN GEOLOGY. 1 Hour.
Independent study in various areas of research including paleontology, stratigraphy, tectonics, structural geology, sedimentology, geochemistry, petrology, geophysics, and volcanology. May be repeated for credit. Graded P/F/R/W.

GEOL 5190. GEOSCIENCE INTERNSHIP. 1 Hour.
Work in geoscience for a commercial concern at least 20 hrs/wk for 3 months. Requirements include writing a resume, learning how to interview and function on the job, and a report describing the work. Prerequisite: Cons. inst.

GEOL 5199. TECHNICAL SESSIONS. 1 Hour.
Forum for presentation of results of graduate students and faculty research. Required each semester of all graduate students.

GEOL 5265. TOPICS IN ENERGY AND EARTH RESOURCES. 1 Hour.
A comprehensive and quantitative study of fundamental aspects of plate tectonics. Introduction to heat flow, elasticity and flexure, fluid mechanics, faulting, gravity, and flow in porous media, with a wide range of geological applications. Includes collaborative problem solving. Prerequisite: GEOL 3443 and MATH 2425.

GEOL 5301. ENVIRONMENTAL GEOCHEMISTRY. 3 Hours.
Fundamentals of low-temperature aqueous geochemistry, and anthropogenic impacts on natural water systems. Topics include equilibrium thermodynamics, kinetics, aqueous complexation, and oxidation/reduction processes that affect metals and organic matter in natural waters.

GEOL 5302. GEODYNAMICS. 3 Hours.
A comprehensive and quantitative study of fundamental aspects of plate tectonics. Introduction to heat flow, elasticity and flexure, fluid mechanics, faulting, gravity, and flow in porous media, with a wide range of geological applications. Includes collaborative problem solving. Prerequisite: GEOL 3443 and MATH 2425.

GEOL 5303. ROCK FRACTURE MECHANICS. 3 Hours.
Principles and tools of fracture mechanics are applied to the origins and physical behaviors of faults, dikes, joints, veins, and other natural structures in rock. Special emphasis will be given to combining field observations of fractures in rock with the elastic theory of cracks in order to explore the role of natural fractures in brittle rock deformation in the earth's crust with applications to crustal deformation, structural geology, engineering geology, and induced hydraulic fracture, i.e. Fracking. Prerequisite: GEOL 3443 and MATH 2425; or GEOL 3940 and CE 2313.

GEOL 5304. SOLID EARTH GEOMECHANICS. 3 Hours.
Application of continuum mechanics to understanding deformation in the earth, including mechanical analysis of natural geologic structures such as faults, folds, lava flows, and dikes, as well as practical problems related to reservoir geomechanics and mining applications. Prerequisite: GEOL 3443, MATH 2325, PHYS 1441 or PHYS 1443.
GEOL 5309. GEOMORPHOLOGY & QUATERNARY STRATIGRAPHY OF SEDIMENTARY SYSTEMS. 3 Hours.
This course examines those physical processes that sculpt the surface of the Earth and result in deposition of sediments. Surface systems covered include weathering, mass wasting, rivers, shorelines, eolian processes, and glaciers. The course also examines the stratigraphic techniques used to decode the recent (2 million to present) stratigraphic record of these systems. Course is designed for geologists, biologists, and other fields concerned with interpreting and/or managing modern environments.

GEOL 5320. UNDERSTANDING GEOGRAPHIC INFORMATION SYSTEMS. 3 Hours.
A practical introduction to GIS and methods of creating, maintaining and displaying spatial data using the ArcGIS software.

GEOL 5321. ANALYSIS OF SPATIAL DATA. 3 Hours.
Analyzing spatial data using ArcGIS, Spatial Analyst, and 3D Analyst, topological surface analysis and modeling; 3D visualization and viewscapes; spatial statistics and data quality management. Prerequisite: GEOL 4330 or GEOL 5320.

GEOL 5322. GLOBAL POSITIONING SYSTEM. 3 Hours.
Review of the NAVSTAR Global Positioning System and its segments: space, operational control, and GPS receivers. Mechanics of the satellite constellation; GPS signal structure; data and coordinate systems; precision and accuracy; error factors; absolute (point) versus relative (differential) positioning. Various positioning techniques using several types of GPS receivers; field data collection and input into GIS programs for data analysis and presentation. Prerequisite: GEOL 4330 or GEOL 5320.

GEOL 5323. REMOTE SENSING FUNDAMENTALS. 3 Hours.
The electromagnetic spectrum and the interaction of EM waves with matter; various types of sensing devices; spectral and spatial resolution parameters; airborne and satellite sensor platforms; aerial photographs and false-color images. The sequence of data acquisition, computer processing and interpretation; sources of data; the integration of remote sensing data with other data types in GIS. Prerequisite: GEOL 4330 or GEOL 5320.

GEOL 5324. GEOGRAPHIC DATA ANALYSIS PROJECT. 3 Hours.
Acquisition, processing and analysis of a set of spatial data selected by the student with the approval of the instructor. A written report of the results is required. Offered as GEOL 5324 and GEOG 5334. Credit will not be given for both. Prerequisite: GEOL 5320, and GEOL 5321 or GEOL 5323, or cons. inst.

GEOL 5325. STABLE ISOTOPE GEOCHEMISTRY. 3 Hours.
Principals governing the fractionation and distribution of stable isotopes (C, H, N, O, S) in nature, and application of stable isotope geochemistry to environmental problems and global climate change.

GEOL 5333. FIELD METHODS. 3 Hours.

GEOL 5334. ANALYTICAL METHODS IN ENVIRONMENTAL SCIENCE. 3 Hours.
Principals of geochemical analysis of waters, rocks and soils, and gases. Methods to be covered include x-ray fluorescence and diffraction, mass spectrometry, coulometry, inductively-coupled plasma, and gas/ion chromatography with various detection methods.

GEOL 5335. ISOTOPES AND TECTONICS. 3 Hours.
An Introduction to the fundamentals of clumped isotopes, and major radiogenic and cosmogenic isotope systems and their applications to the study of earth system processes and Earth history; emphasis will be placed on applications to tectonics, geochronology, and thermochronology. Prerequisite: CHEM 1442 or GEOL 4302.

GEOL 5342. MICROFOSSILS AND CARBONATE ROCKS. 3 Hours.
Half of this course consists of an introduction to microfossil groups occurring in sedimentary rocks: foraminifers, conodonts, coccolithophorids and others, and their usefulness in regional and global correlation of Phanerozoic strata. The biostratigraphy of these groups will be discussed along with the principles used in the correlation of sedimentary rocks. The other half of the course consists of the analysis of the lithofacies and biofacies of carbonate rocks, their genesis, depositional environments, and diagenesis. Prerequisite: GEOL 1302 or permission of the instructor.

GEOL 5345. PETROLEUM GEOLOGY. 3 Hours.
Origin, generation and migration of petroleum; reservoirs, seals and traps; the subsurface environment; properties of petroleum; exploration and production methods; use of seismic lines and well logs; types of petroleum basins; reserves and resources. Prerequisite: GEOL 3442 and GEOL 3443.

GEOL 5351. ENERGY RESOURCES FOR GEOSCIENTISTS. 3 Hours.
The course will review critical knowledges of minerals, rocks, stratigraphy, surface processes, geophysics, geochemistry, structures and tectonics, and connect these aspects of Earth system with Earth's six energy components: hydrocarbon, critical minerals, geothermal energy, CO2 sequestration, waste management, and green energies. Prerequisite: GEOL 1301, or GEOL 3340, or cons. inst.

GEOL 5365. TOPICS IN GEOLOGY. 3 Hours.
Topics offered depend on student and faculty interest. Such topics might include identification of fossil fragments in thin section; magmatic processes; plate tectonics and sedimentary basin evolution; stratigraphic paleontology; sedimentary or volcanogenic ore deposition; geostatistics; geophysical archeology; and various advanced subjects in sedimentology, stratigraphy, paleontology, geophysics, geochemistry, volcanology and petrology. May be repeated for credit when topic changes.

GEOL 5367. PALEO EARTH SYSTEMS. 3 Hours.
This course discusses the evolution of Earth's complex dynamic system that is controlled by feedback processes that are both non-linear and stochastic in nature. Prerequisite: GEOL 1301.
GEOL 5368. GEOLOGY OF THE PERMIAN BASIN. 3 Hours.
Overview of the geologic evolution of the Permian Basin of W Texas and SE New Mexico and its petroleum resources. Emphasis on student presentations and term paper.

GEOL 5369. SEQUENCE STRATIGRAPHY. 3 Hours.
This course introduces sequence stratigraphy within context of all stratigraphy and history of sequence stratigraphy. Includes overview of sequence stratigraphy principles. Review of basic fundamental concepts of surface- and facies-based physical stratigraphy. Review of architectural element analysis, sequence stratigraphic in seismic, borehole expression of sequences and overview of subsurface stratigraphic techniques. Prerequisite: GEOL 3442.

GEOL 5370. SEDIMENTARY SYSTEMS. 3 Hours.
Carbonate and clastic depositional systems, recognition of facies, systems tracts, diagenetic overprint, shelf to basin profiling, and sequence stratigraphic analysis.

GEOL 5371. BASIN ANALYSIS. 3 Hours.
Topics include: the classification and characteristics of of sedimentary basins and the mechanisms forming them; and the tectonic, climatic, and eustatic controls on basin subsidence and the basin fill. Applications include the influence of basin evolution on petroleum generation, migration, and accumulation. Prerequisite: GEOL 3442 (Sedimentology and Stratigraphy).

GEOL 5372. STRUCTURAL GEOMETRY AND TECTONICS OF PETROLEUM FIELDS. 3 Hours.
Structural styles of thin-skinned, basement involved and reactivated systems in shortening, extensional and strike-slip deformation. Use of structural modeling and restoration methods to test the reliability of structural interpretations. Prerequisite: GEOL 3443.

GEOL 5373. RESERVOIR CHARACTERIZATION. 3 Hours.
Principles, protocols, analysis and measurement of petrophysical properties (e.g., fluid content, porosity, permeability, pore size distribution, water retention curve, imbibition) of petroleum reservoir rocks.

GEOL 5374. SEISMIC INTERPRETATION. 3 Hours.
Introduction to the methods of acquisition and processing as they relate to the interpretation of seismic records. Structural and stratigraphic interpretation methods and pitfalls using two and three dimensional seismic data. Introduction to Seismic Interpretation Software such as the Kingdom Suite from Seismic Micro Technology, Inc. Prerequisite: GEOL 3442 and GEOL 3443.

GEOL 5375. INTRODUCTION TO WELL LOG INTERPRETATION AND MAPPING. 3 Hours.
Introduction to the various types of well logs used in the petroleum industry and their petrophysical interpretations, including evaluations of porosity, water saturation, shale volume, permeability, and lithology. Introduction to techniques of contouring data and use of mapping software such as PETRA. Prerequisite: GEOL 3442.

GEOL 5376. RESEARCH IN GEOLOGY. 3 Hours.
Independent study in various areas of research including paleontology, stratigraphy, tectonics, structural geology, sedimentology, geochemistry, petrology, geophysics, and volcanology. May be repeated for credit. Graded R.

GEOL 5395. MASTER'S PROJECT. 3 Hours.
May be used as elective for students in non-thesis program. Graded F,P,R,W. Prerequisite: GEOL 1301 or equivalent course.

GEOL 5398. THESIS. 3 Hours.
Graded F, R.

GEOL 5405. METEOROLOGY AND CLIMATOLOGY. 4 Hours.
A quantitative approach to the study of the structure, energy, and motions of the atmosphere. Prerequisite: MATH 1426 and PHYS 1441, or cons. inst.

GEOL 5421. GEOCHRONOLOGY. 4 Hours.
Introduction to dating techniques, applied to understand past climate and tectonics. Prerequisite: GEOL 1301 or equivalent.

GEOL 5425. PALEOClimate and CLIMATE CHANGE. 4 Hours.
Climate change throughout geologic time, especially the last 100 million years: models of the climate system, reconstruction and modeling of past climates, abrupt climate change, warm climates, paleoclimatology, climate change and mass extinctions. Prerequisite: GEOL 1301 or ENVR 1330 or GEOL 1330, or cons. inst.

GEOL 5428. HYDROGEOLOGY. 4 Hours.
Hydrologic cycle, Darcy's law, hydraulic properties, aquifer types and materials, groundwater flow to wells, fracture flow, vadose zone flow, groundwater chemistry, and groundwater modeling; a term paper about the relevant topics covered in the class is required. Prerequisite: GEOL 2446, MATH 2425.

GEOL 5450. CONTAMINANT HYDROGEOLOGY. 4 Hours.
Sources and types of organic and inorganic contaminants; the physical, chemical, and biological factors and processes that affect the transport and fate of contaminants in the subsurface; non-aqueous phase liquids and multiphase flow; and various remedial techniques of contaminated sites.

GEOL 5454. STATISTICS FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of statistics and helps students apply statistics to analyze data and interpret results from the perspective of Earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in Earth and environmental sciences. Offered as EVSE 5454 and GEOL 5454. Credit will not be given for both.
GEOL 5455. MATHEMATICAL MODELING OF ENVIRONMENTAL QUALITY SYSTEMS. 4 Hours.
This course is designed to introduce the process principles that govern contaminant transport and transformations in multimedia environments. This course will cover application of fate and transport models to evaluate pollutant interactions with the biosphere, particularly in the context of human exposure modeling and health risk assessment. Offered as EVSE 5455 and GEOL 5455. Credit will not be given for both.

GEOL 5456. ENVIRONMENTAL RISK ASSESSMENT. 4 Hours.
This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment—hazard identification, dose-response assessment, exposure assessment, and risk characterization. Offered as EVSE 5456 and GEOL 5456, credit will not be given for both.

GEOL 5458. MACHINE LEARNING FOR EARTH AND ENVIRONMENTAL SCIENTISTS. 4 Hours.
This course provides students with basic principles of machine learning and helps students apply machine learning to analyze data, predict outcomes and interpret results from the perspective of earth and environmental scientists. The course will first introduce basic concepts and then focus on applications to various examples in earth and environmental sciences. Offered as GEOL 5458 and EVSE 5458. Credit will not be given for both. Prerequisite: ENVR 3454 or GEOL 3454 or EVSE 5454 or GEOL 5454 or equivalent.

GEOL 5465. PHYSICAL OCEANOGRAPHY AND LIMNOLOGY. 4 Hours.
An introduction to physical processes in lakes and oceans. Changes in lakes and oceans influence heat, and momentum fluxes at the aquatic/oceanic and atmospheric interface. Topics include ocean/lake structure and circulation, and the impact of global climate change on lakes and oceans. Field excursions to nearby lakes combine theoretical knowledge and field measurements. Prerequisite: PHYS 1441 or PHYS 1443; and MATH 1426.

GEOL 5698. THESIS. 6 Hours.
Graded F, P, R.
Earth and Environmental Sciences - Graduate Programs

Program Objectives

The MS in Earth and Environmental Sciences has four options: an Environmental Science Option; a Geoscience Option; a Professional Environmental Science Option; and a Petroleum Geoscience Option.

The Environmental Science Option provides graduate students with an integrated, multidisciplinary education, requiring a breadth of understanding and mastery of a spectrum of scientific and engineering principles. The thesis option, designed for those interested in an in-depth experience in some particular topic, and a non-thesis option are available. All new students are admitted into the non-thesis option. During the first year, students may transfer to the thesis option after obtaining a faculty thesis supervisor. A thesis supervisor is not guaranteed.

The Geoscience Option is a two year program with specializations in stratigraphy, petrology, paleontology, sedimentology, structural geology, Geomechanics, plate tectonics, computer modeling, hydrology, geochemistry and paleoclimatology. Students in this program are prepared for additional graduate work at the PhD level, or for positions in industry and government. Thesis or non thesis options are available However, all new students are admitted into the non-thesis option. During the first year, students may transfer to the thesis option after obtaining a faculty thesis supervisor. A thesis supervisor is not guaranteed.

The Environmental Science Professional Option is a Professional Master's Degree for those interested in a career in Environmental Science. Instead of a thesis, students participate in a mentoring program, take a course in project economics, work as an intern or in a part time job in the Environmental Science Profession, and course experiences involving business ethics, teamwork, a small research project, and communication. This is a non thesis program.

The Petroleum Geoscience Professional Option is a Professional Masters Degree for those interested in a career in the Petroleum Industry. In addition to core geology courses, students are required to participate in a networking program with industry professionals, work as an intern or in a part time job in petroleum geoscience, take a course in project economics, and participate in course activities that emphasize business ethics, teamwork and communications. A thesis research project is required. All students are initially admitted to the Geoscience non-thesis option. During the first year, students may transfer to the Petroleum Geoscience option after obtaining a faculty thesis supervisor. A thesis supervisor is not guaranteed.

The PhD in Earth and Environmental Sciences. The program leading to the Doctor of Philosophy degree in Earth and Environmental Sciences is designed primarily to prepare doctoral-level students for research careers in industry, government or academic institutions. Students carry out independent research and acquire practical knowledge of the type of research conducted and the constraints (both practical and philosophical) under which such research is conducted. The areas of research are interdisciplinary using the Earth's environment, interpreted broadly, as the theme. Research normally comes from the disciplines of Geoscience, Biology, Chemistry and Engineering, but contributions from other disciplines are welcome. The program is designed to provide graduate students an integrated, multidisciplinary education, requiring a breadth of understanding and mastery of a spectrum of scientific and engineering principles. Among the goals is to provide students who have earned engineering or science undergraduate degrees a common ground for interdisciplinary communication, an understanding of the environment, and competence in a research area that will enable them to evaluate complex environmental problems.

Admission

Students applying for MS or PhD degrees should apply to the Graduate School for regular admission to a particular degree program at [http://www.uta.edu/admissions/graduate/index.php](http://www.uta.edu/admissions/graduate/index.php)

CATEGORIES OF ADMISSION

Unconditional - all the admission criteria are met and there are no conditions placed on continued enrollment in the program.

Probationary - Applicants who do not meet the standards for unconditional admission may be considered for probationary admission after careful examination of their application materials. Probationary admission normally requires that the applicant receive a B or better in their first 12 hours of graduate coursework at UT Arlington, and/or make up undergraduate deficiencies.

Deferred and Provisional Admission - A deferred admission may be granted when an application is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but whom otherwise appears to meet admission requirements may be granted provisional admission.

INTERNATIONAL STUDENTS

An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies. Applicants must submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section to.
An applicant holding either a bachelor’s or a master’s degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT, TSE or IELTS score for admission purposes. Any other waivers of the score requirements must be recommended by the applicant’s Graduate Advisor and approved by the Dean of Graduate Studies.

FINANCIAL AID

Students that are unconditionally admitted into the MS or PhD programs can also apply for available scholarships and/or Graduate Teaching Assistantships. Award of scholarships or Assistantships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 9 hours of coursework in both long semesters to retain their Financial Aid. To be eligible for a Graduate Teaching Assistantship, a non-native English speaker must receive a TOEFL iBT score of at least 23, or an IELTS score of at least 7 on the speaking section of those exams. Applications Scholarships or Teachings Assistantships must be submitted over the internet at https://uta.academicworks.com/. Deadline is March 1st for the following academic year starting in August.

DENIAL OF ADMISSION

A candidate may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

Earth and Environmental Sciences Master’s Program Admissions

For unconditional admission a student must meet the following requirements:

For the Environmental Science Options: A B.S. degree in biology, chemistry, geoscience, mathematics, or engineering with the following courses or their equivalent: 1 semester of introductory physics for science majors; 2 semesters of introductory chemistry for science majors; and Calculus I and II. Students with a Bachelor’s Degree in other sciences will also be considered, subject to satisfactory completion of deficiency courses.

For the Geoscience Options: A B.S. degree in an Earth Science discipline with the following courses or their equivalent: Mineralogy, Petrology, Structure, Stratigraphy/sedimentology, Field Geology and Geophysics or Paleontology. In addition, one semester of Biology, Calculus I and II, and a year of Chemistry and Physics is required.

For all Options:

a. A minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School.

b. Graduate Record Examination (GRE) scores are used in conjunction with GPA’s. For example a person with a GPA below 3.0 will need a GRE score better than average. Masters students who have succeeded in the Earth and Environmental Science s Program typically score higher than the 60th Percentile on the verbal and quantitative portion of the GRE.

c. An applicant whose native language is not English must submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL iBT total score of 79 with sectional scores that meet or exceed 22 for the writing section, 21 for the speaking section, 20 for the reading section, and 16 for the listening section. However, an applicant whose native language is not English with a bachelor’s or a master’s degree from a regionally accredited U.S. college or university is not required to submit a TOEFL, TOEFL iBT,TSE or IELTS score for admission purposes.

d. Favorable letters of recommendation from people familiar with the applicant’s academic work.

Master’s Degree Requirements

EARTH AND ENVIRONMENTAL SCIENCES MASTER’S DEGREE

There are additional requirements for all Master’s programs listed in this CATALOG under University Requirements and Policies.

Dual Degree Program

Dual master’s degrees can be arranged with any suitable program. By participating in a dual degree program, students may apply 6-18 total semester credit hours jointly to meet the requirements of both degrees, thus reducing the total number of hours which would be required to earn both degrees separately. The number of hours which may be jointly applied ranges from six to 18, subject to the approval of Graduate Advisors from both programs. Degree plans, thesis or professional report proposals and programs of work must be approved by Graduate Advisors from both programs. The successful candidate will be awarded both degrees rather than one joint degree.

To participate in the dual degree program, students must make separate application to each program and must submit a separate program of work for each degree. Those interested in the dual degree program should consult the appropriate Graduate Advisors for further information on course requirements. See also the statement on Dual Degree Programs in the general information section of this catalog.

Arrangements to offer a dual degree have already been made between Earth and Environmental Sciences and the Program in City and Regional Planning (M.C.R.P. degree), School of Urban and Public Affairs.

Admission Requirements

For unconditional admission a student must meet the following requirements:

a. A Masters Degree or at least 30 hours of graduate coursework in environmental science, biology, chemistry, geology, mathematics or engineering. Students with a Bachelor’s degree in environmental science, geosciences, biology, chemistry, mathematics, or engineering will be considered for the B.S. to Ph.D. track if they meet the other requirements for admission to doctoral studies. Students with a Bachelor’s Degree in other sciences will also be considered, subject to satisfactory completion of courses to make up deficiencies.

b. A strong quantitative background including courses in differential and integral calculus (i.e., Calculus I and II). Students that have not taken these courses will be expected to complete them during their first year of residence.

c. A minimum graduate coursework GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School.

d. Graduate Record Examination (GRE) scores are considered in admission decisions. Doctoral students who have succeeded in the Earth and Environmental Sciences Program typically score higher than the 60th percentile the verbal and the quantitative portion of the GRE.

e. For applicants whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (or an equivalent score on a computer-based test) or a score of 40 on the Test of Spoken English.

f. Favorable letters of recommendation from people familiar with the applicant’s academic work and/or professional work.

ghi. A statement must be submitted to the program detailing the applicant’s specific research interests and identifying the faculty member who is requested as supervisor of the dissertation research.

h. Students may be considered for unconditional admission if further review of their transcripts, recommendation letters, correspondence or direct interactions with Earth and Environmental Sciences faculty, and statement of research interests indicates that they are qualified to enter the Doctoral Program.

Doctoral Degree Requirements

EARTH AND ENVIRONMENTAL SCIENCES DOCTORAL DEGREE

The Doctoral Program provides students with the interdisciplinary knowledge and skills to conduct independent research in Earth and Environmental Sciences. Students conduct dissertation research under the supervision of a faculty member in one of the participating departments (Biology, Chemistry, Earth and Environmental Sciences, Civil and Environmental Engineering, or Urban and Public Affairs). The supervising professor and a faculty committee assign courses in this primary area of emphasis to support the student’s research and professional goals. To provide interdisciplinary training, additional courses are assigned in a secondary area of emphasis.

If they have not already done so in their previous work, all Doctoral students must take following courses:

<table>

Students who enter the Doctoral Program with a Master’s degree in a science or engineering field, or with 30 semester hours of graduate coursework, take a Diagnostic Examination in the first year of residence to evaluate this previous work. The student’s supervising committee must approve all courses taken to meet degree requirements.

Students who enter the Doctoral Program with a Bachelor’s degree take 30 semester hours of graduate coursework that includes Engineering, Science and Public Policy courses. These students are encouraged to take the diagnostic exam in their first year of enrollment. The student’s supervising committee must approve all courses taken to meet degree requirements.

Students may choose among any of the five participating units for their primary and secondary areas of emphasis. Course selection within these areas of emphasis is guided by the student’s supervising committee and must result in a cohesive program that supports the dissertation research.

Other requirements include:

a. Successful completion of the Diagnostic Examination at the end of the first year of residence.

b. Successful completion of the Comprehensive Examination, an oral defense of a research proposal to be pursued for the dissertation, and a specialization examination over areas of the student’s proposed research.

c. Demonstration of proficiency in one foreign language or a research tool such as advanced computer skills, statistics, or operations research.

d. Successful defense of the dissertation and acceptance of the dissertation by the supervising committee.
Earth and Environmental Sciences - Undergraduate Programs

Degree Programs

BACHELOR OF SCIENCE IN GEOLGY

This degree has three options:

a. The **Professional Option** is for students who plan to enter the profession or go to graduate school but are uncertain where they want to concentrate. The program emphasizes breadth and exposes students to most of the geological disciplines.

b. The **Environmental Science Option** emphasizes the application of earth science to environmental problems associated with the hydrosphere, atmosphere and natural hazards.

c. The **Engineering Geology Option** is for students who are interested in combining Geology with Civil Engineering coursework to work with engineering firms on construction and environmental problems.

BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCE

This degree emphasizes on interdisciplinary training related to environmental sciences and is designed for students who plan to enter the profession or go to graduate school.

BACHELOR OF ARTS IN GEOLGY

This degree has three options:

a. The **General Option** is for students who want to combine Geology with other professional interests.

b. The **Geographic Information Systems Option** is for students who want to combine Geology with computer technology to store and analyze spatial data using GIS software.

c. The **Composite Science Teacher Certification Option** is for students who want teacher certification, and it is offered through the UTeach program.

Requirements for a Bachelor of Science in Geology - Professional Option

This degree is for students who plan to enter the profession or go to graduate school. The program emphasizes breadth and exposes students to most of the geological disciplines.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 47).

**PRE-PROFESSIONAL COURSES**

TRACK DEGREE PLAN: BACHELOR OF SCIENCE IN GEOLOGY AND MASTER OF SCIENCE IN ENVIRONMENTAL SCIENCE - GEOSCIENCE OPTION

The Fast Track program will enable outstanding senior undergraduate Geology students to satisfy degree requirements leading to a master’s degree in Environmental Science while completing their undergraduate studies. This degree is designed for students who plan to work in the geoscience sectors.

DESCRIPTION

Unconditional admission: Undergraduate Geology students can apply when they are within 30 hours of completing their B.S. in Geology degree from the University of Texas Arlington (UTA). They must have completed at least 30 hours of study at UTA with a total GPA of 3.3 and earned an overall GPA of 3.3 or better in all college of science courses as well as Earth and environmental science courses taken at UTA. Additionally, they must have completed 16 credit hours of specified undergraduate Fast Track screening courses at UTA that are listed below and earn a GPA of at least 3.3 in these courses. If one of these courses is transferred from another school it will not be included, and an equivalent course determined by the undergraduate advisor will be used as a Fast Track foundation course. Students must meet any other requirements imposed by the B.S. in Geology and M.S. in Earth and Environmental Science program.

Undergraduate Screening Courses Required for Admission into the Fast Track program:

1. GEOL 2445 Mineralogy (4-0)
2. GEOL 3454 Statistics for Earth and Environmental Scientist (4-0)
3. Two of the following courses:
   - GEOL 3441 Biostratigraphy and Life Through Time (4-0)
   - GEOL 3442 Sedimentology and Stratigraphy (4-0)
   - GEOL 3443 Structural Geology (4-0)
   - GEOL 3446 Petrology and Geochemistry (4-0)

Students admitted to the Fast Track BS-MS Geology program will be allowed to take three 5000-level GEOL/EVSE electives with a total of 12 credit hours in place of 3000/4000-level undergraduate ENVR/GEOL/DATA/CHM/BIO electives. These credits can be used to meet the required 120 credit hours and the required 30 credit hours for MS degree at UTA.

Provisional Admission: A student may gain provisional admission if, during the semester in which application is made, he or she will complete any remaining courses needed to satisfy prerequisite requirements. Provisional admission will be changed to unconditional admission upon satisfactory completion of remaining requirements. Students failing to meet all requirements at the end of their semester of application will be removed from the Fast Track program. Any credits earned prior to removal from the program will be applied to the undergraduate degree only. None of the other benefits of the Fast Track program will apply. Provisionally admitted students who have been removed from the program may subsequently apply to graduate programs via the normal application process, paying all fees and meeting all relevant admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the program to which application is made and the Graduate School.

Denial: Students who are not admissible under the conditions specified above shall be denied admission to the Fast Track program. They may apply to graduate programs via the regular application process, paying all required fees and meeting all relevant admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the program to which application is made and the Graduate School.

Total Hours: 141

* See [General Core Requirements](https://catalog.uta.edu/academicregulations/degreerequirements/generalcorerequirements/) for approved courses.

** Actual number of courses/hours and course sequence determined by appropriate department.

**FAST TRACK DEGREE PLAN: BACHELOR OF SCIENCE IN ENVIRONMENTAL SCIENCE AND MASTER OF SCIENCE IN EARTH AND ENVIRONMENTAL SCIENCE – ENVIRONMENTAL SCIENCE PROFESSIONAL Option**

The Fast Track program will enable outstanding senior undergraduate Environmental Science students to satisfy degree requirements leading to a master’s degree in Environmental Science while completing their undergraduate studies.

**DESCRIPTION**

**Unconditional Admission:** Undergraduate Environmental Science students can apply when they are within 30 hours of completing their B.S. in Environmental Science degree from the University of Texas Arlington (UTA). They must have completed at least 30 hours of study at UTA with a total GPA of 3.3 and earned an overall GPA of 3.3 or better in all college of science courses as well as environmental science courses taken at UTA.
Additionally, they must have completed 14 credit hours of specified undergraduate Fast Track screening courses at UTA that are listed below and earn a GPA of at least 3.3 in these courses. If one of these courses is transferred from another school it will not be included, and an equivalent course determined by the undergraduate advisor will be used as a Fast Track foundation course. Students must meet any other requirements imposed by the B.S. in Environmental Science and M.S. in Earth and Environmental Science program.

Undergraduate Screening Courses Required for Admission into the Fast Track program:

1. **ENVR 2414** The global Environment and Human Health (4-0)
2. **ENVR 3317** Environmental Hydrology (4-0)
3. **ENVR 3387** Environmental Science Field Methods (3-0)
4. **ENVR 3454** Statistics for Earth and Environmental Scientist (4-0)

**ENVR** students pursuing the Fast Track master's degree will be allowed to take three EVSE/PLAN/CE/IE 5000-level electives in place of advanced undergraduate ENVR/GEOL/DATA/CHEM/BIO electives.

**Provisional Admission**: A student may gain provisional admission if, during the semester in which application is made, he or she will complete any remaining courses needed to satisfy prerequisite requirements. Provisional admission will be changed to unconditional admission upon satisfactory completion of remaining requirements. Students failing to meet all requirements at the end of their semester of application will be removed from the Fast Track program. Any credits earned prior to removal from the program will be applied to the undergraduate degree only. None of the other benefits of the Fast Track program will apply. Provisionally admitted students who have been removed from the program may subsequently apply to graduate programs via the normal application process, paying all fees and meeting all relevant admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the program to which application is made and the Graduate School.

**Denial**: Students who are not admissible under the conditions specified above shall be denied admission to the Fast Track program. They may apply to graduate programs via the regular application process, paying all required fees and meeting all relevant admission criteria. Admission will not be automatic as it will be subject to the normal admission practices of the program to which application is made and the Graduate School.

</tr>
</tbody>
</table>

36 hours of coursework must be upperdivision (3000/4000 - level) to earn the degree

**GRADUATE PROGRAM**

Select one of the following Engineering Courses:

- CE 5321 ENGINEERING FOR ENVIRONMENTAL SCIENTISTS
- IE 5304 ADVANCED ENGINEERING ECONOMY

Select one of the following course in science:

- EVSE 5311 ENVIRONMENTAL SYSTEMS-GEOLOGICAL ASPECTS
- EVSE 5312 ENVIRONMENTAL RISK BASED ACTION
- EVSE 5316 CONSERVATION OF NATURAL RESOURCES

Select one of the following in City and Regional Planning:

- PLAN 5303 PLANNING HISTORY, THEORY AND ETHICS
- PLAN 5316 LAND USE PLANNING AND THE LAW
- PLAN 5352 ENVIRONMENT ASSESSMENT POLICY & PRACTICE

Professional Courses

- EVSE 5199 SEMINAR IN ENVIRONMENTAL & EARTH SCIENCES
- EVSE 5115 PROFESSIONAL EXPERIENCE
- or EVSE 6197 RESEARCH IN ENVIRONMENTAL & EARTH SCIENCES

Electives within one of the following departments: Earth and Environmental Sciences, Civil and Environmental Engineering, or Urban and Public Affairs, Biology, or Chemistry

- EVSE 5395 MASTER'S PROJECT 1)

Successful completion of the Master's Comprehensive Examination in final semester.

*See [General Core Requirements](https://catalog.uta.edu/academicregulations/degreerequirements/generalcorerequirements/) for approved courses.

1)Can be replaced by EVSE 5698 Thesis or GEOL or EVSE 5000-level electives (advisor approval)

**Note:** This program consists of 111 undergraduate credit hours, plus 30 graduate credit hours. A grand total of 141 credit hours. The none-fast track B.S. in Environmental Science requires 120 credit hours
# TYPICAL COURSE SEQUENCE

Details of a personal course sequence should be made with the guidance of the Earth and Environmental Sciences undergraduate advisor, particularly since many ENVR courses are not offered every semester. Students should also consult with the appropriate department for minor requirements; Biology minors should consult with the Earth and Environmental Sciences undergraduate advisor.

Total Hours: 120

*  See General Core Requirements (p. 47) for approved courses.

Requirements for a Minor in Geology

A minimum total of 18 credit hours (including a minimum of 6 hours at the 3000-4000 level) are required. Transfer students must complete a minimum of 9 hours at UTA, 6 of which must be 3000-4000 level. A 2.0 GPA is required for coursework in the minor.

The following courses cannot be used for the minor: GEOL 3100, GEOL 3340, GEOL 4189, GEOL 4190, GEOL 4289, GEOL 4393.
Requirements for a Minor in Data Science (for Majors in Earth and Environmental Sciences)

Students who are pursuing a major in the Department of Earth and Environmental Sciences and a minor in Data Science must meet with a Earth and Environmental Science Advisor who approves the minor courses. The following courses normally satisfy the requirements and are recommended by the Earth and Environmental Science Department.

Requirements for a Minor in Biology (for Majors in Earth and Environmental Sciences)

Students who are pursuing a major in the Department of Earth and Environmental Sciences and a minor in Biology must meet with a Biology Advisor who approves the minor courses. The following courses normally satisfy the requirements of the Biology Department and are recommended by the EES Department.

A minimum total of 18 credit hours (including a minimum of 6 hours at the 3000-4000 level) are required. Transfer students must complete a minimum of 9 hours at UTA, 6 of which must be 3000-4000 level. A 2.0 GPA is required for coursework in the minor.

Requirements for Certification in Geographic Information Systems

Certification in Geographic Information Systems is designed for students in non-Earth and Environmental Sciences majors who want to become proficient in spatial data analysis, which is used in business, liberal arts, engineering and architecture disciplines.

This is a certification program and it does not lead to a second major or minor. However, students may use these courses to count towards a Geology minor. Students who are in the Geology B.A. Geographic Information Systems Option or Geoinformatics B.S. degree plans may not also earn this certificate, as the certificate courses are required for those degrees.

Students must obtain a 3.0 cumulative GPA in the required courses in order to earn the certificate.

Certificate

- Applied Statistics Certificate (p. 1282)

COURSES

MATH 0302. FUNDAMENTALS OF ALGEBRA. 3 Hours.
This course is designed for students whose placement scores or life experience indicate that they may need additional preparation in order to take a college credit bearing mathematics course. Topics may include basic algebraic operations and expressions, linear equations and inequalities, polynomials, rational expressions, factoring, exponents and radicals, graphing, quadratic equations, and mathematical reasoning. Students will use mathematical software to master targeted areas and progress through a self-paced environment in order to achieve college readiness. Immediately following the successful completion of this foundational course, students should register for a credit bearing mathematics course accordingly to their degree plan. Credit in this course does not fulfill any degree requirement.

MATH 0311. FOUNDATIONS FOR CONTEMPORARY MATHEMATICS. 3 Hours.
This course is designed for students whose placement scores or life experience indicate that they may need additional preparation in order to take a college credit-bearing mathematics course. This course provides foundational preparation for MATH 1301. Topics include basic numeric and algebraic operations, expressions, linear and quadratic equations, solving techniques, graphing, mathematical logic and reasoning, as well as a brief introduction to probability and statistics. Students will use mathematical software to master targeted areas and progress through a modified self-paced environment in order to achieve college readiness. Immediately following the successful completion of this foundational course, students should register for a credit-bearing mathematics course according to their degree plan, specifically MATH 1301. Credit in this course does not fulfill any degree requirements.
MATH 0312. FOUNDATIONS FOR ALGEBRA. 3 Hours.
This course is designed for students whose placement scores or life experience indicate that they may need additional preparation in order to take a college credit-bearing mathematics course. This course provides foundational preparation for MATH 1302/1402 or MATH 1315. Topics include basic numeric and algebraic operations and expressions, linear equations and inequalities, polynomials, rational expressions, factoring, exponents and radicals, graphing, and quadratic equations. Students will use mathematical software to master targeted areas and progress through a modified self-paced environment in order to achieve college readiness. Immediately following the successful completion of this foundational course, students should register for a credit bearing mathematics course according to their degree plan, specifically MATH 1302, MATH 1402, or MATH 1315. Credit in this course does not fulfill any degree requirements.

MATH 1301. CONTEMPORARY MATHEMATICS. 3 Hours. (TCCN = MATH 1332)
This course covers material in a traditional algebra course together with real-world applications of mathematics. It develops problem-solving and critical thinking skills. Topics include the mathematics of dimensional analysis, mathematical logic, population growth, optimization, voting theory, number theory, graph theory, relations, functions, probability, statistics, and finance. The use of mathematical software and calculators is required. See course syllabus for details. Credit may be received for only one of MATH 1301, MATH 1302/1402, or MATH 1315.

MATH 1302. COLLEGE ALGEBRA. 3 Hours. (TCCN = MATH 1314)
This course is designed as preparation for higher level mathematics courses. Topics include the study of linear, quadratic, polynomial, rational, radical absolute value, logarithmic, and exponential functions, relations and inequalities; graphs, basic characteristics, and operations on functions; real and complex zeros of functions; graphing techniques; systems of equations and matrices. The use of mathematical software and calculators is required. See course syllabus for more details. Non-STEM (Science-Technology-Engineering-Mathematics) majors should enroll in MATH 1301, and Business majors should enroll in MATH 1315. Credit may be received for only one of MATH 1301, MATH 1302, MATH 1402 or MATH 1315. Students may not co-enroll in MATH 1302 and MATH 1402.

MATH 1303. TRIGONOMETRY. 3 Hours. (TCCN = MATH 1316)
Trigonometric functions, radian measure, solution of triangles, graphs of trigonometric functions, trigonometric identities and equations, and complex numbers. This course is not intended for Science majors. Prerequisite: C or better in MATH 1301, MATH 1302, MATH 1402, MATH 1308, MATH 1315, or a qualifying score on either Math Placement Test (MPT) or ALEKS PPL.

MATH 1308. ELEMENTARY STATISTICAL ANALYSIS. 3 Hours. (TCCN = MATH 1342)
Topics may include collection, analysis, presentation, and interpretation of data. Analysis includes descriptive statistics, probability, relationships between variables and graphs, elementary statistical models, hypothesis testing, inference, estimation, correlation, regression and confidence intervals. The use of mathematical software and calculators is required. See course syllabus for details.

MATH 1309. STATISTICAL LITERACY. 3 Hours. (TCCN = MATH 1342)
Topics may include collection, analysis, presentation, and interpretation of data. Analysis includes descriptive statistics, probability, relationships between variables and graphs, hypothesis testing, inference, estimation, correlation, regression, and confidence intervals. Special emphasis placed on statistical reasoning for everyday life, understanding statistical language and methods, and interpreting results. The use of mathematical software and calculators is required.

MATH 1313. LIBERAL ARTS HONORS MATHEMATICS. 3 Hours.
Topics include the development of the real number system, different orders of infinity, the idea of convergence and how this led to the development of calculus, the concept of a mathematical proof, the conceptual foundations of topology, networks, and knot theory, and modern applications of mathematics to the sciences.

MATH 1315. COLLEGE ALGEBRA FOR ECONOMICS & BUSINESS ANALYSIS. 3 Hours. (TCCN = MATH 1324)
This course covers material in a traditional algebra course with emphasis on business and financial application. The application of common algebraic functions including polynomial, exponential, logarithmic, and rational, to problems in business, economics, and the social sciences are addressed. Additional topics include systems of linear equations and inequalities, linear programming, mathematics of finance, elements of matrix algebra, logic and probability including expected value. Credit may be received for only one of MATH 1301, MATH 1302, MATH 1402, or MATH 1315.

MATH 1316. MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS. 3 Hours. (TCCN = MATH 1325)
This course is the basic study of limits and continuity, differentiation, optimization and graphing, and integration of elementary functions, with emphasis on mathematical tools and applications in business, economics, and social sciences. This course is not a substitute for MATH 1426 Calculus I. Prerequisite: C or better in MATH 1315 or MATH 1302 or MATH 1402, or a qualifying score on Math Placement Test (MPT) or ALEKS PPL, or student group.

MATH 1324. ALGEBRA AND TRIGONOMETRY. 3 Hours. (TCCN = MATH 2412)
A fast-paced summary study of the topics of MATH 1302 and MATH 1303. This course is not intended for calculus track students; those students should take MATH 1421. Credit cannot be received for MATH 1324 and MATH 1302/1402 or MATH 1303.

MATH 1325. ANALYTIC GEOMETRY. 3 Hours. (TCCN = MATH 1348)
Vectors, lines in two dimensions, circles, conics, transformation of coordinates, polar coordinates, parametric equations, and the solid analytic geometry of vectors, lines, planes, cylinders, spherical and cylindrical coordinates. Prerequisite:C or better in MATH 1301 or MATH 1302 or MATH 1402 or MATH 1315 or MATH 1324, or a qualifying score on Math Placement Test.
MATH 1327. ARCHITECTURAL CALCULUS WITH ANALYTIC GEOMETRY. 3 Hours.
Topics from Analytic Geometry and Calculus including conics, polar coordinates, parametric equations; concepts of limit, continuity, differentiation and integration; applications of these concepts. This course will not substitute for MATH 1426. Prerequisite: Major or intended major in Architecture or Interior Design and C or better in MATH 1303 or MATH 1421, or a qualifying score on either the Math Placement Test (MPT) or ALEKS PPL, or student group.

MATH 1330. ARITHMETICAL PROBLEM SOLVING. 3 Hours.
This is a course in small and large group problem solving, with emphasis on reasoning and writing. Topics include problem solving, sets, operations and relations, arithmetic, place value and bases, propositional logic, fractions, number theory, number systems and estimation. Prerequisite: C or better in MATH 1301 or MATH 1302 or MATH 1402, and enrollment as an education major.

MATH 1331. GEOMETRICAL INFERENCES AND REASONING. 3 Hours.
A discovery-oriented exploration of two-and three-dimensional geometry, with emphasis on reasoning and writing. Topics include constructions, polygons, tessellations, polyhedra, symmetry, rigid motions in the plane, measurement, and discovering theorems. Prerequisite: C or better in MATH 1330 and enrollment as an education major.

MATH 1332. FUNCTIONS, DATA, AND APPLICATIONS. 3 Hours.
An exploration of interpreting data, using cooperative groups, spreadsheets and mathematical models. Topics include graphs, applications to economics and natural sciences, function concepts, counting principles, and basic probability and statistics. Prerequisite: C or better in MATH 1330 and enrollment as an education major.

MATH 1402. COLLEGE ALGEBRA. 4 Hours. (TCCN = MATH 1414)
This course is designed as preparation for higher level mathematics courses. Integrated review materials will be used to master targeted areas as students proceed through the course. Topics include foundational numeric and algebraic operations in addition to the study of linear, quadratic, polynomial, rational, radical absolute value, logarithmic, and exponential functions, relations and inequalities; graphs, basic characteristics, and operations on functions; real and complex zeros of functions; graphing techniques; systems of equations and matrices. The use of mathematical software and calculators is required. See course syllabus for more details. Non-STEM (Science-Technology-Engineering-Mathematics) majors should enroll in MATH 1301, and Business majors should enroll in MATH 1315. Credit may be received for only one of MATH 1301, MATH 1302, MATH 1402, or MATH 1315. Students may not co-enroll in MATH 1302 and MATH 1402.

MATH 1421. PREPARATION FOR CALCULUS. 4 Hours.
This course integrates and builds upon concepts and skills from college algebra and trigonometry that are essential to success in calculus. Problem solving activities form the basis for the establishment of these mathematical connections. Prerequisite: C or better in MATH 1301 or MATH 1302 or MATH 1402 MATH 1315, or a qualifying score on either the Math Placement Test (MPT) or ALEKS PPL, or student group.

MATH 1426. CALCULUS I. 4 Hours. (TCCN = MATH 2413)
Concepts of limit, continuity, differentiation and integration; applications of these concepts. Prerequisite: A qualifying score on the Math Placement Test (MPT) or ALEKS PPL is required to register for this course, or student group.

MATH 2326. CALCULUS III. 3 Hours. (TCCN = MATH 2315)
Vectors, dot product, cross product, planes, quadric surfaces, partial differentiation, multiple integrals (with applications), line integrals, Green's Theorem, surface integrals, Stokes' Theorem, divergence theorem. Prerequisite: C or better in MATH 2425 or HONR-SC 2425, or student group.

MATH 2330. FUNCTIONS AND MODELING. 3 Hours.
Students engage in explorations and lab activities designed to strengthen and expand their knowledge of the topics found in secondary mathematics. Students collect data and explore a variety of situations that can be modeled using linear, exponential, polynomial, and trigonometric functions. Activities are designed to have them take a second, deeper look at topics they should have been exposed to previously; illuminate the connections between secondary and college mathematics; illustrate good, as opposed to typically poor, sometimes counterproductive, uses of technology in teaching; illuminate the connections between various areas of mathematics; and engage them in serious (i.e., non-routine) problem solving, problem-based learning, and applications of mathematics. While there is some discussion of how the content relates to secondary mathematics instruction, the course primarily emphasizes mathematics content knowledge and content connections, as well as applications of the mathematics topics covered. This course is part of the UTeach program. Prerequisite: C or better in MATH 2425; C or better in SCIE 1201 or SCIE 1334 or concurrent enrollment.

MATH 2333. INTRODUCTION TO LINEAR ALGEBRA. 3 Hours.
Solving systems of linear equations by (reduced) row-echelon form and matrix inversion, matrix algebra, determinants, real n-dimensional space and its geometric structure, linear transformations, eigenvalues and eigenvectors, basis, dot product, quadratic forms, and applications in science and engineering. Prerequisite: C or better in MATH 2425.

MATH 2425. CALCULUS II. 4 Hours. (TCCN = MATH 1426)
Applications of integration, techniques of integration, parametric equations, polar coordinates, sequences, and series. Prerequisite: C or better in MATH 1426 or HONR-SC 1426, or student group.

MATH 3300. INTRODUCTION TO PROOFS. 3 Hours.
Techniques for constructing proofs for various propositions. The propositions chosen exhibit properties of functions, relations, sets, cardinality, and other ideas in mathematics. An axiomatic approach to some areas in mathematics. Oral presentations of proofs are required. Prerequisite: Math major or math intended major. C or better in MATH 2425 or HONR-SC 2425, or student group.

MATH 3301. FOUNDATIONS OF GEOMETRY. 3 Hours.
A development of the foundations of geometry. Prerequisite: C or better in MATH 2425 or HONR-SC 2425, or student group.
MATH 3302. MULTIVARIATE STATISTICAL METHODS. 3 Hours.
Topics in multivariate data analysis with applications in various areas of interest, including multiple regression, analysis of experimental designs, covariate adjustment, non-linear regression and the use of standard multivariate statistical packages. Offered as MATH 3302 and STATS 3302; credit will be granted in only one department. Prerequisite: C or better in MATH 3313 or STATS 3313 or MATH 3316 or STATS 3316 or MATH 3351 or BIOL 3351 or consent of the instructor.

MATH 3303. MATHEMATICAL GAME THEORY. 3 Hours.
Two-person zero-sum games, solving matrix games by linear programming, two-person non-zero sum games, noncooperative n-person games, Nash equilibrium points and refinements, cooperative n-person games, core, Shapley value, and other concepts of solution. Applications to cost allocation, fair division, and voting power. Prerequisite: C or better in MATH 3330 or MATH 3319, or consent of the instructor.

MATH 3304. LINEAR OPTIMIZATION APPLICATIONS. 3 Hours.
An introduction to basic methods of optimization with applications to optimal resource application, minimal cost allocation and interpersonal decision making in noncooperative and cooperative environments. Includes simplex method, duality, zero sum games, transportation and assignment. Prerequisite: C or better in MATH 3330 or MATH 3319.

MATH 3307. ELEMENTARY NUMBER THEORY. 3 Hours.
Various topics in elementary number theory. Divisibility, congruences, quadratic reciprocity, and multiplicative functions. Prerequisite: 2.0 or better in nine hours of college mathematics, or student group.

MATH 3313. INTRODUCTION TO PROBABILITY. 3 Hours.
Basic concepts in probability, random variables, probability distributions, functions of random variables, moment generating functions, central limit theorem and its role in statistics, joint probability functions and joint probability density functions, joint cumulative distribution functions, conditional and marginal probability distributions, covariance and correlation coefficients, transformation and order statistics. Offered as MATH 3313 and STATS 3313; credit will be granted in only one department. Prerequisite: C or better in MATH 2326, or student group.

MATH 3314. DISCRETE MATHEMATICS. 3 Hours.
An introduction into discrete structures. Propositional calculus, sets and operations, functions, induction, counting, relations and matrices, equivalences and partial orders, graphs and shortest path algorithms, trees and minimal spanning trees, tree traversal, elements of boolean algebra. Prerequisite: C or better in MATH 1426 or HONR-SC 1426, or student group.

MATH 3315. MATHEMATICAL MODELS. 3 Hours.
Methods for solving, by means of mathematics, problems which occur in other disciplines such as physics, engineering, biology, and economics. Basic mathematical tools are chosen from areas such as optimization, probability, differential equations, and computer-oriented mathematics. Problems arising in other disciplines or industrial applications are emphasized. Subject matter will depend on the instructor. Prerequisite: C or better in MATH 2326, or permission of instructor, or student group.

MATH 3316. STATISTICAL INFERENCE. 3 Hours.
A comprehensive study of basic data analysis, focused on reasoning process of statistical investigations from asking question and collecting data to analyzing data and drawing inferences. Topics include exploratory data analysis, sampling, sampling distribution, estimation, hypothesis tests, regression, and ANOVA, with an emphasis on applications of these techniques using statistical software. Offered as MATH 3316 and STATS 3316; credit will be granted in only one department. Prerequisite: C or better in 6 hours from the following: MATH 1302, MATH 1308, MATH 1322, MATH 1323, MATH 1330, MATH 1331, MATH 1332, MATH 1402, MATH 1421, MATH 1426, MATH 2425, MATH 2326, MATH 3300, MATH 3307, MATH 3314, MATH 3319, or MATH 3330; HONR-SC 1426, HONR-SC 2425, or student group.

MATH 3318. DIFFERENTIAL EQUATIONS. 3 Hours.
Ordinary differential equations with emphasis on the solutions and analysis of first and higher order differential equations drawn from fields of physics, chemistry, geometry, and engineering. Prerequisite: C or better in MATH 2326 or concurrent registration, or student group.

MATH 3319. DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA. 3 Hours.
Introductory course with emphasis on solution techniques. Ordinary differential equations, vector spaces, linear transformations, matrix/vector algebra, eigenvectors, and systems of equations. Math majors will not receive credit for this course. Prerequisite: C or better in MATH 2425 or student group.

MATH 3321. ABSTRACT ALGEBRA I. 3 Hours.
Groups including Lagrange's Theorem, Cauchy's Theorem, the homomorphism theorems, and symmetric groups. Prerequisite: C or better in MATH 3300 and MATH 3330, or student group.

MATH 3330. INTRODUCTION TO LINEAR ALGEBRA AND VECTOR SPACES. 3 Hours.
Solving systems of linear equations by (reduced) row-echelon form and matrix inversion, matrix operations, linear transformations, projections, characterizing invertibility, determinants, bases, change of basis, real n-dimensional space and its geometric structure, subspaces, kernel and image of a linear transformation, application to abstract vector spaces of arbitrary dimension, dot product, orthogonality, Gram-Schmidt process, eigenvalues and eigenvectors, characteristic polynomial, diagonalization, symmetric matrices, and principal-axis theorem. Prerequisite: C or better in MATH 2425, or student group.

MATH 3335. ANALYSIS I. 3 Hours.
Real numbers, sequences, series, limits of functions, continuity. Prerequisite: Grade of C or better in both MATH 2326 and MATH 3300, or student group.
MATH 3345. NUMERICAL ANALYSIS AND COMPUTER APPLICATIONS. 3 Hours.
Numerical solutions of nonlinear equations, numerical integration and differentiation, polynomial interpolation, solutions of linear systems, and an introduction to spline functions. Prerequisite: C or better in MATH 2326, and C or better in one of MATH 3330 or MATH 3319, or student group.

MATH 4093. UNDERGRADUATE RESEARCH. 0 Hours.
Undergraduate research experiences under supervision of faculty. Students are expected to disseminate research findings by poster or oral presentations in meetings or conferences. Students are also expected to participate in other activities as directed by the grant-funded Research Program Director.

MATH 4150. SEMINAR IN MATHEMATICAL BIOLOGY. 1 Hour.
Formulation and definition of interdisciplinary research problems in Mathematical Biology, the formulation and execution of strategies of solution, and the presentation of results. Research under faculty supervision and mentorship involving collaboration within a small group. Prerequisite: Consent of the instructor.

MATH 4180. ORAL COMMUNICATION OF MATHEMATICS. 1 Hour.
This course trains students in giving effective oral presentations of mathematics and topics involving mathematics. Students will give presentations to the class and evaluate the presentations of their classmates. Topics may be chosen from mathematics and science journals at a level suitable for undergraduates, from books and articles on the history and development of mathematics, or from previous course material.

MATH 4191. SPECIAL TOPICS IN MATHEMATICS. 1 Hour.
Special topics in mathematics are assigned to individuals or small groups. Faculty members closely supervise the projects and assign library reference material. Small groups will hold seminars at suitable intervals. May be repeated for credit. Prerequisite: senior standing and written permission of the instructor and department chair.

MATH 4291. SPECIAL TOPICS IN MATHEMATICS. 2 Hours.
Special topics in mathematics are assigned to individuals or small groups. Faculty members closely supervise the projects and assign library reference material. Small groups will hold seminars at suitable intervals. May be repeated for credit. Prerequisite: senior standing and written permission of the instructor & department chair.

MATH 4303. INTRODUCTION TO TOPOLOGY. 3 Hours.
A first course in topology from the axiomatic point of view. Prerequisite: C or better in MATH 3335.

MATH 4311. STOCHASTIC MODELS AND SIMULATION. 3 Hours.
A study of processes, whose outcomes are governed by chance, through a combination of lectures and computer lab sessions. Experiments include random number generation, coin tossing and other games of chance, random walks, Markov Chains, Poisson processes, birth-death processes, branching processes, and Brownian Motion. A foundation for modeling random phenomena in sciences, engineering and business. Prerequisite: C or better in MATH 2326 and knowledge of basic probability (MATH 3313/STATS 3313 or MATH 3351/BIOL 3351 or equivalent), or consent of instructor, or student group.

MATH 4312. ACTUARIAL RISK ANALYSIS. 3 Hours.
Fundamentals of actuarial science concerning risk theory based on probability. Topics include: utility theory, principles of premium calculations, collective and individual risk models, ruin theory, classical Lundberg's Model. Prerequisite: C or better in MATH 3313/STATS 3313.

MATH 4313. MATHEMATICAL STATISTICS. 3 Hours.
A continuation of MATH 3313. Random sampling and sampling distributions, estimation of unknown parameters and main properties of estimators, confidence intervals for unknown parameters, testing of hypotheses. Prerequisite: C or better in MATH 3313 or STATS 3313.

MATH 4314. ADVANCED DISCRETE MATHEMATICS. 3 Hours.
Finite automata, Turing machines, formal languages, graph theory, combinatorial optimization, complexity of algorithms, P versus NP, and decidable versus undecidable problems. Prerequisite: C or better in MATH 3314.

MATH 4320. ADVANCED DIFFERENTIAL EQUATIONS. 3 Hours.
The existence and properties of solution of differential equations. Prerequisite: C or better in MATH 3318 or MATH 3319.

MATH 4321. ABSTRACT ALGEBRA II. 3 Hours.
Rings and field theory, including polynomial rings and field extensions. Prerequisite: C or better in MATH 3321.

MATH 4322. INTRODUCTION TO COMPLEX VARIABLES. 3 Hours.
An introduction to the theory of functions of a complex variable and also an introduction to applications including uses of the residue theory, contour integration and conformal mapping. Prerequisite: C or better in MATH 2326, or student group.

MATH 4324. INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS. 3 Hours.
Methods of solutions of selected elliptic, parabolic, and hyperbolic partial differential equations with reference to physical applications. Prerequisite: C or better in MATH 3318 or MATH 3319.

MATH 4330. ADVANCED LINEAR ALGEBRA. 3 Hours.
Eigenvalues, eigenvectors, generalized eigenvectors, minimal/characteristic polynomial, Jordan normal/canonical form, companion matrix and rational canonical form, inner products, adjoint of a linear map, positive-definite operators and isometries, polar decomposition and singular-value decomposition, exponential of a matrix and applications to differential equations, least squares and curve fitting, bilinear and quadratic forms, dual spaces and transpose of a matrix, quotient spaces, multilinear maps, tensor products. Prerequisite: MATH 3330 or consent of instructor.
MATH 4334. ADVANCED MULTIVARIABLE CALCULUS. 3 Hours.
Topics include properties of limits of mappings, continuity of mappings, derivatives of mappings, and integrals of mappings from n-dimensional Euclidean space to m-dimensional Euclidean space. Prerequisite: C or better in MATH 3335, and MATH 3330.

MATH 4335. ANALYSIS II. 3 Hours.
Differentiation, integration, and selected topics in sequences and series of functions and metric spaces. Prerequisite: C or better in MATH 3335.

MATH 4345. NUMERICAL ANALYSIS & COMPUTER APPLICATIONS II. 3 Hours.
Numerical solutions for ordinary differential equations, boundary value problems, minimizations of multivariate functions, and methods of least squares. Prerequisite: C or better in MATH 3345.

MATH 4350. PRECALCULUS FOR MID-LEVEL MATHEMATICS TEACHERS. 3 Hours.
This course serves to bridge the gap between algebra and calculus for middle level teachers. It will develop a firm understanding of the concept of function, how to graphically represent various functions, analyze their behavior and create new functions from old. Functions will be used to model real-life situations. The course will focus on the essential elements of precalculus, as given by the TEKS. It will develop the foundations for functions and explore functions as a unifying theme. This includes transformations, inverses, and solving equations. These foundational ideas will be explored and applied to specific functions, including exponential, logarithmic, power, polynomial, rational, and trigonometric functions. There will be an emphasis on multiple representations of mathematical ideas: verbal, concrete, pictorial, tabular, symbolic and graphical. Throughout, the mathematical connections between precalculus and school mathematics will be highlighted. Prerequisite: C or better in MATH 1302/1402, MATH 1308, MATH 1330, MATH 1331 and MATH 1332. This course does not count toward a degree in mathematics.

MATH 4351. CALCULUS FOR MID-LEVEL MATHEMATICS TEACHERS. 3 Hours.
This course serves to introduce the basic concepts of calculus to middle level teachers. The primary goal is to help teachers develop a fundamental understanding of the key mathematical ideas in calculus in order to broaden their mathematical perspective and gain insight into the topics in the middle level curriculum which are related and foundational to its development. Participants will develop conceptual knowledge of the processes of differentiation and integration, and understanding of their applications and an understanding of the relationship between the two processes. Prerequisite: C or better in MATH 4350. This course does not count toward a degree in mathematics.

MATH 4381. MATHEMATICS RESEARCH. 3 Hours.
Formulation and definition of research problems, the formulation and execution of strategies of solution, and the presentation of results. Prerequisite: consent of instructor. Recommendation by other faculty encouraged.

MATH 4391. SPECIAL TOPICS IN MATHEMATICS. 3 Hours.
Special topics in mathematics are assigned to individuals or small groups. Faculty members closely supervise the projects and assign library reference material. Small groups will hold seminars at suitable intervals. May be repeated for credit. Prerequisite: senior standing and written permission of the instructor & department chair.

MATH 4392. ADVANCED TOPICS IN MATHEMATICS. 3 Hours.
Varies from semester to semester. New developments in mathematics, in-depth study of a topic not covered in other courses, or a special faculty expertise made available to undergraduates. May be repeated for credit as topic varies. Prerequisite: permission of instructor.

MATH 4393. HONORS THESIS/SENIOR PROJECT. 3 Hours.
Required of all students in the University Honors College. During the senior year the student must complete a thesis or a project under the direction of a faculty member in the math department. Prerequisite: enrollment in the University Honors College and written permission of the instructor and chair.

MATH 4394. UNDERGRADUATE RESEARCH EXPERIENCES. 3 Hours.
Research under faculty supervision and mentorship involving collaboration within a small group. The topic varies from semester to semester, is determined by the faculty teaching the course, and is announced in advance. The course promotes active learning based on inquiry, development of higher-order thinking skills, and meaningful scientific research. Prerequisite: consent of instructor.

MATH 5190. INTERNSHIP FOR MATHEMATICAL SCIENCES. 1 Hour.
Practical experiences in the mathematical sciences. May be repeated for credit when the content changes. Prerequisite: Successful completion of 18 graduate credit hours in the program of study and in good academic standing (i.e. graduate GPA 3.0/4.0 or higher).

MATH 5191. SEMINAR FOR TEACHING ASSISTANTS. 1 Hour.
This course is mandatory for all mathematics graduate teaching assistants. Students will be instructed on classroom procedures and effective teaching strategies and will be required to deliver teaching demonstrations under the supervision of mathematics faculty. The purpose is to enhance students' capacity to facilitate mathematics learning in a variety of settings. Admission to this course is restricted to Math TAs.

MATH 5300. INTRODUCTION TO SCIENTIFIC COMPUTING. 3 Hours.
Introduction to scientific computing utilizing algorithmic languages and operating environment such as Fortran, MATLAB, C, and C++ and UNIX (LINUX) operating system. Prerequisite: consent of the instructor.

MATH 5302. FUNDAMENTALS OF MATHEMATICAL SCIENCES I. 3 Hours.
Matrices and operators, linear spaces, multivariable calculus, dynamical systems, applications. Prerequisites: MATH 3318 and MATH 3330 or consent of the instructor.

MATH 5303. FUNDAMENTALS OF MATHEMATICAL SCIENCES II. 3 Hours.
Wave propagation, potential theory, complex variables, transform techniques, perturbation techniques, diffusion, applications. Prerequisite: MATH 5302 or consent of the instructor.
MATH 5304. GENERAL TOPOLOGY. 3 Hours.
Introduction to fundamentals of general topology. Topics include product spaces, the Tychonoff theorem, Tietze's Extension theorem, and metrization theorems. Prerequisite: MATH 4304 or MATH 4335.

MATH 5305. STATISTICAL METHODS. 3 Hours.
Topics include descriptive statistics, numeracy, and report writing; basic principles of experimental design and analysis; regression analysis; data analysis using the SAS package. Prerequisite: consent of the instructor.

MATH 5307. MATHEMATICAL ANALYSIS I. 3 Hours.
Elements of topology and the real number system, sequences in metric spaces, limits and continuity of functions, differentiation, the Riemann integral, infinite series, and sequences and series of functions. Prerequisite: MATH 4335 or consent of Graduate Advisor.

MATH 5308. MATHEMATICAL ANALYSIS II. 3 Hours.
Analysis in Rn, limits, continuity, Jacobian, extremum problems, multiple integrals, sequences and series of functions, Lebesgue integral. Prerequisite: MATH 5307 or consent of Graduate Advisor.

MATH 5310. MATHEMATICAL GAME THEORY. 3 Hours.

MATH 5311. APPLIED PROBABILITY AND STOCHASTIC PROCESSES. 3 Hours.
Topics include conditional expectations, law of large numbers and central limit theorem, stochastic processes, including Poisson, renewal, birth-death, and Brownian motion. Prerequisite: MATH 3313 or equivalent.

MATH 5312. MATHEMATICAL STATISTICS I. 3 Hours.
Random variables and their expectations, some special distributions, moment generating functions, transformations of bivariate random variables, sampling distribution of statistics, Central Limit Theorem, confidence intervals, maximum likelihood estimation, introduction to hypothesis testing, maximum likelihood tests. Prerequisite: MATH 3335 or consent of instructor.

MATH 5313. MATHEMATICAL STATISTICS II. 3 Hours.
Multivariate distributions, consistency and limiting distributions, Rao-Cramer lower bound and efficiency, sufficiency and completeness, most powerful tests, uniformly most powerful tests, likelihood ratio test, the sequential probability ratio test, minimax and classification procedures. Prerequisite: MATH 5312/STATS 5312.

MATH 5314. EXPERIMENTAL DESIGN. 3 Hours.
This course covers the classical theory and methods of experimental design, including randomization, blocking, one-way and factorial treatment structures, confounding, statistical models, analysis of variance tables and multiple comparisons procedures. Prerequisite: MATH 5305/STATS 5305 or MATH 5355/STATS 5355 or permission of instructor.

MATH 5315. GRAPH THEORY. 3 Hours.

MATH 5316. COMBINATORIAL OPTIMIZATION. 3 Hours.

MATH 5317. REAL ANALYSIS. 3 Hours.
Sigma-fields, measures, measurable functions, convergence in measure and almost everywhere, integration, Fatou's Lemma, Lebesgue-dominated convergence, signed measures, Radon-Nikodym Theorem, product measures, Fubini's Theorem. Prerequisite: Math 5307 or consent of the Graduate Advisor.

MATH 5318. FUNDAMENTALS OF STOCHASTIC ANALYSIS. 3 Hours.
General properties of stochastic processes, processes with independent increments, martingales, limit theorems including invariance principle, Markov processes, stochastic integral, stochastic differential. Prerequisite: Math 5317 or consent of the instructor.

MATH 5319. PROBABILITY THEORY. 3 Hours.
Probability spaces, random variables, filtrations, conditional expectations, martingales, strong law of large numbers, ergodic theorem, central limit theorem, Brownian motion and its properties. Prerequisite: MATH 5317.

MATH 5320. ORDINARY DIFFERENTIAL EQUATIONS. 3 Hours.

MATH 5321. APPLIED PARTIAL DIFFERENTIAL EQUATIONS. 3 Hours.
General first order equations. Basic linear theory for elliptic, hyperbolic, and parabolic second order equations, including existence and uniqueness for initial and boundary value problems. Prerequisites: MATH 5307 and MATH 5333.

MATH 5322. COMPLEX VARIABLES I. 3 Hours.
Fundamental theory of analytic functions, residues, conformal mapping and applications. Prerequisite: MATH 5307.
MATH 5325. ALGEBRAIC NUMBER THEORY. 3 Hours.
Field extensions, number fields and number rings, ramification theory, class groups, elliptic curves and their group structure, applications to Fermat's last theorem. Prerequisite: MATH 3321.

MATH 5326. ALGEBRAIC TOPOLOGY. 3 Hours.
Basics of topology, Fundamental groups, covering spaces, Van Kampen's Theorem, categories and functors, singular homology, relative homology, Mayer-Vietoris sequence, cohomology, cup products, the cohomology ring of a space, CW complexes. Prerequisites: MATH 3321, MATH 3335.

MATH 5327. FUNCTIONAL ANALYSIS I. 3 Hours.
Introduction to Hilbert and Banach spaces: Hahn-Banach, Banach-Steinhaus, and closed graph theorems. Riesz representation theorem and bounded linear operators in Hilbert space. Prerequisite: MATH 5317 or consent of the instructor.

MATH 5328. FUNCTIONAL ANALYSIS II. 3 Hours.
The theory of distributions and Sobolev spaces, with applications to differential equations. Compact operators and Fredholm theory. Spectral theory for unbounded operators. Prerequisite: MATH 5327.

MATH 5329. HOMOLOGICAL ALGEBRA. 3 Hours.
Projective and injective modules, projective and injective resolutions, Hom and tensor, the language of category theory, derived functors, Ext and Tor, complexes.

MATH 5330. ALGEBRAIC GEOMETRY. 3 Hours.
Theory of ideals in polynomial rings, Nullstellensatz, Hilbert's basis theorem, computation in polynomial rings, affine and projective varieties, singular and smooth points on varieties. Prerequisite: MATH 4321.

MATH 5331. ABSTRACT ALGEBRA I. 3 Hours.
Fundamental topics on groups, rings and modules that may include: abelian groups; dihedral groups; groups of permutations; normal subgroups; quotient groups; group actions; Lagrange's Theorem; Cayley's Theorem; Sylow's Theorems; factorization in commutative rings; localization in commutative rings; quotient rings; quotient modules; isomorphism theorems. Prerequisite: permission from instructor.

MATH 5332. ABSTRACT ALGEBRA II. 3 Hours.
Fundamental topics that may include: modules; chain conditions, noetherian rings and modules, artinian rings; Wedderburn's Theorem; localization with Ore conditions; Maschke's Theorem; special classes of rings such as regular algebras, Cohen-Macaulay rings, Gorenstein rings, universal enveloping algebras. Prerequisite: MATH 5331 or permission from instructor.

MATH 5333. LINEAR ALGEBRA AND MATRICES. 3 Hours.
Vector spaces, their sums, linear (in)dependence, bases, linear maps and their matrices, change of basis, inner-products, adjoints, diagonalization, eigenvectors and generalized eigenvectors, eigenvalues, Jordan form, characteristic and minimal polynomials, dual vector spaces, bilinear and quadratic forms. Prerequisite: MATH 5330 or consent of instructor.

MATH 5334. DIFFERENTIAL GEOMETRY. 3 Hours.
Introduction to the theory of curves and surfaces in three dimensional Euclidean space. Prerequisite: MATH 4334 or MATH 4335.

MATH 5336. CONCEPTS AND TECHNIQUES IN NUMBER THEORY. 3 Hours.
Topics include mathematical induction, fundamental theorem or arithmetic, inequalities, special sequences and sums, divisibility properties, greatest common divisor, division and Euclidean algorithm, properties of congruence and Diophantine equations.

MATH 5337. CONCEPTS AND TECHNIQUES IN CALCULUS. 3 Hours.
Topics studied include limits, continuity, differentiation, integration, numerical approximations, applications and Taylor series.

MATH 5338. NUMERICAL ANALYSIS I. 3 Hours.
Solution of equations including linear and nonlinear systems, interpolation and approximation, spline, numerical differentiation and quadrature. Prerequisite: MATH 2425 or consent of the instructor.

MATH 5339. NUMERICAL ANALYSIS II. 3 Hours.
Rigorous treatment of numerical aspects of linear algebra and numerical solution of ordinary differential equations, boundary value problems, introduction to numerical solution of partial differential equations. Prerequisite: MATH 5338 or consent of the instructor.

MATH 5340. DISCRETE MATHEMATICS FOR PROBLEM SOLVING. 3 Hours.
Topics may include functions, mathematical induction, principles of counting, combinatorics, sequences and recurrence relations, finite graph theory, and elementary game theory.

MATH 5341. MODERN GEOMETRY. 3 Hours.
Topics include Euclidean and non-Euclidean geometries with an emphasis on comparing intrinsic and extrinsic characteristics of geodesics and the resulting geometrical implications.

MATH 5342. CONCEPTS AND TECHNIQUES IN ALGEBRA. 3 Hours.
A study of algebra as described in the K-12 research literature and connections to algebraic structures. Topics include algebra as the study of functions and function relationships, algebra as the study of multiple representations with an emphasis on graphs, tables, and formulae, algebra as generalized arithmetic and quantitative reasoning, and algebra as a language.
MATH 5343. CONCEPTS AND TECHNIQUES IN PROBABILITY AND STATISTICS. 3 Hours.
Consideration of (1) exploring data: descriptive statistics of situations involving one and two variables; (2) anticipating patterns: probability and simulation; (3) design of experiments and planning a study; (4) statistical inference: confirming models. Use of a graphing calculator and other appropriate technology.

MATH 5344. MATHEMATICS-SPECIFIC TECHNOLOGIES. 3 Hours.
Focus on use of current mathematics-specific technologies for enhancing mathematical understanding and mathematics teaching. May include use of Geometer's Sketchpad, Fathom, graphing calculators and computer algebra systems.

MATH 5345. HISTORICAL APPROACH TO REAL ANALYSIS. 3 Hours.
A historical treatment of real analysis that explores motivations for the early definitions and theorems in analysis. Topics may include Fourier's introduction of trigonometric series and the issues it created for mathematicians of the early 19th century, Cauchy's efforts toward establishing a firm foundation for calculus, and Dirichlet's proof of the validity of the Fourier series expansion. Prerequisite: MATH 5337 or consent of the instructor.

MATH 5346. CONCEPTS AND TECHNIQUES IN PROBLEM SOLVING. 3 Hours.
A study of the application of various heuristics and general problem strategies in mathematics, with application to the teaching and learning of secondary school and college-level mathematics. Topics include analyzing, classifying, and modifying tasks, assessment of problem solving, and implementing problem solving in the classroom. Assignments require interaction in secondary school or college field settings.

MATH 5347. CONCEPTS AND TECHNIQUES IN MATHEMATICAL MODELING WITH APPLICATIONS. 3 Hours.
Topics studied include algebraic, graphical, geometrical and numerical techniques to model and solve applied problems.

MATH 5348. ADVANCED ALGEBRA IN SECONDARY SCHOOL MATHEMATICS. 3 Hours.
Major concepts of second-year algebra applied to the teaching and learning of secondary school mathematics. Topics include relations, algebraic, tabular, verbal and geometric representations of functions, transformations, including applications involving systems of equations and inequalities.

MATH 5350. APPLIED MATHEMATICS I. 3 Hours.
Development of models arising in the natural sciences and in engineering. Emphasis will be on the mathematical techniques and theory needed to analyze such models; these include aspects of the theory of differential and integral equations, boundary value problems, theory of distributions and transforms. Prerequisites: MATH 5307 and MATH 5333.

MATH 5351. APPLIED MATHEMATICS II. 3 Hours.
Continuation of MATH 5350; models arising in the physical sciences whose analysis includes such topics as the theory of operators in a Hilbert space, variational principles, branching theory, perturbation and stability analysis. Prerequisite: MATH 5350.

MATH 5352. CONCEPTS AND TECHNIQUES IN PRECALCULUS. 3 Hours.
Topics include functions (transcendental, inverse, parametric, polar, transformations), asymptotic behavior, conics, sequences, complex numbers.

MATH 5353. APPLIED LINEAR MODELS. 3 Hours.
The course covers, at an operational level, three topics: 1) the univariate linear model, including a self-contained review of the relevant distribution theory, basic inference methods, several parameterizations for experimental design and covariate-adjustment models and applications, and power calculation; 2) the multivariate linear model, including basic inference (e.g. the four forms of test criteria and simultaneous methods), applications to repeated measures experiments and power calculation; and 3) the univariate mixed model, including a discussion of the likelihood function and its maximization, approximate likelihood inference, and applications to complex experimental designs, missing data, unbalanced data, time series observations, variance component estimation, random effects estimation, power calculation and a comparison of the mixed model's capabilities relative to those of the classical multivariate model. Knowledge of the SAS package is required. Prerequisite: MATH 5358/STATS 5358 (Regression Analysis) or equivalent.

MATH 5354. CATEGORICAL DATA ANALYSIS. 3 Hours.
This course covers traditional methods for analyzing categorical data from a variety of response/factor structures (univariate or multivariate responses, with or without multivariate factors), based on several different statistical rationales (weighted least squares, maximum likelihood and randomization-based). Included are logistic regression, multiple logit analysis, mean scores analysis, observer agreement analysis, association measures, methods for complex experimental designs with categorical responses and Poisson regression. The classical log-linear model for the association structure of multivariate responses is briefly reviewed. Randomization-based inference (e.g. Mantel-Haenszel) is discussed as well. The necessary distribution theory, basic inference methods, several parameterizations for experimental design and covariate-adjustment models and applications, and power calculation are required. Prerequisite: MATH 5358, or MATH 5305, or IE 5318 or by consent of instructor.

MATH 5355. STATISTICAL THEORY FOR RESEARCH WORKERS. 3 Hours.
Designed for graduate students not majoring in mathematics. Topics include basic probability theory, distributions of random variables, point estimation, interval estimation, testing hypotheses, regression, and an introduction to analysis of variance. Graduate credit not given to math majors. Prerequisite: calculus MATH 1426/MATH 2425/MATH 2326 or permission of instructor.

MATH 5356. APPLIED MULTIVARIATE STATISTICAL ANALYSIS. 3 Hours.
Statistical analysis for data collected in several variables, topics including sampling from multivariate normal distribution, Hotelling's T^2, multivariate analysis of variance, discriminant analysis, principal components, and factor analysis. Prerequisite: MATH 5312/STATS 5312 or consent of instructor.

MATH 5357. SAMPLE SURVEYS. 3 Hours.
A comprehensive account of sampling theory and methods, illustrations to show methodology and practice, simple random sampling, stratified random sample, ratio estimates, regression estimates, systematic sampling, cluster sampling, and nonsampling errors. Prerequisite: MATH 5312/STATS 5312 or consent of instructor.
MATH 5358. REGRESSION ANALYSIS. 3 Hours.
A comprehensive course including multiple linear regression, non-linear regression and logistic regression. Emphasis is on modeling, inference, diagnostics and application to real data sets. The course begins by developing a toolbox of methods via a sequence of guided homework assignments. It culminates with projects based on consulting-level data analysis problems involving stratification, covariate adjustment and messy data sets. Some knowledge of the SAS package is required. Prerequisites: MATH 5312/STATS 5312 or MATH 5305/STATS 5305 with a B or better or permission of the instructor.

MATH 5359. SURVIVAL ANALYSIS. 3 Hours.
This course covers analysis of lifetime data with applications in engineering and biomedical research. Topics may include survival function, hazard function, cumulative hazard function, parametric distributions to model lifetime data, censoring, Kaplan-Meier estimator, testing for survival times for two or more groups, Cox proportional hazards model (both fixed and time dependent covariate), parametric regression models, regression diagnostics, accelerated failure time models, sample size determination, extensive use of R statistical software. Prerequisites: MATH 5305/STATS 5305 or MATH 5312/STATS 5312 or permission of instructor.

MATH 5361. APPLIED CALCULUS OF VARIATION. 3 Hours.
Functionals, variation, extremization, Euler's equation, direct and indirect approximation methods; applications to mechanics and control theory. Prerequisite: MATH 5302.

MATH 5362. MATHEMATICS OF LINEAR PROGRAMMING. 3 Hours.

MATH 5363. OSCILLATIONS AND WAVES. 3 Hours.
Development of methods and results related to phenomena in nature that exhibit oscillatory motion; mathematical techniques include Fourier series, ordinary and partial differential equations, and the theory of almost periodic functions. Prerequisite: MATH 3318.

MATH 5364. INTRODUCTION TO MATHEMATICAL CONTROL THEORY. 3 Hours.
Systems in science, engineering, and economics and their mathematical description by means of functional equations (ordinary, partial, integral, delay-type). Basic properties of various classes of systems: observability, controllability, stability, and oscillating systems; optimal control problems and applications. Prerequisite: MATH 3318 or MATH 4320.

MATH 5365. BIOMATHEMATICS. 3 Hours.
Mathematical techniques used in modeling such as perturbation theory, dimensional analysis, Fourier analysis, and differential equations. Applications to morphogenetics, population dynamics, compartmental systems, and chemical kinetics.

MATH 5366. INTRODUCTION TO NEURAL AND COGNITIVE MODELING. 3 Hours.
Principles of neural network modeling; application of these principles to the simulation of cognitive processes in both brains and machines; models of associative learning, pattern recognition, and classification. Prerequisite: consent of instructor.

MATH 5370. PROBLEM SOLVING IN K-8 MATHEMATICS. 3 Hours.
A study of the nature and aspects of problem solving in mathematics, with application to the teaching and learning of K-8 mathematics. Topics include deconstructing and modifying tasks, assessment of problem solving, and the roles of representation, conjecture & proof, and technology in problem solving. Assignments require interaction in K-8 field settings. Prerequisite: graduate standing.

MATH 5371. APPLIED NUMERICAL LINEAR ALGEBRA. 3 Hours.
Numerical solutions of linear algebraic systems, least squares problems, and eigenvalue problems; LU and QR decompositions, Schur and Singular Value decompositions, Gaussian elimination, QR algorithm, and Krylov subspace iterations for large and sparse linear algebra problems. Prerequisites: MATH 3330 or consent of the instructor.

MATH 5372. OPTIMIZATION METHODS & NUMERICAL SOLUTIONS OF NONLINEAR EQUATIONS. 3 Hours.
Unconstrained and constrained optimization, solutions of nonlinear system of equations; Newton and quasi-Newton methods, secant methods and variations, nonlinear least squares problems. Prerequisite: consent of the instructor.

MATH 5373. NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS. 3 Hours.
Numerical methods for approximating solutions of initial value problems, boundary value problems, including linear multistep methods, Runge-Kutta methods, shooting methods. Prerequisite: MATH 5300, MATH 3319 or consent of instructor.

MATH 5374. NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS. 3 Hours.
Numerical methods for elliptic, parabolic, hyperbolic, mixed, and systems of partial differential equations; finite difference methods, finite element methods, spectral methods. Prerequisite: MATH 5373 or consent of instructor.

MATH 5375. CONSTRUCTING WHOLE NUMBER AND OPERATIONS IN K-8 MATHEMATICS. 3 Hours.
A study of the interaction between the structure of place-value numeration systems and the nature of the four arithmetic operations. The development of traditional and alternative computational arithmetic algorithms from conceptual and concrete models for operations, viewed through the lens of alternative numeration systems and research on children's mathematical thinking. Assignments require interaction in K-8 field settings. Prerequisite: graduate standing.
MATH 5376. CONSTRUCTING RATIONAL NUMBER AND OPERATIONS IN K-8 MATH. 3 Hours.
The meanings and representations of rational numbers, and the development of computations on rational numbers from algorithms for whole numbers, including concrete models for operations on fractions and decimals. Discussion of research on the learning and teaching of operations on rational numbers. Also, divisibility tests and factoring. Assignments require interaction in K-8 field settings. Prerequisite: MATH 5375.

MATH 5377. ALGEBRAIC THINKING IN K-8 MATHEMATICS. 3 Hours.
A study of the practice of making and justifying generalizations in K-8 mathematics, including field properties of operations, modular arithmetic (with applications to odd/even), relations and equivalence relations, the introduction and use of variables and unknowns, and the influence of representations on the form of mathematical arguments. Assignments require interaction in K-8 field settings. Prerequisite: MATH 5375.

MATH 5378. GEOMETRY CONCEPTS IN K-8 MATHEMATICS. 3 Hours.
Major concepts of geometry applied to the teaching and learning of K-8 mathematics. Topics include dimension, development of definitions, meanings of angle, geometric comparison relations, notions of center, and non-Euclidean geometries. Assignments require interaction in K-8 field settings. Prerequisite: graduate standing.

MATH 5379. MEASUREMENT CONCEPTS IN K-8 MATHEMATICS. 3 Hours.
The development of measurement concepts as applied to the teaching and learning of K-8 mathematics. Topics include the development and properties of standard and nonstandard units, notions of size, decomposing space, relationships between boundaries and interiors, the algebra of units, measuring time, and notions of heaviness. Assignments require interaction in K-8 field settings. Prerequisite: graduate standing.

MATH 5380. SEMINAR. 3 Hours.
Current topics in mathematics, may be repeated for credit twice. Prerequisite: consent of instructor.

MATH 5391. SPECIAL TOPICS IN MATHEMATICS. 3 Hours.
Topics in mathematics assigned individual students or small groups. Faculty members closely supervise the students in their research and study. In areas where there are only three hours offered, the special topics may be used by students to continue their study in the same area. Graded P/F/R. Prerequisite: permission of instructor.

MATH 5392. SELECTED TOPICS IN MATHEMATICS. 3 Hours.
May vary from semester to semester depending upon need and interest of the students. May be repeated for credit. Prerequisite: permission of Graduate Advisor.

MATH 5395. SPECIAL PROJECT. 3 Hours.
Graded P/F/R. Prerequisite: permission of Graduate Advisor.

MATH 5398. THESIS. 3 Hours.
MATH 5398 Graded R/F only; MATH 5698 graded P/F/R. Prerequisite: permission of Graduate Advisor.

MATH 5399. RESEARCH IN MATHEMATICS. 3 Hours.
Faculty directed individual study and research. May be repeated for credit. Graded P/F/R/W only. Prerequisite: permission of instructor.

MATH 5698. THESIS. 6 Hours.
Graded P/F/R. Prerequisite: permission of Graduate Advisor.

MATH 5699. RESEARCH IN MATHEMATICS. 6 Hours.
Faculty directed individual study and research. May be repeated for credit. Graded P/F/R/W only. Prerequisite: permission of instructor.

MATH 5999. RESEARCH IN MATHEMATICS. 9 Hours.
Faculty directed individual study and research. May be repeated for credit. Graded P/F/R/W only. Prerequisite: permission of instructor.

MATH 6180. SEMINAR FOR PROFESSIONAL DEVELOPMENT OF PhD STUDENTS IN SPECIAL PROJECTS. 1 Hour.
This seminar class is for Ph.D. students enrolled in special University projects. Topics include a survey of new Math, Science, Technology and Engineering advancements, Ph.D. students professional development and mentoring. Prerequisite: Prior approval of Project Director.

MATH 6310. FOUNDATION OF DATA SCIENCES. 3 Hours.
Basic knowledge and computational methods in data sciences, select topics in norms, semidefinite matrix, nonnegative matrix, Cholesky decomposition, QR decompositions, linear system, least squares problem, eigenvalue and singular value decompositions, low rank approximation, nonnegative matrix factorization, introduction to simplex method, KKT conditions for optimizations, Krylov subspace methods, and applications. Prerequisite: MATH 3330 or consent of the instructor.

MATH 6311. OPTIMIZATION ON BIG DATA. 3 Hours.
Introduction to big data analysis; real world applications of data science; linear system solutions; linear programming; duality theory; convex sets; convex functions; optimality conditions; unconstrained optimization; constraint optimization; conjugate direction methods; alternating direction method of multipliers; classification/regression models and algorithms; dimensionality reduction for visualization; projects on real data. Prerequisite: MATH 3330 or consent of the instructor.

MATH 6312. DATA MINING. 3 Hours.
The course focuses on topics including but not limited to: linear methods in regression, linear methods in classification, model assessment and selection, regularized models, splines, generalized additive models, model averaging, ensemble learning, support vector machines, neural networks, probabilistic graphical models, cluster analysis, dimension reduction techniques, and multidimensional scaling. Prerequisite: MATH 5305/STATS 5305 or MATH 5312/STATS 5312 or permission of instructor. Basic programming skills are preferred.
MATH 6313. TOPICS IN PROBABILITY AND STATISTICS. 3 Hours.
May be repeated for credit when the content changes.

MATH 6353. GENERALIZED LINEAR MODELS. 3 Hours.
This course covers modern methods for analyzing Bernoulli, multinomial and count data. It begins with a development of generalized linear model theory, including the exponential family, link function and maximum likelihood. Second is a discussion of the case of models for independent observations. Next is a discussion of models for repeated measures, based on quasi-likelihood methods. These include models (such as Markov chains) for categorical time series. Next is a treatment of models with random effects. Finally is a discussion of methods for handling missing data. Knowledge of the SAS package is required. Prerequisites: MATH 5358/STATS 5358 (Regression Analysis) and preferably MATH 5313/STATS 5313. (Students without 5313 can still succeed but must deal with the slightly higher mathematical level of this course.)

MATH 6356. TIME SERIES ANALYSIS. 3 Hours.
This course covers classical methods of time series analysis, for both the time and frequency domains. For covariance stationary series, these include ARIMA modeling and spectral analysis. For nonstationary series, they include methods for detrending and filtering. Also included is a treatment of multivariate series, as well as a discussion of the Kalman filter state-space model. Knowledge of the SAS package is required. Prerequisites: MATH 5358/STATS 5358 (Regression Analysis) and MATH 5313/STATS 5313.

MATH 6357. NONPARAMETRIC STATISTICS. 3 Hours.
This is a survey of classical nonparametric methods for inference in standard observational settings (one-sample, two-sample, k-samples and the univariate linear model), and includes a development of U-statistics, rank statistics and their asymptotic distribution theory. The mathematical level is fairly high. Prerequisite: MATH 5313/STATS 5313.

MATH 6390. BAYESIAN DATA ANALYSIS. 3 Hours.
Introduces the Bayesian framework to statistical inference and describes effective approaches for Bayesian modeling and computation. Prerequisite: Mathematical Statistic; statistical computing.

MATH 6391. SPECIAL TOPICS IN MATHEMATICS. 3 Hours.
Faculty directed individual study and research. May be repeated for credit when the content changes.

MATH 6399. DISSERTATION. 3 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree in mathematics.

MATH 6699. DISSERTATION. 6 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree in mathematics.

MATH 6999. DISSERTATION. 9 Hours.
Prerequisite: admission to candidacy for the Doctor of Philosophy degree in mathematics.

MATH 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.

COURSES

MSCI 6399. DISSERTATION. 3 Hours.

MSCI 6699. DISSERTATION. 6 Hours.

MSCI 6999. DISSERTATION. 9 Hours.

MSCI 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
COURSES

STATS 1308. ELEMENTARY STATISTICAL ANALYSIS. 3 Hours.
Topics may include collection, analysis, presentation, and interpretation of data. Analysis includes descriptive statistics, probability, relationships between variables and graphs, elementary statistical models, hypothesis testing, inference, estimation, correlation, regression and confidence intervals. The use of mathematical software and calculators is required. See course syllabus for details.

STATS 3302. MULTIVARIATE STATISTICAL METHODS. 3 Hours.
Topics in multivariate data analysis with applications in various areas of interest, including multiple regression, analysis of experimental designs, covariate adjustment, non-linear regression and the use of standard multivariate statistical packages. Offered as MATH 3302 and STATS 3302; credit will be granted in only one department. Prerequisite: C or better in MATH 3313 or STATS 3313 or MATH 3316 or STATS 3316 or MATH 3351 or BIOL 3351 or consent of the instructor.

STATS 3313. INTRODUCTION TO PROBABILITY. 3 Hours.
Basic concepts in probability, random variables, probability distributions, functions of random variables, moment generating functions, central limit theorem and its role in statistics, joint probability functions and joint probability density functions, joint cumulative distribution functions, conditional and marginal probability distributions, covariance and correlation coefficients, transformation and order statistics. Offered as MATH 3313 and STATS 3313; credit will be granted in only one department. Prerequisite: C or better in MATH 2326, or student group.

STATS 3316. STATISTICAL INFERENCE. 3 Hours.
A comprehensive study of basic data analysis, focused on reasoning process of statistical investigations from asking question and collecting data to analyzing data and drawing inferences. Topics include exploratory data analysis, sampling, sampling distribution, estimation, hypothesis tests, regression, and ANOVA, with an emphasis on applications of these techniques using statistical software. Offered as MATH 3316 and STATS 3316; credit will be granted in only one department. Prerequisite: C or better in 6 hours from the following: MATH 1302, MATH 1308, MATH 1322, MATH 1323, MATH 1330, MATH 1331, MATH 1332, MATH 1402, MATH 1421, MATH 1426, MATH 2425, MATH 2326, MATH 3300, MATH 3307, MATH 3314, MATH 3319, or MATH 3330; HONR-SC 1426, HONR-SC 2425, or student group.

STATS 4311. STOCHASTIC MODELS AND SIMULATION. 3 Hours.
A study of processes, whose outcomes are governed by chance, through a combination of lectures and computer lab sessions. Experiments include random number generation, coin tossing and other games of chance, random walks, Markov Chains, Poisson processes, birth-death processes, branching processes, and Brownian Motion. A foundation for modeling random phenomena in sciences, engineering and business. Prerequisite: C or better in MATH 2326 and knowledge of basic probability (MATH 3313/STATS 3313 or MATH 3351/Biol 3351 or equivalent), or consent of instructor, or student group.

STATS 4313. MATHEMATICAL STATISTICS. 3 Hours.
A continuation of MATH 3313. Random sampling and sampling distributions, estimation of unknown parameters and main properties of estimators, confidence intervals for unknown parameters, testing of hypotheses. Prerequisite: C or better in MATH 3313 or STATS 3313.

STATS 5305. STATISTICAL METHODS. 3 Hours.
Topics include descriptive statistics, numeracy, and report writing; basic principles of experimental design and analysis; regression analysis; data analysis using the SAS package. Prerequisite: consent of the instructor.

STATS 5312. MATHEMATICAL STATISTICS I. 3 Hours.
Random variables and their expectations, some special distributions, moment generating functions, transformations of bivariate random variables, sampling distribution of statistics, Central Limit Theorem, confidence intervals, maximum likelihood estimation, introduction to hypothesis testing, maximum likelihood tests. Prerequisite: MATH 3335 or consent of instructor.

STATS 5313. MATHEMATICAL STATISTICS II. 3 Hours.
Multivariate distributions, consistency and limiting distributions, Rao-Cramer lower bound and efficiency, sufficiency and completeness, most powerful tests, uniformly most powerful tests, likelihood ratio test, the sequential probability ratio test, minimax and classification procedures. Prerequisite: MATH 5312/STATS 5312.

STATS 5314. EXPERIMENTAL DESIGN. 3 Hours.
This course covers the classical theory and methods of experimental design, including randomization, blocking, one-way and factorial treatment structures, confounding, statistical models, analysis of variance tables and multiple comparisons procedures. Prerequisite: MATH 5305/STATS 5305 or MATH 5355/STATS 5355 or permission of instructor.

STATS 5353. APPLIED LINEAR MODELS. 3 Hours.
The course covers, at an operational level, three level topics: 1) the univariate linear model, including a self-contained review of the relevant distribution theory, basic inference methods, several parameterizations for experimental design and covariate-adjustment models and applications, and power calculation; 2) the multivariate linear model, including basic inference (e.g. the four forms of test criteria and simultaneous methods), applications to repeated measures experiments and power calculation; and 3) the univariate mixed model, including a discussion of the likelihood function and its maximization, approximate likelihood inference, and applications to complex experimental designs, missing data, unbalanced data, time series observations, variance component estimation, random effects estimation, power calculation and a comparison of the mixed model's capabilities relative to those of the classical multivariate model. Knowledge of the SAS package is required. Prerequisite: MATH 5358/STATS 5358 (Regression Analysis) or equivalent.
STATS 5354. CATEGORICAL DATA ANALYSIS. 3 Hours.
This course covers classical methods for analyzing categorical data from a variety of response/factor structures (univariate or multivariate responses, with or without multivariate factors), based on several different statistical rationales (weighted least squares, maximum likelihood and randomization-based). Included are logistic regression, multiple logit analysis, mean scores analysis, observer agreement analysis, association measures, methods for complex experimental designs with categorical responses and Poisson regression. The classical log-linear model for the association structure of multivariate responses is briefly reviewed. Randomization-based inference (e.g. Mantel-Haenzel) is discussed as well. The necessary distribution theory (multinomial, asymptotics of weighted least squares and maximum likelihood) are discussed at an operational level. Knowledge of the SAS package is required. Prerequisite: MATH 5358, or MATH 5305, or IE 5318 or by consent of instructor.

STATS 5355. STATISTICAL THEORY FOR RESEARCH WORKERS. 3 Hours.
Designed for graduate students not majoring in mathematics. Topics include basic probability theory, distributions of random variables, point estimation, interval estimation, testing hypotheses, regression, and an introduction to analysis of variance. Graduate credit not given to math majors. Prerequisite: calculus MATH 1426/MATH 2425/MATH 2326 or permission of instructor.

STATS 5356. APPLIED MULTIVARIATE STATISTICAL ANALYSIS. 3 Hours.
Statistical analysis for data collected in several variables, topics including sampling from multivariate normal distribution, Hotelling's T2, multivariate analysis of variance, discriminant analysis, principal components, and factor analysis. Prerequisite: MATH 5312/STATS 5312 or consent of instructor.

STATS 5357. SAMPLE SURVEYS. 3 Hours.
A comprehensive account of sampling theory and methods, illustrations to show methodology and practice, simple random sampling, stratified random sample, ratio estimates, regression estimates, systematic sampling, cluster sampling, and nonsampling errors. Prerequisite: MATH 5312/STATS 5312 or consent of instructor.

STATS 5358. REGRESSION ANALYSIS. 3 Hours.
A comprehensive course including multiple linear regression, non-linear regression and logistic regression. Emphasis is on modeling, inference, diagnostics and application to real data sets. The course begins by developing a toolbox of methods via a sequence of guided homework assignments. It culminates with projects based on consulting-level data analysis problems involving stratification, covariate adjustment and messy data sets. Some knowledge of the SAS package is required. Prerequisites: MATH 5312/STATS 5312 or MATH 5305/STATS 5305 with a B or better or permission of the instructor.

STATS 5359. SURVIVAL ANALYSIS. 3 Hours.
This course covers analysis of lifetime data with applications in engineering and biomedical research. Topics may include survival function, hazard function, cumulative hazard function, parametric distributions to model lifetime data, censoring, Kaplan-Meier estimator, testing for survival times for two or more groups, Cox proportional hazards model (both fixed and time dependent covariate), parametric regression models, regression diagnostics, accelerated failure time models, sample size determination, extensive use of R statistical software. Prerequisites: MATH 5305/STATS 5305 or MATH 5312/STATS 5312 or permission of instructor.

STATS 6353. GENERALIZED LINEAR MODELS. 3 Hours.
This course covers modern methods for analyzing Bernoulli, multinomial and count data. It begins with a development of generalized linear model theory, including the exponential family, link function and maximum likelihood. Second is a discussion of the case of models for independent observations. Next is a discussion of models for repeated measures, based on quasi-likelihood methods. These include models (such as Markov chains) for categorical time series. Next is a treatment of models with random effects. Finally is a discussion of methods for handling missing data. Knowledge of the SAS package is required. Prerequisites: MATH 5358/STATS 5358 (Regression Analysis) and preferably MATH 5313/STATS 5313. (Students without 5313 can still succeed but must deal with the slightly higher mathematical level of this course.).

STATS 6356. TIME SERIES ANALYSIS. 3 Hours.
This course covers classical methods of time series analysis, for both the time and frequency domains. For covariance stationary series, these include ARIMA modeling and spectral analysis. For nonstationary series, they include methods for detrending and filtering. Also included is a treatment of multivariate series, as well as a discussion of the Kalman filter state-space model. Knowledge of the SAS package is required. Prerequisites: MATH 5358/STATS 5358 (Regression Analysis) and MATH 5313/STATS 5313.

STATS 6357. NONPARAMETRIC STATISTICS. 3 Hours.
This is a survey of classical nonparametric methods for inference in standard observational settings (one-sample, two-sample, k-samples and the univariate linear model), and includes a development of U-statistics, rank statistics and their asymptotic distribution theory. The mathematical level is fairly high. Prerequisite: MATH 5313/STATS 5313.

STATS 6390. BAYESIAN DATA ANALYSIS. 3 Hours.
Introduces the Bayesian framework to statistical inference and describes effective approaches for Bayesian modeling and computation. Prerequisite: Mathematical Statistic; statistical computing.
Mathematics - Graduate Programs

Objective

The objectives of the UT Arlington Mathematics Department’s graduate program are:

- Develop the students’ ability to do independent research and prepare them for more advanced studies in mathematics.
- Provide advanced training and preparation for professional careers as mathematicians, mathematics teachers, and those employed in engineering, scientific and business fields.

Graduate work will be offered in algebra, complex and real variables, data science, differential equations, functional analysis, geometry, mathematics education, numerical analysis, probability, statistics and topology.

Admissions Requirements

MASTER OF SCIENCE PROGRAM

For unconditional admission, a student must meet the following requirements:

- A B.A. or B.S. degree in mathematics or closely related field.
- An overall GPA in the final 60 hours of coursework of a 3.0 or better, as calculated by the Graduate School, on a 4.0 scale.
- Minimum of 350 on the verbal and 650 on the quantitative portions of the Graduate Record Examination (GRE) if taken prior to August 2011. Minimum of 143 on the verbal and 151 on the quantitative portions of the GRE if taken after August 2011.
- For applicants whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (or a minimum score of 213 on a computer-based test, or a minimum score of 79 on an internet-based test) or a minimum score of 40 on the Test of Spoken English.
- Three favorable letters of recommendation from people familiar with the applicant’s academic work.

Applicants who do not satisfy requirements 2 or 3 above may be considered for unconditional admission if further review of their undergraduate transcript, recommendation letters, correspondence or direct interactions with mathematics faculty, and statement of professional or research interests indicates that they are qualified to enter the Master’s Program without deficiency.

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in the first 12 hours of graduate coursework at UT Arlington.

Students who are unconditionally admitted or admitted on probation will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the fall semester, and must have a GPA of 3.0 or better in the last 60 undergraduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain the fellowship.

Applicants may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

MASTER OF ARTS PROGRAM

For unconditional admission a student must meet items 1-3 or 3-5.

- A B.S. or B.A. degree with at least 24 hours of mathematics coursework with a GPA of at least 3.0, as calculated by the Graduate School on a 4.0 scale.
- Minimum of 400 on the verbal and 600 on the quantitative portions of the Graduate Record Examination (GRE) if taken prior to August 2011. Minimum of 146 on the verbal and 148 on the quantitative portions of the GRE if taken after August 2011.
- Three favorable letters of recommendation from people familiar with the applicant’s academic work and/or professional work.
- A B.S. or B.A. degree with a GPA of at least 3.0, as calculated by the Graduate School on a 4.0 scale.
- Certified to teach mathematics at the Secondary Level (Secondary Mathematics Certification).

Applicants who do not satisfy requirements 1 or 2 above may be considered for unconditional admission if further review of their undergraduate transcript, recommendation letters, correspondence or direct interactions with mathematics faculty, and statement of professional or research interests indicates that they are qualified to enter the Master’s Program without deficiency.

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in the first 12 hours of graduate coursework at UT Arlington.
Applicants may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

**Master of Science Degree Requirements**

The Department of Mathematics offers master's degree programs in mathematics with additional emphasis in applied mathematics, computational mathematics, mathematics education, pure mathematics, and statistics. All students are to use the thesis plan, thesis-substitute plan, or non-thesis plan.

All students in Master of Science program must complete one of the following:

**General Mathematics core requirements**:  
MATH 5307  MATHEMATICAL ANALYSIS I  3  
MATH 5333  LINEAR ALGEBRA AND MATRICES  3  
Select one of the following tracks:  
General Mathematics:  15  
MATH 5317  REAL ANALYSIS  3  
MATH 5322  COMPLEX VARIABLES I  3  
MATH 5327  FUNCTIONAL ANALYSIS I  3  
MATH 5331  ABSTRACT ALGEBRA I  3  
MATH 5338  NUMERICAL ANALYSIS I  3  
Applied Mathematics:  15  
MATH 5300  INTRODUCTION TO SCIENTIFIC COMPUTING  3  
Select four of the following:  12  
MATH 5350  APPLIED MATHEMATICS I  
MATH 5351  APPLIED MATHEMATICS II  
MATH 5320  ORDINARY DIFFERENTIAL EQUATIONS  
MATH 5321  APPLIED PARTIAL DIFFERENTIAL EQUATIONS  
An area-related graduate course chosen in consultation with the student's advisor.  3  
Computational Mathematics:  15  
MATH 5300  INTRODUCTION TO SCIENTIFIC COMPUTING  3  
MATH 5338  NUMERICAL ANALYSIS I  3  
MATH 5339  NUMERICAL ANALYSIS II  3  
MATH 5371  APPLIED NUMERICAL LINEAR ALGEBRA  3  
 or MATH 5373  NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS  
An area-related graduate course chosen in consultation with the student's advisor.  3  
Data Science:  15  
MATH 5300  INTRODUCTION TO SCIENTIFIC COMPUTING  3  
MATH 5305  STATISTICAL METHODS  3  
MATH 5371  APPLIED NUMERICAL LINEAR ALGEBRA  3  
 or MATH 6310  FOUNDATION OF DATA SCIENCES  
Select 2 of the following:  6  
MATH 5312  MATHEMATICAL STATISTICS I  3  
MATH 5338  NUMERICAL ANALYSIS I ( OR AN AREA-RELATED COURSE CHOSEN IN CONSULTATION WITH THE STUDENT'S ADVISOR )  3  
MATH 6311  OPTIMIZATION ON BIG DATA  3  
MATH 6312  DATA MINING  3  
Mathematics Education:  15  
MATH 5300  INTRODUCTION TO SCIENTIFIC COMPUTING  3  
MATH 5305  STATISTICAL METHODS  3  
Select three of the following:  9  
MATH 5341  MODERN GEOMETRY  
MATH 5342  CONCEPTS AND TECHNIQUES IN ALGEBRA  
MATH 5344  MATHEMATICS-SPECIFIC TECHNOLOGIES

**Total Hours**: 21

In addition:

a. Those students enrolled in the non-thesis plan must take at least 15 other hours of electives approved by the graduate advisor.

b. Those students enrolled in the thesis substitute plan must take MATH 5395 SPECIAL PROJECT, and must take at least nine other hours of electives.

c. Those students enrolled in the thesis plan must take at least six hours of MATH 5398 / MATH 5698, and must take at least three other hours of electives.

1Core requirements can also be fulfilled by completing core requirements in the BS-Ph.D. track in the Doctoral program.

2Electives may not be chosen from MATH 5336, MATH 5337, MATH 5340, MATH 5341, MATH 5342, MATH 5343, MATH 5344, MATH 5345, MATH 5346, MATH 5347, MATH 5348, MATH 5352, MATH 5370, MATH 5375, MATH 5376, MATH 5377, MATH 5378, MATH 5379. However, students in the Mathematics Education thesis or thesis-substitute track may choose three hours from MATH 5353, 5354, 5340-5348, 5352, 5370, 5375-5379. Students in the Mathematics Education non-thesis track may choose six hours from MATH 5336, 5337, 5340-5348, 5352, 5370, 5375-5379. Students in the Computational Mathematics track may choose three approved hours of electives in science and/or engineering. Elective courses for pure-mathematics track must be chosen from MATH 5300, MATH 5304, MATH 5317, MATH 5321, MATH 5326, MATH 5327, MATH 5329, MATH 5330, MATH 5332, MATH 5334, MATH 5380, or MATH 5392 courses offered in the pure-mathematics track.

Students in thesis degree plan or thesis-substitute plan must pass a final Master's exam.
Master of Arts Degree Requirements

The Master of Arts in Mathematics program in the Department of Mathematics is designed to extend undergraduate mathematics experiences in the area of specialized mathematics content for secondary school and early college mathematics teaching. The program focuses on enhancing mathematics teaching through innovative preparation in topics grounded in secondary school and early college mathematics from an advanced standpoint. The program embraces a philosophy of teaching and learning mathematics that is consistent with the landmark Standards documents produced by the National Council of Teachers of Mathematics.

The requirements for the Master of Arts degree thesis-substitute option are 30 hours of graduate courses from the Department of Mathematics and a 3-hour project. Students in the thesis-substitute plan must pass a final Master's exam. The requirements for a Master of Arts degree non-thesis option are 36 hours of graduate courses from the Department of Mathematics.

All students in the Master of Arts program must complete one of the following:

### Required Courses

Students must successfully complete 18 additional hours of electives. Electives may not be chosen from MATH 5375-MATH 5379.

Admission Requirements

For unconditional admission a student must meet the following requirements:

a. A master's degree or at least 30 hours of graduate coursework in mathematics or closely related fields.

b. A minimum GPA of 3.0, as calculated by the Graduate School, on a 4.0 scale in graduate coursework.

c. Minimum of 350 on the verbal and 700 on the quantitative portions of the Graduate Record Examination (GRE) if taken prior to August 2011.
   Minimum of 143 on the verbal and 155 on the quantitative portions of the GRE if taken after August 2011.

d. For applicants whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (or a minimum score of 213 on a computer-based test, or a minimum score of 79 on an internet-based test) or a minimum score of 40 on the Test of Spoken English.

e. Three favorable letters of recommendation from people familiar with the applicant's academic work and/or professional work.

Applicants who do not satisfy requirements 2 or 3 above may be considered for unconditional admission if further review of their undergraduate transcript, recommendation letters, correspondence or direct interactions with mathematics faculty, and statement of professional or research interests indicates that they are qualified to enter the Doctoral Program without deficiency.

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in the first 12 hours of graduate coursework at UT Arlington.

Applicants may be denied admission if they have less than satisfactory performance on a majority of the admission criteria described above.

A deferred decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline, but who otherwise appears to meet admission requirements, may be granted provisional admission.

DOCTORAL PROGRAM (B.S.-PH.D. TRACK)

For unconditional admission a student must meet the following requirements:

a. A bachelor's degree in mathematics or in a closely related field.

b. A minimum GPA of 3.00 on the 4.00 scale in undergraduate course work, as calculated by the UT Arlington Graduate School.

c. A minimum of 350 on the verbal part and 700 on the quantitative part of the Graduate Record Examination (GRE) if taken prior to August 2011.
   Minimum of 143 on the verbal and 155 on the quantitative portions of the GRE if taken after August 2011.
d. For an applicant whose native language is not English, a minimum score of 550 on the Test of English as a Foreign Language (or a minimum score of 213 on a computer-based test, or a minimum score of 79 on an internet-based test) or a minimum score of 40 on the Test of Spoken English.

e. At least three letters of recommendation from people familiar with the applicant's academic work and/or professional work.

Applicants who do not satisfy requirement 2 or/and 3 above may be considered for an unconditional admission if a further review of their undergraduate transcript(s), recommendation letters, correspondence or direct interactions with mathematics faculty, and statement of professional or research interests indicates that they are qualified to enter the B.S.-Ph.D. track program without deficiency.

If an applicant does not meet a majority of standards for an unconditional admission outlined above, he/she may be considered for a probationary admission after a careful examination of his/her application materials. A probationary admission requires that the applicant receive grades of B or better in the first 12 hours of graduate course work at UT Arlington.

An applicant may be denied admission if he/she has less than satisfactory performance on a majority of the admission criteria described above.

A deferred decision may be granted when the applicant's file is incomplete or when a denial on his/her admission is not appropriate. An applicant who is unable to supply all required documentation prior to the admission deadline but who otherwise appears to have met admission requirements may be granted provisional admission.

Students who are unconditionally admitted or admitted on probation will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the fall semester, must have a GPA of 3.0 in the last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain the fellowship.

**Ph.D. Degree Requirements**

A dynamic program leading to the Doctor of Philosophy degree in the mathematics will aim at both real and demonstrated competency on the part of the student over material from various branches of mathematics. The Doctor of Philosophy degree in Mathematics provides a program of study that may be tailored to meet the needs of those interested in applied or academic careers. This program allows students to pursue topics ranging from traditional mathematics studies to applied mathematical problems in engineering and sciences. The nature of the dissertation will range from research in mathematics to the discovery and testing of mathematical models for analyzing given problems in engineering and sciences and in locating and developing mathematical and computational techniques for deducing the properties of these models as to solve these problems effectively and efficiently. Such dissertations will be concerned with research problems from pure mathematics, applied mathematics, mathematics education and statistics.

The Department of Mathematics offers doctoral degree programs in Mathematics (algebra, applied mathematics, data science, geometry, mathematics education, numerical analysis and statistics).

All doctoral students must complete one of the following:

**1. General MATHEMATICS core requirements:**

<table>
<thead>
<tr>
<th>Course</th>

In addition to the mathematics core requirements, the student is required to take four area-related courses, in consultation with their advisor 12

**Total Hours** 27

**2. General STATISTICS core requirements:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5312</td>
<td>MATHEMATICAL STATISTICS I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5313</td>
<td>MATHEMATICAL STATISTICS II</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5317</td>
<td>REAL ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5319</td>
<td>PROBABILITY THEORY</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5358</td>
<td>REGRESSION ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 5359</td>
<td>SURVIVAL ANALYSIS</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition to the statistics core requirements, students are also required to take four area-related courses, chosen in consultation with their advisor 12

**Total Hours** 27
3. General MATHEMATICS-DATA SCIENCE (jointly with Computer Science and Engineering department) core requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5317</td>
<td>REAL ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5322</td>

<td>CSE 5311</td>
<td>DESIGN AND ANALYSIS OF ALGORITHMS</td>
<td>3</td>
</tr>
<tr>
<td>CSE 5334</td>
<td>DATA MINING</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition to the MATH/CSE core requirements, the student is required to take two area-related courses in MATH or CSE, chosen in consultation with their advisor.

Total Hours 27

Students in every degree plan must pass the preliminary examinations, a diagnostic evaluation, and a comprehensive examination. A minimum of 9 dissertation hours must be taken to satisfy the graduation requirement for doctoral degree in the Mathematics Department. Doctoral students must enroll in the appropriate 6699, 6999 or 7399 Dissertation Completion course the semester in which the dissertation is defended. Students typically enroll in these courses defend and apply for graduation in the same term. The Dissertation Completion course (7399) may only be taken once and cannot be repeated.

Ph.D. Degree Requirements for the B.S.-Ph.D. track

The student must complete either the mathematics or statistics core requirements.

1. General MATHEMATICS core requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5307</td>
<td>MATHEMATICAL ANALYSIS I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5317</td>
<td>REAL ANALYSIS</td>

<td>LINEAR ALGEBRA AND MATRICES</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5338</td>
<td>NUMERICAL ANALYSIS I</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition to the mathematics core requirements, the student is required to take four area-related courses, chosen in consultation with their advisor.

Total Hours 33

2. General STATISTICS core requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5307</td>
<td>MATHEMATICAL ANALYSIS I</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>or MATH 5359</td>
<td>SURVIVAL ANALYSIS</td>
<td></td>
</tr>
</tbody>
</table>

In addition to the statistics core requirements, students are also required to take four area-related courses, chosen in consultation with their advisor.

Total Hours 33

3. General MATHEMATICS-DATA SCIENCE (jointly with Computer Science and Engineering department) core requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5307</td>
<td>MATHEMATICAL ANALYSIS I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5317</td>
<td>REAL ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5322</td>
<td>COMPLEX VARIABLES I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5327</td>
<td>FUNCTIONAL ANALYSIS I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5333</td>
<td>LINEAR ALGEBRA AND MATRICES</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5338</td>
<td>NUMERICAL ANALYSIS I</td>
<td>3</td>
</tr>
</tbody>
</table>
CSE 5301 DATA ANALYSIS & MODELING TECHNIQUES 3
CSE 5311 DESIGN AND ANALYSIS OF ALGORITHMS 3
CSE 5334 DATA MINING 3

In addition to the MATH/CSE core requirements, the student is required to take two area-related courses in MATH or CSE, chosen in consultation with their advisor. 6

Total Hours 33

The requirements for the preliminary examinations, diagnostic evaluation, and comprehensive examination are the same as the other tracks in the Ph.D. program. A minimum of 9 dissertation hours must be taken to satisfy the graduation requirement for doctoral degree in the Mathematics Department. Doctoral students must enroll in the appropriate 6699, 6999 or 7399 Dissertation Completion course the semester in which the dissertation is defended. Students typically enroll in these courses defend and apply for graduation in the same term. The Dissertation Completion course (7399) may only be taken once and cannot be repeated.

For additional information on the mathematics program, see the program entry in the Interdepartmental and Intercampus Programs section of this catalog.

Certificate of Applied Statistics Program

The admission standard is the same as that of Master of Science Program (http://catalog.uta.edu/science/math/graduate/#masterstext).

Certificate of Applied Statistics Requirements

The Certificate in Applied Statistics offers individuals with an undergraduate degree an opportunity to receive graduate instruction in applied statistics as a means of maintaining and enhancing their professional development. The certificate program will provide coursework in statistics to an individual whose undergraduate major was outside the area of statistics. Since the requirements for the certificate are substantially less than those for the Master’s Degree in Mathematics with a concentration in Statistics, the certificate can be earned in a much shorter time span. When applicable, the courses taken in the certificate program can also be used to satisfy a Master of Science in Mathematics degree requirement at UTA and other institutions. Consult with the graduate advisor for advice on graduate course transfer.

The Certificate in Applied Statistics requires that the students take and successfully complete the following courses.

Required Courses
STATS 5312 MATHEMATICAL STATISTICS I 3
STATS 5313 MATHEMATICAL STATISTICS II 3

Electives
Select three of the following: 9
STATS 5305 STATISTICAL METHODS
STATS 5314 EXPERIMENTAL DESIGN
STATS 5353 APPLIED LINEAR MODELS
STATS 5356 APPLIED MULTIVARIATE STATISTICAL ANALYSIS
STATS 5357 SAMPLE SURVEYS
STATS 5358 REGRESSION ANALYSIS
MATH 5392 SELECTED TOPICS IN MATHEMATICS (Statistical Quality Control)
MATH 5392 SELECTED TOPICS IN MATHEMATICS (Statistical Methods in Clinical Research)

Total Hours 15

Upon completion of the 15 hours of graduate courses from lists 1 and 2 with a minimum GPA of 3.0, the student is awarded the Certificate in Applied Statistics. The expected time to completion is 1 to 2 years. The time limit for completion of the certificate program is 6 years.

**Academic Advising: 406 Pickard Hall · 817-272-0939**

## Bachelor's Degrees in Mathematics

The Department of Mathematics offers programs leading to the Bachelor of Science Degree in Mathematics and the Bachelor of Arts Degree in Mathematics. The Bachelor of Science degree may also be acquired with the explicit addition of one of these options: actuarial science, applied mathematics, pure mathematics, statistics, data science, or secondary teaching pathway.

The Bachelor of Science pure math option is primarily intended for students wishing to pursue graduate work in mathematics. The applied mathematics option is aimed at students seeking careers as mathematicians in the emerging high-tech industries. The actuarial science option is intended for students with an interest in a career involving various applications of mathematics to the world of business. The data science option provides a mathematics major with the interdisciplinary skills to derive science and business insights from big data. The option with secondary teaching pathway is intended for students desiring to teach mathematics at the secondary school level, and is offered in coordination with UT Arlington's UTeach program. The Bachelor of Arts degree is intended for those students seeking a traditional liberal arts education with an emphasis in mathematics.

All students seeking a bachelor's degree in mathematics must take at least two mathematics sequences. A sequence is defined as a 3300-level course followed by a 4300-level course in the same general area of mathematics. Each of the two sequences must build from distinct 3300-level courses. The approved sequences are as follows:

<table>
<thead>
<tr>
<th>Sequence 1</th>
<th>Sequence 2</th>
<th>Total Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 3313 &amp; MATH 4311</td>
<td>INTRODUCTION TO PROBABILITY</td>
<td>6</td>
</tr>
<tr>
<td>or STATS 3313 &amp; STATS 4311</td>
<td>and STOCHASTIC MODELS AND SIMULATION</td>
<td></td>
</tr>
<tr>
<td>MATH 3313 &amp; MATH 4312</td>
<td>INTRODUCTION TO PROBABILITY</td>
<td>6</td>
</tr>
<tr>
<td>or STATS 3313 &amp; MATH 4312</td>
<td>and ACTUARIAL RISK ANALYSIS</td>
<td></td>
</tr>
<tr>
<td>MATH 3313 &amp; MATH 4313</td>
<td>INTRODUCTION TO PROBABILITY</td>
<td>6</td>
</tr>
<tr>
<td>or STATS 3313 &amp; STATS 4313</td>
<td>and MATHEMATICAL STATISTICS</td>
<td></td>
</tr>
<tr>
<td>MATH 3321 &amp; MATH 4321</td>
<td>ABSTRACT ALGEBRA I</td>
<td>6</td>
</tr>
<tr>
<td>MATH 3335 &amp; MATH 4303</td>
<td>ANALYSIS I</td>
<td>6</td>
</tr>
<tr>
<td>MATH 3335 &amp; MATH 4334</td>
<td>and INTRODUCTION TO TOPOLOGY</td>
<td></td>
</tr>
<tr>
<td>MATH 3335 &amp; MATH 4335</td>
<td>ANALYSIS I</td>
<td>6</td>
</tr>
<tr>
<td>&amp; MATH 3335</td>
<td>and ADVANCED MULTIVARIABLE CALCULUS</td>
<td></td>
</tr>
<tr>
<td>MATH 3345 &amp; MATH 4345</td>
<td>ANALYSIS I</td>
<td>6</td>
</tr>
<tr>
<td>&amp; MATH 4345</td>
<td>and NUMERICAL ANALYSIS &amp; COMPUTER APPLICATIONS II</td>
<td></td>
</tr>
<tr>
<td>MATH 3314 &amp; MATH 4314</td>
<td>DISCRETE MATHEMATICS</td>
<td>6</td>
</tr>
<tr>
<td>MATH 3318 &amp; MATH 4324</td>
<td>DIFFERENTIAL EQUATIONS</td>
<td>6</td>
</tr>
<tr>
<td>MATH 3330 &amp; MATH 4330</td>
<td>INTRODUCTION TO LINEAR ALGEBRA AND VECTOR SPACES</td>
<td>6</td>
</tr>
</tbody>
</table>

It is strongly recommended that mathematics majors take MATH 3330 and MATH 3300 as early as possible, since these courses are prerequisites for many other 3000/4000-level courses. It is suggested to take MATH 3330 simultaneously with Calculus III. Mathematics majors must pass MATH 3300 before attempting the required courses MATH 3321 and MATH 3335. It is strongly recommended that mathematics majors with little or no computer programming experience satisfy the computer programming requirement as early as possible with CSE 1310 INTRODUCTION TO COMPUTERS & PROGRAMMING, CSE 1311, CSE 1320, CSE 1325 OBJECT-ORIENTED PROGRAMMING, or MAE 2360 NUMERICAL ANALYSIS & PROGRAMMING.
Teacher Certification

Students interested in earning a Bachelor of Science degree with a major in mathematics with secondary teacher certification should refer to the “Bachelor of Science in Mathematics with Secondary Teaching Pathway” degree plan for teacher certification requirements. Students should also see an advisor in the UTeach Arlington department.

Second Major

A student who satisfies the requirements for any other baccalaureate degree qualifies for having mathematics named as a second major upon completion of nine mathematics courses at 3000/4000 level (except for capstone mathematics courses specifically for prospective middle or secondary grades mathematics teachers). The following courses are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 3300</td>
<td>INTRODUCTION TO PROOFS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3316</td>
<td>STATISTICAL INFERENCE</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3318</td>
<td>DIFFERENTIAL EQUATIONS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3321</td>
<td>ABSTRACT ALGEBRA I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3330</td>
<td>INTRODUCTION TO LINEAR ALGEBRA AND VECTOR SPACES</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3335</td>
<td>ANALYSIS I</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following: 3

- MATH 4321  | ABSTRACT ALGEBRA II                     |       |
- MATH 4335  | ANALYSIS II                             |       |
- MATH 4334  | ADVANCED MULTIVARIABLE CALCULUS         |       |

Additional advanced hours 6

Besides the sequence MATH 3321-MATH 4321 or the sequence MATH 3335 and (MATH 4335 or MATH 4334), a second sequence must be part of the second major. The GPA requirements on the mathematics courses for a second major are identical to those listed below under the heading Graduation Requirements.

First-time Admission Requirements

Students who wish to apply for major status in mathematics must first complete the University and College of Science requirements and the specific requirements of the Department of Mathematics listed below.

- Overall GPA of 2.25;
- Minimum GPA of 2.25 in at least nine hours of mathematics courses in residence at the level of MATH 1426 or above, excluding capstone mathematics courses specifically for prospective middle or secondary grades mathematics teachers;
- At least six hours from the science or computer science courses listed in the mathematics degree plans; and
- Twelve hours of courses of the University core curriculum in disciplines other than science and mathematics.

Students currently enrolled at the University may qualify to change their major to mathematics by meeting the requirements listed above.

Satisfactory Academic Standard Requirement

Majors whose overall GPA or GPA in major courses falls below 2.25 will be required to change their major.

To re-enter as a mathematics major, the student must meet the requirements listed in the First-time Admissions Requirements section.

Non-Credit Courses

The following courses will not be counted for credit (as mathematics or electives) toward a bachelor's degree in mathematics:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1301</td>
<td>CONTEMPORARY MATHEMATICS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1302</td>
<td>COLLEGE ALGEBRA</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1308</td>
<td>ELEMENTARY STATISTICAL ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1315</td>
<td>COLLEGE ALGEBRA FOR ECONOMICS &amp; BUSINESS ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1316</td>
<td>MATHEMATICS FOR ECONOMICS AND BUSINESS ANALYSIS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1330</td>
<td>ARITHMETICAL PROBLEM SOLVING</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1331</td>
<td>GEOMETRICAL INference AND REASONING</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1332</td>
<td>FUNCTIONS, DATA, AND APPLICATIONS</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1402</td>
<td>COLLEGE ALGEBRA</td>
<td>4</td>
</tr>
</tbody>
</table>
Capstone mathematics courses specifically for prospective secondary grades mathematics teachers can be counted for credit only by those pursuing a B.S. with Secondary Teaching Certification.

## Math Course Registration and Requirements

Students may not be "pre-enrolled" in mathematics courses while prerequisite courses at another institution are pending grades. Only UT Arlington credits may be used for pre-enrollment purposes.

Canvas grades (or other learning-management system grades) may not be used as proof of completion for a prerequisite course. Students must submit either an official transcript to the registrar’s office, or submit a transcript with a letter grade for the prerequisite course to the undergraduate mathematics advisor in order to be enrolled in a mathematics course. If a student is submitting the transcript via email, the email must be sent from their UTA email address.

Select one of the following to complete one sequence:
MATH 4321  ABSTRACT ALGEBRA II
MATH 4334  ADVANCED MULTIVARIABLE CALCULUS
MATH 4335  ANALYSIS II

Additional advanced hours in mathematics which must include a second sequence 2 15

Select one of the following options: 6-8
2 courses in Modern and Classical Languages (Levels I and II or higher) in one language OR
2 courses closely related to the major area

Minor 18

The minor may be from any college 3

Sufficient number of hours to complete the total hours required for a degree

1  See general core requirements (p. 47).
2  Fifteen additional advanced hours (MATH 3301 or above, except for capstone mathematics courses specifically for prospective middle grades or secondary grades mathematics teachers), including a second sequence (see paragraph three in the opening section).
3  The student should consult the appropriate section in this catalog for the exact requirements for a minor in a given department or contact that department’s undergraduate advisor.

Capstone mathematics courses specifically for prospective middle grade mathematics teachers do not count toward a degree in mathematics. Capstone mathematics courses for secondary mathematics teachers will count only for those working on the BS in Mathematics with Secondary Teaching Pathway.

---

1. See general core requirements (p. 47).
2. ECON 2305 and ECON 2306, passed with a B or better, together satisfy the Society of Actuaries requirement for VEE certification in Economics.
3. MATH 3302 and MATH 4313, passed with a B or better, together satisfy the Society of Actuaries requirement for VEE certification in Applied Statistical Methods. (Pending approval from the Society of Actuaries.)
4. MATH 3313 and MATH 4312 should prepare a student to pass Exam P of the Society of Actuaries Associateship Course Catalog.
FINA 3313, passed with a B or better, satisfies the Society of Actuaries requirement for VEE certification in Corporate Finance. This course has prerequisites: ACCT 2302 PRINCIPLES OF ACCOUNTING II and ECON 2306. FINA 3313, FINA 3315, and FINA 3317 should prepare a student to pass Exam FM of the Society of Actuaries Associateship Course Catalog.

Capstone mathematics courses specifically for prospective middle grade mathematics teachers do not count toward a degree in mathematics. Capstone mathematics courses for secondary mathematics teachers will count only for those working on the BS in Mathematics with Secondary Teaching Pathway.

See www.soa.org (http://www.soa.org) for more details about VEE Certification and the Associateship Course Catalog.

</table>

Additional advanced hours in mathematics which must include a second sequence \(^2\) | 27

Select one of the following options:

| 2 courses in Modern and Classical Languages (Levels I and II or higher) in one language OR 2 courses closely related to the major area | 6-8 |

---

1. See general core requirements (p. 47).
2. 27 additional advanced mathematics hours (MATH 3301 or above, except for capstone mathematics courses specifically for prospective middle grades or secondary grades mathematics teachers).

Capstone mathematics courses specifically for prospective middle grade mathematics teachers do not count toward a degree in mathematics. Capstone mathematics courses for secondary mathematics teachers will count only for those working on the BS in Mathematics with Secondary Teaching Pathway.

### Requirements for Accelerated BS/MS Degrees: Bachelor of Science in Mathematics and Master of Science in Biomedical Engineering

- **UNIV 1131** STUDENT SUCCESS 1
- **General Core Requirements** (p. 47) 42
- Communication 1 6
- Language, Philosophy, and Culture 1 3
- Social and Behavioral Sciences 1 3
- Creative Arts 1 3
- Foundational Component Area 1 3
- **POLS 2311** GOVERNMENT OF THE UNITED STATES 3
- **POLS 2312** STATE AND LOCAL GOVERNMENT 3
- **HIST 1301** HISTORY OF THE UNITED STATES TO 1865 3
- **HIST 1302** HISTORY OF THE UNITED STATES, 1865 TO PRESENT 3
- **BIOL 1441** BIOLOGY I FOR SCIENCE MAJORS: CELL AND MOLECULAR BIOLOGY 8
  & **BIOL 1442** and BIOLOGY II FOR SCIENCE MAJORS: ECOLOGY AND EVOLUTION 9

</tbody>
</table>

1. See general core requirements (p. 47).
2. Six additional advanced hours (MATH 3301 or above, except for capstone mathematics courses specifically for prospective middle grades or secondary grades mathematics teachers). The need for a second sequence is fulfilled by Math 3313/4313.

Capstone mathematics courses specifically for prospective middle grade mathematics teachers do not count toward a degree in mathematics. Capstone mathematics courses for secondary mathematics teachers will count only for those working on the BS in Mathematics with Secondary Teaching Pathway.

Total Hours: 145

## Minor

Students in non-engineering majors may minor in mathematics by taking 18 hours of mathematics courses with an average GPA in mathematics courses of 2.0, and with at least nine hours of 3000/4000 level courses. The courses that may be counted toward a math minor are MATH 1426 and above, except for capstone mathematics courses specifically for prospective middle or secondary grades mathematics teachers. Nine hours of the minor must be taken in residence. Engineering majors seeking a math minor should refer to the College of Engineering section of this catalog for the requirements for the engineering math minor.

College of Engineering students may minor in mathematics by taking 18 hours of mathematics courses with an average GPA in mathematics courses of 2.0, and with at least nine hours of 3000/4000 level courses. Nine hours of the minor must be taken in residence. The courses that may be counted toward a math minor are MATH 1426 and above, with exceptions listed below for certain majors:

- MATH 3313 is prohibited for BSCPE and BSIE majors
- MATH 3318 and MATH 3319 is prohibited for BSME and BSAE majors
- Only one of MATH 3319 or 3330 may be counted toward the minor
- Only one of MATH 3318 or 3319 may be counted toward the minor
Physics

Undergraduate Degrees

- Bachelor of Science in Physics (p. 1310)
- Bachelor of Science in Physics with Engineering Emphasis (p. 1310)
- Bachelor of Science in Physics with Medical School Preparation (p. 1310)
- Bachelor of Arts in Physics (p. 1310)
- Bachelor of Science in Physics with Physical Science Teacher Certification (UTeach) (p. 1310)
- Bachelor of Science in Physics with Physics/Mathematics Teacher Certification (UTeach) (p. 1310)
- Bachelor of Science in Physics with Master's in Materials Science and Engineering (Fast Track Program) (p. 1310)

Minors

- Minor in Physics (p. 1323)
- Minor in Astronomy for Non-Physics Majors (p. 1323)
- Minor in Astrophysics for Non-Physics Majors (p. 1323)

Graduate Degrees

- Physics, M.S. (p. 1308)
- Physics and Applied Physics, Ph.D. (p. 1308)

COURSES

PHYS 1181. PROBLEMS IN MECHANICS. 1 Hour.
Primarily an independent study course involving problem-solving in general technical mechanics. The objective is to prepare the student whose background in physics is of a non-technical nature to do advanced study in curricula requiring technical physics. This course in combination with PHYS 1441 shall serve as an equivalent to PHYS 1443. Prerequisite: MATH 1426 and a grade of B or better in PHYS 1441. Department consent may be granted to take this course with Physics B AP score of 4 or 5.

PHYS 1182. PROBLEMS IN ELECTRICITY AND MAGNETISM. 1 Hour.
Primarily an independent study course involving problem-solving in general technical electricity and magnetism. The objective is to prepare the student whose background in physics is of a non-technical nature to do advanced study in curricula requiring technical physics. This course in combination with PHYS 1442 shall serve as an equivalent to PHYS 1444. Prerequisite: MATH 2425 and a grade of B or better in PHYS 1442. Department consent may be granted to take this course with Physics B AP score of 4 or 5.

PHYS 1188. SPECIAL PROBLEMS IN GENERAL PHYSICS. 1 Hour.
Primarily laboratory work and/or problem-solving in general technical physics. Prerequisite: PHYS 1441 or PHYS 1443 lecture credit equivalent or PHYS 1442 or PHYS 1444 lecture credit equivalent.

PHYS 1288. SPECIAL PROBLEMS IN GENERAL PHYSICS. 2 Hours.
Primarily laboratory work and/or problem-solving in general technical physics. Prerequisite: PHYS 1441 and PHYS 1442 lecture credit equivalent or PHYS 1443 and PHYS 1444 lecture credit equivalent.

PHYS 1300. INTRODUCTION TO MUSICAL ACOUSTICS. 3 Hours.
An introduction, for the music major, to the nature of periodic motion and its relation to music, characteristics of sound waves, sources of sound used in music, musical scales and temperament, mechanics of hearing, recording and reproduction of sound. May not be used to satisfy any of the requirements for a degree in physics.

PHYS 1301. PHYSICS FOR NON SPECIALISTS I. 3 Hours.
PHYS 1301 and 1302 constitute a one-year introductory course for liberal arts and business majors. How physics plays a role in everyday life; explanations of how things work. Helps develop analytical thinking. The first semester explains motion and forces and heat.

PHYS 1302. PHYSICS FOR NON SPECIALISTS II. 3 Hours.
Follows PHYS 1301 and explains sound, light, electricity and magnetism. Prerequisite: PHYS 1301 or permission from instructor.

PHYS 1351. ENERGY AND ENVIRONMENT. 3 Hours.
This course explores the fundamental laws of nature and natural processes related to energy production, transport, storage, and uses. The objective of this course is to provide students with an in-depth understanding of the Physics of Energy and its relation to the Earth Environment. The course is designed for non-science major students with two one-hour lectures (or one two-hour lecture) and one 2-hour laboratory per week.

PHYS 1441. GENERAL COLLEGE PHYSICS I. 4 Hours. (TCCN = PHYS 1401)
The first half of a one-year, non-calculus introductory physics course taken by pre-medical, pre-dental, biology and architectural majors and others. The study of mechanics, elasticity, fluids, heat and waves is supplemented by laboratory experiments. Familiarity with high school algebra and trigonometry is required.
PHYS 1442. GENERAL COLLEGE PHYSICS II. 4 Hours. (TCCN = PHYS 1402)
The second half of a one-year, non-calculus introductory physics course. Subject matter includes electricity and magnetism, light and optics, and modern physics. Prerequisite: PHYS 1441 or equivalent, or permission of instructor or student group.

PHYS 1443. GENERAL TECHNICAL PHYSICS I. 4 Hours. (TCCN = PHYS 2425)
The first half of a one-year technical course. Required for many science and engineering majors, exceeds premedical requirement. The study of physical phenomena in the fields of mechanics, heat, and waves. Concurrent enrollment in MATH 1426 (per prerequisite) is not recommended if no prior background in calculus. Prerequisite: MATH 1426 or consent of instructor.

PHYS 1444. GENERAL TECHNICAL PHYSICS II. 4 Hours. (TCCN = PHYS 2426)
The second half of a one-year technical course. The study of physical phenomena including electricity, magnetism, circuit theory, light, and optics. Prerequisites: PHYS 1443 or equivalent and MATH 2425 or concurrent enrollment.

PHYS 2311. MATHEMATICAL METHODS OF PHYSICS. 3 Hours.
Harmonic oscillators, waves, vector description of particles and fields, coordinate transformations, eigenvalue problems, and systems of linear equations. Prerequisites: PHYS 1444 or equivalent and MATH 2425.

PHYS 2315. INTRODUCTORY ASTROPHYSICS. 3 Hours.
This course introduces science and engineering majors to astrophysics. Subject matter includes the solar system, stellar properties and evolution, the Milky Way galaxy, normal and active galaxies, and cosmology. Prerequisite: PHYS 1444 or permission of the instructor.

PHYS 2321. COMPUTATIONAL PHYSICS. 3 Hours.
Development of computational techniques, including simulation, through applications to physical problems. A survey of topics including the multi-body problem, celestial mechanics, scattering, chaos, percolation, fractals, random processes, Fourier techniques in wave phenomena, Monte Carlo methods, and image reconstruction techniques. Prerequisite: PHYS 1444 or equivalent.

PHYS 3183. MODERN PHYSICS LABORATORY. 1 Hour.
Supplements the topics covered in PHYS 3313. Prerequisite: PHYS 3313 or concurrent enrollment.

PHYS 3313. INTRODUCTION TO MODERN PHYSICS. 3 Hours.
A brief introduction to the theories of quantum mechanics and statistical mechanics followed by a survey of atomic physics, conductors, semiconductors and modern electronic devices, nuclear and sub-nuclear physics. Prerequisites: PHYS 1444 or equivalent and MATH 2425.

PHYS 3315. ASTROPHYSICS AND COSMOLOGY. 3 Hours.
Diverse concepts in theoretical physics are applied to a wide range of astrophysical problems. Topics include stellar properties, spectra, evolution, radiation transport, nuclear reactions, degenerate matter, orbital mechanics, galactic dynamics, introductory general relativity and cosmology. Prerequisite: PHYS 3313 and MATH 3318 or MATH 3319.

PHYS 3316. ASTROBIOLOGY I. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include properties of life, origin and evolution of life on Earth, terrestrial geology and habitability, environmental forcings, extremophiles, mass extinctions, meteorites, searches for life in the solar system. Offered as BIOL 3316, GEOL 3316 and PHYS 3316; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent.

PHYS 3321. INTERMEDIATE ELECTRICITY AND MAGNETISM. 3 Hours.
Vector algebra and vector calculus applied to electrostatics, magnetostatics, the study of dielectric materials, and boundary value problems. Prerequisite: PHYS 2311 and MATH 3318 or MATH 3319.

PHYS 3341. INTRODUCTION TO BIOLOGICAL PHYSICS. 3 Hours.
This course will cover four parts: Part I - History of Biological Physics and the general introduction of Cell biology; Part II - Physics of Biomaterials including polymer Physics; DNA & RNA; Protein Structures, Functions and Physics; Part III - Physics of life genetics including molecular motors, ATP functions, Photosynthesis and Physics of genetic regulations; and Part IV - Physics of biological detection including Physics of Radiation diagnosis; Optical Imaging; Magnetic Resonance Imaging and Ultrasound imaging. Prerequisite: PHYS 1442 or PHYS 1444 or equivalent.

PHYS 3342. INTRODUCTION TO NANO-BIO PHYSICS. 3 Hours.
The objective of this course is to provide students with an in-depth understanding of the physics of nanotechnology and its biological applications. The course is composed of two parts: nanoparticle physics and nano-bio physics. In the first part, the physics of nanotechnology will be introduced. The second part is the biological applications of nanotechnology, for which the focus will be on how to understand the physics of these applications. The understanding of the physical objectives for these applications will be helpful for the exploration of nano-biotechnology. Key advances from the recent literature will be reviewed and introduced to students as supplemental topics. Prerequisite: PHYS 1442 or PHYS 1444 or equivalent.

PHYS 3358. ASTROBIOLOGY II. 3 Hours.
This is an interdisciplinary course between astrophysics, biology and geology. Topics include basic properties of life, habitability of Earth, studies of possible life regarding Mars, Europa & Titan, space missions, exoplanets and exomoons, stellar habitable zones, multistellar systems, exoEarths, biomarkers, SETI, Fermi paradox, Drake equation, cosmology. Offered as BIOL 3358, GEOL 3358, and PHYS 3358; credit will be granted only once. Prerequisite: PHYS 1441 & PHYS 1442 or equivalent and PHYS 2315 or PHYS 3315, or permission from instructor. Prerequisites for Biology majors: PHYS 1441 & PHYS 1442 or equivalent. Note that Astrobiology I is strongly recommended to students to be taken prior to Astrobiology II, but is not a prerequisite.
PHYS 3360. PHYSICS OF THE HUMAN BODY. 3 Hours.
This course will explore the fundamental laws and natural processes related to the mechanics, fluid dynamics, optics, and biophysics of the human body. It is designed for kinesiology pre-health, biology and nursing students seeking to understand the foundations and biophysical principles of human life. Note that Kinesiology students seeking to apply to science based graduate programs are advised to take PHYS 1441 and PHYS 1442 so the prerequisite requirement of these courses will not preclude the students for whom PHYS 3360 is intended from taking the course. Prerequisite: PHYS 1441.

PHYS 3366. SPECIAL TOPICS IN PRE-COLLEGE PHYSICAL SCIENCE INSTRUCTION. 3 Hours.
A laboratory oriented curriculum for teaching physical science and/or physics is developed and experienced. The developed curriculum is particularly appropriate for pre-college instruction. May be repeated for credit as the subject matter changes, but not more than six hours credit may be accumulated. Prerequisite: junior standing, six hours of science, three hours of education, and consent of the instructor.

PHYS 3345. OPTICS. 4 Hours.
Fundamental principles of physical and geometric optics, absorption and scattering, Planck's quantum theory of radiation, diffraction, interference, light sources, and spectra. Prerequisites: PHYS 1444 or equivalent and MATH 2425.

PHYS 3346. NUCLEAR AND PARTICLE PHYSICS. 4 Hours.
The study of atomic nuclei and the fundamental constituents of matter. Topics include nuclear structure, radioactivity, nuclear reactions, fission, fusion, particles and their interactions, the standard model of particle physics, experimental methods, accelerators, and examples from current research topics. Prerequisite: PHYS 3313.

PHYS 3345. ELECTRONICS. 4 Hours.
A study of electronic components and quantum devices and their application to circuits and instrumentation. Prerequisites: PHYS 3313 and MATH 2425.

PHYS 4081. UNDERGRADUATE RESEARCH IN PHYSICS. 0 Hours.
Independent research conducted on a selected topic under the supervision of a member of the Physics faculty. This course may be repeated. This is a non-credit course so cannot be used to meet degree requirements. Prerequisite: Permission of instructor.

PHYS 4117. INDIVIDUAL LEARNING BY SEMINAR. 1 Hour.
Individual instruction on using the seminar as a model of learning current topics in physics. An individual report is required. Prerequisite: 18 hours of physics and senior standing.

PHYS 4171. ADVANCED OPTICS LABORATORY. 1 Hour.
Special laboratory projects in advanced optics. Prerequisite: PHYS 3445 or permission of the instructor.

PHYS 4181. SPECIAL PROBLEMS. 1 Hour.
Selected projects in research or teaching laboratories, which may be repeated in any order for a total credit not to exceed four hours, unless authorized by the undergraduate advisor. Prerequisite: Permission of instructor and Physics undergraduate advisor.

PHYS 4185. ADVANCED ELECTRICITY AND MAGNETISM LABORATORY. 1 Hour.
Supplements the topics covered in PHYS 3321 and PHYS 4324. Prerequisite: PHYS 4324 or concurrent enrollment.

PHYS 4191. SPECIAL TOPICS IN PHYSICS. 1 Hour.
Selected topics arranged on an individual basis, which may be repeated with permission from instructor and Physics undergraduate advisor. Prerequisite: as determined for topic or permission from instructor.

PHYS 4271. ADVANCED OPTICS LAB. 2 Hours.
Special laboratory projects in advanced optics. Prerequisite: PHYS 3445 or permission of the instructor.

PHYS 4281. SPECIAL PROBLEMS. 2 Hours.
Selected projects in research or teaching laboratories, which may be repeated in any order for a total credit not to exceed four hours, unless authorized by the undergraduate advisor. Prerequisite: permission from the instructor and the Physics undergraduate advisor.

PHYS 4291. SPECIAL TOPICS. 2 Hours.
Selected topics arranged on an individual basis, which may be repeated with permission from instructor and Physics undergraduate advisor. Prerequisite: as determined for topic or permission from instructor.

PHYS 4315. THERMODYNAMICS AND STATISTICAL MECHANICS. 3 Hours.
Topics in classical thermodynamics include the laws of thermodynamics, Gibbs' and Helmholtz's free energies, the Maxwell relations, heat capacities, entropy change calculations, phase and chemical changes. Statistical mechanics centers on the partition function and its applications, such as the entropy of an ideal gas, the Maxwell velocity distribution, the heat capacity of a solid, photon statistics, and blackbody radiation. Fermi-Dirac and Bose-Einstein statistics. Prerequisite: PHYS 3313 and MATH 2326 or permission of the instructor.

PHYS 4319. ADVANCED MECHANICS. 3 Hours.
Coupled oscillators, central forces, Lagrange's equations, Hamilton's canonical equations, the moment of inertia tensor, and the application of Euler's angles to rotational motion. Prerequisite: PHYS 2311, PHYS 3321, and MATH 3318 or MATH 3319, or permission of the instructor.

PHYS 4324. ADVANCED ELECTRICITY AND MAGNETISM. 3 Hours.
Electromagnetic phenomena based on Maxwell's equations and particle-field interactions. Prerequisite: PHYS 3321 or permission of the instructor.
PHYS 4325. SOLID STATE PHYSICS. 3 Hours.
Classification of crystalline solids and elastic and thermal properties, electric and magnetic properties, and electronic properties of solids. An introduction to current research problems. Prerequisite: PHYS 4315 or permission of the instructor.

PHYS 4326. INTRODUCTION TO QUANTUM MECHANICS. 3 Hours.
Schrödinger equation and implications, the free particle, the one-electron atom, the potential barrier, and perturbation theory. Prerequisite: PHYS 3313, MATH 3318 or MATH 3319, or permission of the instructor.

PHYS 4327. INTRODUCTION TO QUANTUM MECHANICS II. 3 Hours.
This is a continuation of Introduction to Quantum Mechanics (PHYS 4326). The topics that will be covered will include: time-independent perturbation theory for non-degenerate states, degenerate perturbation theory, atoms with one or two electrons and molecules, Fermi and Bose gases, time-dependent perturbation theory, scattering theory, and introduction to relativistic quantum mechanics. Prerequisite: PHYS 4326 or permission from instructor.

PHYS 4343. RESEARCH METHODS - UTEACH. 3 Hours.
The purpose of this course is to present UTeach students with the tools scientists use to solve scientific problems. These tools enable scientists to develop new knowledge and insights, the most important of which are eventually presented in textbooks and taught in more conventional science classes. These tools include: design of experiments to answer scientific questions; use of statistics to interpret experimental results and deal with sampling errors; mathematical modeling of scientific phenomena; finding and reading articles in the current scientific literature; applying scientific arguments in matters of social importance; writing scientific papers; reviewing scientific papers; oral presentation of scientific work; use of probes and computers to gather and analyze data; ethical treatment of human subjects; laboratory safety. Research Methods is primarily a laboratory course, and most of these topics are developed in connection with 4 independent inquiries UTeach students design and carry out. Written inquiries will be evaluated as examples of scientific writing. Prerequisite: C or better in SCIE 1201 or SCIE 1334 or concurrent enrollment; junior or senior standing.

PHYS 4391. SPECIAL TOPICS. 3 Hours.
Selected topics arranged on an individual basis, which may be repeated with permission from instructor and Physics undergraduate advisor. Prerequisite: as determined for topic or permission from instructor.

PHYS 4393. HONORS THESIS IN PHYSICS. 3 Hours.
Required of all students in the University Honors College. During the senior year the honors physics major will perform a research project under the direction of a Physics Department faculty member.

PHYS 5193. READINGS IN PHYSICS. 1 Hour.
Conference course. May be repeated for credit.

PHYS 5194. RESEARCH IN PHYSICS. 1 Hour.
Conference course with laboratory. May be repeated for credit.

PHYS 5294. RESEARCH IN PHYSICS. 2 Hours.
Conference course with laboratory. May be repeated for credit.

PHYS 5305. CHAOS AND NONLINEAR DYNAMICS. 3 Hours.
Introduction to basic principles and concepts of chaos theory and their applications in diverse fields of research. Topics include chaotic and non-chaotic systems, stability analysis and attractors, bifurcation theory, routes to chaos and universality in chaos, iterated maps, Lyapunov exponents, fractal dimensions, multifractals, hamiltonian chaos, quantum chaos, controlling chaos, self-organized systems, and theory of complexity.

PHYS 5306. CLASSICAL MECHANICS. 3 Hours.
General principles of analytical mechanics, the kinematics of rigid bodies, canonical transformation, Hamilton-Jacobi theory.

PHYS 5307. QUANTUM MECHANICS I. 3 Hours.
Matrix formulation, theory of radiation, angular momentum, perturbation methods.

PHYS 5308. QUANTUM MECHANICS II. 3 Hours.
Approximate methods, symmetry and unitary groups, scattering theory. Prerequisite: PHYS 5307.

PHYS 5309. ELECTROMAGNETIC THEORY I. 3 Hours.
Boundary value problems in electrostatics and magnetostatics, Maxwell's equations.

PHYS 5310. STATISTICAL MECHANICS. 3 Hours.
Fundamental principles of statistical mechanics, Liouville theorem, entropy, Fermi-Dirac distribution, Bose-Einstein distribution, Einstein condensation, density matrix, quantum statistical mechanics, kinetic methods, and transport theory.

PHYS 5311. MATHEMATICAL METHODS IN PHYSICS I. 3 Hours.
Algebraic and analytical methods used in modern physics. Algebra: matrices, groups, and tensors, with application to quantum mechanics, the solid state, and special relativity. Analysis: vector calculus, ordinary and partial differential equations, with applications to electromagnetic and seismic wave propagation.

PHYS 5312. MATHEMATICAL METHODS IN PHYSICS II. 3 Hours.
Continuation of PHYS 5311 with a selection from the following topics. Algebra: matrix representations of the symmetric and point groups of solid state physics, matrix representations of the continuous groups O(3), SU(2), SU(3), SL(2,C), general covariance. Analysis: further study of analytic functions, Cauchy's theorem, Green's function techniques, orthogonal functions, integral equations. Prerequisite: PHYS 5311.
PHYS 5313. ELECTROMAGNETIC THEORY II. 3 Hours.
Modern tensorial treatment of classical electrodynamics, force on and field of a moving charge, derivation and application of 4-vector potential, Maxwell's equations in tensor form, field momentum and radiation. Prerequisite: PHYS 5309.

PHYS 5314. ADVANCED OPTICS. 3 Hours.
Electromagnetic wave equations, theory of diffraction, radiation scattering and dispersion, coherence and laser optics. Additional advanced topics of current interest.

PHYS 5315. SOLID STATE I. 3 Hours.
Crystal structure, lattice vibration, thermal properties, and band theory of solids.

PHYS 5316. SOLID STATE II. 3 Hours.
Electrical and magnetic properties of crystalline solids, magnetic resonance, and optical phenomena. Prerequisite: PHYS 5315.

PHYS 5317. STATISTICAL MECHANICS II. 3 Hours.
Methods in applied statistical mechanics. Topics may include fluctuations and critical phenomena, the Ising model, the master equation, transport in solids, and chaos. Prerequisite: PHYS 5310.

PHYS 5319. MATHEMATICAL METHODS IN PHYSICS III. 3 Hours.
Numerical methods for applied physics; computer techniques, numerical differentiation, integration, interpolation, extrapolation; differential equations, integral equations, statistical analysis; scientific computer library; artificial intelligence programming.

PHYS 5320. QUANTUM MECHANICS III. 3 Hours.
Quantum theory of radiation; relativistic equations; elements of quantum field theory; symmetries and gauge theories. Applications in elementary particle physics and solid-state physics. Prerequisite: PHYS 5308 and PHYS 5312.

PHYS 5325. INTRODUCTION TO ELEMENTARY PARTICLES I. 3 Hours.

PHYS 5326. INTRODUCTION TO ELEMENTARY PARTICLE PHYSICS II. 3 Hours.
Systematics of the quark model; the fundamental interactions of elementary particles; spin and relativistic kinematics; Dirac Equation; the standard electroweak model. Prerequisite: PHYS 5325.

PHYS 5328. SURFACE PHYSICS. 3 Hours.

PHYS 5330. PHYSICS OF SEMICONDUCTOR PROCESSING AND CHARACTERIZATION. 3 Hours.
Selection from the following topics: physics of crystal growth, lattice defects, impurity diffusion, ion-implantation, thin film growth and plasma etching. Physics of characterization techniques utilizing resistivity, carrier mobility and lifetimes, electrons, x-rays, ions, Rutherford backscattering, neutron activation analysis, positron annihilation spectroscopy, deep-level transient spectroscopy.

PHYS 5381. MECHANICS & HEAT FOR TEACHERS. 3 Hours.
This course is intended for students who wish to achieve a higher level of knowledge and effectiveness in fundamental physics (not available for M.S. or Ph.D. credit in Physics). Topics include: 1) Newton's laws of motion, gravitation, and planetary motion; 2) the basic laws of thermal and statistical physics; 3) oscillatory motion including waves and sound. Replaceable experiments will be demonstrated throughout the course.

PHYS 5382. ELECTROMAGNETISM FOR TEACHERS. 3 Hours.
This course is intended for students who wish to achieve a higher level of knowledge and effectiveness in fundamental physics (not available for M.S. or Ph.D. credit in Physics). Topics include: 1) Static charges, current flow, electric and magnetic fields; 2) simple DC/AC electrical circuits including examples from household circuit and practical electronic devices; 3) light and optics including examples such as cameras, microscopes and telescopes. Replaceable experiments will be demonstrated throughout the course.

PHYS 5383. MODERN PHYSICS FOR TEACHERS. 3 Hours.
This course is intended for students who wish to achieve a higher level of knowledge and effectiveness in fundamental physics (not available for M.S. or Ph.D. credit in Physics). Topics include: 1) Introduction to special relativity and quantum theory; 2) light and radiation; 3) applications to modern electrical devices; 4) nuclear and particle physics.

PHYS 5385. PHYSICS LAB TECHNIQUES FOR TEACHERS. 3 Hours.
This course is intended for students who wish to achieve a higher level of knowledge and effectiveness in fundamental physics (not available for M.S. or Ph.D. credit in Physics). Experiments demonstrating various topics are covered. Experiments include gravitational acceleration heat flow, harmonic motion, sound, electric magnetic fields, electric circuits, optic, x-rays and nuclear radiation.

PHYS 5391. SPECIAL TOPICS IN PHYSICS. 3 Hours.
Topics in physics, particularly from areas in which active research is being conducted, are assigned to individuals or small groups for intensive investigations. May be repeated for credit.

PHYS 5393. READINGS IN PHYSICS. 3 Hours.
Conference course. May be repeated for credit.
PHYS 5394. RESEARCH IN PHYSICS. 3 Hours.
Conference course with laboratory. May be repeated for credit.

PHYS 5398. THESIS. 3 Hours.

PHYS 5694. RESEARCH IN PHYSICS. 6 Hours.
Conference course with laboratory. May be repeated for credit.

PHYS 5698. THESIS. 6 Hours.

PHYS 6301. METHODS OF APPLIED PHYSICS I--ELECTRONICS. 3 Hours.
The analysis and design of electronic circuits for use in the laboratory. Transistors and integrated circuits in analog instrumentation. Digital logic. Information theory and signal processing.

PHYS 6302. METHODS OF APPLIED PHYSICS II--COMPUTERS IN PHYSICS. 3 Hours.
Applications of computers in physics. Acquisition and analysis of experimental data. Vector and parallel processing, image processing, simulation.

PHYS 6303. METHODS OF APPLIED PHYSICS III--SPECTROSCOPY. 3 Hours.
The principles (interactions, cross-sections, elastic and inelastic scattering, diffraction, coherence), the methodologies (sources, detectors, visualization), and applications (structure, dynamics, composition, excitations) of neutral and charged particle spectroscopies to condensed matter physics and materials science.

PHYS 6304. APPLIED PHYSICS INTERNSHIP. 3 Hours.
Applied physics and engineering research and training in industry or other science or engineering departments of U.T. Arlington or other institutions requiring applied physicists. Faculty supervision and submission of technical progress reports required.

PHYS 6391. SELECTED TOPICS IN APPLIED PHYSICS. 3 Hours.
Topics chosen from research areas in the Department of Physics or at one of the institutions or corporations participating in the traineeship program in applied physics; emphasis on industrial and engineering applications. May be repeated for credit.

PHYS 6399. DISSERTATION. 3 Hours.

PHYS 6604. APPLIED PHYSICS INTERNSHIP. 6 Hours.
Applied physics and engineering research and training in industry or other science or engineering departments of U.T. Arlington or other institutions requiring applied physicists. Faculty supervision and submission of technical progress reports required.

PHYS 6699. DISSERTATION. 6 Hours.

PHYS 6904. APPLIED PHYSICS INTERNSHIP. 9 Hours.
Applied physics and engineering research and training in industry or other science or engineering departments of U.T. Arlington or other institutions requiring applied physicists. Faculty supervision and submission of technical progress reports required.

PHYS 6999. DISSERTATION. 9 Hours.

PHYS 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student's degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Physics - Graduate Programs

Objective
The objective of graduate work in physics is to prepare the student for continued professional and scholarly development as a physicist. The Physics MS Degree Programs are designed to give the student advanced training in all fundamental areas of physics through formal courses and the options of some degree of specialization or participation in original research in one of a variety of projects directed by the faculty.

The Doctor of Philosophy in Physics and Applied Physics Program combines the traditional elements of a science doctoral program with courses in specifically applied topics and internship in a technological environment. It is designed to produce highly trained professionals with a broad perspective of the subject which may prepare them equally well for careers in academia or government or industry. Current research in the department is predominantly in the areas of condensed matter physics, medical biophysics, astrophysics, space physics, and high-energy and nuclear physics.

Admission Criteria
For unconditional admission to the Master of Science program in physics, the candidate must satisfy the general admission requirements of the University, including a minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by Graduate Admissions and favorable letters of recommendation from individuals able to assess the applicant's potential for success in a Masters program. In addition, the candidate should have satisfactorily completed at least 24 undergraduate hours of advanced physics and supporting courses and should have minimal GRE scores of 143 in Verbal and 151 in Quantitative.

Applicants not meeting the minimum requirements of the department or the University for either program may still be considered for unconditional acceptance if other information in their application indicates a reasonable probability of success in graduate studies in physics.

PROBATIONARY ADMISSION
If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first 12 hours of graduate coursework at UT Arlington.

DEFERRED AND PROVISIONAL ADMISSION
A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

DENIAL OF ADMISSION
A candidate may be denied admission if he or she have less than satisfactory performance on the admission criteria described above.

SCHOLARSHIPS AND FELLOWSHIPS
Students who are admitted will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by Graduate Admissions, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

Degree Requirements: Master of Science
For the Thesis Option, a minimum of 30 hours is required for the Master of Science degree, of which 24 hours, including a six hour thesis (minimum registration), will be in physics, and six hours may be selected from physics, mathematics, chemistry, earth & environmental sciences, biology, or engineering as approved by the Graduate Advisor.

For the Non-thesis Option, a minimum of 36 hours is required for the Master of Science degree. They will be in physics. But up to nine hours may be selected from mathematics, chemistry, earth & environmental sciences, biology, or engineering as approved by the Graduate Advisor. The student is required to pass an oral comprehensive exam in the last semester.

Admission Criteria
For unconditional admission to the Doctor of Philosophy program, an applicant must have a master's degree or 30 semester hours of graduate credit in physics or a related field and satisfy the general admission requirements of the University, including a minimum graduate coursework GPA of 3.0 on a 4.0 scale, as calculated by Graduate Admissions and favorable letters of recommendation from individuals able to assess the applicant's potential for success in a Ph.D. program. In addition, the applicant should have minimal GRE scores of 143 in Verbal and 151 in Quantitative.

Applicants not meeting the minimum requirements of the department or the University for either program may still be considered for unconditional acceptance if other information in their application indicates a reasonable probability of success in graduate studies in physics.
PROBATIONARY ADMISSION

If an applicant does not meet a majority of standards for unconditional admission outlined above, they may be considered for probationary admission after careful examination of their application materials. Probationary admission requires that the applicant receive a B or better in their first 12 hours of graduate coursework at UT Arlington.

DEFERRED AND PROVISIONAL ADMISSION

A deferred application decision may be granted when a file is incomplete or when a denied decision is not appropriate. An applicant unable to supply all required documentation prior to the admission deadline but who otherwise appears to meet admission requirements may be granted provisional admission.

DENIAL OF ADMISSION

A candidate may be denied admission if he or she have less than satisfactory performance on the admission criteria described above.

SCHOLARSHIPS AND FELLOWSHIPS

Students who are admitted will be eligible for available scholarship and/or fellowship support. Award of scholarships or fellowships will be based on consideration of the same criteria utilized in admission decisions. To be eligible, candidates must be new students coming to UT Arlington in the Fall semester, must have a GPA of 3.0 in their last 60 undergraduate credit hours plus any graduate credit hours as calculated by the Graduate School, and must be enrolled in a minimum of 6 hours of coursework in both long semesters to retain their fellowships.

Degree Requirements: Doctor of Philosophy

Each candidate must complete the following program requirements:

a. Demonstration of competence in a minimum of 39 credit hours of core courses chosen under the guidance of the supervising committee from the following (or from courses approved in advance by the Graduate Studies Committee):

<table>

Physics - Undergraduate Programs

Academic Advising: 107 Life Science Building • 817.272.9685

Degree Programs

The Department of Physics offers five Bachelor of Science degree programs, a Bachelor of Arts degree program, and a Bachelor of Science in Physics/Master’s in Materials Science and Engineering Fast Track Program.

The Bachelor of Science degree programs include one which prepares students for careers in science and technology, another for medical school preparation, and a third for students wanting to minor in an Engineering discipline. When combined with the required UTeach education courses, the Bachelor of Science program is also appropriate for students who are interested in becoming schoolteachers.* The Bachelor of Arts degree in Physics is intended for students who seek a broader education while retaining a firm foundation in Physics. The Bachelor of Science degree in Physics/Master’s degree in Materials Science and Engineering Fast Track Program enables outstanding senior undergraduate students in Physics to satisfy degree requirements leading to a Bachelor’s degree in Physics while simultaneously pursuing a Master’s degree in Materials Science and Engineering.

Students considering a Physics major should schedule an appointment with the undergraduate advisor in Physics to discuss their degree and career options. Physics majors are encouraged to participate in research projects under faculty guidance for course credit or financial reward. In this way, undergraduate students have the choice of gaining hands-on experience from a variety of research disciplines, including astrophysics, biophysics, computational physics, high energy physics, medical physics, optics, space physics, and theoretical and experimental condensed matter physics.

The faculty of the Physics Department encourages qualified students to participate in the university’s Honors College. Scholarships may be offered every year to new students majoring in Physics.

* Students desiring certification for teaching at the secondary level must fulfill specific requirements for the appropriate Physics B.S. Teacher Certification degree.

Second Major in Physics

Students who satisfy the requirements for any other baccalaureate degree qualify to have Physics named as a second major upon completion of the following courses:

<table>

Teacher Certification

Students who are interested in earning a Bachelor of Science degree in Physics with Secondary Teacher Certification should refer to the Bachelor of Science in Physics with Physical Science Teacher Certification and the Bachelor of Science in Physics with Physics/Mathematics Teacher Certification degree plans for requirements. Teacher certification is offered through the UTeach program.

Requirements for a Bachelor of Science in Physics

This program provides students with a rigorous training in Physics, which is designed to prepare for a career in science, technology, and/or engineering research.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 47).

**General Electives**

10

Total 36 hours of coursework must be advanced (3000/4000-level) to earn degree.

**Total Hours**

123

* See General Core Requirements (p. 47) for approved courses.

**TYPICAL COURSE SEQUENCE**

Details of a personal course sequence should be made with the guidance of the Physics undergraduate advisor, particularly since many courses in Physics are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426 CALCULUS I, in the first semester.

**First Year**

See General Core Requirements (p. 47) for approved courses.

Requirements for a Bachelor of Science in Physics with Engineering Emphasis

This program allows students to augment a rigorous training in Physics with the choice of a minor in a suitable engineering discipline, thus combining a theoretical understanding of the basic physical theories with a practical, more detailed understanding given in the College of Engineering. Such a combination would be a bonus for employment in the engineering-type professions often chosen by Physics majors.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 47).

General Electives

6

36 hours of coursework must be advanced (3000/4000-level) to earn degree.

Total Hours

120

* See General Core Requirements (p. 47) for approved courses.

TYPICAL COURSE SEQUENCE

Details of a personal course sequence should be made with the guidance of the Physics undergraduate advisor as well as the undergraduate advisor in the appropriate Engineering department. Many courses in Physics are not offered every semester, and Engineering coursework and sequences are determined by individual departments in the College of Engineering. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426 CALCULUS I, in the first semester.

Total Hours: 119-121

* See General Core Requirements (p. 47) for approved courses.
** Actual number of courses-hours and course sequence determined by appropriate Engineering department.

**Requirements for a Bachelor of Science in Physics with Medical School Preparation**

This program offers the broad background in fundamental science and strong problem-solving ability of a Physics degree as well as specific Biology and Chemistry medical school requirements. The combination of skills developed in this program is designed to provide the intellectual foundation necessary for excellence in research and the practice of medicine.

The University Core Curriculum consists of 42 credit hours from University Core Curriculum (p. 47).

**PRE-PROFESSIONAL COURSES**

**RECOMMENDED CORE REQUIREMENTS**

- ENGL 1301 Rhetoric and Composition I 3
- ENGL 1302 Rhetoric and Composition II 3
- Creative Arts 3
- POLS 2311 Government of the United States 3
- POLS 2312 State and Local Government 3
- Language, Philosophy and Culture * 3
- PHYS 1443 General Technical Physics I 4
- PHYS 1444 General Technical Physics II 4
- MATH 1426 Calculus I 4
- MATH 2425 Calculus II 4
- Social/Behavioral Science * 3
- HIST 1301 History of the United States to 1865 3
- HIST 1302 History of the United States, 1865 to Present 3
- Foundational Component Area * 3

**PROGRAM REQUIREMENTS**

Communication Competence - satisfied by PHYS 4117
Computer Use Competence - satisfied by Computer Science requirement for major

**PROFESSIONAL COURSES**

Select one of the following for Computer Science requirement:
- DATA 3401 Python for Data Science I 4
- or higher-numbered CSE course
- PHYS 2321 Computational Physics
- MATH 3345 Numerical Analysis and Computer Applications
- or other suitable course approved by Physics undergraduate advisor and/or Chair of the Department of Physics
- CHEM 1441 General Chemistry I 4
- CHEM 1442 General Chemistry II 4
- CHEM 2321 Organic Chemistry I 3
- CHEM 2181 Organic Chemistry I Laboratory 1

Details of a personal course sequence should be made with the guidance of the Physics undergraduate advisor, particularly since many courses in Physics are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426 CALULCULUS I, in the first semester.

PROGRAM REQUIREMENTS

Communication Competence - satisfied by PHYS 4117

Computer Use Competence - satisfied by Computer Science requirement for major

PROFESSIONAL COURSES

Select one of the following for Computer Science requirement: 3

CSE 1311 INTRODUCTION TO PROGRAMMING FOR ENGINEERS 3
or higher-numbered CSE course

PHYS 2321 COMPUTATIONAL PHYSICS
MATH 3345 NUMERICAL ANALYSIS AND COMPUTER APPLICATIONS

or other suitable course approved by Physics undergraduate advisor and/or Chair of the Department of Physics

CHEM 1441 GENERAL CHEMISTRY I 4
CHEM 1442 GENERAL CHEMISTRY II 4

course for majors offered in the departments of Biology, Chemistry and Biochemistry, or Earth and Environmental Sciences 4

MATH 2326 CALCULUS III 3
MATH 3319 DIFFERENTIAL EQUATIONS & LINEAR ALGEBRA 3
or MATH 3318 DIFFERENTIAL EQUATIONS 3

MSE 3300 INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING 3

MSE graduate or advanced (3000/4000-level) courses approved by MSE graduate advisor 9

MAJOR

PHYS 2311 MATHEMATICAL METHODS OF PHYSICS 3
PHYS 3313 INTRODUCTION TO MODERN PHYSICS 3
PHYS 3183 MODERN PHYSICS LABORATORY 1
PHYS 3321 INTERMEDIATE ELECTRICITY AND MAGNETISM 3
PHYS 3445 OPTICS 4
PHYS 4117 INDIVIDUAL LEARNING BY SEMINAR 1
PHYS 4315 THERMODYNAMICS AND STATISTICAL MECHANICS 3
PHYS 4326 INTRODUCTION TO QUANTUM MECHANICS 3

PHYS electives approved by Physics undergraduate advisor and/or Chair of the Department of Physics 12

General Electives 8

36 hours of coursework must be advanced (3000/4000-level) to earn degree; up to 9 hours can be graduate-level (only for approved MSE coursework).

Total Hours 123

See General Core Requirements (p. 47) for approved courses.

Details of a personal course sequence should be made with the guidance of the Physics undergraduate advisor, particularly since many courses in Physics are not offered every semester. For all entering freshmen, it is important to begin the mathematics sequence, starting with MATH 1426 CALCULUS I, in the first semester.

** Actual courses and course sequence determined by Materials Science and Engineering Department.

Minor in Physics

A minimum total of 18 credit hours (including a minimum of 6 hours at the 3000/4000 level) are required. Transfer students must complete a minimum of 9 hours at UTA, 6 of which must be 3000/4000-level. A 2.0 GPA is required for coursework in the minor.

REQUIRED COURSES

PHYS 1443 GENERAL TECHNICAL PHYSICS I 4
PHYS 1444 GENERAL TECHNICAL PHYSICS II 4
PHYS 3313 INTRODUCTION TO MODERN PHYSICS 3

Total Hours 18

Minor in Astronomy for Non-Physics Majors

A minimum total of 18 credit hours (including a minimum of 6 hours at the 3000/4000 level) are required. Transfer students must complete a minimum of 9 hours at UTA, 6 of which must be 3000/4000-level. A 2.0 GPA is required for coursework in the minor.

REQUIRED COURSES

PHYS 1441 GENERAL COLLEGE PHYSICS I 4
PHYS 1442 GENERAL COLLEGE PHYSICS II 4
PHYS 2315 INTRODUCTORY ASTROPHYSICS 3
PHYS 3315 ASTROPHYSICS AND COSMOLOGY 3
PHYS 3316 ASTROBIOLOGY I 3

Elective Courses - choose from the following (approval from the Physics undergraduate advisor is required):

Special Problems (PHYS 4181, PHYS 4281 - with Astronomy research faculty) 1
### Minor in Astrophysics for Non-Physics Majors

A minimum total of 18 credit hours (including a minimum of 6 hours at the 3000/4000 level) are required. Transfer students must complete a minimum of 9 hours at UTA, 6 of which must be 3000/4000-level. A 2.0 GPA is required for coursework in the minor.

  - Health Neuroscience concentration
  - Psychological Sciences concentration

COURSES

PSYC 1315. INTRODUCTION TO PSYCHOLOGY. 3 Hours. (TCCN = PSYC 2301)
The fundamental methods and content of scientific psychology. Concentration on the understanding of basic principles.

PSYC 2300. STATISTICS IN PSYCHOLOGY. 3 Hours.
This course covers descriptive and inferential statistics used in psychological research and assessment. It includes measurement, characteristics of distributions; measures of central tendency and variability; transformed scores; correlation and regression; probability theory; and hypotheses testing and inference. PSYC 2300 and PSYC 3300 can be taken concurrently. Prerequisite: PSYC 1315, MATH 1302 (or equivalent).

PSYC 2317. BASIC CONCEPTS IN HUMAN SEXUALITY. 3 Hours. (TCCN = PSYC 2306)
The physiological, psychological, and sociological aspects of human sexuality. Offered as BIOL 2317, HEED 2317, PSYC 2317, and GWSS 2317. Credit will be granted for one of these courses only. Students seeking certification in Health Education must enroll in HEED 2317. Students seeking credit toward their science requirement must enroll in BIOL 2317. May not be used for biology grade point calculation or biology credit toward a BS degree in biology, microbiology, medical technology, psychology, or sociology.

PSYC 3200. EXPERIENCING RESEARCH IN PSYCHOLOGY. 2 Hours.
This is a practical, project-based course that focuses on laboratory and field experience in designing, conducting, and reporting psychology research. It includes all stages of the research process including the formulation of research hypotheses, review and evaluation of published literature, choice of research design and measurement variables, data collection and analysis, and presentation of results in oral and written reports. Prerequisite: PSYC 2300 and PSYC 3300.

PSYC 3300. RESEARCH METHODS IN PSYCHOLOGY. 3 Hours.
This course covers experimental designs and research methodologies commonly used in the field of psychology. It includes strategies for identifying meaningful hypothesis, conducting literature reviews, implementing research practices, and interpreting and evaluating statistical conclusions and empirical research findings. Challenges related to sociocultural factors will also be analyzed. PSYC 2300 and PSYC 3300 can be taken concurrently.

PSYC 3301. PSYCHOLOGY OF HUMAN RELATIONS. 3 Hours.
Workplace applications of topics including person perception, social influence, group processes and dynamics, interpersonal relations, teamwork, leadership, workplace discrimination, diversity, stress, and burnout.

PSYC 3302. BUSINESS PSYCHOLOGY. 3 Hours.
A survey of the fields of industrial and organizational psychology, focusing on the application of psychological theory to understanding and solving problems in the workplace. Topics include recruitment, employee selection and training, the effects of attitudes, motivation, group dynamics and leadership, job satisfaction, productivity and morale.

PSYC 3303. DRUGS AND BEHAVIOR. 3 Hours.
A survey of the psychoactive agents, their therapeutic uses, and social abuses. Alcohol, nicotine, caffeine, narcotics, hallucinogens, stimulants, and tranquilizers. Offered as BIOL 3303, HEED 3303, and PSYC 3303; credit will be granted only once. May not be used for biology grade point calculation or biology credit toward a B.S. degree in biology, microbiology, or medical technology. Students seeking certification in health education must enroll in HEED 3303.

PSYC 3304. ANALYSIS & MANAGEMENT OF BEHAVIOR. 3 Hours.
Behavioral control techniques for remediation and prevention of problem behaviors and for optimization of normal behaviors in real life settings. Contrasting therapeutic approaches, the ethics of behavior control, and the impact of behaviorism on society. Prerequisite: PSYC 1315 or permission of the instructor.

PSYC 3305. PSYCHOLOGY OF EMPLOYEE TRAINING. 3 Hours.
An introduction to theories, research, and techniques related to training needs analysis, program design and delivery, and training evaluation in organizational settings.
PSYC 3306. PSYCHOLOGY OF CREATIVITY AND CREATIVE THINKING. 3 Hours.
Research and theory relevant to the traits, attitudes, and abilities which are related to creative functioning with emphasis on the conceptual-cognitive
components of creative formation and problem solving. Methods of stimulating creative behavior in individuals and in groups. Relevant research findings
provide the substance of the course. Prerequisite: PSYC 1315.

PSYC 3310. DEVELOPMENTAL PSYCHOLOGY. 3 Hours.
Human development and growth from conception through old age, concerned with the physical, behavioral, and social aspects. Prerequisite: PSYC
1315.

PSYC 3312. SOCIAL & PERSONALITY DEVELOPMENT. 3 Hours.
A review of psychological theory and research on age trends and individuals differences in personality and social development. Topics include emotional
development, aggression, identity and achievement, attachment, gender role development, and familial and extrafamilial influences on development.
Prerequisite: PSYC 1315.

PSYC 3314. PSYCHOLOGY OF PERSONALITY. 3 Hours.
A broad survey of major theories, assessment methods, and representative research in the field of personality. The theoretical approaches considered
include the psychoanalytic, neo-Freudian, trait, biological, humanistic, behavioral social/learning, and cognitive approaches. Prerequisite: PSYC 1315.

PSYC 3315. SOCIAL PSYCHOLOGY. 3 Hours.
The theories and research dealing with individual behavior in the social environment. Social influence processes, interpersonal attraction, group
behavior, aggression, conformity, and attitude formation and change. Prerequisite: PSYC 1315.

PSYC 3317. INTRODUCTION TO CLINICAL AND COUNSELING PSYCHOLOGY. 3 Hours.
The student is introduced to psychodiagnostic procedures and the basic approaches of counseling and psychotherapy. Prerequisite: PSYC 1315.

PSYC 3318. ABNORMAL PSYCHOLOGY. 3 Hours.
Major forms of psychopathology. Classification, etiology, and treatment of major disorders. Prerequisite: PSYC 1315.

PSYC 3319. PSYCHOLOGY OF ADOLESCENCE. 3 Hours.
A topical study of adolescent behavioral and psychological development with emphasis on theory, methods of inquiry, and practical implications.
Prerequisite: PSYC 1315.

PSYC 3320. BEHAVIOR AND MOTIVATION. 3 Hours.
Theory and research involving relation of motivation and emotion to learning theory, social behavior, personality, and development. Prerequisite: PSYC
1315.

PSYC 3322. BRAIN AND BEHAVIOR. 3 Hours.
An introduction to the anatomical structures and physiological processes that determine behavior. Topics include the acquisition and processing of
sensory information, the neural control of movement, and the biological bases of complex behaviors (such as learning, memory, sex, language, and
addiction), as well as the basic functioning of the nervous system. Offered as BIOL 3322 and PSYC 3322. Credit will be granted only once. BIOL 3322
prerequisite: BIOL 1441, BIOL 1442. PSYC 3322 prerequisite: BIOL 1441 or PSYC 1315.

PSYC 3325. DATA SCIENCE IN PSYCHOLOGY. 3 Hours.
This course is a survey of the benefits and challenges of data science in psychological research. The course includes discussions on advances in data
collection and analysis, the applications and career opportunities within various psychology disciplines, and the best practices concerning ethics, privacy,
security, and responsible conduct of research. Statistical concepts and techniques will be introduced using simple computing tools, such as Excel or
code from programming languages, such as Python. Prerequisite: PSYC 2300 (or equivalent).

PSYC 3326. ANIMAL BEHAVIOR. 3 Hours.
A survey of research and theory comparing behavior at various phyletic levels. Offered as BIOL 3326 and PSYC 3326. Credit will be granted for only
one of these courses. Prerequisite: BIOL 1441, BIOL 1442.

PSYC 3334. COGNITIVE PROCESSES. 3 Hours.
Current theory and research in cognitive processes such as memory, information processing, concept formation, and problem solving. Prerequisite:
PSYC 1315.

PSYC 3335. EVOLUTIONARY PSYCHOLOGY. 3 Hours.
A consideration of how evolution has influenced social, cognitive and developmental processes in humans. Comparisons between humans and other
species, and between different human cultures will be included. Topics such as mate selection, marriage and family practices, child rearing, social
relations, language, thinking, neuropsychology, learning and related topics will be considered. Methods of gathering data and theory about evolutionary
processes will be stressed. Prerequisite: PSYC 1315.

PSYC 3357. CYBERPSYCHOLOGY BASIC CONCEPTS. 3 Hours.
Cyberspsychology is a branch of psychology that studies the way people interact with technology and the impacts of technology on the way people feel,
think, and behave both online and offline. This course provides a broad survey of the impacts of digital media (e.g., social media) on people's perception,
learning, motivation, and decision making. Theories from neuroscience (e.g., large-scale networks), evolution (e.g., evolutionary mismatch), social (e.g.,
identity fusion), and health (e.g., anxiety) are incorporated for understanding the basic guiding principles of human behavior in the digital environment.
Offered as PSYC 3357 and PSYC 5346.
PSYC 3358. CYBERPSYCHOLOGY APPLICATIONS. 3 Hours.
This is a project-based course that focuses on developing and testing digital interventions based on persuasion theories. Course topics include persuasion research, associative learning, consumer behavior, emotional and motivational strategies, social media, mental health, personality, social engineering, and political activism. This course is designed to introduce psychological vulnerabilities to technologically savvy students with hopes of aspiring them to invent technologies that improve the quality of life. Offered as PSYC 3358 and PSYC 5347.

PSYC 3359. POLITICAL PSYCHOLOGY FOR THE INTERNET. 3 Hours.
This course provides a comprehensive review of the psychology of political behavior on digital platforms. The course covers the foundational approaches to political psychology, including the evolutionary, personality, and developmental roots of political attitudes, to contemporary challenges to governance, including populism, hate speech, conspiracy beliefs, inequality, climate change, and terrorism. This course will focus on the application of psychological factors (affect, emotions, heuristics) that influence political behavior (voting, attitudes, beliefs) with emphasis on internet-mediated political strategies. Offered as PSYC 3359 and PSYC 5349.

PSYC 4081. VOLUNTEER RESEARCH IN PSYCHOLOGY. 0 Hours.
Volunteer research hours (0 credit hours) Participation in a group research project on a selected topic as designated by the directing professor. Maybe repeated. Intended for advanced undergraduate majors. Prerequisite: Instructor permission; other prerequisites may be implemented at the discretion of each individual laboratory research mentor.

PSYC 4161. READINGS IN PSYCHOLOGY. 1 Hour.
Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper as arranged. Prerequisite: permission of the instructor.

PSYC 4181. RESEARCH IN PSYCHOLOGY. 1 Hour.
Research problems arranged on an individual basis, to be conducted by the student, and written in publishable journal format. Prerequisite: permission of the instructor.

PSYC 4191. UNDERGRADUATE TEACHING EXPERIENCE. 1 Hour.
Teaching effectively requires mastering the content of your discipline, but also numerous other skills. This course will prepare undergraduate students to be challenging, inspiring, engaging teachers and/or communicators of psychological topics by providing hands-on experience as teaching assistants. Prerequisite: Students must complete Introduction to Psychology (PSYC 1315) and PSYC 4391 (Undergraduate Teaching Experience) before enrolling in this course. Students must have a minimum GPA of 3.5 and be a psychology major (other majors may be approved with instructor permission). Students must have earned a B or better in the class for which they will serve as a TA and instructor approval is required.

PSYC 4261. READINGS IN PSYCHOLOGY. 2 Hours.
Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper as arranged. Prerequisite: permission of the instructor.

PSYC 4281. RESEARCH IN PSYCHOLOGY. 2 Hours.
Research problems arranged on an individual basis, to be conducted by the student, and written in publishable journal format. Prerequisite: permission of the instructor.

PSYC 4291. UNDERGRADUATE TEACHING EXPERIENCE. 2 Hours.
Teaching effectively requires mastering the content of your discipline, but also numerous other skills. This course will prepare undergraduate students to be challenging, inspiring, engaging teachers and/or communicators of psychological topics by providing hands-on experience as teaching assistants. Prerequisite: Students must complete Introduction to Psychology (PSYC 1315) and PSYC 4391 (Undergraduate Teaching Experience) before enrolling in this course. Students must have a minimum GPA of 3.5 and be a psychology major (other majors may be approved with instructor permission). Students must have earned a B or better in the class for which they will serve as a TA and instructor approval is required.

PSYC 4301. PRINCIPLES OF NEUROSCIENCE. 3 Hours.
An in depth understanding of the mechanisms underlying the function of the nervous system. Topics include cellular mechanisms of neural communication, neuroanatomy and neurophysiology of sensory, motor, and autonomic systems, cellular mechanisms of learning and memory, and neuropathological conditions that contribute to neurological disorders. Course offered as BIOL 4301 and PSYC 4301. Credit will be granted only once. Prerequisite: PSYC 3322 (BIOL 3322) or permission of instructor.

PSYC 4309. NEUROPHARMACOLOGY. 3 Hours.
A survey of how drugs affect the nervous system. General topics will include cellular and molecular foundations of neuropharmacology, receptors and modulation of neural signaling. The specific role of neurotransmitter systems (i.e. acetylcholine, dopamine, norepinephrine, serotonin, and opiates) will be explored. Offered as BIOL 4309 and PSYC 4309; credit will be granted only once. Prerequisite: one or more of the following courses or permission of instructor: BIOL 1441 or PSYC 3322/BIOL 3322 or BIOL 3301.

PSYC 4315. HORMONES AND BEHAVIOR. 3 Hours.
A study of the interaction between hormones and behavior. Specific topics covered include; examination of the hormonal influences on sex determination, reproductive behaviors, parental behavior, dominance and aggression, responses to stressful stimuli, homeostasis, and learning and memory. This course uses a comparative approach and draws examples of neuroendocrine function from throughout the animal kingdom including fish, birds, reptiles, and mammals (including humans). Offered as PSYC 4315 and BIOL 4315. Credit will be granted only once. Prerequisite: PSYC 3322/BIOL 3322 or BIOL 1441 or BIOL 3301.
PSYC 4327. BEHAVIORAL GENETICS. 3 Hours.
Genetic influences on behavioral phenotypes. Research strategies, quantitative methods, and pharmacogenetic approaches to the brain; sociality and altruism; the personality, emotionality and intelligence; psychopathology; chromosomal abnormalities; forensic implications of genetic counseling. Offered as BIOL 4327 and PSYC 4327; credit will be granted only once. Students seeking credit toward the science requirement must enroll in BIOL 4327. Prerequisite: PSYC 1315 or BIOL 1441.

PSYC 4332. THEORIES OF HUMAN LEARNING AND MEMORY. 3 Hours.
A comprehensive survey of theories and research concerning basic learning and memory processes and their application to a variety of areas, e.g., eyewitness memory, false memory syndrome, autobiographical memory, memory decline in aging. Theoretical and background perspectives include associative mechanism, information processing approaches, and neurophysiological bases for encoding, storage, and retrieval. Prerequisite: PSYC 1315, and Junior Standing.

PSYC 4335. COGNITIVE DEVELOPMENT. 3 Hours.
Theories and phenomena concerning development of all aspects of human cognition across the life span. Prerequisite: C or better in PSYC 3300.

PSYC 4338. COGNITIVE NEUROSCIENCE. 3 Hours.
Theory and research on the relationship between the brain and human cognition. Normal functioning and comparisons between normal and disordered states (e.g., Alzheimer's disease, amnesia, localized brain injury, age changes). Prerequisite: PSYC 4332 or PSYC 3334.

PSYC 4339. PSYCHOLOGY OF JUDGMENT AND CHOICE. 3 Hours.
Research and theory on the errors of intuitive judgment and how formal decision methods improve choices. Prerequisite: C or better in PSYC 2300.

PSYC 4350. SPORT PSYCHOLOGY. 3 Hours.
The course will provide an overview of the growing field of Sport Psychology, which involves applying psychological science to sports. Topics such as maximizing sports performance, elite performance and personality, motivation techniques in sports, leadership skills in sports, etc., will be covered.

PSYC 4357. HEALTH PSYCHOLOGY. 3 Hours.
This course provides a broad introduction to health psychology and its interface with the medical world. The course provides a balanced presentation of the important issues in the field, as well as specific content topics that are especially relevant today to better understand health and illness. Offered as BIOL 4357, HEED 4357, and PSYC 4357. Students seeking science requirement credit must enroll in BIOL 4357; students seeking Certification in Health must enroll in HEED 4357. Prerequisite: PSYC 1315 or BIOL 1333 or BIOL 1441 or BIOL 2457; junior standing recommended.

PSYC 4359. SELECTED TOPICS IN PSYCHOLOGY. 3 Hours.
Topics pertinent to the field of psychology. Topic, format, and prerequisites to be determined by the instructor. May be repeated for credit as different topics are offered. Prerequisite: to be determined by the instructor.

PSYC 4361. READINGS IN PSYCHOLOGY. 3 Hours.
Topics arranged on an individual basis. Performance may be assessed by oral exam, written test, or review paper as arranged. Prerequisite: permission of the instructor.

PSYC 4381. RESEARCH IN PSYCHOLOGY. 3 Hours.
Research problems arranged on an individual basis, to be conducted by the student, and written in publishable journal format. Prerequisite: permission of the instructor.

PSYC 4391. FOUNDATIONS OF UNDERGRADUATE TEACHING EXPERIENCE. 3 Hours.
Teaching effectively requires mastering the content of your discipline, but also numerous other skills. This course will prepare undergraduate students to be challenging, inspiring, engaging teachers and/or communicators of psychological topics by covering important professional issues, including: planning a syllabus, structuring a lecture, navigating class discussions, communicating effectively with different types of classes, responding to student input, dealing with classroom incivilities, responding to student assignments, using technology, and responding to student work. This course will also assist students through the process of teaching as learning through addressing cognitive theories underlying the learning process. Prerequisite: Students must complete Introduction to Psychology (PSYC 1315) before enrolling in this course. Students must have a minimum GPA of 3.5 and be a psychology major (other majors may be approved with instructor permission). Students must have earned a B or better in the class for which they will serve as a TA and instructor approval is required.

PSYC 4398. HONORS THESIS. 3 Hours.
Students may take this course only at the invitation of the department. Consists of a research project of a type and level which would be publishable in one of the psychological journals. Particular emphasis is placed on independent work by the student. Prerequisite: departmental invitation.

PSYC 4410. ADVANCED TOPICS IN DEVELOPMENTAL PSYCHOLOGY. 4 Hours.
This course will cover current topics in Developmental Psychology using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Developmental Psychology. Completion of the course is essential for students who are interested in pursuing a career in Developmental Psychology research. Prerequisites: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3310. Junior standing recommended.

PSYC 4411. ADVANCED TOPICS IN PERSONALITY. 4 Hours.
This course will cover current topics in Personality using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Personality. Completion of the course is essential for students who are interested in pursuing a career in Personality research. Prerequisites: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3314. Junior standing recommended.
PSYC 4412. ADVANCED TOPICS IN SOCIAL PSYCHOLOGY. 4 Hours.
This course will cover current topics in Social Psychology using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Social Psychology. Completion of the course is essential for students who are interested in pursuing a career in Social Psychology research. Prerequisites: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3315. Junior standing recommended.

PSYC 4415. INTERNSHIP IN PSYCHOLOGY. 4 Hours.
Provides the student with an opportunity to apply academic experience to practical situations by serving for a specified number of hours as participant-observer in an off-campus activity. The activity will be reflected in the title on the transcript. Internships must be arranged with an internship supervisor and/or faculty member in the semester prior to enrolling for this course. Prerequisite: C or better in PSYC 2300 and PSYC 3300.

PSYC 4420. EXPERIMENTAL ANALYSIS OF BEHAVIOR. 4 Hours.
A laboratory course examining basic principles of behavior control and analysis with single animals and automated testing apparatus. Emphasis is placed on individualized, self-paced instruction and creative experimentation. Prerequisite: C or better in either PSYC 3304 or PSYC 4310. C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3304.

PSYC 4421. ADVANCED TOPICS IN NEUROSCIENCE. 4 Hours.
This course will cover current topics in Neuroscience using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Neuroscience. Completion of the course is essential for students who are interested in pursuing a career in Neuroscience research. Prerequisites: C or better in BIOL 3322 or PSYC 3322 required.

PSYC 4430. ADVANCED TOPICS IN CLINICAL COUNSELING. 4 Hours.
This course will cover current topics in Clinical and Counseling using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Clinical and Counseling. Completion of the course is essential for students who are interested in pursuing a career in Clinical and Counseling research. Prerequisite: PSYC 3317; PSYC 3318; C or better in PSYC 2300, PSYC 3200, and PSYC 3300; junior standing recommended.

PSYC 4431. ADVANCED TOPICS IN COGNITIVE SCIENCE. 4 Hours.
This course will cover current topics in Cognitive Psychology using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Cognitive Psychology. Completion of the course is essential for students who are interested in pursuing a career in Cognitive Psychology research. May be repeated for credit as specific topics vary. Prerequisite: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 3334. Junior standing recommended.

PSYC 4432. ADVANCED TOPICS IN HEALTH. 4 Hours.
This course will cover current topics in Health Psychology using an interactive, participatory format that includes a lecture portion and a laboratory section. The course will focus on specific content topics that are especially relevant today to better understand and use advanced concepts in Health Psychology. Completion of the course is essential for students who are interested in pursuing a career in Health Psychology research. May be repeated for credit as specific topics vary. Prerequisite: C or better in PSYC 2300, PSYC 3200, PSYC 3300, and PSYC 4357. Junior standing recommended.

PSYC 5110. PROFESSIONAL DEVELOPMENT. 1 Hour.
The philosophy and methods of conducting a university class for undergraduates are examined. Specific tips and suggestions for managing course materials, lectures, audiovisual aids, grading, etc. will be presented. The role of the university instructor as a researcher as well as a teacher will be elaborated. Specific topics will include the ethics and regulation of research, service as a journal referee, corresponding with peers, participating in a research team, manuscript preparation, presentation at professional conferences, and submitting material for publication. Prerequisite: admission to the graduate program in psychology or permission of the instructor. Graded F, P. Prerequisite: Admission to the graduate program in psychology or permission of the instructor.

PSYC 5127. INDUSTRIAL AND ORGANIZATIONAL INTERNSHIP. 1 Hour.
This course is preparation for and supervision of internship activities in an organization or organizations in an area related to area of interest or training. No credit will be given for previous experience or activities. Course may be repeated for credit. Prerequisite: Consent of instructor.

PSYC 5151. READINGS IN PSYCHOLOGY. 1 Hour.
Independent readings under the supervision of an individual faculty member. Students wishing to conduct research should sign up for PSYC 5191, PSYC 5291, or PSYC 5391. May be repeated for credit with consent of the Graduate Advisor. Graded A/B/C/D/F/I/P/W. Prerequisite: consent of the instructor.

PSYC 5191. RESEARCH IN PSYCHOLOGY. 1 Hour.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 5227. INDUSTRIAL AND ORGANIZATIONAL INTERNSHIP. 2 Hours.
This course is preparation for and supervision of internship activities in an organization or organizations in an area related to area of interest or training. No credit will be given for previous experience or activities. Course may be repeated for credit. Prerequisite: Consent of instructor.
PSYC 5251. READINGS IN PSYCHOLOGY. 2 Hours.
Independent readings under the supervision of an individual faculty member. Students wishing to conduct research should sign up for PSYC 5191, PSYC 5291, or PSYC 5391. May be repeated for credit with consent of the Graduate Advisor. Graded A/B/C/D/F/I/P/W. Prerequisite: consent of the instructor.

PSYC 5291. RESEARCH IN PSYCHOLOGY. 2 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 5307. RESEARCH METHODS. 3 Hours.
This course considers basic and advanced aspects of methodology used in psychological research, including experimental design, methodologies that combine disciplinary approaches (e.g., biomedical, behavioral, and field and laboratory approaches).

PSYC 5309. HEALTH PSYCHOLOGY. 3 Hours.
A survey of current theory and research in health psychology, including basic research in health and behavior, biobehavioral contributions to illness and disability, and fundamental relationships among the brain, bodily function, and behavior that may affect health and well-being. It will also include clinical and translational topics including patient interventions in medically-ill populations, pain management, and disease prevention.

PSYC 5310. DATA SCIENCE IN PSYCHOLOGY. 3 Hours.
To live in the modern world is to leave digital data traces that provide insights into an individual's habits, choices, social networks, interests, and a range of personal identity markers (such as political views). The rapid growth of this data presents researchers with new avenues to evaluate and understand human cognition and human behavior, while simultaneously raising concerns of privacy, bias, and ethics. For researchers in psychology, "big data" also provides an additional methodological angle to complement existing research methodologies. This course surveys data science approaches to research, focusing on implications and opportunities in psychology. Topics include collecting, accessing, and analyzing data, as well as the tools and technologies commonly used in processing human-generated data. The course will also introduce construct creation where data is used to model and predict cognitive constructs and anticipate changes to those constructs. Additional emphasis will be on the skills needed by individual researchers as well as the broader implications of wearables and immersive environments (such as VR and AR) that capture psychophysiological data on the future of research in psychology.

PSYC 5313. COGNITIVE PSYCHOLOGY. 3 Hours.
Surveys current experimental and clinical research and theory relating the brain and cognition. Emphasizes selected areas i.e., perception, attention, memory, language, and thinking.

PSYC 5316. ORGANIZATIONAL TEAM PERFORMANCE. 3 Hours.
This course integrates research on group dynamics with practical applications to develop, assess, and enhance team performance in organizations. Major topics include group formation/development, power, intra- and inter-group relations, creativity, evaluation, cohesion, process management, leadership, and more. Students will practice process facilitation of work teams as well as team leadership and membership skills throughout the course.

PSYC 5321. PERSONALITY PSYCHOLOGY. 3 Hours.
A survey of contemporary topics in personality psychology, including personality assessment, strategies for studying personality, temporal stability and cross-situational consistency in behavior, and personality influence on social behavior.

PSYC 5322. SOCIAL PSYCHOLOGY. 3 Hours.
A survey of contemporary topics in social psychology, including interpersonal attraction, altruism and aggression, attribution and social cognition, social influence, group dynamics, and social motivation.

PSYC 5323. GROUP PROCESSES. 3 Hours.
Survey of the major topics in group dynamics. Among the issues covered will be performance, motivation, goal setting, decision-making, creativity, social influence, memory, leadership, teamwork, and collective behavior.

PSYC 5324. APPLIED RESEARCH DESIGN. 3 Hours.
Basic aspects of organizational research methods will be covered including: research ethics, the scientific method, inductive and deductive reasoning, research questions, hypotheses, study designs, manipulation of variables, and various measures and methods used in organizational research. The history of Industrial and Organizational research will also be covered.

PSYC 5325. ORGANIZATIONAL BEHAVIOR. 3 Hours.
Survey of theory and research related to human behavior in organizations. Topics include job performance, motivation, job satisfaction, organizational commitment, work stress, organizational justice, leadership, groups and teams, and organizational theory.

PSYC 5326. EMPLOYEE SELECTION. 3 Hours.
Principles and techniques of employee selection, placement, and classification will be examined. Job analysis and competency modeling will be covered with a focus on the legal aspects of selection and promotion. The use of various methods and measures of job relevant individual differences will be examined within the context of predicting performance criteria.

PSYC 5327. INDUSTRIAL AND ORGANIZATIONAL INTERNSHIP. 3 Hours.
This course is preparation for and supervision of internship activities in an organization or organizations in an area related to area of interest or training. No credit will be given for previous experience or activities. Course may be repeated for credit. Prerequisite: consent of instructor.
PSYC 5328. EMPLOYEE ATTITUDES AND BEHAVIORS. 3 Hours.
Theory and research concerning the determinants, consequences, and measurement of job satisfaction and related constructs such as involvement, commitment and work motivation will be covered. Attitudes, opinions, and beliefs will be examined in relation to the behavioral intentions of individuals at work. Organizational interventions designed to improve and enhance employee motivation, attitudes and behaviors will be evaluated.

PSYC 5329. PERFORMANCE MANAGEMENT SYSTEMS. 3 Hours.
Principles and techniques of the performance appraisal and feedback process will be covered. Different sources of performance information will be evaluated. Mentoring and procedures for communicating performance evaluation information and improving job performance via development and training will be examined. Theories and techniques used to design, conduct, and evaluate training programs will be evaluated.

PSYC 5330. ADVANCE EMPLOYEE TRAINING AND DEVELOPMENT. 3 Hours.
Theoretical advancements, empirical research findings, and practical applications of psychological concepts related to employee training and development. This course focuses on the entirety of the employee training process, including topics and issues related to training needs analysis, program design and implementation, and the evaluation of training effectiveness.

PSYC 5331. PERCEPTION AND ATTENTION. 3 Hours.
Survey of methods and findings dealing with perception; emphasis will be upon behavioral rather than physiological considerations; particular topics include signal detection theory, form and pattern recognition, and attentional mechanisms.

PSYC 5332. BEHAVIORAL NEUROSCIENCE. 3 Hours.
A survey of biological and physical processes underlying behavior. Emphasis on neural, hormonal, and genetic determinants of behavior. Topics include regulatory behaviors, reward and nociceptive systems, differentiation and sociosexual behaviors, limbic and cortical functions.

PSYC 5333. HUMAN PHYSIOLOGY. 3 Hours.
This course will provide a comprehensive review of the human physiology that is categorized in 15 sections and 84 chapters. Some of them will be covered by different courses, such as Neuroscience, Immunology, and Endocrinology. Students are expected to learn how the human body works and what the underlying mechanisms that control the physiological responses are. In case of damage to these systems, what will happen to the body as a whole and what will be the impact on behaviors?

PSYC 5334. ANIMAL COGNITION AND BEHAVIOR. 3 Hours.
A survey of theory and data on how animals learn and represent the world and the evolutionary processes that influence their individual and social behavior.

PSYC 5341. DECISION MAKING. 3 Hours.
Factors that influence categorical and numerical judgments, choices, and preference decisions. Comparison of human decision behavior with various quantitative theories.

PSYC 5342. LEADERSHIP IN ORGANIZATIONS. 3 Hours.
This course focuses on leadership theory and the applicability to modern organizations. Various approach to studying and understanding leadership, as well as the evolution of leadership theory over time will be discussed. Discussed approaches will include trait, situational, skill, contextual, style, cultural, and emerging theories of leadership. Additionally, this course will focus on designing effective leadership development programs.

PSYC 5343. ELECTRONIC HUMAN RESOURCE MANAGEMENT. 3 Hours.
A survey of theory and research related to the use of technology in organizational employment practices, including topics such as web-based recruitment, technology-based interviewing, online testing, cybervetting, e-training, e-performance monitoring, virtual teams, cyberdeviance, and telework.

PSYC 5344. HUMAN LEARNING AND MEMORY. 3 Hours.
Survey of current approaches to the study of human learning and memory.

PSYC 5345. PSYCHOLOGY OF LEARNING. 3 Hours.
Cyberpsychology is a branch of psychology that studies the way people interact with technology and the impacts of technology on the way people feel, think, and behave both online and offline. This course provides a broad survey of the impacts of digital media (e.g., social media) on people's perception, learning, motivation, and decision making. Theories from neuroscience (e.g., large-scale networks), evolution (e.g., evolutionary mismatch), social (e.g., identity fusion), and health (e.g., anxiety) are incorporated for understanding the basic guiding principles of human behavior in the digital environment. Offered as PSYC 3357 and PSYC 5346.

PSYC 5346. CYBERPSYCHOLOGY BASIC CONCEPTS. 3 Hours.
This is a project-based course that focuses on developing and testing digital interventions based on persuasion theories. Course topics include persuasion research, associative learning, consumer behavior, emotional and motivational strategies, social media, mental health, personality, social engineering, and political activism. This course is designed to introduce psychological vulnerabilities to technologically savvy students with hopes of aspiring them to invent technologies that improve the quality of life. Offered as PSYC 3358 and PSYC 5347.

PSYC 5347. CYBERPSYCHOLOGY APPLICATIONS. 3 Hours.
This course provides a comprehensive review of the psychology of political behavior on digital platforms. The course covers the foundational approaches to political psychology, including the evolutionary, personality, and developmental roots of political attitudes, to contemporary challenges to governance, including populism, hate speech, conspiracy beliefs, inequality, climate change, and terrorism. This course will focus on the application of psychological factors (affect, emotions, heuristics) that influence political behavior (voting, attitudes, beliefs) with emphasis on internet-mediated political strategies. Offered as PSYC 3359 and PSYC 5349.
PSYC 5351. READINGS IN PSYCHOLOGY. 3 Hours.
Independent readings under the supervision of an individual faculty member. Students wishing to conduct research should sign up for PSYC 5191, PSYC 5291, or PSYC 5391. May be repeated for credit with consent of the Graduate Advisor. Graded P/F/R. Prerequisite: consent of the instructor.

PSYC 5389. CONTEMPORARY PROBLEMS IN PSYCHOLOGY. 3 Hours.
Topics vary. May be repeated for credit with consent of Graduate Advisor.

PSYC 5391. RESEARCH IN PSYCHOLOGY. 3 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 5405. ADVANCED STATISTICS I. 4 Hours.
Basic descriptive and inferential statistics used in psychological research.

PSYC 5407. MULTIVARIATE DATA ANALYSIS. 4 Hours.
Statistical aspects of complex experimental designs used in psychological research. Prerequisite: PSYC 5405.

PSYC 5410. APPLIED STATISTICS I. 4 Hours.
Provides training in advanced statistical techniques for both research and organizational applications. Theory will be discussed in context of analytic design, but course emphasizes practical applications of statistical methods, including issues gathering and managing organizational data and conducting analyses in industry settings. Relevant statistical software packages will be incorporated. Students will develop expertise in presenting advanced quantitative analyses to both corporate and scientific audiences and in using data to guide decision-making.

PSYC 5411. APPLIED STATISTICS II. 4 Hours.
Provides additional training in advanced statistical techniques for both research and organizational applications. Theory will be discussed in context of analytic design, but course emphasizes practical applications of statistical methods, including issues gathering and managing organizational data and conducting analyses in industry settings. Relevant statistical software packages will be incorporated. Students will develop expertise in presenting advanced quantitative analyses to both corporate and scientific audiences and in using data to guide decision-making. Prerequisite: PSYC 5405 or PSYC 5410, or equivalent.

PSYC 5600. ADVANCED RESEARCH. 6 Hours.
Supervised research. May be repeated for credit. Graded P/F/R. Prerequisite: permission of instructor.

PSYC 5698. THESIS. 6 Hours.
Graded P/F/R. Can only be taken up to 4 times. Prerequisite: 12 hours of advanced psychology and an approved thesis proposal.

PSYC 6191. RESEARCH IN PSYCHOLOGY. 1 Hour.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 6291. RESEARCH IN PSYCHOLOGY. 2 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 6300. SEMINAR IN PSYCHOLOGY. 3 Hours.
Offered each semester. Topics vary. May be repeated for credit. Prerequisite: consent of instructor.

PSYC 6318. SOCIAL AND PERSONALITY DEVELOPMENT. 3 Hours.
Theory and research on social and emotional development with an emphasis on the interaction between individual needs and abilities and societal expectations and demands.

PSYC 6320. NEUROPHARMACOLOGY. 3 Hours.
Survey of the basis of behavioral pharmacology including mechanisms and theories of drug actions, techniques and strategies of research, common psychoactive drugs, and the uses of drugs in clinical practice.

PSYC 6335. ANIMAL BEHAVIOR. 3 Hours.
Phylogenetic approach to some basic problems in behavior, with special emphasis on unlearned behavior.

PSYC 6336. COMPARATIVE PSYCHOLOGY. 3 Hours.
Theory and data about all aspects of behavior stressing similarities and differences across species.

PSYC 6338. NEURAL AND COGNITIVE MODELING. 3 Hours.
Principles of neural network and dynamical systems modeling; application of these principles to the simulation of cognitive processes in both brains and machines; models of associative learning, pattern recognition and classification, and individual and group behavior. Prerequisite: consent of instructor.

PSYC 6346. EVOLUTIONARY PSYCHOLOGY. 3 Hours.
Evolutionary processes influence behavior and thinking of humans and nonhuman species. Sociosexual behavior, aggression, cognition, and information processing from an evolutionary perspective will be among the topics covered.
PSYC 6347. ENVIRONMENTAL PSYCHOLOGY. 3 Hours.
Survey of the current literature on the impact of various features of the physical environment on human behavior. Topics covered include crowding, privacy, territoriality, personal space, noise, the natural environment, residential, educational and work environments, urban and community design, and pollution and resource management. Designed to be of interest to graduate students in architecture, urban affairs, environmental science and engineering, geology, sociology, as well as those in psychology.

PSYC 6349. PSYCHOMETRIC THEORY. 3 Hours.
Introduction to test construction. Topics include reliability theory, test validation, and item analysis. Prerequisite: C or better in PSYC 5405 and PSYC 5407.

PSYC 6391. RESEARCH IN PSYCHOLOGY. 3 Hours.
Independent research under the supervision of an individual faculty member; may be repeated for credit with consent of Graduate Advisor. Graded Pass/Fail. Prerequisite: consent of the instructor.

PSYC 6399. DISSERTATION. 3 Hours.
Graded R/F. Prerequisite: approved dissertation proposal.

PSYC 6699. DISSERTATION. 6 Hours.
Graded R/F/P/W. Prerequisite: approved dissertation proposal.

PSYC 6999. DISSERTATION. 9 Hours.
Graded P/F/R. Prerequisite: approved dissertation proposal.

PSYC 7399. DOCTORAL DEGREE COMPLETION. 3 Hours.
This course may be taken during the semester in which a student expects to complete all requirements for the doctoral degree and graduate. Enrolling in this course meets minimum enrollment requirements for graduation, for holding fellowships awarded by The Office of Graduate Studies and for full-time GTA or GRA positions. Students should verify that enrollment in this course meets other applicable enrollment requirements. To remain eligible in their final semester of study for grants, loans or other forms of financial aid administered by the Financial Aid Office must enroll in a minimum of 5 hours as required by the Office of Financial Aid. Other funding sources may also require more than 3-hours of enrollment. Additional hours may also be required to meet to requirements set by immigration law or by the policies of the student’s degree program. Students should contact the Financial Aid Office, other sources of funding, Office of International Education and/or their graduate advisor to verify enrollment requirements before registering for this course. This course may only be taken once and may not be repeated. Students who do not complete all graduation requirements while enrolled in this course must enroll in a minimum of 6 dissertation hours (6699 or 6999) in their graduation term. Graded P/F/R.
Psychology - Graduate Programs

Objective

The objective of graduate work in psychology is to educate the student in the methods and basic content of the discipline and to provide an apprenticeship in the execution of creative research.

Graduate work in the master's program and doctoral program will be offered in psychology. Students' individual programs of work may be arranged to give emphasis to a particular aspect of the general program.

Within this framework, options include, but are not limited to: Animal Behavior and Animal Learning, Cognition and Perception, Developmental, Health Psychology and Neuroscience, Industrial/Organizational, Behavioral Neuroscience, Social-Personality Psychology, and Learning Analytics. Students specializing in Cognition and Perception may include advanced topical seminars in their area of specialty. In addition to core courses for those interested in Behavioral Neuroscience, seminars offered in the recent past include Aggression and Nociception. For those seeking expertise in the Social-Personality area, seminars have included topics such as Social Influence and Empathetic Accuracy and Intersubjectivity.

Research Involvement-Since the Department of Psychology believes that graduate training should involve the student continuously in the research process, students are encouraged to make personal contacts by letter or e-mail with faculty members of their choice. A description of the faculty and their areas of research may be obtained by consulting the department Web page at www.uta.edu/psychology (http://www.uta.edu/psychology/) or by writing to or calling the department at 817.272.2281. Every effort will be made to assign the incoming student to a faculty member of choice, but priority is given to those who have discussed their placement in advance.

Deadline for Financial Aid Applications-Students who wish to be considered for assistantships should have their applications and departmental forms sent to The University of Texas at Arlington by December 15 for the fall Semester.

Admissions Criteria

There are no fixed criteria for admission to the M.S. or Ph.D. programs in Psychology; many aspects of the student’s application inform our admission decisions, but a complete application package before December 15 is highly recommended to ensure a timely review of the student file (NOTE: the Master of Science in Learning Analytics has a departmental deadline of June 30 for Fall admission, see their webpage for more details). There are, though, some standard requirements. A student is expected to have successfully completed the appropriate work prior to admission, including an undergraduate B.A. or B.S. degree. The Office of Graduate Studies requires a minimum grade point average of 3.0 in undergraduate work for unconditional admission to the program. Graduate coursework will also be reviewed for those who are applying to a degree bound or direct Ph.D. program, if any. For those applying to the direct Ph.D. program already having earned or will earn a masters, a minimum of 28-30 graduate hours with a GPA of 3.0 or better as calculated by the Graduate School is typically required. The Department of Psychology strongly encourages undergraduate courses in statistics and experimental methods prior to admission.

A. Admissions Focus

Graduate admissions committees are subcommittees of the Graduate Studies Committee. Each specialization (i.e., Psychological Sciences, Health/Neuroscience, I/O) will convene an admissions committee to make recommendations to the Graduate Studies Committee regarding advisors of applicants. Each is composed of faculty representatives from the specialization, the graduate advisor and the Department Chairperson. Admissions decisions are based on interpretation of indications of potential success in the program. The following points are generally considered:

a. Grade point average. Most candidates for admissions present averages greater than 3.2. We do, however, examine the applicant’s coursework as evidence of research interest. Positive indicators of success in our program include greater than average work in biological and physical sciences, mathematics and psychology. In similar fashion, evidence of research experience is viewed as a predictor of future research potential. For students interested in specialization in Industrial/Organizational (I/O) Psychology at the Master's level, appropriate coursework is taken into consideration.

b. Submission of Verbal and Mathematics GRE scores is required unless otherwise noted. High GRE scores are viewed positively, but lower GRE scores need not exclude a candidate who shows positive indicators in other areas. We do not require the GRE Subject Test in Psychology. (Not required for MS in Learning Analytics only).

c. If applicable, submission of language-based tests for applicants who do not have a US-based degree: An applicant whose native language is not English must demonstrate a sufficient level of skill with the English language to assure success in graduate studies. This requirement will be waived for non-native speakers of English who possess a Bachelor’s degree from an accredited US institution. Applicants are expected to submit a score of at least 550 on the paper-based TOEFL, a score of at least 213 on the computer-based TOEFL, a minimum score of 40 on the TSE, a minimum score of 6.5 on the IELTS, or a minimum TOEFL IBT total score of 79. Further, When the TOEFL IBT is taken, sectional scores of at least 22 on the writing section, 21 on the speaking section, 20 on the reading section, and 16 on the listening section are preferred. However, admission to any graduate program is limited and competitive. Meeting the minimum admission requirements does not guarantee acceptance and programs may give preference to students with higher scores. Only scores submitted directly by ETS or IELTS to UT Arlington are acceptable. English Proficiency for Graduate Teaching Assistants: Students whose native language is not English must provide a score on the Test of Spoken English (TSE) of at least 45, a minimum score of 23 on the Speaking portion of the TOEFL IBT exam or a minimum score of 7 on the Speaking portion of the IELTS exam. The English proficiency requirement will be waived for non-native speakers of English who possess a Bachelor’s degree from an accredited US institution.
d. **Letters of reference (minimum 3).** These are important insofar as they offer evidence of commitment to research, the ability to think independently, critically and creatively, and to integrate knowledge. Letters also provide additional information about a candidate’s experience and interests. Evidence of success in employment relevant to I/O psychology will be considered for the Master's degree in that area.

e. **The personal statement is required.** The personal statement is meant to be specific concerning your career goals/interests regarding our program. This should describe the applicant’s laboratory, field, or applied interests, career plans, and a discussion of how the UT Arlington program can serve to further these interests and plans. The statement is required and will be examined for evidence of the appropriateness of the candidate to the UT Arlington program. The personal statement should contain information about the student's intended specialization and preferred faculty mentor(s). Students are encouraged to contact specific faculty members during the application process.

f. Finally, successful completion of a Master's degree in another department may be viewed positively even when the degree was received in an area outside of psychology. In this latter case, some conditions in terms of make-up (or deficiency) coursework may be specified.

**B. Admission Status and Eligibility for Assistantship/Fellowship**

As noted in the Graduate Catalog, there are several categories of admission in addition to unconditional admission to the Graduate Program in Psychology.

- **Probationary Admission:** If an applicant does not evidence a majority of the positive indicators for the unconditional admission described above, they may, after careful examination of their application materials be given probationary admission. Probationary admission requires that the new student receive a 3.0 (B average) GPA or better in the first 9-12 hours of graduate course work at UT Arlington.

- **Deferred Admission:** A deferred decision may be granted when a file is incomplete or when denial of admission is not currently appropriate.

- **Provisional Admission:** An applicant unable to supply all documentation (including certified transcripts, GRE scores, letters of reference, and personal statements) prior to the admission deadline, but otherwise appears to meet admission requirements, may be granted provisional admission.

- **Denial of Admission:** Applicants whose records in the aggregate do not show sufficient positive indications of potential success will be denied admission. Please note that not all "qualified" applicants are admitted. Successful admission depends upon the competitiveness of the applicant pool, the number of positions available, and the applicant's fit with the current research interests of the faculty.

- **Eligibility for Assistantship/Fellowship available for PHD Applicants Only:** PHD students who wish to be considered for assistantships should have their application and Department forms sent to The University of Texas at Arlington by December 15 for the Fall Semester. Students unconditionally admitted to the program are eligible for scholarship and fellowship support. Students who are provisionally admitted (pending receipt of their transcript or because they are international students who have not yet met the English language requirement) can receive 1-semester waiver from the Graduate School to hold the assistantship until these items have been received. International graduate teaching assistants who make scores that fall below the required test score on the TSE, SEA, or Speaking Section of the TOEFL iBT test must contact the English Language Institute Office at 817-272-2730 or at http://eli.uta.edu. No funding available for master programs.

The criteria applied will be the same as those applied to admission decisions. To be eligible, candidates typically must: be a new student, have a GPA of 3.0 or higher in their last 60 undergraduate credit hours, plus any graduate credit hours as calculated by the Office of Graduate Studies; and be enrolled in a minimum of 9 hours of course work in both long semesters (6 hours in the Summer) to retain their fellowships (see section entitled "Department Enrollment Policy" below). Assistantship assignments are made by the Department Chairperson in consultation with the Associate Chair and the Graduate Advisors. Students may be eligible for other forms of support including fellowships. Please refer to the Office of Graduate Studies for further information under Financial Aid Resources (https://www.uta.edu/academics/schools-colleges/gradschool/funding)."
Students who are accepted via facilitated admission will be admitted directly to graduate school without completing the application for admission, submitting an application evaluation charge, or taking the GRE. Students who believe they qualify for this program should contact the appropriate Graduate Advisor in the Department of Psychology.

Master's Degree Requirements (Earning a Master's in Passing)

MASTER OF SCIENCE IN PSYCHOLOGY

As soon as is feasible, a student should decide on an area for specialization and research. After discussion with, and consent of the involved faculty members, the student selects a supervising professor and a thesis committee. No student may enroll in PSYC 5698 (Thesis - 6 hours) until the thesis committee has approved a proposal for the thesis project and cannot be retaken more than 4 times.

The MS program in Psychology requires completion of a Master's thesis (with the exception of the I/O program) and may be considered as preparation for doctoral work. Progress toward the Ph.D. degree requires completion of a Master's degree in a specialization in psychology or a "Master's equivalency paper". The MS thesis proposal must be approved by a thesis committee consisting of at least three members of the Psychology graduate faculty (additional members are optional) before the candidate for the MS degree may enroll in PSYC 5698 (Thesis - 6 hours). The completed thesis must receive final approval by the committee in an oral defense, which is open to any interested member of the Department, including students.

Students are to post signs and make e-mail announcements informing the local academic community about their upcoming defense no later than two weeks prior to the defense date. A Final Master's Examination Report must be completed, signed and filed no later than two weeks before the date on which the candidate expects the degree to be conferred. For students who elect the thesis substitute, the final examinations(s) will be determined and administered by all of the members of the student's supervising committee. As above, a Final Examination Report must be filed by the dates listed in the Graduate Calendar.

Specialization in Psychological Sciences or Health/Neuroscience Psychology (Masters in Passing)

Thirty (30) credit hours, as well as six hours of thesis (PSYC 5698), are required to earn a masters in passing while remaining in your Ph.D. program. The masters in passing is designed to form the basis for the doctoral program. Required courses are the following: PSYC 5110, 5405, 5407, 5307 (or 5324), 5333 (or 5334)*, 5313*, 5322*, 5342*, and a 3 hour research course (a combination of 5191 and 5291 or 5391, or 5600). Thesis research and thesis document, approved by a thesis committee, are also required for the Psychological Sciences and Health/Neuroscience specializations. More details about each course can be found at http://catalog.uta.edu/science/psychology/#courseinventory (*must take 3 of the 4 courses.)

Master of Science in Psychology (Industrial/Organizational Emphasis)

The program and curriculum are designed for students who intend to pursue an applied, professional career as practitioners in the field. The program offers both a thesis (41 hours) and a non-thesis option (38 hours); however, all students enter the program under the non-thesis option. The decision to change to a thesis option will be made on a case-by-case basis and will be based on the student's aptitude and career focus, as well as on the fit between the student and the faculty mentor. Whether thesis or non-thesis option is chosen, all students earn a Master of Science in Psychology (Industrial/Organizational Emphasis) and will therefore be required to conduct research related to I/O Psychology. Required psychology courses include PSYC 5405, 5407, 5324, 5325, 5326, 5327 (5127 and 5227), 5330, 5342, 6300, and 5391 OR 5698. Students are also required to complete 400-hours of an outside internship. Students typically complete their thesis or non-thesis option (Individual Research) at the end of their second year.

A typical program of study looks like this (pending final University approval):

<table>
<thead>
<tr>
<th>First Year</th>

</table>

Total Hours: 38-41

Note: Total hours correspond to a non-thesis (38 hrs) or thesis (41 hrs) option.

*Restricted Electives

Other courses subject to department approval
Master of Science in Learning Analytics

Thirty-six (36) credit hours are required for the Master of Science in Learning Analytics. Required courses are the following:

- Core Courses (18 hours): LAPS 5310, 5320, 5330, 5340, 5350, 5360
- Four Electives (12 hours) from: LAPS 5370, 5375, 5376, 5377, 5378, 5380, 5388, 5390, 5391, 5392, 5393, 5394, 5395
- Capstone (6 hours): LAPS 5610

Details about each course can be found at https://catalog.uta.edu/coursedescriptions/laps/.

If a prospective student does not have sufficient statistical experience in prior coursework, they may be required to take LAPS 5370 – Introduction to Statistical Analysis as a leveling course at the end of their core coursework. This course would count as one of four required electives.

After completing 30 hours of coursework (18 hours core, 12 hours elective) and receiving approval from the program coordinator, students may enroll in the LAPS 5610 Capstone course. Students will work in diverse groups of 5 to 6 students along with a faculty mentor, and the small groups will be designed to combine students with diverse skill sets and emphasize community and collaboration. Students will apply program knowledge and skills learned in prior coursework to complete a small-scale, integrative project involving the analysis of a real world, educational data set. Students will have the opportunity to apply for competitive internships that will provide small scholarships. Once the student enrolls in this course, they must continuously enroll in it until they successfully complete their capstone, but no more than 4 times.

**NOTE: At this time, students in the Learning Analytics program may not earn a Master’s in Passing in order to complete a Ph.D.**

Here is a sample program of study:

- Year 1 (Fall)
  - LAPS 5310 Learning Analytics Fundamentals
  - LAPS 5360 Introduction to Data Analysis and R
- Year 1 (Spring)
  - LAPS 5320 Experimental Design and Methodology
  - LAPS 5330 Psychology of Learning and Learning Sciences
- Year 1 (Summer)
  - LAPS 5340 Big Data Methods
  - LAPS 5350 Privacy & Ethics in Learning Analytics
- Year 2 (Fall)
  - Two (2) electives
- Year 2 (Spring)
  - Two (2) electives
- Year 2 (Summer)
  - LAPS 5610 Capstone
Current electives include:

- LAPS 5370 Introduction to Statistical Analysis (leveling course)
- LAPS 5375 Probability and Statistical Inference
- LAPS 5376 Applied Regression Analysis
- LAPS 5377 Linear Models and Experimental Design
- LAPS 5378 Multidimensional Scaling and Clustering
- LAPS 5380 Causal Inference for Program Evaluation
- LAPS 5388 Advanced Methods in Educational Data Management and Learning Analytics
- LAPS 5390 Learning Design Analytics
- LAPS 5391 Independent Study
- LAPS 5392 Cognition, Computers, and Metacognition
- LAPS 5393 Natural Language Processing for Educational Research
- LAPS 5394 Social Network Analysis
- LAPS 5395 Human and Artificial Cognition

**Doctoral Degree Requirements**

**DOCTOR OF PHILOSOPHY**

The degree of Doctor of Philosophy in psychology requires distinguished accomplishments in both scholarship and original research, and a deep understanding of the strategic role of thoughtful research in the development of an empirical science. Although the student must meet the minimum requirements of a planned course of study, the ultimate basis for conferring the degree must be the demonstrated ability to do independent and creative work, and the exhibition of a profound grasp of the subject matter of the field.

**Specializations in Psychological Sciences (Graduate Advisor: Dr. Jared Kenworthy) and Health/Neuroscience (Graduate Advisor: Dr. Yuan Bo Peng)**

The specialization in Psychological Sciences allows students to work in a general experimental context while specializing in one of several areas (e.g., cognitive, social, developmental, personality, industrial/organizational, etc.) The specialization in Health/Neuroscience Psychology is designed to train researchers in health/neuroscience and behavior, working at the cutting-edge of interdisciplinary, biomedical and bio behavioral investigation in areas such as pain, addiction, stress, psycho-immunology, memory, cancer and aging. Most research activity is based on the neurophysiological, bio-behavioral, or biopsychosocial model of health and illness.

**Core Course requirements**

Graduate students entering the Psychological Sciences specialization will be required to take the following 3 of the 4 core courses (Psyc 5333 or 5334, Psyc 5313, Psyc 5322, Psyc 5324) during their first four semesters of enrollment (min. 24 hours). Exceptions may be made only with written permission of the Graduate Studies Committee. It should also be mentioned that students are expected to maintain their GPA at or above a 3.0 average each term to ensure the successful completion of the program. Therefore, a grade of D is not considered to be acceptable at the doctoral level and if earned, the student risks being dropped from the program. Grades of C have been found to slow down adequate academic progress and should not be taken lightly. All students are expected to consult their faculty mentors if such grades are earned to see how the GPA can be improved.

</tbody>
</table>

Having fulfilled the above, the following are also required:

Four courses (12 hours) from among electives and seminars (PSYC 6300), including Human Physiology (PSYC 5334) or Behavioral Neuroscience (PSYC 5333), Personality Psychology (5321), Human Learning & Memory (PSYC 5345), Neuropsychopharmacology (PSYC 6320), Group Processes (PSYC 5323), Social & Personality Development (PSYC 6318), Health Psychology (PSYC 5309). The other required elective course must be approved by the
appropriate Graduate Advisor and/or Committee on Graduate Studies and can include a graduate level course in statistics, genetics, immunology, endocrinology, or other specialized biomedical topic available at UT Southwestern or another UT Arlington department.

a. Two six-hour research courses. These may be taken from Thesis PSYC 5698 or Advanced Research PSYC 5600. Students who plan to obtain the MS should elect PSYC 5698 as one of the research courses and students who do not plan to obtain the MS should select two sections of PSYC 5600. If the student does not elect to obtain the MS, one of the research courses must result in a formal thesis-equivalent paper, which will be evaluated by a committee and defended in an oral examination. The two research courses are a minimum requirement. Students are strongly encouraged to take Research in Psychology PSYC 5391 before taking PSYC 5600 and PSYC 5698. Please note that Psyc 5698 should not be taken more than 4 times. Students should only enroll in Psyc 5698 once they have successfully proposed their thesis.

b. Additional hours of coursework to be determined by the Graduate Advisor and dissertation committee. The student should plan to take approximately 67 hours including PSYC 6999. Please note that a total of 9 dissertation hours are required for graduation (a combination of 6399, 6699, 6999, and 7399). At least 31-34 of these hours must be in organized courses, lectures or seminars. No student may enroll in a dissertation course until the dissertation committee has approved a proposal for the dissertation project.

Students with prior graduate work may be waive up to 9 hours from any of the above requirements by a written request to the Graduate Studies Committee. The request should include a syllabus or other documentation showing that a prior course and one of our required courses are equivalent. Students should discuss course equivalency with the professor(s) who teach the course(s) in question before submitting the request.

A student has completed the course requirements when he or she has maintained at least a B average in all courses.

Note: This is based on a 5-year program of study. Students may adjust the speed at which milestones are achieved by adding 4th year courses earlier. A doctoral student must pay non-resident tuition beginning the first long semester (Fall or Spring) in which a) the student has been enrolled previously as a graduate student for 14 or more long semesters, AND b) the student has accumulated more than 99 semester credit hours of graduate study at any Texas state university. Students exceeding either limit will not be eligible for assistant ships supported by state funds.

Research Requirements

Research requirements include general expectations of student involvement in research throughout their graduate career and specific milestones that must be accomplished in order, including the Research Progress Symposium, the Master’s Thesis or equivalent paper, the Major Area Paper (MAP; Diagnostic/Qualifying Exam), the Dissertation Proposal (Comprehensive Exam), and the Dissertation Defense. University requirements mandate the
completion of six hours of Master's research and another "nine total hours of Dissertation research in the semester that degree requirements will be completed. *Please see the section entitled "Dissertation Hours" for an explanation of the different dissertation registration options.

Prerequisite Conditions for the Major Area Paper

In order to begin working on the Major Area Paper (MAP; diagnostic examination), students must complete:

a. The Departmental Core Curriculum requirements as set forth elsewhere in the catalog. Generally, these course requirements will be met within the first two years of graduate enrollment.

b. Students must also satisfactorily participate in the Research Progress Symposium (RPS), a twelve-minute presentation of original research, taking place as early as the third long semester but must be completed by the fourth long semester (Spring of the 2nd year)

c. Finally, a Master's Thesis (or equivalent) must be completed. Students entering the program with a master's degree must complete the Departmental Core Curriculum requirements and participate in the RPS before being invited to begin work on the MAP.

Major Area Paper (MAP)/Diagnostic/ Qualifying Examination

Upon completion of these prerequisite conditions, students will be invited to begin consulting with their major Major Area Paper (MAP) committee regarding the project, and are expected to finish within one year. Students should enroll in Psyc 6391 in the first long semester following the MAP invite and continue to course as long as they are working on their MAP.

MAP and MAP Oral Defense

The MAP consists of a comprehensive review paper, which is a summary, integration, and critical review of the literature relevant to a general theme or topic. It is expected that the student will offer a novel and forward-thinking perspective on the topic area. The MAP does not directly propose research hypotheses and designs, nor does it involve the collection of primary-level data. It may be either a quantitative review (i.e., a meta-analysis) or a more qualitative review. It should contain a concluding section in which novel theoretical ideas are proposed and elaborated upon, and which will form a basis for the MAP Oral Defense. The topic area, scope, and timeline of the MAP will be developed with the student's primary faculty mentor and one or two other Department of Psychology Faculty members.

MAP candidates shall convene a prospectus meeting with their MAP Committee before beginning the work on their MAP, in which they present and discuss a 1-2 page abstract or prospectus, outlining the aims, scope, feasibility and structure of the MAP. This abstract should be accompanied by an annotated reference list of key works, indicating an understanding of the literature to which the MAP will continue. Before beginning the MAP, documentation of this meeting shall be submitted to the department for the student's file.

The topic and content of the MAP should not have substantial overlap with either the student's Thesis or with their eventual Dissertation proposal or project. In accordance with the University policy, MAP Committees must be comprised of three (3) members of the Graduate Faculty. Students should consult their Committee members for general comments and direction before beginning work on the MAP, but Committee member involvement in the writing of the MAP (including that of the student's Faculty mentor) is expected to be minimal. Any feedback from others should not be substantive, but should instead resemble the feedback given by article or grant reviewers.

Upon submission of the MAP document to the Committee, the Committee will evaluate the MAP in terms of its potential contribution to the student's chosen field, and in terms of the degree to which it represents Ph.D.-level thinking, communication, independence, and scholarship. Ordinarily, the Committee will take no longer than 2-3 weeks to evaluate the MAP and communicate their decision regarding the document to the student. If the Committee determines that the MAP document is unacceptable, the student will be given one opportunity to revise it for a second evaluation by the Committee. If the revised version of the MAP is also judged to be unacceptable, the student will not be invited to pursue the Ph.D. degree in the UT Arlington Graduate Program in Psychology. Such a student's Master's degree will thus be his/her terminal degree.

If and when the MAP document is deemed acceptable by the Committee, the Committee will invite the student to schedule a MAP Oral Defense, which will take place no sooner than two weeks following communication from the Committee to the student that the student's MAP is acceptable. The MAP Oral Defense consists only of the student and Committee members, and is not open to other students, faculty, staff, or the general public. In this meeting, which will normally last between 90 and 120 minutes, Committee members will assess the student's knowledge of the topic area, the theoretical background, the methodologies likely to be employed in related research, limitations to the ideas, and conceptual and practical connections to related issues. The Committee will determine whether or not the student has clearly passed the examination, clearly failed, or passed with conditions which must be met before Ph.D. Candidacy is recommended. Upon passing both the MAP and the MAP Oral Defense, a Diagnostic Evaluation Report form must be completed, signed, and filed. In order to be deemed making satisfactory academic progress, students are expected to complete the MAP within one calendar year once invited.

DISSERTATION

Dissertation Proposal

Students who pass their MAP/diagnostic examinations may continue in the Ph.D. program after having a dissertation proposal approved by their dissertation supervising committee. The committee is formed by a student in consultation with his or her major advisor and the Graduate Advisor, and consists of at least five members, at least three of whom are from the psychology Graduate Faculty (additional members are optional).

The meeting with members of the dissertation committee is a closed one so that the proposed project can be discussed in a confidential manner. The oral presentation of the dissertation proposal satisfies the University requirement that a graduate student must take and pass a "comprehensive
examination" prior to advancement to candidacy for the PhD degree. During the presentation, the student responds to any questions the committee members may have about the project. The committee may approve the project, suggest modifications that would make the project acceptable, or reject the proposal and require a new one. In addition to satisfying the comprehensive examination requirement, approval of the dissertation proposal implies that the project is acceptable as a research topic that the project's conceptualization, design, and proposal methods are acceptable and that particular results ("positive results") are not required. As noted above, approval of the dissertation proposal also is the final step for the student to be admitted to candidacy for the PhD degree. The dissertation course (PSYC 6399, 6699, 6999 or 7399) can be taken (see dissertation hours section below). During this period, meetings with the committee are on an “as needed” basis. The dissertation project is then carried out as approved, or as modified with prior approval of the committee members, and the dissertation is written. When a student has completed a draft of the dissertation that the primary mentor deems appropriate for his or her committee, a date for the oral defense is scheduled, and written drafts must be provided to committee members at least two weeks before this date.

**Dissertation Hours**

Doctoral students must take a minimum of 9 hours of dissertation. This can be accomplished by taking 6999 or a combination of other dissertation course options. A doctoral student working on a dissertation should be enrolled in an approximate 6X99 or 7399 dissertation course. A student receiving advice and assistance from a faculty member in the preparation of a dissertation must register in the course even if the student is not on campus. Doctoral students must enroll in the appropriate 6699, 6999, or 7399 Dissertation Completion course the semester in which the dissertation is defended. Students that typically enroll in these courses defend and apply for graduation in the same semester. There are 4 options for dissertation registration:

- **6399** is the most basic dissertation course and is repeatable, however, this course only has graded options of R and F. P grades cannot be assigned in this course and therefore dissertation defenses must not be conducted when a student is enrolled exclusively in a 6399 course. **It is a requirement for graduation that a student be awarded a P grade for a successful defense and this is not a grading option for this course.**
- **6699** is repeatable with grade options of P, F, or R and should be taken when a student expects to work approximately 6 hours per week on their dissertation.
- **6999** is repeatable with grade options of P, F, or R. It should be taken when a student expects to work approximately 9 hours per week on their dissertation.
- **7399** should be taken only in the term in which a student expects to complete all requirements and graduate. Grade options are P, F, and R. This course is not repeatable under any circumstances. If a student receives an R grade in 7399, they must enroll in 6699 in next and any future terms. Enrolling in 7399 meets the university full-time enrollment requirements (note that financial aid, loan agencies, and other organizations may not accept 3 hours as full-time enrollment. It is the student's responsibility to find out).

**Dissertation Defense**

The PhD final oral examination (that is, the "dissertation defense") is conducted by the dissertation committee in a meeting that is open to any member of the University community and to guests. Graduate students are urged to attend all dissertation defenses, especially those in their own area(s) of specialization. Defending students will post flyers approved for posting and stamped by the Student Governance Office and make e-mail announcements informing the local academic community about the defense at least two weeks prior to the defense date. The PhD oral examination is conducted by the dissertation committee. The first part of the examination is an oral presentation of the research and its findings. This portion of the meeting is open to any member of the University community and guests. The second part is a closed examination and consists of specific detailed questions about the dissertation. Both oral defense and the written dissertation must be passed. A Dissertation Defense Report form must be filed in conjunction with the oral dissertation proposal presentation.

**Specialization in Industrial/Organizational Psychology**

The doctorate of psychology with an emphasis in I/O is designed for students who intend to conduct research in I/O psychology and begin their professional career as either an academician or a research-oriented practitioner in the field. Students working toward the I/O doctoral degree are expected to develop, implement, and complete research as part of the degree requirements. Additionally, students have the opportunity to be involved with a student-staffed consulting organization, The Insights for Organizations Center. The I/O specialization is currently a part of the Experimental program and requires completion of psychology, methods, and I-O specific courses.

Due to the applied nature of I/O MS programs, if an MS degree has been conferred or is conferred en route to the Ph.D., then it is not necessary to conduct a thesis or a formal thesis-equivalent paper. Students may take 6 hours of Advanced Research (PSYC 5600), under the supervision of their major professor, to work toward obtaining additional publications and strengthening research-oriented skills.

**Current I/O Master of Psyc students**

Students currently enrolled in the I/O Master of Psyc program who wish to be considered for admission into a PhD program must submit the Change of Program form for either Psychological Sciences or Health/Neuroscience and must follow the formal admission procedures as stated previously. Students must meet the criteria for admission to the PhD program which will be determined, in part, by the scholarly achievements accomplished as well as the fit between the student and faculty mentor.
SOME UNIVERSITY AND DEPARTMENT POLICIES

Deadlines
A variety of University and Office of Graduate Studies deadlines are published each year by the Office of Graduate Studies. Students are responsible for meeting any deadlines that may apply to them. For your convenience, the link to the Office of Graduate Studies Calendar is provided here: http://www.uta.edu/uta/acadcal.php

Department Enrollment Policy
All full-time doctoral students are recommended to enroll in at least six hours of course work each regular semester. State law requires that students on support enroll in at least nine hours of course work during the Fall and Spring Semesters (six hours during Summer Semesters) until a student is post-comprehensive examination, at which time the student can drop to 6 and/or 3 hours in their last two semesters and still maintain an assistantship. Please see the Department’s Administrative Assistant for additional information regarding this policy. The nine-hour requirement may be reduced to six hours during the Fall and Spring Semesters (three hours during Summer Semesters) when enrolled in course work in other UT Arlington departments (see Credit for Courses Taken in Other Departments on the UT Arlington Campus in our graduate student handbook on our website).

Enrollment in Readings (PSYC 5151, 5251, 5351) will not be allowed without prior approval of both an appropriate Faculty member and the Graduate Advisor. (See also the enrollment requirements for teaching assistants under section IV.B Teaching Skills Requirement.) International students are required to enroll in nine hours each semester that they are in attendance.

Academic Honesty
Every student is expected to be intellectually honest and professionally ethical in all aspects of graduate work. Academic dishonesty, such as cheating on examinations, falsification of data or student records, or plagiarism, will result in a review by the Graduate Studies Committee and a potential dismissal from the Graduate Program. All students are expected to be familiar with American Psychological Association and American Psychological Society publications on ethical principles in the conduct of research using online databases, as well as human and/or animal subjects.

Grade Grievances
The student must first discuss the appeal of a course grade with the instructor who issued the grade. This step must be taken promptly. The student must file the grievance within one (1) year from the date that grades are posted, and preferably within 45 days. If the instructor is unavailable, the student may proceed in the appeal process and discuss the matter with the Department Chairperson responsible for the course for which the grade is being appealed.

In the event the student and the instructor are unable to reach agreement, or the instructor is unavailable, the student must follow the departmental protocol for grade appeals:

a. The student is responsible for contacting the Department Chairperson
b. The Department Chairperson will convene a subcommittee
c. The subcommittee will review the appeal and relevant documents, and will provide a recommendation to the Department Chairperson.
d. The Department Chairperson will review the subcommittee’s recommendation and make a decision.
e. If the student wishes to pursue a grade appeal beyond the Department Chairperson, the student must complete the Student Grade Appeal Form and deliver it to the Dean’s Office, College of Science, with any supporting documentation the student wishes to provide.
f. The Dean’s decision is final.

Withdrawing from the University
Students requiring a medical withdrawal should speak to their faculty mentor and department staff as soon as possible to determine the appropriate course of action and paperwork required. Please refer to the University catalog to review all appropriate procedures and regulation regarding medical withdrawals. In contrast, those needing to withdraw for non-medical reasons (ex. dismissal from the program) are responsible for dropping their own classes prior to the start of the semester. If the classes are not dropped prior to the first day of class, the student accepts financial responsibility for any issues regarding a refund or lack thereof. It is also the student’s responsibility to contact the graduate coordinator to determine how to drop their classes.
Psychology - Undergraduate Programs

Academic Advising:  320/321 Life Science Bldg. · 817-272-0858

Overview

The Department of Psychology offers two programs of study leading to the bachelor's degree. It also offers courses of interest to the general public.

The Bachelor of Arts degree in psychology is for those who wish to obtain a broad liberal arts education with a concentration in psychology. It is also a preparation for graduate studies in psychology and many other fields.

The Bachelor of Science degree in psychology is intended for those students preparing for work and study in fields requiring more mathematics and sciences. It is also suitable for pre-medical and pre-dental students. Students preparing for study in the health professions including medicine, dentistry, pharmacology, optometry, occupational therapy, and veterinary medicine should also be advised by the Health Professions Advisor in, Room 107 A, Life Science Building in order to meet the requirements of the corresponding professional schools.

Courses of general interest to the academic community include the following, which have no prerequisites:

<table>
<thead>
<tr>
<th>Course Code</th>

</table>

UNIV 1101 Career Preparation and Student Success

All transfer students are required to enroll in a 1-credit hour career preparation course, UNIV 1101 or UNIV-SC 1101. Transfer students need to take this course before the end of the first year at UTA unless they meet any of the following criteria:

- Non-degree seeking status
- Post-baccalaureate status
- Have an equivalent Transfer course

UNIV 1131 Issues in College Adjustment

All entering freshman are required to enroll in a 1-credit hour college adjustment course, UNIV 1131.

Acceptance Requirements for a Major in Psychology

Students who wish to apply for major status in psychology must first meet the University and College of Science requirements for admission to major status and the specific requirements of the Department of Psychology listed below.

Overall and Psychology GPA of at least 2.25. To be changed to full major you must first complete PSYC 2300, PSYC 3200 and PSYC 3300 with a C or better in each course.

Academic Probation (College of Science): Majors whose overall GPA or GPA in major courses falls below 2.25 will be placed on probation and must consult with the Department Advisor prior to enrolling in additional courses.

Admission to Upper-Level Laboratory Courses:

To enroll in the Advanced Topic courses the student must make a C or better in both PSYC 2300, PSYC 3200 and PSYC 3300 or equivalent courses and must have completed the associated upper-division lecture course.

Advanced Topic courses: PSYC 4410, PSYC 4411, PSYC 4412, PSYC 4415, PSYC 4420, PSYC 4421, PSYC 4430, PSYC 4431.

Distinguished Scholars in Psychology

The Department of Psychology offers a Distinguished Scholars program in psychology. This program is intended to provide students with the opportunity for intellectual and professional development that will take them beyond the requirements of the basic B.A. or B.S. degrees. Thus, the program serves to promote and acknowledge the special achievements of participating students.

To qualify, the student must have completed 30 hours with a grade point average of 3.0 or better in residence at UT Arlington, including 10 hours in psychology, with a minimum grade point average of 3.5 or better. The student does background reading and designs a study with a faculty sponsor in
PSYC 4361, then performs the research project and writes an honors thesis in PSYC 4398. In most cases, the six hours of Distinguished Scholar credit will not increase the total hours necessary to complete the B.A. or B.S. degree.

Qualified students or students who believe they may qualify should contact the undergraduate advisor as soon as possible after completing PSYC 3300.

## Requirements for a Bachelor of Science Degree in Psychology

The requirements to receive a Bachelor of Science Degree in Psychology can be achieved through a degree plan under any one of the two options (i.e., Option 1-BS in Psychology with a minor from a different discipline, Option 2- BS in Psychology with an Emphasis in Psychology). Before choosing a degree program under one of these options, please consult with the psychology undergraduate advisor. Click here for a sample degree plan: [Unofficial_BS_Degree_Plan.pdf](http://catalog.uta.edu/science/psychology/undergraduate/Unofficial_BS_Degree_Plan.pdf)

#### Program Requirements

Select one of the following in computer literacy:

- CSE 1310: INTRODUCTION TO COMPUTERS & PROGRAMMING
- INSY 2303: INTRODUCTION TO M.I.S. AND DATA PROCESSING

Or any equivalent course

Or passing the university computer proficiency test

Select one of the following in oral communication competency:

- COMS 1301: FUNDAMENTALS OF PUBLIC SPEAKING
- COMS 2302: PROFESSIONAL AND TECHNICAL COMMUNICATION FOR SCIENCE AND ENGINEERING
- COMS 2305: BUSINESS AND PROFESSIONAL COMMUNICATION

Or an equivalent three hour course approved by the Undergraduate Advisor

Modern Language Level III and IV or Courses from the Cultural Studies List (see psyc advisor for list)

Need a total of 15-16 hours in Life & Physical Sciences including the 8 hours from the biology sequence. Select from the following sciences, or seven additional hours in biology for science majors courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1441 &amp; CHEM 1442</td>
<td>7-8</td>
</tr>
<tr>

</tr>
<tr>
<td>PSYC 3334</td>
<td>COGNITIVE PROCESSES</td>
<td>3</td>
</tr>
</tbody>
</table>

### Lecture Groups

Select one three-hour lecture course from each of the Groups I, II, and III; plus one three-hour course from either Group I, II, or III:

#### Group I

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 3310</td>
<td>DEVELOPMENTAL PSYCHOLOGY</td>
<td></td>
</tr>
<tr>
<td>PSYC 3312</td>
<td>SOCIAL &amp; PERSONALITY DEVELOPMENT</td>
<td></td>
</tr>
<tr>
<td>PSYC 3314</td>
<td>PSYCHOLOGY OF PERSONALITY</td>
<td></td>
</tr>
<tr>
<td>PSYC 3319</td>
<td>PSYCHOLOGY OF ADOLESCENCE</td>
<td></td>
</tr>
</tbody>
</table>

#### Group II

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>

<tbody>
<tr>
<td>PSYC 3304</td>
<td>ANALYSIS &amp; MANAGEMENT OF BEHAVIOR</td>
<td></td>
</tr>
<tr>
<td>PSYC 3320</td>
<td>BEHAVIOR AND MOTIVATION</td>
<td></td>
</tr>
<tr>
<td>PSYC 3326</td>
<td>ANIMAL BEHAVIOR</td>
<td></td>
</tr>
<tr>
<td>PSYC 3356</td>
<td>EVOLUTIONARY PSYCHOLOGY</td>
<td></td>
</tr>
<tr>
<td>PSYC 4309</td>
<td>NEUROPHARMACOLOGY</td>
<td></td>
</tr>
<tr>
<td>PSYC 4327</td>
<td>BEHAVIORAL GENETICS</td>
<td></td>
</tr>
</tbody>
</table>

#### Group III

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 3317</td>
<td>INTRODUCTION TO CLINICAL AND COUNSELING PSYCHOLOGY</td>
<td></td>
</tr>
<tr>
<td>PSYC 3318</td>
<td>ABNORMAL PSYCHOLOGY</td>
<td></td>
</tr>
<tr>
<td>PSYC 4332</td>
<td>THEORIES OF HUMAN LEARNING AND MEMORY</td>
<td></td>
</tr>
<tr>
<td>PSYC 4357</td>
<td>HEALTH PSYCHOLOGY</td>
<td></td>
</tr>
</tbody>
</table>

### Advanced Topics Course

Select one four-hour advanced topics course from either Group I, II, or III:

#### Group I

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 4410</td>
<td>ADVANCED TOPICS IN DEVELOPMENTAL PSYCHOLOGY</td>
<td></td>
</tr>
<tr>
<td>PSYC 4411</td>
<td>ADVANCED TOPICS IN PERSONALITY</td>
<td></td>
</tr>
<tr>
<td>PSYC 4412</td>
<td>ADVANCED TOPICS IN SOCIAL PSYCHOLOGY</td>
<td></td>
</tr>
</tbody>
</table>

#### Group II

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 4420</td>
<td>EXPERIMENTAL ANALYSIS OF BEHAVIOR</td>
<td></td>
</tr>
<tr>
<td>PSYC 4421</td>
<td>ADVANCED TOPICS IN NEUROSCIENCE</td>
<td></td>
</tr>
</tbody>
</table>

#### Group III

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 4415</td>
<td>INTERNSHIP IN PSYCHOLOGY</td>
<td></td>
</tr>
<tr>
<td>PSYC 4431</td>
<td>ADVANCED TOPICS IN COGNITIVE SCIENCE</td>
<td></td>
</tr>
</tbody>
</table>

### Minor or Emphasis

Either a minor of 18 hours in a discipline other than Psychology or an Emphasis in Psychology (General, Clinical Health, Neuroscience or Organizational Science), which consists of 18 hours of Psychology course work, is required. (See Minor page on the Psychology website for details)

### Electives

Sufficient hours to complete the total required for the degree.

### Total

120 hours, of which at least 36 hours must be 3000/4000-level.

---

1. See General Core Requirements (p. 47) for approved courses.
2. Prerequisites may add hours to the total required for the degree.
3. Computer Skills Placement Test Website link below:
   [https://www.uta.edu/studentsuccess/testing-services/proficiency-and-other-exams/csp.php](https://www.uta.edu/studentsuccess/testing-services/proficiency-and-other-exams/csp.php)

Minor or Emphasis

Either a minor of 18 hours in a discipline other than Psychology or an emphasis in Psychology (General, Clinical Health, Neuroscience or Organizational Science), which consists of 18 hours of Psychology course work, is required. (See minor page on Psychology website for details)

Electives

Sufficient hours to complete the total required for the degree.

Total

120 hours, of which at least 36 hours must be 3000/4000-level.

---

1 See General Core Requirements (p. 47) for approved courses.
2 Prerequisites may add hours to the total required for the degree.
3 Computer Skills Placement Test Website Link Below:

### General Psychology Minor

A minor consists of 18 credit hours or more in Psychology (PSYC) courses. 9 of the 18 hours must be completed at UT Arlington. Six of the 9 hours must be 3000-4000 level. A 2.0 grade point average(calculated only by the PSYC courses you take in residency) must be maintained in the minor. To request a minor be added to your degree plan, please complete the minor request form (https://cdn.web.uta.edu/-/media/project/website/science/psychology/documents/degree-programs/undergraduate/minors/general-psych-minor02172022.ashx?revision=0c43d798-a730-4051-92fb-ca942af86cb) and seek approval from your academic advisor.

### Clinical Health Psychology Minor

The Clinical Health Psychology minor consists of 18 credit hours or more in Psychology (PSYC) courses. A 2.0-grade point average(calculated only by the PSYC courses you take in residency) must be maintained in the minor. To request a minor be added to your degree plan, please complete the minor request form (https://cdn.web.uta.edu/-/media/project/website/science/psychology/documents/degree-programs/undergraduate/minors/clinical-health-psychology-minor02172022.ashx?revision=2c3cd36-5ddf-4bba-8585-c95bc852f280) and seek approval from your academic advisor.

Courses you can take towards the minor are:

*Prerequisite of PSYC 1315 (Intro to Psychology) with a C or better before starting any of the following courses.*

- PSYC 3304 Analysis and Management of Behavior
- PSYC 3310 Developmental Psychology
- PSYC 3312 Social and Personality Development
- PSYC 3314 Psychology of Personality
- PSYC 3317 Introduction to Clinical and Counseling Psychology
- PSYC 3318 Abnormal Psychology
- PSYC 3319 Psychology of Adolescence
- PSYC 3320 Behavior and Motivation
- PSYC 3322 Brain and Behavior
- PSYC 4301 Principles of Neuroscience
- PSYC 4309 Neuropsychology
- PSYC 4327 Behavioral Genetics
- PSYC 4357 Health Psychology
- PSYC 4410 Advanced Topics in Developmental Psychology
- PSYC 4411 Advanced Topics in Personality

---

1. These are suggestions only. See your academic advisor for an actual degree worksheet.
2. See catalog or handbook for course options.
Psychology - Undergraduate Programs

PSYC 4421 Advanced Topics in Neuroscience
PSYC 4430 Advanced Topics in Clinical and Counseling
PSYC 4432 Advanced Topics in Health Psychology
PSYC 4398 Honors Thesis**
PSYC 4161, 4261, 4361 Readings in Psychology**
PSYC 4181, 4281, 4381 Research in Psychology**

** A maximum of 6 hours of honors thesis, research, or readings credits may be applied to the minor

Courses may be added to the list as they are offered.

Neuroscience Minor

A Neuroscience minor consists of 18 credit hours or more in Psychology (PSYC) courses. A 2.0 grade point average (calculated only by the PSYC courses you take in residency) must be maintained in the minor. To request a minor be added to your degree plan, please complete the minor request form (https://cdn.web.uta.edu/-/media/project/website/science/psychology/documents/degree-programs/undergraduate/minors/neuroscience-psychology-minor02172022.ashx?revision=cb143bc0-7d14-4f3d-b146-8d3fe46b2730) and seek approval from your academic advisor.

Courses you can take towards the minor are:

Prerequisite of PSYC 1315 (Intro to Psychology) with a C or better before starting any of the following courses.

PSYC 3304 Analysis Management of Behavior
PSYC 3320 Behavior and Motivation
BIOL/PSYC 3322 Brain and Behavior
BIOL/PSYC 3326 Animal Behavior
PSYC 3334 Cognitive Processes
PSYC 3356 Evolutionary Psychology
BIOL/PSYC 4301 Principles of Neuroscience**
BIOL/PSYC 4309 Neuropharmacology **
BIOL/PSYC 4327 Behavioral Genetics
PSYC 4420 Experimental Analysis of Behavior
BIOL/PSYC 4421 Advanced Topics in Neuroscience **
PSYC 4431 Advanced Topics in Cognitive Science

** Additional prerequisite of BIOL/PSYC 3322 required.

Courses may be added to the list as they are offered.

Organizational Science Minor

The Organizational Science minor consists of 18 credit hours or more in Psychology (PSYC) courses. A 2.0 grade point average must be maintained in the minor. To request a minor be added to your degree plan, please complete the minor request form (https://cdn.web.uta.edu/-/media/project/website/science/psychology/documents/degree-programs/undergraduate/minors/organizational-sciences-psychology-minor02172022.ashx?revision=ecb3ff23-5d69-4133-8295-e30be09d0a55) and seek approval from your academic advisor.

Courses you can take towards the minor are:

Prerequisite of PSYC 1315 (Intro to Psychology) with a C or better before starting any of the following courses.

PSYC 3301 Psychology of Human Relations
PSYC 3302 Business Psychology
PSYC 3305 Psychology of Employee Training
PSYC 3306 Psychology of Creativity and Creative Thinking
PSYC 3314 Psychology of Personality
PSYC 3315 Social Psychology
PSYC 3320 Behavior and Motivation
PSYC 3334 Cognitive Processes
PSYC 4332 Theories of Human Learning and Memory
PSYC 4339 Psychology of Judgment and Choice
PSYC 4398 Honors Thesis**
PSYC 4161, 4261, 4361 Readings in Psychology**
PSYC 4181, 4281, 4381 Research in Psychology**

Courses may be added to the list as they are offered.
School of Social Work

Overview

The School of Social Work (SSW) has a long, well established history at UTA. Initially, beginning in 1967, only the MSW degree was offered. In 1979, The Bachelors of Social Work (BSW) degree was founded but under the auspices of the Department of Sociology, Anthropology, and Social Work. The Doctor of Philosophy (Ph.D.) in Social Work degree program was initiated in 1983. On September 1, 1991, the graduate and undergraduate programs were brought together into a unified administrative and academic unit, the School of Social Work.

The School now has a diverse student body of over 1,800 students enrolled in four degree programs: the Bachelor of Social Work (BSW) (https://www.uta.edu/academics/schools-colleges/social-work/programs/bsw/), Bachelor of Science in Substance Use & Treatment (BSSUT) (https://www.uta.edu/academics/schools-colleges/social-work/programs/bssut/), Master of Social Work (MSW), (https://www.uta.edu/academics/schools-colleges/social-work/programs/msw/) and the Ph.D. in Social Work (https://www.uta.edu/academics/schools-colleges/social-work/programs/phd/). The BSW and MSW programs are fully accredited by the Council on Social Work Education.

With a commitment to social justice, the School is also home to the Diversity Studies program (https://www.uta.edu/academics/schools-colleges/social-work/programs/minors/diversity-studies/), where undergraduate students can enroll in a cluster of courses to earn a certificate or minor in diversity. Additionally, undergraduate students may choose to minor in Social Justice and Social Welfare or Substance Use Treatment.

The MSW, BSW, and BSSUT programs are offered in person and fully online, and are available to students both within the state of Texas as well as to out-of-state students. In addition to in person courses offered at the Arlington campus, some courses are also available in person at the UTA Fort Worth campus. Graduate certificates are available to students seeking to develop additional expertise in working with military populations through our Military Social Work Certificate or our Military, Veteran, and Family Care Certificate. In addition, students interested in developing additional leadership skills may select one of four graduate leadership certificates in Community Leadership, Organizational Leadership, Administrative Leadership, or Policy Leadership.

In the BSW program, we prepare students for a wide range of entry level, generalist practice and social service positions. The BSSUT program prepares students for careers in the field of substance use disorder assessment and treatment. In the MSW program, students prepare for advanced level positions with specializations in either direct clinical practice with families and children, mental health and substance abuse, aging, or health, or in community and administrative practice. In the Ph.D. program students are prepared for positions in academia where they can teach and continue research in areas of importance to the social work profession. All four programs offer challenging courses, internships, and practicums designed to teach practice knowledge and skills while instilling the value orientations of the profession.

Mission and Philosophy

The School of Social Work (SSW) strives to educate leaders to create community partnerships for promoting a just society. The School promotes the highest standards of integrity and excellence in research, teaching and service, and creates collaborative scholarly and educational opportunities for students and the community, with the goal of achieving a just society.

The SSW has identified several broad program objectives: engaging in evidence-informed research, teaching and practice, preparing students to assume leadership roles and activities in the local community and beyond, and to conduct community-based research to address complex and pressing social issues at the local, national and global levels.

Office of Advising and Student Retention

To help students in the SSW reach their graduation goals we established the Office of Advising and Student Retention. Through this office students receive timely and accurate professional and academic advising, connection to the larger campus, and referrals to additional services to facilitate academic achievement. For more information contact the Office of Advising and Student Retention at (817) 272-3647.

Scholastic Activity and Research Interests of the Faculty

In the SSW there are three research centers: the Judith Birmingham Center for Child Welfare, the Center for Addictions & Recovery Studies (CARS) and the Center for Clinical Social Work, (CCSW). The centers offer training, research, and service opportunities to faculty and students.

Our faculty are outstanding scholars and teachers in the domains of child welfare, family violence, health, mental health, aging and disability and are active in developing new knowledge in their respective fields, producing significant numbers of peer-reviewed journal articles, books, and book chapters each year.

Research produced by faculty has generated not only new knowledge, but also intervention outcomes that have garnered national attention and recognition, with a number of faculty members serving either as editors-in-chief of peer-reviewed journals, or as members of editorial review boards.
COURSES

SOCW 1231. SOCIAL WORK PROFESSIONALISM. 2 Hours.
Equips students with skills and resources to prepare for academic and professional success. Empowers diverse students to identify their individual needs, reflect on opportunities for growth, determine what resources and self-care strategies are appropriate, recognize the faculty role in their development, and formulate a plan for an actively engaged and enriched experience from campus to career. Each class section has a Peer Academic Leader (PAL), who are students who have already taken the course and assist as a discussion leader for the class under the supervision of the instructor. This course is reserved exclusively for students planning to major in Social Work (e.g., BSW-Intended status) who are freshmen; this will be taken concurrently with UNIV 1131. This course or SOCW 3300 is required for admission to the BSW major.

SOCW 1350. SPECIAL ISSUES IN SOCIAL WORK. 3 Hours.
Relevant social work topics generated and explored in depth according to student and professional needs. The topic will be determined prior to registration. We sometimes transfer in 1000 level courses and need a generic 1000 level for allocation.

SOCW 2302. LIFE SPAN DEVELOPMENT AND HUMAN BEHAVIOR. 3 Hours.
This course explores, within the context of a strengths and empowerment based perspective, the bio-psycho-social development of persons from birth to death. It is strongly recommended that this course be taken before SOCW 3301. This course is required for Social Work Field Instruction and Seminar I (SOCW 4951). This course satisfies the University of Texas at Arlington core curriculum requirement in Social and Behavioral Sciences. For students seeking the BSW major who are Field of Study complete in Social Work, this course is not required.

SOCW 2325. INTRODUCTION TO STATISTICS FOR SOCIAL WORK AND THE SOCIAL SCIENCES. 3 Hours.
This course is designed to enhance students’ skills as research consumers and in performing research and statistical analyses in social work and the social sciences. This course teaches analytical methods that permit social workers to explore and understand the effects of individual differences on the impact of treatments and the success of interventions between various ethnic and cultural groups, gender identities, across the life span, and through different socio-economic levels. Included in the course are descriptive statistical procedures including measures of central tendency, variability, shape and distribution along with associations between two variables. In addition, inferential statistics are covered including estimation and hypothesis testing.

SOCW 2350. SPECIAL ISSUES IN SOCIAL WORK. 3 Hours.
Relevant social work topics generated and explored in depth according to student and professional needs. The topic will be determined prior to registration.

SOCW 2361. INTRODUCTION TO SOCIAL WORK. 3 Hours.
An overview of the social work profession, its fields of practice, methods of social intervention, its historical context, and its relationship to the social welfare system. This course is open to all students and satisfies the requirement for Social and Behavioral Sciences in the core curriculum. This course is required for the Bachelor of Social Work (BSW) program.

SOCW 3300. SOCIAL WORK PROFESSIONALISM AND STUDENT SUCCESS. 3 Hours.
Equips students with skills and resources to prepare for academic and professional success. Empowers diverse students to identify their individual needs, reflect on opportunities for growth, determine what resources and self-care strategies are appropriate, recognize the faculty role in their development, and formulate a plan for an actively engaged and enriched experience from campus to career. Each class section has a Peer Academic Leader (PAL), who are students who have already taken the course and assist as a discussion leader for the class under the supervision of the instructor. This course is reserved exclusively for students planning to major in Social Work (e.g., BSW-Intended status) who have transferred from another institution; this fulfills the university requirement for UNIV 1101. This course or SOCW 1231 is required for admission to the BSW major. Co-requisite: SOCW 2361.

SOCW 3301. THEORIES OF HUMAN BEHAVIOR. 3 Hours.
This course explores, within the context of a strengths and empowerment perspective, theories of human behavior. For social work majors, it is strongly recommended that SOCW 2302 be taken before this course. Offered as AAST 3301 and SOCW 3301; credit will be granted in only one department. This course is required for Social Work Field Instruction and Seminar I (SOCW 4951).

SOCW 3303. SOCIAL WELFARE POLICY AND SERVICES. 3 Hours.
Examines how social goals are met by social welfare institutions. Conceptual schemes are developed for analyzing the structure of social welfare institutions and evaluating social welfare sub-systems. The social work profession is also examined in the context of the evolution and function of the contemporary American social welfare system. This course is required for Social Work Field Instruction and Seminar II (SOCW 4952).

SOCW 3305. SOCIAL WORK PRACTICE I. 3 Hours.
This course is designed to promote a critical evaluation of the history and philosophy of social work and its value base as well as teach basic practice concepts including cultural humility, interviewing, communication, and problem-solving to use with diverse individuals, families, and groups across practice settings. Students will be able to make connections between social work's historical roots and present-day social work practice and demonstrate understanding of what they bring to practice as individuals and how that may support or hinder their work with diverse individuals, families, and groups. This course is required for admission to the Bachelor of Social Work (BSW) program. Co-requisite: SOCW 2311 or SOCW 2361.

SOCW 3306. SOCIAL WORK PRACTICE III: MACRO PRACTICE. 3 Hours.
Examines generalist community and administrative practice roles and includes the perspectives of historical inequities and social injustice and the impact on communities and diverse groups, strengths, empowerment, evidence-based practice, and global practice along with the values of social justice, diversity, and participation. Specific attention is given to assessing community assets and needs. Prerequisite: SOCW 1231 OR SOCW 3300, SOCW 2361, SOCW 3305, SOCW 3307, and MATH 1308 or SOCW 2325 or other equivalent statistics course approved by the Director of Undergraduate Programs.
SOCW 3307. DIVERSE POPULATIONS. 3 Hours.
Introduction to theoretical, practical, and policy issues related to diverse populations. Historical, political, and socioeconomic forces are examined that maintain discriminatory and oppressive values, attitudes, and behaviors in society in diverse populations and in all levels of organizational behavior. This course is required for admission to the Bachelor of Social Work (BSW) program. Offered as AAST 3317, SOCW 3307 and MAS 3319; credit will be granted in only one department.

SOCW 3308. SOCIAL WORK RESEARCH METHODS. 3 Hours.
This course is designed to provide students with the fundamental skills to understand, use, and conduct research to advance the knowledge base of the social work profession and assess the effectiveness of social work interventions in generalist social work practice. The course addresses elements of the research process, quantitative and qualitative methods, research ethics, and approaches to data analysis. Particular attention will be given to the role of research with populations-at-risk, social and economic justice, and cultural diversity. Prerequisite: SOCW 1231 OR SOCW 3300, SOCW 3305, SOCW 3307, and MATH 1308 or SOCW 2325 or other equivalent statistics course approved by the Director of Undergraduate Programs.

SOCW 3309. SOCIAL WORK PRACTICE II. 3 Hours.
Theories and methodologies of social work assessment, case management, and other generalist intervention at the individual, family, and group levels in diverse settings through the lens of intersectionality of race, gender, sexuality, age educational level and other aspects of identity. Prerequisite: SOCW 1231 OR SOCW 3300, SOCW 2361, SOCW 3305, SOCW 3307, and MATH 1308 or SOCW 2325 or other equivalent statistics course approved by the Director of Undergraduate Programs.

SOCW 3310. ENVIRONMENTAL JUSTICE & GREEN SOCIAL WORK. 3 Hours.
This course examines how a variety of vulnerable or marginalized populations are impacted by environmental injustices, and explores ways that social service professionals can solve environmental justice issues on the micro, mezzo and macro level. Students will explore how issues such as climate change, extreme weather events and environmental toxins interact with health, mental health, children & youth, older adults, indigenous populations, food deserts, climate-forced migration, international conflict, environmental racism, and more and examine solutions including ecotherapy, climate policy, and community organizing. This course is also offered at the Master's level as SOCW 5310. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 3312. DISABILITY & SOCIAL WORK. 3 Hours.
Examines major themes in disability and social work. Topics include basic understandings of disability, lived experiences of people with disabilities, legal and policy perspectives, working with adults and children with a variety of disabilities, history of disability policy and disability rights, disability advocacy, and resources in the community, among others. Offered as DS 3312 and SOCW 3312; credit will only be granted in one department.

SOCW 3314. THE LATINA EXPERIENCE. 3 Hours.
A course on the social, cultural, and economic experiences of Latina and Latin American origin women in the United States. Offered as MAS 3314, SOCI 3314, SOCW 3314, GWSS 3314, and AAST 3321. Credit will be granted in only one department.

SOCW 3315. INTRODUCTION TO SUBSTANCE USE DISORDERS. 3 Hours.
This is an entry-level course that provides foundation-level social work students with the fundamental concepts of Substance Use Disorders (SUD) and the addictive process. Students will examine the prevalence and characteristics of substance use disorders and the impact of such disorders on the individual, family, and the community. Theories of addiction and application of these theories will be examined. Students will develop conceptual knowledge and self-awareness concerning the etiology of addiction, assessment strategies, and wellness strategies for facilitating optimal development and preventing SUD. The course will cover the prevalence of SUD varies among ethnic and cultural groups, between men and women, across the life span, and through different socio-economic levels. This course is taught as SOCW 3315 and SUT 3315. Credit will be granted only once.

SOCW 3318. SCREENING, ASSESSMENT, & ENGAGEMENT. 3 Hours.
Introduces screening and diagnostic instruments and techniques appropriate for determining whether a substance use disorder might exist. Explores the therapeutic alliance and practice engagement techniques taking into account intersections of race, gender, sexuality, age, educational level, and other aspects of identity. Students learn to assess suicide risk and a client's readiness for change. Students learn to diagnose substance use disorders and recognize intoxication, withdrawal, substance, and medication induced disorders. Offered as SUT 3318 and SOCW 3318. Credit will be granted only once. Prerequisite: Prerequisite OR Corequisite: SUT 3315 or SOCW 3315.

SOCW 3319. TREATMENT PLANNING, COLLABORATION & REFERRAL. 3 Hours.
This course addresses the clinical application of the biopsychosocial assessment in the development of a treatment plan. Potential treatment issues will be identified and a client-specific problem list will be developed. Individualized treatment goals will be established in collaboration with diverse clients. Client objectives and clinical interventions will also be developed. This course explores dynamics of the therapeutic alliance, and clinician-client collaboration within the context of a strengths and empowerment-based perspective. The student will gain insight into and an appreciation of collaboration, consultation, and referral throughout the continuum of care. Offered as SUT 3319 and SOCW 3319. Credit will be granted only once. Prerequisite: Prerequisite: SOCW 3318 or SUT 3318.

SOCW 3320. U.S. IMMIGRATION POLICY AND THE AMERICAN DREAM. 3 Hours.
This course focuses on diverse ethnic and racial identities in America through the examination of immigration to the United States, past and present, and the evolution of U.S. immigration policy. Topics include U.S. attitudes and policy responses to European, Asian, and Latin American immigration and to the incorporation of the descendants of African slaves and Native Americans. Emphasis on the decline of the melting pot idea and the incorporation of recent immigrants. Offered as MAS 3320, AAST 3319, and SOCW 3320. Credit will be granted only once.
SOCW 3321. SUBSTANCE USE TREATMENT. 3 Hours.
This course is the culmination of the fundamentals of substance use disorders, treatment planning, collaboration and referral, and substance use treatment. Students will learn and acquire the special skills necessary to assist individuals, families, and groups through the sequela of substance use and addiction. Focus on cognitive-behavioral therapy, motivational interviewing, 12-step programs, nutrition and exercise, meditation, and other alternative treatment options. Students will study treatment modalities that consider the social, cultural, and economic influences that shape the client's world view and substance use experience. Offered as SUT 3321 and SOCW 3321. Credit will be granted only once. Prerequisite: Prerequisite or corequisite: SUT 3319 or SOCW 3319.

SOCW 4191. CONFERENCE COURSE. 1 Hour.
Topics assigned on an individual basis covering personal research or study in designated areas. Prerequisite: Permission of the Director.

SOCW 4291. CONFERENCE COURSE. 2 Hours.
Topics assigned on an individual basis covering personal research or study in designated areas. Prerequisite: Permission of the Director.

SOCW 4310. SOCIAL WORK WITH CHILDREN AND FAMILIES. 3 Hours.
A critical examination of social policies, research, and practices impacting at-risk children and families in child welfare, child mental health, and school settings. Emphasis is placed on the role of the social work practitioner in enhancing the well-being of children and families in contemporary society. Prerequisite: SOCW 2302, SOCW 3301, and SOCW 3309.

SOCW 4314. INTIMATE PARTNER VIOLENCE. 3 Hours.
This course covers interdisciplinary theoretical frameworks for understanding and addressing intimate partner violence in diverse relationships, including critical feminism, psychological, and sociological models, as well as prevention and intervention practices that reflect a stance of cultural and critical humility. This course is also offered at the Master's level as SOCW 5314. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 4335. AGING IN AMERICAN SOCIETY. 3 Hours.
This course presents the major theories of aging, in the United States and across cultures, and explores the diverse factors of aging through the lens of intersectionality taking into account intersections of race, gender, sexuality, educational level and other aspects of identity. It includes various perspectives including psychological, biological, sociological, and spiritual. Students will examine current social and economic issues impacting older adults, such as aging & healthcare policy, living arrangements, caregiving, technology, and sexuality. Theories are integrated into practice thus providing students a sound foundation for social work practice with diverse older adults. Students who receive credit for this course in the undergraduate program (SOCW 4335) may not repeat the course at the Master's level (SOCW 5335). Prerequisite: SOCW 2302, SOCW 3301, and SOCW 3307.

SOCW 4344. HEALTH INSURANCE AND ACCESS TO CARE. 3 Hours.
Explores the history and underlying philosophy of managed care in health and social services, reviews interdisciplinary approaches and principles for understanding and critiquing health care systems, and covers current trends and practice issues. Assesses the potential for conflict between social work values and managed care systems. Builds skills for advancing health equity through administrative roles in managed care settings. This is offered at the MSW level as SOCW 5344. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 4350. SPECIAL ISSUES IN SOCIAL WORK. 3 Hours.
Relevant social work topics generated and explored in depth according to student and professional needs. The topic will be determined prior to registration. Prerequisite: Permission of the Director.

SOCW 4364. PERSONAL RELATIONSHIPS. 3 Hours.
Explores theoretical and empirical data on diverse personal relationships at the follow stages of relationship: initiation, maintenance, and termination. Identifies areas for intervention. Also offered as SOCW 5364 in the MSW program. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: SOCW 3301, SOCW 2302, and SOCW 3307. Co-requisite: Social Work Practice II (SOCW 3309 [formerly 3304]).

SOCW 4366. SEMINAR IN WOMEN'S ISSUES. 3 Hours.
Explores women's issues in human behavior theory, practice theory, and policy. Using an intersectional lens, the historical, political, and socioeconomic forces that maintain sexism among diverse groups are discussed. Environmental influences are examined in relation to social justice, social work values, knowledge, and skills. This course is also offered as SOCW 5366 in the MSW program. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: SOCW 3301, and SOCW 3307. Co-requisite: Social Work Practice II (SOCW 3309).

SOCW 4370. SOCIAL WORK IN THE SCHOOLS. 3 Hours.
The purpose of this course is to provide an overview of the various social work-related theoretical perspectives, models, and programs for intervention with diverse children and their families in the school setting. This includes skills in assessment, prevention, and intervention in providing services to students that are marginalized for numerous reasons including race, gender, skin color, religion, immigrant status, disability, sexual orientation, and socioeconomic status among other factors. Students will learn to use intervention skills that address each level of the ecosystem's perspective in schools. This is offered at the Master's level as SOCW 5370. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Prerequisite: SOCW 3309.
SOCW 4371. INEQUITIES AND INCARCERATION. 3 Hours.
This course surveys mass incarceration in the U.S. criminal justice system as a racialized and classist system of control. First, this course will contextualize the US criminal justice system, both historically and through global comparisons. Then students will be introduced to four broad content areas: entering the criminal justice system (school-to-prison pipeline and policing), who is detained (demographics and common mental health and substance use issues) and what they experience in detention (including covid-19 in jails and prisons), experiences and problems encountered when returning citizens reenter society, and trends in criminal justice reform advocacy (including problem-solving courts and advocacy efforts such as Black Lives Matter). Finally, the course considers the social work grand challenge of smart decarceration as a path towards reform specific to social workers. Also offered as SOCW 5371 in the MSW program. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 4391. CONFERENCE COURSE. 3 Hours.
Topics assigned on an individual basis covering personal research or study in designated areas. Prerequisite: Permission of the Director.

SOCW 4451. SOCIAL WORK FIELD SEMINAR I. 4 Hours.
Students will spend three hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. Students will discuss and reflect on their direct practice and macro practice experiences, how the Code of Ethics is applied at their agencies, what evidence-based best practices are utilized at their agencies, and how the planned change process is implemented at their agencies with their fellow students and Field Liaisons. For additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 4452. SOCIAL WORK FIELD SEMINAR II. 4 Hours.
Students will spend three hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. Students will discuss and reflect on their direct practice and macro practice experiences, how the Code of Ethics is applied at their agencies, what evidence-based best practices are utilized at their agencies, and how the planned change process is implemented at their agencies with their fellow students and Field Liaisons. For additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 4455. SOCIAL WORK FIELD SEMINAR BLOCK PART 1. 4 Hours.
Students will spend three hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. Students will discuss and reflect on their direct practice and macro practice experiences, how the Code of Ethics is applied at their agencies, what evidence-based best practices are utilized at their agencies, and how the planned change process is implemented at their agencies with their fellow students and Field Liaisons. For additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 4456. SOCIAL WORK FIELD SEMINAR BLOCK PART 2. 4 Hours.
Students will spend three hours a week in a seminar course to reflect and integrate social work knowledge, theory, and skills learned over the course of the program that they are applying in their field placement. Students will discuss and reflect on their direct practice and macro practice experiences, how the Code of Ethics is applied at their agencies, what evidence-based best practices are utilized at their agencies, and how the planned change process is implemented at their agencies with their fellow students and Field Liaisons. For additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 4451. SOCIAL WORK FIELD INSTRUCTION I. 5 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements For additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 4452. SOCIAL WORK FIELD INSTRUCTION II. 5 Hours.
Students will complete a minimum of 240 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements For additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 4455. SOCIAL WORK FIELD INSTRUCTION BLOCK PART 1. 5 Hours.
Students will complete a minimum of 480 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements For additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 4456. SOCIAL WORK FIELD INSTRUCTION BLOCK PART 2. 5 Hours.
Students will complete a minimum of 480 clock hours in a supervised field placement. Students will gain social work experience in an agency that will integrate generalist social work practice concepts into professional social work experience. Students will follow the NASW Code of Ethics and work with an anti-oppressive lens while in their field placements For additional information and requirements, see the Field website. Prerequisite: SOCW 2302, SOCW 3301, SOCW 3303, SOCW 3305, SOCW 3306, SOCW 3308, SOCW 3309, and 1 Social Work Elective.

SOCW 5301. HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I. 3 Hours.
Exploration of behavioral and social science knowledge of human behavior and development of diverse persons through the life course. Examines major systems in society: individual, group, family, and community; and the diversity of ethnicity, race, class, sexual orientation, and culture.
SOCW 5303. FOUNDATIONS OF SOCIAL POLICY AND SERVICES. 3 Hours.
Examines how social goals of diverse populations are met by social welfare institutions. Conceptual schemes are developed for analyzing the structure of social welfare institutions and evaluating social welfare sub-systems. The social work profession also is examined in the context of the evolution and function of the contemporary American social welfare system.

SOCW 5304. GENERALIST MICRO PRACTICE. 3 Hours.
This foundation level course introduces graduate students to both theory and methods for social work practice with diverse individuals, families, and small groups. It emphasizes a generalist perspective, beginning interviewing and relationship skills, problem assessment, goal setting, and contracting. Special attention is given to the common roles assumed by social workers (e.g. facilitator, broker, advocate) as well as development of self-reflection skills in relationship to the dynamics of intersectionality of those served.

SOCW 5306. GENERALIST MACRO PRACTICE. 3 Hours.
Examines generalist community and administrative practice roles and includes the perspectives of historical inequities and social injustice and the impact on communities and diverse groups, strengths, empowerment, evidence-based practice, and global practice along with the values of social justice, diversity, and participation. Specific attention is given to assessing community assets and needs.

SOCW 5310. ENVIRONMENTAL JUSTICE & GREEN SOCIAL WORK. 3 Hours.
This course examines how a variety of vulnerable or marginalized populations are impacted by environmental injustices, and explores ways that social service professionals can solve environmental justice issues on the micro, mezzo and macro level. Students will explore how issues such as climate change, extreme weather events and environmental toxins intersect with health, mental health, children & youth, older adults, indigenous populations, food deserts, climate-forced migration, international conflict, environmental racism, and more and examine solutions including ecotherapy, climate policy, and community organizing. This course is also offered at the undergraduate level as SOCW 3310. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level.

SOCW 5311. ADVANCED MICRO PRACTICE. 3 Hours.
Builds on the generalist perspective and the basic familiarity with social work processes (such as problem identification, assessment, contracting, plan implementation, and outcome evaluation) in the context of (1) existing psychosocial intervention modalities; (2) the particular client values, personal goals, treatment preferences, and characteristics such as racial, ethnic, gender, sexual orientation, age, and ability identities; and (3) selection of change modalities appropriate in relation to clients’ characteristics, social justice, and the client’s presenting issues. Required of all Direct Practice students. Prerequisite: Advanced Standing OR SOCW 5304 AND SOCW 5581 OR SOCW 5385.

SOCW 5312. COMMUNITY AND ADMINISTRATIVE PRACTICE. 3 Hours.
This course surveys theory and builds skills in roles associated specifically with understanding the complex history and multilayered intersections, e.g. discrimination, oppression, disparities or other lived experiences that influence diverse community practice (e.g. community/locality history and development, social planning, social action) and culturally inclusive and sensitive administrative practice (e.g. supervision, administration, diverse management and management systems). Students complete an advanced culturally informed assignment in community and/or organizational assessment and program design. Required of all CAP (Community and Administrative Practice) students. Prerequisite: Advanced Standing Student OR SOCW 5306 AND SOCW 5681 OR SOCW 5881.

SOCW 5313. RESEARCH AND EVALUATION METHODS IN SOCIAL WORK II. 3 Hours.
This course is designed to provide students with an understanding of and ability to analyze, monitor, and evaluate evidence informed interventions and human service programs. In this course quantitative and qualitative research methods and approaches are applied to the scientific and ethical evaluation of evidence informed interventions and human service programs. Research skills and knowledge are presented from the perspective of promoting diversity and social and economic justice in anti-oppressive research and evaluation of social work. Students seeking a Master of Social Work (MSW) must take either SOCW 5313 or SOCW 5323. Prerequisite: Advanced Standing OR SOCW 5308.

SOCW 5314. INTIMATE PARTNER VIOLENCE. 3 Hours.
This course covers interdisciplinary theoretical frameworks for understanding and addressing intimate partner violence in diverse relationships, including critical feminism, psychological, and sociological models, as well as prevention and intervention practices that reflect a stance of cultural and critical humility. This course is also offered at the Bachelor's level as SOCW 4314. Students who receive credit for this course in the undergraduate program may not repeat the course at the Master's level. Co-requisite: SOCW 5311. If the co-requisite is dropped, this course will be as well.
SOCW 5315. BRAIN AND BEHAVIOR. 3 Hours.
The focus of this course is on current advances in knowledge of the neurobiological underpinnings of human behavior and development, the interaction between those underpinnings and the social context and environment, the relevance to social work practice with individuals, families, groups, programs/organizations, and communities, and related assessment and intervention practice behaviors across several practice domains. The domains include human development, genetics, mental health and substance abuse, cognition, stress and trauma, and violence and aggression. The implications of neurobiological and environmental influences (including public health issues and health disparities) will be examined in terms of social justice, social work values, knowledge, and skills, as well as in terms of those populations who have historically been harmed by structural and systematic arrangement and delivery of social welfare services at the micro, mezzo, and macro levels. Co-requisite: SOCW 5311. Please note that if the co-requisite course is dropped, this one will also be.

SOCW 5316. STRESS, CRISIS, AND COPING. 3 Hours.
The impact of specific crises on individuals and families will be examined including the unique stresses, crises, and coping responses of diverse cultural and social identities as these relate to the stresses of oppression and social injustice and inequity. Variations in cultural wellness and health relative to stress and recovery will also be explored. Typical crises will include life-threatening illness, trauma, physical and mental disability, and death. Assessment and evaluation of an individual's coping ability and appropriate strategies for social work interventions will be studied. Differential therapeutics relative to ethnicity, cultural norms, inclusiveness, and access to wellness resources, will be infused into course assignments and discussion. Co-requisite: SOCW 5311. Please note that if the co-requisite is dropped, this will be also.

SOCW 5317. PALLIATIVE CARE. 3 Hours.
This course introduces students to palliative care and the unique opportunities and challenges it presents to social workers employed in those settings. While a complete review of palliative care would be impossible to achieve within the confines of this course, the materials are designed to introduce students to key palliative care philosophies, values, and practice considerations. Students will be challenged to think critically about how dying and death is constructed and supported in Western medical settings, and leave with an understanding of social workers' role in delivery compassionate and personalized care to clients who are at the end of their lives. Co-requisite: SOCW 5311. Please note that if the co-requisite course is dropped, this one will be also.

SOCW 5318. DEATH & DYING. 3 Hours.
This course will give students an overview of the principles of thanatology from anthropological, sociological, psychological, medical, historical, spiritual, cultural, and political perspectives and the role(s) that social work can play in helping individuals, families, and communities from diverse backgrounds. Using life course and life span approaches, course content will include personal death awareness, the integration of theoretical perspectives and evidence-based practice interventions in working with dying, death, and bereavement with emphasis on cultural and religious/spiritual perspectives, bioethical principles, and end-of-life decision making, social justice, and advocacy for the dying. Particular attention is given to the intersections of older adults with gender, race, sexuality, age, education level, and other aspects of identity. Therefore, the class content promotes individual self-reflection and discussion through the lens of diversity and intersectionality across the developmental life span and life course about the meaning of life and death and implications for social work practice. This dialog is a precursor to engagement with clients, caregivers, grieving persons, and health care personnel about sensitive and culturally diverse issues around the experience of dying and death. Co-requisite: 5311. Please note that if the co-requisite is dropped, this will be also.

SOCW 5319. SUICIDE PREVENTION AND INTERVENTION. 3 Hours.
This course will provide students with an overview of the public health problem of suicide, with specific attention to prevention, intervention, and postintervention. Students will gain an understanding of suicide epidemiology and underlying theory, as well as risk and protective factors for suicidal thoughts and behaviors. This course will familiarize students with evidence-based practices and ethical considerations with clients engaging in suicidal thoughts and behaviors. Students will learn about state and national strategies for suicide prevention, as well as policies related to suicide. Students will gain skills in assessment and management of suicide risk, intervention and treatment techniques with suicidal clients, and postintervention approaches with survivors of suicide loss at the individual, community, and national levels. Co-requisite: SOCW 5311. Please note that if the co-requisite course is dropped, this one will be also.

SOCW 5320. ADVANCED ADMINISTRATIVE PRACTICE. 3 Hours.
Focuses on selected topics, issues, and skills for effective social work administration. Content includes inclusive and anti-oppressive approaches to leadership, worker motivation, resource development, stakeholder engagement, interagency relations, and managing conflict and diversity in a climate of scarce resources. Prerequisite: SOCW 5312 or concurrent enrollment. Please note that if SOCW 5312 is dropped, this course will be dropped as well.

SOCW 5321. ADVANCED COMMUNITY PRACTICE. 3 Hours.
This course explores research, theory and evidence-based approaches to community practice. Content is focused on the development of skills for partnering with neighborhoods, communities, and groups to address community problems rooted in structural inequalities. Major topics include the politics of empowerment, mobilizing coalitions, locating resources, and mediating conflict. Prerequisite: SOCW 5312 or concurrent enrollment.

SOCW 5323. PROGRAM EVALUATION. 3 Hours.
This course is designed to provide students with an understanding of and ability to analyze, monitor, and evaluate evidence-informed interventions and human service programs. In this course, quantitative and qualitative research methods and approaches are applied to the scientific and ethical evaluation of evidence-informed interventions and human service programs. Research skills and knowledge are presented from the perspective of promoting diversity and social and economic justice in the evaluation of social work. Prerequisite: SOCW 5308 or Advanced Standing.
SOCW 5324. SOCIAL WORK SUPERVISION. 3 Hours.
This course introduces the culturally diverse roles, functions, and contexts of social work supervision between the supervisor and supervisee. Covers culturally sensitive administrative and clinical perspectives on the social work supervisor as a manager, educator, mentor, mediator, and leader in diverse human service organizations. Co-requisite: SOCW 5311 or SOCW 5312. Please note if co-requisite is dropped, this course will be dropped as well.

SOCW 5325. BUDGETING AND FINANCIAL MANAGEMENT. 3 Hours.
This course provides a basic overview of financial management applied specifically to human service agencies. Grounded in a historical lens that examines power relationships in human service financial management, this course emphasizes basic concepts and skill building in budgeting and fund raising; accounting principles; financial statements, and computerized financial information systems. Special emphasis is given to the role of participatory approaches in resource allocation and distribution for human services. Co-requisite: SOCW 5312. Please note that if the co-requisite is dropped, these course will be dropped also.

SOCW 5326. GRANT PROPOSAL DEVELOPMENT SEMINAR. 3 Hours.
Grant proposal development is a fundamental method of accessing funds and developing new programs in the social service arena. In this class, students will identify key funding opportunities in their fields of interest and will write a proposal using an actual federal application and a foundation funding announcement. The majority of the course will be devoted to the development of the skills and knowledge necessary to produce a competitive proposal. These include, but are not limited to: a) needs and capacities assessment, b) program development, c) strategic planning, d) budgeting, e) evaluation, and f) community collaboration. Co-requisite: SOCW 5312. If the co-requisite is dropped, this one will be as well.

SOCW 5327. HUMAN BEHAVIOR IN MACRO ENVIRONMENTS. 3 Hours.
Offers advanced students the opportunity to study diverse people's behavior within large and complex social settings including: natural helping networks and ontological communities, organizations, and bureaucracies, and social and political movements. Prerequisite: Advanced Standing OR SOCW 5301 and SOCW 5307.

SOCW 5328. ADVOCACY AND SOCIAL POLICY. 3 Hours.
Politics are key to developing equitable social policy. Students learn theory and skills to impact social and distributive justice at local, state, and national levels. Examines the role of the social work profession in politics. Prerequisite: SOCW 5303.

SOCW 5329. POVERTY, INEQUALITY AND SOCIAL POLICY. 3 Hours.
This course examines the nature and extent of poverty and inequality in the United States, their causes and consequences, and the debate concerning the role of government in providing anti-poverty programs. Many points of view concerning social and distributive justice are presented, from the radical left to radical right. Prerequisite: SOCW 5303.

SOCW 5330. DIRECT PRACTICE WITH AGING. 3 Hours.
Course presents an overview of current issues, trends, and practice in the care, treatment, and delivery of social services to diverse older adults and their families. Students learn practice procedures designed to equip them with the skills needed for effective social work practice, review major theories on aging, as well as evaluate needs and gaps in services to diverse older adults and their families. Particular attention is given to the intersections of older adults with gender, race, sexuality, age, education level, and other aspects of identity. Co-requisite: 5311. Please note if the co-requisite is dropped, this course will be dropped as well.

SOCW 5332. AGING AND SOCIAL POLICY. 3 Hours.
